Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant materials, tools, equipment and personal protective equipment currently used in industry including:
  - environmental measuring devices
- relevant documentation including operational procedures, regulations, codes of practice and operation manuals.

DEFPHL004 Undertake a vector borne diseases surveillance program

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to undertake a vector borne diseases surveillance program as a member of the Australian Defence Force (ADF).

It includes preparing, collecting, performing and reviewing data in a vector borne diseases surveillance program. It also includes interpreting and reporting data gathered from vector borne disease surveillance.

This unit applies to personnel working in Defence preventive medicine.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform complex tasks in a range of contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Preventive Health

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential	Performance criteria describe the performance needed to

outcomes.	demonstrate achievement of the element.
1 Collect and review data in preparation for surveillance activities	**1.1** Analyse historical data to determine the surveillance area and vectors
	1.2 Review climate and topography of surveillance area to identify key locations of interest and optimal time to perform surveillance
	1.3 Analyse blood and/or mosquito samples using rapid test kits in accordance with manufacturer specifications, to identify potential prevalence of vector borne diseases in surveillance area
2 Perform surveillance of vectors	**2.1** Gather surveillance data using vector collection techniques
	2.2 Operate surveillance equipment in accordance with manufacturer specifications
	2.3 Sort and identify collected vectors to enable classification
	2.4 Preserve, store and maintain collected vectors for transport, in accordance with operational procedures
3 Interpret and report data gathered from vector borne disease surveillance	**3.1** Interpret surveillance data to assess the risk of vector borne disease to personnel
	3.2 Determine the risk of vector borne disease occurrence to aid environmental health planning
	3.3 Draft and present a surveillance report to relevant stakeholders
	3.4 Recommend control measures to reduce vector borne disease risks to personnel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to DEFPH004A Undertake a vector borne diseases surveillance program.

Assessment Requirements for DEFPHL004 Undertake a vector borne diseases surveillance program

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying relevant legislation, and organisational policies and procedures
- collecting research material from available relevant sources
- collecting and correctly identifying vectors
- gathering vector borne disease surveillance data
- identifying the potential prevalence of vector borne diseases in surveillance area
- identifying vector borne disease hazards, assessing risks and implementing control measures
- interpreting and reporting surveillance data
- manipulating vectors with high level of dexterity and hand–eye coordination
- prioritising tasking
- setting up and disassembling equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aetiology of disease relevant to vector borne diseases
- health surveillance system
- historical data which must include one or more of the following:
  - health intelligence reports
  - government reports on health statistics
  - scientific reports on health statistics
- operating procedures for surveillance equipment
- preservation techniques for vectors
- relevant vector borne diseases of interest to the Australian Defence Force (ADF)
- relevant vector biology
- relevant disease control measures including:
  - avoiding known areas where vectors occur

© Commonwealth of Australia, 2025 Public Skills Australia

  - education
  - impregnating clothing and bed nets with chemical protective barriers (permethrin impregnation)
  - selecting appropriate camp sites
  - sleeping under bed nets
  - using protective clothing
  - using repellents, insecticides
  - wearing long sleeves, trousers, head nets, covered footwear
- relevant documentation processes
- relevant legislation, and organisational policies and procedures
- relevant vectors including:
  - cockroaches
  - fleas
  - house flies
  - lice
  - mites
  - mosquitoes
  - phlebotomies (sandflies)
  - ticks.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry including:
  - relevant surveillance equipment
  - suitable environment/setting to collect vectors
- relevant documentation including operational procedures, regulations, codes of practice and operation manuals.

DEFPHL005 Assist with field hygiene and sanitation

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to assist with field hygiene and sanitation as a member of the Australian Defence Force (ADF).

It includes conducting a minor field hygiene survey and providing technical field hygiene advice.

This unit applies to Defence personnel required to assist with hygiene and sanitation.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform routine tasks in a range of contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Preventive Health

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Conduct a minor field	**1.1** Clarify group’s local area of responsibility to establish

© Commonwealth of Australia, 2025 Public Skills Australia

	hygiene survey		survey boundary
		1.2	Inspect proposed camp site environment, sanitary condition and general area for hygiene risks to inform site selection
		1.3	Assess location, condition and suitability of field hygiene facilities in accordance with operational procedures
		1.4	Assess positioning, type and operation of field waste facilities in accordance with operational procedures
		1.5	Assess food/water storage and handling arrangements to ensure optimum food safety and water distribution
2	**Provide technical field hygiene advice**	**2.1**	Provide advice on camp site selection to optimise field hygiene and sanitation outcomes during temporary camp emplacement
		2.2	Provide advice on field waste management to control the risk of disease in accordance with waste handling operational procedures
		2.3	Provide advice on personal hygiene facilities and practices to promote individual health and resistance to disease
		2.4	Provide advice on food/water storage and handling measures to control the risk of disease from ingested vectors of disease

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to DEFPH005A Assist with field hygiene and sanitation.

Assessment Requirements for DEFPHL005 Assist with field hygiene and sanitation

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions – one urban and one rural environment – and include:

- applying relevant legislation, regulatory standards and organisational policies and procedures
- communicating appropriately about, consulting on and imparting knowledge of field hygiene and sanitation
- gathering field hygiene data from relevant sources
- identifying hygiene risks and implementing control measures
- interpreting field hygiene data.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes of disease transmission
- control measures for disease transmission
- relevant documentation processes
- food storage and distribution standards including:
  - hazard analysis and critical control points (HACCP)
- health surveillance system
- methods of establishing field hygiene and waste facilities
- pathophysiology of common communicable diseases
- relevant legislation, regulatory standards and organisational policies and procedures
- process of disease
- risk management principles
- water quality assurance measures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of

DEFPHL006 Monitor water handling and distribution practices

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to inspect and monitor water distribution for safe water handling practice as a member of the Australian Defence Force (ADF).

It includes monitoring water distribution point, storage and equipment.

This unit applies to Defence personnel required to monitor water handling and distribution.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFPHL006 Monitor water handling and distribution practices

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying legislation, regulatory standards and organisational policies and procedures
- communicating and consulting with stakeholders
- implementing control measures of disease transmission
- implementing safe water handling practices
- implementing water quality assurance measures
- interpreting data gathered in the field against quality standards in national water quality guidelines
- recognising unsafe water or water storage containers
- researching causes of disease transmission
- taking action to prevent disease and illness.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aetiology of water-borne diseases
- control measures of disease transmission
- health surveillance system
- relevant legislation, standards, and organisational policies and procedures
- risk management principles
- safe water handling practices and guidelines.

Assessment Conditions

DEFPHL007 Conduct chlorine dosing of water at the point of supply

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to conduct chlorine dosing of water at the point of supply as a member of the Australian Defence Force (ADF).

It includes preparing, conducting and monitoring chlorine dosing and performance at the point of supply to ensure chlorine disinfection residue levels meet the minimum standard for Australian drinking water guidelines (ADWG).

This unit applies to personnel working in ADF preventive medicine.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work under supervision and perform specific tasks in familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFPHL007 Conduct chlorine dosing of water at the point of supply

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions – in an urban or field setting – and include:

- applying Australian drinking water guidelines (ADWG)
- applying relevant legislation, and organisational policies and procedures
- calculating chlorine dosing levels accurately
- identifying and responding to dosing faults
- identifying hazards, assessing risks and implementing control measures
- interpreting data gathered in the field against quality standards
- liaising and communicating with persons in positions of authority
- measuring chemicals accurately
- using, handling and storing chlorine in accordance with safety data sheets (SDS)/material safety data sheet (MSDS).

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- ADWG
- chlorine dosing levels per volume of water
- documentation processes relevant to own workplace
- process of disease
- relationship between chlorine, water pH and temperature as it relates to water disinfection
- relevant dangerous/hazardous goods codes including:
  - handling and storage requirements for chlorine
- relevant SDS/MSDS
- risk management principles
- water quality assurance measures.

Assessment Requirements for DEFPHL008 Coordinate environmental health operations

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying relevant legislation, and organisational policies and procedures
- communicating and consulting with relevant stakeholders
- coordinating tasking of at least two team members to achieve desired outcomes
- determining an achievable tasking plan with prioritised time requirements and resource allocation
- establishing and maintaining administrative systems
- identifying hazards, assessing risks and implementing control measures
- maintaining consistency in tasking
- managing workplace issues and problems
- modifying tasking to meet unplanned events
- reallocating resources based on tasking monitoring.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- principles of resource management/allocation
- causes of disease transmission
- control measures of disease transmission
- methods of establishing field hygiene and waste facilities
- pathophysiology of common communicable diseases
- planning and control systems
- process of disease
- relevant documentation processes
- relevant legislation, and organisational policies and procedures
- risk management principles
- role and capabilities of other health care providers including environmental health team
- tasking must include one or more of the following:

© Commonwealth of Australia, 2025 Public Skills Australia

  - applying the permethrin protection system
  - assisting in ongoing health threat assessment and health surveillance
  - collecting water samples for laboratory analysis
  - contributing to epidemiologic quick assessment of disease
  - contributing to organisational compliance with work health and safety (WHS)/occupational health and safety (OHS) and industrial hygiene policy/procedures
  - coordinating field waste management
  - implementing strategies to control the transmission of disease
  - inspecting and monitoring water distribution for safe water handling practices
  - monitoring food hygiene and preventing the transmission of disease via ingested sources
  - operating pesticide dispersal equipment
  - performing a water quality survey of an established water distribution point
  - performing chlorine dosing of water at the point of supply
- team leadership management principles.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations based on a range of notional health threats from recent and historical experience to tailor tasking
- dependent personnel
- relevant and appropriate materials, tools, equipment, stores and personal protective equipment currently used in industry
- relevant documentation including operational procedures, regulations, codes of practice and operation manuals.

DEFPHL009 Conduct a quick assessment of disease outbreak

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to conduct a quick assessment of disease outbreak as a member of the Australian Defence Force (ADF).

It includes initiating data gathering and analysing epidemiologic data from quick assessment. It also includes reporting assessment findings and implementing disease control measures.

This unit applies to personnel working in ADF preventive medicine.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Initiate data gathering for quick assessment**	**1.1**	Liaise with stakeholders to gain consent for quick assessment to occur, in accordance with operational policies
		1.2	Determine factors affecting complexity of quick assessment
		1.3	Obtain information on life cycle of disease outbreak using appropriate data collection methods in accordance with operational procedures
		1.4	Task and provide guidance to persons assisting with quick assessment to enable them to assist independently
		1.5	Conduct environmental measurements and testing to support quick assessment
2	**Analyse epidemiologic data**	**2.1**	Construct a chronology of events to identify initial causative incident
		2.2	Analyse causative incident/s to identify nature of disease causing outbreak, in accordance with operational procedures
		2.3	Analyse epidemiologic data to identify disease spread and to classify disease outbreak proportions
		2.4	Compare factors relating to disease outbreak to treatment information and organisation's response to the disease outbreak in accordance with operational procedures
		2.5	Contact relevant specialist authorities to seek expert advice to aid with assessment of disease, as required
3	**Report assessment findings and implement disease control measures**	**3.1**	Gain relevant stakeholder approval for assessment findings
		3.2	Identify relevant control measures that specifically address factors relating to disease outbreak in accordance with operational procedures
		3.3	Record and communicate assessment findings and control measures with relevant stakeholders
		3.4	Conduct a control measure lesson learned activity to support wider environmental health support plan

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for DEFPHL009 Conduct a quick assessment of disease outbreak

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- analysing information
- applying legislation, and organisational policies and procedures
- communicating and consulting with relevant stakeholders
- coordinating activities of persons assisting with quick assessment
- establishing and maintaining administrative systems
- identifying hazards, assessing risks and implementing control measures
- making accurate assessments about the nature of disease causing the outbreak
- prioritising tasking
- using data collection methodology.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes of disease transmission
- control measures of disease transmission
- epidemiology of disease
- food safety standards including:
  - hazard analysis and critical control points (HACCP) approach to food control
  - food storage and distribution standards
- health surveillance system
- pathophysiology of common communicable diseases
- planning and control systems
- process of disease
- relevant legislation, and organisational policies and procedures
- role and capabilities of other health care providers including environmental health team
- water quality assurance measures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations of outbreak of disease
- relevant and appropriate supporting information, materials, tools, equipment and personal protective equipment currently used in industry including:
  - equipment to perform environmental measurement and testing
- relevant documentation including operational procedures, regulations, codes of practice and operation manuals.

DEFPHL010 Conduct a field hygiene survey

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to conduct a field hygiene survey as a member of the Australian Defence Force (ADF).

It includes determining requirements, and performing and reporting on findings of field hygiene survey.

This unit applies to personnel working in ADF preventive health.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Preventive Health

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Determine field hygiene survey requirements**	**1.1** Liaise with relevant stakeholders to gain support for survey activities
		1.2 Determine survey scope in accordance with operational requirements and procedures
		1.3 Clarify local area of responsibility to establish survey area and relevant boundaries
		1.4 Identify, source and evaluate current data for survey requirements to establish a point of reference and comparison
		1.5 Obtain and inspect relevant equipment in accordance with manufacturer specifications and operational procedures
		1.6 Determine data collection methodology in accordance with operational requirements
2	**Perform field hygiene survey**	**2.1** Inspect general environment for its sanitary condition and areas of general hygiene risk
		2.2 Conduct initial hygiene risk assessment of building integrity and suitability for use and habitation in accordance with operational procedures
		2.3 Assess and record the presence of disease vectors, vermin and insects in accordance with hygiene survey requirements
		2.4 Assess location, condition and suitability of field hygiene and waste facilities
		2.5 Assess positioning and arrangements for food and water storage and handling facilities to optimise food/water distribution safety
		2.6 Determine recommendations and control measures based on survey results in accordance with operational requirements
3	**Report field hygiene survey findings**	**3.1** Record assessment findings in accordance with organisational procedures
		3.2 Communicate assessment findings and control measures to relevant stakeholders

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to DEFPH010A Conduct a field hygiene survey.

Assessment Requirements for DEFPHL010 Conduct a field hygiene survey

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying relevant legislation, and organisational policies and procedures
- communicating appropriately and consulting effectively with stakeholders
- conducting an initial hygiene risk assessment
- gathering field hygiene data via from available sources
- identifying hazards, assessing risks and implementing control measures – in particular in relation to field hygiene risks and actions to correct field hygiene deficiencies
- interpreting field hygiene data
- making technical judgements based on own level of knowledge and experience
- prioritising tasking.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aetiology of disease relevant to vector borne diseases
- causes of disease transmission
- control measures of disease transmission
- food safety standards including:
  - food storage and distribution standards
  - hazard analysis and critical control points (HACCP) approach to food control
- health surveillance system
- initial hygiene risk assessment including:
  - ability to withstand a storm or weather conditions
  - determining materials used in constructing the building (e.g. asbestos)
  - likelihood of collapse
  - protection from weather or flooding
  - providing appropriate access and egress

© Commonwealth of Australia, 2025 Public Skills Australia

  - suited to the purpose for which they are being used
  - ventilation
- methods of establishing field hygiene and waste facilities
- pathophysiology of common communicable diseases
- process of disease
- relevant documentation processes
- relevant legislation, and organisational policies and procedures
- relevant vector borne diseases
- risk management principles
- water quality assurance measures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Resources for assessment must include access to:

- a range of environments (urban and field), relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment, stores and personal protective equipment currently used in industry
- relevant documentation including operational procedures, regulations, codes of practice and operation manuals.

DEFPHL011 Perform environmental health planning

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to perform environmental health planning as a member of the Australian Defence Force (ADF).

It includes conducting an environmental health analysis to develop an environmental health plan.

This unit applies to preventive medicine supervisors.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently, supervise small teams and perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Preventive Health

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Conduct an	**1.1** Determine scope and context of environmental health

	environmental health analysis		support required in accordance with operational policy
		1.2	Identify and review health intelligence sources
		1.3	Conduct an environmental health threat risk assessment
		1.4	Identify environmental health tasks to mitigate each threat in accordance with operational procedures
		1.5	Determine environmental health strategies and action in accordance with scope and context of identified support
		1.6	Compare strategies with responsiveness to potential obstacles and key health threats
		1.7	Present a health analysis brief to relevant stakeholders for consultation and guidance in accordance with operational procedure
2	**Develop environmental health plan**	**2.1**	Identify environmental health stakeholders for specific tasking within the plan
		2.2	Allocate environmental health assets in accordance with agreed environmental health strategies
		2.3	Prioritise and sequence environmental health tasking in accordance with environmental health strategies
		2.4	Apply principles of health support
		2.5	Draft environmental health plan to support strategic adaptability to react effectively when environmental circumstances change unexpectedly
		2.6	Present draft plan to relevant stakeholders and personnel for approval in accordance with operational procedures
		2.7	Finalise environmental health plan that incorporates stakeholder feedback and recommendations, in accordance with plan scope and operational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for DEFPHL011 Perform environmental health planning

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation, and operational policies and procedures
- communicating effectively with all stakeholders
- enabling sustained environmental health support
- identifying key health threats, assessing risks and implementing control measures during environmental health planning
- interpreting information to support health planning
- making judgements that balance health support and operational imperatives
- managing basic projects
- managing schedule with competing interests
- minimising health threat to the organisation
- negotiating complex issues and ideas to arrive at a common understanding
- optimising the implementation of health support plans
- preparing complex verbal or written health assessments for communication to relevant stakeholders
- researching information to aid health support assessment
- solving problems.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- health support logistics and planning processes
- health support resource capabilities
- health threat analysis
- injury risk assessment and management
- organisational structure, and lines of authority and communication within the organisation
- principles of health support including:
  - enable control of health resources by technically qualified personnel best placed to employ them

© Commonwealth of Australia, 2025 Public Skills Australia

    - ensure conformity of health plan with higher operational plans
    - ensure continuity of health care between levels of treatment and between different agencies involved in treatment
    - ensure health support maintains its proximity to activity being supported
    - ensure health support maintains mobility with activity of group being supported
    - facilitate provision of initial wound surgery within three hours of being injured
    - facilitate provision of resuscitation by a medical officer within an hour of being injured
    - prevent injury and illness
    - provide immediate first aid to an injured person
    - maintain flexibility to adapt health plan to changing circumstances of Australian Defence Force (ADF) operations
- relevant legislation, and organisational policies and procedures
- relevant organisational standing and routine orders
- structure and function of ADF health services
- theory of health support
- vectors of disease.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations including:
    - actual situation or scenario requiring environmental health planning, with all supporting information
    - welldeveloped health intelligence
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- relevant documentation including operational procedures, regulations, codes of practice and operation manuals.

DEFPHL012 Manage environmental health operations

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to manage environmental health operations as a member of the Australian Defence Force (ADF).

It includes issuing team tasking, supervising operations and monitoring effectiveness of environmental health support.

This unit applies to ADF preventive medicine supervisors.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work autonomously with supervisory responsibilities, and perform complex tasks in a broad range of contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Preventive Health

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Issue tasking for environmental health teams**	**1.1** Review and clarify as required in consultation with relevant personnel, environmental health support plan to fully ascertain the support required to be delivered
		1.2 Brief relevant personnel on recommendations for support requirements in the health support plan
		1.3 Determine tasking schedule considering the best use of environmental health assets, time and availability of dependent organisations
		1.4 Determine key performance indicators through consultation with relevant personnel and team leaders
		1.5 Allocate resources within tasking schedule to ensure teams are equipped to achieve objectives
		1.6 Task team leaders in accordance with health support plan and operational requirements
2	**Supervise environmental health team operations**	**2.1** Liaise with dependent organisations to set expectations about service being provided and to establish a common understanding of team performance and interaction
		2.2 Identify factors affecting delivery of environmental health support through consultation with team leaders and organisations receiving support
		2.3 Identify and implement measures to improve delivery of environmental health support across all teams
		2.4 Provide technical guidance to team leaders to ensure correct performance of environmental health measures
		2.5 Monitor utilisation of assets and adjust tasking schedule to ensure efficient use of all resources
		2.6 Maintain work records to allow reference and tracking of workflow to dependent organisations
		2.7 Compile and submit reports and returns in accordance with operational procedure
		2.8 Communicate technical environmental health advice to relevant personnel
3	**Monitor effectiveness of environmental health support**	**3.1** Liaise with team leaders and dependent organisations to gauge acceptance, reception and benefits of environmental health support

© Commonwealth of Australia, 2025 Public Skills Australia

3.2 Review information sources on environmental health performance

3.3 Monitor changes in environment to continually adapt tasking schedule to current situation

3.4 Optimise team composition, tasking schedule and asset allocation to ensure health support effectiveness

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to DEFPH012A Manage environmental health operations.

Assessment Requirements for DEFPHL012 Manage environmental health operations

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying relevant legislation, and operational policies and procedures
- coaching and mentoring to provide support to personnel
- communicating and consulting with relevant stakeholders
- confirming tasks are completed
- coordinating tasking of at least two teams, of no less than three personnel in each team
- developing a tasking schedule utilising environmental health assets
- ensuring efficient use of resources
- maintaining administrative procedures
- managing factors affecting delivery issues and problems
- mentoring team leaders to achieve team tasking and objectives
- prioritising tasking.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- food safety standards including:
  - food storage and distribution standards
  - hazard analysis and critical control points (HACCP) approach to food control
- legal rights and responsibilities
- methods of establishing field hygiene and waste facilities
- principles and techniques associated with:
  - establishing key performance indicators
  - leading people
  - making decisions
  - preparing tasking schedules and plans
  - team leadership management

© Commonwealth of Australia, 2025 Public Skills Australia

    - time management strategies to set priorities
- process of disease including the causes of disease transmission
- relevant administrative procedures
- relevant legislation, and organisational policies and procedures
- risk management principles
- role and capabilities of other health care providers including:
    - relevant environmental health personnel
- scheduling resources
- tasking must include one or more of the following:
    - applying the permethrin protection system
    - assisting in ongoing health threat assessment and health surveillance
    - collecting water samples for laboratory analysis
    - contributing to epidemiologic quick assessment of disease
    - contributing to organisational compliance with work health and safety (WHS) and industrial hygiene policy/procedure
    - coordinating field waste management
    - implementing strategies to control transmission of disease
    - inspecting and monitoring water distribution for safe water handling practices
    - monitoring food hygiene and preventing transmission of disease via ingested sources
    - operating pesticide dispersal equipment
    - performing a water quality survey of an established water distribution point
    - performing chlorine dosing of water at the point of supply.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations based on a range of operational situations from recent and historical experience to tailor tasking
- dependent personnel – team leaders and team members
- relevant and appropriate materials, tools, equipment, stores and personal protective

© Commonwealth of Australia, 2025 Public Skills Australia

equipment currently used in industry
- relevant documentation including operational procedures, regulations, codes of practice and operation manuals.

DEFPHL013 Manage a deployed capability

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to manage a deployed capability as a member of the Australian Defence Force (ADF).

It includes deployment planning, supervising deployment activities and integrating operations with other co-located capabilities, supporting the leadership of the team, and communicating instructions.

This unit applies to personnel employed in the ADF who exercise supervisory responsibility over a number of support teams while deployed on ADF activities.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work autonomously, supervise teams, and perform complex tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

outcomes.	demonstrate achievement of the element.
1 Plan and supervise pre-deployment activities	**1.1** Obtain deployment instructions and clarify as required, in accordance with organisational procedures
	1.2 Seek further information and tasking from briefings
	1.3 Review deployment instructions to plan tasking and activities to be coordinated by team leaders
	1.4 Maintain lines of communication with team leaders to ensure teams are kept informed of the developments in the situation in accordance with operational procedures
	1.5 Issue pre-deployment tasking to team leaders
	1.6 Monitor team leader deployment preparation to ensure capability members are ready for deployment
	1.7 Monitor preparation of stores and equipment to ensure they are operational and ready for deployment, in accordance with deployment plan
	1.8 Consider and cater for specialist requirements during the preparation of stores and equipment
	1.9 Monitor loading of stores and equipment for deployment in accordance with operational requirements
	1.10 Confirm final deployment instructions and communicate to team leaders to ensure all capability members are informed and ready for deployment
2 Supervise deployment activities	**2.1** Confirm deployment site and siting considerations with commander on arrival at deployment area
	2.2 Issue detailed instructions to team leaders including ground brief, detailed tasks and timings
	2.3 Monitor setting-up capability stores and equipment in accordance with operational procedures and requirements
	2.4 Identify and rectify problems with deployment or refer to commander for resolution in accordance with deployment instructions
	2.5 Establish lines of communication with co-located capabilities and other stakeholders to enable inter-operability

© Commonwealth of Australia, 2025 Public Skills Australia

		2.6	Contribute to setting-up of support facility's amenities as directed by facility commander in accordance with operational requirements
3	**Supervise the operation of a deployed capability**	**3.1**	Monitor maintenance of operational posture to ensure the operation of the capability complements the provision of services and the operational environment
		3.2	Compile and issue reports and returns to commander in accordance with organisational procedures
		3.3	Monitor maintenance of stores and equipment
		3.4	Supervise team leaders appropriate to changing priorities and situation, and differing needs and skills of individuals
4	**Supervise re-deployment activities**	**4.1**	Acknowledge and clarify re-deployment instructions in accordance with operational procedures
		4.2	Plan tasking and activities to support re-deployment instructions
		4.3	Issue re-deployment tasking to team leaders
		4.4	Monitor refurbishment of stores and equipment to ensure capability is made ready for future deployments and to identify maintenance needs between deployments
		4.5	Monitor loading of stores and equipment for re-deployment to ensure safe transportation and arrival in the new location
		4.6	Assess deployment to identify lessons learned to improve future deployments and record findings in accordance with organisational policy

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for DEFPHL013 Manage a deployed capability

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation, and operational policies and procedures
- coordinating activities of a large team to deploy and operate a capability
- ensuring capability is operational and ready for use
- establishing and maintaining administrative procedures
- establishing key performance indicators
- issuing formal and quick orders in an operational setting
- mentoring and directing team leaders
- planning and organising tasking
- preparing tasking schedules and plans.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- deployment instructions must include one or more of the following:
  - administrative guidance
  - command, control and communication guidance
  - commander’s intent/mission statement
  - execution guidelines including timings and phasing
  - situation update
- management of available resources
- orders appreciation process
- planning principles
- pre-deployment tasking must include one or more of the following:
  - arranging for transport of refrigerated items
  - arranging personal administration for deployment
  - attending briefings and orders
  - compiling freight and load documentation

© Commonwealth of Australia, 2025 Public Skills Australia

  - completing deployment documentation
  - confirming equipment serviceability and readiness
  - delivering briefings and orders
  - packing equipment for transport
  - preparing dangerous cargo for transport
- relevant administrative procedures
- relevant legislation, and operational policies and procedures
- risk management principles
- role and capabilities of other health care providers
- safe workplace practices as they relate to the operational environment
- structure, function and layout of deployed capability
- team leadership management principles
- time management strategies to set priorities.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

DEFPHL014 Investigate and control outbreak of disease

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to investigate and control disease outbreak as a member of the Australian Defence Force (ADF).

It includes gathering data and analysing that information to draw conclusions to classify the disease. It also includes identifying and determining control measures to prevent the re-occurrence of disease outbreak.

This unit applies to personnel working in ADF preventive health. This function may be performed in collaboration with other health service personnel and may be initiated and led by a medical officer.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Gather data in support of the investigation	**1.1** Gain consent for investigation from relevant personnel within affected organisation and inform them of the investigation process
	1.2 Determine and address factors affecting scope, risks and complexity of investigation to facilitate commencement of investigation activities
	1.3 Task and guide personnel assisting with the investigation to enable them to assist independently
	1.4 Analyse data gathered and confirm disease outbreak by comparison of reported cases with the usual incidence of cases experienced
	1.5 Obtain a presumptive diagnosis from medical officer to focus investigation effort where feasible
	1.6 Instigate initial control measures to limit the spread of disease and to provide early treatment to those displaying symptoms of disease, in accordance with operational procedures
	1.7 Conduct interviews with affected and non-affected personnel to identify common factors in disease outbreak including potential disease source/s
	1.8 Conduct on-site inspections of areas found to be common to those affected by the disease to gather site information to assist with the identification of disease source/s, in accordance with organisational procedures
	1.9 Analyse and assess risk from site inspection and make appropriate recommendations to assist investigation
2 Analyse data to classify the path of disease	**2.1** Collate data from relevant sources to enable comparison and analysis in accordance with organisational procedures
	2.2 Assess disease characteristics and risk factors to determine disease route and likely targets
	2.3 Determine disease attack rate to establish cumulative incidence rate of disease over the period of the outbreak
	2.4 Develop an endemic curve diagram to show the spread

© Commonwealth of Australia, 2025 Public Skills Australia

		of infection over time and to identify the likely incidents of exposure to the disease
	2.5	Identify risk factors using infection attack rate data and likely incidence of exposure
	2.6	Gather additional data based on identified risk factors and integrated into analysis
	2.7	Classify the disease source, route and target by comparing information gathered during on-site inspection with analysis findings
	2.8	Document and communicate the findings from the analysis to relevant personnel to enable appropriate notification to occur and to inform the development of disease control measures
3 Determine and implement disease control measures	**3.1**	Review compliance factors to identify systemic issues that may have contributed to the disease and which require corrective action
	3.2	Determine clean up procedures to allow facilities and/or environment connected with disease source to return to normal activity as soon as possible
	3.3	Determine disease control measures to provide immediate and long term control of disease in accordance with organisational procedures
	3.4	Determine monitoring procedures to confirm compliance with initial clean up and disease control measures
	3.5	Compile investigation findings and disease control measures into a disease outbreak report and issue to relevant personnel for review and implementation
	3.6	Debrief stakeholders on disease outbreak to clarify investigation outcomes and provide lessons learned, in accordance with organisational procedures
	3.7	Integrate disease control measures into wider environmental health support plan to apply lessons learnt for other operating areas and groups

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of

Assessment Requirements for DEFPHL014 Investigate and control outbreak of disease

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate investigation scenarios and include:

- administering questionnaires to gather information about common factors in the outbreak of disease
- applying relevant legislation, and organisational policies and procedures
- classifying the path of disease using calculated attack rates, endemic curve diagrams and assessed risk factors as the basis for analysis
- communicating clearly and concisely
- communicating professionally with members of the organisation and health services
- conducting disease investigational activities
- determining control measures applicable to the disease
- establishing and maintaining cooperative working relationships with those contacted in the course of work
- establishing and maintaining relevant administrative procedures
- gathering data using a minimum of three data collection methods
- interpreting the significance of medical, health and other data obtained from a variety of sources
- interviewing cases to determine demographic, medically relevant information and risk factor data
- leading, planning, assigning and reviewing the work of personnel assisting with the investigation
- maintaining confidentiality
- prioritising tasking.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aetiology of infectious diseases including:
  - microbiology

© Commonwealth of Australia, 2025 Public Skills Australia

- biological, ecologic and social factors that promote the spread of a disease
- chronic and communicable diseases including:
  - bioterrorism agents and their transmission
  - prevention
  - control methods
- common factors in the outbreak of disease
- control measures for disease transmission including:
  - initial control measures to limit the spread of disease
- current disease surveillance methods
- epidemiologic investigative principles, practices and procedures
- epidemiology of disease including:
  - calculating disease attack rate (biostatistical measure of frequency)
  - incidence rate of disease
  - population risk factors
- factors affecting the complexity of the disease investigation
- food safety standards including:
  - food storage and distribution standards
  - hazard analysis and critical control points (HACCP) approach to food control
- monitoring procedures
- planning and control systems
- relevant documentation processes
- relevant legislation, and organisational policies and procedures
- risk management principles and disease risk factors
- role and capabilities of other health care providers including environmental health team
- water quality assurance measures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations of disease outbreak with

© Commonwealth of Australia, 2025 Public Skills Australia

all supporting information
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry required to perform measurement, testing and on-site inspection
- relevant documentation including operational procedures, regulations, codes of practice and operation manuals.

DEFPOL001 Apply the values and principles of Defence police

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to carry out policing operations within a Defence environment.

It includes exhibiting ethical standards and dealing with ethical problems.

Persons undertaking this unit must possess and be able to apply a sound understanding of Defence and individual service ethics, values and principles. The ethical framework is particularly important under operational conditions where normal social values and norms can become clouded and obscured by operational priorities. The effectiveness of persons working in this field will be determined, in large, by their application and adherence to the ethical framework, principles and values under which they operate.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

In this situation, the person must be capable of displaying sound judgement in circumstances where professional and ethical ambiguities arise, or when there are conflicts of interest (such as the interests of service police, unit, service and/or wider community).

This work is normally undertaken while working with an associate, but also includes the ability to work individually and independently when carrying out policing operations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Exhibit ethical standards	**1.1** Apply compliance operations in accordance with individual service and wider Defence ethics, standards, organisational policy and guidelines
	1.2 Provide verbal and written advice and reports containing information that is impartial, substantiated, accurate and complete
	1.3 Use resources in accordance with Defence ethics, standards, organisational policy and guidelines
	1.4 Identify, address and document conflicts in accordance with organisational procedures
	1.5 Establish and maintain relationships with public and private organisations in accordance with ethics, standards, and guidelines
	1.6 Provide information on Defence ethical standards and values to suppliers and providers, as required
2 Deal with ethical problems	**2.1** Resolve or refer situations that pose ethical problems in accordance with Defence and individual service guidelines
	2.2 Record decision-making processes used to resolve ethical problems in accordance with Defence and individual service procedures
	2.3 Access and apply Defence and individual service policies on the prevention and reporting of unethical conduct

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

Assessment Requirements for DEFPOL001 Apply the values and principles of Defence police

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria with at least two ethical problems should be posed requiring a response or action that can be assessed and include:

- adjusting communication methods to suit relevant stakeholders
- applying objectivity/impartiality of judgement when dealing with ethical issues
- applying processes correctly for resolving or referring ethical problems, including conflict of interest
- dealing correctly with ethical problems, unethical conduct and conflicts of interest
- encouraging team members
- evaluating and assessing conflicting requirements
- exhibiting ethical standards and behaviours
- following instructions and directives
- identifying unethical conduct and conflicts of interest
- identifying, interpreting and analysing requirements relevant to values and principles of Defence police
- making ethical decisions
- participating as part of a team
- reading and applying relevant legislation, regulatory standards, and organisation plans, policies and procedures
- reading complex and formal documents such as codes of ethics and applying them to work practices.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Defence and individual service codes of ethics
- ethical problems that may need to be referred to a relevant authority rather than resolved
- fundamental ethical principles such as justice, respect for persons and responsible care
- models of ethical decisionmaking
- natural justice/procedural fairness

© Commonwealth of Australia, 2025 Public Skills Australia

- nature of ethics and ethical values
- organisational policies and procedures for reporting fraud, corruption, mal-administration, breeches of ethics and conflicts of interest
- relevant principles, standards, and organisational policy and guidelines
- resolving ethical problems must include one or more of the following:
  - accessing relevant industry standards and other information
  - withdrawing from a situation
  - using models of ethical decision-making
  - reflection, discussion, seeking clarification from others
  - reporting breaches of ethical conduct
- techniques for supporting team members
- unethical conduct
- verbal and non-verbal communication techniques.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

DEFPOL002 Conduct battlefield circulation and control operations

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to conduct a range of battlefield circulation control tasks that relate to the physical monitoring and controlling of traffic within an area of operations under a variety of environmental conditions.

It includes conducting battlefield circulation and control operations to collect information on traffic control matters and providing verbal and/or written advice to assist planners in the development of a traffic control plan.

Route reconnaissance includes identifying and clarifying required driving conditions, and undertaken by map reconnaissance and/or through physical route clearance.

This unit will involve persons operating from a staffed police post as a member of a team, but also operating individually and independently. Persons may be directly responsible for complex tasks such as establishing, maintaining and recovering signage on the route and may direct and control traffic as a ‘pointsman’ at critical points, and if required, implement contingency plans to divert traffic. These tasks may be undertaken in familiar or unfamiliar contexts.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

POLGEN019 Operate safely within a policing environment

PUAOPE013A Operate communications systems and equipment

PUAOPE014A Navigate to an incident

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Conduct a reconnaissance of a route	**1.1** Conduct map reconnaissance of a route linking a number of points to identify potential hazards that may impact on the free flow of traffic along that route
	1.2 Undertake route reconnaissance to identify, confirm or obtain more information on potential hazards that may impact on the free flow of traffic along that route
	1.3 Provide verbal and/or written report on the findings of the reconnaissance to appropriate personnel, as directed
2 Control movement along a route	**2.1** Obtain and interpret maps, overlays, reconnaissance reports, traffic control plans, movement instructions and movement plans, as required, to determine road movement information, identify traffic control tasks and identify the requirement for sign posting routes
	2.2 Prepare and implement traffic control plan including contingency actions, as required, in accordance with organisational orders and instructions
	2.3 Prepare, position, maintain and recover sign posting along a route in accordance with traffic control plan
	2.4 Control traffic using a range of specialist equipment and in accordance with organisational procedures
	2.5 Conduct speed checks, as required, in accordance with traffic control plan
	2.6 Communicate and liaise with external agencies and traffic authorities to ensure full details of the operation are available
3 Operate a police post	**3.1** Site and establish police post in accordance with traffic control plan and operational directives

© Commonwealth of Australia, 2025 Public Skills Australia

3.2 Provide movement guidance and road traffic advice to authorised persons in accordance with traffic control plan

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to DEFPO002B Conduct battlefield circulation and control operations.

Assessment Requirements for DEFPOL002 Conduct battlefield circulation and control operations

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation, regulatory standards and organisational policies and procedures
- conducting a reconnaissance of a route
- controlling movement along a route
- following instructions/directives and reporting relevant information
- identifying, interpreting and analysing requirements relevant to battlefield circulation and control operations
- navigating and map reading
- operating a police post
- participating as a team member
- performing police post duties as an individual and in a collective environment
- recording information
- using speed measuring equipment
- using traffic control signals
- writing up traffic control plan including diagrams and tables.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- camouflage and countersurveillance of police posts
- map reading and navigation
- operation of speed measuring equipment
- oral and written communication techniques
- police post tasks
- potential hazards relevant to battlefield circulation and control operations
- relevant legislation, regulatory standards and organisational policies and procedures
- road and traffic hazards and traffic control measures
- route reconnaissance
- sign posting a route

© Commonwealth of Australia, 2025 Public Skills Australia

- siting and layout of a police post
- specialist equipment suitable for conducting battlefield circulation and control operations
- team structures and roles and responsibilities of team members
- team work principles and strategies
- traffic control, traffic control tasks and traffic control movement plans
- written and verbal reconnaissance reports.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment, post kits and personal protective equipment currently used in industry
- vehicles and drivers
- a designated area where operations can be undertaken by day and night, in urban and field environments, in all types of weather and terrain, and under a variety of tactical conditions or in a simulated operational environment reflecting these conditions
- applicable documentation including organisational procedures, regulations, codes of practice and operation manuals.

Assessment must confirm the ability to effectively control traffic by ensuring that, as far as possible, all movement of personnel, vehicles and equipment is carried out in accordance with orders and instructions, movement orders and traffic control plans. This includes taking contingency actions and manually directing traffic at a convergence or choke point. Appropriate advice must also be provided on traffic flows, hazards, accidents and other delays so higher headquarters is kept informed of changes in the overall situation.

Assessment must also confirm the ability to use initiative in clearing obstructions and delays by diverting traffic around obstacles and other impediments.

DEFPSY001 Assist in the conduct of a psycho-social selection activity

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to assist in a psychosocial selection activity within the Australian Defence Force.

It includes preparing for and supporting a selection activity, and performing postselection activity administration.

This unit applies to military personnel required to prepare and assist in Defence specialist psychosocial selection activities, and to complete post-activity administration

This unit applies to persons working as psychologists in Defence but may be applicable to anyone in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work in a broad range of contexts under limited supervision and perform a broad range of tasks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

- identifying an unsafe situation and take immediate steps to maintain safety
- scoring psychometric test accurately
- setting-up relevant equipment according to a specific layout and standards

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- administrative support requirements
- equipment and material requirements
- ethical and privacy considerations in psychological testing
- legislative requirements relating to collection, storage, disposal and release of psychological information
- principles to establish an environment of trust and mutual respect
- psychosocial behavioural norms relating to friendship, leadership, stress, hostility
- psychometric test/s which must include at least one of the following:
  - aptitude tests
  - personality tests
- relevant legislation, and organisational policies and procedures, including work health and safety (WHS)/occupational health and safety (OHS)
- reporting requirements relating to observed behaviour
- role of personnel participating in a selection activity
- scoring procedures for observation activities
- selection activity specifications and support requirements

© Commonwealth of Australia, 2025 Public Skills Australia

- types of psychosocial selection activities.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate test materials, tools, equipment and psychological documents currently used in Defence
- relevant documentation including operational procedures, regulations, codes of practice and operation manuals.

DEFRNG001 Provide technical advice on ranges and training areas

Modification History

Release 2. Modifications made to Assessment Conditions.

Release 1. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFRM101B Provide technical advice on ranges and training areas.

- Unit code updated
- Content and formatting updated to comply with new standards
- All PC transitioned from passive to active voice
- Elements 2 and 3 reworded
- All PC in elements 2 and 3 revised

Application

This unit involves the skills and knowledge required to provide technical advice on ranges and training areas.

It includes the skills required to analyse issues, formulate options and provide advice.

This unit applies to Defence personnel who work in range management and range control but may be relevant to others who work in this field. Those undertaking this unit would work independently or as part of a team, under indirect supervision while performing complex tasks, in a small range of familiar contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

This unit describes the skills required to provide technical advice related to ranges and training areas.

Pre-requisite Unit

Not applicable.

Competency Field

Range

Elements and Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA	
Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Identify and analyse the issue(s)**	**1.1**	Identify and confirm issues via consultation with relevant personnel
		1.2	Observe and analyse the circumstances that require the provision of advice and interpret the issues
		1.3	Conduct research related to the issues and clarify unclear findings with relevant personnel
2	**Formulate options**	**2.1**	Identify and evaluate options related to the provision of advice
		2.2	Prioritise options and select the preferred option
3	**Provide advice**	**3.1**	Formulate advice and discuss with stakeholders
		3.2	Negotiate, incorporate and document stakeholder requirements within the proposed advice
		3.3	Provide concluding advice within the specified time and budget

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Unit Mapping Information

This unit supersedes and is equivalent to DEFRM101B Provide technical advice on ranges and training areas.

Assessment Requirements for DEFRNG001 Provide technical advice on ranges and training areas

Modification History

Release 2. Modifications made to Assessment Conditions.

Release 1. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFRM101B Provide technical advice on ranges and training areas.

- Unit code updated
- Content and formatting updated to comply with new standards
- All PC transitioned from passive to active voice
- Elements 2 and 3 reworded
- All PC in elements 2 and 3 revised

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- analysing and evaluating information
- liaising with stakeholders
- preparing and presenting reports
- providing and receiving feedback in a constructive manner
- accessing relevant workplace standards
- identifying the issues surrounding the provision of advice
- conducting research

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- analysis process
- codes of conduct and behaviour
- relevant policies and procedures in relation to training area/range standing orders and workplace standards
- information sources
- research techniques
- verbal communication techniques
- written communication to a level required in the preparation of letters and reports

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

DEFRNG005 Manage emergency operations

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFRM205B Manage emergency operations. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC added in element 1 • PC 3.1 revised • PC 3.2 and 3.3 merged • PC 5.1 and 5.2 merged and revised

Application

This unit describes the skills required to plan, prepare and manage emergency operations in a training area or a range.

This unit was developed for Defence personnel who work in range management and range control but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, while performing specific tasks, in mostly unpredictable contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

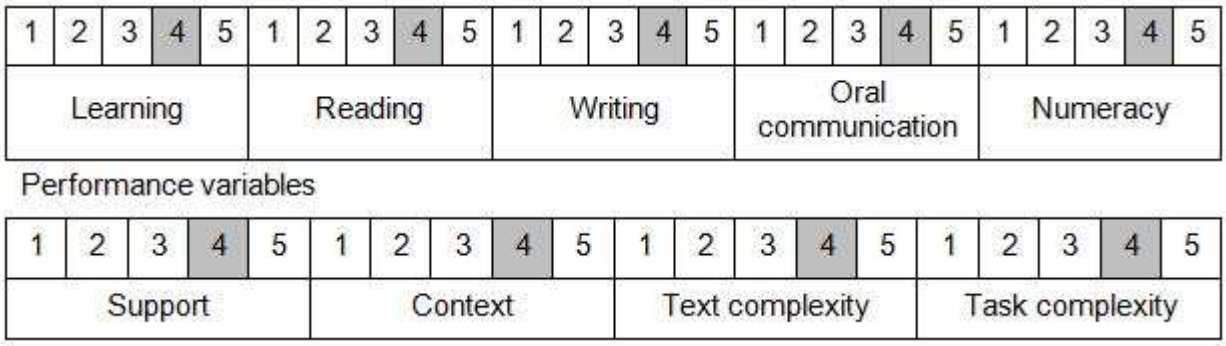
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for operations	1.1 Obtain operational information to conduct an accurate assessment of the problem. 1.2 Identify hazards. 1.3 Activate operational plans.
2. Manage an operations centre	2.1 Allocate operations centre tasks and conduct briefings. 2.2 Activate and maintain internal and external liaison networks. 2.3 Supervise operations centre staff. 2.4 Manage physical and financial resources.
3. Manage operational information	3.1 Organise operation centre staff to collect and collate information. 3.2 Manage information flow, analyse information and update plans. 3.3 Raise and distribute regular situation reports. 3.4 Establish radio and allied communication nets. 3.5 Implement and maintain message and information management systems to provide accurate operational records.
4. Make operational decisions	4.1 Identify the extent of the operational area. 4.2 Identify, assess and implement operational strategies in accordance with local emergency management arrangements and standard operating procedures. 4.3 Identify and prioritise hazards to ensure that the response is appropriate to the type and scale of the event. 4.4 Terminate the operation.
5. Manage post operation activities	5.1 Conduct post-operation debriefing and prepare operation reports. 5.2 Review training and operational planning to enhance future operations.

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFRM205B Manage emergency operations.

Assessment Requirements for DEFRNG005 Manage emergency operations

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- conducting regular briefings and debriefings
- establishing an improvised operations centre
- establishing an operational plan and adapting the plan as circumstances change
- identifying operational areas of concern
- managing communications within and between teams and organisations
- planning for emergency response, including the setting up of appropriate control and coordination structures
- raising regular situation reports
- reading and understanding organisations policies and procedures

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- communication equipment and systems
- composition of teams and roles and responsibilities of team members
- emergency plans
- local alert and warning systems
- local documentation requirements
- local operating procedures

© Commonwealth of Australia, 2025 Public Skills Australia

- local operational briefing and debriefing procedures
- locally available resources, their capabilities and access to them
- nature of local hazards and plans, including effects on the provision of communications
- principles of risk management
- relevant WHS and regulatory requirements
- team work principles and strategies
- written communication to a level required to complete workplace documentation and reports

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFRNG006 Conduct range inspections

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFRM206B Conduct range inspections. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 2.1 revised • PC 2.2 and 3.4 removed • PC 2.3 and 3.4 merged

Application

This unit describes the skills required to plan, prepare, conduct and follow up on a range inspection. It includes the requirement to ensure the safety of the range and to identify those aspects that may inhibit or jeopardise the safety of the range including maintenance requirements.

This unit was developed for Defence personnel who work in range management and range control but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under indirect supervision, while performing routine tasks, in a small range of familiar contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

Assessment Requirements for DEFRNG006 Conduct range inspections

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying environmental issues relevant to the training area
- exercising judgement in relation to range safety
- interpreting and applying range safety requirements
- interpreting range specifications and construction requirements
- interpreting range user requirements
- interpreting weapon and ammunition specifications and effects
- operating digital cameras and process images
- operating geographical information systems
- operating range communication facilities
- operating specialist measuring instruments
- performing elementary surveying tasks
- planning and preparing the conduct of the range inspection
- researching the range
- inspecting the range
- preparing and presenting relevant inspection reports

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

© Commonwealth of Australia, 2025 Public Skills Australia

- application of ammunition danger area traces and templates
- communications
- composition of teams and roles and responsibility of team members
- elementary surveying
- environmental issues relevant to the range
- geographical information systems
- map reading
- navigation techniques
- photography
- planning processes
- principles of teamwork and team aims and objectives
- range safety requirements
- range specifications and construction
- range user requirements for all services
- reporting requirements
- trigonometry
- weapon and ammunition specifications and effects

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for the location and identification of contaminants	1.1 Analyse post activity reports and other incident or activity reports for probable contamination and its location. 1.2 Identify on maps probable location(s) of contaminant(s). 1.3 Identify and acquire resources for location/marking of the contaminant. 1.4 Establish plans for searches, confirmation and marking of contaminant.
2. Confirm locality and identity of contaminants	2.1 Conduct searches for contaminant. 2.2 Identify and mark contaminant on maps, charts and documentation.
3. Isolate and determine safety parameters and/or disposal or clearance action	3.1 Evaluate options and decisions on safety measures, exclusion zones and/or disposal or clearance and action. 3.2 Identify and establish contaminant exclusion zones. 3.3 Record contaminant(s) in relevant logs. 3.4 Prioritise action. 3.5 Arrange destruction/clearances.
4. Notify users and/or authorities of contaminants	4.1 Amend briefs for training area/range to reflect status of contaminant. 4.2 Prepare and issue warnings.
5. Monitor and review training area status	5.1 Negotiate revised activity plans and bookings. 5.2 Lift, remove or provide waiver restrictions.

Foundation Skills

DEFRNG009 Supervise contractors

Modification History

Release 2. Modifications have been made to Performance Criteria and Assessment Conditions.

Release 1. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFRM209B Supervise contractors.

- Unit code updated
- Content and formatting updated to comply with new standards
- All PC transitioned from passive to active voice

Application

This unit involves the skills and knowledge required to supervise contractors on a training area or a range.

It includes the skills required to monitor contractors and contractor staff to ensure continued safety and security of training area and range activities, infrastructure and facilities.

This unit applies to Defence personnel who work in range management and range control but may be relevant to others who work in this field. They do not provide technical supervision or advice, but act as a local point of contact for works contracts and other professional/para-professional activities that may be carried out from time to time. Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, while performing complex tasks, in a small range of familiar contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
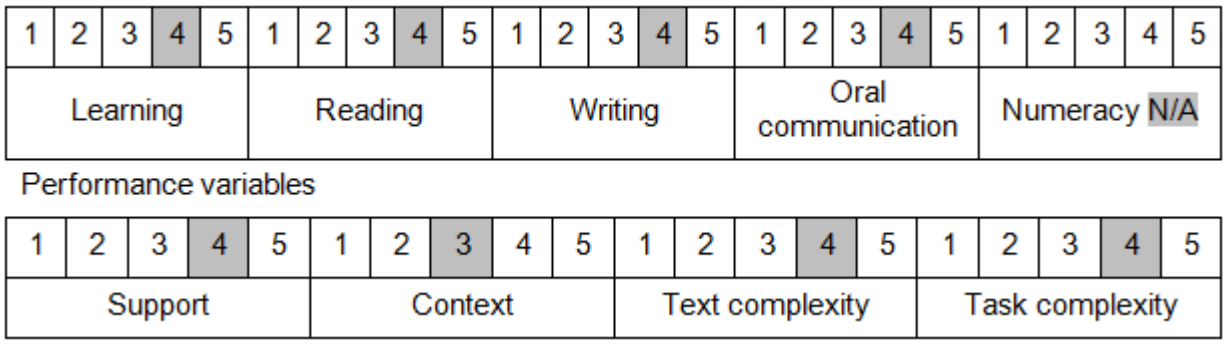
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Relate environmental plans and procedures to specific areas	1.1 Identify and agree on environmental risks with relevant personnel. 1.2 Examine environmental plans and procedures for compliance. 1.3 Select appropriate environmental plans and procedures that related to the specific areas.
2. Implement environmental plans and procedures	2.1 Identify environmental risks and impacts. 2.2 Apply emergency procedures. 2.3 Conduct activities. 2.4 Establish and maintain participation and contribution.
3. Develop project/site environmental procedures	3.1 Establish and assess the need for specific area environmental procedures in consultation with stakeholders. 3.2 Develop specific area environmental procedures. 3.3 Review and amend specific area environmental procedures.
4. Manage environmental incidents	4.1 Identify and control environmental incidents. 4.2 Apply emergency procedures. 4.3 Record and report environmental incidents.
5. Monitor and report on the applications of environmental plans and procedures	5.1 Evaluate and report the results of applied environmental plans and procedures to relevant personnel. 5.2 Report environmental risks. 5.3 Maintain and adjust environmental management documentation and inform all stakeholders.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia

ACSF levels indicative of performance:



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFRM210B Monitor and implement environmental plans and procedures.

Assessment Requirements for DEFRNG010 Monitor and implement environmental plans and procedures

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- accessing, interpreting and applying relevant legislation and standard operating procedures
- applying control procedures to environmental risks and incidents
- applying environmental plans and procedures
- developing local area environmental procedures
- identifying environmental risk and impacts
- monitoring specific activities
- reporting and recording environmental procedures
- maintaining environmental management documentation

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- consultation procedures
- control procedures for environmental risks and incidents
- electronic or manual recording procedures
- endangered species and habitat protection
- environmental impact assessment
- environmental plans and procedures

© Commonwealth of Australia, 2025 Public Skills Australia

- identification of risks and impacts
- incident management procedures
- monitoring procedures
- potential environmental auditing
- principles of environmental protection
- rare and endangered plants
- relevant legislative requirements
- reporting procedures
- risk assessment procedures
- sedimentation and erosion control

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFRNG011 Site range complexes

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFRM211B Site range complexes. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to site range complexes as a member of a Range Siting Board. It includes the processes of siting individual ranges or a group of ranges as part of a range complex ensuring the efficient utilisation of land and the safety requirements related to the use of weapons and ammunition.

This unit was developed for Defence personnel who work in range management and range control but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team under indirect supervision, while performing complex tasks, in a range of familiar contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to unit at the time of publication.

DEFRNG013 Control training area and range activities

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit describes the skills required to control activities on the training area and range (TAR), including access and activities, where coordination and compliance are required. It also covers the review and maintenance of TAR Standing Orders and raising and disseminating relevant reports.

This unit was developed for Defence personnel who work in range management and range control but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under indirect supervision, while performing complex tasks, in a range of familiar and unfamiliar contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for DEFRNG013 Control training area and range activities

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing, interpreting and applying relevant legislation and training area and range (TAR) guidance, including at least two of the following:
  - Defence policy
  - work health and safety (WHS) legislation
  - TAR Standing Orders
  - TAR operating plans
  - emergency plans
  - environmental plans
- checking ammunition safety traces and danger area templates
- evaluating compliance of and controlling TAR activities
- following instructions/directives and reporting information
- reading technical specifications, maps and diagrams
- reviewing and maintaining TAR Standing Orders.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- ammunition danger areas
- exercise instructions
- negotiation techniques
- post-activity reports
- range clearance certificates
- range danger area safety traces
- range instructions
- range practices
- standing operating instructions
- TAR Standing Orders

© Commonwealth of Australia, 2025 Public Skills Australia

- weapon systems characteristics.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- acceptable means of simulated assessment.

DEFSEA001 Assist in seamanship operations

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFBM001C Assist in seamanship operations. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • Element 3 reworded • PC 2.2 removed

Application

This unit describes the skills required to assist in a range of seamanship operations. It covers specific skills and knowledge such as general rigging and load shifting, towing, buoy attachment, berthing and slipping, equipment recovery, sea boat operations, man overboard recovery, replenishment at sea and ladder and brow deployment.

This unit would be typically implemented in a Naval Defence environment but is applicable to any individual in this field of work. Tasks are carried out on a ship in a range of conditions that would typically apply to a lengthy operation, while minimising or eliminating environmental stresses and hazards, risk to personnel, vessel and the environment, and preserving individual safety.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would generally perform routine tasks as part of a team and under indirect supervision. They would need to be prepared for a wide of range of contexts that could be unfamiliar and highly unpredictable.

Assessment Requirements for DEFSEA001 Assist in seamanship operations

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- following instructions and responding to directions as a team member
- reporting information verbally and non-verbally using a variety of communication techniques
- working by day and night

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- composition of teams, and roles and responsibilities of team members
- definitions and terms associated with seamanship operations
- uses of knots, bends, splices, whippings and hitches
- use and operation of provided communication and seamanship equipment

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFBM002C Assist in boarding operations. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • Element 5 reworded • PC 1.1, 3.2, 3.3 and 3.5 revised • PC 2.1 and 2.2; PC 4.3 and 4.4 merged • PC 2.4 removed

Application

This unit describes the skills required to board and secure a vessel and search personnel and property.

This unit would be typically implemented in a Naval Defence environment but is applicable to any individual in this field of work. Tasks are carried out on a ship in a range of conditions that would typically apply to a lengthy operation, while minimising or eliminating environmental stresses and hazards, risk to personnel, vessel and the environment, and preserving individual safety.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act in a broad range of contexts that could be highly unpredictable, under indirect supervision, as part of a team, while performing routine tasks that can involve less-familiar steps.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Maritime Operations

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to board vessel	1.1 Receive and acknowledge a pre-boarding briefing. 1.2 Identify and acknowledge vessel type and environmental factors to determine method of insertion. 1.3 Establish and acknowledge roles and responsibilities of team members. 1.4 Obtain and check dress and equipment for serviceability. 1.5 Acknowledge method of insertion. 1.6 Receive and acknowledge position of insertion point.
2. Board vessel	2.1 Conduct boarding operation using dress and equipment while taking appropriate action to protect personnel and equipment. 2.2 Maintain communication throughout the operation.
3. Secure vessel	3.1 Secure insertion point and access routes. 3.2 Clear vessel for personnel. 3.3 Gather and isolate crew. 3.4 Identify master, secure bridge and obtain applicable documents. 3.5 Assess situation and adjust or discontinue response with changing circumstances. 3.6 Identify situations requiring assistance and request support.
4. Search vessel and personnel	4.1 Establish need to undertake search of personnel and property. 4.2 Explain reason for search to vessel master and personnel involved. 4.3 Conduct search of both property and personnel. When searching personnel it must be conducted at appropriate locations and, where possible, by persons of the same gender, according to specific legislation. 4.4 Identify and record illegal cargo, personal items and activities. 4.5 Gather and record physical evidence.

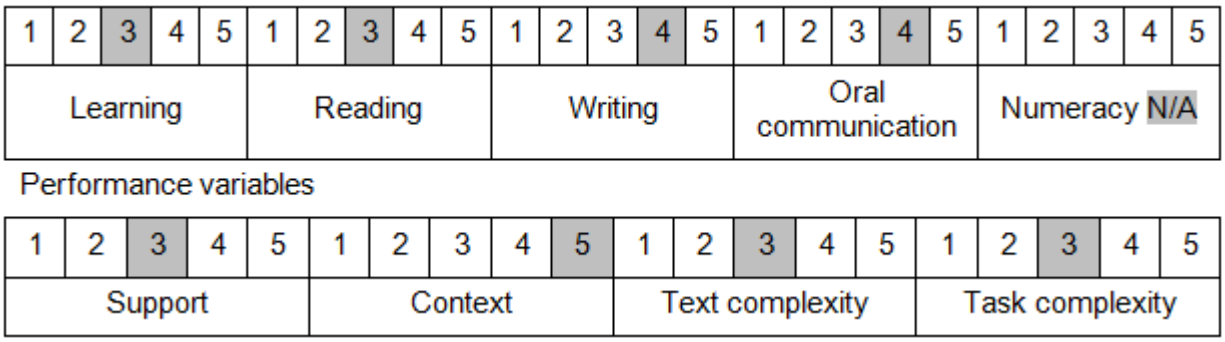
© Commonwealth of Australia, 2025 Public Skills Australia

5. Finalise boarding operations	5.1 Disembark vessel. 5.2 Maintain and stow dress and equipment. 5.3 Attend and participate in boarding debrief. 5.4 Complete post-boarding reports.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFBM002C Assist in boarding operations.

Assessment Requirements for DEFSEA002 Assist in boarding operations

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying observation and surveillance techniques
- communicating and negotiating under stressful situations
- minimising threat to self and others by use of appropriate force
- recording and reporting information accurately according to legal and international law
- using active listening skills in communication with colleagues and personnel
- responding to directions

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- composition of teams, and roles and responsibilities of team members
- differing cultural and social practices
- legislative and/or legal provisions, including provisions governing the use of force, reactive force, misuse of force, proactive force and the duty of care under criminal, civil and international law
- powers and procedures for effecting arrest
- search techniques for both persons and property
- teamwork principles and strategies

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSEA003 Control persons using non-firearms options

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFBM003C Control persons using non firearms options. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • Elements 2 and 3 merged • All PC in elements 2 & 3 revised • PC 4.1 and 4.2 merged

Application

This unit describes the skills required to select and deploy appropriate techniques and/or equipment to control persons in an operational situation.

This competency typically applies to a Naval Defence environment and was developed for boatswain's mates but is applicable to any individual in this field of work. Tasks are carried out on a ship in a range of conditions that would typically apply to a lengthy operation, while minimising or eliminating environmental stresses and hazards, risk to personnel, vessel and the environment, and preserving individual safety.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would generally perform routine tasks as part of a team and under indirect supervision. They would need to be prepared for a wide of range of contexts that could be unfamiliar and highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Maritime Operations

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Assess the need to use empty hand techniques, hand restraints and/or baton	1.1 Evaluate situation and determine most appropriate equipment and control technique. 1.2 Evaluate risk factors and determine person's intentions. 1.3 Assess capacity to complete action prior to commencement and assess viability of alternative actions. 1.4 Identify situations requiring assistance and request support.
2. Contain incident	2.1 Carry baton and hand restraints in a secure, protected and accessible position for safe deployment. 2.2 Select appropriate techniques to ensure protection of self and efficient completion of movement. 2.3 Apply appropriate techniques (empty hand, hand restraints, baton). 2.4 Assess sufficiency of response and need for support. 2.5 Adjust or discontinue response with changing circumstances. 2.6 Detain persons.
3. Evaluate response	3.1 Review, debrief and evaluate effectiveness of response by providing observations of the incident. 3.2 Maintain system, records and reporting procedures. 3.3 Recognise effects of stress on self and use stress management techniques to diffuse.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying basic problem solving strategies
- applying observation techniques
- recording and reporting information
- minimising threat to self and others by using appropriate force using force principles and defensive techniques
- managing and selecting response options within specified legal and strategic requirements
- assessing situations and readjusting or discontinuing the response as determined by unexpected changes in circumstances
- handling of batons and hand restraints to ensure retention and continued control

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- legislative and/or legal provisions governing:
  - use of force (reactive, proactive)
  - misuse of force
  - duty of care under criminal, civil and international law
- response options that are most effective for the objective, within specified legal and strategic limits

DEFSEA004 Defend persons using firearms

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFBM004C Defend persons using firearms. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.1 and 1.2 merged and PC 5.1 and 5.2 merged • All PC in element 2 revised • PC added to element 3 • PC 4.4 removed • PC 4.3 revised

Application

This unit describes the skills and evaluates the requirements to deploy firearms effectively to protect persons in an operational situation, minimising risk to self and others. This includes justifying judgements about use of firearms.

This unit was written for a Naval Defence environment but is applicable to any individual in this field of work. Tasks are carried out on a ship in a range of conditions that would typically apply to a lengthy operation, while minimising or eliminating environmental stresses and hazards, risk to personnel, vessel and the environment, and preserving individual safety.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Perform pre-operational checks	1.1 Perform firearm checks by drawing, inspecting and proofing weapon. 1.2 Issue ammunition. 1.3 Receive and acknowledge an operational brief.
2. Assess the need to use firearms	2.1 Evaluate use of firearm against Use of force guidelines, legal requirements and organisational policy and procedures. 2.2 Determine person's intentions by assessing risk factors and opportunities. 2.3 Consider capacity to complete action prior to commencement and assess viability of alternative actions.
3. Use firearms	3.1 Identify situations requiring assistance and request support. 3.2 Secure, protect and provide access to firearm carriage. 3.3 Maintain tactical positioning consistent with the assessment of person's intentions and anticipated range of possible actions. 3.4 Maintain weapons. 3.5 Justify judgements on the use of firearms. 3.6 Select ammunition. 3.7 Select protective equipment. 3.8 Discharge firearm only to stop the progress of life-threatening situations.
4. Contain incident	4.1 Adjust or discontinue response with changing circumstances. 4.2 Confirm resolution and isolation of threat by constantly monitoring person's positions and behaviour. 4.3 Detain persons.

© Commonwealth of Australia, 2025 Public Skills Australia

	4.4 Monitor and provide adequate aftercare to persons injured by firearms discharge.
5. Evaluate response	5.1 Review and evaluate effectiveness of response by providing observations of the incident. 5.2 Maintain system, records and reporting procedures. 5.3 Recognise effects of stress on self and use stress management techniques to diffuse.

DEFSEA005 Maintain weapons and associated equipment

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFBM005C Maintain weapons and associated equipment. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.2 removed • PC added in element 2

Application

This unit describes the skills required to plan and conduct operational maintenance and to store weapons and associated equipment.

This unit would be typically implemented in a Naval Defence environment but is applicable to any individual in this field of work. Tasks are carried out on a ship in a range of conditions that would typically apply to a lengthy operation, while minimising or eliminating environmental stresses and hazards, risk to personnel, vessel and the environment, and preserving individual safety.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would generally perform routine tasks as part of a team and under supervision in a routine context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for DEFSEA005 Maintain weapons and associated equipment

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- following instructions
- reporting verbally and in writing
- interpreting maintenance system, publications and documentation
- using cleaning and preservation chemicals
- maximising individual and others' safety in a way that does not impair the operational effectiveness of the unit

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- legal and Defence weapon stowage requirements

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSEA007 Assist in ship navigation

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFBM007A Assist in ship navigation. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.2 removed

Application

This unit describes the skills required to assist in ship navigation, including storing and maintaining navigational documentation and operating navigational equipment to assist the ship navigator.

This unit would be typically implemented in a Naval Defence environment but is applicable to any individual in this field of work. Tasks are carried out on a ship in a range of conditions that would typically apply to a lengthy operation, while minimising or eliminating environmental stresses and hazards, risk to personnel, vessel and the environment, and preserving individual safety.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would generally perform routine tasks as part of a team and under indirect supervision. They would need to be prepared for a wide of range of contexts that could be unfamiliar and highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for DEFSEA007 Assist in ship navigation

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- following instructions and reporting information
- using verbal and non-verbal communication techniques
- responding to directions

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- navigational principles
- relevant operational policies and procedures
- uses of provided equipment

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSEA008 Operate a chaff firing system

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFBM008A Operate a chaff firing system. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.2 removed

Application

This unit describes the skills required to operate a chaff firing system. It includes handling ammunition, and loading and unloading a chaff firing system. It also involves strict compliance with safety precautions and responding to commands from a supervisor.

This unit typically applies to a Naval Defence environment and was developed for boatswain's mates but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would generally perform routine tasks as part of a team and under indirect supervision. They would need to be prepared for a wide of range of contexts that could be unfamiliar and highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

© Commonwealth of Australia, 2025 Public Skills Australia

Competency Field

Maritime Operations

Elements and Performance Criteria

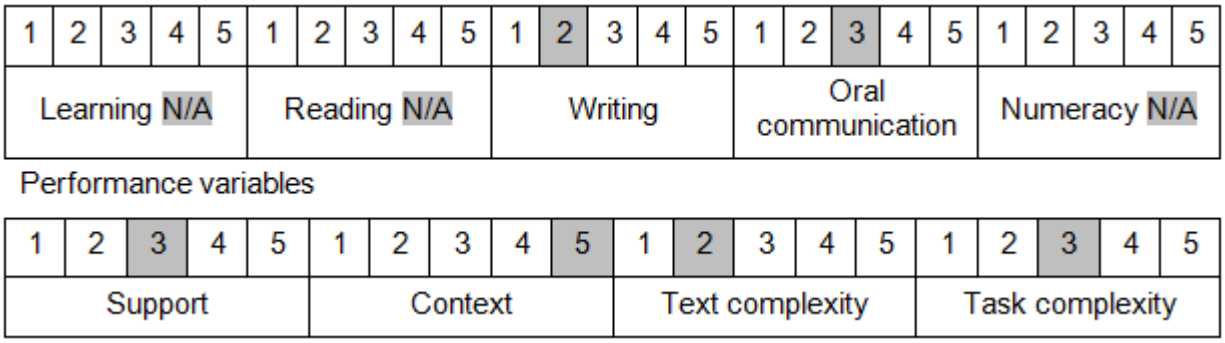
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Load and unload chaff firing system	1.1 Collect task requirements and confirm with supervisor. 1.2 Select and wear appropriate personal protective equipment. 1.3 Maintain communication with team members throughout chaff firing operations. 1.4 Conduct pre-firing checks under supervisor directions. 1.5 Identify and select ammunition. 1.6 Load and unload chaff firing system under supervisor directions. 1.7 Recognise and act on pre-firing warnings. 1.8 Respond to emergencies/incidents.
2. Secure chaff firing system	2.1 Check chaff firing system for serviceability and safety under supervisor directions. 2.2 Report faults or damage. 2.3 Clean, inspect, carry and secure ammunition.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia

ACSF levels indicative of performance:



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFBM008A Operate a chaff firing system.

DEFSEN001 Operate a radar system

Modification History

Release 2. Modifications made to Assessment Conditions.

Release 1. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFSO001C Operate a radar system.

- Unit code updated
- Content and formatting updated to comply with new standards
- All PC transitioned from passive to active voice
- PC 1.1 removed
- PC 1.4 revised
- PC 2.1 and 2.2 merged

Application

This unit describes the skills required to operate a radar system. It includes the requirement to configure the system, build and maintain the collection, and collate and analyse information to track existing contacts or identify new contacts. This activity could continue for a prolonged period, requiring the operator to hand over effectively to another operator.

This unit was developed for Sensor Operators working within Defence but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team, under supervision, while performing routine tasks in a broad range of contexts and environments. They use discretion and judgement and take responsibility for the quality of their output.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Sensor Operations

© Commonwealth of Australia, 2025 Public Skills Australia

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Configure radar system	**1.1** Confirm serviceability of radar system, recognise and report any fault
	1.2 Optimise radar display for operator use
	1.3 Optimise system in line with the environmental conditions
	1.4 Establish internal and external communications
2 Compile and maintain an electronic picture	**2.1** Identify and discriminate radar contacts by collecting, collating and analysing information
	2.2 Use radar identification friend or foe (IFF) and other available sensors/sources to collect information
	2.3 Report, display and disseminate contact details to stakeholders
	2.4 Respond to threats
	2.5 Report problems or issues beyond own capability to supervisor
3 Finalise operations	**3.1** Cease radar system operation or transfer to new operator as directed by supervisor
	3.2 Secure and stow system
	3.3 Secure and stow documentation
	3.4 Report to supervisor on completion

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSO001C Operate a radar system.

Links

Assessment Requirements for DEFSEN001 Operate a radar system

Modification History

Release 2. Modifications made to Assessment Conditions.

Release 1. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFSO001C Operate a radar system.

- Unit code updated
- Content and formatting updated to comply with new standards
- All PC transitioned from passive to active voice
- PC 1.1 removed
- PC 1.4 revised
- PC 2.1 and 2.2 merged

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- conducting daily system operability tests (DSOTs)
- detecting contacts via electronic means
- optimising operations room equipment
- using correct voice procedures
- using identification procedures
- identifying, tracking and reporting contacts over a minimum of one hour
- completing a minimum eight hours of radar systems operations using a manual or automated system
- working within one’s delegated authority

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basic principles and characteristics of radar
- cryptographic materials
- environmental prediction system
- external/internal communication techniques and voice procedures
- tactical data systems

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- acceptable means of simulation assessment.

DEFSUR001 Catch aquatic animals in a survival situation

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFSU001B Catch aquatic animals in a survival situation. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to catch aquatic animals in a survival situation. This includes preparing improvised fishing resources and conducting fishing operations. The individual is not expected to be an expert fisherperson but rather to have sufficient skills and knowledge to obtain, where possible, a measure of sustenance from waterways to increase their chances of survival.

This unit was developed for Defence personnel but may be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

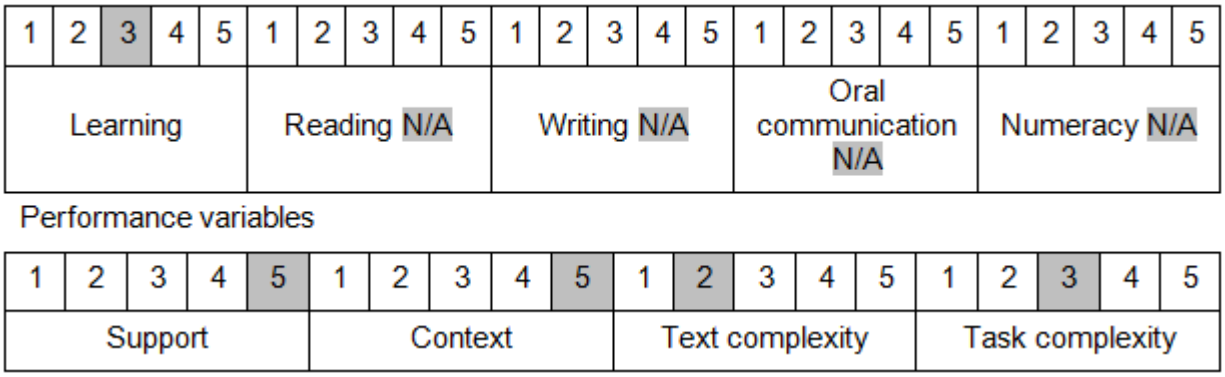
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare improvised fishing resources	1.1 Assemble improvised tackle from natural resources and basic survival resources (i.e. wire, fish hooks and fishing line). 1.2 Identify and prepare natural fish-stunning agents. 1.3 Bait tackle using locally acquired insects and animals appropriate to the type of aquatic animal being sought.
2. Conduct fishing operation	2.1 Choose location and timing of fishing operation to optimise the chances of success. 2.2 Apply basic fishing techniques to attract the desired aquatic animal to strike. 2.3 Land hooked aquatic animals. 2.4 Site and enhance tidal pools (includes making use of inlets, natural constrictions) to trap aquatic animals during tidal ranges. 2.5 Handle, dispatch, gut and fillet captured aquatic animals, and remove undesirable/poisonous animals from catch. 2.6 Examine guts to identify animals' preferred diet with the aim of targeting particular species and reinvesting offal and offcuts in ongoing fishing operations. 2.7 Implement techniques for maintaining aquatic animals in fresh condition until required for consumption.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia

ACSF levels indicative of performance:



Performance variables

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU001B Catch aquatic animals in a survival situation.

Assessment Requirements for DEFSUR001 Catch aquatic animals in a survival situation

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- siting an appropriate fishing location that optimises the chances of success
- siting and constructing a functional tidal pool of at least two square metres surface area
- maintaining a landed fish either by tethering or depositing in an enclosed pool
- recognising dangerous aquatic animals and predators

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- ciguatera poisoning signs and symptoms
- awareness of dangerous/poisonous aquatic animals and of predators

Assessment Conditions

Competency should be demonstrated over time in a range of fishing activities that could be expected in a survival situation. Competency must be assessed in a simulated workplace environment with access to a suitable assessment area, fish hooks (maximum of five) and fishing line (maximum of five metres).

Consideration must be given to holistic assessment with other survival units.

© Commonwealth of Australia, 2025 Public Skills Australia

While a person can demonstrate the ability to catch aquatic animals, doing so in a survival situation is crucial. Assessment under simulated survival conditions includes:

- food restrictions
- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR002 Construct improvised weapons and equipment in a survival situation

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFSU002B Construct improvised weapons and equipment in a survival situation. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to use traditional techniques to construct and maintain improvised weapons and equipment in a survival situation. The individual is not expected to be an expert tool maker or craftsperson, but rather to have sufficient skills and knowledge to produce functional items of equipment that will increase their chances of survival.

This unit was developed for Defence personnel but may be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

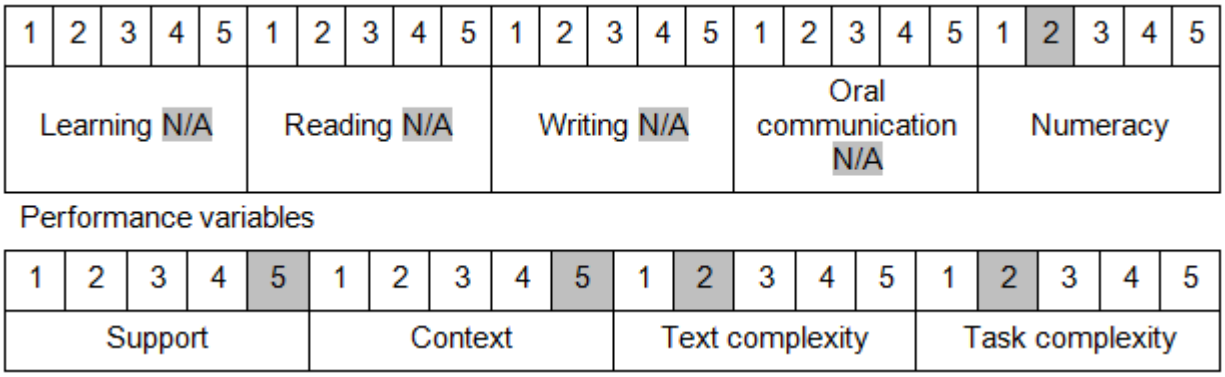
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for the construction of improvised weapons and equipment	1.1 Determine required weapons (such as bolas, boomerang, spear) and equipment (such as bed, coolamon, digging stick, rock hammer, seat, table, traps and snares) to increase chances of survival and prioritise as appropriate to the situation. 1.2 Develop a basic plan for construction, including general design, labour and resource requirements of desired items. 1.3 Gather natural resources to meet the concept of design. 1.4 Make two-ply string from fibrous material for use in binding and securing.
2. Construct improvised weapons and equipment	2.1 Use heat to shape timber (induce and/or remove bends). 2.2 Cut notches, edges and settings into timber to fit and secure additional items. 2.3 Use heat to harden timber to prevent wearing, blunting and splitting. 2.4 Use knots and lashes to secure additional items. 2.5 Add padding using grasses and barks to survival equipment. 2.6 Weave or assemble baskets using natural resources to store survival items. 2.7 Maintain and preserve weapons and equipment using improvised preservation techniques, including plant and animal oils, saps and smoking.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia

ACSF levels indicative of performance:



Performance variables

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Assessment Requirements for DEFSUR002 Construct improvised weapons and equipment in a survival situation

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- sharpening and maintaining a knife
- tying knots and lashings/seizing/whipping
- maintaining a range of survival weapons and equipment
- producing a range of items according to the survival situation, but must include:
  - either digging stick:
    - length – minimum half user's body length
    - shaft diameter – minimum 2.5 centimetres
    - plumb – not greater than seven degrees off 'true' from point to end
    - point – fire hardened sufficiently to deny fingernail from making any marking/indentation
  - or spear:
    - length – minimum three-quarters user's body length
    - shaft diameter – maximum two centimetres
    - plumb – not greater than seven degrees off 'true' from point to end
    - point – fire hardened sufficiently to deny fingernail from making any marking/indentation
  - either bed:
    - length and width – must cover user's body when flat with arms by sides
    - height – must elevate user at least ten centimetres off the ground
    - level – must be level

© Commonwealth of Australia, 2025 Public Skills Australia

    - strength – must withstand weight of user and frame must remain rigid under user's movements
    - comfort – must have sufficient padding to prevent framework from unduly discomforting user
- or seat:
    - dimensions – seat must cover user's posterior
    - height – must elevate to user's knee level off the ground
    - level – must be level
    - strength – must withstand weight of user and frame must remain rigid under user's movements
    - comfort – must have sufficient padding (including bark, grass)to prevent discomfort through pressure of framework
    - improvised cordage:
    - six metres
    - minimum two-ply lay
    - capable of supporting twenty kilograms weight
    - maximum six millimetres diameter
- basket:
    - minimum side and bottom length twenty centimetres
    - carry handle attached
    - capable of securing survival items during travel

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- knife and weapon safety
- fire safety

Assessment Conditions

Competency must be assessed in a simulated workplace environment with access to a suitable assessment area, with natural resources and a knife.

Consideration must be given to holistic assessment with other survival units.

While a person can demonstrate the ability to construct improvised weapons and equipment, doing so in a survival situation is crucial. Assessment under simulated survival conditions includes:

- food restrictions

© Commonwealth of Australia, 2025 Public Skills Australia

- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR003 Employ visual emergency signalling techniques in a survival situation

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFSU003B Employ visual emergency signalling techniques in a survival situation. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 3.3 revised

Application

This unit describes the skills required to employ visual emergency signalling techniques in a survival situation. The individual is not meant to be an expert signaller, but must demonstrate sufficient skills and knowledge to construct, maintain and employ functional emergency signalling devices to enhance their survival through the attraction of, and basic communication with, search and rescue (SAR) agencies.

This unit was developed for Defence personnel but may be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Survival

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for construction of visual emergency signals	1.1 Assess available natural and artificial resources for their application in emergency signalling. 1.2 Examine local area and identify the ground that would afford optimum visibility to searchers but minimum physical effort to the survivor. 1.3 Observe and note sun's transit to determine the optimum placement of reflective signalling devices.
2. Prepare emergency signalling devices for use	2.1 Site and construct ground-to-air emergency signals using purpose signal marker panels and/or improvised markers to optimise visibility from the air. 2.2 Site and construct tinsel/Christmas tree devices using artificial resources to optimise visibility from the air. 2.3 Site and construct an emergency signal fire to optimise visibility from the air, considering the prevailing wind's effect (if any) on smoke trails. 2.4 Site and excavate shadow trenches, considering the sun's movement. 2.5 Prepare purpose-built signalling devices.
3. Employ visual emergency signals	3.1 Initiate an emergency signal fire and utilise fuel to maximise the visual signature. 3.2 Attract search aircraft attention by employing purpose-built signalling devices. 3.3 Interpret and respond to recognition and response signals from search aircraft.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning N/A					Reading N/A					Writing					Oral communication					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU003B Employ visual emergency signalling techniques in a survival situation.

Assessment Requirements for DEFSUR003 Employ visual emergency signalling techniques in a survival situation

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- selecting combustible and ‘smoking’ materials
- constructing, igniting and maintaining a fire
- siting and building a trench symbol, visible from the air at 2000 metres may be a simulated trench if ground is too hard.
- siting and constructing a tinsel tree, visible from the air at 2000 metres
- siting, constructing and maintaining the fuel and foliage stock for the fire
- lighting the fire so that it is well ablaze within 120 seconds and then generating smoke through the application of green foliage
- interpreting and responding to recognition and response signals from search aircraft, including :
  - I require your attention
  - message received and understood
  - message received but not understood
  - follow aircraft in same direction

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- air search/ground search procedures
- aircraft recognition and response/international distress signals

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Competency should be demonstrated using a range of simulated visual emergency signalling techniques that could be expected in a survival situation with access to emergency signalling devices.

Consideration must be given to holistic assessment with other survival units.

While a person can demonstrate the ability to employ visual emergency signalling techniques, doing so in a survival situation is crucial. Assessment under simulated survival conditions includes:

- food restrictions
- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR004 Erect a survival shelter using natural resources in a survival situation

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFSU004B Erect a survival shelter using natural resources in a survival situation. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 2.2 and 2.3 revised

Application

This unit describes the skills required to erect a survival shelter in a survival situation. The individual is not expected to be an expert in building construction, but rather to have the requisite skills and knowledge to identify the elemental threats to his/her survival such as sun, wind and rain, and to establish a survival shelter to provide the necessary protection. The shelter may take advantage of established natural features or may demand stand-alone construction from natural resources. This unit assumes that manufactured resources are not available.

This unit was developed for Defence personnel but may be relevant to others

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare resources for erection of survival shelter	1.1 Identify potential threat to personal survival posed by the elements and use natural features to provide immediate protection. 1.2 Optimise survival shelter's siting for protection from the elements and to minimise hazards to the survivalist, taking advantage, where possible, of existing natural resources. 1.3 Collect resources to construct survival shelter to maximise shelter strength and protection, while minimising physical effort.
2. Construct survival shelter	2.1 Construct traditional two-ply string for use in binding and securing. 2.2 Establish survival shelter's framework, taking maximum advantage of the strength of natural junction points such as forks, by using and binding with improvised cordage. 2.3 Protect survival shelter from wind and rain, using shingling (bark sections and large leaves) and thatching (bound grass and bundled grass) for roofing and siding.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading N/A					Writing N/A					Oral communication N/A					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

© Commonwealth of Australia, 2025 Public Skills Australia

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU004B Erect a survival shelter using natural resources in a survival situation.

Assessment Requirements for DEFSUR004 Erect a survival shelter using natural resources in a survival situation

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- tying knots and lashes
- constructing at least two shelters capable of withstanding a vertical or horizontal loading to the framework of 300N; that repels all water when twenty litres is poured along the top/leading edge of the structure to simulate rain; whose tiling and thatching remains adhered to the shelter under wind conditions of Beaufort scale 4 (11–16 knots)
- using and binding with improvised cordage including at least one of
  - animal skins/gut
  - bark strips
  - reeds and grasses
  - traditional two-ply string

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- priorities of survival
- threats to survival from elements

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Competency must be assessed in a simulated workplace environment, including access to an appropriate remote survival area that has suitable natural resources and natural features; and a knife.

Consideration must be given to holistic assessment with other survival units.

While a person can demonstrate the technical ability to construct and maintain a shelter, doing so in a survival situation is crucial. Assessment under simulated survival conditions includes:

- food restrictions
- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR005 Maintain physical and emotional health and fitness in a survival environment

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFSU005B Maintain physical and emotional health and fitness in a survival environment. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to demonstrate the personal qualities of resilience and resoluteness under the hardships that must be endured to survive at the individual level, as well as the interpersonal skills to optimise the survival opportunities of the team. This unit also includes the discipline to ration food and water despite constant hunger and thirst, and to undertake arduous tasks despite increasing levels of fatigue and the diminishing potential of rescue. Individuals must demonstrate a robust standard of physical health and a meticulous attitude to personal safety and hygiene.

This unit was developed for Defence personnel but may be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Survival

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Maintain personal health and safety	1.1 Minimise threats of disease, distraction and discomfort. 1.2 Minimise threats posed by exposure to the sun. 1.3 Handle equipment safely to prevent cuts. 1.4 Immediately treat injuries such as cuts and burns. 1.5 Take opportunities to improve personal hygiene, including cleaning teeth, grooming, washing skin and clothes.
2. Maintain a healthy and safe environment	2.1 Treat fire with respect to prevent injury or ignition of campsite and surrounds. 2.2 Establish latrine and slaughter areas away from the camp area to prevent disease and attraction of disease carriers. 2.3 Clear camp area of rubbish and food scraps to prevent disease and attraction of disease carriers. 2.4 Maintain safe distances from potential animal dangers.
3. Optimise the chances of survival	3.1 Maintain a positive and proactive attitude towards the survival situation by constantly reinforcing the goal of rescue. 3.2 Contain personal fears and tensions and avoid allowing them to impact on others. 3.3 Provide positive and constructive input to the group to support agreement on the survival tasks and the priority and manner in which they will be conducted to maximise outcomes and minimise energy expenditure. 3.4 Accept and undertake survival tasks allocated by the team. 3.5 Consume available resources, as rationed by the team. 3.6 Identify signs of concern in others and provide reassurance accordingly to prevent deterioration of the individual and/or the group.

Assessment Requirements for DEFSUR005 Maintain physical and emotional health and fitness in a survival environment

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- maintaining personal health and fitness by cleaning and treating minor injuries
- maintaining a positive attitude

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- factors impacting on stress and personal health and fitness
- fire safety
- health and hygiene
- natural remedies provided by plant material
- safety in a survival situation

Assessment Conditions

Competency must be assessed in a simulated workplace environment (with access to a suitable assessment area), and in a team.

Consideration must be given to holistic assessment with other survival units.

© Commonwealth of Australia, 2025 Public Skills Australia

While a person can demonstrate the ability to maintain physical and emotional health and fitness, doing so in a survival situation is crucial. Assessment under simulated survival conditions includes:

- food restrictions
- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR006 Navigate using celestial aids

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFSU012 Navigate using celestial aids. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.3, 5.2 and 6.2 revised • PC 3.3 and 3.4 merged

Application

This unit describes the skills required to navigate using celestial aids, by both day and night, to a destination, within standard tolerances of accuracy, without the use of the normal range of navigation aids.

This unit was developed for military personnel required to operate in a remote, deployed operational environment, but is applicable to any individual who is required to navigate using celestial aids. Alternatively, if an approximate position is known relative to a highway, waterway or coast, where either survival or rescue is better effected, the individual will have sufficient skills and knowledge to remain on a constant bearing and estimate distance travelled.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

© Commonwealth of Australia, 2025 Public Skills Australia

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Establish cardinal points by day using the sun	1.1 Construct a sun compass in an open and level area to record complete movement of the sun over a solar day. 1.2 Mark true north, associated cardinal points and the arc of the sun on the sun compass. 1.3 Mark true north and associated cardinal points using a quick shadow stick method (maximum of twenty minutes of solar transit) and making allowance for the deviation arising from early morning or late afternoon siting.
2. Establish cardinal points by night using celestial aids	2.1 Extrapolate the location of cardinal points by identifying and using celestial bodies. 2.2 Extrapolate the location of the celestial pole by identifying and using celestial bodies. 2.3 Extrapolate true south (or north) by using the celestial pole on the earth/sky horizon and by establishing a compass showing all cardinal points on the ground.
3. Employ improvised direction measuring techniques	3.1 Select appropriate direction of travel to optimise survival or rescue, after analysing the survival situation. 3.2 Construct an improvised protractor using a multi-folded sheet of paper and mark the desired angle of direction. 3.3 Use established cardinal points and directional markings on an improvised protractor to navigate towards a recognisable feature in the distance.
4. Employ improvised time measuring techniques	4.1 Estimate elapsed time by measuring the angle of a segment of the sun’s transit and applying an angle by rate calculation. 4.2 Estimate elapsed time by measuring the rotation of a celestial body around the celestial pole, and applying an angle by rate calculation.
5. Employ	5.1 Estimate distance by counting number of paces taken and

© Commonwealth of Australia, 2025 Public Skills Australia

improvised distance measuring techniques	applying a pace by length of pace calculation. 5.2 Estimate distance by travelling at constant estimated velocity walking pace of four km/h and applying a velocity by time calculation.
6. Determine overall position relative to start point and navigate back	6.1 Draw grid system using a standard scale on a sheet of paper, and mark cardinal points and start point. 6.2 Draw physical navigation movements as scaled vectors from the start point. 6.3 Aggregate individual navigation vectors to determine final position relative to the start point. 6.4 Determine return vector, including bearing and distance, to return to the start point.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning N/A					Reading N/A					Writing N/A					Oral communication N/A					Numeracy				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Assessment Requirements for DEFSUR006 Navigate using celestial aids

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying celestial bodies
- navigating
  - five kilometres within a solar day, which may be broken into legs of not less than one kilometre, but must include at least four legs, as part of a navigation circuit; on completion, navigators are to submit a vector diagram detailing their final position relative to their start point accurate to within 10% (of distance and direction)
  - five kilometres within eight hours at night, which may be broken into legs of not less than one kilometre, but must include at least four legs, as part of a navigation circuit; on completion, navigators are to submit a vector diagram detailing their final position relative to their start point accurate to within 10% (of distance and direction)
- locating cardinal points and true north
  - by day: make adjustments for the shadow arc, dependent upon the time, when using only a partial segment of a solar day (maximum twenty minute fix) to locate the cardinal points; and to indicate true north to within 10% with a sun compass, using a twenty minute fix
  - by night: implement contingency skills when there is partial cloud in the night sky; and to employ five different celestial body indication techniques to locate the cardinal points, either directly or through extrapolation via the celestial pole

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- angles (in degrees)
- basic physics (velocity/distance/time)
- cardinal points (magnetic and true)
- earth's orbit and rotation in relation to the sun and night sky, including the celestial pole phenomenon
- mathematical calculations including:
  - distance travelled:
    - velocity x time
    - pace length x number of paces
  - elapsed time:
    - rate of (apparent) movement of sun (15 degrees/hour x solar angle subtended)
    - rate of (apparent) movement of night sky around the celestial pole (15 degrees/hour x angle subtended by nominated celestial body)
    -

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations. Competency must be assessed in an area that has an unmodified landscape, with access to pen and paper.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR007 Preserve and cook foodstuffs in a survival situation

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFSU007B Preserve and cook foodstuffs in a survival situation. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to preserve and cook foodstuffs in a survival situation. This unit also covers the prudent management of food assets and implementing personal measures to minimise energy expenditure to enhance survival chances. The individual is not expected to be a camp chef, but rather to possess sufficient skills and knowledge to obtain, where possible, a measure of sustenance from the environment through cooking, or preserving for longer-term consumption.

This unit was developed for Defence personnel but may be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

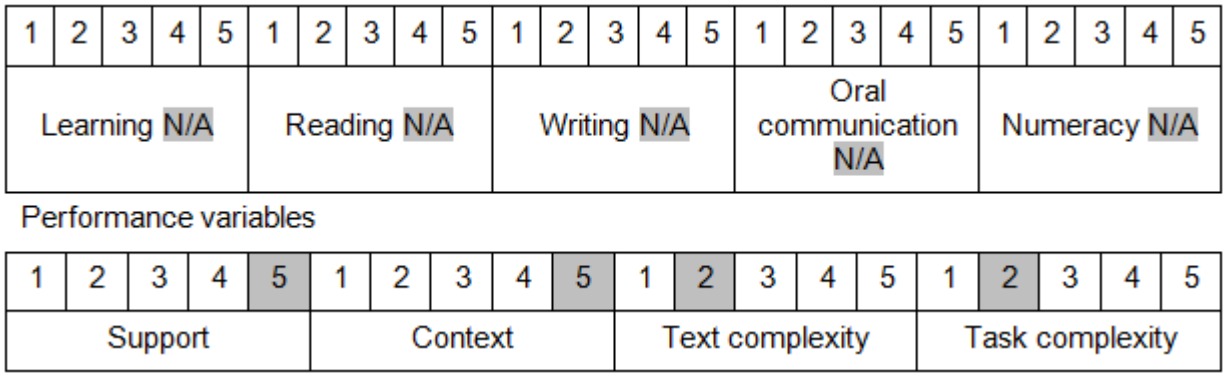
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Preserve and cook flora and fauna	1.1 Apply testing procedures to unknown flora to identify their fitness for consumption. 1.2 Remove harmful components of animal and vegetable foodstuffs. 1.3 Use improvised cooking techniques to prepare animal and vegetable foodstuffs for consumption to reduce the chances of acquiring parasites and germs. 1.4 Use improvised preserving techniques to preserve animal and vegetable foodstuffs to allow long-term storage without any harmful organisms spoiling the foodstuff.
2. Manage food resources	2.1 Implement energy management techniques to minimise unnecessary wastage. 2.2 Ration foodstuffs in accordance with survival requirements.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia

ACSF levels indicative of performance:



Performance variables

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU007B Preserve and cook foodstuffs in a survival situation.

Assessment Requirements for DEFSUR007 Preserve and cook foodstuffs in a survival situation

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- using improvised cooking techniques for at least one animal and at least one vegetable foodstuff by two of the following methods on different meal occasions:
  - roasting
  - earth oven
  - boiling
  - grilling/frying
- applying safety principles to ensure potential parasites and other organisms are destroyed by cooking, without destroying the foodstuff by burning or overcooking
- preserving foodstuff for at least one animal and at least one vegetable foodstuff quantity sufficient for at least two separate survival meals by two of the following methods:
  - drying
  - smoking
  - salting
- using curing techniques, making sure that maggot or bacterial infestation does not spoil the foodstuff (the preserved foodstuff should not suffer deterioration for two days [minimum] after curing, and must then be consumed by the survivor as part of their survival diet)

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- fire safety
- food testing procedures
- recognition of edible plants

Assessment Conditions

Competency must be assessed in a simulated workplace environment and demonstrated at least once in the test procedure for unknown flora and, as detailed, over a range of occasions for cooking and preserving that could be expected in a survival situation.

Consideration must be given to holistic assessment with other survival units.

While a person can demonstrate the technical ability to cook and preserve foodstuffs, doing so in a survival situation is crucial. Assessment under simulated survival conditions includes:

- food restrictions
- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR008 Produce fire using improvised means in a survival situation

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFSU008B Produce fire using improvised means in a survival situation. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 2.1 revised

Application

This unit describes the skills required to initiate and maintain fire in a survival situation. Fire is one of the most critical survival resources because of the range of applications, from preventing hypothermia and sterilising water to initiating rescue signals. The individual is expected to produce fire from improvised means (which may include traditional means if there are no alternatives).

This unit was developed for Defence personnel but may be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

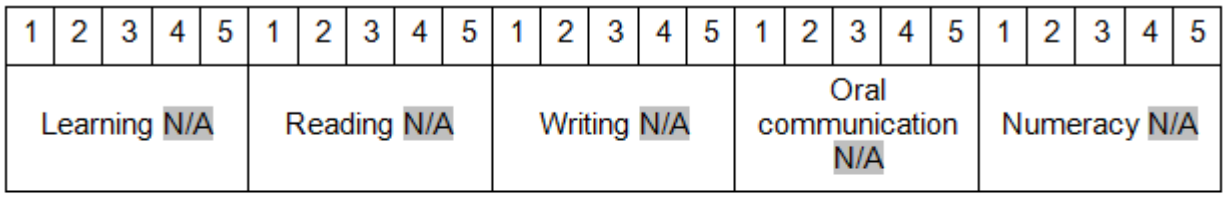
Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for fire starting	1.1 Collect, dry and protect tinder. 1.2 Collect, prepare and store kindling. 1.3 Collect, prepare and store fuel (branches, logs) in a dry location.
2. Start and maintain fire	2.1 Site and prepare a fire-safe area, minimising threat to survivor effects and equipment and preventing escape of the fire into surrounding vegetation. 2.2 Use improvised means to start fire. 2.3 Prevent fire from extinguishing in all weather conditions.

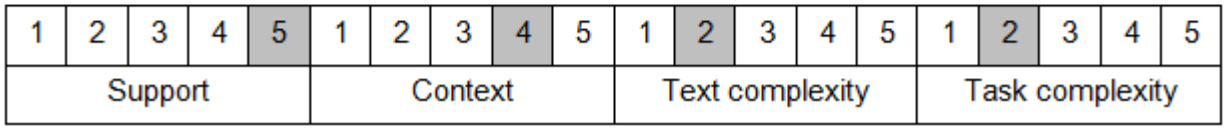
Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:



Performance variables



© Commonwealth of Australia, 2025 Public Skills Australia

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU008B Produce fire using improvised means in a survival situation.

Assessment Requirements for DEFSUR008 Produce fire using improvised means in a survival situation

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- implementing fire safety
- producing fire from traditional means and friction
- nurturing the ember into a robust flame through the careful and sequential additions of tinder, kindling and fuel
- maintaining a fire continuously regardless of weather conditions
- demonstrating due regard to the safety of persons and equipment, and the surrounding environment

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- fire safety
- hypothermia
- range of applications of fire in a survival situation

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Competency must be demonstrated once under the range of methods detailed in the establishment of fire but the maintenance of fire should be assessed over time. Competency must be assessed in a simulated workplace environment in an appropriate assessment area with access to sufficient suitable dry organic material to start fires; friction method fire-starting resources including bootlace (as bow string); and a knife. Fire should be maintained in all weather conditions including rain.

Consideration must be given to holistic assessment with other survival units.

While a person can demonstrate the technical ability to start and maintain a fire, doing so in a survival situation is crucial. Assessment under simulated survival conditions includes:

- food restrictions
- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR009 Trap and kill animals in a survival situation

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFSU009B Trap and kill animals in a survival situation. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.1, 2.6, 2.8 and 2.9 revised • PC 2.1, 2.2 and 2.3 merged

Application

This unit describes the skills required to trap and kill animals in a survival situation. The individual is not expected to be an expert trapper or butcher, but rather to have sufficient skills and knowledge to catch animals using trapping techniques, and to kill and butcher the animal including inspecting for signs of disease.

This unit was developed for Defence personnel but may be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete, tasks in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

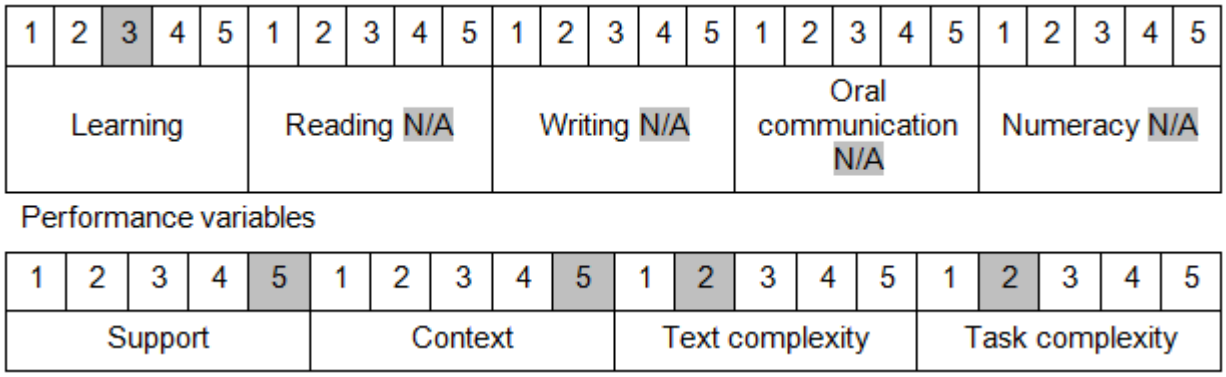
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Trap animals	1.1 Develop a capture plan including trap height, location and type, as well as means of attraction, by identifying animal signs and by interpreting drinking, eating, foraging, mating, and sleeping habits. 1.2 Acquire bait attractive to the targeted animal. 1.3 Create traps from natural resources. 1.4 Deploy and camouflage traps on likely animal travel routes. 1.5 Check traps regularly for captured animals.
2. Slaughter animals	2.1 Conduct slaughter humanely to cause minimum stress for the animal. 2.2 Skin or pluck carcass. 2.3 Hang carcass for butchering. 2.4 Butcher carcass by cutting edible portions (dressing) of meat and by removing internal organs. 2.5 Inspect offal for signs of disease. 2.6 Protect meat from the elements including flyblow, scavenging animals and the sun. 2.7 Maintain hygiene of the slaughterer. 2.8 Maintain hygiene of the carcass.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia

ACSF levels indicative of performance:



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU009B Trap and kill animals in a survival situation.

Assessment Requirements for DEFSUR009 Trap and kill animals in a survival situation

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- demonstrating safe knife-handling
- constructing, siting, setting and camouflaging the following traps:
  - simple snare – focusing on the functionality of the snare and the fixing of the aperture
  - Fig 4 – focusing on the functionality of the mechanism
  - a frame – focusing on the functionality of the mechanism
- ensuring own safety
- efficiently despatching the slaughter
- removing offal and cuts of meat without rupturing the animal’s internal organs, thereby spoiling the meat
- examining carcasses for disease and parasites

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- basic animal anatomy
- hazards associated with animals

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Competency must be demonstrated in a simulated workplace environment, with access to animals for slaughter. The candidate should have access to a knife as minimum equipment.

Consideration must be given to holistic assessment with other survival units.

While a person can demonstrate the technical ability to capture and kill animals, doing so in a survival situation is crucial. Assessment under simulated survival conditions includes:

- food restrictions
- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR010 Locate, treat and manage water in a survival situation

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFSU010B Locate, treat and manage water in a survival situation. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 2.1, 2.2 and 2.3 revised

Application

This unit describes the skills required to locate, treat (for human consumption) and manage water in a survival situation. This unit also includes extracting water directly through evaporation, transpiration and desalination; filtering techniques; and treating foul water to render it potable. Of equal importance to optimising the input of water, is minimising the expenditure of water. Individuals will need to protect and ration their water assets and to implement measures to minimise water loss to increase their chances of survival.

This unit was developed for Defence personnel but may be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

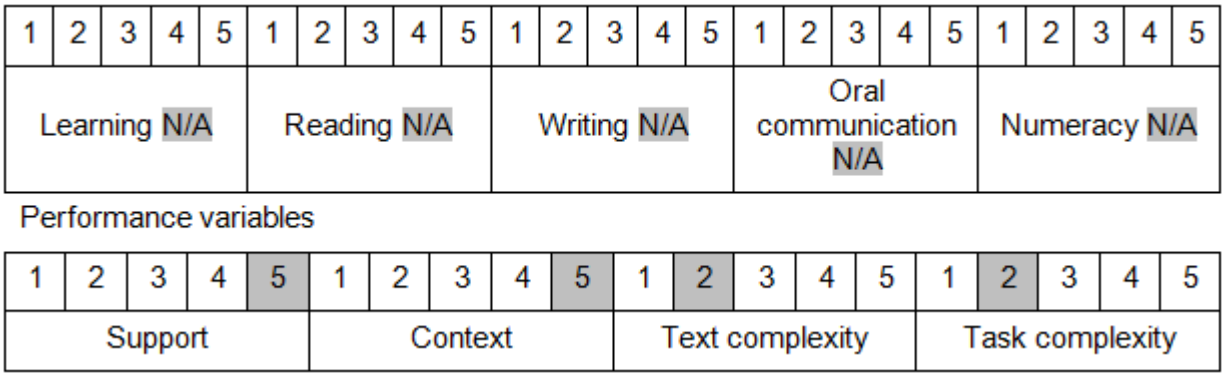
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Locate and extract water	1.1 Discover water by recognising and investigating the likely locations and the indicators of water. 1.2 Collect water during periods of rain and high atmospheric moisture content. 1.3 Extract water from the ground through evaporation. 1.4 Extract water from vegetation using transpiration.
2. Prepare water for consumption	2.1 Filter water (i.e. clarify content, remove debris and large contaminants) using improvised filtration methods. 2.2 Make water safe for drinking using improvised desalinator system, including boiler (i.e. drum), collector (i.e. bag) and condenser (i.e. tube/pipe). 2.3 Taste and smell water to confirm it is safe for drinking.
3. Manage water resources	3.1 Store water using improvised storage receptacles. 3.2 Minimise loss of water by implementing water loss reduction management techniques. 3.3 Ration water in accordance with minimum daily requirements as per the survival situation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia

ACSF levels indicative of performance:



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU010B Locate, treat and manage water in a survival situation.

Assessment Requirements for DEFSUR010 Locate, treat and manage water in a survival situation

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- assembling basic improvised equipment
- demonstrating extreme care in handling critical survival items
- extracting water through:
  - evaporation – a minimum of 20 millilitres of water in 24 hours through the use of a desert still
  - transpiration – a minimum of 200 millilitres of water in a solar day using a plastic (transpirator) bag (0.6 metres by 0.4 metres)
  - desalination – a minimum of five litres of potable water in 24 hours using the following:
    - a ten litre metal drum
    - plastic (transpirator) bag (0.6 metres by 0.4 metres)
    - pipe section (ten to twenty centimetres)

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- desalinator construction including:
  - drum
  - condensing tube
  - collecting device

© Commonwealth of Australia, 2025 Public Skills Australia

  - connections of the following to each other
  - cooling options for the condensing device
- desalinator non-compliant liquids
- transpirator non-compliant vegetation

Assessment Conditions

Competency must be assessed with access to improvised desalinator kits, the desalinator is to provide the only source of water for a minimum of two days unless safety/health reasons require additional supplementation. Competency must be demonstrated once in the evaporation and transpiration of water and competency must be demonstrated in the desalination and management of water, and minimisation of water loss, over a minimum of two days.

Consideration must be given to holistic assessment with other survival units.

While a person can demonstrate the technical ability to locate and treat water, the aspect of longer-term survival, i.e. management of water (including care of the desalinator), is crucial.

Assessment under simulated survival conditions includes:

- food restrictions
- absence of normal living conditions and amenities
- significant period of time

Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFSUR011 Survive at sea

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFSU011B Survive at sea. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice • PC 1.2 revised

Application

This unit describes the skills required to survive at sea and the immediate measures that would need to be taken upon exposure to the water, including both surface and underwater swimming, treading water, rigging improvised and purpose flotation devices, and adopting heat-loss minimisation positions. It also covers the use of purpose survival craft and equipment, including water procurement, food procurement and emergency signalling devices.

This unit was developed for Defence personnel but may be relevant to others. The context of this competency would typically be when a ship is sunk or an aircraft is downed over water. The survivor can be on their own or in a group.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

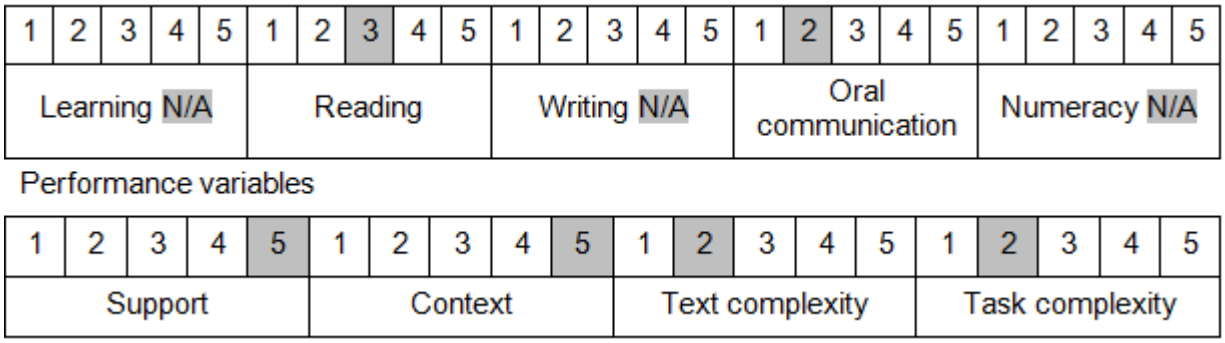
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Survive in the water	1.1 Use surface and underwater swimming techniques to escape from dangerous situations. 1.2 Enter water from a height and then surface. 1.3 Assume heat-retaining positions in the water as an individual and in a group environment. 1.4 Use improvised flotation devices to supplement buoyancy. 1.5 Fit personal flotation device (PFD) and maintain buoyancy through manual techniques.
2. Operate and maintain survival flotation craft and its resources	2.1 Deploy, inflate, right (upon inversion) and board survival flotation craft (multi-person or single-person life raft). 2.2 Escape from inside the survival flotation craft after inversion. 2.3 Rig survival flotation craft for protection from the elements and optimisation (or minimisation) of movement. 2.4 Inspect and maintain survival flotation craft throughout the survival period. 2.5 Manage survival resources. 2.6 Deploy and operate water and food procurement devices. 2.7 Operate signal equipment from the survival flotation craft. 2.8 Interpret and respond to recognition and response signals from search aircraft.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia

ACSF levels indicative of performance:



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU011B Survive at sea.

Assessment Requirements for DEFSUR011 Survive at sea

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- fitting personal floatation devices
- using duck dive technique
- swimming 30 metres in clothing
- treading water for a minimum of five minutes in clothing
- adopting the HELP for at least ten minutes
- rigging and using two different improvised flotation devices for at least five minutes each
- surviving at sea over three hours using a multi-person raft by:
  - rigging the drogue
  - rigging the canopy
  - rigging water procurement devices including solar stills and reverse osmosis machines, and producing at least 300 millilitre of water
  - bailing
  - inspecting the craft
- rigging and employing the following signalling devices from the survival craft:
  - heliograph – accurately illuminating a target at least 300 metres away
  - sea marker dye – deploying a sea marker dye effectively and safely using prevailing currents to optimise signature
  - flare – employing a signal flare effectively without threatening persons or survival equipment
- use surface and underwater swimming techniques including at least one of:
  - duck diving
  - swimming while clothed

© Commonwealth of Australia, 2025 Public Skills Australia

  - treading water in location

- Deploy and operate water and food procurement devices including at least one of:
  - reverse osmosis machine
  - solar stills
  -

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- aircraft response signals
- emergency signalling
- heat-retaining position
- improvised flotation techniques

Assessment Conditions

Competency should be demonstrated over time in a range of situations that could be expected in a survival situation.

Competency must be assessed in a simulated workplace environment, with access to a suitable sea-survival area, buoyancy devices, signalling devices and life rafts. All aspects of competence must be tested as part of an unbroken continuum from entry into the water at the individual level to the boarding and conduct aboard a survival flotation craft.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFTST001 Plan testing and evaluation processes

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFTE001A Plan testing and evaluation processes. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.3, 3.1, 3.3 and 3.4 revised • PC 4.2 and 4.3 merged

Application

This unit describes the skills required to plan a test and evaluation process which may be complex in terms of scope; degree of risk; environmental, political, cultural and social factors that apply; consequences of failure; and degree of control. It includes the requirement to identify the scope of the testing process, to determine the testing methodology and to prepare the plan.

This unit was developed for Defence test and evaluation workers, but is applicable to any individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform sophisticated tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

© Commonwealth of Australia, 2025 Public Skills Australia

Competency Field

Testing

Elements and Performance Criteria

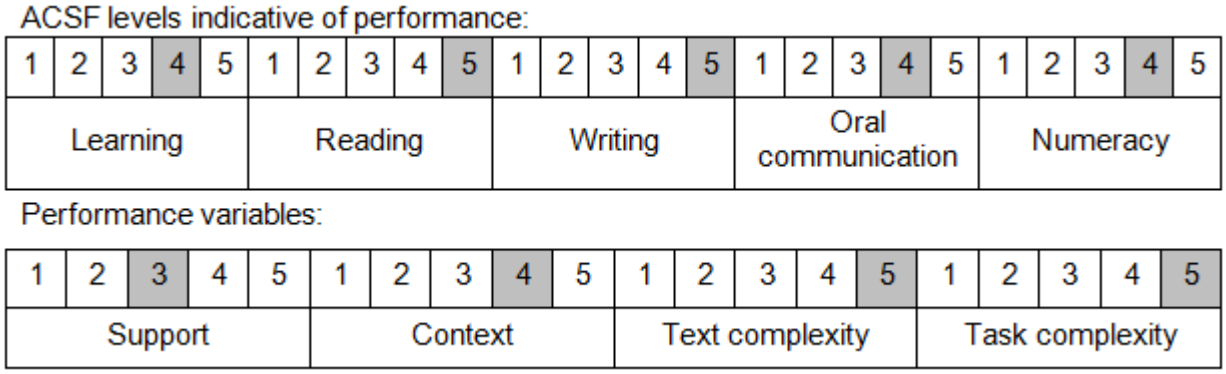
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify testing requirements and undertake scoping	1.1 Analyse the need for testing. 1.2 Undertake definition study where necessary, to determine scope of testing process. 1.3 Complete scoping, identifying rationale for the testing that includes purpose and outcomes. 1.4 Identify and canvas stakeholders to ensure that their requirements are addressed in planning.
2. Determine testing methodology	2.1 Undertake research and analysis to identify impacts and risks, constraining factors and alternate options. 2.2 Analyse methodology technical feasibility, supportability and cost effectiveness and report outcome to key stakeholders. 2.3 Assess alternatives for testing design. 2.4 Identify and report preferred option that fits organisational requirements. 2.5 Consult relevant specialists to determine extent of potential risks. 2.6 Prepare business case and obtain approvals to proceed with test development.
3. Develop test and evaluation plans	3.1 Define aims, objectives and impacts in test plan and timeframes. 3.2 Identify resources to complete quality deliverables on time and within budget. 3.3 Determine test methods by consideration of resource constraints, environmental constraints, evidence requirements, existing capabilities and their compatibility with existing procedures. 3.4 Record testing outcomes in measurable and achievable forms. 3.5 Develop indicators to monitor test performance and seek agreement by relevant parties. 3.6 Investigate potential risks and identify them in the plan. 3.7 Establish a risk management process to analyse information and options.

© Commonwealth of Australia, 2025 Public Skills Australia

	3.8 Clarify and agree on skills, roles and responsibilities of team members and stakeholders, and identify reporting requirements. 3.9 Address management of test parameters in the plan and design evaluation criteria. 3.10 Design and document planning process utilising management tools, in accordance with test and users' requirements, in consultation with specialists.
4. Finalise test plans	4.1 Maintain security and confidentiality of data. 4.2 Promulgate and maintain test plans.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFTE001A Plan testing and evaluation processes.

Assessment Requirements for DEFTST001 Plan testing and evaluation processes

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying risk management techniques
- negotiating timelines, roles and responsibilities with stakeholders and team members
- scheduling testing activities
- use planning techniques related to testing and evaluation that may be complex in terms of scope; degree of risk; environmental, political, cultural and social factors that apply; consequences of failure; degree of control
- using public relations strategies to promote and gain endorsement

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- approval processes
- integrated logistics support
- legislation, organisational policy and procedures that may impact on the test and evaluation process
- management tools suited to implementing testing processes
- organisational change management
- principles relating to the implementation phase of testing processes
- resource plans
- resource scheduling packages

© Commonwealth of Australia, 2025 Public Skills Australia

- test and evaluation implementation methods which may be complex in terms of scope; degree of risk; environmental, political, cultural and social factors that apply; consequences of failure; degree of control
- work breakdown structures (WBS)

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFTST002 Prepare testing and evaluation processes

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFTE002A Prepare testing and evaluation processes. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.6, 2.3 and 3.2 revised

Application

This unit describes the skills required to prepare for a test and evaluation process. It includes the requirement to establish the testing process, to integrate the testing processes and to develop, review and maintain the test plan.

This unit was developed for Defence test and evaluation workers, but is applicable to any individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform sophisticated tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Testing

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Establish test and evaluation processes	1.1 Confirm drivers for the test and evaluation with stakeholders. 1.2 Develop test plan in accordance with direction from Test and Evaluation Master Plan. 1.3 Determine test methods by consideration of resource constraints, environmental constraints, evidence requirements, existing capabilities and their compatibility with existing procedures. 1.4 Brief and negotiate with stakeholders to obtain endorsement for testing process. 1.5 Obtain resources. 1.6 Review and analyse scope and objectives. 1.7 Develop a strategy establishing work breakdown structures in order to implement testing process. 1.8 Identify and establish testing infrastructure. 1.9 Identify and establish safety systems and procedures. 1.10 Identify and obtain specialist and technical support relevant to the testing. 1.11 Maintain security and confidentiality of data. 1.12 Establish governance structure and processes as detailed in test plan.
2. Conduct start up activities	2.1 Refine test plans in consultation with steering committee and team members, and include precise details for schedules of activities, milestones and resources. 2.2 Establish and maintain required systems throughout the process in accordance with the complexity of the testing and in line with test plan. 2.3 Confirm team members' understanding of testing and evaluation and commitment to fulfilling the requirements. 2.4 Confirm team members' roles and responsibilities for the duration of the process. 2.5 Utilise and apply management tools to achieve outcomes.
3. Manage test and	3.1 Integrate all aspects of testing and related processes and establish

© Commonwealth of Australia, 2025 Public Skills Australia

evaluation preparedness	links to ensure objectives are met in accordance with test plan. 3.2 Establish consultation and reporting mechanisms in accordance with test plan. 3.3 Consult with staff and contractors regularly to discuss progress and to ensure effective results. 3.4 Monitor integration, and review and amend management plans and any related contracts as appropriate, with results reported in accordance with mechanisms identified in test plan. 3.5 Establish ongoing progress monitoring processes against agreed milestones in accordance with test plan, to provide a measure of performance throughout the life of the testing process. 3.6 Plan and establish programmed review of objectives and achievement in accordance with test plan.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy NA					

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFTE002A Prepare testing and evaluation processes.

Assessment Requirements for DEFTST002 Prepare testing and evaluation processes

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- using management techniques related to testing and evaluation that may be reasonably complex in terms of scope; degree of risk; environmental, political, cultural and social factors that apply; consequences of failure; degree of control
- using management tools suited to implementing testing processes
- using public relations strategies to promote and gain endorsement

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- approval processes
- change management
- cost schedule control systems
- integrated logistics support
- legislation, organisational policy and procedures that may impact on the test and evaluation process
- management tools suited to planning testing and evaluation processes
- principles relating to the planning phase of testing and evaluation processes
- resource plans
- scheduling packages

© Commonwealth of Australia, 2025 Public Skills Australia

- test and evaluation planning methods which may be reasonably complex in terms of scope; degree of risk; environmental, political, cultural and social factors that apply; consequences of failure; degree of control
- work breakdown structure (WBS)

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFTST003 Conduct testing processes

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFTE003A Conduct testing processes. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.4 & 1.5 merged • Element 1 one new PC

Application

This unit describes the skills required to conduct a testing process. It includes managing the testing process, capturing data and adhering to the test plan.

This unit was developed for Defence test and evaluation workers, but is applicable to individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform complex tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for and conduct tests	1.1 Obtain and comply with test plan. 1.2 Brief stakeholders and test participants. 1.3 Check and initiate safety systems and procedures. 1.4 Commence test and evaluation activities. 1.5 Perform qualitative and quantitative tests to observe and to measure relevant critical parameters. 1.6 Collect and record test data.
2. Monitor testing processes	2.1 Monitor and amend test plans based on changing circumstances in consultation with team members, and include precise details for schedules of activities, milestones and resources. 2.2 Monitor systems throughout the process. 2.3 Identify risks and apply the risk management process. 2.4 Apply management tools throughout the process to achieve outcomes. 2.5 Compare data with standards, charts and tables in order to meet compliance with required specification or test specific requirements. 2.6 Check initial analyses against test plan procedures when non-standard results are obtained. 2.7 Recognise and manage contingencies.
3. Finalise testing processes	3.1 Evaluate testing process, equipment performance and achievement against objectives and report initial results. 3.2 Maintain security and confidentiality of data. 3.3 Debrief stakeholders and test participants. 3.4 Forward test data for analysis. 3.5 Review and amend management plans and any related contracts as appropriate. 3.6 Conduct review of objectives and achievement and prepare outcomes for test report.

DEFTST004 Evaluate testing

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFTE004A Evaluate testing. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 3.3 and 3.4 merged • Element 1 one new PC

Application

This unit describes the skills required to evaluate the results of a testing process. It involves analysing data and solving complex problems where the information may not be obvious but can be determined by direct and logical reasoning.

This unit was developed for Defence test and evaluation workers, but is applicable to any individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform complex tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Perform scientific calculations	1.1 Ensure consistency of raw data with expectations and reasonable ranges. 1.2 Calculate scientific quantities. 1.3 Determine calculated quantities and estimations. 1.4 Present results using the appropriate units, uncertainties and number of significant figures.
2. Analyse trends and relationships in data	2.1 Determine relationships between sets of data. 2.2 Prepare and analyse data to determine if a process is in control. 2.3 Identify possible causes for out of control condition.
3. Determine variation and/or uncertainty in data distributions	3.1 Organise raw data into appropriate frequency distributions. 3.2 Calculate statistical properties for ungrouped and grouped data. 3.3 Interpret statistical properties to determine characteristics of sample or population. 3.4 Calculate standard deviations and confidence limits for means and replicates. 3.5 Determine uncertainty in measurements using statistical analysis. 3.6 Determine data acceptability using statistical tests and organisational procedures.
4. Check for aberrant results	4.1 Identify results that cannot be reconciled with documentation, testing procedures and/or expected outcomes. 4.2 Determine appropriate actions in consultation with supervisor as required.
5. Maintain results	5.1 Store, retrieve and manipulate data following document traceability procedures. 5.2 Present results in an appropriate format. 5.3 Verify entry of data and results. 5.4 Maintain security and confidentiality of data. 5.5 Prepare reports in a format and style consistent with their intended use and organisational guidelines.

Assessment Requirements for DEFTST006 Analyse test data

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- completing mathematical calculations involving fractions, decimals, ratios, proportions and percent
- evaluating mathematical formulae
- interpreting scientific properties
- preparing and interpreting graphs and data

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics of a valid measurement
- procedures for data traceability
- procedures for maintaining and filing records, security of data
- procedures for verifying data and rectifying mistakes
- relevant scientific terminology
- sources of uncertainty in measurements

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFTE007A Apply knowledge of test and evaluation processes. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to analyse and apply knowledge of test and evaluation processes. This includes the specific knowledge of test and evaluation processes required to support these areas. Applying knowledge of test and evaluation processes is specific to work undertaken by Defence personnel and may be included within a variety of areas such as management, acquisitions, audits, inspections, policy implementation, technical manual development, platform integration, configuration, staff processes, transport and inter-operability.

This unit applies to those working within Defence where knowledge of test and evaluation processes is necessary, but where the worker is not a test and evaluation practitioner.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform complex tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Testing

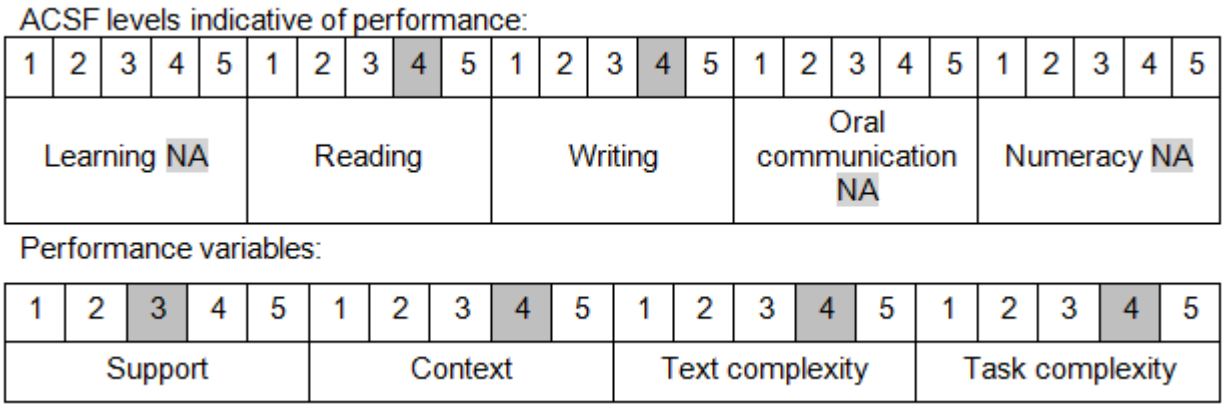
Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Access and analyse relevant test and evaluation information	1.1 Identify and obtain relevant test and evaluation process, safety, legislative and statutory requirements. 1.2 Analyse obtained information to determine relevance and application to the organisation. 1.3 Formulate outcomes of the analysis and provide recommendations relevant to workplace requirements.
2. Implement recommendations specific to test and evaluation	2.1 Apply workplace requirements relevant to test and evaluation processes. 2.2 Determine work requirements while applying relevant recommendations. 2.3 Assess, review and record effectiveness of the recommendations. 2.4 Adjust recommendations, if required, and document for future application.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFTE007A Apply knowledge of test and evaluation processes.

Assessment Requirements for DEFTST007 Apply knowledge of test and evaluation processes

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- analysing and evaluating information
- applying safety, legislative and statutory requirements relevant to test and evaluation
- interpreting organisational role relevant to test and evaluation
- applying knowledge of testing and evaluation processes to assist in work and to guide problem solving

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- organisational role relevant to test and evaluation
- safety, legislative and statutory requirements relevant to test and evaluation
- test and evaluation knowledge relevant to work being performed
- test and evaluation processes

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFVEH001 Conduct recovery vehicle operations in a field environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to undertake recovery of broken down vehicles and equipment, requiring the operation of specialist recovery vehicles and equipment.

It includes preparing for recovery vehicle tasks, dispatching the recovery vehicle to an incident site, retrieving disabled equipment and moving it to a place of repair. It also includes transporting disabled equipment and finalising recovery tasks.

This unit does not cover the extraction of disabled equipment by winching techniques, which is covered by DEFVEH002 Extract disabled equipment using winching techniques in a field environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit lead a small team to recover vehicles and equipment. Specialist recovery vehicles and equipment includes towing, lifting and winching equipment.

Persons must be capable of assessing recovery situations in remote environments and tasking personnel to complete operations in isolation from supervision or support.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Vehicle Recovery

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for recovery tasks	**1.1** Obtain and confirm orders and instructions
	1.2 Check and prepare recovery vehicle and equipment for deployment in accordance with organisational procedures
	1.3 Confirm and organise resources required for operational tasks
	1.4 Brief recovery crew about task in accordance with organisational procedures
	1.5 Report identified problems/shortfalls to appropriate personnel in accordance with organisational procedures so corrective action can occur prior to deployment
	1.6 Apply work health and safety (WHS)/occupational health and safety (OHS) requirements and recognised safety precautions throughout the operation in accordance with organisational procedures
	1.7 Identify, assess and implement environmentally sustainable work practices, as required
2 Deploy recovery equipment	**2.1** Deploy recovery vehicle to recovery site in accordance with organisational procedures
	2.2 Communicate effectively with relevant vehicle recovery activity stakeholders to ensure everyone is aware of recovery procedures
3 Recover disabled equipment	**3.1** Diagnose equipment casualty faults, where possible, to ensure efficient and cost effective recovery actions
	3.2 Assess recovery situation in accordance with organisational procedures to determine appropriate recovery method
	3.3 Assess safety risks associated with recovery task and implement control measures to ensure a safe working environment in accordance with organisational

© Commonwealth of Australia, 2025 Public Skills Australia

		procedures
	3.4	Brief on-site personnel, allocate tasks and supervise personnel in accordance with organisational procedures
	3.5	Complete recovery tasks in accordance with organisational procedures
	3.6	Respond to minor unplanned situations in accordance with organisational procedures, in a manner that minimises risk to personnel and equipment
	3.7	Report major incidents outside scope of vehicle recovery team capability to appropriate personnel
4 Transport disabled equipment	**4.1**	Secure disabled equipment to recovery vehicle in accordance with manufacturer instructions and organisational procedures
	4.2	Assess the stability and braking capability of recovery vehicle to ensure it is safe to transport disabled equipment
	4.3	Drive recovery vehicle to maintenance facility
	4.4	Manage unplanned incidents as they occur in accordance with organisational procedures
5 Finalise recovery tasks	**5.1**	Hand over equipment casualty to owner or recover further, as required
	5.2	Complete documentation, including reports and returns, in accordance with organisational procedures
	5.3	Supervise and conduct maintenance in accordance with organisational procedures
	5.4	Report faulty equipment and take corrective actions, as required
	5.5	Debrief recovery crew as required, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to DEFVH001A Conduct recovery vehicle operations in a field environment.

Assessment Requirements for DEFVEH001 Conduct recovery vehicle operations in a field environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- allocating appropriate materials and personnel to tasks
- applying relevant legislation and organisational policies and procedures
- applying safety, legislative and statutory requirements relevant to the recovery vehicle operations risk assessment
- assessing recovery situations in remote environments and tasking personnel to complete operations isolated from supervision or support
- communicating effectively in the workplace
- conducting vehicle operations taking into account the characteristics of the equipment casualty and recovery equipment when determining suitable recovery methods
- deploying recovery equipment appropriate for tasks and field environment
- directing, briefing, coordinating and monitoring personnel
- finalising recovery tasks
- identifying, interpreting and analysing risk assessment requirements relevant to recovery vehicle operations in a field environment
- interpreting instructions and directions
- operating specialist recovery vehicles and equipment
- performing a lift/tow recovery of a light and a medium/heavy rigid vehicle
- performing a trailer recovery involving a medium/heavy rigid vehicle (or equivalent)
- preparing for recovery tasks
- recovering and transporting disabled equipment
- solving task specific problems and unplanned events/incidence in accordance with organisational procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basic engineering principles including:
  - characteristics and capabilities of recovery vehicles and equipment

© Commonwealth of Australia, 2025 Public Skills Australia

  - material capabilities
  - theory of levers and pulleys
- basic vehicle mechanical principles
- common equipment casualty faults including:
  - damaged driveline
  - electrical system faults
  - engine/transmission faults
  - fuel system faults
- functions and responsibilities of team members
- maintenance requirements and procedures
- relevant minor problems, major incidents and unplanned situations risk mitigation organisational procedures
- recovery methods and procedures
- recovery vehicle and equipment specifications and capabilities
- relevant organisational policies and procedures including:
  - work health and safety (WHS)/occupational health and safety (OHS) procedures relevant to field recovery operations
- reporting requirements and procedures
- safety risk and precautions associated with recovery tasks.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in field environment operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated field environment operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- recovery vehicle, associated equipment and crew
- actual or simulated vehicle/equipment casualties
- applicable documentation including relevant organisational workplace procedures, publications, regulations, codes of practice and operation manuals.

DEFVEH002 Extract disabled equipment using winching techniques in a field environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to assess equipment and vehicles requiring recovery and to employ suitable winching techniques and procedures to extricate casualties utilising specialist recovery vehicles equipped with motorised winching equipment.

It includes operating winching equipment capable of extracting a range of vehicles and equipment that have become bogged or broken down due to terrain or environmental factors, and cannot be extracted by other means.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Typically, winching operations are conducted by persons acting independently or in charge of a small team, isolated from assistance or supervision. They exercise judgement and work within agreed safety procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Respond to call for assistance	**1.1** Obtain winching tasks and confirm details in accordance with operational requirements
	1.2 Assess tasks to determine equipment requirements
	1.3 Check and prepare recovery vehicle for task in accordance with organisational procedures
	1.4 Deploy recovery vehicle to casualty site in preparation to conduct task
2 Assess winching task	**2.1** Liaise with on-site personnel
	2.2 Assess equipment casualty to determine suitability for winching
	2.3 Inspect site, identify hazards and obstacles associated with winching, assess risks and implement control measures in accordance with organisational procedure
	2.4 Determine winching equipment requirements to extricate casualty and ensure suitable recovery vehicle and equipment for task
	2.5 Develop winching plan taking into account terrain conditions, requirements of casualty, site, recovery equipment and vehicle capabilities
	2.6 Determine and apply work health and safety (WHS)/occupational health and safety (OHS) requirements during winching operations in accordance with organisational procedures
3 Prepare for winching task	**3.1** Prepare equipment casualty for winching in accordance with winching plan
	3.2 Prepare winching equipment in accordance with winching plan
	3.3 Brief on-site personnel, allocate tasks and supervise personnel in accordance with organisational procedures
4 Extricate equipment casualty using winch	**4.1** Conduct winching process in accordance with winching plan
	4.2 Respond to minor unplanned situations in accordance with organisational procedures, in a manner that

© Commonwealth of Australia, 2025 Public Skills Australia

		minimises risk to personnel and equipment
	4.3	Seek assistance from appropriate personnel when major problems outside scope of vehicle winching team capability occur
5 Finalise winching operations	**5.1**	Hand over equipment casualty to owner or recover further as required to complete task
	5.2	Recover and inspect winching equipment for damage in accordance with organisational procedures
	5.3	Report unserviceable equipment and take appropriate actions in accordance with organisational procedures
	5.4	Maintain equipment in accordance with manufacturer instructions
	5.5	Compile documentation and make reports, as required
	5.6	Refurbish worksite in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for DEFVEH002 Extract disabled equipment using winching techniques in a field environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- allocating appropriate materials and personnel to winching task
- applying relevant organisational policies and procedures
- applying safety, legislative and statutory requirements relevant to winching risk assessment
- assessing site and winching risks and applying control measures
- assessing winching task
- briefing and supervising personnel
- communicating effectively in the workplace
- conducting a winching operation to extricate a light and a medium/heavy rigid vehicle
- conducting winching operations on ground that is soft enough to simulate the conditions encountered when winching bogged vehicles
- extricating equipment casualty using a winch
- finalising winching operations
- identifying, interpreting and analysing risk assessment requirements relevant to winching work being performed
- preparing for winching task
- providing reports and appropriate documentation
- responding to call for winching assistance
- solving problems relevant to winching task
- using motorised winches, winch ropes and associated fittings.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basic engineering principles relevant to winching including:
  - characteristics and capabilities of recovery vehicles and equipment
  - material capabilities
  - theory of levers and pulleys
- basic vehicle mechanical principles

© Commonwealth of Australia, 2025 Public Skills Australia

- hazards associated with winching
- maintenance requirements and organisational procedures
- recovery methods and winching procedures
- relevant legislation and organisational policies and procedures
- reporting requirements and procedures
- organisational work health and safety (WHS)/occupational health and safety (OHS) requirements and procedures relevant to winching operations including:
  - personal protective equipment
  - safety distances
  - safety equipment
  - warning devices
- winching equipment manufacturer specifications.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

DEFWHS001 Identify and monitor radiation hazards

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to:

- Foundation Skills
- Range of Conditions
- Assessment Conditions.

Release 1.0. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFOH003B Identify and monitor radiation hazards.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- PC 1.3 reworded
- PC 2.1 and 3.1 revised
- Element 1 one new PC.

Application

This unit involves the skills and knowledge required to identify and monitor radiation hazards.

It includes effective identification of sources of radiation, non-ionising and ionising radiations, and implementing hazard controls.

This unit applies to Defence personnel involved in identifying and monitoring radiation hazards as part of a workplace responsibility but is applicable to all individuals who work in this field. Those undertaking this unit would work independently or as part of a team, under indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform complex tasks in a range of familiar contexts.

Licensing conditions may be required for those working in this field.

Pre-requisite Unit

Not applicable.

Competency Field

Work Health and Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify workplace radiation hazards	**1.1** Identify source of radiation and/or equipment
	1.2 Identify and access existing organisational records relevant to the radiation
	1.3 Apply regulatory requirements, including those contained in organisational procedures, throughout the operation
	1.4 Take immediate action to bring source of radiation under control
	1.5 Conduct consultation with stakeholders
2 Monitor radiation abatement plans or controls	**2.1** Monitor pre-existing controls and determine controls are adequate
	2.2 Record and report breaches of protocols, plans and local controls
	2.3 Inspect monitoring equipment regularly, where installed
3 Maintain workplace radiation records/ documentation	**3.1** Maintain radiation safety management plans
	3.2 Maintain equipment/instrument deployment and maintenance records/documentation
	3.3 Maintain inventory of radiation sources
	3.4 Maintain records of radiation exposure

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit supersedes and is equivalent to DEFOH003B Identify and monitor radiation hazards.

Assessment Requirements for DEFWHS001 Identify and monitor radiation hazards

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to:

- Foundation Skills
- Range of Conditions
- Assessment Conditions.

Release 1.0. These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

- Assessment Requirements created drawing upon specified assessment information from superseded unit.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- accessing, reading, interpreting and applying radiation safety plan
- identifying radiation sources
- undertaking risk assessment and control
- observing and responding to changing circumstances and unusual situations in the workplace
- making a subjective and qualitative assessment during a walk through/survey
- identifying changes in workplace configurations
- applying knowledge of relevant WHS legislative framework
- identifying inspection tools and methods appropriate to the workplace
- applying the principles and practices of WHS inspections
- identifying intervention points for advice to assist in work and to guide problem solving.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- meaning of WHS symbols, signs and labels in the workplace
- WHS requirements relevant to radiation in the workplace
- WHS requirements for the workplace, including ways in which WHS is managed and designated personnel responsible for WHS
- organisational policy and standards relevant to radiation
- relevant Australian and international standards.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

DEFWHS003 Apply radio frequency radiation safety procedures

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to the following:

- Foundation Skills
- Range of Conditions
- Assessment Conditions.

Release 1.0. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFOH005B Apply radio frequency radiation safety procedures.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- PC 1.3 removed.

Application

This unit describes the skills required to apply appropriate safety procedures or plans related to the control or mitigation of radio frequency radiation, including microwaves, radar radio transmissions. This includes researching, consulting about and applying procedures that have been specifically developed for the organisation.

This unit was developed for Defence workers involved in application of radio frequency radiation procedures and also applies to individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

DEFWHS004 Develop radio frequency radiation safety plans

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFOH006B Develop radio frequency radiation safety plans. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.2 removed • Elements 1 and 2 merged • Element 1 one new PC

Application

This unit describes the skills required to measure and analyse radio frequency radiation, including microwaves, radar and radio transmissions, and to develop relevant safety plans and procedures. This includes developing and drafting policy, procedures and plans/instructions for the management, amelioration and/or control of radio frequency radiation in the workplace.

This unit was developed for Defence workers involved in developing radio frequency safety plans as a workplace responsibility, but is applicable to all individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform complex tasks in a range of familiar contexts.

Work Health & Safety

Elements and Performance Criteria

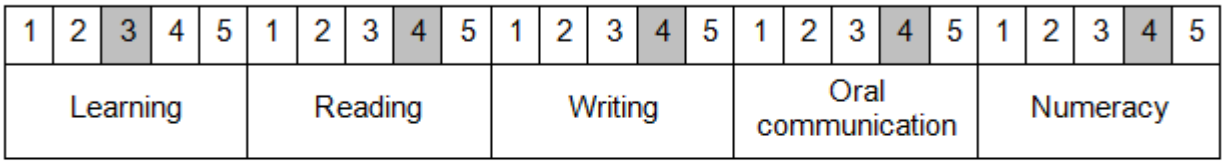
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to develop radio frequency radiation safety plans	1.1 Identify and confirm radio frequency radiation sources. 1.2 Identify and access standards and legislation appropriate to radio frequency radiation exposure levels. 1.3 Identify and access existing organisational records relevant to radio frequency radiation. 1.4 Identify, acquire and prepare equipment and resources required for the measurement of radio frequency radiation. 1.5 Measure radio frequency radiation. 1.6 Deploy measuring equipment and record readings.
2. Analyse radio frequency radiation	2.1 Interpret and confirm measurements. 2.2 Analyse and/or determine radio frequency radiation and report findings to appropriate authorities/superiors.
3. Develop radio frequency radiation safety plans	3.1 Conduct consultation with stakeholders. 3.2 Identify and interpret technical standards, organisational environmental requirements and radio frequency radiation exposure levels. 3.3 Develop radio frequency radiation safety plans and forward to the relevant authority.

Foundation Skills

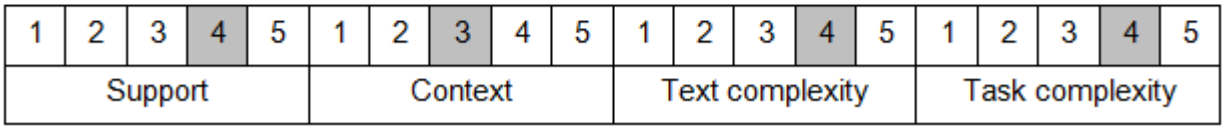
The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia

ACSF levels indicative of performance:



Performance variables:



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Range of Conditions

Relevant organisational policies and procedures include:	• Australian or international standards (particularly AS/NZS 1269.2:1998 Occupational Radio Frequency Management, Part 2: Radio Frequency control management) • manufacturer's instructions • state/territory/Commonwealth legislation

Assessment Requirements for DEFWHS004 Develop radio frequency radiation safety plans

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- operating radio frequency radiation measuring equipment
- measuring and analysing radio frequency radiation
- developing radio frequency radiation safety plans that adhere to Australian and organisational standards and recognise stakeholders requirements
- applying knowledge of relevant WHS and radio frequency radiation legislative frameworks
- identifying inspection tools and methods appropriate to the workplace
- identifying intervention points for advice to assist in work and to guide problem solving

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- environmental factors relevant to workplace radio frequency radiation
- WHS requirements for the organisation/industry and for supervisors/managers in the workplace
- radio frequency radiation control requirements
- radio frequency radiation exposure level standards/requirements
- radio frequency radiation measuring techniques and equipment
- reliability of measures

© Commonwealth of Australia, 2025 Public Skills Australia

- relevant Australian and international standards
- relevant legislation
- relevant organisational policy and standards
- tolerances of error that may apply

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFWHS005 Apply ionising radiation safety procedures

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to Foundation Skills and Assessment Conditions.

Release 1.0. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFOH007B Apply ionising radiation safety procedures.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- PC 1.3 removed.

Application

This unit involves the skills and knowledge required to apply ionising radiation safety procedures related to the control or mitigation of ionising radiation.

It includes researching, consulting and applying procedures within an organisation. In the context of this unit, ionising radiation may include emissions from radioactive material, apparatus containing radioactive material and x-ray apparatus.

This unit applies to those involved in applying ionising radiation safety procedures as a workplace responsibility but is applicable to all individuals who work in this field. Those undertaking this unit would work independently or as part of a team under, indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Work Health & Safety

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA	
Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Prepare for the application of workplace ionising radiation safety procedures/plans**	**1.1**	Identify source of ionising radiation
		1.2	Identify and access existing organisational records relevant to the radiation
		1.3	Conduct consultation with stakeholders
2	**Apply ionising radiation safety procedures/plans**	**2.1**	Apply ionising radiation protection control measures
		2.2	Ensure notices/signs are displayed
		2.3	Handle ionising radiation sources
3	**Maintain workplace ionising radiation safety documentation**	**3.1**	Maintain workplace ionising radiation records
		3.2	Maintain equipment/instrument deployment and maintenance records/documentation

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Unit Mapping Information

This unit supersedes and is equivalent to DEFOH007B Apply ionising radiation safety procedures.

Assessment Requirements for DEFWHS005 Apply ionising radiation safety procedures

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to Foundation Skills and Assessment Conditions.

Release 1.0. These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

Assessment Requirements created drawing upon specified assessment information from superseded unit.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- accessing, reading, interpreting and applying information on ionising radiation
- applying knowledge of relevant WHS and ionising radiation safety legislative frameworks
- identifying inspection tools and methods appropriate to the workplace
- applying principles and practices of WHS and ionising radiation safety in the workplace
- identifying intervention points for advice to assist in work and to guide problem solving.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- WHS requirements for workplace supervisors
- relevant Australian or international standards
- relevant organisational policy and standards.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace

© Commonwealth of Australia, 2025 Public Skills Australia

conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

DEFWHS006 Develop ionising radiation safety plans

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFOH008B Develop ionising radiation safety plans. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.2 removed • Elements 1 and 2 merged • Element 1 one new PC

Application

This unit describes the skills required to measure and analyse ionising radiation and to develop relevant safety plans and procedures. In the context of this unit, ionising radiation may include emissions from radioactive elements, controlled apparatus, sealed and unsealed sources. The unit includes developing and drafting policy, procedures and plans/instructions for the management, amelioration and/or control of ionising radiation in the workplace.

This was developed for those working in Defence involved in developing ionising radiation safety plans as a workplace responsibility, but is applicable to all individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team under, indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform complex tasks in a range of familiar contexts.

Assessment Requirements for DEFWHS006 Develop ionising radiation safety plans

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- measuring and analysing ionising radiation
- developing practical ionising safety plans that adhere to Australian and organisational standards and recognise stakeholder requirements
- monitoring and recording data from personal ionising radiation monitors
- identifying inspection tools and methods appropriate to the workplace
- identifying intervention points for advice to assist in work and to guide problem solving

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- principles and practices of WHS and ionising radiation inspections
- ionising radiation control requirements
- ionising radiation exposure level standards/requirements
- ionising radiation legislation
- ionising radiation measuring techniques and equipment
- WHS requirements for the organisation/industry and for supervisors/managers in the workplace
- relevant Australian and international standards
- relevant environmental factors relating to workplace ionising radiation
- relevant organisational policy and standards

DEFWHS007 Work safely with lasers

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to Foundation Skills and Assessment Conditions.

Release 1.0. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFOH009B Work safely with lasers.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice.

Application

This unit involves the skills and knowledge required to work safely with lasers.

It includes identifying Australian Standard class lasers, understanding potential laser hazards, and preparing appropriate laser safety controls, labels and signage.

This unit applies to identifying Australian Standard class lasers, understanding potential laser hazards, and preparing appropriate laser safety controls, labels and signage. Those undertaking this unit would work independently or as part of a team under, indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify laser safety issues	**1.1** Identify potential laser source
	1.2 Identify type of laser and its Australian Standard class
	1.3 Identify dangers/risks associated with lasers
	1.4 Apply laser safety controls
	1.5 Identify and interpret laser warning signage
2 Apply safe work practices	**2.1** Identify lasers deployed in the workplace
	2.2 Identify and interpret laser exposure situations
	2.3 Identify and apply appropriate personal protective equipment
	2.4 Identify and adhere to other control measures
3 Report on workplace laser incidents	**3.1** Apply incident reporting procedures
	3.2 Comply with health surveillance requirements, including eye testing

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for DEFWHS007 Work safely with lasers

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to Assessment Conditions.

Release 1.0. These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

Assessment Requirements created drawing upon specified assessment information from superseded unit.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- accessing, reading, interpreting and applying information on laser operations
- identifying laser sources
- identifying laser safety issues
- applying safe work practices
- monitoring and reporting on workplace incidents
- identifying inspection tools and methods appropriate to the workplace
- identifying intervention points for advice to assist in work and to guide problem solving.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- WHS requirements relevant to laser emissions in the workplace
- organisational policy and standards relevant to laser operations emissions
- principles and practices of WHS when working with lasers.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate,

DEFWHS009 Develop laser safety plans

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFOH011B Develop laser safety plans. • Unit code updated • Content and formatting updated to comply with the new standards. • All PC transitioned from passive to active voice • PC 1.5 removed

Application

This unit describes the skills required to develop laser safety plans and procedures. This includes identifying, evaluating and overseeing the control of laser hazards; developing laser safety papers and templates; providing technical advice on laser safety; developing and drafting laser safety policy, procedures and instructions; and preparing the selection of laser safety controls, labels and signage.

This unit applies to those involved in the development of laser safety plans as a workplace responsibility.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team under, indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for DEFWHS009 Develop laser safety plans

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying complex mathematical processes
- identifying relevant laser hazards
- developing procedures and plans to mitigate the hazards in the working environment
- identifying inspection tools and methods appropriate to the workplace
- identifying intervention points for advice to assist in work and to guide problem solving

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- principles and practices of work health and safety inspections
- characteristics of lasers including the types of lasers and the fundamentals of laser operation
- laser environment
- organisational policy and procedures relevant to laser operations
- relevant Australian and international standards

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFWHS010 Identify confined space

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to Foundation Skills and Assessment Conditions.

Release 1.0. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFOH012B Identify confined space.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- PC 2.1 removed.

Application

This unit involves the skills and knowledge required to identify confined space prior to entering a confined space for work purposes. In the context of this unit, a confined space is any compartment or area that has the capability of accumulating a toxic, flammable or explosive atmosphere, or of being flooded, in addition to one of the following characteristics:

- limited opening for access
- no escape route or very restricted means of escape
- limited natural ventilation
- atmosphere containing more than 23.5% or less than 19.5% oxygen

It includes recognising actual and potential confined spaces in one's work environment and understanding the broad limitations they impose on work practices. It also covers identifying potential work health and safety (WHS) concerns and seeking further advice and/or applying appropriate procedures when dealing with WHS issues.

This unit applies to Defence personnel involved in the identification of confined spaces as a workplace responsibility but is applicable to all individuals who work in this field. Those undertaking this unit would work independently or as part of a team under, indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Recognise a confined space	**1.1** Select and don required personal protective equipment (PPE) to identify a confined space
	1.2 Review nature of the possible work space and its characteristics
	1.3 Assess possible work space for its potential to be a confined space
	1.4 Determine precautions to be taken in the presence of a harmful atmosphere
	1.5 Identify and assess other hazards and factors associated with the possible work space to determine the level of risk associated with that space
	1.6 Refer identified hazards to appropriate personnel/authority for further investigation and analysis, where uncertainty exists about confined space potential
	1.7 Confirm safety of possible workspace
2 Carry out appropriate action after identifying a confined space	**2.1** Identify and document potential WHS issues
	2.2 Undertake, document and revise risk assessment, whenever there is evidence to indicate that it is no longer valid
	2.3 Document broad limitations the confined space may

© Commonwealth of Australia, 2025 Public Skills Australia

impose on work practices

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit supersedes and is equivalent to DEFOH012B Identify confined space.

Assessment Requirements for DEFWHS010 Identify confined space

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to Foundation Skills and Assessment Conditions.

Release 1.0. These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

- Assessment Requirements created drawing upon specified assessment information from superseded unit.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- accessing, reading, interpreting and applying information on confined spaces
- identifying and reporting hazards
- understanding the possible nature of the environment
- identifying intervention points for expert advice to assist work and to guide problem solving
- identifying principle risks and associated mitigation.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- appropriate signage, symbols, labels and warning devices relating to confined spaces
- location of applicable organisational procedures and documents
- preferred order of ways to control WHS risk – hierarchy of controls
- rights and responsibilities of workplace parties under WHS legislation.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate,

© Commonwealth of Australia, 2025 Public Skills Australia

assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

DEFWHS011 Enter confined space

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to Foundation Skills and Assessment Conditions.

Release 1.0. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFOH013B Enter confined space.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- PC 1.3, 1.5 and 2.7 removed.

Application

This unit involves the skills and knowledge required to enter confined spaces. In the context of this unit, a confined space is any compartment or area that has the capability of accumulating a toxic, flammable or explosive atmosphere, or of being flooded, in addition to one of the following characteristics:

- limited opening for access
- no escape route or very restricted means of escape
- limited natural ventilation
- atmosphere containing more than 23.5% or less than 19.5% oxygen

It includes the skills required to prepare to enter confined spaces and to finalise egress at the conclusion of the task/s.

This unit applies to Defence personnel involved in entering confined spaces as a workplace responsibility, but it is applicable to all individuals who work in this field. Those undertaking this unit would work independently or as part of a team under indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

An individual undertakes this as part of a team in conjunction with other individuals who also have this competency. It is expected that one or more of the team members, or a team member not working in the confined space, will hold a current, recognised, first aid certificate.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for confined space entry	**1.1** Identify and confirm requirement for confined space entry from work requests/instructions
	1.2 Identify duration of and limitations on the tasks to be performed in the confined space
	1.3 Identify, acquire and prepare equipment and resources required for the confined space entry
	1.4 Prepare confined space for entry
	1.5 Confirm and delegate team and individual roles and responsibilities within the team
	1.6 Conduct pre-entry tests and checks in accordance with organisational and manufacturers' requirements
2 Enter confined spaces	**2.1** Identify entry/egress points
	2.2 Monitor environmental conditions
	2.3 Maintain verbal and non-verbal communication
	2.4 Operate equipment and resources in accordance with manufacturers' requirements and organisational procedures
	2.5 Adhere to entry permit conditions
	2.6 Recognise and respond to unexpected situations
3 Finalise confined space entry	**3.1** Exit confined space

© Commonwealth of Australia, 2025 Public Skills Australia

3.2 Clean and refurbish equipment

3.3 Complete documentation and reports

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit supersedes and is equivalent to DEFOH013B Enter confined space.

Assessment Requirements for DEFWHS011 Enter confined space

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to Foundation Skills and Assessment Conditions.

Release 1.0. These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

- Assessment Requirements created drawing upon specified assessment information from superseded unit.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- accessing, reading, interpreting and applying information on confined spaces
- assessing risks and applying effective risk control measures
- communicating effectively
- identifying and reporting hazards
- identifying stored energy sources
- operating equipment pertinent to the confined space entry and task to be performed
- reporting abnormalities
- identifying intervention points for expert advice to assist work and to guide problem solving.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable organisational procedures and documents
- appropriate signage and protective barriers
- risk assessment procedures
- safety equipment operations
- work methods analysis.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory

DEFWHS012 Test confined space environment

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to Foundation Skills and Assessment Conditions.

Release 1.0. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFOH014B Test confined space environment.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- PC 2.4 removed
- PC 2.2 and 2.3 merged.

Application

This unit involves the skills and knowledge required to test confined space environment to ensure safe entry and egress.

In the context of this unit, a confined space is any compartment or area that has the capability of accumulating a toxic, flammable or explosive atmosphere, or of being flooded, in addition to one of the following characteristics:

- limited opening for access
- no escape route or very restricted means of escape
- limited natural ventilation
- atmosphere containing more than 23.5% or less than 19.5% oxygen

It includes the skills required to prepare for and conduct test procedures, and all post test procedures.

This unit applies to Defence personnel involved in the testing of confined space environments as a workplace responsibility but is applicable to all individuals who work in this field. Those undertaking this unit must demonstrate the ability to work independently or as part of a team under indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

DEFWHS013 Control entry to confined spaces

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to Foundation Skills and Assessment Conditions.

Release1.0. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFOH015B Control entry to confined spaces.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- PC 1.5 removed.

Application

This unit involves the skills and knowledge required to control entry to confined spaces.

It includes the skills required to control entry and egress to confined spaces. While exercising the control of entry to confined space may not require the competency to enter confined space, it requires awareness of the legislative requirements and organisational procedures related to confined space entry.

In the context of this unit, a confined space is any compartment or area that has the capability of accumulating a toxic, flammable or explosive atmosphere, or of being flooded, in addition to one of the following characteristics:

- limited opening for access
- no escape route or very restricted means of escape
- limited natural ventilation
- atmosphere containing more than 23.5% or less than 19.5% oxygen

This unit applies to Defence personnel involved in the control of entry to confined spaces as a workplace responsibility but is applicable to all individuals who work in this field. Those undertaking this unit would work independently or as part of a team under, indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform routine tasks in a range of familiar contexts.

Assessment Requirements for DEFWHS013 Control entry to confined spaces

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to Foundation Skills and Assessment Conditions.

Release1.0. These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

- Assessment Requirements created drawing upon specified assessment information from superseded unit.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- accessing, reading, interpreting and applying information on confined spaces
- analysing relevant workplace data to identify hazards, assess risks and evaluate effectiveness of WHS control measures
- analysing working environment to identify hazards, assess risks and design and implement appropriate WHS control measures
- assessing the resources needed to establish and maintain systematic approaches to managing WHS including a range of control measures
- operating equipment pertinent to the control of confined space entry
- identifying intervention points for expert advice to assist in work and to guide problem solving.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- appropriate emergency response procedures
- appropriate signage, symbols, labels and barriers
- entry permit procedures
- incident and accident investigation including WHS record keeping
- risk management principles and application of appropriate measures including hierarchy of control
- role of technical information and experts in designing control measures, and monitoring systems
- training and competency requirements for confined space entry.

DEFWHS014 Monitor and report on hazardous substances safety

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to Foundation Skills and Assessment Conditions.

Release1.0. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFOH016B Monitor and report on hazardous substances safety.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- PC 1.3 removed
- PC 3.1 and 3.2 merged
- Elements 2 and 3 merged.

Application

This unit involves the skills and knowledge required to monitor and report on hazardous substances safety.

It includes the skills required to effectively identify hazardous substances that may be present in the workplace and to monitor the hazard and hazard controls that have been recommended/implemented as well as reporting the results of this identification and monitoring to commanders/managers.

In the context of this unit, a hazardous substance includes any substances with the potential, when used at work, to impact on the health or safety of persons and/or the environment (surface/ground water, flora, fauna, atmosphere, soil etc.) at or near the workplace.

This unit applies to Defence personnel involved in the monitoring and reporting of hazardous substances as a workplace responsibility but is applicable to all individuals who work in this field. Those undertaking this unit would work independently or as part of a team under, indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFWHS014 Monitor and report on hazardous substances safety

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to Foundation Skills and Assessment Conditions.

Release1.0. These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

- Assessment Requirements created drawing upon specified assessment information from superseded unit.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- testing and operating monitoring equipment
- identifying intervention points for expert advice to assist in work and to provide a guide to problem solving.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- hazardous substances likely to be found in the workplace
- WHS requirements relevant to hazardous substances in the workplace.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

FBPFSY2002 Apply food safety procedures

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to maintain food safety, workplace cleanliness and personal hygiene, and conduct work tasks where work involves operation of production and/or packaging equipment and processes.

This unit applies to individuals who participate in and comply with safety programs in the food processing sector. It does not apply to the pharmaceutical industry.

Legislative and regulatory requirements apply to food safety and are enforced through state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Pre-requisite Unit

Nil

Unit Sector

Food Safety (FSY)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement the food safety program	1.1 Identify food handling requirements of the work task 1.2 Carry out food handling, and control food safety hazards according to the food safety program 1.3 Report any incident where food safety control requirements, including for food allergens, are not met, and take corrective action as

Assessment Requirements for FBPFSY2002 Apply food safety procedures

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively implemented the food safety program and procedures on two separate occasions in a food processing and/or food packaging environment, including:

- identifying own responsibilities with regard to food safety, including food allergen management
- identifying food safety risks in the workplace, and the control measures used to manage them
- applying control measures in own work
- monitoring compliance with food safety standards
- identifying and acting on non-compliances.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- sources of information and expertise on procedures and responsibilities for food safety relating to own work
- basic concepts of critical control point (CCP)-based food safety, including identification of hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- food safety management arrangements in the workplace, including:
  - workplace policies and procedures to implement responsibilities
  - the relationship between the quality system and the food safety program
  - the role of internal and external auditors
  - procedures followed to investigate contamination and cross-contact allergenic events
- Food Standards Code and why it exists, relevant to work role

© Commonwealth of Australia, 2025 Public Skills Australia

- good manufacturing practices (GMP) relevant to work role
- state/territory food legislation, relevant to workplace
- common microbiological, physical, chemical and allergen hazards related to the foods handled in the work area
- handling and storage requirements of ingredients, materials and products handled and used
- methods used to monitor that food safety is under control, including the purpose of sampling
- action required in the event of non-compliance (corrective action is typically described in the food safety program and/or related workplace information)
- purpose of keeping records, and the recording requirements of the food safety program
- methods used in the workplace to isolate or quarantine food that may be unsafe or non-conforming
- product and ingredient recall procedures where required by work responsibilities
- personal protective clothing and footwear, clothing maintenance, laundering and storage requirements
- housekeeping requirements and responsibilities relating to own work, and use and storage of housekeeping/cleaning equipment where relevant
- procedures to follow in the event of pest sighting or discovery of infestation
- purpose and importance of cleaning and sanitisation procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
  - a food or beverage processing workplace or an environment that accurately represents actual workplace conditions
- resources, equipment and materials:
  - food safety information relating to the workplace, including a food safety program outlining food safety hazards and control methods
  - personal protective equipment and clothing
- specifications:
  - work instructions and procedures relevant to work task
  - cleaning and sanitisation policies and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPFSY3002 Participate in a HACCP team

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to participate in the development and review of a hazard analysis critical control point (HACCP)-based food safety program.

The unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others, and who participate in the development of a food safety program typically limited to their immediate work area.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Food Safety (FSY)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to develop or review a food safety program	1.1 Recognise roles and responsibilities for participating in, developing or reviewing a food safety program 1.2 Identify the scope of a food safety program

© Commonwealth of Australia, 2025 Public Skills Australia

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Identify and review food safety hazards	2.1 Identify processes to be covered by the food safety program, and recognise the steps within each process 2.2 Identify food safety hazards that are reasonably expected for each critical control point 2.3 Review safety handling methods, processing techniques and existing support programs used in the workplace as part of a team
3. Establish or review methods to monitor and control food safety hazards	3.1 Establish acceptable methods of control for each food safety hazard that is reasonably expected to occur 3.2 Validate control methods against safety standards 3.3 Establish or review procedures for taking preventative action 3.4 Establish or review appropriate methods for monitoring that processes remain within control 3.5 Establish required corrective action to respond to situations where hazards are not effectively controlled

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret details of the food safety program

Assessment Requirements for FBPFSY3002 Participate in a HACCP team

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has actively participated in a food safety team on a minimum of two occasions, including:

- identifying food safety hazards in the critical control points (CCPs) of production processes
- establishing and validating control standards and methods for a minimum of two potential hazards
- applying food safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and intent of food safety legislation, including Food Standards Code
- the roles and responsibilities for developing and maintaining the food safety program, including roles of internal and external auditors and authorised officers
- techniques for applying critical control point principles, including techniques for identifying hazards, assessing the likelihood of occurrence, determining acceptable methods of control, monitoring and recording requirements for each control point, identifying corrective action if controls are not met, and developing system review procedures
- common microbiological, physical, chemical and allergen hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences, and control methods to prevent occurrence

© Commonwealth of Australia, 2025 Public Skills Australia

- techniques used to map operations and analyse food safety requirements, such as preparation of flow charts, hazard analysis charts and tables, and data analysis reports
- raw materials, ingredients and finished product composition and characteristics, and related handling and storage requirements
- food processing methods used in the workplace or work area, and their effect on food safety
- the role of consultation in the development, implementation and ongoing maintenance of the food safety program
- documentation and recording requirements to support communication and monitoring of the food safety program, including procedures for maintaining and updating relevant documents, such as operating procedures
- main types of food safety hazards and contamination likely to occur given product type and processing methods used
- conditions required for bacterial food poisoning to occur, such as water activity, pH, composition and time and temperature as relevant to food handled
- acceptable control methods for identified hazards, and required corrective actions when control requirements are not met
- typical support programs, such as cleaning schedules, pest control, stock rotation, product traceability, and personal hygiene, and how they can be used as part of a food safety program
- validation and verification processes and techniques and responsibilities.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - workplace food safety program documentation
- specifications:
  - review/audit arrangements
  - advice on quality and food safety legislation
  - procedures for developing or modifying specifications and other advice on food safety requirements
  - reporting/recording system
- relationships (internal and/or external):
  - interactions with team members.

FBPOPR2066 Apply sampling procedures

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to interpret sampling plans, and to collect and transfer samples to retain sample integrity.

This unit applies to individuals who would typically be required to follow specific sampling procedures under general supervision.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for sampling	1.1 Read or listen to work instructions from supervisor and clarify where needed 1.2 Identify health and safety hazards in the workplace and inform supervisor 1.3 Wear appropriate personal protective equipment and ensure correct fit 1.4 Identify sampling requirements in the sampling plan

© Commonwealth of Australia, 2025 Public Skills Australia

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.5 Prepare sampling equipment, containers and labels
2. Collect samples	2.1 Collect samples as specified in the sampling plan 2.2 Handle and prepare samples to preserve sample and source integrity 2.3 Identify and report defects or abnormalities in source material and sample 2.4 Record sample information in line with workplace requirements 2.5 Maintain a clean and tidy workplace

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	• Record sample information accurately
Get the work done	• Solve familiar and generally predictable problems within workplace guidelines

Assessment Requirements for FBPOPR2066 Apply sampling procedures

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively taken 10 samples, in line with the sampling plan, including:

- accessing and interpreting sampling plan to identify requirements
- selecting, fitting and using personal protective equipment
- preparing for sampling to ensure required tools, containers and labels are available
- following sampling procedures and the sampling plan to collect samples from the designated points, in the quantities and at the times specified
- identifying atypical source materials and/or samples and take corrective action, such as reporting abnormalities, repeating sample collection and/or following intensive sampling schedules
- completing sample records according to workplace requirements, such as labelling samples as required
- transferring samples for testing
- maintaining work area to meet housekeeping standards.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace, including the purpose and limitations of personal protective equipment
- basic sampling principles, including the importance of following the sampling plan to obtain representative sampling reflecting characteristics of source material, the sample characteristics and related preservation, handling and storage requirements, and the labelling system purpose and requirements
- tests to be conducted on samples, and related handling and preparation requirements and responsibilities

© Commonwealth of Australia, 2025 Public Skills Australia

- characteristics of materials sampled, and common contaminants and related conditions under which contamination is likely to occur
- sampling techniques relevant to samples collected, such as sterilisation methods and procedures
- the relationship between sampling, testing and production processes, including different sampling regimes that may apply in response to non-standard conditions or after corrective action is taken to adjust production outputs
- procedures and responsibility for reporting and recording sampling information, including legislative requirements
- procedures for preparing samples.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - sampling plan
  - recording and reporting system
  - sampling equipment and containers as required
  - product/source material to be sampled.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FDFAU4001A Assess compliance with food safety programs

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers skills and knowledge required to assess compliance against an approved food safety program where the program is supported by a prescriptive template or tool or where compliance is checked against a food safety program that has been validated by a technical expert.

Application of the Unit

Application of the unit	This unit applies to regulatory, commercial or internal auditors. When this unit is applied to regulatory auditing it should be noted that the National Food Safety Audit Policy for regulatory auditing requires that the unit FDFAU4002A Communicate and negotiate to conduct food safety audits, must be pre or co-assessed with this unit when applied to assessing compliance against approved food safety programs that have been validated by a technical expert.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan the audit	1.1. An audit plan is developed to meet the audit scope 1.2. The plan is capable of delivering the required outcomes within resource and time allocations 1.3. Plan includes audit purpose, scope and relevant templates or approved food safety program 1.4. Activities and responsibilities for the audit are identified 1.5. Audit timing (as required by legislation and/or client) is identified including timetable for each stage of the audit 1.6. Resource, personnel and reporting requirements are identified 1.7. Follow up and completion procedures are identified 1.8. Communication protocols are identified and established to facilitate the effective exchange of information and suited to the auditee environment

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Confirm that the food business has documented required preliminary work	2.1. The food and the method of distribution are defined 2.2. Customers and intended use of food is identified 2.3. The process is described and documented 2.4. The food business has checked their documentation for accuracy and completeness
3. Confirm the food safety program is supported by a tool or template or has been validated	3.1. The documented food safety program and related procedures and prerequisite programs are assessed to confirm that they have a prescriptive tool or have been validated by a technical expert 3.2. The food business method of identifying and analysing food safety hazards is reviewed 3.3. Templates or the approved food safety program are correctly selected to meet audit scope 3.4. Templates or the approved food safety program are appropriately adapted to suit the needs of the business without adversely affecting food safety 3.5. Documented verification records are reviewed to confirm that the requirements of the food safety program are being met 3.6. Corrective actions required where processes are identified as not meeting targets or critical limits are assessed to confirm they meet the requirements of the template or food safety program 3.7. Food safety prerequisite programs are assessed to confirm they are appropriate for the food business/industry sector to maintain a safe food environment 3.8. Food safety program documents are reviewed to confirm currency, accuracy and adequacy to facilitate maintenance of an adequate food safety program
4. Collect evidence to review and assess implementation of food safety programs	4.1. Evidence is collected to confirm that documented programs and procedures are working effectively, reflect actual practice and are consistently applied 4.2. Evidence is collected to confirm that food safety monitoring and corrective actions are carried out according to procedure 4.3. Evidence is collected to confirm that safety prerequisite programs are effective and consistently followed 4.4. Evidence is collected to confirm that food safety records are completed and provide an accurate

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	record of events 4.5. Evidence is collected to confirm that records are accessed and analysed to confirm effective program maintenance in accordance with the template or food safety program 4.6. Evidence is collected to confirm that food safety skills and knowledge of food business personnel is commensurate with their work role 4.7. Evidence is collected to confirm that the food safety program has been internally monitored and assessed, updated and improved by a technical expert
5. Manage the audit process	5.1. Audit progress is monitored against the audit plan and any variation to plan is identified and addressed 5.2. Circumstances requiring the audit plan to be adjusted are identified and negotiated in a timely manner 5.3. Audits address audit scope and are conducted within time and resource constraints to meet quality and professional standards 5.4. The audit process is reviewed to identify opportunities for improvement
6. Consolidate audit outcomes	6.1. Audit evidence is analysed and assessed to identify any areas of non-compliance with legislation and/or the food safety program 6.2. Non-conformities are identified and classified as agreed by the audit plan 6.3. Non-conformities are reported in accordance with agreed client and/or legislative requirements 6.4. Audit reports and/or certificates are prepared and submitted or presented as required to meet regulatory and client requirements 6.5. A corrective action implementation plan defining proposed actions and timelines developed by the auditee is reviewed by the auditor to confirm that template or food safety program requirements are met 6.6. Audit findings are reviewed to confirm that evidence is sufficient as defined by the template or approved food safety program
7. Confirm and close out corrective actions	7.1. Implementation and effectiveness of corrective action is monitored and verified against the template or the approved food safety program

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	7.2. Audit records are maintained to record corrective actions

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: • plan and organise audit activities • identify work processes and work flow • interpret food safety programs including flow charts, standard operating procedures (SOPs), and other process documentation • describe each process step and identify food safety hazards • conduct research to identify, collect and analyse evidence of compliance with food safety programs • use communication skills to support evidence collection and outcome presentation • identify and classify non-compliances • prepare audit reports and certificates to meet regulatory and client requirements • review corrective action implementation plans • monitor the implementation of corrective actions • maintain audit records
Required knowledge
Knowledge of: • required content and scope of food safety programs as defined in the National Food Safety Standard 3.2.1 or other relevant standards • purpose and minimum requirements of risk-based approaches to managing food safety hazards, including the role of prescriptive templates or approved food safety programs in supporting a risk-based approach and the process used to validate these tools • guidelines on implementing industry templates or approved food safety programs • legal requirements of food businesses • legal liability of auditors and protection against litigation and professional practice issues, including the circumstances under which an auditor could be prosecuted and insurance requirements • audit activities and principles, including guidelines on audit stages and activities as

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
outlined in ISO 19011:2002 • personal attributes required of food safety auditors, including those outlined in ISO 19011:2002, and additional system owner requirements where required • role, responsibilities and powers of enforcement agencies, authorised officers and commercial auditors, including reporting responsibilities, legal liability of auditors and delegation of authority to commercial auditors as may apply in some states and territories • information handling and management system protocols, including issues, such as rights of access to information, maintenance of confidentiality of audit information and reports and information dissemination requirements • evidence appropriate for use in audit processes, including the difference between objective and hearsay evidence and methods for recording and managing evidence to provide reliable reference information in the event that evidence is challenged • vocabulary and terms relating to food safety programs, includign terms and jargon to describe technical processes, industry standards and common biological and chemical terms • common biological, physical and chemical hazards that may occur in the food business and appropriate methods of control and critical limits as outlined in the approved food safety program or template • the impact of (1) the design and construction of premises and (2) the selection, application and condition of equipment, on food safety as defined in Food Safety Standard 3.2.3 • role of prerequisite programs in controlling hazards, including the relationship between prerequisite programs and risk-based approaches, such as HACCP to controlling food safety hazards • circumstances, implications and responsibilities in the event that the auditee requests that the audit ceases • circumstances and authority to initiate cessation of an audit • methods to assess skill requirements and options to confirm that the responsible personnel within the food business have the of food safety and food hygiene relevant to the food business

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competence in this unit must be able to assess compliance against an approved food

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	safety program where the program is supported by a prescriptive template or tool or where compliance is checked against a food safety program that has been validated by a technical expert. Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • confirm that the food safety program and/or template is appropriate to the activities of the business • review food safety program records to assess compliance against the approved food safety program and/or template • collect and analyse evidence to confirm that the food safety program is consistently followed and controls all critical risks • identify circumstances where variation or customising of the template or food safety program requires further validation • submit non-compliance reports to clearly identify the aspects of the food safety program that have broken down/need further development in order to prevent recurrence.
Context of and specific resources for assessment	Competency may be assessed in an actual workplace or simulated environment that provides access to the required resources. At least one of the scenarios should be assessed in an actual workplace context. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. The following resources must be available: • food safety plans • food safety-related documentation required to implement and record the food safety plan • evidence and documentation relevant to processes that would typically be used to assess compliance with the food safety program • plant and equipment that would typically be used in a commercial manufacturing business.

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
Method of assessment	Assessment methods must satisfy the endorsed Assessment Guidelines of FDF10 Food Processing Industry Training Package. The following assessment methods should be considered to gather sufficient and valid evidence of competency: • observation and a report covering the critical aspects for assessment identified above • questioning to test the level and application of knowledge • workplace example or scenario to allow a valid decision on the compliance of the food safety program to be made, with evidence of recording and feedback.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Food safety program	Food safety programs include both prerequisite programs and a risk-based analysis of food safety hazards to determine required control measures to eliminate, prevent or reduce hazards. Minimum legal requirements for food safety programs are specified in National Food Safety Standard 3.2.1 or other relevant legislative requirements. The food safety program may be based on a template or externally developed program that is adapted to the needs of the business

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
Licensing/certification requirements	Licensing and certification requirements are determined by system owners
Technical expert	The requirements of a technical expert are determined by the system owner. System owners may include: • government regulators as well as private system owners
Audit scope	The scope describes the purpose, extent and boundaries of the audit. This may include: • physical locations • products • processes • time period covered by the audit • extent of authority of the auditor
Prerequisite programs	Prerequisite programs are also referred to as support programs, such as Good Manufacturing Practice (GMP), Good Agricultural Practice (GAP) and Good Hygiene Practice (GHP) Prerequisite programs can be divided into two categories. **Infrastructure and maintenance programs**. These may include: • layout, design and construction of buildings and facilities • supplies of air, water energy and other utilities • equipment, including preventative maintenance, sanitary design and accessibility for maintenance and cleaning • support services, including waste and sewage disposal **Operational prerequisite programs**. These may include: • personal hygiene • cleaning and sanitation • pest control • measures for the prevention of cross-contamination • packaging and labelling procedures

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• supplier assurance • chemical storage • employee training • maintenance • calibration • document control • internal audit programs • traceability and recall programs • on-farm food safety schemes • inspecting and testing regimes, including analytical and microbiological testing
Legal requirements	The scope of the audit determines and may be determined by food safety legislation which may include: • Food Standards Code • relevant state and territory legislation and related codes of practice, including industry sector-specific legislation and related codes of practice, such as that relating to meat, seafood, dairy and primary production and processing • regulatory and commercial requirements relevant to importing countries • Commonwealth legislation (e.g. Export Control Act) Other legislation which may impact on the conduct of a food safety auditor may include legislation covering: • occupational health and safety (OHS), anti-harassment, anti-discrimination and industrial relations • trade practices legislation • environmental risk management • legal contracts or agreements
Food businesses	A food business refers to a business, enterprise or activity where food is produced, processed, stored, displayed and/or sold. It may also include primary producers
Food safety program documents	Food safety program documents may include: • documented statements of food safety policy

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	and objectives • documented procedures and records • documented complaints register • documents and records to ensure the effective development, implementation and updating of the food safety program
Risk-based approaches	Risk-based approaches to controlling food safety are typically based on HACCP, described in the Codex Alimentarius guidelines

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop a communication plan to support audit processes	1.1. Roles and responsibilities of the auditee are defined and agreed by both parties to address the audit scope 1.2. Roles and responsibilities of all personnel involved in the audit process are defined, communicated and agreed 1.3. Appropriate communication methods and protocols are determined and specific arrangements, including reporting requirements, are agreed 1.4. A communication plan is developed to identify the communication requirements and responsibilities of personnel involved in the audit process
2. Select and use appropriate communication methods to conduct an audit	2.1. Appropriate communication methods are used to establish and maintain effective client relationships, collect audit evidence, provide and present information, facilitate meeting processes, facilitate issue management and conflict resolution and communicate audit findings 2.2. Communication methods are selected to take account of system owner and food business requirements, workplace culture and individual differences 2.3. Information provided by the auditee is interpreted in the context of the industry sector, language and culture of the business
3. Negotiate to achieve agreement on audit outcomes	3.1. Areas of disagreement over audit outcomes are identified and clarified with the auditee 3.2. Understanding is sought on actions to be followed to

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	resolve outstanding issues 3.3. Communication techniques are applied to encourage all relevant parties to participate and express their views fully 3.4. Auditee views are treated with respect 3.5. Options for resolving differences are explored to reach agreement and meet audit timeline and resource parameters 3.6. Appropriate issue resolution strategies are explored to increase the likelihood of agreement on steps required to conclude the audit 3.7. The negotiation process is managed to maintain constructive client relationships 3.8. Any areas of continuing non-compliance that result from unresolved differences are reported to system owners and appropriate authorities as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: • select, design and use appropriate communication methods and techniques to support the audit process and the needs of the audience • apply strategies to communicate with people at different levels of the food business with different English language, literacy and technical skill levels • facilitate groups to resolve sensitive and/or conflict-based issues • structure and present written and verbal information that is thorough, legible, clear, accurate and appropriate to the purpose and the audience • use information systems, technologies and software to manage security, authorisation and distribution of audit data and records • communicate information in environments where the recipients may be hostile to the information being presented • apply issue resolution strategies
Required knowledge

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
Knowledge of: • legislation that impacts on acceptable communication methods and conduct, including anti-discrimination, anti-harassment and privacy legislation • vocabulary and terms relevant to audit process, including terms and jargon to describe food safety legislation, technical processes and industry standards • confidentiality needs and expectations of food businesses • strategies to communicate in culturally diverse environments • dynamics of conflict and strategies to manage resolution • the structure, authority levels and lines of reporting within a food business • communication methods relevant to different groups and audiences • reporting formats and requirements to meet client and legislative needs

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competence in this unit must be able to select and use appropriate methods of communication and negotiation to support audit processes. This unit should be assessed together with other food safety auditing units. Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • design a communication plan to meet the needs of stakeholders in an audit process, specifically where a number of participants have limited English language and literacy skills • facilitate and negotiate to seek understanding of audit outcomes in a conflict-based situation where the outcomes are contested by the auditee. This component of assessment must provide opportunities to select and apply appropriate communication

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	methods.
Context of and specific resources for assessment	Competency may be assessed in an actual workplace or simulated environment where the simulated context provides access to audit findings which are disputed by the auditee. At least one of the audit scenarios should be assessed in an actual workplace context. A simulated environment must provide access to a typical range of personnel with communication skill levels appropriate to food businesses and to the roles of personnel involved in food safety audit processes.
Method of assessment	The following assessment methods should be considered to gather sufficient and valid evidence of competency: • observation of communication and conflict management skills • a report for a communication plan to conduct a food safety audit • questioning to test the level and application of knowledge • a journal or report on communication strategies used in conducting a food safety audit. Assessment methods must satisfy the endorsed Assessment Guidelines of FDF10 Food Processing Industry Training Package.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
Licensing/certification requirements	This unit is part of a set of units that are a minimum requirement for auditors of food safety programs
Communication plan	A communication plan identifies: • the type and purpose of information to be provided through each stage of the audit process • audiences for types of information • the form or method of communication (e.g. written report, verbal presentation) • when/how often the communication will occur reporting procedures and responsibilities, including reporting timelines, formats and procedure for reporting serious/critical food safety hazards
Communication methods and protocols	Methods of communication may include: • written presentations and reports • two-way verbal interaction • constructive feedback • active listening • questioning to elicit, confirm and clarity information • interview techniques • facilitation of meetings and group processes • interpreting non-verbal skills and body language Communication protocols may include: • confidentiality • objectivity • information access and dissemination • levels of communication/lines or reporting • timeliness of providing information/responding to information requests
Food business requirements	Business requirements may require that communication is consistent with: • confidentiality requirements • legal requirements and related policies and procedures relating to communication

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	requirements • professional codes of conduct/personal attributes of auditors • information that is accurate, thorough and clearly presented • resource parameters • organisational structure and delegated levels of authority • existing communication mechanisms and systems used in the auditee's workplace
Individual differences	Individual differences may include but are not limited to: • age • race • gender • culture • religion • impairment/disability • physical features • educational background • technical skill level • communication styles and skill levels • English language and literacy • any other individual characteristics that may need to be taken into account in designing communication as covered by relevant legislation
Issue resolution strategies	Issue resolution strategies may include: • establishing open communication practices to encourage the trust and engagement of all parties • designing processes that ensure all parties have opportunities to fully express their position • involving personnel with additional expertise (this may include other expertise from the auditing body and/or the regulator) • validating evidence used to support audit findings

FDFAU4004A Identify, evaluate and control food safety hazards

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to identify, evaluate and control food safety hazards for the purposes of validating specific control measures in a food safety program.

Application of the Unit

Application of the unit	This unit applies to regulatory, commercial and internal food safety system auditors. When this unit is applied to regulatory auditing it should be noted that the National Food Safety Audit Policy for regulatory auditing requires that, when assessing compliance of food safety programs in a medium or high risk environment, the following units must be pre or co-assessed with this unit: • FDFAU4002A Communicate and negotiate to conduct food safety audits • FDFAU4003A Conduct food safety audits. When applied to conducting regulatory food safety audits of high risk food businesses or processes, additional food safety auditing unit/s relevant to the specified business or process may be required under the National Food Safety Audit Policy. Current high risk food safety auditing units are: • FDFAU4005A Audit bivalve mollusc growing and harvesting processes • FDFAU4006A Audit a cook chill process • FDFAU4007A Audit a heat treatment process • FDFAU4008A Audit manufacturing of ready-to-eat meat products.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Identify food safety hazards in a food business	1.1. Biological food safety hazards that could present a risk in the food at the point of consumption are identified by type, origin and food association and assessed to determine risk level and control requirements 1.2. Intrinsic and extrinsic chemical food safety hazards that could present a risk in the food at the point of consumption, including toxin presence, are identified

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	by type, origin and food association and assessed to determine risk level and control requirements 1.3. Physical food safety hazards that present a risk in food are identified and assessed to determine control requirements
2. Control food safety hazards in a food business	2.1. Processing hazards and related control measures and critical limits, monitoring and recording requirements are established and validated to eliminate or reduce food safety hazards to acceptable levels 2.2. Food storage and handling requirements necessary to eliminate or reduce food safety hazards are determined 2.3. Personal hygiene practices required to eliminate or reduce food safety hazards are established 2.4. Cleaning and sanitation, housekeeping and pest control practices and procedures required to prevent or reduce food safety hazards are established 2.5. Other prerequisite programs are developed to eliminate or reduce food safety hazards to acceptable levels

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- interpret and apply relevant legislation, codes of practice and technical standards
- identify biological, chemical and physical food safety hazards
- determine critical control points and critical limits for identified hazards
- establish the required procedures, systems and records to monitor critical control points in order to demonstrate that the critical control point is in control
- specify required corrective actions and corrections to be taken when critical limits are not achieved

Required knowledge

Knowledge of:

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- sources of advice and research on foods, processing methods, production technologies and associated food safety hazards and control methods
- ways in which food can cause illness and injury, including incidence and trends in food-borne illness
- intrinsic and extrinsic factors that can impact on food safety
- common biological food safety hazards (including toxin production and spore formation) and conditions required for survival and growth of each, including growth rates, transmission routes, likely carriers and threshold levels
- sources of information on acceptable (and legal) levels of biological, chemical and physical contamination
- food supply chains and potential of a breakdown in control at one point to impact other parts of the chain
- survival and growth requirements of biological food safety hazards
- common allergenic substances as described by the Food Standards Code (and may be additionally defined by system owners)
- common control methods necessary to eliminate or reduce the risk of food-borne illness to acceptable levels for each common pathogen, including the role of food storage, temperature control, preservation and process methods, traceability, product shelf-life, cleaning and sanitation, and pest control
- methods to detect and minimise the risk of food contamination by personal carriers, including convalescent and symptomless carriers, and related minimum legal illness reporting requirements and personal hygiene procedures
- the role of microbiological sampling, swabbing and testing in assessing the presence of biological contamination
- methods to determine the appropriateness and effectiveness of control measures and critical limits, including identifying the effect of control measures on the identified food safety hazard, method and feasibility of monitoring, the relationship to other control measures, and the severity of consequences and required corrective action in the event of failure of control
- types and causes of acute and chronic chemical food borne illness
- the food safety and legal impact of chemical contamination, including residual agricultural and environmental chemicals, residual industrial (including cleaning) chemicals, and chemical contamination as a result of packaging methods and materials
- physical hazards that pose a food safety risk
- common control methods to eliminate or reduce the risk of chemical or physical food-borne illness to acceptable levels for each common form of chemical and physical food safety hazard, including:
  - chemicals that pose a food safety risk
  - common food allergens
  - physical hazards
- the role and requirements of prerequisite programs and procedures to eliminate, prevent or reduce biological, chemical and physical food safety hazards to

REQUIRED SKILLS AND KNOWLEDGE
acceptable levels

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to establish or validate specific control measures in a food safety program based on demonstration of the identification, evaluation and control of food safety hazards. Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to:
	• select a food supply chain and identify:
	  • known biological food safety hazards that could occur across the chain and could present a risk in food at the point of consumption
	  • likely patterns of growth and transmission from source of contamination to onset of consumer symptoms for pathogens likely to occur in the supply chain, including threshold levels
	  • sources of chemical and physical contamination that could present a food safety risk at the time of food consumption, across the chain
	  • impact and indicators of the presence of biological or chemical food safety hazards throughout the food chain
	  • acceptable levels of contamination. These may be established by reference to relevant legislation and/or reference to system requirements
	• select one stage in the food supply chain (which must be a medium or high risk business or process) and establish or validate control measures and

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	verification records and procedures.
Context of and specific resources for assessment	Assessment may occur in a real or simulated food business context where the simulated context provides access to food safety programs for a multi-staged food supply chain which includes the point of delivery to the consumer. The selected supply chain must include at least one medium or high risk business and/or process and provide opportunity to apply a depth and breadth of food safety knowledge.
Method of assessment	The following assessment methods should be considered to gather sufficient and valid evidence of competency: • observation and documentation showing the identification of critical aspects of a food chain • questioning to test the level and application of knowledge • workplace example or scenario to produce validated control measures and verification records and procedures for food safety hazards.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Licensing/certification requirements	Licensing and registration arrangements are determined by system owners
Food safety hazards	A food safety hazard is a biological, chemical, or

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	physical agent in, or condition of, food with the potential to cause an adverse health effect in humans (defined in 'Hazard Analysis and Critical Control Point System and Guidelines for its Application', Codex Alimentarius Commission)
Biological food safety hazards	Common biological food safety hazards include but are not limited to: • Salmonella spp • Campylobacter jejuni • Bacillus cereus • Clostridium perfringens • Clostridium botulinum • Cryptosporidium • Pathogenic escherichia coli • Giardia • Listeria moncytogenes • Shigella spp • Staphylococcus aureus • Vibrio parahaemolyticus • Yersinia enterocolitica • Hepatitis A virus • Norwalk virus Classifications by type of micro-organism include: • bacteria • viruses • moulds/fungi • parasites • algae
Chemical food safety hazards	Common origins of chemical contamination may include: • cleaning chemicals • pesticides • veterinary residues • chemical additives • allergenic substances • toxic metals • nitrites, nitrates and N-nitroso compounds • polychlorinated biphenyls (PCBs)

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• plasticizers and packaging migration • phytotoxins • zootoxins
Physical food safety hazards	Physical food safety hazards refer to objects not normally found in food which may cause illness or injury to the consumer
Acceptable levels	Acceptable levels define the level of a particular hazard in the end product that is acceptable to ensure food safety. Acceptable levels are typically defined by: • the Food Standards Code • commonwealth, state or territory legislation or codes • industry codes of practice • international protocols (CODEX Alimentarius) • customer food safety requirements (including intended use)
Prerequisite programs	Prerequisite programs are also referred to as support programs, such as Good Manufacturing Practice (GMP), Good Agricultural Practice (GAP) and Good Hygiene Practice (GHP). Prerequisite programs can be divided into two categories. **Infrastructure and maintenance programs**. These may include: • layout, design and construction of buildings and facilities • supplies of air, water, energy and other utilities • equipment, including preventative maintenance, sanitary design and accessibility for maintenance and cleaning • support services, including waste and sewage disposal **Operational prerequisite programs**. These may include: • personal hygiene • cleaning and sanitation • pest control

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• measures for the prevention of cross-contamination • packaging and labelling procedures • supplier assurance • chemical storage • employee training • maintenance • calibration • document control • internal audit programs • traceability and recall programs • on-farm food safety schemes • inspecting and testing regimes, including analytical and microbiological testing
Critical control point	Critical control point is a step at which control can be applied and is essential to prevent or eliminate a food safety hazard or reduce it to an acceptable level
Critical limit	Critical limit refers to criterion which separates acceptability from unacceptability
Food supply chain	Food supply chain refers to a sequence of stages and operations involved in the production, processing, distribution and handling of food from primary production to consumption
Growth requirements	Factors which influence the growth of pathogenic micro-organisms may include: • temperature • water activity • gases • pH • time • moisture • nutrients
Validation	Validation refers to obtaining evidence to confirm that a HACCP-based food safety program is complete and effective and will deliver the expected food safety outcomes
Validation evidence	Validation evidence confirms that control

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	measures are capable of being consistently effective and may include the application of: • existing Australian legislative requirements • challenge tests • peer reviewed scientific papers • targeted scientific reports • validation already carried out in other jurisdictions and recognised by the responsible authority • mathematical modelling (e.g. predictive microbiology models) • industry codes of practice (where implementation by food business is verified during audits)

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement the food safety program	1.1. Food handling requirements are identified 1.2. Food handling is carried out according to the food safety program 1.3. Food safety hazards are controlled as required by the food safety program 1.4. Where food safety control requirements are not met, the incident is promptly reported and corrective action is taken 1.5. Food safety information is recorded to meet requirements of the food safety program 1.6. The workplace is maintained in a clean and tidy order to meet workplace standards 1.7. Work is conducted in accordance with workplace environmental guidelines
2. Participate in maintaining and improving food safety	2.1. Work area, materials, equipment and product are routinely monitored to ensure compliance with food safety requirements 2.2. Processes, practices or conditions which could result in a food safety breach are identified and reported according to workplace reporting requirements 2.3. Corrective action is taken in accordance with the food safety program 2.4. Food safety issues are raised with designated

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	personnel
3. Comply with personal hygiene standards	3.1. Personal hygiene meets the requirements of the food safety program 3.2. Health conditions and/or illness are reported as required by the food safety program 3.3. Clothing and footwear worn is appropriate for the food handling task and meets the requirements of the food safety program 3.4. Movement around the workplace complies with the food safety program

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- locate and follow workplace information relating to food safety responsibilities
- follow workplace procedures to maintain food safety as required by the food safety program relating to own work
- monitor food safety hazards as required by the food safety program, including methods such as visual inspection, sampling and testing
- record results of monitoring, and maintain records as required by the food safety program
- identify and report situations that do not meet the requirements of the food safety program and/or could result in unsafe food
- take corrective action as required by food safety program within level of responsibility
- handle, clean and store equipment, utensils, packaging materials and similar items according to the requirements of the food safety program as required by work role
- maintain personal hygiene consistent with the food safety program
- take necessary precautions when moving around the workplace and/or from one task to another to maintain food safety
- wear and maintain appropriate clothing/footwear as required by work tasks and consistent with the requirements of the food safety program
- report health conditions and illness as appropriate according to the food safety program
- handle and dispose of out-of-specification or contaminated food, waste and

© Commonwealth of Australia, 2025 Public Skills Australia

recyclable material according to food safety program as this requirement relates to own work responsibility
- maintain the work area in a clean and tidy state
- identify and report signs of pest infestation
- record food safety information in appropriate format
- clean and sanitise equipment according to enterprise procedures
- collect samples and conduct tests according to the food safety program according to enterprise procedures
- participate in investigating food safety breaches according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- sources of information and expertise on procedures and responsibilities for food safety relating to own work
- basic concepts of HACCP-based food safety, including identification of hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- food safety management arrangements in the workplace, including awareness of food safety legislation, workplace policies and procedures to implement responsibilities, understanding the relationship between the quality system and food safety program, personnel responsible for developing and implementing the food safety program, the role of internal and external auditors as appropriate, procedures followed to investigate contamination events, and performance improvement processes
- awareness of common microbiological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences and control methods to prevent occurrence
- basic understanding of the properties, handling and storage requirements of ingredients, materials and products handled and used
- suitable standard for materials, measuring devices, equipment and utensils used in the work area
- food safety requirements related to work responsibilities, including personal hygiene, requirements and procedures to report illness and safe food handling practices for own work
- methods used to monitor that food safety is under control, including the purpose of sampling and taking measurements, such as temperature and pH, and conducting inspections and tests
- action required in the event of non-compliance (corrective action is typically described in the food safety program and/or related workplace information)
- purpose of keeping records and the recording requirements of the food safety

© Commonwealth of Australia, 2025 Public Skills Australia

program • methods used in the workplace to isolate or quarantine food which may be unsafe • product and ingredient traceability procedures, such as product recall where required by work responsibilities • clothing and footwear requirements for working in and/or moving between food handling areas • personal clothing maintenance, laundering and storage requirements • appropriate bandages and dressings to be used when undertaking food handling • housekeeping requirements and responsibilities relating to own work, and use and storage of housekeeping/cleaning equipment where relevant • procedures to follow in the event of pest sighting or discovery of infestation • purpose and importance of cleaning and sanitation procedures • waste collection, recycling and handling procedures relevant to own work responsibilities • cleaning and sanitation procedures where relevant • impact of rework handling/addition on food safety where relevant • sampling and test methods where relevant

•

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • identify own responsibilities with regard to food safety • identify food safety risks in the workplace and the control measures used to manage them • apply control measures in own work • monitor compliance with food safety standards • identify and act on non-compliances and participate in improving safety • maintain required standards of personal hygiene • complete workplace records as required

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	• apply safe work practices and identify OHS hazards and controls • apply food safety procedures.

Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to:
	• food safety information relating to the workplace, including a food safety program outlining food safety hazards and control methods. It may also include company policies, procedures and codes of practice, such as:
	  • Good Manufacturing Practice (GMP)
	  • related work instructions and procedures
	  • work tasks and responsibilities
	  • appropriate clothing and related apparatus
	  • reporting and monitoring systems
	  • cleaning and sanitation policies and procedures as required
	  • sampling and test procedures and related equipment as required.

Method of assessment	This unit should be assessed together with other units of competence relevant to the function or work role. Examples could be: • FDFOP2004A Clean and sanitise equipment • FDFOP2013A Apply sampling procedures • FDFOP2063A Apply quality systems and procedures • MSL973001A Perform basic tests.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
A food safety program	A food safety program is a written document that specifies how a business will control all food safety hazards that may be reasonably expected to occur in all food handling operations of the food business. The food safety program and related procedures must comply with legal requirements of the food safety standards and must be communicated to all food handlers. Where no food safety program is in place, food safety requirements may be specified in general operating procedures
Workplace information	Workplace information may be provided in: • food safety program • standard operating procedures (SOPs) • specifications • log sheets • written or verbal instruction
Food handling	Food handling refers to: • food receipt and storage • food preparation • cooking, holding, cooling, chilling and reheating • packaging, disposal
Products/materials handled and stored	Products/materials handled and stored can include: • raw materials • ingredients • consumables • part-processed product • finished product • cleaning materials
Examples of a breach of food safety procedures	Examples of a breach of food safety procedures could include: • failure to check delivery temperatures of potentially hazardous chilled food

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• failure to place temperature-sensitive food in temperature controlled storage conditions promptly • failure to wash hands when required • use of cloths for unsuitable purposes
Responsibility for monitoring food safety	Responsibility for monitoring food safety, identifying breaches in food safety procedures and taking corrective action relates to own tasks and responsibilities and occurs in the context of the food safety program in the workplace
Monitoring	Monitoring describes the methods used to confirm that a food safety hazard is in control, such as: • taking temperatures • collecting samples • conducting visual inspections • conducting other tests as required
Food safety hazard	A food safety hazard is a biological, chemical or physical agent in, or condition of, food that has the potential to cause an adverse health effect
Hygiene requirements	Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state or territory legislation/regulations
Reporting of health conditions and illnesses requirements	Reporting of health conditions and illnesses requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state or territory legislation/regulations
Appropriate clothing and footwear	Appropriate clothing and footwear depends on work requirements. It should be designed to ensure that the body and clothing itself does not contaminate food or surfaces likely to come into contact with food. Examples of clothing designed to prevent contamination by the body include: • purpose designed overalls or uniforms • hair-nets

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• beard snoods • gloves • overshoes

FDFFS3001A Monitor the implementation of quality and food safety programs

Modification History

November 2011: minor typographical error corrected.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to provide a leadership role in supporting day-to-day implementation of the food safety/quality programs in a work area. It also involves supporting others to implement the requirements of the food safety/quality procedures.

Application of the Unit

Application of the unit	This unit applies to those with formal responsibility for others, and to those required to model workplace policies and procedures but who have no formal management role. This unit is based on and equivalent to the guideline food safety unit GFSOFSA Oversee the day-to-day implementation of food safety in the workplace. Note that this unit does not apply to the pharmaceutical industry. Refer to FDFPH3001A Monitor and maintain Good Manufacturing Practice procedures.

Licensing/Regulatory Information

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Ensure others in the work area are able to meet quality and food safety requirements	1.1. Hazard control and clothing and equipment appropriate to work requirements are available, functional and correctly fitted 1.2. Information on food safety/quality responsibilities and procedures is current, accessible and communicated to others in the work area 1.3. Information about identified hazards and the outcomes of risk assessment and risk control procedures is accessible and communicated to others in the work area 1.4. Food safety/quality hazards and control measures used in the work area can be identified by those in the work area 1.5. Mentoring and coaching support is available to support individuals/groups to implement quality and

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	safe food handling procedures 1.6. Training needs are identified and addressed within level of responsibility
2. Monitor observance of quality standards and food safety programs in the work area	2.1. Work procedures in the work area are clearly defined, documented and followed 2.2. Deviation from identified procedures is identified, reported and addressed within level of responsibility 2.3. Personal behaviour is consistent with workplace policies and procedures that support food safety and quality 2.4. Food safety and/or quality hazards are identified and reported according to workplace procedures 2.5. Food safety and quality information is recorded to meet workplace reporting requirements 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines
3. Take corrective action in response to quality and food safety non-compliance	3.1. Workplace procedures for responding to quality and food safety non-compliance are promptly implemented 3.2. Hazardous events are investigated to identify cause 3.3. Control measures to prevent recurrence and minimise risks of hazardous events are implemented
4. Maintain and improve quality and food safety in the work area	4.1. Processes or conditions which could result in a breach of food safety procedures or quality specifications are identified, assessed, removed or and/reported within level of responsibility and according to workplace procedure 4.2. Risk assessments are conducted and appropriate control measures are identified and implemented in the work area 4.3. Recommendations arising from risk assessments are implemented within level of responsibility 4.4. Inadequacies in control measures are identified and reported according to company reporting requirements 4.5. Matters raised relating to quality/food safety are promptly resolved and/or referred to appropriate personnel 4.6. The work group is consulted and advised of

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	quality/food safety matters relevant to work role 4.7. Opportunities for improving food safety and quality are identified and raised with relevant personnel 4.8. Procedures are developed or revised to support effective control of quality and food safety hazards 4.9. Quality/food safety records are reviewed to ensure they are complete and meet the quality system, food safety program and legal requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access, interpret and communicate information about the food safety program, quality requirements and related procedures to others in the work area
- demonstrate two-way communication, including active listening and responding constructively to feedback
- provide access to and maintain current food safety/quality documentation
- model safe food handling and quality practices and procedures to achieve required outcomes, including demonstrating:
  - work procedures that meet the requirements of quality and food safety
  - cleaning and sanitising equipment
  - sampling and testing as appropriate according to quality and food safety requirements
  - maintaining personal hygiene
  - wearing appropriate clothing and footwear as required by the work task
  - following procedures when moving within and between work areas
  - reporting health conditions and illnesses according to workplace procedures
  - handling, cleaning and storing equipment, utensils and packaging materials as appropriate
- identify control points in the work area and demonstrate monitoring techniques used (control points include critical, quality and regulatory control points)
- support others to meet quality standards and follow food safety procedures by ensuring that all personnel in the work area receive the information required and have the necessary skills and equipment to carry out their responsibilities

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- identify, report and/or address food safety/quality non-compliance in an appropriate and timely manner within level of responsibility
- determine when and how to make adjustments to maintain output within level of responsibility
- identify, report and/or address food safety/quality training and development needs of others in the work area
- ensure that appropriate and timely action is taken in response to non-compliance
- handle and dispose of out-of-specification or contaminated food, waste and recyclable material according to food safety program as this requirement relates to own work responsibility
- participate in investigations of non-compliance and risk assessment processes
- participate in consultation processes to improve quality and food safety outcomes in the workplace
- review practice and procedures to implement recommendations arising from risk assessments and/or improvement proposals within level of responsibility, such as collecting and analysing food safety/quality records, reviewing operating procedures and communicating changes to others in the work area
- ensure that housekeeping standards are maintained and that equipment is in operational order, such as participating in the management of equipment calibration
- monitor the recording of quality and food safety information to confirm that records accurately reflect performance and meet the requirements of the food safety and quality programs
- participate in food recall procedures as required, within level of responsibility
- facilitate consultation processes according to enterprise procedures
- lead investigations of quality and food safety incidents according to enterprise procedures
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- sources of information and expertise on procedures and responsibilities for food safety relevant to the workplace
- principles of a HACCP-based approach to managing food safety, including identifying hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- basic concepts of quality assurance including hazards, risk assessment and control methods
- company programs and systems in place to manage and support quality and food safety in the workplace, which may involve separate or integrated programs, including systems for maintaining and updating documents, such as operating procedures and specifications
- clothing and footwear requirements for working in and/or moving between food

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
handling areas, including personal clothing maintenance, laundering and storage requirements • appropriate bandages and dressings to be used when undertaking food handling • housekeeping requirements and responsibilities relating to own work, where relevant this includes use and storage of housekeeping/cleaning equipment • procedures to follow in the event of pest sighting or discovery of infestation • purpose and importance of cleaning and sanitation procedures • legal obligations for food safety and quality, including an awareness of government legislation and customer requirements • food safety and quality responsibilities and requirements relating to the work area • awareness of common micro biological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences and control methods to prevent occurrence • suitable standard for materials, measuring devices, equipment and utensils used in the work area • properties of food and ingredients used that affect food safety, including an understanding of related storage, processing and handling requirements • current technical and process knowledge required to participate in investigations of food safety/quality hazards, risks and incidents within level of responsibility, including an understanding of common micro biological, physical and chemical hazards, related control methods and the way changes in equipment and/or processing methods can affect food safety and quality outcomes • procedures for identifying unsafe and/or non-conforming product, including control points and evidence of out-of-specification product or materials • sampling procedures, test methods and inspections • options for responding to non-compliance, including legal responsibility, risk management and cost/implications of different responses and level of responsibility for decision making • methods used in the workplace to isolate or quarantine food which may be unsafe • waste collection, recycling, handling and disposal, including handling/disposal requirements for different types of waste, such as hazardous waste where relevant • traceability and recall procedures within level of responsibility • documentation system and procedures, including record keeping to meet both company and legal requirements, procedures for developing and/or reviewing workplace procedures, and document control systems used in the workplace • auditing arrangements, roles and responsibilities as they relate to own work responsibilities, such as internal and external audit processes • appropriate communication skills and techniques to convey information on quality and food safety requirements to others in the workplace • cleaning and sanitation procedures where relevant • impact of rework handling/addition on food safety where relevant • sampling and test methods where relevant

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• facilitation and consultation techniqueswhere relevant

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • describe quality and food safety program, risks and control measures of the work area • confirm that control measures are in place and that personnel in the work area are equipped and informed to implement programs • identify, address and follow up on non-compliances • identify causes of non compliances • conduct risk assessments and recommend responsive action • provide support to others to implement the programs • complete and maintain documentation.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • food safety program for the work area which identifies critical control points, control measures and corrective action • quality policy, system and procedures • work area or system in which quality and food safety practices and procedures are to be monitored • personal protective clothing and equipment as required • review/audit arrangements • reporting and monitoring systems.

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
Method of assessment	This unit should be assessed together with other units of competence relevant to the function or work role. Examples could be: • FDFPPL3001A Participate in improvement processes • FDFPPL3004A Lead work teams and groups • BSBRES401A Analyse and present research information.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Work responsibilities	Work responsibilities may include formal or informal responsibility for modelling appropriate quality/food safety policies and procedures and providing a support role to others in the work area
Food safety program	A food safety program is a written document that specifies how a business will control all food safety hazards that may be reasonably expected to occur in all food handling operations of the food business. The food safety program and related procedures must comply with legal requirements of the food safety standards and must be communicated to all food handlers. Where no food safety program is in place, food safety requirements may be specified in general operating procedures

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
Quality systems	Quality systems may be externally accredited, such as an ISO system, or internally designed and managed
Workplace information	Workplace information may be provided in: • food safety and quality policies and programs • standard operating procedures (SOPs) • specifications • log sheets • written or verbal instruction incorporating food safety and quality requirements
Incidents	A food safety incident is: • a situation where the safe limits or parameters identified by the food safety program are not met A quality incident is: • a situation where the quality limits or parameters identified in specifications or processing instructions are not met
Monitoring	Monitoring describes the methods used to confirm that a food safety or quality hazard is in control, such as: • taking temperatures • collecting samples • conducting visual inspections • additional testing as required
Responsibility for identifying breaches of food safety procedures	Responsibility for identifying breaches of food safety procedures and taking corrective action occurs in the context of the food safety program and within scope of responsibility
Responsibility for identifying non-compliance against quality standards	Responsibility for identifying non-compliance against quality standards occurs within the context of defined standards or specifications and relates to work area
Personal hygiene requirements	Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state or territory

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	legislation/regulations
Reporting of health conditions and illnesses	Reporting of health conditions and illnesses requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state or territory legislation/regulations
Operator responsibilities	The operator at this level may not have direct responsibility for overseeing the training/development of team members. At a minimum they must be able to identify development needs of others in the work area and refer this information to the relevant personnel. The operator at this level may not have responsibility for independently assessing risks and determining the effectiveness of control measures. However, they would be expected to observe day-to-day effectiveness and participate in assessment and review processes. Responsibilities at this level may include facilitating consultation processes within level of responsibility
Record keeping	Record keeping complies with customer, legal and food safety program requirements

FDFTEC4003A Control food contamination and spoilage

Modification History

November 2011: updated to include correct prerequisite.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to prevent food contamination and spoilage. It includes management of food safety and cleaning and sanitation programs.

Application of the Unit

Application of the unit	This unit has application at a level where a person would be expected to oversee control measures across a production site or facility.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		
	FDFFS3001A	Monitor the implementation of quality and food safety programs* *FDFFS2001A Implement the food safety program and procedures*

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify legal responsibilities to produce quality, safe food	1.1. Legal and ethical responsibilities to produce safe food are identified 1.2. Legal, company and customer quality standards for products are identified
2. Identify common causes of food poisoning and contamination	2.1. Food-borne pathogens and contamination that can occur in processed food are identified 2.2. Patterns of contamination and spoilage are traced through processing, storage and shelf-life for a given product 2.3. Conditions required for contamination to occur are identified 2.4. Laboratory results used to detect the presence of contamination and/or related conditions are analysed and applied
3. Manage control measures to eliminate and/or minimise the risk of contamination	3.1. Control measures related to receivals, handling and processing, storage and/or transport stages to guarantee food safety in the workplace are identified 3.2. Control measures to prevent food contamination and spoilage are documented and followed
4. Manage cleaning and sanitation regimes	4.1. The main types of cleaners and sanitisers used in the food industry are identified 4.2. Application methods and related materials, labour and equipment requirements are identified

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.3. Cleaning and sanitation methods and regimes are assessed for environmental impact 4.4. Appropriate cleaning and sanitation methods are selected to suit a given product, processing method and risk factors and to ensure minimal impact on the environment 4.5. Inspection and/or test methods are in place to confirm the effectiveness of the cleaning and sanitation program 4.6. Responsibilities for cleaning and sanitation are documented and communicated

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify the requirements of legislative responsibilities relating to food production, including food composition, specification of safe handling, processing, storage and transportation methods as appropriate, and establishment of related programs, such as cleaning and sanitation, personal hygiene practices, training and food traceability and recall procedures
- identify how legislative requirements have been applied in a production context (this will typically be based on the food safety program (HACCP) for a production process)
- identify related roles and responsibilities for implementing, maintaining and reviewing the food safety program in a production environment
- identify the types of pathogenic bacteria, viruses and chemicals that can occur in food, including the main types of pathogens and contamination that can occur for a given product and production method, as well as the specific strains that can occur
- identify the main types and causes of food spoilage that can occur, including:
  - bacterial growth
  - growth of yeasts and moulds
  - fermentation
  - enzymic reactions
  - physical degradation (oxidation)
- identify the conditions that cause or promote the growth of pathogens and other

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
forms of contamination and food spoilage • identify typical control measures used to prevent contamination from occurring, including microbiological, chemical and physical types of contamination • distinguish between measures to control pathogenic growth (critical control measures) and those used to prevent other forms of contamination • interpret test results and apply this information in a production context • identify the types of contamination that can occur and the controls in place to prevent or minimise the likelihood of contamination occurring (where a food safety plan has been developed, compare the outcomes of this process with the provisions of the food safety plan) • review workplace information to ensure that critical control measures and procedures are documented in a form appropriate to meet company and legal requirements and that quality control measures and procedures are documented to meet company and customer requirements (documentation includes action to be followed in the event of an incident or emergency and should be reflected in food safety plans and operating procedures) • identify the cleaning and sanitation requirements/standards appropriate for a food processing environment • identify the types of cleaners, sanitisers and combined cleaning/sanitation agents used in the food industry and related application methods • evaluate the appropriateness of available methods to a given production process/product type • develop and/or review a cleaning regime suited to a given production process, including the nature, frequency and methods of cleaning and sanitation required, such as removal of residues as appropriate, inspection and/or test methods to confirm effectiveness and allocation of roles and responsibilities (the cleaning regime should balance the need to ensure effective cleaning and sanitation at the same time as minimising the disruption to production) • identify the possible consequences of failing to follow the cleaning regime • develop and/or review procedures to describe the methods, frequency, recording, inspection and test requirements related to implementation of cleaning and sanitation • analyse and interpret test results relating to cleaning and sanitation • for a given type of microbacterial and/or chemical contamination, identify likely causes, relevant tests and review of the effectiveness of existing controls, including cleaning and sanitation measures • use communication skills to interpret and complete work information to support operations of work team or area • demonstrate and support cooperative work practices within a culturally diverse workforce
Required knowledge
Knowledge of:

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

• the types of pathogenic bacteria, viruses and chemicals that can occur in food
• the main types of pathogens and contamination that can occur
• the main types and causes of food spoilage that can occur, including:
  • bacterial growth
  • growth of yeasts and moulds
  • fermentation
  • enzymic reactions
  • physical degradation (oxidation)
• the conditions that cause or promote the growth of pathogens and other forms of contamination and food spoilage
• criteria for evaluation to take account of the effectiveness of the method in controlling contamination risk, equipment requirements, cost and other criteria as identified by the workplace.
• issues of compatibility of cleaning agents with materials used in equipment/instrument fabrication
• the legal responsibilities to maintain food production facilities in a clean and sanitary condition, the difference between a surface that appears clean and one that is microbiologically described as clean, and use of terms, such as sterile and commercially sterile
• laboratory procedures used to avoid erroneous results, including practices such as use of negative controls and the purpose of false positives/false negatives
• common terms,such as:
  • plate count
  • culture
  • colony
  • bacteriophage
  • spores
  • yeasts and moulds
  • water activity

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the

EVIDENCE GUIDE	
	assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • identify legal, company and quality standards for food products • identify common causes of contamination and poisoning, and techniques used to verify status • identify and manage control measures used to address risks • manage cleaning procedures to ensure workplace standards meet food safety requirements.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • food safety plan and related information, including operating procedures, cleaning and sanitation regimes/plans • laboratory test results • a given production process and product as the basis for tracing contamination/spoilage and identifying control measures • cleaning and sanitation methods, equipment and procedures .
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating

RANGE STATEMENT	
conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Food-borne pathogens and contamination	Food-borne pathogens and contamination includes: • those listed in the World Health Organisation(WHO) table on 'Food-borne pathogens and chemicals of public health importance'. This is reproduced in a number of food safety-related documents, including 'Food Safety Standards Costs and Benefits' ANZFA, May 1999
Food-related legislation	Food-related legislation relevant to this unit includes: • relevant state, territory and federal food safety legislation • the Food Standards Code
Identification	Identification can be based on active ingredients and includes but is not limited to: • alkaline and acid-based detergents • steam/hot water-based methods of sanitation • bleach-based sanitisers • quaternary ammonium compounds (QUATs) • alcohol-based sanitisers • use of UV light, gamma radiation and combined cleaners/sanitisers

FNSASIC301 Establish client relationship and analyse needs

Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to interpret and comply with industry regulations and codes of practice when considering the characteristics of financial products and services for individual client needs.

It applies to individuals with excellent communication skills who are authorised as Australian Securities and Investments Commission (ASIC) registered Australian financial services licence (AFSL) holders to provide advice on deposit products, non-cash payment facilities and general insurance products at Tier 2 level.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the FNS Implementation Guide Companion Volume or the relevant regulator for specific guidance on requirements.

Unit Sector

ASIC units

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish relationship with client	1.1 Use range of communication and interpersonal skills to establish knowledge level of client 1.2 Respond to enquiries in relation to products and services by explaining range available and associated fee and charging

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	schedule 1.3 Inform client of role of adviser and licensee or principal responsible for adviser's conduct, including procedures for complaints handling and circumstances in which they should be engaged
2. Identify client objectives, needs and financial situation	2.1 Employ range of communication and interpersonal skills to gather client personal, financial and business details 2.2 Identify client's needs and product risk profile by encouraging expression of objectives and short-term, medium-term and long-term goals as relevant to product 2.3 Establish and confirm client expectations of cash flow and relevant taxation obligations
3. Analyse client objectives, needs, financial situation and risk profile	3.1 Undertake assessment of client's needs, using all information gathered and taking into account client's product expectations and specific needs 3.2 Consult client throughout analysis for further clarification where necessary 3.3 Analyse need for specialist advice and refer client to appropriate adviser for higher level or specialist advice if required 3.4 Complete product risk profile of client that demonstrates correct application of ASIC generic and specialist knowledge relevant to products being offered

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	3.1	• Recognises and interprets information from relevant sources to safeguard client needs
Writing	1.1-1.3, 2.1-2.3, 3.1-3.4	• Uses clear, specific and industry related terminology to complete and update workplace documentation
Oral Communication	1.1-1.3, 2.1-2.3, 3.1-3.4	• Elicits the view and opinions of others by listening and questioning • Clearly articulates requirements using language

© Commonwealth of Australia, 2025 Public Skills Australia

		appropriate to the audience and environment, and participates in a verbal exchange of ideas and solutions
Numeracy	1.2	• Interprets financial product information and analyses numerical data within spreadsheets and databases
Navigate the world of work	1.2, 1.3, 3.4	• Takes responsibility for providing effective advisory services that comply with legislative, regulatory and organisational requirements
Interact with others	1.1, 2.1, 2.2	• Selects and uses appropriate conventions and protocols to build rapport with clients to elicit and provide relevant information • Adapts personal communication style to show respect for the values, beliefs and cultural expectations of others
Get the work done	2.1-2.3, 3.1, 3.3, 3.4	• Takes responsibility for the sequence and priority of tasks within own workload to achieve effective outcomes • Uses analytical thinking and organisational techniques to assess relevant and key information that informs critical and non-critical decisions about client needs, risk profile and the potential need for input from others • Uses familiar digital tools and systems to complete job tasks

Assessment Requirements for FNSASIC301 Establish client relationship and analyse needs

Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- work effectively with clients to collect relevant personal and/or business information that will enable identification of their objectives, needs, expectations, financial situation and risk profile
- interpret and comply with relevant industry regulations and codes of practice requirements that relate to the provision of financial product advice
- analyse client information and assess client risk profile to determine the characteristics of financial products and services relevant to client needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must satisfy the knowledge requirements relevant to the products and activities in which advice is given.

For general insurance, deposit products and non-cash payments and relevant first home saver account products the individual must:

- explain the legal environment including disclosure and compliance covering:
  - role of the representative or adviser
  - relevant legal principles including the Corporations Act, Financial Services Reform Act (FSRA), Competition and Consumer Act, Insurance Contracts Act and Australian Securities and Investments Commission (ASIC) Act
  - the relationship between ethics and regulatory requirements including good faith, utmost good faith, full disclosure of remuneration and fees, and any other conflicts of interest which may influence the adviser's recommendation
- name relevant industry codes of practice and conduct

© Commonwealth of Australia, 2025 Public Skills Australia

- identify complaints resolution procedures (internal and external)
- outline relevant ASIC regulatory guidelines.

For general insurance the individual must:

- summarise the characteristics and participants of Australian insurance markets and the roles played by intermediaries, and identify insurance products including:
  - definition of an insurance product
  - conditions, exclusions and level of coverage of risk transfer products
  - types of insurance products
  - pricing of risk products
- identify taxation issues relating to insurance products
- explain advisory functions including:
  - role of the representative, broker or adviser
  - participants in the insurance advisory services market
  - range of services provided
  - profile and financial information of the client
  - appropriateness of a risk assessment
- summarise the specific product knowledge for the general insurance products in which advice is given including:
  - standard cover (and deviations)
  - policy wordings
  - taxes and charges
  - insurance claims
  - premium rating and risk selection
  - reporting
  - product development
  - underwriting.

For deposit products and non-cash payment facilities the individual must:

- name the types of deposit products and non-cash payment products
- summarise the product characteristics.

For first home saver accounts the individual must:

- name the types of first home saver account products including the range of accounts, associated risks and alternative products
- summarise the product characteristics – eligibility and withdrawal, and government conditions
- explain the taxation issues relating to first home saver accounts.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial services and products advice field of work and include access to:

- office equipment, technology, software and consumables
- financial services product information.

Assessors must satisfy NVR/AQTF assessor requirements.

FNSCRD405 Manage overdue customer accounts

Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify customer accounts which have outstanding payments and negotiate agreements that are monitored for compliance or further action.

It applies to individuals who may use a range of organisational and negotiation skills to plan, manage and monitor their work. This unit may be adapted to meet a range of debt recovery and debt management job roles.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the FNS Implementation Guide Companion Volume or the relevant regulator for specific guidance on requirements.

Unit Sector

Credit management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify customers requiring collection activity	1.1 Monitor organisational reporting system regularly for possible overdue accounts 1.2 Access relevant customer information and retrieve records 1.3 Review overdue accounts and customer credit histories in accordance with organisational policy and procedures, and relevant legislation

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Establish contact with customers and attempt to resolve outstanding payment matters	2.1 Determine proposed communication with customers to collect outstanding payments 2.2 Obtain approval to initiate communication with customers from authorised personnel in the organisation and inform other relevant external parties 2.3 Establish rapport with customers and ensure all communication complies with relevant legislation and organisational policy and procedures 2.4 Advise purpose of contact clearly and comprehensively to customers in accordance with legislative requirements
3. Negotiate resolution of outstanding payments	3.1 Advise customers of possibility of legal action and any other implications if outstanding payments are not resolved 3.2 Use appropriate techniques to achieve resolution and record negotiation outcomes accurately 3.3 Schedule further action to be undertaken in relation to outstanding payment matters
4. Monitor agreements to ensure adherence	4.1 Review accounts regularly to ensure that payments are received in accordance with negotiated arrangements 4.2 Address breaches of agreements in accordance with organisational policy and procedures, and legislative requirements 4.3 Refer outstanding payment matters to appropriate personnel as required

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 4.1	• Critically evaluates relatively complex texts and other information to determine if action is required
Writing	1.3, 2.1, 2.4, 3.1, 3.2, 3.3	• Documents actions and required information using clear and detailed language specific to the purpose of a range of communications with customers and external entities

© Commonwealth of Australia, 2025 Public Skills Australia

Oral Communication	2.2-2.4, 3.1, 3.2, 4.3	• Clearly articulates requirements using language, tone and pace appropriate to the audience and the environment • Uses careful listening and questioning techniques to negotiate and confirm mutual understanding of the agreement
Numeracy	1.1, 1.3, 4.2	• Uses a range of mathematical skills to interpret accounting records for breaches and calculate overdue amounts
Navigate the world of work	1.3, 2.3, 2.4, 4.2	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements • Identifies and acts on issues that contravene relevant policies, procedures and legal requirements in managing customer accounts
Interact with others	2.1-2.4, 3.1, 4.3	• Uses a range of strategies and reads verbal and non-verbal signals to establish a sense of connection and build rapport with customers • Negotiates positive outcomes for complex problematic exchanges • Recognises and accommodates basic differences and priorities of others
Get the work done	1.1-1.3, 3.2-3.3, 4.1-4.2	• Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes • Makes routine decisions and implements standard procedures for routine tasks, using formal decision-making processes for more complex and non-routine situations • Uses the main features and functions of digital tools to complete work tasks

Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- follow organisational procedures and policy for identifying overdue accounts and collecting outstanding payments
- communicate effectively with customers, explaining the implications of overdue accounts and alternative payment arrangement options following organisational guidelines and legislative requirements
- apply effective negotiation skills to resolve customer outstanding payment matters
- use the data entry and reporting system correctly to identify and monitor overdue accounts.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and explain organisational policy changes that reflect current developments in the credit management sector
- explain the key steps or actions in legal debt recovery processes
- explain relevant legislative requirements of overdue account review and management
- outline a range of negotiation techniques that can be used in managing overdue customer accounts.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the credit management field of work and include access to:

© Commonwealth of Australia, 2025 Public Skills Australia

- common office equipment, technology and consumables
- credit product information
- relevant software systems and data
- organisational policy and procedures for payment recovery.

Assessors must satisfy NVR/AQTF assessor requirements.

FNSCUS402 Resolve disputes

Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to investigate, negotiate and resolve disputes between financial services customers and organisations.

It applies to individuals in any sector of the financial services industry who work with others as part of a formal internal dispute resolution process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Customer service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish that dispute exists	1.1 Identify all information relating to original problem and clarify grounds for dispute 1.2 Contact all parties to identify and clarify disputed issues and confirm that customer has a legitimate dispute, or that initial complaint has not already been settled to customer's satisfaction 1.3 Ensure that organisational operating procedures have been followed and all information relevant to dispute resolution process is provided to customer 1.4 Obtain additional information from relevant parties as required

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and manage information exchange appropriately 1.5 Inform customer of organisation's obligations, procedures and timeframes where existence of genuine dispute is established
2. Investigate dispute and determine action to be taken	2.1 Collect all information from prior dealings with customer and undertake further investigations if necessary 2.2 Inform customer of progress and advise of any delays 2.3 Determine resolution action with consideration of facts, legislation, organisational policy and procedures and industry codes of practice, and inform appropriate personnel of action to be taken
3. Negotiate and resolve dispute	3.1 Inform customer of decision, including reasons if appropriate, and negotiate with claimant or representative if required 3.2 Resolve dispute effectively and in a timely manner, aiming to reduce need for litigation or formal conciliation services 3.3 Respect rights of customer in all dispute settlement procedures and refer any unresolved disputes to formal conciliation services
4. Finalise dispute	4.1 Record dispute resolution process outcomes and advise all parties affected by the decision clearly and promptly on the outcome and their rights to review of the decision 4.2 Prepare relevant documentation for unresolved disputes which have been referred to formal conciliation services according to legislation, regulations and codes of practice 4.3 Act on decisions of external dispute resolution as required 4.4 Complete all documentation in accordance with legislation and organisational procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 2.3	• Interprets, analyses and assesses a range of textual information from a variety of sources to ensure fully informed and compliant actions

© Commonwealth of Australia, 2025 Public Skills Australia

Writing	1.1-1.5, 2.2, 2.3, 3.1, 3.3, 4.1, 4.2	• Prepares specific, relevant information which clearly informs customer and relevant others of organisation's action and obligations consistent with regulatory requirements and timeframes • Uses logical, organised structures to document decisions and outcomes which comply with legislative and organisational requirements
Oral Communication	1.1-1.5, 2.2, 2.3, 3.1, 3.2, 3.3	• Engages in complex verbal interactions considering aspects of context, purpose and audience • Uses clear and direct language to clarify process, decisions and required actions to customer and others • Uses careful listening and questioning techniques to clarify understanding and elicit all relevant information
Numeracy	1.1, 1.3	• Extracts, interprets and evaluates numerical information relevant to disputes
Navigate the world of work	1.3, 1.5, 2.3, 3.3, 4.2, 4.4	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Interact with others	1.1-1.5, 2.2, 2.3, 3.1, 3.2, 3.3, 4.1	• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders involved in disputes • Collaborates and negotiates with others to achieve agreeable outcomes, playing an active role in facilitating consensus in contentious situations • Recognises behaviours and triggers that contribute to conflict and implements strategies to moderate conflict
Get the work done	1.1-1.5, 2.1-2.3, 3.1-3.3, 4.1-4.4	• Organises, plans and sequences own workload • Accesses, interprets and manages dispute documentation and related information • Applies problem-solving processes to address negotiation and related dispute resolution issues • Uses decision-making processes to form recommendations in operational situations • Uses the main features and functions of digital tools to complete work tasks and access information

Assessment Requirements for FNSCUS402 Resolve disputes

Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify, investigate and obtain all relevant information relating to the dispute
- apply dispute resolution and negotiation techniques effectively
- settle disputes in the financial services industry in line with organisational policy and procedures, and relevant industry and legislative requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the possible grounds for dispute
- explain current industry compliance requirements and dispute settling procedures and requirements
- describe current organisational policy and procedures
- identify and explain key requirements of legislation relevant to dispute resolution
- explain effective negotiation principles and dispute resolution practices
- outline the role and process for referring disputes to formal conciliation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- common office equipment, technology, software and consumables
- financial services product information
- information about workplace disputes.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy NVR/AQTF assessor requirements.

FNSORG501 Develop and manage a budget

Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to collect and analyse information and apply sound accounting principles to the development and ongoing management of a budget for a small organisation or section of a large organisation.

It applies to individuals who use a range of specialist and managerial techniques to plan, monitor and control budgetary work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Organisational skills

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan for and collect information for budget	1.1 Determine and confirm areas for which budget is being prepared with appropriate personnel, and identify, access and analyse data required for development of budget 1.2 Determine budget parameters with estimates based on research, consultation and negotiation with appropriate personnel 1.3 Consult relevant colleagues in budget planning process as required

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Develop budget	2.1 Draft budget based on analysis of all available information in accordance with organisational policy 2.2 Identify and support income and expenditure estimates with reliable information and circulate draft budget for comment
3. Finalise budget and allocate resources	3.1 Provide final budget which incorporates agreed modifications to appropriate personnel 3.2 Inform personnel affected by budget of its limits and goals in their work area and clarify financial management and reporting responsibilities 3.3 Obtain agreement to budget priorities and allocate resources
4. Monitor and control budget	4.1 Check actual income and expenditure against budget at regular intervals, and prepare and present budget reports to appropriate personnel 4.2 Identify and respond to deviations, take appropriate action and advise relevant personnel on budget status
5. Complete financial and statistical reports	5.1 Complete all required financial and statistical reports accurately within designated timelines 5.2 Make appropriate recommendations about future financial planning 5.3 Provide clearly presented and accurate reports to appropriate personnel

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 4.1, 4.2	• Extracts, analyses and monitors complex textual information from a range of sources to determine relevance, accuracy and compliance with organisational policy
Writing	1.1, 1.3, 2.1, 2.2, 3.1, 3.2, 4.2, 5.1, 5.2, 5.3	• Analyses and compiles numerical data and text information to convey specific information and recommendations accurately and effectively to others using clear and detailed language

© Commonwealth of Australia, 2025 Public Skills Australia

		• Demonstrates effective control of text types required by financial and statistical report conventions and documentation
Oral Communication	1.1 -1.3, 3.2, 3.3, 4.1, 4.2, 5.2	• Participates in verbal exchanges of information, demonstrating control of a range of oral techniques to elicit the views and opinions of others and confirm understanding • Clearly articulates requirements and outcomes using language, tone and pace appropriate to the audience and environment
Numeracy	1.1, 1.2, 2.1, 2.2, 3.1, 4.1, 4.2, 5.1, 5.3	• Interprets, analyses and uses numerically expressed data to effectively prepare, monitor, amend and present accurate budgetary information
Navigate the world of work	2.1, 3.2, 5.1	• Works independently and collectively in making decisions about budge requirements in accordance with organisational policy
Interact with others	1.1-1.3, 2.2, 3.1, 3.2, 4.1, 5.3	• Selects and uses appropriate conventions and protocols to gain and provide relevant budgetary information • Plays a lead role in situations requiring effective collaborative skills, demonstrating high level negotiation skills and ability to gather information through consultation
Get the work done	1.1, 1.2, 2.1, 3.3, 4.1, 4.2, 5.1, 5.2	• Accepts responsibility for planning and sequencing complex tasks and workload • Applies systematic and analytical decision-making processes to make recommendations in complex and non-routine situations • Uses digital technologies to access, extract and share relevant information to achieve required outcomes

Assessment Requirements for FNSORG501 Develop and manage a budget

Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- collect and accurately interpret relevant data to develop and finalise a budget
- consult effectively and negotiate outcomes with others on budgetary issues
- accurately complete financial and statistical reports related to budgeting.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the evidence requirements safely and effectively, the individual must:

- define basic accounting and financial services industry terminology
- outline types of data required to develop the budget
- explain accounting techniques relevant to budget preparation and maintenance
- describe budgeting techniques and tools
- describe organisational and industry policy and procedures related to budget development and management.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the organisational skills field of work and include access to:

- a range of common office equipment, technology, software and consumables
- an integrated financial software system and data.

Assessors must satisfy NVR/AQTF assessor requirements.

HLTAID011 Provide First Aid

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

The unit applies to all persons who may be required to provide a first aid response in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Respond to an emergency situation.	1.1. Recognise and assess an emergency situation. 1.2. Ensure safety for self, bystanders and casualty. 1.3. Assess the casualty and recognise the need for first aid response. 1.4. Seek assistance from emergency services.
2. Apply appropriate first aid procedures.	2.1. Perform cardiopulmonary resuscitation (CPR) in accordance ARC guidelines. 2.2. Provide first aid in accordance with established first aid principles. 2.3. Display respectful behaviour towards casualty. 2.4. Obtain consent from casualty where possible. 2.5. Use available resources and equipment to make the casualty as comfortable as possible. 2.6. Operate first aid equipment according to manufacturers' instructions. 2.7. Monitor the casualty's condition and respond in accordance with first aid principles.

© Commonwealth of Australia, 2025 Public Skills Australia

3. Communicate details of the incident.	3.1. Accurately convey incident details to emergency services. 3.2. Report details of incident in line with appropriate workplace or site procedures. 3.3. Complete applicable workplace or site documentation, including incident report form. 3.4. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
4. Review the incident.	4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required. 4.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and not equivalent to HLTAID003 Provide first aid

Assessment Requirements for HLTAID011 Provide First Aid

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
  - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
  - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
  - responding appropriately in the event of regurgitation or vomiting
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
  - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
  - anaphylaxis
  - asthma
  - non-life-threatening bleeding
  - choking
  - envenomation, using pressure immobilisation
  - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques
  - minor wound cleaning and dressing
  - nosebleed
  - shock

© Commonwealth of Australia, 2025 Public Skills Australia

- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
  - identifying the casualty's illness or injury through history, signs and symptoms
  - using personal protective equipment (PPE) as required
  - providing appropriate first aid treatment
  - conveying incident details to emergency services or advising casualty on any required post incident action
  - providing an accurate verbal and written report of the incident
  - reviewing the incident.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
  - ARC guidelines relevant to the provision of first aid
  - first aid guidelines from Australian national peak clinical bodies
  - potential incident hazards and risk minimisation processes when providing first aid
  - infection control procedures, including use of standard precautions and resuscitation barrier devices
  - requirements for currency of skill and knowledge
  - first aid codes of practice
  - appropriate workplace or site procedures relevant to the provision of first aid
  - contents of first aid kits
- legal, workplace and community considerations including:
  - duty of care requirements
  - own skills and limitations
  - consent and how it relates to the conscious and unconscious casualty
  - privacy and confidentiality requirements
  - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
  - upper airway and effect of positional change
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - safety and maintenance procedures for an AED
  - chain of survival
  - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
  - how to recognise that a casualty is unconscious and not breathing normally

© Commonwealth of Australia, 2025 Public Skills Australia

  - rate, ratio and depth of compressions and ventilations
  - correct hand positioning for compressions
  - basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- signs, symptoms and management of the following conditions and injuries:
  - allergic reaction
  - anaphylaxis
  - asthma
  - non-life-threatening and life-threatening bleeding
  - burns
  - cardiac conditions, including chest pain
  - choking
  - diabetes
  - drowning
  - envenomation - all current treatments
  - eye injuries
  - fractures, dislocations, strains and sprains
  - head, neck and spinal injuries
  - hypothermia
  - hyperthermia
  - minor wounds
  - nose-bleed
  - poisoning
  - seizures
  - shock
  - sharps injuries
  - stroke.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device

© Commonwealth of Australia, 2025 Public Skills Australia

- AED training devices
- workplace first aid kit
- placebo bronchodilator and spacer device
- different types of wound dressings and bandages
- blankets and items to treat for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other applicable workplace or site incident report form.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTPOP026 Monitor and maintain sewage or effluent systems

Modification History

Release	Comments
Release 2	Release 2. HLTPOP026 Monitor and maintain sewage or effluent systems supersedes and is equivalent to Release 1. HLTPOP026 Monitor and maintain sewage or effluent systems. Minor changes. Mapping Info Table Notes added for superseded unit HLTPOP002 Monitor and maintain sewage systems.
Release 1	Release 1. HLTPOP026 Monitor and maintain sewage or effluent systems supersedes and is equivalent to HLTPOP002 Monitor and maintain sewage systems.

Application

This unit describes the skills and knowledge required to identify the basic way in which sewage systems function and the strategies needed to maintain sewage systems in the community.

This unit applies to work in a public health context and workers at this level will work under supervision and within defined guidelines.

Plumbing work must only be performed by a person authorised by an exemption registration or licence granted by the relevant State or Territory regulatory authority under legislation.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

Elements and Performance Criteria

ELEMENTS	**PERFORMANCE CRITERIA**
Elements describe the essential outcomes	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify potential problems and faults with sewage systems in the community.	1.1. Identify components of the sewage system in the community. 1.2. Check for signs of contamination and identify potential problems that can occur with sewage systems and household plumbing and fixtures, including septic tanks.
2. Monitor and maintain	2.1. Identify strategies required to prevent the transmission of

© Commonwealth of Australia, 2025 Public Skills Australia

the sewage system.

disease through sewage disposal.

2.2. Assist in the development and implementation of a work plan in relation to the identified sewage system strategies, including the use of personal protective equipment (PPE) and in accordance with workplace health and safety (WHS) standards.

2.3. Report any difficulties or problems to supervisor in accordance with organisational policy and procedures.

2.4. Refer any problems or difficulties that are outside own area of responsibility or expertise to appropriate people or agencies.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Release	Comments

Assessment Requirements for HLTPOP026 Monitor and maintain sewage or effluent systems

Modification History

Release	Comments
Release 2	Release 2. HLTPOP026 Monitor and maintain sewage or effluent systems supersedes and is equivalent to Release 1. HLTPOP026 Monitor and maintain sewage or effluent systems. Minor changes. Mapping Info Table Notes added for superseded unit HLTPOP002 Monitor and maintain sewage systems.
Release 1	Release 1. HLTPOP026 Monitor and maintain sewage or effluent systems supersedes and is equivalent to HLTPOP002 Monitor and maintain sewage systems.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify at least two potential health risks or problems associated with sewage systems and develop and implement a work plan that includes strategies to deal with each issue.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational requirements relating to sewage systems work, including:
  - infection control
  - manual handling
  - workplace health and safety standards (WHS)
  - personal protective equipment use
  - reporting requirements
  - scope of own role and responsibilities
  - approvals required and process of obtaining approvals
  - referral agencies and procedures
- household plumbing design and fixtures and the way in which effluent and sullage waste leaves the house or building to go out to the waste disposal system
- water and sewage plans for the community, if available

© Commonwealth of Australia, 2025 Public Skills Australia

- type, design and components of the sewage system in the community and how they function, including:
  - septic or onsite systems
  - sewage or effluent systems
- what sewage is and the difference between effluent black water and sullage grey water
- causes of common faults, risks and problems associated with household plumbing and sewage systems and how to identify and prevent them
- sewage disposal strategies for communities or outstations without a sewage disposal system including:
  - onsite or septic system
  - sewage or effluent system
  - grease trap and soakage pit
  - pit toilets and shallow trench latrines.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies.

Assessment must ensure access to:

- use of suitable facilities, equipment and resources, including:
  - work health and safety (WHS) standards
  - personal protective equipment (PPE)
  - organisational guidelines and procedures.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

ICAICT206A Install software applications

Modification History

Release	Comments
Release 1	This Unit first released with *ICA11 Information and Communications Technology Training Package version 1.0*

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to select, install or upgrade basic commercial software applications.

Application of the Unit

This unit applies to workers who require the information and communications technology (ICT) skills to select, install and upgrade basic commercial software applications within a small to large office environment. Communicating effectively and supporting software application packages are key components of any ICT business or office environment.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
Elements describe the essential outcomes of a	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised*

Element	Performance Criteria
unit of competency.	*text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Determine software or software upgrade requirements	1.1 Document ***client*** requirements and report to ***appropriate person*** 1.2 Act on instructions to meet client requirements, according to ***organisational requirements***
2. Obtain software or software upgrade	2.1 Investigate and select a ***software application program*** that best conforms to requirements and organisational policies 2.2 Obtain application program under instruction from appropriate ***person*** 2.3 Determine ***licensing requirements*** and record, according to organisational guidelines 2.4 Ensure target ***computer*** conforms to the minimum hardware and ***operating system*** requirements of the ***application program***
3. Install or upgrade software	3.1 Install new or upgraded ***software application program*** according to ***appropriate person*** or organisational instructions 3.2 Complete the installation process efficiently and effectively to minimise disruption 3.3 Carry out testing and acceptance, according to corporate guidelines, paying particular attention to possible ***effect*** on other systems 3.4 Ensure client requirements are satisfied 3.5 Refer outstanding ***client*** issues to ***appropriate person*** as necessary

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

© Commonwealth of Australia, 2025 Public Skills Australia

- communication skills to:
  - communicate with peers and supervisors
  - support software application deployment
- literacy skills to:
  - interpret user manuals and help functions
  - make decisions about licensing requirements
  - read and write basic workplace documents
  - seek assistance and expert advice
- technical skills to:
  - carry out testing
  - upload and install software
  - use computer hardware.

Required knowledge

- broad general knowledge of:
  - client business domain
  - hardware storage devices
  - input and output devices
  - licensing arrangements and responsibilities
  - operating systems supported by the organisation
  - organisational guidelines for purchasing
  - software application packages
  - software copyright responsibilities.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • install software applications through operating system instructions • configure computer to accept new software or upgrade

© Commonwealth of Australia, 2025 Public Skills Australia

	• carry out testing and acceptance according to corporate guidelines.
Context of and specific resources for assessment	Assessment must ensure access to: • PC where software installation may be performed • use of application software currently used in industry • documents detailing organisational testing and acceptance policy and procedures • appropriate learning and assessment support when required. Where applicable, physical resources should include equipment modified for people with special needs.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • verbal or written questioning to assess candidate's underpinning knowledge of software upgrade requirements, current industry standard application software and acceptance testing procedures • direct observation of candidate upgrading or installing new software.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate. Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed. Indigenous people and other people from a non-English speaking background may need additional support. In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Public Skills Australia

Client may include:	• employees • external organisations • individuals • internal departments.
Appropriate person may include:	• authorised business representative • client • supervisor.
Organisational requirements may include:	• budget • corporate purchasing • guidelines • licensing arrangements.
Software application program may include:	• database programs • email programs • internet browsers • spreadsheets • system browsers • word processing.
Licensing requirements may include:	• cost of licence • number of licences required • support provided • type of licence.
Computer may include:	• laptops • servers • workstations.
Operating system may include:	• Mac OS X • Linux • Windows.
Effect may relate to:	• data entry • effect on normal business • installation time • problems.

ICAICT302A Install and optimise operating system software

Modification History

Version	Comments
ICAICT302A	This version first released with *ICA11 Information and Communications Technology Training Package version 1.0*

Unit Descriptor

This unit defines the performance outcomes, skills and knowledge required to install operating system (OS) software and to make adjustments as a means of optimising the system to accommodate business and client needs.

Application of the Unit

This unit applies to individuals in a technical support role who are required to identify the most suitable OS to meet organisational requirements. The unit develops the ability to install, configure and optimise the OS to identified vendor specifications.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
Elements describe the essential outcomes of a	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised*

Element	Performance Criteria
unit of competency.	*text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Determine function of operating system	1.1 Identify and demonstrate understanding of the purposes of ***operating system***
	1.2 Distinguish between batch system, real-time system, multi-tasking system
	1.3 Compare and contrast different operating systems and their features
	1.4 Identify and demonstrate knowledge of the basic functions of operating system, including file system, memory management, process scheduling
	1.5 Identify and demonstrate management of virtual memory
2. Obtain operating system	2.1 Contact operating system vendors to obtain technical specifications and system requirements
	2.2 Identify the process and steps required to install and configure the operating system using ***installation components***
	2.3 Document adjustment recommendations and provide to ***appropriate person***
	2.4 Determine and apply knowledge of licensing, hardware and security requirements
3. Install, configure and optimise operating system	3.1 Install, configure and test operating system using installation components and ***boot-utility options***
	3.2 Use the relevant ***operating system user interface*** to correctly configure the installation
	3.3 Optimise the system to meet ***organisational requirements***
	3.4 Document the system according to organisational requirements
	3.5 Install the operating system with minimal disruption to ***client*** or users
4. Provide instruction to meet new software	4.1 Provide one-to-one instruction about changes to the client or users as required

© Commonwealth of Australia, 2025 Public Skills Australia

requirements	4.2 Obtain client evaluation about new system to ensure requirements are met, using appropriate ***feedback mechanism***

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - liaise with people working across different levels and in different contexts, such as operating system vendors and clients
- literacy skills to:
  - interpret technical computer installation manuals
  - obtain written and verbal feedback from clients
  - present information, such as the use of diagnostic tools
  - provide verbal instructions to client
- technical skills to:
  - install and configure operating system software
  - write instructions for clients.

Required knowledge

- current industry-accepted hardware and software products
- functions and features of operating systems used by the organisation
- installation and configuration of systems software
- architecture of current technical systems
- deployment of current organisational systems
- organisational requirements for operating system software
- prerequisites for system software installation
- set-up and configuration procedures
- software packages supported by the organisation
- system's current functionality
- system's diagnostic software
- vendor specifications and requirements for installation.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Public Skills Australia

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • install, configure and test an operating system to improve system performance with minimum disruption to clients.
Context of and specific resources for assessment	Assessment must ensure access to: • personal computer where installation may be performed • OS software and technical documentation • organisational documentation • appropriate learning and assessment support when required • modified equipment for people with special needs.

Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:
	• direct observation of candidate:
	  • questioning team members, supervisors and clients
	  • installing and testing an operating system
	• review of candidate's practical assignments and reports.

Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate. Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed. Indigenous people and other people from a non-English speaking background may need additional support. In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Operating system may include:	• Linux:
	  • Debian
	  • Fedora
	  • Google Chrome OS
	  • Kubuntu
	  • Linux Mint
	  • Red Hat
	  • Ubuntu
	• Mac OS X
	• Microsoft Windows:
	  • Windows 2000
	  • Windows XP (32 bit versus 64 bit)
	  • Windows Vista (32 bit versus 64 bit)
	  • Windows 7 (32 bit versus 64 bit)
	• mobile operating systems:
	  • Android
	  • Blackberry
	  • iPhone
	  • Palm
	  • Symbian
	  • Windows Phone 7 series.

Installation components may include:	• configure power management:
	  • hibernate
	  • sleep timers
	  • standby
	  • suspend
	  • wake on local area network (LAN)
	• demonstrate safe removal of peripherals
	• device manager:
	  • driver signing
	  • install and update devices drivers

© Commonwealth of Australia, 2025 Public Skills Australia

	• verify
	• directory structures:
	  • create folders
	  • navigate directory structures
	• disk preparation order:
	  • format drive
	  • partition
	  • start installation
	• files:
	  • attributes
	  • creation
	  • extensions
	  • permissions
	• file systems, such as FAT32 versus new technology file system (NTFS)
	• installation methods:
	  • boot media, such as DVD, CD, floppy or universal serial bus (USB)
	  • factory recovery partition
	  • install from image
	  • network installation
	  • recover CD
	• operating system installation options:
	  • file system type
	  • network configuration
	  • repair install
	• user data migration - user state migration tool (USMT)
	• verification of hardware compatibility and minimum requirements
	• virtual memory.

Appropriate person may include:	• authorised business representative • client • supervisor.
Boot-utility options may include:	• automated system recovery (ASR) • boot options • boot to restore point • disk boot order or device priority • emergency repair disk (ERD) • recovery console • recovery options • safe mode

© Commonwealth of Australia, 2025 Public Skills Australia

	• types of boot devices (disk, network, USB).

Operating system user interface may include:	• Windows-adopting interface to undertake similar tasks with chosen operating system:
	  • administrative tools, such as performance monitor, event viewer, services and computer management
	  • command prompt utilities, such as ipconfig, Ping and Telnet
	  • control panel
	  • location of basic network settings between OS versions
	  • MMC
	  • my computer
	  • my network places or home group
	  • run line utilities:
	  • cmd
	  • direct diagnostics (DXdiag)
	  • msconfig
	  • MSINFO32
	  • REGEDIT
	  • start menu
	  • task bar or systray
	  • task manager
	  • Windows Explorer - Libraries in Windows 7.

Organisational requirements may include:	• availability of system to be optimised • client support documentation • in-house or vendor • contracting arrangements relating to IT purchasing • IT policy and procedures relating to service levels and installation • level of complexity of technical manuals.
Client may include:	• department within the organisation • person with special needs • person within a department • third party.
Feedback mechanism may include:	• interview • meeting • questionnaire • survey.

ICAICT303A Connect internal hardware components

Modification History

Release	Comments
Release 1	This Unit first released with *ICA11 Information and Communications Technology Training Package version 1.0*

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to modify and connect system hardware components according to client and user requirements.

Application of the Unit

This unit applies to support technicians who modify and connect system components. Ensuring the integrity of the system after the operation is critical in the context of minimising client disruption and need for continuing desktop operation.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills*

© Commonwealth of Australia, 2025 Public Skills Australia

Element	Performance Criteria
	and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Identify, categorise and distinguish between the different types of internal hardware components	1.1 Identify and categorise the different ***internal hardware components*** 1.2 Explain the purpose and characteristics of the different internal hardware component categories 1.3 Distinguish between the different types of devices within each internal hardware component category
2. Determine components required	2.1 Identify and clarify user internal hardware component requirements according to ***organisational guidelines*** 2.2 Organise and record user component requirements, pass on to ***appropriate person*** for evaluation and vendor selection
3. Obtain components	3.1 Contact vendors to obtain technical specifications for the proposed components 3.2 Assess the options and provide recommendations to the appropriate person for final analysis 3.3 Obtain components to prepare for installation
4. Install components	4.1 Develop plans, with prioritised tasks and contingency arrangements, for the installation of selected components with minimum disruption to ***clients*** 4.2 Liaise with appropriate person to obtain approval for the plans 4.3 Install and configure components according to plan, installation procedures and ***organisational requirements*** 4.4 Test components for error-free performance, using available technology 4.5 Identify and resolve identified problems 4.6 Test and enhance system performance, using knowledge of the system, to meet organisational benchmarks 4.7 Document the installation and configuration process according to organisation guidelines
5. Evaluate modified	5.1 Collect client or user feedback and analyse against client

© Commonwealth of Australia, 2025 Public Skills Australia

system	requirements 5.2 Correct identified shortcomings in the system and record actions

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with peers and supervisors, and internal and external clients
  - interpret technical computer installation manuals
  - interpret user manuals and help functions
- literacy skills to:
  - organise resources for one-to-one instruction
  - plan, prioritise and organise work
  - write technical reports and maintain records
- planning and organisational skills to address technical issues
- problem-solving skills to anticipate and respond to a range of driver-related errors that may arise
- technical skills to:
  - comprehend how the operating system will communicate with the installed component
  - install components
  - test components using available technology
  - test system performance.

Required knowledge

- areas of the operating system relevant to configuration and testing
- current industry-accepted hardware and software products
- environmental considerations in e-waste disposal
- organisational guidelines and organisational requirements with regard to safety, recycling and component installation
- system's diagnostic software and current functionality
- vendor specifications and requirements for component installation.

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • identify and categorise the different types of internal hardware components • modify system's hardware to meet client requirements • plan the modification and connect internal hardware components according to vendor and technical specifications • install components across a variety of situations and account for unexpected contingencies.
Context of and specific resources for assessment	Assessment must ensure access to: • personal computer and internal hardware components for installation • current industry standard performance testing software • documents detailing organisational guidelines and requirements • technical manuals and tools • appropriate learning and assessment support when required • modified equipment for people with special needs. Note: The careful planning and promotion of hardware upgrades and changes are critical to the effective support of business functions. Hardware modifications need to be risk managed similar to other business processes. The effective management and execution of the component maintenance and replacement process may significantly determine the amount of downtime a company encounters.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • verbal or written questioning to assess candidate’s knowledge of system diagnostic software and system functionality • direct observation of candidate connecting internal hardware components • evaluation of client requirements and candidate’s final recommendations

© Commonwealth of Australia, 2025 Public Skills Australia

	• review of candidate's written notes. Note: Evidence for assessment from industry or vendor-certified training may be presented for the whole or part of this unit depending on the range of variables and performance criteria.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate. Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed. Indigenous people and other people from a non-English speaking background may need additional support. In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Internal hardware components may include:	• adapter card components:
	  • communications:
	  • modem
	  • network interface card (NIC)
	  • I/O:
	  • parallel
	  • small computer system interface (SCSI)
	  • serial
	  • universal serial bus (USB)
	  • multimedia:
	  • capture cards
	  • sound card
	  • TV tuner cards
	  • video:

© Commonwealth of Australia, 2025 Public Skills Australia

	• AGP • peripheral component interconnect (PCI) • PCIe • cooling system components: • CPU and case fans • heat sinks • liquid cooling systems • thermal compound • CPU components and features: • 32 bit versus 64 bit • hyper threading • identify CPU types: • AMD • Intel • multi-core: • dual core • quad core • triple core • onchip cache: • L1 • L2 • speed (real versus actual) • display device components: • connector types: • component or RGB • DVI pin compatibility • HDMi • S-Video • VGA • LCD technologies: • contrast ratio • native resolution • resolution (e.g. XGA, SXGA+, UXGA, WUXGA) • projectors, CRT and LCD • settings: • degauss • multi-monitor • refresh rate • resolution

© Commonwealth of Australia, 2025 Public Skills Australia

	• memory components and features:
	  • ECC versus non-ECC
	  • parity versus non-parity
	  • single channel versus dual channel
	  • single sided versus double-sided
	  • speed:
	  • PC100
	  • PC133
	  • PC2700
	  • PC3200
	  • DDR3-1600
	  • DDR2-667
	  • types:
	  • DRAM
	  • SRAM
	  • SDRAM
	  • DDR or DDR2 or DDR3
	  • RAMBUS
	• motherboard components:
	  • basic input/output system (BIOS), complementary metal oxide semiconductor (CMOS) or Firmware:
	  • CMOS battery
	  • POST
	  • bus architecture
	  • bus slots:
	  • AGP
	  • AMR
	  • CNR
	  • PCI
	  • PCIe
	  • Personal Computer Memory Card International Association (PCMCIA)
	  • chipsets
	  • contrast RAID (levels 0, 1, 5)
	  • form factor:
	  • ATX or BTX
	  • micro ATX
	  • NLX
	  • I/O interfaces:
	  • IEEE 1394 or Firewire

© Commonwealth of Australia, 2025 Public Skills Australia

	• modem • NIC • parallel • PS/2 • serial • sound • USB 1.1 and 2.0 • video • memory slots: • DIMM • RIMM • SIMM • SODIMM • parallel advanced technology attachment (PATA): • EIDE • IDE • processor sockets • riser card or daughterboard • serial advanced technology attachment (SATA) • eSATA • power supply components: • AC adapter • ATX proprietary • pins (20, 24) • voltage selector switch • voltage, wattage and capacity • storage devices and backup media components: • floppy disk drive (FDD) • hard disk drive (HDD): solid state versus magnetic • optical drives, such as CD, DVD, RW or blu-ray • removable storage: • external CD-RW and hard drive • hot swappable devices and non-hot swappable devices • solid state (e.g. thumb drive, flash, SD cards, USB) • tape drive.
Organisational guidelines may include:	• communication methods • content of emails • dispute resolution • document procedures and templates • downloading information and accessing particular websites

© Commonwealth of Australia, 2025 Public Skills Australia

	• financial control mechanisms • opening mail with attachments • personal use of emails and internet access • virus risk.
Appropriate person may include:	• authorised business representative • client • supervisor.
Clients may include:	• department within the organisation • person within a department • third party.
Organisational requirements may include:	• how and what the organisation wants in regard to work environment • preventative maintenance and diagnostic policy • problem solution processes • roles and technical responsibilities in the IT department • vendor and product service level support agreements.

ICASAS203A Connect hardware peripherals

Modification History

Release	Comments
Release 1	This Unit first released with *ICA11 Information and Communications Technology Training Package version 1.0*

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to connect hardware peripherals according to instructions.

Application of the Unit

This unit applies to workers who require the information and communications technology (ICT) skills to connect a variety of hardware peripherals to different configurations and types of ICT equipment. Communicating effectively, and simplifying and solving technical incompatibility conflicts and problems are key components of this ICT support role.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
Elements describe the essential outcomes of a	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text*

Element	Performance Criteria
unit of competency.	*is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Confirm client requirements	1.1 Identify and confirm ***peripheral*** requirements of ***client*** according to ***organisational standards***
	1.2 Document client requirements and peripherals needed and report findings to the appropriate person according to organisational standards
	1.3 Verify client requirements with ***appropriate person*** according to organisational standards and reporting procedures
	1.4 Take action to ensure client support expectations are covered by vendor warranty and support services
2. Obtain required peripherals	2.1 Obtain peripherals under instruction from appropriate person
	2.2 Enter details of peripherals into ***equipment inventory*** according to organisational standards
	2.3 Validate that contents of delivered components and physical contents match the packing list and resolve discrepancies if necessary
	2.4 ***Store*** peripherals according to vendors guidelines
3. Connect hardware peripherals	3.1 Verify timeframe for installation schedule with client
	3.2 Remove old peripherals with minimal disruption to clients if they are to be replaced, taking into account ***environmental considerations*** and ***OHS standards***
	3.3 Connect new peripherals with minimum disruption to clients, taking into account ***operating system*** procedures
	3.4 Configure computer to accept new peripherals
	3.5 Test hardware peripherals and confirm client satisfaction, paying particular attention to possible effect on other systems and making adjustments as required

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- customer service and conflict-resolution skills to:
  - ensure proposed actions are consistent with client's expectations
  - transfer and collect information
- literacy skills to:
  - document client requirements
  - follow vendor guidelines
  - present information
  - update equipment inventory
- negotiation skills to interact with other team members and clients
- problem-solving skills to resolve routine installation and configuration issues
- technical skills and decision-making skills to:
  - ensure compatibility of peripherals with operating system
  - remove and install peripherals
  - undertake maintenance procedures.

Required knowledge

- broad general knowledge of:
  - computer operating systems
  - help desk and maintenance practices
  - peripheral devices
  - OHS procedures for electrical equipment
  - interconnectivity of technical system components
- current industry-accepted hardware and software products
- detailed knowledge of inventory procedures
- organisational guidelines relating to external suppliers and vendors.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Public Skills Australia

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • safely connect several different types of hardware peripherals to the system according to vendor instructions with a minimum of downtime using known routines and procedures • locate, interpret and use vendor documentation related to connection and storage of hardware peripherals • test operation of newly installed hardware peripherals and confirm client satisfaction • adhere to OHS regulations when working with electrical equipment.
Context of and specific resources for assessment	Assessment must ensure access to: • sites with a representative range of workstations, hardware peripherals, internet connections, cabling, and software to be installed, interconnected and configured • hardware and software currently used in industry • technical documentation, including organisational hardware blueprint • vendor support • appropriate learning and assessment support when required. Where applicable, physical resources should include equipment modified for people with special needs.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct observation of candidate installing, connecting and configuring hardware peripheral devices • review of reports that document client requirements and peripherals completed for different scenarios and situations • verbal or written questioning to assess candidate's ability to locate, use and interpret vendor documentation • direct observation of candidate testing hardware peripherals added to a system.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate. Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed. Indigenous people and other people from a non-English speaking

	background may need additional support. In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Peripheral may include:	• Bluetooth device • firewire (IEEE 1394) device • hard drive • keyboard • laptop • mobile phone • modem • mouse • multimedia kit • pen • personal digital assistant (PDA), such as palmtop • printer • scanner • speaker • tape cartridge • touch pad • universal serial bus (USB) device • wireless fidelity (wi-fi) router.
Client may include:	• external organisations • individuals • internal departments.
Organisational standards may include:	• communication methods • content of emails • dispute resolution • document procedures and templates • downloading information and accessing particular websites • financial control mechanisms

© Commonwealth of Australia, 2025 Public Skills Australia

	• opening mail with attachments • personal use of emails and internet access • virus risk.
Appropriate person may include:	• authorised business representative • client • help-desk person • subject matter expert • supervisor • system administrator.
Equipment inventory may include detailed lists of peripherals, including:	• hard drives • hubs • modems or other connectivity devices • monitors • other peripheral devices • personal computers • PDA • printers • switches.
Store may include:	• anti-static packaging • controlled humidity • controlled temperature • secure storage area • shock and vibration minimisation • silica gel desiccant • stacking limits.

Environmental considerations may include:	• recycling of packaging:
	  • cardboard
	  • paper
	  • polystyrene
	• recycling or disposal of ewaste:
	  • cathode ray tube (CRT) monitors
	  • printed circuit boards
	  • redundant hardware.

OHS standards may include:	• electrical safety • safe lifting methods • ventilation.
Operating system may include:	• GNUs Not Unix (GNU) • Linux • Mac OS X • Microsoft Windows

© Commonwealth of Australia, 2025 Public Skills Australia

	• Unix-like operating systems:
	  • HP-UX
	  • IBM AIX
	  • Silicon Graphics IRIX
	  • Sun Solaris.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - clarify instructions
  - communicate with peers and supervisors
  - present information
  - seek assistance and expert advice
- literacy skills to:
  - interpret user manuals, technical documentation and help functions
  - read and write basic workplace documents
- problem-solving skills to address common operational problems when carrying out system backup and recovery
- technical skills to perform:
  - backup and recovery operations
  - basic diagnostic tests in system integrity.

Required knowledge

- broad knowledge of:
  - organisational standards regarding:
    - backup and recovery procedures and operations
    - label and store backups
  - current industry-accepted hardware and software products
  - current viruses and protection methods
  - diagnostic tools
  - inventory procedures
  - maintenance procedures
  - storage and retrieval guidelines
  - system performance
- software copyright and general public licence (GPL) or copyright responsibilities.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Public Skills Australia

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • protect and secure stand-alone or networked client-server environments and operating systems according to system maintenance procedures • undertake system and file backup, recovery delete and archive according to backup and recovery procedures • check computers to ensure software compliance.
Context of and specific resources for assessment	Assessment must ensure access to: • sites with a representative range of stand-alone and networked client-server environments and operating systems • antivirus software • technical records and documentation • appropriate learning and assessment support when required. Where applicable, physical resources should include equipment modified for people with special needs.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct observation of candidate undertaking file backup and recovery • direct observation of candidate performing virus scans and virus removal • review of documented reports on backup results • review organisational backup schedules • review software licence records • verbal or written questioning to assess candidate's knowledge of maintaining and updating virus protection software and checking computers for software copyright compliance.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate. Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed. Indigenous people and other people from a non-English speaking background may need additional support. In cases where practical assessment is used it should be combined

© Commonwealth of Australia, 2025 Public Skills Australia

	with targeted questioning to assess required knowledge.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Backup schedule may occur:	• evenings • weekdays • weekends • monthly • yearly • or a combination.
Storage media may include:	• CD and DVD • external storage devices, such as universal serial bus (USB) flash drive • internal storage devices.
Hardware may include:	• networked systems • personal computers • tools to perform tape backups.
Organisational standards may include:	• backup procedures • GPL and copyright licences • reporting of non-compliant software • restore and security procedures • software licence documentation • virus scanning and removal procedures.
Appropriate person may include:	• authorised business representative • client • supervisor • system administrator.
Virus protection may include:	• freeware • online • open source • proprietary software: • BitDefender

© Commonwealth of Australia, 2025 Public Skills Australia

	• CA Vet Antivirus • Kaspersky Antivirus • McAfee VirusScan • Panda Antivirus • Symantec Norton Antivirus.

Operating system may include:	• GNUs Not Unix (GNU)
	• Linux
	• Mac OS X
	• Microsoft Windows
	• Unix-like operating systems:
	  • HP-UX
	  • IBM AIX
	  • Silicon Graphics IRIX
	  • Sun Solaris.

Licensed software may include:	• corporate licences • educational licences • freeware • open source • shareware licences • single-user licences • user-restrictive licences.

Software may include:	• application:
	  • database
	  • internet browser
	  • spreadsheet
	  • word-processing
	• commercial
	• customised
	• in-house
	• programming:
	  • assembler
	  • compiler
	  • development tools
	• system:
	  • computer security
	  • device drivers
	  • operating system.

ICTICT103 Use, communicate and search securely on the internet

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to connect to the internet, securely send and receive emails, search the internet using web browsers and interact securely and in a socially responsible manner with a range of different internet sites.

It applies to individuals who use business technology to perform a range of routine tasks in the workplace or home office with limited responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Connect to and access the internet	1.1 Connect to internet via existing internet connection and confirm functionality 1.2 Open internet browser and set home page of personal choice by setting internet options 1.3 Ensure internet browser software security 1.4 Adjust display of the internet browser to suit personal requirements

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.5 Modify toolbar to meet user and internet browser needs 1.6 Access a particular website, note privacy and other conditions of use, and retrieve data 1.7 Use socially responsible behaviour when sharing information on the internet 1.8 Enter uniform resource locator (URL) in address line of internet browser
2. Use email for communications	2.1 Open email application package, create new email message and add addressees 2.2 Compose text of an email message according to organisational guidelines, and spell check and edit text as required 2.3 Create and add an automatic signature for the user 2.4 Attach files to email message where required 2.5 Determine and set priority and send email message 2.6 Reply to and forward a received message using available features 2.7 Open and save an attachment to the relevant folder 2.8 Search for, sort and save email message using available settings 2.9 Adjust email accounts to restrict and quarantine possible email security problems 2.10 Print email message as required
3. Search the internet	3.1 Review organisational guidelines on internet access 3.2 Open internet application and locate and access a search engine on the internet, and define search expressions based on data required 3.3 Enter appropriate key words into the search engine to locate desired information 3.4 Refine a search depending on outcomes of original search 3.5 Save search expression results and present them in a report according to information requirements 3.6 Create a bookmark within the internet browser or a link for the required web page for the key results 3.7 Save key results in a bookmark folder 3.8 Modify internet browser options for printing and print a

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	web page 3.9 Close internet browser
4. Access and use consumer specific sites on the internet	4.1 Identify, access and review information specific sites to gain consumer information 4.2 Identify and use internet application sites to lodge details and gain access and information 4.3 Access and use online forms on the internet
5. Undertake online transactions	5.1 Access online transaction site 5.2 Ensure security of transaction site 5.3 Enter required information into fields on merchant's website 5.4 Ensure pop-up dialog boxes, prompts or feedback mechanisms are completed 5.5 Enter, check and make changes to preferred transaction options 5.6 Complete online transaction 5.7 Record and archive receipts according to business processes 5.8 Close down and leave transaction process
6. Conduct an advanced search	6.1 Use search tools and advanced search features 6.2 Use Boolean search techniques when required to enhance the search 6.3 Use multiple or meta-search tools with a range of key words 6.4 Use search engines particular to a field of knowledge to refine the outcome 6.5 Access related virtual community sites and newsgroups, and note their objectives and operational arrangements 6.6 Conduct a search with domain names to refine the search
7. Use information that has been located	7.1 Cross reference information found by using several websites to determine accuracy of information 7.2 Check date that website was last updated or properties of website to determine currency of information 7.3 Determine website authority by looking at copyright statements, privacy statements and organisational information 7.4 Save and print information found in different file forms

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 1.6, 2.1, 2.6-2.8, 3.1, 3.2, 4.1-4.3, 5.1, 5.2, 5.4, 5.5, 6.5, 7.1-7.3	• Interprets textual information and instructions to efficiently undertake the task
Writing	2.1-2.3, 3.5, 5.3, 5.4, 5.7	• Uses required format to accurately enter information specific to requirements • Composes short and specific messages using format, grammar and language appropriate to audience
Navigate the world of work	1.7	• Understands main responsibilities and boundaries of own role
Get the work done	1.1-1.8, 2.1, 2.3-2.10, 3.2-3.9, 4.1-4.3, 5.1-5.8, 6.1-6.6, 7.4	• Plans routine tasks with familiar goals and outcomes, taking limited responsibility for decisions regarding sequencing • Understands the purpose and specific functions of common digital tools used in work contexts • Recognises and responds to common operational problems when using web browsers • Takes responsibility for routine low-impact decisions within familiar situations • Implements basic security requirements related to own tasks

Assessment Requirements for ICTICT103 Use, communicate and search securely on the internet

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- connect to and access the internet
- send and receive emails
- secure internet access and email communications
- use search tools to locate information
- use different internet search techniques
- research and select appropriate website
- undertake online transactions
- assess the accuracy, currency, authority and reliability of the site and information located.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must :

- list basic technical terminology related to reading help files and prompts
- describe the basics of copyright and privacy statements
- explain different types of messages that occur, including error messages and messages to install plug-ins
- list different types of search engines and web browsers
- list procedures for using email applications
- list procedures for evaluating and assessing the authority, reliability and authenticity of information
- outline internet search functions
- describe internet speed and traffic loads related to times of accessing the internet
- describe the makeup and structure of internet addresses

© Commonwealth of Australia, 2025 Public Skills Australia

- list organisational guidelines on internet and email use (web etiquette or netiquette)
- describe business process related to online transactions
- describe web browser update techniques
- explain what key words and bookmarks are used for.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a personal computer or digital device with internet
- search engines currently used in industry
- organisational policies on internet usage.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT206 Install software applications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to select, install or upgrade basic commercial software applications.

It applies to individuals who require basic information and communications technology (ICT) skills to undertake related tasks under supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine software or software upgrade requirements	1.1 Document client requirements and report to appropriate person 1.2 Act on instructions to meet client requirements, according to organisational requirements
2. Obtain software or software upgrade	2.1 Investigate and select a software application program that best conforms to requirements and organisational policies 2.2 Obtain application program under instruction from appropriate person

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3 Determine licensing requirements and record, according to organisational guidelines 2.4 Ensure target computer conforms to the minimum hardware and operating system requirements of the application program
3. Install or upgrade software	3.1 Install new or upgraded software application program according to appropriate person or organisational instructions 3.2 Complete the installation process efficiently and effectively to minimise disruption 3.3 Carry out testing and acceptance, according to organisational guidelines, paying particular attention to possible effect on other systems 3.4 Ensure client requirements are satisfied 3.5 Refer outstanding client issues to appropriate person as necessary

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 2.3	• Uses available literature to appropriately address requirements • Interprets and responds to complex text to ascertain and confirm requirements
Writing	1.1, 2.3	• Records key information relevant to requirements, using basic punctuation, text and correct spelling
Oral Communication	1.1, 2.2, 3.1, 3.4, 3.5	• Uses listening and questioning techniques to confirm understanding of requirements • Uses clear and specific language to convey requirements
Navigate the world of work	2.1	• Takes some personal responsibility for adherence to organisational requirements
Get the work done	1.2, 2.1, 2.2, 2.4, 3.1-3.3	• Follows routine procedures for using digital technology to enter, store and retrieve information directly relevant to role • Understands purposes, specific functions and key

© Commonwealth of Australia, 2025 Public Skills Australia

		features of common digital systems and tools, and operates them effectively to complete routine tasks • Plans routine tasks with familiar goals and outcomes, taking some limited responsibility for decisions regarding sequencing

Assessment Requirements for ICTICT206 Install software applications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- install software applications through operating system instructions
- configure computer to accept new software or upgrade
- carry out testing and acceptance according to organisational guidelines.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe a typical client business domain
- identify typical hardware storage devices
- identify typical input and output devices
- describe key licensing arrangements and responsibilities to ensure they are adhered to
- identify operating systems supported by the organisation
- describe the organisational guidelines for purchasing
- identify the installation requirements for key software application packages
- describe typical software copyright responsibilities.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- a personal computer (PC) where software installation may be performed

© Commonwealth of Australia, 2025 Public Skills Australia

- application software currently used in industry
- documents detailing organisational testing and acceptance policy and procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT302 Install and optimise operating system software

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit defines the skills and knowledge required to install, configure and optimise operating system (OS) software to meet business and client needs.

It applies to individuals who may work under supervision and support others using well developed skills in creating solutions through analysis and evaluation of information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine function of operating system	1.1 Identify and demonstrate understanding of the purposes of operating system 1.2 Distinguish between batch system, real-time system and multi-tasking system 1.3 Compare and contrast different operating systems and their features 1.4 Identify and demonstrate knowledge of the basic functions of operating system, including file system, memory

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	management, process scheduling 1.5 Identify and demonstrate management of virtual memory
2. Obtain operating system	2.1 Contact operating system vendors to obtain technical specifications and system requirements 2.2 Identify process and steps required to install and configure the operating system using installation components 2.3 Document adjustment recommendations and provide to appropriate person 2.4 Determine and apply knowledge of licensing, hardware and security requirements
3. Install, configure and optimise operating system	3.1 Install, configure and test operating system using installation components and boot-utility options 3.2 Use the relevant operating system user interface to correctly configure the installation 3.3 Optimise the system to meet organisational requirements 3.4 Document the system according to organisational requirements 3.5 Install the operating system with minimal disruption to client or users
4. Provide instruction to meet new software requirements	4.1 Provide one-to-one instruction about changes to the client or users as required 4.2 Obtain client evaluation about new system to ensure requirements are met, using appropriate feedback mechanism

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3-1.5, 2.1, 2.2, 2.4, 3.1, 3.2, 4.2	• Identifies, analyses and evaluates a range of on-line and hard-copy text containing complex, OS specific terminology, and applies the information to the selection, installation, configuration and optimisation of operating systems

© Commonwealth of Australia, 2025 Public Skills Australia

		• Interprets and comprehends a large range of syntax, diagrams, icons, symbols, text, numbers and letters necessary to install and configure operating systems
Writing	2.3, 3.4	• Uses the correct spelling and grammar, clear plain English and systems related text to document recommendations and processes, and develop feedback tools
Oral Communication	2.1, 3.5, 4.1, 4.2	• Elicits and evaluates information using OS related terminology and effective listening and questioning techniques • Uses simple and relevant language to liaise with clients, present information and obtain feedback
Navigate the world of work	2.4	• Takes some personal responsibility for adherence to legal and regulatory requirements, and seeks clarification when required
Get the work done	1.1-1.5, 2.1, 2.2, 3.1-3.3, 3.5	• Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency and considering how to link with the work of others • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks

Assessment Requirements for ICTICT302 Install and optimise operating system software

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- install, configure and test an operating system to improve system performance with minimum disruption to clients.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- compare current industry accepted hardware and software products
- outline functions and features of operating systems used by the organisation
- explain the installation and configuration of systems software
- explain the architecture of current technical systems
- outline the deployment of current organisational systems
- list organisational requirements for operating system (OS) software
- explain prerequisites for system software installation
- outline set-up and configuration procedures
- list software packages supported by the organisation
- describe system’s current functionality
- list system’s diagnostic software
- outline vendor specifications and requirements for installation.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

ICTICT303 Connect internal hardware components

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to acquire, install, configure and evaluate system hardware components according to client and user requirements.

It applies to individuals who work with a degree of self-sufficiency and provide support in a range of information and communications technology (ICT) work areas and activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify, categorise and distinguish between the different types of internal hardware components	1.1 Identify and categorise the different internal hardware components 1.2 Define the purpose and characteristics of the different internal hardware component categories 1.3 Distinguish between different types of devices within each internal hardware component category
2. Determine components required	2.1 Identify and clarify user internal hardware component requirements according to organisational guidelines

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.2 Organise and record user component requirements, pass on to appropriate person for evaluation and vendor selection
3. Obtain components	3.1 Contact vendors to obtain technical specifications for the proposed components 3.2 Assess options and provide recommendations to the appropriate person for final analysis 3.3 Obtain components to prepare for installation
4. Install components	4.1 Develop plans, with prioritised tasks and contingency arrangements, for the installation of selected components with minimum disruption to clients 4.2 Liaise with appropriate person to obtain approval for the plans 4.3 Install and configure components according to plan, installation procedures and organisational requirements 4.4 Test components for error-free performance, using available technology 4.5 Identify and resolve identified problems 4.6 Test and enhance system performance, using knowledge of the system, to meet organisational benchmarks 4.7 Document the installation and configuration process according to organisation guidelines
5. Evaluate modified system	5.1 Collect client or user feedback and analyse against client requirements 5.2 Correct identified shortcomings in the system and record actions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 3.2, 4.3, 5.1	• Identifies, interprets and evaluates online and hard copy documentation containing complex ICT related terminology, acronyms and concepts

© Commonwealth of Australia, 2025 Public Skills Australia

Writing	2.2, 3.2, 4.1, 4.7	• Uses correct spelling, grammar and plain English together with the ICT specific terminology and diagrams to convey recommendations and requirements, and complete organisational documentation
Oral Communication	1.1, 2.2, 3.1-3.3, 4.1, 4.2, 5.1	• Converts highly technical language and terminology into plain English to communicate ideas and plans, and gather feedback from clients • Uses effective listening and questioning techniques and technical terminology to elicit information and make the correct component selection
Navigate the world of work	2.1, 4.3	• Recognises and follows explicit protocols and meets expectations associated with own role
Get the work done	1.1, 1.3, 2.1, 2.2, 3.2, 3.3, 4.1, 4.4-4.6, 5.1, 5.2	• Initiates standard procedures when responding to familiar problems within immediate context • Recognises some general design and operating principles of digital tools and uses these to help when modifying systems and when troubleshooting • Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency

Unit Mapping Information

Assessment Requirements for ICTICT303 Connect internal hardware components

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and categorise the different types of internal hardware components
- modify system's hardware to meet client requirements
- plan modification of and connect internal hardware components according to vendor and technical specifications
- install components across a variety of situations and account for unexpected contingencies
- evaluate the system on completion.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe areas of the operating system relevant to configuration and testing
- compare current industry accepted hardware and software products
- outline environmental considerations in e-waste disposal
- outline organisational guidelines and organisational requirements with regard to safety, recycling and component installation
- outline system's diagnostic software and current functionality
- interpret vendor specifications and requirements for component installation.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

© Commonwealth of Australia, 2025 Public Skills Australia

- a personal computer and internal hardware components for installation
- current industry standard performance testing software
- documents detailing organisational guidelines and requirements
- technical manuals and tools.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT304 Implement system software changes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement system software changes and to hand over the modified system to the client's operational area.

It applies to individuals working in support roles who are required to update operating systems on client computers with the latest technology fixes, working under minimum supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine system changes required	1.1 Determine and record required changes to system 1.2 Ensure documentary evidence exists to support changes and evaluate changes required 1.3 Complete documentation required according to maintenance methodologies 1.4 Clarify and confirm nature of the changes with the client 1.5 Obtain technical data from reliable sources and request

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	other resources that may be required to complete the changes
2. Carry out system changes	2.1 Plan the procedure to effect intended changes 2.2 Consult with colleagues and users involved in the proposed changes and agree a mutually acceptable timeline and method of implementation 2.3 Copy initialisation or configuration files prior to implementation 2.4 Create a roll-back path in the event of failure 2.5 Ensure changes required in software are made according to project or organisational guidelines 2.6 Test and verify that the changes have been made according to implementation guides and organisational standards
3. Present changes to client	3.1 Demonstrate changes to the client and explain the impact of these changes 3.2 Work towards making these changes acceptable to the client if changes are rejected, or making further modifications if required 3.3 Update documentation and repositories according to standards and update modifications made to the change management system
4. Perform handover to client	4.1 Update documentation and client procedures to reflect changes made 4.2 Secure sign-off of acceptance documents by client 4.3 Facilitate handover of modified system to client's operational area

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.5	• Identifies and interprets hard copy, online and computer generated text, numerical and diagrammatic information with systems

© Commonwealth of Australia, 2025 Public Skills Australia

		software specific terminology • Reviews a range of organisational documentation to identify relevant information relating to the requirements of both the job role and organisation
Writing	1.1, 1.3, 3.3, 4.1	• Uses correct spelling and grammar, plain English and, when necessary, systems related text and terminology to complete documentation and update client procedures
Oral Communication	1.1, 1.2, 1.4, 1.5, 2.1, 2.2, 3.1, 3.2, 4.2, 4.3	• Uses effective listening and questioning techniques and systems related terminology to elicit information about the systems and determine the job requirements • Converts highly technical language and terminology to plain English to communicate changes to, and gather feedback from, the client(s)
Navigate the world of work	2.5, 2.6, 3.3	• Recognises and follows explicit protocols and meets expectations associated with own role
Get the work done	1.1, 2.1-2.4, 2.6, 3.2, 3.3, 4.3	• Initiates standard procedures when responding to familiar problems within immediate context • Recognises some general design and operating principles of digital tools and uses these to help when modifying systems and when troubleshooting • Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency

Assessment Requirements for ICTICT304 Implement system software changes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- evaluate, document and implement changes to the system with minimum disruption to the system and client users
- hand over the project to the client with instructions and updated documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe business scheduling requirements
- identify change control procedures
- describe client business domain
- discuss current industry accepted hardware and software products
- discuss emerging standards for data and voice communications
- outline the system's current functionality
- discuss the features of the system under modification
- outline the organisational policy and procedures with regard to system changes
- recognise vendor software services with regard to system changes.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

© Commonwealth of Australia, 2025 Public Skills Australia

- a computer
- system software currently used in industry
- technical manuals and tools.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT401 Determine and confirm client business requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine client business system requirements and verify the accuracy of the information gathered.

It applies to information and communications technology (ICT) personnel who are required to analyse client expectations and needs, and recommend business system changes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine context of business need or problem	1.1 Establish the business problem to be investigated, including determining system boundaries, scope and the development methodology to be used 1.2 Choose information gathering method and develop questions appropriate to business problem 1.3 Develop objectives and identify expected outcomes to be achieved 1.4 Document the business problem

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.5 Submit documentation to appropriate person for substantiation
2. Gather information	2.1 Use chosen information gathering method to identify clients of the system and problems they encounter 2.2 Record client responses 2.3 Analyse gathered information to identify new system requirements and establish problem specifications 2.4 Document system requirements and problems 2.5 Analyse physical requirements and identify changes required to implement new systems
3. Confirm system specifications	3.1 Check documentation to ensure it meets client business needs 3.2 Submit documentation to the client for verification of accuracy and approval 3.3 Make changes to the documentation as necessary and indicated by the client 3.4 Submit documentation to client for final approval or sign-off

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.3, 2.5, 3.1	• Identifies, analyses and evaluates information from a variety of sources containing complex systems related terminology to determine system performance requirements and establish solutions
Writing	1.2-1.4, 2.2, 2.4, 3.3	• Uses the correct spelling and grammar, plain English and, when necessary, systems related text and terminology to develop information gathering tools and document recommendations
Oral Communication	1.1, 2.1, 2.5, 3.2, 3.4	• Uses plain English, effective listening and questioning techniques and, where necessary, systems related terminology to elicit information

© Commonwealth of Australia, 2025 Public Skills Australia

		• Uses plain English and relevant terminology to liaise with clients, present information and obtain feedback
Get the work done	1.1-1.3, 2.1, 2.3, 2.5	• Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements so work is undertaken methodically • Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts • Understands the purposes, specific functions and key features of common digital systems and tools to provide current advice on systems and data gathering products

Assessment Requirements for ICTICT401 Determine and confirm client business requirements

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use investigative techniques to obtain information and document the business system problem
- produce a clear statement of business expectations and needs, including critical business requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe a variety of data gathering techniques
- describe areas related to the client business in detail
- interpret functional organisational charts
- outline physical requirements of the client's business, taking into account current system functionality, geography, environment, client user and cost constraints
- describe products related to data capture
- discuss the role of stakeholders and the degree of stakeholder involvement.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- current business needs
- a client expectations brief

© Commonwealth of Australia, 2025 Public Skills Australia

- business objectives
- systems, data gathering and appropriate software products.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT403 Apply software development methodologies

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to apply traditional and non-traditional systems development methodologies.

It applies to individuals in a senior development role who exercise discretion and judgement to create solutions using appropriate technical knowledge and analysis skills.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine and select appropriate methodology for a given activity	1.1 Determine and define subject activity 1.2 Define criteria for selection of development methodology 1.3 Review and evaluate a range of traditional and non-traditional system development methodologies 1.4 Select appropriate system development methodology to suit the activity
2. Apply the selected	2.1 Create an initial project plan to guide developmental

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
development methodology	processes 2.2 Identify appropriate task types according to development methodology 2.3 Clearly describe and articulate task types 2.4 Define appropriate control structures that need to be created during task type execution 2.5 Associate each task type with a set of input and output parameters
3. Adjust project to suit appropriate methodology	3.1 Identify resources to support methodology selection 3.2 Apply appropriate methodology to solve tasks 3.3 Monitor project flow and record effectiveness against project plan 3.4 Review and document opportunities for improvement, lessons learned and recommendations for future projects 3.5 Submit results to appropriate person for approval

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 3.1, 3.4	• Identifies, analyses and evaluates a range of textual information containing complex systems development specific terminology, syntax and diagrams, and applies the information to the task
Writing	2.1, 2.3, 3.3, 3.4	• Uses the correct spelling and grammar, and technical terminology to develop project plans, document recommendations, processes and reports in a format suitable to the audience
Oral Communication	1.1, 1.3, 2.3, 3.1-3.4	• Elicits and evaluates information using project related terminology and effective listening and questioning techniques • Uses plain English and, where necessary, project related terminology to liaise with clients, present information and obtain feedback • Uses specific and complex systems development

© Commonwealth of Australia, 2025 Public Skills Australia

		terminology to liaise with co-workers
Get the work done	1.1-1.4, 2.2, 2.4, 2.5, 3.1-3.4	• Uses familiar digital systems and tools to access, organise, analyse and display information relevant to the role • Applies formal processes when planning more complex tasks, producing plans with logically sequenced steps, reflecting an awareness of time and resource constraints and the needs of others • Reflects on the appropriateness and effectiveness of project methodologies and identifies some key principles that may be relevant in future situations

Unit Mapping Information

Assessment Requirements for ICTICT403 Apply software development methodologies

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop a project plan
- apply a methodology to a project
- produce documentation as required by the chosen methodology.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe client business domain and organisational requirements
- explain current project requirements
- explain role of stakeholders and the degree of stakeholder involvement in the development process
- describe at least two current system development methodologies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- design specifications and current methodologies
- organisational standards for documentation and version control
- detailed user requirements document, including model and scope.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy NVR/AQTF assessor requirements.

ICTICT502 Develop detailed component specifications from project specifications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to analyse requirements of the project specifications in order to produce a set of high-level component specifications.

It applies to systems designers who are required to produce component specifications for programmers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop components	1.1 Document behaviour scenarios according to documentation standards 1.2 Identify or develop components according to project specifications 1.3 Prepare diagrams according to standards
2. Prepare schema	2.1 Analyse and document component connectivity

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.2 Identify and incorporate data flow iteration 2.3 Prepare component action diagrams according to standards
3. Prepare component model	3.1 Describe roles and responsibilities 3.2 Review and update functional requirements 3.3 Specify interface components and component relationships 3.4 Prepare interaction diagrams according to standards
4. Iterate and review model	4.1 Conduct walk-through of current model and review functionality 4.2 Identify relationships to ensure integration of model 4.3 Review class service requirements 4.4 Prepare initial test criteria 4.5 Implement process for incremental testing

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 3.2, 4.1-4.3	• Interprets and analyses text with complex terminology, diagrams, code, syntax, icons and symbols to evaluate current system functionality and technical requirements, and develop diagrams using industry specific software
Writing	1.1-1.3, 2.1-2.3, 3.1-3.4, 4.4, 4.5	• Uses the correct spelling and grammar, clear plain English, task related terminology, and a formal document structure, format and style appropriate to the audience and organisation • Selects suitable vocabulary, terminology, labelling and naming conventions to develop diagrams using industry specific design tools
Numeracy	1.2	• Interprets numerical information and applies basic mathematical calculations relating to time durations and budgetary information
Navigate the	1.1, 1.3, 2.3, 3.4	• Recognises and follows explicit and implicit protocols,

© Commonwealth of Australia, 2025 Public Skills Australia

world of work		and meets expectations associated with own role
Get the work done	1.2, 2.1, 2.2, 3.2, 3.3, 4.1- 4.5	• Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for efficiency • In familiar contexts, responds intuitively to problems requiring immediate attention • Considers purpose, needs and limitations when selecting devices and applications for different tasks

Unit Mapping Information

Assessment Requirements for ICTICT502 Develop detailed component specifications from project specifications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and document high level component specifications relevant to the project specifications
- analyse and document component connectivity and relationships
- document and review component modelling.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline appropriate design tools and their use
- discuss and explain configuration management
- outline the key features of a cost-benefit analysis
- identify and apply current industry accepted design methodologies and hardware and software products, including broad knowledge of general features and capabilities
- explain data modelling techniques
- describe program development methodologies
- describe quality assurance practices for preparing component models
- outline relevant standards and organisational policies
- specify current system functionality for analysing components.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the general information and communications technology (ICT) industry, and include access to:

- technical specifications
- organisational and process goals
- standards for model development
- computer aided software engineering (CASE) tools
- project deliverables
- test plan
- project budget
- outcomes of the business analysis process
- appropriate software and hardware.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK305 Install and manage network protocols

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to install and manage network protocols in a networking environment.

It applies to individuals with competent information and communications technology (ICT) skills, working as network administrators who are required to ensure that appropriate protocols have been installed in networks to allow user functionality and maintenance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Install and manage network protocols	1.1 Select, test and validate appropriate network protocol services 1.2 Design a network addressing system, with subnet and host IDs, including appropriate devices 1.3 Configure hosts and workstations to use IP addresses either manually or through automatic allocation of addresses, such as found with dynamic host configuration protocol (DHCP)
2. Identify network	2.1 Review a range of well-known network protocol applications

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
protocol applications	2.2 Evaluate client user requirement and recommend network protocol services 2.3 Apply internet protocol (IP) addressing scheme according to approved policy and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.2, 2.3	• Recognises and interprets textual information, including technical manuals, to establish the job requirements
Writing	2.2	• Uses specific and relevant language to document new file systems, user access and disaster recovery procedures
Oral Communications	2.2	• Articulates clearly using specific and relevant language suitable to audience to convey requirements • Uses listening and questioning techniques to confirm understanding
Navigate the world of work	2.3	• Complies with explicit organisational policies and procedures • Ensures knowledge of legislative requirements and products is kept up to date
Get the work done	1.1-1.3, 2.1	• Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency, and considering how to link with the work of others • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks • Initiates standard procedures when developing and refining configuration protocols

Assessment Requirements for ICTNWK305 Install and manage network protocols

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- configure, test and validate network protocols in order to facilitate interconnectivity
- install and manage network protocols in a network, and troubleshoot problems.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the client business domain, including client organisation structure and business functionality
- list current communications technologies and their associated protocols
- outline current industry accepted hardware and software products, and general features and capabilities
- summarise network protocols currently in use in the organisation and industry, including:
  - transmission control protocol
  - internet protocol (TCP/IP)
  - OSI models
- clarify the vendor product range and development directions
- describe how network protocols transcend organisational size and network complexity.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

© Commonwealth of Australia, 2025 Public Skills Australia

- a live network
- application software and operating system
- appropriate learning and assessment support when required
- networked computers
- organisational guidelines
- technical documentation and installation manuals
- vendor software.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK311 Install and test network protocols

Modification History

Release	Comments
Release 2	This version first released with ICT Information and Communications Technology Training Package Version 8.0. Removal of 'Writing' skill removed from Foundation Skills.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to install and test network protocols in a networking environment.

It applies to individuals with Information and Communications Technology (ICT) skills, who are required to provide network support to ensure that appropriate protocols have been installed in networks to allow user functionality and maintenance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to install network protocols	1.1 Determine network protocol, user and task requirements 1.2 Select network protocol applications according to task requirements 1.3 Determine network protocol services according to task requirements 1.4 Design network addressing system according to protocol and task requirements

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Install network protocols	2.1 Install and validate network protocol services according to task requirements 2.2 Install required network addressing system 2.3 Apply internet protocol (IP) addressing scheme according to user needs and organisational policies and procedures 2.4 Configure IP addresses on hosts and workstations
3. Test network protocols	3.1 Test and validate network protocols according to user requirements 3.2 Seek and respond to network protocol performance feedback 3.3 Store unused ICT equipment and dispose of redundant ICT equipment according to manufacturer specifications and organisational procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Learning	• Ensures knowledge of legislative requirements and products is kept up to date
Reading	• Recognises and interprets textual information, including technical manuals to establish the job requirements
Oral Communications	• Uses listening and questioning techniques to articulate information and task requirements using succinct verbal language
Self-management	• Identifies roles and responsibilities for task and makes decisions on work completion parameters in accordance with organisational procedures, WHS and environmental guidelines
Technology	• Identifies the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks

Unit Mapping Information

Supersedes and is equivalent to ICTNWK305 Install and manage network protocols.

Assessment Requirements for ICTNWK311 Install and test network protocols

Modification History

Release	Comments
Release 2	This version first released with ICT Information and Communications Technology Training Package Version 8.0. Removal of 'Writing' skill removed from Foundation Skills.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- configure, test and validate network protocols in order to facilitate interconnectivity on at least one occasion
- install and manage network protocols in a network and troubleshoot problems on at least one occasion.

In the course of the above, the candidate must:

- adhere to work health safety (WHS) requirements according to organisational policies and procedures.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- business domains, including the organisational structure and business functionality of the network
- user needs, manufacturer specifications and organisational policies and procedures
- network protocol required to install and manage network protocols
- required communications technologies and their associated protocols
- industry accepted hardware and software products, and general features and capabilities
- network protocols currently in use in the organisation and industry, including:
  - transmission control protocol
  - internet protocol (TCP/IP)

© Commonwealth of Australia, 2025 Public Skills Australia

  - OSI models
- vendor product range and development directions
- network protocols transcend organisational size and network complexity.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- a live network
- application software and operating system
- networked computers
- organisational guidelines
- technical documentation and installation manuals
- vendor software
- work health and safety (WHS) guidelines, policies and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTNWK410 Install hardware to a network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, manage and install new hardware components in a network.

It applies to individuals employed in technical information and communications technology (ICT) support roles, such as network administrators, who support network hardware in a peer-to-peer or client-server networked environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine network hardware requirements	1.1 Assess client network hardware and cabling requirements, considering compatibility with existing application software and operating system 1.2 Analyse requirements against local area network (LAN), wide area network (WAN), wireless networks, and mobile equipment access design limitations and organisational guidelines 1.3 Evaluate client requirements according to organisational guidelines, corporate purchasing procedures, licensing

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	arrangements and budget
2. Obtain network hardware	2.1 Contact vendors and obtain technical specifications 2.2 Evaluate or test hardware according to client requirements and organisational guidelines 2.3 Document recommendations and provide copies to appropriate person 2.4 Determine and document licensing requirements and security issues 2.5 Acquire hardware according to recommendations and organisational procedures 2.6 Organise cabling infrastructure where required
3. Install network hardware	3.1 Conduct installation with minimal disruption to clients 3.2 Install hardware according to appropriate installation procedures 3.3 Configure and test the installation to ensure that it meets client needs
4. Provide instruction and support for installed products	4.1 Determine and document client instructions and needs 4.2 Provide one-to-one or group instruction to client and users as required 4.3 Obtain client evaluation and feedback to ensure that client requirements have been met

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.2, 2.5	• Recognises and interprets licensing and security issues, technical information and organisational procedures to determine job requirements
Writing	2.4, 4.1	• Prepares information which incorporates evaluation of information and specialised and cohesive language in a format and style appropriate to a specific audience

© Commonwealth of Australia, 2025 Public Skills Australia

Oral Communication	2.1, 2.3, 4.1-4.3	• Uses listening and questioning skills to confirm understanding for requirements • Participates in regular verbal exchanges and uses appropriate, detailed and clear language to address key personnel and to disseminate information
Numeracy	1.3	• Uses mathematical formulas and calculations to estimate and plan costs according to business budgets
Navigate the world of work	1.2, 1.3, 2.4, 2.5	• Appreciates the implications of legal and regulatory responsibilities related to own work
Get the work done	1.1-1.3, 2.2, 2.5, 2.6, 3.1- 3.3	• Determines job priorities, resources and equipment, and works logically and systematically to maintain the continuity of network operations and business functions during network installation tasks • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks • Recognises and responds to predictable routine problems related to own role in the immediate work context • Automatically implements standard procedures for routine decisions

Assessment Requirements for ICTNWK410 Install hardware to a network

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- evaluate client user requirements and hardware installation
- install a range of network hardware by planning, managing and supporting the installation of new components in a network, according to organisational policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise current industry, data and voice networking, security products, devices and procedures, including:
  - current industry accepted network protocols
  - organisational contracting procedures and responsibilities
  - system diagnostic software
- outline current industry accepted network hardware and software products
- explain hardware and software installation procedures
- describe local area network (LAN) capabilities and characteristics, such as network type, internet protocol (IP) addressing, switch or hub operation
- describe various features of network connections, including types of cables, cabling distance limitations and wireless connections
- outline operating systems sufficient to enable basic installation
- summarise set-up and configuration procedures
- describe software packages supported by the organisation.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- vendor hardware and software components
- application software and operating system
- hardware maintenance tools
- a live network
- networked computers
- organisational guidelines
- technical documentation and installation manuals.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK411 Deploy software to networked computers

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, manage and support the installation of new or upgraded software to networked computers according to vendor and organisation specifications.

It applies to individuals involved in installing, configuring, maintaining and supporting software, such as network administrators and network support staff.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine operating system and software and hardware requirements	1.1 Assess client software and licensing requirements, considering compatibility with existing application software and operating system 1.2 Assess hardware requirements 1.3 Analyse requirements against local area network (LAN), wide area network (WAN), and wireless networks within organisational guidelines 1.4 Evaluate client requirements according to organisational

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	guidelines, corporate purchasing procedures and budget
2. Obtain deployment software to automate deployment	2.1 Evaluate deployment software according to client requirements and organisational guidelines 2.2 Contact vendors and obtain technical specifications, including support arrangements and licensing 2.3 Acquire software and licences according to organisational procedures 2.4 Store software licences and manuals according to organisational guidelines
3. Automate installation of operating system via network	3.1 Plan and deploy operating system according to appropriate vendor installation procedures, with minimal disruption to network and clients 3.2 Configure and test installation to ensure that it meets client needs and vendor specifications 3.3 Install updates and patches
4. Automate installation of software packages via network	4.1 Plan and deploy software packages according to appropriate vendor installation procedures, with minimal disruption to network and clients 4.2 Configure and test installation to ensure that it meets client needs and vendor specifications 4.3 Install updates and patches
5. Test and sign off	5.1 Test installed operating system and software for error-free performance, identifying and resolving problems 5.2 Determine and document security and licensing issues 5.3 Obtain client evaluation and feedback to ensure that client requirements have been met

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.4, 2.1, 2.3, 2.4,	• Recognises and interprets technical, licensing

© Commonwealth of Australia, 2025 Public Skills Australia

	3.1, 3.2, 4.1, 4.2	and organisational information to determine business requirements
Writing	1.3, 5.2	• Develops material for a specific audience, using clear and detailed language in order to convey explicit information
Oral Communication	2.2, 5.3	• Uses active listening, observational and questioning techniques in order to identify information and confirm, clarify or revise understanding • Uses specific and relevant language to obtain information to determine job requirements
Numeracy	1.4	• Uses mathematical formulas and calculations to estimate and plan costs according to business budgets
Navigate the world of work	1.1, 1.3, 1.4, 2.1-2.4, 5.2	• Appreciates the implications of legal and regulatory responsibilities related to own work
Get the work done	1.1-1.4, 2.1, 2.3, 2.4, 3.1-3.3, 4.1-4.3, 5.1	• Determines job priorities, resources and equipment, and works logically and systematically • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks • Uses analytical processes to respond to deployment and configuration issues in the immediate work context • Automatically implements standard procedures for routine decisions

Assessment Requirements for ICTNWK411 Deploy software to networked computers

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify client software requirements
- plan and deploy automatic installation of operating system and software
- configure and test installation, ensuring client needs are met.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise network protocols and operating systems, including:
  - transmission control protocols (TCP)
  - internet protocols (IPs)
  - network applications
- describe organisational contracting procedures and responsibilities
- outline software licensing requirements and documentation
- explain current industry standards related to software deployment, including:
  - deployment software configuration
  - configuration of automated deployment processes
  - operating system deployment
  - software package deployment
  - troubleshooting deployment processes.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the network industry, and include access to:

- a site or prototype where deployment processes may be implemented
- a live network
- software tools to support implementation of deployment processes
- technical documentation and installation manuals
- organisational guidelines.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTNWK429 Install hardware to networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to plan, manage and install new hardware components in a network.

It applies to individuals involved in technical Information and Communications Technology (ICT) support roles, including network administrators who support network hardware in a peer-to-peer or client-server networked environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Networking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine network hardware requirements	1.1 Determine network hardware and cabling requirements for local area network (LAN), wide area network (WAN), wireless networks according to organisational requirements 1.2 Identify any mobile equipment access design limitations according to task requirements 1.3 Determine effectiveness of organisational guidelines, purchasing policies, procedures, licensing arrangements and budget according to organisational requirements
2. Obtain and test network hardware	2.1 Identify technical specifications for required hardware according to task requirements 2.2 Test hardware capability according to organisational and

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	technical requirements 2.3 Document recommendations and provide document to required personnel 2.4 Determine and document licensing requirements and security issues according to organisational and industry standards 2.5 Obtain hardware according to recommendations and organisational requirements
3. Install and configure network hardware	3.1 Install hardware according to manufacturer and organisational policies, procedures and guidelines 3.2 Configure and test installation according to manufacturer and task requirements
4. Provide instruction and support for installed products	4.1 Determine and document organisational user instructions and requirements from installed products 4.2 Provide instruction document to required personnel according to organisational requirements 4.3 Seek evaluation and feedback from required personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria

SKILL	DESCRIPTION
Learning	• Demonstrates an understanding of licensing and security issues relevant to job requirements
Numeracy	• Uses mathematical formulas and calculations to estimate and plan costs according to business budgets
Oral Communication	• Uses listening and questioning techniques to confirm information and task requirements, communicate ideas and solutions
Writing	• Prepares documentation detailing recommendations, requirements and organisational user instruction using cohesive language for intended audience
Technology	• Demonstrates and understanding of technical information and organisational procedures to determine job requirements

© Commonwealth of Australia, 2025 Public Skills Australia

Unit Mapping Information

Supersedes and is equivalent to ICTNWK410 Install hardware to a network.

Assessment Requirements for ICTNWK429 Install hardware to networks

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- evaluate client user requirements and hardware installation for at least one network
- install a range of network hardware by planning, managing and supporting the installation of new components in a network
- document finished process.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- industry, data and voice networking, security products, devices and procedures, including:
  - industry accepted network protocols
  - organisational contracting procedures and responsibilities
  - system diagnostic software
  - industry accepted network hardware and software products
  - hardware and software installation procedures
  - local area network (LAN) capabilities and characteristics, such as network type, internet protocol (IP) addressing, switch or hub operation
  - various features of network connections, including types of cables, cabling distance limitations and wireless connections
  - operating systems sufficient to enable basic installation
  - set-up and configuration procedures
- software packages supported by organisation.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- vendor hardware and software components
- application software and operating system
- hardware maintenance tools
- a live network
- networked computers
- organisational guidelines
- technical documentation and installation manuals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine operating system requirements	1.1 Determine software and licensing according to organisational requirements 1.2 Determine hardware needs according to organisational requirements 1.3 Determine hardware and software requirements against local area network (LAN), wide area network (WAN), and wireless networks
2. Obtain deployment software to automate deployment	2.1 Determine required deployment software according to task requirements 2.2 Obtain required software and licences, technical specifications and support arrangements from vendors

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3 Store software licences and manuals according to organisational guidelines
3. Automate installation of operating system	3.1 Plan and deploy operating system according to vendor installation procedures and organisational requirements 3.2 Configure and test installation according to vendor specifications and organisational requirements 3.3 Install updates and patches according to task requirements
4. Automate installation of software packages	4.1 Plan and deploy software packages according to vendor installation procedures and organisational requirements 4.2 Configure and test installation to task requirements 4.3 Install required updates and patches according to task requirements
5. Test and sign off	5.1 Test installed operating system and software and confirm error-free performance 5.2 Document security and licensing agreements according to organisational policies and procedures 5.3 Submit documentation to required personnel for final approval sign off

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria

SKILL	DESCRIPTION
Oral Communication	• Uses active listening, observational and questioning techniques to confirm information and determine job requirements
Reading	• Recognises and interprets written technical, licensing and organisational
Writing	• Prepares required documentation conveying explicit recommendations, requirements and information using specific and relevant language
Planning and organising	• Uses effective planning structures and prioritises tasks according to output needs

Assessment Requirements for ICTNWK430 Deploy software to networked computers

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- plan and deploy automatic installation of operating system and software to at least two networked computers
- configure and test installation of automatic installation of operating system and software on at least two networked computers
- document finalised process.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- network protocols and operating systems
- transmission control protocols (TCP)
- internet protocols (IPs)
- network applications
- organisational contracting procedures and responsibilities that may be used in deploying software for networked computers
- software licensing requirements and documentation
- standards related to software deployment, including:
  - deployment software configuration
  - configuration of automated deployment processes
  - operating system deployment
  - software package deployment
  - troubleshooting deployment processes.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- a site or prototype where deployment processes may be implemented
- a live network
- software tools to support implementation of deployment processes
- technical documentation and installation manuals
- required regulatory documentation that affects networking activities
- organisational guidelines.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTPRG524 Develop high-level object-oriented class specifications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to analyse requirements and produce a set of high-level object-oriented class specifications.

It applies to individuals who are required to develop object designs as part of the systems design process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Programming and software development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Analyse the behaviour of objects	1.1 Analyse behaviour scenarios and the prepare documentation, according to standards 1.2 Identify classes, objects and abstract data types, according to requirements 1.3 Prepare class, object, module and process diagrams, according to specifications

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Prepare a state model	2.1 Analyse data requirements and iterate data flows 2.2 Prepare state-transition diagrams, according to standards 2.3 Improve the abstract data types and specifications
3. Describe the roles and responsibilities of classes	3.1 Review the functional requirements, assign responsibilities and update class structures 3.2 Specify the interface and class communication requirements 3.3 Prepare the interaction diagrams, according to standards
4. Iterate and review the object model	4.1 Review the current object model, class functionality and data transformation 4.2 Identify and develop class relationships, priorities, and the inheritance hierarchy 4.3 Review the class-service requirements and initial test criteria 4.4 Identify object processes and reuse classes 4.5 Document the model and forward it to the appropriate person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 4.1, 4.2	• Interprets, and analyses, complex technical documentation
Writing	1.1, 1.3, 2.2, 3.3, 4.5	• Accurately records and completes documentation according to organisational formats and protocols • Writes and edits documents to ensure accuracy and consistency of information, and clarity of meaning
Interact with others	4.5	• Shares knowledge, information and experience openly, liaising with colleagues to achieve the best possible outcome
Get the work done	1.3, 3.1, 3.2, 4.1, 4.2, 4.3, 4.4	• Uses a range of digitally-based technologies to access, extract and share relevant information, in order to achieve the required outcomes • Identifies technical or conceptual issues, and applies analytical processes, to resolve these issues

© Commonwealth of Australia, 2025 Public Skills Australia

		• Uses analytical and lateral thinking to review current practices, and to develop new or improved software or systems

Assessment Requirements for ICTPRG524 Develop high-level object-oriented class specifications

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- specify and model abstract data types
- specify the interface between classes and objects
- document the results.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline configuration management
- outline current industry-accepted object-oriented methodologies
- outline current program development methodologies
- describe data modelling techniques
- describe object-oriented analysis tools
- describe quality assurance practices.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the programming and software development industry, and include access to:

- the business, system and user requirement
- a unified modelling language (UML) modelling tool
- the appropriate learning and assessment support, when required.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAD501 Model data objects

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to understand business operations, identify entities and data, diagrammatically represent their relationships, and prepare a data model.

It applies individuals who have a broad range of analytical, technical and communication skills and who work within broad but established parameters.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems analysis and design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify entities and relationships	1.1 Analyse business data to understand operations 1.2 Identify boundaries of the system 1.3 Identify entities, attributes, data types and relationships of data 1.4 Review business rules to determine impact 1.5 Document relationships in an entity relationship diagram

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Develop normalisation	2.1 Identify suitable business data 2.2 Undertake normalisation of business data and document results 2.3 Compare normalisation results with entity relationship diagram 2.4 Reconcile differences between data
3. Validate model	3.1 Validate data model with client 3.2 Resolve issues or recommendations 3.3 Document completed data model 3.4 Submit to client for final approval

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 2.3, 2.4	• Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements
Writing	1.5, 2.2, 2.4, 3.3, 3.4	• Prepares and produces diagrammatic models and associated documents that convey complex relationships between data • Documents outcomes and changes to discussions, using industry relevant terminology and recognised symbols
Oral Communication	3.1-3.4	• Participates in verbal exchanges by listening and questioning clients to elicit information, resolve issues, and obtain final product and work outcome approval
Interact with others	3.1, 3.2, 3.4	• Selects, implements and seeks to improve protocols governing communications to clients and co-workers in a range of work contexts • Elicits feedback and provides feedback to others
Get the work done	1.1-1.4, 2.1, 3.2, 3.3	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Applies systematic and analytical decision making

© Commonwealth of Australia, 2025 Public Skills Australia

		processes for complex and non-routine situations • Uses and investigates new digital technologies and applications to manage and manipulate data and communicate effectively with others, in a secure and stable digital environment

Unit Mapping Information

Code and title current version	**Code and title previous version**	**Comments**	**Equivalence status**

Assessment Requirements for ICTSAD501 Model data objects

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- document client business requirements
- construct an entity relationship diagram
- construct and document a data model
- normalise the model
- validate the model.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- fully describe:
  - database identifiers and their impact on database usability
  - normalisation rules and processes
  - type hierarchies, including sub-types, super-types and root-types related to development of structured data types
  - validation procedures and processes
- describe the function and features of:
  - an approach to data modelling, such as the entity-relationship model
  - keys, e.g. unique keys, composite keys, primary keys and primary index
  - time stamps related to the use of keys
  - user defined types, structured types, reference types and user defined functions
  - data types and their application
- summarise the particular business domain.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems analysis and design field of work, and include access to:

- client's business requirements
- special purpose tools, equipment and materials
- industry software packages
- computer aided software engineering (CASE) tools
- entity relationship diagrams.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAD502 Model data processes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to gather process data and business information in order to model data processes within an organisation.

It applies to individuals who can apply a broad range of technical knowledge and skills within the context of a complex project.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems analysis and design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop scope of model	1.1 Identify relevant data processes and sources of information 1.2 Identify information gathering method and modelling methodology to be used 1.3 Document modelling information gathered 1.4 Validate modelling information with client
2. Gather process data	2.1 Identify business functions and collect process data using chosen method

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.2 Identify external events, procedures and results 2.3 Identify processes and required decomposition
3. Develop and validate data model	3.1 Model process data according to modelling methodology 3.2 Validate process model with client to determine inaccuracies 3.3 Incorporate identified changes, as required 3.4 Review business rules to determine impact on process models and change as required 3.5 Validate completed process models with client

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.3, 3.4	• Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements
Writing	1.3, 1.4, 3.3-3.5	• Prepares and produces diagrammatic models and associated documents that convey complex relationships between data
Oral Communication	1.4, 3.2, 3.5	• Determines and confirms client requirements using collaborative and inclusive techniques, including active listening and questioning, and reading of verbal and non-verbal signals to convey and clarify information and confirm understanding
Interact with others	1.4, 3.2, 3.5	• Implements strategies for a diverse range of colleagues and clients to build rapport and foster strong relationships
Get the work done	1.1, 1.2, 2.1-2.3, 3.1, 3.4	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Applies systematic and analytical decision making processes for complex and non-routine situations • Uses and investigates new digital technologies and applications to manage and manipulate data, and

Assessment Requirements for ICTSAD502 Model data processes

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify data processes that represent the client's business reality
- model data processes according to industry and organisation standards
- complete documentation of the data model.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss modelling rules and conventions with reference to naming processes and events
- outline features and functions of process mappers
- explain features of data analysis, particularly in determining process flows
- describe processes and techniques, using logical design concepts related to designing process models.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems analysis and design field of work, and include access to:

- client’s business requirements
- special purpose tools and equipment
- industry software packages.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS203 Connect hardware peripherals

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to connect hardware peripherals according to instructions.

It applies to individuals employed in an information and communications technology (ICT) support role who are required to solve technical hardware and software incompatibility conflicts and problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Confirm client requirements	1.1 Identify and confirm peripheral requirements of client according to organisational standards 1.2 Document client requirements and peripherals needed, and report findings to the appropriate person according to organisational standards 1.3 Verify client requirements with appropriate person according to organisational standards and reporting procedures

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Take action to ensure client support expectations are covered by vendor warranty and support services
2. Obtain required peripherals	2.1 Obtain peripherals under instruction from appropriate person 2.2 Enter details of peripherals into equipment inventory according to organisational standards 2.3 Validate that contents of delivered components and physical contents match the packing list and resolve discrepancies if necessary 2.4 Store peripherals according to vendors guidelines
3. Connect hardware peripherals	3.1 Verify timeframe for installation schedule with client 3.2 Remove old peripherals with minimal disruption to clients if they are to be replaced, taking into account environmental considerations and work health and safety (WHS) standards 3.3 Connect new peripherals with minimum disruption to clients, taking into account operating system procedures 3.4 Configure computer to accept new peripherals 3.5 Test hardware peripherals and confirm client satisfaction, paying particular attention to possible effect on other systems and making adjustments as required

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1-2.4, 3.1-3.5	• Interprets textual information from a range of sources to identify and adhere to requirements
Writing	1.2, 1.3, 1.4, 2.1	• Develops materials and resources using simple vocabulary to convey and record information and inventory, according to client and vendor requirements
Oral Communication	1.2, 1.3, 1.4, 2.1, 3.1, 3.5	• Participates in verbal exchanges of familiar ideas and information using questioning and active listening to elicit views, opinions and feedback from others
Navigate the	1.1, 1.3, 1.4, 2.1-2.4,	• Understands roles and responsibilities for task and makes basic decisions on work completion parameters

© Commonwealth of Australia, 2025 Public Skills Australia

world of work	3.2-3.5	in accordance with organisational requirements, WHS standards and environmental considerations
Interact with others	1.1-1.4, 2.1, 3.1	• Identifies and takes steps to follow accepted communication practices and protocols
Get the work done	1.1-1.4, 2.1-2.4, 3.1-3.5	• Plans and implements routine tasks, aiming to achieve them efficiently • Responds to predictable routine problems and implements standard or logical solutions • Understands the purposes, specific functions and key features of common digital systems and tools, and operates them effectively to complete routine tasks

Assessment Requirements for ICTSAS203 Connect hardware peripherals

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- connect several different types of hardware peripherals to the system safely and according to vendor instructions with a minimum of downtime, using known routines and procedures
- locate, interpret and use vendor documentation related to connection and storage of hardware peripherals
- test the operation of newly installed hardware peripherals and confirm client satisfaction
- follow work health and safety policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the commonly used computer operating systems
- identify help desk and maintenance practices
- describe common peripheral devices
- summarise WHS procedures for electrical equipment
- list the system components and describe their interconnectivity
- identify current industry accepted hardware and software products
- describe procedures relevant to maintaining inventory
- list the organisational guidelines and standards that impact on service support including:
  - external suppliers and vendors
  - internal and external communications
  - internet access
  - security of information and data

© Commonwealth of Australia, 2025 Public Skills Australia

- identify common principles for environmentally sustainable business practices.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the systems administration and support field of work and include access to:

- sites with a representative range of workstations, hardware peripherals, internet connections and cabling
- software to be installed, interconnected and configured
- hardware and software currently used in industry
- technical documentation, including organisational hardware blueprint and vendor support.

Assessors must satisfy NVR/AQTF assessor requirements.

ICTSAS213 Maintain the integrity of ICT systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to backup, protect and secure stand-alone and networked client server environments.

It applies to technical support individuals who are required to uphold workflow and quality processes in a small or large office environment through the maintenance of Information and Communications Technology (ICT) systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Systems administration and support

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to test ICT system integrity	1.1 Determine restoration and back up schedule according to organisational procedures 1.2 Identify and confirm storage and backup destination with required personnel 1.3 Perform backup according to task requirements 1.4 Label and store backups according to organisational procedures and backup schedule 1.5 Update system with virus protection and scanning software according to cyber security procedures 1.6 Identify copyright and privacy legislation for licensed software and work

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Conduct ICT system testing and backup procedures	2.1 Test restoration procedures according to organisational procedures 2.2 Restore data under instruction from required personnel 2.3 Carry out virus scanning and report detected viruses to required personnel 2.4 Remove viruses and malware according to organisational procedures and within scope of own role 2.5 Check hardware devices and networks for operating condition and performance
3. Finalise and record current state of ICT systems	3.1 Document and report backup results 3.2 Maintain records of backups, file names, licence numbers and their location 3.3 Report licensing anomalies related to software to required personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	• Interprets familiar textual information from a range of sources to identify and review practices and determine that standards have been maintained • Researches and interprets information to identify, monitor and evaluate technical information and maintain standards
Writing	• Accurately records and completes documentation according to organisational formats and procedures
Teamwork	• Identifies and takes steps to follow accepted communication practices and protocols
Planning and organising	• Plans and implements routine tasks
Problem solving	• Makes low-impact decisions within familiar situations, based on a range of predefined or routine solutions, and evaluates the effectiveness of the outcome
Self-management	• Identifies roles and responsibilities for task and makes basic decisions on work completion parameters in accordance with organisational standards
Technology	• Identifies the purposes, specific functions and key features of

© Commonwealth of Australia, 2025 Public Skills Australia

	common digital systems and tools, and operates them effectively to complete routine tasks

Unit Mapping Information

Supersedes and is equivalent to ICTSAS205 Maintain ICT system integrity.

Assessment Requirements for ICTSAS213 Maintain the integrity of ICT systems

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- backup, protect and secure at least two client server environments.

In the course of the above, the candidate must:

- review organisational backup schedule
- follow system maintenance procedures
- create, restore, label, delete, archive and report file backups
- check hardware and networks for compliance with licensing requirements
- report data security, privacy, copyright and licensing compliance anomalies
- perform virus protection and scanning software updates.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational procedures for:
  - backups, restoration and testing procedures and operations
  - file name conventions and storage of backups
  - malware and virus scans
  - copyright and privacy legislation
  - inventory and maintenance procedures
- industry accepted hardware and software products
- virus protection methods
- diagnostic tools that may be used in maintaining the integrity of ICT systems
- storage and retrieval guidelines
- system performance metrics and system performance testing tools

© Commonwealth of Australia, 2025 Public Skills Australia

- legislation relating to restoration procedures, copyright, privacy and General Public Licence (GPL).

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- stand-alone and networked client server environments
- hardware containing information and data
- antivirus and scanning software
- technical records and documentation
- copyright, GPL and privacy legislation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

MEM15002A Apply quality systems

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers working within a quality improvement system, either individually or in a team situation.

Application of the Unit

Application of the unit	This unit is applicable for any work within a quality improvement system in a manufacturing, engineering or related environment. The definition of customer is wide and applies to the next person or organisation receiving the product or service. Application may include quality inspection of own or other employee's work up to the level of the employee's technical competence. **Band**: **A** **Unit Weight**: **2**

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Public Skills Australia

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Work within a quality system	1.1. Instructions and procedures are followed and duties are performed in accordance with requirements of quality improvement system. 1.2. Conformance to specifications is ensured. 1.3. Defects are detected and reported according to standard operating procedures. 1.4. Performance of operation or quality of product or service is monitored to ensure customer satisfaction.
2. Engage in quality improvement	2.1. Current performance is assessed. 2.2. Established performance measures are identified. 2.3. Specifications and standard operating procedures are identified. 2.4. Defects are detected and reported according to standard operating procedures. 2.5. Process improvement procedures are participated in. 2.6. The improvement of internal/external customer/supplier relationships is participated in. 2.7. Performance of operation or quality of product or service is monitored to ensure customer satisfaction.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- reading, interpreting and following information on written job sheets, instructions, standard operating procedures and drawings
- checking and clarifying task-related information
- entering information onto workplace documents
- checking for conformance to specifications
- identifying duties of the individual within the quality improvement system
- identifying customers' requirements with respect to the operation or quality of the product or service
- reporting where appropriate, defects detected
- carrying out work in accordance with the process improvement procedures
- carrying out work in a manner consistent with the improvement of customer/supplier relationships
- performing numerical operations, geometry and calculations/formulae within the scope of this unit

Required knowledge

Look for evidence that confirms knowledge of:

- quality system terminology and concepts, e.g.
  - quality assurance - planning to meet customers' requirements
  - quality control - checks and procedures to ensure customer requirements are met
  - quality inspection - inspecting and testing products and services
  - total quality control - a company-wide approach that combines both quality assurance and quality control so that the customer is always satisfied
- commonly accepted meaning/s of the terms quality and quality system
- the reasons for following the requirements of the quality improvement system
- strategies and approaches for working within a quality system
- procedures to be followed in undertaking the work
- specifications to which the individual's work is to comply
- reasons for ensuring work conforms to specification
- benefits of good quality:

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• quality products • reduced costs • customer confidence, satisfaction and loyalty • good reputation • job satisfaction • solving problems • increased competitiveness • keeping up with technology • costs and consequences of poor quality e.g. • lost customers • accidents • wastage • lost time • low morale • conflict • procedures for reporting defects • examples of common defects • quality improvement procedures • four steps of the quality cycle: plan, do, check, act • reasons for following process improvement procedures • examples of ways in which customer/supplier relationships can be improved • benefits of good customer/supplier relationship • hazards and control measures associated with applying quality procedures, including housekeeping • safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to apply quality systems.
Critical aspects for assessment and	Assessors must be satisfied that the candidate can

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
evidence required to demonstrate competency in this unit	competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with applying quality systems or other units requiring the exercise of the skills and knowledge covered by this unit.
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised

MEM18001C Use hand tools

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers using a range of hand tools for a variety of general engineering applications.

Application of the Unit

Application of the unit	Applications may include hand tools used for adjusting, dismantling, assembling and finishing of items or components, and the finishing, cutting, scraping of metallic and non-metallic material to size and shape. This includes simple tapping and threading and routine maintenance of hand tools. This unit should not be selected if the hand tool is dedicated to a single operation or machine and if only a machine specific/customised tool is used. When using hand held power tools or power tools used for hand held operations, refer to Unit MEM18002B (Use power tools/hand held operations). **Band**: **A** **Unit Weight**: **2**

Licensing/Regulatory Information

Prerequisite units	

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Use hand tools	1.1. Hand tools are selected appropriate to the task requirements. 1.2. Hand tools are used to produce desired outcomes to job specifications which may include finish, tension, size or shape. 1.3. All safety requirements are adhered to before, during and after use. 1.4. Unsafe or faulty tools are identified and marked for repair according to designated procedures before, during and after use. 1.5. Routine maintenance of tools, including hand sharpening is undertaken according to standard

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	operational procedures, principles and techniques. 1.6. Hand tools are stored safely in appropriate location according to standard operational procedures and manufacturers' recommendations.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: • reading and following information on standard operating procedures • following verbal instructions • selecting hand tools appropriate to the task • using hand tools safely • identifying hand tool defects and marking for repair • maintaining/sharpening hand tools using appropriate techniques • storing hand tools in accordance with manufacturers'/standard operating procedures
Required knowledge
Look for evidence that confirms knowledge of: • applications of different hand tools in a general engineering context • common faults and/or defects in hand tools • procedures for marking unsafe or faulty tools for repair • routine maintenance requirements for a range of hand tools • storage location and procedures for a range of hand tools • hazards and control measures associated with using hand tools • use and application of personal protective equipment • safe work practices and procedures

MEM50009B Safely operate a mechanically powered recreational boat

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers safely handling/operating a powered recreational boat on coastal and inland waters. It includes manoeuvring and handling the boat as well as safe navigation and anchoring. This unit was developed by the National Marine Safety Committee (NMSC).

Application of the Unit

Application of the unit	This unit is one of three core competencies that have been adopted by all government marine safety authorities to contribute to and promote the safe use of waterways and awareness of boating safety. The unit applies specifically to mechanical powered recreational boats including personal watercraft. However, it is recognised that some aspects of this competency apply to any recreational vessel. All work and work practices are undertaken to regulatory and legislative requirements. Unit MEM50008B (Carry out trip preparation and planning) and Unit MEM50010B (Respond to boating emergencies and incidents) are the other two NMSC core units. **Band**: **A** **Unit Weight**: **2**

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Manoeuvre and handle the boat	1.1. A pre-start check is undertaken. 1.2. Motor is prepared and started. 1.3. Boat is manoeuvred safely according to conditions and in accordance with water traffic regulations. 1.4. Performance of the boat and personnel is monitored at all times. 1.5. Impact of boat use on others and the environment is considered.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.6. Safety equipment is used, stowed and, if required, worn in accordance with legislation and recognised regulations and rules.
2. Navigate safely	2.1. Aids to small craft navigation are identified. 2.2. Collision avoidance techniques are applied when required in accordance with relevant legislation, recognised regulations and rules. 2.3. Operation of the boat is carried out at all times in accordance with relevant legislation, recognised regulations and rules. 2.4. Navigational aids and landmarks are used to determine and monitor boat position. 2.5. Hazards and conditions are taken into account in navigating the boat.
3. Anchor the boat	3.1. Anchorage site is selected in accordance with prevailing and forecast conditions and in accordance with legislation. 3.2. Type of anchor used is suitable for location. 3.3. Anchor is lowered, set and monitored according to prevailing conditions. 3.4. Anchor is retrieved and securely stowed.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: • adequately preparing and checking • manoeuvring and handling a boat safely and accurately • monitoring performance and being aware • navigating safely and taking hazards into account • anchoring techniques
Required knowledge

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
Look for evidence that confirms knowledge of: • boating and other relevant legislation, rules and regulations • legislative requirements regarding the use of safety equipment • area of activity hazards and prevailing conditions • boating information resources • environmental awareness

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to safely handle/operate a powered recreational boat on coastal and inland waters, including basic navigation and anchoring.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling associated with a marine environment, or other units requiring the exercise of the skills and knowledge covered by this unit.

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifi-cations, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Pre-start check	Pre-start check may include: • fuel is connected • battery is charged and connected • kill switch • fumes, petrol • fuel and water leaks • hatches/windows/doors are open • ventilation • sea-cock opening • loose gear is secured • marine radio is turned on and radio aerials raised • bilge water levels checked

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• navigation lights

Manoeuvred safely according to conditions	• Manoeuvring conditions may include:
	  • from or to a ramp, pontoon, wharf, mooring, anchor, confined areas such as narrow channels, marinas, moorings, obstructions
	  • sea-states such as bars, waves, rips, high seas, tidal surges, choppy conditions, wakes
	  • low speed/high speed
	  • poor visibility
	  • effect of wind
	  • large vessels
	• Safe manoeuvring may include:
	  • steer straight line
	  • astern
	  • figure-eight
	  • right of way
	  • port-starboard
	  • throttle control
	  • emergency stop
	  • trim and stability of vessel
	  • towing or being towed
	  • berthing
	  • standing-on/stemming the tide
	  • retrieval of person overboard

Monitored	Monitoring may include: • cooling system • bilge • portholes and hatches • location and welfare of persons on board • oil, fuel and water • radio • position of boat • other water users • battery and electrical systems
Environment	Impact of boat use on others/environment may include: • noise • wake

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• safety of others • disturbance or injury to wildlife • disposal of waste and bilge water • effects of detergent and anti-foul • fuelling arrangements
Aids to small craft navigation	Aids to navigation may include: • IALA Buoyage System 'A' • charts • compasses • GPS • sounder • tide tables • passage plan • marine references • notices to mariners • radio navigational warnings

Relevant legislation, **recognised regulations and rules**	• Collision regulations such as:
	  • navigating in narrow channels
	  • giving way to other vessels
	  • overtaking, proper lookout
	  • sound signals
	  • lights and shapes
	  • responsibilities and duty of care
	  • use of buoyage system
	  • speed
	  • recognition of lights and markers
	  • rules of road
	  • recognition of operation areas
	  • specific activity rules, e.g. PWCs, water skis, equipment requirements
	  • accident/incident reporting
	• Marine regulations such as:
	  • safety regulations
	  • licensing and registration
	  • speed limit restrictions
	  • distance off requirements
	  • port limits/rules
	  • marine incident reporting

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• carrying capacity • drug and alcohol limits/effects • age of operators • Environmental and wildlife regulations as relevant and applicable to the operation of boats
Hazards and conditions	Hazards and conditions may include: • weather • set and drift • effect of wind, tide and currents • submerged objects • other boats and wash • restricted waters • crossing bars
Type of anchor	• Types of anchor may include: • Danforth • Grapnel/Reef • Bruce • Plough • Admiralty • Sarca • sea anchor • Anchoring systems may include: • multiple anchors • bow and stern anchors • mooring buoy

MSL974008A Capture and manage scientific images

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the ability to capture accurate and reproducible images of scientific (environmental, medical and technical) subjects using a scientific approach and enterprise procedures/protocols to ensure the integrity of the image. It also includes the ability to generate and maintain pre- and post-image capture records to ensure that images can be reproduced.

Application of the Unit

Application of the unit	This unit of competency is applicable to laboratory technicians in all industry sectors. Personnel who capture images as a substantial part of their job role, should consider accessing the following units of competency from the *CUV40403 Certificate IV in Photoimaging* from CUV03 *Visual Arts, Crafts and Design Training Package*: • *CUVPHI04B Apply photoimaging lighting techniques* • *CUVPHI05B Use a 35mm SLR camera or digital equivalent* • *CUVPHI06B Plan and carry out image capture in response to a brief* • *CUVPHI07B Process photoimages to work print/file stage* • *CUVPHI511A Produce technical photoimages*. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Establish requirements for image capture	1.1. Define requirements and purpose of the work and create a brief 1.2. Choose an imaging technique that maintains the integrity and veracity of the subject and fulfils the work requirements 1.3. Plan the work using technical knowledge to ensure an effective and efficient result
2. Plan and set up the	2.1. Select and assemble the required equipment

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
shoot	2.2. Follow ethical and legal work practices at all times 2.3. Assess risks or hazards and implement safety procedures 2.4. Prepare the subject to achieve the brief
3. Capture and reproduce the required image	3.1. Expose media or film and accurately document the work in progress 3.2. Review the image against the work requirements and repeat if necessary 3.3. Reproduce the image to specification
4. Keep records and deliver images	4.1. Accurately and retrievably record the request, technical specifications and images so that they are retrievable 4.2. Store records safely and securely to archival standards 4.3. Follow copyright and crediting policies and procedures 4.4. Make the images available to the client, discuss the results and ensure that requirements have been met

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- creating and interpreting a brief
- applying an imaging technique that best meets the specifications and purpose of the job
- using a back-up system of image capture when shooting images
- producing consistent high quality, cost effective outcomes for clients
- keeping accurate records that allow future replication of images
- working safely and in an ethical manner

Required knowledge

Required knowledge includes:

- repercussions of manipulation of images and differences between adjustment and

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
manipulation • scientific approach and protocols to ensure integrity of images • veracity of different types of storage media • relevant copyright, moral rights and intellectual property issues and legislation • relevant health, safety and environment requirements • enterprise policies and procedures for capturing and managing scientific images

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors should ensure that candidates can: • create and interpret a brief • apply an imaging technique that best meets the specifications and purpose of the job, consistent with enterprise procedures • provide a back-up system of image capture when shooting images • produce consistent high quality, cost effective outcomes for clients • keep accurate records that allow future replication of images • work safely and in an ethical manner consistent with legislation, regulations and codes of practice.
Context of and specific resources for assessment	This unit of competency is to be assessed in the workplace or simulated workplace environment. This unit of competency may be assessed with: • *MSL975015A Prepare animal and plant material for display*. Resources may include: • appropriate facilities, equipment and materials for image capture • enterprise procedures, equipment manuals, industry

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	catalogues and journals.
Method of assessment	The following assessment methods are suggested: • review of portfolio of work completed by the candidate • feedback from clients and supervisor • oral or written questions to assess underpinning knowledge • case studies to assess the candidate's approach to different subjects and use of a variety of imaging techniques. In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability. Access must be provided to appropriate learning and/or assessment support when required. The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.
This competency in practice	Industry representatives have provided the case study below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. **Biomedical**, **biotechnology**, **environmental** It's Friday afternoon and a technical officer in a university biology faculty is asked, at short notice, to assist a postgraduate student to obtain images to support a presentation of her work at an international conference. She's flying out of the country to the conference on Sunday. The officer discusses the requirements with the student and determines that the images are needed for a poster presentation to show the differences between sizes of fungal spores. It is agreed that colour prints of four different sized spores are to be produced using a camera coupled to a stereomicroscope. Given the time constraints, a decision is made to use a digital image that

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	can be reproduced on-site. The images are produced on Friday evening and the student produces her poster on Saturday. The details of the subject, conditions and the images themselves are carefully stored for later use in the student's thesis.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Codes of practice	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used
Scientific images	Scientific images may include the following types of imaging techniques: • photographic • digital • X-ray • video • prints • transparencies • direct transformation from images to data, such as reading of DNA sequencing gels • auto-radiations • micrographs • other non-visible light sources, such as ultraviolet (UV) light, fluorescence and phosphorescence • electron micrographs
Scientific subjects	Scientific subjects may include: • building sites, environmental survey and monitoring sites

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• accident or incident sites, and injuries • forensic evidence • biological specimens • histological sections • live animals • chromatography gels
Job requirements and brief	Job requirements and brief may include: • description and specification of work, including constraints and due date • purpose of the image • specifications, such as size, purpose, audience, medium and style • interviewing and collecting information from the client • keeping records, request forms and notes
Purposes of the image	Purposes of the image may include: • publication as a thesis, presentation or on the web • temporal serial recording of changes over time • display as a poster, diorama, print or projection • preview, snapshot or proof of an image for production at a later stage • records of data for inclusion in databases • use in forensic investigation or court proceedings
Planning of the job	Planning of the job may include: • choice of type of image, media, site and conditions • preparation of the subject, such as make-up, choice of whole or part, staining, dissection, mounting, animal handling, setting up a light path for a microscope and appropriate magnification • technical requirements, such as resolution, film type, tripods, shutter speed, lens type and colour differential • back-up method and equipment for image capture • specification of final product, size, delivery, number and cost

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• position of subject
Equipment	Equipment may include: • lighting • backdrops • camera systems and accessories
Hazards	Hazards may include: • microbiological organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids • solar radiation, dust and noise • chemicals and radioisotopes • X-rays and other sources of electromagnetic radiation (laser and UV) • manual handling of heavy objects • slips, trips and falls, falling objects and moving machinery (e.g. on building sites) • pedestrian and vehicular traffic
Safety procedures	Safety procedures may include: • recognising and observing hazard warnings and safety signs • use of personal protective equipment, such as hard hats, hearing protection, gloves, safety glasses, goggles, face guards, coveralls, gowns, body suits, respirators and safety boots • following required containment procedures through the use of appropriate equipment, such as biohazard containers, laminar flow cabinets, Class I, II and III biohazard cabinets and Class PCII, PCIII, and PCIV physical containment facilities • use of material safety data sheets (MSDS) • handling and storage of all hazardous materials and equipment in accordance with labelling, MSDS and manufacturer's instructions • following established manual handling procedures
Ethical and legal work practices	Ethical and legal work practices may include consideration of: • industry codes of practice, contracts, permits,

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	intellectual property, crediting, plagiarism and copyright • moral rights, model release, etiquette, decorum and sensitivity towards the subject, use of a chaperone and confidentiality
Production of images	Production of images may include: • sending images for processing • processing the images • use of commercial software
Storage of records	Storage of records may include: • the brief, technical specifications and images • file management (back-ups, data retrieval and storage) • paper-based, electronic or digital
Occupational health and safety (OHS) and environmental management requirements	OHS and environmental management requirements: • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

MSL974019 Perform chemical tests and procedures

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL974003 Perform chemical tests and procedures. Changes to performance criteria. Range of conditions removed. Assessment requirements amended.

Application

This unit of competency describes the skills and knowledge to interpret chemical test requirements, prepare samples, conduct pre-use and calibration checks on equipment and perform routine chemical tests. These tests will involve several measurement steps. The unit includes basic data processing and interpretation of results.

This unit applies to laboratory or technical assistants and instrument operators in all industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Interpret and schedule test requirements**	1.1	Review test request to identify samples to be tested, test method and equipment and instruments involved
		1.2	Identify hazards and workplace control measures associated with the sample, preparation and test methods, reagents and/or equipment
		1.3	Plan work sequences to optimise throughput of multiple samples
2	**Receive and prepare samples**	2.1	Log samples using standard operating procedures (SOPs)
		2.2	Record sample description, compare with specification and note and report discrepancies
		2.3	Prepare samples and standards in accordance with chemical testing requirements
3	**Check equipment before use**	3.1	Set up equipment and instruments in accordance with test method requirements
		3.2	Perform pre-use and safety checks in accordance with relevant workplace and operating procedures
		3.3	Check equipment calibration using specified standards and procedures
		3.4	Inspect reagents required for quality issues including visual checks and expiry
		3.5	Maintain equipment log in accordance with workplace procedures
4	**Test samples to determine chemical species or properties**	4.1	Operate equipment and instruments in accordance with test method requirements
		4.2	Perform tests or procedures on all samples and standards in accordance with specified methods
		4.3	Shut down equipment and instruments in accordance

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
			with operating procedures
5	**Process and interpret data**	5.1	Record test data noting atypical observations and anomalies
		5.2	Construct calibration graphs and compute results for all samples from these graphs
		5.3	Check calculated values for consistency with expectations
		5.4	Record and report results in accordance with workplace procedures
		5.5	Determine if obvious procedure or equipment problems have led to atypical data or results
6	**Maintain a safe work environment**	6.1	Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel
		6.2	Minimise the generation of wastes and environmental impacts
		6.3	Safely collect and dispose of laboratory and hazardous waste
		6.4	Care for and store equipment and reagents as required
7	**Maintain laboratory records**	7.1	Record entries on report forms or into a laboratory information management system accurately calculating, recording or transcribing data as required
		7.2	Ensure traceability of sample from receipt to reporting of results

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Problem-solving skills to trace and source obvious causes of artefacts, track obvious test malfunctions for standardised procedures, and troubleshoot basic equipment and methods.
- Calculate the concentration of solutions.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Assessment Requirements for MSL974019 Perform chemical tests and procedures

Modification History

Release	Comments
Release 1	This version was released in *MSL Laboratory Operations Training Package Release 2.0.* Supersedes and equivalent to MSL974003 Perform chemical tests and procedures. Changes to performance criteria. Range of conditions removed. Assessment requirements amended.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- safely performed at least 3 different chemical tests involving several measurement steps including at least 1 of the following:
  - colorimetric techniques
  - infrared and ultraviolet-visible (UV-VIS) spectrophotometry
  - other spectrometric techniques
  - chromatographic techniques
  - electrochemical techniques
  - electrophoretic techniques
  - soil testing techniques
  - gravimetric analysis
  - titrimetric analysis
  - filtration, separation and solvent extraction techniques
  - corrosion testing, cement content and accelerated weathering.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- why chemical tests are performed
- relevant chemical principles and concepts, including:
  - elements, compounds, ions, atoms, molecules, bonding and links to chemical properties
  - periodic table and symbols of elements

© Commonwealth of Australia, 2025 Public Skills Australia

  - atomic mass and molecular weight
  - moles and molarity
  - chemical formulae and balancing equations
  - chemical reactions
  - energy levels and absorption/emission spectra
- purpose of the tests and/or procedures conducted
- international system of units (SI)
- principles and concepts related to equipment and instrument operation, tests and/or procedures
- requirements for cleaning up spills and reporting faulty or unsafe equipment, hazards and incidents.
- concepts of metrology, including:
  - all measurements are estimates
  - precision, accuracy and significant figures
  - sources of error, uncertainty and repeatability
  - traceability
- function of key components of the equipment and instrument and reagents and effects of modifying equipment and instrument variables
- common causes of analytical errors
- calibration requirements and basic equipment and method troubleshooting procedures
- sample preparation procedures for the tests and/or procedures conducted
- traceability requirements
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a standard laboratory equipped with appropriate sample preparation and test equipment, instruments, standards and reagents
  - workplace procedures and standard methods
  - records, including test and calibration results; equipment use, maintenance and servicing history, and faulty or unsafe equipment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSMENV272 Participate in environmentally sustainable work practices

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAENV272B Participate in environmentally sustainable work practices.

Application

This unit describes the skills and knowledge required to comply with environmental regulations, identify environment issues and minimise the risks of negative impact on work and carry out improvements in own work area.

This unit applies to operators and team members who are required to follow procedures to work in an environmentally sustainable manner.

This unit applies to all sectors of the manufacturing industry and members of its value chain. It may also be applied to all sections of an organisation, including office and warehouse. This unit will need to be contextualised for the industry sector, organisation and section.

This unit applies to an individual working alone or as part of a team and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

MSMOPS400 Optimise process/plant area

Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS400A Optimise process/plant area

Application

This unit of competency covers the skills and knowledge required to optimise the process performance of a complete process, plant area or system. It requires optimising a more significant portion of a plant than would be required for one of the PMAOPS3## series. It also requires a more strategic approach to the optimisation than the routine, day-to-day optimisation undertaken as a routine part of plant operation. The optimisation may, or may not involve capital expenditure.

It includes ensuring that the process/plant area complies with health, safety and environment (HSE) requirements, that process, plant and equipment improvement is planned and carried out, and that problems are solved to meet operational needs and ensure that production of finished goods meets customer requirements. It includes all items of equipment and unit operations which form part of the production process of a complete area.

This unit of competency requires the application of detailed operational and process knowledge, including the principles of operation of equipment, and the chemistry and/or physics and/or biology/biochemistry of changes to materials occurring during processing. It embodies a significant breadth and depth of technical knowledge and process understanding which is applied to process improvement.

This competency is typically performed by a senior operator, team leader or frontline manager.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element	
1	Analyse and evaluate current plant, equipment and processes	1.1	Compare actual process, plant and equipment performance with requirements and/or historical data/records and/or design performance
		1.2	Identify abnormal or sub-optimal process, plant and equipment performance
		1.3	Identify hazards associated with the plant and equipment
		1.4	Collect and evaluate product, materials and/or process records to determine possible causes for sub-optimal performance
		1.5	Use appropriate techniques to rank possible causes from most to least probable cause
2	Develop plan for corrective and/or optimisation action	2.1	Analyse causes to determine appropriate corrective action
		2.2	Predict the impact of a change in one unit/area on other related plant units/areas
		2.3	Predict the impact of a change on HSE performance
		2.4	Develop measurable objectives and evaluate alternatives
		2.5	Identify requirements to implement change
		2.6	Consult with stakeholders regarding planned changes and impacts
		2.7	Develop optimisation plan taking account of hazards identified and HSE implications and communicate to appropriate personnel
		2.8	Evaluate optimisation action to determine measures of effectiveness

© Commonwealth of Australia, 2025 Public Skills Australia

3	Coordinate corrective and/ or optimisation action plan	3.1	Coordinate all appropriate unit areas and operations in order to rectify problem causes in process, plant and equipment performance
		3.2	Initiate and/or implement all required corrective/optimisation actions
		3.3	Communicate corrective/optimisation outcomes to all relevant personnel
		3.4	Record and maintain log of all relevant information
4	Develop continuous improvement strategies	4.1	Identify opportunities to continuously improve performance of process/plant area
		4.2	Develop recommendations for continual improvement of process, plant and equipment effectiveness
		4.3	Consult with appropriate personnel and implement continuous improvement strategies
		4.4	Document implementation of continuous improvement strategies

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)

© Commonwealth of Australia, 2025 Public Skills Australia

- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent HSE requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- equipment start-up, operation and shutdown procedures
- calibration and maintenance schedules
- quality manuals and procedures
- organisation recording and reporting procedures
- material, production and product specifications
- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Process optimisation

Process optimisation requires application of detailed operational and process knowledge to address one or more of the following:

- starting material quality
- yield maximisation
- throughput maximisation
- energy efficiency
- use of utilities
- labour utilisation
- overall cost
- efficient use of equipment

© Commonwealth of Australia, 2025 Public Skills Australia

- reducing downtime
- minimisation of waste and rework
- improved workplace layout and work flow

Assessment Requirements for MSMOPS400 Optimise process/plant area

Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS400A Optimise process/plant area

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- identify and interpret information from a range of internal and external sources
- use analytical techniques to identify cause of a complex problem
- determine corrective actions to optimise the condition of the process, plant and equipment
- plan and coordinate corrective/optimisation actions and related changes that may be required
- develop written plans
- complete documentation
- identify and control hazards by applying the hierarchy of control as part of the optimisation process
- distinguish between:
  - optimum and marginal performance of the plant
  - effective and marginal performance corrections and actions
- communicate and consult with stakeholders at all levels
- read and interpret technical information and relevant regulatory requirements
- develop and implement continuous improvement strategies.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- hazards that may arise in the job/work environment, including:
  - their possible causes
  - potential consequences
  - appropriate risk controls
- relevant technical theory of the plant area
- an in depth understanding of plant and process across the entire plant area being optimised
- process parameters and limits, including:
  - temperature
  - pressure
  - flow
  - pH

© Commonwealth of Australia, 2025 Public Skills Australia

- effects of variations in process conditions and materials
- functions and principles of operation of equipment in the production process
- chemistry and/or physics and/or biology/biochemistry relevant to changes to materials during processing.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- It is desirable that this evidence comes from implemented optimisation projects. However, where the project does not receive sanction to be implemented, or is otherwise not implemented, then sufficient evidence may be able to be obtained from a detailed implementation plan and a simulated implementation.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should occur in operational workplace situations. Where this is not possible, or practical, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements

MSMOPS401 Trial new process or product

Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS401A Trial new process or product

Application

This unit of competency covers the skills and knowledge required to take a lead technical role in the trialling of a new or significantly altered product or process. The new/changed product/process has been independently developed and its development is not part of this unit.

The unit of competency applies to a person in a technician role in a plant or a similar role. The technician is expected already to be a technical expert in that part of the plant/process where the trial is being conducted and be able to operate and control all equipment required for the trial. The technician is often the most technically competent member of an operational team. As such, they may not have the 'hands on' role of operating items of equipment; but they are required to have the competence to direct the operation of equipment as appropriate throughout the trial.

Typically the technician will be part of a team during the trial and will work in conjunction with a process/product development expert, such as a chemist or engineer and liaise and cooperate with other members of the team.

Trialling refers to the scale-up and other development steps required to take a new product or process from its design/laboratory trials to full commercial operation on a plant. Trialling may be done on a pilot plant where available and/or on a full scale plant.

This unit of competency does not apply to minor modifications to existing products or processes. Similarly it does not apply to a technician or operator taking part in such trials and/or who is simply following directions from a technician, chemist, engineer, supervisor or manager.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Operations

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element	
1	Contribute to the selection of equipment/ process conditions	1.1	Liaise with appropriate technical experts
		1.2	Interpret properties of materials and desired product characteristics
		1.3	Interpret technical specifications/drawings of plant requirements
		1.4	Recommend equipment/ancillary equipment appropriate for the materials, products and conditions
		1.5	Recommend process conditions appropriate for the equipment, materials and product characteristics
		1.6	Recommend feed rates/order/condition appropriate to the process conditions, equipment, materials and product characteristics
		1.7	Ensure hazard identification and analysis procedures are completed, including consultation with stakeholders, and findings included in plan
		1.8	Ensure recommendations meet the identified need
2	Prepare for trials	2.1	Determine the availability of resources required, such as materials, equipment, people and skills
		2.2	Estimate time required for trial
		2.3	Liaise with relevant stakeholders
		2.4	Schedule trial at a convenient time

© Commonwealth of Australia, 2025 Public Skills Australia

		2.5	Develop documentation for the trial
		2.6	Identify potential hazards and required hazard control procedures by applying the hierarchy of control
		2.7	Determine permit and other authorisation requirements and special safety and storage requirements
		2.8	Verify decisions with appropriate experts/stakeholders
		2.9	Ensure people with adequate skills are available for the trial
3	Conduct trials	3.1	Ensure hazard controls are implemented prior to commencement
		3.2	Run trials
		3.3	Maintain communication with all relevant personnel
		3.4	Closely monitor critical parameters
		3.5	Recognise actual and potential problems
		3.6	Make adjustments to process conditions as required during trial
		3.7	Sample and test product as required
		3.8	Record and report performance data
		3.9	Ensure all materials, products and waste are handled correctly
		3.10	Leave plant in a condition suitable for routine production to recommence
4	Evaluate results and identify modifications	4.1	Interpret data from trial
		4.2	Identify factors which might be related to low rates or low charge amounts
		4.3	Recommend modifications and improvements required
		4.4	Develop and check standard operating procedures (SOPs)

© Commonwealth of Australia, 2025 Public Skills Australia

4.5 Complete documentation and report to appropriate personnel

4.6 Ensure all relevant staff have required skill levels for the introduction of the new process

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

© Commonwealth of Australia, 2025 Public Skills Australia

- emergency procedures
- work instructions
- SOPs
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Technical experts

Technical experts include one or more of the following:

- manufacturers
- chemists
- engineering personnel
- designers
- WHS advisors
- maintenance personnel
- potential customers

Non-routine problems

Routine problems must be resolved by applying known solutions.

Non-routine problems must be resolved by applying operational knowledge to develop new solutions, either individually or in collaboration with relevant experts, to:

- determine problems needing action
- determine possible fault causes
- develop solutions to problems which do not have a known solution
- follow through items initiated until final resolution has occurred
- report problems outside area of responsibility to designated person

Non-routine problems are unexpected problems, or variations of previous problems and include one or more of the following:

- mixing is poor
- materials do not behave as expected
- process/reaction does not proceed/proceeds too slowly
- process/reaction proceeds too quickly/runs away
- yield is low
- quality is out of specification
- process is unstable
- instrumentation is not sufficiently sensitive/too sensitive

© Commonwealth of Australia, 2025 Public Skills Australia

- variable catalyst activity
- surging flow/pressure

Operational knowledge includes one or more of the following:

- procedures
- training
- technical information, such as journals and engineering specifications
- remembered experience
- relevant knowledge obtained from appropriate people

Hazard analysis procedures

Hazard analysis procedures must be undertaken, however, it is not required that the candidate conducts the procedures. Hazard analysis procedures include one or more of the following:

- job safety analysis (JSA)/job hazard analysis (JHA)
- hazard and operability (HAZOP) studies
- hazard analysis (HAZAN) studies
- similar company specified procedures

Assessment Requirements for MSMOPS401 Trial new process or product

Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS401A Trial new process or product

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- analyse technical information from a range of sources
- determine recommendations for new process or product, including:
  - materials
  - equipment
  - process and process conditions
  - required variations in process variables
- plan the trials
- conduct trials
- communicate and liaise with people at a range of levels about technical matters
- write technical documentation, including specifications and procedures required for the trial
- ensure formal hazard analysis procedures are undertaken
- recognise early warning signs of equipment/processes or potential problems needing attention
- isolate the causes of problems to an item of equipment within the plant system
- identify any additional skills needs.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisation procedures
- relevant technical theory of the plant area
- chemistry and/or physics and/or biology/biochemistry relevant to changes to materials during processing
- effects of variations in process conditions and materials
- routine and non-routine problems that may arise, the range of possible causes and processes to develop solutions
- methods of changing rate and the advantages and disadvantages of each
- methods of controlling other process variables and the advantages and disadvantages of each.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- The trial may, or may not be a success.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should occur in operational workplace situations. Where this is not possible or practical, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent, process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMPCII295 Operate manufacturing equipment

Modification History

Release 1. Supersedes and is equivalent to MSAPCII295A Operate manufacturing equipment

Application

This unit of competency covers the skills and knowledge required to operate production equipment, and to the resolve routine problems in a simulated or trial manufacturing environment where there is a high degree of direct supervision. This competency is intended to be applied to any item of routine production equipment.

This unit of competency applies to learners seeking practical skills that are relevant and useful to the area in which the learner hopes to gain employment, is currently working, and/or as a pathway to further study.

This unit can be performed by operators working either independently or as part of a work team.

This unit of competency applies to a learning and assessment environment where access to normal production operations is not available. Typically this will be a VET in Schools delivery environment but it may be another simulated or trial manufacturing environment where a high degree of supervision exists. Students may be on work placement.

When delivered/assessed as part of a qualification the unit must be customised to ensure its relevance to real or simulated work activities and related workplaces.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element	
1	Check job requirements	1.1	Identify workplace requirements by following established procedures and practices, including work health and safety (WHS) requirements
		1.2	Identify product, materials and equipment requirements for job, including personal protective equipment (PPE)
2	Control hazards	2.1	Identify hazards in the production work area
		2.2	Assess the risks arising from those hazards
		2.3	Implement measures to control or avoid those risks in line with procedures and duty of care to fellow workers
3	Prepare equipment for operation as required	3.1	Perform pre-start checks
		3.2	Report suspected unusual or non-standard product, materials and equipment to an appropriate person
		3.3	Notify other team members, if required, on the intended equipment function and start-up
		3.4	Check/supply materials to equipment as required
		3.5	Start up the item of equipment as required
		3.6	Bring equipment to specified conditions and build the operating rate steadily, checking expected performance at various stages in accordance with procedures
4	Operate equipment	4.1	Monitor equipment operating conditions
		4.2	Monitor product characteristics

© Commonwealth of Australia, 2025 Public Skills Australia

		4.3	Recognise conditions and characteristics which indicate a problem or a potential problem
		4.4	Take appropriate action in response to problem or potential problem
		4.5	Maintain supply of materials and removal of products as required
		4.6	Complete required records
		4.7	Keep equipment and work area in a clean, organised and safe condition
5	Prepare equipment for shutdown	5.1	Perform emergency pause, stop or shutdown as required
		5.2	Ensure equipment is free of product or purged as required
		5.3	Shut down equipment in accordance with procedures
		5.4	Make sure equipment and area is left in a safe condition and ready for restart, maintenance or medium /long-term shutdown

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Procedures Procedures may be written, verbal computer-based, or in some other form and include one or more of the following:

- work instructions

© Commonwealth of Australia, 2025 Public Skills Australia

- standard operating procedures (SOPs)
- formulas/recipes
- batch sheets
- temporary instructions and similar instructions provided for the smooth running of equipment and processes

For the purposes of this Training Package, ' procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.

Equipment

Equipment for the purposes of this unit covers routine or common manufacturing equipment suitable for students operating in a simulated or trial manufacturing environment where there is a high degree of direct supervision. examples includes, but is not limited to, one or more of the following:

- guillotines
- bending and folding machines
- non-computer numerically controlled (CNC) lathes, especially bench and training lathes
- soldering equipment
- pedestal drills
- bench grinders

Workplace hazards

Workplace hazards include, but are not limited to, one or more of the following:

- hazardous materials
- gases and liquids under pressure
- moving machinery
- cutting edges
- electrical equipment
- materials handling
- environments subject to heat, noise, dusts or vapours

Pre-start checks

Pre-start checks include one or more of the following:

- visual checks
- completing checklists
- checking that safety guards, gates and so on, are in position and are operational

© Commonwealth of Australia, 2025 Public Skills Australia

- other checks required by SOPs and manufacturer instructions

Equipment operating conditions

Equipment operating conditions will be monitored using a range of techniques including:

- monitoring of measured or indicated data as shown by gauges and charts (e.g. speed, hours on line, pressure, temperature, flow and vibration)
- the senses of smell, sight, sound and feel, as appropriate

Product characteristics

Product characteristics include one or more of the following:

- product quality
- production rate
- defect rate

Problem/potential problems

Problem/potential problems include, but are not limited to, one or more of the following:

- changes to operating conditions
- adverse changes to product characteristics
- adverse changes to waste

Appropriate actions

Appropriate actions include one or more of the following:

- making adjustments in accordance with procedures
- stopping the equipment in accordance with procedures
- reporting to appropriate person

Records

Records include one or more of the following:

- log sheets/books
- job/work sheets
- electronic/paper records
- verbal/voicemail/email reports

Assessment Requirements for MSMPCII295 Operate manufacturing equipment

Modification History

Release 1. Supersedes and is equivalent to MSAPCII295A Operate manufacturing equipment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and demonstrate the ability to:

- carry out the day-to-day operation of a routine piece of production equipment, meeting the demands of productivity and quality while resolving routine problems
- follow work instructions, operating procedures and inspection practices to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment or products
  - achieve required production output and product quality
  - modify activities to cater for variations in workplace contexts and environment
- use hand tools and power equipment correctly and safely
- perform normal operator maintenance of work area to enable work to be conducted safely and efficiently
- check specifications and work requirements
- recognise early warning signs of equipment/processes needing attention, including changes to operating conditions, product quality and amount of waste
- make pre-start visual checks, including completing checklists and checking that safety guards and gates are in position and are operational
- use start-up and shutdown processes
- monitor equipment operation as shown by gauges and charts (e.g. speed, hours on line, pressure, temperature, flow and vibration)
- monitor equipment using the senses of smell, sight, sound and feel, as appropriate
- monitor product quality, production rate and defect rate
- report process variations to ensure process conditions are maintained within limits
- respond signals and alarms immediately
- check product for quality and conformity to specifications
- address non-conforming products/materials in accordance with procedures
- identify and rectify/report routine process problems
- complete proforma production logs and reports
- communicate and work effectively and safely with others
- comply with work health and safety (WHS) requirements and safety instructions
- apply safe handling requirements for equipment, products and materials, including the use of personal protective equipment (PPE)
- collect, organise and understand information related to equipment operation

© Commonwealth of Australia, 2025 Public Skills Australia

- use mathematical ideas and techniques for measuring product specifications and estimating materials requirements
- follow instructions and specifications and ask for help where needed
- prepare and plan the work
- modify activities to cater for variations in workplace contexts and environment.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- major components and functions of the equipment
- principles of equipment operation
- equipment operating parameters
- equipment and product variables and their interactions
- critical material properties, settings and readings
- impact of materials and properties
- construction and limitations of the equipment
- out-of-specification situations
- distinguishing between causes of faults, including:
  - raw materials
  - instrument failure/malfunction
  - electrical failure/malfunction
  - mechanical failure/malfunction
  - variations in product parameters (temperature, flows, pressure and levels).

Assessment Conditions

- Assessment must occur in a simulated environment or a workplace on an operating item of production equipment.
- Workplace for this unit covers a manufacturing environment specifically established for learning introductory manufacturing skills. It may be:
  - a school classroom or workshop equipped to teach manufacturing principles and practices
  - RTO premises equipped to teach manufacturing principles and practices with access to an operating item of production equipment over an extended time
  - an enterprise environment where above average supervision exists and training is occurring. The normal production imperatives have been modified to take into account the training being delivered.
- This unit must always be assessed holistically in conjunction with other units of competency that form part of a specified job function.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Performance must be demonstrated consistently over a period of time.
- Materials and equipment must include:

© Commonwealth of Australia, 2025 Public Skills Australia

  - workplace procedures such as work instructions, standard operating procedures (SOPs), batch sheets. They may be written, verbal, computer based or in some other form.
  - routine or common manufacturing equipment suitable for students operating in a simulated or trial manufacturing environment where there is a high degree of direct supervision.
- Equipment / materials include but are not limited to one or more of the following:
  - guillotines
  - bending and folding machines
  - non CNC lathes, especially bench and training lathes
  - soldering equipment
  - pedestal drills
  - bench grinders
  - records including log sheets/books, job/work sheets, electronic/paper records, verbal/voicemail/email reports
- Assessors must:
  - as a minimum, satisfy the Standards for Registered Training Organisations 2015 assessor requirements
  - have vocational competency in the manufacturing industry at least to the level being assessed, with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the manufacturing industry.

MSMPCII297 Make an object from cloth using an existing pattern

Modification History

Release 1. Supersedes and is equivalent to MSAPCII297A Make an object from cloth using an existing pattern

Application

This unit of competency covers the skills and knowledge required to make an object from cloth (such as basic decorative items or clothing) following the requirements of an identified pattern. It may or may not require machinery and does not require complex sewing or finishing or the development of a pattern.

This unit applies to learners seeking practical skills that are relevant and useful to the area in which the learner hopes to gain employment, is currently working, and/or as a pathway to further study.

This unit applies to a learning and assessment environment where access to normal production operations is not available. Typically this will be a VET in Schools delivery environment but it may be another simulated or trial manufacturing environment where a high degree of supervision exists. Students may be on work placement.

The unit should be applied to a specific 'project' or task which has a defined beginning, middle and end, occurs over an extended period of time, and is relevant to the manufacturing industry.

When delivered/assessed as part of a qualification the unit must be customised to ensure its relevance to real or simulated work activities and related workplaces.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element	
1	Identify job requirements	1.1	Identify job requirements for making the object from cloth from work instructions
		1.2	Apply instructions for designing and sequencing work
		1.3	Interpret and map out particular measurements or adjustments
		1.4	Consider, plan for and observe work health and safety (WHS) requirements
2	Prepare for work	2.1	Select a suitable work area for the task
		2.2	Select appropriate tools, equipment and materials, including personal protective equipment (PPE), in accordance with specifications
		2.3	Identify potential hazards associated with the use of tools, equipment and materials, and take appropriate safety precautions and/or report to supervisor
		2.4	Lay out required tools and materials in sequence according to job requirements and work instructions
		2.5	Check and adjust equipment in accordance with workplace procedures
3	Create work	3.1	Measure, cut and lay out fabric according to specifications
		3.2	Secure or sew fabric according to quality requirements

© Commonwealth of Australia, 2025 Public Skills Australia

		3.3	Check work against patterns and worksheets at the identified checkpoints
		3.4	Rectify non-conformity with the required pattern or quality standard
4	Complete work	4.1	Check completed work against the required quality standards
		4.2	Complete documentation following workplace reporting procedures
		4.3	Clean work area and return tools and equipment to storage
		4.4	Return unused materials to storage and deal with waste and scrap following workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

An object from cloth

An object from cloth includes one or more of the following:

- basic cushions
- soft tableware, such as placemats or serviettes
- basic clothing, such as a scarf, simple cloth hat not requiring blocking or a circle skirt
- a basic carry bag
- handkerchief
- tea towel
- wall hanging

© Commonwealth of Australia, 2025 Public Skills Australia

- pencil case
- BBQ cover
- external awning

Work instructions

Work instructions include one or more of the following:

- job sheets including number and type of objects to be produced
- patterns for making an object from cloth
- plans
- drawings and sketches
- operating instructions for equipment including safety procedures
- designer instructions
- quality requirements
- verbal directions from a supervisor or instructor

WHS requirements

WHS requirements include one or more of the following:

- legislation
- regulations
- material handling instructions, including hazardous and dangerous goods codes
- local safe operating procedures
- specific workplace rules and regulations regarding personal protective equipment (PPE)

Suitable work area

A suitable work area includes one or more of the following:

- a bench top or desk
- a sewing or layout table
- a sewing table with a sewing machine

Tools, **equipment and materials**

Tools, equipment and materials include one or more of the following:

- measuring equipment, such as tapes and rulers
- calculating equipment, such as calculators and computers
- general cutting and sewing tools, including scissors, drills, sewing machines, hemming machines and glue guns
- PPE
- plain and patterned fabric

© Commonwealth of Australia, 2025 Public Skills Australia

- velvet
- threads
- wadding
- foam
- tape
- fasteners, including buttons and hooks

Potential hazards

Potential hazards include one or more of the following:

- broken or faulty equipment
- damaged needles
- a lack of lighting
- untidy working conditions
- wet or slippery floors
- improperly secured sewing machines
- damaged or frayed electrical cables and connections

Reporting procedures

Reporting procedures include:

- completing necessary paperwork
- communicating with a supervisor or key person that you completed the task
- reporting, accidents, injuries and faulty equipment or materials
- filing necessary paperwork

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPCII297A Make an object from cloth using an existing pattern

Assessment Requirements for MSMPCII297 Make an object from cloth using an existing pattern

Modification History

Release 1. Supersedes and is equivalent to MSAPCII297A Make an object from cloth using an existing pattern

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and demonstrate the ability to:

- construct, assemble and finish at least one (1) object made from cloth
- follow work instructions, operating procedures and inspection practices to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment or products
  - achieve required production output and product quality
  - modify activities to cater for variations in workplace contexts and environment
- identify appropriate materials for use in making cloth items, and any special sewing or handling requirements for those materials
- interpret work order and locate and apply relevant information
- use patterns, and select and use tools and equipment appropriate to the task
- prevent damage to goods, equipment or products
- maintain required production output and product quality
- use hand tools and power equipment correctly and safely
- perform normal operator maintenance of work area to enable work to be conducted safely and efficiently
- report process or materials faults, damaged products or equipment
- communicate and work effectively and safely with others
- comply with work health and safety (WHS) requirements and safety instructions
- apply safe handling requirements for equipment, products and materials, including the use of personal protective equipment (PPE)
- collect, organise and understand information related to basic plans
- use mathematical ideas and techniques for measuring and calculating areas and estimating materials requirements
- follow instructions and specifications and ask for help where needed.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- workplace procedures and work instructions
- organisational structure

© Commonwealth of Australia, 2025 Public Skills Australia

- evaluation and review procedures;
- creative thinking techniques.

Assessment Conditions

- Assessment should occur on the job or in a workplace simulated facility with relevant equipment, materials, work instructions and deadlines.
- This unit must always be assessed in holistically in conjunction with other units of competency that form part of a specified job function.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Performance must be demonstrated consistently over a period of time.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including work instructions, specifications, hand and/or power tools, workplace records and a suitable work area.
- Assessors must:
  - as a minimum, satisfy the Standards for Registered Training Organisations 2015 assessor requirements
  - have vocational competency in the manufacturing industry at least to the level being assessed, with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the manufacturing industry.

MSMPCII298 Make an object from metal

Modification History

Release 1. Supersedes and is equivalent to MSAPCII298A Make an object from metal

Application

This unit of competency covers the skills and knowledge required to make an object from metal in accordance with the requirements of an established design in a simulated or trial manufacturing environment where there is a high degree of direct supervision.

This unit applies to learners seeking practical skills that are relevant and useful to the area in which the learner hopes to gain employment, is currently working, and/or as a pathway to further study.

This unit applies to a learning and assessment environment where access to normal production operations is not available. Typically this will be a VET in Schools delivery environment but it may be another simulated or trial manufacturing environment where a high degree of supervision exists. Students may be on work placement.

The unit must be applied to a specific 'project' or task which has a defined beginning, middle and end, occurs over an extended period of time, and is relevant to the manufacturing industry.

When delivered/assessed as part of a qualification the unit must be customised to ensure its relevance to real or simulated work activities and related workplaces.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element	
1	Identify job requirements	1.1	Identify specifications for metal item from work instructions
		1.2	Interpret design to determine the process, tools, equipment and materials required
		1.3	Consider and apply work health and safety (WHS) requirements for the job
2	Prepare for work	2.1	Select a suitable work area for the task
		2.2	Prepare the work area according to WHS and ergonomic requirements
		2.3	Select appropriate tools, equipment and materials, including personal protective equipment (PPE), in accordance with specifications
		2.4	Clean, check and prepare equipment and machinery for operation in accordance with WHS requirements and workplace procedures
		2.5	Identify potential hazards associated with the use of tools, equipment and materials, and take appropriate safety precautions and/or report to supervisor
		2.6	Keep records in accordance with workplace requirements
3	Produce work	3.1	Transfer dimensions from job specifications and/or drawings or sketches and mark out material to conform to specifications and templates using appropriate machinery or tools

© Commonwealth of Australia, 2025 Public Skills Australia

		3.2	Prepare edges and surfaces according to specifications
		3.3	Join components according to project requirements
		3.4	Check work for conformance with specifications
		3.5	Rectify non-conformity with specifications or quality standards
		3.6	Finish work according to specifications and quality standards
4	Complete work	4.1	Check completed work against required quality standards
		4.2	Return unused materials to storage and deal with waste and scrap following workplace procedures
		4.3	Clean work area and return tools and equipment to storage
		4.4	Complete documentation and records and maintain them following workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Metal

Metal includes one or more of the following:

- mild steel
- galvanised steel
- stainless steel

© Commonwealth of Australia, 2025 Public Skills Australia

- aluminium
- brass

Metal object

A metal object includes one or more of the following:

- a small decorative box, with or without a lid
- desk pencil holder
- metallic photo album
- cabinet
- shelving
- CD rack
- metallic picture frame

Work instructions

Work instructions include one or more of the following:

- job sheets
- patterns
- plans
- drawings and sketches
- verbal or illustrated directions from supervisor
- number and type of objects to be produced
- quality requirements
- WHS requirements
- environmental requirements

WHS requirements

WHS requirements include one or more of the following:

- legislative requirements
- hazardous and dangerous goods codes
- safe operating procedures
- specific workplace rules regarding PPE, such as disposable overalls, dust mask, eye and ear protection, and gloves

Suitable work area

A suitable work area includes one or more of the following:

- workbench
- desk or table
- workshop
- shed
- durable space

© Commonwealth of Australia, 2025 Public Skills Australia

Appropriate tools, equipment and materials

Appropriate tools, equipment and materials include one or more of the following:

- measuring tapes or rulers
- hammers
- mallets
- squares
- bevels
- chisels
- files
- planes
- hand saws
- cordless drills/screwdrivers
- fixing and joining devices
- jigs
- clamping devices
- pincers
- power saws
- power drills
- band saws
- vertical drill presses
- PPE
- metal
- adhesives
- screws
- nuts
- bolts
- hinges and metal fasteners
- pencils and markers
- paints

Potential hazards

Potential hazards include one or more of the following:

- broken or faulty equipment
- unnoticed sharp objects
- poor lighting
- inadequate ventilation
- inadequate attention to the activities of others
- electrical shortages and power overload
- disorganised or cluttered workspace (poor housekeeping)

© Commonwealth of Australia, 2025 Public Skills Australia

- poor attention when dealing with tools and equipment
- environmental chemicals, heat, dust, noise, gas and oil

Workplace records

Workplace records include one or more of the following:

- plant and maintenance records
- job cards
- check sheets
- reporting requirements
- documenting equipment and/or material defects
- workplace procedures relating to the use of tools and equipment

Specifications

Specifications include one or more of the following:

- measurements and dimensions
- joining methods
- quality standards
- materials to be used

Preparing edges and surfaces

Preparing edges and surfaces includes one or more of the following:

- filing
- sanding
- cleaning
- grinding
- polishing

Joining metal pieces

Joining metal pieces includes one or more of the following

- screws, rivets, nuts and bolts
- hinging
- soldering

Rectifying non-conformities

Rectifying non-conformities includes one or more of the following:

- deconstructing the assembled pieces
- reshaping, resizing or re-cutting elements
- reassembling elements

© Commonwealth of Australia, 2025 Public Skills Australia

Finishing work	Finishing work includes one or more of the following: • filing • polishing • grinding • painting and decorating

Assessment Requirements for MSMPCII298 Make an object from metal

Modification History

Release 1. Supersedes and is equivalent to MSAPCII298A Make an object from metal

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and demonstrate the ability to:

- construct, assemble and finish at least one (1) basic object from metal
- follow work instructions, operating procedures and inspection practices to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment or products
  - achieve required production output and product quality
  - modify activities to cater for variations in workplace contexts and environment
- use routine workplace tools, equipment, materials and measuring devices correctly and safely
- apply pre-checking and quality techniques to anticipate construction problems, avoid reworking and avoid wastage
- perform normal operator maintenance of work area to enable work to be conducted safely and efficiently
- communicate and work effectively and safely with others
- comply with work health and safety (WHS) requirements and safety instructions
- apply safe handling requirements for equipment, products and materials, including the use of personal protective equipment (PPE)
- collect, organise and understand information related to basic plans
- use mathematical ideas and techniques for measuring and calculating areas and estimating materials requirements
- follow instructions and specifications and ask for help where needed.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- the concept of work flow and its relation to manufacture of objects
- WHS standards and requirements
- relevant statutory requirements and codes of practice
- hand and portable power tools and their application
- mechanical cutting techniques
- fabrication and shaping techniques
- types of paints, sealants and glues

© Commonwealth of Australia, 2025 Public Skills Australia

- types of jigs and templates
- workshop plant and equipment
- manufacture and assembly techniques
- common materials used in the manufacture of metal objects.

Assessment Conditions

- Assessment should occur on the job or in a workplace simulated facility with relevant equipment, materials, work instructions and deadlines.
- This unit must always be assessed in holistically in conjunction with other units of competency that form part of a specified job function.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Performance must be demonstrated consistently over a period of time.
- Workplace for this unit means a manufacturing environment specifically established for learning introductory manufacturing skills. It may be:
  - a school classroom or workshop equipped to teach manufacturing principles and practices
  - RTO premises equipped to teach manufacturing principles and practices
  - an enterprise environment where above average supervision exists and training is occurring. The normal production imperatives have been modified to take into account the training being delivered.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including work instructions, specifications, hand and/or power tools, metal working machinery, workplace records and a suitable work area.
- Assessors must:
  - as a minimum, satisfy the Standards for Registered Training Organisations 2015 assessor requirements
  - have vocational competency in the manufacturing industry at least to the level being assessed, with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the manufacturing industry.

MSMSUP102 Communicate in the workplace

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP102A Communicate in the workplace.

Application

This unit describes the skills and knowledge required to receive, relay and record written and oral messages and to provide relevant information in response to requests within timelines.

This unit applies to personnel who are required to communicate clearly and accurately to record messages, seek clarification, access needed information, relay information to other people and complete workplace documentation.

This unit applies to all work environments.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Assessment Requirements for MSMSUP102 Communicate in the workplace

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP102A Communicate in the workplace.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- received, recorded and relayed messages, including:
  - listening attentively and asking questions to confirm understanding
- responded to at least one request for information in accordance with procedures, including:
  - using clear and concise language in both verbal and written communication
- completed workplace forms legibly and accurately

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sources of information
- communication equipment
- organisation procedures, including:
  - telephone and communications protocols and/or procedures
  - documentation and record keeping
- types and meaning of workplace codes, numbers, symbols, signs and colours typically used in the work environment
- types, purpose and importance of workplace documentation
- workplace expectations for acceptable language and tone, including swearing, level of formality, courteousness and respect for diversity
- challenges in communicating with people from culturally and linguistically diverse (CALD) backgrounds in the workplace and possible strategies
- communication problems and corrective actions relevant to own role
-

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workplace documentation and/or information
  - workplace forms.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSMSUP210 Process and record information

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Foundation skills specified. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP210A Process and record information.

Application

This unit describes the skills and knowledge required to process information and respond to the information requirements of own job, including the completion of workplace documents, and clearly and concisely providing relevant information to others.

This unit applies to personnel who are required to identify routine information requirements, access and process information, provide workplace and technical information within their area of expertise and complete workplace documentation. Information will be conveyed orally and in writing.

This unit applies to all work environments.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Assessment Requirements for MSMSUP240 Undertake minor maintenance

Modification History

Release 2. Equivalent. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP240A Undertake minor maintenance.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- undertaken at least 1 minor maintenance activity, including:
  - using available data and records to recognise fault and no-fault conditions in standard and non-standard situations
  - applying operational guidelines and known solutions to correct variations and/or irregularities
  - applying approved hazard control, work permit and safety procedures.
  -

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- principles of operation of the equipment to be maintained
- function and troubleshooting of major internal components and their problems
- appropriate testing procedures and use of equipment for a range of equipment faults
- typical causes of equipment failures and the service conditions which may increase maintenance
- types and nature of maintenance (preventative, predictive, corrective) uses, benefits and limitations
- factors that may affect product quality or production output and appropriate remedies.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

© Commonwealth of Australia, 2025 Public Skills Australia

- maintenance documentation, guidelines, procedures and schedules, including data and plant records
- maintenance tools and equipment, including personal protective equipment (PPE).

MSMSUP292 Sample and test materials and product

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP292A Sample and test materials and product

Application

This unit of competency covers the skills and knowledge required to take routine samples and conduct simple tests.

This unit of competency applies to operators who are required to take samples in the workplace, perform a narrow range of simple tests and interpret the results and take specified action based on those results.

It applies to simple, routine tests to procedure which will typically be done in the workplace or in a ‘factory laboratory’ (or bench) adjacent to or within the factory.

This unit of competency is typically performed by operators working either independently or as part of a work team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element

© Commonwealth of Australia, 2025 Public Skills Australia

1	Take sample	1.1	Determine type of sample and sampling equipment required
		1.2	Check sampling equipment is clean and in good order
		1.3	Take sample of required type, from the required place and at the required time and place in required container
		1.4	Label sample to procedure
		1.5	Carry sample to required place
2	Complete test	2.1	Check test required from procedures
		2.2	Check sample identification and integrity
		2.3	Check test equipment is clean, in good order and within calibration
		2.4	Complete test required in accordance with standard procedures/instructions
3	Interpret results and take action	3.1	Note anything about sample, equipment or the test itself which may have caused it to give a bad result
		3.2	Compare results to specification
		3.3	Take action appropriate to the test results and any other observations
4	Complete sample and test cycle	4.1	Complete required records
		4.2	Store and/or dispose of sample as required
		4.3	Clean all equipment and leave ready for next sample/test

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- test methods
- sampling techniques
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- emergency procedures
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Unit Mapping Information

Assessment Requirements for MSMSUP292 Sample and test materials and product

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP292A Sample and test materials and product

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- undertake collection and processing of sample
- select and use appropriate procedures
- undertake tests with adequate reproducibility
- check and clean equipment
- recognise suspicious test results caused by sampling/testing faults
- compare results to specifications and take appropriate action as defined in relevant procedures
- complete workplace forms, label samples and record results.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant procedures
- specifications for test results
- types and application of sample techniques and their requirements
- types and application of test methods and critical factors leading to good/poor test results

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operations
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems

© Commonwealth of Australia, 2025 Public Skills Australia

  - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMSUP390 Use structured problem-solving tools

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed.

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem-solving tools.

Application

This unit describes the skills and knowledge required to use structured process improvement tools to solve process and other problems. It describes the broad application of in-depth and rigorous structured problem-solving techniques to identify opportunities for improvement.

This unit applies to experienced operators, team leaders, supervisors or people in similar roles who are required to identify improvements and/or solve problems beyond those associated directly with the process unit and/or equipment.

This unit applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all work environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements	**Performance Criteria**
Elements describe the essential *outcomes.*	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify the problem	1.1 Identify variances from desired operating and/or output parameters and quality 1.2 Define the extent, cause and nature of the problem by observation

© Commonwealth of Australia, 2025 Public Skills Australia

Elements	**Performance Criteria**
Elements describe the essential *outcomes.*	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	and investigation 1.3 State and specify the problem clearly
2. Determine fundamental cause of problem	2.1 Select problem-solving tool appropriate to the problem and the context 2.2 Identify possible causes based on experience and the use of problem-solving tools and analytical techniques 2.3 Develop possible cause statements 2.4 Determine fundamental cause
3. Determine corrective action	3.1 Determine all possible options for resolution of the problem 3.2 Identify strengths and weaknesses of possible options 3.3 Determine corrective action to remove the problem and possible future causes 3.4 Develop implementation plans identifying measurable objectives, resource needs and timelines in accordance with safety and operating procedures 3.5 Develop recommendations for ongoing monitoring and testing
4. Communicate recommendations	4.1 Prepare report on recommendations 4.2 Present recommendations to appropriate personnel 4.3 Follow up recommendations

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSMSUP390 Use structured problem-solving tools

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed.

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem-solving tools.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified at least 1 problem
- analysed problem using at least 1 analysis tool drawn from each of 2 different groups of tools (basic, visual, process, business and organisation specific)
- selected the preferred solution
- developed and used an implementation plan, that includes:
  - specific, measurable, achievable, relevant, timed (SMART) objectives
  - resource requirements
  - methods for reaching objectives
  - timelines
  - methods of checking and adjusting adherence to plan
- communicated effectively with other personnel.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- relevant organisation procedures
- risks, risk assessment and controls relevant to problem being analysed
- targets and measures for output and quality
- types and application of problem-solving tools and analytical techniques
- relevant equipment and operational processes.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies, as well as, using suitable facilities, equipment and resources.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSMWHS200 Work safely

Modification History

Release 3. Equivalent. Mapping information updated.

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMOHS200A Work safely.

Application

This unit describes the skills and knowledge required to apply workplace policies and procedures to maintain a safe work environment for self and others. This includes identifying work health and safety (WHS) hazards, assessing risk and following safety procedures in the workplace with minimal supervision.

This unit applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Work health and safety

Elements and Performance Criteria

Elements	**Performance Criteria**
Elements describe the essential *outcomes.*	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify hazards and assess risk	1.1 Identify hazards in the work area before and during work 1.2 Access and apply relevant safety data sheets (SDS) 1.3 Assess risks for the identified hazards

© Commonwealth of Australia, 2025 Public Skills Australia

Elements	**Performance Criteria**
Elements describe the essential *outcomes.*	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Identify controls for these hazards from procedures 1.5 Review effectiveness of controls within the scope of authority 1.6 Identify and report remaining risk
2. Follow procedures for risk control	2.1 Control risks when working under minimal supervision by following workplace procedures 2.2 Follow safety signs and other safety indicators and zones 2.3 Select, use and maintain relevant personal protective equipment (PPE) 2.4 Handle and store items and materials relevant to job safely
3. Follow emergency procedures	3.1 Recognise emergency situations 3.2 Take appropriate initial emergency action 3.3 Follow procedures for dealing with a range of site or plant emergencies
4. Participate in the enhancement of safety	4.1 Raise WHS issues with designated personnel in accordance with workplace procedures and relevant requirements of WHS legislation 4.2 Contribute to participative arrangements for WHS management in the workplace within organisation procedures and the scope of responsibilities and competencies 4.3 Provide input to minimise hazards in work area in line with organisation WHS procedures 4.4 Provide input to opportunities for development of work group's competencies in relation to WHS 4.5 Support the implementation of procedures to control risks using the hierarchy of control and in accordance with organisation procedures 4.6 Report to appropriate people in accordance with workplace procedures when non-routine hazards arise
5. Work in accordance with WHS policies and procedures	5.1 Follow workplace procedures to achieve a safe working environment in accordance with all relevant WHS legislation, including codes of practice relating to hazards within the workplace or industry 5.2 Identify the duties, rights and obligations of employees and employers under the relevant WHS legislation 5.3 Complete hazard, accident or incident reports as required by workplace procedures

© Commonwealth of Australia, 2025 Public Skills Australia

Elements	Performance Criteria
Elements describe the essential *outcomes.*	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	5.4 Seek assistance with documentation and processes when needed

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSMWHS200 Work safely

Modification History

Release 3. Equivalent. Mapping information updated.

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMOHS200A Work safely.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified hazards relevant to work area and followed procedures to:
  - assess risks associated with the hazards
  - identify and apply standard controls
  - check that controls are in place and operational.
  -

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- organisational work health and safety (WHS) procedures, including procedures for reporting WHS problems and corrective actions
- duties, rights and obligations of employees and employers under the relevant WHS legislation as they relate to the job role
- hazards that may arise in the work environment, including:
  - their possible causes
  - potential consequences
  - appropriate risk controls
- hierarchy of control
- types and application of personal protective equipment (PPE)
- hazard and emergency signs, labels and alarms
- appropriate responses to non-standard situations.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

© Commonwealth of Australia, 2025 Public Skills Australia

- use of suitable facilities, equipment and resources, including:
  - WHS procedures, incident reporting documentation and safety data sheets (SDS).
  - personal protective equipment (PPE)

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSMWHS210 Undertake first response to non-fire incidents

Modification History

Release 2. Addition of information missing from the Assessment Requirements. Equivalent.

Release 1. Supersedes and is equivalent to MSAPMOHS210B Undertake first response to non-fire incidents

Application

This unit of competency covers the skills and knowledge required to recognise and respond to an incident (except for fire/explosion) to provide an appropriate first response.

This unit of competency applies to operators who are required to respond to an incident, such as a leak, spill or other incident. The worker is not expected to deal with the emerging incident, but to provide an initial first response in order to contain the incident and/or secure the immediate area in order to minimise resultant damages and loss. In this unit it is assumed that the worker is acting according to established workplace procedures.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

Organisations within the chemical, hydrocarbons and refining industries may find themselves falling under the provisions of various Major Hazard Facilities legislation. In developing this unit consideration has been given to the requirements of Sections 8 and 9 of the National Standard for the Control of Major Hazard Facilities [NOHSC:1014 (2002)] and the National Code of Practice for the Control of Major Hazard Facilities [NOHSC:2016 (1996)].

No other licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element	
1	Assess level of severity	1.1	Recognise an incident has occurred or is about to occur
		1.2	Access hazard information as appropriate
		1.3	Assess frequency, duration, actual and potential outcome
		1.4	Evaluate and communicate in a timely and appropriate manner the location, nature and extent of the incident
2	Undertake routine response to minimise affect of the incident	2.1	Select the appropriate response from the incident procedures
		2.2	Clear and secure the incident area
		2.3	Select appropriate materials and equipment to contain the incident
		2.4	Safely locate access and operate incident response equipment
		2.5	Apply incident containment procedures as appropriate
3	Notify responsible authorities	3.1	Follow incident reporting procedures
		3.2	Identify appropriate authorities and notify
		3.3	Clearly and unambiguously communicate information concerning the incident in a timely manner
4	Undertake safe evacuation	4.1	Evacuate the area in a safe and controlled manner when first response has failed to control the incident or has proven inappropriate
		4.2	Secure the immediate area of the incident to ensure no further loss occurs to people, equipment, materials,

process and environment

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements
- National Standard for the Control of Major Hazard Facilities [NOHSC:1014 (2002)] (where applicable)
- National Code of Practice for the Control of Major Hazard Facilities [NOHSC:2016 (1996)] (where applicable)

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- temporary instructions
- any similar instructions provided for the smooth running of the plant

© Commonwealth of Australia, 2025 Public Skills Australia

Hazards and incidents

Hazards and incidents include one or more of the following:

- smoke, darkness and heat
- heat, smoke, dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- limited head spaces or overhangs
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- limited head spaces or overhangs
- extreme weather
- other hazards that might arise

Tools and equipment

Tools and equipment include one or more of the following:

- personal protective equipment (PPE)
- incident response equipment, such as spill kits and vapour dispersion
- evacuation equipment
- survival equipment
- breathing apparatus
- smoke or self rescue respirators
- atmosphere/gas testing equipment
- mobile and portable equipment
- first aid equipment
- pipeline repair clamps
- lamb air movers
- barricades and signage
- communications equipment, such as two-way radios, mobile and satellite phones and pagers

© Commonwealth of Australia, 2025 Public Skills Australia

Responsible authorities

Responsible authorities include one or more of the following:

- internal personnel:
  - employer
  - supervisor
  - employees elected as incident team leader
  - other personnel with incident team leader responsibilities
- external personnel:
  - police
  - fire brigade
  - ambulance

Unit Mapping Information

Release 2. Addition of information missing from the Assessment Requirements. Equivalent.

Release 1. Supersedes and is equivalent to MSAPMOHS210B Undertake first response to non-fire incidents

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027

Assessment Requirements for MSMWHS210 Undertake first response to non-fire incidents

Modification History

Release 2. Addition of information missing from the Assessment Requirements. Equivalent.

Release 1. Supersedes and is equivalent to MSAPMOHS210B Undertake first response to non-fire incidents

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- recognise and assess incident situations
- determine appropriate actions according to procedures and within scope of own responsibilities, including:
  - evacuate (self/others)
  - seek assistance as appropriate
  - apply control measures
  - select and use incident response equipment
  - select and use personal protective equipment (PPE)
  - implement corrective action
  - minimise the effect of an incident situation
- communicate clearly and unambiguously with a range of personnel on incident situations, related problems and safety and emergency procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- types and application of incident response equipment
- principles of operation of the incident response equipment
- types and application of PPE
- roles and responsibilities of internal and external personnel in relation to incident situations
- communicating methods appropriate to role
- appropriate responses to different non-fire situations.

Assessment Conditions

- Competency must be achieved before performing this work unsupervised. Therefore this unit will typically be assessed off the job. Where assessment is undertaken on the job, appropriate supervision and safety precautions must be provided.

© Commonwealth of Australia, 2025 Public Skills Australia

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should provide evidence of the ability to perform over the range of situations which might be expected to be encountered, including typical disruptions to normal, smooth work conditions
  - must include the use of appropriate incident containment tools, equipment, media and safety gear requiring demonstration of preparation, operation, completion and responding to problems
  - must include responding to an actual spill or other incident in a simulated industrial situation and so may need to occur in a specialised area.
- Off-the-job assessment must sufficiently reflect realistic operational workplace conditions that cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Knowledge evidence will be collected independently of the above practical assessment and may use workbooks, written assessments, interviews (provided a record is kept) or other methods.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Persons seeking verification of competence/retraining must meet the same evidence requirements as above.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSMWHS300 Facilitate the implementation of WHS for a work group

Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS300A Facilitate the implementation of OHS for a work group

Application

This unit of competency covers the skills and knowledge required to implement and monitor defined work health and safety (WHS) policies and procedures for a work group or area.

This unit of competency applies to people in a team leader or similar role and to people who are on a WHS committee.

It covers the ability to provide clear directions, information, instruction, training and appropriate supervision regarding the relevant state/territory WHS legislation, codes of practice, industry standards, workplace procedures and work instructions. It also covers the ability to coach team members to participate and contribute to WHS management issues.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSMWHS200 Work safely

Competency Field

HSE

© Commonwealth of Australia, 2025 Public Skills Australia

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes		Performance criteria describe the performance needed to demonstrate achievement of the element	
1	Communicate WHS information for co-workers in team	1.1	Accurately and clearly explain to the work group basic WHS rights, responsibilities and requirements
		1.2	Provide, in a readily accessible manner, information on the relevant organisation WHS policies, procedures and programs, and accurately and clearly explain them to the work group
		1.3	Regularly provide relevant information about identified hazards and the outcomes of risk assessment and risk control procedures, and accurately and clearly explain them to the work group
2	Coach co-workers in team	2.1	Establish mutual support groups, e.g. buddy system, to encourage effective development of individual and group competencies in WHS
		2.2	Provide personal encouragement and assistance to team members to contribute to the management of WHS at the workplace
3	Facilitate the consultative process	3.1	Deal with, and promptly resolve, issues raised through consultation or refer to the appropriate personnel for resolution in accordance with workplace procedures
		3.2	Seek input from work group on WHS issues and proposed changes to process, procedures or work place
		3.3	Encourage and use feedback from individuals and teams to identify and initiate improvements in the management of WHS
		3.4	Promptly inform the work group of the outcomes of consultation over WHS issues

© Commonwealth of Australia, 2025 Public Skills Australia

4	Implement and monitor organisation procedures for identifying hazards, and assessing and controlling risk	4.1	Implement and monitor WHS policies and procedures as defined by organisation
		4.2	Monitor existing risk control measures and report results regularly
		4.3	Access internal and external sources of relevant WHS information
		4.4	Evaluate and identify inadequacies in existing risk control measures in accordance with the hierarchy of control, and report to designated personnel
		4.5	Identify inadequacies in resource allocation for implementation of risk control measures and report to designated personnel
		4.6	Identify actual/potential inadequacies in procedures and report to designated personnel
		4.7	Identify actual/potential inadequacies in individual or team competency and report to designated personnel
5	Maintain and use WHS records	5.1	Accurately and legibly complete WHS records for work area, in accordance with workplace requirements for WHS records and legal requirements for the maintenance of records of workplace injury and disease
		5.2	Use aggregated information from the area WHS records to identify hazards and monitor risk control procedures within work area according to procedures and within scope of responsibilities and competencies

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Hazards

Hazards include one or more of the following:

- smoke, darkness and heat
- electricity
- gas and
- gases and liquids under pressure
- structural hazards

© Commonwealth of Australia, 2025 Public Skills Australia

- structural collapse
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- flammability and explosivity
- hazardous products and materials
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- limited head spaces or overhangs
- unauthorised personnel
- other hazards that might arise

Appropriate personnel

Appropriate personnel include one or more of the following:

- employer
- supervisor
- employees elected as WHS representatives
- other personnel with WHS responsibilities

WHS records

WHS records include one or more of the following:

- hazard and incident reports
- logs/logs sheets
- inspection/start up/shut down checklists
- injury reports
- maintenance records

WHS information sources

WHS information sources include one or more of the following:

- WHS legislation, codes of practice and Australian and International standards
- WHS regulators
- WorkSafe Australia Guides
- industry bodies
- internet sites, journals and newsletters
- manufacturer manuals
- material safety data sheets (MSDS) and registers
- organisation WHS policies and procedures
- internal risk assessments, job safety analyses (JSAs) and workplace inspections

© Commonwealth of Australia, 2025 Public Skills Australia

- internal hazard and incident reports

Assessment Requirements for MSMWHS300 Facilitate the implementation of WHS for a work group

Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS300A Facilitate the implementation of OHS for a work group

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include the ability to:

- communicate using appropriate style and format for a range of stakeholders to:
  - promote and facilitate consultation and participation in the WHS processes
  - provide WHS information to work group
  - explain WHS procedures to work team members
  - report to designated personnel
  - seek input and feedback on WHS issues
  - undertake WHS issue resolution
- implement and monitor defined WHS activities for a work group or area
- encourage and assist the development of work group members
- evaluate and report on WHS procedures and practices
- participate in decisions which impact on WHS for the workgroup
- recognise a situation requiring action, including hazards, and take specified action to rectify or seek assistance as appropriate.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job sufficient to operate independently and to solve routine and non-routine problems, including:

- assessment of risk and implementation of risk control measures
- rights and responsibilities of employees under WHS legislation
- obligations of employers under the WHS legislation, including duty of care
- regulatory requirements for WHS information and consultation and processes and arrangements to meet these obligations
- regulatory requirements for WHS record keeping and reporting
- regulatory requirements for training and licensing relevant to WHS
- the hierarchy of control
- counselling, disciplinary and issue resolution processes.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

- Where the candidate does not currently possess evidence of competency in MSMWHS200 Work safely, it may be co-assessed with this unit.
- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should provide evidence of the ability to perform over the range of situations which might be expected to be encountered, including typical disruptions to normal, smooth work conditions
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include a demonstration of communication of WHS information to a group and the use of appropriate consultation and participation from within that group
  - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSS015022 Develop strategies for more sustainable use of resources

Modification History

Release 1. Updated unit code. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge to identify strategies for more sustainable uses of resources. The unit includes the identification of waste (muda) as part of a strategy for achieving better sustainability outcomes in a process as well as quantifying theoretical and actual resource (including energy) consumption.

This unit applies inside organisations and their value chains and specifically applies to the use of resources as part of an overall response to improving sustainability.

Where the carbon footprint (or water footprint or similar) of an organisation or value chain is known, the unit can be applied to developing strategies for the reduction of that footprint. A manager or technical specialist who has a major responsibility for sustainability as part of a broader work role would typically undertake this, or sustainability may be their primary work responsibility.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Quantify**	1.1	Identify all significant resources used by process

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
	resource consumption	1.2	Identify consumption measurements available for each resource
		1.3	Quantify consumption for each resource
2	**Quantify resource loss**	2.1	Determine theoretical consumption of each resource
		2.2	Compare theoretical consumption with actual consumption
		2.3	Quantify loss (emission) for each resource
3	**Recommend strategies for reducing muda (waste)**	3.1	Short-list high emission process steps
		3.2	Analyse process to identify emission steps or locations
		3.3	Determine root cause of emission
		3.4	Investigate methods for reducing emission
		3.5	Develop strategies and recommendations for improvement
4	**Prepare resources use audit report**	4.1	Identify purpose of report and key stakeholders
		4.2	Compile data, implications and recommendations
		4.3	Consult with stakeholders
		4.4	Write and present report

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSS015022 Develop strategies for more sustainable use of resources

Modification History

Release 1. Updated unit code. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- quantified significant resource consumption and emission using materials balancing for at least 1 organisation or value chain, including developing strategies for reducing emissions and preparing and presenting a resources use audit report.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the concept of muda (waste) and muda categories
- muda reduction methods and strategies
- methods and uses of material balancing
- methods and uses of energy balancing
- methods of comparing theoretical with actual resource consumption
- methods for mapping processes and resources consumed
- methods of measuring actual resource usage
- AS/NZS ISO 14001 Environmental Management Systems or its authorised replacement.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS402001 Apply competitive systems and practices

Modification History

Release 1 - Supersedes and is equivalent to MSS402001A Apply competitive systems and practices

Application

This unit of competency covers the skills and knowledge required to implement basic improvement practices within an organisation using competitive systems and practices. The unit focuses on bringing together the basic concepts and the holistic application of these basic concepts and processes to operations. It would typically be carried out working as part of a team.

This unit applies to an individual in an organisation that has embarked on competitive systems and practices. The unit covers the skills and knowledge required to contribute to the competitive systems and practices processes and assumes that they are to be used within the scope of the individual's job and authority.

This unit requires the application of skills associated with planning and organising an individual's own role within the competitive systems and practices framework.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

essential outcomes.		demonstrate achievement of the element.	
1	**Identify own place in the value chain**	1.1	Identify customers relevant to own work and their needs/requirements.
		1.2	Identify suppliers for own work.
		1.3	Identify value contributions along the chain.
		1.4	Identify and recommend methods of increasing own contribution to the value chain.
2	**Improve the product and process value**	2.1	Identify customer features/benefits in the product and process.
		2.2	Identify aspects of product and process which contribute to customer features/benefits.
		2.3	Identify aspects of product and process which do not contribute to customer benefits/features.
		2.4	Recommend methods of reducing waste and increasing features/benefits.
3	**Use competitive systems and practices**	3.1	Identify competitive systems and practices used in organisation and own work area.
		3.2	Apply practices appropriate for the job or process.
		3.3	Monitor the job/process and make adjustments to improve it in accordance with procedures.
		3.4	Identify own skill requirements and seek skill development, if required.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Customers include one or more of:

- internal or external customers and should be sufficiently close to the individual's work as to be easily identifiable
- final customers used as the basis for the identification of value and waste.

Suppliers include one or more of:

- internal suppliers
- external suppliers sufficiently close to the individual's work as to be easily identifiable.

Procedures (written, verbal, visual, computer based, etc.) include one or more of:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions

© Commonwealth of Australia, 2025 Public Skills Australia

- any similar instructions provided for the smooth running of the plant.

Assessment Requirements for MSS402001 Apply competitive systems and practices

Modification History

Release 1 - Supersedes and is equivalent to MSS402001A Apply competitive systems and practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to always apply competitive systems and practices to their own job to:

- identify own place in the value chain relevant to their job
- use competitive systems and practices tools and thinking
- recommend improvements in product and/or process.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- customer requirements and their role in fulfilling them
- the value chain for products they make and their place in it
- identification of muda (waste) and its reduction.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the application of competitive systems and practice in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.

© Commonwealth of Australia, 2025 Public Skills Australia

- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402002 Sustain process improvements

Modification History

Release 1. Supersedes and is equivalent to MSS402002A Sustain process improvements

Application

This unit of competency covers the skills and knowledge required by an individual to prevent process improvements in their own work from slipping back to former practices or digressing to less efficient practices.

This unit applies to organisations implementing competitive systems and practices and continuous improvement. It covers the skills needed to ensure that process improvements are sustained and opportunities taken to suggest further improvements.

Improvement initiatives can be made by any of a number of methods and by teams or individuals. The unit assumes that desired levels of performance or quality are known to employees.

The unit can be applied to all areas of an organisation, including production, maintenance, logistics and office functions.

This unit requires the application of skills associated with problem solving, initiative and enterprise and self-management in order to understand implement and monitor improvement practices. It also requires the ability to identify and address personal skill gaps in order to manage own ability to implement change.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Examine previous improvements**	1.1	Identify impact of previous process improvements to equipment, operations, services or products in own work area.
		1.2	Identify improvements where objectives have not been met.
2	**Implement corrective actions**	2.1	Identify corrective actions that can be taken by self on process improvements that have not met objectives.
		2.2	Obtain any required approvals.
		2.3	Identify any additional, personal skill gaps and seek skill development.
		2.4	Adopt improved processes.
3	**Check changes**	3.1	Identify claimed improvements.
		3.2	Identify methods of observing and measuring claimed improvements in own work area.
		3.3	Check if claimed improvements are occurring and report problems in accordance with procedures.
4	**Check for further improvements**	4.1	Look for areas of possible further improvement.
		4.2	Discuss further improvements with peers and supervisors.
		4.3	Take action to implement improvements in accordance with procedures.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Customers include one or more of:	• internal customers • external customers sufficiently close to the individual’s work as to be easily identifiable • final customers used as the basis for the identification of value and waste.
Suppliers include	• internal suppliers

© Commonwealth of Australia, 2025 Public Skills Australia

one or more of:	• external suppliers sufficiently close to the individual's work as to be easily identifiable.
Measuring improvements includes one or more of:	• personally taking measurements • arranging for measurements to be taken/made by appropriate personnel.
Procedures (written, verbal, visual, computer based, etc.) include one or any combination of:	• work instructions • standard operating procedures (SOPs) • safe work method statements • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant.
Corrective actions to sustain improvements include one or more of:	• techniques for preventing mistakes by designing the operations process, equipment and tools so that an operation literally cannot be performed incorrectly (e.g. baka-yoke) • techniques that generate warning signals where a mistake is about to be performed (poka-yoke) • administrative techniques, such as procedure/work instruction changes • skilling techniques, such as training, mentoring, demonstration • process techniques, such as changing the process/conditions/variables.

Assessment Requirements for MSS402002 Sustain process improvements

Modification History

Release 1. Supersedes and is equivalent to MSS402002A Sustain process improvements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to examine three (3) or more previous improvements, including one (1) or more where improvement objectives have not been met, and to:

- identify corrective actions that can be taken by self
- implement those corrective actions
- check whether the claimed improvements have occurred
- check for further improvements.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- muda (waste)
- indicators of processes not delivering claimed improvements
- baka-yoke and poka-yoke techniques.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include actions to sustain process improvements in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.

© Commonwealth of Australia, 2025 Public Skills Australia

- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402010 Manage the impact of change on own work

Modification History

Release 1. Supersedes and is equivalent to MSS402010A Manage the impact of change on own work

Application

This unit of competency covers the skills and knowledge required by an individual to effectively manage the changes in their own work resulting from their organisation's implementation of competitive systems and practices.

This unit applies to an individual in an organisation implementing competitive systems and practices that affect the individual's own work. The unit includes the skills required to positively participate in ongoing and continuous change as it affects their work. The individual will be expected to deal with these changes as part of a team and to give feedback from their own perspective.

This unit requires the application of skills associated with problem solving, planning and organising and self-management for assessing and managing the impact of change on own work. This unit also requires the ability to seek information and feedback from team members on the impact of changes and suggested improvements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Examine the impact of change on own work practices**	1.1	Identify competitive systems and practices relevant to changes in own work.
		1.2	Examine changes to work flow.
		1.3	Examine changes to equipment/process/physical environment.
		1.4	Examine changes to work relationship with team members and other teams.
		1.5	Examine changes to data collection needs.
		1.6	Examine changed work for impacts on health, safety and environment (HSE).
		1.7	Examine changes to quality requirements.
		1.8	Identify any additional individual skill needs.
		1.9	Identify other areas requiring assistance.
2	**Implement change**	2.1	Review changes which may have an adverse impact with team leader.
		2.2	Adopt changes to individual work practice.
		2.3	Seek assistance in gathering/processing data, as required.
		2.4	Implement the data collection/processing and take actions on resulting information in accordance with procedures.
		2.5	Seek assistance/training to meet needs caused by change.
3	**Implement continuous improvement**	3.1	Critically examine all changes.
		3.2	Identify impacts of changes both up and down the immediate value stream.

© Commonwealth of Australia, 2025 Public Skills Australia

3.3 Identify areas for improvement.

3.4 Make recommendations for improvement in accordance with procedures.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Impact of change	• elements being undertaken individually or as part of a team

© Commonwealth of Australia, 2025 Public Skills Australia

may include one or more of:	• seeking assistance from team leaders for areas outside the employee's range of responsibility and authority.
Procedures (written, verbal, visual, computer based, etc.) include one or more of:	• work instructions • standard operating procedures (SOPs) • safe work method statements • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant.
Gathering and monitoring performance data include one or more of:	• manual gathering by individual employees through charts, tally sheets or keypad/board entry • automatic collection through software, such as SCADA software, ERP systems, MRP and proprietary systems.
Continuous improvement (kaizen) includes evaluation of one or more of:	• time required • resources used • resultant quality • other aspects relevant to the process.
Stages where value stream actions may occur include one or more of:	• sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer • after market support.

Assessment Requirements for MSS402010 Manage the impact of change on own work

Modification History

Release 1. Supersedes and is equivalent to MSS402010A Manage the impact of change on own work

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more changes, to:

- identify competitive systems and practices used in their own workplace
- identify change and its impact on own work practices in relation to implementation of competitive systems and practices
- adopt change and seek any required assistance
- identify areas for improvement.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision:

- features of common competitive systems and practices in use in own workplace
- sources of data on the process/plant
- methods of determining own skill needs
- health, safety and environment (HSE) principles relevant to own job
- change implementation contacts and procedures
- employee assistance mechanisms within organisation.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include evidence of responding to change in own workplace

© Commonwealth of Australia, 2025 Public Skills Australia

    - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations. Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including, relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
    - relevant VET or other qualification/Statement of Attainment AND/OR
    - relevant workplace experience
- Currency can be demonstrated through:
    - performing the competency being assessed as part of current employment OR
    - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402020 Apply quick changeover procedures

Modification History

Release 1. Supersedes and is equivalent to MSS402020A Apply quick changeover procedures

Application

This unit of competency covers the skills and knowledge required to apply quick changeover procedures in an organisation implementing competitive systems and practices.

This unit applies to individuals in an organisation which is implementing competitive systems and practices and is pursuing quick changeover as one of its competitive operations tools. The unit can apply to quick changeovers of equipment, processes, batches or product type. It requires the application of skills associated with applying quick changeover procedures, including the planning and organising of own work, identifying problems and making suggestions for improvement of procedures.

Particular technical skills may also be required in some operations sectors and for some jobs. These skills should be gained from the Training Package relevant to the individual's industry and occupation.

This unit may not be applicable to a totally continuous operation producing only the one product, or simultaneous range of products. The unit is also not applicable to a maintenance/PVI shutdown as experienced by continuous process manufacturers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Prepare for changeover**	1.1	Determine when changeover will be required.
		1.2	Review plans and instructions for quick changeover.
		1.3	Identify role of others in quick changeover.
		1.4	Obtain all required tools/parts/materials for changeover.
		1.5	Organise process and tools/parts/materials ready for changeover.
2	**Make quick changeover**	2.1	Plan changeover according to quick changeover principles.
		2.2	Liaise and work with relevant people in quick changeover.
		2.3	Complete changeover according to procedures.
		2.4	Check output meets specification.
		2.5	Debrief with all relevant stakeholders.
		2.6	Note any steps which cause a problem.
		2.7	Recommend changes to problematic steps.
3	**Improve work health and safety (WHS)**	3.1	Identify hazards to self or others in all steps/actions.
		3.2	Determine risks from each hazard.
		3.3	Identify actions which may be performed in a more ergonomic manner.
		3.4	Recommend changes to improve WHS.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Changeover may include one or more of:	• an exchange of equipment (often dies or tools (traditional)) • a change between products/batches or between campaigns or processes. It may be any quantum change to produce a different product or undertake a different process.

© Commonwealth of Australia, 2025 Public Skills Australia

Set-up can be divided into two types:	• internal set-up (requires work to stop, work that can be done only when the machine or process is not actively engaged in production, computers etc. need to be reset and restarted) • external set-up (work can continue during the changeover, work can be done concurrently with the machine or process performing production duties).
Set-up time includes:	• the work time required to change over a machine or process from one item or operation to the next item or operation.
Procedures (written, verbal, visual, computer based, etc.) include one or more of:	• work instructions • standard operating procedures (SOPs) • safe work method statements • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant.

Assessment Requirements for MSS402020 Apply quick changeover procedures

Modification History

Release 1. Supersedes and is equivalent to MSS402020A Apply quick changeover procedures

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for three (3) or more quick changeovers, to:

- identify the scope and equipment to be used in a quick changeover implemented in their own workplace
- plan and complete changeover
- identify problems in quick changeovers
- contribute suggestions for improvement.

Knowledge Evidence

- Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision and to solve routine problems, including knowledge of:
- principles of quick changeover, including:
  - setting of target time for changeover
  - conversion of internal set-up time to external set-up time, where appropriate
  - simplification of changeover steps
  - monitoring and continuous improvement of changeovers
- purpose and requirements of changeover
- minimisation of changeover waste (e.g. scrap and energy)
- quality requirements for products and purposes
- relevant operational procedures
- health, safety and environment (HSE) principles relevant to own job.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace

© Commonwealth of Australia, 2025 Public Skills Australia

  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include actual quick changeovers, the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations. Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402021 Apply Just in Time procedures

Modification History

Release 1. Supersedes and is equivalent to MSS402021A Apply Just in Time procedures

Application

This unit of competency covers the skills and knowledge required to work in an organisation implementing and/or utilising Just in Time (JIT) procedures.

This unit applies to an individual working in an organisation following JIT who will need to follow procedures which are specific to JIT, such as the controlled flow of material (e.g. the use of kanban and elimination of waste). This will involve the individual in the application of the pull system to their job and the authorisation of product/material flows in accordance with procedures and their level of authority.

This unit requires the application of skills associated with planning and organising and self-management to deliver product on demand using necessary tools, equipment and processes to meet production requirements. The unit also requires an ability to recognise and act on problems that may interfere with meeting production demands.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Respond to indicator of demand**	1.1	Identify pull of product through work role.
		1.2	Recognise indicator of flow authorisation.
		1.3	Identify production or service required.
2	**Make products or deliver service to demand**	2.1	Make product or deliver service as required by ticket.
		2.2	Identify any factors likely to prevent demand being satisfied in own work or work of the team.
		2.3	Take action in accordance with procedures.
3	**Update demand information as required**	3.1	Record information on ticket to procedures, as required.
		3.2	Facilitate operation of flow authorisation as part of work.
4	**Recommend improvements**	4.1	Examine the operation of the JIT system as it relates to own work.
		4.2	Identify areas for improvement.
		4.3	Identify any additional personal skill requirements to implement JIT procedures.
		4.4	Recommend improvements.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect

performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
JIT requires availability:	• precisely when the service, product or operation is to be produced or undertaken • in the right quantity and at the right quality.
Product includes one or more of:	• a physical product • a supporting utility service, such as water, gas and power • some other service (e.g. cranes and forklifts).
Indicator of demand includes one or more of:	• kanban bin, ticket or similar • some other indicator of demand pull which authorises production or movement of an item (in some plants, this may also include authorisation using SCADA software).
Procedures (written, verbal, visual, computer based, etc.) include one or	• work instructions • standard operating procedures (SOPs) • safe work method statements • formulas/recipes

Assessment Requirements for MSS402021 Apply Just in Time procedures

Modification History

Release 1. Supersedes and is equivalent to MSS402021A Apply Just in Time procedures

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more JIT procedures, to:

- identify the indicators of demand and the flow authorisation system in their own workplace
- relate products and services supplied by suppliers and customers to the flow authorisation system
- interpret received indicators of demand correctly for quantity, quality and time of delivery
- contribute suggestions for improvement.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- JIT methods relevant to own job
- relevant indicator of demands for own job
- own role in flow authorisation
- faults and other issues that may threaten the JIT delivery of own product or service
- procedures for recommending improvements.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include JIT procedures in own workplace

© Commonwealth of Australia, 2025 Public Skills Australia

    - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations. Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSS402030 Apply cost factors to work practices

Modification History

Release 1. Supersedes and is equivalent to MSS402030A Apply cost factors to work practices

Application

This unit of competency covers the skills and knowledge required by an individual to identify cost components in their work and to be able to determine, in general terms, the cost impacts of alternative actions.

This unit applies to an individual who is required to contribute to, and be involved in, the assessment of cost factors in their work. This may be done individually or in a team environment.

The unit covers the skills to be able to assess the relative costs of the alternatives and use this as one of the key factors in making decisions. Decisions are made within the scope of the employee's authority and according to procedures. Typical decisions include those that contribute to the efficient organisation of own work and the improvement of production time and cycle times.

This unit requires the application of skills associated with problem solving to identify cost factors and cost implications of own work and self-management to apply cost-effective practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Identify the major cost components of product or process in own work area**	1.1	Identify cost components in the product or process in own work area.
		1.2	Recognise the impact of current or alternative actions on costs.
2	**Identify constraints to cost-efficiency**	2.1	Identify required production/process rate and major costs.
		2.2	Identify costs factors under individual or team control.
		2.3	Relate identified costs factors to impact on overall cost of production/process.
		2.4	Identify cost factors that are a constraint to cost-efficiency in own work area.
3	**Apply cost-efficient work practices**	3.1	Identify and explain to relevant people the implications of possible actions/changes to improve cost-efficiency in simple financial terms.
		3.2	Identify non-financial implications of proposed changes in discussion with relevant people.
		3.3	Select actions which minimise overall costs.
		3.4	Monitor actions to ensure cost-efficiency in own work area is maintained.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Cost components include all of:

- fixed and variable costs, such as power/energy, materials, plant and equipment, production or process time, including impact of salary and wages
- office expenses, such as telephone and internet
- government taxes and charges.

Process includes one or more of:

- production
- maintenance
- logistics
- office
- other support processes in an organisation.

Overall cost includes all of:

- the assessment of negative and positive financial implications
- negative long-term issues, such as work health and safety (WHS), environmental and regulatory issues.

Assessment Requirements for MSS402030 Apply cost factors to work practices

Modification History

Release 1. Supersedes and is equivalent to MSS402030A Apply cost factors to work practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, on one (1) or more occasions to use cost factors in making a decision related to their workplace, and to:

- identify major cost components
- distinguish components which they can control from those they can't
- make decisions which minimise overall cost and explain these to stakeholders.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- concepts of expense, income and capital
- fixed and variable cost components relevant to own work:
  - power/energy
  - materials, plant and equipment
  - production or process time, including impact of salary and wages
  - office expenses
  - government taxes and charges
- relative impact of each of these
- financial and non-financial impacts of cost reductions
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.

© Commonwealth of Australia, 2025 Public Skills Australia

- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment will use a real project in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402031 Interpret product costs in terms of customer requirements

Modification History

Release 1. Supersedes and is equivalent to MSS402031A Interpret product costs in terms of customer requirements.

Release 2. Unit code in Application updated. Equivalent outcome.

Application

This unit of competency covers the skills and knowledge required by an individual to be able to identify the major cost components of either products or processes, the basic relationship of these to customer benefit, and use this to help minimise waste (defined as anything not delivering value as defined by the customer). It has a different focus to *MSS402082 Apply cost factors to work practices*, which focuses on costs in isolation, whereas this unit regards all costs not directly leading to customer benefit as waste.

This unit applies to an individual who uses their understanding of the customer's requirements of the product or process being undertaken as the basis for investigating work processes to identify waste sources and then takes action relevant to their level of competency and authority to reduce this waste. It requires an understanding of both the cost factors in the products they make and also the benefits which the customer derives from the product.

This competency may be performed individually or in a team-based environment.

This unit requires the application of skills associated with analysis and problem solving to identify waste and determine ways to minimise waste. This unit requires initiative and enterprise and application of learning in concepts of waste and waste minimisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Identify cost components deriving from customer benefit and other costs**	1.1	Identify customer features/benefits in product or process being undertaken.
		1.2	Identify cost components which deliver customer features/benefits and those which do not.
2	**Compare required performance of product or process steps with actual performance**	2.1	Identify performance required to meet customer needs in own work and that of team.
		2.2	Identify actual performance.
		2.3	Compare cost components of products or process with current customer-related targets.
		2.4	Separate costs components into those that contribute to customer features/benefits and those that do not.
		2.5	Determine non-contributing cost components which are under control of the individual or team.
3	**Minimise waste**	3.1	Recommend changes to eliminate or reduce waste.
		3.2	Adopt changes which minimises waste.
		3.3	Monitor effect of changes to ensure gains are made against customer features/benefits.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect

© Commonwealth of Australia, 2025 Public Skills Australia

performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just In Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Customer features/ benefits include all of:

- characteristics of the product or service which the customer perceives as meeting their need
- characteristics of the product or service which the customer perceives as adding value
- financial or features items which the customer perceives and a benefit.

Performance includes all of:

- takt - the allowable time to produce one product at the rate and quality customers are demanding it
- the rate of output of the plant compared to the takt time.

Customer-related targets includes all of:

- internally set financial targets that contribute to meeting customer features/benefits
- operational targets that contribute to meeting customer features/benefits
- other targets that contribute to meeting customer features/benefits.

© Commonwealth of Australia, 2025 Public Skills Australia

Contributing cost components include all of:	• costs that make a direct contribution to customer features/benefits. • costs that need to be incurred (although they may be minimised) in order to gain the customer feature/benefit.
Non-contributing cost components include all of:	• costs that do not contribute to customer features/benefits • costs that must be maintained, such as regulatory compliance costs which do not contribute to customer features and so should be minimised • costs that neither contribute to customer features/benefits nor must be maintained (muda) and so should be eliminated if possible.
Muda (waste) includes all of:	• any activity which does not contribute to customer or organisation benefit/features in the product • activities which do not yield any benefit to the organisation or any benefit to the organisation's customers • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items.

MSS402040 Apply 5S procedures

Modification History

Release 1. Supersedes and is equivalent to MSS402040A Apply 5S procedures

Release 2. Duplicated performance Criteria removed. Equivalent outcome.

Application

This unit of competency covers the skills and knowledge required by an individual to apply 5S procedures to their own job and work area. The unit assumes the individual has a particular job and an allocated work area and that processes in the work area are known by the individual.

This unit applies to an individual in an organisation who works in an operational position as part of production, maintenance, logistics, etc. The unit can also apply to individuals in other organisations who have a discrete role and responsibility for individually managed processes.

This unit applies where an organisation has decided to embark on a competitive systems and practices strategy and as part of this has adopted the philosophy of 5S as one of the tools to improve performance. The employee needs to apply 5S to their job and work area and maintain the housekeeping and other standards set by 5S.

This unit requires the application of skills associated with planning and organising, problem solving and self-management, in order to identify and implement 5S housekeeping practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Sort needed items from unneeded**	1.1	Identify all items in the work area.
		1.2	Sort items to achieve deliverables and value expected by downstream and final customers.
		1.3	Sort items required for regulatory or other required purposes.
		1.4	Place any non-essential item in an appropriate place other than the workplace.
		1.5	Regularly check that only essential items are in the work area.
2	**Set the workplace in order**	2.1	Identify the best location for each essential item.
		2.2	Place each essential item in its assigned location.
		2.3	After use immediately return each essential item to its assigned location.
		2.4	Regularly check that each essential item is in its assigned location.
3	**Shine the work area**	3.1	Keep the work area clean and tidy at all times.
		3.2	Conduct regular housekeeping activities during shift.
		3.3	Ensure the work area is neat, clean and tidy at both beginning and end of shift.
4	**Standardise activities**	4.1	Follow procedures.
		4.2	Follow checklists for activities, where available.
		4.3	Keep the work area to specified standard.
5	**Sustain the 5S system**	5.1	Clean up after completion of job and before commencing next job or end of shift.
		5.2	Identify situations where compliance to standards is unlikely and take actions specified in procedures.

© Commonwealth of Australia, 2025 Public Skills Australia

5.3 Inspect work area regularly for compliance to specified standard.

5.4 Recommend improvements to lift the level of compliance in the workplace.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

5S includes all of:

- sort

© Commonwealth of Australia, 2025 Public Skills Australia

- set in order
- shine
- standardise
- sustain.

Sort includes all of:

- separating necessary from unnecessary items (equipment and supplies)
- keeping only what is absolutely necessary for the work processes that comprise the job
- disposing of (or relocating) all other items.

Set in order includes all of:

- assigning required equipment and materials appropriate locations in the work area
- consideration of frequency of use, ergonomics and work health and safety (WHS)
- provision of facilities to maintain the locations.

Shine includes one or more of:

- keeping the work area clean at all times which should be carried out to a regular daily schedule against allowed time, usually at the end of the day or of a particular process
- keeping work area organised
- noting any signs of wear, damage, leakage, safety risks or other issues that require immediate attention.

Best location includes one or more of:

- changes to the layout of furniture
- arrangement of equipment
- provision of services
- location of personnel.

Standardising includes one or more of:

- activities that help maintain the order and the housekeeping standards
- using procedures and checklists developed from a procedure.

Sustain includes one or more of:

- making sure that daily activities are completed every day regardless of circumstance
- cleaning up after a job
- undertaking inspections, including:
- informal inspections carried out often, at least weekly
- formal inspections carried out at least monthly

© Commonwealth of Australia, 2025 Public Skills Australia

- generating continuous improvement actions from daily activities
- following up specific actions to generate continuous improvement.

Items in work area include one or more of:

- tools
- jigs/fixtures
- materials/components
- plant and equipment
- manuals
- personal items (e.g. bags, lunch boxes and posters)
- safety equipment and personal protective equipment (PPE)
- other items which happen to be in the work area.

Procedures (written, verbal, visual, computer based, etc.) include one or more of:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

Assessment Requirements for MSS402040 Apply 5S procedures

Modification History

Release 1. Supersedes and is equivalent to MSS402040A Apply 5S procedures

Release 2. Duplicated performance Criteria removed. Equivalent outcome.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, in one (1) or more allocated areas, to:

- implement and sustain 5S in own workplace
- identify own tasks and responsibilities
- contribute suggestions for improvement.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- purpose of 5S in the workplace
- meaning and application of 5S steps to own workplace and job
- principles of efficient workplace organisation
- identifying waste (muda)
- procedures for recommending improvements.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the application of 5S procedures in a work area where 5S has not previously been undertaken, or, demonstration of sustaining 5S principles in a work area that has already undergone prior 5S procedures
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.

© Commonwealth of Australia, 2025 Public Skills Australia

- Assessment should occur in operational workplace situations. Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402050 Monitor process capability

Modification History

Release 1. Supersedes and is equivalent to MSS402050A Monitor process capability

Application

This unit of competency covers the skills and knowledge required for gathering of data and the interpretation of simple information to determine the compliance of the process and the taking of action as defined by the procedures where the information reveals the process is out of control parameters.

This unit applies to an individual in an organisation adopting specific competitive systems and practices, usually either six sigma or statistical process control/three sigma, as a means of determining and improving the capability of their process to customer requirements. The individual is involved in collecting specified data and performing specified manipulations to the data (typically by plotting on a chart or by entering into a nominated computer program). The information is typically presented to team members in terms of graphs/charts which they are expected to interpret at a basic level and then take action in accordance with procedures to restore the process to being under control parameters.

This unit requires the application of skills associated with entering and monitoring operational data and information and requires initiative, enterprise and problem solving in identifying production variations and making improvement recommendations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Collect and process data**	1.1	Take specified measurements/readings/observations, as required.
		1.2	Enter data in log, computer or other record.
		1.3	Manipulate and/or chart data as required by procedures.
2	**Identify variations that are not random and take action**	2.1	Examine chart and/or reliability information.
		2.2	Distinguish between random variations and those with an identifiable cause.
		2.3	Take action specified in procedures when a variation with an identifiable cause occurs.
3	**Assist in process improvement**	3.1	Collect data for process capability improvement trials.
		3.2	Make recommendations for improvement.
		3.3	Implement revised capability monitoring procedures.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems	• lean operations

© Commonwealth of Australia, 2025 Public Skills Australia

and practices include one or more of:	• agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Procedures (written, verbal, visual, computer based, etc.) include one or any combination of:	• work instructions • standard operating procedures (SOPs) • safe work method statements • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant.
Process capability includes one or more of:	• the capability of the process to deliver to customer defined requirements • process stability against standardised practices and documentation to eliminate variation against customer requirements • statistical capability to deliver product within a specified range • a statistical technique to determine the range within which a product might be expected to fall.

Assessment Requirements for MSS402050 Monitor process capability

Modification History

Release 1. Supersedes and is equivalent to MSS402050A Monitor process capability

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to assist in one (1) or more process improvements and to routinely:

- collect and process data
- identify non-random variations and take the action specified in the procedures
- make recommendations for improvements.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- defects and defective product
- variation and the related statistical distribution
- control charting (or similar) methods
- analysis of information to identify trends or other non-random results
- determination of identifiable causes from variation information
- process capability determination from variation data.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include routine collection of data and identification of non-random variation in own workplace
  - must include participation in a process capability improvement project

© Commonwealth of Australia, 2025 Public Skills Australia

  - will typically include the use of appropriate statistical tools, aids and apps.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402051 Apply quality standards

Modification History

Release 2. Mapping updated to include superseded unit (not equivalent to LMTGN2002B Apply quality standards)

Release 1. Supersedes and is equivalent to MSS402051A Apply quality standards

Application

This unit of competency covers the skills and knowledge required to apply quality standards to work operations in an organisation. The unit is designed to complement competitive systems and practices units.

This unit applies to an individual who is expected to take responsibility for the quality of their own work, and to take actions specified in the procedures and within the scope of their job and authority to ensure that quality standards are met.

This unit requires the application of skills associated with interpreting and applying workplace standards and identifying and addressing problems that interfere with quality outcomes. The unit requires initiative, enterprise and self-management to ensure quality standards are achieved.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

essential outcomes.		demonstrate achievement of the element.	
1	**Assess own work**	1.1	Continuously check completed work against workplace standards relevant to the operation being undertaken.
		1.2	Demonstrate an understanding of how the work activities and completed work relate to the next production process or processes and to the final products or services concerned.
		1.3	Identify and isolate faulty components, products or processes.
		1.4	Record and/or report faults and any identified causes to the supervisor concerned, where required, in accordance with workplace procedures.
2	**Assess quality of received components, parts or materials**	2.1	Continuously measure/check received components, parts, materials, information, service or final products against workplace standards and specifications for conformance.
		2.2	Demonstrate an understanding of how the received components, parts or materials, information or service relate to the current operation and how they contribute to the final quality of the product or service.
		2.3	Identify and isolate faulty components, parts, materials or information that relate to the operator's work.
		2.4	Record and/or report faults and any identified causes in accordance with workplace procedures.
		2.5	Identify causes of any identified faults and take corrective action as specified in workplace procedures.
3	**Investigate causes of quality deviations**	3.1	Record information on quality and other indicators of process performance.
		3.2	Investigate and report causes of deviations from specified quality standards for components.
		3.3	Recommend suitable preventative action based on workplace quality standards and the identified causes of deviations from specified quality standards of materials.

- current reality tree.

Quality parameters include one or more of:

- finish
- size
- durability
- product or process variations
- materials

© Commonwealth of Australia, 2025 Public Skills Australia

- alignment
- colour
- damage and imperfections
- time
- is complete/contains all required information/data
- complies to template
- uses the correct styles and formats.

Quality checks include one or more of:

- visual inspection
- physical measurements
- chemical tests
- checks against patterns, templates, styles, formats and guides
- processing time.

Materials include one or more of:

- physical raw materials
- orders, forms and other documentation
- services required for undertaking an operation (e.g. power, water, compressed air and fuel).

Procedures (written, verbal, visual, computer based, etc) include one or more of:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

Indicators of production performance include one or more of:

- number of items/production rate
- delays and causes of delays (where known)
- other information as specified in the procedures.

Data entry/recording includes one or more of:

- keyboard
- written (including ticks or signs)
- verbal.

Sources of information/ documents include one

- quality and Australian Standards and procedures
- work instructions, patterns, designs and recipes

© Commonwealth of Australia, 2025 Public Skills Australia

or more of:	• organisation work procedures • manufacturer instructions for materials and equipment • organisational or external personnel • customer requirements.
Investigate and report requires following set procedures which include one or more of:	• verbal instructions • documented procedures • other quality procedures as implemented within an organisation or work environment.

Workplace context includes one or more of:	• work organisation procedures and practices relating to the manufacture and quality outcomes for products
	• conditions of service, legislation and industrial agreements, including:
	  • workplace agreements and awards
	  • federal or state/territory legislation
	  • standard work practice.

Reporting/communication includes one or more of:	• verbal and written communication in accordance with organisational policies and procedures • oral, written or visual communication, including simple data.
Being responsible for the maintenance of own work quality includes one or more of	• contributing to the quality improvement of team or section output, where necessary, in accordance with workplace procedures • following safety, environmental, housekeeping and quality procedures as specified by materials/machine/equipment manufacturers, regulatory authorities and the organisation.
Applicable regulations and legislation include one or more of	• work health and safety (WHS) legislation relevant to workplace activities • workers compensation legislation.

MSS402061 Use SCADA systems in operations

Modification History

Release 1. Supersedes and is equivalent to MSS402061A Use SCADA systems in operations

Application

This unit of competency covers the skills and knowledge required by an individual to interact with a System Control and Data Acquisition (SCADA) system as part of their job.

This unit applies to an individual in an organisation using a SCADA system and the individual must interface with that system. The individual will need to access this system as part of their routine and take actions based on the information they obtain from the SCADA system in accordance with procedures.

This unit requires the application of skills associated with using communication tools and technology for management of own work, planning and problem solving.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Use operator interface**	1.1 Identify SCADA terminals relevant to own workstation and functions.

© Commonwealth of Australia, 2025 Public Skills Australia

		1.2	Use keyboards, track ball, monitor and/or stand-alone controllers to access/interrogate system.
		1.3	Use correct level of access and find all relevant screens and information.
		1.4	Access message section and acknowledge messages.
		1.5	Input and output information correctly according to program and organisation requirements.
2	**Use information**	2.1	Obtain data and information from SCADA, as required, including process, supply and product chain data.
		2.2	Interpret data and information as required by own job.
		2.3	Find and use relevant historical data and information.
		2.4	Use manufacturer manuals or specifications, as required, to expand knowledge of SCADA system relevant to own work.
		2.5	Determine and prioritise required actions.
3	**Make required changes in accordance with procedures**	3.1	Adjust production/process in response to SCADA information.
		3.2	Record adjustments and variations to specifications/schedules and report to appropriate personnel.
		3.3	Seek feedback and information on adjustments to further improve procedures, where required.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSS402061 Use SCADA systems in operations

Modification History

Release 1. Supersedes and is equivalent to MSS402061A Use SCADA systems in operations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for three (3) or more adjustments to production/process utilising SCADA information, to:

- identify scope and relevance of SCADA system to own work
- access correct levels of SCADA system
- enter and retrieve data, including normal performance and variations
- use SCADA system to assist in own work.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- hierarchy of SCADA system and operation
- available information from, and controls exercised by, SCADA system.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include use of SCADA systems in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).

© Commonwealth of Australia, 2025 Public Skills Australia

- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402080 Undertake root cause analysis

Modification History

Release 1. Supersedes and is equivalent to MSS402080A Undertake root cause analysis

Application

This unit of competency covers the skills and knowledge required to undertake root cause analysis (RCA). This unit also covers the competencies needed by operators to contribute to an advanced maintenance strategy using RCA coupled with diagrams and charts.

This unit applies to individuals working in an organisation that is applying competitive systems and practices strategies. The unit applies to the formal problem solving to root cause that the individual must undertake in their own work area or where the individual contributes to problem solving to root cause as part of a team.

This unit requires an ability to seek and apply information from a variety of sources in order to inform RCAs. Initiative and enterprise is also required to identify quick fix and permanent solutions to problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Recognise problems**	1.1	Identify features or occurrences indicative of a problem.
		1.2	Use appropriate tools, techniques and charts to define the problem.
2	**Implement quick fix**	2.1	Recommend a quick fix within the scope of competency and authority.
		2.2	Use technology or processes relevant to the problem to implement quick fix.
3	**Determine root cause**	3.1	Identify a range of possible causes.
		3.2	Gather data and other information to eliminate or confirm possible causes.
		3.3	Use available data and information to link causes and effects.
		3.4	Seek assistance to obtain additional information if problem is beyond own competency/authority.
		3.5	Identify root cause.
4	**Develop permanent solution**	4.1	Identify a range of methods to eliminate the root cause or break the cause tree.
		4.2	Select the most appropriate solution.
		4.3	Liaise with relevant people.
		4.4	Recommend or implement solution within the limits of competency and authority.
		4.5	Monitor impact of solution and make further recommendations, as required.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Problems include one or more of:

- variation to normal plant or equipment operation
- unplanned or non-conforming process or operations outcomes
- out of specification products
- excess scrap
- accidents and emergencies
- regulatory breaches
- customer returns and complaints
- reduction or loss of sales.

Techniques/charts include one or more

- control charts
- Pareto charts

© Commonwealth of Australia, 2025 Public Skills Australia

of:

- run charts
- flow charts
- cause and effect diagrams
- tree diagrams
- 5 Whys analysis
- organisation specified/mandated methods.

Assessment Requirements for MSS402080 Undertake root cause analysis

Modification History

Release 1. Supersedes and is equivalent to MSS402080A Undertake root cause analysis

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more problems, to:

- undertake problem identification
- use appropriate processes to achieve root cause identification
- recommend solutions and implementation procedures to problems within own area
- monitor implementation of solutions.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- methodology of root cause analysis, including:
  - difference between quick fix and root cause elimination
  - breaking of causal tree
- indicators of problems and variances to normal operation
- relevant analysis tools (e.g. Pareto charts, 5 Whys).

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include a root cause analysis in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.

© Commonwealth of Australia, 2025 Public Skills Australia

- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402081 Contribute to the application of a proactive maintenance strategy

Modification History

Release 1. Supersedes and is equivalent to MSS402081A Contribute to the application of a proactive maintenance strategy

Application

This unit of competency covers the skills and knowledge required by an individual to make a positive contribution to proactive maintenance strategies, including actions that contribute to equipment uptime and overall equipment effectiveness (OEE). This unit applies in an organisation which is following a predictive, preventative or reliability-centred maintenance strategy and which requires commitment from all employees. The employee should 'own' their equipment/plant and take an active part in the implementation of the strategy within the scope of their authority.

This unit requires the application of skills associated with accessing and maintaining equipment/plant documentation. It also requires problem solving, initiative and enterprise to continually monitor and maintain operational performance of equipment/plant used in work role.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

essential outcomes.		demonstrate achievement of the element.	
1	**Maintain equipment/plant**	1.1	Keep equipment/plant within area of responsibility clean.
		1.2	Ensure equipment/plant is serviced and adjusted, as required, in accordance with procedures and own level of responsibility.
		1.3	Access manufacturer manuals and specifications, where required, to expand knowledge on the maintenance of equipment/plant.
		1.4	Access and update documentation on equipment/plant operation and maintenance in accordance with workplace procedures.
2	**Monitor operation of equipment/plant**	2.1	Regularly check key conditions of the equipment/plant as defined in workplace procedures.
		2.2	Regularly check equipment/plant OEE.
		2.3	Note any deviation from conditions specified in procedures.
3	**Identify deviations and patterns**	3.1	Identify any previous occurrences of a deviation.
		3.2	Identify any related deviations which have occurred.
		3.3	Identify any unusual occurrence which may be related to a deviation.
4	**Take action appropriate to competency and authority on deviation**	4.1	Liaise with relevant people regarding the deviation and the solution.
		4.2	Implement solution and/or assist with the implementation of the solution, as appropriate.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • OEE • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Uptime includes one or more of:	• the overall availability of the plant • the inverse of downtime or the unavailability of the plant • the fraction, percentage or time the plant is available for production.
Procedures (written, verbal, visual, computer based, etc.) include one or any combination of:	• work instructions • standard operating procedures (SOPs) • safe work method statements • formulas/recipes • batch sheets • temporary instructions

© Commonwealth of Australia, 2025 Public Skills Australia

- any similar instructions provided for the smooth running of the plant.

Assessment Requirements for MSS402081 Contribute to the application of a proactive maintenance strategy

Modification History

Release 1. Supersedes and is equivalent to MSS402081A Contribute to the application of a proactive maintenance strategy

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include the ability to monitor equipment/plant in one (1) or more areas, and to:

- maintain the equipment/plant to the required standard
- identify deviations in OEE requiring action
- take the action required by the procedures.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- interpretation of trends or other non-random variation
- determining OEE (availability x performance x quality rate) and uptime metrics
- principles of operation of plant/equipment and factors likely to cause deviations in performance
- identifying deviations requiring action
- appropriate actions for dealing with deviations.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the application of proactive maintenance in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.

© Commonwealth of Australia, 2025 Public Skills Australia

- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS402083 Use planning software systems in operations

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge to access planning software (often known as Enterprise Resource Planning (ERP), Materials Resource Planning (MRP and MRPII), and often by a proprietary name, to make routine business decisions required of the person as a regular part of their job.

This unit applies to an individual in an organisation using a planning software system and who must interface with that system. The unit applies to both accessing information from the planning software system and using it as an aid to decision making. This unit requires the application of communication, planning, and problem solving associated with using planning software in own work.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Use interface**	1.1	Identify terminals relevant to own workstation and functions
		1.2	Use peripherals to access system

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.3	Navigate through system and screens to find program menu and data relevant to own work
	1.4	Identify and input information on own work processes at required frequency and to required detail
	1.5	Access message section and read and acknowledge messages
	1.6	Identify problems and make suggestions for improvements to relevance of planning software to own work
2 **Access information**	2.1	Identify work processes that require information from planning software system
	2.2	Obtain data and information on current operations from the planning software system
	2.3	Identify the status of items in the value stream
	2.4	Access and read historical data and information
	2.5	Read and interpret information and identify and prioritise actions required in response to information
3 **Take action in accordance with procedures**	3.1	Take action in response to information obtained from planning software
	3.2	Follow up to ensure anticipated results have occurred
	3.3	Record adjustments and variations
	3.4	Identify any learning needs to use planning software and seek support

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSS402083 Use planning software systems in operations

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit and:

- used planning software systems for at least 3 different purposes, utilising outcomes to aid decision making.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- planning software system and operation, including:
  - terminal locations and types
  - security and access arrangements
  - information held in planning software relevant to own work
  - data collection methods for operations in work area
  - assistance arrangements for users of planning software
  - business activities exercised with the planning software system
- procedures for recommending improvements
- data and information sources.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of facilities, equipment and resources, including:
  - planning software systems.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS403001 Review competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS403001A Implement competitive systems and practices

Application

This unit of competency covers the skills and knowledge required by an individual to review competitive systems and practices in their own work in a way that integrates with others in the team or work area who are also implementing competitive systems and practices. The unit focuses on the holistic application of competitive systems and practices to achieve improved performance in own work and in activities with others in the team or work area that contribute to improving customer benefit. Depending on the operations or processes in the team or work area the unit may also include interaction with other teams and work areas.

The unit is suitable for individuals who have formal responsibility for the work of others, such as team leaders. It is also suitable for individuals, such as technicians and tradespeople, who must integrate the application of their technical skills with the implementation of competitive systems and practices in an organisation.

The unit applies to the areas of cost, quality, delivery, safety/environment, and employee capability, including continuous reviewing of performance against these five areas in liaison with other relevant people. Improvement initiatives in these five areas are usually developed and implemented with the support of technical support staff. Whereas other units may emphasise the competence to use one or more competitive practices, this unit emphasises the ability to advance on all five key areas over a moderate time period.

This unit requires the application of skills associated with problem solving and initiative and enterprise in order to identify opportunities to make improvements and maximise performance. Communication, the ability to work in a team and planning and organising skills are required to implement improvements and address any conflicts that arise. This unit also requires an ability to identify appropriate technology, and to consider and integrate feedback on how personal performance can be improved.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Contribute to the improvement of the operations system in team or work area**	1.1	Identify key performance indicators (KPIs) for area of operations.
		1.2	Review competitive systems and practices to improve health, safety and environment (HSE) performance of self and others.
		1.3	Review competitive systems and practices to maximise quality consistency.
		1.4	Review competitive systems and practices and identify any skill and training issues that need to be addressed to improve capability of self and others.
		1.5	Review competitive systems and practices to maximise customer benefit/cost ratio.
		1.6	Review competitive systems and practices to reduce lead time to delivery within the scope of authority and responsibility.
		1.7	Work with relevant stakeholders to resolve conflicts which arise from implementation of competitive systems and practices.
		1.8	Select improvements which will deliver the greatest overall benefit for the resources required/available without reducing current performance on individual factors.
2	**Implement improvements**	2.1	Implement the chosen improvement/s.
		2.2	Check the selected improvements improve the system as

© Commonwealth of Australia, 2025 Public Skills Australia

a whole and do not result in unintended consequences.

2.3 Monitor implementation and make adjustments, as required.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Customer includes one or more of:	• internal customers • external customers

© Commonwealth of Australia, 2025 Public Skills Australia

	• final customer.
Supplier includes one or more of:	• internal supplier • external supplier • ultimate source of inputs (e.g. raw materials) to the process.
Muda (waste) includes all of:	• any activity which does not contribute to customer perceived benefit/features • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items • other activities which do not yield any benefit to the organisation or any benefit to the organisations customers.
Operations includes all of:	• process • plant and equipment • procedures and practices • skills and work organisation of the workforce • other components which make up the productive organisation.
Implement improvements within one or more of:	• own job role • processes and operations in the work area or team.

Assessment Requirements for MSS403001 Review competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS403001A Implement competitive systems and practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to contribute to and implement improvements on one (1) or more occasions and to improve performance in:

- cost
- quality
- delivery
- safety/environment
- employee capability.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- techniques for monitoring cost, quality, delivery, safety/ environment and employee capability
- muda (waste)
- kaizen (continuous improvement)
- key performance indicators (KPIs), their use and problems
- cost components of products (goods or services)
- techniques for identifying and improving employee capability.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.

© Commonwealth of Australia, 2025 Public Skills Australia

- Assessment should use a real project in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS403005 Facilitate use of a Balanced Scorecard for performance improvement

Modification History

Release 1. Supersedes and is equivalent to MSS403005A Facilitate use of a Balanced Scorecard for performance improvement

Application

This unit of competency applies in organisations using a Balanced Scorecard approach to performance improvement. In these organisations the unit applies to individuals in a team or workgroup who facilitate the use of the Balanced Scorecard through leading, assisting and/or motivating others in using the Balance Scorecard approach.

This unit requires the application of skills associated with communication, teamwork, problem solving, initiative, enterprise, and planning and organising in order to provide leadership in the interpretation, review and strategic response to Balanced Scorecard results.

This unit has a strong emphasis on identifying and reviewing required performance measures and requires an ability to use new information to improve performance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

essential outcomes.		demonstrate achievement of the element.	
1	**Interpret Balanced Scorecard results**	1.1	Identify patterns of performance shown on strategy map.
		1.2	Identify actions indicated by Balanced Scorecard results.
		1.3	Discuss results with fellow employees and other relevant stakeholders.
		1.4	Facilitate the selection of required actions with employees and other stakeholders.
		1.5	Facilitate the development of implementation plans for team or individuals.
		1.6	Facilitate the implementation of required actions from developed plans.
		1.7	Follow up on implementation to ensure it occurs as planned.
2	**Review key performance indicators (KPIs) in the Balanced Scorecard for the organisation and work area**	2.1	Relate area and other KPIs to strategy map/strategic objective.
		2.2	Review the actions required by self and others to meet each KPI.
		2.3	Compare current actions to the optimal actions to achieve strategy.
		2.4	Discuss with employees and other stakeholders any modifications to KPIs which will better meet strategy.
		2.5	Recommend amendments to KPIs to relevant personnel.
3	**Review reporting systems for Balanced Scorecard information**	3.1	Review reporting systems to ensure information needed by self, other employees in area and organisation is available.
		3.2	Review the mix of operational and strategic information to ensure it is appropriate for work area.
		3.3	Review information provided for relevance and currency, and that it is meaningful and not excessive.
		3.4	Recommend improvements to reports and reporting

- run charts
- standard procedures
- current reality tree.

Team includes one or more of:

- all individuals in the target work area who are involved in the implementation and use of the Balanced Scorecard
- formally designated team working to a team leader
- informal or *ad hoc* team/group of people.

Balanced Scorecard includes all of:

- an organisation's vision and strategy
- establishing and measuring enterprise activity in a number of different financial and non-financial perspectives
- use of KPIs related to an overall strategy map
- use of metrics for KPI components, such as customer, environmental, internal business process and learning and growth.

KPIs include all of:

- financial performance measures
- non-financial performance measures against targets
- other performance indicators relevant for informing the teams activities (e.g. performance indicators for other areas or sections, suppliers or customers).

Actions include one or more of:

- corrective action for poor results
- confirming action for acceptable results
- taking steps to ensure actions for good results are consistently maintained
- changes to performance indicators or performance measurement.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS403005A Facilitate use of a Balanced Scorecard for performance improvement

Assessment Requirements for MSS403005 Facilitate use of a Balanced Scorecard for performance improvement

Modification History

Release 1. Supersedes and is equivalent to MSS403005A Facilitate use of a Balanced Scorecard for performance improvement

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to review Balanced Scorecard use on two (2) or more occasions and to:

- interpret Balanced Scorecard results
- review key performance indicators (KPIs)
- review reporting
- use this to help improve total performance.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- components of the Balanced Scorecard, including perspectives, feedback loops, targets and metrics, and reporting systems
- analysis of Balanced Scorecard information
- uses and limitations of KPIs and the alignment of KPIs with the organisations strategy map
- how to identify areas for improvement from Balanced Scorecard information.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - single projects which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project in an operational workplace.

© Commonwealth of Australia, 2025 Public Skills Australia

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS403010 Facilitate change in an organisation implementing competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS403010A Facilitate change in an organisation implementing competitive systems and practices

Application

This unit of competency covers the skills and knowledge required by individuals responsible for facilitating change processes in an organisation implementing competitive operational practices.

This unit applies to individuals who facilitate the change process resulting from implementing one or more competitive systems or practices. This implementation may also be associated with other changes, such as the introduction of new products, processes or equipment. The unit will usually apply to individuals whose responsibility is at the team, area or section level rather than the whole organisation. The responsibility may be formally designated or be informal, as in mentoring and assisting fellow employees.

This unit assumes that consultation and agreement on the implementation of the competitive systems and practices and other associated changes has already occurred and the nature and extent of the change has been agreed.

This unit does not cover the negotiation of change in a formal industrial relations sense but does cover the skills needed to identify real or potential change implementation issues, including those that may need to be referred to formal consultation and/or dispute settlement procedures.

This unit has a strong emphasis on planning, encouraging and facilitating in a changing environment within the organisation, including using appropriate communication, teamwork, problem solving, initiative and self-management.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Define nature and impact of change for designated area and processes**	1.1	Identify the organisation's aims and objectives for the competitive systems and practices techniques related to the change process.
		1.2	Identify opportunities for implementation of change within work area.
		1.3	Determine impacts of change for work area, including potential benefits and impacts on own work and work of fellow employees.
2	**Identify key performance indicators (KPIs)**	2.1	Liaise, where required, with managers, engineers and other staff responsible for designing and/or implementing change.
		2.2	Identify KPIs for own work responsibility and that of the work area.
		2.3	Communicate KPIs to fellow employees.
		2.4	Check that data collection and processing are appropriate for KPIs.
		2.5	Raise and resolve issues related to KPIs with relevant personnel.
3	**Liaise with key stakeholders**	3.1	Identify key stakeholders impacted by the change.
		3.2	Communicate with key stakeholders within scope of authority.

© Commonwealth of Australia, 2025 Public Skills Australia

		3.3	Identify and address issues and concerns of each stakeholder if within scope of authority.
		3.4	Develop and/or locate information required to address key concerns.
		3.5	Refer issues and concerns outside of scope of authority to appropriate personnel.
4	**Develop a strategy to help implement change**	4.1	Identify or develop a work plan for implementing change.
		4.2	Make information required to support change available to team members.
		4.3	Communicate/circulate draft work plan to other employees in work area, supervisors, technical experts and other appropriate personnel for comment.
		4.4	Assess suggested changes and incorporate into work plan, where appropriate.
5	**Implement change**	5.1	Obtain authorisation to commence change implementation in accordance with organisation procedures.
		5.2	Implement change in accordance with work plan and organisational work health and safety (WHS) and consultation procedures.
6	**Monitor implementation of change**	6.1	Maintain open communication channels with all stakeholders during implementation.
		6.2	Monitor KPIs during implementation.
		6.3	Encourage and facilitate improvement suggestions of team members.
		6.4	Identify areas requiring improvement in change implementation.
		6.5	Make improvements to implementation according to organisation procedures.

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Work plan for change includes one or more of:	• timetables • KPIs • training needs • WHS implications • contingency plans

© Commonwealth of Australia, 2025 Public Skills Australia

	• responsibilities with team members and senior managers, engineers and other staff responsible for designing and/or implementing change.
Issues and concerns include one or more of:	• individual and group concerns • those expressed by and through industrial processes.
Gathering and monitoring performance data includes one or more of:	• manually by individual employees through charts, tally sheets or keypad/board entry • automatically through software, such as SCADA software, ERP systems, MRP and proprietary systems.

Assessment Requirements for MSS403010 Facilitate change in an organisation implementing competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS403010A Facilitate change in an organisation implementing competitive systems and practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more changes, to:

- identify competitive systems and practices in own workplace
- identify changes to own work and work area flowing from implementation of relevant competitive systems and practices
- consult with stakeholders regarding changes and issues
- develop a strategy to implement required changes
- make suggestions for improvements.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- features of competitive operational practices in own work area
- health, safety and environment (HSE) principles and requirements for area of responsibility
- change implementation procedures
- planning and implementation strategies
- employee assistance mechanisms within organisation.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency

© Commonwealth of Australia, 2025 Public Skills Australia

  - must include facilitating change in relation to the implementation of competitive operational practices in own work area
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS403021 Facilitate a Just in Time system

Modification History

Release 1. Supersedes and is equivalent to MSS403021A Facilitate a Just in Time system

Application

This unit of competency covers the skills and knowledge required to facilitate the implementation/operation of a Just in Time (JIT)/kanban system in a team or work area.

This unit applies to a person who needs to monitor the operation of a JIT system and facilitate its working in a team or work area. This will involve liaison with stakeholders as well as examining the data generated and being alert to potential problems and areas for improvement.

This unit requires the application of skills associated with gathering, analysing and communicating information to facilitate implementation of the JIT system. It requires planning and organising skills and has a strong emphasis on communication and teamwork skills to ensure the JIT system is being effectively implemented. This unit also requires the ability to problem solve and take the initiative to consider performance issues and learn from experience to improve future performance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

essential outcomes.		demonstrate achievement of the element.	
1	**Monitor the operation of the JIT system**	1.1	Track value of key measures.
		1.2	Recognise indicators of poor performance.
		1.3	Take appropriate quick fix action.
2	**Liaise with relevant stakeholders**	2.1	Regularly communicate with team or work group members regarding the operation of the JIT system.
		2.2	Review JIT key performance indicators (KPIs) with team or work group members.
		2.3	Communicate with relevant personnel up and down the value stream regarding the operation of the JIT system.
		2.4	Identify issues with stakeholders and take appropriate quick fix action.
3	**Improve the JIT system**	3.1	Identify areas requiring improvement in the JIT system.
		3.2	Identify root cause of JIT-related problems.
		3.3	Review value of key measures.
		3.4	Recognise skill gaps in team members and other stakeholders.
		3.5	Determine any other issues in team or work group, other stakeholders and JIT system leading to poor performance indicators.
		3.6	Develop appropriate improvement solutions.
		3.7	Liaise with relevant people regarding improvement solutions.
		3.8	Implement and/or assist with the implementation of the solutions.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Key measures include one or more of:

- inventory levels
- lead time
- In Full, On Time and In Specification (IFOTIS) delivery
- productivity/production rate
- other measures of pull through the value stream
- quality.

© Commonwealth of Australia, 2025 Public Skills Australia

Stages where value stream actions can occur include one or more of	• sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer • after market support.

Assessment Requirements for MSS403021 Facilitate a Just in Time system

Modification History

Release 1. Supersedes and is equivalent to MSS403021A Facilitate a Just in Time system

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for three (3) or more JIT related improvements, to:

- identify the JIT system and practices used in own work area
- identify and monitor JIT key measures
- solve JIT-related problems to root cause
- communicate effectively with stakeholders
- facilitate and monitor JIT-related changes to operations and practices.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- JIT methods relevant to own work area
- production data generated by the process and its application to JIT
- methods of gathering data against key performance indicators (KPIs)
- facilitation techniques to encourage work group development and improvement.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include facilitating the implementation of a Just in Time (JIT) system in in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.

© Commonwealth of Australia, 2025 Public Skills Australia

- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

MSS403032 Analyse manual handling processes

Modification History

Release 1. Supersedes and is equivalent to MSS403032A Analyse manual handling processes

Application

This unit of competency covers the skills and knowledge required to analyse manual handling in terms of its efficiency and safety.

This unit applies to an individual who is required to examine the manual handling component of a job and improve it in terms of safety, effort required and efficiency. This may be conducted for a job performed by others or it may be for the person's own job.

This unit primarily requires the application of skills associated with problem solving, initiative and enterprise to identify safe and efficient manual handling, and planning and organising to ensure processes are implemented. This unit also requires communication with, and involvement of, others to ensure they understand the approach and to facilitate training.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Assess manual**	1.1	Identify manual handling hazards in work area.

© Commonwealth of Australia, 2025 Public Skills Australia

	handling risks	1.2	Assess risks arising from manual handling hazards.
2	**Analyse physical effort requirements of job**	2.1	Determine basic manual handling requirements of job.
		2.2	Analyse requirements in terms of components, such as lift, move, place and hold.
		2.3	Analyse items to be handled in terms such as weight, size, shape or other hazards.
3	**Determine time/effort components of physical effort**	3.1	Break required movement pattern down into movement components.
		3.2	Determine time and effort requirements for movements.
		3.3	Develop alternative movement patterns.
		3.4	Determine time and effort requirements for alternative movements.
		3.5	Determine handling aids required to assist movement.
		3.6	Determine preferred movement pattern.
4	**Analyse the ergonomics of physical effort**	4.1	Analyse the ergonomics of the preferred movement pattern.
		4.2	Develop substitute movements for any movement which is not ergonomically sound.
		4.3	Determine handling aids required to improve ergonomics of required movements.
5	**Optimise application of physical effort**	5.1	Select movement patterns which are ergonomically sound and time and effort efficient.
		5.2	Ensure all relevant people are trained to use these methods.
		5.3	Ensure procedures and practices reflect the optimum methods.

© Commonwealth of Australia, 2025 Public Skills Australia

5.4	Communicate with team members and involve them in development of alternatives to ensure awareness and facilitate learning.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Procedures (written,	• work instructions

© Commonwealth of Australia, 2025 Public Skills Australia

verbal, visual, computer based, etc.) include one or more of:	• standard operating procedures (SOPs) • safe work method statements • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant.
Manual handling hazards include one or more of	• loads that pose a risk of injury • ergonomically unsound movements • hazard requirements as defined by relevant work health and safety (WHS) Acts and regulations, industry standards and best practice.
Ergonomically unsound movements include one or more of	• awkward and repetitive movements • carrying, pushing, pulling or lifting of heavy loads • carrying or movement of hard, sharp, slippery or other difficult to grasp loads.
Ergonomically sound movements include one or more of	• keeping loads close to the body and near the person's centre of gravity • using diagonal foot positions for lifting • moving loads at waist height rather than directly from the floor.

Assessment Requirements for MSS403032 Analyse manual handling processes

Modification History

Release 1. Supersedes and is equivalent to MSS403032A Analyse manual handling processes

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for at least (1) one job/process, to:

- analyse manual handling requirements and risks
- distinguish between ergonomically sound and unsound movement
- analyse manual handling movements and risks for an individual
- relate manual handling requirements to job efficiency.

Knowledge Evidence

- Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:
- principles of ergonomics/safe movement
- principles of work analysis
- relevant work health and safety (WHS) Acts and regulations as they apply to manual handling
- principles of job and work method design as applied to efficient and safe movement
- aids that can assist with or substitute for manual handling.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include analysing manual handling processes in own workplace

© Commonwealth of Australia, 2025 Public Skills Australia

  - will typically include the use of appropriate manual handling guides, tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS403040 Facilitate and improve implementation of 5S

Modification History

Release 1. Supersedes and is equivalent to MSS403040A Facilitate and improve implementation of 5S

Application

This unit of competency covers the skills and knowledge required by an individual to facilitate the implementation and improvement of the 5S by self and others in a team or work area. The facilitation may be undertaken by formally designated supervisory staff, such as team leaders or other individuals in a competitive systems and practices implementation role, who need to provide support and encouragement to others to facilitate the achievement of 5S outcomes in the workplace.

This unit requires the application of skills associated with communication, teamwork, problem solving, initiative and enterprise, planning and organising, and self-management in order to provide leadership in a 5S environment. This unit has a strong emphasis on planning and change management, but also requires an ability to learn from experience and feed new information back into strategies to improve performance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Facilitate the set-up of 5S**	1.1	Assist others to determine what are necessary and unnecessary items in the work area.
		1.2	Assist others to determine optimum assigned location for all necessary items.
		1.3	Liaise with relevant production and work health and safety (WHS) personnel in determining optimum locations.
		1.4	Assist others to determine optimum location for unnecessary items.
		1.5	Assist others to determine 5S schedule.
		1.6	Assist others to achieve the required level of skill.
2	**Facilitate the implementation of 5S**	2.1	Ensure procedures reflect 5S practices.
		2.2	Assess skill base of team or work group members in 5S and arrange for any required training.
		2.3	Ensure that any damage and/or safety risks reported by the team or work group are addressed through correct mechanisms.
3	**Monitor 5S**	3.1	Check work area for 5S implementation as part of normal routine.
		3.2	Identify non-conformances.
		3.3	Negotiate solutions to non-conformances.
4	**Improve 5S**	4.1	Work with others to find areas for improvement.
		4.2	Assist others to develop improvement solutions.
		4.3	Facilitate the availability of resources required for the improvement solution.
		4.4	Facilitate the implementation of the improvement solution.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Procedures (written, verbal, visual, computer based, etc.) include one or more of:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

© Commonwealth of Australia, 2025 Public Skills Australia

5S includes all of:

- sort
- set in order
- shine
- standardise
- sustain.

Sort includes all of:

- separating necessary from unnecessary items (equipment and supplies)
- keeping only what is absolutely necessary for the work processes that comprise the job
- disposing of (or relocating) all other items.

Set in order includes all of:

- assigning required equipment and materials appropriate locations in the work area
- consideration of frequency of use, ergonomics and WHS
- provision of facilities to maintain the locations.

Shine includes one or more of:

- keeping the work area clean at all times which should be carried out to a regular daily schedule against allowed time, usually at the end of the day or of a particular process
- keeping work area, including virtual work area, organised
- noting any signs of wear, damage, leakage, safety risks or other issues that require immediate attention.

Standardising includes one or more of:

- activities that help maintain the order and the 5S standards
- using procedures and checklists developed from a procedure.

Sustain includes one or more of:

- making sure that daily activities are completed every day regardless of circumstance
- undertaking inspections, including:
  - informal inspections that should be carried often, at least weekly
  - formal inspections that should be carried out at least monthly.

Items in work area include one or more of:

- office supplies
- materials
- paperwork

© Commonwealth of Australia, 2025 Public Skills Australia

	• furniture • storage systems and cabinets • lighting, wiring, plumbing and other services designed to support a working environment in the office • manuals • personal items (e.g. bags, phones, lunch boxes, clothing, photos and ornaments) • safety and personal protective equipment • any other item which happens to be in the work area.
Teams include one or more of:	• formal teams • informal teams • people working in the same area.
Target work area may be a physical and/or virtual workspace and includes one or more of:	• used by a person, a team or a cross-functional group • common to part/s of a process or value stream (already defined) • shared by people who undertake a defined procedure or set of procedures • needed to support a particular function.
Appropriate places include areas designated for one or more of:	• recycling • rubbish removal • staff room/lunch room/kitchen • office supplies, filing and other storage • functions, such as printing/copying • holding until status is confirmed.
Optimum assigned location includes:	• making changes to the layout of furniture, equipment and personnel in order to facilitate the smooth and continuous flow of work through process steps taking into account WHS considerations.
Non-conformance includes:	• incorrect or incomplete application of 5S procedures, including any daily tasks, scheduled inspections and continuous improvement procedures.

Assessment Requirements for MSS403040 Facilitate and improve implementation of 5S

Modification History

Release 1. Supersedes and is equivalent to MSS403040A Facilitate and improve implementation of 5S

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, in one (1) or more allocated areas, to:

- identify the scope of the services and/or functions supplied to and by the team or work area and the deliverables expected by customers, including the ultimate customer
- facilitate a systematic approach to implementing 5S
- lead and motivate others in achieving 5S outcomes and making improvements to the 5S systems
- set up systems for monitoring and improving 5S implementation
- manage non-conformances in implementation of 5S.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- principles and purpose of 5S
- methods of identifying waste in the work area, such as:
  - waste walk
  - document tagging
  - tracking/log sheets
  - spaghetti diagrams
  - existing information technology and enterprise resource systems (e.g. SCADA, ERP and MRP)
- methods of identifying and evaluating options
- work health and safety (WHS) requirements relevant to team and work areas
- processes for identifying and addressing skill gaps.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:

© Commonwealth of Australia, 2025 Public Skills Australia

  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the implementation of 5S procedures in a work area where 5S has not previously been undertaken, or, demonstration of improving 5S application in a work area that has already undergone prior 5S procedures
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations. Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS403085 Ensure process improvements are sustained

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge required to ensure that the gains which have been made by using improved methods, processes and/or equipment are sustained as the new baseline or standard for an area of work and so prevent regression to former practices, or digression to less efficient practices.

This unit applies to individuals working in a team or work area who have already implemented competitive systems and practices related improvements in their own work and who must work effectively with others implementing competitive systems and practices to ensure that performance improvement gains are sustained.

The unit applies to team leaders, senior operators, technicians or tradespeople who are required to mentor others and integrate the application of their technical skills with the implementation of competitive systems and practices in an organisation. Employees will be required to problem solve, show initiative, plan, organise and manage own output and development.

The unit applies to all areas of an organisation, including production, maintenance, logistics and office functions.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Examine previous improvements**	1.1	Identify impact of previous process improvements to systems, equipment, operations or products in work area
		1.2	Identify previous improvements that have not met objectives
2	**Ensure corrective actions are implemented**	2.1	Identify corrective actions that can be taken on process improvements that have not met objectives
		2.2	Liaise with relevant people associated with the anticipated corrective action
		2.3	Obtain any required approvals
		2.4	Arrange for the supply of resources
		2.5	Check impacts of corrective action on work health and safety (WHS), quality and environmental systems in work area and take action in accordance with procedures
		2.6	Check that self and others in team or work area have required skills for corrective actions
		2.7	Monitor implementation of corrective action
		2.8	Make required adjustments
3	**Verify systems support improvement**	3.1	Verify procedures reflect improvements
		3.2	Check that training and assessment activities in team or work area reflect improvements
		3.3	Liaise with relevant people to ensure their support of the new or modified system/s
4	**Audit the change**	4.1	Determine an audit period or cycle
		4.2	Agree measures and indicators for the improvement

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	4.3 Measure performance at agreed times using agreed measures
	4.4 Investigate causes of under-performance
	4.5 Take corrective action to improve performance
	4.6 Re-audit the improvement on an agreed basis

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Assessment Requirements for MSS403085 Ensure process improvements are sustained

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified at least 1 previous improvement that has not met objectives and identified and implemented actions to correct this without adverse impact on other areas
- conducted at least 1 audit to measure the improvement from the change.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- muda and its causes
- processes and procedures for the organisation relevant to the work area
- sustaining approaches, including poka yoke, baka yoke
- measures of performance relevant to the work area and the improvement.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS403086 Improve cost factors in work practices

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge required by an individual to evaluate the product or process outcomes of a team or work group in terms of their cost components and to be able to determine, in general terms, the cost impacts of alternative actions. This includes the efficient organisation of own work, and that of others in a work area or within a team, and the improvement of throughput and cycle times.

This applies to team members who will be required to problem solve, show initiative, plan, organise and manage own output and development. Decisions are made within the scope of the authority of the individual and other employees in the area or team and according to procedures.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Assessment Requirements for MSS403086 Improve cost factors in work practices

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified and analysed cost factors in work practices and made recommendations to improve costs on at least 1 occasion.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- cost components of products made
- costs concepts, including expense/capital, income and cost benefit ratios
- major cost contributors to product (including energy, materials and inputs, labour and distribution)
- difference between internally and externally controlled costs
- difference between overhead, capital, expense, labour and other consumables.
- causes of cost variances.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS403087 Mistake proof an operational process

Modification History

Release 1. Updated unit code. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge to analyse a process that a team is responsible for and determine methods of mistake proofing it. This includes determining, implementing and sustaining improvement activities.

The person will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to mistake proof the production process in their area.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Analyse process**	1.1	Identify sources of variability and non-conformance in the process
		1.2	Identify critical control points in process
		1.3	Analyse causes of variability and non-conformance

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
2	**Develop preventative options**	2.1	Liaise with team members and other people to develop mistake proof options for performing operation
		2.2	Test and validate mistake proofing options
3	**Implement permanent fix**	3.1	Liaise with relevant people to have systems and procedures changed to implement solution
		3.2	Liaise with relevant people to implement the solution
		3.3	Liaise with relevant people to ensure self and others in the team or work area have appropriate skills
		3.4	Follow through to ensure implementation occurs
4	**Monitor implementation**	4.1	Critically observe the implementation
		4.2	Compare the results of the implementation against the expected outcomes
		4.3	Modify solution to improve outcomes
		4.4	Confirm procedures reflect change
		4.5	Confirm training and assessment reflects change
		4.6	Audit change at agreed period or cycle
		4.7	Address any observed deviation
5	**Seek improvements**	5.1	Observe and monitor changes
		5.2	Analyse process again to ensure improvements are sustained

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Assessment Requirements for MSS403087 Mistake proof an operational process

Modification History

Release 1. Updated unit code. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- mistake proofed (applied baka yoke or poka yoke) to at least 1 operational process.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- baka yoke and poka yoke approaches
- factors causing variability in the process and methods of controlling it
- error causes and control options
- cost benefit analysis, feasibility, regulatory compliance and perceived value to the customer
- validation of baka yoke and poka yoke proposals.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS404054 Apply statistics to operational processes

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS404052 Apply statistics to operational processes.

Application

This unit describes the skills and knowledge required to gather and analyse process data to support the control of processes and operations. It includes interpretation of sampling procedures, frequency distributions, random and non- random variations in data/control charts; use of control limits to determine whether monitored processes are in control; and communicating this information to others.

This unit applies to a person working in an organisation applying statistical process control on processes or operations. The statistical process control will usually be used to monitor the processes or operations and determine when action needs to be taken. The appropriate action will then be taken in accordance with standard procedures.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Nil.

Competency Field

Assessment Requirements for MSS404054 Apply statistics to operational processes

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS404052 Apply statistics to operational processes.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- gathered, analysed and interpreted process data to monitor and control at least 2 operational processes.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose of sampling and measurement
- sampling methods to be used
- methods of calculating mean and standard deviation and their purpose in statistical control
- concept of limits, including 1, 2, 3 and 6 sigma limits
- types of control charts and their applications to different types of process and product and for different purposes
- process causes of variation and typical cause types of non-random variation
- non-process causes of variation
- stable and unstable processes
- causes of stability and instability in the process
- calculation of control limits and process capability and the applications of different control limits
- standard distribution curve and confidence limits.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS404060 Facilitate the use of planning software systems in a work area or team

Modification History

Release 1. Supersedes and is equivalent to MSS404060A Facilitate the use of planning software systems in a work area or team

Application

This unit of competency covers the skills and knowledge required to facilitate the use of planning software in an organisation in an individual's work area or team. These systems are known by various generic names, such as Enterprise Resource Planning (ERP), Materials Resource Planning (MRPII, MRP III etc.) or by proprietary names.

This unit applies to an individual who will access the planning software system for their own work, but will also need to provide support and organise skill development programs for their team or work group members. The individual will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to facilitate the use of the planning software system. The planning software system will be used routinely in the work of the team or work group.

This unit primarily requires the application of skills associated with using communication technology and supporting team use of planning software. Problem solving, initiative and enterprise, and planning and organisational skills are required to ensure that planning software is used efficiently. This requires aspects of learning and self-management to ensure own performance and that of the team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Identify scope of planning software**	1.1	Identify categories of information held by planning software.
		1.2	Identify information categories relevant to team and area processes.
		1.3	Identify range of information able to be provided to planning software by team or work group.
		1.4	Identify range of information able to be provided to team or work group by planning software.
2	**Communicate using the planning software system**	2.1	Send and receive information using planning software.
		2.2	Send and receive messages using planning software.
3	**Make decisions using planning software**	3.1	Interrogate the planning software system to find required current, historical or predicted information.
		3.2	Take actions appropriate to the information in accordance with procedures.
4	**Monitor the use of planning software**	4.1	Routinely monitor planning software information.
		4.2	Review performance and use of planning software with team.
5	**Support others to use planning software**	5.1	Regularly communicate with team or other work group members, both using planning software and face to face.
		5.2	Identify improvements required.
		5.3	Take action to implement improvements in accordance with procedures.

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Planning software integrates a range of business information including one or	• sales/order taking • finance/accounting • logistics • maintenance • human resources

© Commonwealth of Australia, 2025 Public Skills Australia

more of:	• production.
Information and message categories include one or more of:	• orders • production/operations processes • scheduling (e.g. daily/weekly) • finance and accounting • human resources (e.g. rosters, reserves, training completed and scheduled) • quality requirements • customers • suppliers.
Stages where value stream actions occur include one or more of:	• sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer • after market support.

Unit Mapping Information

Assessment Requirements for MSS404060 Facilitate the use of planning software systems in a work area or team

Modification History

Release 1. Supersedes and is equivalent to MSS404060A Facilitate the use of planning software systems in a work area or team

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, to facilitate and/or provide support on three (3) or more occasions, to:

- identify team or work group area information requirements and relate to planning software categories
- lead and motivate others in using planning software
- ensure information sent to planning software is accurate and appropriate
- obtain regular and one-off information from planning software
- make decisions using planning software generated information.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- hierarchy of planning software system and operation
- information available from/through the planning software system
- query facilities and information analysis capabilities offered by planning software
- support/training/skill development mechanisms available for access by team members.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include facilitating and/or support for teams or work groups using planning software systems in own workplace

© Commonwealth of Australia, 2025 Public Skills Australia

  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS404061 Facilitate the use of SCADA systems in a team or work area

Modification History

Release 1. Supersedes and is equivalent to MSS404061A Facilitate the use of SCADA systems in a team or work area

Application

This unit of competency covers the skills and knowledge required by a team leader or technical expert to personally use and facilitate the use of System Control and Data Acquisition (SCADA), or other similar systems, and support the team in their use of SCADA.

This unit applies to individuals who will access the SCADA system for their own work, but will also need to provide support and organise skill development programs for their team members. It is also relevant to maintenance personnel using a SCADA system to coordinate maintenance activities.

This unit primarily requires the application of skills associated with using communication technology and supporting team use of SCADA systems. Problem solving, initiative and enterprise, and planning and organisational skills are required to ensure the system is used efficiently.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Identify scope of SCADA system**	1.1	Identify categories of information held in and control options of SCADA system relevant to team or area.
		1.2	Identify range of information able to be provided to SCADA system by team.
		1.3	Identify range of information able to be provided to team by SCADA system.
		1.4	Identify team or area functions impacted by SCADA system.
2	**Communicate using SCADA system**	2.1	Send and receive information using SCADA.
		2.2	Send and receive messages using SCADA.
3	**Make decisions using SCADA**	3.1	Interrogate the SCADA system to find required current, historical or predicted information.
		3.2	Take actions appropriate to the information.
4	**Monitor the use of SCADA**	4.1	Routinely monitor SCADA information.
		4.2	Identify poor uses of SCADA system within team and system inadequacies.
		4.3	Identify system improvements required.
		4.4	Take action to improve SCADA system and its use.
5	**Support team use of SCADA**	5.1	Regularly communicate with team, both using SCADA-based communication and face to face.
		5.2	Identify skill improvement needs.
		5.3	Identify team members who require additional support.

© Commonwealth of Australia, 2025 Public Skills Australia

5.4 Take action to provide support according to procedures.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.

© Commonwealth of Australia, 2025 Public Skills Australia

Stages where value stream actions occur include one or more of:	• sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer • after market support.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS404061A Facilitate the use of SCADA systems in a team or work area

Assessment Requirements for MSS404061 Facilitate the use of SCADA systems in a team or work area

Modification History

Release 1. Supersedes and is equivalent to MSS404061A Facilitate the use of SCADA systems in a team or work area

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, to facilitate and/or provide support on three (3) or more occasions, to:

- identify team or area information and operations requirements and relate to SCADA system
- lead and motivate others in using SCADA system
- obtain regular and one-off information from SCADA system
- make decisions using SCADA generated information.

Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- hierarchy of SCADA system and operation
- information available from and controls exercised by/through the SCADA system
- query, control and other facilities and information offered by SCADA
- support/training/skill development mechanisms available for access by team members.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include facilitating and/or support for teams or work groups using SCADA systems in own workplace

© Commonwealth of Australia, 2025 Public Skills Australia

  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS404084 Undertake process capability improvements

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge required to make process capability improvements, including analysing data from the process, developing improvements to eliminate variation due to assignable causes and then implementing actions.

This unit applies to a person who reviews a range of process capability data and information and makes (or arranges for) changes to be made to procedures, equipment or process and then recalculates the process capability and monitors resulting improvement actions. The person will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to suggest and justify process capability improvements.

Process capability may have been determined using either a six sigma or three sigma processes. This unit applies to the application of statistical methods and the determination of capability based on those methods.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Assessment Requirements for MSS404084 Undertake process capability improvements

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- planned and implemented at least 1 process capability improvement.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- data collection and manipulation techniques
- variability, normal distribution and three and six sigma limits
- type of variations:
  - random variation (no assignable cause)
  - non-random variation (which has an assignable cause).
- causes of non-random variation in the process
- approaches to reducing variability.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS404085 Undertake proactive maintenance analyses

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS404081 Undertake proactive maintenance analyses.

Application

This unit describes the skills and knowledge required to undertake the most common forms of analyses associated with predictive/preventative/reliability centred maintenance strategies.

This unit applies to a technical expert (usually an engineer, technician or tradesperson) who is required to undertake analyses for predictive, preventative and/or reliability centred maintenance of plant/equipment as part of a competitive systems and practices strategy. This includes undertaking a failure effects analysis in accordance with organisation's procedures.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Nil.

Competency Field

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Liaise with operator	1.1	Establish a relationship with the operator of equipment
	1.2	Check the operator has the required skills and resources to keep the equipment clean
	1.3	Check the operator can monitor the operation of the equipment

© Commonwealth of Australia, 2025 Public Skills Australia

	1.4	Communicate with operator about the overall equipment effectiveness (OEE) of equipment
	1.5	Involve operator, team leader and key personnel in identification of skill needs and means of skill acquisition to fill any identified gaps
2. Analyse history	2.1	Read maintenance records and analyse mean time between failures (MTBF)
	2.2	Read and analyse performance data of the equipment
	2.3	Identify causes of changes to historic trends and status
	2.4	Determine methods of ensuring causes of improvements and resolution of deterioration are locked in
3. Undertake failure effects analysis	3.1	Undertake analysis of failure effects and causes and record results
	3.2	Investigate methods of eliminating possibility of failure and minimising probability of failure
	3.3	Investigate methods of minimising the impact when failure cannot be eliminated
	3.4	Liaise with operator, team leader and key personnel regarding solutions
	3.5	Select and implement solutions
4. Undertake condition monitoring analysis	4.1	Obtain data for condition monitoring analysis
	4.2	Read and interpret condition monitoring data
	4.3	Predict required maintenance type and timing from condition monitoring data
	4.4	Liaise with operator, team leader and key personnel regarding implications of condition monitoring report
	4.5	Involve team members in development of changes to maintenance strategy to ensure awareness, learning and commitment

Assessment Requirements for MSS404085 Undertake proactive maintenance analyses

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS404081 Undertake proactive maintenance analyses.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- undertaken proactive maintenance analyses of at least 2 items of equipment.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- cleaning requirements and operational principles of equipment in area of responsibility
- methods of assessing operator and maintenance skill gaps and filling them
- techniques for determining mean time between failures (MTBF)
- techniques for undertaking failure effects analysis
- principles of competitive systems and practices strategies being implemented and how to adapt them to maintenance
- root cause analysis
- techniques to analyse condition monitoring data.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS404086 Assist in implementing a proactive maintenance strategy

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS404082 Assist in implementing a proactive maintenance strategy.

Application

This unit describes the skills and knowledge required by a maintenance person to assist in the implementation of a proactive maintenance strategy in an organisation. This unit includes the interaction between a maintenance worker and operators, as appropriate.

This unit applies to a maintenance person in an organisation that has adopted or is implementing total preventative and/or productive maintenance (TPM), reliability centred maintenance (RCM) or similar strategies. As part of this, the maintenance person is expected to assist in the implementation by determining appropriate maintenance related schedules and also by providing maintenance related assistance to non-maintenance personnel, such as assisting production personnel to fulfil their role in the TPM/RCM strategy.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Develop components of reliability strategy for a work or plant area	1.1	Read and interpret manufacturer's recommended inspection, servicing and related schedules for relevant plant

© Commonwealth of Australia, 2025 Public Skills Australia

	1.2	Communicate appropriate inspections, services and schedules to stakeholders
	1.3	Discuss any conflicts and seek resolution of conflicts
	1.4	Develop schedules in liaison with stakeholders
	1.5	Identify inspections and servicing which may be done by operations personnel in liaison with stakeholders
2. Assess current practice for maintenance implications	2.1	Identify the overall equipment effectiveness (OEE) and organisation targets for equipment
	2.2	Evaluate procedures for equipment reliability implications
	2.3	Discuss current practices with stakeholders to determine equipment reliability implications
	2.4	Recommend changes to improve equipment reliability in accordance with procedures
3. Assist in implementing the reliability strategy	3.1	Arrange for schedules to be incorporated into work plans
	3.2	Identify training needs in discussion with key personnel
	3.3	Assist personnel to develop required skills for inspections and servicing within scope of authority
	3.4	Collect data and information as required by own work plan
	3.5	Compare data and information with performance indicators
	3.6	Recommend improvements to reliability strategy in accordance with procedures

Assessment Requirements for MSS404086 Assist in implementing a proactive maintenance strategy

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS404082 Assist in implementing a proactive maintenance strategy.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- assisted in implementing a proactive maintenance strategy in at least 1 organisation.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- requirements of the proactive maintenance strategy being implemented
- operating principles and procedures for equipment and plant subject to proactive maintenance strategy
- purpose and processes for data collection in proactive maintenance strategies
- procedures relevant to own job and organisation implementation of proactive maintenance
- methods of making and recommending improvements.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS405001 Develop competitive systems and practices for an organisation

Modification History

Release 1. Supersedes and is equivalent to MSS405001A Develop competitive systems and practices for an organisation

Application

This unit of competency covers the skills and knowledge required to develop new strategies for competitive systems and practices or make improvements to existing systems and practices.

This unit applies to a manager, technical specialist or similar in an organisation implementing competitive systems and practices, or in an organisation wishing to embark on the competitive systems and practices path. The person needs to be able to analyse the needs of the organisation and develop strategies and systems for effective implementation and continuous improvement of competitive systems and practices in the organisation. They may be developing competitive systems and practices for the first time for this organisation, or may be developing/improving existing systems and practices.

This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Problem solving, initiative and enterprise, and planning and organising are required to determine effective competitive systems and practices strategies for the organisation. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine appropriate analytical techniques**	1.1	Liaise with key stakeholders to determine objectives of operations strategy.
		1.2	Examine current operations to determine major areas requiring improvement
		1.3	Compare possible strategies, techniques and tools against organisation needs.
		1.4	Select possible strategies, techniques and tools.
		1.5	Consult with key stakeholders to confirm selected strategies, techniques and tools.
2	**Develop competitive systems and practices strategies**	2.1	Estimate benefit/cost ratio for major stakeholders and the value stream overall.
		2.2	Determine preferred operations strategy.
		2.3	Examine and adapt strategy to organisation needs and priorities.
		2.4	Examine and adapt competitive systems and practices techniques and tools required to implement strategy.
		2.5	Negotiate with key stakeholders to develop an implementation plan.
		2.6	Determine key information and performance indicators required.
3	**Implement strategy**	3.1	Determine data collection required.
		3.2	Identify and evaluate methods of collecting and processing required data.

© Commonwealth of Australia, 2025 Public Skills Australia

		3.3	Determine hardware and other resources required.
		3.4	Evaluate skill needs required.
		3.5	Ensure all resources/training are available and completed.
		3.6	Implement strategy.
4	**Monitor implementation of strategy**	4.1	Compare information/performance indicators with desired levels.
		4.2	Liaise with key stakeholders regarding strategy issues.
		4.3	Identify areas requiring adjustment.
		4.4	Make required adjustments.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring

Assessment Requirements for MSS405001 Develop competitive systems and practices for an organisation

Modification History

Release 1. Supersedes and is equivalent to MSS405001A Develop competitive systems and practices for an organisation

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to develop the competitive systems and practices of an entire organisation, department or equivalent and to:

- determine analytical techniques which are currently appropriate for the organisation
- develop/improve the strategies used
- implement and monitor the new/improved strategy.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to develop the organisation's competitive systems and practices, including knowledge of:

- competitive systems and practices tools which may be relevant
- kaizen and kaizen blitz techniques
- muda identification and minimisation
- benefit/cost determination and application
- matching and prioritising strategies to organisation goals.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project aimed at developing an organisation's competitive systems and practices for an operational workplace.

© Commonwealth of Australia, 2025 Public Skills Australia

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS405004 Develop business plans in an organisation implementing competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS405004A Develop business plans in an organisation implementing competitive systems and practices

Application

This unit of competency covers the skills and knowledge required to develop business plans in an organisation implementing competitive systems and practices. This unit applies to an individual in an organisation implementing competitive systems and practices (e.g. a production/plant manager, purchasing/technical officer or similar) who is required to develop a section business plan to meet the requirements of the overall strategic plan of the organisation. The plan includes the impact on the value stream and other critical competitive systems and practices factors. Due to competitive pressures this may be a reasonably frequent activity and can occur at any time over the business cycle. The plan may be in response to a specific change, or it may be a plan for the next period.

This unit assumes that up-to-date information about the organisation's role in the value stream is available.

This unit primarily requires the application of skills associated with gathering, analysing and applying information and consulting with stakeholders. Problem solving, initiative and enterprise, and planning and organising are required to develop an effective and measurable business plan. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine purpose of plan**	1.1	Confirm reason for developing plan and expected outcomes from plan.
		1.2	Confirm purpose of plan with all relevant stakeholders.
		1.3	Check expected outcomes from plan with overall strategic plan for organisation.
		1.4	Identify any potential areas for conflict between proposed plan and strategic directions.
		1.5	Negotiate with relevant stakeholders to resolve issues.
2	**Develop objectives and strategies**	2.1	Draft objectives for business plan.
		2.2	Draft strategies to achieve these objectives.
		2.3	Determine implications for value stream.
		2.4	Determine capital or workplace layout/organisation implications for objectives and strategies.
3	**Develop plans to meet objectives and strategies**	3.1	Negotiate with relevant stakeholders over implications for objectives and strategies.
		3.2	Liaise with relevant stakeholders to develop plans to meet objectives.
		3.3	Determine relevant key performance indicators (KPIs) for plan.
		3.4	Check KPIs are appropriate for purpose of plan.
		3.5	Check plan will deliver planned purpose.
		3.6	Map plan to changed value stream.

© Commonwealth of Australia, 2025 Public Skills Australia

		3.7	Adjust plan to optimise value stream.
		3.8	Validate plan with relevant stakeholders.
4	**Monitor the implementation of the plan**	4.1	Release plan for implementation.
		4.2	Check the key progress points against the key stages of the plan.
		4.3	Note any discrepancies.
		4.4	Take action to ensure correct implementation of plan.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams

- environment
- competitive systems and practices
- human, physical, financial and environmental/resource use.

Strategies to meet objectives include one or more areas:

- human and industrial relations practice
- material/component and resources use
- sustainable environmental practices
- sales and marketing
- financial
- regulatory compliance.

Relevant stakeholders include one or more of:

- other team members
- other workers
- management
- technical specialists
- other members of the value stream.

Customer requirement stages where value stream actions may occur include one or more of:

- sales outlet/representative
- information gathering, data analysis and research
- product design
- raw material sourcing
- intermediate processing
- final assembler/ collation/preparation
- support services (e.g. accounting, finance and legal)
- storage and delivery to customer
- after market support.

Assessment Requirements for MSS405004 Develop business plans in an organisation implementing competitive systems and practices

Modification History

Release 1. Supersedes and is equivalent to MSS405004A Develop business plans in an organisation implementing competitive systems and practices

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to develop one (1) or more business plans covering an organisation, department or section (or similar) and to:

- determine the purpose of the plan
- draft objectives of the plan and strategies for achieving them
- develop a plan which uses the strategies to deliver the objectives and optimise the value stream
- monitor the implementation of the plan and make changes as needed.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to develop and modify a business plan, including knowledge of:

- techniques and purposes of developing business plans
- parameters for business plans, including scope, period and risk
- relationship between business plans and competitive systems and practices
- impacts of alternatives on the value stream
- key performance indicators (KPIs) and the characteristics of good (optimises the whole) and poor KPIs
- risk mitigation, including business, quality, sustainability and other risks.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.

© Commonwealth of Australia, 2025 Public Skills Australia

- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real business plan development for an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS405008 Analyse and map a value stream

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS405002 Analyse and map a value stream.

Application

This unit describes the skills and knowledge required to analyse and map a value stream, including the clear identification of the place of an organisation in the value stream and its contribution to the value stream. The unit includes the relationships and the activities undertaken by value stream organisations. The identification skills include identification at the virtual or information level, the technical or process level, and at the physical or logistic level.

The unit includes the analysis of value-adding and non-value adding activities and the information needs for successful value stream mapping, including information technology (IT) needs.

This unit covers the analysis of the supply chain, the demand chain as well as the overall value stream.

This unit applies to an individual in a senior role in an organisation, such as an operations manager, purchasing manager, senior technical officer performing planning or scheduling or similar who needs to analyse and map a value stream, a supply chain, or a demand chain in order to understand the interactions between all members and determine the value added/potential value added by each member. The value stream is represented visually according to organisation format requirements.

The value stream may be being mapped for the first time, or it may be an analysis and mapping of a previously mapped value stream. The analysis and mapping may be for an entire value stream, or a defined part of one.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Nil.

Competency Field

Competitive systems and practices

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Map the value stream	1.1	Select a product or product group for analysis
	1.2	Identify ultimate customer
	1.3	Identify ultimate supplier
	1.4	Identify all organisations between ultimate supplier and ultimate customer
	1.5	Identify all steps in own organisation
	1.6	Collate all information and map value stream
2. Define customer need	2.1	Determine the features and benefits obtained by customers from product
	2.2	Determine methods of measuring the contribution to each feature and benefit
	2.3	Identify possible data sources for required measures
	2.4	Implement measurement of contribution to features and benefits
3. Assess the value added at each step	3.1	Identify value contributed by each external organisation
	3.2	Determine value added by each internal step
	3.3	Determine method of measuring value added
4. Reduce muda (waste)	4.1	Compare value added to customer feature and benefit
	4.2	Identify activities on value stream map which do not add to customer features and benefits
	4.3	Liaise with external value stream members to determine methods to reduce overall waste
	4.4	Take required actions to reduce waste

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Supersedes and is equivalent to MSS405002 Analyse and map a value stream.

Assessment Requirements for MSS405008 Analyse and map a value stream

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS405002 Analyse and map a value stream.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- mapped and analysed at least 1 value stream for an organisation.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- value stream mapping and analysis techniques
- muda (waste) identification and causes
- details of the process being mapped in sufficient depth to allow analysis of the map
- meaningful interactions between value streams
- concepts of value added, non-value added and methods of determining and quantifying this.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS405009 Manage a value stream

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Foundation skills information added. Assessment requirements changed. Supersedes and is equivalent to MSS405003 Manage a value stream.

Application

This unit describes the skills and knowledge required to manage an overall value stream, a supply chain or a demand chain, including close liaison with suppliers and customers. It may be applied to managing the chain internally and externally within an organisation.

This unit applies to a person in a senior role in an organisation, such as a manager, technical specialist or similar, who needs to manage the value, supply and/or demand chain on an ongoing basis to achieve the best overall contribution of valued added to their product in terms of customer benefit and features. The unit can be applied to value streams of large or small organisations and to internal and external value streams or a combination value stream.

This unit assumes that the value stream has been mapped and that the mapping is available.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Nil.

Competency Field

Competitive systems and practices

Unit Sector

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Evaluate the value stream	1.1	Identify all members in the value stream for products in area of responsibility

© Commonwealth of Australia, 2025 Public Skills Australia

	1.2	Identify value added by each member of the chain
	1.3	Identify non-value adding steps in the value stream
	1.4	Identify acute and chronic issues which impact on the value stream
	1.5	Develop priority list of items for improvement
2. Liaise regularly with chain members	2.1	Establish and maintain regular communication with all chain members
	2.2	Identify current and forecast issues with each member
	2.3	Work with members to help them address their issues
	2.4	Build trust and confidence in the relationship
	2.5	Develop with each chain member a priority list of items for improvement
	2.6	Negotiate with all chain members to ensure improvements benefit chain members and improve the benefits and features perceived by the ultimate customer
3. Monitor the value added at each step	3.1	Identify changes in value added by each chain member
	3.2	Identify areas where value adding changes are required
	3.3	Develop a priority list of required value adding changes
	3.4	Work with chain member to implement improvements
4. Continue to reduce muda (waste)	4.1	Identify muda (waste) in value stream
	4.2	Work with chain members to continually reduce muda

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

- Oral communication skills to liaise with stakeholders and keep them informed.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSS405009 Manage a value stream

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Foundation skills information added. Assessment requirements changed. Supersedes and is equivalent to MSS405003 Manage a value stream.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- managed at least 1 value stream for an organisation.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- customer perception of value added and muda (waste)
- the process(es) covered by the value stream
- performance indicators for each value stream step
- value stream analysis and mapping
- methods of reducing muda and increasing perceived value added
- upstream and downstream components of the value stream that are beyond the individual's scope of authority to manage.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS405020 Develop quick changeover procedures

Modification History

Release 1. Supersedes and is equivalent to MSS405020A Develop quick changeover procedures

Application

This unit of competency covers the skills and knowledge required to develop/improve changeovers for equipment, processes or operations. It includes critically analysing existing changeovers, applying quick changeover principles, and developing improved changeover procedures.

This unit applies to managers, technical specialists or similar in an organisation that has adopted or is adopting a quick changeover approach to its changeovers.

This unit requires the application of skills associated with communication, problem solving, initiative, enterprise, planning and organising in order to analyse and determine changeover procedures. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into the development of procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Analyse changeover**	1.1	Critically observe changeover process.
		1.2	Identify steps in changeover.
		1.3	Identify start situation and required finish situation for changeover.
2	**Apply quick changeover principles**	2.1	Identify changes to the start situation and required finish situation which are possible.
		2.2	Identify internal and external changeover activities.
		2.3	Identify activities which could be improved/eliminated.
		2.4	Eliminate/reduce adjustments required after changeover.
		2.5	Develop improved changeover process and recommendations for implementation procedure.
		2.6	Liaise with relevant people to validate recommendations.
3	**Assess and minimise risks in changeover**	3.1	Analyse hazards and risks from all steps in changeover.
		3.2	Apply ergonomic principles and hierarchy of control to each equipment and manual hazard.
		3.3	Assess any regulatory risk in changeover.
		3.4	Minimise hazards during changeover ensuring final risk profile is acceptable.
4	**Implement improved changeover**	4.1	Acquire any required resources and approvals.
		4.2	Organise trials of improved changeover.
		4.3	Monitor trial.
		4.4	Make adjustments to changeover process.
		4.5	Implement improved changeover process.

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Changeover refers to one or more of:	• equipment exchanges, such as an exchange of dies/tools (traditional) • change between batches • change between campaigns (process manufacturing) • quantum equipment/process change to produce a different product.

© Commonwealth of Australia, 2025 Public Skills Australia

Activities which should be improved/ eliminated include one or more of:	• those which take time or are unreliable in terms of outcome • those which are difficult to do or have adverse work health and safety (WHS) implications (e.g. repetitive strain injury, back injury and finger injuries).
Hazards and risks are related to one or more of:	• WHS • regulatory compliance • environment • commercial and contractual obligations.
Procedures (written, verbal, visual, computer based, etc.) include one or any combination of:	• work instructions • standard operating procedures (SOPs) • safe work method statements • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant.

Assessment Requirements for MSS405020 Develop quick changeover procedures

Modification History

Release 1. Supersedes and is equivalent to MSS405020A Develop quick changeover procedures

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more quick changeover procedures, to:

- observe and analyse steps in an existing changeover
- manage risks in adjusting changeover procedures
- develop changeover adjustments that deliver the greatest overall benefit
- supervise changeover procedure trials.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to develop/improve quick changeover procedures, including knowledge of:

- principles of quick changeover
- equipment and operating environment of activities subject to quick changeover
- regulatory and commercial obligations and risk environment for operations subject to quick changeover analysis
- safe movement and other relevant work health and safety (WHS) principles
- relevant procedures
- purposes/requirements of changeover
- sourcing of resources
- trialling procedures.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.

© Commonwealth of Australia, 2025 Public Skills Australia

- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use the actual developing/improving of changeover procedures in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS405021 Develop a Just in Time system

Modification History

Release 1. Supersedes and is equivalent to MSS405021A Develop a Just in Time system

Application

This unit applies to an individual responsible for planning and implementing a Just in Time (JIT) system. It includes consulting with employees, suppliers and customers regarding the change. This may require identification of training and other employee support as well as identifying possible logistical support.

The unit includes kanban-based JIT systems but also applies to other sectors and systems where a traditional kanban-type JIT may not be suitable through the unit's coverage of JIT principles.

This unit requires the application of skills associated with communication in gathering, analysing and applying information, consulting with stakeholders, problem solving, and demonstrating initiative and enterprise. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into the JIT design.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Design the JIT system/system improvements**	1.1	Identify value chain members.
		1.2	Consult with internal and external value chain members.
		1.3	Identify current storage/inventory in value chain.
		1.4	Determine flow authorisation indicators.
		1.5	Determine minimum and maximum operations rate.
		1.6	Determine lead time for product or service.
		1.7	Determine number of units per kanban.
		1.8	Draft workable procedures to implement JIT.
2	**Implement the JIT system/improvements**	2.1	Consult with key internal stakeholders to develop solutions to JIT issues.
		2.2	Ensure all stakeholders have required JIT-related skills and related issues have been resolved.
		2.3	Liaise with key external members of the value chain to develop solutions to JIT issues.
		2.4	Develop implementation plan for JIT.
		2.5	Determine key measures of JIT.
3	**Monitor the JIT system**	3.1	Monitor key measures of JIT.
		3.2	Regularly liaise with key stakeholders seeking areas for improvement.
		3.3	Identify areas in need of improvement.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- JIT, kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Procedures (written, verbal, visual, computer based, etc.) include one or any combination of:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

Key measures include one or more of:

- inventory levels
- lead time
- in full, on time and in specification (IFOTIS) delivery
- productivity/production rate
- other measures of pull through the value chain
- quality.

Assessment Requirements for MSS405021 Develop a Just in Time system

Modification History

Release 1. Supersedes and is equivalent to MSS405021A Develop a Just in Time system

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more JIT systems, to:

- develop a complete JIT system
- provide training and support for employees and value chain members
- communicate and negotiate complex issues to a wide variety of individuals
- supervise JIT implementation and suggest improvements.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to develop a JIT system, including knowledge of:

- needs of internal and external value chain members
- principles of JIT
- reasons for delays/storages/inventories in the value stream and methods of reducing/eliminating them
- methods of identifying and filling skill gaps
- key business objectives associated with implementing JIT
- principles of the operational processes relevant to the JIT implementation
- production data generated by the process and its application to JIT.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.

© Commonwealth of Australia, 2025 Public Skills Australia

- Assessment should use development of an actual JIT system in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS405030 Optimise cost of a product or service

Modification History

Release 1. Supersedes and is equivalent to MSS405030A Optimise cost of a product or service

Application

This unit of competency covers the skills and knowledge required to examine the costs of a product or service and determine methods of reducing costs. This unit applies to an individual a who is required to undertake a detailed study of a product or service's costs, including analysing it by its cost components to determining the best method of lowering the cost overall. This unit differs from *MSS405031 Undertake value analysis of a product or process costs in terms of customer requirements*, in that it looks at all costs, including overheads and takes a wider and more traditional approach to the cost of the product. Information and cost reduction strategies gained from the application of this unit may support other cost approaches in the enterprise, including value stream costing.

This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information. Problem solving, initiative and enterprise, and planning and organising are required to calculate cost components and determine cost optimisation strategies. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into costing methods.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Analyse total cost components of a product or service**	1.1	Identify all cost components of product or service.
		1.2	Allocate cost components to major categories, such as overhead, depreciation, energy, consumables and labour.
		1.3	Distinguish between costs which directly deliver customer features/benefits and muda (waste).
2	**Optimise costs**	2.1	Analyse causes of costs which lead to customer features/benefit.
		2.2	Determine methods of increasing the customer benefit/cost ratio.
		2.3	Analyse causes of muda costs.
		2.4	Determine methods of reducing/eliminating muda costs.
		2.5	Analyse interactions between cost components.
		2.6	Check that one method of reducing costs does not cause an increase in another cost/reduction in consumer benefit.
		2.7	Check that cost reduction plans do not reduce required levels of regulatory compliance or work health and safety (WHS).
3	**Implement cost optimisation**	3.1	Develop cost optimisation plans.
		3.2	Negotiate with relevant people to agree on implementation plans.
		3.3	Take actions to implement the cost optimisation.
		3.4	Monitor the implementation of the cost optimisation.
		3.5	Make adjustments to the plan, as required.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Muda (waste) includes all of:

- excess production and early production
- delays
- movement and transport
- poor process design
- inventory
- inefficient performance of a process
- making defective items
- activities which do not yield any benefit to the organisation or any

© Commonwealth of Australia, 2025 Public Skills Australia

benefit to the organisations customers.

Cost includes all of:

- the monetary value of expenditures able to be directly identified for supplies, services, direct labour, materials, components, cost of inventory, faults and reworks, rejects/scrap, equipment and other items used in the production of the product
- allocations and estimates for indirect costs (e.g. indirect labour, rent, energy, water and cost of capital) where a direct monetary value cannot be identified.

Cost optimisation plans include all of:

- application scope (e.g. product/s, services, areas, employees and suppliers included in plan)
- target costs and target cost reductions
- implementation period
- method of monitoring
- method of communicating progress to stakeholders.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS405030A Optimise cost of a product or service

Assessment Requirements for MSS405030 Optimise cost of a product or service

Modification History

Release 1. Supersedes and is equivalent to MSS405030A Optimise cost of a product or service

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to optimise costs for one (1) or more products or services and to:

- analyse all cost components
- optimise costs and minimise muda
- implement the cost optimisation.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to optimise costs, including knowledge of:

- cost component categories
- methods of allocating indirect costs and their implications
- expressing customer perceived benefit in cost or dollar value terms
- major controllable costs for the organisation, and how to control them
- types of muda and how to reduce it
- benefit cost/ratios, their determination and application.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real cost optimisation project for an operational workplace.

© Commonwealth of Australia, 2025 Public Skills Australia

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS405031 Undertake value analysis of product or process costs in terms of customer requirements

Modification History

Release 1. Supersedes and is equivalent to MSS405031A Undertake value analysis of product or process costs in terms of customer requirements

Application

This unit of competency covers the skills and knowledge required by an individual who is required to analyse products and processes to determine the value-adding factors, including design and processing costs that most impact on meeting customer requirements and which may also include competitor benchmarking. The unit also includes implementing identified changes that increase cost-efficiency. The unit may be applied individually or in a team environment.

In this unit an individual uses an analysis of the benefits/features which a customer perceives to be in a product or service as a basis for determining appropriate or unnecessary (muda) cost and so identifying and reducing muda (waste).

This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information. Problem solving, initiative and enterprise, and planning and organising are required to determine cost-efficiencies. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into costing methods.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Analyse customer benefits to determine appropriate or muda (waste) costs**	1.1	Analyse product or service to determine features/benefits perceived by customer in product.
		1.2	Analyse cost components of product or service and determine those which deliver customer features/benefits and those which are either appropriate or muda.
		1.3	Determine any additional features that may be added to improve saleability.
		1.4	Analyse muda cost components and allocate to direct and indirect cost categories.
		1.5	Determine options for reducing direct and indirect muda costs.
		1.6	Select cost-related actions which maximise customer benefits and minimise costs.
		1.7	Where required, undertake competitor benchmarking to provide reference points.
2	**Analyse performance variance**	2.1	Identify muda processing or operational steps for product or service following completion of customer benefit analysis.
		2.2	Analyse all costs and determine methods of reducing costs and muda.
		2.3	Develop plan and recommendations for actions required to achieve cost improvement or added customer benefits to improve saleability.
		2.4	Submit plan and recommendations to stakeholders.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Muda includes all of:	• excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items • activities which do not yield any benefit to the organisation or any benefit to the organisations customers.
Cost includes all of:	• the monetary value of expenditures able to be directly identified for supplies, services, direct labour, components, cost of

Assessment Requirements for MSS405031 Undertake value analysis of product or process costs in terms of customer requirements

Modification History

Release 1. Supersedes and is equivalent to MSS405031A Undertake value analysis of product or process costs in terms of customer requirements

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to undertake value analysis on one (1) or more products or processes and to:

- distinguish between appropriate costs and muda
- distinguish between direct and indirect costs
- determine methods of reducing both appropriate costs and muda
- develop a plan to increase customer perceived benefits/ saleability and/or reduce costs and muda.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to undertake value analysis, including knowledge of:

- cost components, direct and indirect costs
- customer perceived benefits
- factors influencing saleability
- impact of customer features/benefits on sales, market share and firms profitability
- major costs which are controllable (and how to control them)
- types of muda
- methods of reducing muda.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.

© Commonwealth of Australia, 2025 Public Skills Australia

- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real value analysis project in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS405040 Manage 5S system in an organisation

Modification History

Release 1. Supersedes and is equivalent to MSS405040A Manage 5S system in an organisation

Application

This unit of competency covers the skills and knowledge required for the overall management of the 5S system in an organisation.

This unit applies to an individual who is responsible for ensuring the smooth operation and continuous improvement of the 5S system in an organisation. This may be for an initial introduction of, or for the ongoing implementation and continuous improvement resulting from, 5S.

This unit requires the application of skills associated with problem solving, planning, communication and teamwork.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Organise an**	1.1 Ensure managers and other key stakeholders support and

	appropriate environment for 5S		understand 5S.
		1.2	Arrange for team leaders to develop/maintain skills required for 5S.
		1.3	Ensure team leaders are developing/maintaining skills required in their team members.
		1.4	Ensure procedures and work practices reflect 5S needs and regulatory requirements.
		1.5	Practise 5S in own work.
		1.6	Eliminate roadblocks to 5S.
2	**Audit 5S implementation**	2.1	Undertake spot checks of compliance.
		2.2	Review workplace and records for indicators of compliance/non-compliance.
		2.3	Encourage all levels of the workforce to routinely suggest areas for improvement.
		2.4	Discuss 5S routinely with team leaders to seek ideas for implementation of improvement suggestions and encourage identification of non-conformance.
3	**Improve 5S**	3.1	Negotiate solutions to non-conformances.
		3.2	Implement agreed solutions.
		3.3	Work with team leaders to develop opportunities for improvements.
		3.4	Provide necessary resources for improvements.
		3.5	Ensure procedures and practices change to reflect improvements.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Procedures (written, verbal, visual, computer based, etc.) include one or any combination of:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

5S includes all of:

- sort
- set in order

© Commonwealth of Australia, 2025 Public Skills Australia

- shine
- standardise
- sustain.

Sort includes all of:

- separating necessary from unnecessary items (equipment and supplies)
- keeping only what is absolutely necessary for the work processes that comprise the job
- disposing of (or relocating) all other items.

Set in order includes all of:

- assigning required equipment and materials appropriate locations in the work area
- consideration of frequency of use, ergonomics and work health and safety (WHS)
- provision of facilities to maintain the locations.

Shine includes one or more of:

- keeping the work area clean at all times which should be carried out to a regular daily schedule against allowed time, usually at the end of the day or of a particular process
- keeping work area, including virtual work area, organised
- noting any signs of wear, damage, leakage, safety risks or other issues that require immediate attention.

Standardising includes one or more of:

- activities that help maintain the order and the 5S standards
- using procedures and checklists developed from a procedure.

Sustain includes one or more of:

- making sure that daily activities are completed every day regardless of circumstance
- informal inspections that should be carried often, at least weekly
- formal inspections that should be carried out at least monthly.

Items in work area may include one or more of:

- tools
- jigs/fixtures
- materials/components
- plant and equipment
- manuals
- personal items (e.g., lunch boxes and posters)
- safety equipment and personal protective equipment
- other items which happens to be in the work area.

Assessment Requirements for MSS405040 Manage 5S system in an organisation

Modification History

Release 1. Supersedes and is equivalent to MSS405040A Manage 5S system in an organisation

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, across an organisation or department/section, to:

- encourage and monitor a systematic approach to implementing 5S
- analyse areas and records for evidence of 5S conformance/non-conformances
- manage non-conformances in implementation of 5S
- lead and motivate others in achieving 5S outcomes and making improvements to the 5S systems.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to manage 5S systems, including knowledge of:

- organisation operations and structure
- principles of efficient workplace organisation
- purposes and methodology of 5S
- operation procedures relevant to jobs in the organisation
- relevant regulatory requirements
- processes for identification of skill gaps
- methods of addressing skill gaps
- ways of encouraging team leaders and operators to find and suggest areas for improvement
- methods of making/recommending improvements
- methods of accessing required resources
- non-conformance, what they are, assessment of severity and action to be taken.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:

© Commonwealth of Australia, 2025 Public Skills Australia

  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project where initial introduction of, or ongoing implementation and continuous improvement resulting from 5S occur in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS405054 Determine and improve process capability

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS405050 Determine and improve process capability.

Application

This unit describes the skills and knowledge required to determine the actual (as distinct from design) capability of a process and then to analyse that process to remove assignable causes and reduce random causes. This unit applies to an individual (who may be a production manager, plant/process engineer, technical specialist or similar) who is responsible for developing plans to stabilise and then improve process capability and, following agreement, the implementation of the plans to improve process capability. The organisation may use either a six sigma or three sigma process.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

MSS404054 Apply statistics to operational processes

Competency Field

Competitive systems and practices

Unit Sector

Elements and Performance Criteria

Elements Elements describe the essential outcomes.	**Performance Criteria** Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Obtain data for process capability study	1.1	Identify the process requiring capability analysis, including procedures
	1.2	Identify customer specifications for product or service
	1.3	Obtain process capability data

© Commonwealth of Australia, 2025 Public Skills Australia

2. Analyse data	2.1	Read and interpret data to identify assignable causes of variation in liaison with relevant personnel
	2.2	Develop solutions to eliminate variation due to assignable causes in liaison with relevant personnel
	2.3	Analyse random variations for possible causes in liaison with relevant personnel
	2.4	Confirm causes of random variation
	2.5	Develop solutions to reduce random variations in liaison with relevant personnel
3. Improve process capability	3.1	Develop written plans to implement solutions
	3.2	Liaise with relevant personnel to implement solutions
	3.3	Gain necessary approvals to implement plans
	3.4	Monitor implementation and make adjustments
	3.5	Determine new or revised process capability
	3.6	Implement revised process capability regime

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSS405054 Determine and improve process capability

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS405050 Determine and improve process capability.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- determined and improved the capability of at least 1 process.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- statistical methods of processing and describing data
- data collection methods
- data processing techniques required to establish variability and normal distribution
- how to calculate three sigma or six sigma process capability
- random and non-random results and processes for recognition of assignable causes
- causes of different types of non-random results
- causes of random variation
- process to translate the data into variations in the process and determine methods of controlling them.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS405063 Develop the application of enterprise control systems in an organisation

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS405060 Develop the application of enterprise control systems in an organisation.

Application

This unit describes the skills and knowledge required to continuously modify and improve or develop new enterprise-wide information technology (IT) based control systems, such as Supervisory Control and Data Acquisition (SCADA), Enterprise Resource Planning (ERP), Materials Resource Planning (MRPII) and similar.

Typically, the development of such a system will be in liaison with an appropriate technical expert who may be an internal expert or an external consultant.

This unit applies to an individual responsible for the development and implementation of new systems or modifications to the current system. While the individual might generate the ideas for change themselves and undertake a significant part of the final implementation, they may also be working closely with an appropriate technical expert (such as the software system supplier) who may actually make the modifications.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Elements and Performance Criteria

Elements	**Performance Criteria**
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1. Monitor information and control needs of organisation	1.1	Check the use of current information
	1.2	Check the operation of current control systems
	1.3	Communicate with key information users regarding new or changed information control needs, including information needs from and to value stream
	1.4	Identify short comings in information and control provision
	1.5	Act on information and control needs to meet organisational needs
2. Check current system against organisation needs	2.1	Check the routine use of the system
	2.2	Check system alarm or non-conformance notification and control operation
	2.3	Communicate with key stakeholders about current system use and application
	2.4	Determine effect of non-conformance on enterprise system
	2.5	Identify problems and issues and address in accordance with procedures
3. Determine developments needed in a new or significantly modified system	3.1	Identify needs requiring a new system or development of modifications to the current system
	3.2	Draft scope, specifications and outcomes required
	3.3	Liaise with key stakeholders and technical experts to refine scope, specifications and outcomes needed in new or modified system
	3.4	Agree final scope, specifications and outcomes
4. Develop system	4.1	Develop written project plan
	4.2	Facilitate ongoing consultation with stakeholders
	4.3	Manage development project
	4.4	Manage trialing of modified system
	4.5	Ensure modified system meets organisational requirements

Assessment Requirements for MSS405063 Develop the application of enterprise control systems in an organisation

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS405060 Develop the application of enterprise control systems in an organisation.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed the application of enterprise control system for an organisation for at least 1 of the following purposes:
  - development and implementation of new system
  - modifications to the current system.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- capability of resource planning, SCADA systems
- information and control needs of organisation and processes
- project management principles
- support, training, skill development mechanisms available for access by personnel.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS405064 Determine and establish information collection requirements and processes

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Foundation skills information added. Assessment requirements changed. Supersedes and is equivalent to MSS405061 Determine and establish information collection requirements and processes.

Application

This unit describes the skills and knowledge required to determine what information is needed to support decision making in a competitive systems and practices environment and then to set about establishing required information collection systems. This would usually be done as part of a team and would require consultation with all key stakeholders.

This unit covers the determination of data needs and collection methods for an organisation or specific plant or process. This will typically be done in liaison with a wide range of people, each of whom will have their own specific information requirements. This will need to be balanced and interpreted into a workable set of data to be collected.

This unit is primarily focused on those decisions which are non-routine and so need specific collection of data, or for those decisions which are routine, the establishment of a routine data collection protocol to allow for the decisions to be made based on appropriate, reliable data.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Elements and Performance Criteria

Elements	**Performance Criteria**
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1. Analyse decisions to be made	1.1	Identify personnel to be included in the analysis process
	1.2	Determine the consequences of the decisions in liaison with personnel
	1.3	Determine the variables which can be controlled
	1.4	Determine the variables which cannot be controlled
	1.5	Determine the consequences of a change in these variables in liaison with affected personnel
2. Define factors that cause variables to change	2.1	Identify factors which can be controlled
	2.2	Identify factors which are not able to be controlled
	2.3	Identify means of measuring these factors, or indicators for the values of these factors
	2.4	Compile a list of measurements or indicators required
	2.5	Communicate with team members and involve them in development of factors and changes to ensure awareness and facilitate learning
3. Develop data collection protocols	3.1	Determine methods of making measurements
	3.2	Determine methods of quantifying indicators
	3.3	Calculate the cost-benefit of data collection method
4. Develop systems to produce required information	4.1	Identify user of information and their needs and abilities
	4.2	Determine data processing needs to produce required information
	4.3	Determine information distribution channels
	4.4	Determine skill development need for recipients of information
	4.5	Implement systems to produce information
	4.6	Monitor implementation and adjust to produce required information

Assessment Requirements for MSS405064 Determine and establish information collection requirements and processes

Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Foundation skills information added. Assessment requirements changed. Supersedes and is equivalent to MSS405061 Determine and establish information collection requirements and processes.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- determined and established information collection requirements and processes for at least 1 specific plant or process.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- business needs of the organisation
- information needs of individuals within the organisation
- data available and potentially available to the organisation
- methods of collecting available and potential data
- relationship between data available and information required
- methods of converting data into useful information
- methods of developing indicators for factors resistant to measurement
- stakeholder consultation techniques.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS405075 Facilitate the development of a new product

Modification History

Release 2. Updated pre-requisite code

Release 1. Supersedes and is equivalent to MSS405075A Facilitate the development of a new product

Application

This unit of competency covers the skills and knowledge required to facilitate the development of a new or evolutionary product within an existing range of products and encompasses design for manufacture, determining the process capability and the facilitation of its initial production.

This unit applies to an individual responsible for the development of a new product. The unit assumes an initial product design has been prepared by a designer and also assumes a working knowledge of all main processes and materials so that an informed choice can be made between them. The person will normally be a manager or technical expert and be required to work closely with a range of other management and operations personnel.

The unit requires balancing the business and technical sides of the new product and would typically be done as part of a cross-functional team. This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Teamwork, problem solving, initiative and enterprise, and planning and organising are required to facilitate the development of a new product. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

MSS404054	Apply statistics to operational processes

Competency Field

Competitive systems and practices

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Confirm design brief of new product in consultation with relevant people**	1.1	Review product design with customer and other key stakeholders and agree on technical specification, aesthetic requirements, timelines, cost and other market requirements.
		1.2	Determine any regulatory, industry code/intellectual property (IP) requirements for product.
		1.3	Identify any required tooling, process or equipment needs.
		1.4	Confirm design brief, including relevant drawings, to meet needs.
		1.5	Determine design brief conforms to organisation objectives and capability.
		1.6	Obtain approval on total design brief from all relevant personnel.
2	**Determine material requirements for product**	2.1	Select appropriate materials or combination of materials/ components in liaison with key stakeholders.
		2.2	Determine material/component testing and evaluation regime required to meet product end use requirements, including regulatory/industry code requirements.
		2.3	Arrange for testing and evaluation of trial materials/ components.
		2.4	Guide material trial process and interpret material trial results.
		2.5	Determine final materials/components specifications and details of value chain.

© Commonwealth of Australia, 2025 Public Skills Australia

3	**Determine process requirements for product**	3.1	Select appropriate process to make product in liaison with key stakeholders and based on relevant factors.
		3.2	Determine any special process/equipment requirements for this product.
		3.3	Communicate with production personnel to determine any concerns and/or training or other needs.
		3.4	Adjust the design, as required, to satisfy customer and production needs.
4	**Ensure process needs for new product have been met**	4.1	Liaise with equipment design/procurement personnel.
		4.2	Interpret hardware specifications and ensure they are appropriate for the job required.
		4.3	Liaise with process personnel to ensure appropriate draft procedures for new product have been developed.
		4.4	Validate product cost and design meets organisation requirements and capability.
5	**Trial new product through the process**	5.1	Design trialling procedure to deliver required information.
		5.2	Liaise with relevant stakeholders.
		5.3	Ensure health, safety and environment (HSE) requirements are observed.
		5.4	Coordinate the trialling of the new product.
		5.5	Interpret product trial results and guide product trial process.
		5.6	Tune process to optimise production of new product.
6	**Determine process capability**	6.1	Plot appropriate statistical process control charts.
		6.2	Determine confidence limits.
		6.3	Compare confidence limits with product specification.

© Commonwealth of Australia, 2025 Public Skills Australia

7	**Coordinate product trials**	7.1	Determine product testing and evaluation regime required to meet end use requirements, including regulatory/industry code requirements.
		7.2	Arrange for testing and evaluation of trial product/prototype.
		7.3	Interpret product trial results and guide product trial process.
		7.4	Determine final product specification in liaison with key stakeholders.
		7.5	Make required changes to materials, process and equipment.
8	**Implement standard procedures for new product**	8.1	Monitor initial production and, in liaison with appropriate team members, adjust process, conditions and materials to ensure the product and process outcomes conform to customer, regulatory and organisation requirements.
		8.2	Ensure process specifications are updated and reflect the optimised operation developed.
		8.3	Ensure standard operating procedures (SOPs) are correct for the new product.
		8.4	Ensure equipment and other hardware records are updated to reflect additions/changes.
		8.5	Ensure project records are complete and all required reports have been completed and submitted.
		8.6	Archive records according to company procedure.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Organisation objectives and requirements include one or more of:	• cost/profit requirements for new products (e.g. minimum return and capital expenditure limits) • encouragement/discouragement of different types of products (e.g. on sustainability, ethical or other non-individual customer-related criteria) • potential or actual capacity conflicts with other customers or product/process activities • activities that require/may require community consultation (e.g. on noise or other environmental grounds).
Typical regulatory requirements include one or more	• work health and safety (WHS) • environmental regulations • structural codes

© Commonwealth of Australia, 2025 Public Skills Australia

of:	• product/industry-specific requirements.
Typical problems include one or more of:	• defining product end-use requirements in terms meaningful to the product design and manufacture • matching suitable materials and processes to the product needs and company expertise and facilities • matching (and improving) process capability to product tolerances.
Relevant factors include one or more of	• type of material • dimensional precision of product • length of run/number of products • required aesthetics • size and complexity of product • available capital funding • process equipment available • HSE factors.

Unit Mapping Information

Release 2. Equivalent to Release 1

Release 1. Supersedes and is equivalent to MSS405075A Facilitate the development of a new product

Assessment Requirements for MSS405075 Facilitate the development of a new product

Modification History

Release 2. Updated pre-requisite code

Release 1. Supersedes and is equivalent to MSS405075A Facilitate the development of a new product

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to facilitate the development of one (1) or more new/modified products and to:

- confirm the design brief
- determine material and process requirements
- ensure process needs have been met
- trial the new product and determine process capability
- conduct product trials
- standardise the new product.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to facilitate the development of a new product, including knowledge of:

- appropriate types of materials/components and criteria for choosing between them
- alternative processes/plant/equipment for making the new product and criteria for choosing between them
- determination of process capability
- appropriate sampling and testing for materials/components and products
- determination of processing time, product cost, benefit cost of the new product
- interpretation of trial/field test results.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
    - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria

© Commonwealth of Australia, 2025 Public Skills Australia

  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real new/modified product development project in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS405081 Develop a proactive maintenance strategy

Modification History

Release 1. Supersedes and is equivalent to MSS405081A Develop a proactive maintenance strategy

Application

This unit of competency covers the skills and knowledge required to develop and implement a proactive maintenance strategy for an organisation. The unit recognises that there are a number of predictive or proactive maintenance strategies, such as total productive maintenance (TPM) and reliability centred maintenance (RCM).

This unit applies to an individual responsible for developing a proactive maintenance strategy for an organisation. Typically the organisation will also be implementing other competitive systems and practices. The unit applies to the selection of appropriate strategies, initial development and implementation as well as application of the strategies to new areas and the improvement of operation in existing areas. This would typically be done in a team environment and in consultation with all key stakeholders.

This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Teamwork, problem solving, initiative and enterprise, and planning and organising are required to develop and implement a predictive maintenance strategy. Strategies will incorporate the maintenance requirements of relevant technologies. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into maintenance strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Determine appropriate analytical techniques**	1.1	Liaise with key stakeholders to determine objectives of maintenance strategy.
		1.2	Examine current maintenance situation to determine major areas requiring improvement.
		1.3	Compare possible strategies, techniques and tools against organisation needs.
		1.4	Select possible strategies, techniques and tools.
		1.5	Confirm selected strategies, techniques and tools with key stakeholders.
2	**Develop reliability strategies**	2.1	Select preferred maintenance strategy.
		2.2	Examine and adapt strategy to organisation needs and priorities.
		2.3	Examine and adapt techniques and tools required to implement strategy.
		2.4	Liaise with key stakeholders to develop an implementation plan.
		2.5	Identify key information and performance indicators required.
3	**Implement strategy**	3.1	Identify data collection required.
		3.2	Identify hardware and other resources required.
		3.3	Identify skill needs required in consultation with key stakeholders.
		3.4	Ensure all resources/training are available.

© Commonwealth of Australia, 2025 Public Skills Australia

		3.5	Implement strategy.
4	**Monitor implementation of strategy**	4.1	Compare information/performance indicators with desired levels.
		4.2	Liaise with key stakeholders regarding strategy issues.
		4.3	Identify areas requiring adjustment.
		4.4	Make required adjustments.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping

© Commonwealth of Australia, 2025 Public Skills Australia

- problem solving
- run charts
- standard procedures
- current reality tree.

OEE includes:

The combination of the main factors causing loss of productive capacity from equipment/plant and is:

- OEE = availability x performance x quality rate

where:

- availability takes into account losses due to breakdown, set-up and adjustments
- performance takes into account losses due to minor stoppages, reduced speed and idling
- quality rate takes into account losses due to rejects, reworks and start-up waste.

Mean time between failure (MTBF) includes:

One key measure of the effectiveness of a maintenance procedure, and is an indicator as to whether root causes are being found and resolved. If MTBF is reducing, then it is an indicator that the maintenance regime is failing.

There are many possible causes of any problem. Eliminating some will have no impact, others will ameliorate the problem. However, elimination of the root cause will eliminate the problem. There should only be one root cause for any problem and so the analysis should continue until this one cause is found. Elimination of the root cause permanently eliminates the problem.

Depending on the equipment, operations and procedures of the organisation, alternative statistical records of maintenance and maintenance-related events may be substituted for MTBF providing they relate strategies for improving OEE.

Failure mode effects analysis (FMEA) includes:

A systematic approach that identifies potential failure modes in a system, product, or operations/assembly operation caused by either design or operations/assembly process deficiencies. It also identifies critical or significant design or process characteristics that require special controls to prevent or detect failure modes. FMEA is a tool used to prevent problems from occurring.

© Commonwealth of Australia, 2025 Public Skills Australia

Some industry sectors have highly adapted forms of FMEA and may practice traditional FMEA in say their routine maintenance while using another technique, such as Hazard and Operability Studies (HAZOP) for design and modification.

HAZOP is a form of FMEA which has been practiced by the process industries for over 30 years and examines the implications of changes in process conditions to process stability.

Condition monitoring includes: The process of analysing the implications of condition monitoring data for proactive maintenance whether it be obtained from non-destructive testing (NDT) reports, visual assessment by experts, diagnostic reports obtained from SCADA or other enterprise or equipment software and product or process quality analyses. It does not require the actual undertaking of the NDT or condition monitoring assessment or test. If this is required appropriate units from other Training Packages will be required.

Assessment Requirements for MSS405081 Develop a proactive maintenance strategy

Modification History

Release 1. Supersedes and is equivalent to MSS405081A Develop a proactive maintenance strategy

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more work areas or product families, to:

- consider a variety of proactive maintenance strategies for suitability to an organisation
- consult operators, maintenance, management and other stakeholders in decisions on proactive maintenance strategies
- implement selected strategies
- monitor performance to selected indicators and make improvements to selected proactive maintenance strategies.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to develop and implement a proactive maintenance strategy, including knowledge of:

- characteristics and strengths of different types of strategies, techniques and tools
- holistic costs of different strategies combining cost of maintenance with costs of lost production, sales, and so on, as relevant to the organisation
- business goals sufficient to match the strategy to the business needs
- strategic thinking and its application to proactive maintenance
- principles of process equipment and how to improve its reliability
- resources required and how to obtain them.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.

© Commonwealth of Australia, 2025 Public Skills Australia

- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project where development of a proactive maintenance strategy occurs in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS405086 Develop sustainable energy practices

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Application

This unit describes the skills and knowledge required by an individual to identify opportunities for, and make improvements in, sustainable energy practices in an organisation. This includes efficient use of raw materials, management of waste, electricity conservation, heat conservation and management, water management, environment protection and environment obligations of organisations.

The unit involves analysis of energy used in processes and operations and categorising the energy use according to lean principles. The unit covers categorising energy into necessary use and muda (waste) with the muda being further categorised into necessary muda and unnecessary muda. Strategies for eliminating or minimising energy muda are covered with cost benefit analyses being required for strategies.

This unit applies to a manager, technical specialist or similar who is required to use problem solving, initiative, planning and organising skills to develop plans for efficient energy use.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Analyse energy**	1.1	Identify all energy consuming processes

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
	use	1.2	Determine quantity and nature of energy consumed
		1.3	Analyse energy consumed and generated in different parts of the process
		1.4	Determine source of energy consumed in process
2	**Develop energy conservation plans**	2.1	Determine the efficiency of use of energy by all energy consuming processes
		2.2	Determine causes of low efficiency of use
		2.3	Develop plans for increasing the efficiency of energy use
		2.4	Calculate cost benefit of plans
3	**Develop energy trading plans**	3.1	Compare energy generating activities with energy consuming activities
		3.2	Determine feasibility of energy consuming activities using energy generated by other activities
		3.3	Develop plans for energy trading
		3.4	Calculate cost benefit of plans
4	**Investigate alternative sources of energy**	4.1	Write a specification for energy required
		4.2	Identify sources for that energy
		4.3	Calculate cost benefit for alternative energy sources
5	**Develop plans for more efficient energy use**	5.1	Compare cost benefit for different alternatives developed
		5.2	Rank proposals based on cost benefit compared to limited resources

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
	5.3	Check proposals meet regulatory requirements
	5.4	Recommend proposals for improving energy efficiency
6 **Implement selected plans**	6.1	Liaise with relevant people to implement energy efficiency plans
	6.2	Follow through to ensure implementation occurs
	6.3	Monitor implementation and adjust
	6.4	Check new energy usage to ensure improvements have occurred

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSS405086 Develop sustainable energy practices

Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed sustainable energy practices for at least 1 organisation.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sources of data and required calculations
- types and sources of energy
- methods of analysing energy efficiency for different types of energy
- methods of converting energy values from one form to another
- alternative sources of energy
- principles of energy efficiency
- sustainability regulatory and legislative requirements
- energy trading schemes and procedures
- organisation and process needs for energy
- muda (waste) including: necessary and unnecessary

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS407003 Analyse process changes

Modification History

Release 1. Supersedes and is equivalent to MSS407003A Analyse process changes

Application

This unit of competency covers the skills and knowledge required to quantitatively analyse past changes made in an organisation's operations, systems, process or environment to ensure the quantum of expected change has been achieved and that gains are maintained and are used as a basis for further gains.

The unit includes statistical and other mathematical analysis of data, methods for capturing data on implemented changes (quantitative and qualitative) and producing useful information from this data. It includes consultation with stakeholders both for data validation and consensus decision making for future improvements.

This unit applies to team leaders, technical experts and people with a similar sphere of influence/scope of authority and responsibility who already have a knowledge of statistics used in managing operations and of process capability improvement and some knowledge of factorial design, the selection and analysis of appropriate metrics, and the discrimination between valid and invalid interpretations of data

The unit applies to reviews of both intended and unintended consequences of change and the effectiveness of the implementation of the change. This unit is not intended to be applied to a technical or engineering review of a major capital expenditure or similar.

This unit takes a largely quantitative approach to the review.

This unit may also be applied to service organisations applying competitive systems and practices principles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Analyse a change**	1.1	Identify changes which have occurred.
		1.2	Select a change or group of related changes to analyse.
		1.3	Determine the initiation of the selected change.
		1.4	Identify relevant metrics and predicted values for these metrics.
		1.5	Gather data for these metrics prior to the change.
		1.6	Gather data and information on the implementation of the change.
		1.7	Gather data for these metrics after the change.
		1.8	Survey all key metrics and identify anywhere variations may correlate with the change being analysed.
		1.9	Discuss results of change with key stakeholders and identify other possible (qualitative or quantitative) results of the change.
		1.10	Analyse this data to determine the results of the change.
2	**Review results of change with stakeholders**	2.1	Identify trends over time in all relevant metrics.
		2.2	Analyse correlated metrics to determine causal relationship.
		2.3	Audit health, safety and environment (HSE) impacts as a result of the change.
		2.4	Present information in a form understandable by

		stakeholders.
	2.5	Discuss analysed information with relevant stakeholders.
	2.6	Modify information based on stakeholder input, as required.
	2.7	Develop a consensus view of the result of the change which is supported by the information available.
	2.8	Validate the consensus view with stakeholders.
3 **Identify future improvements**	3.1	Discuss lessons learned from the change with stakeholders.
	3.2	Capture key knowledge in accordance with systems and procedures.
	3.3	Identify future improvements in collaboration with team members.
	3.4	Validate identified changes with stakeholders.
	3.5	Obtain sign-off from process/system owner.
	3.6	Start the process for implementing future improvements.
	3.7	Check that the planned improvements are occurring.
	3.8	Take action to sustain improvement by standardising.

contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Change includes one or more of:	• plant, operations, products, procedures or practice • continuous improvement (or an improvement event/project) or implementing new products, technology or systems • intended to make an improvement or to implement new products, technology or systems.
Presentation of information may occur in one or more formats:	• in appropriate visual forms (e.g. graphs, charts and noticeboards • verbally or other forms able to be understood and used by stakeholders.
Stakeholders include one or more of:	• work team members • value stream members • managers.
Results of change include one or more of:	• an initial improvement followed by a return to previous performance • continued improvement • continued detriment or other variations over time.

© Commonwealth of Australia, 2025 Public Skills Australia

Improvements include one or more of:	• changes to operations, process, plant, procedures or practice • changes to ensure positive benefits are maintained.
Sustaining improvement include one or more of:	• standard procedures and work instructions • standard practice • other relevant documents and practices.
Team leader includes one or more of:	• a person with a formal, permanent role • a person with an ad hoc role in facilitating the function of a team in a workplace.

Assessment Requirements for MSS407003 Analyse process changes

Modification History

Release 1. Supersedes and is equivalent to MSS407003A Analyse process changes

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to quantitatively analyse one (1) or more changes and to:

- analyse the change
- review the results of the change
- identify improvements to be made.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to analyse a change, including knowledge of:

- methods of determining the impact of a change using quantitative analysis of process data, including advanced statistical/mathematical analysis and basic qualitative techniques
- organisation metrics, particularly those related to the change
- sources of data (actual and possible) within the organisation and the value stream
- range of typical metrics, their applications and limitations
- trends, correlation and causation.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use an analysis of a real change in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).

© Commonwealth of Australia, 2025 Public Skills Australia

- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS407012 Lead a process to determine and solve root cause for a complex problem

Modification History

Release 1. Supersedes and is equivalent to MSS407012A Lead a problem solving process to determine and solve root cause

Application

This unit of competency covers the skills and knowledge required to guide or lead a problem-solving process to solve complex and/or unusual problems. The problem-solving process will usually involve the use of either real or nominal groups to determine the root cause and propose the solution.

This unit applies to managers and/or technical experts who are confronted by complex problems to which they need to develop a solution. The problem may be related to any area or process within the organisation or in the value stream and may have been formally presented to the individual for consideration or arise as part of other work.

The person may or may not have the required technical expertise for the particular problem, although the problem will require technical expertise to be solved. The problem may be capable of being adequately defined at the beginning of the problem solving activity, or may be progressively defined through continued iterations of the problem-solving activity.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Competitive systems and practices

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Recognise complex problem**	1.1	Identify a complex issue which needs to be addressed.
		1.2	Undertake an initial investigation of the issue.
		1.3	Determine initial areas of expertise and data which may be required to analyse the problem.
		1.4	Develop an initial definition of the problem.
2	**Develop problem-solving methodology**	2.1	Draft a problem-solving methodology.
		2.2	Develop required approaches and protocols for obtaining required data and information.
		2.3	Establish group to assist with problem solving.
		2.4	Allocate tasks, responsibilities and reporting arrangements to group.
		2.5	Develop arrangements for consultation with required people outside of group.
3	**Analyse problem**	3.1	Apply methodology.
		3.2	Obtain data/information.
		3.3	Review problem definition.
		3.4	Review methodology.
		3.5	Obtain additional data/information as required.
4	**Identify root cause**	4.1	Map causal links for the problem.
		4.2	Determine indicators of the problem or the problem precursors.
		4.3	Identify causes which can be controlled/brought under control.

© Commonwealth of Australia, 2025 Public Skills Australia

5	**Develop a solution**	5.1	Develop solutions for controllable causes.
		5.2	Determine benefit/cost for proposed solutions.
		5.3	Investigate proposed solutions for efficacy.
		5.4	Select the best available solution.
		5.5	Obtain necessary support and authorisations for proposed solution.
6	**Check problem is solved and standardised**	6.1	Monitor indicators of problem/problem precursor.
		6.2	Review problem solution/implementation as required.
		6.3	Ensure appropriate solution is standardised.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:	• lean operations • agile operations • preventative and predictive maintenance approaches • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis

© Commonwealth of Australia, 2025 Public Skills Australia

- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

Complex problem includes one or more of:

- requires going into the value stream for data/information
- is wider than just applying to a single job
- applies to less common solutions or problems
- requires a higher level of knowledge and skill
- requires significant specialist knowledge
- requires significant specialist skill
- requires more theory/understanding of technology or process
- data is not easily available and may need particular strategies to obtain
- requires overcoming resistance from people, including employees, customers or suppliers
- requires extracting data not regularly reported from SCADA or similar systems
- the problem and/or proposed solutions require reporting or authorisations from a Board or external authorities, such as licensing or regulatory bodies.

Problem recognition includes one or more of:

- an obvious and current complex problem
- an intractable problem which has been known about and ‘lived with’ for some time
- a complex problem which has not been previously recognised.

Group includes one or more of:

- real (i.e. physical or face to face)
- nominal (i.e. never meets and may not know who each other is)
- or any combination in between.

Assessment Requirements for MSS407012 Lead a process to determine and solve root cause for a complex problem

Modification History

Release 1. Supersedes and is equivalent to MSS407012A Lead a problem solving process to determine and solve root cause

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more complex problems, to:

- undertake complex problem identification
- establish appropriate methodologies, including establishing team responsibilities, to achieve root cause identification
- prioritise solutions
- recommend solutions and implementation procedures within the organisation and the value stream
- evaluate implementation of solutions
- standardise solutions.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to lead a problem-solving process, including knowledge of:

- organisational goals, products and processes
- sources of data (actual and possible) within the organisation and the value stream
- understanding of the techniques and methodologies of formal problem solving
- data required for problem solving and alternative/proxy data sources
- benefit/cost analysis.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.

© Commonwealth of Australia, 2025 Public Skills Australia

- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project where a problem solving process is utilised to solve complex and/or unusual problems in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS408005 Develop knowledge systems and learning processes for an organisation

Modification History

Release 1. Supersedes and is equivalent to MSS408005A Develop the learning processes of the operations organisation

Application

This unit of competency covers the skills and knowledge required to ensure that knowledge relevant to performance improvement and the meeting of customer requirements is gathered, applied and retained by the organisation and individuals. This unit focuses on the processes in an organisation for extracting learning as it appears, capturing it in a manner which makes it available for future use and applying it to work.

The unit is intended for managers and people with a similar sphere of influence and scope of authority and responsibility who are familiar with competitive systems and practices and workplace learning.

This unit may also be applied to service organisations applying competitive systems and practices principles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

essential outcomes.		demonstrate achievement of the element.	
1	Identify processes generating new knowledge	1.1	Identify any existing systems for organisational learning.
		1.2	Encourage the open discussion of current performance and problems.
		1.3	Facilitate consensus problem solving.
		1.4	Ensure both qualitative and quantitative knowledge are captured.
		1.5	Validate findings with relevant managers.
2	Develop knowledge capture and retrieval systems	2.1	Obtain required approvals.
		2.2	Provide useable systems for recording of problems, causes and solutions.
		2.3	Facilitate the extraction of knowledge from records.
		2.4	Ensure all project work captures generated knowledge.
		2.5	Ensure knowledge is in a form able to be applied by the organisation and its personnel.
		2.6	Develop knowledge storage and retrieval systems.
		2.7	Monitor knowledge capture system use and suitability.
3	Improve the application of organisational knowledge	3.1	Ensure knowledge is distributed to and available where needed.
		3.2	Ensure knowledge system is part of standard procedures and practices.
		3.3	Encourage the routine use of the knowledge system.
		3.4	Facilitate open discussion of knowledge and knowledge system.
		3.5	Identify inhibitors to greater use of knowledge.
		3.6	Take actions to improve application of organisational knowledge.

© Commonwealth of Australia, 2025 Public Skills Australia

4	Evaluate and improve learning processes	4.1	Review use of knowledge system.
		4.2	Evaluate benefits obtained from knowledge system.
		4.3	Identify areas where the knowledge system is not being fully utilised.
		4.4	Identify areas where greater benefits could be obtained from the knowledge system.
		4.5	Discuss areas of possible improvements with relevant managers and other stakeholders.
		4.6	Develop consensus improvement plans for the knowledge system.
		4.7	Obtain required approvals.
		4.8	Train personnel, as required, to improve use.
		4.9	Implement improvement plans.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Assessment Requirements for MSS408005 Develop knowledge systems and learning processes for an organisation

Modification History

Release 1. Supersedes and is equivalent to MSS408005A Develop the learning processes of the operations organisation

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, across an organisation or department/section, to:

- review knowledge system and learning process across the organisation
- relate learning processes to implementation of competitive systems and practices
- identify components of current knowledge system that require improvement
- develop improvements to current knowledge/learning system, including setting of system metrics
- manage implementation of improvements.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to develop knowledge systems and learning processes, including knowledge of:

- competitive systems and practices principles and tools
- organisational goals strategies, operations and processes
- approval processes within organisation
- cost/benefit analysis methods
- methods of determining the impact of a change
- communication methods and media for a range of audiences
- customer perception of value
- reward systems
- learning and knowledge management systems.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria

© Commonwealth of Australia, 2025 Public Skills Australia

  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project where knowledge relevant to performance improvement and the meeting of customer requirements is gathered, applied and retained in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS408006 Develop and refine systems for improvement in operations

Modification History

Release 1. Supersedes and is equivalent to MSS408006A Develop and refine systems for continuous improvement in operations

Application

This unit of competency covers the skills, knowledge and processes required to ensure that continuous improvement systems do not stultify and continue to improve along with other operational systems in an organisation. This unit is about improving the process yield/unit of effort or cost, reducing process variation and increasing process reliability, upgrading, enhancing or refining process outputs, and includes developing a culture of reviewing and sustaining change ensuring improvements are maintained and built on.

This unit applies to managers and people with a similar sphere of influence and scope of authority and responsibility and who are familiar with competitive systems and practices, continuous improvement and locking in improvements.

This unit may also be applied to service organisations applying competitive systems and practices principles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Establish parameters of current internal improvement systems**	1.1	Describe organisation systems that impact on continuous improvement.
		1.2	Identify current relevant metrics and their values.
		1.3	Check that metrics are collected for all improvements.
		1.4	Determine yield of current improvement processes.
		1.5	Review results of improvements.
2	**Distinguish kaizen blitz processes**	2.1	Identify all improvements which have occurred over an agreed period of time.
		2.2	Distinguish between kaizen blitz (breakthrough improvements) and kaizen (continuous improvements).
		2.3	Determine the timing of kaizen blitz breakthrough improvement processes.
		2.4	Analyse factors controlling the timing and selection of kaizen blitz.
		2.5	Analyse kaizen to identify cases where kaizen blitz were required.
		2.6	Validate findings with process/system owners and obtain required approvals.
		2.7	Improve timing/selection of kaizen blitz.
		2.8	Improve other factors limiting the gains from kaizen blitz.
3	**Develop kaizen practice**	3.1	Check that levels of delegated authority and responsibility are appropriate for kaizen from the shop floor.
		3.2	Ensure all personnel have appropriate capabilities for kaizen processes.

© Commonwealth of Australia, 2025 Public Skills Australia

		3.3	Ensure personnel and systems recognise potential kaizen blitz projects.
		3.4	Ensure sufficient resources are available for the operation of kaizen and kaizen blitz processes.
		3.5	Check that relevant information flows from improvement changes to all required areas and stakeholders.
		3.6	Check data collection and metrics analysis capture changes which result from improvement actions.
		3.7	Check that improvement changes are standardised and sustained.
		3.8	Check review processes for routine kaizen.
		3.9	Remove or change factors limiting gains from improvements.
		3.10	Modify systems to ensure appropriate possible changes are referred to other improvement processes.
		3.11	Institutionalise improvement.
4	**Establish parameters of current external improvement systems**	4.1	Review value stream systems that impact on improvement.
		4.2	Review procedures for deciding improvement methodologies.
		4.3	Identify current relevant metrics and their values, as appropriate.
		4.4	Determine yield of current improvement processes.
		4.5	Review results of improvements.
5	**Explore opportunities for further development of value stream improvement**	5.1	Review mechanisms for consultation with value stream members.
		5.2	Develop mechanisms for further improving joint problem solving.
		5.3	Develop mechanisms for increased sharing of

© Commonwealth of Australia, 2025 Public Skills Australia

	processes		organisational knowledge.
		5.4	Obtain support and necessary authorisations from process/system owners.
		5.5	Capture and standardise improvements.
		5.6	Improve factors limiting gains from kaizen.
6	**Review systems for compatibility with improvement strategy**	6.1	Review all systems which impact or are impacted on improvements and the improvement system.
		6.2	Analyse relationships between improvement systems and other relevant systems.
		6.3	Analyse practices caused by and results from the systems.
		6.4	Negotiate changes to the systems to improve the outcomes from improvement systems.
		6.5	Obtain necessary approvals to implement changes.
		6.6	Monitor the implementation of the changes.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more	• lean operations • agile operations • preventative and predictive maintenance approaches

© Commonwealth of Australia, 2025 Public Skills Australia

of:	• statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree.
Organisation systems include one or more of:	• problem recognition and solving • operational/process improvement • improvement projects • product/process design and development • processes for making incremental improvements.
Relevant metrics to determine the performance of the improvement system include one or more of:	• hurdle rates for new investments • KPIs for existing processes • quality statistics • delivery timing and quantity statistics • process/equipment reliability (‘uptime’) • incident and non-conformance reports • complaints, returns and rejects.
Resources for improvement include the consideration of all of:	• improvement budget • guidelines for trialling of possible improvements • mechanism for approvals for possible improvements • business case guidelines for proposed improvements • indicators of success of proposed improvement • mechanisms for tracking and evaluation of changes • forum for the open discussion of the results of the implementation • mechanisms for the examination of the improvement for additional improvements

© Commonwealth of Australia, 2025 Public Skills Australia

	• organisation systems to sustain beneficial changes.
Capturing value stream improvements includes one or more of:	• revised contractual arrangements • revised specifications • signed agreements • other documented arrangements which formalise the raised base line.
Systems impact/are impacted on improvements include one or more of:	• office • purchasing • rewards (individual or team at all levels) • sales • marketing • maintenance • process/product • transport and logistics.
Organisational knowledge includes one or more forms of information which is:	• quantified or otherwise modified to make its outcomes measurable or observable • expressed in an accessible and distributable form appropriate to the organisation operations and stakeholders.
Improvements include one or more of:	• process, plant, procedures or practice • changes to ensure positive benefits to stakeholders are maintained.
Manager includes one or more of:	• a person who may has a formal, permanent position • a person who has an ad hoc role in facilitating the function of multiple teams in a workplace, departments or entire organisations.

Assessment Requirements for MSS408006 Develop and refine systems for improvement in operations

Modification History

Release 1. Supersedes and is equivalent to MSS408006A Develop and refine systems for continuous improvement in operations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to develop improvement systems for one (1) or more processes or systems and to:

- review current improvements and improvement processes
- improve the practice of kaizen and kaizen blitz
- explore opportunities for improvement to improvement processes along the value stream
- take steps to improve the outcomes from improvement systems.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to apply and improve the use of improvement systems, including knowledge of:

- distinction between and complementarity of kaizen and kaizen blitz
- influence, persuasion and negotiation techniques
- competitive systems and practices tools relevant to the process/system and value stream
- methods for the evaluation of the success of change.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence should use one or more of:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria
  - evidence of routine, day-to-day use of kaizen and kaizen blitz which together provides sufficient evidence
  - some combination of these.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.

© Commonwealth of Australia, 2025 Public Skills Australia

- Assessment should use a real evidence from real kaizen and kaizen blitz outcomes for an operational workplace/value stream.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

MSS408007 Develop problem solving capability of an organisation

Modification History

Release 1. Supersedes and is equivalent to MSS408007A Develop problem solving capability of an organisation

Application

This unit of competency covers the skills and knowledge required to develop problem solving skills of individuals within an organisation and as a consequence the problem solving capability of the organisation as a whole. The unit does not supply the skills to undertake formal problem solving on individual problems.

This unit is intended for organisation leaders/managers and people with a similar sphere of influence and scope of authority and responsibility. It applies where problem solving is already routine in the organisation and improving individual and organisational problem solving capability has been accepted as part of the organisation's improvement processes.

The unit applies to individuals who are already familiar with formal problem solving processes.

This unit may also be applied to service organisations applying competitive systems and practices principles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Develop an appropriate organisational framework**	1.1	Determine or review available problem finding strategies in the organisation.
		1.2	Analyse the current selection and application of problem solving tools and gauge effectiveness.
		1.3	Determine preferred problem solving strategies for the organisation.
		1.4	Determine or review the desired outcomes from use of selected problem solving strategies.
		1.5	Review organisational structure to facilitate improvement in problem solving.
		1.6	Develop a training strategy to improve problem solving ability.
		1.7	Develop reporting framework and guidelines.
		1.8	Develop corrective action identification and tracking systems.
		1.9	Obtain support from relevant process/system owners for proposed changes.
2	**Improve problem solving ability**	2.1	Implement training strategy.
		2.2	Ensure problem solving occurs using groups or teams.
		2.3	Provide resources to ensure problem solving occurs.
		2.4	Confirm with teams and groups that training and resources deliver capability to solve complex problems.
		2.5	Monitor problem solving to determine if improvement in developing problem solving solutions is achieved.
		2.6	Provide resources to ensure solutions are implemented.
		2.7	Ensure reporting and corrective action tracking occurs.

© Commonwealth of Australia, 2025 Public Skills Australia

3	**Review problem solving effectiveness**	3.1	Review corrective action tracking.
		3.2	Determine benefit/cost from solutions.
		3.3	Analyse interactions of multiple problems with each other and the organisation.
		3.4	Review problem solving strategy.
		3.5	Make improvements to problem solving strategy and approach.

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Competitive systems and practices include one or more of:

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping

© Commonwealth of Australia, 2025 Public Skills Australia

	• problem solving • run charts • standard procedures • current reality tree.
Organisational structure review includes one or more of:	• operational and support functions and departments • links with value stream members • super-users and facilitators • roles and responsibilities with regard to problem solving • plans to broaden the users of problem solving approach • plans to improve the problem solving performance of personnel.
Problem finding strategies are used to identify one or more of:	• problems before they become obvious or cause significant non-conformance or risk • situations not initially considered a problem but which may be hindering greater performance • strategies for finding opportunities for improvement.
Complex problem includes one or more of:	• requires going into the value stream for data/information • is wider than just applying to a single job • applies to less common solutions or problems • requires a higher level of knowledge and skill • requires significant specialist knowledge • requires significant specialist skill • requires more theory/understanding of technology or process • data is not easily available and may need particular strategies to obtain • requires overcoming resistance from people including employees, customers or suppliers • requires extracting data not regularly reported from SCADA or similar systems • the problem and/or proposed solutions require reporting or authorisations from a Board or external authorities, such as licensing or regulatory bodies.
Effective solutions will include one or more of:	• prevent recurrence • be within the control/ability of the organisation to implement • meet organisation goals and objectives.
Required resources	• plant

© Commonwealth of Australia, 2025 Public Skills Australia

include one or more of:	• data processing equipment • measuring and diagnostic equipment • materials (e.g. raw materials, components, work in progress, other consumables, paper and forms in electronic or hard format) • energy (e.g. heating, cooling, fuel and power) • appropriately skilled people as employees and in the value stream • finances • feedback/visual operations resources • measuring equipment.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS408007A Develop problem solving capability of an organisation

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5b04f318-804f-4dc0-9463-c3fb9a3fe998

Assessment Requirements for MSS408007 Develop problem solving capability of an organisation

Modification History

Release 1. Supersedes and is equivalent to MSS408007A Develop problem solving capability of an organisation

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, across an organisation or department/section, to:

- analyse and improve problem finding capabilities of the organisation
- improve the problem solving capability of the organisation
- set key performance indicators (KPIs) for organisation problem solving
- ongoing review of systems and processes relevant to problem solving
- increase problem solving capability through identification of appropriate strategies.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to develop problem solving capabilities, including knowledge of:

- competitive systems and practices principles
- competitive systems and practices at both a strategic and tools level
- problem solving methodologies
- organisation strategy and vision
- value stream and value as defined by the organisation’s customers
- corrective action tracking methods.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.

© Commonwealth of Australia, 2025 Public Skills Australia

- Assessment should use a real project where the problem solving skills of individuals within their teams are developed in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

NWPCAD005 Monitor, inspect and report catchment areas

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to monitor, inspect and report catchment areas.

It includes monitoring flows, coordinating catchment areas and collecting data and samples. It also includes monitoring and adjusting regulatory systems, identifying and investigating catchment problems and producing reports.

This unit applies to field staff with a specific responsibility for inspecting, monitoring and reporting catchment areas. Those undertaking this unit would work under appropriate supervision while performing routine tasks ensuring minimum damage to the environment, in a familiar context. The level of responsibility may vary according to the size and complexity of the catchment area.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Catchment and Dams

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Inspect and monitor	**1.1** Identify and apply work requirements for undertaking

© Commonwealth of Australia, 2025 Public Skills Australia

	catchment areas		inspections of catchments and surrounding areas
		1.2	Schedule routine inspections of catchment areas to identify water quality risks
		1.3	Inspect and monitor designated locations according to work schedule and workplace procedures
		1.4	Inspect flow regulating systems and adjust to meet demand
		1.5	Select, fit and use safety equipment, including personal protective equipment
2	**Operate and report catchment conditions**	**2.1**	Measure and record catchment inflows and outflows or extractions
		2.2	Collect and record water samples according to sampling requirements
		2.3	Identify organisational guidelines for the condition and maintenance of catchment environment
		2.4	Identify changes to environmental conditions outside of normal parameters and report to relevant personnel for further action
3	**Assist in investigating hazards, risks and catchment security**	**3.1**	Identify and report activities within catchment posing a hazard or risk to the public, water quality or the environment
		3.2	Identify and report activities of external parties within catchment and surrounding area breaching organisational guidelines
		3.3	Check and confirm public concerns and report to relevant personnel
4	**Complete documentation**	**4.1**	Identify and collect catchment data
		4.2	Compile reports from catchment inspections according to workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPSOU012 Monitor, inspect and report catchment operations.

Assessment Requirements for NWPCAD005 Monitor, inspect and report catchment areas

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- assessing and reporting on the condition of the catchment area
- collecting samples
- completing documentation
- coordinating safety
- identifying and addressing risks and hazards
- identifying and reporting on flows into the catchment area
- identifying catchment faults
- inspecting and adjusting flow regulating systems
- inspecting and monitoring catchment areas
- inspecting catchment areas and identifying water quality risks
- measuring flow and capacity
- monitoring and integrating catchments processes
- monitoring and reporting organisational guideline breaches
- monitoring catchment and collecting and reporting catchment data
- monitoring flows
- organising pest eradication
- using safety equipment and personal protective equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- catchment layout and processes
- communication systems
- coordination processes
- effects of weather and conditions on operation of catchment areas
- environmental aspects of catchment areas
- inspection requirements of catchments

© Commonwealth of Australia, 2025 Public Skills Australia

- pest control specifications
- relevant by-laws and legislation
- relevant regulations and workplace procedures
- relevant water industry guidelines
- risk factors and potential hazards involved with catchment area processes, equipment operation, capacity and limitations

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPGEN007 Sample and test drinking water

Modification History

Release	Comments
1	This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages. • New unit • Created drawing upon information from deleted units NWP208A and NWP218B

Application

This unit describes the skills required to collect and prepare drinking water samples and to perform basic water quality tests. This unit does not include off-site laboratory testing.

This unit applies to those working in field operations in the water industry, but might be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, while performing routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

General

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

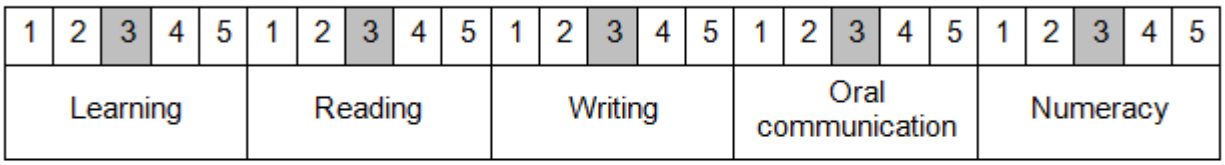
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for water quality sampling and testing	1.1 Receive instructions for taking samples and conducting basic water quality tests. 1.2 Confirm and record samples and tests to comply with requirements. 1.3 Select, check and prepare equipment and resources. 1.4 Select and apply relevant sample preservation methods. 1.5 Select, fit and use personal protective equipment.
2. Conduct water quality sampling and testing	2.1 Adopt hygienic work practices. 2.2 Collect samples ensuring that types, locations and times comply with requirements. 2.3 Prepare samples for off-site laboratory testing according to requirements. 2.4 Maintain integrity of samples during sampling and on-site testing. 2.5 Conduct basic on-site water quality tests. 2.6 Assess and report abnormal characteristics and apply incident management principles. 2.7 Record samples and results of on-site analysis. 2.8 Limit hazards and contamination to self, work area and environment.
3. Finalise work	3.1 Apply chain of custody principles. 3.2 Report observations or measurements requiring further action. 3.3 Dispose of samples and clean and store test equipment. 3.4 Clear and restore work area.

Foundation Skills

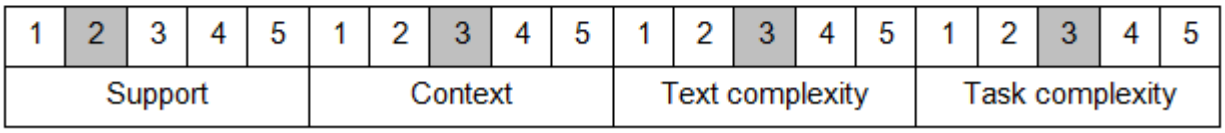
The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia

ACSF levels indicative of performance:



Performance variables:



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Range of Conditions

Types of sampling conditions includes:	• physical • microbial • chemical • radiological
On-site tests include:	• turbidity • pH • dissolved oxygen • electrical conductivity • chlorine • temperature • colour
Types of sampling areas include:	• surface • ground • drinking • seawater

Unit Mapping Information

No equivalent unit.

Assessment Requirements for NWPGEN007 Sample and test drinking water

Modification History

Release	Comments
1	These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. To be deemed competent the candidate must be assessed in a minimum of three of the types of tests, one of the types of conditions and one of the areas of sampling listed in the Range of Conditions. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- calibrating testing equipment
- interpreting sampling and testing requirements
- preparing, checking and using equipment
- assessing risks
- preparing, collecting, labelling and preserving water samples
- disposing of waste and spent samples
- planning and preparing for water sampling tasks
- recording all required information

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- chain of custody
- range and purpose of basic water quality testing and sampling
- relevant policies and procedures
- blind sampling
- abnormal characteristics of water samples
- atypical test result data
- relevant work-related calculations
- maintenance and storage of reagents
- requirements for maintaining sample integrity

© Commonwealth of Australia, 2025 Public Skills Australia

- relevant legislative and organisational requirements
- water sample preparation
- work planning processes
- effects of weather and conditions on work
- hazards associated with collection of water samples
- incident management principles

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPGEN022 Perform laboratory testing

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to perform laboratory testing.

It includes performing laboratory tests using standard methods and procedures, using and calibrating equipment and preserving the integrity of samples. It also includes performing calculations and identifying and reporting discrepancies.

This unit applies to those working in industry under appropriate supervision, while performing complex tasks in a range of contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

General

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare samples for testing	**1.1** Register and record laboratory samples, ensuring required information is transcribed accurately and legibly

© Commonwealth of Australia, 2025 Public Skills Australia

		1.2	Identify samples to be tested, appropriate test method, equipment and safety requirements
		1.3	Maintain integrity of samples during sub-sampling as per workplace procedures
		1.4	Assess and report abnormal characteristics to relevant personnel
2	**Prepare for laboratory testing**	**2.1**	Set up test equipment according to appropriate test method and workplace procedures
		2.2	Conduct pre-use and safety checks on test equipment according to workplace procedures
		2.3	Identify and report faulty or unsafe equipment to relevant personnel
		2.4	Check the calibration status of equipment and conduct calibration or report calibration requirements to relevant personnel
3	**Perform tests on samples**	**3.1**	Preserve the integrity of sub-samples and eliminate the possibility of cross-contamination
		3.2	Identify, prepare and weigh or measure sample to be tested
		3.3	Follow test methods and perform sequence of tests using safety equipment and verification standards
		3.4	Use calculations to determine results of tests
		3.5	Shut down, clean and store equipment according to manufacturer instructions and workplace procedures
		3.6	Store unused reagents and dispose of wastes as required by relevant legislation, regulations and codes of practice
4	**Finalise work**	**4.1**	Apply chain of custody principles to laboratory testing
		4.2	Record results and complete relevant documentation
		4.3	Identify and report discrepancies requiring further action to relevant personnel
		4.4	Clear and restore work area according to workplace procedures

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPGEN009 Perform laboratory testing

Assessment Requirements for NWPGEN022 Perform laboratory testing

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- comparing sample description with the specification, recording results and reporting discrepancies
- calculating and recording test results
- interpreting laboratory test methods
- limiting hazards and contamination to self, work area and environment
- performing at least two types of sample preparations for the following:
  - digestion
  - dilution
  - filtration
  - heating/cooling
  - mixing/agitation
  - neutralisation/ quenching
  - sub sampling
- performing sub-sample and testing products
- producing laboratory reports
- registering and preserving samples
- selecting the correct equipment and checking equipment performance
- using laboratory safety equipment and personal protective equipment
- using the following laboratory equipment including:
  - gravimetric
  - potentiometric
  - spectrophotometric
  - volumetric

Knowledge Evidence

- calibration and pre-use equipment checks
- reference, standards or buffers

© Commonwealth of Australia, 2025 Public Skills Australia

- principles of the standard methods for laboratory analysis
- procedures for recognition of unexpected or unusual results and likely causes
- purpose of tests
- relevant legislation, regulations and workplace procedures
- relevant workplace procedures for sampling and testing
- safety data sheets
- source of uncertainty in measurements and methods for control

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPTRT005 Monitor and operate water treatment processes

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to monitor and operate water treatment processes.

It includes reporting on water treatment plant system performance and processing quality control. It also includes operating water treatment processes, and complying with relevant legislation, regulations and guidelines.

This unit applies to operational staff in water treatment plants with responsibility for the practical and safe operation of plant, equipment and processes. Those undertaking this unit would work under appropriate supervision, while performing routine tasks, within a familiar context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Treatment

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for work	**1.1** Determine work requirements from job specifications and plans

© Commonwealth of Australia, 2025 Public Skills Australia

		1.2	Select and check equipment required to meet safety requirements of task and worksite
		1.3	Select, fit and use required safety equipment, including personal protective equipment (PPE)
2	**Monitor and operate treatment processes**	**2.1**	Inspect plant according to workplace procedures
		2.2	Collect process samples and conduct standard tests according to workplace procedures
		2.3	Operate treatment processes according to workplace procedures
		2.4	Perform adjustments to enhance system performance
3	**Complete documentation**	**3.1**	Collect, record and complete process data according to workplace procedures
		3.2	Identify and report observations outside defined parameters to relevant personnel for further action

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPTRT001 Operate and control water treatment processes.

Assessment Requirements for NWPTRT005 Monitor and operate water treatment processes

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- applying workplace procedures
- collecting and labelling samples
- collecting and recording data
- completing documentation
- conducting routine plant inspections
- performing disinfection processes
- performing water treatment separation processes
- preparing and applying chemical dosing.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- demands and uses of water, both domestic and industrial
- interpreting safety data sheets
- physical, chemical and microbiological characteristics of water
- post-treatment processes
- pre-treatment processes
- reasons for water treatment

- water cycle.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPTRT022 Monitor and operate hypochlorite disinfection processes

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to monitor and operate hypochlorite disinfection processes.

It includes monitoring hypochlorite disinfection systems and reporting on process quality control. It also includes working safely with, transporting and storing sodium hypochlorite solution or calcium hypochlorite solids and implementing emergency response procedures.

This unit applies to operational staff with specific responsibility for hypochlorite disinfection systems in water or wastewater treatment plants. Those undertaking this unit would work under appropriate supervision, while performing routine tasks, in a range of familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Treatment

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for work	**1.1** Determine work requirements from job specifications

			and plans
		1.2	Select and check equipment and hypochlorite supplies to meet safety requirements of task and worksite
		1.3	Select, fit and use required safety equipment, including personal protective equipment (PPE)
		1.4	Handle and store hypochlorite chemicals to maximise shelf life and reduce loss of available chlorine
		1.5	Conduct the percentage available chlorine test according to workplace procedures
2	**Monitor processes**	**2.1**	Monitor hypochlorite disinfection processes according to workplace procedures
		2.2	Collect process samples and conduct standard tests according to workplace procedures
		2.3	Make process adjustments to maintain effectiveness of hypochlorite disinfection
		2.4	Monitor the parameter set points for critical control points and operational control points
3	**Apply chemical dosing**	**3.1**	Prepare and apply hypochlorite chemicals
		3.2	Control hypochlorite dosing to maintain required chlorine residual
4	**Complete documentation**	**4.1**	Maintain information relating to hypochlorite supply and usage
		4.2	Collect, record and complete process data according to workplace procedures and process requirements
		4.3	Identify data outside of normal operational parameters and report to relevant personnel for further action

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for NWPTRT022 Monitor and operate hypochlorite disinfection processes

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- collecting and reporting process data
- identifying and responding to process faults
- identifying hazards
- interpreting and following safety data sheets
- monitoring, operating and reporting on hypochlorite disinfection systems
- performing at least one of the following concentration tests:
  - calcium hypochlorite
  - sodium hypochlorite solution
- performing chlorine residual sampling and testing
- performing process calculations including at least one of the following:
  - Ct calculation dosage
  - feed rate
- preparing and applying hypochlorite dosing safely
- selecting and using appropriate tools and equipment, including personal protective equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- automatic feed rate control systems
- breakpoint
- chlorine demands including:
  - ammonia
  - iron, manganese and nitrite
  - natural organic matter (NOM)
  - turbidity
- contact time
- disinfection by-products (DBP)

© Commonwealth of Australia, 2025 Public Skills Australia

- effects of pH, time, temperature, UV exposure and impurities on hypochlorite breakdown
- hypochlorite dosing system layout for sodium hypochlorite or calcium hypochlorite dosing systems
- impact of pH
- microbiological guidelines
- properties and chemistry of hypochlorite chemicals
- reactions with water to produce hypochlorous acid/hypochlorite ion
- relevant legislation, regulations and workplace procedures
- risk factors and potential hazards associated with hypo chlorination
- safety data sheets

Assessment Conditions

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPTRT027 Monitor and operate wastewater treatment processes

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to operate and control wastewater processes.

It includes monitoring and operating wastewater treatment plants, reporting system performance and process quality control. It also includes ensuring wastewater disposal or re-use meets state or territory legislative requirements.

This unit applies to operational staff in wastewater treatment plants with responsibility for the practical and safe operation of plant, equipment and processes. Those undertaking this unit would work under appropriate supervision, performing routine tasks within a familiar context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Treatment

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for work	**1.1** Determine work requirements from job specifications and plans

Assessment Requirements for NWPTRT027 Monitor and operate wastewater treatment processes

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- applying workplace procedures
- completing documentation
- conducting routine plant inspections
- operating and adjusting at least one of the following processes:
  - primary treatment
  - secondary treatment
  - tertiary treatment
  - solids management
- taking samples and performing standard tests

Knowledge Evidence

- chemical and biological principles of wastewater treatment
- hydraulics and organic loading in wastewater plants
- physical, chemical and microbiological characteristics of wastewater treatment
- preliminary treatment, primary treatment, secondary treatment, tertiary treatment and solids management
- reasons for wastewater treatment
- relevant workplace procedures, guidelines and industry standards
- state or territory legislative requirements for wastewater treatment processes
- risk factors and potential hazards relating to wastewater treatment
- sources of wastewater
- types of components
- water cycle

NWPTRT029 Monitor and operate pre-treatment processes

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to monitor and operate pre-treatment processes.

It includes reporting on pre-treatment processes, separation processes, screens and grit removal used in municipal, industrial or domestic treatment plants prior to further treatment.

This unit applies to operational staff with specific responsibility for pre-treatment processes. Those undertaking this unit would work under appropriate supervision while performing routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for NWPTRT029 Monitor and operate pre-treatment processes

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- applying workplace procedures
- collecting and labelling samples
- collecting and recording data
- identifying faults and operational problems
- operating and adjusting at least one of the following processes:
  - chemical additions
  - chemical usage
  - dissolved oxygen levels
  - flow control
  - plant performance data
  - screen rotation frequency
  - solids removal
- preparing for work

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- control systems
- equipment operation, capacity and limitations
- impacts of variable flows
- plant layout
- principles of and need for effective pre-treatment
- relevant legislation and regulations
- risk factors and potential hazards relating to treatment
- workplace policies and procedures applied to pre-treatment processes

PMAOPS101 Read dials and indicators

Modification History

Release 1. Supersedes and is equivalent to PMAOPS101C Read dials and indicators

Application

This unit of competency covers the skills and knowledge required to make readings and/or take measurements using common types of plant instrumentation.

This unit of competency applies to operators who are required to identify the units and scales to use, perform the measurements and record the results in prescribed format, level of detail and according to procedures.

This unit of competency applies to reading process instrumentation in any plant or related situation. Readings may need to be made at heights, in wet or restricted conditions, or close to hot or moving equipment and across sites and plants.

In a typical scenario an operator patrols the plant taking a range of readings to complete logs and check on the operation of the plant. The operator needs to interpret the display on the instrument and record the appropriate reading. As part of this process, they will need to check that the instrument is within calibration (where appropriate) and make a judgement as to whether the reading is 'reasonable' or whether some action needs to be taken.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Contribute to controlling hazards in work area**	1.1	Identify hazards in work area
		1.2	Take appropriate action to control risks according to procedures
2	**Identify appropriate measuring device readings**	2.1	Confirm the calibration of the measuring device, where appropriate
		2.2	Select appropriate units on the measuring device
		2.3	Select appropriate scales on the measuring device
3	**Perform measurements**	3.1	Identify the range of results that could be obtained
		3.2	Identify and take account of relevant external factors
		3.3	Perform measurements using appropriate techniques
		3.4	Identify measurements outside the range of expected results
		3.5	Take action on measurements outside expected range according to procedures
4	**Record results**	4.1	Record readings accurately in the appropriate format
		4.2	Record the results to the appropriate level of detail

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Hazards

Hazards include one or more of the following:

- smoke, darkness and heat
- dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- plant services (steam, condensate and cooling water)
- limited head spaces or overhangs
- working at heights, in restricted or confined spaces, or in environments subjected to heat, dusts, smoke, vapours or other atmospheric hazards
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

© Commonwealth of Australia, 2025 Public Skills Australia

Dials and indicators

Dials and indicators include one or more of the following:

- analogue dials, such as:
- pressure gauge
- rev counter
- temperature dial
- digital readouts, such as:
- pH meter
- temperature probe
- ammeter
- flow meter
- weigh scales

Calibration checks

Calibration checks include one or more of the following:

- checking the date that the next calibration is required (e.g. weigh scale and pressure gauge)
- using a calibration button on the instrument (e.g. zero button on an ammeter and calibration button on an electronic meter)

Problems

Problems must be reported and corrective action taken according to relevant procedures.

Problems include one or more of the following:

- measuring instrument not fit for use (e.g. not within calibration)
- appropriate measuring device not available
- deviations from normal range of readings
- effect of temperature on material properties

Corrective actions include one or more of the following:

- reporting to an appropriate person
- taking action specified in the procedure

Appropriate personnel

Appropriate personnel include one or more of the following:

- supervisor
- more senior operator
- other designated personnel

© Commonwealth of Australia, 2025 Public Skills Australia

Procedures All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Unit Mapping Information

Release 1. Supersedes and is equivalent to PMAOPS101C Read dials and indicators

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=9fc2cf53-e570-4e9f-ad6a-b228ffdb6875

Assessment Requirements for PMAOPS101 Read dials and indicators

Modification History

Release 1. Supersedes and is equivalent to PMAOPS101C Read dials and indicators

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include the ability to:

- accurately perform and record measurements according to procedures
- recognise readings which are out of range or unusual and take action according to procedures
- identify hazard and control risks
- check accuracy of own work and complete workplace forms.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- basic units of measurement and where they apply
- types and application of measuring devices typically used in the job/work environment and problems that can arise
- graphs and scales relevant to the readings being taken
- organisation procedures relevant to the readings being taken
- hazards that may arise in the job/work environment, and:
  - their possible causes
  - potential consequences
  - relevant controls.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of an operating plant
  - will typically include a supervisor/third-party report or other evidence, focusing on consistent performance and problem recognition and solving. A supervisor/third party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency

© Commonwealth of Australia, 2025 Public Skills Australia

  - must include the use of an appropriate industrial item of equipment
  - may use industry-based simulation for all or part of the unit where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- In addition, the assessor or anyone acting in subject matter expert role in assessment must demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they must assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
  - relevant VET or other qualification/Statement of Attainment
  - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
  - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
- Currency can be demonstrated through one or more of:
  - being currently employed undertaking the type of work being assessed

© Commonwealth of Australia, 2025 Public Skills Australia

- being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
- having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
- conducting on-the-job training/assessments of the type of work being assessed
- being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work

PMAOPS105 Select and prepare materials

Modification History

Release 1. Supersedes and is equivalent to PMAOPS105C Select and prepare materials

Application

This unit of competency covers the skills and knowledge required to select and prepare materials for use in production processes.

This unit of competency applies to operators who are required to find the right materials, check them, measure and prepare them, if required, and deliver the materials to the process in the right condition.

A typical application of this unit of competency could be an operator preparing a range of chemicals or other substances for use in a batch process. The operator would visually inspect each item for deterioration or damage, and follow procedures to prepare materials. Once prepared, the operator would then assemble the materials for supply to production areas.

This competency applies where mixing, grinding, testing, etc are an incidental part of preparing materials for use in production.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Identify and locate materials**	1.1	Identify material requirements correctly from documentation
		1.2	Identify type, quantity and quality of materials
		1.3	Identify material hazards and handling procedures
		1.4	Locate and check materials to procedures
		1.5	Confirm availability of required quantity of materials
		1.6	Note and report material shortages
2	**Contribute to controlling hazards**	2.1	Identify other hazards in work area
		2.2	Take action to control material hazards as per documentation
		2.3	Take appropriate action to control other hazards in the workplace
3	**Measure quantity of materials**	3.1	Identify measuring requirements and select appropriate measuring equipment
		3.2	Measure and assemble required quantities
		3.3	Check material quantities required
		3.4	Complete required documentation and labelling
		3.5	Deliver materials to correct location
4	**Prepare materials as required**	4.1	Check that hoppers, bins and holding tanks are free from contamination
		4.2	Identify classes of compatible and incompatible chemicals
		4.3	Prepare materials to procedures
5	**Store assembled materials**	5.1	Identify the storage conditions required for the main classes of chemicals

© Commonwealth of Australia, 2025 Public Skills Australia

		5.2	Identify materials that have special storage requirements
		5.3	Store and supply materials
6	**Dispose of waste materials**	6.1	Correctly identify waste materials
		6.2	Dispose of materials to procedures and work health and safety (WHS) and environmental requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

Materials preparation

Materials preparation includes one or more of the following:

- pre-production measuring, assembling and identification of materials
- warming to melt waxy or other materials
- breaking up solid materials into pieces or smaller lumps
- passing materials through an in-line delumper

© Commonwealth of Australia, 2025 Public Skills Australia

- blending a powder or liquid into a solution prior to use in the process
- blending powders prior to production
- dilution of solutions
- preparation of a solution for dosing into a process

Materials

Materials include one or more of the following:

- raw materials
- packaging materials
- consumables

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Equipment

Equipment includes one or more of the following:

- buckets
- stirring paddle
- propeller or drum mixers
- delumpers
- hammers or axes
- measuring equipment, including scales, flow meters and graduated vessels
- hard hats
- goggles/glasses/face shields
- hearing protection (ear muffs and plugs)
- dusk masks/canister masks/self contained breathing apparatus (SCBA)/long range breathers
- gloves/gauntlets

© Commonwealth of Australia, 2025 Public Skills Australia

- safety boots
- antistatic equipment
- overalls/aprons/acid jackets/pants
- handling aids
- other safety equipment

Material hazards and handling procedures

Material hazards and handling procedures include one or more of the following:

- labels
- safety data sheets (SDS)
- verbal direction from supervisor or other person
- other standard sources, such as:
  - enterprise procedures
  - HAZCHEM symbols and codes
  - spill containment and disposal procedures

Hazards

Hazards include one or more of the following:

- smoke, darkness and heat
- dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- plant services (steam, condensate and cooling water)
- limited head spaces or overhangs
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours or other atmospheric hazards
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

Assessment Requirements for PMAOPS105 Select and prepare materials

Modification History

Release 1. Supersedes and is equivalent to PMAOPS105C Select and prepare materials

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include the ability to:

- identify job requirements and safe work procedures
- identify and operate equipment
- identify hazards and apply hazard control procedures
- complete required workplace forms
- communicate with team and supervisors
- measure and prepare materials to meet requirements
- identify and dispose of waste materials according to work health and safety (WHS) and environmental requirements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- types and application of measuring equipment relevant to job/work environment
- classes of compatible and incompatible chemicals and implications in job/work environment
- types of materials in plant and their storage requirements
- routes of entry of chemicals to the body (basic only)
- procedures for safe handling and storage of chemicals and hazardous substances relevant to job/work environment
- types and application of personal protective equipment (PPE) relevant to job/work environment
- labelling requirements (dangerous goods codes, classification numbers and packaging group numbers)
- HAZCHEM symbols and codes relevant to the job/work environment
- organisation procedures relevant to job/work environment
- hazards that may arise in the job/work environment, and:
  - their possible causes
  - potential consequences
  - appropriate risk controls
- environmental requirements related to waste disposal.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of an operating plant
  - will typically include a supervisor/third-party report or other evidence, focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of an appropriate industrial item of equipment
  - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from demonstration of skills and one or more of:
  - walk-throughs
  - pilot plant operation
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- In addition, the assessor or anyone acting in subject matter expert role in assessment must demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they must assess with a subject matter expert who does meet these requirements.

© Commonwealth of Australia, 2025 Public Skills Australia

- Technical competence can be demonstrated through one or more of:
  - relevant VET or other qualification/Statement of Attainment
  - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
  - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
- Currency can be demonstrated through one or more of:
  - being currently employed undertaking the type of work being assessed
  - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
  - having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
  - conducting on-the-job training/assessments of the type of work being assessed
  - being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work

PMAOPS201 Operate fluid flow equipment

Modification History

Release 1. Supersedes and is equivalent to PMAOPS201B Operate fluid flow equipment

Application

This unit of competency covers the skills and knowledge required to operate pumps and valves and other fluid flow equipment in a processing plant.

This unit of competency applies to operators who are required to identify, operate, monitor and troubleshoot the pumps and valves and contribute to a safe working environment. It is typically performed by all operators in a processing plant.

This unit of competency applies to an individual who may work alone although under routine direction and supervision. They may work as part of a team or group and will work in liaison with other shift team members and the control room operator, as appropriate.

In a typical scenario, an operator uses a number of general purpose pumps, piping and valves to move liquids from a storage tank area into the processing plant, within and between plant units, to the finished goods tanks. The operator utilises in-line mixers, strainers and filters, valves, controls and meters to complete this work.

This competency covers all general duty pumps, their associated drivers (motors) and valves. The effect of pipe fittings on pump performance and problems/problem analysis is also included.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Prepare for work**	1.1	Receive and give shift handover
		1.2	Identify work requirements
		1.3	Identify and control hazards
		1.4	Coordinate with appropriate personnel
		1.5	Check for recent work undertaken on plant item
		1.6	Note any outstanding/incomplete work
		1.7	Check operational status of fluid flow equipment
2	**Operate pumps**	2.1	Identify the type of pump
		2.2	Start up and shut down pump as required
		2.3	Adjust flow and head/pressure as appropriate to type of pump
		2.4	Complete routine checks and reports and take appropriate action as required
3	**Operate pump drivers**	3.1	Monitor critical variables such as amps, temperature and vibration
		3.2	Keep critical variables in range
		3.3	Recognise trends/patterns which indicate a potential or actual problem with the pump driver
		3.4	Take action to ensure driver as required
4	**Operate valves**	4.1	Identify the type of valve
		4.2	Operate valve in a manner appropriate to the valve type

© Commonwealth of Australia, 2025 Public Skills Australia

		4.3	Complete routine checks and reports and take appropriate action as required
5	**Recognise and take appropriate action on abnormal fluid system situations**	5.1	Monitor fluid flow system frequently and critically throughout shift using measured/indicated data and smell, sight, sound and feel as appropriate
		5.2	Identify impacts of any changes upstream and downstream
		5.3	Recognise situations which may require action
		5.4	Resolve routine problems
		5.5	Take actions on other abnormal situations to make safe and have the situation resolved
6	**Isolate and de-isolate equipment**	6.1	Complete any required pre-start checks
		6.2	Start up/shut down/changeover fluid flow equipment according to the equipment type and duty in liaison with other personnel
		6.3	Isolate equipment
		6.4	Make safe for required work
		6.5	Check plant is ready to be returned to service
		6.6	De-isolate and prepare plant for return to service

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Equipment

Equipment includes one or more of the following:

- pumps (various types of centrifugal and positive displacement)
- valves, such as globe, needle, gate, butterfly, plug cock, wedge plug, ball cock, non-return, diaphragm, pneumatic globe and pneumatic butterfly)
- piping systems and components, including bends and elbows, tee

© Commonwealth of Australia, 2025 Public Skills Australia

pieces, expansion mechanisms, pipe joints, reducers, nipples, orifices, in-line mixers, filters and strainers, flexible hoses and couplings
- shaft seals, such as stuffing boxes, mechanical seals, fluid seals and labyrinth seals

Routine problems

Routine problems must be resolved by applying known solutions.

Routine problems are predictable and include one or more of the following:

- cavitation
- seal leaks
- head loss/low flow
- bearing problems

Known solutions are drawn from one or more of the following:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to according to relevant procedures.

Responding to abnormal situations

Responding to abnormal situations includes the following:

- determining problems needing action
- determining possible fault causes
- rectifying problem using appropriate solution within area of responsibility
- following through items initiated until final resolution has occurred
- reporting problems outside area of responsibility to designated person

Operate

Operate is to monitor, adjust/change the plant item/unit/system to meet specifications, by one or more of the following:

- manually in the plant
- using local controller in the plant

Hazards

Hazards include one or more of the following:

- smoke, darkness and heat

© Commonwealth of Australia, 2025 Public Skills Australia

- dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- plant services (steam, condensate and cooling water)
- limited head spaces or overhangs
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours or other atmospheric hazards
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

Start up/shut down as required

Start up/shut down as required includes the following:

- start up and shut down to/from normal operating conditions
- start up and shut down to/from isolated, cold or empty
- start up and shut down to/from other conditions/situations experienced on the plant

Unit Mapping Information

Assessment Requirements for PMAOPS201 Operate fluid flow equipment

Modification History

Release 1. Supersedes and is equivalent to PMAOPS201B Operate fluid flow equipment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include the ability to:

- apply pre-start, start-up and shutdown procedures
- monitor and operate fluid flow equipment to meet specifications
- recognise early warning signs of equipment/processes needing attention or with potential problems
- determine the most likely cause of routine problems
- take appropriate action to ensure a timely return to full performance
- isolate and de-isolate equipment
- identify hazards and apply hazard control procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- principles of operation of fluid flow equipment
- plant process idiosyncrasies
- physics relevant to fluid flow equipment
- process parameters and limits
- all items on a schematic of the fluid flow system and the function of each
- correct methods of starting, stopping, operating and controlling flow
- relevant alarms and actions
- routine problems, faults and their resolution
- function and troubleshooting of major internal components of pumps and valves and their typical problems.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The assessment must include at least:
  - one (1) type of centrifugal pump, and
  - one (1) type of positive displacement pump, and
  - two (2) different types of valves.

© Commonwealth of Australia, 2025 Public Skills Australia

- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of an operating plant
  - will typically include a supervisor/third-party report or other evidence, focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of an appropriate industrial item of equipment requiring demonstration of operation, start-up and shutdown procedures and responding to problems
  - may use industry-based simulation for part only of the unit where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- In addition, the assessor or anyone acting in subject matter expert role in assessment must demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they must assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:

© Commonwealth of Australia, 2025 Public Skills Australia

  - relevant VET or other qualification/Statement of Attainment
  - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
  - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
- Currency can be demonstrated through one or more of:
  - being currently employed undertaking the type of work being assessed
  - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
  - having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
  - conducting on-the-job training/assessments of the type of work being assessed
  - being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work

PMAOPS204 Select and use utilities and services

Modification History

Release 1. Supersedes and is equivalent to PMAOPS204B Use utilities and services

Application

This unit of competency covers skills and knowledge required to select and use a range of utilities and services in the plant.

This unit of competency applies to operators who are required to select the appropriate utility/service from those provided to the plant and recognise and respond to operational problems.

This unit of competency applies to an individual who may work alone although under routine direction and supervision. They may work as part of a team or group and will work in liaison with other shift team members and the control room operator, as appropriate.

In a typical scenario an operator will be able to identify and select utilities and services used on a day-to-day basis. These will be provided to a process plant and will consist of instrument and plant air, nitrogen, plant water, steam, flushing oil and other utilities/services required for a particular process. The operator uses these utilities/services as required. The correct use and application of these substances is essential to plant and operator safety and the continued performance of the process.

This unit of competency applies to any/all service utilities which form part of the utility system for the plant, typically:

- steam (saturated and superheated)
- air (process, instrument and breathable)
- water (cooling, boiler feed, plant and waste)
- inert atmosphere (nitrogen and carbon dioxide)
- flushing oil.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for PMAOPS204 Select and use utilities and services

Modification History

Release 1. Supersedes and is equivalent to PMAOPS204B Use utilities and services

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include the ability to:

- select the required utility/service
- recognise early warning signs of equipment/processes needing attention or with potential problems
- determine the most likely cause of routine problems
- take appropriate action to ensure a timely return to full performance
- isolate the causes of problems to an item of equipment within the production system and to distinguish between causes of problems/alarm/fault indications, such as:
  - instrument failure/malfunction
  - electrical failure/malfunction
  - mechanical failure/malfunction
  - variations in product parameters (temperature, flows, pressure and levels)
- identify hazards and apply hazard control procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- all items on a schematic of the utilities system and the function of each
- differences between grades/types of services (e.g. grades of steam, air and nitrogen)
- differences in use and methods between each service and utility
- hazards that may arise in the job/work environment, and:
  - their possible causes
  - potential consequences
  - appropriate risk controls
- physics and chemistry relevant to the utility and its use
- process parameters and limits, including temperature, pressure, flow and pH
- routine problems, faults and their resolution
- relevant alarms and actions
- types and causes of utility problems within operator's scope of skill level and responsibility.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of an operating plant
  - will typically include a supervisor/third-party report or other evidence, focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of an appropriate industrial item of equipment requiring selection and use of utilities and services and responding to problems
  - may use industry-based simulation for part only of the unit where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

© Commonwealth of Australia, 2025 Public Skills Australia

- In addition, the assessor or anyone acting in subject matter expert role in assessment must demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they must assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
  - relevant VET or other qualification/Statement of Attainment
  - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
  - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
- Currency can be demonstrated through one or more of:
  - being currently employed undertaking the type of work being assessed
  - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
  - having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
  - conducting on-the-job training/assessments of the type of work being assessed
  - being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work

PMAOPS205 Operate heat exchangers

Modification History

Release 1. Supersedes and is equivalent to PMAOPS205B Operate heat exchangers

Application

This unit of competency covers the skills and knowledge required to operate heat exchangers.

This unit of competency applies to operators who are required start up and shut down heat exchangers in accordance with procedures, make adjustments to flow rate, temperature and pressure, as required, and solve heat exchanger problems.

This unit of competency applies to an individual who may work alone although under routine direction and supervision. They may work as part of a team or group and will work in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all heat exchangers, examples include:

- plate
- Utube
- spiral
- bayonet
- air cooled fin
- shell and tube (all variants of design)
- scraped surface
- vessel jackets/coils.

This unit of competency does not cover superheaters or waste heat boilers, which are treated as part of steam generating equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Operations

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Prepare for work**	1.1	Receive and give shift handover
		1.2	Identify work requirements
		1.3	Identify and control hazards
		1.4	Coordinate with appropriate personnel
		1.5	Check for recent work undertaken on plant item
		1.6	Note any outstanding/incomplete work
		1.7	Check operational status of heat exchanger
2	**Operate heat exchangers in accordance with procedures**	2.1	Identify the type of heat exchanger and duty
		2.2	Adjust flow rates, temperatures and pressure as appropriate to type of heat exchanger and duty
		2.3	Complete routine checks, logs and paperwork, taking action on unexpected readings and trends
3	**Recognise and take action on abnormal situations in accordance with procedures**	3.1	Monitor heat exchanger frequently and critically throughout shift using measured/indicated data and senses
		3.2	Identify impacts of any changes upstream and downstream
		3.3	Recognise situations which may require action
		3.4	Resolve routine problems
		3.5	Take actions on other abnormal situations to make safe

© Commonwealth of Australia, 2025 Public Skills Australia

			and have the situation resolved
4	**Isolate and de-isolate equipment**	4.1	Complete any required pre-start checks
		4.2	Start up/shut down/changeover heat exchanger according to the plant type and duty in liaison with other personnel
		4.3	Isolate plant
		4.4	Make safe for required work
		4.5	Check plant is ready to be returned to service
		4.6	De-isolate and prepare plant for return to service

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through

© Commonwealth of Australia, 2025 Public Skills Australia

state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Hazards

Hazards include one or more of the following:

- dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- plant services (steam, condensate and cooling water)
- limited head spaces or overhangs
- working at heights, in restricted or confined spaces, or in environments subjected to heat, dusts or vapours
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

© Commonwealth of Australia, 2025 Public Skills Australia

Heat exchanger duties

Heat exchanger duties include a minimum of one of the following:

- heating
- cooling
- cryogenic
- reboilers
- condensers
- gas dryers
- gas coolers
- refrigeration (evaporators/condensers)

Routine problems

Routine problems must be resolved by applying known solutions.

Routine problems are predictable and include one or more of the following:

- damage to heat exchanger due to overheating and/or under/over pressurising
- factors that affect heat exchanger efficiency (scale build-up, fouling, internal leakage, air lock, turbulence and corrosion)
- leakage or gasket problems
- recognising when maintenance is required

Known solutions are drawn from one or more of the following:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to according to relevant procedures.

Start up/shut down as required

Start up/shut down as required includes:

- start up and shut down to/from normal operating conditions
- start up and shut down to/from isolated, cold or empty
- start up and shut down to/from other conditions/situations experienced on the plant

Resolve routine problems

Resolving routine problems includes one or more of the following:

- making adjustments
- carrying out minor maintenance
- identifying and reporting problems outside operator's scope of

© Commonwealth of Australia, 2025 Public Skills Australia

responsibility
- identifying and controlling hazards related to heat exchangers and their integral equipment, including pressure vessels

Action Action in accordance with procedures includes the following:

- determining problems needing action
- determining possible fault causes
- rectifying problem using appropriate solution within area of responsibility
- following through items initiated until final resolution has occurred
- reporting problems outside area of responsibility to designated person

Operate Operate is to monitor, adjust/change the plant item/unit/system to meet specifications, by one or more of the following:

- manually in the plant
- using local controller in the plant
- using the process control system in the control room

Unit Mapping Information

Release 1. Supersedes and is equivalent to PMAOPS205B Operate heat exchangers

Assessment Requirements for PMAOPS205 Operate heat exchangers

Modification History

Release 1. Supersedes and is equivalent to PMAOPS205B Operate heat exchangers

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to:

- start up and shut down heat exchangers
- monitor and operate heat exchange equipment to meet specifications
- recognise early warning signs of equipment/processes needing attention or with potential problems
- determine the most likely cause of routine problems
- take appropriate action to ensure a timely return to full performance
- isolate and de-isolate equipment
- identify hazards and apply hazard control procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- all items on a schematic of the heat exchanger system and the function of each
- principles of operation of heat exchangers
- correct methods of starting, operating and shutting down heat exchangers
- physics and chemistry relevant to the process unit
- process parameters and limits, including temperature, pressure, flow and pH
- routine problems, faults and their resolution
- relevant alarms and actions
- plant process idiosyncrasies
- causes of head loss and change in heat transfer coefficient/rates
- corrective action appropriate to the problem cause
- function and troubleshooting of major internal components, including tubes and baffles, and typical problems
- hazards that may arise in the job/work environment, and:
  - their possible causes
  - potential consequences
  - appropriate risk controls.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of an operating plant
  - will typically include a supervisor/third-party report or other evidence, focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of an appropriate industrial item of equipment requiring demonstration of operation, start-up and shutdown procedures and responding to problems
  - may use industry-based simulation for part only of the unit where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

© Commonwealth of Australia, 2025 Public Skills Australia

- In addition, the assessor or anyone acting in subject matter expert role in assessment must demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they must assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
  - relevant VET or other qualification/Statement of Attainment
  - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
  - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
- Currency can be demonstrated through one or more of:
  - being currently employed undertaking the type of work being assessed
  - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
  - having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
  - conducting on-the-job training/assessments of the type of work being assessed
  - being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work

PMAOPS216 Operate local control system

Modification History

Release 1. Supersedes and is equivalent to PMAOPS216B Operate local control system

Application

This unit of competency covers the skills and knowledge required to operate a local control panel.

These controllers use simple control algorithms and only a limited number of control loops. Typically it will be located on the plant, but may be located off-plant. This unit of competency also applies to simple panels in a control room which are not part of the main control panel.

This unit of competency applies to operators who are required to start up and shut down equipment using the local control system; monitor and control process variables, such as temperature or pressure; operate valves and pumps to add raw materials and/or additives; and discharge product.

The operator is expected to be capable of performing all parts of this unit of competency. Generally the operator would be part of a team during start-up and shutdown procedures. At all times they would be liaising and cooperating with other members of the team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Prepare for work**	1.1	Receive and give shift handover
		1.2	Identify work requirements
		1.3	Identify and control hazards
		1.4	Coordinate with appropriate personnel
		1.5	Check for recent work undertaken on plant units being controlled
		1.6	Note any outstanding/incomplete work
		1.7	Check operational status of plant units being controlled
2	**Interface with the control panel**	2.1	Monitor the process using the operator interfaces and keep appropriate personnel informed on developments
		2.2	Select appropriate controller modes to ensure the effective control of the process
		2.3	Undertake required set point/output changes to optimise plant and process requirements
		2.4	Access historical data and information
		2.5	Acknowledge messages and alarms
3	**Control the process using the local control system**	3.1	Obtain relevant data and information from the control system by applying systems knowledge
		3.2	Identify the status of individual pieces of equipment from the control panel and use information to identify potential faults
		3.3	Interpret alarms and prioritise steps to ensure control of system is maintained

© Commonwealth of Australia, 2025 Public Skills Australia

		3.4 Minimise fluctuations and variations in process through the interpretation of existing trends and control schematics
		3.5 Make required set point/output changes to meet plant and process requirements
		3.6 Take other appropriate action as required
		3.7 Record process variations/irregularities in accordance with procedures
4	**Facilitate planned and unplanned process start-ups and shutdowns**	4.1 Respond to all alarms and take appropriate action
		4.2 Maintain coordination with all outside services and operations in order to assist in the correct identification and reporting of faults
		4.3 Conduct planned start-up and shutdown processes to procedures
		4.4 Conduct unplanned start-up and shutdown processes to procedures
		4.5 Communicate with all operational areas and personnel affected by unplanned events to ensure safety is maintained during the process
		4.6 Implement all required and stated emergency responses and ensure the outcomes of these responses are communicated to all affected areas
		4.7 Log all required information for further action to provide a historical record of all events

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

Hazards

Hazards include one or more of the following:

- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures

© Commonwealth of Australia, 2025 Public Skills Australia

- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- plant services (steam, condensate and cooling water)
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

Routine problems

Routine problems must be resolved by applying known solutions.

Routine problems are predictable and include one or more of the following:

- variation/loss of feed
- unstable control of pressure, temperature level and flows
- control equipment failure
- process plant trips
- change in atmospheric conditions (rain, temperature, wind and lightning)
- emergency situations
- loss of power/utilities

Known solutions are drawn from one or more of the following:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to according to relevant procedures.

Operate

Operate is to monitor, adjust/change the plant item/unit/system to meet specifications, by:

- using local controller in the plant

© Commonwealth of Australia, 2025 Public Skills Australia

Operator interfaces

Operator interfaces include one or more of the following:

- keyboards/key pads
- track ball/mouse
- touch screen
- monitor
- standalone devices

Equipment

This unit includes all items of equipment which form part of the production/processing system. Equipment will be selected as required from the following:

- plant items requiring only simple control
- programmable logic controllers (PLCs)
- hard wired control and alarm panels
- analogue control systems
- personal computers
- printers
- fire and gas detection/protection systems
- emergency shutdown systems
- communications systems

Appropriate action

Appropriate action includes the following:

- determining problems needing action
- determining possible fault causes
- rectifying problem using appropriate solution within area of responsibility
- following through items initiated until final resolution has occurred
- reporting problems outside area of responsibility to designated person

Start up/shut down

Start-up/shut down includes the following:

- start up and shut down to/from normal operating conditions
- start up and shut down to/from isolated, cold or empty
- start up and shut down to/from all other conditions experienced on the plant (i.e. from any condition to any condition experienced on the plant)

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Requirements for PMAOPS216 Operate local control system

Modification History

Release 1. Supersedes and is equivalent to PMAOPS216B Operate local control system

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and demonstrate the ability to:

- identify job requirements
- obtain and interpret data from the control system
- monitor and control individual items of equipment to meet specifications
- conduct planned and unplanned start-ups and shutdowns according to procedures
- recognise early warning signs of equipment/processes needing attention or with potential problems
- determine the most likely cause of routine problems
- take appropriate action to ensure a timely return to full performance
- distinguish between causes of problems/alarms/fault indications, such as:
  - instrument failure/malfunction
  - electrical failure/malfunction
  - mechanical failure/malfunction
  - equipment design deficiencies
  - product parameters (temperature, flows, pressure and levels)
- identify hazards and apply hazard control procedures
- complete workplace forms
- communicate with team and supervisors.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- all items on a schematic of the controller and the function of each
- principles of operation and location of the process/production equipment
- specific plant process operations
- product specifications and tolerances
- systems operating parameters
- basis of control for the process
- emergency shutdown procedures
- process-specific science (physics, chemistry and biochemistry) to the level required to recognise and resolve routine problems

© Commonwealth of Australia, 2025 Public Skills Australia

- mathematics to the level required to interpret control data, recognise trends and take appropriate action
- process drawings, e.g. piping and instrumentation diagram (P&ID), process flow diagram (PFD) and cause and effect
- instrumentation and control systems, e.g. relevant primary sensing devices, final control elements, transducers/transmitters
- simple control loops, including proportional integral derivative (PID) control, set points, controlled variable and indicated variable
- organisation procedures
- hazards that may arise in the job/work environment, and:
  - their possible causes
  - potential consequences
  - appropriate risk controls.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- It may be appropriate to assess this unit concurrently with units such as:
  - teamwork
  - communication
  - safety
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of an operating plant
  - will typically include a supervisor/third-party report or other evidence, focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - may include the use of an appropriate local controller controlling an industrial plant requiring demonstration of operation, start-up and shutdown procedures and responding to problems
  - may use an appropriate local controller linked to a simulator which simulates an industrial plant requiring demonstration of operation, start-up and shutdown procedures and responding to problems
  - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

© Commonwealth of Australia, 2025 Public Skills Australia

- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry-based case studies/scenarios
  - 'what ifs'.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- In addition the assessor or anyone acting in subject matter expert role in assessment must demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they shall assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
  - relevant VET or other qualification/Statement of Attainment
  - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
  - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions.
- Current industry skills are the knowledge, skills and experience required by VET trainers and assessors and those who provide training and assessment under supervision to ensure that their training and assessment is based on current industry practices and meets the needs of industry.
- Current industry skills may be informed by consultations with industry and may include, but is not limited to:
  - having knowledge of and/or experience using the latest techniques and processes
  - possessing a high level of product knowledge
  - understanding and knowledge of legislation relevant to the industry and to employment and workplaces
  - being customer/client-oriented
- possessing formal industry and training qualifications

© Commonwealth of Australia, 2025 Public Skills Australia

training content that reflects current industry practice.

PMAOPS222 Operate and monitor pumping systems and equipment

Modification History

Release 1. Supersedes and is equivalent to PMAOPS222B Operate and monitor pumping systems and equipment

Application

This unit of competency covers the skills and knowledge required to operate pumping systems, which are driven by prime movers; and ancillary equipment.

The pumps covered by this unit of competency typically are used for hydrocarbon transmission lines.

This unit of competency applies to operators who are required to start up and shut down the equipment, monitor its performance, identify operational problems and take appropriate action.

This unit of competency applies to an individual who may work alone although under routine direction and supervision. They may work as part of a team or group and will work in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication

Pre-requisite Unit

PMAOPS221 PMAOPS221 Operate and monitor prime movers OR

PMAOPS324 Operate a gas turbine

Competency Field

Operations

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Prepare for work**	1.1	Receive and give shift handover
		1.2	Identify work requirements
		1.3	Identify and control hazards
		1.4	Coordinate with appropriate personnel
		1.5	Check for recent work undertaken on plant item
		1.6	Note any outstanding/incomplete work
		1.7	Check operational status of equipment
2	**Operate pumping systems in accordance with procedures**	2.1	Identify the type of pumping system and duty
		2.2	Operate ancillary equipment
		2.3	Adjust pumping system as appropriate to type and duty
		2.4	Complete routine checks, logs and paperwork, taking action on unexpected observations, readings and trends
		2.5	Verify the operational condition of all flanges, gaskets and seals to ensure that the operational integrity of these components is maintained within stated operational tolerances and to avoid any environmental damage
3	**Recognise and take action on abnormal situations in accordance with procedures**	3.1	Monitor pumping system, filter system and lubrication system frequently and critically throughout shift using measured/indicated data and senses
		3.2	Identify impacts of any changes upstream and downstream
		3.3	Recognise situations which may require action
		3.4	Resolve routine problems

© Commonwealth of Australia, 2025 Public Skills Australia

		3.5	Take actions on other abnormal situations to make safe and have the situation resolved
4	**Isolate and de-isolate equipment**	4.1	Complete any required pre-start checks
		4.2	Start up/shut down/changeover pumping system according to plant type and duty in liaison with other personnel
		4.3	Isolate pumping system
		4.4	Make safe for required work
		4.5	Check pumping system is ready to be returned to service
		4.6	De-isolate and prepare pumping system for return to service

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

© Commonwealth of Australia, 2025 Public Skills Australia

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Hazards

Hazards include one or more of the following:

- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- plant services (steam, condensate and cooling water)
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

© Commonwealth of Australia, 2025 Public Skills Australia

Routine problems

Routine problems must be resolved by applying known solutions.

Routine problems are predictable and include one or more of the following:

- variation in feed
- vibration
- control of level, temperature, pressure and flow
- blockages
- overheating
- overloading

Known solutions are drawn from one or more of the following:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to according to relevant procedures.

Action

Action in accordance with procedures includes the following:

- determining problems needing action
- determining possible fault causes
- rectifying problem using appropriate solution within area of responsibility
- following through items initiated until final resolution has occurred
- reporting problems outside area of responsibility to designated person

Operate

Operate is to monitor, adjust/change the plant item/unit/system to meet specifications, by one or more of the following:

- manually in the plant
- using local controller in the plant
- using the process control system in the control room

Start up/shut down as required

Start up/shut down as required includes the following:

- start up and shut down to/from normal operating conditions
- start up and shut down to/from isolated, cold or empty

© Commonwealth of Australia, 2025 Public Skills Australia

- start up and shut down to/from other conditions/situations experienced on the plant

Pumps

Pumps include one or more of the following:

- beam pumps
- electrical submersible pumps
- jet pumps
- centrifugal pumps
- positive displacement pumps (e.g. reciprocating pumps)

Ancillary equipment

Ancillary equipment includes one or more of the following:

- various drivers (e.g. diesel engine, electric motor and steam turbine)
- vibration monitors
- lubrication pumps and equipment
- gear boxes and barring gear instrumentation
- filters

Unit Mapping Information

Release 1. Supersedes and is equivalent to PMAOPS222B Operate and monitor pumping systems and equipment

Assessment Requirements for PMAOPS222 Operate and monitor pumping systems and equipment

Modification History

Release 1. Supersedes and is equivalent to PMAOPS222B Operate and monitor pumping systems and equipment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include the ability to:

- start up and shut down pumping system
- monitor and operate equipment to meet specifications
- recognise early warning signs of equipment/processes needing attention or with potential problems
- determine the most likely cause of routine problems
- take appropriate action to ensure a timely return to full performance
- isolate and de-isolate equipment
- identify hazards and apply hazard control procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- pumping system/equipment operating parameters
- equipment terminology
- safety systems and procedures
- principles of operation of pump, ancillaries and components
- physics and chemistry relevant to the pump, ancillaries and the materials processed
- process parameters and limits, e.g. temperature, pressure, flow and pH
- relevant alarms and actions
- correct methods of starting, stopping, operating and controlling process
- function and troubleshooting of major components and their problems
- corrective action appropriate to the problem cause
- hierarchy of control
- hazards that may arise in the job/work environment, and:
  - their possible causes
  - potential consequences
  - appropriate risk controls.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- Where competency is also required and has not been achieved in
  - PMAOPS221 Operate and monitor prime movers OR
  - PMAOPS324A Operate a gas turbine
- It may be co-delivered and co-assessed.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of an operating plant
  - will typically include a supervisor/third-party report or other evidence, focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of an industrial pump appropriate to this unit allowing demonstration of operation
  - may use industry-based simulation for part only of the unit where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.

© Commonwealth of Australia, 2025 Public Skills Australia

- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- In addition, the assessor or anyone acting in subject matter expert role in assessment must demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they must assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
  - relevant VET or other qualification/Statement of Attainment
  - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
  - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
- Currency can be demonstrated through one or more of:
  - being currently employed undertaking the type of work being assessed
  - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation’s policies and procedures
  - having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
  - conducting on-the-job training/assessments of the type of work being assessed
  - being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work

PMAOPS300 Operate a production unit

Modification History

Release 1. Supersedes and is equivalent to PMAOPS300B Operate a production unit

Application

This unit of competency covers the skills and knowledge required to operate an enterprise-specific unit of a production plant, which is not otherwise described by other units in this Training Package. The production unit operation will integrate several plant items (single unit operations). For the operation of a single unit operation refer to the relevant PMAOPS2## unit of competency.

This unit of competency applies to operations technicians who are required to demonstrate a significant understanding of the process and the equipment operation in order to identify and rectify operational problems, predict the potential impact of the production unit output on the operation of the whole plant, and facilitate output changes.

Operation of the production unit includes the operation of other plant items which are integral to the operation of the production unit.

This unit of competency applies to an individual operating independently in a plant with local control, or in liaison with the control room operator in a plant with a centralised control panel, such as distributed control system (DCS) type controls. In the case of large complex plant, the operations technician would be part of a team during start-up and shutdown procedures.

The operations technician is expected to be capable of performing all parts of this unit of competency. At all times they would be liaising and cooperating with other members of the team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Prepare for work**	1.1	Receive and give shift handover
		1.2	Identify work requirements
		1.3	Identify and control hazards
		1.4	Coordinate with appropriate personnel
		1.5	Check for recent work undertaken on the production unit
		1.6	Note any outstanding/incomplete work
		1.7	Check operational status of the production unit
2	**Operate production unit**	2.1	Describe the type of production unit, the component plant items and their duties
		2.2	Complete routine checks, logs and paperwork taking appropriate action on unexpected readings
		2.3	Change rate, grade or specification smoothly as required
		2.4	Adjust the production unit and its component plant items as appropriate to their type and duty to maximise performance
		2.5	Charge/discharge the production unit as required
3	**Diagnose and take appropriate action on abnormal situations**	3.1	Monitor the production unit and its component plant items frequently and critically throughout shift using measured/indicated data and senses as appropriate
		3.2	Describe impacts of any changes upstream and downstream
		3.3	Recognise actual and developing situations which may require action

© Commonwealth of Australia, 2025 Public Skills Australia

		3.4 Apply operational knowledge to resolve problems
		3.5 Take other appropriate actions on abnormal situations which cannot be resolved during the shift to ensure safety and the resolution of the situation
		3.6 Follow through items initiated until final resolution has occurred
4	**Isolate and de-isolate production unit and its component plant items**	4.1 Complete any required pre-start checks
		4.2 Start up/shut down production unit according to the production unit type and duty in liaison with other personnel
		4.3 Start up/shut down/changeover component plant items within the production unit according to their type and duty in liaison with other personnel
		4.4 Isolate entire production unit and/or any component plant item
		4.5 Make safe for required work
		4.6 Check production unit/plant item is ready to be returned to service
		4.7 De-isolate and prepare production unit/plant item for return to service

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of

© Commonwealth of Australia, 2025 Public Skills Australia

the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Hazards

Hazards include one or more of the following:

- smoke, darkness and heat
- heat, smoke, dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- plant services (steam, condensate and cooling water)
- limited head spaces or overhangs
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- fire and explosion
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

© Commonwealth of Australia, 2025 Public Skills Australia

Non-routine problems

Non-routine problems must be resolved by applying operational knowledge to develop new solutions, either individually or in collaboration with relevant experts, to:

- determine problems needing action
- determine possible fault causes
- develop solutions to problems which do not have a known solution
- follow through items initiated until final resolution has occurred
- report problems outside area of responsibility to designated person

Non-routine problems are unexpected problems, or variations of previous problems and include one or more of the following:

- recognising and acting on unstable/sub-optimal operation
- control of critical variables and outputs
- variations in feed rates, quality, and so on
- unstable process variables, such as pressure, temperature, level and/or flow
- loss of utilities
- production unit trip, the trip of one or more component plant items
- emergency situations

Start up/shut down

Start up/shut down includes the following:

- start up and shut down to/from normal operating conditions
- start up and shut down to/from isolated, cold or empty
- start up and shut down to/from all other conditions experienced on the plant (i.e. from any condition to any condition experienced on the plant)

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions

© Commonwealth of Australia, 2025 Public Skills Australia

- any similar instructions provided for the smooth running of the plant

Operate Operate is to monitor, adjust/make change to the production unit and/or its component items to meet specifications, by one or more of the following:

- manually in the plant
- using local controller in the plant

This competency does not require the operation of a central control panel.

Product Product includes anything produced by a process step and so includes:

- intermediate products, such as the product from one process step, which then becomes the feed for another

Unit Mapping Information

Release 1. Supersedes and is equivalent to PMAOPS300B Operate a production unit

Assessment Requirements for PMAOPS300 Operate a production unit

Modification History

Release 1. Supersedes and is equivalent to PMAOPS300B Operate a production unit

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and demonstrate the ability to:

- identify and control hazards
- use data and own senses to monitor plant and maximise performance
- isolate the causes of problems to an item of equipment within the production unit and to distinguish between causes of problems/alarm/fault indications, including:
  - process materials variations
  - instrument failure/wrong reading
  - electrical failure
  - mechanical failure
  - operational problem
- recognise early warning signs of equipment/processes needing attention or with potential problems
- take appropriate action to ensure a timely return to full performance
- perform pre-start checks, start-up/shutdown procedures and isolations and de-isolations
- complete written records
- communicate effectively with team or group, supervisors and other personnel
- identify and communicate information required by others.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisation procedures
- hazards that may arise in the job/work environment, and:
  - their possible causes
  - potential consequences
  - appropriate risk controls
- all items on a schematic of the production unit and the function of each
- the basis of the process used in the production unit to transform the feed materials into the product

© Commonwealth of Australia, 2025 Public Skills Australia

- process-specific science (physics, chemistry and biochemistry) to the level of being able to interpret the science and extract factors controlling the process and product and by-product production rate and quality (e.g. for chemistry interpret the equation for factors controlling rate and yield and also interfering reactions, such as salts and hydrates)
- interactions between plant items/processes
- basic science of upstream and downstream processes
- product specifications and tolerances
- systems' operating parameters
- impact of external factors (e.g. variations in weather and feed)
- system integrity limits
- emergency shutdown procedures
- routine and non-routine problems that may arise, and the range of possible causes and processes to develop solutions
- methods of changing rate/grade/specification or feed and the advantages and disadvantages of each
- principles of operation of plant/equipment
- plant process idiosyncrasies
- correct methods of starting, stopping, operating and controlling
- isolation procedures
- process parameters and limits (e.g. temperature, pressure, flow, pH and amps)
- effects of variations in process conditions and materials
- required preparation and permits required for different types of work to be done on the production unit or its component items.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of an operating plant
  - will typically include a supervisor/third-party report or other evidence, focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of an appropriate industrial item of equipment requiring demonstration of operation, start-up and shutdown procedures and responding to problems
  - may use industry-based simulation for part only of the unit particularly where safety, lack of opportunity or significant cost is an issue.

© Commonwealth of Australia, 2025 Public Skills Australia

- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry based case studies/scenarios
  - 'what ifs'.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- In addition the assessor or anyone acting in subject matter expert role in assessment shall demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they shall assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
  - relevant VET or other qualification/Statement of Attainment
  - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
  - appropriate workplace experience supervising/ evaluating the type of work being assessed under routine and non-routine conditions.
- Currency can be demonstrated through one or more of:
  - being currently employed undertaking the type of work being assessed
  - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures

© Commonwealth of Australia, 2025 Public Skills Australia

- having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
- conducting on-the-job training/assessments of the type of work being assessed
- being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work.

PMAOPS305 Operate process control systems

Modification History

Release 1. Supersedes and is equivalent to PMAOPS305B Operate process control systems

Application

This unit of competency covers the skills and knowledge required to operate and monitor the plant using a centralised control panel, such as distributed control system (DCS) type controls. The panel controls multiple vessels/plant items and or products. It will typically be located on-site but off plant in a control room, but may also be off-site.

This unit of competency applies to operations technicians who have overall responsibility for the operation of all units of equipment covered by the control system/portion of the control system they operate. They are required to identify, correct and report operational problems, operate, monitor and maintain equipment using relevant procedures, take appropriate action following an alarm or out-of-specification condition developing, and contribute to safe operations.

The control system will typically use a range of control algorithms and multiple control loops. The control system may include other local controllers which are integral to its operation.

This unit of competency applies to an individual operating as part of a team during start-up, shutdown and normal operating conditions. They would take a leading role in liaising and cooperating with other members of the team, including ‘outside operators’. However, this unit does not preclude the situation where the panel operator may also undertake 'outside' functions.

The operations technician is expected to be capable of performing all parts of this unit of competency.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Operations

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Prepare for work**	1.1	Receive and give shift handover
		1.2	Identify work requirements
		1.3	Identify and control hazards
		1.4	Coordinate with appropriate personnel
		1.5	Check for recent work undertaken on plant units being controlled
		1.6	Note any outstanding/incomplete work
		1.7	Check operational status of plant units being controlled
2	**Use operator interface**	2.1	Use human interface devices to access control system/panel
		2.2	Monitor the process using the operator interfaces
		2.3	Select appropriate controller modes
		2.4	Access historical data and information
		2.5	Acknowledge messages and alarms
3	**Access control information**	3.1	Obtain relevant data and information from the control system by applying systems knowledge
		3.2	Identify the status of individual pieces of equipment from the control panel and use information to identify potential faults
		3.3	Minimise fluctuations and variations in process through

© Commonwealth of Australia, 2025 Public Skills Australia

			the interpretation of existing trends and control schematics
		3.4	Record process variations/irregularities to procedures
4	**Control process variations and monitor operations**	4.1	Use historical data to assist the identification of problems
		4.2	Process available information to identify potential faults
		4.3	Undertake required set point/output changes to meet plant and process requirements
		4.4	Optimise plant operating conditions in accordance with guidelines
		4.5	Adjust production in response to test results and control panel information
		4.6	Monitor key process and environmental variables and take appropriate action
		4.7	Adjust controller settings in accordance with procedures
		4.8	Use fine tuning software as appropriate.
		4.9	Coordinate with upstream and downstream units as appropriate
		4.10	Record adjustments and variations to specifications/schedules
		4.11	Communicate to appropriate personnel as required
5	**Facilitate planned and unplanned process start-ups and shutdowns**	5.1	Select and apply procedures to planned start-up and shutdown processes
		5.2	Select and apply procedures to unplanned shutdown processes
		5.3	Implement all required emergency responses
		5.4	Communicate necessary information to all personnel affected by events
		5.5	Log all required information

© Commonwealth of Australia, 2025 Public Skills Australia

6	**Respond to alarms or out of specification conditions**	6.1	Identify system(s) affected by the alarm or condition
		6.2	Interpret alarms and prioritise actions to be taken
		6.3	Take appropriate action to respond to the alarm or incident
		6.4	Deal with any out-of-specification material in accordance with procedures
		6.5	Communicate the problem/solution to appropriate personnel
		6.6	Record the information as required
		6.7	Provide details of the alarm and action taken to the next shift at changeover

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

© Commonwealth of Australia, 2025 Public Skills Australia

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Hazards

Hazards include one or more of the following:

- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- plant services (steam, condensate and cooling water)
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

Non-routine problems

Non-routine problems must be resolved by applying operational knowledge to develop new solutions, either individually or in collaboration with relevant experts, to:

- determine problems needing action
- determine possible fault causes
- develop solutions to problems which do not have a known solution
- follow through items initiated until final resolution has occurred
- report problems outside area of responsibility to designated person

Non-routine problems are unexpected problems, or variations of previous problems and include one or more of the following:

© Commonwealth of Australia, 2025 Public Skills Australia

- loss of power/utilities
- variation in feed rate, quality or loss of feed
- unstable control of pressure, temperature, level and/or flows
- unstable/suboptimal operation
- control equipment failure
- process plant trips
- change in atmospheric conditions (rain, temperature, wind and lightning)
- emergency situations

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Human interface devices

Human interface devices include one or more of the following:

- keyboards
- track ball/mouse
- touch screen
- monitor and/or
- standalone controllers

Alarms or abnormal conditions

Alarms or other abnormal conditions include the following:

- emergency, including emergency shut down
- partial or complete controller failure

Start up/shut down

Start up/shut down includes the following:

- start up and shut down to/from normal operating conditions
- start up and shut down to/from isolated, cold or empty

© Commonwealth of Australia, 2025 Public Skills Australia

- start up and shut down to/from all other conditions experienced on the plant (i.e. from any condition to any condition experienced on the plant)

Operate

Operate is to monitor, adjust/change the plant item/unit/system to meet specifications, by the following:

- using the process control system in the control room

This competency does not require operation other than through the control panel.

Product

Product includes anything produced by a process step and so includes:

- intermediate products, such as the product from one process step, which then becomes the feed for another

Assessment Requirements for PMAOPS305 Operate process control systems

Modification History

Release 1. Supersedes and is equivalent to PMAOPS305B Operate process control systems

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and demonstrate the ability to:

- identify and control hazards
- use schematics and data to monitor plant and optimise performance
- isolate the causes of problems and distinguish between causes of problems/alarm/fault indications, including:
  - instrument failure/malfunction
  - electrical failure/malfunction
  - mechanical failure/malfunction
  - equipment design deficiencies
  - product parameters (temperature, flows, pressure and levels)
  - process control system malfunction
  - power/utility failures
- communicate effectively with team, group, supervisors and other personnel
- recognise early warning signs of equipment/processes needing attention or with potential problems
- take appropriate action to ensure a timely return to full performance
- select and apply planned and unplanned start-up shutdown procedures
- identify and communicate information required by others
- complete written records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisation procedures
- hazards that may arise in the job/work environment, and:
  - their possible causes
  - potential consequences
  - appropriate risk controls
- the function and location of the process/production equipment
- interactions between plant items/processes
- product specifications and tolerances

© Commonwealth of Australia, 2025 Public Skills Australia

- systems' operating parameters
- impact of external factors (e.g. variations in weather and feed)
- system integrity limits
- process control philosophies and strategies
- emergency shutdown procedures
- specific plant process operations
- process-specific science (physics, chemistry and biochemistry) to the level of being able to interpret the science and extract factors controlling the process and product and by-product production rate and quality (e.g. for chemistry interpret the equation for factors controlling rate and yield and also interfering reactions, such as salts and hydrates)
- basic science of upstream and downstream processes
- emergency shutdown procedures
- process drawings, such as piping and instrumentation diagram (P&ID) and process flow diagram (PFD)
- cause and effect
- control system architecture
- basis of control for the plant/s
- types of instrumentation and control systems, including feed forward, feedback and open control
- types of instrumentation and control system components and their role, including primary sensing devices, final control elements and transducers/transmitters
- how control loops and their components, including PID control, set points, controlled variable, indicated variable operate to control the process, and their limitations
- interaction between multiple control loops, including cascade control
- impacts of changing controller settings and the limits within which changes can be made
- effective communication techniques
- uninterrupt power supplies (UPS) and its applications and use.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of an operating plant
  - will typically include a supervisor/third-party report or other evidence focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - may include the use of an appropriate process control system controlling an industrial plant requiring demonstration of operation, start-up and shutdown procedures and responding to problems

© Commonwealth of Australia, 2025 Public Skills Australia

  - may use an appropriate process control system linked to a simulator which simulates an industrial plant requiring demonstration of operation, start-up and shutdown procedures and responding to problems
  - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - simulator
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- In addition, the assessor or anyone acting in subject matter expert role in assessment must demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they must assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
  - relevant VET or other qualification/Statement of Attainment
  - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
  - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
- Currency can be demonstrated through one or more of:

© Commonwealth of Australia, 2025 Public Skills Australia

- being currently employed undertaking the type of work being assessed
- being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
- having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
- conducting on-the-job training/assessments of the type of work being assessed
- being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work.

PMAOPS307 Transfer bulk fluids into/out of storage facility

Modification History

Release 1. Supersedes and is equivalent to PMAOPS307B Transfer bulk fluids into/out of storage facility

Application

This unit of competency covers the skills and knowledge required to transfer bulk fluids into/out of storage facility. The storage facility may be a land-based tank farm or a tanker at sea. The storage facility will integrate several plant items (single unit operations). Operation of the storage facility includes the operation of ancillary equipment that is integral to the operation of the production unit, such as:

- pumps (e.g. transfer and circulation pumps, and stripping pumps)
- compressors (e.g. boil-off gas compressors)
- gauges
- deluge systems and other fire protection systems, such as flares, fire pumps, jockey pumps, fire monitors and sub-surface foam injection
- gas detection systems and equipment
- fire detection and reporting systems
- emergency shutdown systems
- tank dipping and measurement equipment
- instrumentation.

The unit of competency applies to storage facilities, such as:

- tanks, such as concrete bunded storage tanks, atmospheric pressure tanks, floating roof tanks, and temperature controlled tanks (heated, chilled and refrigerated)
- vessels (e.g. pressure storage vessels).

This unit of competency applies to operations technicians who are required to demonstrate a significant understanding of the process and the equipment operation in order to identify and rectify operational problems, prepare for and undertake load-out/transfer, and ensure effective safety and communications systems are applied.

In a typical scenario involving land-based tank farms or tankers at sea transferring liquefied gas, the control room operator, from the main panel, will monitor and control the transfer of product into storage facilities, including controlling product levels, flows, temperatures and pressures. The operations technician will also prepare and complete all necessary documentation for the control, transfer and calculation of product volumes.

© Commonwealth of Australia, 2025 Public Skills Australia

The storage facility or vessel will be monitored through the use of gas and fire detection (or other safety) equipment. Automatic sprinkler systems, deluges or other emergency response equipment will be activated in the event of fire/emergency detection and emergency shutdown systems will operate.

The equipment to be used in the transfer of product will be checked and tested before use. In some cases, before transferring, the circulation of product through pipelines will commence. This is usually for the purpose of pipeline chilldown and is required to minimise vapour pressure build-up in warm pipework.

A comprehensive fire water supply main may encompass the facility and/or be located on the vessel, and a suitable fire pump would be able to provide fire water requirements in emergencies.

This unit of competency applies to an individual operating independently in a plant with local control or in liaison with the control room operator in a plant with a centralised control panel such as distributed control system (DCS) type controls.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

This competency does not require the operation of a central control panel.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the Performance criteria describe the performance needed to

© Commonwealth of Australia, 2025 Public Skills Australia

essential outcomes.		demonstrate achievement of the element.	
1	**Prepare for work**	1.1	Receive and give shift handover
		1.2	Identify work requirements
		1.3	Identify and control hazards
		1.4	Coordinate with appropriate personnel
		1.5	Check for recent work undertaken on storage/transfer facilities
		1.6	Note any outstanding/incomplete work
		1.7	Check operational status of storage/transfer facilities
2	**Prepare storage/transfer facilities**	2.1	Manage products within the tank farm or at the platform in accordance with the site/enterprise's storage types, products and locations
		2.2	Inspect storage and/or docking facilities for leaks or damage
		2.3	Check and test safety systems to verify their operational condition and status, and report on all equipment faults
		2.4	Conduct critical inspections of storage and tank farms (and ascertain seaworthiness of vessels at sea, if required) and transfer facilities ensuring areas are safe, clean and equipment can’t be compromised by debris
		2.5	Identify and report all equipment requiring maintenance, follow-up to satisfactory conclusion
3	**Monitor storage facilities**	3.1	Confirm tank mixes, capacities and quality, and determine if these are being maintained within the agreed product requirements prior to transfer
		3.2	Monitor gas detection/environmental/safety systems to ensure the storage area is a safe environment and that the safety of the area or vessel is not compromised
		3.3	Communicate storage conditions to transfer or other personnel to inform them of the operational condition and status of the storage facilities or vessel

© Commonwealth of Australia, 2025 Public Skills Australia

4	**Monitor load-out/transfer platform or facility in accordance with procedures**	4.1	Monitor load-out/transfer systems on the platform or in the terminal load-out/transfer area
		4.2	Monitor gas detection/environmental/safety systems to ensure the load-out/transfer area is a safe environment
		4.3	Inform appropriate personnel of the load-out/transfer area status, and conditions of the storage facilities
5	**Conduct load-out/transfer in accordance with procedures**	5.1	Communicate operational status to required personnel prior to loading
		5.2	Ensure that all start-up permissives have been satisfied and product is ready for transfer
		5.3	Set and adjust pump flow rates to keep within agreed capacities
		5.4	Monitor loading pump performance to keep within stated operational ranges and vibration is in limits
		5.5	Take and record product shipping/transfer samples if required
6	**Isolate and de-isolate plant**	6.1	Isolate storage/transfer facility or its component parts
		6.2	Make safe for required work
		6.3	Check storage/transfer facility/plant item is ready to be returned to service
		6.4	De-isolate and prepare plant for return to service
7	**Resolve problems**	7.1	Identify possible problems in equipment and process
		7.2	Determine problems needing action
		7.3	Determine possible fault causes
		7.4	Rectify problem using appropriate solution within area of responsibility

© Commonwealth of Australia, 2025 Public Skills Australia

7.5 Follow up items until resolved

7.6 Report problems outside area of responsibility to designated person

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Hazards

Hazards include one or more of the following:

- darkness, distance over which transfer must occur
- electricity
- gas
- gases and liquids under pressure

© Commonwealth of Australia, 2025 Public Skills Australia

- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- plant services (steam, condensate and cooling water)
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

Routine problems

Routine problems include one or more of the following:

- insufficient/inappropriate storage for product/material
- interruptions to loading through adverse weather conditions
- product surging
- control of temperature and pressure
- variations in feed
- vibration
- tank capacities and space

Non-routine problems

Non-routine problems are unexpected problems, or variations of previous problems and must be resolved by applying operational knowledge to develop new solutions, either individually or in collaboration with relevant experts, to:

- determine problems needing action
- determine possible fault causes
- develop solutions to problems which do not have a known solution
- follow through items initiated until final resolution has occurred
- report problems outside area of responsibility to designated person

Operational knowledge includes one or more of the following:

- procedures
- training
- technical information such as journals, engineering specifications

© Commonwealth of Australia, 2025 Public Skills Australia

- remembered experience
- relevant knowledge obtained from appropriate people

Start up/shut down

Start up/shut down includes the following:

- start up and shut down to/from normal operating conditions
- start up and shut down to/from isolated, cold or empty
- start up and shut down to/from other conditions/situations experienced on the plant

Permissive

A permissive is any and all permissions which are required and include one or more of the following:

- authorisation
- permit/clearance
- other permit sanctioned by procedures

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Operate

Operate is to monitor, adjust/make change to the production unit and/or its component items to meet specifications, by one or both of the following:

- manually in the plant
- using local controller in the plant

Monitor

Monitor means to continuously or frequently observe using data and/or senses.

© Commonwealth of Australia, 2025 Public Skills Australia

Product Product includes one or more of the following:

- hydrocarbons
- oil
- gas
- bulk liquid chemicals/petrochemicals

Assessment Requirements for PMAOPS307 Transfer bulk fluids into/out of storage facility

Modification History

Release 1. Supersedes and is equivalent to PMAOPS307B Transfer bulk fluids into/out of storage facility

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include the ability to:

- use data and own senses to monitor plant and maximise performance
- perform pre-start checks, inspections and tests, start-up/shutdown procedures, and isolations and de-isolations
- identify hazards and risks and apply risk control procedures
- identify early warning signs of equipment/processes needing attention or with potential problems and respond in accordance with procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- all items on a schematic of the storage/transfer system and functions of each
- interactions between plant items/processes
- process specific science (physics, chemistry and biochemistry) to the level of being able to interpret the science and extract factors controlling the process and product, causes of head loss in piping systems, including comparison of fittings using Le/d concept, fluid and pipe material properties, flow geometry and static electricity principles
- systems' operating parameters, integrity limits, product specifications and tolerances, tank and product mixes, flow rates and measures, tank capacities and percentages, process parameters and limits, including temperature, pressure, flow and pH
- function and troubleshooting of major components and their problems, such as impellors, seals or bearings
- hierarchy of control
- hazards that may arise in the job/work environment, and:
  - their possible causes
  - potential consequences
  - appropriate risk controls.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.

© Commonwealth of Australia, 2025 Public Skills Australia

- Where competency is also required and has not already been achieved in
  - PMAOPS201 Operate fluid flow equipment or
  - PMAOPS221 Operate and monitor prime movers and/or
  - PMAOPS222 Operate and monitor pumping systems and equipment and/or
  - PMAOPS223 Operate and monitor valve systems

  they may be co-delivered and co-assessed.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operations
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of industrial scale storage and transfer facilities
  - may use industry-based simulation for part only of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.

© Commonwealth of Australia, 2025 Public Skills Australia

- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- In addition, the assessor or anyone acting in subject matter expert role in assessment must demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they must assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
  - relevant VET or other qualification/Statement of Attainment
  - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
  - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
- Currency can be demonstrated through one or more of:
  - being currently employed undertaking the type of work being assessed
  - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation’s policies and procedures
  - having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
  - conducting on-the-job training/assessments of the type of work being assessed
  - being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work.

PMAOPS410 Operate remote production facilities

Modification History

Release 1. Supersedes and is equivalent to PMAOPS410B Monitor remote production facilities

Application

This unit of competency covers the skills and knowledge required to operate and monitor remote process/plant, including production facilities and its associated ancillary equipment and services, from a remote, off-site control system using ground based, satellite or other communications systems. It applies to remote facilities, such as wellheads, separation facilities, utility systems, compressor/pumping stations, treatment stations and satellite processes.

This unit of competency applies to senior technicians or similar roles who are required to apply in depth knowledge of process and plant to in order to operate, monitor and optimise the remote facility, perform tests and isolations, solve process problems and liaise with other plants and facilities.

This unit of competency would typically require the use of a control system, such as a distributed control systems (DCS) or supervisory control and data acquisition (SCADA).

It is not expected that there would be a ‘field operator’ available full time at the remote facility and arranging for one to attend could be part of the role.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Prepare for operation of remote facility**	1.1	Receive and give shift handover
		1.2	Identify work requirements
		1.3	Identify and control remote facility hazards
		1.4	Check for recent work undertaken on remote facility
		1.5	Note any outstanding/incomplete work
		1.6	Check operational status of remote facility
		1.7	Liaise with field operator and other personnel responsible for remote facility confirming expected attendance time and work to be performed
2	**Operate the remote facility**	2.1	Monitor the remote facility, its component plant items, utilities and environment frequently and critically throughout shift using measured/ indicated data
		2.2	Describe impacts of any environmental changes and changes upstream and downstream
		2.3	Recognise actual and developing situations which may require action
		2.4	Apply operational knowledge to resolve problems
		2.5	Take other actions on abnormal situations which cannot be resolved during the shift to ensure safety and the resolution of the situation
		2.6	Follow through items initiated until final resolution has occurred
3	**Recover and measure product**	3.1	Monitor quality and quantity of products and wastes generated

© Commonwealth of Australia, 2025 Public Skills Australia

		3.2	Maximise recovery of product and transfer in accordance with procedures
		3.3	Ensure all waste is treated in accordance with procedures and waste disposed of is within environmental/licence limits
		3.4	Ensure measuring, sampling, testing and data logging is occurring to schedule
4	**Organise required onsite activities**	4.1	Identify job scope and timing of required on-site work from monitored data, job schedules and observations of remote facility operations
		4.2	Arrange for appropriate personnel to attend remote site within the required timeframe
		4.3	Liaise with personnel attending site from their departure for remote site, their activities on remote site and their return to base
		4.4	Check effectiveness of on-site work before personnel leave remote site
5	**Isolate and de-isolate remote facility**	5.1	Arrange to have personnel on site in accordance with procedures
		5.2	Complete any required pre-start checks
		5.3	Start up/shut down remote facility according to the type and duty in liaison with other personnel
		5.4	Start up/shut down/changeover component plant items within unit according to their type and duty in liaison with other personnel
		5.5	Isolate entire remote facility and/or any component plant item
		5.6	Make safe for required work
		5.7	Check remote facility/plant item is ready to be returned to service
		5.8	De-isolate and prepare remote facility/plant item for

return to service

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Hazards

Hazards include one or more of the following:

- remoteness/single operator
- electricity
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)

© Commonwealth of Australia, 2025 Public Skills Australia

- equipment or product mass
- noise, rotational equipment or vibration
- working at heights, in restricted or confined spaces, or in environments subjected to heat, dusts or vapours
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Routine problems

Routine problems are predictable problems with known solutions and include one or more of the following:

- variations in feed
- contamination of product
- control of temperature and pressure
- variations in waste
- equipment malfunction
- vibration

Non-routine problems

Non-routine problems are unexpected problems, or variations of previous problems and must be resolved by applying operational knowledge to develop new solutions, either individually or in collaboration with relevant experts, to:

- determine problems needing action

© Commonwealth of Australia, 2025 Public Skills Australia

- determine possible fault causes
- develop solutions to problems which do not have a known solution
- follow through items initiated until final resolution has occurred
- report problems outside area of responsibility to designated person

Operational knowledge includes one or more of the following:

- procedures
- training
- technical information, such as journals and engineering specifications
- remembered experience
- relevant knowledge obtained from appropriate people

Remote production facility

This unit of competency includes all such items of equipment and unit operations which form part of the remote production facility, including as appropriate to the facility, one or more of the following:

- valves
- pumps
- prime movers
- compressors
- separators
- instrumentation
- storage tanks, ponds and dams
- filters
- wellheads
- hydraulic well control panels
- fire and gas safety systems

Unit Mapping Information

Assessment Requirements for PMAOPS410 Operate remote production facilities

Modification History

Release 1. Supersedes and is equivalent to PMAOPS410B Monitor remote production facilities

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include the ability to:

- interpret and respond to panel messages and alarms
- obtain and interpret data from the control system to minimise variation and maximise performance
- predict impact of a change in one unit/area on other plant units/areas and take action
- apply process knowledge to monitor and predict the need for adjustments to system components
- identify early warning signs of equipment/processes needing attention or with potential problems and take action
- identify hazards and risks and apply risk control procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- all items on a schematic of the remote system and the function of each
- remote terminal unit, functions, operation and problems
- nature/condition of materials entering and leaving each stage of the process
- changes which have occurred in that stage and why they have occurred
- methods of changing production rates and the advantages and disadvantages of each
- effect of specific climatic and environmental factors
- process parameters and limits (e.g. temperature, pressure, flow and pH)
- principles of operation of plant/equipment
- physics and chemistry relevant to the process unit and the fluids involved
- local lease and well operations requirements and constraints
- corrective action appropriate to the problem cause
- function and troubleshooting of major components and their problems
- hierarchy of control
- hazards that may arise in the job/work environment, and:
  - their possible causes
  - potential consequences
  - appropriate risk controls.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operations
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of industrial type remote facilities allowing operation
  - may use industry-based simulation for all of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

© Commonwealth of Australia, 2025 Public Skills Australia

- In addition, the assessor or anyone acting in subject matter expert role in assessment must demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they must assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
  - relevant VET or other qualification/Statement of Attainment
  - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
  - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
- Currency can be demonstrated through one or more of:
  - being currently employed undertaking the type of work being assessed
  - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
  - having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
  - conducting on-the-job training/assessments of the type of work being assessed
  - being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work.

PMAOPS411 Manage plant shutdown and restart

Modification History

Release 1. Supersedes and is equivalent to PMAOPS411B Manage plant shutdown and restart

Application

This unit of competency covers the skills and knowledge required to manage the shutdown and restart of a complex and integrated plant. It applies to planned, shutdowns and start-ups, but may also be applied to unplanned and emergency shutdowns (ESD). It does not apply to plant trips.

This unit of competency applies to senior technicians, panel technicians, outside technicians and those in similar roles who are required to apply in-depth knowledge of process and plant to in order to adapt normal practice, within the overall guidelines, to the situation; balance the varying requirements to ensure the shutdown occurs with maximum safety to personnel, plant, the environment and the business's productivity (in that order); and coordinate all personnel involved in the shutdown to ensure it happens in as orderly a fashion as possible and that the plant is left in the best condition possible for a quick restart.

This unit of competency does not apply to individual plant operators shutting down individual production units or following directions during a shutdown; these are included in the unit of competency for operating a particular production unit.

The individual will be liaising and communicating with all internal and external stakeholders.

No licensing, legislative or certification requirements apply to this unit at the time of publication

Pre-requisite Unit

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Manage shutdown sequence**	1.1	Check and verify safety systems to ensure that the unit has been made safe
		1.2	Identify the reason for, or cause of, the shutdown by troubleshooting the system and by utilising all available data and information systems
		1.3	Obtain confirmation of the identified shutdown from field-based operators to verify both the nature and the reliability of the shutdown
		1.4	Rectify or initiate procedures to rectify the fault or shutdown cause through either repair of the operational fault or readjustment before returning the system to start-up status
2	**Conduct start-up process**	2.1	Satisfy all start-up permissives prior to start-up process being commenced
		2.2	Identify hazards and check that hazard controls are operational and effective
		2.3	Conduct start-up according to procedures and in a safe and efficient manner, ensuring a return to steady state operation is achieved
3	**Document shutdown and start-up process**	3.1	Complete all logs and workplace documentation relating to the shutdown/start-up process, ensuring all details, actions and responses are accurately recorded
		3.2	Record any further ongoing production problems and report to appropriate persons or authority

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Hazards

Hazards include one or more of the following:

- electricity
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- plant services (steam, condensate and cooling water)
- working at heights, in restricted or confined spaces, or in environments subjected to heat, dusts or vapours
- flammability and explosivity

© Commonwealth of Australia, 2025 Public Skills Australia

- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

Procedures All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Unit Mapping Information

Assessment Requirements for PMAOPS411 Manage plant shutdown and restart

Modification History

Release 1. Supersedes and is equivalent to PMAOPS411B Manage plant shutdown and restart

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to:

- interpret and analyse data to decide on type of shutdown required
- plan for efficient shutdown to:
  - cold
  - warm
  - hot
- use data to identify reason for/cause of shutdown and determine action to be taken
- select and apply procedures for planned and unplanned start-up/shutdown
- ensure all safety, permit and system preparations are in place as required for shutdown and start-up
- identify hazards and risks and apply risk control procedures.

Knowledge Evidence

- Evidence must be provided that demonstrates knowledge of:
- shutdown/start-up philosophy and procedures
- correct methods of starting, stopping, operating and controlling process
- emergency shutdown (ESD) procedures
- required state of plant and equipment to allow for a restart
- hierarchy of control
- hazards that may arise in the job/work environment, and:
  - their possible causes
  - potential consequences
  - appropriate risk controls.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operations

© Commonwealth of Australia, 2025 Public Skills Australia

  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the use of an industrial plant allowing demonstration of shutdown and restart
  - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- In addition, the assessor or anyone acting in subject matter expert role in assessment must demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they must assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
  - relevant VET or other qualification/Statement of Attainment
  - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
  - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions

© Commonwealth of Australia, 2025 Public Skills Australia

- Currency can be demonstrated through one or more of:
  - being currently employed undertaking the type of work being assessed
  - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
  - having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
  - conducting on-the-job training/assessments of the type of work being assessed
  - being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work.

PMASUP440 Commission/recommission plant

Modification History

Release 1. Supersedes and is equivalent to PMASUP440B Commission/recommission plant

Application

This unit of competency covers the skills and knowledge required to commission new plant/pipeline or recommission significantly modified plant/pipeline. It applies to plant/pipeline, such as on or offshore plant, wellheads, transmission pipelines or similar.

Commissioning refers to the start-up of a new plant or plant unit and the associated equipment for the first time. Recommissioning refers to the start-up of an existing plant following major modifications, rebuild or reconfiguration.

This unit of competency applies to senior technicians and those in similar roles who are required to apply in-depth knowledge of process and plant in order to ensure design of new/modified plant meets safety and operability requirements, plan and coordinate commissioning/recommissioning, and complete required documentation. The technician would not normally have a 'hands on' operating role for all items of equipment, but may have a 'hands on' role for major items of equipment; however this is not required as part of this competency.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Contribute to/review the design of plant/ equipment**	1.1	Apply process understanding to the design process
		1.2	Identify the role and purpose of the plant and equipment
		1.3	Ensure design meets the identified need
		1.4	Identify process conditions and apply to hazard and operability studies (HAZOP)
		1.5	Undertake investigations following hazard studies
		1.6	Record and report findings
2	**Take part in commissioning planning**	2.1	Ensure the work is coordinated effectively with others involved on the work site
		2.2	Obtain materials necessary to complete the work and check against job requirements
		2.3	Obtain tools and equipment necessary to carry out the work and check for correct operation and safety
		2.4	Prepare plans to ensure that procedures are performed in the correct sequence
		2.5	Obtain approvals, where necessary, from appropriate authorities
3	**Participate in acceptance of plant/ equipment**	3.1	Undertake pre-commissioning activities
		3.2	Complete safety acceptance documentation
		3.3	Identify, record and report problems or non-conformance
		3.4	Conduct trials/test runs
		3.5	Record and report performance data
4	**Commission system**	4.1	Bring the plant/plant systems/pipeline online
		4.2	Make and report adjustments
		4.3	Prepare reports in accordance with legislative and

© Commonwealth of Australia, 2025 Public Skills Australia

			company requirements to maintain the historical record
5	**Evaluate results and identify modifications**	5.1	Identify modifications and improvements required
		5.2	Check specifications, procedures and training material match the final system/procedures
		5.3	Complete documentation and report to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

© Commonwealth of Australia, 2025 Public Skills Australia

Hazards

Hazards include one or more of the following:

- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- plant services (steam, condensate and cooling water)
- limited head spaces or overhangs
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Documentation

Documentation includes one or more of the following:

- operating procedures
- work health and safety (WHS) and environmental legislative

© Commonwealth of Australia, 2025 Public Skills Australia

requirements
- manufacturer specifications
- appropriate authority approvals (e.g. local councils, road authority, sewerage, stormwater, electricity, water and telephone)
- quality assurance inspection and test reports

Plant/pipeline systems

This unit of competency includes all items of equipment and unit operations which form part of the pipeline system including, as relevant to a particular plant/pipeline:

- pipes
- valves
- operating units
- electrical and electronic components
- programmable logic controllers (PLCs)/distributed control system (DCS) or other plant controls
- cathodic protection (CP)
- pressure/flow/temperature, regulation and meters

Tools, materials and equipment

Tools, materials and equipment include one or more of the following:

- hand tools,
- power operated tools
- plant
- emergency equipment
- electrical and electronic test equipment
- gas detectors
- air compressor
- water pump

Assessment Requirements for PMASUP440 Commission/recommission plant

Modification History

Release 1. Supersedes and is equivalent to PMASUP440B Commission/recommission plant

Performance Evidence

- Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include the ability to:
- plan, coordinate and monitor pre-commissioning, commissioning/recommissioning activities
- arrange resources as required
- communicate effectively with stakeholders, including manufacturers, engineering personnel, designers, contractors and maintenance and other company personnel
- participate in and/or review hazard and operability studies (HAZOP), hazard analysis studies (HAZAN) or similar techniques
- participate in and/or review design or modification plans
- identify hazards and risks and apply risk control procedures

complete written/electronic documentation.

Knowledge Evidence

- Evidence must be provided that demonstrates knowledge of:
- all items on a schematic of the system and functions of each
- principles of operation of items of equipment in the system
- principles of operation of instrumentation
- principles of basic control systems
- process control philosophies and strategies
- interactions between plant items/processes
- systems' operating parameters
- system integrity limits
- product tolerances, limitations and specifications
- types and purpose of typical pre-commissioning activities, including:
  - checking plant is built to design
  - ensuring plant is safe to operate
  - ensuring plant area and plant internals are clean and clear of debris
  - functional checking of equipment and ancillaries
- types and purpose of typical commissioning/recommissioning activities, including:
  - trial running of equipment
  - use of trial materials in plant

© Commonwealth of Australia, 2025 Public Skills Australia

  - safe introduction of process materials to plant
  - producing product within specification
  - bringing plant to design rates
  - solving operational problems
  - disposal of waste generated in the start-up
- science (e.g. physics, chemistry and biochemistry) relevant to process and materials
- process parameters and limits (e.g. temperature, pressure, flow and pH)
- correct methods of starting, stopping, operating and controlling plant
- routine and non-routine problems that may arise, the range of possible causes and processes to develop solutions.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project in an operational workplace. Where this is not possible or practical, assessment must occur using a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

© Commonwealth of Australia, 2025 Public Skills Australia

- In addition, the assessor or anyone acting in subject matter expert role in assessment must demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they must assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
  - relevant VET or other qualification/Statement of Attainment
  - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
  - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
- Currency can be demonstrated through one or more of:
  - being currently employed undertaking the type of work being assessed
  - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
  - having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
  - conducting on-the-job training/assessments of the type of work being assessed
  - being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work.

PMASUP540 Analyse equipment performance

Modification History

Release 1. Supersedes and is equivalent to PMASUP540B Analyse equipment performance

Application

This unit of competency covers the skills and knowledge required to analyse performance of plant, equipment and equipment components and recommend improvements. It applies to all work environments and sectors within the chemical, hydrocarbons and refining industry.

This unit of competency applies to senior technicians or those in similar roles who are required to apply in-depth knowledge of process and plant in order to calculate the theoretical performance of an item of equipment, gather data to determine the actual performance of the item of equipment, calculate actual versus theoretical performance, and make recommendations based on the performance verification results.

The technician will have detailed operational and process knowledge but is not required to demonstrate 'hands on' operation of equipment as part of this unit of competency.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for PMASUP540 Analyse equipment performance

Modification History

Release 1. Supersedes and is equivalent to PMASUP540B Analyse equipment performance

Performance Evidence

- Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include the ability to:
- design and implement verification trial appropriate to the plant/equipment, theoretical analysis and required data
- undertake theoretical/mathematical and practical analysis of the process
- recommended changes that are justified based on the comparison of trial and theoretical data
- calculate equipment and component performance from the design specification
- determine equipment and design performance from practical trials
- determine the 'limiting component' in the performance of an item of equipment or a process
- determine possible performance of an item of equipment/process if practical improvements were made to the 'limiting item'

predict interactions between materials, equipment and process and their impacts on performance.

Knowledge Evidence

Evidence must be provided that demonstrates sufficient knowledge to interact with relevant personnel and be able to analyse equipment performance, including knowledge of:

- methods of identifying and calculating theoretical performance
- ways of trialling, trial design and implementation
- methods of data analysis to determine trial outcomes
- methods of interpreting information deduced from trial data
- all items on a schematic (e.g. piping and instrumentation diagrams (P&IDs) and process flow diagrams (PFDs) of the system and the function and principles of operation of each
- systems operating parameters
- system integrity limits
- process control philosophies and strategies
- process parameters and limits
- product specifications and tolerances
- principles of operation of plant/equipment
- science (e.g. physics, chemistry and biochemistry) relevant to process and materials

© Commonwealth of Australia, 2025 Public Skills Australia

- organisation procedures
- duty of care obligations
- hierarchy of control.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project in an operational workplace. Where this is not possible or practical, assessment must occur using a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Simulation may be used for part only of this unit.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- In addition, the assessor or anyone acting in subject matter expert role in assessment must demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they must assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
  - relevant VET or other qualification/Statement of Attainment
  - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions

© Commonwealth of Australia, 2025 Public Skills Australia

    - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
- Currency can be demonstrated through one or more of:
    - being currently employed undertaking the type of work being assessed
    - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
    - having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
    - conducting on-the-job training/assessments of the type of work being assessed
    - being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work.

PMAWHS310 Investigate incidents

Modification History

Release 1. Supersedes and is equivalent to PMAOHS310B Investigate incidents

Application

This unit of competency covers the skills and knowledge required to investigate incidents in the workplace. These incidents can vary from large to small, completely internal or partially externally coordinated. They include all types of incidents and emergencies (e.g. process, work health and safety (WHS), and environmental).

An incident is an event which causes, or could have caused, injury or illness; damage to plant, material or the environment; disruption to production or public alarm.

An incident is an unintended event, or an unintended consequence of an intended event, such as:

- fire and explosion
- loss of containment
- excursions above/below acceptable limits for emissions or plant conditions
- excursions above occupational hygiene or biological exposure limits
- non-compliance with regulatory requirements
- security breaches
- failure to follow procedures
- complaints
- vehicle incidents
- on/off-site incidents.

This unit of competency applies to operators who are required to secure the incident site, identify and examine a range of evidence to determine likely cause of incident, record evidence and analyse results to identify improvements to procedures/processes.

This unit of competency applies to experienced operators, technicians, supervisors, and those in similar roles who undertake internal investigations of minor incidents and/or who assist in external investigations of more major incidents.

© Commonwealth of Australia, 2025 Public Skills Australia

The exact definition of the scope of responsibility will depend on company policy, as will the level of the person undertaking these investigations. These investigations will be in accordance with company procedures for such investigations which will be consistent with any relevant regulations.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members.

This unit of competency applies to all work environments and sectors within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Review incident**	1.1	Undertake site inspections of incident scene
		1.2	Communicate with relevant personnel regarding specific aspects of the incident
		1.3	Monitor corrective action procedures
		1.4	Communicate changes to the situation to appropriate personnel
2	**Record investigation**	2.1	Establish and secure boundaries of the incident scene to prevent contamination of prospective evidence/exhibits.

© Commonwealth of Australia, 2025 Public Skills Australia

	process and results	2.2	Identify and interview persons relevant to the incident
		2.3	Identify and record evidence/exhibits at the scene prior to examination to ensure continuity
		2.4	Assess relevant information, documentation and evidence/exhibits
		2.5	Determine point of origin and most likely cause of incident
		2.6	Determine risk factors affecting the incident
		2.7	Identify and analyse a range of other possible causes
		2.8	Identify and utilise support services to investigate the incident scene
		2.9	Process, record and communicate information/evidence/exhibits, forms and documents to appropriate personnel following enterprise policies and procedures
3	**Make suggestions to improve incident handling and prevention**	3.1	Identify and assess tactical factors and resulting priorities occurring during the incident
		3.2	Formulate appropriate suggestions to improve handling of similar incidents based upon information available
		3.3	Identify incident cause and make recommendations to prevent a recurrence

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance.

© Commonwealth of Australia, 2025 Public Skills Australia

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, include one or more of the following:

- job safety analysis (JSA) methods
- risk analysis/risk management procedures
- environmental risk/environmental management procedures
- personal protective equipment (PPE) and procedures
- emergency, fire and accident procedures
- hazard policies and procedures
- emergency procedures
- work instructions
- standard operating procedures SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

© Commonwealth of Australia, 2025 Public Skills Australia

Hazards and risks

Hazards and risk factors must be analysed in order to identify possible and likely causes of incidents.

Identifying hazards requires consideration of one or more of the following:

- hazards remaining from the original cause of the incident
- hazards arising from conducting an incident investigation
- hazards arising from working in conjunction with incident response personnel.

Identifying risks requires consideration of specific hazards, including the following:

- what level of harm can occur
- how harm can occur (various chains of events that could result in harm from the hazard)
- the likelihood that harm will occur

Evidence gained

Evidence gained as a result of investigations include one or more of the following:

- video tapes
- audio tapes
- drawings
- photographs
- plans
- manifests
- relevant documents
- records of interview
- personal notes
- physical evidence/materials
- debris
- soil

Support services

Support services include one or more of the following:

- pathologists
- forensic investigators
- coroner
- government medical officers
- interpreters
- technical services

© Commonwealth of Australia, 2025 Public Skills Australia

- legal officers
- undertakers
- forensic accountants
- information technology consultants
- document examiners
- handwriting experts
- financial organisations
- external law enforcement agencies

Interview strategies

The purpose of the interview is to establish what happened, not who is to blame. Interviews must be planned and require consideration of the following:

- location
- timing
- method (direct questioning and empathetic questioning)
- strategies for developing rapport
- who is being interviewed
- legal and policy requirements that might apply
- exclusion of leading questions
- avoidance of cross-examination

Legal and policy requirements might apply according to the status of the person being interviewed. Requirements include one or more of the following:

- the presence of a solicitor, independent person, family member or interpreter
- special consideration that applies because of disability, child, parent, age, gender, ethnicity and race

Post-investigation documentation

Post-investigation documentation include one or more of the following:

- statements
- proformas
- photographs
- tape/video recordings

Relevant personnel

The relevant personnel for incident investigation referrals will depend on the type of information being conveyed and the enterprise policies and procedures. Typically they will include one or more of the

© Commonwealth of Australia, 2025 Public Skills Australia

following:

- employer
- personnel directly involved in responding to the incident, including:
  - first response personnel
  - emergency response team members
  - emergency team leader
  - first aid officers
- other personnel with emergency team leader responsibilities

Unit Mapping Information

Assessment Requirements for PMAWHS310 Investigate incidents

Modification History

Release 1. Supersedes and is equivalent to PMAOHS310B Investigate incidents

Performance Evidence

- Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include the ability to:
- recognise and analyse potential situations requiring action and implement corrective action
- secure incident site and collect and preserve evidence and records in accordance with legislative requirements
- analyse information and evidence to determine:
  - possible and likely causes of incident
  - improvements to emergency procedures
- plan and undertake interviews using appropriate communication (listening and questioning) and negotiation techniques
- demonstrate ethical behaviour and cultural awareness in undertaking investigation
- identify and liaise with specialists and support services
- complete forms and records

read and interpret procedures, reports, evidence and statements.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisational procedures, including those covering:
  - safety, hazards and hazard control
  - incident, fire and accident reporting and investigation
  - environmental protection
  - risk assessment/risk management
  - record keeping
- hazards that may arise in the job/work environment, and:
  - their possible causes
  - potential consequences
  - risks
  - appropriate risk controls
- factors affecting incident initiation and development for predictable incident types for that plant
- scope and limitations of own role and responsibilities

© Commonwealth of Australia, 2025 Public Skills Australia

- appropriate personnel for referral and reporting.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur in an operational environment while conducting an incident investigation
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include an incident investigation using appropriate tools, equipment and safety gear
  - may use industry-based simulation for all or part of the unit particularly where, lack of opportunity is an issue. If simulation is the major source of evidence, then the simulation must replicate or enhance the situation of a real investigation.
- Assessment should occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

© Commonwealth of Australia, 2025 Public Skills Australia

- In addition, the assessor or anyone acting in subject matter expert role in assessment must demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they must assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
  - relevant VET or other qualification/Statement of Attainment
  - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
  - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions
- Currency can be demonstrated through one or more of:
  - being currently employed undertaking the type of work being assessed
  - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
  - having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
  - conducting on-the-job training/assessments of the type of work being assessed
  - being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work.

POLFOR024 Detect, record and collect forensic evidence

Modification History

Release	Comments
1	This unit was released in POL Police Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PUAPOLFC003B Detect, record and collect physical evidence. • Content and formatting updated to comply with new standards • Unit recoded POL • Title updated • Elements 1 and 2 all PC revised • PC 3.1 and 3.2 revised

Application

This unit describes the skills required to detect, record and collect forensic evidence in order to maximise the potential evidentiary value of exhibits. This may be applied in the field at incident/crime scenes or in a laboratory.

This unit applies to those working as police staff involved in forensic examination.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to work health and safety (WHS).

Those undertaking this role would work autonomously while remaining responsible for reporting to senior staff. They would demonstrate adaptability across a broad range of contexts while performing a range of complex tasks.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Forensics

Elements and Performance Criteria

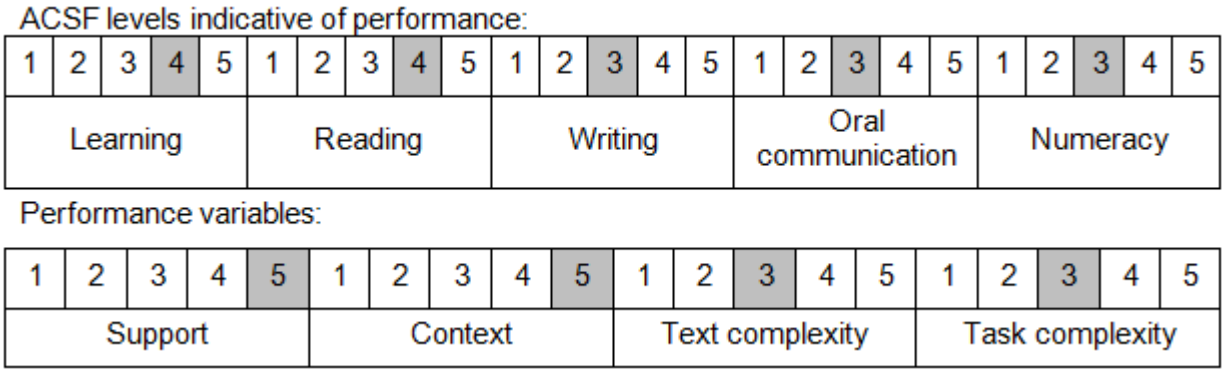
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Detect physical evidence	1.1 Apply search methods, observation techniques and technical methods to detect forensic evidence. 1.2 Apply screening techniques to assist in locating forensic evidence. 1.3 Assess forensic evidence to identify potential contamination or loss. 1.4 Preserve forensic evidence to maximise evidentiary value. 1.5 Assess evidence to determine suitability for recording and collection.
2. Record physical evidence	2.1 Identify recording methods to document forensic evidence and scene. 2.2 Apply enhancement techniques to assist in recording forensic evidence. 2.3 Document details of scene and evidence using note-taking techniques. 2.4 Sketch scene and physical evidence for recording purposes. 2.5 Photograph details of scene and evidence for recording purposes. 2.6 Select markers and scales to accurately represent characteristics and information of the scene.
3. Collect physical evidence	3.1 Apply swab, lifting and hand picking techniques to gather evidence and reference samples. 3.2 Gather impression evidence using photography, casting and lifting techniques. 3.3 Gather exhibits for further forensic examination.
4. Package forensic evidence	4.1 Select packaging technique to prevent degradation or contamination. 4.2 Label items to ensure easy identification. 4.3 Seal items to maintain integrity and prevent contamination. 4.4 Assess items to determine if aeration is required. 4.5 Store items to maintain integrity and continuity and to prevent degradation.

© Commonwealth of Australia, 2025 Public Skills Australia

	4.6 Record details of evidence to enter into case notes and/or exhibit register and to maintain continuity.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to PUAPOLFC003B Detect, record and collect physical evidence.

Assessment Requirements for POLFOR024 Detect, record and collect forensic evidence

Modification History

Release	Comments
1	These Assessment Requirements were released in POL Police Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- detecting forensic evidence using search methods, observation techniques, technical methods and screening techniques
- identifying collection, recording, and packaging requirements in accordance with evidence type
- recording details of scene and physical evidence using notes, sketches and photographs
- collecting, packaging and preserving different evidence types
- handling exhibits to preserve continuity of evidence
- maintaining records of forensic evidence using jurisdictional information management systems

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- jurisdictional legislation, policies and procedures relating to forensic examination, workplace health and safety, quality systems, exhibit handling, and intimate samples and authorisations
- potential risks associated with a range of field and laboratory activities
- techniques for the recording, collection, packaging and preserving of evidence
- application and potential limitation of forensic examination techniques
- role and function of other forensic disciplines in the recording, collection and preservation of forensic evidence

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Consideration must be given to practical assessment for this unit. Refer to advice in the companion volumes.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPETH002 Uphold and support the values and principles of public service

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPETHC401A Uphold and support the values and principles of public service. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to contribute to an ethical workplace and participate in ethical decision making.

This unit applies to those working in public sector roles but may be applied to anyone working in a similar organisational context.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would generally work independently and as part of a team, where they may have some supervisory responsibilities. They would perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Ethics

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Contribute to an ethical workplace	1.1 Access, interpret and apply information on ethical values. 1.2 Discuss and confirm application of ethical values and principle with senior management and colleagues to ensure common understanding and application. 1.3 Assist others to access and use public sector ethics legislation and guidelines to ensure compliance with requirements. 1.4 Explain the differences between ethics and personal beliefs to others to encourage understanding and compliance with the principles of procedural fairness. 1.5 Identify and discuss with work colleagues hypothetical work practices that would constitute unethical conduct including strategies to avoid or deal with them.
2. Participate in ethical decision-making	2.1 Identify real and potential ethical problems, and the decision-making processes used to resolve or refer them. 2.2 Monitor and access information to ensure currency in ethical knowledge. 2.3 Develop judgment through involvement in workplace discussions or ongoing professional development related to ethical standards and practices. 2.4 Support staff to contribute to ethical discussions and problem-solving. 2.5 Use processes for preventing and reporting unethical conduct and assist others in their application.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia

ACSF levels indicative of performance :

1	2	3	**4**	5	1	2	3	**4**	5	1	2	3	**4**	5	1	2	3	**4**	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy NA					

Performance variables:

1	2	**3**	4	5	1	2	3	**4**	5	1	2	3	**4**	5	1	2	3	**4**	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. The candidate must demonstrate evidence of performance of the following on at least one occasion:

- accessing legislation and codes of ethics electronically or in hard copy
- applying objective and impartial evaluation of ethical problems
- preparing written reports that contain information that is impartial, substantiated, accurate and complete
- adjusting communication methods to suit different audiences

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- the nature of public sector ethics and ethical values as opposed to personal beliefs/value systems
- fundamental ethical principles including at least one of:
  - natural justice
  - procedural fairness
  - respect for persons
  - responsible care
- equal employment opportunity, equity and diversity principles
- procedures and protocols for reporting unethical conduct

PSPGEN001 Work in a public sector environment

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV201B Work in a public sector environment. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to work as a trainee or new employee in the public sector. It includes accessing and using legislation, guidelines and organisational information, working with a diverse range of people and investigating career options.

This unit applies to those commencing work in generalist or specialist roles across the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team under supervision, performing routine tasks in familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Access and use legislation and guidelines	1.1 Access the range of legislation and guidelines common to employment in a public sector organisation. 1.2 Identify the key principles contained in the legislation and guidelines. 1.3 Clarify information in order to confirm own understanding. 1.4 Apply the principles contained in legislation and guidelines to individual workplace practice.
2. Access and use organisational information	2.1 Identify the staffing and organisational structure. 2.2 Identify and clarify procedures for dealing with staff at all levels of the organisation. 2.3 Identify procedures for dealing with clients. 2.4 Identify sources of assistance and types of assistance available from each source.
3. Work with diversity	3.1 Demonstrate appreciation of the differences between colleagues through workplace behaviour. 3.2 Use effective communication styles to take account of workplace diversity and reflect the principles of emotional intelligence. 3.3 Make contribution to the workgroup to utilise personal strengths and take any opportunities provided to develop new competencies. 3.4 Meet the requirements of multicultural awareness and anti discrimination legislation.
4. Investigate career options	4.1 Identify personal working and learning styles, values and attitudes and weigh against the requirements of current and potential work opportunities. 4.2 Identify and prioritise personal work goals. 4.3 Seek advice on future work/career options. 4.4 Identify a range of possible career paths and undertake initial planning to map out broad competency areas and experiences required to pursue them. 4.5 Plan personal development to prepare for career options. 4.6 Seek and access learning opportunities in line with personal work goals.

Assessment Requirements for PSPGEN001 Work in a public sector environment

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- accessing and identifying information
- scanning techniques to locate main ideas
- reading written materials, including manuals and codes of practice
- using interpersonal communication including negotiating strategies to clarify understanding
- recognising own and others' emotions in the workplace

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation, regulations and guidelines
- organisation guidelines and procedures
- principles of cultural awareness, workplace diversity and emotional intelligence and their application in the workplace
- codes of conduct
- principles of personal career planning

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Match service to client needs	1.1 Access and obtain information on the client base. 1.2 Use information on the client base and its needs to match services to clients. 1.3 Identify particular needs of clients to enable targeted service delivery. 1.4 Match requests from clients to the appropriate service from a defined range of options. 1.5 Report problems in matching service delivery to clients to supervisor.
2. Deliver client service	2.1 Provide client service that meets client needs within the limitations of resources. 2.2 Respond to client enquiries promptly and in accordance with accepted practice and standards of the organisation. 2.3 Tailor service and communication techniques to the specific needs of clients. 2.4 Deal with complaints from clients and difficult situations. 2.5 Maintain client confidentiality as part of service delivery where required. 2.6 Collect data to assist in evaluating whether client needs have been met.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPGOV203B Deliver a service to clients.

Assessment Requirements for PSPGEN003 Deliver a service to clients

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- communicating with a diverse range of internal and external clients including negotiating, explaining and clarifying
- solving problems
- tailoring delivery to meet specific client needs

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector policies, procedures and guidelines related to client service delivery
- current practice in client service delivery in the public sector
- organisational client service charter, standards and procedures
- limitations of resources for service delivery
- public sector legislation, including work health and safety and environment in the context of client service delivery

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPGEN007 Use technology in the workplace

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV207B Use technology in the workplace. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to perform various applications of technology and their use to achieve work outcomes. It includes selecting, using and maintaining technology.

This unit applies to those working in generalist or specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work in teams or autonomously, performing routine tasks in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

PSPGEN009 Work effectively in the organisation

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV301B Work effectively in the organisation. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to work effectively in a public sector organisation with a focus on self-management. It includes evaluating and developing your own expertise, identifying career options, working within the organisational structure and culture, and managing your own work.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work in teams or autonomously, performing routine tasks in familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Evaluate and develop own expertise	1.1 Make self-assessment of work-related competencies by reflecting on own workplace experience and training, and from monitoring feedback on performance in the workplace. 1.2 Undertake research to identify possible careers and compare the requirements of these careers with current skill base and development opportunities available within the organisation and across the public sector. 1.3 Identify areas requiring competency development by comparing current competencies with the competency requirements of current or anticipated duties. 1.4 Set personal learning goals and monitor progress towards them. 1.5 Identify and access potential competency recognition or development opportunities. 1.6 Maintain records of competency development and convey work-related competencies and experience to relevant people as required.
2. Work within the organisational structure and context	2.1 Develop and use a comprehensive knowledge of the organisation's structure and function. 2.2 Develop and use an understanding of the organisation's context. 2.3 Identify the work unit's position in the organisational structure, examine its relationship with other organisational work units and determine any protocols, difficulties or special requirements. 2.4 Identify and confirm the contribution of the work role and the work unit to the organisation's vision, goals and outcomes. 2.5 Undertake work in a manner that has regard for the workgroup position and the organisation's structure, functioning, culture and vision.
3. Manage own work	3.1 Identify, clarify and prioritise individual work goals. 3.2 Identify and manage risks to the achievement of personal work outcomes in accordance with organisational risk management requirements. 3.3 Select work strategies with regard to applicable work parameters. 3.4 Monitor progress with work against set goals, strategies and outcomes. 3.5 Achieve work goals and revise work plans to attend to ongoing or new responsibilities.

PSPGEN011 Build and maintain internal networks

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV303B Build and maintain internal networks. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to build and maintain internal networks. It includes identifying key internal stakeholders, building network links and participating in internal networks.

This unit applies to those working in a role where the exchange of information between workgroups depends on building and maintaining good internal networks.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit will be working independently where some support is available from a mentor, performing routine tasks in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

General

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify key internal stakeholders	1.1 Identify key internal stakeholders and their needs, expectations and roles. 1.2 Identify organisational synergies of networking with key internal stakeholders.
2. Build network links with key internal stakeholders	2.1 Establish and use effective new network links between self and key internal stakeholders. 2.2 Identify and maintain existing effective links between key internal stakeholders and identify and initiate strategies to expand them. 2.3 Use networking strategies to maintain internal networks.
3. Participate in internal networks	3.1 Provide information to internal stakeholders to ensure an understanding of own role and to exchange information to increase workgroup effectiveness. 3.2 Obtain and assess internal stakeholder input and feedback and act upon if necessary. 3.3 Seek assistance to deal with any misunderstandings or conflict situations that arise within internal networks.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPGOV303B Build and maintain internal networks.

PSPGEN023 Deliver and monitor service to clients

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV402B Deliver and monitor service to clients. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to identify client needs, deliver a service, monitor through feedback and then review the service.

This unit applies to those working in public sector roles but may be applied to anyone working in a similar organisational context.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would be working under supervision, performing routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

General

© Commonwealth of Australia, 2025 Public Skills Australia

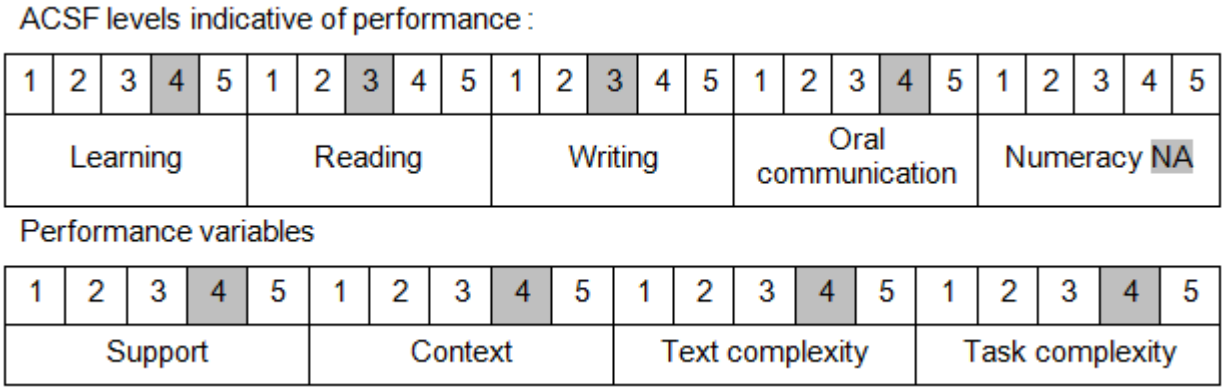
Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify and define client needs	1.1 Identify services required by client, ensuring needs of clients are recognised and addressed. 1.2 Identify potential difficulties and address or refer for recommended action.
2. Deliver client service	2.1 Respond to client enquiries. 2.2 Tailor communication to the situation and the client's specific needs. 2.3 Negotiate or use conflict resolution techniques to resolve difficult situations, or refer where appropriate. 2.4 Undertake remedial actions for clients with specific needs or in potential areas of difficulty. 2.5 Use accountability measures, including the organisational client service charter, client service records, grievance procedures and/or external review.
3. Monitor and improve client service delivery	3.1 Monitor service delivery and use feedback to and from colleagues to improve personal service. 3.2 Convey changes in policies and procedures that impact upon client relations. 3.3 Seek advice and assistance where necessary, to deal with client service issues, meeting changing needs and achieving service potential.
4. Review client service	4.1 Monitor procedural aspects of service delivery and maintain records. 4.2 Seek client feedback and propose changes in response to feedback on service development and delivery. 4.3 Carry out modifications to client service within limits and area of responsibility.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to PSPGOV402B Deliver and monitor service to clients.

Assessment Requirements for PSPGEN023 Deliver and monitor service to clients

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, regulations and policies relating to client service
- using communication methods with a diverse range of clients including negotiation and problem solving
- using a variety of words and language structures to explain sometimes complex ideas to different audiences
- analysing feedback on client service delivery
- recommending improvements to client service delivery within organisational constraints

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- legislation, policies, procedures, standards and guidelines relating to client service
- principles of effective client service delivery
- client services provided by the organisation
- limitations of resources for service delivery

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPGEN024 Use resources to achieve work unit goals

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV403B Use resources to achieve work unit goals. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to organise available resources at a senior operative level to facilitate achievement of work unit objectives. It includes acquiring and applying available resources, monitoring and reporting on resource usage and maintaining resources.

This unit applies to those working in senior roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously, supervising others performing complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Acquire and apply available resources	1.1 Identify available resources and fill gaps in accordance with work unit plans. 1.2 Apply procedures that promote efficient, economical and effective allocation and distribution of resources. 1.3 Handle resources in accordance with established work practices and guidelines.
2. Monitor and report on resource usage	2.1 Monitor and report on trends in resource usage. 2.2 Maintain records of resource usage. 2.3 Operate relevant financial and resource management systems. 2.4 Identify resource shortfalls and make recommendations to address these.
3. Maintain resources	3.1 Maintain resources in accordance with manufacturers' guidelines and service contracts. 3.2 Organise maintenance of resources to facilitate work practices and outcomes. 3.3 Develop contingency plans to ensure operational continuity.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPGOV403B Use resources to achieve work unit goals.

Assessment Requirements for PSPGEN024 Use resources to achieve work unit goals

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, policy and guidelines relating to resource usage, storage and maintenance
- communicating with diverse people on resource related matters, including maintenance contractors, work unit members, managers
- monitoring outcomes

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- legislation including WHS and environment and sustainability, regulations, policies, procedures and guidelines relating to resource usage
- operational procedures for accessing, storing, maintaining and using resources
- security and fraud control guidelines
- stock handling procedures

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Assessment Requirements for PSPGEN027 Gather and analyse information

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- accessing and using information ethically and legally
- using manual and computerised techniques for information management
- applying computer technology to data storage, security, retrieval and presentation
- using basic statistical and numerical manipulation
- using critical analysis techniques
- communicating with colleagues and supervisors
- presenting information in different ways
- using problem solving techniques and referring problems as required

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including WHS and environment
- policies, procedures and guidelines relating to information handling in the public sector, including confidentiality, privacy, security, freedom of information
- data collection and management procedures
- organisational information handling and storage procedures
- cultural aspects of information and meaning
- sources of public sector work-related information
- economic, legal, security and social issues surrounding the use of information

© Commonwealth of Australia, 2025 Public Skills Australia

- public sector standards
- electronic and manual filing systems
- databases and data storage systems

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Deal with complex enquiries and/or complaints	1.1 Establish relationship with the client by displaying understanding towards client needs, and the nature of complaint and/or enquiry by listening, questioning and confirming. 1.2 Record complaint and/or enquiry, and verify with the client. 1.3 Obtain documentation to support complaint and/or enquiry if required. 1.4 Identify action available under organisational policies, and follow procedures to respond to and resolve complaint and/or enquiry. 1.5 Identify and refer complaints and/or enquiries that require other personnel or external organisations' input to resolve. 1.6 Advise client of action taken to resolve the complaint and/or enquiry and record.
2. Give directions	2.1 Give ethical, lawful and reasonable directions to others, and protect staff from reprisals for refusing directions to act unethically. 2.2 Give directions and confirm understanding of directions. 2.3 Resolve problems or refer if required. 2.4 Provide feedback on implementation.
3. Manage meetings	3.1 Clarify purpose of each meeting and develop the agenda in consultation with participants. 3.2 Select procedure for each meeting and style of facilitating. 3.3 Chair meetings in accordance with agreed conventions for the type of meeting and legal and ethical requirements. 3.4 Ensure meetings are focused on the objectives of the meeting and are time efficient. 3.5 Enable participation, discussion, problem solving and resolution of issues by all those present. 3.6 Summarise decisions and recommendations, check for accuracy and record as required.
4. Make presentations	4.1 Make presentations to a range of audiences. 4.2 Structure presentations logically and ensure they contain relevant information to meet the purpose of the presentation. 4.3 Create, organise and select supporting materials and presentation aids to enhance audience understanding of key concepts and ideas.

© Commonwealth of Australia, 2025 Public Skills Australia

	4.4 Choose presentation strategies to match the characteristics of the target audience, the location, the resources and the personnel needed. 4.5 Evaluate effectiveness of the presentation formally and informally for the purpose of continuously improving future presentations.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Assessment Requirements for PSPGEN033 Use advanced workplace communication strategies

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- speaking and listening relating to sustained and sometimes complex communication exchanges
- taking part in interpersonal exchanges of information, with a flexible use of register and strategies for interaction
- dealing with complaints, clarifying meaning, exploring issues and using problem solving or referral
- deriving meaning from sustained oral discussions
- using observation to read non-verbal cues, especially those relating to culture, ethnicity, emotional state
- using presentation software

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including WHS and environment, regulations, policies, procedures and guidelines relating to workplace communication
- complaints procedures
- conflict resolution techniques
- knowledge of organisation processes and hierarchy
- official communication channels
- organisational protocols and etiquette for oral communication

© Commonwealth of Australia, 2025 Public Skills Australia

- meeting formats and facilitation/chairing requirements to suit
- presentation styles to suit different audiences

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Interpret and evaluate workplace information	1.1 Seek information from inside and outside the organisation and analyse sources for reliability. 1.2 Distinguish cultural context of the information and use to aid in interpretation. 1.3 Analyse information for relevance to own work and seek assistance with interpretation of complex materials. 1.4 Identify assumed prior knowledge underpinning workplace information and gather additional information if necessary. 1.5 Advise implications of information to relevant personnel.
2. Compose complex written materials	2.1 Determine the purpose, objectives and format for the materials. 2.2 Seek, collate and assess information to inform the document. 2.3 Determine content, structure and sequencing of materials in line with the purpose and intended audience. 2.4 Consider options for inclusion. 2.5 Assess possible impact on the target audience and counter potential criticism where necessary. 2.6 Review composed material to confirm objectives, organisational and legislative requirements are met, and submit materials within required timeframes.
3. Edit written material	3.1 Confirm intent of the communication. 3.2 Check content and proofread for grammar, spelling and punctuation. 3.3 Assess communication in light of the needs of the intended audience. 3.4 Make recommendations for improvement if necessary and record. 3.5 Amend information if required, and submit for approval.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Establish the need for mentoring	1.1 Identify purpose of the mentoring relationship. 1.2 Clarify expectations and goals of the mentoring relationship with the other party. 1.3 Identify and confirm skill sets that may be shared within the objectives of the mentoring relationship. 1.4 Negotiate and agree upon a mentoring agreement in accordance with the identified need, personal expectations and cultural or other considerations.
2. Develop a mentoring plan	2.1 Identify the scope and boundaries of the mentoring relationship. 2.2 Establish ground rules and negotiate realistic expectations. 2.3 Establish and maintain confidentiality of the relationship. 2.4 Manage the perceptions of others outside the mentoring relationship.
3. Facilitate mentoring relationship	3.1 Share personal experiences and knowledge with the person being mentored, in accordance with agreed objectives. 3.2 Support the person being mentored to develop skills in problem solving and decision making. 3.3 Use personal and professional networks to assist the person being mentored. 3.4 Assist the person being mentored to identify and access opportunities for development. 3.5 Use techniques for resolving differences without damaging the relationship, or seek assistance.
4. Monitor mentoring relationship	4.1 Provide planning assistance and guidance as requested. 4.2 Provide feedback on progress towards achieving the expectations and goals of the mentoring process. 4.3 Recognise and discuss changes in the mentoring relationship. 4.4 Negotiate and manage closure of the mentoring arrangement.
5. Evaluate effectiveness of mentoring	5.1 Establish and discuss benefits gained from the mentoring process. 5.2 Identify and report the benefits and outcomes of the mentoring arrangement for the organisation.

PSPGEN038 Identify and treat risks

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV417A Identify and treat risks. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to identify and treat risk using the organisation's risk management procedures and treatments. It applies to the risks inherent in all aspects of everyday work in the public sector as well as to specific functional activities and projects related to the particular mandate of the organisation. It includes establishing the risk context, analysing and evaluating risks and monitoring and reviewing the risk treatment plan.

This unit applies to those working in generalist or specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Establish the risk context	1.1 Establish the nature and extent of the work activity within the broader organisational context. 1.2 Identify and document outcomes to be achieved. 1.3 Analyse relationship between the activity and its environment and identify critical factors in the environment that may impact on the achievement of outcomes. 1.4 Identify and consult stakeholders to understand their opinions, concerns and needs. 1.5 Determine risk evaluation criteria for the activity.
2. Identify risks	2.1 Select method/s for identifying risks in accordance with risk management policy and procedures, budgetary and time constraints relative to the type of activity to be undertaken. 2.2 Identify and document sources of risk as required. 2.3 Identify and record risk events related to each source of risk. 2.4 Undertake consultation to ensure all possible risks are identified.
3. Analyse risks	3.1 Analyse and rate the probability of identified risks occurring and consequences. 3.2 Consider current control measures for any of the identified risks in the risk analysis, and analyse and include residual risks if necessary. 3.3 Determine levels of risk in accordance with risk matrix used by the organisation. 3.4 Consult as required to confirm risk levels, and document analysis.
4. Evaluate risks	4.1 Evaluate risks by comparing the level of risk with risk evaluation criteria established at the beginning of the risk management process. 4.2 Consider the importance of the activity, its outcomes and the degree of control over the risks. 4.3 Consider potential and actual losses which may arise from the risk. 4.4 Take into account benefits and opportunities presented by the risk. 4.5 Identify risks as acceptable or unacceptable in accordance with risk evaluation criteria, and obtain approval. 4.6 Prioritise unacceptable risks and document the reason/s for

© Commonwealth of Australia, 2025 Public Skills Australia

	acceptance of risks.
5. Treat risks	5.1 Determine options for treating risks. 5.2 Select the best treatment option and undertake a cost-benefit analysis. 5.3 Prepare, approve and communicate a risk treatment plan to those who will be involved in implementation. 5.4 Negotiate changes required to operational structure, procedures or staffing in order to implement risk treatments. 5.5 Organise resources and implement risk treatment plan.
6. Monitor and review risk treatment plan	6.1 Monitor changes in the organisational environment and factors impacting on the organisation for their impact on risks and existing risk treatments. 6.2 Monitor and adjust risk treatments for unacceptable risks as required. 6.3 Monitor acceptable risks to ensure these risk levels do not increase over time. 6.4 Consult and collect, analyse and use data relating to risks and risk treatments to improve risk management in own area of operation. 6.5 Review risk treatment plan in accordance with timetable for review of plan and updated as required. 6.6 Provide input into formal reviews of risk in the organisation to improve risk management outcomes.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPGOV417A Identify and treat risks.

Assessment Requirements for PSPGEN038 Identify and treat risks

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, regulations and policies relating to risk management
- researching and analysing the wider context affecting the organisation
- communicating and consulting with a diverse range of stakeholders
- estimating and arranging resources needed for implementation of risk treatments

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including WHS and environment, regulations, policies, procedures and guidelines relating to risk management
- AS/NZS ISO 31000:2009 risk management – principles and guidelines
- HB 436:2004 (guidelines to AS/NZS 4360:2004) Risk Management Guidelines Companion to AS/NZS 4360:2004
- the organisation's risk management framework
- the relationship of risk to context – how the context may define the risks
- the importance of consultation and communication at every stage of the risk management cycle
- risk management as a core activity of everyday work in the public sector
- the diversity of risks in the public sector

PSPGEN039 Develop internal and external networks

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV418A Develop internal and external networks. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to develop and maintain effective workplace relationships and networks. It includes establishing and maintaining working relationships, and representing and promoting the organisation.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently performing complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for PSPGEN039 Develop internal and external networks

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- demonstrating leadership to gain the trust and confidence of clients and colleagues
- using communication strategies, including giving and receiving feedback, reporting, maintaining effective relationships, and managing conflict
- using problem solving and negotiation to manage contingencies and achieve mutually acceptable outcomes
- reading and understanding a variety of texts
- preparing general information and papers according to target audiences
- proofreading and editing to ensure clarity of meaning and conformity to organisational requirements, checking for accuracy and consistency of information

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including WHS and environment, regulations, policies, procedures and guidelines relating to the public sector environment
- organisational policies, plans and procedures
- principles and operations of networks
- principles of effective communication in relation to listening, questioning and non-verbal communication
- techniques for building relationships of trust including those with people from different cultures

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Analyse client needs	1.1 Gather information on the client group from a range of sources. 1.2 Use information on the client group to target service provision for clients. 1.3 Identify clients and their specific needs to enable the service to be provided and expanded in order to respond to changing needs. 1.4 Seek and consider client feedback in order to respond to changing needs.
2. Review client service	2.1 Record, maintain, share and use client information to ensure future client dealings and service developments are well informed. 2.2 Use client feedback on service delivery to refine the service. 2.3 Undertake client service delivery in a manner that upholds and enhances the reputation of the organisation. 2.4 Identify and address individual differences of clients. 2.5 Identify significant problems in addressing client needs and refer to appropriate staff.
3. Promote client services	3.1 Promote services to existing and/or potential clients to ensure that the benefits and costs of the service are clearly understood. 3.2 Promote a range of service options for clients. 3.3 Assist clients, using a range of communication techniques, to identify their needs and select the best available service. 3.4 Negotiate and use conflict resolution techniques to resolve difficult situations, or refer.
4. Develop and enhance client service	4.1 Ensure improvements to client service are within policy and budgetary frameworks. 4.2 Establish and implement appropriate strategies for meeting changing client needs. 4.3 Use information on the product and/or service to match client needs with service delivery. 4.4 Modify specified aspects of the service or service delivery to meet changing client and service requirements. 4.5 Adapt client service within procedural and legislative requirements to maintain high standards of delivery.

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, regulations and policies relating to client service
- recordkeeping and interpreting records
- monitoring and evaluation
- communicating with a diverse range of clients, including through negotiation and problem-solving
- using a variety of words and language structures to explain sometimes complex ideas to different audiences
- analysing feedback on client service delivery

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including WHS and environment, policies, procedures, standards and guidelines relating to client service
- principles of client service delivery in the public sector
- organisation specific client services available
- organisation client service standards
- client services provided by the organisation
- organisational goals and processes
- government processes
- limitations of resources for service delivery

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify and undertake research	1.1 Define information needs based on work objectives and client and organisation requirements. 1.2 Evaluate and select potential sources of information and the format in which they are presented in line with the purpose and audience for the research. 1.3 Develop strategies to acquire required information. 1.4 Research information in a thorough way and within resource allocation. 1.5 Assess quantity, quality and relevance of initial search results and fill gaps using the same or adjusted research strategies. 1.6 Communicate the methods and outcomes of research, and the criteria used to make information decisions and choices.
2. Analyse information and apply the results of analysis	2.1 Examine, compare and evaluate information from various sources for content, structure and logic. 2.2 Select analytical techniques and processes in line with defined objectives. 2.3 Collate, consolidate and analyse information and advise senior staff of outcomes. 2.4 Identify facts, issues, patterns, interrelationships and trends through analysis in accordance with research aims. 2.5 Meet agreed project timelines and the defined standards of the organisation.
3. Maintain information systems	3.1 Maintain, validate and reconcile information systems so that data and system integrity are assured. 3.2 Maintain a range of standard and complex information systems and applications. 3.3 Review and update information systems as necessary.
4. Compile reports from information systems	4.1 Use the findings from analysing information to meet client and/or organisational needs and organisation standards. 4.2 Determine and organise content of reports in a manner that supports the purposes and format of the organisation and audience. 4.3 Sequence the reporting of results and ensure it includes predictions, assumptions and constraints where relevant.

Competency Field

General

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Develop coaching/ mentoring strategy	1.1 Research the potential for coaching and mentoring within the organisation. 1.2 Implement and promote a coaching and mentoring framework, linked to other human resource strategies in the organisation. 1.3 Outline benefits to all parties involved in coaching and mentoring, ensuring consistency with the organisation's philosophy and goals. 1.4 Establish ground rules for coaching and mentoring in the organisation. 1.5 Develop timelines for the implementation of the strategy with key stakeholders. 1.6 Seek organisational support and resources for the strategy.
2. Establish a coaching/ mentoring framework	2.1 Identify a range of coaching/mentoring models to suit the organisation's needs. 2.2 Arrange training for those interested in being coaches, coached, mentors and/or mentored. 2.3 Develop and monitor the requirements of coaching and mentoring contracts/agreements in accordance with the strategy. 2.4 Identify the range of stages in coaching and mentoring relationships and ensure flexibility in the framework. 2.5 Formalise protocols for matching participants and dealing with difficulties, disputes and grievances.
3. Implement and support coaching and mentoring	3.1 Promote the value of coaching and mentoring at all levels of the organisation. 3.2 Identify opportunities for mentoring and coaching and communicate to interested parties. 3.3 Use internal and external networks to support coaching and mentoring. 3.4 Suggest techniques and practices for resolving differences without damaging relationships, or provide assistance.
4. Monitor coaching and	4.1 Encourage people involved in coaching and mentoring to reflect on organisational processes, organisational support and their

© Commonwealth of Australia, 2025 Public Skills Australia

mentoring arrangements	activities to identify opportunities for improvement and innovation. 4.2 Evaluate and implement recommendations made for improvements in the coaching/mentoring strategy as necessary.
5. Consolidate opportunities for further coaching and mentoring	5.1 Recognise and acknowledge positive contributions of individuals to coaching and mentoring arrangements. 5.2 Celebrate and reward positive changes created through coaching and mentoring arrangements. 5.3 Identify and promote ongoing opportunities for coaching and mentoring.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPGOV506A Support workplace coaching and mentoring.

Assessment Requirements for PSPGEN048 Support workplace coaching and mentoring

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, regulations and policies relating to workplace coaching and mentoring
- undertaking research and analysis
- using effective communication with a diverse workforce including active listening, giving and receiving feedback

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including WHS and environment, regulations, policies, procedures and guidelines relating to workplace coaching and mentoring including privacy and freedom of information
- codes of ethics
- code of conduct
- policy and procedures for specific environment
- human resource strategies that link to a coaching/mentoring strategy
- strategic goals and direction/plan
- principles and practices of coaching and mentoring that need to be addressed in the organisational strategy
- coaching/mentoring methodologies and strategies

PSPGEN049 Undertake negotiations

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV507A Undertake negotiations. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to undertake negotiations. It includes planning and finalising negotiation outcomes.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan for negotiation	1.1 Clarify the purpose of the negotiation and the issue/s under consideration with affected personnel and through analysis of all related information. 1.2 Identify primary needs and desired outcomes of all parties. 1.3 Determine the organisation's position in consultation with senior personnel, and devise a negotiation approach based on an analysis of the strengths and weaknesses of the position. 1.4 Collect, analyse and organise information relating to the negotiation, including any precedents. 1.5 Agree upon timeframe and logistics, develop a negotiation plan and communicate to other staff, if any, involved in the negotiation team.
2. Conduct negotiation	2.1 Agree upon the issue/s under consideration and the negotiation process to be used with all parties and document. 2.2 Use negotiation techniques to persuade the other party of the strength of the argument in favour of the organisation's position. 2.3 Modify the negotiation plan if necessary to respond to contingencies. 2.4 Select and use techniques for dealing with conflict or deadlocks in accordance with the negotiation plan and the progress of the negotiation. 2.5 Discuss options for resolving the issue and determine the acceptability of these to the parties.
3. Finalise negotiation outcomes	3.1 Reach an agreed conclusion, document and obtain sign-off by the parties. 3.2 Report negotiation outcomes and debrief stakeholders if required. 3.3 Determine any further action required as a result of agreement and action. 3.4 Review the negotiation process and outcomes, and document lessons learnt for future use.

PSPGEN053 Provide leadership

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV511A Provide leadership. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to achieve operational results and effective working relationships through leadership, feedback and support of individuals in a workgroup that may exist in the workplace, be formed for a special purpose or project, or consist of community members, volunteers and/or interagency members. It includes facilitating commitment to objectives and required standards, contributing to the development of a cooperative, high performance workgroup, giving and receiving feedback on performance, supporting and participating in development activities, and providing leadership, direction and guidance in the workgroup.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously with management responsibilities performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

General

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Facilitate commitment to objectives and required standards	1.1 Discuss and clarify the organisation's vision, strategic objectives and required standards of performance with others in accordance with the needs, communication and learning styles of workgroup members. 1.2 Establish the purpose, objectives, roles and responsibilities in the workgroup. 1.3 Model commitment to objectives and standards to provide leadership and develop workgroup commitment. 1.4 Model and promote equal employment opportunity, workplace health and safety, diversity management and participative work practices within the workgroup.
2. Contribute to the development of a cooperative, high performance workgroup	2.1 Encourage, acknowledge and consider work contributions or suggestions. 2.2 Support workgroup members to use, share and develop their skills according to work requirements. 2.3 Facilitate work allocation within the group on the basis of current skills and development needs. 2.4 Consult with workgroup members in the implementation of new work practices. 2.5 Resolve conflict and other issues which affect performance within the workgroup wherever possible, or refer.
3. Give and receive feedback on performance	3.1 Seek feedback from others outside the workgroup on personal and workgroup performance, and give open and constructive responses to feedback. 3.2 Gather and provide regular constructive feedback on all aspects of work performance from and to the workgroup. 3.3 Assess and address performance and recognise and/or reward notable performance. 3.4 Address under performance of self and others. 3.5 Use feedback to continuously improve performance and outcomes.
4. Support and	4.1 Develop, agree upon and implement an action plan to meet

© Commonwealth of Australia, 2025 Public Skills Australia

participate in development activities	individual and group learning and development needs. 4.2 Support individuals to identify their specific learning and/or development needs. 4.3 Encourage and support workgroup members to take advantage of development opportunities in accordance with their needs. 4.4 Access learning and development opportunities to continuously improve own leadership skills and other identified development needs. 4.5 Provide on-the-job learning opportunities in accordance with individual needs and to the required standard. 4.6 Encourage and support workgroup members in applying new skills and knowledge in the workplace.
5. Provide leadership, direction and guidance in the workgroup	5.1 Use participative decision making in developing, implementing and reviewing the work of the group and the distribution of responsibilities, where appropriate. 5.2 Give opportunities and encouragement to workgroup members to develop new and innovative work practices and strategies. 5.3 Provide workgroup members with the support, leadership, advice and policy direction necessary to perform work. 5.4 Allocate tasks in accordance with the competencies of workgroup members, and delegate autonomy and authority as appropriate. 5.5 Vary leadership and guidance strategies to meet changing priorities and situations, and take into account the differing needs and skills of individuals and the requirements of the tasks and workplace.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

PSPGEN054 Use complex workplace communication strategies

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV512A Use complex workplace communication strategies. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to use complex workplace communication for working at middle management level with internal and external clients, colleagues and other staff. It includes preparing for complex communication, analysing and responding to opinions, presenting a convincing argument, and developing a range of communication strategies.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously with management responsibilities performing complex tasks, in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for complex communication	1.1 Clarify communication objectives, confirm those to be present and identify the communication mode. 1.2 Undertake analysis to anticipate the likely positions to be taken by those present on the matters under discussion. 1.3 Research and organise subject matter, identify and record key points to be conveyed, and summarise information to counter other positions. 1.4 Identify and incorporate requirements of legislation, policy and guidelines relevant to the discussion.
2. Analyse and respond to opinions	2.1 Evaluate discussion to identify impartiality, bias or unsupported argument. 2.2 Record points of view of other speakers and present information to counter opposing views. 2.3 Analyse reaction to speakers and their point of view to identify and manage emotional reactions and maintain objectivity. 2.4 Examine opposing or challenging views for their value in achieving the same ends. 2.5 Use active listening and questioning to clarify own understanding, challenge or justify other points of view.
3. Present a convincing argument	3.1 Choose communication approach to suit the given audience. 3.2 Assert prepared position with conviction and purpose. 3.3 Adjust verbal and non-verbal behaviour to maintain listener interest if the audience is unresponsive. 3.4 Use questions to elicit feedback and check audience understanding. 3.5 Respond to audience questions and arguments and support answers by reasoned explanation. 3.6 Negotiate agreement where possible, concluding with a summary of agreed items.
4. Develop a range of communication strategies	4.1 Seek feedback from others and assess the outcomes of communication. 4.2 Record and use lessons learnt to underpin future interactions. 4.3 Develop and practise language structures and features that influence audiences to a preferred point of view. 4.4 Explore and practise communication strategies for a range of

PSPGEN055 Refine complex workplace documents

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV513A Refine complex workplace documents. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to refine complex written workplace communication at a level where preliminary research or documents may have been prepared by others as input, and final documents are being prepared. It includes critical analysis of workplace information, composition, revision and refinement to meet workplace requirements.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify the political terrain	1.1 Identify and take into account stakeholder positions. 1.2 Analyse corporate politics to identify agendas and players. 1.3 Develop and utilise awareness of political agendas, both open and hidden. 1.4 Locate the current agenda in the wider context to appreciate the big picture and provide more than one perspective. 1.5 Identify and confirm the impact of the agenda on the work area.
2. Evaluate the political environment	2.1 Source information from inside and outside the organisation, and confirm its authenticity and reliability. 2.2 Analyse the political, social and economic environment and take into account emerging trends and current and possible future goals of the organisation.
3. Form alliances	3.1 Identify power structure and sources of power in the organisation and the wider public sector. 3.2 Identify people prepared to trade mutual support and assess the benefits. 3.3 Weigh the risks and benefits of possible alliances. 3.4 Lobby interested groups and/or individuals to gain support and acceptance of ideas and/or courses of action. 3.5 Build influence with key policy makers, decision makers and key influencers.
4. Bargain and negotiate to achieve outcomes	4.1 Develop sound positions with supporting arguments. 4.2 Formulate responses to possible contradictory positions. 4.3 Negotiate and refine positions with feedback from the negotiation process. 4.4 Achieve consensus with others for one’s position. 4.5 Implement outcomes.

Assessment Requirements for PSPGEN057 Develop and use political nous

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking research and analysis
- participating in communication activities, including negotiating, consulting, influencing, bargaining, resolving conflict and networking
- applying risk management strategies

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including WHS and environment, regulations, policies, procedures and guidelines relating to the public sector environment
- organisational policies and procedures
- organisational and public sector power structures and sources of power
- macro view of agendas, positions, and power
- government directions and agendas

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPGEN070 Persuade and influence opinion

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGOV605A Persuade and influence opinion. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to persuade and influence opinion in high-level workplace communication for working at a senior level with internal and external clients, colleagues and other staff. It includes preparing for high-level communication, critically analysing and responding to opinions, persuading and influencing others, and reflecting on and honing communication strategies.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously consulting others as required, performing sophisticated tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

General

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for high-level communication	1.1 Clarify communication objectives, confirm those to be present and identify communication mode. 1.2 Anticipate the likely attitudes of and positions to be taken by those present on the matters under discussion. 1.3 Consider communication styles of those to be present and assess their effect on the tone and likely progress of the discussion. 1.4 Undertake critical self-evaluation of communication strengths and vulnerabilities and compare with other participants' in planned encounters. 1.5 Research and organise subject matter, identify key messages and plan tactics to use personal strengths and maximise outcomes.
2. Critically analyse and respond to opinions	2.1 Listen to others critically and responsively to evaluate complex levels of meaning in spoken communication and to identify bias or unsupported argument. 2.2 Note tone, style, non-verbal elements and points of view of speakers and consider their use in influencing and affecting particular outcomes. 2.3 Analyse reaction to speakers and their point of view to identify and manage emotional triggers and maintain objectivity. 2.4 Welcome opposing or challenging views and examine them for their value in achieving the same ends. 2.5 Examine communication for subtext, significant inclusions and exclusions, socio-cultural values, attitudes and assumptions. 2.6 Explore complex concepts and ideas to clarify understanding, and to challenge and justify interpretations based on underlying assumptions, beliefs and values.
3. Persuade and influence others	3.1 Choose a communication approach to maximise effect with the given audience. 3.2 Assert sustained points of view with determination and conviction. 3.3 Modify content and approach when speaking to an unresponsive audience, and handle diversions and unexpected questions

© Commonwealth of Australia, 2025 Public Skills Australia

	confidently. 3.4 Use a variety of verbal and non-verbal behaviour to explain abstract ideas and expand on complex issues. 3.5 Respond to complex questions and arguments with reasoned explanation. 3.6 Handle disagreements or conflicting personalities objectively and negotiate agreements where possible, concluding with positive summaries of achievement.
4. Reflect on and hone communication strategies	4.1 Seek feedback from others, assess outcomes and analyse underlying interactions and motivations. 4.2 Analyse own vulnerability to emotional and other seductive appeals dispassionately. 4.3 Articulate and use lessons learnt to underpin future interactions. 4.4 Develop and practise sophisticated language structures and features that influence audiences. 4.5 Explore and practise creative and innovative communication strategies for a range of workplace applications.

PSPGEN077 Apply public sector financial policies and processes

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPFIN501A Apply public sector financial policies and processes. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to have detailed knowledge of the public sector financial framework, a working knowledge of external requirements and the application of these to work in a specialist finance role in the public sector. It includes identifying and implementing public sector requirements for financial services.

This unit applies to those working in the public sector with specialist knowledge of public sector financial framework and its applications.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously with some supervision of others, performing complex tasks in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for PSPGEN077 Apply public sector financial policies and processes

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- reading complex and formal documents, including legislation, policies, procedures, and accounting standards, and providing advice on their interpretation and application
- adjusting communication to suit different audiences
- using financial applications for entering data and preparing reports requiring accuracy of expression
- applying delegations
- working in accordance with public sector industry benchmarks
- accessing information and legislation electronically or in hard copy
- applying environmental and work health and safety procedures relating to working in the public sector
- applying numeracy skills and reading and interpreting financial information

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including work health and safety and environment, policies and processes relating to public sector finance
- public sector financial management compliance framework (detailed knowledge) and the relationship of the elements of the framework
- documents that make up the financial management compliance framework
- delegations and why the public sector uses them

© Commonwealth of Australia, 2025 Public Skills Australia

- internal controls, mechanisms for internal controls and why these are used
- separation of duties
- corporate governance requirements/relationship of financial management compliance framework to organisational structures
- service level agreements
- accrual accounting principles
- ethics/code of conduct

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan events and activities	1.1 Analyse broad public affairs objectives for the organisation to ensure that events and activities advance those objectives. 1.2 Determine the range and types of public affairs events or activities in line with broad public affairs objectives, and obtain approvals. 1.3 Determine objectives and target audience/s for each event and activity in line with organisational requirements. 1.4 Develop project plans to identify the requirements for all aspects of events and activities and to assign responsibilities. 1.5 Assess risks and likely contingencies and address their management in project plans. 1.6 Develop criteria and measures to monitor progress and evaluate achievement of objectives.
2. Implement events and activities	2.1 Obtain resources and implement plans. 2.2 Brief personnel to be involved and coordinate speeches as required. 2.3 Coordinate events and activities. 2.4 Handle contingencies in accordance with organisational risk management arrangements identified in the planning for events or activities.
3. Evaluate implementation and outcomes	3.1 Evaluate coordination and planning of individual events and activities, and document lessons learned to improve future planning. 3.2 Assess events and activities in terms of their effectiveness in reaching the target audience/s and achieving desired target audience response. 3.3 Assess implementation in terms of achieving individual objectives and meeting criteria for each event or activity. 3.4 Assess the outcomes of events or activities in terms of achieving broad public affairs objectives for the organisation.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Contribute to public affairs scope and direction	1.1 Conduct an environmental scan to identify public affairs issues and needs for the organisation. 1.2 Identify target audiences for public affairs action. 1.3 Develop public affairs objectives and programs in line with the organisation's business and strategic plans. 1.4 Develop criteria and measures for assessing objectives. 1.5 Identify resourcing requirements and negotiate the scope of public affairs activities in accordance with organisational priorities and resource constraints.
2. Plan and manage public affairs program	2.1 Develop operational plan for public affairs to integrate strategies and coordinate communications and activities. 2.2 Develop schedules for communications and activities that are flexible enough to provide for contingencies and emerging issues. 2.3 Define responsibilities and accountabilities, and identify reporting requirements and benchmarks for monitoring the program. 2.4 Implement and monitor public affairs program to ensure progress or make changes to achieve the program objectives. 2.5 Evaluate results in terms of media coverage, penetration and desired audience response, identify reasons for variations and make changes to improve results.
3. Develop crisis management communication strategies	3.1 Assess organisational activities and operations to identify potential crisis factors and evaluate risk management strategies. 3.2 Explore and determine the composition of a crisis communication team in terms of required specialist knowledge and guidance. 3.3 Identify training needs for potential spokespersons and organise media training. 3.4 Identify individuals and groups who must be contacted in crisis situations, establish lines of communication and confirm their roles and responsibilities. 3.5 Develop crisis management action plan and submit for approval.
4. Handle high-profile events	4.1 Undertake public affairs strategic planning for high-profile events. 4.2 Involve outside groups, partners, the media and business in sponsoring/supporting special events as required. 4.3 Apply and explain protocol standards to others as required to

© Commonwealth of Australia, 2025 Public Skills Australia

	ensure a positive organisational outcome from high-profile events. 4.4 Oversee and support the involvement of managers, staff and government representatives in high-profile events. 4.5 Prepare speeches and statements for management and other officials for special events or in times of crisis.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

PSPGEN084 Provide public affairs advisory service

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPPA602A Provide public affairs advisory service. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to provide a public affairs advisory service to management that provides a direct unfiltered link to trends, public opinion and perspectives. It includes advising on sensitive situations, advising on reactions to organisational action and advising on organisational materials.

This unit applies to those working as public affairs advisors to management within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently in consultation with others, performing complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

General

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Advise on sensitive situations	1.1 Maintain close communication with national, regional and local media to identify and anticipate issues of significance to the organisation. 1.2 Identify and assess trends, public opinion and perspectives for their impact on the organisation. 1.3 Provide advice on sensitive issues as they arise and on emerging issues that may be politically sensitive for the organisation. 1.4 Ensure advice is based on well-researched background information, is objective and meets the organisation's needs. 1.5 Ensure advice includes strategies for dealing with sensitive situations while maintaining confidentiality, and handling breaches of confidentiality.
2. Advise on reactions to organisational action	2.1 Analyse proposed organisational policies, programs and actions for their impact on clients and/or the public. 2.2 Provide advice on anticipated or actual public and media reaction to proposed organisational changes. 2.3 Include in advice given strategies for ensuring full understanding of the benefits of change, minimising damage to the organisation's image and reputation, and recommendations to counter negative publicity. 2.4 Provide candid, objective and confidential advice.
3. Advise on organisational materials	3.1 Analyse draft materials produced by the organisation for political, social or economic issues relevant to the government as a whole, the intended audience and/or the public. 3.2 Identify cultural context of the information in terms of its relevance or otherwise to the target audience and the general population. 3.3 Identify stereotypes, bias, prejudice and motive and highlight for amendment. 3.4 Identify key issues, separate fact from opinion and explore underlying values and beliefs. 3.5 Synthesise information and prepare advice or feedback to ensure

Assessment Requirements for PSPGEN084 Provide public affairs advisory service

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified, the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, regulations and policies relating to public affairs
- analysing organisational policy, core business and client group for potential sensitive issues
- using discretion and judgment with sensitive issues
- providing candid confidential advice
- analysing and interpreting organisational materials to advise on changes to address sensitive issues
- applying procedures relating to work health and safety and the environment in the context of public affairs

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified, the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation including work health and safety and the environment, regulations, policies, procedures and guidelines relating to public affairs
- maintaining relationships with key media contacts
- journalistic and interpretive writing
- strategies to deal with sensitive situations to defend the organisation’s position in the face of criticism

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPGEN085 Manage media relationships

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPPA603A Manage media relationships. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to manage media relationships to enable the organisation's services and achievements to be recognised and to deal with sensitive issues as they arise. It includes liaising with media personnel, negotiating media coverage, monitoring media coverage and preparing spokespersons for media interaction.

This unit applies to those working in public affairs, managing relationships with the media.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently in consultation with others, performing complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

© Commonwealth of Australia, 2025 Public Skills Australia

Competency Field

General

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Liaise with media personnel	1.1 Obtain information on local, regional and national media contacts and keep up to date. 1.2 Confirm processes and procedures for dealing with the media, and establish requirements for format, presentation and deadlines for information. 1.3 Establish communication processes to develop mutual trust and cooperation, and to foster awareness of public affairs events and activities. 1.4 Provide information that is reliable and represents the current position of the organisation or situation to the media. 1.5 Handle situations where serious errors or misquoting occurs.
2. Negotiate media coverage	2.1 Assess the potential level of interest in particular events, and make activities and communications, and media selections to maximise coverage and achieve public affairs objectives. 2.2 Identify the form of information and preferred message positions to maximise media coverage. 2.3 Give notice to the media of the timing of events and activities, and provide contact information to enable confirmation of details. 2.4 Negotiate media coverage.
3. Monitor media coverage	3.1 Assess options for monitoring media coverage and select based on organisational requirements and value for money. 3.2 Develop and implement procedures for monitoring media performance, and recommend actions that address variations from expected performance. 3.3 Evaluate media coverage in terms of effectiveness in achieving message placement objectives, anticipated impact and public affairs objectives.
4. Prepare spokespersons for media interaction	4.1 Brief spokespersons on the characteristics, communication techniques and potential impact of media interviews for newspapers, radio and television. 4.2 Brief spokespersons on interview approaches and the techniques of specific interviewers.

© Commonwealth of Australia, 2025 Public Skills Australia

	4.3 Establish objectives with spokespersons for interview outcomes in planned situations in order to communicate specific information. 4.4 Provide responses and techniques for achieving positive communication outcomes in unplanned media interactions. 4.5 Prepare spokespersons for crisis situations in accordance with crisis communication plans and responsibilities.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPPA603A Manage media relationships.

Assessment Requirements for PSPGEN085 Manage media relationships

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified, the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, regulations and policies relating to public affairs
- using communication methods and strategies with diverse groups, including consultation, liaison, advice, negotiation
- assessing and providing newsworthy information
- applying procedures relating to work health and safety and environment in the context of public affairs

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation, including work health and safety and the environment, regulations, policies, procedures and guidelines relating to public affairs
- the importance of relationships with key media contacts
- the range of media and the usefulness of each for particular information or messages
- organisational procedures for dealing with the media

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPGOV201B Work in a public sector environment

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the requirements for entry into/working as a trainee in the public sector. It includes compliance with the principles of public sector legislation and guidelines, the use of public sector and organisational procedures when dealing with others at work, respect for individual differences and career planning.

In practice, working in a public sector environment may overlap with other generalist or specialist public sector work activities such as communicating with others, delivering client service, using resources, handling information.

The unit serves as the introductory unit of competency in the *Working in Government* competency themes of *Effective Work* and *Diversity*, and in the Competency Fields of *Ethics&Accountability*, and *Legislation&Compliance*, so provides the introductory unit for:

- PSPGOV301B Work effectively in the organisation
- PSPGOV308B Work effectively with diversity
- PSPGOV310A Work in and with small, regional and remote organisations
- PSPETHC301B Uphold the values and principles of public service
- PSPLEGN301B Comply with legislation in the public sector
-
- No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

© Commonwealth of Australia, 2025 Public Skills Australia

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Access and use legislation and guidelines**	1.1 The range of ***legislation*** and ***guidelines*** common to employment in a public sector organisation is accessed. 1.2 The ***key principles*** contained in the legislation and guidelines are identified. 1.3 Information is clarified in order to confirm own understanding. 1.4 Work is undertaken in accordance with the principles contained in legislation and guidelines.
2. **Access and use organisational information**	2.1 The staffing and organisational structure is identified. 2.2 Procedures for dealing with staff at all levels of the organisation are identified and clarified. 2.3 Procedures for dealing with ***clients*** are identified. 2.4 ***Sources of assistance*** are identified, and types of assistance available from each source are identified. 2.5 Work is carried out within ***organisational procedures***.
3. **Work with diversity**	3.1 Appreciation of the ***differences*** between ***colleagues*** is demonstrated through workplace behaviour. 3.2 Communication styles are used to take account of workplace diversity and reflect the principles of ***emotional intelligence***. 3.3 Contribution to the workgroup is made to utilise personal

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	strengths and take any opportunities provided to develop new competencies.
	3.4 The requirements of multicultural awareness and anti-discrimination legislation are met.
4. Investigate career options	4.1 Personal working and learning styles, values and attitudes are identified and weighed against the requirements of current and potential work opportunities.
	4.2 Personal work goals are identified and prioritised.
	4.3 ***Advice*** is obtained on future work/career options.
	4.4 A range of possible career paths is identified and initial planning undertaken to map out broad competency areas and experiences required to pursue them.
	4.5 Personal development is planned to prepare for career options.
	4.6 Learning opportunities are sought and accessed in line with personal work goals.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- accessing and identifying information
- scanning techniques to locate main ideas
- reading written materials such as manuals and codes of practice
- responding to diversity, including gender and disability
- using interpersonal communication including negotiating strategies to clarify understanding
- recognising own and others' emotions in the workplace
- using information technology and the Internet
- applying public sector legislation such as occupational health and safety and environmental procedures in the workplace

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- public sector legislation, regulations and guidelines
- organisation guidelines and procedures
- principles of cultural awareness, workplace diversity and emotional intelligence

© Commonwealth of Australia, 2025 Public Skills Australia

and their application in the workplace
- codes of conduct
- equal employment opportunity, equity and diversity principles
- principles of personal career planning

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPGOV202B Use routine workplace communication techniques
  - PSPGOV203B Deliver a service to clients
  - PSPGOV204B Access and use resources
  - PSPGOV205B Participate in workplace change
  - PSPGOV206B Handle workplace information
  - PSPGOV208A Write routine workplace materials
  - PSPOHS201B Follow workplace safety procedures

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- completing work in a range of (3 or more) public sector contexts, such as different work functions or roles (or 3 or more occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to work in the public sector
- case studies and workplace scenarios to capture the range of situations likely to be encountered when working in a public sector environment

Where and how to

Valid assessment of this unit requires:

© Commonwealth of Australia, 2025 Public Skills Australia

assess evidence	• a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when working in a public sector environment, including coping with difficulties, irregularities and breakdowns in routine • completing work in a range of (3 or more) public sector contexts, such as different work functions or roles (or 3 or more occasions, over time). Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as: • people with disabilities • people from culturally and linguistically diverse backgrounds • Aboriginal and Torres Strait Islander people • women • young people • older people • people in rural and remote locations. Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of: • case studies • portfolios • questioning • scenarios • simulation or role plays • authenticated evidence from the workplace and/or training courses.
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.	
Legislation may include:	• anti-discrimination

© Commonwealth of Australia, 2025 Public Skills Australia

	• duty of care • employee relations • employment • equal employment opportunity • fraud control • freedom of information • government security management • occupational health and safety • privacy • public sector management • whistleblowers protection • workplace diversity • workplace harassment • international legislation/codes of practice
Guidelines may include:	• public sector standards • relevant public sector code of ethics • organisational code of conduct • organisational mission and values statements • organisational procedures/guidelines • government policy • Ministerial directions • directives from head of organisation • standard operational procedures
Key principles may include:	• honesty and integrity • confidentiality and non-disclosure of official information • security of information, resources, facilities and people • due care and diligence • avoiding conflicts of interest • obeying lawful and reasonable direction • compliance with the law
Clients may include:	• the public • private enterprise • other public sector organisations • internal clients • the Minister
Sources of assistance may include:	• colleagues • immediate supervisor • line management • human resources personnel • workplace representatives/union personnel
Organisational	• mission and values statements

© Commonwealth of Australia, 2025 Public Skills Australia

procedures may include:	• organisational charts • strategic plans • business unit and work area plans • customer service charters • induction materials • standard operating procedures • relevant workplace agreements • disciplinary processes • grievance procedures • advertising materials • Internet and/or intranet web pages
Individual differences may include:	• age • cultural background • disability • educational level • ethnicity • expertise • family responsibilities • gender • interests • interpersonal approach • language • life experience • marital status • personality • physical ability • political orientation • religious belief • sexual orientation • socio-economic background • thinking/learning styles • work experience • working styles
Colleagues may include:	• peers • junior staff • internal stakeholders • external stakeholders/clients/customers • supervisors and senior management

© Commonwealth of Australia, 2025 Public Skills Australia

Emotional intelligence is:	• widely recognised as the ability of an individual to monitor their own and others' emotions in a social or work environment, to discriminate among the emotions and to use the information to guide their thinking and actions • characterised by self-awareness (personal), self-management (personal), social awareness (social) and relationship management (social)
Advice may include:	• formal/informal performance appraisals • feedback from supervisors and colleagues • reflection/comment on personal goals • vocational/career counselling

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Access and use resources**	1.1 ***Resources*** required to achieve work outcomes are identified and accessed in accordance with ***legislation and organisational policy and procedures***. 1.2 Resources are used efficiently and effectively and in accordance with legislation, organisational policy and procedures.
2. **Administer physical resources**	2.1 Supplies and materials required to support the operation of the workgroup are obtained and maintained. 2.2 ***Records*** of resource usage are maintained as required by the organisation/work unit. 2.3 Orders are processed in a timely manner and in accordance with defined organisational procedures. 2.4 Supplies and materials are stored in accordance with organisational procedures and to reduce theft and fraudulent activity.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

© Commonwealth of Australia, 2025 Public Skills Australia

- recordkeeping
- reading materials such as legislation and operational procedures related to resources and finances
- completing and processing orders requiring both literacy and numeracy
- securing information and resources
- responding to diversity, including gender and disability
- applying public sector legislation such as occupational health and safety and environment in the context of resource use

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- public sector legislation and operational procedures relating to accessing and using resources
- security requirements for resources, facilities, people and information
- principles of fraud control in the public sector
- principles of financial management and stock handling
- occupational health and safety requirements
- environmental and sustainability requirements
- equal employment opportunity, equity and diversity principles

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in *italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select and use technology	1.1 The technology requirements of tasks are assessed and ***technology*** and/or ***software applications*** are selected in accordance with task requirements and available workplace resources.
	1.2 Work area, furniture and equipment are adjusted and used in accordance with ergonomic requirements.
	1.3 Technology/software is ***used*** to achieve work outcomes in accordance with organisational ***guidelines*** and occupational health and safety requirements.
	1.4 Manuals, training booklets, online/telephone assistance or help-desks are used to overcome basic difficulties with technology, and more complex problems are referred for assistance in accordance with organisational policy and procedures.
	1.5 Technology and data are secured in accordance with legislation, policy and procedures.
2. Maintain technology	2.1 ***Routine maintenance*** is carried out and/or arranged to ensure that technology is maintained in accordance with manufacturers' instructions and organisational requirements.
	2.2 ***Equipment faults*** are corrected or reported in accordance with manufacturers' instructions and service agreements.
	2.3 Technology consumables are replaced as they are used in accordance with manufacturers' instructions and organisational requirements.
	2.4 Use of technology and disposal of ***used consumables*** meets government and organisational ***environmental policies***.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for

© Commonwealth of Australia, 2025 Public Skills Australia

this unit.

Skill requirements

Look for evidence that confirms skills in:

- planning technology use
- identifying work requirements and selecting the equipment and software application of best fit in terms of timeliness, cost effectiveness, occupational health and safety conditions
- using a keyboard
- using a range of technology applications
- using communication to request advice, receive feedback and work with others
- applying problem solving in relation to routine problems
- following manufacturers' instructions
- responding to diversity, including gender and disability
- applying public sector legislation such as occupational health and safety and environment in the context of using workplace technology

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, procedures and guidelines relating to the use of technology in the workplace
- occupational health and safety procedures and regulations
- logon, backup, virus protection and shutdown procedures for computer equipment
- basic technical terminology in relation to reading manuals and help files
- methods of detecting faults in and solving problems with business technology
- equal employment opportunity, equity and diversity principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- PSPGOV204B Access and use resources
- PSPGOV205B Participate in workplace change
- PSPGOV206B Handle workplace information
- PSPGOV208A Write routine workplace materials

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- use of equipment and application of software in a range of (3 or more) contexts (or occasions, over time).

The unit relates to the application of technology as a transferable competency. It is not necessary to assess (or address) an exhaustive range of equipment, rather attention should be given to the different kinds of technology that can be used and the selection of the 'technology of best fit' for the task. (Is it better/more economical to print one master copy, and photocopy multiples, or print multiple copies direct from the computer? I need a graph - do I use a word processing or spreadsheet application?)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the use of technology in the workplace
- case studies and workplace scenarios to capture the range of situations likely to be encountered when using technology in the workplace

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when using technology in the workplace, including coping with difficulties, irregularities and breakdowns in routine
- correct use of equipment and application of software in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women

© Commonwealth of Australia, 2025 Public Skills Australia

	• young people • older people • people in rural and remote locations. Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of: • demonstration • observation • portfolios • projects • questioning • scenarios • simulation or role plays • authenticated evidence from workplace training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.	
Technology covers all equipment used in the workplace and may include:	• computer facsimiles • computer technology, such as laptops, notebooks, palm pilots and personal computers • datashow projectors • digital cameras • electronic whiteboards • facsimile machines • keyboards • modems • mouses • multifunction scanners/faxes/printers • pagers • photocopiers • printers

© Commonwealth of Australia, 2025 Public Skills Australia

	• routers • scanners • tape/MD recorders • telephones/mobiles/wireless telephones • video cameras • wireless technology equipment • zip drives
Software applications may include:	• email • Internet • instant messages • word processing • spreadsheets • databases • accounting • presentation packages
Use of technology may include:	• information searches • data storage, retrieval and analysis • numerical calculations • presentation of information • copying information • communication • Internet • Email
Guidelines may include:	• work unit and organisation standards • occupational health and safety policies and procedures • environmental procedures • manufacturers' operating instructions • ethical considerations
Routine maintenance may include:	• regular checking of equipment • replacing consumables • 'in-house' cleaning and servicing of equipment according to manufacturers' guidelines • periodic servicing by qualified or manufacturer-approved technician
Equipment faults may be identified or countered by:	• routine checking of equipment • preparation of a maintenance program • encouraging feedback from work colleagues • regular back-ups of data • keeping a log book of detected faults • regular occupational health and safety inspections • checking that repairs have been carried out

© Commonwealth of Australia, 2025 Public Skills Australia

Used consumables may include:	• ink cartridges • toner cartridges • print heads • CD-ROMs • zip disks • floppy disks • backup tapes
Environmental policies may cover:	• type of paper • recycling requirements

Unit Descriptor

This unit covers feedback in the workplace, both giving and receiving. It includes seeking and acting on workplace feedback, and providing informal as well as formal feedback in the workplace.

In practice, giving and receiving feedback may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, working effectively, working with diversity, contributing to the workgroup, building networks, etc.

This is one of 4 units in the *Working in Government* and *Management* Competency Fields that deal with performance. Related units are:

- PSPGOV416A Monitor performance and provide feedback
- PSPGOV519A Manage performance
- PSPMNGT603B Facilitate people management
-
- No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Seek and act on workplace feedback	1.1 ***Feedback*** on performance and ***other workplace issues*** is sought from ***others*** in accordance with organisational policy and procedures. 1.2 Feedback is discussed, questions asked to clarify understanding, and active listening used to ensure understanding of the issues and any constructive suggestions. 1.3 ***Diversity issues*** are considered when evaluating feedback to ensure correct interpretation. 1.4 Suggestions for improvements made by other workgroup members are considered objectively and implemented where appropriate.
2. Provide informal feedback in the workplace	2.1 Informal feedback is given regularly, in a timely manner, in accordance with workplace procedures and protocols. 2.2 Evidence from a range of sources is considered in providing feedback in the workplace. 2.3 The opinions of others are considered when providing informal feedback. 2.4 Performance of self and others is evaluated and confirmed with workgroup members. 2.5 ***Strategies/opportunities for continuous improvement*** are planned and implemented in consultation with the workgroup, and notable performance is recognised in accordance with organisational policy and procedures.
3. Provide formal	3.1 Where they exist, processes/***guidelines*** for providing ***formal***

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
feedback in the workplace	***feedback*** are used to ensure feedback meets purpose/s for which it is required. 3.2 ***Standards/criteria*** for feedback are identified and clarified. 3.3 Written or verbal feedback is prepared to address required criteria and purpose in accordance with ***legislation, policy and procedures***. 3.4 Where others disagree with feedback provided, their opinions and ideas are considered objectively and the feedback is amended or supported in line with organisational procedures. 3.5 Agreement with those seeking formal feedback is negotiated and documented regarding any actions/follow-up as a result of feedback. 3.6 Where agreement cannot be reached, reports are prepared and further action is taken if necessary, in accordance with organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- using techniques for maintaining objectivity while giving and receiving feedback
- using a range of communication techniques with members of a diverse workforce, including negotiating, questioning, clarifying, understanding, active listening, evaluating the ideas and opinions of others
- evaluating workplace performance and issues affecting clients and others
- responding to diversity, including gender and disability
- applying legislation such as occupational health and safety and environment in the context of giving and receiving feedback

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- public sector legislation, regulations, policies, procedures and guidelines relating to giving and receiving feedback
- organisation policies, practices and procedures relating to feedback
- workplace performance requirements and issues
- equal employment opportunity, equity and diversity principles

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC301B Uphold the values and principles of public service
  - PSPGOV301B Work effectively in the organisation
  - PSPGOV302B Contribute to workgroup activities
  - PSPGOV303B Build and maintain internal networks
  - PSPGOV307B Organise workplace information
  - PSPGOV308B Work effectively with diversity
  - PSPGOV312A Use workplace communication strategies
  - PSPGOV313A Compose workplace documents
  - PSPGOV314A Contribute to conflict management
  - PSPLEGN301B Comply with legislation in the public sector
  - PSPOHS301A Contribute to workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- feedback given and received in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to feedback in the workplace
- case studies and workplace scenarios to capture the range of situations likely to be encountered when giving and receiving workplace feedback

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when giving and receiving workplace feedback, including coping with difficulties, irregularities and

© Commonwealth of Australia, 2025 Public Skills Australia

breakdowns in routine
- feedback given and received in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Feedback on performance may include:	• client feedback • 360° feedback • feedback from assessors • performance feedback

© Commonwealth of Australia, 2025 Public Skills Australia

	• feedback on a job application
Other workplace issues may include:	• personal presentation • attitude • style, tone and form of language used • body language • cultural interactions • equity and diversity • telephone manner • client service manner
Others may include:	• team members • colleagues • superiors • subordinates • clients • assessors • performance appraisers • referees • interview panels • validators
Diversity issues may include:	• accepting that different ways of working and communicating are valid • focus on outcomes rather than process so that different ways of reaching the same end are not raised as negative feedback • interpreting feedback in light of diversity considerations • using culturally appropriate verbal and non-verbal language
Strategies/opportunities for continuous improvement may include:	• coaching, mentoring and/or supervision • formal/informal learning programs • internal/external training provision • work experience/exchange/opportunities • personal study • career planning/development • learning pathways.
Guidelines may include:	• sources of evidence • feedback methods/decisions • how to provide feedback • who gets feedback • appeal processes • grievance processes • dispute resolution processes • confidentiality • privacy

© Commonwealth of Australia, 2025 Public Skills Australia

	• freedom of information requirements
Formal feedback may be required by:	• peers • managers/supervisors/team leaders • employees • teams and team members • clients/customers • job applicants (360° feedback)
Standards*/*criteria may include:	• selection criteria • best practice standards • organisational practice standards • competencies • service level standards • codes of ethics/conduct • legislation/regulations

Legislation*, *policy and procedures may include:	• State/Territory and Commonwealth legislation and regulations such as:
	  • public sector management acts
	  • privacy legislation
	  • freedom of information
	  • equal employment opportunity, anti-discrimination and harassment legislation
	  • occupational health and safety legislation
	• environmental legislation
	• ethics and accountability standards
	• public sector standards
	• organisational policy, procedures and protocols
	• international legislation/codes of behaviour

PSPGOV513A Refine complex workplace documents

Modification History

Release	TP Version	Comments
3	PSP12V1	Layout adjusted.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers written workplace communication at a level where preliminary research or documents may have been prepared by others as input, and final documents are being prepared. It includes critical analysis of workplace information, composition, revision and refinement to meet workplace requirements.

In practice, refinement of complex workplace documents may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, providing client service, leading a group, developing policy, undertaking research and analysis, etc.

This is one of 5 units of competency in the *Working in Government* Competency Field that deal with written communication. Related units are:

- PSPGOV208A Write routine workplace materials
- PSPGOV313A Compose workplace documents
- PSPGOV413A Compose complex workplace documents
- PSPGOV606A Prepare high-level/sensitive written materials

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Critically analyse information	1.1 ***Information*** is tested for relevance, reliability, consistency and usefulness to the task/organisation. 1.2 Fact is separated from opinion and underlying values and beliefs are identified. 1.3 Cultural context of the information is taken into account in the analysis. 1.4 Stereotypes, bias, prejudice and motive are recognised. 1.5 Conclusions are drawn and a critical analysis with supporting evidence is prepared and submitted in accordance with organisational requirements.
2. Compose/refine complex documents	2.1 The ***purpose***, audience and objectives of ***complex documents*** are confirmed in accordance with organisational requirements. 2.2 ***Structure and content*** of document is approved in line with the purpose and intended audience. 2.3 Risk assessment is undertaken and risk management is implemented in relation to document preparation and content, in accordance with the nature and classification of the material. 2.4 Information/documents provided by others are analysed for bias, gaps, the influence of values, attitudes and context, conflicting advice/evidence and political implications. 2.5 Information is synthesised and complex documents are prepared and ***submitted*** in accordance with ***organisational requirements, legislation, policy and procedures***. 2.6 Feedback is provided to contributors of information/documents

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	to improve future input in a manner that provides learning opportunities for the researchers/authors.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- reading and writing at a level to cope with a range of complex and sensitive workplace materials
- critically analysing and synthesising information to compose complex written documents
- refining content, structure and sequence according to the required purpose of written material
- using spelling, punctuation and grammar for workplace documents at an experienced level
- providing feedback on other people's work in ways suited to the diversity of the workplace, including creation of learning opportunities to improve research/document input
- responding to diversity, including gender and disability
- implementing ergonomic requirements for office work
- complying with environmental policies such as those relating to paper use/wastage/recycling

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to written communication in the public sector such as privacy, freedom of information, information security, confidentiality, copyright, intellectual property
- critical analysis of complex information
- politically and culturally sensitive documents
- organisational requirements for complex written documents
- government style manual requirements
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of preparing written materials

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV504B Undertake research and analysis
  - PSPGOV505A Promote diversity
  - PSPGOV515A Develop and use political nous
  - PSPLEGN501B Promote compliance with legislation in the public sector
  - PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- complex workplace documents composed/refined in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to written communication in the public sector
- examples of complex workplace documents
- government style guide
- case studies and workplace scenarios to capture the range of situations likely to be encountered when composing/refining complex workplace documents

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when refining complex workplace documents, including coping with difficulties, irregularities and breakdowns in routine
- complex workplace documents composed/refined in a range of (3 or more) contexts (or occasions, over time).

© Commonwealth of Australia, 2025 Public Skills Australia

	Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as: • people with disabilities • people from culturally and linguistically diverse backgrounds • Aboriginal and Torres Strait Islander people • women • young people • older people • people in rural and remote locations. Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of: • portfolios • projects • questioning • scenarios • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.	
Information for critical analysis may include:	• applications • briefing papers • discussion papers • expert opinion • literature • plans • policy advice • project briefs • reports • research

© Commonwealth of Australia, 2025 Public Skills Australia

	• speeches • submissions • web site information
Purpose may include:	• influencing opinion • reporting on achievement • recommending options and corresponding actions • meeting regulatory requirements • meeting public sector reporting requirements • documenting policy • developing policy • obtaining funding • providing briefing material • contributing to strategic planning • responding to enquiries/complaints
Complex documents may include:	• funding submissions • briefing papers • speeches • media briefs • position papers • discussion papers • business cases • reports • project briefs • strategic and operational plans • functional area strategy • justification for policy development • policy guidance • counter argument to submission
Structure and content may include:	• executive summary • division into sections or chapters • tables of contents and indexes • conclusions • glossaries • footnotes/endnotes • references • critical analysis • facts and observations • submissions • creative ideas • recommendations and supporting arguments • opinion

© Commonwealth of Australia, 2025 Public Skills Australia

	• anticipated arguments and rebuttals • case studies
Submission of document may include:	• approvals • sign-off procedures

Organisational requirements may include:	• use of plain English
	• style formats
	• acknowledgements
	• particular terminology to be used/not used:
	  • acronyms
	  • technical terms
	  • bureaucratic language
	  • abbreviations
	• requirements for minimising jargon in written materials
	• requirements for written material to take account of cultural, ethnic, religious or language differences, disabilities, etiquette
	• guidelines for illustrative items
	• standards for references, acknowledgements, citations, footnotes, endnotes
	• using particular communication channels

Legislation, ***policy and procedures*** may include:	• State/Territory or Commonwealth legislation, regulations, policies, procedures and guidelines relating to the preparation and security of written information in the public sector, including freedom of information, copyright, privacy, confidentiality, equal employment opportunity, diversity, occupational health and safety • risk assessment • information security requirements • public sector standards • fraud control standards • codes of practice • codes of ethics • private or confidential materials • embargoed material • politically sensitive materials • security standards for government information

PSPGSD002 Administer government service delivery requirements

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPGSD402A Administer government service delivery requirements. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to administer government service offers, agreements and records. It includes reviewing service offers or agreements, and reviewing and updating records.

This unit applies to those working in public sector roles but may be applied to anyone working in a similar organisational context.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, performing routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

© Commonwealth of Australia, 2025 Public Skills Australia

Competency Field

Government service delivery

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Administer service offers or agreements	1.1 Identify and act on the need for assistance. 1.2 Identify and explain mutual obligations, rights and responsibilities associated with government service delivery. 1.3 Ensure delivery of services matches the circumstances.
2. Review service offers or agreements	2.1 Review service offer decisions as required. 2.2 Process appeals against service offer decisions. 2.3 Identify and negotiate ongoing resources and support required to progress the service offer. 2.4 Update records to reflect changes in circumstances.
3. Review and update government service delivery records	3.1 Review service delivery records for accuracy and currency. 3.2 Record and update information about individuals' needs as circumstances change. 3.3 Update information systems and records related to services provided to individuals. 3.4 Protect the privacy and security of personal information and records.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPGSD402A Administer government service delivery requirements.

Assessment Requirements for PSPGSD002 Administer government service delivery requirements

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- reading complex, formal documents including legislation and guidelines and explaining them to people from diverse backgrounds
- granting and adjusting payments

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- the range of applicant circumstances and complexity of needs in the context of government service delivery
- range of services available through the organisation
- mutual obligations, rights and responsibilities
- service offers
- appeal processes
- administration systems and requirements for payments and benefits
- legislation, policy, procedures and protocols relating to government service delivery, including work health and safety and environment and sustainability practices
- principles of equal employment opportunity and diversity

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPINV001 Plan and initiate an investigation

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.

Application

This unit describes the skills required to identify and confirm possible non-compliance, and plan and initiate a subsequent investigation. It includes planning and activating evidence collection, identifying witnesses and persons of interest.

This unit applies to those working in a range of regulatory work environments involving gathering and managing physical or documentary evidence from a range of sources.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS in the context of investigations.

Those undertaking this unit would work independently using support from a range of established resources to perform complex tasks in a range of contexts, including some that are unfamiliar and/or unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Investigation

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

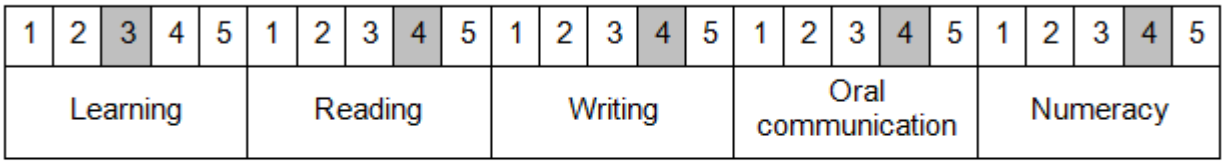
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Initiate preliminary investigation to confirm non-compliance	1.1 Assess information, confirm likely non-compliance and if matter under investigation falls within jurisdiction. 1.2 Prioritise importance and urgency of the matter for action. 1.3 Initiate documentation for investigation of alleged matter.
2. Plan investigation	2.1 Determine the objectives of the investigation and obtain necessary resources to conduct the investigation. 2.2 Identify and plan for risks associated with the investigation including sensitivities that might affect the organisation. 2.3 Select methods to achieve the investigation's objectives. 2.4 Identify timelines and prioritise tasks. 2.5 Confirm and initiate communication and case management requirements. 2.6 Record investigation planning. 2.7 Obtain approval to commence investigation.
3. Initiate investigation	3.1 Implement evidence recording process. 3.2 Identify, locate and contact possible witnesses to request information. 3.3 Identify and locate responsible parties and record their particulars. 3.4 Contact responsible parties for interview and inform them of the nature of the investigation as required by law. 3.5 Research evidence requirements to establish the type and standard of evidence and necessary resources according to the size of investigation and nature of the offence. 3.6 Select and initiate investigative techniques.

Foundation Skills

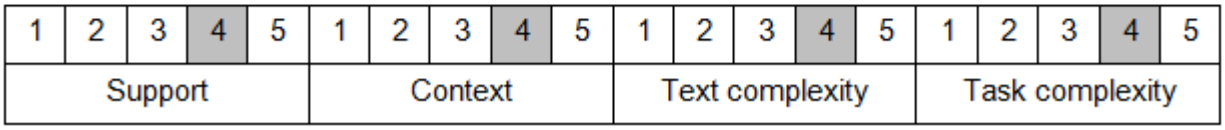
The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia

ACSF levels indicative of performance:



Performance variables:



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for PSPINV001 Plan and initiate an investigation

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least two occasions.

- acting ethically
- applying legislation, regulations and codes of practice
- using process mapping
- undertaking research, analysis and problem solving in the context of investigating non compliance
- questioning and negotiating meaning
- responding to diversity
- using planning and time management in the context of investigations
- preparing written reports and recommendations requiring accuracy, formal language structures
- using information technology for data analysis, recording and reporting

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- investigation methodology and techniques
- rules and types of evidence
- storage and continuity of evidence
- applicable legislation
- aspects of criminal, civil or administrative law
- jurisdiction, powers and restrictions to investigate
- organisational policy and procedures
- cultural awareness

© Commonwealth of Australia, 2025 Public Skills Australia

- confidentiality and privacy issues
- reporting procedures which provide a written or electronic audit trail

Assessment Conditions

Valid assessment of this unit requires a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when initiating investigations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPINV002 Conduct an investigation

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.

Application

This unit describes the skills required to conduct an investigation under commonwealth and/or jurisdictional law, in accordance with an established investigation plan. It includes gathering and managing evidence, identifying persons of interest, reviewing and reporting on progress and briefing/debriefing relevant personnel.

This unit applies to those working in a range of regulatory work environments.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS and environment in the context of investigations.

Those undertaking this unit would work independently using support from a range of established resources to perform complex tasks in a range of contexts, including some that are unfamiliar and/or unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

the essential outcomes	achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Locate and record information sources	1.1 Identify subjects and suspects involved in the matter under investigation and record details. 1.2 Obtain or verify authority to search, involving other organisations where necessary. 1.3 Collect and analyse information relevant to the investigation. 1.4 Identify and locate persons relevant to the investigation and eliminate persons who are not. 1.5 Access expert skills and knowledge when necessary to further assist staff in areas where they cannot, or are not authorised, to act. 1.6 Anticipate likely defences and include evidence to counter these.
2. Collect and manage information and exhibits	2.1 Collect, label, record and preserve identified and/or corroboratory evidence for later use in proceedings. 2.2 Identify, secure and manage evidence from incoming information. 2.3 Maintain continuity, security and integrity of exhibits. 2.4 Handle, record, store and dispose of exhibits.
3. Review and adjust investigation process	3.1 Monitor and review evidence collection to address gaps and inadequacies. 3.2 Conduct briefings and debriefings of all relevant personnel. 3.3 Conduct investigation with sufficient flexibility to allow for contingencies, modify process of investigation and implement solutions where practicable.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

PSPINV003 Finalise an investigation

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.

Application

This unit describes the skills required to complete, review and report on the results of an investigation. It includes finalising the investigation, handling complaints and appeals, preparing an investigation report and using investigation outcomes.

This unit applies to those working in a range of regulatory work environments comprising gathering, managing and interpreting documentary evidence to determine appropriate responses including reporting and acting on investigation outcomes.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS and environment in the context of investigations.

Those undertaking this unit would work independently using support from a range of established resources to perform complex tasks in a range of contexts, including some that are unfamiliar and/or unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Address investigation outcomes	1.1 Complete documentation if no breach has occurred or no action is to be taken, including reasons and justification. 1.2 Prepare and submit a record of the investigation and consequent recommendations for action. 1.3 Respond to complaints, appeals and the potential role of the ombudsman. 1.4 Advise relevant personnel on the outcome of the investigation. 1.5 Make recommendation for referral to another organisation as required and document for the organisation's information.
2. Report findings	2.1 Prepare finalisation report in relation to the findings and submission of evidence, with recommendations for subsequent action if relevant. 2.2 Prepare report and refer to relevant personnel for further action.
3. Finalise investigation	3.1 Undertake self-assessment of the conduct of the investigation and provide verbal and written briefings. 3.2 Inform relevant external organisations of outcomes and document this action. 3.3 Update organisational systems regularly, contributing investigation results for the development of statistics, trends and precedents.

Assessment Requirements for PSPINV003 Finalise an investigation

Modification History

Release	Comments
1	These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least two occasions.

- undertaking analysis and problem-solving
- engaging in exchanges of sometimes complex oral information
- varying style and language during briefings to suit audience
- writing summaries, briefing papers and reports requiring clarity, accuracy and formality of structure and language
- applying analytical techniques, logic and reasoning to identify and select avenues of inquiry and substantiate these choices

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- legislation relating to the offences under investigation
- investigation principles and the range of investigation techniques available
- organisational guidelines for reporting and information management
- ethical standards
- principles of equal employment opportunity, equity and diversity
- operational safety
- legislation related to anti-discrimination and disability
- different types of criminal activity and their elements
- available resources which may need to be deployed to support the investigation
- security issues and classifications
- legal and ethical considerations in investigations which involve juveniles and indigenous people

© Commonwealth of Australia, 2025 Public Skills Australia

- knowledge of case management systems and the range of contexts in which they can be applied
- court procedures and evidentiary in provision of briefs of evidence for use by the prosecution
- role and functions of other agencies who work with policing in the conduct of investigations
- methods and process for subject/suspect identification and profiling

Assessment Conditions

Valid assessment of this unit requires a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when initiating investigations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPLEG003 Promote compliance with legislation in the public sector

Modification History

Release	Comments
1	This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to PSPLEGN501B Promote compliance with legislation in the public sector. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to promote compliance with legislation in the public sector. It includes modelling compliance with legislation.

This unit applies to those with responsibility for encouraging and assisting others to comply with public sector guidelines and procedures.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would generally work independently with supervisory responsibilities. They would perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Legislation and compliance

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Encourage compliance with legislative requirements	1.1 Use personal work practices to provide a consistent model of compliance with current public sector legislation and guidelines. 1.2 Provide responses to staff enquiries about the legislative requirements of the workplace. 1.3 Explain to staff the consequences of non-compliance relating to a range of legislation. 1.4 Use compliance strategies to encourage compliance with legislation, policies and guidelines in accordance with the situation.
2. Monitor compliance with legislative requirements	2.1 Monitor compliance with legislative requirements and resolve or refer issues. 2.2 Raise and address inadequacies in workplace procedures which contribute to non-compliance. 2.3 Report on compliance with legislative requirements.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPLEGN501B Promote compliance with legislation in the public sector.
