- reading and explaining complex and formal documents, including legislation and codes of ethics, and applying them to work practices
- communicating with others involving exchanges of complex oral and written information
- applying environmental and WHS procedures and promoting their use by others

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- legislation relating to the public sector including WHS and environment
- regulations, guidelines, policy, practices
- public sector codes of ethics and conduct
- government processes and practices

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPLEGN401A Encourage compliance with legislation in the public sector

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the competency to encourage others (colleagues or those supervised) in the workplace to comply with legislation. It includes assisting others to comply with legislative requirements, and taking action on non-compliance.

In practice, encouraging compliance with legislation is demonstrated in the context of other generalist or specialist work activities such as using government processes, delivering and monitoring client services, using resources, preparing quotations, conducting interviews, awarding contracts etc.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assist others to comply with legislative requirements	1.1 Knowledge of the range of ***legislation and guidelines*** relating to the public sector workplace is regularly updated to ensure currency. 1.2 The way various pieces of legislation are integrated to provide a legislative framework for public sector work and the key requirements of each piece of legislation are confirmed and conveyed to ***others*** using language and examples suited to their individual needs. 1.3 Own work practices and procedures are used to provide a consistent model of compliance with legislative requirements relating to the public sector work environment. 1.4 The ***consequences of non-compliance*** with public sector legislation are identified and conveyed to others using language and examples suited to individual needs. 1.5 Others are assisted to locate and access current information on legislation and guidelines. 1.6 Others are encouraged to identify and obtain advice on apparently ***conflicting legislative requirements*** in accordance with organisational policy and procedures.
2. Act on non-compliance	2.1 Actions that might constitute breaches of legislation are identified and discussed with others in accordance with organisational requirements. 2.2 Possible breaches of legislation are acted upon or referred promptly to an authorised person/body in accordance with organisational procedures. 2.3 ***Inadequacies in workplace procedures*** which may contribute to non-compliance are reported and addressed in accordance with organisational procedures.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- accessing and reading complex and formal documents such as legislation and related materials
- assisting others to apply legislation to work practices and to identify inappropriate conduct
- using guidelines to effectively administer legislative requirements
- exercising discretion in accordance with legislation and guidelines
- communicating with others involving exchanges of complex oral/written information
- using technology to access legislative requirements
- responding to diversity, including gender and disability
- applying environmental and occupational health and safety procedures and encouraging others in their application

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- the range of legislation relating to the public sector (including occupational health and safety, and specific enabling legislation relating to the business) and the key requirements of each
- public sector codes of ethics/conduct
- consequences of non-compliance
- procedures for acting on and reporting possible breaches of legislation
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to

© Commonwealth of Australia, 2025 Public Skills Australia

increase the efficiency and realism of the assessment process include, but are not limited to:

- PSPETHC401A Uphold and support the values and principles of public service
- PSPGOV402B Deliver and monitor service to clients
- PSPGOV403B Use resources to achieve work unit goals
- PSPGOV407B Provide a quotation
- PSPGOV422A Apply government processes
- PSPPROC409A Receive and select offers
- PSPREG407B Produce formal record of interview

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- compliance with legislation encouraged in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- public sector legislation, regulations and guidelines
- procedures and protocols
- scenarios and case studies to capture the range of situations likely to be encountered when assisting others to comply with legislation

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when encouraging compliance with legislation in the public sector, including coping with difficulties, irregularities and apparently conflicting legislative requirements
- compliance with legislation encouraged in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people

© Commonwealth of Australia, 2025 Public Skills Australia

- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Legislation and guidelines may relate to:

- public sector standards:
  - codes of conduct/ethics
  - guarantee of service
  - legislated standards
  - State/Territory/Commonwealth/organisational standards
  - technical/industrial standards
  - professional standards
  - industry competency standards
  - anti-corruption legislation
  - whistleblowers' protection
- public sector employment:
  - employee relations
  - chief executive officer's instructions
  - Commissioner's instructions
  - public sector notices

© Commonwealth of Australia, 2025 Public Skills Australia

- workplace environment:
  - equal employment opportunity
  - affirmative action
  - workplace diversity
  - anti-discrimination
  - workplace harassment
  - occupational health and safety
  - duty of care
  - security, storage, handling and classification of documents
- financial management and accountability:
  - Treasurer's instructions
  - contractual obligations
- transparency:
  - freedom of information
  - professional reporting
  - accountability
  - fair trading
- business and community:
  - privacy
  - trade practices
  - competition
  - road transport legislation
- information and records management standards and legislation
- the organisation's enabling legislation, regulations
- aspects of common law, criminal law, contract law, employment law and administrative law, including judges' rules
- international legislation/codes of behaviour

Others may include:

- colleagues
- supervised staff
- contractors

Consequences of non-compliance may include:

- for individuals:
  - counselling
  - disciplinary action
  - transfer, demotion, dismissal
  - legal liability
  - fine
- external consequences, for example:

© Commonwealth of Australia, 2025 Public Skills Australia

- to clients
- to the organisation's reputation

Conflicting legislative requirements may include:

- apparent contradiction between statutes
- apparent conflict between statutes and policy requirements
- contradictions between different policy requirements
- contradictions within a single piece of legislation

Inadequacies in workplace procedures may include:

- insufficient financial/other controls
- insecure Internet/fax access
- non-auditable records processes
- ambiguous guidelines
- no guidelines
- unnecessary complexity
- use of non-current legislation

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Model and encourage compliance with legislative requirements	1.1 Personal work practices are used to provide a consistent model of compliance with current public sector ***legislation and guidelines***.
	1.2 Responses to staff enquiries about the legislative requirements of the workplace are provided in a timely, consistent and constructive manner.
	1.3 The ***consequences of non-compliance*** relating to a range of legislation are explained to staff using language and materials suited to their levels of experience, learning styles and individual needs.
	1.4 ***Compliance strategies*** are used to encourage compliance with legislation, policies and guidelines in accordance with the situation at hand.
2. Monitor compliance with legislative requirements	2.1 Compliance with legislative requirements is monitored in accordance with organisational procedures.
	2.2 Compliance issues are resolved or referred in accordance with organisational policy and procedures.
	2.3 ***Inadequacies in workplace procedures*** which may contribute to non-compliance are raised promptly and addressed in accordance with organisational procedures.
	2.4 Compliance with legislative requirements is reported on, in accordance with organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2025 Public Skills Australia

Skill requirements

Look for evidence that confirms skills in:

- applying research and evaluation
- assisting other people in areas such as conflict resolution, coaching, problem solving
- reading and explaining complex and formal documents such as legislation and codes of ethics and applying them to work practices
- communicating with others involving exchanges of complex oral and written information
- responding to diversity, including gender and disability
- using technology skills to access legislation and guidelines electronically
- applying environmental and occupational health and safety procedures and promoting their use by others

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation relating to the public sector (including occupational health and safety and environment)
- regulations, guidelines, policy, practices
- public sector codes of ethics/conduct
- government processes
- governance practices
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPMGT001 Manage resources

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPMNGT602B Manage resources. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to manage resources in accordance with planned business strategies. It includes analysing resource requirements, developing resource plans, allocating resources, reviewing and reporting on resource usage.

This unit applies to those involved in the management of organisation resources.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously with management responsibilities, performing complex tasks in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Analyse resource requirements	1.1 Develop resource bids in line with outputs identified in business plans. 1.2 Consult key stakeholders in determining the nature and level of resources required. 1.3 Analyse resource requirements to identify proposed costs and benefits. 1.4 Identify opportunities to share resources across business units within the organisation.
2. Develop resource plans to support achievement of business unit objectives	2.1 Develop resource plans that detail the acquisition and allocation of resources, and the relationship to business strategies, contingencies, plans, programs and processes. 2.2 Identify internal resourcing capabilities and external resourcing requirements. 2.3 Identify procedures for the evaluation of resource allocation. 2.4 Include processes for managing changing government priorities. 2.5 Obtain approval from senior management.
3. Allocate resources	3.1 Manage resource allocation to enable achievement of business unit objectives. 3.2 Negotiate and obtain resources within required timeframe. 3.3 Develop and implement systems to enable accurate monitoring and review of resource usage. 3.4 Incorporate efficient use of technology into work practices.
4. Review and report on resource usage	4.1 Develop and implement procedures to review resource allocation against business unit objectives. 4.2 Monitor compliance with program and project budgets and recommend and apply corrective action where necessary. 4.3 Prepare reports that indicate the level of performance achieved and any action taken to adjust or rectify procedures in meeting service and product delivery standards.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Assessment Requirements for PSPMGT001 Manage resources

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, regulations, policies, procedures and guidelines relating to resource management in the public sector
- using effective consultation and negotiation with stakeholders
- writing reports requiring reasoning and precision of expression
- communicating using complex exchange of oral information
- applying budgeting and financial management

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- financial management and budgetary processes in the organisation
- business strategies
- risk management concepts
- organisational goals, policies and procedures
- jurisdictional legislation and guidelines applicable to resource management, including work health and safety and environment

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPMNGT614A Facilitate knowledge management

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers management of knowledge and information in the business unit to improve productivity and organisational efficiency, promote innovation and meet business unit goals. It includes establishing the organisational context for knowledge management, developing capability, facilitating knowledge management, and integrating aspects of knowledge management with information/records management.

In practice, facilitation of knowledge management may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government systems, managing change, managing diversity, facilitating workforce effectiveness, etc.

Related units in the Information competency theme in the *Working in Government* Competency field are:

- PSPGOV206B Handle workplace information
- PSPGOV307B Organise workplace information
- PSPGOV406B Gather and analyse information
- PSPGOV504B Undertake research and analysis

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish the organisational context for knowledge management	1.1 The organisation's history, culture, functions, strategic direction, performance and ***knowledge*** resources are identified. 1.2 Organisational strategies and goals that may be assisted by the development of organisational capability in ***knowledge management*** are identified. 1.3 The current ***knowledge management position*** of the organisation is assessed and the ***strengths and weaknesses*** of its knowledge resources and activities are determined. 1.4 Consultation with ***stakeholders*** is undertaken to raise knowledge and awareness of knowledge management and to establish knowledge management ***goals*** for the business unit and/or the organisation. 1.5 The cultural aspects of knowledge and knowledge management are identified and explored in the context of the organisational environment.
2. Develop capability in knowledge management	2.1 The ***benefits*** of knowledge management are identified and promoted to build an environment where these benefits may be realised. 2.2 Knowledge management ***initiatives*** are developed and aligned with the overall organisational strategy and contribute to

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	business unit goals.
	2.3 Initiatives are developed to build long-term capability in knowledge management and a culture of sharing knowledge and creating new knowledge in the organisation.
	2.4 Knowledge management initiatives are focused on the management and use of tacit knowledge in the business unit and creating new knowledge, as well as the capture and sharing of explicit knowledge.
	2.5 Management and stakeholder support is built throughout knowledge management initiatives to ensure immediate successes are transformed into ongoing benefits.
3. **Facilitate knowledge management**	3.1 Strategies are implemented to facilitate the development of strong and trusting culturally diverse networks where knowledge can be created and shared.
	3.2 ***Methods for creating, discovering and acquiring*** knowledge are facilitated in the business unit.
	3.3 ***Methods and systems for capturing and storing*** knowledge are promoted in accordance with ***legislation, policy and procedures***.
	3.4 ***Methods and systems for presenting, distributing and sharing*** knowledge are promoted.
	3.5 ***Activities for revising and disposing of*** knowledge are facilitated in accordance with legislation, policy and procedures.
4. **Integrate aspects of knowledge management with information management**	4.1 Processes for the management of explicit knowledge are integrated with the organisation's information management processes/systems to ensure efficiency and to provide wide access to explicit knowledge.
	4.2 Explicit knowledge is recorded and stored in accordance with organisational and public sector standards for information/records management.
	4.3 Structuring, maintaining and linking of explicit knowledge to related organisational ***information*** is facilitated in accordance with organisational requirements.
	4.4 Knowledge and information are managed to improve their integration and use to meet business unit goals.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2025 Public Skills Australia

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to knowledge management and information management
- showing leadership and taking risks in the context of knowledge management
- applying organisation and resource management techniques and methods
- building strong and trusting networks
- facilitating groups and learning
- communicating with a diverse range of stakeholders to build knowledge management capacity
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of knowledge and information management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to knowledge management and information management, such as privacy, freedom of information
- principles of knowledge management
- Australian Standard AS 5037(Int)-2003 Knowledge management
- tools and techniques related to introduction of knowledge management initiatives
- intersection of knowledge management with other disciplines, such as organisational learning, information management/technology, human resources management, communications
- cultural aspects of knowledge and knowledge management
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of knowledge and information management

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*

© Commonwealth of Australia, 2025 Public Skills Australia

- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC601B Maintain and enhance confidence in public service
  - PSPGOV601B Apply government systems
  - PSPGOV602B Establish and maintain strategic networks
  - PSPLEGN601B Manage compliance with legislation in the public sector
  - PSPMNGT615A Influence workforce effectiveness
  - PSPMNGT602B Manage resources
  - PSPMNGT604B Manage change
  - PSPMNGT605B Manage diversity
  - PSPMNGT608B Manage risk

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of knowledge and information in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to knowledge management and information management
- current theory and practice in knowledge management
- Australian Standard AS 5037(Int)-2003 Knowledge management
- case studies and workplace scenarios to capture the range of situations likely to be encountered when managing knowledge and information

Where and how to assess evidence

Valid assessment of this unit requires:

- an environment that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing knowledge and information, including coping with difficulties, irregularities and breakdowns in routine
- management of knowledge and information in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as

© Commonwealth of Australia, 2025 Public Skills Australia

literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Knowledge is:

- a body of understanding and skills that is constructed by people
- increased through interaction with information (typically from other people)
- tacit - residing in the mind and may include aspects of culture or 'ways of doing things'
- explicit - when recorded as information in a document, image, film clip or some other medium AS 5037(Int)-2003
- also sometimes identified as 'expert' knowledge, or

© Commonwealth of Australia, 2025 Public Skills Australia

	'entrepreneurial' knowledge • affected by experience
Knowledge management is:	• a multi-disciplined approach to achieving organisational objectives by making best use of knowledge • involves the design, review and implementation of both social and technological processes to improve the application of knowledge in the collective interest of stakeholders AS 5037(Int)-2003
The organisation's current position in relation to knowledge management may include:	• low literacy in knowledge management and no trust or networks developed (new organisation) • low literacy in knowledge management but well-networked staff (existing organisation) • high literacy in knowledge management but no trust or networks developed (new organisation) • high literacy in knowledge management and well-networked staff (existing organisation)
Strengths and weaknesses may relate to:	• people • process • technology • content

Stakeholders may include:	• all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services, including:
	  • boards of management
	  • clients
	  • community organisations
	  • contractors
	  • employees at all levels of the organisation
	  • government
	  • Ministers
	  • other public sector organisations
	  • service providers
	  • suppliers
	  • the public
	  • union and association representatives
	  • volunteers

Knowledge management goals may include:	• new knowledge creation • improving knowledge utilisation • developing a community of practice in knowledge management with strong social networks

© Commonwealth of Australia, 2025 Public Skills Australia

Benefits of knowledge management may include:	• improved decision making • improved performance • improved productivity and organisational efficiency • retaining corporate knowledge and organisational learning • improving networking, trust and morale • increased innovation • increased motivation
Knowledge management initiatives may include:	• development of knowledge management policy/strategy • knowledge management projects • mentoring in knowledge management • electronic collaboration • tools and approaches to remedy weaknesses in knowledge management or build on strengths
Methods for creating, discovering and acquiring knowledge may include:	• meetings to foster innovation • employing staff or consultants with knowledge/skills not currently in the organisation for the purpose of knowledge transfer • research outside the organisation • through publications • analysis of existing and archived information • auditing/mapping of information • consulting staff in similar organisations

Methods and systems for capturing and storing knowledge may include:	• traditional information management systems, such as:
	  • files
	  • books
	  • journals
	  • documentation and archives
	  • intranets
	  • portals
	  • web sites
	  • databases
	  • electronic documents
	• ways of making tacit knowledge visible and available (without making it explicit and storing as above), such as advertising available expertise, providing help desk facilities
	• capturing learning from past activities
	• openness to change
	• drive for continual improvement

Legislation, policy and	• State/Territory and Commonwealth legislation, regulations and guidelines relating to knowledge management and

© Commonwealth of Australia, 2025 Public Skills Australia

procedures may include:	information management, such as privacy, freedom of information, confidentiality, security, etc • public sector management acts • codes of ethics • codes of conduct • public sector standards, such as fraud control, security management, risk control • disaster recovery
Methods and systems for presenting, distributing and sharing knowledge may include:	• information management systems • intranets • files • databases • work processes where explicit knowledge is formally distributed • face-to-face meetings • providing leadership to encourage risk taking • development of trusted social networks for knowledge exchange
Activities for revising and disposing of knowledge may include:	• processes to authenticate and update knowledge • processes to ensure that out-of-date or incorrect knowledge (especially tacit knowledge) is not used • processes for destruction of explicit knowledge that follow records management standards for destruction of records and public sector/legal requirements
Information is:	• data in a context to which meaning has been attributed AS 5037(Int)-2003

PSPMNGT615A Influence workforce effectiveness

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the competency to ensure the effectiveness of the workforce, whether staff or contractors, in promoting the attainment of strategic objectives. It includes providing leadership to individuals and work teams, creating a cooperative work environment, capitalising on workplace emotions, motivating the workforce to achieve quality results, and delegating work to achieve strategic objectives, and managing up.

In practice influencing workforce effectiveness occurs in the context of other generalist or specialist work functions such as managing performance, managing diversity, managing change, managing client service.

This unit is one of a series of 4 units of competency relating to working with others, located in the Competency fields of *Working in Government* and *Management*. Related units are:

- PSPGOV302B Contribute to workgroup activities
- PSPGOV404B Develop and implement work unit plans
- PSPGOV511A Provide leadership

This unit replaces *PSPMNGT601A Facilitate workforce effectiveness*. The units are not equivalent as elements dealing with emotional intelligence and managing up have been added.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Provide leadership to individuals and work teams**	1.1 The vision and strategic goals of the organisation that impact on the work area are identified and promoted. 1.2 ***Workforce members*** are regularly consulted on business objectives, plans and operational issues to minimise role ambiguity and uncertainty. 1.3 Roles, functions, responsibilities and work goals are defined in accordance with organisational requirements, and are communicated and agreed. 1.4 Opportunities are provided for workforce members to clarify aspects of particular tasks, resolve issues and seek feedback or further direction. 1.5 Encouragement is provided to develop new and innovative practices, procedures, processes, technologies and strategies in line with corporate values, vision and goals. 1.6 ***Leadership*** is provided appropriate to changing priorities and situations and takes account of the specific needs of a diverse workforce.
2. **Create a cooperative work environment**	2.1 Cooperation in the work environment is actively facilitated through balanced and fair work allocation and recognition of all contributions.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.2 Teams and individuals are encouraged to find styles of working which are consistent both with team and individual competencies, preferences and ***business unit*** objectives.
	2.3 Conflict management strategies are used to facilitate a cooperative work environment.
	2.4 Cooperative and productive relationships with individuals and teams are established.
	2.5 Leadership style and guidance that take into account the differing needs and background of a diverse workforce are used.
3. **Monitor and respond to workplace emotions**	3.1 Emotional ***strengths*** and triggers are ***identified*** for self and ***others in the workplace***, and communication, client service or work allocations are tailored to take account of these.
	3.2 Self-reflection and feedback is used to identify the effect on others of own emotions, and emotional control is exerted to model positive workplace behaviour.
	3.3 Opportunities are provided for others to express their thoughts and feelings, and ***emotions*** are taken into account in decision making to maintain a positive emotional climate in the workplace.
	3.4 Assistance is provided to others to identify the effect of emotions in the workplace and to ***develop*** and use their own ***emotional intelligence*** to build productive relationships and maximise workplace outcomes.
4. **Motivate the workforce to achieve quality results**	4.1 Ways to motivate a diverse workforce are explored and matched to individual needs.
	4.2 Opportunities are identified for individuals to develop competencies required to meet work objectives.
	4.3 Individuals' career development requirements are recognised and balanced with team objectives.
	4.4 Feedback that is prompt, consistent and constructive and ongoing is provided on performance.
	4.5 Achievements are promoted and rewarded in a way which openly acknowledges the contribution of individuals and teams.
	4.6 ***Team building strategies*** are applied to strengthen individual and team commitment to organisational vision and work unit goals.
5. **Delegate work to achieve business unit strategic objectives**	5.1 Work is delegated in accordance with individual competencies or as development opportunities arise, and sufficient information is communicated, resources allocated and support provided to enable tasks to be completed successfully.
	5.2 Responsibilities are delegated while still accepting accountability for their success/failure.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	5.3 Mechanisms for monitoring progress in achieving work goals are established and implemented in accordance with organisational policy and practices.
	5.4 Areas for improvement are determined collaboratively and improved processes/strategies are implemented.
	5.5 Tasks are delegated effectively to facilitate the attainment of business unit objectives and the continuous improvement of business processes.
	5.6 Up-to-date and accessible record of delegations is maintained in accordance with organisational policy and procedures.
6. **Manage up**	6.1 People and influences outside the immediate work environment with the potential to affect work priorities, outcomes and resources are identified.
	6.2 Role relationships and responsibilities for managing up are analysed.
	6.3 Strategies are developed and implemented to ensure executives consider the operational consequences of policy changes.
	6.4 Strategies are used to engage support for public sector activities and ensure sufficient resources are provided to implement initiatives.
	6.5 Self-evaluation and feedback from ***others*** on own performance is used to continuously improve performance and outcomes.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- delegating work to others
- counselling and resolving conflict in teams
- using team building strategies
- using facilitation, negotiation and consultation requiring exchanges of complex oral information
- using consensual decision making skills
- keeping check of emotions when challenges arise, maintaining composure, perceiving the emotional motivators that drive individuals and groups in the workplace and engaging those motivators, where appropriate, to optimize organisational performance

© Commonwealth of Australia, 2025 Public Skills Australia

- using a variety of words and language structures to explain complex ideas to different audiences
- interpreting and explaining complex, formal documents and assisting others to apply them in the workplace
- responding to diversity, including gender and disability
- applying occupational health and safety strategies relevant to managing and working with others in a public sector workplace

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- organisational goals, policies and procedures
- equal employment opportunity, equity and diversity principles
- the relationship between effective human resource functions and the attainment of business unit objectives
- human resource policies and practices
- emotional intelligence principles and strategies
- group processes and facilitation techniques
- team building strategies
- the organisation's career and human resource development strategies, programs and plans
- conflict resolution strategies
- jurisdictional legislation applicable to management and human resource management functions
- occupational health and safety issues relevant to managing and working with others in a public sector workplace
- environmental and sustainability issues relevant to managing and working in a public sector environment

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC601B Maintain and enhance confidence in

© Commonwealth of Australia, 2025 Public Skills Australia

public service
- PSPGOV601B Apply government systems
- PSPGOV602B Establish and maintain strategic networks
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPPOL603A Manage policy implementation

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- workforce effectiveness influenced in a range of (3 or more) contexts (or occasions, over time) such as working with staff, clients and contractors

Resources required to carry out assessment

These resources include:

- procedures and protocols
- public sector policies and legislation such as those dealing with:
- human resource management and development
- workforce capability
- case studies and workplace scenarios to capture the range of situations likely to be encountered when influencing workforce effectiveness

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when facilitating workforce effectiveness, including coping with difficulties, irregularities and breakdowns in routine
- workforce effectiveness influenced in a range of (3 or more) contexts (or occasions, over time) such as working with staff, clients and contractors

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women

© Commonwealth of Australia, 2025 Public Skills Australia

- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Workforce members may include:	• employees • consultants • external contractors • job rotation staff • trainees
Leadership refers to:	• the process of influencing others to engage in work behaviours that facilitate the attainment of the business unit's strategic objectives
Business unit may refer to:	• a program • sub-program • cost centre • area • division

© Commonwealth of Australia, 2025 Public Skills Australia

- branch
- production unit or section located within the organisation

Emotional strengths may include ability to:

- monitor and control negative emotions
- recognise and respond to others' emotional states
- see beyond an immediate emotional reaction to the real cause, rather than responding to the emotions on face value

Identification of emotions may need to take account of:

- the varying cultural expressions of emotion

Others in the workplace may include:

- management
- staff
- clients
- contractors

Emotions may include:

- anger
- anxiety
- apprehension
- caring
- confidence
- depression
- elation
- enthusiasm
- excitement
- fear
- happiness
- inadequacy
- joy
- nervousness
- over-confidence
- pride
- stress
- under-confidence
- unhappiness

Development of emotional intelligence may occur through:

- mentoring
- shadowing
- coaching
- training
- simulation

© Commonwealth of Australia, 2025 Public Skills Australia

Emotional intelligence is:	• widely recognised as the ability of an individual to monitor their own and others' emotions in a social or work environment, to discriminate among the emotions and to use the information to guide their thinking and actions • characterised by self-awareness (personal), self-management (personal), social awareness (social) and relationship management (social)
Team building strategies may include:	• defining and clarifying objectives/work area plans • strengthening communication processes • clarifying ground rules and behavioural expectations • fostering creativity • offering constructive feedback • providing facilitated meetings • recognising achievements
Others may include:	• superiors • reportees

PSPPCM001 Carry out basic procurement

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPPROC303A Carry out basic procurement. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to plan and undertake basic procurement of goods or services and receive goods or services.

This unit applies to those working in public sector roles whose duties include simple purchasing of low-value goods or services, and coordinating the end-to-end process.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, and as part of a team, while performing routine tasks, in familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Procurement

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan for basic procurement of goods or services	1.1 Confirm procurement requirements and limit of delegated authority. 1.2 Determine the most suitable option for acquiring goods or services considering value for money. 1.3 Identify the approval process. 1.4 Conduct risk planning for the procurement activity.
2. Undertake procurement	2.1 Obtain quotes and approvals for procurement of goods or services with any conflict of interest declared and resolved. 2.2 Assess and select suppliers or service providers in line with the organisation's financial management system and on the basis of best value for money. 2.3 Initiate and conduct procurement in accordance with organisation's probity and governance requirements.
3. Receive goods or services	3.1 Implement quality assurance processes to ensure goods or services meet procurement specifications. 3.2 Resolve non-compliance with specifications within limits of own authority. 3.3 Confirm receipt of goods or services and process accounts for payment. 3.4 Maintain records and meet reporting obligations to provide an audit trail.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPPROC303A Carry out basic procurement.

Assessment Requirements for PSPPCM001 Carry out basic procurement

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion:

- writing and conveying procurement requirements
- consulting and negotiating with providers
- assessing procurement options and selecting the most suitable option
- assessing goods and services against specifications

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- Commonwealth, state/territory and local government procurement legislation, policies and procedures, including environmental purchasing guidelines
- conflict of interest, gifts and inappropriate relationships with providers relating to procurement of goods and services
- procurement options and methods
- coping with difficulties, irregularities and breakdowns in routine in 3 or more contexts or occasions

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Interpret procurement requirements	1.1 Consult with stakeholders to determine whether viable alternatives to procurement exist that address identified business need, to define and clarify requirements, and to justify the procurement decision. 1.2 Conduct scoping of procurement requirements identifying outcomes, objectives and logistics or supply chain factors. 1.3 Conduct market analysis to identify factors that may impact on procurement decisions. 1.4 Confirm procurement approvals and appropriations for whole-of-life of the activity. 1.5 Access information on sources of supply to determine possible providers and identify and resolve any conflict of interest. 1.6 Specify planned provider contract arrangements. 1.7 Investigate issues and opportunities for integration into procurement activity.
2. Plan procurement activities	2.1 Outline procurement requirement from transition to close out. 2.2 Plan opportunities to obtain stakeholder input at all stages of the procurement process. 2.3 Confirm resource requirements and nominate responsible authorities. 2.4 Include strategies for briefing potential bidders when required, and ensure they are practical and meet probity requirements of fairness and impartiality, public sector standards and organisational protocols.
3. Manage procurement plans	3.1 Develop and approve procurement documentation and procurement plan which contains relevant detail about the procurement process and desired business outcomes. 3.2 Seek stakeholder input at all stages during the development of the procurement plan. 3.3 Consider probity risks in the procurement process. 3.4 Communicate approved procurement plan or strategy to stakeholders.

Assessment Requirements for PSPPCM004 Plan procurement

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- consulting with stakeholders
- writing a procurement requirement
- analysing issues relating to procurement need
- making comparisons, justifying a point of view and providing supporting evidence
- researching issues relating to procurement need
- planning issues relating to procurement need
- learning skills to keep up-to-date with relevant procurement legislation, policies and procedures

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- Commonwealth, state or territory, and local government legislation, policies, practices and guidelines relating to contract management, including environmental purchasing and corporate social responsibility guidance
- organisational procurement policies, practices and approval processes
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to procurement
- life cycle costs
- whole-of-life considerations
- technical knowledge or subject matter expertise in the goods or services being procured

© Commonwealth of Australia, 2025 Public Skills Australia

- aspects of law of contract, laws of tort, trade practices law, commercial law and other legislation relating to receipt and evaluation of offers, negotiation and award of contracts

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Specify procurement requirement	1.1 Undertake scoping of requirement to identify outcomes, objectives and practical requirements. 1.2 Prepare statement of requirement. 1.3 Consider needs of clients, end users and other stakeholders and incorporate into statement of requirement. 1.4 Ensure procurement outcome is fair to, and achievable by, potential providers. 1.5 Specify planned provider contract arrangements, standards of performance and codes of practice, incentives, disincentives and performance measures.
2. Develop request for offers	2.1 Develop and clarify request for offers and contractual conditions suitable for procurement activity with clients, providers and/or experts as necessary. 2.2 Develop and clarify contractual conditions suitable for procurement activity with clients, providers and/or experts as necessary. 2.3 Obtain input on content of request for offer documents and proposed contractual conditions from market according to probity requirement of impartiality when possible and appropriate. 2.4 Obtain approvals to approach marketplace. 2.5 Maintain records relating to documenting request, and seeking, processing and closing offers.
3. Manage offer evaluation plan	3.1 Develop and document offer evaluation plan, including criteria for evaluation and approve prior to releasing formal request documentation to the market. 3.2 Arrange specialist expertise to evaluate offers and membership of evaluation panel if required. 3.3 Ensure offer evaluation plan complies with probity requirements, in particular impartiality and management of conflict of interest.
4. Manage distribution and receipt of offers	4.1 Disseminate request for offers. 4.2 Clarify information in the request for offer as required. 4.3 Disseminate requests for offers and closing offers in line with probity issues. 4.4 Deal with late offers and non-conforming bids.

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

Assessment Requirements for PSPPCM005 Develop and distribute requests for offers

Modification History

Not applicable.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- consulting with stakeholders, specialists and providers
- reading complex documents
- applying probity requirements in specifying and developing requests for offers, providing briefings and information, and receiving offers
- managing the release of documents to stakeholders
- learning skills to keep up-to-date with relevant procurement legislation, policies and procedures

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- Commonwealth, state or territory, and local government legislation, policies, practices and guidelines: relating to requests for offers, including environmental purchasing and corporate social responsibility guidance
- organisational procurement policies, practices and approval processes
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to developing and receiving requests for offers
- issues to be considered when developing requests for offers, including things like buying locally, and open or restricted opportunities to tender
- aspects of law of contract, laws of tort, trade practices law, commercial law and other legislation relating to requests for offers

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPPCM006 Select providers and develop contracts

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPPROC413A Select providers and develop contracts. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to select preferred providers as a result of a formal request for offer process. It includes evaluating offers, obtaining approvals, developing and formalising contractual arrangements, and debriefing the market and other stakeholders.

This unit applies to those working as public sector staff required to select providers.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, while performing complex tasks in familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Select preferred providers	1.1 Form and coordinate evaluation panel. 1.2 Evaluate offers according to evaluation plan and organisational probity requirements which relate to managing conflicts of interest and adherence to public sector standards. 1.3 Obtain specialist expertise where necessary to assist with evaluation of offers. 1.4 Undertake clarification and negotiation of matters contained in offers with bidders. 1.5 Select preferred providers and develop, justify and document recommendations for allocation of business against selection criteria. 1.6 Obtain approvals for the recommended offers. 1.7 Notify successful providers.
2. Develop and formalise contractual arrangements	2.1 Obtain approvals to enter negotiations and negotiate final wording of contract. 2.2 Obtain approvals to enter into contracts and ensure contracts are signed by all parties before contracted work commences. 2.3 Structure contracts to capture and address identified risks, protect both parties, provide the basis for due performance, and outline expected standards of behaviour. 2.4 Ensure contracts are valid and legally binding to the parties.
3. Debrief market and other stakeholders	3.1 Provide advice on the contractual arrangements to internal stakeholders. 3.2 Inform unsuccessful bidders and provide constructive feedback on their proposals. 3.3 Make details of successful providers public.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

PSPPCM008 Manage contract performance

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPPROC503B Manage contract performance. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to implement strategies that ensure effective contract performance. It includes managing the business relationship, performance of the contract, and contract issues; and implementing a communication strategy.

This unit applies to those working in roles involved in procurement contract maintenance.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently seeking advice as required, performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Confirm contract requirements	1.1 Identify legislation, public sector standards and organisational requirements relating to probity, financial management, approvals and other considerations for inclusion in the contract management plan. 1.2 Re-confirm contract requirements with all parties. 1.3 Determine obligations to the contractor, limits of authority and delegations according to contractual arrangements. 1.4 Confirm start-up or transition arrangements.
2. Prepare contract management plan	2.1 Identify contract risks and develop a risk management plan. 2.2 Determine procedures to identify, receive and address contract variations. 2.3 Determine procedures to investigate, resolve or refer disputes or complaints. 2.4 Develop and negotiate key performance indicators and identify and approve administrative processes for the life of the contract. 2.5 Document, obtain approval on and maintain a contract management plan that addresses key elements. 2.6 Apply expected standards of behaviour, probity and privacy principles to all elements of contract management plan. 2.7 Apply environmental, sustainability and corporate social responsibility principles to all elements of contract management plan.
3. Develop stakeholder relationships	3.1 Identify stakeholder networks and relationships. 3.2 Use networking strategies to establish, develop and maintain working relationships to promote benefits to the contract requirements. 3.3 Develop and maintain confidence of stakeholders through high standards of behaviour and ethical conduct. 3.4 Use negotiation strategies to achieve positive outcomes when difficult situations arise. 3.5 Identify and confirm communication requirements in line with contractual obligations and stakeholder needs.
4. Implement contract strategies	4.1 Identify requirements of confidentiality and freedom of information for the contract. 4.2 Develop communication and/or information strategy that matches needs of the organisation, the contract and the contractor's

© Commonwealth of Australia, 2025 Public Skills Australia

	business environment. 4.3 Establish contract review requirements with stakeholders. 4.4 Develop contract review strategy to review management of the contract, contractor performance and user satisfaction.
5. Implement contractual arrangements	5.1 Establish and manage business relationship with contractor. 5.2 Implement start-up or transition arrangements. 5.3 Establish financial, administrative and information management processes. 5.4 Implement contractual arrangements according to contract management plan. 5.5 Maintain appropriate records for the life of the contract.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Establish, apply and manage procurement governance arrangements	1.1 Make contributions to forward procurement planning. 1.2 Apply organisational, financial and budgetary framework effectively to procurement. 1.3 Research and apply organisational objectives, policies and goals. 1.4 Identify and apply relevant interacting legislative, policy and probity requirements to the proposed procurement activity. 1.5 Develop and/or assess procurement needs, aligned to organisational objectives, business plan and appropriate justification of estimated procurement expenditure. 1.6 Propose alternatives to procurement action where appropriate. 1.7 Apply and manage probity principles when planning procurement activities.
2. Identify, consult with and manage procurement stakeholders	2.1 Identify internal and external stakeholders for procurement activities. 2.2 Develop strategies to effectively gather information from and distribute information to procurement stakeholders throughout the procurement process. 2.3 Inform and educate stakeholders on the concept of value for money. 2.4 Develop strategies for the ongoing consideration and management of key stakeholders.
3. Conduct market research and develop appropriate strategies to approach the market	3.1 Conduct market research and analysis. 3.2 Identify strengths and weaknesses of the market. 3.3 Determine appropriate procurement options and procurement methods for approaching the market, taking into account relevant jurisdictional and organisational policy requirements.
4. Identify, source and manage resources to conduct procurement processes	4.1 Identify, seek and manage financial and budgetary resources required to effectively conduct procurement processes. 4.2 Identify, seek and manage technical and procurement expertise required to effectively conduct procurement processes, including the establishment of tender evaluation panel or working group. 4.3 Determine and apply appropriate structures and processes to the conduct of the procurement, including operation of the tender evaluation panel or working group.

© Commonwealth of Australia, 2025 Public Skills Australia

	4.4 Plan and communicate appropriate lead times for conducting procurement processes to stakeholders.
5. Define procurement specifications and requirements	5.1 Align procurement requirements with organisational objectives and business plans that are realistic in terms of the capacity of the market to supply. 5.2 Develop and/or critically assess statements of requirements and specifications that meet business needs of the organisation. 5.3 Review previous procurements and consult stakeholders to inform and define the specifications. 5.4 Explore the viability of specifications to ensure risks and whole-of-life costs and benefits are identified and to support value for money.
6. Undertake detailed procurement planning	6.1 Assist stakeholders to make meaningful contributions to procurement plans. 6.2 Conduct procurement risk assessments and determine appropriate risk management strategies. 6.3 Address jurisdictional, organisational, legislative, policy and probity requirements. 6.4 Design a procurement process that achieves a value for money outcome, including consideration of whole-of-life costs and benefits. 6.5 Document detailed procurement plans and sub-plans for the various activities that will be conducted throughout the procurement process, including evaluation and reporting requirements. 6.6 Plan prompt execution of financial delegations and other approvals. 6.7 Undertake procurement activity in line with jurisdictional, organisational and best practice requirements for accountability and transparency, including record keeping and reporting regimes.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPPROC507A Plan for procurement outcomes.

Assessment Requirements for PSPPCM012 Plan for procurement outcomes

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- networking, consulting and negotiating with contractors and stakeholders
- writing a business case
- reading and applying complex documents, including contracts, legislation and guidelines
- providing feedback
- modelling effective team management approaches
- referring issues to the correct person
- resolving complicated procurement issues
- developing options for inclusion in a business case
- undertaking research and business analysis
- planning procurement processes in alignment with business and organisational goals
- documenting procurement planning decisions and expected outcomes
- managing and updating the procurement plan and sub-plans
- maintaining currency in best practice examples in procurement practice and relevant procurement legislation, policies and procedures
- using electronic procurement templates

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

© Commonwealth of Australia, 2025 Public Skills Australia

- Commonwealth, state or territory, and local government legislation, policies, practices and guidelines relating to contract management, including environmental purchasing and corporate social responsibility guidance
- organisational procurement policies, practices and approval processes
- procurement planning for complex procurement requirements and associated outcomes in alignment with business and organisational goals
- probity principles and issues
- codes of conduct, codes of practice and standards of individual behaviour relating to the procurement process
- government procurement environment
- legal requirements of government procurement
- implications of particular procurement arrangements
- whole-of-life considerations
- financial and accounting issues relevant to the procurement
- cultural issues relating to complex procurement and industry development in certain industry sectors
- relationship management

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPPCY006 Develop organisation policy

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPPOL501A Develop organisation policy. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to develop or review internal policy in an organisation, formulated to facilitate the implementation of government or board directives. It includes anticipating and confirming the need for policy development or review; planning the policy development process; gathering and analysing information; determining policy direction; and drafting, releasing and promoting policy.

This unit applies to public sector staff working in policy development.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, while performing complex tasks in familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Policy

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Assess the need for policy development and/or review	1.1 Identify internal and external factors, issues, events, directions or government and/or board policies likely to cause changes to organisation policy. 1.2 Identify the likely implications and impact of factors on policy development in consultation with stakeholders. 1.3 Conduct a critical analysis of the need for new or revised policy including a scan of the wider internal and external environment. 1.4 Recommend priority areas for policy development and/or review. 1.5 Detail confirmation of the need for policy development and/or review with supporting evidence.
2. Plan the policy development process	2.1 Confirm the approving authority and relevant organisational procedures and protocols. 2.2 Identify and analyse issues likely to impact on the policy development process and address risks in planning. 2.3 Outline policy requirements in a policy development plan.
3. Gather and analyse information for policy development	3.1 Identify and engage with stakeholders through the establishment and maintenance of a representative and relevant policy network. 3.2 Identify, gather, analyse and interpret information required to support the policy development process. 3.3 Determine and apply an analytical framework for the development of the policy.
4. Determine policy direction	4.1 Develop a range of policy options and criteria for choice and communicate them to those responsible for selecting the policy direction. 4.2 Promote specific policy options to executives within the organisation. 4.3 Recommend preferred policy option. 4.4 Determine risk treatments in accordance with the policy development plan. 4.5 Obtain approvals.
5. Draft policy	5.1 Implement a cyclical process of consultation, feedback,

© Commonwealth of Australia, 2025 Public Skills Australia

	identification of changes and re drafting. 5.2 Implement risk management processes in accordance with the policy development plan to ensure progress against the timeframe and milestones. 5.3 Add an implementation plan in the policy that details responsibilities for implementation and strategies for transition, change management, initial and ongoing training and maintenance of the policy. 5.4 Add mechanisms within the policy for monitoring compliance, quality assurance, and evaluation of the policy.
6. Finalise development of policy	6.1 Clear policy through organisational channels, and gain agreement of critical stakeholders. 6.2 Ensure all stakeholders, particularly those who will be responsible for implementing the new or revised policy, are informed of the outcomes, and manage fallout from dissenting stakeholders. 6.3 Release and promote policy.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

PSPPCY008 Develop public policy

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPPOL601A Develop public policy. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to develop or review public policy, to enable the implementation of government objectives. For the purposes of this unit, public policy includes government policy affecting all Australians and public sector policy that is not restricted to a particular organisational structure or individual organisation. The unit includes anticipating and confirming the need for public policy development or review and planning the policy development process; gathering and analysing information; determining policy direction; drafting, gaining agreement for, and disseminating public policy.

This unit applies to those working as public sector staff required to develop policy.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, while performing complex tasks in familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Policy

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Assess the need for public policy development or review	1.1 Identify events, issues or government policies likely to lead to changes to public policy. 1.2 Identify and prioritise the likely implications and impact of factors that might require public policy development in consultation with stakeholders. 1.3 Conduct a critical analysis of the need for new or revised public policy that includes a scan of both internal and external environments, checks related policies for context and identifies other public policy likely to be impacted. 1.4 Recommend priority areas for public policy development or review. 1.5 Confirm the need for public policy development or review and detail supporting evidence.
2. Plan public policy development process	2.1 Confirm the approving authority. 2.2 Identify and analyse issues likely to impact on the policy development process and address them in policy development planning. 2.3 Develop a policy development plan outlining public policy requirements.
3. Gather and analyse information for public policy development	3.1 Identify and engage stakeholders through the establishment and maintenance of a public policy network. 3.2 Gather, analyse and interpret information required. 3.3 Determine and apply an analytical framework.
4. Determine public policy direction	4.1 Obtain strategic input from high-level staff. 4.2 Develop a range of policy options and criteria for choice and communicate to those responsible for selecting the policy direction. 4.3 Determine risk treatments and identify a preferred public policy option. 4.4 Obtain approvals and endorsements.
5. Draft public	5.1 Draft public policy using a cyclical process of consultation,

PSPPM402B Manage simple projects

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers management of generally low risk projects that may be small scale and managed by one person or a person with a small team. It includes implementing project start-up activities, coordinating project implementation, monitoring the project and arranging follow-up activities. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, managing simple projects overlaps with other generalist and specialist work activities such as applying government processes, using resources, gathering information, managing contracts etc.

This unit, and unit *PSPPM405A Administer simple projects*, are mutually exclusive. One or the other, but not both, may contribute to a qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Public Skills Australia

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Implement start-up activities**	1.1 The ***project plan*** is updated with confirmed information for key dates and activities, resources and project governance details in accordance with the project implementation strategy. 1.2 Project ***stakeholders'*** understanding of and agreement to fulfil the project requirements and their roles and responsibilities are confirmed. 1.3 ***Required systems*** are established and maintained throughout the project in accordance with the project plan. 1.4 A working knowledge of ***project management tools*** is used to facilitate integration of project activities and achievement of project outcomes.
2. **Coordinate project implementation**	2.1 ***Integration*** and ***management*** of project activities are handled in accordance with the project plan. 2.2 Stakeholder input and expectations are managed and their commitment is maintained throughout the life of the project in accordance with organisational policy and procedures and the project plan. 2.3 Disagreements and disputes are resolved or referred to a higher authority in accordance with organisational policy and procedures. 2.4 Project ***change proposals*** are received and changes are recommended/made in accordance with the project plan, and documented in accordance with ***policy and procedures***.
3. **Monitor project**	3.1 All aspects of the project are continually monitored and

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	corrective action is taken as necessary to maintain progress in accordance with the project plan.
	3.2 Consultation and reporting mechanisms are applied in accordance with the communication plan when dealing with management, staff and/or contractors, steering committee members or other stakeholders.
	3.3 Project governance plans and any related contracts are monitored, reviewed and amended as appropriate, and results are reported in accordance with the communication plan.
	3.4 Project progress is monitored against agreed milestones in accordance with the project plan to provide a measure of performance throughout the life of the contract.
	3.5 Programmed review of objectives and achievement is implemented in accordance with the project plan.
4. Arrange project follow-up activities	4.1 Project deliverables are analysed against ***specifications***, performance standards and project objectives, under broad guidance, and the results are reported to stakeholders.
	4.2 An initial support package or product manual is produced, if required, to provide guidance for stakeholders who will be required to apply the project results.
	4.3 The support package includes options for stakeholders to take account of environmental and cultural factors in applying project results.
	4.4 Operational and support authorities are consulted to research any testing/trialling/building requirements resulting from the project, and evaluation of any recommendations are included in the project report.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- leading and mentoring people to achieve project deliverables
- maintaining agreement of stakeholders and team members to timelines, roles and responsibilities
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes

© Commonwealth of Australia, 2025 Public Skills Australia

- responding to diversity, including gender and disability
- using project management tools applicable to small scale or low risk projects
- applying ethical decision making and problem solving related to project management of small scale or low risk projects
- writing recommendations and preparing implementation support packages requiring precision of expression
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project management, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environment requirements
  - project governance requirements
  - quality standards
- risk management
- procurement guidelines
- human resources
- equal employment opportunity, equity and diversity principles
- project management tools to suit a range of small scale or low risk projects
- project management principles
- organisational and political context

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV402B Deliver and monitor service to clients

© Commonwealth of Australia, 2025 Public Skills Australia

- PSPGOV403B Use resources to achieve work unit goals
- PSPGOV411A Deal with conflict
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV422A Apply government processes
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPPROC410A Administer contracts
- PSPPM401B Design simple projects
- PSPPM403B Close simple projects

- *Excluded units* that may not contribute to the same qualification as this unit:
  - PSPPM405A Administer simple projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- simple projects managed in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project management
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when implementing projects, including coping with difficulties, irregularities and breakdowns in routine
- simple projects managed in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse

© Commonwealth of Australia, 2025 Public Skills Australia

backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Project plan will include some or all of:	• acquisition strategies • budget and financial management strategy • contract management • cost estimates • evaluation criteria • expected outcomes/measurable benefits of the project • facilities • inclusions and exclusions from project • information/communication strategy • intellectual property strategies • milestones

© Commonwealth of Australia, 2025 Public Skills Australia

- objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

Stakeholders may include:

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

Required systems for project management may include:

- planning and monitoring system
- financial management including:
  - budget allocation/funding
  - income generated
  - expenditure
- recordkeeping for documented information such as:

© Commonwealth of Australia, 2025 Public Skills Australia

- correspondence
- quality data including survey, needs, test results
- contracts
- time allocated and spent on each aspect of the project
- progress reports
- performance reports against milestones
- project outcomes
- samples, prototypes, models

Project management tools may include:

- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
  - Gantt and bar charts
  - Program Evaluation and Review Technique (PERT) charts
  - Critical Path Method
  - cost schedule control system
  - logistics support analysis
  - life cycle cost analysis
  - spreadsheets
  - recording systems - electronic and manual

Integration of project activities may include:

- scope
- time
- cost
- quality
- human resources
- communications
- risk
- procurement

Management may include:

- scope management
- communication and reporting
- schedule management
- financial management
- quality management
- resources management
- people management
- logistics management
- risk management

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement project review activities	1.1 Evaluation of project process and achievement against objectives is undertaken in consultation with ***stakeholders*** and results are reported in accordance with the ***project plan*** and organisational ***policy and procedures***.
	1.2 Action to rectify problems in meeting client needs is recommended and documented.
	1.3 Implications of project results for policies and operating procedures are identified and recommendations are made for their amendment.
	1.4 Information obtained from the evaluation of the project is structured so it may be used to improve relevant policy and practice in accordance with organisational requirements.
2. Finalise project	2.1 Contracts are finalised and financial records are checked for accuracy and completed in accordance with organisational procedures.
	2.2 Project wind-down is ***managed, documentation*** is completed, records are archived and ***approvals*** are obtained in accordance with the project plan and organisational policy and procedures.
	2.3 Project stakeholders are debriefed, and recommendations are made for redeployment of infrastructure/resources in accordance with organisational policy and procedures.
	2.4 Project hand-over to user/s is completed in accordance with organisational procedures and lessons learnt are documented and reported to stakeholders to assist in continuous improvement.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.5 Stakeholders are advised of procedures and authorities for initial support to implement project deliverables where relevant, and strategies are devised to manage long-term project momentum in accordance with organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- analysing results and evaluating results against objectives
- writing recommendations and preparing reports requiring precision of expression
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- debriefing project team members
- reporting on resource expenditure including time and costs
- using project management tools suited to small scale or low risk projects
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project finalisation, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environment requirements
  - project governance requirements
  - quality standards
- risk management
- procurement guidelines
- human resource management and development
- equal employment opportunity, equity and diversity principles
- project management tools to suit a range of small scale or low risk projects
- project management principles

- organisational and political environment

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV402B Deliver and monitor service to clients
  - PSPGOV403B Use resources to achieve work unit goals
  - PSPGOV411A Deal with conflict
  - PSPGOV412A Use advanced workplace communication strategies
  - PSPGOV422A Apply government processes
  - PSPLEGN401A Encourage compliance with legislation in the public sector
  - PSPPROC410A Administer contracts
  - PSPPM401B Design simple projects
  - PSPPM402B Manage simple projects
- *Excluded units* that may not contribute to the same qualification as this unit:
  - PSPPM405A Administer simple projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- closure of simple projects in a range of (3 or more) contexts (or occasions, over time)

© Commonwealth of Australia, 2025 Public Skills Australia

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project close-out
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when closing projects, including coping with difficulties, irregularities and breakdowns in routine
- closure of simple projects in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Stakeholders may include:

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

Project plan will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones
- objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy

© Commonwealth of Australia, 2025 Public Skills Australia

- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

Policy and procedures may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
  - public sector management acts
  - financial management and accounting legislation and regulations
  - privacy legislation
- government and organisational guidelines and procedures relating to:
  - project governance
  - resourcing
  - security
  - strategic plans
  - recruitment
  - risk management
  - procurement guidelines
  - designation approvals
  - industrial agreements

Management of project wind-down may include:

- risks
- issues
- assets
- consultants
- project team
- support staff

Documentation may include:

- project completion report
- supplier performance reports
- whole-of-life support plans
- transfer documents

© Commonwealth of Australia, 2025 Public Skills Australia

- financial reports and acquittals

Approvals may be required from:

- project sponsor/funding body
- business owner of the project
- program manager
- line manager
- project governance office/personnel in the organisation
- chief executive officer, manager or management representative
- customer or client

Unit Descriptor

This unit covers the activities required to carry out simple projects, working on one project at a time. This work is typically undertaken by a project officer working individually or as part of a project team. It includes reviewing and confirming the project brief, carrying out project activities, monitoring and maintaining progress and completing the project. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, carrying out project work overlaps with other generalist and specialist work activities such as acting ethically, applying government processes, using resources, developing work plans, gathering information.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Review and confirm project brief	1.1 Project information and supporting materials are obtained and the individual ***project brief*** is clarified in accordance with the ***project plan*** and organisational ***policy and procedures***. 1.2 Project plan is analysed and requirements, timeframes, roles, responsibilities and ***stakeholder*** involvement are confirmed. 1.3 Project management procedures and controls are confirmed in accordance with the project plan, and any required changes are negotiated according to the project plan change management strategy. 1.4 The project plan is updated with confirmed information for milestones, resources, other team members and steering committee details.
2. Undertake project activities	2.1 Professional or technical skills are provided to accomplish project tasks in accordance with the project requirements. 2.2 ***Project data*** is captured and recorded in accordance with project requirements. 2.3 Specialist advice and support are provided to the project manager, steering committee and stakeholders as required to achieve project objectives.
3. Monitor and maintain progress of project	3.1 ***Project management tools*** are used for integration and timing of project activities and achievement of project deliverables. 3.2 Risks to progress and achievement of project objectives are anticipated and related to the project manager for action in accordance with the ***risk management*** plan. 3.3 Completion of project activities and progress against targets and milestones are monitored and corrective action is taken if needed, in accordance with project plans and in ***consultation***

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	with management/governance personnel.
	3.4 Problem solving to find innovative ***solutions*** to project problems or unplanned-for contingencies is undertaken in consultation with project management.
	3.5 Progress reports are provided as required by the project communication plan.
4. **Complete project**	4.1 Project deliverables are completed to the required standard in the required timeframe.
	4.2 Recordkeeping associated with the project is completed and archived as required by the project plan.
	4.3 Project process is evaluated, issues identified and recommendations made for continuous improvement.
	4.4 Project reports are completed to the required standard, containing required information and using agreed style, voice and format.
	4.5 Project hand-over of deliverables and return of borrowed/unused materials are completed in accordance with the project plan and organisational procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- recording information, writing recommendations and preparing reports requiring complex language structures and precision of expression
- negotiating changes to timelines, roles and responsibilities
- communicating with stakeholders, managers and other team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- managing self, time and costs
- using project management tools
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

PSPPM405A Administer simple projects

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the administration of a straightforward project or a discrete component of a larger project by staff who are not specialists in project management. The unit focuses on the application of project management skills and the requirement to meet timelines, quality standards, budgetary limits and other requirements set for the project. It includes defining the project, developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learnt for application to future projects. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

Units of competency for specialist project managers at this level include *PSPPM401B Design simple projects*, *PSPPM402B Manage simple projects* and *PSPPM403B Close simple projects*. The unit of competency for specialist project officers is *PSPPM404A Carry out simple project activities*.

This unit and the 3 project management competencies for specialist project managers (PSPPM401B - PSPPM403B) are mutually exclusive and may not contribute to the same qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define project	1.1 ***Project scope*** and other relevant documentation are accessed in accordance with organisational ***policy and procedures***. 1.2 Project ***stakeholders*** are identified and their interest in or relationship to the project is established. 1.3 Clarification is sought from ***delegating authority*** of any issues related to the project and ***project parameters***. 1.4 Limits of own responsibility and reporting requirements are confirmed. 1.5 Relationship of the project to other projects and to the organisation's objectives is clarified. 1.6 Available resources to undertake the project are determined and accessed in accordance with organisational requirements.
2. Develop detailed project plan	2.1 A ***project plan*** is developed that identifies in detail how the project will be executed and managed in relation to the project parameters. 2.2 ***Project management tools*** are identified and accessed in accordance with project requirements. 2.3 A communication strategy and risk management plan that address the project, organisational and legislative requirements are contained within the project plan.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.4 A timeline for completion of activities and a budget, developed and approved in accordance with organisational procedures, are included within the project plan.
	2.5 Stakeholders' understanding of and agreement to fulfil the project requirements and their roles and responsibilities are confirmed.
	2.6 Project plan is finalised and any necessary approvals are gained to commence the project according to the documented plan.
3. **Administer and monitor project**	3.1 ***Support*** is provided to ensure that the quality of the expected deliverables of the project and documented timelines are met.
	3.2 Required ***recordkeeping*** systems are established and maintained throughout the project.
	3.3 ***Component plans*** that identify how key aspects of the project will be managed are implemented and monitored in accordance with set requirements.
	3.4 Project reports are completed and forwarded as required in accordance with the project communication strategy.
	3.5 ***Risk management*** is undertaken in accordance with the project plan to ensure project requirements are achieved in accordance with the project plan.
	3.6 Project deliverables are completed to the required standard, in the required timeframe and within budget.
4. **Finalise project**	4.1 Any financial recordkeeping associated with the project is completed and checked for accuracy.
	4.2 Staff involved in the project are de-briefed before assignment to new or previous roles.
	4.3 Project documentation is completed and ***signed off*** in accordance with organisational procedures.
5. **Review project**	5.1 Project deliverables and processes are reviewed against the project scope and plan.
	5.2 Stakeholders are involved in the review of the project.
	5.3 Lessons learnt from the project are documented and reported in accordance with organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

© Commonwealth of Australia, 2025 Public Skills Australia

Look for evidence that confirms skills in:

- detailing requirements, writing recommendations and preparing reports requiring complex language structures and precision of expression
- negotiating timelines, roles and responsibilities with team members
- communicating with stakeholders using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- leading and managing a project team
- managing time and costs
- using project management tools
- applying quality management techniques including testing and auditing as appropriate
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on the project and management of the project, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environment and sustainability
- project governance requirements
- quality standards
- risk management
- procurement
- human resources
- equal employment opportunity, equity and diversity principles
- organisational structure and lines of authority within organisation
- project management tools to suit the projects administered
- evaluation techniques for projects

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*

© Commonwealth of Australia, 2025 Public Skills Australia

- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV402B Deliver and monitor service to clients
  - PSPGOV403B Use resources to achieve work unit goals

PSPSEC006 Implement security risk treatments

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPSEC402A Implement security risk treatments. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 2.1 and 2.2, PC 3.3 and 3.4, PC 4.1 and 4.2 merged

Application

This unit describes the skills required to confirm risk decisions, identify risk treatments, implement countermeasures and monitor and review the security risk management process.

This unit applies to those working in a security role where they will be required to confirm, identify, implement and review risk.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to the security plan.

Those undertaking this unit would generally work independently and as part of a team using support resources as required. They would perform complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Confirm risk decisions	1.1 Confirm management decisions determining acceptable and unacceptable levels of risks. 1.2 Note and monitor low level risks accepted by the organisation, to detect changed circumstances. 1.3 Refer unacceptable high-level risks for development of formal management plans. 1.4 Note for treatment all major or significant risks determined as unacceptable.
2. Identify risk treatments	2.1 Ensure treatments are consistent with the security plan, are cost effective and address levels and types of risk and the importance of the function or resource at risk. 2.2 Select treatments to reduce the likelihood and/or consequences of the risk. 2.3 Include continuity plans in treatments where appropriate. 2.4 Document treatments and submit for approval.
3. Implement countermeasures	3.1 Develop and implement a treatment plan. 3.2 Apply countermeasures in accordance with the implementation strategy detailed in the security plan. 3.3 Implement countermeasures in accordance with timeframe, budgetary requirements and legal requirements.
4. Monitor and review security risk management process	4.1 Implement strategies to monitor risk environment. 4.2 Evaluate risk treatments against the objectives of the security plan. 4.3 Obtain feedback from stakeholders on the adequacy and need for current security measures affecting their work/area. 4.4 Convey recommendations for re-examination of security risk or improved risk treatments to the appropriate personnel.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy					

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to PSPSEC402A Implement security risk treatments.

Assessment Requirements for PSPSEC006 Implement security risk treatments

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least two occasions.

- applying legislation, regulations and policies relating to government security management
- reading and analysing the organisation's security plan
- communicating with diverse stakeholders
- using computer technology to gather and analyse information, and prepare formal reports
- representing mathematical information in format to suit the purpose

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- legislation, regulations, policies, procedures and guidelines relating to government security management including WHS
- Crimes Act 1914 and Criminal Code 1985
- Freedom of Information Act 1982
- Privacy Act 1988
- fraud control and protective security policies
- Australian Government Information Security Manual (ISM)
- Protective Security Policy Framework
- risk analysis terminology and techniques
- the organisation's security plan
- the organisation's assets and security environment

© Commonwealth of Australia, 2025 Public Skills Australia

- risk management: principles and guidelines
- AS/NZS ISO 31000:2009

Assessment Conditions

Assessment of this unit requires a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when implementing security risk treatments.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPSEC007 Develop and advise on government security procedures

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPSEC403A Develop and advise on government security procedures. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 2.1 and 2.2 merged, PC 4.2 removed

Application

This unit describes the skills required to interpret security policy and legislation, analyse security related data, develop procedures and provide advice on government security matters.

This unit applies to those working in the policy development division of the organisation.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to policy development and implementation.

Those undertaking this unit would generally work independently and as part of a team using support resources as required. They would perform complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Interpret security policy and legislation	1.1 Identify and analyse legislation impacting on security policy and procedures. 1.2 Analyse the organisation's security policy in relation to risk identification, security management and security incidents. 1.3 Confirm policy intent and identify and review existing procedures for consistency.
2. Analyse security related data	2.1 Collect and analyse data and confirm its integrity. 2.2 Identify outcomes and trends that need to be addressed through security procedures. 2.3 Determine any changes in organisational circumstances and identify related security procedures.
3. Develop procedures	3.1 Identify intended audience/s for procedures and determine language style, structure and format accordingly. 3.2 Develop security procedures to reflect changes in circumstances. 3.3 Develop procedures in consultation with security plan developer/s, end users and approval personnel. 3.4 Submit and gain approval for procedures.
4. Provide advice on government security matters	4.1 Provide information and advice on security procedures and related legislation, regulations, standards and guidelines. 4.2 Consider intended use and consequences of advice and communicate in a manner that addresses the requirements of stakeholders. 4.3 Check documentation provided to ensure it supports the information and advice given.

PSPSEC012 Develop security risk management plans

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPSEC502A Develop security risk management plans. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 2.1 and 2.2 merged

Application

This unit describes the skills required to treat security risks through the development of a security risk management plan. It includes identifying security countermeasures and developing a plan with schedule for implementing, monitoring and evaluating security strategies.

This unit applies to those working in a security role with some responsibility for addressing organisational risk.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to developing risk management plans.

Those undertaking this unit would work autonomously occasionally accessing and evaluating support from a broad range of sources. They would perform complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify counter-measures	1.1 Review documented risks and threats and validate management decisions on acceptable and unacceptable risks. 1.2 Determine treatment options and countermeasures to reduce the likelihood of occurrence or consequences of the risk. 1.3 Propose treatments which include continuity plans where appropriate. 1.4 Propose treatments which match the level and type of risk and importance of the function or resource. 1.5 Conduct a cost-benefit analysis to determine countermeasures. 1.6 Consult stakeholders on the cost-benefit analysis and determine and submit countermeasures for prioritising.
2. Develop security plan	2.1 Prepare a security plan containing explanatory information on the importance of security and the organisation’s security objectives in achieving corporate and business objectives. 2.2 Summarise the threat assessments undertaken, current exposure and current protective security arrangements in the plan. 2.3 Outline security strategies for implementing, monitoring and evaluating countermeasures. 2.4 Include timeframes and security budget for implementing countermeasures including assigned responsibilities and methodologies to be used. 2.5 Submit security plan for approval and communicate to stakeholders.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

Assessment Requirements for PSPSEC012 Develop security risk management plans

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least two occasions.

- applying legislation, regulations and policies relating to security risk management plans
- using evaluation, deductive reasoning, problem solving and decision making
- communicating with diverse stakeholders involving presentation, listening, questioning, paraphrasing, clarifying, summarising
- reading and analysing complex information in standards and security plans
- writing reports requiring formal language and structure
- representing numerical, graphical and statistical information in diverse formats

Knowledge Evidence

- Operational knowledge of:
  - Crimes Act 1914 and Criminal Code 1985
  - Freedom of Information Act 1982
  - Privacy Act 1988
  - fraud control policy
  - Australian Government Information Security Manual (ISM)
  - Protective Security Policy Framework
  - Australian standards, quality assurance and certification requirements
  - international treaties and protocols
  - requires comprehensive knowledge of cross-jurisdictional protocols
  - organisation’s strategic objectives

© Commonwealth of Australia, 2025 Public Skills Australia

- national strategic objectives
- formats for different types of reports
- cost-benefit analysis techniques
- equal employment opportunity, equity and diversity principles
- public sector legislation, including WHS and environment, in the context of security risk assessment

Assessment Conditions

Assessment of this unit requires evidence gathered over time in a workplace environment or one that closely resembles normal work practice and replicates the diverse conditions likely to be encountered when developing risk management plans.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PUACOM001C Communicate in the workplace

Modification History

PUACOM001C Release 2: Layout adjusted. Application added.

PUACOM001C Release 1: Primary release.

Unit Descriptor

This unit covers the competency for interacting with people internally and externally through verbal, nonverbal and written communications in the workplace and the ability to follow verbal and written workplace instructions.

Application of the Unit

This unit applies to all workers, but has a specific focus on the communication skills required by entry level workers with public safety organisations and other safety roles.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Communicate verbally	1.1 Language used in all communications is clear concise and appropriate to client, assignment and organisation's requirements. 1.2 Active listening skills and questioning techniques are used to clarify issues. 1.3 Established ***communication*** pathways are used for routine and non-routine communication.
2. Communicate non verbally	2.1 ***Non verbal communication*** is positive, culturally appropriate and tailored to the audience. 2.2 Non verbal communication is consistent with verbal communication.
3. Communicate with clients	3.1 Questioning, learning and summarising skills are used to establish ***client needs.*** 3.2 The needs of ***clients*** are addressed in line with organisation's policy and procedures. 3.3 Confidentiality is observed in accordance with organisation's policies and procedures.
4. Give and receive instructions	4.1 ***Instructions*** received are acted upon within an agreed time frame and to meet organisation needs. 4.2 Difficulties/problem areas are identified and communicated to the appropriate person in a timely manner. 4.3 Clarification of instructions is sought from the appropriate person. 4.4 Instructions are relayed clearly, concisely and accurately and confirmation of understanding obtained.
5. Take part in group discussions and informal meetings	5.1 Contributions are made in small informal group activities and meetings to facilitate outcomes. 5.2 Responses are sought from, and provided to, other group members in a constructive way. 5.3 Views and opinions of individuals or a group are understood, acknowledged and accurately represented to others where required.
6. Prepare and process routine written correspondence notes and records	6.1 Information and ideas are presented in a format, language and timeframe to meet organisation's requirements. 6.2 Presentation of written documents meets organisation's standards of style and accuracy. 6.3 Documents are processed to comply with legislative

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	requirements and organisation's policy and procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate in group setting
- follow written instructions
- give and receive verbal instructions
- interact with clients
- use information technology effectively

Required Knowledge

- effective non verbal communication techniques
- effective verbal communication techniques
- group communication techniques
- small group dynamics
- written communication skills

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in effectively interacting with clients and communicate verbally and non verbally.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

- A combination of oral or written presentations
- observations
- on the job and/or in a simulated workplace environment

Specific resources for assessment

No special requirements.

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Clients may include:
- external
- internal
- representatives of other organisations
- representatives of non government organisations
- contractors
- members of the public
- persons from culturally and linguistically diverse backgrounds
- people with hearing/vision impairments

Instructions may include:
- verbal
- non verbal
- written and may include requests
- directions

Modes of communication may include:
- written
- face to face
- radio
- mobile telephone
- land line telephone
- facsimile
- information technology systems
- signalling systems
- pamphlets translated in other languages for persons from culturally and linguistically diverse backgrounds
- Auslan gestures
- use of interpreters
- signals
- visual signalling re vessels
- helicopter signals
- fixed plane signals
- signalling to vessel skipper re anchoring, towing etc

Client needs may include:
- information
- advice
- directions
- assistance

© Commonwealth of Australia, 2025 Public Skills Australia

Workplace may include:	• office • in the field • workshop • operational area • surf or ocean environment • blue water coastal areas, barrier reef • bars and bar crossings
Non verbal communication may include:	• body language • gestures and signals
Routine correspondence may include:	• brief notes • documents • number of themes covered in document would be simple and limited

PUACOM002 Provide services to clients

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to interact with internal and external clients. It includes identifying and determining client needs and expectations and managing their expectations.

The unit is applicable to personnel who have a requirement to communicate with clients as part of their public safety role. This may include personnel who have a specific client contact role, as well as those in operational roles who meet members of the public as part of their duties.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Public Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify client needs and expectations	**1.1** Current and potential clients are identified
	1.2 Public Safety needs and expectations are discussed and clarified with clients

© Commonwealth of Australia, 2025 Public Skills Australia

	1.3	Range of possible organisational responses are communicated to the client in a timely manner
	1.4	Client is informed of options for further action, in accordance with organisational procedures
2 Determine and implement response to client needs	**2.1**	Appropriate decision making processes are established with client and pertinent stakeholders
	2.2	Options are identified, in accordance with organisational procedures
	2.3	Decision making criteria is identified taking into account client needs and organisational context
	2.4	Decision making criteria are applied to options to identify a range of relevant outcomes
	2.5	Appropriate response is selected and implemented, in accordance with organisational procedures
	2.6	Client needs are recognised, in accordance with anti-discrimination and other organisational policies and procedures
3 Manage client expectations	**3.1**	Courtesy, consideration and sensitivity are applied to all clients
	3.2	Documentation is obtained, completed and processed, in accordance with organisational policies and procedures
	3.3	Organisational policy and procedures relating to confidentiality are implemented
	3.4	Assistance is sought to manage clients' expectations, in accordance with organisational procedures
	3.5	Clients are referred, where appropriate, to other personnel to ensure their needs are managed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUACOM002B Provide services to clients.

Assessment Requirements for PUACOM002 Provide services to clients

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- analysing and evaluating information
- completing records
- determining and implementing response to client needs
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- identifying client needs and expectations
- locating information
- locating, interpreting and providing information for client requests
- managing client expectations when providing services to clients
- reading selectively and summarising information
- seeking assistance
- using interpersonal skills
- working with organisational client information collection techniques and methods

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- appropriate responses to suit situations including dealing with difficult clients
- communication methods and techniques
- opportunities for feedback
- organisational documentation, policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements, client service, information provision, anti-discrimination procedures and privacy principles
- organisational structure, services, facilities and activities
- types of clients and their needs

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, regulations, equipment specifications, codes of practice and operation manuals.

1. Identify client needs and expectations	1.1 Current and potential ***clients*** are identified. 1.2 Needs and expectations are discussed and clarified with clients.
2. Determine and implement response to client needs	2.1 Appropriate decision making processes are established with client and relevant stakeholders. 2.2 Options are identified. 2.3 Decision making criteria are identified taking account of client needs and organisational context. 2.4 Decision making criteria are applied to options in order to identify range of relevant outcomes. 2.5 ***Appropriate response*** are selected and implemented. 2.6 Client needs are recognised and taken into consideration in accordance with anti discrimination and other organisation policy and procedures.
3. Manage client expectations	3.1 Range of possible organisational responses are communicated to the client in a timely manner. 3.2 Client is informed of options for further action. 3.3 Courtesy, consideration and sensitivity are exercised at all times with the client. 3.4 All ***necessary documentation*** is obtained, completed and processed according to organisation's policy and procedures. 3.5 ***Organisation's policy and procedures*** relating to confidentiality are implemented. 3.6 Assistance is sought to manage clients' expectations when necessary. 3.7 Clients are referred to other personnel where necessary to ensure their needs are managed efficiently.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- interpersonal skills
- locating information
- reading selectively and summarising information

© Commonwealth of Australia, 2025 Public Skills Australia

Required Knowledge

- major regulatory functions of organisation
- organisation and structure
- organisation services, facilities and activities
- organisation's anti-discrimination procedures
- organisation's policies and procedures relevant to client service and information provision

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in:

- locating, interpreting and providing relevant information to requests
- seeking assistance when necessary
- completing appropriate workplace records
- working in accordance with organisation's policies and procedures

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

A combination of oral or written presentation, observation on the job and/or in a simulated workplace environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Communication with clients may include:

- spoken
- face-to-face
- telephone

© Commonwealth of Australia, 2025 Public Skills Australia

- written
- electronic
- forms
- letters
- non verbal
- gestures
- body language
- displays of information
- photographs
- interpreters

Clients may include:

- colleagues
- community
- contractors
- personnel from other organisations

Other organisations may include:

- government departments
- community services
- community groups
- public safety organisations
- non government organisations

Effective (spoken) communication may include:

- clear
- sequenced explanations
- instructions
- paraphrasing
- negotiating meaning
- checking back on details
- summarising
- using another language

Appropriate response may include:

- written response involving reading
- selecting and extracting relevant information
- spoken response involving questioning appropriate personnel and relaying information to the client

Completion of necessary documentation may include:

- independent or assisted form filling
- recording events in the sequence they happened

Organisation's policy and procedures may include:

- as documented in procedures manual
- standardised operations
- conveyed through spoken language

Procedures for dealing with difficult clients may include:

- seeking assistance
- referring to other personnel

Opportunities for feedback may include:

- client satisfaction forms
- telephone survey
- follow up contact

© Commonwealth of Australia, 2025 Public Skills Australia

- suggestion box
- verbal

PUACOM003B Manage information

Modification History

PUACOM003B Release 2: Layout adjusted. Application added.

PUACOM003B Release 1: Primary release.

Unit Descriptor

This unit covers the competency to manage information to support the achievement of the organisation's objectives.

Application of the Unit

This unit applies to workers who have the delegated responsibility to ensure that information is collected and disseminated to team members and also that data and information is stored in organisational information systems. This unit is relevant at both local public safety group level and organisation wide. While written specifically for the public safety industry, it may have application in other industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify information needs and sources	1.1 The ***information*** needs of individuals/teams are determined and the sources are identified. 1.2 Information held by the organisation is reviewed to determine suitability and accessibility. 1.3 Plans are prepared to obtain information which is not available or accessible within the organisation.
2. Collect and analyse information	2.1 ***Collection*** of information is timely and relevant to the needs of individuals/teams. 2.2 Information is in a formal suitable for ***analysis***, interpretation and dissemination. 2.3 Information is analysed to identify relevant trends and developments in terms of the needs for which is was acquired.
3. Use management information systems	3.1 ***Management information systems*** are used to store and retrieve data for decision making. 3.2 Technology available in the work area/organisation is used to manage information. 3.3 Recommendations for improving the information system are submitted to designated persons/groups.
4. Record and support information	4.1 The results of information gathering, analysis and synthesis are reported within specified time frames and to the standard defined by the organisation. 4.2 The results of information gathering, analysis and synthesis are reported so they can be inputs to policy development and organisation decision making. 4.3 Information which is gathered is disseminated to appropriate personnel within the specified timeframe.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse record information

© Commonwealth of Australia, 2025 Public Skills Australia

- collect and collate information
- communicate effectively
- disseminate information
- present information
- use management information systems to store and retrieve data

Required Knowledge

- analysis and display techniques
- information collection, collation
- information evaluation issues
- information storage requirements and methods
- reporting procedures of the organisation

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Establish an effective information system which facilitates achievement of organisational objectives. **Consistency in performance** Evidence will need to be collected over time in a range of actual and/or simulated management contexts.
Context of and specific resources for assessment	**Context of assessment** Evidence will need to be collected over time in a range of actual and/or simulated information management contexts. **Specific resources for assessment** Evidence of competent performance should be obtained by observing an individual in an information management role within the workplace or operational or simulated environment.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Presentation of information may include:	• routine and complex reports and submissions • briefing notes • ministerials

© Commonwealth of Australia, 2025 Public Skills Australia

- proposals
- project plans
- articles and promotional material

Management information systems may include:

- computers
- communication channels
- records management
- procedures
- manuals
- protocol
- legislation
- guidelines and awards
- organisational
- legal and policy materials
- client information
- market trends
- registries and file records
- library
- financial records
- basic statistical information
- personnel resources

Analysis may include:

- application of statistical methods
- mathematical calculations
- critical analysis
- problem solving

Collection techniques may include:

- research
- surveys
- literature search
- interviews
- data bases
- observation

Collection methods may include:

- indexing
- linking
- sorting
- comparing
- categorising
- integrating

Evaluation of information issues may include:

- credibility
- reliability
- validity
- accuracy
- pertinence

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Promote the organisation in the community	1.1 ***Community*** requests for ***information*** or participation are responded to in accordance with the organisation's policies and procedures. 1.2 ***Opportunities to*** explain and ***promote*** the organisation's activities are acted on to promote community recognition and support. 1.3 Non-routine requests for information are referred to an ***appropriate person.***
2. Represent the organisation in the community	2.1 The organisation's position on particular issues is represented in a way which acknowledges community concerns and promotes community awareness. 2.2 Communication and presentation to the public enhances the organisation's public image.
3. Advise and involve the community in public safety activities	3.1 The community is advised of a range of ***prevention and mitigation techniques.*** 3.2 Community members are informed and skilled to implement prevention and mitigation activities. 3.3 Community is assisted to initiate, develop and conduct prevention and mitigation techniques addressing their own particular needs.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicating with wide variety of people

© Commonwealth of Australia, 2025 Public Skills Australia

- evaluating activities
- interpreting comments
- listening to questions

Required Knowledge

- a range of presentation strategies and techniques
- legislative responsibilities relevant to provision of information
- organisation policy relevant to provision of advice
- organisation's position on current issues
- relevant recording procedures

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrate in ability to provide advice on prevention and mitigation techniques in a way that acknowledges community concerns. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated work environment. In a Fire Sector specific context, this unit should be assessed with PUAFIR301B Undertake community safety activities. **Specific resources for assessment** Access to promotional/informational material.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Information may include:

- how to participate
- publicity material
- contact information

© Commonwealth of Australia, 2025 Public Skills Australia

- prevention and mitigation strategies

Community may include:

- local community
- business community including a range of ages and persons from culturally and linguistically diverse backgrounds
- people with a disability

Opportunities to promote may include:

- answering general enquiries
- presentations at community group gatherings
- special interest forums
- other organisation forums
- community events and festivals
- participating in conferences
- representing organisation on associations and committees
- school visits

Special promotions may include:

- career promotions
- local shows
- marches and ceremonies
- organisation specific weeks and regular state/national events e.g. fire awareness week
- bluey day
- shopping mall promotions

Appropriate person may include:

- more senior personnel
- personnel with specific expertise
- community liaison officer
- other organisation
- bilingual

Response may include:

- referral
- provide action
- details of where to access further information

Prevention and mitigation techniques may include:

- dances
- school/community group visitations/presentations
- station open days
- Police Citizens Clubs
- specific co-operative arrangements with community groups
- business owners
- shopping centres/malls
- etc, and should focus on local community safety issues and the fostering of closer linkages/partnership with policy

PUACOM007 Liaise with other organisations

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Clarification of text, addition of Performance Criteria and minor changes to Knowledge and Performance Evidence.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to develop networks and relationships and to liaise with other organisations. It includes establishing networks and relationships and communicating and interacting with other organisations.

The unit applies to personnel who formally liaise on behalf of their own organisation with other organisations to increase response effectiveness and community safety. It should be noted that this unit does not address all of the functions of an incident management liaison officer.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUACOM005 Foster a positive organisational image in the community

Competency Field

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Establish networks and relationships	**1.1** Formal and informal network opportunities are identified that will support ongoing and future liaisons and collaboration
	1.2 Relationships are developed which provide identifiable benefits to the organisation from shared expertise, information and resources
	1.3 Meetings and forums that support mutual cooperation are participated in
	1.4 Consultation with affected and interested parties is undertaken to support organisational goals and objectives
2 Communicate and interact with other organisations	**2.1** Information is provided to other organisations in a clear, concise and comprehensive manner
	2.2 Communication with other organisations is conducted in accordance with organisational policies and procedures
	2.3 Information gathered from other organisations is used for improvement of services and to avoid duplication of effort
	2.4 Meeting outcomes are documented and disseminated

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Unit Mapping Information

This unit replaces and is equivalent to PUACOM007B Liaise with other organisations.

Assessment Requirements for PUACOM007 Liaise with other organisations

Modification History

Release 2.0 This is the second release of this qualification in the PUA Public Safety Training Package.

Clarification of text, addition of Performance Criteria and minor changes to Knowledge and Performance Evidence.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- communicating, liaising and interacting with other organisations
- documenting and disseminating meeting outcomes
- following organisational policies and procedures
- networking and developing relationships
- participating in meetings and forums
- providing accurate and clear information.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- confidentiality requirements and privacy principles
- goals and objectives of own organisation and other organisations, agencies and sectors
- interorganisational cooperation and collaboration techniques
- key roles and responsibilities in own and other organisations
- organisational documentation, policies and procedures
- protocols and procedures for meetings.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the

© Commonwealth of Australia, 2025 Public Skills Australia

time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of exercises and/or case studies
- appropriate materials and equipment currently used in industry
- applicable documentation including organisational procedures, standards, equipment specifications, regulations, codes of practice and operational manuals.

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Build networks and develop working relationships	1.1 Formal and informal networks are established at the local, regional and national levels to support ongoing and future liaison and collaboration. 1.2 The roles and responsibilities of ***stakeholders*** are recognised and taken account of in interactions. 1.3 Working relationships are developed with stakeholders and used in a way which provides identifiable benefits to the organisation and the community from shared expertise and resources. 1.4 Dealings with stakeholders are conducted in line with ethical and professional standards to develop a relationship of trust and mutual understanding. 1.5 Feedback is obtained from other organisations and governments to inform and improve service delivery.
2. Represent the organisation	2.1 The organisation's message is imparted accurately and in a clear, concise and confident manner to gain stakeholder's understanding and commitment. 2.2 The organisation's representation is sought and promoted on external bodies. 2.3 Opportunities to promote the organisation through media, government and the community are utilised in a positive and constructive manner, in line with organisational requirements. 2.4 Advice to stakeholders is provided consistent with organisation policy, needs, quality standards and legislative responsibilities. 2.5 Advice is provided in the context of strategic planning for the organisation. 2.6 Advice is provided confidentially on matters sensitive to governments and the organisation, in line with privacy and confidentiality legislation and guidelines.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- building networks and relationships
- gaining cooperation of others
- speaking publicly

Required Knowledge

- confidentiality requirements
- goals and objectives of the organisation
- legislation
- organisation policies
- regulation
- responsibilities of three levels of government relevant to the organisation
- roles and responsibilities of other agencies and relevant organisations
- statutes impacting on the organisation

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in establishment and maintenance of networks which will promote the organisation and achieve the organisation's outcomes. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated work environment. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised***

wording in the Performance Criteria is detailed below.

Stakeholders may include:

- local
- state/territory and federal governments
- industry
- national and international associations
- other emergency management and non-government organisations e.g. Red Cross/Salvation Army/Cave Rescue
- volunteers
- community groups
- technical advisers
- consultants
- work groups and individuals internal to the organisation
- customers
- utilities

PUACOM011B Develop community awareness networks

Modification History

Release	TP Version	Comments
3	PUA12 V2.1	Editorial changes.
2	PUA12 V2	Layout adjusted. Application added.
1	PUA00 V8.1	Primary release.

Unit Descriptor

This unit covers the competency to develop appropriate networks within the community to enable the development and implementation of effective public safety awareness activities.

Application of the Unit

This unit applies to workers with a role that includes creating networks within geographically specific communities in order to advance public safety knowledge within that community. This may be relevant to managers of local public safety groups, however may be more relevant to managers responsible for supporting multiple public safety groups within a larger geographical area.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR301B Undertake community safety activities (Fire sector specific)

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop networks within the community	1.1 Individual and group ***stakeholders*** within the community, and their issues and concerns, are identified. 1.2 Rapport is established and maintained with appropriate community representatives and groups.
2. Manage public safety awareness activities	2.1 Need for activities is determined. 2.2 Cooperation and support is enlisted from industry, government and the ***community*** in planning and initiating special promotions which target the identified needs. 2.3 Representation for the organisation in public forums and community events is arranged to promote awareness and a positive public image of the organisation.
3. Facilitate community group discussions and formal meetings	3.1 Relevant ***information*** is provided to the group to facilitate its outcomes. 3.2 Contributions are sought, acknowledged and encouraged to foster group participation. 3.3 ***Strategies*** appropriate to the group are implemented to promote ongoing participation of all group members. 3.4 Objectives and agendas for meetings are negotiated to assist the community. 3.5 Meeting procedures are appropriate to the level of formality and the community context.
4. Report on public safety awareness activities	4.1 Community perceptions of organisational personnel and quality of service delivery are consistently monitored by listening to feedback, both direct and via the media. 4.2 ***Public safety awareness*** activities are evaluated.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.3 Reports detailing activities, results and recommendations are completed and processed in line with organisation guidelines.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse and evaluate the effectiveness of public safety awareness activities
- analysing community safety needs
- communicating in a group setting
- communicating with wide variety of people
- establishing networks
- evaluating activities
- facilitating group discussion and participation
- interpreting comments
- listening to questions
- media liaison
- relevant recording procedures
- reporting procedures and standards
- writing reports

Required Knowledge

- a range of presentation strategies and techniques
- activities and level of community activity of various organisations in the community
- fairs and events
- how to identify leaders/stakeholders representatives'
- legislative considerations and organisation standards relevant to communication and provision of information
- organisation policy relevant to provision of advice
- possible implications of community festivals
- possible protocols and procedures
- promotional techniques and methods
- role
- small group dynamics

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in the identification and establishment of networks relevant to the development and implementation of public safety awareness activities.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Stakeholders may include:

- local community
- service clubs
- neighbourhood watch
- ethnic groups
- festival and show committees
- sporting groups
- tourist industry
- local businesses
- chambers of commerce
- local facility management

Community includes:

- local community
- business community and will include a range of ages and a diversity of cultural, linguistic and ethnic backgrounds

Information may include:

- how to manage public safety risks

Opportunities to promote may include:

- presentations at community group gatherings
- special interest forums
- other organisation forums
- community events and festivals

© Commonwealth of Australia, 2025 Public Skills Australia

- speaking at seminars
- participating in conferences
- representing organisation on associations and committees

Public safety awareness may include:

- career promotions
- local shows
- marches and ceremonies
- organisation - specific weeks and regular state/national events e.g. fire safety week
- bluey day
- shopping mall promotions
- processes derived from models such as community fire guard
- Neighbourhood Watch and Landcare

Appropriate person may include:

- more senior personnel
- personnel with specific expertise
- community liaison officer
- other organisation and bilingual personnel

Public safety awareness activities should be evaluated in terms of:

- their costs and benefits

Identification of needs may include:

- surveys
- questionnaires
- research
- policy directive from management

Appropriate media and equipment may include:

- whiteboard
- overhead projectors
- slides
- multi-media
- electronic whiteboard
- computerised slide presentation
- organisation technical equipment
- models
- dummies
- microphones

Appropriate presentation techniques style and language may include:

- recognised group presentation techniques including audience participation
- questioning
- activities
- change of pace
- use of range of equipment
- level of formality appropriate to group/own position

© Commonwealth of Australia, 2025 Public Skills Australia

- language appropriate to age
- language level of group

Strategies may include:

- encouragement
- reinforcement
- icebreakers
- active physical involvement

Records may include:

- minutes of meetings
- diarised entries
- formal reports
- proformas

Response may include:

- refer
- provide advice
- details of where to access further information

PUACOM012B Liaise with media at a local level

Modification History

Release	TP Version	Comments
3	PUA12 V2.1	Editorial changes.
2	PUA12 V2	Layout adjusted. Application added.
1	PUA00 V8.1	Primary release.

Unit Descriptor

This unit covers the liaison with media at a low level incident and providing information about local events.

Application of the Unit

This unit applies to workers of local public safety groups who are delegated the responsibility to liaise with media in both emergency and non-emergency situations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

© Commonwealth of Australia, 2025 Public Skills Australia

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine media requirements	1.1 ***Organisational protocols*** are followed when ***liaising with the media.***
	1.2 The media's potential interest is assessed and arrangements are made to meet needs where appropriate.
	1.3 ***Operational responsibilities*** are balanced against the provision of information to the ***media.***
2. Provide information to the media	2.1 A positive image of the ***organisation*** is maintained when liaising with the media.
	2.2 Every opportunity is used to promote the organisation, its services and personnel.
	2.3 ***Relevant and succinct information*** is supplied to media when operational responsibilities are under control and when organisational representative is available to talk to the media.
3. Publicise an event	3.1 Relationship is established with media contacts.
	3.2 ***Event*** details and support materials are gathered and presented in a logical, relevant and concise manner to the media.
	3.3 Information provided to media is recorded and maintained.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- attention to detail
- communicating facts in a fluent, clear and interesting manner
- empathy with victims and operational personnel
- liaison with media and other organisation personnel
- media presentation
- prioritisation between operational responsibilities and provision of information to

© Commonwealth of Australia, 2025 Public Skills Australia

media
- public speaking
- retaining professionalism under duress

Required Knowledge

- organisational protocols relating to media liaison, for example legal and organisation requirements relating to:
  - confidentiality
  - libel
  - accuracy
  - discrimination
- role of media in disseminating information
- requirements of media to present information in a newsworthy/informative manner
- requirements of different media:
  - newspapers
  - magazines
  - radio
  - television (local, regional, national media)
- communication skills
- establishing media relationship

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in providing information to media whilst managing operational responsibilities. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated work environment. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisation may include	• Fire • Police • State Emergency Service • Emergency Management
Organisational protocols may include	• organisational policies and procedures • personal presentation being as neat as possible considering the operational circumstances • ensuring media liaison person is fully briefed and prepared • acknowledge support of other organisations • seeking advice from headquarters where appropriate • limiting comments on role of own service • relevant Federal and State legislation and regulations
Liaising with the media may include	• print (local, community, daily newspapers, magazines) • television (live or pre-recorded) • radio (live or pre-recorded)
Operational responsibilities may include	• preservation of life and property, which is the principal concern to all public safety personnel • presenting information relevant to the public
Event may include	• long service to organisation • medal presentation • awarding of certificates • donations/sponsorships/fundraising • recruiting • new equipment • VIP visit • open day • training • unusual rescues • self help information
Media's potential interest may include:	• enormous media event • standard report • human interest • in the public's interest
Media's requirements may include:	• deadlines • capabilities

© Commonwealth of Australia, 2025 Public Skills Australia

- visual and verbal requirements
- types of medium
- variation
- journalists
- amenities
- briefing area
- access to media liaison person
- bilingual personnel and bilingual information

Media may include:

- representatives from mainstream, community and ethnic television
- print and broadcast media

Organisational positive image may include:

- promote the relevance and efficiency of the service
- report the facts
- heroism of personnel
- organisational personnel are co-operative and responsive
- organisational personnel well presented
- handling media in most positive manner in even the most adverse conditions/circumstances

Media opportunity may include:

- opportunity to promote the services
- provide educational information to the public
- airplay

Relevant and succinct information may include:

- information that according to protocol is available for public release
- report facts and avoid speculation
- do not supply classified information
- use language that can be readily understood by all to avoid misinterpretation

PUAEMR001 Establish context for emergency risk assessment

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to determine an emergency risk assessment's objectives, scope, stakeholders and risk criteria. It includes identifying emergency risk assessment objectives and scope by research and consultation with stakeholders, clarifying roles and requirements with stakeholders to develop risk criteria and monitoring and reviewing an assessment.

The unit is applicable to personnel required to initiate an emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Emergency Management

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify objectives and scope by research and	**1.1** Objectives and scope are identified using emergency risk management standards and guidelines

© Commonwealth of Australia, 2025 Public Skills Australia

	consultation	
		1.2 Stakeholder roles and required scope inputs are determined, in accordance with organisational policies and procedures
		1.3 Budget, timeframe and schedule for research and consultation are determined, in accordance with organisational policies
		1.4 Community information is obtained, in accordance with organisational policies and procedures
2	**Identify and consult with stakeholders**	**2.1** Stakeholders are identified, in accordance with organisational policies and communication procedures
		2.2 Existing and potential liaison networks are identified and evaluated for relevance
		2.3 Stakeholder networks are developed using a range of strategies
		2.4 Communication and consultation are established, in accordance with organisational policies and procedures
		2.5 Communication options are evaluated and selected to develop a communication plan
3	**Clarify roles and requirements with stakeholders**	**3.1** Stakeholder roles and their participation are clearly defined and emphasised in seeking their cooperation
		3.2 Stakeholders are informed of the aims, objectives, risk management context and structure within which they must operate
		3.3 Stakeholder needs are determined with conflicting requirements being identified, recorded and communicated to relevant personnel
4	**Develop risk criteria with stakeholders**	**4.1** Social, environmental, financial and timeframe constraints are identified in consultation with stakeholders
		4.2 Legal, technical and political considerations are identified in consultation with stakeholders
		4.3 Reasons and selection of criteria are negotiated and agreed with stakeholders

© Commonwealth of Australia, 2025 Public Skills Australia

	4.4	Risk criteria and practical constraints are determined taking into account the community's acceptance of risk
	4.5	Community expectations of acceptable risk are established
5 Monitor and review	**5.1**	Hazard and risk assessment context and evaluation criteria are monitored, in accordance with organisational policies and procedures
	5.2	Risk assessment evaluation criteria are reviewed, in accordance with industry standards and guidelines

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAEMR022 Establish context for emergency risk assessment.

Assessment Requirements for PUAEMR001 Establish context for emergency risk assessment

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least two separate occasions and includes

- analysing stakeholder acceptance of risk
- clarifying roles and requirements with stakeholders
- communicating and consulting in a group context
- communicating with relevant personnel
- developing risk criteria with stakeholders
- documenting emergency risk assessment process outcomes
- facilitating of group stakeholder processes
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- identifying and consulting with stakeholders
- identifying objectives and scope by research and consultation
- implementing risk assessment control measures
- monitoring and reviewing emergency risk assessment
- negotiating with stakeholders
- researching geographic, demographic and socio-economic analysis
- solving problems in accordance with organisational policies and procedures

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of

- community demographic information including
  - cultural makeup and mix
  - demographic measures
  - local economy and industry makeup and interdependencies
  - socio-economic measures
- emergency risk management concepts and principles

© Commonwealth of Australia, 2025 Public Skills Australia

- hazards and practical constraints including
  - arrangements, roles and responsibilities set down in existing facility emergency response plan
  - availability of technical expertise, technology and equipment
  - budgets, time, availability and capability of personnel
  - land use planning policy, authority and regulation
  - legislation covering emergency management, environmental management, safety standards and local government regulations
  - limited community knowledge of emergency risk management processes and benefits
  - political, social and cultural considerations
- industry standards and guidelines
- legislative and regulatory requirements relevant to emergency risk management
- organisational documentation, policies and procedures including
  - arrangements specified in legislation
  - existing disaster plans, agreements or memoranda of understanding
  - facility emergency response plan
  - organisational or jurisdictional emergency risk management policies or procedures
  - Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- risk criteria including
  - how likelihood will be defined
  - how the level of risk is to be determined
  - level at which risk becomes acceptable or tolerable
  - nature and types of causes and consequences that can occur and how they will be measured
  - risk mitigation processes
  - timeframes of the likelihood and/or consequences
  - views of stakeholders
  - whether combinations of multiple risks should be considered and if so how and which combinations should be considered
- stakeholders including
  - client, community and industry groups
  - decision makers
  - elected officials
  - non-government organisations
  - public
  - public and private sector organisations
  - staff

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include

© Commonwealth of Australia, 2025 Public Skills Australia

requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

PUAEMR002 Assess emergency risk

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to identify, analyse and evaluate risks to determine which need treatment, and the treatment priorities. It includes identifying, analysing and evaluating risk and monitoring and reviewing emergency risks to a community.

The unit applies to personnel undertaking an emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify risk	**1.1** Sources of risk are identified by considering the interaction of hazards, communities and the environment

© Commonwealth of Australia, 2025 Public Skills Australia

	1.2	Elements at risk are identified, in accordance with organisational policies and procedures
	1.3	Stakeholders are consulted throughout the risk assessment process
	1.4	Risk statements describing consequences are documented, in accordance with organisational policies and procedures
2 Analyse risk	**2.1**	Risks are analysed by considering the likelihood of consequences occurring
	2.2	Vulnerability of communities and environments is determined by analysing their susceptibility and resilience to risks
	2.3	Risks are rated, in accordance with organisational procedures and agreed risk probability criteria
3 Evaluate risk	**3.1**	Risks requiring additional analysis or treatment are determined and documented
	3.2	Tolerability and acceptability of risks are agreed with stakeholders
	3.3	Risk treatments are prioritised using agreed risk criteria
4 Monitor and review	**4.1**	Hazard and risks assessments are monitored, in accordance with relevant standards and guidelines
	4.2	Evaluated risks assessments are reviewed and reported, in accordance with industry standards and organisational guidelines

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for PUAEMR002 Assess emergency risk

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- analysing qualitative and quantitative risk
- analysing risk and probability
- demonstrating appropriate methods to identify risk, producing risk statements and applying risk criteria in consultation with stakeholders
- evaluating risk
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- identifying hazards and associated risks
- identifying sources of risk to the social, built, economic and natural environments
- identifying stakeholders including negotiating with stakeholders
- monitoring and reviewing existing emergency risk assessments
- using analysis techniques
- using emergency risk modelling processes to estimate risk

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- application of analysis techniques including spatial analysis
- concepts of credible consequence level, likelihood rating, confidence rating and as low as reasonably practicable principles
- consultation with stakeholders about risk criteria
- emergency risk management concepts and principles including industry standards
- jurisdiction or organisational emergency risk management principles and guidelines
- methods to identify risk including tolerable and acceptable risks
- organisational documentation, policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements and facility emergency response plans
- production of risk statements

© Commonwealth of Australia, 2025 Public Skills Australia

- research, demographic and economic analysis techniques
- risk criteria including
  - how likelihood will be defined
  - level at which risk becomes acceptable or tolerable
  - nature and types of causes and consequences that can occur and how they are measured
  - risk mitigation and how the level of risk is to be determined
  - timeframe of the likelihood or consequences
  - view of stakeholders
  - whether combinations of multiple risks should be considered and if so how and which combinations should be considered
- risk identification tools
- risk statements and risk register
- sources of risk including
  - built environment failures
  - commercial and legal relationships
  - disease including plant, animal or human
  - economic systems and relationships
  - human behaviour
  - natural events
  - political circumstances
  - technology and technical issues, management activities and controls
- structure of risk criteria and the application of scenario dynamics including how a hazard creates consequences

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

PUAEMR003 Develop treatment options for emergency risk

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Previously deleted unit reinstated.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to determine a range of treatment options which can be used to reduce emergency risk. It includes identifying, evaluating and recommending treatment options and developing treatment plans.

The unit applies to personnel who are part of a working group developing treatment options during an emergency risk assessment with a community group.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Emergency Management

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify treatment options	**1.1** Emergency risk treatment objectives are identified, in consultation with stakeholders

© Commonwealth of Australia, 2025 Public Skills Australia

	1.2	Existing emergency risk treatment options are identified through research and stakeholder consultation
	1.3	Range of potential emergency risk treatment options are identified through research and stakeholder consultation
2 Evaluate treatment options	**2.1**	Evaluation methods are agreed with stakeholders, in accordance with organisational procedures
	2.2	Feedback on likely implications and impact of emergency risk treatment options is obtained from stakeholders
	2.3	Residual emergency risks are assessed for tolerability or acceptance
	2.4	Cost benefit analysis is completed for each risk treatment option, in accordance with organisational procedures
3 Recommend treatment options	**3.1**	Recommended treatment options including implementation responsibilities are agreed, in consultation with stakeholders
	3.2	Recommended treatment options and residual emergency risks are documented, in accordance with organisational policies and procedures
	3.3	Recommended treatment options are submitted for approval, in accordance with organisational policies and procedures
4 Develop treatment plan	**4.1**	Treatment options, resources, milestones, budgets, reporting procedures, roles and responsibilities for implementation are identified
	4.2	Communication and project management strategies are developed with stakeholders, in accordance with organisational procedures
	4.3	Treatment plan implementation issues are identified and contingencies are developed, as required
	4.4	An agreed treatment plan is documented and submitted for approval to authorised personnel, in accordance with organisational policies and procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAEMR024 Develop treatment options for emergency risk.

Links

Companion Volume Implementation Guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf

Assessment Requirements for PUAEMR003 Develop treatment options for emergency risk

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Previously deleted unit reinstated.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least two occasions and includes

- determining residual risks
- developing treatment plans
- evaluating treatment options
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- identifying treatment options for emergency risk including conducting cost benefit analysis for each risk treatment option
- researching potential treatment options including recommending treatment options
- using evaluation methods
- working with stakeholders to generate an agreed list of recommended treatment options

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- emergency risk management concepts and principles including industry standards
- evaluation methods including
  - analysis of treatment effectiveness
  - first pass cost benefit analysis
  - legal, regulatory and compliance impact
  - potential to create new or secondary risks
  - stakeholder acceptability
- legislative and regulatory requirements relevant to emergency risk management
- organisational documentation, policies and procedures including
  - arrangements specified in legislation

© Commonwealth of Australia, 2025 Public Skills Australia

  - existing disaster plans, agreements or memoranda of understanding
  - facility emergency response plan
  - organisational or jurisdictional emergency risk management policies or procedures
  - WHS/OHS requirements including risk mitigation
- potential stakeholders
- range of options for treating emergency risk
- risk treatment options including
  - a hazard impacting on elements at risk
  - avoidance of the risk
  - changing the consequences of an identified hazard impact
  - changing the likelihood of an initiating event or source of risk occurring
  - removing a risk source
  - retaining the risk based on an informed decision
  - sharing the risk
- submissions
- techniques to facilitate evaluating residual risk including cost benefit analysis for each risk treatment option

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Candidates must demonstrate an ability to work with stakeholders and generate an agreed list of recommended treatment options in an appropriate format. They are expected to present evidence from at least two different contexts, one of which may be simulated.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

PUAEMR004 Manage risk treatment implementation

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to communicate, facilitate and review implementation of selected risk treatments. It includes confirming implementation context, developing implementation plan, communicating the treatment plan, facilitating treatment plan implementation and monitoring and reviewing treatment plan implementation.

The unit applies to managers or members of project teams responsible for implementing a risk treatment plan who are working at local, regional or state level organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Emergency Management

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Confirm implementation context	**1.1** Project drivers, triggers, risks, risk management contexts, treatment options, priorities and practical constraints are clarified
	1.2 Applicable policies and procedures are identified

© Commonwealth of Australia, 2025 Public Skills Australia

	1.3	Key stakeholders are identified along with their potential interests, sensitivities, roles and responsibilities
2 Develop implementation plan	**2.1**	Risks to be treated and current treatment options are confirmed, in accordance with organisational policies and procedures
	2.2	Performance criteria for assessing the effectiveness of treatment implementation are established, in consultation with stakeholders
	2.3	Treatment actions, resources required, milestones, budget, reporting procedures and roles and responsibilities of project team members are identified
	2.4	Implementation issues are identified and contingencies are developed, as required, in accordance with organisational policies
	2.5	An agreed treatment plan is documented and submitted for approval, in accordance with organisational policies and procedures
3 Communicate the treatment plan	**3.1**	Processes to effectively consult and communicate are selected for implementation
	3.2	Consultation plan is developed and implemented, in accordance with organisational procedures
4 Facilitate treatment plan implementation	**4.1**	Treatment tasks and activities are allocated, in accordance with the implementation plan
	4.2	Communication between working group members is maintained
	4.3	Stakeholders are kept informed of progress, performance and any proposed variations in strategy or implementation
	4.4	Agreed treatment plan variations are planned, assessed and presented to accommodate changed circumstances or to achieve more effective outcomes
5 Monitor and review treatment plan implementation	**5.1**	A review process is established, in accordance with organisational policies and in consultation with stakeholders
	5.2	Effectiveness of treatment activities, adequacy of resources, project progress and expenditure are

© Commonwealth of Australia, 2025 Public Skills Australia

monitored against plans and are recorded and reported

5.3 Implementation plans are adjusted, as required, following the review process

5.4 Adjustments to implementation plans are communicated to stakeholders, in accordance with treatment plan

5.5 Residual risk is re-evaluated after treatment to determine whether to accept the risk or reassess the risk, in accordance with the treatment plan

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAEMR025 Manage risk treatment implementation.

Assessment Requirements for PUAEMR004 Manage risk treatment implementation

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least two separate occasions and includes

- applying a range of media communication and methods to communicate with stakeholders
- communicating treatment plan
- confirming implementation context
- developing implementation plan
- facilitating treatment plan implementation
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- identifying practical constraints for existing control measures with stakeholders
- monitoring and reviewing treatment plan implementation
- stakeholder networking and relationship building
- working with stakeholder groups

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- analytical, problem solving and decision making techniques to facilitate monitoring progress against targets
- emergency risk management concepts and principles including industry standards
- jurisdiction and organisational documentation and reporting procedures
- jurisdictional and organisational responsibilities for implementing risk treatment options
- legislative and regulatory requirements relevant to implementing risk treatments
- options for communicating with stakeholders
- organisational policies and procedures including
  - arrangements in legislation
  - existing disaster plans, agreements and/or memorandums of understanding
  - facility emergency response plan

© Commonwealth of Australia, 2025 Public Skills Australia

    - local planning regulations, development controls and environmental plans
    - organisational or jurisdictional emergency risk management policies or procedures
    - Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation
- performance criteria for assessing treatment implementation including
    - continuous monitoring of maintenance of equity
    - continued involvement of stakeholders
    - cost effectiveness of treatment
    - evaluation in terms of actual risk reduction
    - evaluation of need for redefinition of policy
    - feedback mechanism
    - consideration of change that takes place over time
- practical constraint requirements and context including
    - arrangements, roles and responsibilities set down in existing facility emergency response plans
    - availability of technical expertise, technology and equipment
    - budgets, time, availability and capability of people
    - land use planning
    - legislation covering emergency and environmental management, safety standards and local government regulations
    - limited community knowledge of emergency risk management processes and benefits
    - political, social and cultural considerations

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Candidates must demonstrate that they have developed criteria to monitor implementation progress, report on progress and communicate and consult with stakeholders. They must present evidence from at least two different contexts, one of which may be simulated.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations

PUAEMR005 Treat operational risk

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to identify, plan and implement treatment options to reduce risk. It includes making risk decisions by identifying, assessing and implementing risk control measures, treatment options and monitoring and reviewing risk mitigation processes.

The unit applies to personnel working in a relatively simple and routine workplace in which organisational policy and procedures are used. They would normally have local supervisory and/or management responsibility and will apply appropriate solutions to a variety of predictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

PUAEMR027 Assess operational risk

Competency Field

Emergency Management

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Make risk decisions	**1.1** Hazards are identified and risks are assessed, in accordance with operational policies and procedures

© Commonwealth of Australia, 2025 Public Skills Australia

	1.2	Risk that is determined as unacceptable is documented and noted for treatment
2 Identify and select treatment options	**2.1**	Treatment options of known risks are identified and confirmed, in accordance with organisational standards, guidelines and supervisor's guidance
	2.2	Treatment options under consideration are evaluated for effectiveness within the given context
	2.3	Selected treatment options are documented and communicated, in accordance with organisational policies and procedures
3 Implement treatment options	**3.1**	Treatment plans incorporating selected options are implemented, in accordance with organisational policies and procedures
	3.2	Treatment plans are communicated within the workplace, in accordance with organisational policies and procedures
4 Monitor and review risks and process	**4.1**	Effectiveness and efficiency of the treatment plan is monitored, reviewed and recorded, in accordance with organisational policies and procedures, to ensure compliance and validity
	4.2	Residual risk is calculated and communicated to supervisors, so that a decision can be made whether to accept the risk or re-establish the risk management process
	4.3	Treatments are adjusted and communicated following the review process

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for PUAEMR005 Treat operational risk

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least three separate occasions and includes

- communicating with personnel at all levels of organisation and risk management specialists
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- implementing and monitoring designated actions
- implementing treatment options including identifying and selecting treatment options
- interpreting information and data to identify areas for improvement
- making observations and recording outcomes accurately
- managing simple project implementation
- monitoring and reviewing risks mitigation processes
- undertaking basic research to access relevant information and data
- using consultation and negotiation skills in relation to developing plans

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- duty of care
- communication techniques
- legislation including regulations, codes of practice, associated standards and guidance material
- organisational documentation, policies, procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- guidelines relevant to risk
- risk assessment including
  - benefits to individual and organisation
  - cost benefits from implementation of treatment
  - cost of implementing treatment option
- risk management terminology and language relevant to industry standards including

© Commonwealth of Australia, 2025 Public Skills Australia

    - acceptable risk
    - residual risk
    - unacceptable risk
- specified methods or tools for use in the identification and analysis of risk
- team work principles and strategies
- techniques and methods used to identify or analyse risk management information
- techniques for giving and receiving feedback in a constructive manner
- treatment options for risks including
    - avoidance of risk
    - changing consequences of an identified hazard impact
    - changing likelihood of an initiating event or source of risk occurring
    - hazard impacting on elements at risk
    - removing a risk source
    - retaining risk based on an informed decision
    - risk mitigation
    - sharing risk
    - treatment options may
- treatment plans including
    - budgeting
    - expected outcome of treatments
    - performance measures
    - responsibilities
    - review process to be used
    - schedules

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholder involvement throughout the treatment process and that an informed analysis and selection of treatment options has been

© Commonwealth of Australia, 2025 Public Skills Australia

undertaken using the methodology and procedures approved by the organisation.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Establish the risk context	**1.1** Risk assessment objectives and scope are identified using organisational risk management procedures, industry standards and guidelines
	1.2 Risk criteria are identified and confirmed, in accordance with organisational policies, procedures or with

© Commonwealth of Australia, 2025 Public Skills Australia

		supervisor's guidance
	1.3	Structure for planning required to conduct a risk assessment is determined
	1.4	Stakeholder aims and objectives are identified and recorded, in accordance with organisational procedures and guidelines
2 Identify risk	**2.1**	Sources of risk which affect the situation or objectives are identified and recorded, in consultation with stakeholders
	2.2	Risks are identified using a specified methodology or tool, in accordance with organisational procedures and guidelines
	2.3	Risk statements describing consequences are generated, in accordance with organisational procedures
3 Analyse risk	**3.1**	Risks are analysed by estimating the likelihood of consequences, in accordance with organisational procedures
	3.2	Levels of risk are determined, documented and communicated, in accordance with organisational policies and procedures
4 Evaluate risk	**4.1**	Levels of risks are prioritised for control, in consultation with stakeholders
	4.2	Risk assessment rating is compared to established risk evaluation criteria and is communicated to the supervisor
	4.3	Risks are monitored and reviewed until appropriate treatment measures have been implemented

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Assessment Requirements for PUAEMR006 Assess operational risk

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least three separate occasions and includes

- analysing organisational information and data
- communicating with stakeholders
- contributing to the assessment of resources
- establishing risk context and identifying, analysing and evaluating risk
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- interpreting information and data to identify areas for improvement
- making observations including interactions between personnel, their activities, equipment, environment and systems
- preparing detailed reports for a range of target groups including WHS/OHS or risk committee, WHS/OHS representatives, managers and supervisors
- undertaking basic research including accessing information and data
- using consultation and negotiation skills in relation to developing plans and implementing and monitoring designated actions

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of

- communication techniques including language style and active listening
- concept of duty of care in emergency risk management
- organisational documentation, policies, procedures and guidelines including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- principles of operational risk assessment
- risk management terminology and language
- risk profiles or criteria including
  - how likelihood will be defined
  - level at which risk becomes acceptable or tolerable

© Commonwealth of Australia, 2025 Public Skills Australia

  - nature and types of causes and consequences that can occur and how they will be measured
  - risk mitigation and how level of risk is determined
  - roles and responsibilities in assessing risk
  - timeframes of likelihood or consequences
  - views of stakeholders
  - whether combinations of multiple risks should be considered and if so how and which combinations should be considered
- specified methods and tools used in the identification and analysis of risk
- structure and forms of legislation including regulations, codes of practice, industry standards and guidance material
- techniques and methods used to identify and analyse information

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholder involvement throughout the process and that an informed analysis of the risks has been undertaken using tools and methodology approved by the organisation.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

PUAEMR009 Facilitate emergency risk assessment

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Clarification of text, addition/deletion of Performance Criteria and minor changes to Knowledge and Performance Evidence.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to facilitate the development of an agreed list of prioritised risks, using an emergency risk management process developed in cooperation with the community, that is consistent with standards. It includes identifying, defining and engaging with entities, establishing context and risk criteria, identifying and analysing risk, evaluating risks, promoting ongoing commitment to process and outcomes and monitoring and reviewing processes and outcomes.

The unit applies to personnel who facilitate emergency risk assessments with a community or part of a community and who will act as a project manager or facilitator for working groups that are used to conduct emergency risk assessments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential	Performance criteria describe the performance needed to

© Commonwealth of Australia, 2025 Public Skills Australia

outcomes.	demonstrate achievement of the element.
1 Identify, define and engage entities	**1.1** Entities are defined and identified
	1.2 Known risks, stakeholder/entity analysis, specialist expertise and community and organisational sources of information are used to identify communication and consultation networks that may be useful
	1.3 Working group is established with an appropriate balance of expertise, representation and authority included
	1.4 Emergency risk principles, terminology and processes are explained to and further developed with the community
	1.5 Implementation of emergency risk management processes are negotiated with relevant entities
	1.6 Communication strategies are selected to develop a communication plan
2 Establish context and risk criteria	**2.1** Legislative, regulatory and organisational requirements including policies, procedures, standards and desired outcomes are identified
	2.2 Objectives, expectations and scope of risk assessment are identified using emergency risk management standards and guidelines
	2.3 Information on community characteristics, safety expectations, risk perceptions, roles and the requirements of entities is collected
	2.4 Practical constraints, existing treatment strategies and expectations are reviewed when developing the risk criteria
	2.5 Draft criteria and supporting explanations are circulated for comment
	2.6 Processes for accountability and communication of accurate and consistent information to entities are developed and applied
3 Identify and analyse risks	**3.1** Sources of risk are identified through interaction of hazards, communities and the environment

© Commonwealth of Australia, 2025 Public Skills Australia

	3.2	Community elements at risk are identified
	3.3	Risk vulnerability of communities and the environment is determined according to likelihood, consequence and confidence
	3.4	Risk statements describing consequences are analysed and documented
	3.5	Risks are analysed in accordance with organisational procedures
	3.6	Risks and risk statements are rated and prioritised in accordance with agreed risk criteria
	3.7	Entities are consulted and feedback is documented
	3.8	Promotion of the emergency risk project is authorised before being communicated to others
4 Evaluate risks	**4.1**	Risks requiring additional analysis or treatment are determined
	4.2	Tolerability and acceptability of risks are agreed with entities
5 Promote ongoing commitment to process and outcomes	**5.1**	Consultation is undertaken throughout all stages of the emergency risk process
	5.2	Various communication and engagement strategies are used in accordance with organisational procedures and community expectations
	5.3	Stages of the risk assessment process, decisions taken and outcomes are documented
	5.4	Information is provided to the community taking into consideration language, literacy and cultural needs
6 Monitor and review process and outcomes	**6.1**	Emergency risk assessment is completed and documented
	6.2	Data and contact information for entities is reviewed regularly and updated
	6.3	Review of the risk register is undertaken in accordance with the schedule or in response to emergency risk

© Commonwealth of Australia, 2025 Public Skills Australia

drivers or triggers

6.4 Opportunities for improving the emergency risk assessment plan and processes are reported and action is taken

6.5 Allocated tasks are completed on time, whilst encouraging entities to help achieve common goals

6.6 Documentation, records, confidentiality and privacy of information is maintained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAEMR009B Facilitate emergency risk assessment.

Assessment Requirements for PUAEMR009 Facilitate emergency risk assessment

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Clarification of text, addition/deletion of Performance Criteria and minor changes to Knowledge and Performance Evidence.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all requirements of the elements and performance criteria on at least one occasion and includes

- applying organisational policies and procedures
- calculating probability and consequences from sources of risk for vulnerable communities and the environment
- communicating emergency risk management concepts and processes and promoting its benefits to entities
- defining and engaging the community
- demonstrating decision making techniques
- establishing context and risk criteria
- evaluating environmental assets throughout risk assessment during risk assessment
- identifying, analysing and evaluating risks
- locating and interpreting community information
- monitoring and reviewing emergency risk assessment processes and outcomes
- promoting commitment and ownership for emergency risk assessment processes and outcomes
- summarising and explaining key information.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all requirements of the elements and performance criteria and includes knowledge of

- community entities
- emergency risk management concepts, plans and principles
- evaluation methods and techniques
- how to identify and define entities

© Commonwealth of Australia, 2025 Public Skills Australia

- how to locate and interpret entity information
- organisational documentation, policies and procedures
- practical constraints including political, social, environmental and cultural considerations
- risk assessment standards
- risk criteria
- sources of risk for vulnerable communities and the environment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of exercises and/or case studies
- appropriate materials and equipment currently used in industry
- applicable documentation including organisational procedures, standards, equipment specifications, regulations, codes of practice and operational manuals.

PUAEMR011 Manage and evaluate emergency management exercises

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to manage and evaluate activities which exercise elements of emergency management arrangements. It includes preparing and managing exercise activities to any context in which an emergency management exercise is appropriate and evaluating outcomes against exercise objectives.

Emergency management exercises may be used in any context where there is a requirement to plan for or manage an emergency. An exercise scale can range from a small activity in a volunteer emergency response unit to a major evacuation exercise for an industrial plant.

The unit applies to personnel who are responsible for implementing and evaluating pre-designed emergency management exercises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Emergency Management

Unit Sector

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Prepare exercise**	**1.1** Exercise documentation are reviewed to confirm governance and stakeholder requirements
		1.2 Exercise aim, objectives, activities and evaluation plan are examined and confirmed
		1.3 Relevant permissions, authorities, clearances and approvals are identified and confirmed
		1.4 Logistic requirements are identified and organised, in accordance with organisational procedures
		1.5 Communication plan is designed and implemented, in consultation with stakeholders
2	**Manage exercise activities**	**2.1** Exercise management team is formed, in accordance with organisational policies and procedures
		2.2 Communication and consultation is established and maintained with activity personnel throughout the conduct of the exercise
		2.3 Exercise site preparation and familiarisation is ensured, in accordance with the exercise plan
		2.4 Briefings are prepared and delivered to stakeholders detailing exercise objectives and activities
		2.5 Confirmation and management of logistic requirements for exercise activities are confirmed
		2.6 Exercise plan is used to initiate and facilitate the conduct and direction of the exercise
		2.7 Exercise hazards are identified, risks are continually assessed and control measures are implemented
3	**Evaluate outcomes against exercise objectives**	**3.1** Post exercise debriefings are conducted and feedback is obtained and actions are identified
		3.2 Exercise feedback is collated, recorded, analysed and issues are identified
		3.3 Exercise report, including recommendations, is prepared, in accordance with organisational procedures and is distributed to relevant stakeholders

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAEMR030 Manage and evaluate emergency management exercises.

Assessment Requirements for PUAEMR011 Manage and evaluate emergency management exercises

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least two separate occasions and includes

- building networks and relationships
- completing exercise risk and safety requirements
- consulting with stakeholders including implementing the communications plan
- determining and managing small group activities
- evaluating exercise outcomes against exercise objectives
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements and evacuation plans
- gathering and analysing feedback
- managing exercise plan and directing activity personnel
- planning and delivering briefings and debriefings
- preparing to manage emergency management exercises
- reviewing pace and intensity of an exercise
- supervising exercise activities
- working in group settings

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- budget and logistics management principles
- educational principles underpinning the design of objectives and linking those to activities
- exercise management concepts and principles
- logistic requirements including
  - accommodation
  - catering
  - equipment
  - exercise management personnel

© Commonwealth of Australia, 2025 Public Skills Australia

  - exercise role players
  - facilities
  - finance and accounting procedures
  - first aid and medical supplies and personnel
  - guest or specialist speakers or presenters
  - participants
  - transport
- organisational documentation, policies and procedures including
  - environmental management and sustainability policies
  - exercise plan
  - facility emergency response plan
  - legislation relevant to organisational operational, corporate and strategic plans
  - performance standards
  - personnel and roles
  - quality standards
  - Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) practices and guidelines
- risk and safety management principles including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in two different types of workplace operational situations, including at least one exercise that requires multi organisational exercises where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated operational situations that replicate workplace conditions.

Assessment must confirm the ability to

- ensure all permissions, authorities, clearances and approvals are obtained
- ensure all resources are available for the exercise and
- pace of the exercise proceeds appropriately to achieve its' objectives

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing

© Commonwealth of Australia, 2025 Public Skills Australia

currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

PUAEMR013 Design emergency management exercises

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to design, develop and/or modify activities that exercise elements of emergency management exercise arrangements. It includes determining exercise purpose by designing and planning exercise activities, assessing exercise risks and then planning resource allocation

Emergency management exercises are used to test emergency plans, practise responding to an emergency, develop and/or practise emergency management skills, build motivation for emergency management personnel and/or measure an organisation's ability to manage an emergency. An exercise can range from a small activity in a volunteer emergency response unit to a major evacuation exercise for an industrial plant.

The unit applies to personnel with responsibility for designing emergency management exercises. The design skills in this unit can be applied to any context in which an emergency management exercise is appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Determine exercise purpose**	**1.1** Exercise stakeholders are identified and engaged, in accordance with organisational policies and procedures
		1.2 Exercise governance arrangements are confirmed, in accordance with organisational policies and procedures
		1.3 Exercise aim is identified, in consultation with stakeholders
		1.4 Exercise objectives are confirmed as meeting identified aim
		1.5 Exercise focus is determined, based on operational outcomes, results of training needs analysis, previous exercises and evaluation reports
2	**Design and plan exercise activities**	**2.1** Planning team is established, in accordance with organisational policies and procedures
		2.2 Governance and planning meetings are held, agreements and decisions are made and outcomes are communicated to stakeholders
		2.3 Components of the exercise program are identified, developed and documented in the exercise plan
		2.4 Exercise style and activities consistent with objectives are selected, in consultation with stakeholders
		2.5 Design planning processes are undertaken with stakeholders to meet exercise objectives and components
		2.6 Exercise documentation is prepared, in accordance with organisational policies and procedures
3	**Assess exercise risks**	**3.1** Risk and safety considerations are identified and included in the planning process
		3.2 Activities which mitigate or reduce risks associated with conducting exercise activities are designed
		3.3 Exercise risk and safety management plan is prepared, in accordance with organisational policies and procedures
4	**Plan resource allocation**	**4.1** Resources to support the exercise are identified and secured

© Commonwealth of Australia, 2025 Public Skills Australia

4.2 Exercise location and/or host is identified and a commitment to achieving exercise objectives is secured

4.3 Appropriate authorisation to use resources are obtained and documented, in accordance with organisational policies

4.4 Availability and timeframes for use of resources is agreed by appropriate personnel and/or authorities

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAEMR031 Design emergency management exercises.

Assessment Requirements for PUAEMR013 Design emergency management exercises

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least two separate occasions and includes

- designing and planning exercise activities processes including
  - assessment and emergency management exercise criteria
  - background information and emergency management exercise inputs
  - briefings and debriefings
  - design of emergency management exercise scenario and activities
  - development and review of key performance indicators
  - duration of exercise activities
  - emergency management exercise contingency plans
  - emergency management exercise documentation
  - emergency management exercise management structure
  - emergency management exercise meetings
  - identifying and managing risks
  - issuing notifications to affected stakeholders
  - scoping of organisations and agencies participating and the level at which they are participating
  - seasonal weather considerations
  - securing resources
- determining emergency management exercise purpose and objectives
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including assessing emergency management exercise risks
- interpreting organisational needs to develop measurable, achievable objectives
- liaising and communicating with other organisations and agencies
- managing small group workshops and activities
- planning and delivering briefings and debriefings
- planning resource allocation
- preparing exercise documentation

© Commonwealth of Australia, 2025 Public Skills Australia

- working in group settings

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- components of emergency management exercises including
  - activity plan
  - aim and objectives
  - authorities, permissions and governance
  - budget and logistics plan
  - debrief plan
  - detailed schedule of activities
  - evaluation or assessment plan
  - evidence collection tools and templates
  - exercise name
  - location
  - risk and safety management plan
  - scope or purpose statement
- educational principles underpinning the design of emergency exercise objectives and activities
- exercise management concepts and principles
- incident management principles
- jurisdictional emergency management arrangements
- legislative and regulatory arrangements for using resources such as land, buildings, equipment and volunteers
- organisational documentation, policies and procedures including WHS/OHS requirements and facility emergency response plans
- risk and safety management principles including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational contexts or exercise styles, including at least

© Commonwealth of Australia, 2025 Public Skills Australia

one exercise that requires multi-organisational input and of which one may be simulated, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment must confirm the ability to

- bring together an effective exercise design and planning team
- facilitate the construction of realistic, meaningful and safe activities that address the exercise aim and objectives

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

PUAEMR022 Establish context for emergency risk assessment

Modification History

Release	TP version	Comments
1	PUA12 V1	First release.

Unit Descriptor

This unit describes the outcomes required to determine an emergency risk assessment's objectives, scope, stakeholders, and risk criteria.

Application of the Unit

This unit applies to people required to initiate an emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

© Commonwealth of Australia, 2025 Public Skills Australia

of Competency.	detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
1. Identify objectives and scope by research and consultation	1.1 Objectives and scope are identified using emergency risk management ***standards and guidelines.***
	1.2 ***Stakeholder*** roles and required inputs are determined in accordance with ***policies and procedures.***
	1.3 Budget, timeframe and schedule for research and consultation are determined.
	1.4 Information about communities is obtained.
2. Identify and consult with stakeholders	2.1 Stakeholders are identified.
	2.2 Existing and potential liaison networks are identified and evaluated for relevance.
	2.3 Stakeholder networks are developed using a range of strategies.
	2.4 Communication and consultation are established.
	2.5 Communication options are selected to develop a communication plan.
3. Clarify roles and requirements with stakeholders	3.1 Stakeholders' roles and the need for their input are clearly defined and emphasised in seeking their cooperation.
	3.2 Stakeholders are informed of the aims, objectives, risk management context and structure within which they must operate.
	3.3 Stakeholders' needs are determined and conflicting needs identified and noted.
4. Develop risk criteria with stakeholders	4.1 Social, environmental, financial and timeframe needs are identified in consultation with stakeholders.
	4.2 Legal, technical and political considerations are identified in consultation with stakeholders.
	4.3 Reasons for, and selection of, criteria are negotiated with stakeholders and agreed upon.
	4.4 ***Risk criteria*** are recommended which take into account ***practical constraints*** and the community's

© Commonwealth of Australia, 2025 Public Skills Australia

	acceptance of risk.
	4.5 Community expectations of acceptable risk are established.
5. Monitor and review	5.1 Context and evaluation criteria are monitored in accordance with policies and procedures.
	5.2 Context and evaluation criteria are reviewed in accordance with standards and guidelines.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- stakeholder analysis
- communication and consultation in a group context
- facilitation of group processes
- negotiation
- problem solving
- project management
- research skills to conduct geographic, demographic and socio-economic analysis

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines
- legislative and regulatory requirements relevant to emergency risk management
- problem solving and decision making techniques

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Stakeholders are comprehensively identified and consulted to establish a clear context, which includes objectives, scope and risk criteria. **Consistency in performance** Candidates should be expected to present evidence from at least two different contexts, one of which may be simulated.
Context of and specific	**Context of assessment**

© Commonwealth of Australia, 2025 Public Skills Australia

resources for assessment	Evidence of competence in this unit may be collected in a simulated environment and a real environment, often as part of a larger project with concurrent assessment of other emergency risk management competencies. **Specific resources for assessment** For the demonstration of competence in this unit it will be necessary to participate in a real-world project. Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects in real or simulated environments.
Guidance information for assessment	This unit contains many transferable skills, such as communication, consultation, research and analysis skills that can be applied in the emergency risk management context. Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-world project, often in an action-learning context. This unit may be assessed with other units that address other parts of the emergency risk management process.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Standards and guidelines may include:	• AS/NZS ISO 31000:2009, Risk management—Principles and Guidelines • HB 327:2010, Communicating and consulting about risk • ISO Guide 73:2009, Risk management—Vocabulary • National Emergency, Management Committee (2010), National Emergency Risk Assessment Guidelines • jurisdictional or organisational emergency risk management policies and procedures
Stakeholders may include:	• staff • client groups • decision makers • members of the public

© Commonwealth of Australia, 2025 Public Skills Australia

	• community groups • industry groups • public and private sector organisations • non-government organisations • elected officials
Policies and procedures may include:	• arrangements specified in legislation • organisational or jurisdictional emergency risk management policies or procedures • existing disaster plans, agreements or memoranda of understanding
Information about communities may include:	• demographic measures • socio-economic measures • local economy and industry makeup and interdependencies • cultural makeup and mix
Risk criteria may include:	• the nature and types of causes and consequences that can occur and how they will be measured • how likelihood will be defined • the timeframe(s) of the likelihood and/or consequence(s) • how the level of risk is to be determined • the views of stakeholders • the level at which risk becomes acceptable or tolerable • whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered
Practical constraints may include:	• arrangements, roles and responsibilities set down in existing emergency management plans • availability of technical expertise, technology, equipment • budgets, time, availability and capability of people • land use planning policy, authority and regulation • legislation covering emergency management, environmental management, safety standards, local government regulations • limited community knowledge of emergency risk management processes and benefits • political, social and cultural considerations

PUAEMR024 Develop treatment options for emergency risk

Modification History

Release	TP version	Comments
1	PUA12 V1	First release.

Unit Descriptor

This unit describes the outcomes required to determine a range of treatment options which can be used to reduce emergency risk.

Application of the Unit

This unit applies to people who are part of a working group that develops treatment options during an emergency risk assessment with a community or part of a community. Such assessments are conducted at local, regional or state level by local governments, emergency management committees, public safety agencies, major event managers or other organisations that need to understand emergency risk to a community.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

	contingencies developed where necessary.
	4.4 An agreed treatment plan is documented and submitted for approval in accordance with organisational policies procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- Research and analysis skills to determine potential treatment options
- ability to negotiate and work effectively with stakeholder groups
- analytical techniques to determine residual risk
- analytical techniques to conduct benefit:cost analysis at an appropriate level

Required Knowledge

- emergency risk management concepts and principles included in the current National Emergency Risk Assessment Guidelines and AS/NZS ISO 31000:2009 *Risk management—Principles and Guidelines*
- legislative and regulatory requirements relevant to emergency risk management
- jurisdiction and organisational documentation and submission procedures
- analytical, problem solving and decision making techniques to facilitate evaluating residual risk and cost-benefit analysis
- geospatial databases and presentation options
- range of options for treating emergency risk

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Candidates must demonstrate an ability to work with stakeholders and generate an agreed list of recommended treatment options in an appropriate format. **Consistency in performance** Candidates should be expected to present evidence from at least two different contexts, one of which may be simulated.
Context of and specific	**Context of assessment**

PUAEMR030 Manage and evaluate emergency management exercises

Modification History

PUAEMR030 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to manage and evaluate activities which exercise elements of emergency management arrangements.

Application of the Unit

This unit applies to people who are responsible for implementing and evaluating pre-designed emergency management exercises. Emergency management exercises may be used in any context where there is a requirement to plan for, or manage an emergency. The exercise scale can range from a small activity in a volunteer emergency response unit to a major evacuation exercise for an industrial plant. The skills in this unit can be applied to any context in which an emergency management exercise is appropriate.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to manage the exercise	1.1 Exercise ***documentation*** reviewed to confirm governance and ***stakeholder*** requirements. 1.2 Exercise aim**,** objectives, activities and evaluation plan are confirmed. 1.3 Relevant permissions, authorities, clearances and approvals are identified and confirmed. 1.4 ***Logistic requirements*** are identified and organised. 1.5 Communication plan is designed and implemented in consultation with stakeholders.
2. Manage exercise activities	2.1 Exercise management team is formed where required. 2.2 Communication and consultation is established with ***activity personnel*** and maintained throughout the conduct of the exercise. 2.3 Exercise site preparation and familiarisation are ensured in accordance with the exercise plan. 2.4 Briefings are prepared and delivered to stakeholders reflecting exercise objectives and activities. 2.5 Confirmation and management of logistic requirements required to conduct exercise activities is ensured. 2.6 The exercise plan is used to initiate and facilitate the conduct and direction of the exercise. 2.7 Risk is managed throughout the exercise.
3. Evaluate outcomes against exercise objectives	3.1 Post-exercise debriefings are conducted and feedback is gathered. 3.2 Exercise feedback is collated, recorded, analysed and issues identified. 3.3 An ***exercise report,*** including recommendations, is prepared to organisational standards and distributed to stakeholders.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- manage small-group activities
- build effective networks and relationships
- work effectively in a group setting
- consult with stakeholders
- manage and direct activity personnel
- plan and deliver briefings and debriefings
- manage the pace and intensity of the exercise
- manage risk and safety
- gather and analyse feedback

Required Knowledge

- exercise management concepts and principles
- educational principles underpinning the design of objectives and linking those to activities
- legislative, regulatory and insurance arrangements relevant to using resources, such as land, buildings, equipment, staff and volunteers
- relevant organisational policies and procedures (such as legislation relevant to the operation/ incident/response; legislation relevant to the organisation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- problem solving and decision making techniques
- project management principles
- project management principles
- risk and safety management principles
- budgeting and logistic management principles

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • ensure all permissions, authorities, clearances and approvals are obtained,

© Commonwealth of Australia, 2025 Public Skills Australia

- ensure all resources are available for the exercise, and
- the pace of the exercise proceeds appropriately to achieve the objectives

Consistency in performance

Candidates should be expected to present evidence of managing two different types of exercise, including at least one exercise that requires multi-agency or organisation input.

Context of and specific resources for assessment

Context of assessment

This competency cannot be assessed in a simulated environment.

Specific resources for assessment

- Access is required to real-life exercises, including supporting resources.

Method of assessment

This unit contains transferable skills, such as communication, consultation, and logistic management skills that can be applied to managing an emergency management exercise. Assessors may use formative assessment strategies in a simulated environment to contextualise underpinning knowledge.

Summative assessment requires application of the unit to manage exercises in the workplace. Evidence of performance can be gathered by:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Documentation may include:

- activity inputs (general and special ideas)
- activity notification
- activity management checklists
- assessor documentation

© Commonwealth of Australia, 2025 Public Skills Australia

- evaluation checklist
- evidence collection templates
- exercise injects
- general instruction
- incident action plans
- permissions and approvals risk assessments
- risk action plans
- safety instructions
- specific inputs
- timetable/schedule of events
- umpire documentation

Stakeholder may include:

- staff
- client groups
- decision makers
- members of the public
- community groups
- industry groups
- public and private sector organisations
- non-government organisations
- elected officials

Logistic requirements may include:

- catering
- equipment
- facilities
- finance and accounting procedures
- transport
- accommodation
- guest or specialist speaker(s) or presenters
- first aid and medical supplies and personnel
- exercise management personnel
- role players
- participants

Activity personnel may include:

- exercise management staff
- exercise evaluation staff
- casualty simulation staff
- role players
- public information staff
- participants' management

Exercise report may include:

- executive summary
- acknowledgements
- exercise aim and objectives
- introduction

© Commonwealth of Australia, 2025 Public Skills Australia

- exercise scenario
- sequence of events
- exercise critique (relating observations and feedback to the objectives)
- summary
- recommendations
- attachments (exercise management team, participating organisations and volunteers, referee reports, debrief notes)

Unit Sector(s)

PUAEMR031 Design emergency management exercises

Modification History

PUAEMR031 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to design, develop or modify activities that exercise elements of emergency management arrangements.

Emergency management exercises are used to test emergency plans, practise responding to an emergency, develop and/or practise emergency management skills, build motivation for emergency management personnel, and/or measure an organisation's ability to manage an emergency.

Application of the Unit

This unit applies to workers with the responsibility for designing emergency management exercises. It does not cover the skills and knowledge for implementing those designs.

Emergency management exercises can be used in any context where there is a requirement to plan for, or manage an emergency. The exercise scale can range from a small activity in a volunteer emergency response unit to a major evacuation exercise for an industrial plant. The design skills in this unit can be applied to any context in which an emergency management exercise is appropriate.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance Criteria describe the required performance

essential outcomes of a Unit of Competency.	needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine exercise purpose	1.1 Exercise ***stakeholders*** are identified and engaged. 1.2 Exercise governance arrangements are confirmed. 1.3 Exercise aim is identified in consultation with stakeholders. 1.4 ***Exercise objectives*** that meet the identified aim are determined. 1.5 ***Exercise focus*** is determined, based on operational outcomes, results of training needs analysis, previous exercises and evaluation reports.
2. Design and plan exercise activities	2.1 Planning team is established where required. 2.2 Governance and planning meetings are held, agreements and decisions are made, and outcomes are communicated to stakeholders. 2.3 ***Components of the exercise program*** are identified, developed and documented in the exercise plan. 2.4 ***Exercise style*** and activities consistent with exercise objectives are selected in consultation with stakeholders. 2.5 ***Design planning processes*** are undertaken with stakeholders to meet exercise objectives and components. 2.6 Exercise documentation is prepared.
3. Assess exercise risks	3.1 Risk and safety considerations are included in planning process. 3.2 Activities which mitigate/reduce risks associated with conducting exercise activities are designed and included. 3.3 Exercise risk and safety management plan is prepared.
4. Plan resource allocation	4.1 ***Resources*** to support the exercise are identified and secured. 4.2 Exercise host is identified and commitment to

© Commonwealth of Australia, 2025 Public Skills Australia

achieving exercise objectives is secured.

4.3 Appropriate authorisation(s) to use resources are obtained and documented.

4.4 Availability and timeframes for use of resources is agreed by appropriate authorities.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- manage small-group workshops and activities
- build effective networks and relationships
- work effectively in a group setting
- liaise and communicate with other agencies
- plan and deliver briefings and debriefings
- prepare exercise documentation
- interpret organisational needs to develop measurable, achievable objectives
- research skills to build scenarios and exercise inputs

Required Knowledge

- exercise management concepts and principles
- educational principles underpinning the design of objectives and linking those to activities
- incident management principles
- legislative and regulatory arrangements relevant to using resources, such as land, buildings, equipment and volunteers
- problem solving and decision making techniques
- project management principles
- risk and safety management principles
- budgeting and logistic management principles
- jurisdictional emergency management arrangements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for Assessment must confirm the ability to:

© Commonwealth of Australia, 2025 Public Skills Australia

assessment and evidence required to demonstrate competency in this unit

- bring together an effective exercise design and planning team
- facilitate the construction of realistic, meaningful and safe activities that address the exercise aim and objectives

Consistency in performance

Candidates should be expected to present evidence from at least two different contexts or exercise styles, including at least one exercise that requires multi-agency or organisation input and of which one may be simulated

Context of and specific resources for assessment

Context of assessment

Competency should be assessed on-the-job or in a simulated workplace environment.

Specific resources for assessment

Access is required to a real-life exercise design project.

Method of assessment

Assessors should use formative assessment strategies in a simulated environment to contextualise underpinning knowledge. Summative assessment requires application of the unit in a real-life project, often in an action-learning context.

Assessment may occur in a work environment or in a simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Stakeholders may include:

- staff
- client groups
- decision makers
- members of the public

© Commonwealth of Australia, 2025 Public Skills Australia

- community groups
- industry groups
- public and private sector organisations
- non-government organisations
- elected officials

Exercise objectives may include:

- assessing and/or demonstrating the capability of individuals, teams, systems and/or arrangements
- assessing or auditing system(s) performance
- developing new skills
- evaluating emergency management plans
- evaluating individuals/teams/facilities/systems
- evaluating risk treatment strategies
- exploring issues
- improving team cohesion
- meeting legislative or regulatory requirements
- practising skills, systems or procedures
- promoting awareness
- sharing information
- validating training objectives or learning outcomes

Exercise focus may include:

- improving systems, plans or arrangements
- developing/training participants
- sharing information
- testing or auditing systems, plans, arrangements, facilities, and/or individual or team competencies

Components of the exercise program may include:

- exercise name
- authorities, permissions and governance
- scope or purpose statement
- aim and objectives
- activity plan
- detailed schedule of activities
- location (s)
- risk and safety management plan
- budget and logistics plan
- evaluation/assessment plan
- evidence collection tools/templates
- debrief plan

Exercise style may include:

- case study
- discussion/desktop exercises
- hypothetical exercise/scenario analysis
- distributed interactive exercise
- field exercise
- functional centre exercises

PUAFER004 Respond to facility emergencies

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required by occupants to recognise emergencies in a facility, to report emergencies and to take appropriate action during facility emergency situations. It includes preparing for emergency situations, reporting emergencies, responding to emergency warnings and advice, choosing the most appropriate course of action and evacuating from a danger area.

The unit has been developed to cover the facilities as specified in Australian Standard (AS) 3745 and AS4083. For this unit, as covered by AS3745 and AS4083, occupants are people attending a facility on a permanent or temporary basis such as an employee, contractor, student, resident but not a visitor or patient and a facility is a building, structure or workplace that is, or may be, occupied by people (occupants).

All aspects of the unit must be undertaken in accordance with legislative requirements, organisational policies and procedures and accepted safe practices. It applies to occupants who are required to be 'emergency aware' in their facility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

outcomes.	demonstrate achievement of the element.
1 Prepare for emergency situations	**1.1** Facility emergency procedures to be used by occupants are identified and followed
	1.2 Emergency resources in a facility are identified and located
	1.3 Emergency response exercises are participated in, in accordance with facility emergency procedures
2 Report emergencies	**2.1** Emergencies are identified and reported, in accordance with facility emergency procedures
	2.2 Occupants in any immediate danger from an emergency or potential emergency are alerted, in accordance with facility emergency procedures
3 Respond to emergency warnings and advice	**3.1** Emergency warnings and advice are responded to, in accordance with facility emergency procedures
	3.2 Instructions from emergency control organisation or attending emergency services are complied with during an emergency
4 Choose most appropriate course of action	**4.1** Emergencies that require evacuation are determined
	4.2 Emergencies that require occupants to shelter-in-place (no evacuation) are determined
	4.3 Shelter or refuge is assessed to determine suitability and sustainability when a shelter-in-place response is the preferred option
	4.4 Emergencies that require lockdown are determined
	4.5 Appropriate cover is assessed when lockdown is required
5 Evacuate from danger area	**5.1** Need to evacuate from danger area is determined and issued under facility emergency procedures
	5.2 Work area is prepared for evacuation, in accordance with facility emergency procedures
	5.3 Area of danger is evacuated, in accordance with facility emergency procedures
	5.4 Where it is safe to do so, assistance is provided to

© Commonwealth of Australia, 2025 Public Skills Australia

occupants who may require it

5.5 Evacuation procedures and instructions from emergency control organisation or emergency response personnel are followed

5.6 Alternative pathways or methods of evacuation are identified, assessed and chosen, in accordance with facility emergency procedures, if usual means of evacuation are blocked or occupants are endangered

5.7 Communication system is used to respond to facility emergencies, in accordance with facility procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAWER004B Respond to facility emergencies.

Assessment Requirements for PUAFER004 Respond to facility emergencies

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- complying with legislation, industry standards, codes of practice and regulations
- evacuating from work area
- following facility emergency procedures and direction of emergency control organisation members and/or attending emergency services
- identifying and evacuating occupants who may require assistance
- identifying and reporting emergencies
- maintaining own safety and the safety of others in emergency situations
- participating in emergency response exercises including briefings, debriefings, simulations, reviews and desk top drills
- preparing for emergency situations
- responding to emergency warnings and advice
- selecting the most appropriate course of action during an emergency

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- circumstances where evacuation may need to be modified
- emergency response exercises including participation in briefings and debriefings
- evacuation alarms and facility emergency procedures including action to take when evacuation to a location external to the building might expose evacuated occupants and/or personnel to a greater level of danger
- facility emergency documentation, policies and procedures
- facility emergency reporting systems and procedures facility emergency warning system, signals and instructions
- legislation, industry standards, codes of practice and regulations
- locations of assembly areas and post evacuation actions

© Commonwealth of Australia, 2025 Public Skills Australia

- locations of emergency equipment in a facility
- roles, responsibilities and authority of emergency personnel, emergency control organisations and emergency response teams
- types of emergencies, hazards and evacuation actions associated with each one
- types of occupants who may require assistance
- where Personal Emergency Evacuations Plans (PEEPs) for occupants who have a disability are kept
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
  - that reflect emergency situations that may occur in a facility and include shelter in place, partial evacuation and/or full evacuation
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational policies, facility emergency plan, facility emergency response procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR508 Develop and analyse the behaviour and suppression options for a wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to provide an analysis of the behaviour and spread of a wildfire and to prepare suppression options that are appropriate for expected fire behaviour.

The unit applies to personnel required to provide fire behaviour and spread predictions for consideration by the incident management team and state control centre.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Analyse factors that can impact a wildfire and	**1.1** Information on current and future fire behaviour and spread is collected from a range of sources and is

© Commonwealth of Australia, 2025 Public Skills Australia

develop predictions		recorded, in accordance with organisational procedures
	1.2	Analysis is undertaken of fuels, fuel assessment, weather analysis and the effects of topography on fire behaviour
	1.3	Relevant site information is sought form data bases or experts, in accordance with organisational procedures
	1.4	Appropriate fire prediction tools and references are utilised in the analysis of fire behaviour and spread
	1.5	Fire behaviour and spread predictions are developed, in accordance with organisational procedures
	1.6	Predicted fire behaviour is validated against actual observations and intelligence as it becomes available
2 Develop and maintain maps and data	**2.1**	Required map information and data regarding predicted fire spread and behaviour is prepared
	2.2	Quality information is provided within required timeframes for fire control planning
	2.3	Key assumptions and limitations affecting the predictions are identified and reported
	2.4	Fire behaviour and spread predictions are updated as new weather and fire information becomes available
3 Analyse and communicate risks	**3.1**	Location and timing of potential future impact of the fire is predicted
	3.2	Key risks of fire to human, economic and environmental assets are considered, in accordance with organisational procedures
	3.3	Fire and weather are monitored to assess if and or when fire behaviour is likely to change
	3.4	Identified risks and impacts are communicated to relevant personnel
4 Contribute to the analysis of fire suppression options	**4.1**	Participate in preparation of options analysis for consideration by the Incident Management Team (IMT)
	4.2	Relevant time frames and fire behaviour thresholds for fire suppression strategies and tactics are considered
	4.3	Predicted changes to or variations in fire behaviour

© Commonwealth of Australia, 2025 Public Skills Australia

conditions due to fuel, weather, topography and fire size are reviewed and considered

4.4 Advice and analysis are provided to the IMT, in accordance with organisational procedures, to assist in developing strategies including fall back strategies

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

firefighting strategies must include	• defensive strategies - community and asset protection • offensive strategies - direct, indirect and parallel attack
firefighting tactics must include	• aerial suppression • back burning and burning out • control line construction - hand and machine • direct application of firefighting media

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR512 Develop and analyse the behaviour and suppression options for a Level 2 wildfire.

Assessment Requirements for PUAFIR508 Develop and analyse the behaviour and suppression options for a wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- accessing and interpreting weather products including conducting weather analysis, consideration of fuels, using topographical information to predict fire behaviour and the selection fire prediction tools
- analysing and communicating key risks
- analysing factors impacting on wildfire and developing incident predictions
- applying topographical information to predict fire behaviour
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- conducting weather analysis
- considering fuels
- developing and maintaining maps and data information for fire predictions
- preparing and analysing fire suppression options including strategies and tactics consistent with incident objectives
- providing for use to an Incident Management Team (IMT) an accurate analysis and projection of fire spread and fire behaviour indicating probable and possible scenarios and an analysis of a range of appropriate fire suppression options
- selecting and applying fire prediction tools and references

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- conditions suitable for and limitations of fire suppression strategies and tactics
- effects of topography on fire behaviour
- fire behaviour including fire perimeter, fire size, growth and shape, fire whirls, flame characteristics such as height and depth, heat output and intensity, junction zones, rate of spread, smoke and spotting
- fire considerations and risks

© Commonwealth of Australia, 2025 Public Skills Australia

- fire suppression strategies and tactics
- fire weather
- fuel and fuel assessment
- fuel types and fuel assessment techniques
- human, economic and environmental assets
- impact of weather on fire behaviour
- map information and data including
  - fire behaviour estimates
  - maps of fire spread estimated at time intervals as required by the incident management team with separate mapping for probable and possible scenarios
  - narrative regarding limitations, assumptions, prediction uncertainties and other comments to assist in the interpretation of data
- organisational documentation, policies and procedures
- sources of information relating to weather and fire behaviour
- types of fire prediction tools and references
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and categories of risk

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be demonstrated over time in actual or simulated wildfire incidents

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - a range of actual or simulated fires
  - a range of sources of information related to fire spread and behaviour
  - organisational templates for fire behaviour prediction
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse factors impacting on the spread and behaviour of an intermediate wildfire and develop an incident prediction	1.1 Information on the current and future fire spread and ***fire behaviour*** is collected from a range of ***sources*** and recorded. 1.2 Analysis is conducted using ***consideration of fuels and fuel assessment***, ***weather analysis***, the ***effects of topography*** and likely resultant fire behaviour. ***1.3 Fire prediction tools and references*** are effectively utilised in the analysis of fire spread and behaviour. 1.4 Results of the fire behaviour analysis are validated against fire observations as they become available.
2. Develop maps and data, and maintain associated information regarding projected fire spread and behaviour	2.1 Necessary ***map information and data*** is prepared. 2.2 Fire spread and behaviour projections are developed in a manner appropriate to the incident. 2.3 Use of the information in planning the control of the incident is facilitated through quality, timeliness and presentation of the information. 2.4 Fire spread and fire behaviour projections are updated as new weather and fire information becomes available.
3. Analyse and communicate key risks of the projected fire spread and behaviour	3.1 Site information is sought from agency databases or experts. 3.2 Area and timing of potential future impact of the fire is projected. 3.3 Key ***risks*** of the fire to ***human, economic and environmental assets*** are considered. 3.4 Fire and weather are monitored to assess if or when fire danger is likely to suddenly increase.
4. Prepare and analyse a range of fire suppression	4.1 Range of options with an analysis of probable level of success and consequences of failure is prepared

© Commonwealth of Australia, 2025 Public Skills Australia

options consistent with incident objectives	for consideration by the Incident Management Team. 4.2 Time available and the threshold fire behaviour for which each ***strategy*** and ***tactic*** is likely to be effective are considered. 4.3 Projected changes to or variation in fire behaviour conditions (due to fuel, weather, topography, fire size) are considered. 4.4 Advice and analysis are provided to the Incident Management Team to assist in development of strategies and fallback strategies.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- access and interpret weather products
- implement strategic risk analysis techniques
- interpret fire spread source data
- manage data and maintain accurate records
- understand and interpret topographic maps in order to plot potential fire spread
- use fire prediction tools and suppression guides

Required Knowledge

- categories of risk
- conditions suitable for and the limitations of fire suppression strategies
- effects of topography on fire behaviour
- fire behaviour factors
- fire suppression strategies and tactics
- fire weather
- fuel and fuel assessment
- sources of data relating to fire behaviour

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence	Assessment must confirm the ability to:

© Commonwealth of Australia, 2025 Public Skills Australia

required to demonstrate competency in this unit	• provide (for use by the Incident Management Team to plan the control of an intermediate wildfire):
	  • accurate analysis and projection of fire spread and fire behaviour, indicating probable and possible scenarios
	  • analysis of a range of appropriate fire suppression options
	Consistency in performance
	Competency should be demonstrated over time in actual or simulated wildfire incidents.

Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in a range of actual or simulated wildfire incidents. **Specific resources for assessment** Access is required to: • range of actual or simulated fires • range of sources of information related to fire spread and behaviour • agency templates for fire behaviour prediction
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for

© Commonwealth of Australia, 2025 Public Skills Australia

different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.	
Fire behaviour must include:	• fire perimeter • fire size/growth/shape • fire whirls • flame characteristics (height and depth) • heat output and intensity • junction zones • rate of spread • smoke • spotting
Sources may include:	• air or ground observations • automated weather stations • Bureau of Meteorology websites and/or fire weather experts • fire history maps • fuel type maps • fireground information, operational situation reports and infrared scans • geographic information systems (GIS) and agency site-related databases • land managers • persons with local knowledge
Consideration of fuels and fuel assessment may include:	• bark fine fuels • canopy fine fuels • coarse fuels • coarse standing fuels • coarse surface fuels • dead course fuel moisture • dead fine fuel moisture • elevated fine fuels • fine fuels • fuel and fire behaviour • live fuel moisture • moisture content assessment • near surface fine fuels • surface fine fuels • total fuel load
Weather analysis may include:	• atmospheric stability • Bureau of Meteorology products and tools • calculation of fire danger ratings

© Commonwealth of Australia, 2025 Public Skills Australia

	• cold fronts • diurnal cycles • droughts • Foehn winds • Katabatic and Anabatic winds • long-term weather cycles • relative humidity and dew point temperature • sea breezes and land breezes • seasonal cycles • short-term and local weather effects • temperature • temperature inversions • wind gustiness and directional variation • wind speed and direction
Eeffects of topography on fire behaviour must include:	• acceleration effects • dry upper winds – mixing/range effect • drought index and drought factor • fuel distribution • elevation • rockiness/continuity • land form (channelling) • slope and aspect
Fire prediction tools and references may include:	• CSIRO (Mcarthur) forest fire danger meter • CSIRO (Mcarthur) grassland fire danger meter • CSIRO (Mcarthur) grassland fire spread meter • Vesta fire model • WA forest fire behaviour tables • overall fuel hazard guide (DSE, 1999) • other fuel specific fire behaviour prediction systems (such as buttongrass in Tasmania, mallee-heath model, spinifex model)
Map information and data may include:	• maps of fire spread, estimated at time intervals as required by the incident management team, with separate mapping for probable and possible scenarios • narrative regarding limitations, assumptions, prediction uncertainties and other comment to assist in the interpretation of the data • victoria fire behaviour estimates
Risks may include:	• operational risk • public safety risk • risks to public and private assets

© Commonwealth of Australia, 2025 Public Skills Australia

	• economic risk • environmental risk • legal risk • technical risk • political risk
Human, economic and environmental assets may include:	• areas of environmental or conservation value • areas of tourism value • crops and farm assets • historic sites • indigenous cultural sites • key infrastructure such as a major bridge or power transmission lines • plantations • private or public buildings • towns or settlements • water catchments

Strategy may include:	• offensive strategies:
	  • direct attack
	  • indirect attack
	  • parallel attack
	• defensive strategies:
	  • community and asset protection

Tactic may include:	• aerial suppression • back-burning/burning out • control line construction (hand, machine)

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

© Commonwealth of Australia, 2025 Public Skills Australia

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Access and allocate resources	1.1 Required ***resources*** are identified, and accessed in accordance with organisation's policy and procedures. 1.2 ***Resources are allocated*** to facilitate required outcomes . 1.3 Equipment stock and supplies are stored in accordance with ***organisation's policy and procedures.*** 1.4 Resources are handled in accordance with organisation's policy and procedures and ***resource management systems.***
2. Monitor, evaluate and report on resource usage	2.1 Records of resources allocation and usage are maintained in accordance with relevant legislation and organisational guidelines. 2.2 Resource usage is monitored and evaluated against targets and organisational standards. 2.3 Resource utilisation issues are addressed.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- evaluate resource usage
- interpret budget reports
- monitor resource allocation and usage
- produce resource reports
- utilise resource inventories

Required Knowledge

- computer based tools to produce resource reports
- equal employment opportunity policy and procedures
- management information systems

© Commonwealth of Australia, 2025 Public Skills Australia

- occupational health and safety policy and procedures
- organisation's policies and procedures for budget administration
- organisation's policy and procedures relating to resource acquisition and allocation
- stock handling procedures

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in knowledge and application of the coordination of resources in a range of contexts to achieve the organisation's objectives.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Evidence of competent performance should be gathered by observing an individual in a resource coordination role in the workplace or exercise or operational environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Resources may include:

- finances
- facilities equipment
- stock and supplies
- human resources

Organisation's policy procedures and standards may include:

- equal employment opportunity and occupational health and safety work group policy and procedures
- environmental protection and sustainability
- organisation's work group plans
- organisation's financial and other resource

© Commonwealth of Australia, 2025 Public Skills Australia

	management guidelines • technology and data associated with management information systems
Resource management systems may include:	• human resource systems • computer databases resource lists • contact details lists • financial accounting systems • communication systems
Allocations of resources considerations may include:	• suitability • type of resource • urgency • cost effectiveness • accessibility • maintenance demands • availability • deployment time

of Competency.	detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare appropriate documentation	1.1 Preparation of documentation is managed. 1.2 Conditions of tendering the contract and specifications meet organisation/government policies and guidelines. 1.3 Tendering process conforms with tender/supply code. 1.4 An appropriately experienced officer is identified to handle all inquiries during the tender process and all tenderers are advised of clarifications.
2. Establish the basis of tendering	2.1 ***The form of tender***, public or selective is determined. 2.2 Expressions of interest are sought. 2.3 Expressions of interest are evaluated and potential tenderers short listed.
3. Receive and assess tenders	3.1 Documents are received and opened in accordance with ***organisational policies and procedures.*** 3.2 Tenders are checked for compliance with conditions set out in request for offers. 3.3 Details of tenders are compared with established ***evaluation criteria.*** 3.4 Checks are made to ensure that principles of probity, fairness and commercial confidentiality are met throughout the tender process. 3.5 Issues which may require negotiation are identified.
4. Select successful respondent/s	4.1 ***Selection*** is based on evaluation criteria and relevant factors affecting the tender. 4.2 Selection is ethically sound and does not breach probity principles. 4.3 All actual or potential conflicts of interests are disclosed. 4.4 Where possible the contractor is selected from a registered panel of contractors who are proven to have the relevant expertise and capacity. 4.5 Contractor's price and conditions are examined in

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	order to determine that the offer is clear, calculable and not open to manipulation.
	4.6 A cost-benefit analysis shows that the selected contractor offers best value for money.
5. Finalise contract details	5.1 Letter of acceptance outlines all relevant requirements for signing of documentation and satisfaction of pre-commencement conditions.
	5.2 Discrepancies and disagreements about proposed supply arrangements are clarified and resolved prior to entering into the agreement.
	5.3 Contract is properly executed by the successful proponent and is in accordance with legal requirements.
	5.4 Unsuccessful tenderers are briefed if appropriate.
	5.5 Contract conditions are read and understood by all personnel involved in contract administration.
	5.6 Contract documents are prepared, approved and distributed.
	5.7 Fulfilment of any ***outstanding requirements*** is checked and rectified if necessary.
6. Evaluate performance of the contract on completion	6.1 Contract conditions and responsibilities are reviewed with relevant personnel to ensure satisfactory completion of contract.
	6.2 Contract completion is authorised in writing to confirm completed services have been undertaken according to contract objectives and specifications.
	6.3 ***Contractor performance***/level of service is evaluated against agreed benchmark.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- establish effective feedback and monitoring systems
- implement risk management plans
- monitor and review contract performance
- plan effectively and solve problems
- supply information relevant to contract performance

© Commonwealth of Australia, 2025 Public Skills Australia

Required Knowledge

- assessment of tenders
- award of contracts
- basics of contract law
- contract administration
- contract requirements
- negotiation processes
- organisational procedures and guidelines for the calling of tenders
- principles of quality assurance
- risk management principles
- sources of legal advice
- terms and conditions

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Demonstration of knowledge and skills required to award, manage and evaluate a contractor's performance and attend to any variations and difficulties which arise during the course of the contract. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated contract management environments.
Context of and specific resources for assessment	**Context of assessment** Evidence should be gathered over a period of time in a range of actual or simulated contract management environments. **Specific resources for assessment** Evidence of competent performance by observing an individual in a contract management role within the workplace or simulated environment. Knowledge may be assessed through written assignments, project reports, debriefings and action learning projects.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised***

wording in the Performance Criteria is detailed below.

Forms of tenders may include:	• public • selective
Evaluation criteria may include:	• project objectives • technical specifications • risk • user requirements • timing resources – staff • supplies • budget • environmental policies
Selection of contractors may be based on:	• assessment against evaluation criteria • expertise of contractor • resources allocated to project • contractor's proven performance record • contractor's reputation for quality • contractor's background knowledge of the project • contractor's understanding of organisational requirements • availability of contractor • estimated cost
Performance of contractors may be evaluated on:	• progress towards milestones and objectives • adherence to proposed timelines • adherence to estimated costs • access to resources • staff • supplies • materials • goods • advice • implementation of recommendations • technical specifications • quality assurance • environmental policies
Outstanding requirements may include:	• insurance (public liability • professional indemnity • WorkCover • personal accident) • evidence of covers • security deposits/bank guarantees • warranties of equipment performance

© Commonwealth of Australia, 2025 Public Skills Australia

Monitoring of contractor performance may include:	• site visits • inspections • project management meetings • progress meetings • reports validation of quality systems • partial or full audits
Organisational policy and procedures may vary between sectors and organisations and may include:	• legislation relevant to procurement • legislation relevant to the organisation • operational corporate and strategic plans • operational performance standards • organisational personnel practices and guidelines

essential outcomes of a Unit of Competency.	needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine hazards at incident site	1.1 Issues affecting safety of self and other personnel are established by identification of ***hazards*** and assessment of ***risks***, and by liaison with others at the scene. 1.2 Relevant operational safety procedures are implemented in accordance with organisation's policies. 1.3 Duties are undertaken in line with organisational health and safety codes of practice and ***relevant legislation.***
2. Implement hazard controls at incident scene	2.1 Hazards are identified and mitigation procedures are selected in line with work instructions and procedures. 2.2 Hazardous situations rectified where possible and reported and/or recorded according to organisation's policies and procedures. 2.3 Changes in situation and/or conditions are reported immediately to ***designated person.*** 2.4 ***Hazard controls*** are monitored and communicated to relevant personnel to ensure continuing effectiveness. 2.5 Hazard control and mitigation measures are implemented with minimum damage to the environment, while maintaining safety of self and others. 2.6 Incident/accident scene is effectively secured to preserve the scene and maintain ***public safety*** in line with legislative requirements.
3. Maintain personal safety	3.1 ***Personal protective clothing and equipment*** is selected and checked according to organisational procedures to ensure it is operational prior to entry into incident situation. 3.2 Personal protective clothing and equipment

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	appropriate to dealing with the hazard is worn/fitted and used in accordance with organisation's policies and procedures and manufacturer's guidelines.
	3.3 Water and food intake, rest breaks and shelter requirements are maintained.
	3.4 ***Survival technique strategies*** are implemented in accordance with organisation's policies and guidelines.
4. Contribute to maintaining safety of other work group members	4.1 Impact of own actions on safety of others is recognised.
	4.2 Contact is maintained at all times with other work group members.
	4.3 Signals are correctly used, interpreted, confirmed and acted upon in a timely manner.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate non-verbally and verbally
- follow procedures and instructions
- record information
- use communication equipment
- work with others in a team situation

Required Knowledge

- accidents and incidents
- commonly encountered hazards and procedures and safety precautions to prevent injury on encountering various hazards
- employee responsibilities and obligations
- food intake
- hazards
- heat induced illness - factors leading to prevention
- injuries
- labelling and storage of hazardous substances
- manual handling hazards
- means of relaying warnings to other personnel
- methods of hazard control and reporting
- organisation's occupational health and safety policy

© Commonwealth of Australia, 2025 Public Skills Australia

- problems associated with insufficient water intake
- procedures for investigating injuries
- procedures for participating in occupational health and safety arrangements
- procedures for reporting hazards
- protection
- relevant standard operating procedures
- respiratory system - functions
- rest breaks
- State and Territory occupational health and safety requirements
- survival techniques for various situations
- symptoms and treatment
- techniques and aids
- use and limitations of relevant protective clothing and equipment

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in maintaining personal safety and safety of others. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** A real life incident, exercise or simulation, or series of tasks are required to demonstrate competence in this unit. This may involve setting scenarios to be completed either individually or as a member of a team. Written or verbal questions may be used as supporting evidence. **Specific resources for assessment** A range of protective clothing and equipment may be required.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

© Commonwealth of Australia, 2025 Public Skills Australia

Working environment may be:	• hazardous • unpredictable • subject to time pressure • chaotic and expose responders to risk
Public Safety workplaces include:	• any location where a Public Safety incident occurs
Response situation include:	• single and multi agency response situations
Hazards include:	• all potential sources of injury or damage to property or the environment including identified and potential hazards to persons • equipment or the environment
Risk is:	• the likelihood of injury or damage occurring and the potential consequences of any injury or damage

Incidents may include:	• a variety of natural or man made events including but not limited to rescues and extrications
	• flood
	• storm
	• tempest
	• natural disaster
	• vehicle
	• aircraft
	• rail
	• industrial
	• civil defence
	• fires:
	  • structural
	  • wild
	  • prescribed burning
	• search and rescue :
	  • urban
	  • rural
	  • sea
	• hazardous materials and dangerous goods

Hazards may be identified by:	• scene assessment • visual inspections • plan reviews • recognising hazard warnings • accessing data bases • interviewing others at scene • seeking expert advice

© Commonwealth of Australia, 2025 Public Skills Australia

Others at scene may include:	• organisational personnel • personnel from other organisations • general public
Hazardous materials may include:	• thermal • mechanical • explosives • toxic • corrosive • asphyxiant • radiation • etiological hazards • mutagenic materials
Biological hazards may include:	• bacteria • viruses • fungi and yeasts • including exotic organisms
Physical hazards may include:	• noise • slippery surfaces • poor visibility • smoky environments • fallen/falling objects • fatigue
Electrical hazards may include:	• pole fires • electrical fires • electricity in damaged/burning structures • energised vehicles/structures due to downed wires • photovoltaic generation systems
Manual handling hazards may include:	• heavy objects • content and shape of containers
Environmental hazards may include:	• temperature • darkness • fire • snow • floods • winds • rain • hail • flora • fauna • postural restrictions and access • terrain

© Commonwealth of Australia, 2025 Public Skills Australia

Hazard control measures may include:	• traffic • erection of barriers • establishment of control zone • use of spill clean up kits • use of electrically insulated tools and equipment • vehicle protection hoses and devices • life support equipment (heat radiation shielded crew cabin • vehicle cabins with/without sprays) • entry control procedures to hazardous areas • decontamination • isolation of electricity supply
Relevant legislation may include:	• state or territory occupational health and safety acts and regulations
Personal protective clothing and equipment may include:	• breathing apparatus • personal lines • air lines • personal distress units • respiratory protection • protective hoods • goggles • hearing protectors • sunscreen • chemical protective clothing • personal flotation devices • wet suits • turnout uniform • gloves • hard hat • safety boots • overalls • chainsaw chaps • bullet proof vests • firearms • batons • handcuffs
Hazard control equipment may include:	• atmospheric monitoring equipment • meteorological equipment • radiation monitoring equipment • oxygen meters • flammable gas detectors

© Commonwealth of Australia, 2025 Public Skills Australia

Reporting may include:	• verbal • written reports • completing standard forms • logs • sitreps • note taking • logging entry to hazardous areas
Designated person may include:	• supervisor • team leader • workplace occupational health and safety representative • officer in charge
Survival strategies which may be applied in:	• buildings • wildfire situations • water • extreme heat or cold
Factors which may require monitoring may include:	• traffic • weather conditions • vegetation type • spectators • temperature • structural integrity • relative humidity • slope • terrain • water supply/pressure • fire development • stream flows • suspect atmospheres
Contact with other personnel may include:	• visual • vocal • touch • radio • audible warnings • signalling

PUAOPE013 Operate communications systems and equipment

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to transmit and receive communications in routine and operational situations using the organisation's communications systems and equipment.

The unit is applicable to personnel who are required to operate an organisation's communications systems and equipment in support of the tasks they are undertaking. This may occur either in the field or from a facility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Public Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Use communications systems and equipment	**1.1** Communications equipment and techniques, including verbal transmissions and voice procedures, are selected to best meet the task, context and needs of the situation
	1.2 Equipment is operated safely to support communications

© Commonwealth of Australia, 2025 Public Skills Australia

		consistent with organisational policies and procedures
	1.3	Communications system is correctly utilised to facilitate transmission and reception
2 Transmit and receive communications	**2.1**	Information is transmitted concisely and clearly to facilitate accurate reception of the message, in accordance with organisational policies and procedures
	2.2	Contact is acknowledged, communication is confirmed, and action is initiated
	2.3	Communication faults and deficiencies are reported, in accordance with organisational policies and procedures
	2.4	Alternative communications strategies are employed, in accordance with organisational procedures, to address identified faults and deficiencies in communication
	2.5	Communication is processed and recorded, in accordance with organisational policies and procedures
3 Maintain communications equipment	**3.1**	Communications equipment is inspected to ensure operational readiness
	3.2	Fault finding techniques are applied and basic maintenance is conducted, in accordance with organisational policies and procedures
	3.3	Faulty equipment is identified and noted for repair and documentation is completed, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

organisation's communications equipment must include	• radio • telephone

Assessment Requirements for PUAOPE013 Operate communications systems and equipment

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- following organisational protocols, policies and procedures
- maintaining communications equipment
- making verbal transmissions
- operating a range of different communications equipment
- reporting communication faults and deficiencies
- transmitting and receiving communications using the organisation's communications systems and equipment
- using communications systems and equipment under non-operational and operational conditions
- using verbal communication procedures
- using voice techniques

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- organisational documentation, policies and procedures
- range of communications equipment available
- types of and use of communications systems including organisational networks and hardware
- verbal transmission procedures
- voice techniques
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
  - communications systems and equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- maintain communications equipment according to organisational procedures
- operate the different communications equipment required by the organisation
- report communication faults and deficiencies according to organisational procedures
- use verbal communication procedures consistent with the organisation's communications system
- utilise the organisation's communications processes and systems

Required Knowledge

- organisational policies and procedures relevant to the operation of communications equipment (such as relevant legislation; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- organisation's communications system
- range of communications equipment available to the organisation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • use communications equipment under non-operational and operational conditions • accurately transmit and receive communications using the organisation's communications systems and equipment. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an operational environmentor in an industry-approved multi-agency simulated workplace environment. **Specific resources for assessment**

© Commonwealth of Australia, 2025 Public Skills Australia

	Access is required to: • relevant communications equipment.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Communications equipment may include:	• Computers • Facsimiles • Pagers • Radio • Signalling devices • Telephones (mobile, landline and satellite)
Verbal communications procedures may include:	• Call signs • Coded messages • Emergency procedures • Phonetic alphabet • Pro-words • Use of abbreviations
Voice procedures may include:	• Corrections • Pitch • Repetitions • Rhythm

© Commonwealth of Australia, 2025 Public Skills Australia

Communications systems may include:	• Sentences • Speed • Volume • Communication protocols • Communications software • Organisation's networks • Verbal communication procedures

(SMEACS) in briefings

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAOPE015A Conduct briefings and debriefings

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to lead and manage a briefing and a debriefing.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to people who are required to conduct briefings and debriefings in operational and non-operational situations in a range of environments.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element.

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare for the briefing and debriefing	1.1 ***Content and format*** for briefing and debriefing are determined. 1.2 Briefing and debriefing plan is prepared in accordance with organisational policies and procedures. 1.3 ***Relevant personnel*** involved in the ***activity*** are identified and informed of briefing and debriefing requirements. 1.4 ***Safe and appropriate location*** for the briefing and debriefing is selected.
2. Conduct the briefing and debriefing	2.1 Purpose and structure of the briefing and debriefing is outlined to incident personnel. 2.2 Understanding is sought and clarifications are provided, where required. 2.3 Contributions from personnel during the debriefing and evaluation by personnel of their anticipated or actual roles in the activity is encouraged. 2.4 Briefing and debriefing is ***conducted*** in accordance with organisational policies and procedures. 2.5 Briefing and debriefing ***checklist*** is used as appropriate.
3. Conclude the briefing and debriefing	3.1 Contributions of personnel are acknowledged in a positive way. 3.2 ***Briefing and debriefing follow-up action*** is identified and acted upon in a timely manner. 3.3 Debriefing activity is reviewed against the policies, practices and training of the organisation to identify opportunities for continuous improvement and to identify lessons learnt. 3.4 Briefing and debriefing findings are summarised and recorded, if appropriate, in a format suitable for ***subsequent action*** by appropriate personnel.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate clearly in a group setting
- lead and manage group processes
- prepare briefing and debriefing plans
- provide feedback and encourage contributions from group members

Required Knowledge

- organisational policies
- organisational procedures for activity briefing and debriefing
- practices and training processes in relation to activity

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • communicate effectively with personnel • elicit and encourage contributions to the briefings and debriefings in a constructive and positive way **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed conducting briefings and debriefings in a variety of actual and/or simulated workplace contexts. **Specific resources for assessment** There are no specific resource requirements for this unit.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified

© Commonwealth of Australia, 2025 Public Skills Australia

	assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Content and format for briefing and debriefing may include:	• Collaborative • Descriptive illustrative • Facilitator led • Level of language used • Predetermined (SMEAC) • Problem based
Briefing and debriefing plan may include:	• Appropriate incident information collected prior to undertaking operational activities • Location • Methodology • Participants • Purpose • Subject matter • Timing
Organisational policies and procedures may include:	• Briefing and debriefing formats • Legislation relevant to the operation/incident/response • Legislation relevant to the organisation • Operational, corporate and strategic plans • Operational performance standards • Operational policies and procedures • Organisational personnel and occupational health and safety practices and guidelines • Organisational quality standards

© Commonwealth of Australia, 2025 Public Skills Australia

	• Organisation's approach to environmental management and sustainability
Relevant personnel may include:	• Contractors • Local, state/territory and federal government employees • Operations personnel • Support personnel • Volunteers • Other agency personnel
Activity may include:	• Incidents • Meetings • Public safety campaigns
Safe and appropriate locations may vary according to:	• Ambient conditions (noise, light, smell) • Distractions • Timing of the briefing and debriefing which may be before, during or following an activity • Weather • Whether briefing and debriefing is under operational or non-operational conditions
Briefing and debriefing may be conducted:	• After a meeting/event • As soon as possible following an incident • At convenient time after the incident • At regular intervals • At shift change over • Immediately after the incident • Prior to undertaking training • Prior to undertaking workplace projects and other work related activities • When incident personnel have been relieved • When personnel return to their home base • When significant changes are anticipated at an incident
Briefing and debriefing checklist may include:	• Control and command • Communications • Damage • Equipment and plant • Fatalities • First aid and medical • Incident background • Incident response • Injuries • Loss

© Commonwealth of Australia, 2025 Public Skills Australia

	• Resources committed to the incident • Strategies to improve response • Stress • Supporting organisations • Welfare
Briefing and debriefing follow-up action may include	• Action taken to address issues identified • Informing participants on the outcomes of the debriefing
Subsequent action may include	• Reporting to appropriate supervisor or agency • Reviewing procedures

PUAPRO001 Promote a learning environment in the workplace

Modification History

Release 2.0 This is the first release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to promote a learning environment in which work and learning are integrated to support the achievement of individual and organisational objectives.

The unit is applicable to all public safety personnel who have a leadership role in their organisation, it is particularly relevant to those with supervisory or managerial responsibilities for teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Create learning	**1.1** Organisational environment which facilitates learning is

© Commonwealth of Australia, 2025 Public Skills Australia

opportunities		developed and supported
	1.2	Learning plans are developed as an integral part of individual and team performance plans
	1.3	Learning plans reflect diversity of learning styles, development needs and learning opportunities
	1.4	Individual and team access to and participation in learning opportunities is facilitated
	1.5	Advice is sought on planning and provision of learning, as required
2 Facilitate and promote learning	**2.1**	Organisational activities are used as opportunities for learning
	2.2	Coaching and mentoring is used to develop organisational knowledge, skills and attitudes
	2.3	Benefits of learning are shared with others in the team and organisation
	2.4	Work achievements are recognised by timely and appropriate recognition, feedback and rewards
3 Monitor and improve learning effectiveness	**3.1**	Learning of individuals and teams is monitored to determine type and extent of additional work based support
	3.2	Additional learning support is provided or arranged, as required
	3.3	Feedback from individuals and teams is used to identify and introduce improvements in future learning arrangements
	3.4	Change in the organisational environment is facilitated to promote learning
	3.5	Records and reports of competency are documented and maintained, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAPRO001B Promote a learning environment in the workplace.

Assessment Requirements for PUAPRO001 Promote a learning environment in the workplace

Modification History

Release 2.0 This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- arranging support for individuals who have learning difficulties
- creating learning opportunities
- developing learning plans
- developing links between work and learning
- encouraging and promoting achievement of competencies
- facilitating and promoting learning
- following organisational policies and procedures
- monitoring and improving learning effectiveness
- promoting collaborative processes in learning environments
- providing leadership and support to individuals and teams to develop and maintain flexible learning environments
- supporting and encouraging learning by individuals and teams.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- group dynamics
- learning opportunities within the organisation or team
- learning strategies including coaching, mentoring, exchanges and/or rotations, action learning and structured training programs
- organisational documentation, policies and procedures
- organisational records and reports on competencies
- principles of adult learning.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Undertake work activities	1.1 Work requirements are identified and undertaken. 1.2 Instructions and directions are understood and implemented. 1.3 Communication is maintained with team leader advising of progress of task/activity. 1.4 Personal safety and safety of others is maintained. 1.5 Any legal requirements and/or ramifications of ***activities*** are communicated to team leader. 1.6 ***Work area*** is determined or selected in accordance with operational or organisation's requirements. 1.7 Equipment is operated in accordance with the manufacturer's specifications. 1.8 OH&S and the organisation's policies and procedures.
2. Accept responsibilities	2.1 Responsibilities are accepted according to the organisation's policy and procedures. 2.2 Team leader is appraised of the outcome of task/activity. 2.3 Any activity that exceeds the scope of the defined task is referred to the supervisor.
3. Set performance requirements	3.1 ***Performance requirements*** are based on objectives and goals and agreed with supervisor.
4. Maintain team performance	4.1 Individual performance is monitored against defined performance requirements and appropriate action taken to maintain performance if required. 4.2 Performance of others is monitored and appropriate action is taken through coaching and mentoring to ensure team objectives and goals are met. 4.3 Supervisor is provided with feedback and

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	constructive advice.
	4.4 Issues which cannot be rectified or addressed are referred to the supervisor for appropriate action according to the organisation's policy.
	4.5 Supervisor is advised of any changes in priorities or tasks.
	4.6 All ***required documentation*** relevant to performance is completed.
5. Act as a team leader as required	5.1 Responsibility for the performance of the team is accepted.
	5.2 Goals are set, tasks identified and presented to team members.
	5.3 Instructions and directions are communicated to team members clearly and unambiguously.
	5.4 Team members' concerns and queries are recognised, discussed and dealt with.
	5.5 Any legal requirements and/or ramifications of team activities are communicated to team members.
	5.6 Duties, rosters and responsibilities are allocated to team members having regard to the skills and knowledge required to properly undertake the assignment or task and according to organisation's policy and procedures.
	5.7 Feedback on own performance is provided as required.
	5.8 Level of authority is recognised and adhered to.
	5.9 Operational debrief is conducted in accordance with the organisation's requirements.

Required Skills and Knowledge

Required Skills

- communicating instructions and directions
- communicating performance expectations
- completing a range of documentation
- encouraging team members
- informal performance counselling
- providing feedback on performance
- representing issues to management

© Commonwealth of Australia, 2025 Public Skills Australia

- team building

Required Knowledge

- defined OH&S policies and procedures
- knowledge of current principles and practices
- legal requirements and ramifications of team activities
- method of monitoring performance
- organisation's policy for referring performance issues
- organisation's policy relevant to hours of work and work allocation
- organisation's requirements for documenting team performance and activities
- procedures and methods of setting performance expectations
- required to work in a team
- team members' duties and responsibilities

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in communication of performance expectations and providing feedback to team members. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated work environment. Where workplace observation is insufficient simulations or case studies may be used. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Scope of allocated task may include:	• extent of activity • content of activity • degree of responsibility for task

© Commonwealth of Australia, 2025 Public Skills Australia

Performance requirements include	• goals • objectives • plans • standards • performance indicators • production rates
Work area may be dependent upon	• activity conducted • road accessibility • logistical support • water availability • vicinity of built-up areas • areas of reduced visibility • distance to operation • hazards • vehicle parking
Performance issues may include:	• occupational health and safety • hours of work details • concerns about ability to complete work • inadequate resources
Appropriate personnel may include:	• manager • human resource personnel • team leader • supervisor • team members
Required documentation may include:	• forms • proformas • incident reports • rosters • timesheets • written reports • logs • standard operating procedures • checklists

Activities may include:	• non operational activities:
	  • tasks
	  • projects
	  • preparing documentation
	• operational activities:
	  • responding in a combat or support role to natural emergencies (fire/flood)
	  • technological/industrial emergencies

© Commonwealth of Australia, 2025 Public Skills Australia

- civil/political emergencies and non-emergency operations including community events
- public relations activities
- sporting events
- parades
- festivals

Conditions under which operational activities may be may include:

- hazardous conditions including adverse weather
- after dark operations
- emergency operations
- difficult terrain
- time pressure
- varying time frames from immediate/short term to long term response operations
- varying access to equipment necessitating the use of improvised techniques
- varying levels of resources
- single or multi organisation responses

PUATEA003 Lead, manage and develop teams

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to achieve organisational objectives and working relationships through leading, managing and developing individuals and teams.

The unit applies to public safety personnel who have a management and/or leadership role that includes basic human resource functions and responsibilities for the ongoing development of a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

Assessment Requirements for PUATEA003 Lead, manage and develop teams

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- allocating tasks and activities
- applying conflict resolution and negotiation techniques
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including recognising and managing hazards
- assessing team and individual training needs
- communicating organisational objectives and standards
- completing organisational documentation
- consulting team members developing and maintaining a team including creating productive work conditions
- displaying and using interpersonal skills including coaching and mentoring
- following organisational policies and procedures
- identifying and meeting organisational objectives and performance requirements
- leading and supervising individuals and teams including managing and improving the performance of teams and individuals
- managing team and individual difficulties to achieve positive outcomes
- providing constructive feedback and leadership to individuals and teams
- supporting and participating in development activities

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- courses and opportunities for training and development
- industrial awards and agreements
- organisational documentation, policies and procedures
- organisational human resource and personnel practices and guidelines
- organisational training standards
- principles related to team operations, leadership and human resource management
- protocols and organisational standards, including legislative, related to work group activities

© Commonwealth of Australia, 2025 Public Skills Australia

- roles and responsibilities of organisational personnel
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including hazard identification and risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- assessing training needs
- conflict resolution and negotiation
- consulting team members
- interpersonal skills
- leading and supervising individuals and teams
- problem solving
- providing constructive feedback

Required Knowledge

- all organisational policies
- anti discrimination and harassment
- industrial awards and agreements
- legislation relevant to work group activities
- occupational health and safety requirements
- organisational personnel practices and guidelines
- organisational policy relating to equal employment opportunity
- organisational quality standards and values
- principles of effective team operation and leadership
- principles of human resource management
- principles of leadership
- procedures
- protocols and standards affecting work group activities
- relevant training courses and development opportunities

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated by team leader meeting objectives and performance requirements. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** A combination of oral or written presentations on the job and/or in a simulated scenario.

RIISTD201D Read and interpret maps

Modification History

Release	Comment
1	This unit replaces RIISTD201A Read and interpret maps
2	Removed irrelevant points in Knowledge Evidence; Editorial corrections
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to read and interpret maps in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

No licensing or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

1. Plan and prepare for navigation	1.1 Access, interpret and apply navigation documentation and ensure the work activity is compliant 1.2 Obtain, interpret, clarify and confirm navigation information, work requirements and travel details 1.3 Select maps, equipment and navigation aids, and check for accuracy, currency and operational effectiveness 1.4 Identify faults/errors in maps and equipment, and record, report and address issues 1.5 Establish and maintain communication plan
2. Plan the route	2.1 Assess and select route to destination, consider information from map/plan/field observations 2.2 Examine maps, and identify relevant symbols, information and navigation data 2.3 Identify and locate current position in the field, on map/plan

© Commonwealth of Australia, 2025 Public Skills Australia

	using landmarks and key geographical features 2.4 Identify and locate required destination on map/plan 2.5 Review the map route/plan, field observations, and local knowledge 2.6 Identify potential hazards and plan risk control measures 2.7 Measure and estimate distance to destination using map scale for selected route 2.8 Document in writing planned route on a navigation data sheet
3. Conduct navigation	3.1 Navigate planned route and schedule 3.2 Orientate the map/plan to surroundings and planned route 3.3 Use and interpret navigation aids 3.4 Navigate alternative routes to bypass obstacles and improve efficiency of route or course 3.5 Maintain clear and concise communication during navigation activity

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIISTD201D Read and interpret maps

Modification History

Release	Comment
1	This unit replaces RIISTD201A Read and interpret maps
2	Removed irrelevant points in Knowledge Evidence; Editorial corrections
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements requirements, procedures and techniques for the safe, effective read and interpret map activities including:
  - applying problem solving skills to resolve issues to navigation route
  - applying mathematical skills, including: basic angles and geometry for compass bearings, estimation and measurement
- works effectively with others to undertake and complete read and interpret map activities that meets all of the required outcomes including:
  - communicating by speaking clearly and listening actively
  - demonstrating the practice of working with others to read and interpret maps
  - maintaining written records and reporting
- demonstrates completion of the reading and interpreting of maps that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - reviewing the map route/plan by identifying and using:
    - symbols
    - navigation data
    - landmarks

© Commonwealth of Australia, 2025 Public Skills Australia

  - geographical features
  - scale
- identifying obstacles and navigating alternative routes
- undertaking a minimum 2 km navigation following established route
- traversing a 2 km route to specified destination
- orienting the map to ground and surrounds
- documenting the navigation route and details on the navigational data sheet
- communicating the planned navigation route to others

Knowledge Evidence

The candidate must demonstrate knowledge of reading and interpreting maps through:

- identifying fatigue management techniques
- identifying and using various types of communication systems and equipment
- engaging map reading and road navigation techniques
- identifying and interpreting types of maps, charts and scales and their uses
- determining representation of topographic features on maps and plans
- determining common scales used on maps and plans
- identifying and using features and use of a compass and factors that affect compass accuracy
- identifying the applications of a GPS
- advantages and disadvantages of different map and chart types and sources of error
- techniques for estimating distance travelled

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,

© Commonwealth of Australia, 2025 Public Skills Australia

- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

SISOBWG201A Demonstrate bushwalking skills in a controlled environment

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to participate in supervised bushwalks. This unit focuses on the demonstration of bushwalking skills through the participation in planned bushwalks and associated activities under the supervision of a suitably qualified leader.

Application of the Unit

This unit applies to those working as assistant bushwalking guides under supervision, in tracked or easy untracked areas that are reliably marked on maps and are obvious on the ground.

This unit may also apply to outdoor recreation leaders working for outdoor education or adventure providers, volunteer groups, not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Plan for a bushwalk.	1.1. Identify ***food and water requirements*** according to ***principles of nutrition*** and the ***duration of the walk*** to maintain physiological well being during activity. 1.2. Identify an appropriate activity location according to ***relevant legislation*** and ***organisational policies and procedures***. 1.3. Obtain and become familiar with appropriate map for the intended walk. 1.4. Access ***relevant sources*** to interpret ***weather and environmental information***. 1.5. Identify potential ***hazards*** associated with the activity.
2. Select equipment.	2.1. Select, fit and adjust ***equipment*** to ensure comfort and safety according to ***contextual issues*** and organisational policies and procedures. 2.2. Ensure pack weight is appropriate to body weight and level of fitness. 2.3. Select personal clothing and footwear and identify the design and or construction features that make it appropriate.
3. Apply bushwalking skills.	3.1. Adopt appropriate posture when lifting and carrying backpack. 3.2. Approach ***obstacles*** and hazards in a safe manner and minimise ***risks*** to self and group where possible. 3.3. Apply ***ascending techniques*** and ***descending techniques*** on slopes. 3.4. Follow a route in ***tracked or easy untracked areas***, demonstrating use of ***navigation aids***.
4. Evaluate the bushwalk.	4.1. Evaluate ***relevant aspects*** of the walk. 4.2. Identify improvements for future walks.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to:
  - read and interpret maps
  - analyse weather and environmental information
- planning and organising skills to select an appropriate activity location and equipment
- communication skills to:
  - follow instructions and directions from the supervisor
  - interact with other participants
- numeracy skills to navigate and follow a route using a map and compass
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of all bushwalking activities
- minimal impact walking codes to ensure protection of environment
- equipment types, characteristics and technology used for bushwalking, the advantages and disadvantages of the range of equipment provided by supervisor, and factors affecting appropriate selection of equipment
- packing techniques in order to protect personal and group equipment
- clothing requirements for outdoor activities and factors affecting appropriate clothing selection, such as layering and protective clothing
- footwear types, the advantages and disadvantages of different footwear, and factors affecting appropriate selection for the anticipated track conditions
- principles of nutrition to maintain health during activity
- navigation techniques in tracked or easy untracked areas to determine location, direction and potential hazards under supervision
- basic weather and environmental information to ascertain possible conditions and their affect on the activity
- emergency procedures and potential hazards relevant to the location to ensure risk minimisation to self and group.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Public Skills Australia

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies relevant process to plan equipment and supply requirements according to the conditions and duration of the bushwalk
- demonstrates bushwalking techniques including ascending and descending techniques
- seeks advice and feedback from leader to improve skills and ensure safety of self and group
- evaluates and reflects on own bushwalking performance to identify strengths and weaknesses and areas that need improvement.

Context of and specific resources for assessment

Assessment must ensure participation in bushwalking activities in tracked and untracked areas that reflect local conditions and are of sufficient duration to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- resources and information, such as maps and meteorological data, to plan for the bushwalk
- a suitable outdoor location with tracks that are reliably marked on maps, are obvious on the ground and are inspected on a regular basis
- a qualified leader or supervisor
- bushwalking, navigation and safety equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of safe participation and demonstration of bushwalking skills
- oral or written questioning to assess knowledge of relevant legislation and organisational policies and procedures to enable safe conduct of all bushwalking activities
- written or verbal self evaluation
- third-party reports from a supervisor detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOOPS202A Use and maintain a temporary or overnight site.

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Food and water requirements may include:	• menu planning and preparation • range of foods • emergency food and water.
Principles of nutrition may include:	• food groups • dietary guidelines • essential nutrients • individual food requirements and allergies.
Duration of the walk may include:	• short walks of up to two hours • day walks • two day walks.
Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations.
Organisational procedures may include:	• occupational health and safety • emergency procedures • communication protocols • use and maintenance of equipment • code of ethics.
Relevant sources may include:	• Bureau of Meteorology • media • land managers or agencies • local knowledge.
Weather and environmental information may include:	• satellite images • daily and weekly forecasts • maximum and minimum temperatures • weather warnings • event warnings • river levels • synoptic charts • high and low tide predictions.

© Commonwealth of Australia, 2025 Public Skills Australia

Hazards may include:	• temperature extremes • slippery or unstable terrain • dangerous animals and insects • stinging trees and nettles • dense vegetation • group management hazards.
Equipment may include:	• bushwalking equipment • navigation equipment • safety and first aid equipment • overnight equipment.
Contextual issues may include:	• weather conditions, including times • season • transport • location • trip distance and duration • group objectives • group size.
Obstacles may include:	• rivers • logs • rocks • gullies • exposed areas.
Risks may include:	• hypothermia • heat exhaustion • injuries • exhaustion • lost party or party member • equipment failure.
Ascending techniques may include:	• zig-zagging • placing feet down flat with a deliberate step • resting heels on any available projections.
Descending techniques may include:	• placing toes against projections to avoid overstriding • avoiding placing feet down heavily • using flat-footed or stiff-heeled technique.
Tracked or easy untracked areas include:	• those that align with Class 4 Tracks within the Australian Standard for Walking Tracks.
Navigation aids may include:	• maps • compass.
Relevant aspects may include:	• objectives

Unit Sector(s)

Outdoor Recreation

Competency Field

Bushwalking

© Commonwealth of Australia, 2025 Public Skills Australia

SISOFLD007 Navigate in difficult tracked environments

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to navigate in difficult tracked environments during any type of outdoor recreation activity.

The unit provides skills to navigate in environments where tracks, natural and constructed features marked on maps may be unreliable. Tracks are generally distinct, but may be indistinct in some places. They have signage at the track head, and have route markers but provide limited signage en route. There may be many natural obstacles and, along with changes in weather and visibility, adjustments to the planned route may be necessary. Tracks could be graded according to the Australian Walking Track Grading System and might include features of grade 4.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders, guides or instructors who use these skills when leading participants during activities where navigation skills are required.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan for navigation.	1.1. Obtain and become familiar with maps, appropriate for the activity, and features that will assist with navigation at the location. 1.2. Interpret map symbols and information to plan an efficient route according to specific activity requirements. 1.3. Select a compass suitable for navigation requirements. 1.4. Calculate grid, magnetic and true north bearings using map, compass and protractor. 1.5. Prepare a navigation data sheet, and identify emergency or contingency escape routes.
2. Navigate a route in difficult tracked environments.	2.1. Orientate map to surroundings using landmarks and compass and identify factors that affect accuracy. 2.2. Follow the planned route using map, route markers, natural and constructed features and compass to assist. 2.3. Use a global positioning system (GPS) as a navigational aid to maintain route. 2.4. Use techniques to estimate distance travelled. 2.5. Maintain, where necessary, a compass course to bypass obstacles. 2.6. Identify unfamiliar features in the field using map and compass to maintain route. 2.7. Utilise navigation techniques to identify unfamiliar features and fix position when lost. 2.8. Make required adjustments to route according to prevailing conditions, and navigate using map, route markers, natural and constructed features, compass and GPS as required.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION

© Commonwealth of Australia, 2025 Public Skills Australia

Reading skills to:	• interpret detailed and potentially unfamiliar information on maps and track signage • interpret factual activity plan information in familiar formats.
Writing skills to:	• develop detailed navigation data sheets using correct terminology and symbols.
Numeracy skills to:	• interpret and calculate detailed numerical data involving, distances, times, altitudes, heights, depths and gradients. • interpret and calculate degrees, mils and angles.
Technology skills to:	• use a range of technologies to access information about routes.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SISOFLD007 Navigate in difficult tracked environments

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and document three efficient routes, each different, within difficult tracked environments
- navigate each of the above three planned routes
- across the three navigation activities, collectively use these techniques to determine location:
  - using map, identifying natural features, constructed objects and determining distance travelled
  - using map and compass techniques including resections/tri-bearings
  - using GPS devices
  - using grid references, estimation and Romer devices
- across the three navigation activities, collectively use these navigation techniques:
  - using linear and point references
  - using terrain features: handrailing, collecting features, catch points
  - using compass techniques: aiming off, backbearing
  - using GPS: waypoints, routes
- on two occasions, determine when there is a deviation from a planned route, adjust and resume the planned route after fixing position using:
  - manual techniques on one occasion
  - a GPS device on one occasion
- determine two adjustments to routes in the field and navigate the changed routes using:
  - manual techniques on one occasion
  - a GPS device on one occasion.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- trusted sources of maps for the region or locality
- different technologies used to access maps

© Commonwealth of Australia, 2025 Public Skills Australia

- characteristics of different map types, their different uses, advantages and disadvantages, accuracy and sources of error:
  - paper based and digital
  - sketch maps and diagrams
  - guide book maps
  - charts
  - topographic
  - cadastral
- information found on maps including symbols and what they represent:
  - survey or edition date
  - map legend
  - scale and distance
  - grid lines and numbers
  - cardinal points and bearings
  - contour lines, altitude and water depth
  - topographic features
  - markers and beacons
  - gradient
  - roads, tracks and waterways
  - magnetic variation and annual change
- principal colours used on maps and what they represent
- other information and key features that can assist navigation in difficult tracked environments:
  - satellite imagery
  - aerial photographs
- features, functions and operation of global positioning systems (GPS):
  - when these might be used, advantages and disadvantages
  - reliability of signal, device and battery
  - system structure at fundamental level of understanding
  - how to identify and use datum grids
  - how to create, enter and transfer waypoints
  - how to create tracks, routes and grid references
  - accuracy and sources of errors
- these different types of compasses, their features and factors which affect accuracy:
  - baseplate/orienteering
  - sighting/mirror
  - lensatic/prismatic
- for difficult tracked environments, map and compass techniques used to:
  - calculate grid, magnetic and true north bearings
  - orientate map to surroundings

© Commonwealth of Australia, 2025 Public Skills Australia

  - maintain a designated course
  - identify unfamiliar features
  - make significant adjustments to routes
- techniques to determine location:
  - using map, identifying natural features, constructed objects and determining distance travelled
  - using map and compass techniques including resections/tri-bearings
  - using GPS devices
  - using grid references, estimation and Romer devices
- the following navigation techniques used to effectively navigate in difficult tracked environments; advantages and disadvantages:
  - using linear and point references
  - using terrain features: handrailing, collecting features, catch points
  - using compass techniques: aiming off
  - using GPS: waypoints, routes
- types of navigation aids found in the field and how these can assist with navigation:
  - track markers, signs and arrows
  - track and creek junctions and crossings
  - survey markers
  - beacons
  - cairns
  - natural features and constructed objects
- contents of navigation data sheets and their purpose:
  - grid reference points
  - grid and magnetic bearings
  - distances
  - estimated travelling times
  - height gain or loss
  - gradient
  - identifiable features
  - escape routes
- factors that affect the adjustment of routes during activities.

Assessment Conditions

Navigation skills must be demonstrated in a setting where outdoor recreation activities are delivered in difficult tracked environments. The environment must feature the following:

- tracks, natural and constructed features are marked on maps but these could be unreliable
- tracks are generally distinct but some parts of the track are indistinct
- tracks have signage at the track head, with route markers but limited signage en route.

© Commonwealth of Australia, 2025 Public Skills Australia

If in an alpine region and snow is present, assessment can only be completed if the track remains discernible.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- maps relevant to the activity type
- compasses and protractors
- global positioning system (GPS) devices
- activity plans
- template navigation data sheets.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience with an organisation providing recreational programs where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

1. Plan for navigation.	1.1. Obtain and become familiar with ***map or maps*** for the activity. 1.2. Identify ***symbols and information*** contained on the map and how these may be used in navigation. 1.3. Apply information contained on the map to plan an efficient route or course and consider all ***relevant factors***. 1.4. Obtain and identify features of a compass and how it is used to maintain a designated course. 1.5. Calculate grid and magnetic bearings using a map and compass. 1.6. Obtain ***additional information*** to assist in navigation from the map. 1.7. Identify emergency or contingency escape routes.
2. Navigate in controlled environments.	2.1. Orientate map to ***surroundings*** with and without the use of a compass. 2.2. Follow a route in ***controlled environments***, demonstrating use of ***navigation aids*** according to ***relevant legislation*** and ***organisational policies and procedures***. 2.3. Apply ***techniques for estimating distance*** travelled. 2.4. Maintain, where necessary, a compass course while bypassing an ***obstacle***. 2.5. Identify unknown features in the field using map and compass. 2.6. Select a route or course for the surroundings and conditions.
3. Evaluate navigations.	3.1. Evaluate ***relevant aspects***. 3.2. Identify improvements for future navigations.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

© Commonwealth of Australia, 2025 Public Skills Australia

Required skills

- literacy skills to:
  - read and interpret maps
  - follow instructions and procedures
- planning and organising skills to:
  - obtain navigation equipment
  - plan a route or course
- communication skills to interact with group leader and other participants to maintain a positive and safe environment while navigating
- numeracy skills to navigate and calculate grid and magnetic bearings and distances using a map and compass.

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of all activities
- different types of maps, and their advantages and disadvantages to enable appropriate map selection
- map features, including symbols, contour lines, scales, grid lines and legends to enable effective map reading
- features of a compass, their use and factors that affect compass accuracy
- route planning and factors that should be considered, such as weather and type of terrain
- navigation techniques in controlled environments to determine distance, location, direction and potential hazards.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • applies relevant process to plan a route in controlled environments and demonstrates navigation techniques to orientate and follow directions • seeks advice and feedback from leader to improve skills and ensure safety of self and group • evaluates and reflects on own navigation performance to identify strengths, weaknesses and areas that need improvement.

© Commonwealth of Australia, 2025 Public Skills Australia

Context of and specific resources for assessment	Assessment must ensure participation in navigation activities in controlled environments that are of sufficient breadth and duration to demonstrate competency and consistency of performance. Assessment must also ensure access to: • a suitable outdoor location, with tracks that are reliably marked on maps, are obvious on the ground and are inspected on a regular basis that align with Class 4 Tracks within the Australian Standard for Walking Tracks • navigation equipment such as map or maps, compass and activity specific equipment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of the planning and review process with evidence of reference to resources and aids • oral or written questioning to assess knowledge of navigation techniques • observation of safe participation and demonstration of navigation skills, such as maintaining a compass course while bypassing an obstacle • third-party reports from a supervisor detailing performance. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • SISOBWG201A Bushwalk in controlled environments or • SISOSKT201A Demonstrate basic cross country skiing skills or • SISORAF201A Demonstrate rafting skills on moving water.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised

- paths
- lines
- signs
- arrows
- compass
- man-made objects or features
- transits.

Relevant legislation may include:

- occupational health and safety
- permits or permission for access
- environmental regulations.

Organisational policies and procedures may include:

- occupational health and safety
- use and maintenance of equipment
- communication protocols
- code of ethics.

Techniques for estimating distance may include:

- time
- observation of surroundings
- pacing.

Obstacles may include:

- rivers
- logs
- rocks
- gullies
- trees
- snow conditions
- exposed areas.

Relevant aspects may include:

- objectives
- planning process
- activity site
- weather
- equipment selection
- clothing selection
- food selection
- instructional content
- instructional technique
- assessment technique
- group feedback
- directing techniques
- rescue techniques employed.

SISONAV302A Apply navigation skills in an intermediate environment

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to navigate in uncontrolled environments within an activity-specific context. This includes areas with few obvious visible landmarks, minimal clearance and limited modifications made to the natural surface and where the changes in weather and visibility may occur.

Application of the Unit

This unit applies to outdoor recreation guides or instructors working for private outdoor adventure companies and or school based outdoor education programs, such as holiday programs and camps. Activities requiring navigation may include bushwalking, skiing, snowboarding, off - highway motorcycling or mountain biking in uncontrolled environments with few obvious visible landmarks, minimal clearance and signage, limited modifications made to the natural surface and may include terrain and man-made hazards, such as cliff lines or dense forests.

This unit may also apply to navigation on difficult or trackless waterways where there are few obvious visible waterway landmarks and the craft may be affected by wind and or currents and tides.

This unit also applies to outdoor recreation leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the Evidence Guide.
1. Plan for navigation.	1.1. Obtain and become familiar with appropriate ***map or maps*** for the activity. 1.2. Identify ***symbols and information*** contained on the map that may be used in navigation. 1.3. Apply information contained on the map to plan an efficient route or course according to specific activity requirements, ***contextual issues***, ***relevant legislation*** and ***organisational policies and procedures***. 1.4. Obtain and identify essential features of a compass and how it is used to maintain a designated course. 1.5. Calculate grid and magnetic bearings using a map and compass. 1.6. Prepare a ***navigation data sheet***, and identify emergency or contingency escape routes.
2. Navigate in uncontrolled environments.	2.1. Apply ***navigation techniques*** to orientate map to ***surroundings*** with a compass and identify factors that affect accuracy. 2.2. Follow a route in remote, ***uncontrolled environments***, demonstrating use of ***navigation aids*** according to relevant legislation and organisational policies and procedures. 2.3. Apply ***techniques for estimating distance*** travelled. 2.4. Maintain, where necessary, a compass course while bypassing an ***obstacle***. 2.5. Identify unknown features in the field using map and compass. 2.6. Demonstrate technique to fix position and identify unknown features when lost.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3. Evaluate navigations	3.1. Evaluate ***relevant aspects*** of navigation. 3.2. Identify improvements or modifications for future navigations in uncontrolled environments.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to:
  - read and interpret maps
  - follow instructions and procedures
  - develop a navigation data sheet
- planning and organising skills to:
  - obtain navigation equipment
  - plan and follow routes and courses
- numeracy skills to navigate and calculate grid and magnetic bearings and distances using a map and compass
- problem-solving skills to:
  - maintain a compass course while bypassing an obstacle
  - fix position and determine current location when lost in uncontrolled environments.

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of all activities
- different types of maps, sources of error and accuracy, and their advantages and disadvantages to enable selection of appropriate maps
- map features, including symbols, contour lines, scales, grid lines and legends to enable effective map reading
- features of a compass, their use and factors that affect compass accuracy
- route planning and factors that should be considered, such as weather and type of terrain
- navigation techniques in uncontrolled environments to determine distance, location, direction and potential obstacles
- techniques for estimating distance travelled, determining position when lost and navigating around obstacles.

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • applies relevant process to plan a route in uncontrolled environments and demonstrates navigation techniques to orientate and follow directions • navigates around obstacles in uncontrolled environments while maintaining a compass course • evaluates and reflects on own navigation performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure participation in navigation activities in uncontrolled environments that are of sufficient breadth and duration to demonstrate competency and consistency of performance. Assessment must also ensure access to: • a suitable outdoor location with uncontrolled environments within an activity-specific context that align with Class 5 Tracks within the Australian Standards for Walking Tracks • navigation equipment such as map or maps, compass, GPS and activity-specific equipment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • oral or written questioning to assess knowledge of navigation techniques used to maintain a course in uncontrolled environments • observation of safe participation and demonstration of navigation skills, such as maintaining a compass course while bypassing an obstacle and identifying unknown features when lost • third-party reports from a supervisor detailing performance. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

© Commonwealth of Australia, 2025 Public Skills Australia

- SISOBWG302A Apply intermediate bushwalking skills.

or

- SISOMBK302A Apply advanced off-road cycling skills.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Map or maps may include:

- cadastral and topographic maps
- charts
- hydrographic
- aerial photographs
- guide books and diagrams
- satellite imagery
- digital map
- sketch maps.

Symbols and information may include:

- grid lines and numbers
- contour lines
- magnetic variation
- scale
- map legend
- topographic features
- markers and beacons
- water depth.

Contextual issues may include:

- weather conditions, including times
- season
- transport
- location
- trip distance and duration
- group objectives
- group size.

Relevant legislation may include:

- occupational health and safety
- permits or permission for access
- environmental regulations.

© Commonwealth of Australia, 2025 Public Skills Australia

Organisational policies and procedures may include:	• occupational health and safety • communication protocols • use and maintenance of equipment • code of ethics.
Navigation data sheet may include:	• grid reference points • grid and magnetic bearings • distances • estimated travelling times • height gain or loss • gradient • identifiable features • escape routes.
Navigation techniques may include:	• use of compass • linear features • point features • attack points • aiming off • collecting features • spiral search • sweep search • backbearings and resections • use of Global Positioning Systems (GPS).
Surroundings may include:	• ground or terrain • snow conditions • bodies of water • beacons and markers • natural formations • landmarks • man-made features.
Uncontrolled environments may include:	• limited modifications to the natural surface • minimal clearance along the track and signage • terrain and man-made hazards • tracks align with Class 5 Tracks within the Australian Standards for Walking Tracks • areas of water where there are few obvious visible landmarks.
Navigation aids may include:	• track and creek junctions and crossings • survey markers • beacons • track markers • cairns

© Commonwealth of Australia, 2025 Public Skills Australia

- paths
- lines
- signs
- arrows
- watch
- weather charts
- man-made objects or features
- transits.

Techniques for estimating distance may include:

- time
- observation of surroundings
- relation to features
- pacing.

Obstacles may include:

- logs
- rocks
- gullies
- trees
- varying snow conditions
- exposed areas
- thick vegetation
- drops and climbs
- marshes and bogs
- fog
- rivers, lakes and dams.

Relevant aspects may include:

- objectives
- planning process
- activity site
- weather
- equipment selection
- clothing selection
- food selection
- instructional content
- instructional technique
- assessment technique
- group feedback
- directing techniques
- rescue techniques employed.

SISOOPS201A Minimise environmental impact

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to implement minimal environmental impact practices while participating in and assisting in outdoor recreation activities under supervision.

Application of the Unit

This unit applies to those who work as assistants under direct supervision in a range of roles and settings across the outdoor recreation sector.

This may include outdoor recreation leaders working for outdoor education or adventure providers, volunteer groups, not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

ELEMENT	PERFORMANCE CRITERIA
unit of competency.	required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the Evidence Guide.
1. Determine the environmental impacts of outdoor recreation activities.	1.1. Identify the ***impacts*** caused by participation in specific outdoor recreation activities. 1.2. Determine the possible ***causes*** of these impacts. 1.3. Identify the consequences of the impact on the environment. 1.4. Source and analyse information on key ***organisational practices and procedures*** used to reduce the environmental impact.
2. Adopt minimal impact practices.	2.1. Follow instructions of ***relevant personnel*** to apply ***minimal impact environmental practices*** and procedures during outdoor activities. 2.2. Use equipment in a manner that reduces impact on the natural environment. 2.3. Demonstrate appropriate behaviour toward the environment when interacting with staff and participants. 2.4. Utilise heritage or cultural sites according to ***relevant legislation*** and or directions from relevant personnel. 2.5. Report ***inappropriate environmental practices*** to relevant personnel.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - follow instructions to implement minimal environmental impact practices in outdoor activities
  - report inappropriate practices
- literacy skills to read and interpret organisational procedures to reduce environmental impact
- problem-solving skills to:
  - anticipate the consequences of outdoor recreation activities on the environment
  - implement strategies to reduce the potential impact.

© Commonwealth of Australia, 2025 Public Skills Australia

Required knowledge

- legislation and codes relating to environmental protection and cultural and heritage protection for the activity area and location to enable outdoor recreation activities to be undertaken responsibly
- area restrictions and resource management requirements to enable compliance during outdoor recreation activities
- basic ecological principles and interrelationships to enable understanding of potential causes and consequences of environmental impact
- organisational procedures for minimal environmental impact practices relevant to specific activities, sites or locations.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • utilises environmental resources responsibly and with minimal impact to participate in outdoor recreation activities • complies with general legislation, land managers requirements, industry codes and activity specific codes of practice to minimise environmental impact • applies contingency management techniques to deal with problems in implementing minimal environmental impact practices.
Context of and specific resources for assessment	Assessment must ensure implementation of minimal impact practices relevant to specific activities, sites and or locations while participating in outdoor recreation activities to demonstrate competency and consistency of performance, on multiple occasions. Assessment must also ensure access to: • an outdoor environment or site to participate in outdoor activity • relevant personnel • documentation such as organisational minimal environmental impact procedures and practices and relevant environmental protection legislation.

© Commonwealth of Australia, 2025 Public Skills Australia

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate's ability to implement minimal environmental practices while participating in and assisting in an outdoor activity
- written and oral questioning to assess knowledge of key environmental practices and procedures to minimise activity impact appropriate to the locality or site of the outdoor activity
- third-party reports from a supervisor detailing evidence of the candidate's implementation of minimal environmental impact practices during an outdoor activity.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOODR201A Assist in conducting outdoor recreation sessions
- Activity specialisations.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Impacts may include:

- pollution
- vegetation tramping and breakage
- breakage and dislodgment of rock and other formations
- compaction of soil and other deposits
- disturbance or removal of fauna
- introduction of new flora and fauna
- chemical alteration of environments
- damage to, or inappropriate behaviour in, cultural sites
- graffiti
- reduction in decomposing timber

© Commonwealth of Australia, 2025 Public Skills Australia

	• campfire scars • noise.
Causes may include:	• development of facilities and signs • increased use.
Organisational practices and procedures may include:	• restricting access • limiting group size • seasonal restrictions • use of permits • codes of ethics and conduct • heritage and cultural site protocols and guidelines.
Relevant personnel may include:	• supervisors • resource managers • peak activity groups • custodians.
Minimal impact environmental practices may include:	• avoidance of sensitive areas • site and route selection • limited party size • removal of rubbish • appropriate sanitation practices • use of fuel stoves • use of low impact equipment • keeping to marked tracks or routes • appropriate washing procedures • respect and protection of heritage and cultural sites • camp fire management and rehabilitation.
Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations • marine regulations.
Inappropriate environmental practices may include:	• trampling over sensitive areas • leaving rubbish behind • accessing out of bounds areas • disturbing cultural sites.

	environmental impact.
	4.5. ***Pack up*** and clean area when leaving according to relevant legislation and organisational policies and procedures.
5. Evaluate the activity.	5.1. Evaluate ***relevant aspects*** of using and maintaining an overnight site.
	5.2. Identify improvements for future overnight stays.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy and numeracy skills to:
  - read and interpret legislation and organisational policies and procedures
  - analyse weather and environmental information
- planning and organising skills to:
  - allocate and select equipment for overnight stay
  - establish and erect shelter at an appropriate site
- communication skills to:
  - interact with other participants
  - work as a team to set up camp and maintain a positive and safe environment
- problem-solving skills to:
  - deal with unforeseen circumstances
  - keep warm and sheltered, in the case of extreme environmental conditions and or loss of equipment
  - handle and prepare food hygienically
  - apply minimal impact camping techniques
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of camping activities
- minimal impact camping and walking codes to ensure protection of environment
- equipment, clothing, footwear, food and water required for the duration of activity
- packing and maintenance techniques before, during and after the activity to protect personal and group equipment and ensure prolonged life
- principles of nutrition to maintain health and energy during activity

© Commonwealth of Australia, 2025 Public Skills Australia

- food and water in emergency situations to maintain health for prolonged periods
- food preparation and cooking methods used in outdoor environments
- sanitation procedures in outdoor environments to avoid contamination and illness
- types and purposes of different shelters to enable selection and use in various weather conditions
- weather and environmental information to ascertain possible conditions and their affect on the activity including life threatening conditions
- emergency procedures and potential hazards relevant to the location to ensure risk minimisation to self and group.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • makes logistical arrangements based on knowledge of the area and selects equipment and supply requirements according to the conditions and duration of the activity • applies camping techniques and adapts to contingencies that may arise, such as sudden change of weather • takes precautions to maintain physical well being of self and group, such as hygiene and sanitation procedures to prevent contamination and illnesses • evaluates and reflects on performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure establishment, use and maintenance of a temporary or overnight site on multiple occasions to demonstrate competency and consistency of performance. Assessment must also ensure access to: • resources and information regarding site to plan logistical arrangements • a suitable outdoor location • appropriate camping equipment.
Method of assessment	A range of assessment methods should be used to assess

© Commonwealth of Australia, 2025 Public Skills Australia

practical skills and knowledge. The following examples are appropriate for this unit:

- observation of planning logistical arrangements for the activity
- oral and or written questioning and reports to assess knowledge in relation to human impact on the environment
- observation of establishing and maintaining an overnight shelter
- observation of dealing with contingencies, such as repairing and or improvising on items of essential equipment in the case of breakage or loss.
- written and or verbal self evaluation.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOOPS201A Minimise environmental impact
- Activity-specific units requiring the use and maintenance of a temporary or overnight site.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information may include:

- maps and charts
- guide books
- land managers and agencies.

Temporary sites may include:

- rest stops
- activity sites
- temporary or overnight shelter.

Relevant legislation may include:

- occupational health and safety
- permits or permission for access
- environmental regulations
- marine regulations.

Organisational policies and procedures may include:

- occupational health and safety
- use and maintenance of equipment
- camp fire regulations

© Commonwealth of Australia, 2025 Public Skills Australia

- emergency procedures
- code of ethics.

Relevant sources may include:

- Bureau of Meteorology
- media
- land managers or agencies
- local knowledge.

Weather and environmental information may include:

- satellite images
- daily and weekly forecasts
- maximum and minimum temperatures
- weather warnings
- event warnings
- river levels
- synoptic charts
- high and low tide predictions.

Hazards may include:

- temperature extremes
- slippery or unstable terrain
- dangerous animals and insects
- stinging trees and nettles
- dense vegetation
- group management hazards.

Human impact may include:

- pollution
- physical damage
- alteration to the environment
- visual
- noise
- damage to cultural heritage
- crowding.

Risk may include:

- hypothermia
- frostbite
- dehydration
- heat exhaustion
- hyperthermia
- injuries and illness
- insect bites and stings
- food poisoning
- lost party or party member
- falling trees and branches.

Food and water requirements may include:

- menu planning and preparation
- range of foods:
  - perishability
  - packaging

© Commonwealth of Australia, 2025 Public Skills Australia

- storage
- cooking methods.

Principles of nutrition may include:

- food groups
- dietary guidelines
- essential nutrients
- food preparation:
  - methods of cooking
  - safe food handling and hygiene practices
- individual food requirements and allergies.

Equipment may include:

- torch
- tent
- poles
- tarp
- sleeping bag
- cooking system and utensils
- pots and pans
- ropes
- plastic bags for rubbish
- first aid kit
- activity-specific equipment.

Contextual issues may include:

- weather conditions, including times
- season
- transport
- location
- trip distance and duration
- group objectives
- group size.

Shelter may include:

- tents
- bivvies
- snow caves
- lean-to
- mobile trailers and vans.

Impact on natural environment may include:

- soil
- plants
- water
- geology
- wildlife.

Pack up may include:

- gather all rubbish for removal
- wipe or clean gear.

Relevant aspects may include:

- objectives
- planning process

ELEMENT	PERFORMANCE CRITERIA
essential outcomes of a unit of competency.	achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the Evidence Guide.
1. Plan for the sailing activity.	1.1. Select an activity site or location with ***controlled conditions*** according to ***relevant legislation*** and ***organisational policies and procedures***. 1.2. Access ***relevant sources*** to interpret ***weather and environmental information***. 1.3. Identify potential ***hazards*** within the ***small boat*** sailing environment and implement strategies to reduce ***risks***, as advised by the supervisor. 1.4. Identify ***food and water requirements*** to maintain physiological well being during activity.
2. Select equipment.	2.1. Select small boat and ***equipment*** according to design and construction features and check working condition. 2.2. Identify and select suitable ***sails*** for boat. 2.3. Select clothing suitable for the prevailing and expected conditions. 2.4. Fit and adjust equipment to ensure comfort, safety and suitability.
3. Rig and de-rig small boat.	3.1. Identify the ***main parts of a small boat*** and fittings on the mast and boom. 3.2. Identify ***sails*** and their component parts. 3.3. Use ***appropriate knots*** to rig ***sails***, under supervision.
4. Launch and land small boat.	4.1. Determine ***wind direction*** to identify safe and easy launching location. 4.2. Launch and land the ***small boat*** in calm, ***controlled conditions*** while maintaining stability, direction and ***speed control***. 4.3. Adopt position on the ***small boat***, and secure the centreboard and rudder.
5. Sail a marked course in calm conditions.	5.1. Apply ***primary boat controls***, and identify their effect on boat movement. 5.2. ***Determine wind direction and use wind, wind indicators and directional change to follow the marked course***. 5.3. Use wind indicators and angle of the sail to vary speed ***and*** use a basic heave to as a reference point. 5.4. Identify when the boat is being sailed close hauled and sail to the destination directly upwind 5.5. Identify the No-Go Zone perimeters and tack the boat from close-hauled to close-hauled.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	5.6. Determine when the boat is being sailed on a dead run and gybe the mainsail while the boat remains sailing on a dead run. 5.7. Identify potential hazards of gybing while sailing downwind, and implement strategies to avoid the unexpected gybe.
6. Perform capsize drills.	6.1. Identify and implement procedures for capsize according to relevant legislation and organisational policies and procedures. 6.2. Demonstrate technique and order of events to right a small boat, as part of a team, according to organisational policies and procedures.
7. Participate in towing drills.	7.1. Identify situations requiring ***towing*** and prepare boat for towing. 7.2. Tow boat safely under instructor guidance, according to organisational policies and procedures. 7.3. Release ***boat*** from tow under instructor guidance, according to organisational policies and procedures. 7.4. Implement, under direct supervision and instructor guidance, a ***crew recovery drill***, in the event of separation of a crew member from the boat.
8. Return small boat ashore.	8.1. Prepare and raise centreboard and rudder for return. 8.2. Carry and stow the ***small boat*** according to supervisor's directions and organisational policies and procedures. 8.3. Stow or store ***equipment*** according to manufacturer's recommendations, supervisor's directions and organisational policies and procedures.
9. Evaluate sailing activity.	9.1. Evaluate ***relevant aspects*** of the activity. 9.2. Identify improvements for future small boat sailing experiences in controlled conditions.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- problem-solving skills to:
  - rig boat using suitable knots
  - determine wind direction
  - maintain stability, position, direction and speed control
  - determine when the boat is being sailed on a dead run
- planning and organising skills to:

© Commonwealth of Australia, 2025 Public Skills Australia

  - select an appropriate location with controlled conditions
  - source small boat, equipment, and food and water
  - prepare for capsizing and towing drills
- numeracy skills to:
  - select correct sized sail for boat
  - use the angle of the sail to slow and speed up the small boat
  - determine points of sail in relation to course, wind direction and angles
- literacy skills to interpret and apply weather and environmental information, relevant legislation and organisational policies and procedures
- communication skills to interact with other craft and crew members
- teamwork skills to:
  - right a small boat after capsize
  - assist and support crew members in all aspects of sailing a small boat
- emergency response and crew recovery skills to enable initial response to emergencies.

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of sailing activities
- rules of the road to safely sail alongside other water craft
- types of small boats and equipment, characteristics and technology used for sailing
- knots and their application to a sailing setting to enable accurate rigging of sails
- sailing manoeuvres and techniques to enable negotiation of courses
- sailing and weather terminology to enable clear communication between crew members
- the main points of sailing and sail positions to manoeuvre small boat efficiently
- information on tide and wind to safe launching, landing and manoeuvring
- capsize procedures and methods to right a small boat
- food and water requirements to maintain health and energy during activities
- weather and environmental information to ascertain possible conditions and their affect on the activity
- emergency, towing and recovery procedures to ensure risk minimisation.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate	Evidence of the following is essential: • selects small boat and equipment suitable for

© Commonwealth of Australia, 2025 Public Skills Australia

competency in this unit	controlled conditions and uses terminology to identify parts and fittings of small boat • rigs small boat using appropriate knots, and launches, lands and returns boat while maintaining stability, direction and ***control*** • applies capsize procedures to right a small boat, and participates in towing and crew recovery drills while maintaining adequate communication with crew • evaluates and reflects on own small boat sailing performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure participation in multiple small boat sailing activities in controlled conditions that are of sufficient duration to demonstrate competency and consistency of performance. Assessment must also ensure access to: • resources and information to plan and select equipment for the sailing activity • a suitable location with sheltered waters, light winds of 0-8 knots, wave height up to 0.3m, and controlled conditions suitable to participants • a qualified leader or supervisor • a small sailing boat, suitable sails and safety equipment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • oral or written questioning to assess knowledge of small boat sailing environments, including wind direction and speed and possible hazards • observation of safe participation and demonstration of basic small boat sailing techniques and manoeuvres • third-party reports from a supervisor detailing performance. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised

© Commonwealth of Australia, 2025 Public Skills Australia

wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Controlled conditions may include:	• light winds of 0-8 knots • sheltered waters with partially smooth waters • wave height up to 0.3m.
Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations • marine regulations.
Organisational policies and procedures may include:	• occupational health and safety • use, maintenance and storage of equipment • communication protocols • ***sailing etiquette*** • minimal impact environmental codes • code of ethics.
Relevant sources may include:	• Bureau of Meteorology • media • land managers or agencies • coastal patrol or coastguard • volunteer marine rescue • local knowledge.
Weather and environmental information may include:	• satellite images • daily and weekly forecasts • maximum and minimum temperatures • weather warnings • event warnings • river heights • synoptic charts • high and low tides.
Hazards may include:	• temperature extremes • slippery or unstable terrain • dangerous animals and insects • stinging trees and nettles • dense vegetation • group management hazards • slippery or unstable shore • poor posture, poor technique • poor carrying techniques • loose or insecure craft when being transported

© Commonwealth of Australia, 2025 Public Skills Australia

	• other craft.
Small boat may include:	• 18ft and under • single masted unballasted mono or multi-hulled vessel • stayed or unstayed mast • one, two or three sails.
Risks may include:	• hypothermia • heat exhaustion • injuries • exhaustion • lost party or party member • equipment and course failure.
Food and water requirements may include:	• range of foods • energy content • hydration.
Equipment may include:	• safety and rescue equipment • protective equipment • small boat • sails.
Sails may include:	• mainsail • jib • spinnaker.
Appropriate knots may include:	• figure of eight • bowline • half hitch • reef knot • rolling hitch.
Primary boat controls may include:	• mainsail • jib • balance • trim • centreboard.
Towing may include:	• single tow • multiple tow • pick-up of tow • release from tow.
Crew recovery drills may include:	• maintain sight of crew overboard at all times • teamwork • approach and stop to leeward of crew member in water • slow speed of approach

© Commonwealth of Australia, 2025 Public Skills Australia

Relevant aspects may include:

- assist crew on board.
- objectives
- planning process
- activity site
- weather
- equipment selection
- clothing selection
- food selection
- instructional content
- instructional technique
- assessment technique
- group feedback
- directing techniques
- rescue techniques employed.

Cross-Sector

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify the role and function of key stakeholders.	1.1 Identify key stakeholders and personnel that impact on the organisation and its service delivery. 1.2 Access and analyse information on the roles and functions of key stakeholders.

© Commonwealth of Australia, 2025 Public Skills Australia

	1.3 Determine the decision making processes within key stakeholder organisations and their impact on the organisation. 1.4 Research types of information and resources available from key stakeholder personnel.
2. Develop and implement strategies to promote effective stakeholder relationships.	2.1 Consult with stakeholders to establish their needs. 2.2 Plan activities to facilitate effective rapport with stakeholders. 2.3 Adopt communication techniques and methods appropriate to the needs of stakeholders. 2.4 Identify and respond to factors that may negatively impact stakeholder communication 2.5 Develop strategies to maintain working relationships with stakeholders.
3. Evaluate stakeholder relationships.	3.1 Seek feedback from stakeholders on communication and engagement activities. 3.2 Assess organisational strategies in developing effective working relationships with stakeholders. 3.3 Modify strategies in consultation with key organisational and stakeholder personnel.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for SISXMGT001 Develop and maintain stakeholder relationships

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop, implement and evaluate strategies to promote effective stakeholder relationships with at least two of the following stakeholder types:
  - government agencies
  - funding agencies
  - community organisations
  - peak bodies
  - boards of management
  - enterprises
  - industry associations
- select and use at least three different techniques and methods for stakeholder communication.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- key stakeholders likely to impact the organisation and the types of strategies and communication methods for building relationships, as specified in the Performance Evidence
- roles and functions of different stakeholders in the industry and how these are changing in relation to:
  - funding
  - management
  - decision-making
  - sponsorship
- organisational policies and procedures for stakeholder relationship management:
  - stakeholder consultation and engagement
  - communication protocols and methods for different situations
  - evaluation measures and criteria
  - conflict resolution procedures

© Commonwealth of Australia, 2025 Public Skills Australia

    - information management and security
- strengths and weaknesses of different types of stakeholder communication
- barriers to effective communication with stakeholders and ways to respond
- information and resources of stakeholders:
    - facilities
    - equipment
    - grants or funding
    - personnel
    - services
- legislative requirements relating to communication of information.

Assessment Conditions

Skills must be demonstrated in:

- a workplace or simulated industry environment.

Assessment must ensure use of:

- legislative information related to communication of information
- information about stakeholder groups / organisations
- individuals and groups with whom the candidate builds relationships; these can be:
    - individuals in industry organisations, or
    - individuals who participate in project activities, role plays or simulated activities, set up for the purpose of assessment, within a training organisation.

Assessment activities that allow the individual to:

- plan and implement strategies over time.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SITEEVT010 Manage on-site event operations

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to manage on-site operational activities for the staging of events. It requires the ability to finalise operational plans, oversee event set-up, execution and break-down, and evaluate the operational success of events.

This unit is relevant to events that are diverse in nature and are coordinated in many industry contexts, including the tourism, hospitality, sport, cultural and community sectors.

It applies to event coordinators and managers as well as venue duty, front of house and operations managers who operate independently, and are responsible for operational decisions. They may work in event management companies, in event venues, or in organisations that organise their own events.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

essential outcomes.	demonstrate achievement of the element.
1. Finalise event preparations.	1.1. Check final arrangements for event and address any discrepancies or outstanding matters. 1.2. Analyse event requirements and develop plans and procedures for event staging. 1.3. Prepare and collate operational documentation to facilitate effective on-site management, and distribute to relevant personnel. 1.4. Develop and provide event briefings to relevant personnel in advance of event. 1.5. Minimise use of printed materials and maximise electronic transmission of documents to reduce waste.
2. Oversee event set-up.	2.1. Establish on-site contact with contractors and reconfirm all requirements. 2.2. Assess all aspects of event set-up against prearranged service agreements and check for safety and ease of attendee access. 2.3. Identify deficiencies and discrepancies and take prompt action to resolve. 2.4. Conduct final briefing on event operational details, including communication and control mechanisms.
3. Monitor event operation.	3.1. Monitor event operation through observation and communication with relevant personnel to ensure effective delivery of services. 3.2. Identify and quickly evaluate operational problems as they arise and take prompt action to resolve. 3.3. Monitor compliance with environmental and social sustainability procedures to ensure minimal impacts. 3.4. Liaise with client throughout event to ensure satisfaction with service delivery and make necessary adjustments.
4. Oversee event break-down.	4.1. Ensure event break-down is completed according to agreements. 4.2. Check and sign invoices according to contractor agreements. 4.3. Debrief relevant personnel to improve future event service delivery.
5. Evaluate operational success of event.	5.1. Obtain feedback from customers and seek input from personnel and contractors on event operations. 5.2. Reflect on and evaluate operational problems. 5.3. Provide recommendations for improvements to future event management practices.

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	• interpret complex event planning documentation.
Writing skills to:	• write complex and detailed, yet easily accessible, event operational documents.
Oral communication skills to:	• provide precise instructions to event team members and contractors throughout the operation of the event • negotiate solutions and provide clear instructions when problems arise.
Numeracy skills to:	• interpret event budgets and event service agreement costings to determine correct on-site supply of contracted services • work quickly and accurately with budget figures to calculate effect on event profitability when resolving on-site problems.
Problem-solving skills to:	• negotiate solutions with clients, and internal and external personnel under pressure where time constraints play a key factor.
Teamwork skills to:	• lead a team of event staging personnel and external contractors to effectively deliver events • consult with team members and take account of suggested solutions to on-site staging problems.
Self-management skills to:	• take responsibility for the finalisation of event plans and on-site coordination of the delivery of the event.
Technology skills to:	• use calculators, computers, software programs and printers for processing event documentation • use two-way communication equipment for on-site management.

Assessment Requirements for SITEEVT010 Manage on-site event operations

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- manage on-site event operations for at least one event type listed in the knowledge evidence with multiple operational components, overseeing event:
  - set-up
  - operation
  - break-down
- develop comprehensive plans, procedures and operational documentation for staging at above event
- conduct event briefings prior to and following the above event
- liaise and consult with contractors and other relevant personnel during event finalisation, operation and break-down to ensure service agreements are met and potential risks are mitigated
- manage on-site event operations in live time where commercially realistic time pressures and constraints play a key factor.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- types of events:
  - business and corporate
  - entertainment and leisure
  - exhibitions, expositions and fairs
  - festivals
  - fundraising
  - government and civic
  - marketing
  - meetings and conventions
  - sports
- characteristics of different types of events; their purpose, format and running order
- personnel and others involved in the operation of an event:

© Commonwealth of Australia, 2025 Public Skills Australia

    - clients
    - contractors
    - event operations team
    - exhibitors
    - merchandisers
    - organising committee
    - sponsors
    - suppliers
    - venue coordinators or duty managers
    - volunteers
- roles, responsibilities, hierarchy of controls, and reporting for event staging of:
    - corporate clients
    - internal event team members, venue personnel and external contractors
    - on-site event manager
- features and functions of two-way communication equipment used to facilitate communication between event personnel
- techniques for managing stress and time during operation of events
- types of event contractors:
    - caterers
    - display suppliers
    - entertainers
    - food and beverage personnel
    - florists
    - equipment hire companies
    - registration and ticket sales specialist companies
    - security personnel
    - speakers and facilitators
    - suppliers of technical equipment and services
    - venue coordinators or duty managers
- key features and functions of event staging products and services:
    - catering
    - displays, stands and signage
    - exhibitor services
    - security
    - talent
    - technical equipment and services:
        - audiovisual
        - lighting
        - rigging
        - sets

© Commonwealth of Australia, 2025 Public Skills Australia

    - sound
    - special effects
    - stage design
  - venue or site:
    - furniture
    - layouts
    - registration areas and equipment
    - styling
- styles used in venue room set-up and their different purposes:
  - banquet
  - classroom
  - cabaret
  - theatre
  - u shape
- formats for, inclusions, and uses of:
  - operational plans and procedures used to manage on-site event logistics:
    - event documentation issued to operational personnel and contractors
    - briefing papers
    - running sheets for delivery of event
    - registration reports
    - layout plan for venue or site
  - event service agreements
- key environmental and social impacts of event delivery and minimal impact procedures to reduce them:
  - reducing impacts on the lifestyle of neighbouring residents
  - maintaining natural and cultural integrity
  - recycling and disposing of waste, especially hazardous substances
  - safety for crowds and the movement of large numbers of attendees
  - use of energy, water and other resources during event set up, operation and break down
- control measures to mitigate risk for:
  - attendees
  - contract staff
  - personnel
  - volunteers
- components of event break-down:
  - correctly removing infrastructure and facilities to ensure site is left in good condition
  - debriefing participants, exhibitors and contractors
  - directing event team member participation
  - liaising with venue and site personnel

© Commonwealth of Australia, 2025 Public Skills Australia

- overseeing recycling and environmentally sound disposal of waste
- packing and removing items.

Assessment Conditions

Skills must be demonstrated in an operational events context where the management of on-site event operations is required. This can be:

- a live event
- a simulated industry event set up for the purpose of skills assessment.

Assessment must ensure access to:

- dedicated event budgets
- venues and sites where events are operated
- computers, software programs and printers currently used by the events industry to prepare event documentation
- two-way communication equipment for on-site management
- industry current operational documents used to facilitate effective on-site management:
  - briefing papers
  - contact numbers for contractors and/or emergency services
  - copies of agreements with contractors and/or clients
  - event program and scheduled time for activities
  - event orders
  - incident reports
  - itemised lists of resources, suppliers and costs
  - layout plan for venue or site
  - plans and procedures
  - registration reports
  - risk assessments
  - running sheet for delivery of event
  - service vouchers
  - signage
  - sign-in and sign-out sheets
  - site maps
  - staffing rosters
- client's internal event team members, venue personnel and external contractors with whom the individual can interact; these can be:
  - those in an industry workplace who are assisted by the individual during the assessment process; or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTVAF005 Fill LPG gas cylinders

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to safely fill liquefied petroleum gas (LPG) cylinders up to a maximum of 9kg. It requires sound knowledge of working with volatile and hazardous gas and how to respond to an emergency.

The unit is relevant to holiday parks and resorts and other associated hospitality or retail workplaces that provide LPG cylinder filling services.

It applies to frontline service or supervisory personnel who operate with a level of independence. Work is undertaken according to organisational policy and procedures and relevant legislative requirements.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Venue and Facility Operations

Unit Sector

Tourism

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Implement work health and	1.1.Implement safe work practices when preparing,

© Commonwealth of Australia, 2025 Public Skills Australia

safety policies and procedures for working with LPG.	undertaking and finalising LPG decanting. 1.2. Lift and carry LPG cylinders following manual handling procedures. 1.3. Carry out first aid in the event of a cold burn. 1.4. Identify, eliminate or control hazards in LPG decanting area as they arise. 1.5. Report and document safety issues, hazards or incidents according to organisational work health and safety (WHS) reporting procedure. 1.6. Explain safe LPG decanting practices and relevant WHS procedures and information to customers and colleagues. 1.7. Participate in LPG WHS consultation processes.
2. Check LPG decanting cylinder for compliance.	2.1. Locate required warning notices and verify they are correct in accordance with legislative requirements. 2.2. Inspect decanting cylinder to confirm it meets safety regulations, standards and statutory requirements. 2.3. Ensure appropriate firefighting equipment is in place and has been tested within the required timeframe. 2.4. Rectify areas of non-compliance or refer to appropriate personnel as required.
3. Prepare for filling of cylinders.	3.1. Locate LPG decanting tool kit and confirm required tools and equipment are available. 3.2. Inspect LPG cylinders to confirm they are safe to fill according to legislative requirements and national standards. 3.3. Explain to customers the specific reason and potential safety risks if cylinder does not comply. 3.4. Retain hazardous cylinders according to organisational policies and procedures as required and offer customer alternative options. 3.5. Drill holes in hazardous LPG cylinder to ‘make safe’ if customer insists on having it returned. 3.6. Scan decanting area to ensure it is safe to commence decanting process. 3.7. Earth cylinder and discharge body build-up of static electricity. 3.8. Put on required protective equipment.
4. Fill cylinders.	4.1. Place cylinder in an upright position, connect decanting hose and commence filling. 4.2. When cylinder is full safely close bleed valve, remove filling hose and finalise decanting. 4.3. Check cylinder for leaks and empty if required.

© Commonwealth of Australia, 2025 Public Skills Australia

	4.4. Secure all tools and equipment and lock decanting cylinder.
5. Follow LPG emergency procedures.	5.1. Respond to LPG emergencies according to organisational emergency procedures and call for assistance from colleagues and authorities as required. 5.2. Clean up following emergencies and check all equipment for damage. 5.3. Repair, replace or re-order damaged equipment as required. 5.4. Complete LPG emergency incident and hazard report.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	• interpret unfamiliar and complex materials describing regulatory requirements for LPG safety management and organisational policies and procedures.
Writing skills to:	• prepare reports on hazards and the effectiveness of LPG safe management practices and, recommendations for change • create accurate written records according to WHS policy and procedures and regulatory compliance.
Problem-solving skills to:	• analyse LPG safety requirements, deficiencies and recommend change.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SITTVAF005 Fill LPG gas cylinders

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- demonstrate the liquefied petroleum gas (LPG) decanting process safely for at least three LPG cylinders following organisational policy and procedures for:
  - storage of tools, equipment and cylinders
  - correct positioning of LPG decanting cylinder
  - handling and transportation of full and empty LPG cylinders
  - filling cylinders
  - testing newly filled cylinders for leaks
- explain procedure to identify a hazardous cylinder and explain organisational policy and procedures for:
  - notifying customers of hazards and offering alternatives
  - retention and safe storage of hazardous cylinders
  - emptying hazardous cylinders as required
  - making cylinders safe
  - reporting and recording the identified hazard or potential hazard
- explain procedure for responding to each of the following emergency situations:
  - leaking decanting cylinder
  - leaking customer cylinder
  - LPG cylinder on fire
  - fire in location of LPG cylinders
  - vehicle driving into decanting cylinder
  - naked flame in proximity of decanting process
  - decanting cylinder leak into drainage system
  - LPG explosion
- explain procedure to complete incident reports for three of the emergency situations listed above.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

© Commonwealth of Australia, 2025 Public Skills Australia

- properties of LPG and its potentially highly volatile and dangerous nature
- potential hazards associated with LPG gas and methods of control
- unsafe conditions or environment when working with LPG:
  - damage to plant equipment
  - breaches in procedures
- required warning notices and their correct positioning
- HAZCHEM/HAZMAT symbols associated with LPG
- current legislation relating to filling LPG cylinders:
  - Australian New Zealand Standards AS/NZS1596 The storage and handling of LP gas
  - Dangerous Goods Act
  - Work Health and Safety Act
- employer responsibilities under the WHS Act to provide a safe workplace
- safe location of LPG decanting cylinder
- regulatory firefighting equipment for LPG and audit timeframe
- tools and equipment required to fill LPG cylinders
- appropriate safe environment to decant LPG
- safe standards for LPG cylinders:
  - capacity greater than 10kg
  - test pressure greater than 3.3 MPa
  - test date less than 10 years old
  - bleed valve fitted that can be easily operated
  - no rust or other damage
  - no leaking fittings
- personal protective equipment (PPE) for decanting LPG and the reason for wearing each:
  - heavy duty gloves
  - eye protection
  - work boots
- safety procedures for controlling static electricity:
  - earthing of cylinders
  - discharging body build-up of static electricity
- manual handling techniques
- operation and purpose of ‘dead man’s handle’
- safe capacity of LPG cylinders and how to identify when cylinders are at capacity
- outcomes of over filling cylinders
- how a ‘cold burn’ occurs and appropriate first aid
- emergency procedures for:
  - leaking decanting or customer cylinder
  - LPG cylinder on fire
  - fire in location of LPG cylinders
  - vehicle driving into the LPG decanting cylinder

© Commonwealth of Australia, 2025 Public Skills Australia

    - naked flame in proximity of decanting process
    - decanting cylinder leak into drainage system
    - LPG explosion
- environmental standards and safe release procedures for emptying LPG cylinders
- potential impact of LPG leaks to environment, workplace, customers and personnel
- alternative options for customers in the event their LPG gas cylinder must be retained
- organisational policies and procedures for:
    - preparing for decanting LPG
    - decanting LPG
    - finalizing cylinders
    - testing filled cylinders for leaks
    - risk management and workplace safety
    - safe storage and delivery of LPG
    - retention of hazardous cylinders
    - ‘making safe’ a hazardous cylinder
    - reporting of hazards and incidents or potential hazards and incidents
- reportable unsafe practices:
    - being asked to participate in unsafe work practices
    - failing to replace unsafe damaged property or fittings
    - ignoring direction of safety signage, supervisors, or managers
    - lack of required safety signage
    - lack of training in health and safety procedures and safe work practices
    - seeing others using unsafe work practices
    - broken or malfunctioning equipment.

Assessment Conditions

Skills must be demonstrated in an operational business or activity where LPG cylinder filling is required and safe working practices must be maintained, this can be:

- an industry workplace
- a simulated environment set up for the purpose of skills assessment.

Assessment must ensure use of:

- relevant documentation:
    - current plain English regulatory documents distributed by the LPG supplier and local work health and safety government regulator
    - policies, procedures, codes of practice and standards issued by government regulators or industry groups
    - LPG safe handling and decanting manuals
    - current organisational policies, procedures and template documents

© Commonwealth of Australia, 2025 Public Skills Australia

    - LPG incident and hazard report identifying:
        - cause of emergency
        - outcome
        - recommendation for prevention of reoccurrence
- safety equipment for decanting LPG:
    - PPE
    - 9kg dry chemical powder fire extinguisher
    - hose attached permanently to a water tap
- tools and equipment for decanting LPG:
    - set spanner or adjustable spanner to fit plug and connection
    - screwdrivers to meet size of bleed valves on different size cylinders
    - lockable padlock on decanting bottle
    - filling hose
- drill and drill bits for making a hazardous cylinder safe
- LPG gas cylinders requiring filling
- LPG decanting cylinder
- required warning notices positioned correctly
- customers and colleagues with whom the individual can interact; these can be:
    - customers or colleagues in an industry workplace; or
    - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and;

- have worked in industry for at least three years where that have applied the skills and knowledge of this unit of competency.

TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with *TAE Training and Education Training Package Version 2.0.*

Application

This unit describes the skills and knowledge required to conduct individual and group instruction, demonstrate work skills and assess the success of training and one's own training performance, using existing learning resources in a safe and comfortable learning environment.

It emphasises the training as being driven by the work process and context, and applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations,

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Organise instruction and demonstration	1.1 Gather information about learner characteristics and learning needs 1.2 Confirm a safe learning environment 1.3 Gather and check instruction, demonstration objectives, and seek assistance if required 1.4 Access and review relevant learning resources and learning

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	materials for suitability and relevance, and seek assistance to interpret the contextual application 1.5 Organise access to necessary equipment or physical resources required for instruction and demonstration 1.6 Notify learners of details regarding the implementation of the learning program and/or delivery plan
2. Conduct instruction and demonstration	2.1 Use interpersonal skills with learners to establish a safe and comfortable learning environment 2.2 Follow the learning program and/or delivery plan to cover all learning objectives 2.3 Brief learners on any workplace health and safety (WHS) procedures and requirements prior to, and during, training 2.4 Use delivery techniques to structure, pace and enhance learning 2.5 Apply coaching techniques to assist learning 2.6 Use communication skills to provide information, instruct learners and demonstrate relevant work skills 2.7 Provide opportunities for practice during instruction and through work activities 2.8 Provide and discuss feedback on learner performance to support learning
3. Check training performance	3.1 Use measures to ensure learners are acquiring, and can use, new technical and generic skills and knowledge 3.2 Monitor learner progress and outcomes in consultation with the learner 3.3 Review relationship between the trainer/coach and the learner, and adjust to suit learner needs
4. Review personal training performance	4.1 Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement 4.2 Maintain, store and secure learner records, according to organisational and legal requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Public Skills Australia

Skill	Performance Criteria	Description
Learning	4.1	• Reflects on practice to improve
Reading	1.1, 1.3, 1.4, 2.2	• Sources and interprets processes and procedures, learning resources and information relevant to providing a work instruction and delivery
Writing	1.4, 1.6, 2.3, 2.6, 2.8, 3.2, 4.1, 4.2	• Accurately maintains learner records and documentation appropriate to the learning context and audience
Oral Communication	1.1, 1.6, 2.3, 2.4, 2.6	• Uses appropriate communication strategies to engage, build rapport, provide instruction, monitor progress and provide feedback to individuals or groups
Interact with others	1.2, 1.3, 2.1, 2.5, 2.8, 3.2	• Recognises the importance of consultation and negotiation while collaborating to confirm strategy and achieve required outcomes • Asks questions in order to clarify understanding, and to provide and seek feedback • Builds rapport to establish effective working relationships and to achieve effective outcomes
Get the work done	1.1-1.6, 2.1-2.8, 3.1-3.3, 4.1, 4.2	• Organises and completes work according to defined requirements, taking responsibility for some decisions and sequencing tasks to achieve efficient outcomes • Identifies and responds to potential risks, problems and opportunities for improvement and considers options for different approaches

Assessment Requirements for TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with *TAE Training and Education Training Package Version 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- carrying out a minimum of three training sessions, involving demonstrating and instructing particular work skills for at least two different individuals or small groups, with each session addressing:
  - different learning objectives
  - a range of delivery techniques and effective communication skills appropriate to the audience.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learner characteristics and needs
- the content and requirements of the relevant learning program, and/or the delivery plan
- the sources and availability of relevant learning resources and learning materials
- the content of relevant learning resources and learning materials
- training techniques that enhance learning, and when to use them
- introductory knowledge of learning principles and learning styles
- key workplace health and safety (WHS) issues in the learning environment, including:
  - roles and responsibilities of key personnel
  - responsibilities of learners
  - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
  - risk controls for the specific learning environment.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to any necessary workplace documents.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL401 Plan, organise and deliver group-based learning

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Application

This unit describes the skills and knowledge required to plan, organise and deliver training for individuals within a group.

It applies to a person working as an entry-level trainer, teacher or facilitator structuring a learning program developed by others in, or with, a training and assessment organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Interpret learning environment and delivery requirements	1.1 Access, read, and interpret learning program documentation to determine delivery requirements 1.2 Use available information and documentation to identify group and individual learner needs, and learner characteristics 1.3 Identify and assess constraints, and risks to delivery

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Confirm personal role and responsibilities in planning, and delivering training, with relevant personnel
2. Prepare session plans	2.1 Refine existing learning objectives according to program requirements and specific needs of individual learners 2.2 Develop session plans and document these plans for each segment of the learning program 2.3 Use knowledge of learning principles and theories to generate ideas for managing session delivery
3. Prepare resources for delivery	3.1 Contextualise learning materials to meet the needs of the specific learner group 3.2 Finalise learning materials and organise facility, technology and equipment needs in time for delivery of learning sessions 3.3 Confirm overall delivery arrangements with relevant personnel
4. Deliver and facilitate training sessions	4.1 Conduct each session according to the session plan, modified where appropriate to meet learner needs 4.2 Use the diversity of the group as another resource to support learning 4.3 Employ a range of delivery methods to optimise learner experiences 4.4 Demonstrate effective facilitation skills to ensure effective participation and group management
5. Support and monitor learning	5.1 Monitor, and document, learner progress to ensure outcomes are being achieved, and individual learner needs are being met 5.2 Make adjustments to the delivery sessions to reflect specific needs and circumstances 5.3 Manage inappropriate behaviour to ensure that learning can take place 5.4 Maintain and store learner records according to organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Public Skills Australia

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.1, 3.1, 5.1	• Access, read and interpret documentation relevant to the learning context, including program documents, learning materials, policies and procedures relevant to the context
Writing	2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 5.1, 5.2, 5.4	• Develops and maintains workplace documentation accurately and in response to required needs
Oral Communication	1.2, 1.3, 4.1, 4.3, 4.4	• Uses communication techniques to build rapport and explore requirements • Facilitates training in an appropriate style for both individuals and groups
Navigate the world of work	1.4, 5.4	• Recognises and follows organisational protocols, policies and procedures relevant to own role
Interact with others	1.4, 3.3, 4.4, 5.3	• Cooperates and collaborates with others as part of routine activities to achieve team results, and to confirm that outcomes meet requirements • Recognises inappropriate behaviours and the potential for conflict, and implements strategies to maintain an appropriate learning environment
Get the work done	1.1-1.4, 2.1-2.3, 3.1-3.3, 4.1-4.4, 5.1-5.4	• Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes • Identifies and responds to problems and opportunities for improvement and considers options for different approaches • Uses information and communications technology (ICT) based tools to access, organise, analyse and display information relevant to role

Assessment Requirements for TAEDEL401 Plan, organise and deliver group-based learning

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1.* Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete the tasks outlined in the elements and performance criteria of this unit, including:

- facilitating group-based learning by preparing and delivering at least three training sessions, including:
  - at least two consecutive sessions of at least 40 minutes duration, that follow one of the learning program designs, to a learner group of at least eight individuals
  - at least one session delivered to a learner group of at least eight individuals, with evidence of how the characteristics and needs of this group were addressed
- identifying and responding to individual needs
- accessing and using documented resources, and any support personnel required to guide inclusive practices.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learning theories and principles
- resources available to identify different learner styles
- the relevant industry area and subject matter of the delivery
- the learner group profile, including characteristics and needs of individual learners in the group
- the requirements of the learning program and/or delivery plan, and the content purpose
- different delivery methods and techniques appropriate to face-to-face group delivery

© Commonwealth of Australia, 2025 Public Skills Australia

- different techniques for the recognition and resolution of inappropriate behaviours
- behaviours that may indicate learner difficulties, and the methods used to address these difficulties
- the purpose of organisational record-management systems and reporting requirements
- evaluation and revision techniques used to improve session plans
- specific resources, equipment and support services available for learners with special needs
- assessment and risk control measures relating to the facilitation of group-based learning
- policies and procedures relevant to the learning environment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to learning program designs in use in the learning environment.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL402 Plan, organise and facilitate learning in the workplace

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1*. Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Application

This unit describes skills and knowledge required to plan, organise and facilitate learning for individuals in a workplace, using real work activities as the basis for learning.

It applies to a person working as an entry-level trainer, teacher or facilitator or an employee, team leader or workplace supervisor responsible for guiding learning through work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish effective work environment for learning	1.1 Establish, and agree upon, the objectives and scope of the work-based learning 1.2 Analyse work practices and routines to determine their effectiveness in meeting established learning objectives

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.3 Identify, and address any workplace health and safety (WHS) implications of using work as the basis for learning
2. Develop a work-based learning pathway	2.1 Address contractual requirements and responsibilities for learning at work 2.2 Arrange for the integration and monitoring of external learning activities with the work-based learning pathway 2.3 Obtain agreement from relevant personnel to implement the work-based learning pathway
3. Establish the learning-facilitation relationship	3.1 Identify the context for learning and the individual's learning style 3.2 Select an appropriate technique or process to facilitate learning, and explain the basis of the technique to the learner 3.3 Develop, document and discuss an individualised learning plan with the learner 3.4 Access, read and interpret documentation outlining the WHS responsibilities of the various parties in the learning environment 3.5 Monitor supervisory arrangements appropriate to learner's levels of knowledge, skill and experience to provide support and encouragement and ensure learner's health and safety
4. Implement the work-based learning pathway	4.1 Explain the objectives of work-based learning, and the processes involved, to the learner 4.2 Sequence the introduction of workplace tasks, activities and processes to reflect the agreed work-based learning pathway 4.3 Encourage learner to take responsibility for learning and to self-reflect 4.4 Develop techniques that facilitate the learner's transfer of skills and knowledge
5. Maintain and develop the learning-facilitation relationship	5.1 Prepare for each session 5.2 Structure learning activities to support and reinforce new learning, build on strengths, and identify areas for further development 5.3 Observe learner cues, and change approaches where necessary, in order to maintain momentum 5.4 Practise ethical behaviour at all times 5.5 Monitor the effectiveness of the learning/facilitation relationship through regular meetings between the parties

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
6. Close and evaluate the learning-facilitation relationship	6.1 Carry out the closure smoothly, using appropriate interpersonal and communication skills 6.2 Seek feedback from the learner on the outcomes achieved, and the value of the relationship 6.3 Evaluate effectiveness of the work-based pathway against the objectives, processes and techniques used 6.4 Recommend improvements to work-based practice in light of the review process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.1, 3.1, 3.4, 3.5, 6.3	• Accesses and interprets compliance information, contractual information, WHS information, and documents relevant to learning in the workplace, in the context of consultation and continuous improvement, to apply relevance to requirements
Writing	1.1, 2.3, 3.3, 4.1, 6.3	• Develops and maintains documentation relevant to workplace learning, including learning plans and evaluations, in accordance with organisational and workplace requirements
Oral Communication	2.2, 3.3, 4.2, 5.5, 6.1	• Uses oral communication techniques to identify needs, build rapport, agree on learning plans, facilitate effective learning and monitor practice • Selects appropriate vocabulary adjusting language, tone and pace to maintain effective interactions, and to build and maintain engagement with individuals or groups
Navigate the world of work	1.3, 2.1, 5.4	• Follows organisational protocols, policies and procedures in the management of records • Recognises and responds to contractual and ethical requirements associated with own role
Interact with others	1.1, 2.3, 3.5, 4.3, 6.2	• Asks questions to clarify understanding, and seeks feedback and further information • Cooperates and collaborates with others as part of

© Commonwealth of Australia, 2025 Public Skills Australia

		routine activities to achieve team results, and to confirm outcomes meet requirements
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.5, 4.1-4.4, 5.1-5.3, 5.5, 6.1-6.3	• Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes • Uses systematic, analytical processes in complex, routine and non-routine situations, gathering information, and identifying and evaluating options based on organisational needs • Identifies and responds to problems and opportunities for improvement, considering options for different approaches • Uses information and communications technology (ICT) based tools to design work processes and to complete work tasks

Assessment Requirements for TAEDEL402 Plan, organise and facilitate learning in the workplace

Modification History

Release	Comments
Release 2	This was first released with *TAE Training and Education Training Package Release 2.1*. Minor update to Assessment Conditions.
Release 1	This version first released with *TAE Training and Education Training Package Release 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- preparing and facilitating work-based learning
- providing a minimum of two examples of developing work-based learning pathways, that include:
  - identifying needs for learning
  - analysing work practices, work environment and work activities
  - organising and allocating work in a way that reflects learning needs, and provides effective learning opportunities through work processes
- conducting a learning facilitation relationship:
  - with at least two individuals
  - demonstrating communication skills and flexibility
  - demonstrating one or more of the processes, or techniques, identified.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- systems, processes and practices within the organisation where work-based learning is taking place
- systems for identifying skill needs within the workplace
- different learning styles, and how to encourage learning for those who learn in different ways

© Commonwealth of Australia, 2025 Public Skills Australia

- workplace health and safety (WHS) relating to the work role, including:
  - hazards relating to the industry and specific workplace
  - reporting requirements for hazards and incidents
  - specific procedures for work tasks
  - safe use and maintenance of relevant equipment
  - emergency procedures
  - sources of WHS information.
  -

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to any documentation relating to workplace procedures required by the candidate.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL404 Mentor in the workplace

Modification History

Release	Comments
Release 1	This version first released with *TAE Training and Education Training Package Version 2.0.*

Application

This unit describes the skills and knowledge required to establish and develop a professional mentoring relationship with an individual in a workplace.

It applies to workplace supervisors or other work colleagues who work under limited supervision and who have responsibility for mentoring one or more individuals in the workplace. This may include, but is not limited to, those who mentor an apprentice or trainee employed by, or undertaking a work placement within, an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop a mentoring plan	1.1 Identify scope and boundaries of the mentoring relationship according to organisational procedures 1.2 Document mentoring plan in accordance with organisational requirements 1.3 Establish ground rules and negotiate realistic expectations 1.4 Establish and maintain confidentiality of the relationship in

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	accordance with legislation, policy and procedures
2. Facilitate mentoring relationship	2.1 Develop learner's confidence, self-esteem, respect and trust in the mentoring relationship 2.2 Share personal experiences and knowledge with the person being mentored according to agreed objectives 2.3 Support the person being mentored to develop and use skills in problem solving and decision making 2.4 Use personal and professional networks to assist the person being mentored 2.5 Provide information, and guidance to enhance engagement in the workplace 2.6 Use techniques for resolving differences without damaging the relationship, and obtain assistance according to organisational policy and procedures
3. Monitor mentoring relationship	3.1 Provide planning assistance and guidance as requested by the person being mentored in a form and style to suit their requirements 3.2 Provide feedback to the person being mentored on progress towards achieving the expectations and goals of the mentoring process 3.3 Recognise and discuss changes in the mentoring relationship with appropriate stakeholders 3.4 Negotiate and manage closure of the mentoring arrangement once objectives have been met
4. Evaluate effectiveness of mentoring	4.1 Establish and discuss benefits gained from the mentoring process 4.2 Reflect on and articulate the personal benefits gained from providing mentoring 4.3 Identify and report the outcomes of the mentoring arrangement and the benefits to the organisation according to organisational policy and procedures to improve the mentoring system or program

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Public Skills Australia

Skill	Performance Criteria	Description
Reading	1.1, 1.4	• Sources and interprets texts relevant to mentoring context, including organisational policies and learner information
Writing	1.1, 1.3, 2.5, 3.1, 3.2, 4.3	• Develops content and documents information relevant to mentoring plan
Oral Communication	2.4, 3.3, 4.1, 4.2, 4.3	• Uses appropriate communication techniques to build rapport, trust, engagement and provide guidance and feedback
Navigate the world of work	1.1, 1.4, 2.6, 4.3	• Follows legislative requirements, organisational protocols, policies and procedures in workplace mentoring
Interact with others	1.2, 2.1-2.3, 2.5, 2.6, 3.1, 3.2, 3.4	• Builds rapport using collaboration with others to achieve joint outcomes and effective interaction • Provides mentoring and role modelling to achieve agreed outcomes • Cooperates and consults with others to clarify understanding and seek feedback
Get the work done	1.1-1.4, 2.1-2.6, 3.1-3.4, 4.1-4.3	• Plans, organises and completes work according to defined requirements taking responsibility for decisions and sequencing tasks to achieve efficient outcomes • Identifies and responds to problems, considering options for different approaches

Assessment Requirements for TAEDEL404 Mentor in the workplace

Modification History

Release	Comments
Release1	This version first released with *TAE Training and Education Training Package Version 2.0.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, including:

- preparing a mentoring plan between the mentor and mentee that sets out clear objectives for a mentoring relationship that will last at least one year
- facilitating at least three mentoring sessions
- documenting information on sessions, including comments and notes from both mentor and mentee.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant policy, legislation, codes of practice and national standards likely to impact on the provision of workplace mentoring, including training contracts and responsibilities of employer, registered training organisation (RTO) and funding body where they exist
- mentoring methodologies and strategies
- learning theories in relation to mentoring
- strategies for working with a mentee including encouraging self reflection, confidence and the building of rapport
- acceptable behaviour in the mentoring relationship
- equal employment opportunity, equity and diversity principles
- how a mentor can support the mentee's employer to meet its WHS obligations for the mentee.
-

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to:

- documentation of any existing training plan or contract if applicable to the mentoring relationship.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TLIA2011 Package goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to package goods in accordance with regulatory and workplace requirements as part of work activities undertaken within the transport and logistics industry.

It includes selecting materials, packing, and labelling packaged products/loads to the required labelling standards.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Select materials and pack products	1.1 Packaging specifications and order packaging documentation are correctly interpreted

© Commonwealth of Australia, 2025 Public Skills Australia

	1.2 Packaging technology suitable for the goods to be packed is selected
	1.3 Packaging materials are identified and matched to specifications
	1.4 Work plan is followed, materials are used economically and appropriate packaging is used to minimise loss and damage in transit or storage
	1.5 Work is planned in accordance with work health and safety (WHS)/occupational health and safety (OHS) requirements
	1.6 Completed packed goods are stacked to minimise damage from within and outside
2 Label packaged products/loads	2.1 Workplace labelling standards are identified
	2.2 Appropriate goods handling, labelling and other identification symbols are used
	2.3 Invoices and picking slips are attached as required
	2.4 Workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2011A Package goods.

Assessment Requirements for TLIA2011 Package goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- checking operation of packaging equipment in terms of service schedule and standard operating procedures
- communicating and working effectively with others when packaging goods
- completing documentation related to work activities when packaging goods
- estimating the size, shape and special requirements of goods and loads
- implementing contingency plans when packaging goods
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring equipment performance when packaging goods
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading and interpreting instructions, procedures and labels relevant to packaging goods
- selecting and using relevant communications, computing equipment and materials when packaging goods
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant to packaging goods
- documentation requirements for packaging goods, such as a workplan
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for packaging goods
- problems that may occur when packaging goods and appropriate action that can be taken to resolve these problems
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- workplace procedures and policies for packaging goods.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
-

TLIA2012 Pick and process orders

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to pick and process orders in accordance with relevant codes, regulations and workplace requirements within the transport and logistics industry.

It includes identifying workplace order picking processes, policies and procedures; picking and despatching orders; and recording stock levels.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify workplace order picking processes, policies	1.1 Workplace procedures for order picking and related workplace documentation are interpreted
	1.2 Stock allocation and location systems are identified and

© Commonwealth of Australia, 2025 Public Skills Australia

	and procedures		located
		1.3	Appropriate manual handling equipment is selected in accordance with work health and safety (WHS)/occupational health and safety (OHS) regulations and workplace procedures
2	**Pick and despatch an order**	2.1	Work requirements are planned and appropriate equipment and documentation is assembled
		2.2	Warehouse zones where required products are stored, are identified and located
		2.3	Pick path is established
		2.4	Appropriate pallet/s for orders are selected and stacked to minimise stock damage and to maximise stability, as required
		2.5	Products are selected and consolidated
		2.6	Products/pallets are located in despatch areas
		2.7	Products are assembled to meet workplace schedules
		2.8	Orders are consolidated, secured, arranged and placed in storage zones in accordance with schedules
3	**Record stock levels**	3.1	Storage areas are checked and stocks are noted for replenishment in accordance with workplace procedures
		3.2	Workplace records are completed in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIA2012 Pick and process orders

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist when picking and processing orders
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when picking and processing orders
- completing documentation related to picking and processing orders
- estimating the size, shape and special requirements of goods/loads
- identifying relevant stock and goods coding and labelling, including Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) markings
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading, interpreting, and following instructions, procedures, signs and labels relevant to picking and processing orders
- selecting and using relevant equipment and communications technology when picking and processing orders
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Public Skills Australia

- documentation and record requirements when picking and processing an order
- equipment used during picking and processing operations and the precautions and procedures to be followed in its use
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for picking and processing orders
- problems that may occur when picking and processing an order and appropriate action that can be taken to resolve these problems
- regulations relevant to picking and processing orders, including relevant bond, quarantine or other legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- workplace procedures and policies for picking and processing orders.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIA2013 Receive goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to receive goods in accordance with regulatory and workplace requirements as part of work activities undertaken within the transport and logistics industry.

It includes identifying workplace procedures and documentation requirements for receiving goods; checking and inspecting goods on arrival and completing workplace documentation; and unloading, unpacking and storing stock.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

Assessment Requirements for TLIA3023 Coordinate stocktakes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in stock and equipment in accordance with standard operating procedures
- reading and interpreting relevant instructions, procedures and labels
- selecting and using relevant communications, computing and office equipment
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian codes and regulations relevant to coordinating stocktakes
- computer records and documentation requirements for coordinating stocktakes
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for conducting stocktakes
- principles and functions of stocktakes
- problems that may occur when coordinating a stocktake and appropriate action that can be taken

© Commonwealth of Australia, 2025 Public Skills Australia

- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout
- workplace procedures and policies for coordinating stocktakes
- workplace processes for records management and producing stocktake reports.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIA5029 Plan and manage storage of dangerous goods and hazardous substances

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to plan and manage the storage of dangerous goods and hazardous substances in accordance with all relevant regulatory requirements, standards, and workplace procedures including the current Australian Dangerous Goods (ADG) Code.

It includes defining the objectives of required handling and storage operations, specifying equipment and system performance requirements, evaluating and selecting bulk handling and storage resources and completing all required documentation.

Work is carried out under general guidance. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

The unit generally applies to those with responsibility for resource coordination and allocation, who lead individuals or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Define objectives of required handling and storage operation	1.1 Requirements for bulk handling and storage activities are identified in accordance with workplace requirements
	1.2 Current best practice and future trends for handling and storage equipment are assessed and compared to present operations
	1.3 Consideration of workplace goals and present capabilities and constraints is undertaken when selecting bulk handling and storage resources
2 Specify equipment and system performance requirements	2.1 Bulk handling and storage equipment and system requirements are documented
	2.2 Performance measures for equipment and system operations are developed and documented
	2.3 Consultations are conducted with relevant employees and management to verify documented requirements
3 Evaluate and select bulk handling and storage resources	3.1 Range of bulk handling and storage equipment and facilities that meet specifications are researched for costs and benefits as well as potential adaptability for new business opportunities
	3.2 Rating system is instigated to facilitate comparisons of cost/benefit and other qualitative properties of bulk handling and storage equipment and systems
	3.3 Analysis of current employee competency in relation to required competency is undertaken and documented
	3.4 Equipment is selected based on comparisons of performance specifications including cost, output, set-up requirements, maintenance and retraining
4 Complete documentation	4.1 Workplace documentation is completed as required
	4.2 Handling and storage requirements are documented and communicated to relevant personnel
	4.3 Reports are compiled and forwarded to appropriate personnel

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA5029A Plan and manage storage of dangerous goods and hazardous substances.

Assessment Requirements for TLIA5029 Plan and manage storage of dangerous goods and hazardous substances

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and working effectively with others when planning and managing the storage of dangerous goods and hazardous substances
- completing documentation as required for the storage of dangerous goods and hazardous substances
- controlling risks
- determining required permits/licences
- estimating weight and volume of goods to be stored and any special requirements
- identifying container markings and HAZCHEM codes
- identifying potential hazards and planning work to minimise risks when storing dangerous goods and hazardous substances
- planning and assessing options for the safe and efficient storage of dangerous goods and hazardous substances to regulatory requirements, as a minimum
- prioritising work and coordinating self and others in relation to activities
- providing leadership to others when planning and managing the storage of dangerous goods and hazardous substances
- reading, interpreting and following procedures, technical data, drawings, instructions and manuals relevant to planning and managing the storage of dangerous goods and hazardous substances
- recognising hazards and applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- selecting and applying appropriate technology, information systems and procedures when planning and managing the storage of dangerous goods and hazardous substances
- undertaking a hazard analysis and risk assessment.

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- application of all relevant Australian and International Standards
- application of current competencies within functional activity
- Australian and international regulations and codes of practice for handling and transporting dangerous goods and hazardous substances
- coaching and mentoring approaches to support team members to share knowledge and skills
- equipment applications, capacities, configurations, safety hazards and control mechanisms
- hierarchy of risks and hazards related to the storage of dangerous goods and hazardous substances, and ways of controlling the risks involved
- operational procedures for safe transfer and storage of dangerous goods and hazardous substances
- operational work systems, resources, management and workplace operating systems
- problems that may occur when planning and managing the storage of dangerous goods and hazardous substances, and action that can be taken to resolve or report these problems
- relevant permit and licence requirements
- relevant regulations, codes of practice and legislative requirements including local and international regulations relevant to handling and storage
- relevant workplace documentation procedures
- resource availability including the competencies of individuals in the team and group
- workplace procedures for planning and managing the storage of dangerous goods and hazardous substances.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

TLIB0012 Maintain and use hand tools

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to maintain and use hand tools in accordance with workplace procedures and safe working codes of practice across a variety of operational workplace contexts within the transport and logistics industry.

It includes selecting and using hand tools to complete workplace tasks, maintaining basic hand tools in accordance with manufacturer instructions, and securing and storing hand tools in accordance with workplace procedures.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

B – Equipment Checking and Maintenance

Unit Sector

Rail sector.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Select and use hand tools	**1.1** Correct tools are chosen to complete workplace tasks
	1.2 Appropriate personal protection equipment (PPE) is selected and used to minimise personal injury risk

© Commonwealth of Australia, 2025 Public Skills Australia

		1.3	Hand tools are used in accordance with manufacturer specifications or workplace procedures to prevent damage and personal injury
2	**Maintain hand tools**	**2.1**	Hand tool are cleaned and maintained in accordance with manufacturer specifications and/or local instructions to ensure correct ongoing functionality of hand tools
		2.2	Unserviceable tools are repaired, replaced or reported to relevant personnel to ensure correct functionality
3	**Secure and store hand tools**	**3.1**	Tools are transported in a safe, secure, efficient manner to minimise risk of injury to personnel and damage to equipment
		3.2	Tools are stored and secured according to manufacturer or workplace procedures to prevent damage to, and losses of, equipment

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIB1028 Maintain and use hand tools.

Assessment Requirements for TLIB0012 Maintain and use hand tools

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- completing relevant documentation
- identifying and selecting at least three different types of hand tools and related materials or equipment suitable for the required task
- using at least three different types of hand tools and related materials or equipment safely
- reading, interpreting and following relevant instructions, procedures, information and signs.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- workplace emergency procedures
- materials for maintaining hand tools and the procedures and precautions for their care, use and storage
- problems that may occur maintaining and using hand tools and related action that should be taken
- relevant work health and safety (WHS)/occupational health and safety (OHS), and environmental procedures and regulations
- relevant sections of state/territory regulations, codes of practice and safe working system requirements
- workplace documentation and records requirements
- workplace procedures and policies for maintaining and using hand tools.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIB3006 Carry out inspection of vehicles designed to carry special loads

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to carry out an inspection of a commercial vehicle designed to carry a special load, in accordance with relevant roads and traffic authority regulations, and workplace policy and procedures concerning vehicle inspection.

It includes action to implement manufacturer specifications for routine checks of vehicle and its associated equipment, to clean the vehicle and its associated equipment, to ensure all specified safety requirements are met, and to ensure vehicle and equipment are operational to workplace requirements and relevant state/territory roads and traffic authority regulations.

Work is performed with limited supervision, with duty of care responsibility for self and others in achieving the prescribed outcomes. It involves the application of routine vehicle checking and maintenance principles and procedures to inspect a commercial vehicle designed to carry special loads, across a variety of operational contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

B – Equipment Checking and Maintenance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Check vehicle	1.1 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.2 Visual check of internal and external condition of vehicle is carried out in accordance with workplace procedures
	1.3 Pre-operational inspections and checks of vehicle tyres, suspension, fluid levels and other critical features are carried out to ensure conformance with road safety standards
	1.4 Associated equipment is tested to ensure it functions correctly to manufacturer specifications
	1.5 Post start-up and shut-down checks are carried out after engine is started to identify possible engine or electrical problems
	1.6 Warning systems (instruments and gauges) are checked to ensure they are operational
	1.7 Vehicle-monitoring device is logged on/off in accordance with manufacturer instructions and workplace procedures, as required
2 Clean vehicle and ancillary equipment	2.1 Vehicle and associated equipment is cleaned in accordance with workplace procedures
	2.2 Special purpose ancillary equipment is cleaned in accordance with relevant government regulations and workplace procedures
3 Complete documentation	3.1 Basic faults are identified and/or diagnosed and appropriate action is taken to report or remedy them as required by workplace procedures and legislation
	3.2 Records of inspection are updated and recommended repairs are documented in accordance with workplace procedures

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for TLIB3006 Carry out inspection of vehicles designed to carry special loads

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- completing relevant documentation
- interpreting and following operational instructions and prioritise work
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information, technical data and drawings
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- principles of operation of systems on commercial vehicles including:
  - electrical systems
  - fuel systems
  - cooling systems
  - steering systems
  - exhaust systems

© Commonwealth of Australia, 2025 Public Skills Australia

    - tyres, brakes
    - relevant ancillary systems
- problems that may occur during routine inspection of a vehicle and its associated ancillary equipment, and appropriate actions and solutions
- procedures for checking and routine inspection of a commercial vehicle designed to carry special loads, in accordance with workplace and manufacturer requirements and established safety rules and regulations including:
    - visual inspection
    - pre-operational checking
    - warning systems checking
- relevant duty of care requirements for routine inspection of vehicles designed to carry special loads
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- relevant recording and documentation procedures
- techniques for recognising faults and vehicle/ancillary system irregularities.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIB5010 Plan and implement maintenance schedules

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to plan and implement maintenance schedules according to relevant regulatory requirements, standards, workplace procedures and codes of practice including the Australian Dangerous Goods (ADG) Code.

It includes establishing maintenance requirements, organising maintenance activities and resources and completing required procedures and documentation.

Work is carried out under general guidance. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within workplace policies and procedures.

The unit generally applies to those with responsibility for resource coordination and allocation, who lead individuals or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

essential outcomes.	demonstrate achievement of the element.	
1 Establish maintenance requirements	1.1	Equipment specifications, service requirements and workplace procedures are checked for recommended maintenance intervals and processes
	1.2	Special requirements for maintenance of storage zones are identified
	1.3	Comparisons with previous experience, future equipment use, work requirements and standard operating procedures are made to inform the planning process
	1.4	Work plan and work schedule are developed
	1.5	Internal and external contractors and/or maintenance providers are identified
	1.6	Costings for process are identified based on work schedule (equipment/staff off-line), equipment manufacturer recommendations, charges for materials, equipment and consumables and internal/external labour charges
	1.7	Required interruptions, processes and procedures are documented and recorded
	1.8	Clearances for required maintenance costs are obtained
2 Organise maintenance activities	2.1	Work schedules and staff rosters are checked to identify times when maintenance process may be scheduled including optimum timing for any shut down
	2.2	Permission from supervisory personnel is obtained for timing of maintenance to optimise the maintenance process and work
	2.3	Detailed work plans are developed in accordance with work schedules, availability of expertise and resource availability
	2.4	Employees with the required competencies are identified and appropriate training and assessment is facilitated as required
	2.5	Approvals for work schedule, employee work pattern and maintenance schedule adjustments are obtained and work plan is refined to ensure maintenance program will maintain workplace outputs in terms of workplace policy
3 Organise resources	3.1	Required equipment, personnel and consumables are allocated in accordance with workplace procedures

© Commonwealth of Australia, 2025 Public Skills Australia

	3.2	Consumables, equipment and expertise are located and coordinated to meet maintenance work schedule
	3.3	Externally sourced equipment, consumables and expertise are identified and appropriate arrangements are made for procurement
4 Complete maintenance procedures	4.1	Completed work is checked against maintenance schedule and work plan
	4.2	Records of work are completed and forwarded to appropriate personnel noting areas where additional maintenance is required to maintain optimum work output and equipment life

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIB5010 Plan and implement maintenance schedules

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment in accordance with standard operating procedures
- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when planning and implementing maintenance schedules
- completing documentation related to planning and implementing maintenance schedules
- ensuring the servicing of equipment in terms of maintenance schedule and standard operating procedures
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- reading and interpreting instructions, procedures, information and signs relevant to planning and implementing maintenance schedules
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- application of current competencies within functional activity
- application of relevant Australian and international standards and associated certification requirements
- characteristics and capabilities of equipment, materials and processes used
- contacts and sources of information/documentation needed when planning and implementing maintenance systems
- operational maintenance systems, resources, management and workplace operating systems
- procedures for establishing and/or monitoring suitable maintenance systems
- procedures for identifying and evaluating information needed to plan and implement maintenance schedules
- procedures for identifying and interpreting maintenance requirements
- procedures for liaising with manufacturers and suppliers
- procedures for operating electronic communications equipment
- procedures for reviewing system options for maintenance operations including appropriate risk analysis
- quality and customer service standards, policies and procedures
- relative features and risks of various maintenance systems, their applications and processes, and issues involved in their use
- relevant Australian and international regulations, codes of practice and legislative requirements including local and international freight regulations
- relevant workplace documentation procedures
- resource availability including the competencies of individuals in the team/group.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIC3063 Operate vehicle carrying special loads

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to safely operate a vehicle carrying a special load in accordance with road and traffic authority and other relevant government regulations and company policies, and to effectively manage hazardous situations.

It involves carrying out pre-operational checks, driving a vehicle carrying special loads, and applying routine vehicle driving principles and procedures to maintain the safety and operation of a commercial vehicle carrying a special load across a variety of driving contexts.

Driving must be carried out in accordance with relevant state/territory road and traffic authority licence and permit requirements and regulations and specific regulatory and permit requirements for the special load being carried.

Driving is performed with limited supervision, and with duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Assessment Requirements for TLIC3063 Operate vehicle carrying special loads

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes
- communicating effectively with others
- completing relevant documentation
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and anticipating traffic hazards and taking appropriate actions
- monitoring performance of vehicle, its equipment and load, and taking appropriate actions, as required
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- servicing vehicle and its equipment in terms of maintenance schedule and operating procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques

© Commonwealth of Australia, 2025 Public Skills Australia

- engine power management and safe driving strategies
- factors that increase fatigue-related accidents
- factors that may cause traffic delays and diversions and related actions that can be taken by a driver
- fatigue management strategies including on-road techniques
- lifestyles that promote effective long-term fatigue management
- map reading and road navigation techniques
- pre-operational checks carried out on vehicle and related actions
- procedures to be followed in a driving emergency
- relevant Australian regulations and codes of practice for handling and transporting dangerous goods (DG) and hazardous substances, including the current Australian Dangerous Goods (ADG) Code and the current Australian Code for the Transport of Explosives by Road and Rail
- relevant state/territory road and traffic authority road rules, regulations, permits and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- vehicle controls, instruments and indicators, and their use
- workplace driving and operational instructions.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Practical assessment must be in vehicles designed to carry special loads, for example, concrete agitator, livestock transporter, armoured car, tanker, refrigerated vehicle, waste vehicle, fresh produce vehicle, car carrier, container carrier or recovery vehicle.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, current ADG Code, codes of practice and operation manuals.

TLID0006 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to move materials mechanically using automated equipment.

It includes selecting appropriate automated mechanical moving equipment, moving materials in accordance with operational requirements, checking condition of materials and completing required records.

Work must be carried out in compliance with relevant work health and safety (WHS)/occupational health and safety (OHS) regulations related to automated mechanical equipment.

Work is performed under limited or minimum supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Identify task and select automated equipment**	**1.1**	Automated equipment is selected in accordance with workplace procedures, manufacturer specifications and loads characteristics
		1.2	Pre-operational checks are completed and safe working load is determined in accordance with workplace procedures and manufacturer specifications
		1.3	Automated equipment faults are identified and appropriate action taken in accordance with workplace procedures
		1.4	Dangerous goods (DG) and hazardous materials are identified and handled in accordance with workplace procedures
2	**Move materials with automated equipment**	**2.1**	Planned route is determined and work area deemed safe
		2.2	Hazards are identified, risks are assessed and control measures are implemented
		2.3	Materials are moved using automated equipment in accordance with manufacturer specifications and workplace procedures
		2.4	Materials are monitored in accordance with workplace procedures
3	**Complete material move and records**	**3.1**	Materials are inspected in accordance with workplace procedures
		3.2	Records are updated in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

© Commonwealth of Australia, 2025 Public Skills Australia

Unit Mapping Information

This unit replaces and is equivalent to TLID2013 Move materials mechanically using automated equipment.

Assessment Requirements for TLID0006 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying workplace procedures when using automated equipment
- following relevant instructions, workplace procedures and signs
- monitoring performance of automated equipment and taking action in accordance with workplace procedures
- reporting automated equipment faults in accordance with workplace procedures
- undertaking operational checks of automated equipment
- using personal protective equipment (PPE) according to workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- characteristics, capabilities and limitations of automated equipment
- hazards when using automated equipment and related risk control measures
- problems that may occur and appropriate actions that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) procedures and regulations
- workplace policies and procedures for using automated equipment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational

© Commonwealth of Australia, 2025 Public Skills Australia

situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, automated equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLID0008 Shift loads using bridge or gantry crane

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift loads using bridge or gantry crane in accordance with relevant regulations and workplace requirements as part of work activities in the transport and logistics industry.

It includes planning work for the prevailing working conditions, using controls and operating systems to manage the operation of equipment, and locating and identifying load characteristics. It also includes safely moving the load; monitoring controls and stopping, shutting down and securing equipment after the completion of operations.

Work is performed under some supervision generally within a team environment.

Where the load shifting equipment operated is considered to be high risk work, the operator must hold a high-risk work licence.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare work for the prevailing working	**1.1** Traffic flow, weather and work area conditions are constantly assessed and adjusted to allow for safe

© Commonwealth of Australia, 2025 Public Skills Australia

	conditions		operations
		1.2	Hazards are identified, risks are assessed and control measures are implemented
		1.3	Load characteristics are taken into account to ensure appropriate attachments/gear are used to move the load in accordance with lift plan
		1.4	Occurrences in the work area that may affect the safety and efficiency of operations are reported to relevant personnel in accordance with workplace procedures
		1.5	Bridge or gantry crane and equipment are inspected and configured in accordance with manufacturer specifications, prepared and appropriate attachments fitted
		1.6	Crane pre-operational checks are conducted in accordance with manufacturer specifications and workplace procedures
2	**Operate bridge or gantry crane**	**2.1**	Bridge or gantry crane is started and operated in accordance with manufacturer specifications
		2.2	Instruments and gauges are monitored to ensure operation is within manufacturer specifications and workplace procedures
		2.3	Faults or damage to bridge or gantry equipment are immediately reported to relevant personnel in accordance with workplace procedures
3	**Locate load and identify load characteristics**	**3.1**	Load is located and identified
		3.2	Working load limit (WLL) of bridge or gantry crane and equipment are identified and communicated to relevant personnel
		3.3	Load characteristics, weight and dimensions are checked to ensure gantry lifting capacity is not exceeded
		3.4	Loading and unloading plans are followed to ensure efficiency and safety of operations
		3.5	Load and environmental conditions are assessed to ensure appropriate loading and unloading procedures are followed

© Commonwealth of Australia, 2025 Public Skills Australia

	3.6	Hazardous cargo is identified and relevant procedures are taken into account when planning and conducting work
4 Operate bridge or gantry crane to safely move load	**4.1**	Bridge or gantry crane is operated and positioned using smooth and controlled movements
	4.2	Movements are within equipment limits and in line with manufacturer specifications
	4.3	Load is moved in accordance with workplace procedures and to ensure safe operation
	4.4	Communication is maintained with relevant personnel
	4.5	Bridge or gantry crane is immediately stopped, and workplace procedures are followed, in the event of an incident or emergency
	4.6	Bridge or gantry crane controls are operated and monitored in accordance with manufacturer specifications
	4.7	Bridge or gantry crane control faults are identified and reported in accordance with workplace procedures
5 Shut down and secure crane	**5.1**	Bridge or gantry crane is shut down in accordance with manufacturer specifications and workplace procedures
	5.2	Equipment is secured in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLID3043 Shift loads using gantry equipment.

Assessment Requirements for TLID0008 Shift loads using bridge or gantry crane

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and implementing risk control measures
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- estimating size, shape and special requirements of loads
- identifying cargo, container and goods, coding, Australian Dangerous Goods (ADG) Code and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- identifying, selecting and using relevant equipment, processes and procedures
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- interpreting relevant instructions, procedures and signs
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring bridge or gantry crane and equipment performance
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with workplace procedures
- receiving, acknowledging and sending messages using appropriate communications equipment
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- using personal protective equipment (PPE) in accordance with workplace procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of

© Commonwealth of Australia, 2025 Public Skills Australia

the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes, regulations and licence/permit requirements relevant for using bridge or gantry crane and equipment to shift loads
- cargo marking and numbering systems
- high-risk work licence requirements for bridge and gantry crane and associated equipment
- operational work systems, equipment, management and site operating systems for using bridge or gantry equipment to shift loads
- problems that may occur and appropriate actions that can be taken to resolve these problems
- relevant approved storage facilities, quarantine or other legislative requirements
- relevant safety codes of practice and emergency response procedures
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- requirements for working load limit (WLL) of bridge or gantry crane and equipment
- types of bridge or gantry crane and equipment used to shift loads in terminals/wharves, their applications and procedures and precautions for their use
- workplace procedures and policies for using bridge or gantry crane and equipment to shift loads.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLID1001 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift loads safely using manual handling methods. Work must be carried out in compliance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning the manual handling and movement of loads.

It includes assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Assess risks associated with	1.1 Products, goods or materials to be relocated are identified and assessed to determine appropriate relocation method

© Commonwealth of Australia, 2025 Public Skills Australia

relocating load	1.2	Storage locations are determined and potential routes to be followed are identified
	1.3	Effect of load relocation on original load base is predicted
	1.4	Points of balance are estimated
	1.5	Required clearances are compared to available space and adjustments are made to moving loads to reflect required clearance
	1.6	Effects of moving contents, which may be loose, liquid, dangerous or hazardous, are considered
	1.7	Risks in potential routes are considered
	1.8	Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods
	1.9	Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified
	1.10	Team lifting processes are considered when moving loads
	1.11	Appropriate personal protective equipment is determined
	1.12	Size to weight ratio of items to be manually handled are identified
2 Plan load relocation	2.1	Relocation of the load is planned, consistent with the code of practice for manual handling and in accordance with the risk assessment
	2.2	Process for relocating load is proposed including predicting and planning for potential difficulties
	2.3	Proposed process is checked for compliance with code of practice and workplace procedures
3 Relocate load	3.1	Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and WHS/OHS requirements
	3.2	Applications appropriate for team relocation of load are identified
	3.3	Team lifting tasks are coordinated
	3.4	Planned process and route are followed

© Commonwealth of Australia, 2025 Public Skills Australia

3.5 Relocated materials are set down without damage to goods, personnel or equipment and are checked for stability

3.6 Relocation is checked to see it meets work requirements and variance/s are reported

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID1001A Shift materials safely using manual handling methods.

Assessment Requirements for TLID1001 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- applying relevant legislation and workplace procedures
- communicating effectively with others when manually lifting and handling materials and goods
- implementing contingency plans when manually lifting and handling, materials and goods
- interpreting and following operational instructions and prioritising work
- interpreting manual handling risks
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in loads and materials in accordance with standard operating procedures
- reading and interpreting instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- using correct manual handling practices
- working collaboratively with others when manually lifting and handling materials and goods
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards and procedures
- relevant WHS/OHS procedures and guidelines concerning the manual lifting and movement of loads
- risks when manually lifting and handling materials and goods, and related precautions to control the risk, including:
- controlled actions on a movement during lifting
- distance over which load is to be shifted
- frequency of shifting operations
- load on the spine during lifting
- postures and positions during lifting
- rotation and side movement of the spine during lifting
- time allowed for shifting the load
- type, weight and position of the load
- work layout
- site layout and obstacles
- workplace procedures and policies for manual handling.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice

TLID2003 Handle dangerous goods/hazardous substances

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to handle dangerous goods and hazardous substances in accordance with relevant work health safety (WHS)/occupational health and safety (OHS) regulations concerning the safe handling of dangerous goods and hazardous substances, within the transport and logistics industry.

It includes identifying requirements for working with dangerous goods and/or hazardous substances, confirming site incident procedures and selecting handling techniques.

Work is performed under general supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA

essential outcomes.	demonstrate achievement of the element.
1 Identify requirements for working with dangerous goods and/or hazardous substances	1.1 Dangerous goods/hazardous substances are identified from information including class labels, manifests and other documentation
	1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.3 Storage requirements for dangerous goods/hazardous substances are identified and applied
	1.4 Legislative requirements for dangerous goods/hazardous substances are used to plan work activities
	1.5 Handling procedures for different classes and characteristics of goods are observed
	1.6 Confirmation is sought from relevant personnel where dangerous goods/hazardous materials do not appear to be appropriately marked
2 Confirm site incident procedures	2.1 Incident reporting processes are identified
	2.2 Emergency equipment is located and checked in accordance with workplace procedures and statutory regulations
	2.3 Emergency procedures are identified and confirmed
3 Select handling techniques	3.1 Load handling and shifting procedures are selected in accordance with identified requirements for particular goods
	3.2 Handling equipment is checked for conformity with workplace requirements and manufacturer guidelines
	3.3 Suitable signage or placards are checked for compliance with workplace procedures, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLID2003 Handle dangerous goods/hazardous substances

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and working effectively with others
- completing relevant documentation
- determining required permits
- estimating weight and dimensions of load and any special requirements
- identifying and assessing handling and storage precautions and requirements for dangerous goods/hazardous substances
- identifying and selecting safety requirements for handling dangerous goods/hazardous substances
- identifying containers and goods coding, markings and emergency information panels for mode of transport storage selected
- identifying dangerous goods/hazardous substances using labels, International Maritime Dangerous Goods (IMDG) Code markings, HAZCHEM signs and other relevant identification criteria
- identifying job and site hazards, and planning work to minimise risks
- implementing contingency plans
- maintaining workplace records and documentation
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule, predicting consequences and identifying improvements
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, regulations, information and signs
- recognising hazards and applying precautions and required action to minimise, control or eliminate recognised hazards
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures

© Commonwealth of Australia, 2025 Public Skills Australia

- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- selecting appropriate equipment and work systems including PPE
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- equipment applications, capacities, configurations, safety hazards and control mechanisms
- housekeeping standards and procedures
- permit and licence requirements
- problems that may arise when handling of dangerous goods and hazardous substances and actions that should be taken to prevent or solve these problems
- relevant aspects of current Australian Dangerous Goods (ADG) Code and relevant Australian Standards
- relevant regulations and codes concerning handling dangerous goods/hazardous substances
- risks when handling dangerous goods/hazardous substances and related precautions to control risk
- workplace procedures for handling and storing dangerous goods/hazardous substances.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload goods and cargo in accordance with relevant state/territory roads and traffic authority regulations/permit requirements.

It includes loading and unloading goods and cargo, securing and protecting a load and completing all required documentation.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Load and unload goods/cargo**	1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading workplace procedures
		1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
		1.3 Dangerous or hazardous goods are identified and handled in accordance with the current Australian Dangerous Goods (ADG) Code and other relevant regulations/permit requirements
		1.4 Load is packed/unpacked to make safe and effective use of available spaces
		1.5 Goods/cargo are loaded in accordance with relevant mass and loading regulations and workplace procedures
		1.6 Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation
		1.7 Unloading activities are conducted in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load
		1.8 Goods requiring special handling and/or documentation are identified and workplace procedures are followed
		1.9 Relocated material is restacked appropriate for transport method, safe height, weight loading, size and crushability of goods
2	**Secure and protect load**	2.1 Load distribution is checked to ensure it is even, legal and within safe working capacity
		2.2 Load is checked to ensure dangerous goods and hazardous substances are appropriately segregated in accordance with current ADG Code
		2.3 Load is secured using correct load restraint and protection equipment for different loads, carrying and storage conditions
		2.4 Load is protected in accordance with legal and workplace safety requirements
3	**Complete**	3.1 Load is inspected and checked for security to travel, in accordance with relevant regulations/permit requirements

© Commonwealth of Australia, 2025 Public Skills Australia

documentation		and current ADG Code, as required
	3.2	All required goods documentation is completed in accordance with workplace requirements including current ADG Code, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying required action to minimise, control or eliminate identified hazards
- completing relevant documentation
- estimating load size, shape and special requirements and taking appropriate action
- identifying containers and goods coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels, and taking appropriate action
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in cargo and equipment in accordance with operating procedures
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures, information, signs and labels
- applying relevant legislation and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- chain of responsibility workplace procedures
- housekeeping workplace procedures
- national load restraint guidelines
- problems that may arise when loading and unloading goods and cargo and actions that should be taken to prevent or solve these problems
- relevant Australian and international regulations and codes of practice for handling and transporting dangerous goods and hazardous substances
- relevant Australian Standards and regulations including state/territory mass and loading regulations
- risks when loading and unloading goods/cargo and related precautions to control risk
- safe work methods for securing load
- security awareness requirements when loading and unloading vehicles and in particular recognising, isolating and reporting suspicious cargo and goods
- site layout and obstacles
- WHS/OHS procedures and guidelines concerning the lifting and movement of loads
- workplace procedures and policies for loading and unloading goods/cargo.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, national Load Restraint Guide (LRG), codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in

TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a forklift in compliance with the relevant state/territory authority licence requirements and regulations, in a variety of operational contexts.

It includes checking forklift condition, driving forklift to fulfil operational requirements, and monitoring and maintaining forklift performance and site conditions.

Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory work health and safety (WHS)/occupational health and safety (OHS) authority.

Operation of a forklift is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Check forklift condition	1.1 Condition of forklift is checked for compliance with WHS/OHS and workplace requirements for warning devices, manufacturer specifications and nature of load shifting task
	1.2 Attachments are checked to ensure appropriate adjustment and operation
	1.3 Mirrors and seats are adjusted for safe operation by driver
	1.4 Logbooks are checked and appropriate workplace documentation is completed in accordance with workplace requirements
2 Drive forklift	2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturer instructions
	2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
	2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques
	2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning
	2.5 Forklift is parked, shut down and secured in accordance with manufacturer specifications, regulations and workplace procedures
3 Operate forklift to handle loads	3.1 Lifting task to be undertaken is appropriately planned, and correct lifting truck and attachments are selected
	3.2 Load is lifted, carried, lowered and set down in accordance with WHS/OHS legislation, manufacturer specifications and company procedures
4 Monitor site conditions	4.1 Hazards and traffic flow are identified when selecting the most efficient route and appropriate adjustments are made
	4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs

© Commonwealth of Australia, 2025 Public Skills Australia

5 Monitor and maintain forklift performance	5.1 Performance and efficiency of vehicle operation is monitored during use
	5.2 Defective/irregular performance and malfunctions are reported to relevant personnel
	5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2010A Operate a forklift.

Assessment Requirements for TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids, and carrying out lubrication processes
- communicating and working effectively with others
- completing relevant documentation
- ensuring forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of forklift and its equipment, and taking appropriate action as required
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- forklift handling procedures
- high risk work licence requirements
- operating hazards and related defensive driving and hazard control techniques
- operational emergency procedures
- pre-operational checks carried out on forklift and related action
- principles of stress management when driving a forklift
- relevant duty of care requirements for operating a forklift
- relevant WHS/OHS and environmental procedures and regulations
- site layout and obstacles
- workplace operating procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLID2012 Operate specialised load shifting equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate specialised load shifting equipment in accordance with codes, permits, workplace requirements and relevant regulatory requirements, as part of work undertaken in the stevedoring, transport, warehousing and logistics industries.

It includes planning work for current working conditions; using controls and equipment operating systems to manage moving the unit and accessory operations; locating load and identifying load characteristics; moving materials and loads; monitoring and operating controls; and stopping, parking and securing equipment after operation.

Safety checks and equipment tests are performed under limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan work for current working conditions	1.1 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.2 Traffic flow and work area conditions are constantly assessed and anticipated to ensure no injury to people, or damage to equipment, loads or facilities
	1.3 Load characteristics are taken into account to ensure appropriate attachments are used to transport load as required
	1.4 Safe working load (SWL) or working load limit (WLL) is calculated
	1.5 Occurrences in work area that affect safety and efficiency of operations are reported to appropriate personnel
2 Use controls and equipment operating systems to manage moving unit and accessory operations	2.1 Equipment is prepared and appropriate attachment is fitted
	2.2 Gear and operational levers are checked to ensure they are in neutral position prior to inserting ignition key and starting engine
	2.3 Engine is started in accordance with manufacturer guidelines to bring engine up to speed
	2.4 Instruments and gauges are monitored during start up and operations to ensure operation is within manufacturer specifications and workplace procedures
	2.5 Engine power is managed to ensure efficiency of equipment movement and economy of equipment operations
	2.6 Equipment operations are conducted in accordance with manufacturer specified torque range
	2.7 Faults or damage to equipment are immediately reported to appropriate personnel in accordance with workplace procedures
3 Locate load and identify load characteristics	3.1 Load is located and identified in accordance with workplace procedures
	3.2 Loading and unloading plans are followed to ensure efficiency and safety of operations
	3.3 Load characteristics are taken into account to ensure appropriate loading and unloading workplace procedures are

© Commonwealth of Australia, 2025 Public Skills Australia

			followed
		3.4	Hazardous goods are identified and relevant procedures are taken into account when planning and conducting work
		3.5	Load weight and dimensions are established within equipment capacity
4	**Move materials and loads**	4.1	Equipment is manoeuvred and positioned using smooth and controlled movements
		4.2	Manoeuvres are made within equipment limits and in accordance with manufacturer specifications
		4.3	Materials are moved ensuring no injury to personnel or damage to equipment or goods
5	**Monitor and operate controls**	5.1	Equipment controls are monitored and operated in accordance with manufacturer operating instructions
		5.2	Control systems are interpreted and acted on in accordance with statutory authority regulations, manufacturer guidelines and site workplace procedures
		5.3	Control faults are identified and reported in accordance with manufacturer instructions and workplace guidelines
6	**Stop, park and secure equipment**	6.1	Equipment is brought to a controlled halt in accordance with manufacturer guidelines
		6.2	Equipment is parked without injury to personnel or damage to equipment, loads or facilities in accordance with company procedures
		6.3	Equipment is secured on a flat, even surface, clear of doorways, aisles, access ways or blind corners in accordance with securing procedures for appropriate equipment
		6.4	Problems, faults or malfunctions are reported and/or rectified in accordance with regulatory requirements and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for TLID2012 Operate specialised load shifting equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria on at least one occasion and include:

- applying fatigue management knowledge and techniques
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes during work activities
- communicating effectively with others
- completing relevant documentation
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- monitoring performance of specialised load shifting equipment and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol
- planning own working, predicting consequences and identifying improvements
- reading, interpreting and following relevant instructions, procedures, information and signs
- selecting and using relevant gear and accessories
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- conveyed material potential for toxicity, reactiveness, material grade, type and purpose including information from relevant safety data sheets (SDSs)/material safety data sheets (MSDSs) and current Australian Dangerous Goods (ADG) Code documentation
- documentation, record requirements and housekeeping standards including:
  - relevant permit and licence requirements
  - site layout and obstacles
- operational safety requirements and precautions for specialised load shifting equipment concerned
- operational work systems, equipment, management and site operating systems for operating specialised load shifting equipment
- problems that may occur and appropriate action that can be taken to resolve these problems
- purpose, characteristics, capabilities, requirements and limitations of specialised load shifting equipment
- relevant regulations for operating specialised load shifting equipment, including current ADG Code and relevant bond, quarantine or other legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- workplace procedures and policies for operating specialised load shifting equipment.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID2016 Load and unload explosives/dangerous goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload explosives/dangerous goods in a range of operational situations, in accordance with relevant Australian and state/territory regulations including current Australian Dangerous Goods (ADG) Code, current Australian Code for the Transport of Explosives by Road and Rail (AE Code), and mass and loading regulations.

It includes identifying explosives/dangerous goods, loading and unloading explosives/dangerous goods using appropriate equipment, securing and protecting vehicle load, and checking vehicle to ensure load is secure and vehicle is marked in accordance with regulatory requirements.

Work is performed under limited or minimum supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Prepare to load and unload vehicle**	1.1 Explosives/dangerous goods are identified and their characteristics are taken into account in accordance with relevant emergency procedures when determining appropriate handling, loading and storage procedures
		1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
		1.3 Compatibility of explosives/dangerous goods is taken into account when assembling and segregating cargo for loading
		1.4 Vehicle/loading equipment is checked to ensure it is suitable to handle/carry load
2	**Load/unload vehicle**	2.1 Vehicle is loaded/unloaded in accordance with workplace procedures and current ADG/AE Code as required
		2.2 Load is segregated according to class and subsidiary risk, and load distribution is checked in accordance with workplace procedures, relevant mass and loading regulations, and current ADG/AE Code as required
		2.3 Personal protective equipment is used during loading/unloading operations as required for type of explosives/dangerous goods concerned
		2.4 Emergency procedures are followed in an incident or accident when loading or unloading explosives and/or dangerous goods
3	**Secure and protect vehicle load**	3.1 Vehicle load is secured using correct load restraint and protection equipment for different loads, vehicles and carriage conditions concerned
		3.2 Load is protected in accordance with legal and workplace safety requirements
		3.3 Load distribution is checked to ensure it is even, legal and within safe working capacity of vehicle
		3.4 Vehicle is clearly marked/placarded to indicate carriage of explosives and/or dangerous goods, in accordance with government regulations and workplace procedures
4	**Check vehicle**	4.1 Loaded vehicle is inspected and checked to ensure it is suitable to carry explosives/dangerous goods, and load

© Commonwealth of Australia, 2025 Public Skills Australia

weight and dimensions are within vehicle safe carrying capacity and equipment capability

4.2 Loaded vehicle is checked to ensure it can be safely parked and secured

4.3 Dangerous goods declaration and required transportation documentation for cargo is completed in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2016A Load and unload explosives and dangerous goods.

Assessment Requirements for TLID2016 Load and unload explosives/dangerous goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- communicating and working effectively with others
- completing relevant documentation
- estimating size, shape and special requirements of loads
- identifying and interpreting containers and goods coding, markings and emergency information panels for mode of transport/storage selected
- identifying load characteristics, loading equipment and related practices
- identifying load label in accordance with identified classification and subsidiary risk information
- identifying markings/placards for vehicle in accordance with relevant regulatory requirements
- implementing contingency plans and modifying activities depending on operational contingencies, risk situations and environments
- loading and unloading explosives/dangerous goods safely, in accordance with workplace procedures and current Australian Dangerous Goods (ADG)/current Australian Code for the Transport of Explosives by Road and Rail (AE Code) requirements
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting /rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- segregating, distributing and securing load for safe transport in accordance with regulations and current ADG/AE Code requirements
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- using manual handling techniques and operating manually-operated load shifting equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- characteristics of various classes of explosives/dangerous goods relevant to handling and transport
- compatibility of various types of explosives and/or dangerous goods
- housekeeping standards and procedures
- manual handling techniques and manually-operated load shifting equipment required for loading, unloading and handling explosives/dangerous goods
- methods of placarding or marking a vehicle carrying explosives and/or dangerous goods
- methods of securing a load on a vehicle
- WHS/OHS procedures and guidelines concerning lifting and moving loads
- relevant Australian explosives and/or dangerous goods codes and state/territory regulations for identifying, handling and marking explosives/dangerous goods
- relevant state/territory mass and loading regulations
- risks and hazards when loading, unloading and handling explosives/dangerous goods, and related precautions to control the risk
- workplace procedures and policies for loading and unloading explosives/dangerous goods.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, ADG/AE Code,

TLID2047 Prepare cargo for transfer with slings

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Performance Criteria
- Minor changes to Performance Evidence
- Minor changes to Knowledge Evidence
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare cargo for transfer with slings.

It includes preparing for cargo transfer, calculating safe working load (SWL) or working load limit (WLL) of slings and loads, slinging and unslinging cargo, and strapping and unstrapping goods in accordance with workplace requirements and relevant regulatory requirements, within the transport and logistics industry.

People achieving competence in this unit will need to fulfil the applicable state and/or territory legislated high-risk work licence requirements and to comply with relevant codes of practice and/or guidelines.

Safety checks and equipment tests are performed under limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare cargo transfer	**1.1** Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.2 Working area is prepared and maintained in accordance with national standards, safety codes and workplace procedures
	1.3 Unsafe work practices and/or faulty equipment are reported in accordance with workplace procedures
	1.4 Correct personal protective equipment (PPE) is identified and worn/used
2 Calculate SWL or WLL of slings and loads	**2.1** SWL or WLL is calculated using standardised formulae for different types of lifting cables
	2.2 Lifting equipment is checked to determine SWL according to workplace procedures
	2.3 Slinging gear is checked for conformity with safety equipment
3 Sling and unsling cargo	**3.1** Cargo is slung/unslung in accordance with national standards, safety codes and workplace procedures
	3.2 Correct securing devices are identified and used
	3.3 Load is steadied by tag lines, as required
	3.4 Damaged cargo is identified and reported in accordance with workplace procedures
	3.5 Slinging attachments are released from load ensuring no injury to personnel or damage to machinery or cargo
4 Strap and unstrap goods	**4.1** Cargo is strapped and unstrapped in accordance with national standards, safety codes and workplace procedures
	4.2 Mechanical strapping equipment is used in accordance with manufacturer instructions
	4.3 Damaged cargo is identified and reported in accordance with workplace procedures

© Commonwealth of Australia, 2025 Public Skills Australia

4.4 Strapping arrangements are secured/released to/from load ensuring no injury to personnel or damage to machinery or cargo

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2047A Prepare cargo for transfer with slings.

Assessment Requirements for TLID2047 Prepare cargo for transfer with slings

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Performance Criteria
- Minor changes to Performance Evidence
- Minor changes to Knowledge Evidence
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate identified hazards
- applying relevant high risk work legislation and workplace procedures
- calculating safe working load (SWL) and working load limit (WLL)
- communicating and working effectively with others
- completing relevant documentation
- implementing contingency plans
- inspecting equipment prior to use
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with workplace operating procedures
- planning own work, predicting consequences and identifying improvements
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using relevant gear and equipment when preparing cargo for transfer with slings
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- using balance points and estimating weights in setting up loads to be shifted
- working systematically with required attention to detail without injury to self or others, or

© Commonwealth of Australia, 2025 Public Skills Australia

damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- cargo potential for toxicity, reactiveness, material grade, type and purpose, including information from relevant safety data sheets (SDS)/material safety data sheets (MSDS) and current dangerous goods systems documentation requirements
- documentation and record requirements
- gear and equipment used when transferring cargo with slings, and precautions and procedures that should be followed in their use
- housekeeping standards and procedures
- manufacturer instructions
- operational work systems, equipment, management and site operating procedures for transferring cargo with slings
- problems that may occur when preparing cargo for transfer with slings and appropriate actions that can be taken to resolve these problems
- relevant regulations for transferring cargo with slings, including current dangerous goods regulations and bond, quarantine and other high-risk work legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- requirements for SWL and WLL
- site layout and obstacles
- slings, dogging and rigging licence to perform high-risk work requirements
- workplace procedures and policies for transferring cargo with slings.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry.
- applicable documentation, including legislation, regulations, codes of practice, workplace

TLID3015 Identify and label explosives/dangerous goods

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Performance Criteria
- Minor changes to Performance Evidence
- Minor changes to Knowledge Evidence
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to identify and label explosives and/or dangerous goods.

It includes assessing, handling and labelling explosives and/or dangerous goods, and complying with all required documentation in accordance with relevant Australian state/territory regulators and authorities concerned with the carriage of explosives and dangerous goods.

This includes the current Australian Dangerous Goods (ADG) Code, Australian Code for the Transport of Explosives by Road and Rail (AE Code), Globally Hazardous System of Classification and Labelling of Chemicals (GHS) and workplace procedures.

Work is performed under limited or minimum supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Assess explosives/dangerous goods	**1.1** Load is checked for explosives and/or dangerous goods in accordance with relevant codes and government regulations
	1.2 Types of explosives and/or dangerous goods are identified from labels, current ADG and/or AE Code declarations and placarding, in accordance with workplace procedures, and all required actions are taken to ensure compliance with relevant government regulations and current ADG and/or AE Code, as required
	1.3 Load hazards are identified from labels and safety data sheets (SDS)/material safety data sheets (MSDS) and required actions taken to minimise, control or eliminate identified hazards
2 Handle explosives/dangerous goods	**2.1** Identified explosives and/or dangerous goods are handled and loaded/unloaded in accordance with regulatory requirements, codes, National Transport Commission (NTC) Load Restraint Guide and workplace procedures
	2.2 Appropriate personal protective equipment (PPE) is used when handling explosives and/or dangerous goods in accordance with class, subsidiary risk and SDS/MSDS information
	2.3 Identified hazards posed by explosives and/or dangerous goods concerned are taken into account when handling different types of load
	2.4 When loading/storing explosives and/or dangerous goods, segregation procedures are followed in accordance with class and subsidiary risk information
3 Label explosives/dangerous goods	**3.1** All packages and/or containers are labelled with class and subsidiary risk information, in accordance with current ADG Code and/or AE Code and workplace procedures, as required
	3.2 Dangerous goods declaration is included with manifest and other shipping documents
	3.3 Vehicles carrying explosives and/or dangerous goods are placarded in accordance with current ADG Code and/or AE Code, as required

© Commonwealth of Australia, 2025 Public Skills Australia

4 Complete documentation	**4.1** Required transport documents are confirmed
	4.2 All required transport documents are completed in accordance with current ADG Code and/or AE Code and workplace procedures, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3015A Identify and label explosives/dangerous goods.

Links

Assessment Requirements for TLID3015 Identify and label explosives/dangerous goods

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Performance Criteria
- Minor changes to Performance Evidence
- Minor changes to Knowledge Evidence
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate identified hazards
- completing relevant documentation
- correctly marking and/or labelling explosives and dangerous goods
- handling explosives and/or dangerous goods in accordance with regulatory requirements, codes, National Transport Commission (NTC) Load Restraint Guide and workplace policy, as required
- identifying explosives and dangerous goods from labels in accordance with regulatory requirements and practices
- identifying hazards from labels of explosives and dangerous goods
- interpreting and following operational instructions and prioritising work
- interpreting safety data sheets (SDS)/material safety data sheets (MSDS), containers and goods coding, markings and other information describing explosives and dangerous goods, including emergency information panels for mode of transport and/or storage selected
- locating, interpreting, and applying relevant codes and regulations
- reading and interpreting relevant instructions, procedures, information and signs
- selecting and using required personal protective equipment (PPE) conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- characteristics of explosives and dangerous goods relevant to handling and transport
- compatibility of various types of explosives and dangerous goods
- housekeeping standards and procedures
- relevant Australian and state and/or territory regulations and codes for identifying and labelling explosives and dangerous goods, including the current Australian Dangerous Goods (ADG) Code, Australian Code for the Transport of Explosives by Road and Rail (AE Code) and Globally Hazardous System of Classification and Labelling of Chemicals (GHS)
- risks and hazards when loading, unloading, and handling explosives and dangerous goods, and related precautions to control the risk
- WHS/OHS procedures and guidelines concerning lifting and moving loads
- regulatory procedures for identifying and labelling explosives and dangerous goods.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation including legislation, regulations, current ADG Code and/or AE Code, codes of practice, GHS, workplace procedures and operation manuals.

TLID3024 Use specialised liquid bulk transfer equipment (gravity/pressurised)

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit application
- Minor changes to performance criteria
- Minor changes to performance evidence
- Minor changes to knowledge evidence
- Minor changes to assessment conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use specialised liquid bulk transfer equipment (gravity/pressurised).

It includes planning work, transferring liquid bulk in accordance with regulatory and operational requirements, monitoring and operating controls, and completing all operations, as required, in accordance with the current Australian Dangerous Goods (ADG) Code and relevant state and/or territory regulations.

Work is performed under general supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling.

Unit Sector

Not applicable.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan work	**1.1** Liquid transfer method is identified for loading and unloading as gravity or pressure
	1.2 Job hazards are identified and required actions taken to minimise, control or eliminate identified hazards
	1.3 Dangerous goods, hazardous materials or regulated waste requiring specialised handling are identified and relevant workplace procedures are taken into account when planning work
	1.4 Precautions are undertaken to eliminate all ignition sources
	1.5 Traffic flow, vehicle positioning and work area conditions are assessed to ensure safe operation and no injury to people, or damage to equipment, loads or facilities
	1.6 Characteristics of liquid, transfer and holding method are taken into account when evaluating procedural requirements, special precautions for method, equipment and, as required, appropriate attachments to transfer load
	1.7 Potential occurrences in work area that may affect safety and efficiency of operations are reported to appropriate personnel
	1.8 Liquid transfer is planned, taking into account requirements of load, transfer method, storage facility, transport mode, load weight, volume, viscosity and equipment capacity
	1.9 Load is checked prior to and at completion of transfer to ensure ullage and/or maximum permitted capacity complies with current ADG Code
	1.10 Adjustments are made to process to accommodate special requirements such as temperature control and combustion
	1.11 Required personal protective equipment (PPE), signage, barriers and special precautions are identified in plan and utilised
	1.12 Procedures to deal with spills, leakages and ruptures are identified

© Commonwealth of Australia, 2025 Public Skills Australia

2 Transfer material	**2.1**	Equipment is prepared and appropriate attachments are fitted
	2.2	Equipment controls are checked for correct operational status before commencing transfer
	2.3	Instruments and gauges are monitored during operations to ensure operation is in accordance with manufacturer specifications, workplace schedule and safety requirements
	2.4	Speed of operation is managed for safety and efficiency of materials movement and equipment operations
	2.5	Faults or damage to equipment are immediately reported to appropriate personnel
3 Monitor and operate controls	**3.1**	Equipment controls are monitored and operated in accordance with manufacturer operating instructions
	3.2	Control systems are monitored in accordance with statutory authority regulations, manufacturer guidelines and site operating procedures
	3.3	Materials are moved without injury to personnel or damage to equipment or goods
	3.4	Faults are identified and reported in accordance with workplace procedures
4 Complete operations	**4.1**	Equipment is shut down in accordance with manufacturer guidelines without injury to personnel or damage to equipment, loads or facilities in accordance with workplace procedures
	4.2	Clean up methods for transfer equipment are completed in accordance with workplace procedures
	4.3	Equipment is secured in accordance with securing procedures for appropriate equipment
	4.4	Workplace documentation is completed and filed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for TLID3024 Use specialised liquid bulk transfer equipment (gravity/pressurised)

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit application
- Minor changes to performance criteria
- Minor changes to performance evidence
- Minor changes to knowledge evidence
- Minor changes to assessment conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking equipment compliance plate for equipment capability
- completing relevant documentation
- estimating mass, volume and special requirements of liquid bulk product
- identifying and correctly using equipment required to transfer liquid bulk product
- identifying goods coding, International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- interpreting and following operational instructions and prioritising work
- monitoring transfer equipment performance
- operating and adapting to differences in transfer equipment in accordance with manufacturer and operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- Australian Dangerous Goods (ADG) Code and relevant state and/or territory mass and loading regulations as they apply to vehicles transporting liquid bulk product
- hazard management consistent with the principle of hierarchy of risk control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and PPE
- hazards involved in transferring liquid bulk product using specialised equipment and ways and means of controlling the risks involved
- housekeeping standards and procedures
- manufacturer and operator instructions and/or manuals
- methods of securing a vehicle following transfer of liquid bulk product
- problems, faults or malfunctions that may occur when transferring liquid bulk product using specialised equipment and actions that should be taken to prevent or resolve these problems
- relevant permit, and health and safety requirements
- risks when transferring liquid bulk product and related precautions to control the risk
- WHS/OHS procedures and guidelines for using specialised liquid bulk transfer equipment
- workplace procedures and policies for efficiently using specialised gravity and/or pressurised equipment to transfer liquid bulk product.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, current ADG Code, codes of practice, workplace procedures and operation manuals.

TLID3027 Prepare for transport of dangerous goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare for the transport of dangerous goods as part of work activities undertaken within the transport and logistics industry. This is undertaken in accordance with relevant state/territory regulations for transporting dangerous goods, including the current Australian Dangerous Goods (ADG) Code.

It includes checking dangerous goods load, assessing vehicle suitability to transport intended load, checking emergency procedures and equipment, evaluating documented route plans, and completing required assessment process.

Work is performed under general supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the	Performance criteria describe the performance needed to

© Commonwealth of Australia, 2025 Public Skills Australia

essential outcomes.	demonstrate achievement of the element.
1 Check dangerous goods load	1.1 Load is compared against transport documentation and discrepancies are noted
	1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
	1.3 Load is checked to ensure dangerous goods labels are clearly visible and legible, and packaged goods are correctly labelled
	1.4 Load is checked to ensure containers are not damaged
	1.5 Vehicle load is checked for compatibility or, where not compatible, is checked for appropriate segregation in accordance with regulatory requirements
	1.6 Load is assessed to ensure it is stowed and secured in or on vehicles in accordance with the current ADG Code and national Load Restraint Guide(LRG)
	1.7 Shipping documentation and other relevant documents are located in cabin in accordance with regulatory requirements
2 Assess vehicle suitability to transport intended load	2.1 Vehicle is assessed for suitability and appropriateness to carry designated dangerous goods including classification, mass and configuration
	2.2 Licence and insurance requirements are checked for conformity with current ADG Code and/or other applicable regulatory requirements as required
	2.3 Load restraint system/s is checked for serviceability and appropriateness to secure intended load
	2.4 Vehicle is checked to ensure it is correctly and clearly marked/placarded for load being carried
3 Check emergency procedures and equipment	3.1 Emergency information for each type of transported dangerous good is noted
	3.2 Regulatory and workplace procedures for an incident are noted including notification of relevant personnel and authorities and, as required, use of equipment for containment, clean up or recovery
	3.3 Personal protective equipment and safety equipment are checked for operational capability and appropriateness to proposed load

© Commonwealth of Australia, 2025 Public Skills Australia

	3.4	Emergency information is located in cabin in accordance with current ADG Code requirements
4 Evaluate documented route plan	4.1	Selected route plan and potential difficulties including regulatory restrictions, traffic flow and conditions, obstacles, road standards and construction activities are assessed
	4.2	Regulatory and workplace procedures for driving, parking, loading and unloading are identified including actions for disengaging and/or securing vehicle
5 Complete documentation	5.1	Load is inspected and checked for security to travel in accordance with relevant regulations/permit requirements and current ADG Code
	5.2	All required documentation for dangerous goods is completed in accordance with regulatory and workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLID3027 Prepare for transport of dangerous goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying fatigue management knowledge and techniques
- applying hierarchy of hazard control
- assessing operational suitability of equipment and vehicles for dangerous goods transportation
- communicating effectively with others
- completing relevant documentation
- determining required permits
- estimating mass, volume and special requirements of load
- estimating weight and dimensions of load and special requirements
- identifying and correctly using equipment required to load dangerous goods
- identifying goods coding, markings and emergency information panels for mode of transport/storage selected
- identifying hazards and applying precautions and required action to minimise, control or eliminate identified hazards
- identifying hazards and planning work to minimise risks
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- maintaining workplace records and documentation including completion of dangerous goods declaration
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work

© Commonwealth of Australia, 2025 Public Skills Australia

health safety (WHS)/occupational health and safety (OHS) standards
- selecting appropriate equipment and work systems to enable safe, efficient work
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- current Australian Dangerous Goods (ADG) Code
- housekeeping standards and procedures
- methods of securing a vehicle following loading of dangerous goods
- problems that may occur when preparing to transport dangerous goods and action that should be taken to prevent or solve these problems
- relevant permit and licence requirements
- relevant state/territory mass and loading regulations for vehicles transporting dangerous goods
- risks when transporting dangerous goods and related precautions to control the risk
- WHS/OHS procedures and guidelines for transporting dangerous goods
- workplace procedures and policies for preparing dangerous goods.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID3043 Shift loads using gantry equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift loads using gantry equipment in accordance with relevant regulations and workplace requirements, as part of work activities in the transport and logistics industry.

It includes planning work for the prevailing working conditions, using controls and operating systems to manage the operation of equipment, and locating and identifying load characteristics. It also includes safely moving the load, monitoring controls and stopping, shutting down and securing equipment after the completion of operations.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1 Plan work for the prevailing working conditions	1.1 Traffic flow, weather and work area conditions are constantly assessed and anticipated to allow safe operation to ensure no injury to people, or damage to equipment, loads or facilities
	1.2 Load characteristics are taken into account to ensure appropriate attachments/gear are used to move the load as required
	1.3 Occurrences in the work area that may affect the safety and efficiency of operations are reported to appropriate personnel
2 Use controls and operating systems to manage the operation of the equipment	2.1 Equipment is prepared and appropriate attachments are fitted as required
	2.2 Gear and operational levers are checked to ensure they are in the neutral position prior to inserting ignition key and starting engine
	2.3 Engine is started in accordance with manufacturer guidelines to bring engine to speed
	2.4 Instruments and gauges are monitored during start up and operations to ensure operation is within manufacturer specifications, and workplace and regulatory safety requirements
	2.5 Engine power is managed for efficiency of equipment movement and economy of equipment operations
	2.6 Equipment operations are conducted within manufacturer specified torque range
	2.7 Faults or damage to equipment are immediately reported to appropriate personnel
3 Locate load and identify load characteristics	3.1 Load is located and identified in accordance with instructions
	3.2 Requirements for safe working load (SWL) and working load limit (WLL) of gantry equipment are identified
	3.3 Load weight and dimensions are checked to ensure they fall within equipment capacity
	3.4 Loading and unloading plans are followed to ensure efficiency and safety of operations

© Commonwealth of Australia, 2025 Public Skills Australia

	3.5 Load characteristics are taken into account to ensure appropriate loading and unloading procedures are followed
	3.6 Hazardous cargo is identified and relevant procedures are taken into account when planning and conducting work
4 Safely move load	4.1 Equipment is operated and positioned using smooth and controlled movements
	4.2 Manoeuvres are within equipment limits and in line with manufacturer specifications
	4.3 Load is moved ensuring no injury to personnel or damage to equipment or cargo
	4.4 Continuous communication is maintained with personnel assisting the operator in the load movement operations using appropriate communications technology and procedures
	4.5 In an incident or emergency, equipment is immediately stopped and workplace emergency procedures are followed
	4.6 Safety incidents and emergencies are reported in accordance with workplace procedures and regulatory requirements
5 Monitor and operate controls	5.1 Equipment controls are monitored and operated in accordance with manufacturer operating instructions
	5.2 Control systems are confirmed and acted on in accordance with regulatory requirements, manufacturer guidelines and workplace operating procedures
	5.3 Control faults are identified and reported in accordance with enterprise guidelines
	5.4 Hazards in the work area are identified and appropriate measures are adopted to control the risks in accordance with regulatory requirements and workplace procedures
6 Stop, shut down and secure equipment	6.1 Equipment is brought to a controlled halt and is shut down without injury to personnel or damage to equipment, loads or facilities in accordance with manufacturer guidelines and workplace procedures

© Commonwealth of Australia, 2025 Public Skills Australia

6.2 Equipment is secured in accordance with manufacturer instructions and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for TLID3043 Shift loads using gantry equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying effective eye-hand coordination to operational tasks
- applying fatigue management knowledge and techniques
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes
- communicating effectively with others
- completing relevant documentation
- estimating size, shape and special requirements of loads
- identifying cargo, container and goods, coding, Australian Dangerous Goods (ADG) Code and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- identifying, selecting and using relevant equipment, processes and procedures
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring equipment performance
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- receiving, acknowledging and sending messages using appropriate communications equipment
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- servicing equipment in terms of maintenance schedule and operating procedures
- working collaboratively with others

© Commonwealth of Australia, 2025 Public Skills Australia

- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes, regulations, licence/permit requirements relevant for using gantry equipment to shift loads
- cargo marking and numbering systems
- operational work systems, equipment, management and site operating systems for using gantry equipment to shift loads
- problems that may occur and appropriate action that can be taken to resolve these problems
- relevant bond, quarantine or other legislative requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- relevant safety codes and emergency procedures
- requirements for safe working load (SWL) and working load limit (WLL) of gantry equipment
- types of gantry equipment used to shift loads in terminals/wharves, their applications and procedures and precautions for their use
- workplace procedures and policies for using gantry equipment to shift loads.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIE2007 Use communications systems

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor word changes and reordering in Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use communications systems in accordance with relevant regulations and workplace procedures.

It includes identifying system features, operating a communications system effectively, using appropriate communications system protocols, maintaining equipment and completing documentation.

It involves applying established communication principles and practices, and using local technical, colloquial language and vocabulary in day-to-day communication.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist when using communications systems
- communicating and working effectively with others using available communications systems
- completing documentation related to work activities when using communications systems
- following communications security procedures
- identifying and using required communications technology
- implementing contingency plans
- modifying activities depending on differing operational contingencies, risk situations and environments
- monitoring communications equipment performance and taking appropriate action as required
- operating and adapting to differences in communications equipment in accordance with operating procedures
- planning, monitoring and prioritising work activities in terms of planned schedule, including predicting consequences and identifying improvements
- reading, interpreting and following communications systems instructions, procedures and relevant legislation
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with workplace procedures
- using communications equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- communication techniques including barriers to effective communication and how to overcome them
- features of various communications systems
- minor routine maintenance procedures for communications equipment
- pre-operational checks for communications systems and equipment
- principles of effective communication
- procedures and protocols for using communications systems during an emergency
- protocols and procedures for communicating with others using relevant communications technology including public address (PA) systems
- relevant procedures and duty of care requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) responsibilities
- typical problems that may occur when using communications systems, and appropriate action and solutions.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLIE3002 Estimate/calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to estimate and calculate mass, area and quantify dimensions of loads in accordance with workplace requirements and relevant regulations, as part of work functions within the transport and logistics industry.

It includes estimating loads to be transported or placed in storage, estimating load limits of transport and/or storage systems, and organising a load.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1 Estimate loads for transport or storage	1.1 Order forms/work orders are read and requirements are noted
	1.2 Shape, balance characteristics, dimensions and mass of load/s are identified
	1.3 Area/volume required for storage is estimated
	1.4 Weights and volumes are totalled to calculate load requirements of transport or storage system
2 Estimate load limits of transport and/or storage	2.1 Allowable load limits for storage and/or transport systems are identified in accordance with workplace procedures
	2.2 Capacity of transport and storage systems in terms of mass, area and volume is calculated
3 Organise load	3.1 Load/s is restricted to allowable range
	3.2 Load/s is spread to ensure safe weighting on pallets, trucks, platforms or other storage or transport systems
	3.3 Appropriate workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3002A Estimate/calculate mass, area and quantify dimensions.

Assessment Requirements for TLIE3002 Estimate/calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- identifying, selecting and using relevant calculators, computing and office equipment
- interpreting and following operational instructions and prioritising work
- performing basic mathematical operations required when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities including addition, subtraction, multiplication and division
- reading and interpreting relevant instructions, procedures, information and labels
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant to workplace activities
- documentation requirements for the workplace activities concerned
- focus of operation of work systems, equipment, management and site operating systems for transporting and/or storing goods and stock
- problems that may occur when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities, and appropriate action that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines

© Commonwealth of Australia, 2025 Public Skills Australia

- workplace procedures and policies for estimating and/or calculating mass, area and volumes of loads, and transport and storage facilities, including the quantification of dimensions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIE3004 Prepare workplace documents

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare workplace documents and forms in accordance with workplace requirements and applicable regulations or codes, as part of work activities within the transport and logistics industry.

It includes planning and preparing simple workplace documents and gathering relevant information enabling the completion of a workplace form.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan workplace	**1.1** Purpose and audience for document are identified

TLIF1001 Follow work health and safety procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to follow and apply work health and safety (WHS)/occupational health and safety (OHS) procedures when carrying out work activities in compliance with the relevant WHS/OHS regulations and procedures.

It includes following workplace procedures for hazard identification and risk control, contributing to WHS/OHS management arrangements and completing WHS/OHS records.

Work is performed under some supervision generally within a team environment. It involves applying established WHS/OHS and hazard minimisation principles and procedures to conduct workplace activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1 Follow workplace procedures for hazard identification and risk control	1.1 Workplace procedures for dealing with accidents, fire and emergencies are identified and followed
	1.2 Workplace procedures for WHS/OHS and related work instructions for controlling risks in a workplace are accurately followed
	1.3 Hazards in the workplace are identified and appropriate action is taken to report them and to minimise or eliminate risk to personnel, workplace and the environment
	1.4 Safety regulations and established workplace safety and hazard control practices and procedures are obtained, interpreted and applied to day-to-day work activities
	1.5 Procedures and precautions necessary for entry into confined spaces in the workplace are correctly followed
	1.6 Personal protection clothing and equipment is correctly used in accordance with established safety practices and procedures
	1.7 Established emergency and contingency plans are followed
2 Contribute to arrangements for managing work health and safety	2.1 WHS/OHS issues and identified safety hazards are raised with designated personnel in accordance with workplace procedures and relevant WHS/OHS legislation
	2.2 Contributions to managing WHS/OHS in the workplace are made in accordance with workplace procedures and relevant legislation
	2.3 WHS/OHS issues are raised with designated personnel in accordance with workplace procedures and relevant legislation
	2.4 Participative arrangements for managing WHS/OHS in the workplace are contributed to in accordance with workplace procedures, and within scope of responsibilities and competence
3 Complete work health and safety records	3.1 WHS/OHS records are completed in accordance with workplace requirements
	3.2 WHS/OHS records and legal requirements for maintaining records of occupational injury and diseases

TLIF1002 Conduct housekeeping activities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to conduct housekeeping activities in the workplace.

It includes identifying housekeeping requirements, procedures and resources of different areas of the workplace; monitoring and maintaining cleanliness and tidiness in the workplace; and completing assigned housekeeping tasks.

Work is performed under some supervision generally in a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F - Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Determine housekeeping requirements for different workplace areas	1.1 Workplace housekeeping procedures are identified
	1.2 Equipment and consumables are selected in accordance with work area requirements

© Commonwealth of Australia, 2025 Public Skills Australia

	1.3 Specific procedures and resources for housekeeping activities in different parts of the work area are identified and followed
2 Monitor and maintain cleanliness and tidiness in the workplace	2.1 Initiative is used to continuously monitor worksite cleanliness and tidiness
	2.2 Housekeeping issues are raised with designated personnel in accordance with workplace procedures
	2.3 Housekeeping equipment is operated in accordance with manufacturer instructions and workplace policy
	2.4 Housekeeping equipment and supplies are maintained and stored
3 Complete assigned housekeeping duties	3.1 Assigned housekeeping duties are conducted in accordance with workplace procedures and ensuring that waste is removed
	3.2 Maintenance requirements of any damaged items are notified to appropriate personnel
	3.3 Schedules and records for housekeeping duties are maintained
	3.4 Work areas are checked and required workplace standards are met
	3.5 Work is carried out following enterprise practices and safe work procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for TLIF1002 Conduct housekeeping activities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during housekeeping activities
- communicating and working effectively with others when carrying out housekeeping activities
- identifying workplace housekeeping requirements and undertaking housekeeping in the workplace
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring condition and performance of housekeeping tools and equipment and servicing, in terms of servicing schedule and standard operating procedures
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reporting and rectifying within limits of own role, problems, faults and malfunctions identified when carrying out housekeeping activities, in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards
- purpose of housekeeping within the workplace

© Commonwealth of Australia, 2025 Public Skills Australia

- relevant enterprise practices and safeworking procedures for own job role
- risks when carrying out housekeeping tasks and related precautions to control them
- servicing procedures for housekeeping equipment
- site layout and obstacles
- workplace procedures and policies for carrying out housekeeping activities in the workplace.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIF2012 Apply safe procedures when handling/transporting dangerous goods or explosives

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Performance Evidence
- Minor changes to Knowledge Evidence
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply safe procedures when handling and/or transporting dangerous goods or explosives.

It includes driving vehicle concerned in a safe manner and consulting with relevant authorities and persons in accordance with regulatory requirements.

Work must be carried out in accordance with relevant Australian and state/territory regulations and codes, including current:

- Australian Code for the Transport of Explosives by Road and Rail (AE Code)
- Australian Dangerous Goods (ADG) Code
- Code for the Safe Transport of Radioactive Material.

Work is performed under limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management.

© Commonwealth of Australia, 2025 Public Skills Australia

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Operate equipment and/or vehicle in a safe manner	**1.1** Job hazards are identified and required actions taken to minimise, control or eliminate identified hazards
	1.2 Safety equipment is checked for serviceability and required quantities and types
	1.3 Equipment/vehicle is operated safely in accordance with the relevant industry regulations, licence/permit requirements/or standards and as directed by police and/or competent authority
	1.4 Safety guidelines and codes of practice are applied in accordance with workplace procedures
	1.5 Dangerous goods/explosives/hazardous substances are handled/conveyed in accordance with relevant government regulations and current ADG Code
	1.6 Relevant emergency procedures are assessed relative to the dangerous goods/explosives/hazardous substances concerned
	1.7 Emergency procedures are instigated in accordance with current ADG Code, relevant codes of practice and government regulations to ensure precautions are taken consistent with directions set out in emergency workplace procedures
	1.8 Procedures are implemented to minimise damage to equipment, facilities and the environment, and to minimise injury to personnel
2 Consult with relevant authorities/persons	**2.1** Dangerous goods occurrences are reported in specified timeframes to competent authority, fire brigade and/or police using appropriate workplace procedures in accordance with relevant regulatory requirements
	2.2 Assistance is provided to competent authority as requested

© Commonwealth of Australia, 2025 Public Skills Australia

2.3 Other persons within affected emergency area are warned about hazard/s in accordance with workplace procedures, as required

2.4 Documentation is completed and proofread in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF2012A Apply safe procedures when handling/transporting dangerous goods or explosives.

Assessment Requirements for TLIF2012 Apply safe procedures when handling/transporting dangerous goods or explosives

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Performance Evidence
- Minor changes to Knowledge Evidence
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- communicating effectively with others
- completing relevant documentation
- handling/transporting dangerous goods/explosives/hazardous substances safely in accordance with workplace procedures and regulatory requirements
- identifying characteristics and hazards of dangerous goods/explosives/hazardous substances being handled
- identifying, selecting and using appropriate handling/transportation equipment, vehicles, personal protective equipment (PPE) and related procedures
- interpreting and following operational instructions and prioritising work
- interpreting relevant signs, placards, labels and codes
- locating, interpreting and applying relevant information
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in handling and transportation equipment in accordance with workplace procedures
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults, or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- selecting and use required PPE conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- characteristics of various dangerous goods, explosives or hazardous substances and their implications for handling and transport
- compatibility of various types of dangerous goods, explosives or hazardous substances
- emergency management plan
- housekeeping standards and procedures
- relevant Australian and state/territory regulations and codes pertaining to identifying, handling and marking dangerous goods, explosives or hazardous substances, including current Australian Dangerous Good (ADG) Code
- risks and hazards when handling and conveying dangerous goods, explosives or hazardous substances, and related precautions to control the risk
- site layout and obstacles
- WHS/OHS procedures and guidelines for lifting and movement of loads
- workplace incident reporting system and employer responsibility to report incidents to relevant government authority
- workplace procedures for handling and transporting dangerous goods, explosives or hazardous substances.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, current ADG Code/ Australian Code for the Transport of Explosives by Road and Rail (AE Code), codes of practice, workplace procedures and operation manuals.

TLIF4007 Implement and coordinate accident-emergency procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement and coordinate accident and emergency procedures in accordance with relevant regulations and workplace procedures.

It includes responding to the incident, coordinating on-site activities and completing follow-up actions.

Work is performed under some supervision generally within a team environment. It involves the application of basic emergency response principles when implementing accident and emergency procedures, and includes providing assistance ranging for simple injuries to applying life support systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1 Respond to incident	1.1 Details of incidents, accidents and emergencies are received, analysed and confirmed
	1.2 Hazards are identified, risks are assessed and control measures are implemented
	1.3 Immediate coordination requirements are identified and actioned in accordance with organisation procedures
	1.4 Travel to incident site is undertaken by the shortest, fastest, legal means and routes
2 Coordinate on-site activities	2.1 Control of site activities is assumed on arrival, and operator and other authorities present are informed of this action
	2.2 Assistance is provided to clients and operators within limitations of duty of care and organisational requirements
	2.3 Details of personnel, including names and nature of injuries, are notified to relevant personnel, in accordance with organisational policies and procedures
	2.4 Assistance is provided to relevant authorities within legal and policy limitations
3 Complete follow-up actions	3.1 Details of affected personnel, including names, nature of injuries and follow-up treatments are notified to next-of-kin in accordance with organisational procedures
	3.2 Incidents resulting in a near miss, accident or emergency are investigated and a report, including recommendations, is completed in accordance with organisational policies and procedures
	3.3 Accident procedures and emergency plans are reviewed for effectiveness and recommendations for changes are prepared and submitted to appropriate persons

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF4007A Implement and coordinate accident-emergency procedures.

Assessment Requirements for TLIF4007 Implement and coordinate accident-emergency procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others when implementing and coordinating accident and emergency procedures
- completing relevant documentation
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- reading and interpreting relevant instructions, procedures, information and signs
- working collaboratively with others when implementing and coordinating accident and emergency procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- means to control and organise an accident scene, provide practical assistance and cooperate with others at the scene
- relevant work health safety (WHS)/occupational health and safety (OHS) and other regulatory codes, procedures and guidelines concerning response to accidents and emergencies
- risks and hazards in the workplace and related precautions to control risk

© Commonwealth of Australia, 2025 Public Skills Australia

- workplace procedures and policies for responding to accidents and emergencies.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIO1002 Follow security procedures when working with passengers and personnel

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor changes to unit Application
- Minor changes to Performance Criteria
- Minor changes to Performance Evidence
- Minor changes to Knowledge Evidence
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to follow security procedures when working with passengers and personnel.

It includes checking and maintaining the security of passengers, workplace personnel and visitors; identifying and responding to security threats or situations; and completing all required security records.

Persons achieving competence in this unit will need to comply with the applicable security regulations and the relevant sections of a transport organisation's workplace security program and procedures.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

O – Security.

Unit Sector

Not applicable.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Maintain security of passengers, workplace personnel and visitors	**1.1** Security checks of passengers, workplace personnel and visitors are carried out in accordance with workplace security program and procedures, within limits of role and responsibilities
	1.2 Precautions and measures aimed at protecting the security of passengers, workplace personnel and visitors are followed in accordance with workplace security procedures and applicable security regulations
	1.3 Signs of suspicious behaviour from passengers, workplace personnel or visitors are recognised and reported promptly to designated personnel in accordance with workplace security procedures
	1.4 Breaches of security requirements for passengers, workplace personnel and visitors are reported promptly to designated personnel in accordance with workplace security procedures
2 Identify a security threat or situation	**2.1** Signs of security threats are recognised and investigated in accordance with workplace security procedures
	2.2 Security threat or situation is identified, assessed and reported promptly in accordance with workplace security procedures
	2.3 Implications of the security threat or situation are evaluated in accordance with workplace security procedures
	2.4 Relevant personnel are alerted to the security threat or situation, as required, in accordance with workplace security procedures
	2.5 Communications are maintained with relevant personnel to determine appropriate course of action
3 Respond to a security threat or situation	**3.1** Response to an identified security threat or situation is in accordance with workplace security procedures, received instructions, regulatory requirements and emergency response plan

© Commonwealth of Australia, 2025 Public Skills Australia

	3.2 Security threats or incidents are handled appropriately in accordance with established response plan, within limits of responsibility and duty of care
	3.3 Responsibilities are fulfilled in accordance with workplace security procedures and regulatory requirements
	3.4 Assistance is provided in controlling the site prior to and following arrival of security and/or emergency services
	3.5 Assistance is provided to other staff and emergency services personnel conducting an initial survey of the security threat or emergency scene
	3.6 Directions of the controlling security and/or emergency authority are followed, and all possible assistance is provided in response to those directions
4 Maintain security records	**4.1** Records of security checks and precautions are kept in accordance with workplace security procedures
	4.2 Reports of security incidents or threats are completed in accordance with workplace security procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIO1002A Follow security procedures when working with passengers and personnel.

Assessment Requirements for TLIO1002 Follow security procedures when working with passengers and personnel

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor changes to unit Application
- Minor changes to Performance Criteria
- Minor changes to Performance Evidence
- Minor changes to Knowledge Evidence
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment, facilities, cargo and passengers
- allocating attention according to priorities
- applying procedures for security checks and precautions in accordance with limits of own role and responsibilities
- applying relevant legislation and workplace procedures
- communicating effectively and working collaboratively with others when following security procedures
- completing required documentation and reports related to security procedures
- following security threat and/or incident response plan and workplace procedures
- identifying and solving and/or reporting problems that arise when following security procedures
- identifying signs of a possible security threat
- modifying activities depending on workplace contexts, risk situations and environments
- reading and interpreting instructions, procedures, applicable regulatory requirements, labels, markings, ID cards and other information relevant to workplace security
- recognising signs of pillage and theft
- recognising signs of security threats and situations
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- responding to a possible security threat
- selecting and using relevant communications and other equipment required when following security procedures

© Commonwealth of Australia, 2025 Public Skills Australia

- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- applicable measures for securing transport terminals, storage facilities, vehicles, trains, aircraft and/or vessels
- applicable transport security legislation including relevant international, national, state and/or territory Acts, regulations codes and/or guidelines
- common security problems that may occur when carrying out operations in the transport and logistics industry, and actions that can be taken to address and resolve these problems
- common security threats and incidents that may occur in transport, logistics and allied industries, and related roles and responsibilities of personnel when reporting and responding to these threats and incidents
- layout of worksite, vehicle, vessel, train or aircraft and operating procedures
- operational work systems, equipment, management and site operating systems when carrying out operations in the transport and logistics industry
- precautions and procedures aimed at protecting the security of passengers, workplace personnel and visitors
- procedures for operating electronic communications equipment in accordance with required protocols
- relevant documentation and reporting requirements
- relevant quarantine regulations and requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures, regulations and guidelines
- relevant workplace security program, policies and procedures for responding to security threats, situations and emergencies
- signs of pillaging and theft
- signs of suspicious behaviour.

TLIR4001 Monitor supplier performance

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to monitor the performance of contracted suppliers of goods/materials/services in compliance with workplace procedures and requirements.

It includes administering supplier contract, assessing for conformity to contracted requirements and completing all required contract documentation.

Work is performed under general guidance on progress and outcomes of work. It involves discretion and judgement for self and others in monitoring supplier performance.

Work involves responsibility for resource coordination and allocation, and for leading individuals or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

R – Contract Procurement

Unit Sector

Not applicable.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Administer supplier contract	1.1 Procedures for receiving supplied goods/materials/services are documented and implemented within the workplace
	1.2 Supplied goods/material/services are assessed for conformity to contracted requirements including price, quantity, quality and delivery schedules
	1.3 Non-conformance of supplier with contracted requirements is accurately detailed
	1.4 Actions to rectify non-conformance are undertaken in accordance with enterprise procedures and within scope of authority
	1.5 Issues of non-conformance beyond scope of authority are referred to designated personnel in accordance with enterprise operating procedures
2 Complete documentation	2.1 Annotations and performance assessment/evaluations are completed and appended to supplier file
	2.2 Action taken in regard to non-conformance of contracted requirements is documented and appended to supplier file
	2.3 System records are maintained and updated in accordance with enterprise information management system and required regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIR4001 Monitor supplier performance

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- Administering supplier contract
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- completing relevant documentation
- Contract non-conformance
- interpreting data and providing appropriate, timely information on data analysis outcomes to appropriate personnel
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures and information
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and appropriately applying technology, information systems and procedures
- working systematically with required attention to detail.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- focus of operation of recording, reporting and statistical analysis systems and resources
- relevant regulatory and code requirements
- typical problems that can occur with supply contracts and related appropriate action that

© Commonwealth of Australia, 2025 Public Skills Australia

can be taken
- workplace business policies and plans as they relate to supply contracts, including procedures for maintaining confidentiality
- workplace contract performance and disputation policies and procedures
- workplace protocols and procedures for monitoring supply contractor performance.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIX4016 Implement and monitor materiel sustainment plans

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement and monitor materiel sustainment plans and associated subordinate plans in accordance with relevant organisational policy and procedures.

This unit was developed for materiel sustainment specialists working within materiel logistics but is applicable to individuals in broader logistics roles.

Typically these individuals work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X – Logistics

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential Performance criteria describe the performance needed to

outcomes.	demonstrate achievement of the element.
1 Identify requirements for providing materiel sustainment plans	1.1 Sources of information relevant to materiel sustainment plans are identified and relevant information is obtained in accordance with organisational policy and procedures
	1.2 Currency of information is reviewed and documented in accordance with organisational policy and procedures
	1.3 Materiel sustainment plans are assessed against reviewed information
2 Implement materiel sustainment plans	2.1 Performance indicators and other criteria for measuring achievement are developed
	2.2 Materiel sustainment risks and impacts relevant to the plan are identified, reported and managed
	2.3 Materiel sustainment plans are implemented in accordance with organisational policy and procedures
	2.4 Participation and contribution to materiel sustainment activities is established and maintained in accordance with schedule
3 Monitor and report on materiel sustainment plans implementation	3.1 Materiel sustainment plans are monitored and regularly reviewed in accordance with organisational policy and procedures
	3.2 Plans are amended and documented in accordance with organisational policy and procedures
	3.3 Performance measures are monitored to ensure they address all key aspects of organisational performance and meet stakeholder requirements
	3.4 Performance data is analysed on a regular basis in terms of indicators and compliance with organisational policy and procedures
	3.5 Strategic performance is reported to all stakeholders in a transparent manner in accordance with compliance requirements

Assessment Requirements for TLIX4016 Implement and monitor materiel sustainment plans

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- analysing data and information
- applying relevant materiel sustainment and project management knowledge to work and to guide problem solving
- applying relevant implementation processes
- developing and/or complying with procedures to implement and monitor materiel sustainment plans
- displaying resilience by continuing to move forward despite criticism or setbacks, remaining positive and responding to pressure in a controlled manner
- ensuring mechanisms are in place to monitor materiel sustainment plans
- identifying relationships between organisational goals and recognising how own work contributes to achieving these goals
- monitoring and reporting on implementation processes
- negotiating and communicating with key internal and external stakeholders , receiving their input, and resolving potential areas of conflict or concern to ensure overall objectives are achieved
- undertaking performance measurement to enable objectives to be measured against defined parameters
- using organisational strategic objectives to identify long-term factors and external considerations for implementing material sustainment plans.

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- codification and cataloguing processes
- configuration management
- contract management
- level of written communication required to prepare correspondence and reports
- logistics support analysis principles and processes
- materiel sustainment processes related to planning
- organisational policy and procedures impacting on materiel sustainment
- organisational role relevant to materiel sustainment
- performance measurement
- product knowledge related to systems and/or equipment in service in the organisation
- safety, legislative and statutory requirements, including environmental and sustainability issues
- technical regulatory framework.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIX4028 Apply knowledge of logistics

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Updated wording to Application and Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply knowledge of logistics.

It includes accessing and interpreting relevant logistics information and applying this information in the workplace.

This unit applies to emerging logistics specialists who need an understanding of the functions and activities of the wider organisation but is applicable to any individual in this field of work.

The application of this knowledge is required by people who are not currently specialists in the field but need the knowledge to inform their decision making.

Typically these individuals must demonstrate the ability to work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

TLIX4029 Apply knowledge of integrated logistics support

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to analyse and apply knowledge of integrated logistics support in accordance with relevant organisational policy and procedures.

The application of this knowledge is required by people who are not integrated logistics support specialists but who need the knowledge to inform their decision making. The application of integrated logistics support knowledge is specific to a variety of component processes in material logistics activities.

This unit was developed for logistics specialists working within materiel logistics but is applicable to individuals in broader logistics roles.

Typically these individuals work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- computer and relevant software
- legislation, guidelines, procedures and protocols relating to integrated logistic support
- integrated logistics support plans.

TLIX4031 Apply knowledge of configuration management

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to analyse and apply knowledge of configuration management in accordance with relevant organisational policy and procedures.

The application of this knowledge is required by people who are not configuration management specialists but who need the knowledge to inform their decision making. The application of configuration management knowledge is specific to a variety of component processes in material logistics activities.

This unit was developed for logistics specialists working within materiel logistics but is applicable to individuals in broader logistics roles.

Typically these individuals work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X – Logistics

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Access and interpret relevant configuration management information	1.1 Relevant configuration management requirements are identified and obtained
	1.2 Configuration management information obtained is analysed to determine relevance and application to the organisation
	1.3 Outcomes of the analysis are documented and recommendations relevant to configuration management requirements are determined
2 Use knowledge of configuration management	2.1 Configuration management requirements and recommendations relevant to materiel and materiel logistics are applied in accordance with organisational policy and procedures
	2.2 Effectiveness of recommendations is assessed, reviewed and recorded in accordance with organisational policy and procedures
	2.3 Recommendations are adjusted as required and documented for future application in accordance with organisational policy and procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Unit Mapping Information

This unit replaces and is equivalent to TLIX4031A Apply knowledge of configuration management.

Assessment Requirements for TLIX4031 Apply knowledge of configuration management

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adhering to relevant configuration management requirements
- analysing and interpreting configuration management information to determine where internal and external factors impact on configuration management requirements, and adjusting planning accordingly
- applying configuration management knowledge to work being performed and to guide problem solving
- consulting and negotiating with key internal and external stakeholders and resolving potential areas of conflict or concern to ensure overall objectives are achieved
- displaying resilience by continuing to move forward despite criticism or setbacks
- focusing on clear communication of configuration management information, presenting information confidently and selecting appropriate medium for communication to a range of audiences
- identifying, interpreting and analysing configuration management requirements relevant to work being performed
- using appropriate information technology and software.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- configuration management knowledge relevant to work performed
- configuration management relevant to materiel and materiel systems
- integrated logistics support
- materiel life cycle
- materiel sustainment

© Commonwealth of Australia, 2025 Public Skills Australia

- own role in relation to wider organisational or project context
- safety, legislative and statutory requirements, including relevant environmental and sustainability issues
- technical regulatory framework.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operations manuals
- computer and relevant software
- legislation, guidelines, procedures and protocols relating to configuration management
- configuration management plans.

TLIX5020 Develop and review configuration management plans

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to develop and review configuration management plans and associated subordinate plans, to ensure efficient and effective delivery of configuration management across the materiel and materiel system life cycle.

This unit was developed for configuration management specialists working within materiel logistics but is applicable to individuals in broader logistics roles.

Typically these individuals work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. All activities are carried out in accordance with relevant organisational policy and procedures.

Assessment Requirements for TLIX5020 Develop and review configuration management plans

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adhering to relevant work health and safety (WHS)/occupational health and safety (OHS) requirements
- applying configuration management and project management knowledge relevant to planning
- consulting and negotiating effectively with internal and external stakeholders and resolving potential areas of conflict or concern to ensure overall configuration management planning objectives are achieved
- displaying resilience by continuing to move forward despite criticism or setbacks
- drawing on information from a variety of sources using research, analysis and judgement to identify and develop configuration management plans
- identifying relationships between organisational goals and recognising how own work contributes to achieving these goals
- identifying requirements for plans and adjusting them as necessary to ensure effective and efficient performance
- identifying, reviewing and analysing information that may impact on configuration management planning or may be impacted by configuration management planning
- initiating and efficiently monitoring processes
- initiating remedial action required
- undertaking performance measurement relevant to configuration management planning to enable objectives to be measured against defined parameters
- using appropriate information technology and software
- using organisational strategic objectives to identify and assess potential alliances and effective strategies.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of

the requirements of the elements and performance criteria and include knowledge of:

- codification and cataloguing processes
- configuration management
- legislative and regulatory environment as it relates to materiel logistics
- logistics governance
- materiel logistics
- organisational policy and procedures
- organisational role relevant to configuration management
- planning processes
- product knowledge related to systems and/or equipment in service in the organisation
- safety, legislative and statutory requirements relevant to configuration management.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations*, current at the time of assessment.

TLIX5021 Manage configuration management processes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare for configuration management processes, to manage those processes throughout the materiel life cycle and to report on those processes in the organisational environment.

This unit was developed for configuration management specialists working within materiel logistics but is applicable to individuals in broader logistics roles.

Typically these individuals work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. All activities are carried out in accordance with relevant organisational policy and procedures.

TLIX5036 Manage and monitor technical data and information systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to manage and monitor technical data and information systems in accordance with relevant organisational policy and procedures.

It includes designating detailed technical data, information use and maintenance responsibilities; developing key performance indicators for technical data management activities; and developing monitoring methodology.

It also includes monitoring technical data management systems; identifying and responding to problems and changes; and designating technical data and information creation and capturing responsibilities.

This competency occurs within an established systems framework. It may also be used to review systems processes and activities.

This unit applies to technical regulatory framework specialists working within materiel logistics but is applicable to any individual in this field of work.

Typically these individuals must demonstrate the ability to work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their output.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Designate detailed technical data and information use, and maintenance responsibilities	1.1 Responsibilities for technical data and information use and maintenance activities are designated to staff in accordance with approved systems framework, organisational policy and the competency of individual staff
	1.2 System operational rules are devised in compliance with approved systems framework
	1.3 Resources for approved budget period are allocated in accordance with policy and strategic plan
2 Develop key performance indicators for technical data management activities	2.1 Measurable performance indicators are developed for technical data management activities in accordance with authorised systems
	2.2 Individual personnel/organisational unit data management responsibilities are identified and documented
	2.3 Acceptable range of variation for compliance is determined based on data management responsibilities, applicable data management systems and organisational risk management analysis
3 Develop monitoring methodology	3.1 Methodology for monitoring technical data management systems rules, standards and procedures is developed based on authorised systems
	3.2 Timeframes involved, means of surveillance and forms of reporting are included in methodology developed
	3.3 Methodology, performance criteria and range of variation from standards and rules are submitted to appropriate authority for approval
4 Monitor a technical data management system	4.1 Monitoring is undertaken in accordance with approved timeframes and frequency

© Commonwealth of Australia, 2025 Public Skills Australia

	4.2 Staff being monitored are notified in accordance with organisational policy and guidelines
	4.3 Variation from data management systems framework, rule, standards and procedures that exceed the agreed limit is noted and details of the situation are recorded
	4.4 Reports relating to technical data and information use and maintenance are provided to appropriate authority in the required format and at the required intervals
5 Identify and respond to problems and changes	5.1 Problems and changes requiring a systematic response are identified from monitoring reports and external events
	5.2 Recommendations are made for revisions to systems, procedures, and strategic plans in response to identified variations, changes and problems
	5.3 Amendments to systems are devised and implementation is planned, in response to problems and changes that require a systemic response
	5.4 Recommendations for systems amendments and the planning and implementation required are prepared, and approval is sought from appropriate authority
	5.5 Procedures for using technical data and information systems, and subsequent alterations and amendments to the procedures are authorised, ensuring that performance indicator parameters and access rules are adhered to
6 Designate technical data and information creation and capture responsibilities	6.1 Responsibilities for technical data and information creation and capture activities are designated to staff in accordance with organisational policy
	6.2 Technical data and information creation and capture performance targets are set within the parameters of the technical data management plan
	6.3 Resources for the budget period are allocated in accordance with organisational policy and strategic plan

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for TLIX5036 Manage and monitor technical data and information systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- analysing data and information
- applying knowledge of technical data and information plans to assist work and to guide problem solving
- applying relevant implementation processes
- applying technical data and information, and project management knowledge to technical data and information systems
- consulting and negotiating effectively with internal and external key stakeholders and resolving potential areas of conflict or concern to ensure overall technical data and information systems objectives are achieved
- displaying resilience by continuing to move forward despite criticism or setbacks
- identifying the relationship between organisational goals and recognising how own work contributes to achieving these goals
- implementing processes to enable new technical data and information systems requirements to be effectively transitioned across the life cycle – including integrated logistics support considerations, environmental, sustainability issues, and validation and verification activities
- monitoring and reporting on implementation processes
- monitoring processes to ensure technical data and information systems continue to enable operational requirements to be attained – this may include performance metrics.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

© Commonwealth of Australia, 2025 Public Skills Australia

- data management, standards, principles, processes and functional requirements
- details of the technical regulatory framework, organisational engineering management plans and technical data management plan
- established communication channels and protocols
- organisational data management systems
- organisational functions, structure and culture
- organisational policy, strategies and procedures
- organisational rules for capturing, accessing, using and maintaining technical data and information
- organisational technical classification scheme and language
- own role in relation to wider organisational or project context
- problem identification and resolution
- procedures for recording, reporting and maintaining workplace records and information
- quality assurance principles and processes
- technical expertise required for the job/function
- workflow and business process re-engineering principles and practices.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

DEFSS00008 Communication Operations Skill Set

Modification History

Release	Comments
1	This skill set was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. • New skill set composed of units previously contained in DEF20912 Certificate II in Communications Operations

Description

This skill set provides a set of skills for Defence Communication Operators to ensure commanders can communicate effectively using satellite terminals, radios, hand held and desk-top data terminals and security equipment. Whatever the location, deployment or task, Communication Operators provide the appropriate communications systems for the Military whether it is on land, in the air or at sea.

Pathways Information

These units may provide credit towards a range of qualifications in the Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

Units	
DEFCMM001	Maintain security in a Defence communications and information systems environment
DEFCMM002	Transmit and receive messages utilising Defence messaging systems
DEFCMM003	Transmit and receive data via information exchange systems
DEFCMM004	Conduct operator level maintenance in a Defence environment

© Commonwealth of Australia, 2025 Public Skills Australia

DEFCMM005	Transmit and receive messages via voice systems
DEFCMM006	Support the operation of a communication and information system facility

Target Group

This skill set applies to those working as communications operators within Defence.

Suggested words for Statement of Attainment

These competencies meet the industry standards for communication operators.

DEFSS00009 Physical Training Skill Set

Modification History

Release	Comments
1	This skill set was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. • DEF unit codes updated • SISSSPT303A and SRXGRO001A units removed

Description

This skill set applies to people who provide fitness training support.

This skill set provides a set of skills to combat fitness leaders who provide fitness training support to small groups or organisations in an operational setting. This function is performed in addition to their primary trade or employment over a range of familiar and predictable contexts.

Pathways Information

This skill set is stand alone and does not lead to a specific Defence qualification. The units it includes may provide credit towards a Sport, Fitness and Recreational Training Package qualification.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

Units	
DEFFIT001	Conduct a group fitness appraisal
DEFFIT002	Develop a group fitness program
DEFFIT003	Conduct individual fitness assessments

© Commonwealth of Australia, 2025 Public Skills Australia

DEFFIT004	Instruct a workplace physical training session

Target Group

This skill set applies to people who provide fitness training support.

Suggested words for Statement of Attainment

These competencies meet the industry standards for providing basic fitness training to small groups in an operational setting.

© Commonwealth of Australia, 2025 Public Skills Australia

DEFSS00010 Maritime Operations Skill Set

Modification History

Release	Comments
1	This skill set was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. • New Skill set composed of units previously contained in DEF31012 Certificate III in Maritime Operations

Description

This skill set provides a set of skills to perform and assist in a range of seamanship operations and would be typically implemented in a Naval or Army Defence maritime environment.

Pathways Information

These units may provide credit towards a range of qualifications in the Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

Units	
DEFSEA001	Assist in seamanship operations
DEFSEA002	Assist in boarding operations
DEFSEA003	Control persons using non firearms options
DEFSEA004	Defend persons using firearms
DEFSEA005	Maintain weapons and associated equipment
DEFSEA006	Track and engage targets

© Commonwealth of Australia, 2025 Public Skills Australia

DEFSEA007	Assist in ship navigation
DEFSEA008	Operate a chaff firing system
DEFSEA009	Operate a visual target designation system

Target Group

This skill set applies to those working in a military maritime environment such as Boatswains Mates.

Suggested words for Statement of Attainment

These competencies meet the industry standards for Defence maritime operations.

DEFSS00011 Survival Skill Set

Modification History

Release	Comments
1	This skill set was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. • New skill set composed of existing units

Description

This skill set provides a set of skills to survive for a significant period of time under food restrictions and in the absence of normal living conditions. For example; a person parachuting from a downed plane into a remote and/or hostile environment.

Pathways Information

These units may provide credit towards a range of qualifications in the Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

Units	
DEFSUR001	Catch aquatic animals in a survival situation
DEFSUR002	Construct improvised weapons and equipment in a survival situation
DEFSUR003	Employ visual emergency signalling techniques in a survival situation
DEFSUR004	Erect a survival shelter using natural resources in a survival situation
DEFSUR005	Maintain physical and emotional health and fitness in a survival environment
DEFSUR006	Navigate using celestial aids

© Commonwealth of Australia, 2025 Public Skills Australia

DEFSUR007	Preserve and cook foodstuffs in a survival situation
DEFSUR008	Produce fire using improvised means in a survival situation
DEFSUR009	Trap and kill animals in a survival situation
DEFSUR010	Locate, treat and manage water in a survival situation
DEFSUR011	Survive at sea

Target Group

This skill set applies to people who are required to survive in a remote environment with little or no resources.

Suggested words for Statement of Attainment

These competencies meet the industry standards for surviving in a remote environment.

DEFSS00012 Defence Chaplain Skill Set

Modification History

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to DEFSS00002 Defence Chaplain.

Description

This skill set allows for the attainment of competencies in Defence Chaplaincy.

Pathways Information

The DEFSS00012 Defence Chaplain Skill Set is part of the DEF Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 5 units of competency must be attained.

DEFCHP001	Provide pastoral care
DEFCHP002	Provide ethical and pastoral advice
DEFCHP003	Plan the delivery of chaplaincy support
DEFCHP004	Conduct and facilitate religious observances and activities
DEFCHP005	Perform as an effective member of the Chaplains' branch

Target Group

Defence Chaplains provide service to men and women in uniform in peace time and operational environments. They also help care for the families of serving members of the Australian Defence Force (ADF).

Their primary aim is to serve denominational members and their families, to facilitate services for those of other denominations or faiths, and to care for all personnel regardless of any religious affiliation.

© Commonwealth of Australia, 2025 Public Skills Australia

Suggested words for Statement of Attainment

This skill set meets industry requirements as specified in the DEF Defence Training Package for work in the area of Defence Chaplaincy.

© Commonwealth of Australia, 2025 Public Skills Australia

DEFSS00013 Defence Heavy Vehicle Recovery Skill Set

Modification History

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to DEFSS00003 Defence Heavy Vehicle Recovery.

Description

This skill set allows for the attainment of competencies required to recover heavy vehicles and equipment that have become bogged or broken down, and due to terrain or environmental factors, cannot be extracted by other means.

Pathways Information

The DEFSS00013 Defence Heavy Vehicle Recovery Skill Set is part of the DEF Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 2 units of competency must be attained.

DEFVEH001	Conduct recovery vehicle operations in a field environment
DEFVEH002	Extract disabled equipment using winching techniques in a field environment

Target Group

This skill set covers the competency required by Defence personnel to recover equipment and vehicles that have become bogged or broken down, and due to terrain or environmental factors cannot be extracted by other means.

Typically, operations are conducted by personnel acting independently or in charge of a small team, operating in remote environments isolated from assistance or supervision.

© Commonwealth of Australia, 2025 Public Skills Australia

Suggested words for Statement of Attainment

This skill set meets industry requirements as specified in the DEF Defence Training Package for work in recovering heavy vehicles and equipment that have become bogged or broken down and which, due environmental factors, cannot be extracted by other means.

DEFSS00014 Enter Confined Space Skill Set

Modification History

Release 2.0. This is the second release of this Skill Set in DEF Defence Training Package Release 4.0. Minor modifications have been made to Target Group.

Release 1.0. New Skill Set.

This Skill Set replaces and is equivalent to DEFSS00004 Enter Confined Space.

Description

This Skill Set allows for the attainment of competencies in confined space entry.

Pathways Information

The DEFSS00014 Enter Confined Space Skill Set is part of the DEF Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of **2 units of competency** must be attained.

DEFWHS010	Identify confined space
DEFWHS011	Enter confined space

Target Group

This skill set applies to Defence personnel who are required to enter and work in a confined space. This function is performed as part of their primary trade or employment.

Suggested words for Statement of Attainment

This skill set meets industry requirements as specified in the DEF Defence Training Package for work in the area of confined space entry within a Defence environment.

DEFSS00015 Field Kitchen Assistant Skill Set

Modification History

Release 1. New Skill Set

This Skill Set replaces and is equivalent to DEFSS00005 Field Kitchen Assistant.

Description

This skill set allows for the attainment of competency for field kitchen assistants who establish and operate a kitchen within a field environment.

Pathways Information

The DEFSS00015 Field Kitchen Assistant Skill Set is part of the DEF Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 1 unit of competency must be attained.

DEFMIL148	Assist with the establishment and operation of a field kitchen

Target Group

Field kitchen assistants assist with the establishment and operation of a kitchen within a field environment.

This skill set was designed for field kitchens in an operational environment that would be encountered in Defence operations and disaster sites but could be equally applicable to field kitchens in other settings such as fetes and markets.

Suggested words for Statement of Attainment

This skill set meets industry requirements as specified in the DEF Defence Training Package for work in the area of assisting with the establishment and operation of a field kitchen.

© Commonwealth of Australia, 2025 Public Skills Australia

DEFSS00016 Field Kitchen Manager Skill Set

Modification History

Release 1. New Skill Set

This Skill Set replaces and is equivalent to DEFSS00006 Field Kitchen Manager.

Description

This skill set allows for the attainment of competencies for field kitchen managers who establish and operate a mobile kitchen facility in a field environment.

Pathways Information

The DEFSS00016 Field Kitchen Manager Skill Set is part of the DEF Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 1 unit of competency must be attained.

DEFMIL147	Establish and operate a field kitchen

Target Group

Field kitchen managers establish and run a mobile kitchen facility in a field environment.

This skill set was designed for field kitchens in an operational environment that would be encountered in Defence operations and disaster sites but could be equally applicable to field kitchens in other similar settings.

Suggested words for Statement of Attainment

This skill set meets industry requirements as specified in the DEF Defence Training Package for work in the area of establishing and managing a field kitchen.

© Commonwealth of Australia, 2025 Public Skills Australia

DEFSS00017 Military Policing Skill Set

Modification History

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to DEFSS00007 Military Policing.

Description

This skill set allows for the attainment of competencies for military policing.

Pathways Information

The DEFSS00017 Military Policing Skill Set is part of the DEF Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 3 units of competency must be attained.

DEFPOL001	Apply the values and principles of Defence police
DEFPOL002	Conduct battlefield circulation and control operations
DEFPOL003	Participate in population protection and control

Target Group

This skill set covers the competencies to carry out policing operations in a Defence environment.

Suggested words for Statement of Attainment

This skill set meets industry requirements as specified in the DEF Defence Training Package for work in the area of policing operations in a Defence environment.

DEFSS00018 Performance Based Contracting Practitioner Skill Set

Modification History

Release 1. New Skill Set

Description

This Skill Set provides a set of skills for managers using the Performance Based Contract (PBC) management framework to ensure that Defence managers and other stakeholders within external organisations employ effective performance based measures in the management of strategic contracts.

Pathways Information

The DEFSS00018 Performance Based Contracting Practitioner Skill Set is part of the DEF Defence Training Package Release 2.0. These units may provide credit towards the DEF40917 Certificate IV in Performance Based Contracting.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 7 units of competency must be attained.

DEFPBC001	Employ the fundamentals of a Performance Based Contract
DEFPBC002	Establish the basis of a Performance Based Contract
DEFPBC003	Establish a Performance Based Contract performance measures hierarchy
DEFPBC004	Establish the contract details of a Performance Based Contract
DEFPBC005	Operate a Performance Based Contract
DEFGEN005	Develop relationships with other organisations
PSPGEN034	Compose complex workplace documents

© Commonwealth of Australia, 2025 Public Skills Australia

Target Group

This is a Skill Set covering the role of Defence managers and other stakeholders within external organisations employing effective performance based measures in the management of strategic contracts.

Suggested words for Statement of Attainment

The competencies are drawn from a nationally endorsed Training Package, and provide the skills and knowledge required by persons performing the duties of Defence managers and other stakeholders within external organisations employ effective performance-based measures in the management of strategic contracts.

DEFSS00019 Range Control Skill Set

Modification History

Release 1. New Skill Set

Description

This skill set provides a set of skills for Range Control Staff (RCS) to ensure that Defence training area and range (TAR) are operated safely, are fit for purpose and RCS employ safe and effective coordination of training activities on assigned training areas.

Pathways Information

The DEFSS00019 Range Control Skill Set is part of the DEF Defence Training Package Release 2.0. These units may provide credit towards the DEF50717 Diploma of Range Control and Management.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 4 units of competency must be attained.

DEFRNG013	Control training area and range activities
DEFRNG014	Monitor training area and range activities
DEFRNG015	Inspect, maintain and monitor training area and range activities
PUAFIR512	Develop and analyse the behaviour and suppression options for a Level 2 wildfire

Target Group

This skill set applies to those working as Range Control Staff (RCS) within Defence.

© Commonwealth of Australia, 2025 Public Skills Australia

Suggested words for Statement of Attainment

The competencies are drawn from a nationally endorsed Training Package, and provide the skills and knowledge required by persons performing the duties Range Control Staff (RCS) within Australian Defence Force (ADF) environments.

DEFSS00020 Basic Geospatial Skill Set

Modification History

Release 1. New Skill Set

Description

This Skill Set is for individuals who perform the duties of basic support to Defence geospatial operations within the Australian Geospatial Workplace environment. It provides the skills and knowledge required to perform basic surveying computations, store and retrieve spatial data, read and interpret maps, support Defence geospatial operations and apply Defence geospatial visualisation.

Pathways Information

The DEFSS00020 Basic Geospatial Skill Set is part of the Defence Training Package.

Licensing/Regulatory Information

Personnel seeking certification as basic geospatial technicians are to comply with the requirements of the Defence Training Package.

Skill Set Requirements

A total of **5 units** of competency must be attained.

CPPSIS3020	Perform basic surveying computations
CPPSIS4022	Store and retrieve spatial data
DEFGEO001	Support geospatial operations
DEFGEO002	Apply geospatial visualisation
RIISTD201D	Read and interpret maps

Target Group

This is a Skill Set covering the role of the Basic Geospatial Technician within the Australian and New Zealand Standard Classification of Occupations (ANZSCO) 2322 Surveyors and Spatial Scientists. This Skill Set focusses on the operational application of Geospatial data.

© Commonwealth of Australia, 2025 Public Skills Australia

Suggested words for Statement of Attainment

The competencies are drawn from a nationally endorsed Training Package, and provide the skills and knowledge required by persons performing the duties of Basic Geospatial Technician within the Australian Geospatial environment.

DEFSS00021 Intermediate Geospatial Skill Set

Modification History

Release 1. New Skill Set

Description

This skill set is for individuals who perform the duties of providing intermediate geospatial support to Defence operations within the Australian geospatial workplace environments. It provides the skills and knowledge required to store and retrieve spatial data, source and assess spatial data, provide geospatial support to Defence operations and provide geospatial technical advice.

Pathways Information

The DEFSS00021 Intermediate Geospatial Skill Set is part of the Defence Training Package.

Licensing/Regulatory Information

Personnel seeking certification as intermediate geospatial technicians are to comply with the requirements of the Defence Training Package.

Skill Set Requirements

A total of **4 units** of competency must be attained.

CPPSIS4022	Store and retrieve spatial data
CPPSIS4024	Source and assess spatial data
DEFGEO003	Provide geospatial support to operations
DEFGEO004	Provide geospatial technical advice

Target Group

This is a Skill Set covering the role of the Intermediate Geospatial Technician within the Australian and New Zealand Standard Classification of Occupations (ANZSCO) 2322 Surveyors and Spatial Scientists. This Skill Set focusses on the operational application of Geospatial data.

© Commonwealth of Australia, 2025 Public Skills Australia

Suggested words for Statement of Attainment

The competencies are drawn from a nationally endorsed Training Package, and provide the skills and knowledge required by persons performing the duties of Intermediate Geospatial Technician within the Australian Geospatial environment.

DEFSS00022 Handle Explosive Ordnance and Dangerous Goods

Modification History

Release 1. This is the first release of this Skill Set.

Description

This Skill Set allows for attainment of competencies to handle explosive ordnance and dangerous goods.

Pathways Information

Units from this Skill Set can contribute to credit towards qualifications in the Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Skill Set Requirements

A total of 5 **units of competency** must be attained.

DEFEXO005	Package explosives
DEFEXO006	Unpackage explosives
DEFEXO008	Conduct explosives inspection
DEFEXO016	Conduct explosives packaging inspection
TLID3015	Identify and label explosives/dangerous goods

Target Group

This Skill Set is suitable for individuals who handle explosive ordnance and dangerous goods.

Suggested words for Statement of Attainment

The competencies are drawn from a nationally endorsed Training Package, and provide the skills

© Commonwealth of Australia, 2025 Public Skills Australia

and knowledge required to handle explosive ordnance and dangerous goods.

© Commonwealth of Australia, 2025 Public Skills Australia

DEFSS00023 Transport Explosive Ordnance Phase One

Modification History

Release 1. This is the first release of this Skill Set.

Description

This Skill Set allows for attainment of phase one competencies to transport explosive ordnance.

Pathways Information

Units from this Skill Set can contribute to credit towards qualifications in the Defence Training Package and the Transport and Logistics Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Skill Set Requirements

A total of 5 **units of competency** must be attained.

TLIA3015	Complete receival/despatch documentation
TLID1001	Shift materials safely using manual handling methods
TLID2016	Load and unload explosives/dangerous goods
TLID3027	Prepare for transport of dangerous goods
TLIF2012	Apply safe procedures when handling/transporting dangerous goods or explosives

Target Group

This Skill Set is suitable for individuals transporting explosive ordnance phase one.

Suggested words for Statement of Attainment

The competencies are drawn from a nationally endorsed Training Package, and provide the skills

© Commonwealth of Australia, 2025 Public Skills Australia

and knowledge to transport explosive ordnance phase one.

© Commonwealth of Australia, 2025 Public Skills Australia

DEFSS00024 Manage Explosive Ordnance Facilities

Modification History

Release 1. This is the first release of this Skill Set.

Description

This Skill Set allows for attainment of competencies to manage explosive ordnance facilities.

Pathways Information

Units from this Skill Set can contribute to credit towards qualifications in the Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Skill Set Requirements

A total of 2 **units of competency** must be attained.

DEFEXO007	Monitor explosive ordnance environmental conditions
DEFEXO066	Inspect explosive facilities

Target Group

This Skill Set is suitable for individuals who manage explosive ordnance facilities.

Suggested words for Statement of Attainment

The competencies are drawn from a nationally endorsed Training Package, and provide the skills and knowledge required to manage explosive ordnance facilities.

© Commonwealth of Australia, 2025 Public Skills Australia

DEFSS00025 Explosive Ordnance Engineering

Modification History

Release 1. This is the first release of this Skill Set.

Description

This Skill Set allows for attainment of competencies in explosive ordnance engineering.

Pathways Information

Units from this Skill Set can contribute to credit towards qualifications in the Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Skill Set Requirements

A total of 6 **units of competency** must be attained.

DEFEXO081	Apply a knowledge of the service environment
DEFEXO082	Apply a knowledge of explosives
DEFEXO083	Apply explosive ordnance design principles
DEFEXO084	Apply knowledge of explosive chemistry
DEFEXO085	Apply knowledge of explosive physics
DEFEXO086	Apply knowledge of explosive materials

Target Group

This Skill Set is suitable for explosive ordnance engineers.

© Commonwealth of Australia, 2025 Public Skills Australia

Suggested words for Statement of Attainment

The competencies are drawn from a nationally endorsed Training Package, and provide the skills and knowledge required to work in explosive ordnance engineering.

© Commonwealth of Australia, 2025 Public Skills Australia

DEFSS00026 Explosive Ordnance Supervisor (EOS)

Modification History

Release 1. This is the first release of this Skill Set.

Description

This Skill Set allows for attainment of competencies in explosive ordnance supervision

Pathways Information

Units from this Skill Set can contribute to credit towards qualifications in the Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Skill Set Requirements

A total of 4 **units of competency** must be attained.

DEFEXO007	Monitor explosive ordnance environmental conditions
DEFEXO066	Inspect explosive facilities
DEFGEN006	Work with equity and diversity
DEFGEN024	Supervise engineering and logistic tasks

Target Group

This Skill Set is suitable for explosive ordnance supervisors.

Suggested words for Statement of Attainment

The competencies are drawn from a nationally endorsed Training Package, and provide the skills and knowledge required for explosive ordnance supervision.

© Commonwealth of Australia, 2025 Public Skills Australia

DEFSS00027 Explosive Ordnance Manager (EOM)

Modification History

Release 1. This is the first release of this Skill Set.

Description

This Skill Set allows for attainment of competencies in explosive ordnance management.

Pathways Information

Units from this Skill Set can contribute to credit towards qualifications in the Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Skill Set Requirements

A total of 6 **units of competency** must be attained.

DEFEXO063	Operate a large quantity explosives facility
DEFEXO018	License explosive facilities and potential explosion sites
DEFEXO068	Establish and operate an explosive field storage site
DEFEXO069	Plan loading of dangerous goods
DEFGEN025	Control engineering and logistic processes
PUACOM007	Liaise with other organisations

Target Group

This Skill Set is suitable for individuals managing explosive ordnance.

© Commonwealth of Australia, 2025 Public Skills Australia

Suggested words for Statement of Attainment

The competencies are drawn from a nationally endorsed Training Package, and provide the skills and knowledge required to manage explosive ordnance.

© Commonwealth of Australia, 2025 Public Skills Australia

DEFSS00028 Laser Safety Officer Skill Set

Modification History

Release 1. This is the first release of this Skill Set in DEF Defence Training Package Release 4.0.

Description

This Skill Set allows for the attainment of competencies in working safely with lasers.

Pathways Information

The DEFSS00028 Laser Safety Officer Skill Set is part of the DEF Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of **4 units of competency** must be attained.

DEFWHS001	Identify and monitor radiation hazards
DEFWHS007	Work safely with lasers
DEFWHS008	Apply laser safety procedures
DEFWHS009	Develop laser safety plans

Target Group

This skill set applies to Defence personnel who are required work safely with lasers. This function is performed as part of their primary trade or employment.

Suggested words for Statement of Attainment

This skill set meets industry requirements as specified in the DEF Defence Training Package for work in the area of lasers within a Defence environment.

© Commonwealth of Australia, 2025 Public Skills Australia

DEFSS00029 Ionising Radiation Safety Officer Skill Set

Modification History

Release 1. This is the first release of this Skill Set in DEF Defence Training Package Release 4.0.

Description

This Skill Set allows for the attainment of competencies in applying ionising safety procedures.

Pathways Information

The DEFSS00029 Ionising Radiation Safety Officer Skill Set is part of the DEF Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of **3 units of competency** must be attained.

DEFWHS001	Identify and monitor radiation hazards
DEFWHS005	Apply ionising radiation safety procedures
DEFWHS006	Develop ionising radiation safety plans

Target Group

This skill set applies to Defence personnel who are required to apply ionising safety procedures. This function is performed as part of their primary trade or employment.

Suggested words for Statement of Attainment

This skill set meets industry requirements as specified in the DEF Defence Training Package for work in the application of ionising safety procedures within a Defence environment.

© Commonwealth of Australia, 2025 Public Skills Australia

DEFSS00030 Radiofrequency Radiation Safety Officer Skill Set

Modification History

Release 1. This is the first release of this Skill Set in DEF Defence Training Package Release 4.0.

Description

This Skill Set allows for the attainment of competencies in radiofrequency radiation safety.

Pathways Information

The DEFSS00030 Radiofrequency Radiation Safety Officer Skill Set is part of the DEF Defence Training package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of **3 units of competency** must be attained.

DEFWHS001	Identify and monitor radiation hazards
DEFWHS003	Apply radio frequency radiation safety procedures
DEFWHS004	Develop radio frequency radiation safety plans

Target Group

This Skill Set applies to Defence personnel who are required to work in the application of radiofrequency radiation safety. This function is performed as part of their primary trade or employment.

Suggested words for Statement of Attainment

This Skill Set meets industry requirements as specified in the DEF Defence Training Package for work in the area of radiofrequency radiation safety within a Defence environment.
