DEF Defence Training Package

Release: 4.3

CONTENTS

DEF10117 Certificate I in Defence Skills 43
DEF20120 Certificate II in Explosive Ordnance 46
DEF20220 Certificate II in Explosive Ordnance Manufacture 48
DEF21115 Certificate II in Military Skills 51
DEF30117 Certificate III in Field Petroleum Operations 54
DEF30120 Certificate III in Explosive Ordnance Maintenance 57
DEF30217 Certificate III in Preventive Health 60
DEF30220 Certificate III in Explosive Ordnance Manufacture 63
DEF30317 Certificate III in Air Dispatch 67
DEF30320 Certificate III in Explosive Ordnance Operations 70
DEF30417 Certificate III in Defence Public Affairs 73
DEF30420 Certificate III in Explosive Ordnance Proof and Experimental 76
DEF40117 Certificate IV in Defence Public Affairs 79
DEF40120 Certificate IV in Explosive Ordnance Maintenance 81
DEF40217 Certificate IV in Intelligence Operations 85
DEF40220 Certificate IV in Explosive Ordnance Manufacture 88
DEF40317 Certificate IV in Psychological Support 92
DEF40320 Certificate IV in Explosive Ordnance Operations 94
DEF40417 Certificate IV in Defence Reporting 97
DEF40420 Certificate IV in Explosive Ordnance Proof and Experimental 99
DEF40517 Certificate IV in Test and Evaluation 102
DEF40520 Certificate IV in Simulator Maintenance 104
DEF40617 Certificate IV in Preventive Health 107
DEF40717 Certificate IV in Defence Paralegal Services 110
DEF40817 Certificate IV in Defence Financial Administration 113
DEF40917 Certificate IV in Performance Based Contracting 115
DEF43115 Certificate IV in Electronic Forensics 118
DEF50117 Diploma of Test and Evaluation 121
DEF50120 Diploma of Explosive Ordnance Manufacture 123
DEF50217 Diploma of Enterprise Architecture Practice 127
DEF50220 Diploma of Explosive Ordnance Proof and Experimental 129
DEF50317 Diploma of Compliance 132
DEF50320 Diploma of Explosives 134
DEF50417 Diploma of Defence Paralegal Services 137
DEF50420 Diploma of Simulator Maintenance Management 139
DEF50517 Diploma of Defence Public Affairs 142
DEF50617 Diploma of Preventive Health 144
DEF50717 Diploma of Range Control and Management 146
DEF50817 Diploma of Defence Financial Management 149
DEF51115 Diploma of Leadership 152
DEF53115 Diploma of Electronic Forensics 156
DEF53415 Diploma of Institutional and Operational Chaplaincy 159
DEF80120 Graduate Diploma of Explosives 162
DEF80220 Graduate Certificate in Explosives 164
DEFDCD001 Function in the Australian aerospace environment 166
Assessment Requirements for DEFDCD001 Function in the Australian aerospace environment 169
DEFDPL007 Provide high-level support on legal assistance matters 171

© Commonwealth of Australia, 2025 Public Skills Australia
Approved Page 2 of 5033
© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Requirements for DEFDPL007 Provide high-level support on legal assistance matters 174
DEFEVL003 Maintain and enhance professional practice 176
Assessment Requirements for DEFEVL003 Maintain and enhance professional practice179
DEFEXO016 Conduct explosives packaging inspection....181
Assessment Requirements for DEFEXO016 Conduct explosives packaging inspection ...183
DEFEXO017 Examine and certify free from explosives 185
Assessment Requirements for DEFEXO017 Examine and certify free from explosives...188
DEFEXO018 License explosive facilities and potential explosion sites....190
Assessment Requirements for DEFEXO018 License explosive facilities and potential explosion sites 193
DEFEXO019 Refurbish explosives packaging 195
Assessment Requirements for DEFEXO019 Refurbish explosives packaging 198
DEFEXO210 Manage explosive ordnance engineering and logistics processes 200
Assessment Requirements for DEFEXO210 Manage explosive ordnance engineering and logistics processes 204
DEFEXO215 Operate lighterage equipment....206
Assessment Requirements for DEFEXO215 Operate lighterage equipment 209
DEFEXO509 Perform purging 211
Assessment Requirements for DEFEXO509 Perform purging....214
DEFEXO510 Maintain small arms ammunition....216
Assessment Requirements for DEFEXO510 Maintain small arms ammunition 219
DEFEXO603 Conduct explosive ordnance trials 221
Assessment Requirements for DEFEXO603 Conduct explosive ordnance trials....224
DEFGEN002 Work independently 226
Assessment Requirements for DEFGEN002 Work independently 229
DEFGEN009 Analyse causes and identify countermeasures for injuries in physical activities 231
Assessment Requirements for DEFGEN009 Analyse causes and identify countermeasures for injuries in physical activities 234
DEFGEN016 Administer personnel 236
Assessment Requirements for DEFGEN016 Administer personnel....240
DEFGEN028 Assist in managing production processes 242
Assessment Requirements for DEFGEN028 Assist in managing production processes....244
DEFGEN307 Maintain logistic support in an adverse environment....246
Assessment Requirements for DEFGEN307 Maintain logistic support in an adverse environment....249
DEFGEN308 Provide specialist technical regulatory framework advice 251
Assessment Requirements for DEFGEN308 Provide specialist technical regulatory framework advice 254
DEFGEN310 Establish technical risk management systems 256
Assessment Requirements for DEFGEN310 Establish technical risk management systems259
DEFGEN311 Implement and manage technical risk management....261
Assessment Requirements for DEFGEN311 Implement and manage technical risk management 264
DEFGEN313 Establish technical data and information management systems....266
Assessment Requirements for DEFGEN313 Establish technical data and information management systems 269
DEFINT015 Locate electromagnetic emissions....271
Assessment Requirements for DEFINT015 Locate electromagnetic emissions 274
DEFINT016 Log target communications....276
Assessment Requirements for DEFINT016 Log target communications 279
DEFINT017 Analyse information for situational value....281

© Commonwealth of Australia, 2025 Public Skills Australia
Approved Page 3 of 5033
© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Requirements for DEFINT017 Analyse information for situational value 284
DEFINT018 Collect radio frequency emissions 286
Assessment Requirements for DEFINT018 Collect radio frequency emissions....289
DEFLAW008 Conduct a Defence administrative inquiry....292
Assessment Requirements for DEFLAW008 Conduct a Defence administrative inquiry 295
DEFMIL010 Operate a 22 gauge rifle....297
Assessment Requirements for DEFMIL010 Operate a 22 gauge rifle 300
DEFMIL011 Conduct individual and collective ceremonial drill 302
Assessment Requirements for DEFMIL011 Conduct individual and collective ceremonial drill....305
DEFMIL021 Observe and monitor hostile areas to detect targets....307
Assessment Requirements for DEFMIL021 Observe and monitor hostile areas to detect targets....310
DEFMIL022 Operate remote sensors to detect targets 312
Assessment Requirements for DEFMIL022 Operate remote sensors to detect targets.....315
DEFMIL025 Operate Defence communications equipment 317
Assessment Requirements for DEFMIL025 Operate Defence communications equipment320
DEFMIL026 Perform an individual static line parachute descent....322
Assessment Requirements for DEFMIL026 Perform an individual static line parachute descent....325
DEFMIL027 Perform a team free fall parachute descent....327
Assessment Requirements for DEFMIL027 Perform a team free fall parachute descent 331
DEFMIL028 Navigate in remote and unmodified landscapes....333
Assessment Requirements for DEFMIL028 Navigate in remote and unmodified landscapes337
DEFMIL030 Use individual protective equipment in a CBRN threat environment 339
Assessment Requirements for DEFMIL030 Use individual protective equipment in a CBRN threat environment....342
DEFMIL041 Operate and maintain an armoured vehicle....344
Assessment Requirements for DEFMIL041 Operate and maintain an armoured vehicle347
DEFMIL042 Operate and maintain armoured vehicle weapon systems 349
Assessment Requirements for DEFMIL042 Operate and maintain armoured vehicle weapon systems 352
DEFMIL043 Supervise an armoured vehicle and crew 354
Assessment Requirements for DEFMIL043 Supervise an armoured vehicle and crew 357
DEFMIL061 Operate indirect fire weapons....359
Assessment Requirements for DEFMIL061 Operate indirect fire weapons 362
DEFMIL064 Destroy hostile air targets using line of sight ground based air defence weapon systems 364
Assessment Requirements for DEFMIL064 Destroy hostile air targets using line of sight ground based air defence weapon systems 367
DEFMIL065 Observe targets and direct single asset firepower on a single target.....369
Assessment Requirements for DEFMIL065 Observe targets and direct single asset firepower on a single target....372
DEFMIL066 Observe targets and direct multi asset firepower on multiple targets 374
Assessment Requirements for DEFMIL066 Observe targets and direct multi asset firepower on multiple targets....377
DEFMIL068 Select sites for deployment in a threat environment....379
Assessment Requirements for DEFMIL068 Select sites for deployment in a threat environment....382
DEFMIL070 Observe targets and engage with joint asset firepower from any agency 384
Assessment Requirements for DEFMIL070 Observe targets and engage with joint asset firepower from any agency 388

DEFMIL071 Supervise the destruction of hostile air targets using line of sight ground based AD weapon systems....390
Assessment Requirements for DEFMIL071 Supervise the destruction of hostile air targets using line of sight ground based AD weapon systems....393
DEFMIL083 Collect environmental information....395
Assessment Requirements for DEFMIL083 Collect environmental information....398
DEFMIL084 Operate an inland tug boat....400
Assessment Requirements for DEFMIL084 Operate an inland tug boat....404
DEFMIL085 Construct equipment bridging....407
Assessment Requirements for DEFMIL085 Construct equipment bridging....410
DEFMIL086 Supervise engineering operations....413
Assessment Requirements for DEFMIL086 Supervise engineering operations....416
DEFMIL087 Supervise the construction of short term roads or tracks....419
Assessment Requirements for DEFMIL087 Supervise the construction of short term roads or tracks....423
DEFMIL090 Assist in the preparation, construction, operation and maintenance of a field water-point....426
Assessment Requirements for DEFMIL090 Assist in the preparation, construction, operation and maintenance of a field water-point....430
DEFMIL091 Prepare, operate and maintain small watercraft....432
Assessment Requirements for DEFMIL091 Prepare, operate and maintain small watercraft....436
DEFMIL092 Assist in the construction of wet gap crossings....438
Assessment Requirements for DEFMIL092 Assist in the construction of wet gap crossings441
DEFMIL093 Assist in the construction of dry gap crossings....443
Assessment Requirements for DEFMIL093 Assist in the construction of dry gap crossings446
DEFMIL094 Assist in the preparation, construction and maintenance of roads and tracks448
Assessment Requirements for DEFMIL094 Assist in the preparation, construction and maintenance of roads and tracks....451
DEFMIL095 Assist in the construction and maintenance of field structures....453
Assessment Requirements for DEFMIL095 Assist in the construction and maintenance of field structures....456
DEFMIL096 Prepare and operate a field water-point....458
Assessment Requirements for DEFMIL096 Prepare and operate a field water-point....461
DEFMIL097 Operate an inland modular raft or ferry....463
Assessment Requirements for DEFMIL097 Operate an inland modular raft or ferry....467
DEFMIL111 Undertake reconnaissance tasks....469
Assessment Requirements for DEFMIL111 Undertake reconnaissance tasks....472
DEFMIL112 Undertake surveillance tasks....474
Assessment Requirements for DEFMIL112 Undertake surveillance tasks....477
DEFMIL113 Operate a service pistol....479
Assessment Requirements for DEFMIL113 Operate a service pistol....482
DEFMIL114 Operate a sustained fire machine gun....484
Assessment Requirements for DEFMIL114 Operate a sustained fire machine gun....487
DEFMIL115 Operate sustained fire machine guns on operations....489
Assessment Requirements for DEFMIL115 Operate sustained fire machine guns on operations....492
DEFMIL116 Operate a shotgun....494
Assessment Requirements for DEFMIL116 Operate a shotgun....497
DEFMIL117 Throw grenades on operations....499
Assessment Requirements for DEFMIL117 Throw grenades on operations....502
DEFMIL118 Operate a grenade launcher....504
Assessment Requirements for DEFMIL118 Operate a grenade launcher....507

© Commonwealth of Australia, 2025 Public Skills Australia
Approved Page 5 of 5033
© Commonwealth of Australia, 2025 Public Skills Australia

DEFMIL119 Operate a mortar....509
Assessment Requirements for DEFMIL119 Operate a mortar....512
DEFMIL120 Operate a direct fire support weapon....514
Assessment Requirements for DEFMIL120 Operate a direct fire support weapon....517
DEFMIL121 Operate direct fire support weapon systems on operations....519
Assessment Requirements for DEFMIL121 Operate direct fire support weapon systems on operations....522
DEFMIL123 Employ hand operated pyrotechnics....524
Assessment Requirements for DEFMIL123 Employ hand operated pyrotechnics....527
DEFMIL124 Destroy targets using a direct fire guided weapons system....529
Assessment Requirements for DEFMIL124 Destroy targets using a direct fire guided weapons system....532
DEFMIL126 Operate a light support weapon on operations....534
Assessment Requirements for DEFMIL126 Operate a light support weapon on operations537
DEFMIL129 Observe and direct machine gun fire....539
Assessment Requirements for DEFMIL129 Observe and direct machine gun fire....542
DEFMIL130 Supervise sniper operations....544
Assessment Requirements for DEFMIL130 Supervise sniper operations....547
DEFMIL131 Undertake stability actions....549
Assessment Requirements for DEFMIL131 Undertake stability actions....552
DEFMIL132 Undertake defensive actions....554
Assessment Requirements for DEFMIL132 Undertake defensive actions....557
DEFMIL133 Undertake offensive actions....559
Assessment Requirements for DEFMIL133 Undertake offensive actions....562
DEFMIL134 Undertake sniper tasks....564
Assessment Requirements for DEFMIL134 Undertake sniper tasks....567
DEFMIL137 Apply non-lethal unarmed self-defence techniques....569
Assessment Requirements for DEFMIL137 Apply non-lethal unarmed self-defence techniques....572
DEFMIL138 Supervise a section during defensive operations....574
Assessment Requirements for DEFMIL138 Supervise a section during defensive operations....577
DEFMIL139 Supervise a section during offensive operations....579
Assessment Requirements for DEFMIL139 Supervise a section during offensive operations....582
DEFMIL140 Supervise platoon level defensive operations....584
Assessment Requirements for DEFMIL140 Supervise platoon level defensive operations587
DEFMIL141 Supervise platoon level offensive operations....589
Assessment Requirements for DEFMIL141 Supervise platoon level offensive operations592
DEFMIL142 Support sub-unit level defensive operations....594
Assessment Requirements for DEFMIL142 Support sub-unit level defensive operations597
DEFMIL143 Support sub-unit level offensive operations....600
Assessment Requirements for DEFMIL143 Support sub-unit level offensive operations 603
DEFMIL144 Apply lethal close quarter fighting techniques....605
Assessment Requirements for DEFMIL144 Apply lethal close quarter fighting techniques605
DEFMIL145 Supervise the application of non-lethal unarmed self-defence techniques...605
Assessment Requirements for DEFMIL145 Supervise the application of non-lethal unarmed self-defence techniques....605
DEFMIL146 Supervise the application of lethal close quarter fighting techniques....605
Assessment Requirements for DEFMIL146 Supervise the application of lethal close quarter fighting techniques....605
DEFRNG012 Manage training areas and ranges....607
Assessment Requirements for DEFRNG012 Manage training areas and ranges....610

DEFRNG016 Coordinate training area and range activities 612
Assessment Requirements for DEFRNG016 Coordinate training area and range activities 614
DEFRNG017 Develop and maintain training area and range standing orders 616
Assessment Requirements for DEFRNG017 Develop and maintain training area and range standing orders 619
DEFRNG018 Monitor and control training area and range visits 621
Assessment Requirements for DEFRNG018 Monitor and control training area and range visits 624
DEFSIM010 Apply knowledge of simulator systems and architecture 626
Assessment Requirements for DEFSIM010 Apply knowledge of simulator systems and architecture 629
DEFSIM011 Fault find and repair simulator control systems 631
Assessment Requirements for DEFSIM011 Fault find and repair simulator control systems 634
DEFSIM012 Fault find and repair simulator motion systems 636
Assessment Requirements for DEFSIM012 Fault find and repair simulator motion systems 639
DEFSIM013 Manage simulator accreditation or in service testing 641
Assessment Requirements for DEFSIM013 Manage simulator accreditation or in service testing 644
DEFSIM014 Work effectively with simulator systems 646
Assessment Requirements for DEFSIM014 Work effectively with simulator systems 649
DEFSIM015 Fault find and repair simulator power distribution and control systems 651
Assessment Requirements for DEFSIM015 Fault find and repair simulator power distribution and control systems 654
DEFSIM016 Fault find and repair simulator computer systems and peripheral hardware 656
Assessment Requirements for DEFSIM016 Fault find and repair simulator computer systems and peripheral hardware 659
DEFSIM017 Fault find and repair simulator image generator and visual display systems 661
Assessment Requirements for DEFSIM017 Fault find and repair simulator image generator and visual display systems 664
DEFSIM018 Fault find and repair simulator sound systems 666
Assessment Requirements for DEFSIM018 Fault find and repair simulator sound systems 669
DEFSIM019 Fault find and repair simulator weapons systems 671
Assessment Requirements for DEFSIM019 Fault find and repair simulator weapons systems 674
DEFSIM020 Conduct simulator performance evaluation 676
Assessment Requirements for DEFSIM020 Conduct simulator performance evaluation 679
DEFSIM021 Operate the simulator for testing purposes 681
Assessment Requirements for DEFSIM021 Operate the simulator for testing purposes . 684
DEFTRP001 Operate a vehicle in an environment of threat 686
Assessment Requirements for DEFTRP001 Operate a vehicle in an environment of threat 689
DEFTRP002 Operate a vehicle at night 691
Assessment Requirements for DEFTRP002 Operate a vehicle at night 694
DEFTRP003 Operate a vehicle over difficult terrain 696
Assessment Requirements for DEFTRP003 Operate a vehicle over difficult terrain 699
DEFTRP004 Operate a vehicle using night fighting equipment (NFE) 701
Assessment Requirements for DEFTRP004 Operate a vehicle using night fighting equipment (NFE) 704
DEFTRP005 Operate a multi-axle trailer 706
Assessment Requirements for DEFTRP005 Operate a multi-axle trailer 709
DEFWDV001 Dive using self-contained underwater breathing apparatus in open water to 30 metres 711

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Requirements for DEFWDV001 Dive using self-contained underwater breathing apparatus in open water to 30 metres 715
DEFWDV002 Support SCUBA diving operations from the surface....718
Assessment Requirements for DEFWDV002 Support SCUBA diving operations from the surface....721
DEFWDV003 Act as a standby diver....724
Assessment Requirements for DEFWDV003 Act as a standby diver....727
DEFWDV004 Dive using surface-supplied breathing apparatus in open water to 30 metres729
Assessment Requirements for DEFWDV004 Dive using surface-supplied breathing apparatus in open water to 30 metres....732
DEFWDV005 Dive using closed-circuit breathing apparatus (N2O2) in open water to a maximum depth of 40 metres 734
Assessment Requirements for DEFWDV005 Dive using closed-circuit breathing apparatus (N2O2) in open water to a maximum depth of 40 metres 737
DEFWDV006 Dive using closed-circuit breathing apparatus (O2) in open water to a maximum depth of 10 metres 739
Assessment Requirements for DEFWDV006 Dive using closed-circuit breathing apparatus (O2) in open water to a maximum depth of 10 metres 742
DEFWDV007 Dive using closed-circuit breathing apparatus (HeO2) in open water to a maximum depth of 60 metres 744
Assessment Requirements for DEFWDV007 Dive using closed-circuit breathing apparatus (HeO2) in open water to a maximum depth of 60 metres 747
DEFWDV008 Employ hand tools in an underwater environment....750
Assessment Requirements for DEFWDV008 Employ hand tools in an underwater environment....753
DEFWDV009 Conduct an underwater search of a ship's hull 755
Assessment Requirements for DEFWDV009 Conduct an underwater search of a ship's hull....757
DEFWDV010 Employ power tools in an underwater environment....759
Assessment Requirements for DEFWDV010 Employ power tools in an underwater environment....762
DEFWDV011 Perform non-technical structural inspections underwater....765
Assessment Requirements for DEFWDV011 Perform non-technical structural inspections underwater 768
DEFWDV012 Perform underwater beach and waterway surveys....771
Assessment Requirements for DEFWDV012 Perform underwater beach and waterway surveys 774
DEFWDV013 Employ air-lift devices underwater 777
Assessment Requirements for DEFWDV013 Employ air-lift devices underwater....780
DEFWDV014 Perform concreting in an underwater environment 782
Assessment Requirements for DEFWDV014 Perform concreting in an underwater environment....785
DEFWDV015 Employ explosive power tools in an underwater environment 788
Assessment Requirements for DEFWDV015 Employ explosive power tools in an underwater environment....791
DEFWDV016 Perform underwater rigging work....793
Assessment Requirements for DEFWDV016 Perform underwater rigging work 796
DEFWDV017 Employ thermal cutting and welding tools (non-load bearing) in an underwater environment....799
Assessment Requirements for DEFWDV017 Employ thermal cutting and welding tools (non-load bearing) in an underwater environment 802
DEFWHS002 Develop noise management plans....805
Assessment Requirements for DEFWHS002 Develop noise management plans 808

DEF10117 Certificate I in Defence Skills

Modification History

Release 4. Updated superseded general elective units.

Release 3. This qualification released in the DEF Defence Training Package Release 4.2. Minor update to DEFMIL008 Display the attributes of Defence personnel.

Release 2. This qualification released in the DEF Defence Training Package Release 2.2.

Release 1. This is the first release of this qualification in the DEF Defence Training Package.

Qualification Description

Additional qualification advice

This is an entry-level qualification for the attainment of competencies relevant to working in the Defence Organisation.

Formal permission must be sought for use of the Defence logo or uniforms when undertaking training for this qualification.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

9 units of competency are required for this qualification comprising:

- **4 core units** listed below, **plus**
- **5 elective units**.

Choose a minimum of **3 elective units** from the list below, of which **1** must be taken from **Group A**, **1** must be taken from **Group B** and **1** must be taken from **Group C.**

Choose the remaining **2 elective units** from the elective unit lists below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units chosen from outside this qualification must support the learning outcomes of this AQF qualification level.

Elective units chosen must not duplicate content already covered by other units in this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

DEFGEN001 Work in a team

© Commonwealth of Australia, 2025 Public Skills Australia

DEFGEN006	Work with equity and diversity
DEFMIL007	Participate in ceremonial activities
DEFMIL009	Integrate into the Defence working environment

Group A: Specialisation elective units (Communication)

BSBCMM101	Apply basic communication skills
BSBCMM201	Communicate in the workplace

Group B: Specialisation elective units (Work Health and Safety)

TLIF1001	Follow work health and safety procedures
BSBWHS201	Contribute to health and safety of self and others

Group C: General elective units

BSBOPS101	Use business resources
BSBTEC101	Operate digital devices
BSBSUS211	Participate in sustainable work practices
BSBPEF202	Plan and apply time management
DEFMIL008	Display the attributes of Defence personnel
HLTAID011	Provide First Aid
ICTICT103	Use, communicate and search securely on the internet
MEM50009B	Safely operate a mechanically powered recreational boat
PSPGEN009	Work effectively in the organisation
PUAOPE013	Operate communications systems and equipment
SISOBWG201A	Demonstrate bushwalking skills in a controlled environment
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISOOPS201A	Minimise environmental impact
SISOOPS202A	Use and maintain a temporary or overnight site
SISOYSB201A	Demonstrate basic skills to sail a small boat in controlled conditions

© Commonwealth of Australia, 2025 Public Skills Australia

Qualification Mapping Information

Supersedes DEF10112 - Certificate I in Defence Force Cadets.

DEF20120 Certificate II in Explosive Ordnance

Modification History

Release 1. This qualification was released in DEF Defence Training Package release 3.0.

Qualification Description

This qualification allows for the attainment of competencies in explosive ordnance.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

Nil

Packaging Rules

11 units of competency are required for this qualification:

- 2 core units
- 9 elective units

Choose a minimum of 7 electives from the list below.

Choose the remaining 2 electives from the list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and learning outcomes of this AQF qualification level.

Elective units selected must not duplicate content already covered by other units in this qualification.

Core units

DEFEXO001	Work safely with explosive ordnance
TLID1001	Shift materials safely using manual handling methods

Group A: General elective units

BSBSUS211	Participate in sustainable work practices
DEFEXO002	Respond to fire
DEFEXO017	Examine and certify free from explosives

© Commonwealth of Australia, 2025 Public Skills Australia

DEFEXO005	Package explosives
DEFEXO006	Unpackage explosives
DEFEXO007	Monitor explosive ordnance environmental conditions
DEFEXO009	Conduct broken seal inspection
DEFEXO016	Conduct explosives packaging inspection
DEFEXO019	Refurbish explosives packaging
DEFEXO012	Conduct electrical/electronic circuitry tests
DEFEXO013	Conduct external explosive ordnance maintenance
DEFEXO014	Gauge explosives
DEFEXO062	Operate a small quantity explosives facility
HLTAID011	Provide First Aid
PUAFER004	Respond to facility emergencies
TLIA2012	Pick and process orders
TLIA2013	Receive goods
TLIA2021	Despatch stock
TLID2012	Operate specialised load shifting equipment
TLIF1002	Conduct housekeeping activities
TLIF2012	Apply safe procedures when handling/transporting dangerous goods or explosives

Qualification Mapping Information

This qualification supersedes and is equivalent to DEF22115 Certificate II in Explosive Ordnance.

DEF20220 Certificate II in Explosive Ordnance Manufacture

Modification History

Release 1. This qualification was released in DEF Defence Training Package release 3.0.

Qualification Description

This qualification allows for the attainment of competencies in explosive ordnance manufacture.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

Nil

Packaging Rules

11 units of competency are required for this qualification:

- 2 core units
- 9 elective units

Choose a minimum of 7 electives from the list below, of which at least 4 must be taken from Group A.

Choose the remaining 2 electives from the list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and learning outcomes of this AQF qualification level.

Elective units selected must not duplicate content already covered by other units in this qualification.

Core units

DEFEXO001	Work safely with explosive ordnance
TLID1001	Shift materials safely using manual handling methods

Group A: Specialisation units

DEFEXO003	Establish and maintain the safety and security of explosive warehouses and workshops
DEFEXO017	Examine and certify free from explosives

© Commonwealth of Australia, 2025 Public Skills Australia

DEFEXO005	Package explosives
DEFEXO006	Unpackage explosives
DEFEXO007	Monitor explosive ordnance environmental conditions
DEFEXO016	Conduct explosives packaging inspection
DEFEXO019	Refurbish explosives packaging
DEFEXO012	Conduct electrical/electronic circuitry tests
DEFEXO013	Conduct external explosive ordnance maintenance
DEFEXO014	Gauge explosives
DEFWHS010	Identify confined space
DEFWHS011	Enter confined space
TLID2012	Operate specialised load shifting equipment
TLIF1002	Conduct housekeeping activities
TLIF2012	Apply safe procedures when handling/transporting dangerous goods or explosives

Group B: General elective units

BSBSUS211	Participate in sustainable work practices
DEFEXO002	Respond to fire
DEFMIL089	Shift loads manually utilising non-motorised equipment
HLTAID011	Provide First Aid
MSMENV272	Participate in environmentally sustainable work practices
MSMPCII295	Operate manufacturing equipment
MSMPCII297	Make an object from cloth using an existing pattern
MSMPCII298	Make an object from metal
MSMSUP102	Communicate in the workplace
MSMSUP210	Process and record information
MSMSUP240	Undertake minor maintenance

© Commonwealth of Australia, 2025 Public Skills Australia

MSMSUP292	Sample and test materials and product
MSS402001	Apply competitive systems and practices
MSS402002	Sustain process improvements
MSS402010	Manage the impact of change on own work
MSS402031	Interpret product costs in terms of customer requirements
MSS402050	Monitor process capability
MSS402051	Apply quality standards
MSS402080	Undertake root cause analysis
PMAOPS101	Read dials and indicators
PMAOPS105	Select and prepare materials
PMAOPS201	Operate fluid flow equipment
PMAOPS204	Select and use utilities and services Elective
PMAOPS205	Operate heat exchangers
PMAOPS216	Operate local control system
PMAOPS222	Operate and monitor pumping systems and equipment
PUAFER004	Respond to facility emergencies
TLIA2011	Package goods
TLID2010	Operate a forklift

Qualification Mapping Information

This qualification supersedes and is equivalent to DEF22215 Certificate II in Explosive Ordnance Manufacture.

DEF21115 Certificate II in Military Skills

Modification History

Release 2 This version was released in DEF Defence Training Package release 4.2. Unit DEFMIL008 Display the attributes of Defence personnel - name updated to current version.

Release 1 This version was released in DEF Defence Training Package release 1.0 and meets the requirements of the Standards for Training Packages.

Supersedes and is not equivalent to DEF21112 Certificate II in Military Skills.

- DEF unit codes updated
- Imported units updated
- PUATEA001B/BSBADM101A/ICAU1133B/PUACOM005B/PUATEA005A/SISOOPS201A/BSBITU101A have been removed
- SISONAV201A/CPCCOHS1001A have been added
- DEFEQ001C has moved from core to electives
- DEFCA416C has been removed
- DEFCM106C has moved from electives to core
- DEFGEN001 new unit added as a core
- DEFGEN013 new unit added to electives

Qualification Description

This qualification allows for the attainment of competencies in military skills for a recruit in the military, working at entry level. Individuals would usually immediately progress to a Certificate III or IV in their chosen trade (for example aviation mechanic, health worker, combat system operator, etc.).

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

12 units of competency are required for this qualification:

- 3 core units
- 9 elective units

Choose a minimum of 5 elective units from the list below.

Choose the remaining 4 elective units from the list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and

© Commonwealth of Australia, 2025 Public Skills Australia

learning outcomes of this AQF qualification level. Seek further advice on selecting imported units of competency in the DEF Implementation Guide.

Elective units selected must not duplicate content already covered by other units in this qualification.

Core units

DEFMIL008	Display the attributes of Defence personnel
DEFMIL003	Operate a service rifle
DEFGEN001	Work in a team

Group A: Elective units

DEFGEN006	Work with equity and diversity
DEFGEN013	Provide Initial Response to Combat Casualty
DEFMIL001	Use personal camouflage and concealment in a threat environment
DEFMIL002	Operate night fighting equipment
DEFMIL004	Operate a light support weapon
DEFMIL005	Operate a service hand grenade
DEFMIL006	Operate in a threat environment
DEFMIL007	Participate in ceremonial activities
PUAOPE013A	Operate communications systems and equipment
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISONAV302A	Apply navigation skills in an intermediate environment
BSBCMM101	Apply basic communication skills
BSBWHS201	Contribute to health and safety of self and others
BSBCMM201	Communicate in the workplace
BSBSUS201A	Participate in environmentally sustainable work practices
CPCCOHS1001A	Work safely in the construction industry
PSPGOV201B	Work in a public sector environment

© Commonwealth of Australia, 2025 Public Skills Australia

PSPGOV204B	Access and use resources
PSPGOV207B	Use technology in the workplace

Qualification Mapping Information

No equivalent qualification.

DEF30117 Certificate III in Field Petroleum Operations

Modification History

Release 2. Updated superseded HLT specialist elective unit.

Release 1. This is the first release of this qualification in the DEF Defence Training Package.

Qualification Description

This qualification allows for the attainment of competencies in field petroleum operations.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

17 units of competency are required for this qualification comprising:

- 6 core units listed below, plus
- 11 elective units.

Choose a minimum of 10 elective units from the list below, of which 4 must be taken from Group A, 4 must be taken from Group B and 2 must be taken from Group C.

Choose the remaining 1 elective unit from the elective unit lists below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units chosen from outside this qualification must support the learning outcomes of this AQF qualification level.

Elective units chosen must not duplicate content already covered by other units in this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

DEFMIL006	Operate in a threat environment
DEFPET001	Conduct field refuelling operations from a bulk fuel installation
DEFPET002	Conduct field refuelling operations using drum stock
DEFPET003	Test fuel hoses
DEFPET004	Assist in the construction and maintenance of a non-permanent bulk fuel installation

© Commonwealth of Australia, 2025 Public Skills Australia

DEFPET005	Assist in the construction and operation of a non-permanent inland pipeline system

Group A: Specialisation elective units (Petroleum)

AVIW3006	Refuel aircraft
DEFCMD001	Marshal aircraft
DEFPET006	Assist in the operation of the tank fabric collapsible marine system
DEFPET007	Assist in the operation of the towed flexible barge system
SITTVAF005	Fill LPG gas cylinders
TLID3024	Use specialised liquid bulk transfer equipment (gravity/pressurised)

Group B: Specialisation elective units (Work Health and Safety)

DEFEXO002	Respond to fire
DEFWHS010	Identify confined space
DEFWHS011	Enter confined space
DEFWHS012	Test confined space environment
HLTAID011	Provide First Aid
TLID1001	Shift materials safely using manual handling methods
TLIF2012	Apply safe procedures when handling/transporting dangerous goods or explosives

Group C: Specialisation elective units (Transport)

TLID2004	Load and unload goods/cargo
TLID2010	Operate a forklift
TLID3027	Prepare for transport of dangerous goods
TLID3043	Shift loads using gantry equipment

Qualification Mapping Information

This qualification replaces but is not equivalent to DEF32612 Certificate III in Field Petroleum Operations.

DEF30120 Certificate III in Explosive Ordnance Maintenance

Modification History

Release 1. This qualification was released in DEF Defence Training Package release 3.0.

Qualification Description

This qualification allows for the attainment of competencies in explosive ordnance maintenance.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

Nil

Packaging Rules

15 units of competency are required for this qualification:

- 2 core units
- 13 elective units

Choose a minimum of 11 electives from the list below, of which at least 4 must be taken from Group A.

Choose the remaining 2 electives from the list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and learning outcomes of this AQF qualification level.

Elective units selected must not duplicate content already covered by other units in this qualification.

Core units

DEFEXO001	Work safely with explosive ordnance
TLID1001	Shift materials safely using manual handling methods

Group A: Specialisation units

DEFEXO003	Establish and maintain the safety and security of explosive warehouses and workshops
DEFEXO008	Conduct explosives inspection

© Commonwealth of Australia, 2025 Public Skills Australia

DEFEXO021	Breakdown explosive ordnance
DEFEXO022	Fuze and defuze explosive ordnance
DEFEXO023	Assemble and disassemble explosive components
DEFEXO063	Operate a large quantity explosives facility
DEFEXO064	Load and unload platforms
DEFEXO066	Inspect explosive facilities
DEFEXO068	Establish and operate an explosive field storage site
DEFEXO071	Test for the presence of explosive substances
DEFEXO101	Dispose of explosives
DEFEXO102	Destroy unexploded ordnance
DEFGEN007	Conduct risk assessment in a Defence environment
DEFGEN008	Treat risk within Defence at an operational level
DEFGEN014	Act as a range safety officer on a permanent range
DEFGEN024	Supervise engineering and logistic tasks
DEFMIL127	Conduct range practices
TLIB3006	Carry out inspection of vehicles designed to carry special loads
TLIC3063	Operate vehicle carrying special loads
TLID2016	Load and unload explosives/dangerous goods
TLID3015	Identify and label explosives/dangerous goods
TLID3027	Prepare for transport of dangerous goods
TLIF2012	Apply safe procedures when handling/transporting dangerous goods or explosives

Group B: General elective units

BSBSUS211	Participate in sustainable work practices
DEFEXO002	Respond to fire
DEFEXO017	Examine and certify free from explosives

© Commonwealth of Australia, 2025 Public Skills Australia

DEFEXO005	Package explosives
DEFEXO006	Unpackage explosives
DEFEXO007	Monitor explosive ordnance environmental conditions
DEFEXO016	Conduct explosive packaging inspection
DEFEXO019	Refurbish explosives packaging
DEFEXO012	Conduct electrical/electronic circuitry tests
DEFEXO013	Conduct external explosive ordnance maintenance
DEFEXO014	Gauge explosives
HLTAID011	Provide First Aid
PUAFER004	Respond to facility emergencies
TLIA2022	Participate in stocktakes
TLIA3015	Complete receival/despatch documentation
TLID2012	Operate specialised load shifting equipment
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIF1002	Conduct housekeeping activities

Qualification Mapping Information

This qualification supersedes and is equivalent to DEF32315 Certificate III in Explosive Ordnance Maintenance.

DEF30217 Certificate III in Preventive Health

Modification History

Release 3. Updated superseded general elective units.

Release 2. Modifications have been made to:

- Unit HLTDEF001 deleted due to zero enrolment

Release 1. This is the first release of this qualification in the DEF Defence Training Package.

Qualification Description

This qualification allows for the attainment of entry-level competencies in preventive health.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

18 units of competency are required for this qualification comprising:

- 4 core units listed below, plus
- 14 elective units.

Choose a minimum of 12 elective units from the list below, of which 3 must be taken from Group A, 3 must be taken from Group B and 6 must be taken from Group C.

Choose the remaining 2 elective units from the elective unit lists below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units chosen from outside this qualification must support the learning outcomes of this AQF qualification level.

Elective units chosen must not duplicate content already covered by other units in this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

DEFPHL001	Contribute to environmental health operations
DEFPHL002	Assist with quick assessment of disease outbreak
DEFPHL004	Undertake a vector borne diseases surveillance program
DEFPHL005	Assist with field hygiene and sanitation

© Commonwealth of Australia, 2025 Public Skills Australia

Group A: Specialisation elective units (Work Health and Safety)

BSBWHS303	Participate in WHS hazard identification, risk assessment and risk control
BSBWHS304	Participate effectively in WHS communication and consultation processes
BSBWHS305	Contribute to WHS issue resolution
BSBWHS406	Assist with responding to incidents

Group B: Specialisation elective units

DEFPHL003	Operate environmental measuring devices
DEFPHL006	Monitor water handling and distribution practices
DEFPHL007	Conduct chlorine dosing of water at the point of supply
NWPGEN007	Sample and test drinking water

Group C: General elective units

BSBINS302	Organise workplace information
BSBLDR301	Support effective workplace relationships
BSBPEF301	Organise personal work priorities
BSBSUS211	Participate in sustainable work practices
BSBTWK201	Work effectively with others
BSBWRT311	Write simple documents
CPCCVE1011A	Undertake a basic construction project
FBPOPR2066	Apply sampling procedures
HLTAID011	Provide First Aid
MEM18001C	Use hand tools
MEM18002B	Use power tools/hand held operations
PUACOM002	Provide services to clients
PUAOPE015	Conduct briefings and debriefings

© Commonwealth of Australia, 2025 Public Skills Australia

Qualification Mapping Information

This qualification replaces but is not equivalent to DEF32812 Certificate III in Preventive Health.

DEF30220 Certificate III in Explosive Ordnance Manufacture

Modification History

Release 1. This qualification was released in DEF Defence Training Package release 3.0.

Qualification Description

This qualification allows for the attainment of competencies in explosive ordnance manufacture.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

Nil

Packaging Rules

16 units of competency are required for this qualification:

- 2 core units
- 14 elective units

Choose a minimum of 12 electives from the list below, of which at least 7 must be taken from Group A.

Choose the remaining 2 electives from the list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and learning outcomes of this AQF qualification level.

Where a pre-requisite unit is attached to an elective unit it is identified by this symbol ∟.

The pre-requisite units attached to any of the elective units must be undertaken and are additional to the number of elective units required for the qualification.

Elective units selected must not duplicate content already covered by other units in this qualification.

Core units

DEFEXO001	Work safely with explosive ordnance
TLID1001	Shift materials safely using manual handling methods

Group A: Specialisation units

© Commonwealth of Australia, 2025 Public Skills Australia

DEFEXO008	Conduct explosives inspection
DEFEXO022	Fuze and defuze explosive ordnance
DEFEXO023	Assemble and disassemble explosive components
DEFEXO066	Inspect explosive facilities
DEFEXO071	Test for the presence of explosive substances
DEFEXO101	Dispose of explosives
DEFEXO103	Dispose of non-explosive dangerous goods
DEFGEN024	Supervise engineering and logistic tasks
DEFWHS012	Test confined space environment
DEFWHS013	Control entry to confined spaces
DEFWHS014	Monitor and report on hazardous substances safety
MSMSUP390	Use structured problem-solving tools
PMAWHS310	Investigate incidents
PMAOPS300	Operate a production unit
PMAOPS305	Operate process control systems
PMAOPS201	Operate fluid flow equipment
PMAOPS307	Transfer bulk fluids into/out of storage facility ∟ PMAOPS201 Operate fluid flow equipment
PUAEMR009	Facilitate emergency risk assessment
TLIB3006	Carry out inspection of vehicles designed to carry special loads
TLIC3063	Operate vehicle carrying special loads
TLID3015	Identify and label explosives/dangerous goods
TLID2016	Load and unload explosives/dangerous goods

Group B: General elective units

BSBSUS211	Participate in sustainable work practices
BSBWHS311	Assist with maintaining workplace safety

© Commonwealth of Australia, 2025 Public Skills Australia

DEFEXO002	Respond to fire
DEFEXO064	Load and unload platforms
DEFEXO081	Apply a knowledge of the service environment
DEFEXO102	Destroy unexploded ordnance
DEFGEN006	Work with equity and diversity
DEFMIL089	Shift loads manually utilising non-motorised equipment
MSMWHS200	Work safely
MSMWHS210	Undertake first response to non-fire incidents
MSMWHS300	Facilitate the implementation of WHS for a work group ∟ MSMWHS200 Work safely
MSS402001	Apply competitive systems and practices
MSS402002	Sustain process improvements
MSS402010	Manage the impact of change on own work
MSS402020	Apply quick changeover procedures
MSS402021	Apply Just In Time procedures
MSS402030	Apply cost factors to work practices
MSS402031	Interpret product costs in terms of customer requirements
MSS402040	Apply 5S procedures
MSS402050	Monitor process capability
MSS402051	Apply quality standards
MSS402083	Use planning software systems in operations
MSS402061	Use SCADA systems in operations
MSS402080	Undertake root cause analysis
MSS402081	Contribute to the application of a proactive maintenance strategy
MSS403001	Review competitive systems and practices
MSS403085	Ensure process improvements are sustained

© Commonwealth of Australia, 2025 Public Skills Australia

MSS403010	Facilitate change in an organisation implementing competitive systems and practices
MSS403021	Facilitate a Just in Time system
MSS403086	Improve cost factors in work practices
MSS403032	Analyse manual handling processes
MSS403040	Facilitate and improve implementation of 5S
MSS403087	Mistake proof an operational process
MSS404084	Undertake process capability improvements
MSS404054	Apply statistics to operational processes
MSS404060	Facilitate the use of planning software systems in a work area or team
MSS404061	Facilitate the use of SCADA systems in a team or work area
MSS404085	Undertake proactive maintenance analyses
MSS404086	Assist in implementing a proactive maintenance strategy
PUAEMR006	Assess operational risk
PUAEMR011	Manage and evaluate emergency management exercises
PUAEMR013	Design emergency management exercises
TLID2012	Operate specialised load shifting equipment
TLIF1002	Conduct housekeeping activities
TLIF2012	Apply safe procedures when handling/transporting dangerous goods or explosives

Qualification Mapping Information

This qualification supersedes and is equivalent to DEF32115 Certificate III in Explosive Ordnance Manufacture.

DEF30317 Certificate III in Air Dispatch

Modification History

Release 3. Updated superseded general elective units.

Release 2. Modifications have been made to:

- Unit AVID0001 deleted due to zero enrolment

Release 1. This is the first release of this qualification in the DEF Defence Training Package.

Qualification Description

This qualification allows for the attainment of competencies in air dispatch in Defence or a similar environment.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

16 units of competency are required for this qualification comprising:

- 8 core units listed below, plus
- 8 elective units.

Choose a minimum of 6 elective units from the list below, of which 2 must be taken from Group A, 2 must be taken from Group B and 2 must be taken from Group C.

Choose the remaining 2 elective units from the elective unit lists below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units chosen from outside this qualification must support the learning outcomes of this AQF qualification level.

Elective units chosen must not duplicate content already covered by other units in this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

DEFADI001	Hook up external lift loads
DEFADI002	Assist in establishing and clearing a cargo drop zone
DEFADI003	Rig and dispatch air-drop loads

© Commonwealth of Australia, 2025 Public Skills Australia

DEFADI004	Work safely and efficiently in and around rotary wing aircraft
DEFADI005	Work safely and effectively in and around aircraft on the airside
DEFADI006	Prepare and rig platform air-drop loads
DEFADI007	Load and secure cargo during fixed wing air-land tasks
DEFMIL006	Operate in a threat environment

Group A: Specialisation elective units

BSBWHS201	Contribute to health and safety of self and others
DEFEXO001	Work safely with explosive ordnance
HLTAID011	Provide First Aid
TLID1001	Shift materials safely using manual handling methods
TLID2003	Handle dangerous goods/hazardous substances

Group B: Technical elective units

TLIA3015	Complete receival/despatch documentation
TLID2004	Load and unload goods/cargo
TLID2047	Prepare cargo for transfer with slings
TLIE3002	Estimate/calculate mass, area and quantify dimensions

Group C: General elective units

BSBINS201	Process and maintain workplace information
DEFGEN001	Work in a team
DEFGEN006	Work with equity and diversity
TLIB0012	Maintain and use hand tools
TLIE2007	Use communications systems
TLIE3004	Prepare workplace documents

Qualification Mapping Information

This qualification replaces but is not equivalent to DEF32412 Certificate III in Air Dispatch.

DEF30417 Certificate III in Defence Public Affairs

Modification History

Release 1. Core - Removal of PUACOM001C, PUACOM003B, PUACOM010B, PUACOM011B, PUACOM012B

Core – Inclusion of DEFGEN002, DEFGEN006, DEFGEN019, DEFDPA002, DEFDPA009

Group A – Removal of DEFEQ001C, DEFPR303B, BSBOHS201A, PSPGOV301B, PSPGOV303B, PUACOM002B

Group A – Inclusion of PSPGEN003, PUACOM001C, PUACOM003B, PUACOM005B, PUACOM006B, PUACOM007B, PUACOM011B, PUACOM012B

Group A – Update of BSBWOR301

Group B – Removal of DEFPA002, PUATEA001B, PUACOM005B, PUACOM006B, PUACOM007B

Group B – Inclusion of BSBWHS201, PSPGEN011

Not equivalent to DEF33012 Certificate III in Defence Public Affairs

Qualification Description

This qualification allows for the attainment of competencies in Defence public affairs.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

13 units of competency are required for this qualification comprising:

- 6 core units listed below, plus
- 7 elective units.

Choose 5 elective units from Group A elective units listed below.

Choose 2 elective units from either Group B general elective units or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units chosen from outside this qualification must support the learning outcomes of this AQF qualification level.

Elective units chosen must not duplicate content already covered by other units in this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

© Commonwealth of Australia, 2025 Public Skills Australia

Core units

DEFDPA001	Promote the organisation's mission and values
DEFDPA002	Identify material suitable for media publication
DEFDPA009	Apply knowledge of public affairs in a service environment
DEFGEN001	Work in a team
DEFGEN006	Work with equity and diversity
DEFGEN019	Write material suitable for publication within Defence

Group A: Specialisation elective units

BSBWOR301	Organise personal work priorities and development
PSPGEN003	Deliver a service to clients
PUACOM001C	Communicate in the workplace
PUACOM003B	Manage information
PUACOM005B	Foster a positive organisational image in the community
PUACOM006B	Plan and conduct a public awareness program
PUACOM007B	Liaise with other organisations
PUACOM011B	Develop community awareness networks
PUACOM012B	Liaise with media at a local level

Group B: General elective units

BSBWHS201	Contribute to health and safety of self and others
PSPGEN011	Build and maintain internal networks
PUAMAN002B	Administer work group resources
PUAOPE015A	Conduct briefings and debriefings

Qualification Mapping Information

This qualification replaces but is not equivalent to DEF33012 Certificate III in Defence Public Affairs.

DEF40117 Certificate IV in Defence Public Affairs

Modification History

Release 1. This is the first release of this qualification in the DEF Defence Training Package.

Qualification Description

This qualification allows for the attainment of competencies in Defence public affairs.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

14 units of competency are required for this qualification comprising:

- 7 core units listed below, plus
- 7 elective units.

Choose a minimum of 5 elective units from the list below.

Choose the remaining 2 elective units from the elective unit list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units chosen from outside this qualification must support the learning outcomes of this AQF qualification level.

Elective units chosen must not duplicate content already covered by other units in this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

DEFDPA002	Identify material suitable for media publication
DEFDPA004	Manage media requirements at major events
DEFDPA005	Develop and implement media plans
DEFDPA006	Develop and implement a public affairs strategic plan
DEFDPA007	Develop and implement effective communication strategies
DEFDPA008	Manage public affairs projects
DEFDPA009	Apply knowledge of public affairs in a service environment

© Commonwealth of Australia, 2025 Public Skills Australia

Elective units

BSBCMM401	Make a presentation
BSBWOR501	Manage personal work priorities and professional development
DEFGEN003	Lead a team
DEFGEN019	Write material suitable for publication within Defence
DEFGEN023	Capture video images
DEFDPA003	Conduct market profiling
PSPGEN027	Gather and analyse information
PUACOM005B	Foster a positive organisational image in the community
PUACOM006B	Plan and conduct a public awareness program
PUACOM007B	Liaise with other organisations
PUAOPE015A	Conduct briefings and debriefings
SITEEVT010	Manage on-site event operations

Qualification Mapping Information

This qualification replaces but is not equivalent to DEF42912 Certificate IV in Defence Public Affairs.

DEF40120 Certificate IV in Explosive Ordnance Maintenance

Modification History

Release 1. This qualification was released in DEF Defence Training Package release 3.0.

Qualification Description

This qualification allows for the attainment of competencies in explosive ordnance maintenance.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

Nil

Packaging Rules

15 units of competency are required for this qualification:

- 2 core units
- 13 elective units

Choose a minimum of 11 electives from the list below, of which at least 5 must be taken from Group A.

Choose the remaining 2 electives from the list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and learning outcomes of this AQF qualification level.

Elective units selected must not duplicate content already covered by other units in this qualification.

Core units

DEFEXO001	Work safely with explosive ordnance
TLID1001	Shift materials safely using manual handling methods

Group A: Specialisation units

DEFEXO041	Maintain grenades
DEFEXO042	Maintain mortar ammunition

© Commonwealth of Australia, 2025 Public Skills Australia

DEFEXO043	Maintain actuating devices
DEFEXO044	Maintain pyrotechnics and countermeasures
DEFEXO045	Maintain guided weapons
DEFEXO046	Maintain free flight rockets
DEFEXO047	Maintain gun ammunition
DEFEXO048	Maintain aerial delivered ordnance
DEFEXO049	Maintain mines
DEFEXO050	Maintain demolition stores
DEFEXO051	Maintain aircraft egress systems
DEFEXO052	Maintain cartridge operated fire extinguisher systems
DEFEXO018	License explosive facilities and potential explosion sites
DEFEXO082	Apply a knowledge of explosives
DEFEXO121	Assess explosive firings
DEFEXO122	Plan explosive trials
DEFEXO123	Conduct explosive trials
DEFEXO124	Perform explosive tests, measurements and analyses
DEFEXO128	Conduct explosive firings
DEFGEN025	Control engineering and logistic processes
TLIF4007	Implement and coordinate accident-emergency procedures

Group B: General elective units

BSBAUD411	Participate in quality audits
BSBSUS411	Implement and monitor environmentally sustainable work practices
DEFEXO003	Establish and maintain the safety and security of explosive warehouses and workshops
DEFEXO021	Breakdown explosive ordnance
DEFEXO022	Fuze and defuze explosive ordnance

© Commonwealth of Australia, 2025 Public Skills Australia

DEFEXO023	Assemble and disassemble explosive components
DEFEXO066	Inspect explosive facilities
DEFEXO068	Establish and operate an explosive field storage site
DEFEXO081	Apply a knowledge of the service environment
DEFEXO103	Dispose of non-explosive dangerous goods
DEFGEN007	Conduct risk assessment in a Defence environment
DEFGEN008	Treat risk within Defence at an operational level
DEFGEN010	Supervise equity and diversity in the workplace
DEFGEN014	Act as a range safety officer on a permanent range
DEFGEN024	Supervise engineering and logistic tasks
DEFMIL127	Conduct range practices
HLTAID011	Provide First Aid
PUAFER004	Respond to facility emergencies
TLIA2022	Participate in stocktakes
TLIA3023	Coordinate stocktakes
TLIB3006	Carry out inspection of vehicles designed to carry special loads
TLIC3063	Operate vehicle carrying special loads
TLID2016	Load and unload explosives/dangerous goods
TLID3015	Identify and label explosives/dangerous goods
TLID3027	Prepare for transport of dangerous goods
TLIE3002	Estimate/calculate mass, area and quantify dimensions

Qualification Mapping Information

This qualification supersedes and is equivalent to DEF42115 Certificate IV in Explosive Ordnance Maintenance.

DEF40217 Certificate IV in Intelligence Operations

Modification History

Release 1. This is the first release of this qualification in the DEF Defence Training Package.

Qualification Description

This qualification allows for the attainment of competencies in Defence intelligence operations including personnel working in operational roles, and undertaking and leading intelligence operations in a Defence or similar government environment.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

14 units of competency are required for this qualification comprising:

- 6 core units listed below, plus
- 8 elective units.

Choose a minimum of 6 elective units from the list below, of which 1 elective unit must be chosen from Group A, 3 elective units must be chosen from Group B and 2 elective units must be chosen from either Group B or Group C.

Choose the remaining 2 elective units from the elective unit lists below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units chosen from outside this qualification must support learning outcomes of this AQF qualification level.

Elective units chosen must not duplicate content already covered by other units in this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

BSBWRT401	Write complex documents
DEFGEN007	Conduct risk assessment in a Defence environment
DEFINT001	Supervise intelligence operations
DEFINT002	Plan and lead a counter-surveillance operation
PSPGEN027	Gather and analyse information

© Commonwealth of Australia, 2025 Public Skills Australia

PUACOM007B	Liaise with other organisations

Group A: Specialisation elective units (Work Health and Safety)

BSBWHS301	Maintain workplace safety
BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements

Group B: Specialisation elective units (Protective Security)

BSBITU402	Develop and use complex spreadsheets
DEFGEN012	Provide technical advice
DEFINT003	Edit intelligence material for security purposes
PSPINV001	Plan and initiate an investigation
PSPINV002	Conduct an investigation
PSPINV003	Finalise an investigation
PSPSEC006	Implement security risk treatments
PSPSEC007	Develop and advise on government security procedures
PSPSEC012	Develop security risk management plans

Group C: General elective units

BSBCMM401	Make a presentation
BSBITU402	Develop and use complex spreadsheets
BSBWRT501	Write persuasive copy
DEFGEN003	Lead a team
DEFGEN010	Supervise equity and diversity in the workplace
PSPGEN014	Organise workplace information
PSPGEN024	Use resources to achieve work unit goals
BSBPMG409	Apply project scope management techniques
BSBPMG413	Apply project human resources management approaches
BSBPMG414	Apply project information management and communications techniques

© Commonwealth of Australia, 2025 Public Skills Australia

BSBPMG417	Apply project life cycle management processes
BSBPMG522	Undertake project work
PUATEA002B	Work autonomously

Qualification Mapping Information

This qualification replaces but is not equivalent to DEF42112 Certificate IV in Intelligence Operations.

DEF40220 Certificate IV in Explosive Ordnance Manufacture

Modification History

Release 1. This qualification was released in DEF Defence Training Package release 3.0.

Qualification Description

This qualification allows for the attainment of competencies in explosive ordnance manufacture.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

Nil

Packaging Rules

16 units of competency are required for this qualification:

- 2 core units
- 14 elective units

Choose a minimum of 12 electives from the list below, of which at least 7 must be taken from Group A.

Choose the remaining 2 electives from the list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and learning outcomes of this AQF qualification level.

Where a prerequisite unit is attached to an elective unit, it is identified by this symbol ∟.

The prerequisite units attached to any of the elective units must be undertaken and are additional to the number of elective units required for the qualification.

Elective units selected must not duplicate content already covered by other units in this qualification.

Core units

DEFEXO001	Work safely with explosive ordnance
TLID1001	Shift materials safely using manual handling methods

Group A: Specialisation units

© Commonwealth of Australia, 2025 Public Skills Australia

BSBPEF402	Develop personal work priorities
DEFEXO021	Breakdown explosive ordnance
DEFEXO041	Maintain grenades
DEFEXO042	Maintain mortar ammunition
DEFEXO043	Maintain actuating devices
DEFEXO044	Maintain pyrotechnics and countermeasures
DEFEXO045	Maintain guided weapons
DEFEXO046	Maintain free flight rockets
DEFEXO047	Maintain gun ammunition
DEFEXO048	Maintain aerial delivered ordnance
DEFEXO049	Maintain mines
DEFEXO050	Maintain demolition stores
DEFEXO018	License explosive facilities and potential explosion sites
DEFEXO082	Apply a knowledge of explosives
DEFEXO121	Assess explosive firings
DEFEXO122	Plan explosive trials
DEFEXO123	Conduct explosive trials
DEFEXO124	Perform explosive tests, measurements and analyses
DEFEXO128	Conduct explosive firings
DEFGEN025	Control engineering and logistic processes
MSMOPS400	Optimise process/plant area
MSMOPS401	Trial new process or product
MSMWHS210	Undertake first response to non-fire incidents
PMAOPS410	Operate remote production facilities
PMAOPS411	Manage plant shutdown and restart
PMASUP440	Commission/recommission plant

© Commonwealth of Australia, 2025 Public Skills Australia

TLIF4007	Implement and coordinate accident-emergency procedures

Group B: General elective units

BSBLDR414	Lead team effectiveness
BSBSUS411	Implement and monitor environmentally sustainable work practices
BSBWHS411	Implement and monitor WHS policies, procedures and programs
DEFEXO002	Respond to fire
DEFEXO003	Establish and maintain the safety and security of explosive warehouses and workshops
DEFEXO022	Fuze and defuze explosive ordnance
DEFEXO023	Assemble and disassemble explosive components
DEFEXO066	Inspect explosive facilities
DEFEXO081	Apply a knowledge of the service environment
DEFEXO103	Dispose of non-explosive dangerous goods
DEFGEN007	Conduct risk assessment in a Defence environment
DEFGEN008	Treat risk within Defence at an operational level
DEFGEN024	Supervise engineering and logistic tasks
MSS403085	Ensure process improvements are sustained
MSS402083	Use planning software systems in operations
MSS403001	Review competitive systems and practices
MSS403005	Facilitate use of a Balanced Scorecard for performance improvement
MSS403010	Facilitate change in an organisation implementing competitive systems and practices
MSS403087	Mistake proof an operational process
MSS404084	Undertake process capability improvements
MSS404054	Apply statistics to operational processes
MSS404060	Facilitate the use of planning software systems in a work area or team

© Commonwealth of Australia, 2025 Public Skills Australia

MSS404061	Facilitate the use of SCADA systems in a team or work area
MSS404085	Undertake proactive maintenance analyses
MSS404086	Assist in implementing a proactive maintenance strategy
PUAEMR001	Establish context for emergency risk assessment
PUAEMR002	Assess emergency risk ∟ PUAEMR001 Establish context for emergency risk assessment
PUAEMR003	Develop treatment options for emergency risk
PUAEMR004	Manage risk treatment implementation
PUAEMR005	Treat operational risk ∟ PUAEMR006 Assess operational risk
PUAEMR006	Assess operational risk
TLIB3006	Carry out inspection of vehicles designed to carry special loads
TLIC3063	Operate vehicle carrying special loads
TLID2016	Load and unload explosives/dangerous goods
TLID3015	Identify and label explosives/dangerous goods

Qualification Mapping Information

This qualification supersedes and is equivalent to DEF42315 Certificate IV in Explosive Ordnance Manufacture.

DEF40317 Certificate IV in Psychological Support

Modification History

Release 2. Modifications have been made to:

- Packaging rules adjusted to reflect the choice of electives in Group A Specialisation
- Unit HLTDEF001 deleted due to zero enrolment

Release 1. This is the first release of this qualification in the DEF Defence Training Package.

Qualification Description

This qualification allows for the attainment of competencies in psychological support.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

14 units of competency are required for this qualification comprising:

- 4 core units listed below, plus
- 10 elective units.

Choose a minimum of 7 elective units from the list below, of which 3 units must be taken from Group A and 4 units must be taken from Group B.

Choose the remaining 3 elective units from the elective unit lists below, or elsewhere within this training package, or another endorsed training package, or accredited course.

All elective units chosen from outside this qualification must support learning outcomes of this AQF qualification level.

Elective units chosen must not duplicate content already covered by other units in this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

BSBMED305	Apply the principles of confidentiality, privacy and security within the medical environment
DEFPSY001	Assist in the conduct of a psycho-social selection activity
DEFPSY002	Conduct a mental health screening interview
DEFPSY003	Conduct a psychometric testing activity

© Commonwealth of Australia, 2025 Public Skills Australia

Group A: Specialisation elective units

BSBINM303	Handle receipt and despatch of information
CHCCCS019	Recognise and respond to crisis situations
PSPGSD002	Administer government service delivery requirements

Group B: General elective units

BSBINM301	Organise workplace information
CHCCOM002	Use communication to build relationships
CHCLEG001	Work legally and ethically
CHCMHS001	Work with people with mental health issues
PSPGEN024	Use resources to achieve work unit goals
PUACOM001C	Communicate in the workplace
PUACOM007B	Liaise with other organisations
PUATEA002B	Work autonomously
PUATEA003B	Lead, manage and develop teams
TAEDEL301	Provide work skill instruction
TAEDEL401	Plan, organise and deliver group-based learning
TAEDEL402	Plan, organise and facilitate learning in the workplace

Qualification Mapping Information

This qualification replaces but is not equivalent to DEF43012 Certificate IV in Psychological Support.

DEF40320 Certificate IV in Explosive Ordnance Operations

Modification History

Release 1. This qualification was released in DEF Defence Training Package release 3.0.

Qualification Description

This qualification allows for the attainment of competencies in explosive ordnance operations.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

Nil

Packaging Rules

15 units of competency are required for this qualification:

- 2 core units
- 13 elective units

Choose a minimum of 11 electives from the list below, of which at least 3 must be taken from Group A.

Choose the remaining 2 electives from the list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and learning outcomes of this AQF qualification level.

Elective units selected must not duplicate content already covered by other units in this qualification.

Core units

DEFEXO001	Work safely with explosive ordnance
TLID1001	Shift materials safely using manual handling methods

© Commonwealth of Australia, 2025 Public Skills Australia

Group A: Specialisation units

DEFEXO082	Apply a knowledge of explosives
DEFEXO104	Operate an in-service remote positioning vehicle
DEFEXO105	Contribute to disposal of explosive ordnance
DEFEXO116	Control military explosive operations
DEFEXO126	Conduct post blast analysis
DEFMIL082	Perform military high-risk search
MSL974019	Perform chemical tests and procedures
TLIF4007	Implement and coordinate accident-emergency procedures

Group B: General elective units

BSBSUS411	Implement and monitor environmentally sustainable work practices
DEFEXO003	Establish and maintain the safety and security of explosive warehouses and workshops
DEFEXO021	Breakdown explosive ordnance
DEFEXO065	Prepare and arm weapon systems
DEFEXO103	Dispose of non-explosive dangerous goods
DEFEXO108	Conduct military demolition operations
DEFEXO109	Lay and clear booby traps
DEFEXO110	Lay and clear mines
DEFEXO111	Conduct underwater explosive demolitions
DEFEXO112	Detect, record and collect evidence
DEFEXO115	Supervise military explosive task
DEFGEN007	Conduct risk assessment in a Defence environment
DEFGEN008	Treat risk within Defence at an operational level
DEFGEN010	Supervise equity and diversity in the workplace
DEFMIL024	Conduct military searches

© Commonwealth of Australia, 2025 Public Skills Australia

HLTAID011	Provide First Aid
PUAFER004	Respond to facility emergencies
TLIB3006	Carry out inspection of vehicles designed to carry special loads
TLIC3063	Operate vehicle carrying special loads
TLID2016	Load and unload explosives/dangerous goods
TLID3015	Identify and label explosives/dangerous goods

Qualification Mapping Information

This qualification supersedes and is equivalent to DEF42415 Certificate IV in Explosive Ordnance Operations

DEF40417 Certificate IV in Defence Reporting

Modification History

Release 1. This is the first release of this qualification in the DEF Defence Training Package.

Qualification Description

This qualification allows for the attainment of competencies for Defence personnel engaged in reporting.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

13 units of competency are required for this qualification comprising:

- 9 core units listed below, plus
- 4 elective units.

Choose a minimum of 2 elective units from the general elective units list below.

Choose the remaining 2 elective units from either the elective unit list below, or elsewhere within this training package, or another endorsed training package, or accredited course.

All elective units chosen from outside this qualification must support the learning outcomes of this AQF qualification level.

Elective units chosen must not duplicate content already covered by other units in this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

BSBADM101	Use business equipment and resources
BSBITU401	Design and develop complex text documents
BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements
DEFGEN006	Work with equity and diversity
DEFGEN017	Identify material suitable for publication within Defence
DEFGEN018	Conduct an interview to support written material

© Commonwealth of Australia, 2025 Public Skills Australia

DEFGEN019	Write material suitable for publication within Defence
DEFGEN020	Edit provided copy
DEFGEN021	Take photographs suitable for publication within Defence

General elective units

BSBINM201	Process and maintain workplace information
BSBSUS401	Implement and monitor environmentally sustainable work practices
DEFGEN007	Conduct risk assessment in a Defence environment
DEFGEN008	Treat risk within Defence at an operational level
DEFGEN010	Supervise equity and diversity in the workplace
DEFGEN022	Obtain images suitable for publication within Defence

Qualification Mapping Information

This qualification replaces and is equivalent to DEF40812 Certificate IV in Defence Reporting.

DEF40420 Certificate IV in Explosive Ordnance Proof and Experimental

Modification History

Release 1. This qualification was released in DEF Defence Training Package release 3.0.

Qualification Description

This qualification allows for the attainment of competencies in explosive ordnance proof and experimental operations.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

Nil

Packaging Rules

14 units of competency are required for this qualification:

- 2 core units
- 12 elective units

Choose a minimum of 10 electives from the list below, of which at least 7 must be taken from Group A.

Choose the remaining 2 electives from the list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and learning outcomes of this AQF qualification level. Seek further advice on selecting imported units of competency in the DEF Implementation Guide.

Elective units selected must not duplicate content already covered by other units in this qualification.

Core units

DEFEXO001	Work safely with explosive ordnance
TLID1001	Shift materials safely using manual handling methods

Group A: Specialisation units

© Commonwealth of Australia, 2025 Public Skills Australia

DEFEXO081	Apply a knowledge of the service environment
DEFEXO082	Apply a knowledge of explosives
DEFEXO121	Assess explosive firings
DEFEXO122	Plan explosive trials
DEFEXO144	Conduct static tests
DEFEXO145	Conduct dynamic small arms tests
DEFEXO146	Conduct dynamic other calibre tests
DEFEXO147	Conduct environmental tests
DEFEXO150	Acquire data related to velocity
DEFEXO151	Acquire data related to pressure
DEFEXO152	Acquire data related to time
DEFEXO153	Acquire data related to environment
DEFEXO154	Acquire data related to imagery
DEFEXO155	Provide survey data for proof and experimental firing
DEFEXO156	Operate small watercraft
DEFMIL063	Produce meteorological data
DEFTST003	Conduct testing processes

Group B: General elective units

BSBSUS411	Implement and monitor environmentally sustainable work practices
BSBWHS411	Implement and monitor WHS policies, procedures and programs
DEFEXO003	Establish and maintain the safety and security of explosive warehouses and workshops
DEFGEN007	Conduct risk assessment in a Defence environment
DEFGEN008	Treat risk within Defence at an operational level
DEFGEN010	Supervise equity and diversity in the workplace
DEFGEN014	Act as a range safety officer on a permanent range

© Commonwealth of Australia, 2025 Public Skills Australia

DEFGEN015	Conduct basic range practices on a permanent range
DEFGEN024	Supervise engineering and logistic tasks
DEFGEN025	Control engineering and logistic processes
DEFMIL069	Supervise indirect fire weapons
DEFMIL127	Conduct range practices
DEFMIL128	Manage range practices and qualifications
DEFMIL135	Supervise the operation of mortars
DEFMIL136	Supervise the operation of direct fire support weapons
DEFWHS010	Identify confined space
DEFWHS011	Enter confined space
DEFWHS012	Test confined space environment
DEFWHS013	Control entry to confined spaces
PUAFER004	Respond to facility emergencies
TLID2016	Load and unload explosives/dangerous goods
TLIF4007	Implement and coordinate accident-emergency procedures

Qualification Mapping Information

This qualification supersedes and is equivalent to DEF42215 Certificate IV in Explosive Ordnance Proof and Experimental.

DEF40517 Certificate IV in Test and Evaluation

Modification History

Release 1. This is the first release of this qualification in the DEF Defence Training Package.

Qualification Description

This qualification allows for the attainment of competencies in test and evaluation.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

12 units of competency are required for this qualification comprising:

- 8 core units listed below, plus
- 4 elective units.

Choose a minimum of 2 elective units from the list below.

Choose the remaining 2 elective units from the elective unit list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units chosen from outside this qualification must support the learning outcomes of this AQF qualification level.

Elective units chosen must not duplicate content already covered by other units in this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

DEFGEN008	Treat risk within Defence at an operational level
DEFGEN012	Provide technical advice
DEFTST001	Plan testing and evaluation processes
DEFTST002	Prepare testing and evaluation processes
DEFTST003	Conduct testing processes
DEFTST004	Evaluate testing
DEFTST005	Produce test and evaluation reports

© Commonwealth of Australia, 2025 Public Skills Australia

DEFTST006	Analyse test data

General elective units

BSBPMG409	Apply project scope management techniques
BSBPMG413	Apply project human resources management approaches
BSBPMG414	Apply project information management and communications techniques
BSBPMG417	Apply project life cycle management processes
BSBPMG522	Undertake project work
DEFGEN005	Develop relationships with other organisations
DEFGEN011	Interpret policy, legislation and regulations
PSPGEN024	Use resources to achieve work unit goals
PSPGEN027	Gather and analyse information

Qualification Mapping Information

This qualification replaces but is not equivalent to DEF42412 Certificate IV in Test and Evaluation.

DEF40520 Certificate IV in Simulator Maintenance

Modification History

Release 1. This is the first release of this qualification in DEF Defence Training Package Release 4.0.

Qualification Description

This qualification has been designed to provide a package of broad and flexible competencies reflecting the workplace responsibilities to trouble-shoot, repair and maintain electronic and mechanical components of simulators used in training (for example pilot training). Skills involve the use of specialized tools, test equipment, built-in diagnostic equipment and technical data to isolate and locate faulty components or system malfunctions.

It qualifies individuals who apply a broad range of specialised knowledge and skills in varied contexts to undertake skilled work in simulator maintenance.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

14 units of competency are required for this qualification:

- 7 core units
- 7 elective units

Choose a minimum of 5 elective units from the list below, of which at least 4 must be taken from Group A.

Choose the remaining 2 elective units from either the list below, or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and learning outcomes of this AQF qualification level. Seek further advice on selecting imported units of competency in the DEF Implementation Guide.

Elective units selected must not duplicate content already covered by other units in this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

DEFSIM015	Fault find and repair simulator power distribution and control systems
DEFSIM016	Fault find and repair simulator computer systems and peripheral hardware

© Commonwealth of Australia, 2025 Public Skills Australia

DEFSIM017	Fault find and repair simulator image generator and visual display systems
DEFSIM011	Fault find and repair simulator control systems
DEFSIM018	Fault find and repair simulator sound systems
DEFSIM014	Work effectively with simulator systems
DEFSIM021	Operate the simulator for testing purposes

Group A: Specialisation units

DEFSIM019	Fault find and repair simulator weapons systems
DEFSIM012	Fault find and repair simulator motion systems
TLIX4031	Apply knowledge of configuration management
DEFSIM020	Conduct simulator performance evaluation
BSBWHS311	Assist with maintaining workplace safety
BSBOPS402	Coordinate business operational plans
BSBSTR402	Implement continuous improvement
BSBWHS211	Contribute to the health and safety of self and others
ICTICT206	Install software applications
ICTICT302	Install and optimise operating system software
ICTICT303	Connect internal hardware components
ICTSAS203	Connect hardware peripherals
ICTSAS213	Maintain the integrity of ICT systems
TLIX4032	Apply knowledge of technical regulatory framework

Group B: General elective units

AVIM0008	Operate a simulator
AVIM0009	Facilitate training in a synthetic environment
BSBOPS404	Implement customer service strategies
BSBWHS411	Implement and monitor WHS policies, procedures and programs
BSBSUS411	Implement and monitor environmentally sustainable work practices

© Commonwealth of Australia, 2025 Public Skills Australia

BSBPEF501	Manage personal and professional development
DEFGEN006	Work with equity and diversity
HLTAID011	Provide First Aid
DEFGEN005	Develop relationships with other organisations
PUAOPE015	Conduct briefings and debriefings
DEFGEN001	Work in a team
TLID1001	Shift materials safely using manual handling methods
TLID2010	Operate a forklift
TLID0006	Move materials mechanically using automated equipment
TLID0008	Shift loads using bridge or gantry crane
TLIO1002	Follow security procedures when working with passengers and personnel

Qualification Mapping Information

This qualification supersedes and is not equivalent to DEF43215 Certificate IV in Simulator Maintenance.

DEF40617 Certificate IV in Preventive Health

Modification History

Release 3. Updated superseded general elective units.

Release 2. Modifications have been made to:

- Unit HLTDEF001 deleted due to zero enrolment

Release 1. This is the first release of this qualification in the DEF Defence Training Package.

Qualification Description

This qualification allows for the attainment of competencies in preventive health.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

16 units of competency are required for this qualification comprising:

- 5 core units listed below, plus
- 11 elective units.

Choose a minimum of 10 elective units from the list below, of which 8 must be taken from Group A and 2 must be taken from Group B.

Choose the remaining 1 elective unit from the elective unit list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units chosen from outside this qualification must support the learning outcomes of this AQF qualification level.

Where a prerequisite unit is attached to an elective unit it is identified by this symbol ∟.

The prerequisite units attached to any of the elective units must be undertaken and are additional to the number of elective units required for the qualification.

Elective units chosen must not duplicate content already covered by other units in this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

DEFGEN012	Provide technical advice
DEFPHL007	Conduct chlorine dosing of water at the point of supply

© Commonwealth of Australia, 2025 Public Skills Australia

DEFPHL008	Coordinate environmental health operations
DEFPHL009	Conduct a quick assessment of disease outbreak
DEFPHL010	Conduct a field hygiene survey

Group A: General elective units

AHCPMG307	Apply animal trapping techniques
CPPUPM4002	Schedule, organise and monitor pest management operations
CPPWMT4001	Develop proposals for waste management services
CPPWMT4002	Develop waste management plans
CPPWMT4003	Implement waste management plans
CPPWMT4008	Provide waste management information to stakeholders
FBPFSY2002	Apply food safety procedures
FBPFSY3002	Participate in a HACCP team
HLTPOP026	Monitor and maintain sewage or effluent systems
NWPCAD005	Monitor, inspect and report catchment areas
NWPGEN022	Perform laboratory testing
NWPTRT005	Monitor and operate water treatment processes
NWPTRT022	Monitor and operate hypochlorite disinfection processes
NWPTRT027	Monitor and operate wastewater treatment processes
NWPTRT029	Monitor and operate pre-treatment processes

Group B: Specialisation elective units (Work Health and Safety)

BSBWHS403	Contribute to implementing and maintaining WHS consultation and participation processes
BSBWHS405	Contribute to implementing and maintaining WHS management systems
BSBWHS409	Assist with workplace monitoring processes

Qualification Mapping Information

This qualification replaces but is not equivalent to DEF42312 Certificate IV in Preventive

DEF40717 Certificate IV in Defence Paralegal Services

Modification History

Release 1. This qualification was released in DEF Defence Training Package Release 2.0 and meets the Standards for Training Packages.

Supersedes and is not equivalent to DEF42812 Certificate IV in Defence Paralegal Services.

- Core and elective packaging rules changed
  - Core units increased from 5 to 7
  - Elective units increased from 6 to 7
- DEF unit codes and titles updated
- Imported units updated

Qualification Description

This qualification allows for the attainment of competencies in the provision of paralegal services by Defence paralegal practitioners.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

14 units of competency are required for this qualification comprising:

- 7 core units listed below, plus
- 7 elective units.

Choose a minimum of 6 elective units from the list below, of which 2 units must be taken from Group A and 4 units from Group B.

Choose the remaining 1 elective unit from the list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units chosen from outside this qualification must support the learning outcomes of this AQF qualification level.

Elective units selected must not duplicate content already covered by other units in this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

BSBINM302 Utilise a knowledge management system

© Commonwealth of Australia, 2025 Public Skills Australia

BSBCMM402	Implement effective communication strategies
DEFDPL006	Provide support in legal assistance matters
DEFDPL012	Work in a public service legal environment
DEFDPL013	Conduct legal research
DEFGEN011	Interpret policy, legislation and regulations
PSPGEN009	Work effectively in the organisation

Group A: Specialisation elective units

BSBLEG308	Assist in prioritising and planning activities in a legal practice
DEFDPL004	Provide support in Defence administrative law matters
DEFDPL008	Obtain information from a client
DEFDPL010	Provide support in service discipline law matters
DEFDPL011	Provide support in criminal law matters
DEFDPL014	Address complex legal and ethical issues in a Defence environment
PSPPCM001	Carry out basic procurement

Group B: General elective units

BSBADM406	Organise business travel
BSBADM502	Manage meetings
BSBLEG418	Produce complex legal documents
BSBRES404	Research legal information using primary sources
BSBRES502	Research legal information using secondary sources
BSBPMG417	Apply project life cycle management processes
BSBWHS301	Maintain workplace safety
DEFGEN003	Lead a team
PSPETH002	Uphold and support the values and principles of public service
PSPGEN023	Deliver and monitor service to clients
PSPGEN027	Gather and analyse information

© Commonwealth of Australia, 2025 Public Skills Australia

PSPGEN039 Develop internal and external networks

DEF40817 Certificate IV in Defence Financial Administration

Modification History

Release 1. This is the first release of this qualification in the DEF Defence Training Package.

Qualification Description

This qualification allows for the attainment of competencies in Government financial administration activities.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

12 units of competency are required for this qualification comprising:

- 6 core units listed below, plus
- 6 elective units.

Choose a minimum of 4 elective units from the lists below, of which 2 must be taken from Group A.

Choose the remaining 2 elective units from the elective unit lists below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units chosen from outside this qualification must support the learning outcomes of this AQF qualification level.

Elective units chosen must not duplicate content already covered by other units within this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

BSBITU304	Produce spreadsheets
DEFFIN003	Ensure financial data quality
DEFFIN004	Support strategic financial management in the public sector environment
DEFFIN005	Understand and comply with a financial management framework
PSPGEN023	Deliver and monitor service to clients
PSPGEN033	Use advanced workplace communication strategies

© Commonwealth of Australia, 2025 Public Skills Australia

Group A: Specialisation elective units

BSBMGT401	Show leadership in the workplace
BSBMGT403	Implement continuous improvement
PSPGEN011	Build and maintain internal networks

Group B: General elective units

BSBINN301	Promote innovation in a team environment
DEFFIN016	Perform financial administration of assets
DEFFIN017	Administer compliance systems
DEFFIN018	Prepare reports on organisational operating costs
DEFFIN019	Provide financial support to materiel acquisition projects
DEFFIN020	Perform taxation administration in the public sector environment
DEFFIN021	Provide administration of banking services in the public sector environment
DEFFIN022	Perform administration of financial systems
DEFFIN023	Contribute to management of the public sector finance function
DEFFIN024	Support the development and management of budgets
DEFFIN025	Process financial transactions
DEFFIN027	Support public sector financial compliance and assurance management
DEFGEN011	Interpret policy, legislation and regulations

Qualification Mapping Information

No equivalent qualification.

DEF40917 Certificate IV in Performance Based Contracting

Modification History

Release 1. This is the first release of this qualification in the DEF Defence Training Package.

Qualification Description

This qualification allows for the attainment of competencies in Performance Based Contracting.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

12 units of competency are required for this qualification comprising:

- 5 core units listed below plus
- 7 elective units.

Choose a minimum of 5 elective units from the elective unit list below.

Choose the remaining 2 elective units from the elective unit list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units chosen from outside this qualification must support the learning outcomes of this AQF qualification level.

Elective units selected must not duplicate content already covered by other units in this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

DEFPBC001	Employ the fundamentals of a Performance Based Contract
DEFPBC002	Establish the basis of a Performance Based Contract
DEFPBC003	Establish a Performance Based Contract performance measures hierarchy
DEFPBC004	Establish the contract details of a Performance Based Contract
DEFPBC005	Operate a Performance Based Contract

General elective units

BSBITU402	Develop and use complex spreadsheets

© Commonwealth of Australia, 2025 Public Skills Australia

BSBMGT403	Implement continuous improvement
BSBPMG416	Apply project procurement procedures
BSBPMG418	Apply project stakeholder engagement techniques
BSBPMG519	Manage project stakeholder engagement
BSBPUR402	Negotiate contracts
DEFGEN005	Develop relationships with other organisations
FNSASIC301	Establish client relationship and analyse needs
FNSCUS402	Resolve disputes

DEF43115 Certificate IV in Electronic Forensics

Modification History

Release	Comments
1	This qualification was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

Qualification Description

This qualification has been designed to provide a package of broad and flexible competencies reflecting the workplace responsibilities to conduct a forensic investigation to lawfully establish evidence that is often found in digital storage mediums and computers. It qualifies individuals who apply a broad range of specialised knowledge and skills in varied contexts to undertake skilled work in Electronic Forensics.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

14 units of competency are required for this qualification:

- 5 core units
- 9 elective units

Choose a minimum of 7 elective units from the list below, of which at least 4 must be taken from Group A.

Choose the remaining 2 elective units from either the list below, or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and learning outcomes of this AQF qualification level. Seek further advice on selecting imported units of competency in the DEF Implementation Guide.

Elective units selected must not duplicate content already covered by other units in this qualification.

© Commonwealth of Australia, 2025 Public Skills Australia

Core units	
DEFFOR001	Inspect, maintain and test electronic forensic equipment
DEFFOR002	Conduct initial electronic investigation
DEFFOR003	Gather and analyse information
DEFFOR004	Capture forensic photographic images
DEFFOR005	Compile and submit electronic forensic documentation
Group A: Specialisation units	
DEFFOR007	Set up, operate and maintain a portable audio recorder
DEFGEN023	Capture video images
ICTICT206	Install software application
ICTICT302	Install and optimise operating system software
ICTICT303	Connect internal hardware components
ICTSAS203	Connect hardware peripherals
ICTSAS205	Maintain IT system integrity
PSPLEGN401A	Encourage compliance with legislation in the public sector
Group B: General elective units	
DEFGEN006	Work with equity and diversity
DEFGEN008	Treat risk within defence at an operational level
DEFGEN007	Conduct risk assessment in a defence environment
BSBWHS301	Maintain workplace safety
BSBWHS201	Contribute to health and safety of self and others
BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements
BSBWOR501	Manage personal work priorities and professional development

© Commonwealth of Australia, 2025 Public Skills Australia

PSPGOV315A	Give and receive work place feedback
PSPPM402B	Manage simple projects
PSPPM403B	Close simple projects
PSPPM404A	Carry out simple project activities
PSPPM405A	Administer simple projects
DEFGEN005	Develop relationships with other organisations
PUAOPE015	Conduct briefings / debriefings
DEFGEN001	Work in a team

Qualification Mapping Information

No equivalent qualification.

Qualification Description

This qualification allows for the attainment of competencies in compliance.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

15 units of competency are required for this qualification comprising:

- 7 core units listed below, plus
- 8 elective units.

Choose a minimum of 6 elective units from the list below.

Choose the remaining 2 elective units from the elective unit list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units chosen from outside this qualification must support the learning outcomes of this AQF qualification level.

Elective units chosen must not duplicate content already covered by other units in this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

DEFCPL001	Evaluate and review safety cases
DEFCPL002	Apply knowledge of regulatory systems
DEFCPL003	Apply knowledge of risk assessment
DEFCPL004	Apply knowledge of risk management
DEFCPL005	Apply knowledge of safety case development process
DEFCPL006	Provide specialist safety case advice
DEFCPL009	Apply knowledge of work health and safety legislation for safety cases

© Commonwealth of Australia, 2025 Public Skills Australia

General elective units

BSBCOM501	Identify and interpret compliance requirements
BSBPMG512	Manage project time
BSBPMG513	Manage project quality
BSBPMG521	Manage project integration
BSBWHS501	Ensure a safe workplace
DEFCPL007	Implement and manage technical regulatory framework compliance
DEFCPL008	Plan and establish technical regulatory framework compliant management systems
PSPGEN046	Undertake research and analysis
PSPGEN054	Use complex workplace communication strategies
PSPGEN055	Refine complex workplace documents
PUAEMR022	Establish context for emergency risk assessment
PUAEMR024	Develop treatment options for emergency risk
PUACOM002B	Provide services to clients
PUACOM007B	Liaise with other organisations

Qualification Mapping Information

This qualification replaces but is not equivalent to DEF52212 Diploma of Compliance.

DEF50320 Diploma of Explosives

Modification History

Release 1. This qualification was released in DEF Defence Training Package release 3.0.

Qualification Description

This qualification allows for the attainment of competencies in explosive ordnance.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

Nil

Packaging Rules

12 units of competency are required for this qualification:

- 2 core units
- 10 elective units

Choose a minimum of 8 electives from the list below, of which at least 4 must be taken from Group A.

Choose the remaining 2 electives from the list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and learning outcomes of this AQF qualification level.

Where a prerequisite unit is attached to an elective unit it is identified by this symbol ∟.

The prerequisite units attached to any of the elective units must be undertaken and are additional to the number of elective units required for the qualification.

Elective units selected must not duplicate content already covered by other units in this qualification.

Core units

DEFEXO001	Work safely with explosive ordnance
TLID1001	Shift materials safely using manual handling methods

Group A: Specialisation units

© Commonwealth of Australia, 2025 Public Skills Australia

DEFEXO061	Render explosive ordnance inert
DEFEXO069	Plan loading of dangerous goods
DEFEXO070	Conduct technical explosive investigations
DEFEXO083	Apply explosive ordnance design principles
DEFEXO106	Conduct explosive ordnance disposal operations
DEFEXO107	Conduct improvised explosive device disposal operations
DEFEXO112	Detect, record and collect evidence
DEFEXO113	Remove explosive ordnance from damaged aircraft
DEFEXO117	Manage military explosive operations
DEFEXO125	Determine the properties of explosives
DEFEXO129	Develop unique explosives
DEFGEN026	Manage engineering and logistic operations
DEFMIL088	Coordinate area and route search, and clearance of explosive ordnance
TLIA5029	Plan and manage storage of dangerous goods and hazardous substances

Group: B General elective units

BSBAUD511	Initiate quality audits
BSBAUD512	Lead quality audits
BSBAUD513	Report on quality audits
BSBLDR522	Manage people performance
BSBSUS411	Implement and monitor environmentally sustainable work practices
BSBWHS411	Implement and monitor WHS policies, procedures and programs
BSBPEF501	Manage personal and professional development
BSBTWK502	Manage team effectiveness
DEFEXO126	Conduct post blast analysis
DEFWHS009	Develop laser safety plans
HLTAID011	Provide First Aid

© Commonwealth of Australia, 2025 Public Skills Australia

MSL974019	Perform chemical tests and procedures
PUACOM002	Provide services to clients
PUACOM007	Liaise with other organisations
PUAEMR001	Establish context for emergency risk assessment
PUAEMR002	Assess emergency risk ∟ PUAEMR001 Establish context for emergency risk assessment
PUAEMR003	Develop treatment options for emergency risk
PUAEMR004	Manage risk treatment implementation
PUAEMR011	Manage and evaluate emergency management exercises
PUAEMR013	Design emergency management exercises
PUATEA003	Lead, manage and develop teams
PUAFER004	Respond to facility emergencies

Qualification Mapping Information

This qualification supersedes and is equivalent to DEF52115 Diploma of Explosive Ordnance.

DEF50417 Diploma of Defence Paralegal Services

Modification History

Release 1. This qualification was released in DEF Defence Training Package Release 2.0 and meets the Standards for Training Packages.

Supersedes but is not equivalent to DEF52612 Diploma of Defence Paralegal Services.

- Core and elective packaging rules changed
  - Core units increased from 2 to 5
  - Elective units decreased from 6 to 3
- DEF unit codes and titles updated
- Imported units updated
- Removal of imported units from Group B

Qualification Description

This qualification allows for the attainment of competencies in the provision of complex paralegal services and the coordination of general Defence paralegal services.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

8 units of competency are required for this qualification comprising:

- 5 core units listed below, plus
- 3 elective units.

Choose a minimum of 2 elective units from the list below, of which 1 must be taken from Group A.

Choose the remaining 1 elective unit from the list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units chosen from outside this qualification must support the learning outcomes of this AQF qualification level.

Elective units chosen must not duplicate content already covered by other units in this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

BSBLEG418 Produce complex legal documents

© Commonwealth of Australia, 2025 Public Skills Australia

DEFDPL009	Manage and analyse a legal file
DEFDPL014	Address complex legal and ethical issues in a Defence environment
DEFGEN011	Interpret policy, legislation and regulations
PSPGEN045	Coordinate resource allocation and usage

Group A: Specialisation elective units

DEFDPL001	Provide high-level support on service discipline matters
DEFDPL002	Provide high-level support on criminal law matters
DEFDPL003	Provide high-level support on administrative law matters
DEFDPL005	Provide high-level support on operations law matters
DEFDPL006	Provide support in legal assistance matters

Group B: General elective units

BSBADM406	Organise business travel
BSBCMM501	Develop and nurture relationships
BSBLED503	Maintain and enhance professional practice
DEFGEN007	Conduct risk assessment in a Defence environment
DEFGEN008	Treat risk within Defence at an operational level
PSPLEG003	Promote compliance with legislation in the public sector

Qualification Mapping Information

DEF50420 Diploma of Simulator Maintenance Management

Modification History

Release 1. This is the first release of this qualification in DEF Defence Training Package Release 4.0.

Qualification Description

This qualification has been designed to provide a package of broad and flexible competencies reflecting the workplace responsibilities of a simulator maintenance manager and a senior simulator technician. These technicians can manage simulator maintenance as well as complete complex testing, fault finding and evaluation of simulation equipment. It qualifies individuals who apply maintenance management and integrated technical and theoretical concepts in a broad range of contexts to undertake advanced skilled or paraprofessional work in simulator maintenance.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

12 units of competency are required for this qualification:

- 2 core units
- 10 elective units

Choose a minimum of 8 elective units from the list below, of which at least 6 must be taken from Group A.

Choose the remaining 2 elective units from either the list below, or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and learning outcomes of this AQF qualification level. Seek further advice on selecting imported units of competency in the DEF Implementation Guide.

Elective units selected must not duplicate content already covered by other units in this qualification.

Where imported units are selected, care must be taken to ensure that all prerequisite units specified are complied with.

Core units

DEFSIM014	Work effectively with simulator systems
DEFSIM010	Apply knowledge of simulator systems and architecture

© Commonwealth of Australia, 2025 Public Skills Australia

Group A: Specialisation units

DEFSIM020	Conduct simulator performance evaluation
DEFSIM013	Manage simulator accreditation or in service testing
DEFPBC005	Operate a performance based contract
PSPPCM008	Manage contract performance
BSBSTR502	Facilitate continuous improvement
BSBWHS521	Ensure a safe workplace for a work area
BSBOPS504	Manage business risk
TLIX4032	Apply knowledge of technical regulatory framework
TLIX5021	Manage configuration management processes
MSS402080	Undertake root cause analysis
MSS404085	Undertake proactive maintenance analyses
MSS405031	Undertake value analysis of product or process costs in terms of customer requirements
MSS405081	Develop a proactive maintenance strategy
TLIB5010	Plan and implement maintenance schedules
TLIX4029	Apply knowledge of integrated logistics support
TLIX5020	Develop and review configuration management plans
TLIX5036	Manage and monitor technical data and information systems

Group B: General elective units

BSBOPS505	Manage organisational customer service
BSBFIN501	Manage budgets and financial plans
BSBINS501	Implement information and knowledge management systems
BSBSTR501	Establish innovative work environments
BSBHRM523	Coordinate the learning and development of teams and individuals
BSBLDR522	Manage people performance

© Commonwealth of Australia, 2025 Public Skills Australia

BSBOPS502	Manage business operational plans
BSBPMG430	Undertake project work
BSBPEF501	Manage personal and professional development
ICTICT304	Implement system software changes
ICTNWK311	Install and test network protocols
ICTNWK429	Install hardware to networks
ICTNWK430	Deploy software to networked computers
DEFGEN007	Conduct risk assessment in a Defence environment
PUAOPE015	Conduct briefings and debriefings

Qualification Mapping Information

This qualification supersedes and is not equivalent to DEF53215 Diploma of Simulator Maintenance.

DEF50717 Diploma of Range Control and Management

Modification History

Release 2. This is the second release of this qualification.

Modifications made to Elective units. BSB imported unit codes and titles updated

Release 1. This qualification was released in DEF Defence Training Package Release 2.0.

This qualification supersedes but is not equivalent to DEF55115 Diploma of Range Management.

- Qualification title changed
- Qualification packaging rules decreased from 14 to 12 units of competency, includes changes to core, technical and elective units
- Imported units updated
- Core units changed:
  - DEFRNG002 and PUAEMR023 removed
  - DEFGEN007 and DEFGEN008 included
- Elective units reduced from 9 to 7 elective units
- Elective units changed:
  - Group A - DEFRNG004, DEFRNG005, DEFRNG007, DEFRNG008, DEFRNG010 and DEFRNG012 removed
  - Group A - DEFRNG006, DEFRNG011, DEFRNG013, DEFRNG014, DEFRNG015 and PUAFIR512 included
  - Group B - DEFRNG006 and DEFRNG011 removed
  - Group B - BSBSUS301, PSPPCM001 and TAEDEL301 included
  - Group C - BSBSUS301A, PSPPROC406B, TAEASS401B, TAEASS502B, TAEDEL402A, TAEASS301B, TAEASS402A, and TAEDEL301A removed. No Group C general electives included.

Qualification Description

This qualification allows for the attainment of competencies as a range control officer or an assistant range control officer. It also covers the requirements of a range inspector. It qualifies individuals who apply integrated technical and theoretical concepts in a broad range of contexts to undertake advanced skilled or paraprofessional work as a senior operations officer.

The term range refers to any area of land, sea or air that may be designated for military manoeuvres or simulated wartime operations. The range control officer is responsible for the overall management and operation of training areas.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

1	This qualification was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

Qualification Description

This qualification has been designed to provide a package of broad and flexible competencies reflecting the workplace responsibilities to conduct and manage a forensic investigation and to lawfully establish evidence that is often found in digital storage mediums and computers. It qualifies individuals who apply integrated technical and theoretical concepts in a broad range of contexts to undertake advanced skilled or paraprofessional work in electronic forensics.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Packaging Rules

12 units of competency are required for this qualification:

- 5 core units
- 7 elective units

Choose a minimum of 5 elective units from the list below, of which at least 3 must be taken from Group A.

Choose the remaining 2 elective units from either the list below, or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and learning outcomes of this AQF qualification level. Seek further advice on selecting imported units of competency in the DEF Implementation Guide.

Elective units selected must not duplicate content already covered by other units in this qualification.

© Commonwealth of Australia, 2025 Public Skills Australia

Core units	
DEFFOR006	Conduct electronic data search and analysis
DEFFOR008	Detect, record and collect electronic evidence
DEFFOR009	Give evidence of electronic media crime
DEFFOR010	Produce an electronic media image for forensic purposes
DEFFOR011	Assess, control and examine electronic incident scenes
Group A: Specialisation units	
BSBMGT517	Manage operational plan
BSBWOR501	Manage personal work priorities and professional development
PUACOM003B	Manage information
DEFGEN005	Develop relationships with other organisations
PSPLEGN501B	Promote compliance with legislation in the public sector
Group B: General elective units	
BSBCUS501	Manage quality customer service
BSBFIM501	Manage budgets and financial plans
BSBINM501	Manage an information or knowledge management system
BSBLED501	Develop a workplace learning environment
BSBMGT516	Facilitate continuous improvement
BSBWHS501	Ensure a safe workplace
BSBPMG522	Undertake project work
BSBRSK501	Manage risk
DEFGEN003	Lead a team
ICTNWK305	Install and manage network protocols

© Commonwealth of Australia, 2025 Public Skills Australia

ICTICT304	Implement system software changes
ICTNWK410	Install hardware to a network
ICTNWK411	Deploy software to networked computers
MSL974008A	Capture and manage scientific images
PSPGOV513A	Refine complex workplace documents
PSPMNGT614A	Facilitate knowledge management
PSPMNGT615A	Influence workforce effectiveness
PUACOM004B	Manage Organisational communication strategies
PUACOM010B	Promote the organisation’s mission and services
DEFGEN007	Conduct risk assessment in a Defence environment
PUAOHS002B	Maintain safety at an incident scene
PUAOPE015	Conduct briefings/debriefings

Qualification Mapping Information

No equivalent qualification.

DEF53415 Diploma of Institutional and Operational Chaplaincy

Modification History

Release 2. Modifications have been made to the Qualification Description and the Elective Unit imported codes.

Release 1. This qualification was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

Qualification Description

This qualification has been designed to provide a package of competencies reflecting the responsibilities of a chaplain. The role of the chaplain is principally to do with religious ministry; however, in the Australian Defence Force (ADF) that ministry extends well beyond the community model of a minister of religion. Chaplains remain active members of their denominational church organisation and they cannot continue to practice without the endorsement of their church, yet they are also commissioned members of the Australian Defence Force. Their role is governed by two disparate yet culturally sympathetic entities, a military chaplain must provide spiritual ministry to all members of Defence, regardless of faith or denomination. This qualification was developed within Defence but could be used by other organisations.

This Diploma is not designed as an entry level qualification but to benchmark additional ADF Chaplain skills in the broader aspects of their role beyond those of an ordained minister, including on deployments, exercises and to the wider ADF community.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

Nil

Packaging Rules

10 units of competency are required for this qualification:

- 4 core units
- 6 elective units

Choose a minimum of 4 elective units from the list below.

Choose the remaining 2 elective units either from the list below or from elsewhere within this

© Commonwealth of Australia, 2025 Public Skills Australia

training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and learning outcomes of this AQF qualification level. Seek further advice on selecting imported units of competency in the DEF Implementation Guide.

Elective units selected must not duplicate content already covered by other units in this qualification.

Core units

DEFCHP001	Provide pastoral care
DEFCHP002	Provide ethical and pastoral advice
DEFCHP003	Plan the delivery of chaplaincy support
DEFCHP004	Conduct and facilitate religious observances and activities

Group A: Elective units

PUAPRO001	Promote a learning environment in the workplace
DEFCHP005	Perform as an effective member of the Chaplains' branch
DEFCHP006	Perform the duties of a chaplain in a deployed environment
DEFGEN003	Lead a team
DEFGEN012	Provide technical advice
BSBHRM413	Support the learning and development of teams and individuals
TAEDEL404	Mentor in the workplace
TAEDEL401	Plan, organise and deliver group-based learning
DEFGEN005	Develop relationships with other organisations
PSPPCM001	Carry out basic procurement

Qualification Mapping Information

No equivalent qualification.

DEF80120 Graduate Diploma of Explosives

Modification History

Release 1. This qualification was released in DEF Defence Training Package release 3.0.

Qualification Description

This qualification allows for the attainment of competencies in explosive ordnance.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

Nil

Packaging Rules

8 units of competency are required for this qualification:

- 2 core units
- 6 elective units

Choose a minimum of 4 electives from the list below, of which at least 2 must be taken from Group A.

Choose the remaining 2 electives from the list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and learning outcomes of this AQF qualification level.

Elective units selected must not duplicate content already covered by other units in this qualification.

Core units

DEFEXO001	Work safely with explosive ordnance
DEFEXO083	Apply explosive ordnance design principles

Group A: Specialisation units

DEFEXO087	Assess the safety and suitability for service of explosives
DEFEXO088	Conduct explosive capability analysis

© Commonwealth of Australia, 2025 Public Skills Australia

DEFEXO089	Assess specific explosives as being safe and suitable for transport
DEFEXO114	Develop explosive ordnance disposal techniques and render safe procedures
DEFEXO126	Conduct post blast analysis
DEFEXO127	Predict and confirm explosive effects
MSS408005	Develop knowledge systems and the learning processes of an organisation
MSS408006	Develop and refine systems for improvement in operations
MSS408007	Develop problem solving capability of an organisation

Group B: General elective units

BSBSTR601	Manage innovation and continuous improvement
DEFGEN026	Manage engineering and logistic operations
DEFTST007	Apply knowledge of test and evaluation processes
PSPPCY008	Develop public policy

Qualification Mapping Information

This qualification supersedes and is equivalent to DEF82115 Graduate Diploma of Explosive Ordnance.

DEF80220 Graduate Certificate in Explosives

Modification History

Release 1. This qualification was released in DEF Defence Training Package release 3.0.

Qualification Description

This qualification allows for the attainment of competencies in explosive ordnance.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

Nil

Packaging Rules

8 units of competency are required for this qualification:

- 2 core units
- 6 elective units

Choose a minimum of 3 electives from Group A.

Choose the remaining 3 electives from the list below or from elsewhere within this training package, or from another endorsed training package, or from an accredited course.

All elective units selected from outside this qualification must reflect the occupational and learning outcomes of this AQF qualification level.

Elective units selected must not duplicate content already covered by other units in this qualification.

Core units

DEFEXO001 Work safely with explosive ordnance

DEFEXO082 Apply a knowledge of explosives

Group A: Specialisation units

© Commonwealth of Australia, 2025 Public Skills Australia

DEFEXO084	Apply knowledge of explosive chemistry
DEFEXO085	Apply knowledge of explosive physics
DEFEXO086	Apply knowledge of explosive materials
DEFGEN025	Control engineering and logistic processes
DEFTST006	Analyse test data
MSS407003	Analyse process changes
MSS407012	Lead a process to determine and solve root cause for a complex problem

Group B: General elective units

DEFTST007	Apply knowledge of test and evaluation processes
PSPPCY006	Develop organisation policy
PUAEMR011	Manage and evaluate emergency management exercises
PUAEMR013	Design emergency management exercises
TLIX4028	Apply knowledge of logistics

Qualification Mapping Information

This qualification supersedes and is equivalent to DEF72115 Graduate Certificate in Explosive Ordnance.

DEFDCD001 Function in the Australian aerospace environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to safely function in the Australian aerospace environment.

It includes identifying information about the aerospace industry in Australia, recognising aircraft and implementing work health and safety (WHS)/occupational health and safety (OHS) requirements.

This unit applies to Defence Force Cadets.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work under direct supervision and perform specific tasks in familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Defence Cadets

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Identify aerospace industry information in Australia**	**1.1**	Outline the structure of the Australian aerospace industry and the functions of the different sectors
		1.2	Outline the structure of the Defence aerospace organisation and the roles of the three services
		1.3	Identify career opportunities within the Australian and/or Defence aerospace environment and the entry requirements
		1.4	Develop and maintain current knowledge of the aerospace environment
2	**Recognise aircraft**	**2.1**	Identify basic airframe parts of a fixed wing aircraft
		2.2	Identify current Australian Defence Force (ADF) and civilian aircraft
3	**Apply WHS/OHS requirements**	**3.1**	Select and use personal protective equipment
		3.2	Identify hazards, assess risks and implement organisational control measures
		3.3	Observe aircraft hazards and safety distances
		3.4	Maintain basic situational awareness when moving within an aviation workplace
		3.5	Recognise and report unsafe actions or situations to supervisor or other appropriate personnel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Unit Mapping Information

This unit replaces and is equivalent to DEFDC002B Function in the Australian aerospace environment.

Assessment Requirements for DEFDCD001 Function in the Australian aerospace environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant safety and security practices, operational procedures and regulations
- complying with relevant operational policies and procedures
- identifying a mixture of at least ten civilian and military aircrafts
- identifying and collecting aerospace information
- identifying hazards, assessing risks and identifying control measures
- moving safely on a tarmac and within a maintenance facility
- recognising and anticipating safety and security problems and hazards, and taking appropriate action.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aircraft recognition features
- Australian Defence Force (ADF) bases from which aircraft operate
- ADF aerospace services
- components of an aircraft airframe
- relevant operational policies and procedures
- relevant safety and security regulations, rules, policies and procedures
- roles of ADF aircraft
- safety and security hazards and risks in the aviation workplace
- sectors of the aerospace industry.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include

© Commonwealth of Australia, 2025 Public Skills Australia

requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in aerospace operational situations, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated aerospace operational situations that reflect aerospace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including operational procedures, regulations, codes of practice and operation manuals.

DEFDPL007 Provide high-level support on legal assistance matters

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to provide high-level support on legal assistance matters within a Defence legal environment. This includes knowledge of Defence military law.

It includes planning and preparing to provide support, clarifying complex legal issues and performing legal research. It also includes preparing complex legal documents and finalising matters.

This unit applies to Defence personnel who are required to provide highlevel paralegal support services.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work mostly independently while part of a team, and perform routine and complex tasks. They work with limited supervision, with identified approval authorities. They apply solutions to a variety of predictable and complex problems, in familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Defence Paralegal Operations

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA	
Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Plan and prepare to provide high-level support on legal assistance support**	**1.1**	Receive high-level task instructions
		1.2	Analyse task requirements and identify task legal issues
2	**Clarify legal issues**	**2.1**	Review and clarify task legal issues with instructing legal officer
		2.2	Obtain additional information as required to address task requirements
		2.3	Clearly outline paralegal legal limits of responsibility to stakeholders and establish clear responsibilities with client in accordance with operational procedures
3	**Perform legal research**	**3.1**	Conduct legal research to meet task requirements
		3.2	Analyse and document information gathered in accordance with task requirements
4	**Prepare legal documents**	**4.1**	Prepare required legal documents for task consultation with instructing legal officer
		4.2	Review prepared legal documents with instructing legal officer and amend as required
5	**Finalise matter**	**5.1**	Finalise legal documents in accordance with task and organisational requirements
		5.2	Communicate task outcomes to stakeholders, as required
		5.3	Update file notes and place outcomes on file in accordance with operating guidelines
		5.4	Appropriately store and secure task file

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for DEFDPL007 Provide high-level support on legal assistance matters

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating effectively on complex legal matters
- coordinating with instructing legal officer to prepare for complex trial or service discipline proceedings
- ensuring trial/tribunal and post-trial/tribunal administration is completed in accordance with legal and operational procedures
- implementing written and oral instructions to prepare effective complex briefs
- preparing and processing documents involved in complex criminal law matters
- preparing legal documents to support legal assistance matters
- preparing summaries of cases in complex legal matters
- providing appropriate support on complex legal assistance matters
- undertaking analysis of information to determine status and value
- undertaking complex research to support instructing legal officer.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- complex legal practices and procedures
- criminal law matters, legal assistance matters and service discipline proceedings
- Defence Force Discipline Act (DFDA) and related legislation
- legal terminology relevant to both simple and complex legal matters
- relationship between trials and tribunals, and potential impacts on legal proceedings
- relevant legal practices and procedures
- relevant legal process, documents and exhibits, legislation and sections, and stages involved in the legal process
- summary hearing/court/tribunal processes and their relevance to paralegal operational procedures
- trials and service discipline proceedings and their relevance to paralegal operational procedures.

DEFEVL003 Maintain and enhance professional practice

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to Foundation Skills and Assessment Conditions.

Release 1.0. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFEV503 Maintain and enhance professional practice.

- Unit code updated
- Content and formatting updated to comply with new standards
- All PC transitioned from passive to active voice.

Application

This unit describes the skills required to manage personal professional performance and to take responsibility for professional development in relation to the provision of evaluation services.

This unit applies to those working in an evaluation environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously while performing complex tasks in a familiar context

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA	
Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Model high standards of performance**	**1.1**	Incorporate individual responsibilities and accountabilities into personal work plans
		1.2	Model professional techniques and strategies
		1.3	Apply ethical and inclusive practices in professional practice
2	**Determine personal development needs**	**2.1**	Assess own knowledge and skills against relevant benchmarks to determine development needs and priorities
		2.2	Seek input from other relevant personnel about own development needs and priorities
		2.3	Identify ways to update and maintain currency of evaluation practices and prepare a vocational training plan
		2.4	Combine vocational training plan and personal development objectives into an overall professional development plan
3	**Participate in professional development activities**	**3.1**	Select and implement development opportunities to support continuous learning and maintain currency of professional practice
		3.2	Participate in professional networks to support continuous learning and maintain currency of professional practice
		3.3	Engage in processes which include observing peers and providing them with feedback
		3.4	Invite peers and others to observe and provide feedback on own practices
		3.5	Use technology to maintain regular communication with relevant networks, organisations and individuals
4	**Reflect on and evaluate professional practice**	**4.1**	Research developments and trends impacting on professional practice and integrate information into work performance

© Commonwealth of Australia, 2025 Public Skills Australia

4.2 Use feedback from colleagues and clients to identify and introduce improvements in work performance

4.3 Document professional development activities, learning and planned changes in behaviours

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit supersedes and is equivalent to DEFEV503 Maintain and enhance professional practice.

Assessment Requirements for DEFEVL003 Maintain and enhance professional practice

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications made to Foundation Skills and Assessment Conditions.

Release 1.0. These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

Assessment Requirements created drawing upon specified assessment information from superseded unit.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two occasions and includes:

- participating in professional networks
- consulting with colleagues and clients
- demonstrating interpersonal skills
- engaging with peers professionally to give and receive feedback
- making informed decisions and recommendations
- completing and maintaining records related to professional development
- evaluating personal work practices to improve performance or understanding
- keeping up with trends, changes and developments in own area of speciality
- analysing and identifying opportunities to improve training and assessment practices
- demonstrating time management skills
- contributing to own professional development plan
- networking and using technology to gain information and other support
- participating in professional development activities.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- organisational goals and objectives
- organisational processes, procedures and opportunities relating to professional development
- continuous improvement techniques and processes and their application
- social and education trends and changes impacting on the evaluation environment, including:
  - policy changes
  - technological changes

© Commonwealth of Australia, 2025 Public Skills Australia

  - cultural changes
  - economic changes
- networks relevant to professional practice
- ethical and inclusive principles and practices associated with assessment of competence
- types and availability of development activities and opportunities.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

DEFEXO016 Conduct explosives packaging inspection

Modification History

Release 1. This unit was released in DEF Defence Training Package release 3.0.

Application

This unit describes the skills required to conduct an inspection of explosives packaging and to process the packaging for further action that may be required. Processing the packaging is subject to the outcomes of the inspection and may result in damaged or defective packaging being rejected, disposed of, returned to the manufacturer or sent for maintenance.

This unit applies to those required to conduct an inspection of explosive packaging and to process the packaging for further action that may be required.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and as part of a team, under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform routine tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Explosive ordnance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Prepare for inspection**	**1.1**	Identify requirement for explosives packaging inspection from work requests and or instructions
		1.2	Identify, acquire and prepare technical references, tools and equipment required for the inspection
		1.3	Identify, acquire, account for, move or pre-position packaging in preparation for inspection
		1.4	Interpret emergency procedures and apply contingency plans
2	**Inspect explosive packaging**	**2.1**	Inspect packaging in a logical set sequence to ensure that defects or damage are not overlooked, in accordance with technical specifications
		2.2	Identify and record damage or other defects
		2.3	Determine serviceability of packaging
3	**Carry out post inspection procedures**	**3.1**	Return explosive packaging to storage or transport condition
		3.2	Maintain documentation and records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit supersedes and is equivalent to DEFEXO010 Conduct explosives packaging inspection.

Assessment Requirements for DEFEXO016 Conduct explosives packaging inspection

Modification History

Release 1. These Assessment Requirements were released in DEF Defence Training Package release 3.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- identifying packaging construction and configuration
- identifying defects with labelling and marking
- maintaining document and records

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and includes:

- basic knowledge of:
  - legislative and regulatory requirements
- operational knowledge of:
  - characteristics and limitations of packaging to be inspected
  - explosives packaging inspection procedures
  - organisational documentation requirements
  - organisational safety requirements

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

© Commonwealth of Australia, 2025 Public Skills Australia

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

DEFEXO017 Examine and certify free from explosives

Modification History

Release 1. This unit was released in DEF Defence Training Package release 3.0.

Application

This unit describes the skills required to examine and certify explosive and non-explosive dangerous goods packaging as being free from explosives (FFE) and arisings for salvage or return. Certification of these items as being FFE is a statutory requirement at different stages in the processing of these items, in particular when being sold or offered to the public for scrap metal. This unit does not cover the competencies required for inerting explosives and associated components.

This unit applies to those required to examine and certify salvage and associated packaging as being FFE.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and as part of a team, under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform specific tasks in a broad range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Explosive Ordnance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential	Performance criteria describe the performance needed to

outcomes.		demonstrate achievement of the element.
1	**Prepare for certification**	**1.1** Identify requirement for certification
		1.2 Identify and prepare suitable location to carry out operation
		1.3 Identify, acquire and prepare equipment required for the certification process
2	**Certify as Free From Explosives (FFE)**	**2.1** Conduct examinations of explosive and non-explosive dangerous goods packaging
		2.2 Deface/remove packaging mandatory markings
		2.3 Seal packaging confirmed as being FFE
		2.4 Apply emergency and contingency procedures
3	**Inspect arisings and salvage**	**3.1** Inspect arisings and salvage to confirm items have completed functioning
		3.2 Inspect arisings and salvage to confirm items are free from misfire
4	**Carry out post certification procedures**	**4.1** Package and label arisings and salvage
		4.2 Maintain accurate documentation and records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit supersedes and is equivalent to DEFEXO004 Examine and certify free from explosives.

Assessment Requirements for DEFEXO017 Examine and certify free from explosives

Modification History

Release 1. These Assessment Requirements were released in DEF Defence Training Package release 3.0

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- applying operational safety
- identifying ammunition and explosive components
- identifying explosive contaminants
- identifying relevant labels and markings

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include

operational knowledge of:

- documentation requirements
- equipment used in FFE process
- explosive contaminants
- explosive packaging components and fitments
- operational safety and WHS standards
- relevant labels and markings
- types of ammunition, explosive component parts

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

DEFEXO018 License explosive facilities and potential explosion sites

Modification History

Release 1. This unit was released in DEF Defence Training Package release 3.0

Application

This unit describes the skills required to inspect and license explosive ordnance facilities and potential explosion sites and review current licences. Explosive ordnance licensing applies to all potential explosion sites and is part of the quality and safety control processes. It includes inspecting the potential explosive facility, applying formulae to determine the net explosive quantity and compatibility for the facility, and preparing the licensing documentation for approval.

This unit applies to personnel who are required to license explosive ordnance facilities and potential explosion sites and review current licences.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and as part of a team, under indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform complex tasks in a broad range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Explosive Ordnance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan and prepare for licensing	**1.1** Identify and confirm explosive ordnance facility to be licensed
	1.2 Identify and assemble documentation related to the facility
	1.3 Liaise with relevant personnel
	1.4 Review previous licensing history documentation
2 Inspect facility	**2.1** Confirm serviceability of the facility
	2.2 Confirm construction standards of the facility
	2.3 Take measurements in accordance with licensing requirements
	2.4 Apply formulae and perform calculations on measurements
	2.5 Compare data to licensing requirements to identify shortfalls
3 Prepare licence application	**3.1** Confirm shortfalls have been rectified
	3.2 Prepare licensing documentation and forward to approving authority
	3.3 Ensure documentation, records and reports related to the facility licence are maintained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for DEFEXO018 License explosive facilities and potential explosion sites

Modification History

Release 1. These Assessment Requirements were released in DEF Defence Training Package release 3.0

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- calculating licensing requirements
- communicating with relevant personnel effectively
- identifying problems and non-adherence to policy and standards
- undertaking measurements of volume, length, width, perimeter and area

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and includes:

- communication protocols
- operational knowledge of:
  - documentation requirements
  - explosive ordnance licensing formulae
  - inspection procedures
  - policies and procedures applicable to licensing

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

DEFEXO019 Refurbish explosives packaging

Modification History

Release 1. These Assessment Requirements were released in DEF Defence Training Package release 3.0.

Application

This unit describes the skills required to refurbish explosives packaging. The unit requires the individual to inspect the packaging to determine whether it can be refurbished, refurbish the packaging and maintain a range of documentation.

This unit applies to those required to prepare for and refurbish explosives packaging following deterioration or damage of the packaging through handling.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as individuals and as part of a team, under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform routine tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Explosive Ordnance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Prepare for refurbishment**	**1.1**	Identify requirement for refurbishing of packaging from work requests/instructions
		1.2	Identify, acquire and prepare technical references, tools, equipment, including personal protective equipment (PPE) and consumables required for maintenance
		1.3	Inspect explosives packaging to confirm that it is free from explosives
		1.4	Deface/Remove packaging mandatory markings
2	**Refurbish explosive packaging**	**2.1**	Inspect explosives packaging to ensure it is capable of being refurbished
		2.2	Return explosives packaging to serviceable state
		2.3	Segregate explosives packaging that cannot be returned to a serviceable state
3	**Finalise reconditioning procedures**	**3.1**	Dispose of unserviceable explosives packaging
		3.2	Conduct housekeeping procedures
		3.3	Maintain documentation and records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for DEFEXO019 Refurbish explosives packaging

Modification History

Release 1. These Assessment Requirements were released in DEF Defence Training Package release 3.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- applying protective coatings
- handling dangerous goods and hazardous substances
- identifying packaging materials and components
- operating equipment and tools
- using manual handling and team lifting techniques
- using PPE
- applying organisational waste management procedures for unserviceable explosives packaging

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and includes:

- operational knowledge of:
  - characteristics and limitations of explosive packaging
  - organisational documentation requirements
  - organisational waste management procedures for unserviceable explosives packaging
  - refurbishment procedures
  - relevant colour coding
  -

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

DEFEXO210 Manage explosive ordnance engineering and logistics processes

Modification History

Release 2. Modifications made to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to manage explosive ordnance engineering and logistics processes.

It includes identifying and planning explosive ordnance engineering and logistics processes, and feasibility assessments. It also includes managing and concluding engineering and logistics processes.

This unit applies to persons who are required to manage explosive ordnance engineering and logistics processes.

A manager of explosive ordnance processes will have some autonomy of action, may delegate authority to subordinates and is capable of independent decision making, requiring no supervision.

The management of explosive ordnance processes is primarily conducted in installations involved in the storage, distribution and maintenance of explosive ordnance, however it may be performed in research and development establishments, and proof and experimental establishments.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify explosive ordnance processes and feasibility assessment	**1.1** Identify storage, distribution and maintenance processes to be performed and confirm with relevant personnel
	1.2 Identify organisational policies, procedures and issues of concern/shortfall applying to relevant processes
	1.3 Determine resources and any special requirement/s for the performance and conduct of explosive ordnance engineering and logistics processes
	1.4 Assess feasibility of explosive ordnance engineering and logistics processes to be undertaken and identify offsets/compromises as required, in accordance with organisational procedures
2 Plan to conduct explosive ordnance processes	**2.1** Plan to conduct storage, distribution and maintenance processes and identify resource requirement/s in accordance with operational procedures
	2.2 Identify availability and suitability of resources
	2.3 Adjust plans and schedules to accord with resource availability and seek authorisation to progress in accordance with organisational policies and procedures
	2.4 Identify relevant financial resources and seek authorisation to proceed
	2.5 Confirm capital requirements and program acquisition in accordance with explosive ordnance engineering and logistics plan
	2.6 Source production and support materials and plan to procure in accordance with production plan
	2.7 Confirm staffing requirements, and develop and implement recruiting plan to provide technical and

© Commonwealth of Australia, 2025 Public Skills Australia

		administrative staff in accordance with organisational policies and procedures
	2.8	Identify and implement relevant legislative requirements including work health and safety (WHS) and environmental matters, during the planning and production processes
	2.9	Finalise, document and authorise development and production plans in accordance with organisational policies and procedures
3 Manage explosive ordnance processes	**3.1**	Inform explosive ordnance process supervisors about production requirements, resources and delegated authority
	3.2	Manage explosive ordnance processes to ensure efficiency of their performance, and to achieve quality of production and objectives
	3.3	Monitor production and adjust plans to reflect requirements in quality, quantity and efficiency
	3.4	Coordinate explosive ordnance processes and reallocate/adjust resources, as required
	3.5	Conduct liaison with supervisors, suppliers, clients and superiors as required, and address feedback and performance
	3.6	Action reported defects/problems in accordance with organisational procedures and instructions
	3.7	Determine and either provide or request support requirements in accordance with organisational procedures
	3.8	Provide reports in accordance with operational guidelines
4 Conclude processes	**4.1**	Process production in accordance with organisational instructions and procedures
	4.2	Debrief supervisors on the performance of their process
	4.3	Relocate resources in accordance with organisational instructions and procedures
	4.4	Document explosive ordnance processes to meet organisational requirements

Assessment Requirements for DEFEXO210 Manage explosive ordnance engineering and logistics processes

Modification History

Release 2. Modifications made to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adjusting processes to reflect changed circumstances
- communicating with supervisors, suppliers, clients and subordinates
- concluding explosive ordnance processes
- following safety, legislative and statutory requirements relevant to the risk assessment
- identifying, interpreting and analysing risk assessment requirements relevant to explosive ordnance engineering and logistics processes
- identifying, sourcing and allocating relevant resources to the processes
- managing explosive ordnance processes efficiently and effectively
- planning for the conduct of explosive ordnance processes
- preparing complex documents, includes reports, feasibility assessments and organisational plans
- using effective techniques to support teams

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- acquisition processes
- composition of teams, and roles and responsibilities of team members
- explosive ordnance engineering and logistics processes
- feasibility assessment requirements
- instructions and procedures relating to the performance of the processes
- inventory control
- operational safety associated with the explosive ordnance process
- organisational procedures for budgets and financial management
- relevant legislation, organisational policies, procedures and instructions, including work health and safety

© Commonwealth of Australia, 2025 Public Skills Australia

- relevant organisational reporting requirements and procedures
- resource and other requirements for the engineering and logistics processes

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

DEFEXO215 Operate lighterage equipment

Modification History

Release 2. Modifications made to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to operate lighterage (also called lightering) ammunition equipment.

It includes the requirement to inspect, operate and maintain the lighter and to communicate with the tug boat operator during towing operations. It also includes completing lighter equipment housekeeping activities.

It does not include the requirement to load or unload the lighter.

This unit applies to persons who are required to operate an ammunition lighter in order to move ammunition.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Prepare for lighter operations**	**1.1** Identify and confirm requirements to operate a lighter in accordance with organisational procedures
		1.2 Apply work health and safety (WHS) requirements and recognise safety precautions throughout the operation
		1.3 Inspect lighter for safe operation in accordance with organisational procedures
		1.4 Identify, obtain and prepare equipment and stores required for operation in accordance with operational guidelines
2	**Operate lighter**	**2.1** Moor and manoeuvre lighter in accordance with organisational requirements
		2.2 Open, close and secure hatches in accordance with work requirements and operational procedures
		2.3 Identify and maintain load security and protection throughout the operation
		2.4 Establish and maintain communication with tow boat operators throughout the towing operation
3	**Maintain lighter**	**3.1** Conduct minor repairs and maintenance in accordance with organisational work procedures
		3.2 Erect and pull-down bird nets in accordance with operational procedures
		3.3 Clean lighter in accordance with safety and organisational guidelines
4	**Complete housekeeping activities**	**4.1** Maintain equipment and tools in accordance with operational guidelines
		4.2 Finalise records and documentation, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

DEFEXO509 Perform purging

Modification History

Release 2. Modifications made to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to purge explosive ordnance or containers.

It includes preparing for explosive ordnance testing, conducting and monitoring purging and finalising purging procedures.

This unit applies to persons who are required to purge explosive ordnance or containers.

Purging of explosive ordnance or containers is required to be performed on a range of explosive ordnance and specialised containers during maintenance processes.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for DEFEXO509 Perform purging

Modification History

Release 2. Modifications made to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant compatibility and environmental constraints
- applying relevant legislation, statutory requirements, organisational policies, procedures and structures
- calculating and applying net explosive quantity
- communicating effectively orally and in writing
- preparing for testing
- reading, accessing, interpreting and applying technical instructions and drawings related to purging
- undertaking purging activities including:
  - conducting and monitoring purging
  - finalising purging procedures
  - maintaining documentation
  - monitoring pressures
  - operating purging equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- assessment of compatibility
- calculation of net explosive quantity
- characteristics and limitations of purging equipment
- effects of environmental conditions
- operability and compatibility of purging equipment
- organisational documentation requirements
- organisational safety information sources
- relevant legislation, regulatory codes, organisational safety policies, procedures and structures

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

DEFEXO510 Maintain small arms ammunition

Modification History

Release 2. Modifications made to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to maintain small arms ammunition to depot level maintenance requirements as specified by the Australian Defence Force.

It includes preparing for and maintaining small arms ammunition, and completing maintenance activity. It also includes identifying and selecting tools and equipment, and applying organisational safety requirements and appropriate legislative and regulatory requirements.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Explosive Ordnance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for small arms	**1.1** Identify, analyse and confirm small arms ammunition

© Commonwealth of Australia, 2025 Public Skills Australia

	ammunition maintenance		maintenance requirements from work requests/instructions
		1.2	Apply work health and safety (WHS) requirements in accordance with organisational procedures throughout the operation
		1.3	Identify, confirm and obtain small arms ammunition to be maintained, in accordance with technical documentation
		1.4	Identify, obtain and prepare technical references, tools, equipment, consumables and packaging components in accordance with organisational procedures
		1.5	Identify, calculate, assess and apply net explosive quantities and compatibility throughout the operation
		1.6	Monitor and maintain environmental conditions, as required
2	**Maintain small arms ammunition**	**2.1**	Inspect small arms ammunition in accordance with organisational procedures
		2.2	Conduct relevant maintenance in accordance with organisational procedures, technical specifications and drawings
		2.3	Apply emergency and contingency procedures, as required
		2.4	Conduct and record relevant small arms ammunition tests in accordance with organisational procedures, technical specifications and drawings
3	**Complete maintenance activity**	**3.1**	Process small arms ammunition in accordance with the work requests/instructions
		3.2	Maintain equipment/tools in accordance with organisational procedures and guidelines
		3.3	Conduct housekeeping procedures in accordance with workshop requirements
		3.4	Maintain documentation and records in accordance with statutory, organisational and workshop requirements

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to DEFEO510C Maintain small arms ammunition.

Assessment Requirements for DEFEXO510 Maintain small arms ammunition

Modification History

Release 2. Modifications made to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant operational policies and procedures
- applying relevant work health and safety requirements
- applying safety, legislative and statutory requirements relevant to the risk assessment
- assessing and applying compatibility to identify and calculate net explosive quantities
- calculating net explosive quantity
- completing maintenance activity
- conducting relevant small arms ammunition tests
- identifying, selecting and using appropriate tools and equipment
- maintaining documentation
- preparing for and maintaining small arms ammunition.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- assessment of compatibility
- effects of environmental conditions
- net explosive quantity calculations
- operational maintenance procedures
- operations, characteristics and limitations of small arms ammunition to be maintained
- operations, characteristics and limitations of tools and equipment used in maintenance
- relevant documentation requirements
- relevant operational policies and procedures, including work health and safety
- small arms ammunition maintenance including:
  - cleaning
  - components change out
  - fuzing and defuzing

© Commonwealth of Australia, 2025 Public Skills Australia

  - painting
- small arms ammunition testing procedures
- storage, distribution or maintenance of explosive ordnance
- technical references including:
  - relevant orders and instructions.
  - relevant publications
  - technical drawings
  - technical reference pamphlets

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

DEFEXO603 Conduct explosive ordnance trials

Modification History

Release 2. Modifications made to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to conduct trials in an explosive ordnance research environment.

Explosive ordnance trials are normally conducted to select new weapons systems or explosive ordnance for introduction into the Australian Defence Force.

It includes preparing for and conducting explosive ordnance trials and reporting on trial results.

This unit applies to persons who are required to prepare and conduct trials in an explosive ordnance research environment.

Trials are a common component of explosive ordnance research and involve a large number of personnel both in their planning and implementation. Persons however, may not necessarily be involved in both planning and implementing the research. It is common that persons involved in the implementation phase of the trials are not involved in the planning phase. In other instances, persons may be involved with both the planning phase and the implementation phase of the trial.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for explosive ordnance trial	**1.1** Obtain and confirm information about resource requirements and availability in accordance with organisational procedures
	1.2 Prepare information support systems for explosive ordnance trial including achievable reporting and recording processes, in accordance with resource requirements
	1.3 Negotiate and resolve coordination issues with others affected by explosive ordnance trial
	1.4 Identify and observe health and safety (WHS)/occupational health and safety (OHS) principles and requirements throughout the trial process work
2 Conduct explosive ordnance trial	**2.1** Identify and liaise with explosive ordnance trial planners in accordance with organisational policy and procedures
	2.2 Implement, monitor and amend explosive ordnance trial plan based on changing circumstances, in accordance with methodologies and organisational procedures
	2.3 Allocate resources to trial tasks in accordance with plan and available resources
	2.4 Record data being generated by trial in accordance with agreed methodology and organisational procedures
3 Report on explosive ordnance trial results	**3.1** Collect and report data generated by explosive ordnance trial in accordance with organisational policy and procedures
	3.2 Provide options and recommendations resulting from explosive ordnance trial in a clear and comprehensive format
	3.3 Produce and maintain post-trial reports, statistical reports and other records in accordance with requirements and organisational procedures

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to DEFEO603C Conduct explosive ordnance trials.

Assessment Requirements for DEFEXO603 Conduct explosive ordnance trials

Modification History

Release 2. Modifications made to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying organisational safety policies and structures, including work health and safety (WHS)/occupational health and safety (OHS) requirements
- applying relevant organisational policies and procedures
- applying safety, legislative and statutory requirements relevant to the risk assessment
- communicating clearly and effectively
- coordinating relevant activities
- documenting and reporting trial results
- evaluating information
- identifying and allocating resources
- identifying hazards, assessing risks and implementing control measures
- identifying issues, interpreting and analysing risk assessment requirements relevant to explosive ordnance trial work being performed
- implementing trial methodologies and procedures
- recording trial data

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- evaluation processes
- explosive ordnance trials including:
  - environmental testing
  - organisational trials
  - proof testing
  - research group or divisional trials
  - specific field testing which is not a normal component of laboratory testing
- information support systems

© Commonwealth of Australia, 2025 Public Skills Australia

- organisational safety policies and structures
- organisational WHS/OHS requirements
- relevant organisational methodologies, policies and procedures
- resource requirements and allocation guidelines
- risk assessment
- trialling methodologies

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

DEFGEN002 Work independently

Modification History

Release 2. Modifications made to the Assessment Conditions.

Release 1. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

Application

This unit describes the skills required to work as a member of a team or as an individual for periods of time without direct supervision.

This unit applies to Defence personnel on operations.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously, performing complex tasks, in a broad range of contexts that could be hostile, while maintaining personal safety.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

General

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Undertake work activities**	**1.1**	Identify and undertake work requirements
		1.2	Implement instructions and directions
		1.3	Maintain communication with chain of command, advising of progress of task/activity and of any legal requirements and/or ramifications of activities
2	**Accept responsibilities**	**2.1**	Accept responsibilities referring to supervisor for any activity that exceeds the scope of the defined task
		2.2	Determine performance requirements based on objectives and goals and validate with supervisor
3	**Maintain team performance**	**3.1**	Monitor individual performance against defined performance requirements and take action as required
		3.2	Monitor and lead performance of others to meet team objectives and goals
		3.3	Refer issues which cannot be rectified or addressed
		3.4	Notify chain of command of any changes in priorities or tasks
		3.5	Recognise and adhere to level of authority
		3.6	Complete required documentation

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for DEFGEN002 Work independently

Modification History

Release 2. Modifications made to Assessment Conditions.

Release 1. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- communicating instructions and directions
- communicating performance expectations
- completing a range of documentation
- encouraging team members
- providing informal performance counselling
- providing feedback on performance to team members
- representing issues to management

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- legal requirements and ramifications of team activities
- method of monitoring performance
- relevant policies and procedures
- team members' duties and responsibilities

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

DEFGEN009 Analyse causes and identify countermeasures for injuries in physical activities

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCM003B Analyse causes and identify countermeasures for injuries in physical activities. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to establish the root cause/s of injuries occurring in physical activity, to develop countermeasures, to report the analysis, and to make recommendations to supervisors.

This unit was developed for Defence workers involved in analysing causes and identifying countermeasures for injuries in physical activities as a workplace responsibility, but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct supervision, while performing complex tasks, in a range of contexts. They must be able to use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

General

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for a causal analysis	1.1 Identify, obtain and assemble background documentation to collate all relevant facts and information that may guide and contribute to the causal analysis. 1.2 Identify relevant personnel and request them to provide input to the causal analysis. 1.3 Identify and assemble other relevant sources of information regarding injury causation. 1.4 Identify, specify and prepare methods and tools to be used in the analysis.
2. Identify the contributing factors involved in causing injury	2.1 Review relevant information sources to determine contributing factors typically involved in causing injury. 2.2 Observe activities and review if needed. 2.3 Conduct interviews with relevant personnel. 2.4 Review contexts in which the activities are commonly conducted. 2.5 Analyse components and aspects of activities which appear to be associated with greater risk of injury in detail. 2.6 Record data using organisational analytical tools in order to compile inputs to the analysis. 2.7 Determine, validate and record final list of contributing factors involved in injury causation by cross referencing results from all causal analysis activities.
3. Undertake a root cause analysis	3.1 Determine root causes of injury in the activity through further analysis of the final list of contributing factors in the light of contextual information. 3.2 Determine, validate and record list of root causes of injury.
4. Recommend countermeasures	4.1 Identify countermeasures where possible, for each root cause of injury, from available information and subject matter experts. 4.2 Develop countermeasures from first principles, in consultation with subject matter experts, where no proven countermeasure can be identified. 4.3 Prepare written and oral causal analysis report, including details of recommended countermeasures, and deliver to decision

Assessment Requirements for DEFGEN009 Analyse causes and identify countermeasures for injuries in physical activities

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- strong communication skills to elicit and convey information through:
  - listening
  - questioning
  - paraphrasing
  - clarifying
  - summarising
- seeking and analysing information
- preparing for a causal analysis
- identifying contributing factors involved in causing injury
- identifying root causes of injury
- recommending countermeasures
- identifying analysis tools and methods appropriate to the workplace
- identifying intervention points for advice to assist in work and to guide problem solving

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- causation models and definitions
- cause and effect diagrams

© Commonwealth of Australia, 2025 Public Skills Australia

- data collection and management procedures
- format of a brief
- format of an oral presentation
- hierarchy of controls
- organisational policies, procedures and guidelines
- organisational structure and function
- safety risk and Haddon's Matrices

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFGEN016 Administer personnel

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCM306A Administer personnel. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.2 and 1.9 revised • Element 1 reworded

Application

This unit describes the skills required to administer personnel. The application of this unit in the workplace includes supervising a designated team of personnel in their administration and compliance with organisational administrative policy and procedures. It includes aspects of supervising personnel readiness for work, welfare, entitlements, discipline and competency.

Supervisors may be at the middle to senior line-management level or junior management level. The number of personnel being administered will vary greatly but will usually be ten to thirty personnel.

This unit applies to those leading and managing others in an operational environment where the normal access to a personnel administrative support network is not available.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously, with supervising responsibilities. They would perform complex tasks in a range of contexts.

© Commonwealth of Australia, 2025 Public Skills Australia

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

General

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Ensure personnel readiness	1.1 Obtain detailed knowledge of personnel information to enable an appreciation of individual circumstances. 1.2 Access information about readiness requirements from organisational information systems. 1.3 Monitor accessible information to ensure the state of personnel readiness is known. 1.4 Inform personnel of their readiness obligations to the organisation to ensure compliance through self-management. 1.5 Gather and review readiness records and documentation to determine personnel progress with readiness maintenance requirements. 1.6 Plan and implement opportunities to maintain personnel readiness. 1.7 Seek technical advice on readiness policy and procedure to enable administrative actions. 1.8 Report information on personnel readiness to designated authorities including specific information on and strategies planned to address personnel who are ‘not ready’. 1.9 Implement administrative actions for personnel identified as permanently ‘not ready’. 1.10 Identify personnel entitled to readiness waivers by designated authorities. 1.11 Compile and submit waiver documentation for consideration.
2. Administer personnel entitlements	2.1 Obtain and review organisational policies and procedures relevant to personnel entitlements using information systems. 2.2 Identify entitlements against personnel individual circumstances using personnel information. 2.3 Access entitlement application forms to be completed by personnel and provide general instructions and guidance to personnel.

© Commonwealth of Australia, 2025 Public Skills Australia

	2.4 Monitor progress of entitlement applications to ensure timely and efficient handling by the administrative stream of the organisation.
3. Ensure personnel welfare	3.1 Inform personnel of welfare requirements specific to their employment, and of welfare support services available to them. 3.2 Maintain welfare related documentation. 3.3 Respect religious preferences and, where suitable to organisational requirements, facilitate opportunities to participate in religious events.
4. Administer personnel discipline	4.1 Communicate standards of organisational discipline to personnel in order to promote appropriate behaviour and conduct. 4.2 Recognise and respond to behaviour in contradiction of organisational disciplinary standards. 4.3 Take organisational discipline administrative actions in response to significant breaches of organisational policies and procedures or disciplinary standards. 4.4 Counsel personnel to improve behaviour of and compliance with disciplinary standards. 4.5 Monitor own behaviour in order to ensure conduct is in accordance with organisational policies and procedures or disciplinary standards.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1 2 3 4 **5**	1 2 3 **4** 5	1 2 3 **4** 5	1 2 3 **4** 5	1 2 3 4 5
Learning	Reading	Writing	Oral communication	Numeracy NA

Performance variables:

1 2 3 4 **5**	1 2 3 **4** 5	1 2 3 **4** 5	1 2 3 **4** 5
Support	Context	Text complexity	Task complexity

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Assessment Requirements for DEFGEN016 Administer personnel

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- accessing and compiling complex organisational forms and applications
- analysing and validating information
- conducting interviews to obtain detailed personal information
- transacting a range of administrative actions including:
  - administrative warning
  - notice to show cause
  - pay adjustment

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- counselling techniques
- organisational disciplinary standards and laws
- organisational information systems
- organisational personnel entitlements
- organisational readiness requirement specific to individual service
- organisational support
- organisational welfare infrastructure, policy and procedures
- organisational writing standards
- personnel support agencies

DEFGEN028 Assist in managing production processes

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to assist in the routine operations involved in the production of a Defence news publication.

It includes analysing and interpreting incoming material for newsworthiness and distributing the material for response from the relevant sectors within Defence.

This unit applies to reporters who are required to be involved in the day-to-day operation of a unit that has responsibility for the production of Defence publications, such as services newspapers, magazines and internet sites. All reporters will be involved with this activity on an asneeds basis; this competency is required by all Defence reporters.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit act in a broad range of contexts under limited supervision as part of a team, and perform specific tasks. Assistance and direction from senior reporters or editors would be provided.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

General

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Manage incoming material**	**1.1** Collect and record incoming material
		1.2 Make an assessment of new material to determine its newsworthiness and make recommendations to the editor
		1.3 Classify and archive material of potential value for future reference in accordance with operational procedures
2	**Assist in managing daily operations**	**2.1** Register letters to the editor and forward to the relevant personnel for response
		2.2 Complete production tasks as directed by supervisor in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to DEFPR307B Assist in managing production processes.

Assessment Requirements for DEFGEN028 Assist in managing production processes

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying safety, legislative and statutory requirements
- assessing and making a fair and impartial judgement about the newsworthiness of material with full consideration of Defence public affairs objectives and communications ethics relevant to the audience and organisation
- assisting in managing daily news publication operations
- composing factual news publication information into a story
- managing incoming news publication material
- prioritising news publication information for relevance and accuracy
- relating effectively with contributors and stakeholders
- responding to readers' letters.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian Defence Force public affairs objectives and the characteristics of Defence public affairs organisations
- Australian journalists' association code of ethics
- Defence news editorial board guidelines, and publishing procedures and deadlines
- news publications and the types of stories relevant for Defence publications
- reader and organisational interests
- relevant legislation
- relevant public affairs organisational policies and procedures
- security requirements, conditions on reporting sensitive issues, Defence issues, current affairs issues
- standard news production tasks and processes.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in a range of workplace operational situations, with particular emphasis placed on the assessment of a variety of incoming material and recommendations, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- an office with operational conditions or a simulated environment that re-creates realistic office and operational scenarios in a wide range of situations that may be encountered by a Defence reporter
- relevant and appropriate materials, tools and equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

DEFGEN307 Maintain logistic support in an adverse environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to maintain the delivery of logistics in an adverse environment.

It includes preparing for logistics operations in an adverse environment, and protecting logistics road movement and site.

An adverse environment typically involves threats and armed conflict.

This unit applies to logistics persons who have a responsibility to organise and manage the delivery of logistic support in an adverse environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Typically, persons undertaking this unit work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, undertake complex tasks and take responsibility for the quality of their specialised outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

General

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Prepare for logistics operations in an adverse environment**	**1.1** Source and analyse intelligence to define the environment in which logistic support is to be provided, in accordance with organisational procedures
		1.2 Identify adverse circumstances that could negatively impact on the delivery of logistic support
		1.3 Analyse and assess adverse circumstances for their potential for occurrence and subsequent consequence to logistics operations
		1.4 Develop and integrate risk management control measures into planning considerations
		1.5 Integrate risk management control measures into logistics operations and communicate to all relevant logistics elements
2	**Protect a logistics site**	**2.1** Plan protection of logistics site taking into account the technical requirements of delivering service support and siting requirements
		2.2 Liaise with other logistics organisations to establish shared responsibilities and mutual support arrangements
		2.3 Select and integrate protective control measures into protection plan
		2.4 Develop and communicate protection plan to all relevant personnel in accordance with organisational procedures
3	**Protect logistics road movement**	**3.1** Oversee and monitor road movement vehicle preparation to ensure vehicles are prepared for movement through an adverse environment
		3.2 Liaise with vehicle escorts, as required, to establish common protocols for the road movement protection plan, communications arrangements and actions to be taken by personnel in adverse circumstances
		3.3 Apply convoy protection control measures during road movement in accordance with organisational procedures and protection plan
		3.4 Respond to emergency or threatening situations in accordance with organisational procedures and

© Commonwealth of Australia, 2025 Public Skills Australia

protection plan

3.5 Maintain communication links with the control centre and within the road convoy during road movement, as required, in accordance with agreed protocols

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to DEFCM307A Maintain logistic support in an adverse environment.

Assessment Requirements for DEFGEN307 Maintain logistic support in an adverse environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to plans during implementation to suit the changing nature of the environment and operation
- planning and preparing processes to develop suitable logistics courses of action in an adverse environment
- applying relevant legislation and organisational policies and procedures
- communicating instructions to implement protection plans and tasks
- developing protection plan and relevant control measures
- drafting and releasing complex forms of written communication
- employing strategies to protect logistics personnel and equipment when stationary and when moving by road
- identifying adverse circumstances accurately within the logistics operating environment
- identifying, interpreting and analysing risk assessment requirements relevant to work being performed
- liaising with other agencies to integrate protection plan
- planning and coordinating vehicle road movement
- protecting logistics site and road movements.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- adverse circumstances, hazard and protection plan control measures
- convoy protection control measures and protocols
- escorts for relevant vehicles including:
  - aircraft
  - armed helicopters
  - armed road vehicles
  - emergency services vehicles
  - police vehicles

© Commonwealth of Australia, 2025 Public Skills Australia

- emergency or threatening situations
- functional and technical siting requirements of specialist logistics elements
- interrelationship between specialist logistics elements within an integrated logistics team
- logistics elements including:
  - catering
  - health
  - maintenance
  - supply
  - transport
- logistics planning processes and support concepts
- protective measures in a Defence environment
- protective siting requirements of logistics elements
- regulatory, technical and industry standards, and organisational policies and procedures as they relate to logistics
- risk management control measures for deployed logistics elements.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- equipment used to conduct logistics operations in an adverse environment
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including organisational policies, procedures, regulations, codes of practice and operation manuals.

DEFGEN308 Provide specialist technical regulatory framework advice

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to provide specialist advice related to the technical regulatory framework.

It includes identifying complex issues, providing technical advice, formulating options and selecting the preferred option to address identified issues. It specifically addresses advice that is relevant to technical regulatory framework activity and is not intended to cover technical advice that is provided in a broader context of the organisational endeavour or a professional discipline.

This unit applies to technical regulatory framework specialists working in Defence materiel logistics but is applicable to any persons in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Typically, persons undertaking this unit work independently or as part of a team under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify and analyse issue/s	**1.1** Observe, receive and clarify circumstances that require provision of advice relating to the technical regulatory framework
	1.2 Identify and confirm issues, as required, through consultation with relevant personnel
	1.3 Analyse circumstances, and interpret and clearly define issue/s in accordance with task requirements
	1.4 Conduct research related to issue/s and seek advice of relevant personnel to clarify unclear findings
	1.5 Document research outcomes and feedback received from relevant personnel, in accordance with operational procedures
2 Formulate options for technical regulatory framework advice	**2.1** Identify and evaluate appropriate options related to the provision of advice
	2.2 Prioritise identified options and make recommendations in accordance with task requirements and regulatory framework
3 Provide specialist technical regulatory framework advice	**3.1** Finalise draft advice and discuss with relevant stakeholders in accordance with organisational policies
	3.2 Negotiate, document and incorporate stakeholder requirements within proposed advice
	3.3 Report finalised advice in accordance with ethical and practical guidelines and within specified resource constraints

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for DEFGEN308 Provide specialist technical regulatory framework advice

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- analysing and evaluating information
- applying relevant legislation, regulations, statutory requirements and organisational policies and procedures
- communicating effectively with colleagues and stakeholders
- conducting research into identified issues and identifying relevant information
- formulating and prioritising options for technical regulatory framework advice, and selecting the most appropriate option
- identifying and analysing issue/s surrounding the provision of advice
- identifying, interpreting and analysing risk assessment requirements relevant to work being performed
- preparing and presenting advice reports
- providing specialist technical regulatory framework advice.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- analysis process
- configuration management
- ethical and practical guidelines
- integrated logistic support
- relevant organisational policies, procedures, guidelines and industry standards
- product knowledge related to systems and/or equipment in service in the organisation
- professional codes of practice
- relevant research techniques and information sources
- specialist technical regulatory framework advice and protocols.

DEFGEN310 Establish technical risk management systems

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to manage the factors that might adversely affect the technical integrity of the organisation's materiel, program and organisational outcomes.

It includes directing the planning and management of technical risks, managing risks to the risk management plan requirements, and assessing technical risk management outcomes associated with materiel. It also includes developing and establishing a technical risk management strategy.

This unit applies to technical regulatory framework specialists working in Defence materiel logistics but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Typically, persons undertaking this unit work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs.

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Direct planning of technical risk management	**1.1** Direct potential, perceived and actual technical risks for identification, documentation and analysis, in consultation with managers and relevant stakeholders, as the basis for technical risk management planning
	1.2 Select and modify risk management methods, techniques and tools for managers to analyse information, evaluate options and determine preferred risk approaches within the overall organisational environment
	1.3 Direct the development, communication and implementation of risk management plans and strategies to ensure clarity of business objectives in accordance with technical regulatory framework requirements
	1.4 Identify, develop and maintain the technical risk management system to enable effective management and communication of technical risk activities and outcomes, responses and results to relevant stakeholders
2 Direct management of technical risk and manage technical risk	**2.1** Manage technical risk in accordance with agreed risk management plans and organisational procedures
	2.2 Review progress, analyse variance and initiate risk responses to achieve objectives in changing environments
	2.3 Identify and assign risk levels to planned technical outcomes to facilitate monitoring and authorisation of remedial actions
3 Assess technical risk management systems	**3.1** Review and analyse technical risk management outcomes to assess the effectiveness of the risk management plan in maintaining the integrity of materiel
	3.2 Aggregate and report lessons learned for feedback to managers and senior management for strategic review and future planning

Foundation Skills

- applying legislative, regulatory and organisational policies and procedures
- applying technical risk management and organisational procedures
- applying, monitoring and reporting on relevant implementation processes
- assessing technical risk management systems
- identifying, interpreting and analysing risk assessment requirements relevant to work being performed
- interpreting organisational role relevant to technical risk management plans
- modifying activities for variations in workplace context and environment
- planning and determining technical risk management plans
- planning, directing and managing technical risk
- working and communicating effectively with relevant stakeholders.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- implementation processes
- monitoring processes
- relevant legislation, regulations and organisational policies, guidance and procedures
- relevant risk management methodologies, capabilities, limitations, applicability and outcomes
- relevant technical risk management context in the materiel life cycle and other risk management functions
- relevant work content, risk, processes, tools and techniques that apply in the various phases of the materiel life cycle and the program cycle, and how these relate to business cycles, particularly financial cycles
- role of the technical regulatory framework and the organisation’s risk management plan.

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Determine risks	**1.1** Identify, document and analyse technical risks as a basis for risk planning, in consultation with relevant stakeholders and higher technical/engineering authorities
	1.2 Use established risk management techniques and tools to analyse risks and assess options, in accordance with delegated technical authority
	1.3 Recommend preferred risk approaches to relevant authority to meet task requirements, in accordance with delegated technical authority and organisational procedures
	1.4 Develop plans, seek stakeholder agreement about plans and communicate plans effectively to ensure clarity of understanding and ongoing management of technical risk factors
	1.5 Determine designated risk management processes and procedures to enable effective management and communication of risk events, responses and results
2 Monitor and control risk	**2.1** Manage activities in accordance with organisational engineering management plan to ensure a common approach to achieving objectives
	2.2 Monitor progress against organisational engineering management plan and risk management plan to identify variances and recommend responses to higher technical authority for remedial action
	2.3 Implement agreed risk responses and modify plans to reflect changing project objectives in changing work contexts and environments
3 Assess risk management outcomes	**3.1** Review outcomes of technical/engineering risk management activities to determine effectiveness of risk management processes and procedures
	3.2 Identify, document and report risk issues and recommend improvements to relevant authorities to inform future applications

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adhering to relevant data collection, storage and retrieval requirements
- applying relevant legislation, regulations and organisational policies and procedures
- applying technical risk management procedures
- assessing risk management outcomes
- determining and assessing technical risks
- identifying critical indicators of technical risk and assessing the risk management system's performance appropriate to the organisational context including:
  - determining, monitoring and controlling risks
  - assessing technical risk management outcomes
- identifying, interpreting and analysing risk assessment requirements relevant to work being performed
- interpreting organisational role relevant to technical risk management
- modifying activities to manage variations in workplace context and environment
- monitoring and controlling relevant risk management
- operating equipment and systems relevant to technical risk management activities
- working and communicating effectively with stakeholders and technical authorities.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- relevant legislation, regulations and organisational policies and procedures
- relevant risk management in the context of the materiel life cycle
- relevant risk management methodologies, their capabilities, limitations, applicability and outcomes
- technical regulatory framework, organisational engineering management plan and risk management plan
- technical risk management including application in the technical/engineering context of principles, tools, techniques, standards, and processes.

DEFGEN313 Establish technical data and information management systems

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to establish the technical data and information management systems framework for a particular organisational context or environment in which specific technical data and information are created, used and maintained.

It includes identifying technical context of the organisation to establish technical creator's accountability requirements and developing a management system framework. It also includes identifying and responding to contextual changes over a system project life cycle.

This unit applies to technical regulatory framework specialists working in Defence materiel logistics but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Typically, persons undertaking this unit work independently or as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify technical context of the organisation	**1.1** Determine and document technical context, nature of the jurisdiction and nature of the organisation
	1.2 Identify and interpret technical regulatory framework specific to the organisation and clarify, as required
2 Establish technical creator's accountability requirements	**2.1** Identify the creator of technical data and information by determining all parts of the organisation that create technical data and information
	2.2 Determine and document accountability requirements and functional responsibilities of the creators of technical data and information
	2.3 Verify sources used in research as authentic and document in accordance with organisational procedures and relevant industry standards
3 Develop management system framework	**3.1** Develop a management system framework from a review and synthesis of individual technical creator requirements
	3.2 Trial proposed system framework to ensure functionality, maintainability and growth potential, and make adjustments as required
	3.3 Document system framework, its protocols and guidelines to ensure consistency of application by users
4 Identify and respond to contextual changes over time	**4.1** Map system functions generating technical data and information and the technical framework governing them, to organisational structures
	4.2 Identify and document changes to the administrative and system functional context over time
	4.3 Analyse and respond to the effects of changes on technical data and information management system structures
	4.4 Review and update documentation taking identified changes into consideration in accordance with organisational procedures and relevant industry

Assessment Requirements for DEFGEN313 Establish technical data and information management systems

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- analysing system data and information
- applying relevant legislative, regulatory and organisational policies and procedures
- applying technical data and information management knowledge relevant to work being performed
- applying, monitoring and reporting on relevant information management system implementation processes
- developing management system framework
- defining technical creator's accountability requirements
- identifying and responding to contextual changes over project life cycle
- identifying technical context of the organisation
- identifying, interpreting and analysing risk assessment requirements relevant to work being performed
- interpreting organisational role relevant to technical risk management system plans
- planning and developing technical data and information management system plans.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- relevant Australian and international industry standards
- relevant legislation and organisational policies and procedures
- research methods and techniques suitable for information management systems
- sources of data relevant to information management system research
- technical regulatory framework compliance management systems, and must include one or more of the following:
  - breach management policies and processes including the identification, classification, investigation, rectification and reporting of breaches in compliance requirements
  - compliance related management information systems
  - compliance reporting procedures

© Commonwealth of Australia, 2025 Public Skills Australia

- continuous improvement processes for information management systems including monitoring, evaluation and review
- documentation of compliance requirements relevant to the organisation
- processes for the internal and external promulgation and promotion of information on compliance requirements and a compliance program management system
- record-keeping systems required for compliance management
- specification of compliance management functions, accountabilities and responsibilities under the technical regulatory framework
- techniques and performance indicators for monitoring the operation of an information management system.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and workplace documentation currently used in industry
- relevant guidelines and organisational procedures relating to system test and evaluation processes
- applicable documentation including organisational procedures, protocols, regulations, codes of practice and operation manuals.

DEFINT015 Locate electromagnetic emissions

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to establish the direction from which a received emission was transmitted (‘direction finding’) from the clandestine or overt interception of a transmitted electromagnetic emission (‘intercept’). This unit also covers the production and reporting of a triangulated emission point-of-origin assessment.

It includes preparing for direction finding activities, and intercepting and locating an electromagnetic emission. It also includes reporting a triangulated emission point-of-origin assessment.

This unit applies to Defence personnel working in electronic warfare and signals intelligence fields but may be applicable to any persons working in a similar role.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Typically, persons undertaking this unit work independently with indirect supervision, and undertake complex tasks within familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Intelligence

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Prepare for direction finding activities**	**1.1** Develop a direction finding task plan, detailing key tasks and timelines in accordance with organisational procedures
		1.2 Prepare direction finding equipment considering task requirements and duration in accordance with manufacturer specifications
		1.3 Obtain and clarify tasks and orders, as required
		1.4 Undertake engagement with all identified stakeholders, in accordance with task requirements and operational procedures
2	**Intercept electromagnetic emission**	**2.1** Operate direction finding equipment in accordance with manufacturer specifications and organisational procedures
		2.2 Intercept target electromagnetic emission in accordance with direction finding task
		2.3 Confirm identity of target electromagnetic emission in accordance with organisational procedures
		2.4 Identify relevant legal requirements and apply during interception activities
3	**Locate electromagnetic emission**	**3.1** Determine a line of bearing to target emission
		3.2 Recognise and apply methods to improve accuracy of direction finding measurements
		3.3 Validate electromagnetic emission and report direction finding measurement in accordance with organisational procedures
		3.4 Apply direction finding processes to multiple direction finding sites to meet task requirements
		3.5 Determine a best point estimate of electromagnetic emission point of origin, using lines of bearing communicated from multiple sensors
		3.6 Document and report electromagnetic direction finding outcomes to relevant personnel in accordance with

© Commonwealth of Australia, 2025 Public Skills Australia

organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to DEFIN015 Locate electromagnetic emissions.

Assessment Requirements for DEFINT015 Locate electromagnetic emissions

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant organisational policies, procedures and protocols
- applying safety, legislative and statutory requirements relevant to the risk assessment
- communicating effectively within the workplace
- converting a magnetic line of bearing to a grid line of bearing for triangulation compilation
- following instructions, protocols and directives
- identifying, interpreting and analysing risk assessment requirements relevant to work being performed
- listening effectively
- locating and intercepting emission
- reporting information appropriate to the situation
- triangulating the location of the isolated electromagnetic emission within a specified and acceptable margin of error
- using specialist sensor equipment.
- using organisational systems and equipment to conduct direction finding.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- calculations to convert a magnetic line of bearing to a grid line of bearing for triangulation compilation
- communication network systems and architecture
- compliance principles
- direction finding and geolocation principles and procedures
- direction finding systems and equipment
- electromagnetic spectrum
- international time zones and date lines
- magnetic to grid conversion
- manufacturer specifications for relevant locating electromagnetic emissions equipment

© Commonwealth of Australia, 2025 Public Skills Australia

- radio frequency propagation
- relevant direction finding task plan
- relevant legislation and organisational policies and procedures including:
  - telecommunications legislation
  - privacy legislation and protocols
- relevant reporting procedures and formats
- triangulation mathematical equations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including organisational guidelines, protocols, procedures, regulations, codes of practice and operation manuals.

DEFINT016 Log target communications

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to record the details of intercepted target communications.

It includes logging intercepted communications and reporting items of interest.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

This unit applies to Defence persons working in electronic warfare and signals intelligence fields but may be applicable to any persons working in a similar role.

Typically, persons undertaking this unit work independently with indirect supervision, and perform complex tasks in familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

1	**Log intercepted communications**	**1.1** Log intercept details or provide the gist of the intercept in accordance with organisational procedures
		1.2 Identify and flag information of situational value contained within intercept
		1.3 Use approved organisational abbreviations for brevity in accordance with organisational protocols
		1.4 Take appropriate actions to identify and remedy, or report problems encountered during logging process
		1.5 Maintain security of information in accordance with organisational procedures
		1.6 Identify and apply relevant legal requirements for intercept activities during logging process in accordance with organisational policy and task requirements
2	**Report items of interest**	**2.1** Conduct, annotate and report situational analysis of information, as required
		2.2 Prioritise situational information in accordance with task requirements
		2.3 Report situational information to relevant personnel in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

Assessment Requirements for DEFINT016 Log target communications

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant organisational policies and procedures
- applying legislative and statutory requirements relevant to targeted communications
- assessing the situational value of information
- communicating effectively
- following instructions, protocols and directives
- identifying information of value contained within an intercepted communication
- identifying, interpreting and analysing requirements relevant to target communications
- logging intercepted communications
- prioritising and reporting identified information of value relevant to the operation
- using current specialist sensor equipment and procedures across a range of logging activities involving a variety of relevant workplace situations, collection systems and target communications environments.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- communication network systems and architecture
- gist protocols
- international time zones and date lines
- relevant legal requirements including:
  - telecommunications legislation
  - privacy legislation
- relevant organisational policies, protocols, guidelines and procedures
- reporting procedures and formats
- situational value protocols.

DEFINT017 Analyse information for situational value

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to organise and perform the rapid analysis of information in order to determine its situational value.

It includes organising and interpreting data into information to assess and report situational value outcomes in an intelligence environment.

This unit applies to Defence personnel working in electronic warfare and signals intelligence fields but may be applicable to any persons working in a similar role.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Typically, persons undertaking this unit work independently with indirect supervision, and perform complex tasks in unfamiliar contexts, with a high level of analysis and risk assessment required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFINT017 Analyse information for situational value

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- analysing data and interpreting information including:
  - applying critical analysis techniques
- applying relevant organisational policies and procedures
- assessing the situational value of information
- communicating effectively with relevant stakeholders
- identifying, interpreting and analysing risk assessment requirements relevant to situational value
- maintaining records, information and repositories
- organising information/data for analysis
- reporting information and outcomes appropriate to the situation.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Defence electronic warfare and signals intelligence field context
- methods of information analysis including:
  - association matrices
  - collaborative analysis
  - critical analysis techniques
  - historical analysis
  - link analysis
  - qualitative analysis
  - quantitative analysis
  - trend analysis
- relevant organisational policies and procedures
- relevant reporting protocols and requirements
- situational value of information.

DEFINT018 Collect radio frequency emissions

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to collect radio frequency emissions.

It includes the actions to search for, intercept (clandestinely or overtly) and report targeted radio frequency emissions.

It also includes preparing and operating collection equipment to search the electromagnetic spectrum and to collect target emissions.

This unit applies to Defence personnel working in electronic warfare and signals intelligence fields but may be applicable to any persons working in a similar role.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Typically, persons undertaking this unit work independently with indirect supervision, and perform complex tasks in unfamiliar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

DEFLAW008 Conduct a Defence administrative inquiry

Modification History

Release 2. Modifications made to Assessment Conditions.

Release 1. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFCM127A Conduct a Defence administrative inquiry.

- Unit code updated
- Content and formatting updated to comply with new standards
- All PC transitioned from passive to active voice

Application

This unit describes the skills required to conduct administrative inquiries under the inherent authority of commanders and under the Defence (Inquiry) Regulations. Staff may be appointed to conduct administrative inquiries to determine the facts and circumstances surrounding an incident or situation so that an informed decision may be taken about the action required including, where appropriate, action to avoid a recurrence.

This unit applies to those working as warrant officers and officers of the Australian Defence Force (ADF), and some civilian staff of the Australian Defence Organisation.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under indirect supervision, while performing sophisticated tasks in a broad range of contexts. The type of inquiry conducted will be dependent on the level of authority, rank or position.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Military Justice

Elements and Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA	
Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Prepare to conduct an inquiry**	**1.1**	Receive and acknowledge appointment as inquiry officer from appointing authority
		1.2	Analyse and discuss inquiry circumstances if necessary, with the appointing authority
		1.3	Confirm and acknowledge independence
		1.4	Determine course of action by referring to the appropriate Defence publications
2	**Plan an inquiry**	**2.1**	Identify, analyse and clarify inquiry Terms of Reference
		2.2	Develop an inquiry plan
		2.3	Seek advice where appropriate
3	**Gather and analyse evidence**	**3.1**	Conduct interviews
		3.2	Identify, acquire, confirm and analyse evidence
		3.3	Provide progress reports in accordance with the Terms of Reference and appointing authority requirements
		3.4	Suspend inquiry and notify appointing authority when Defence Force Discipline Act (DFDA) offence or other notifiable incident is suspected
4	**Present inquiry findings**	**4.1**	Draw conclusions and recommendations, based on the evidence gathered and within the boundaries of the Terms of Reference
		4.2	Present inquiry findings in accordance with the Terms of Reference and appointing authority requirements

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

DEFMIL010 Operate a 22 gauge rifle

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCM006B Operate a 22 gauge rifle. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.1 removed • Elements 3 and 4 merged

Application

This unit describes the skills required to operate a single bolt action 22 calibre long rifle on a legal range. Operating a 22 gauge rifle involves the ability to safely handle, maintain, operate and fire the 22 gauge rifle. The operator must be familiar with the characteristics and capabilities of the rifle.

This unit applies to those required to operate a 22 gauge rifle.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision and will always operate under direct orders. They would perform specific tasks in a known context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

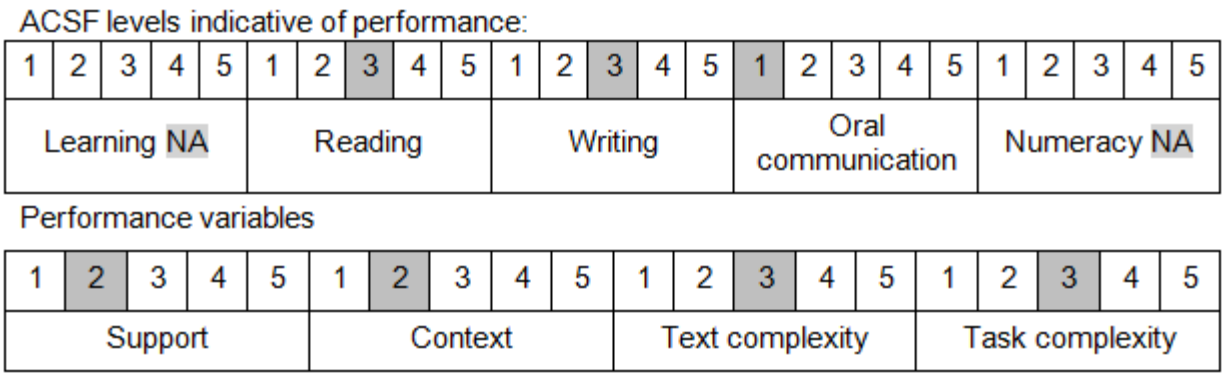
Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Safely handle a 22 gauge rifle	1.1 Handle and carry a 22 gauge rifle. 1.2 Identify, select and handle ammunition. 1.3 Secure a 22 gauge rifle.
2. Safely maintain a 22 gauge rifle	2.1 Strip and assemble a 22 gauge rifle. 2.2 Clean and service a 22 gauge rifle and associated equipment. 2.3 Identify and rectify defects within limits of authority or report to supervisor. 2.4 Complete documentation.
3. Safely operate a 22 gauge rifle	3.1 Conduct weapon drills. 3.2 Apply marksmanship principles. 3.3 Employ weapon equipment. 3.4 Fire a 22 gauge rifle 3.5 Comply with range safety brief and practice brief when firing a 22 gauge rifle. 3.6 Recognise problems and take actions. 3.7 Identify and engage targets.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.



© Commonwealth of Australia, 2025 Public Skills Australia

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCM006B Operate a 22 gauge rifle.

Assessment Requirements for DEFMIL010 Operate a 22 gauge rifle

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying recognised safety precautions
- interpreting fire control orders
- conducting the following firearm drills:
  - degrees of weapon readiness
  - immediate action and stoppage
  - safety precautions including checking clearances
- recognising the limit of own authority

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics, technical capabilities, effects, employment and limitations of the rifle and ammunition
- degrees of weapon readiness
- marksmanship principles
- safety precautions of the 22 gauge rifle
- types of targets

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Competency should be assessed using live ammunition on a live firing range.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL011 Conduct individual and collective ceremonial drill

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCM132 Conduct individual and collective ceremonial drill. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to supervise groups in the conduct of collective ceremonial drill movements and to perform specific individual drill movements with a cane, including:

- advance in review order
- change from slow to quick time and quick to slow time
- form two ranks from three and three ranks from two
- forms in slow and quick time
- march in line in slow and quick time
- open and close order on the march

Collective ceremonial drill fosters discipline, team work and a sense of collective identity while providing an appropriate means to physically commemorate the unique history, customs and traditions of military service.

This unit was developed for Defence personnel who are required to participate in and lead ceremonial drill, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

© Commonwealth of Australia, 2025 Public Skills Australia

Those undertaking this unit would work independently. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in mainly predictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

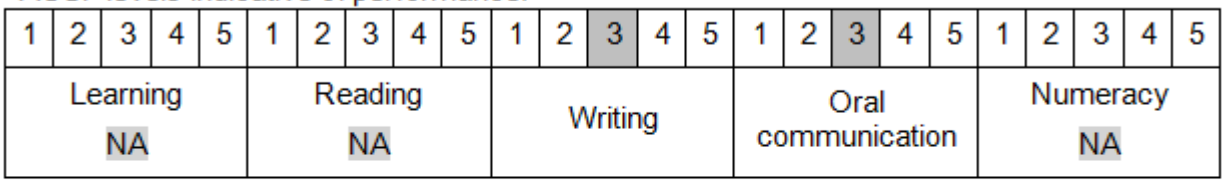
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Supervise collective ceremonial drill	1.1 Identify appropriate type of collective ceremonial drill activity. 1.2 Plan for a collective ceremonial drill activity. 1.3 Conduct collective drill instruction in accordance with prescribed format. 1.4 Set and display standards of dress, bearing and collective drill movements.
2. Perform cane drill	2.1 Rehearse cane drill movements and correct faults. 2.2 Perform cane drill movements in accordance with the manual.

Foundation Skills

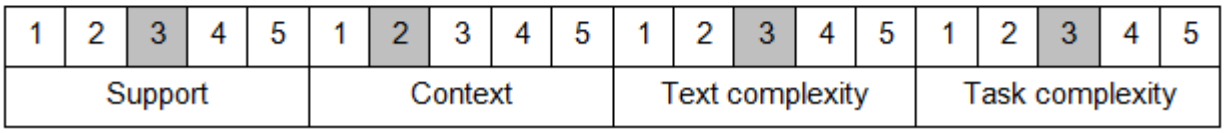
The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia

ACSF levels indicative of performance:



Performance variables:



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCM132 Conduct individual and collective ceremonial drill.

Assessment Requirements for DEFMIL011 Conduct individual and collective ceremonial drill

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- communicating interactively with others using words of command
- leading by example
- performing drill movements
- controlling a team/group

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- drill and ceremonial orders of dress
- format for the conduct of collective drill lessons
- formations for ceremonial drill
- work health and safety (WHS)
- protocol for funerals and guards of honour
- purpose of national flag and methods of paying compliments
- types of colours, flags and banners; entitlements, display and paying of compliments
- words of command required to direct ceremonial occasions

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Competency should be assessed in the workplace or in a simulated workplace environment and must be demonstrated over time covering all of the following drill movements:

- beating the retreat
- birthday, graduation and passing out parades
- catafalque parties
- freedom of entry to towns or cities
- funerals
- guards
- presentation of colours, guidons or banners
- unit parades

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL021 Observe and monitor hostile areas to detect targets

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA001B Operate remote sensors to detect targets. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to observe and/or listen for targets remote from the target acquisition assets and to provide information to stakeholders. This observation is normally conducted by at least two people; one person will be the observer and one will record the data. This unit covers both roles.

This unit was developed for those working in Defence as combat arms personnel required to observe and/or listen for targets remote from the target acquisition assets and to provide information to stakeholders in a deployed operational environment but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work in pairs under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Occupy and prepare a location	1.1 Occupy vantage point and maintain concealment. 1.2 Establish occupied position. 1.3 Establish reference points and document information. 1.4 Observe and monitor possible threats so that an appropriate plan of action can be prepared.
2. Detect target/s	2.1 Establish target position via aural and visual observation, and estimate bearing and distance. 2.2 Identify and classify threat (if present) through visual or aural recognition, or by crater analysis. 2.3 Estimate enemy capability. 2.4 Monitor hostile action from prepared position. 2.5 Maintain communications with stakeholders.
3. Provide information on target to stakeholders	3.1 Describe target to stakeholders. 3.2 Maintain records.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying operational safety
- conducting equipment maintenance
- applying fieldcraft skills including tactical movement and camouflage
- selecting the appropriate configuration and location of remote sensors
- installing and maintaining remote sensors physically
- maximising the desired coverage of hostile areas

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics and effects of hostile and friendly equipment and weapons
- nature of the threat environment
- relevant WHS constraints
- Rules of Engagement
- sensor equipment characteristics and limitations
- tactical techniques and procedures
- target recognition

DEFMIL025 Operate Defence communications equipment

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA011 Operate Defence communications equipment. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.1 removed • Elements 1 and 2 merged

Application

This unit describes the skills required to select, set up, inspect, operate and maintain communications equipment prior to deployment and once in location. The unit also covers the ability to manage contingencies such as lost communications, jamming and interference, and implementing the necessary protocols to maintain or re-establish communications. The individual will also be responsible for establishing and maintaining communications. Compliance with radio telephone procedure, including authentication procedures, is an essential part of this unit.

This unit was developed for those working as combat arms personnel required to operate communications equipment in a deployed operational environment but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

© Commonwealth of Australia, 2025 Public Skills Australia

Those undertaking this unit would work independently and as part of a team, under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFMIL025 Operate Defence communications equipment

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying basic equipment faults
- operating current radio equipment, including secure equipment
- reporting communications faults and deficiencies
- using radio telephone procedure, including codes
- utilising communications systems
- setting up and operating the current in-service, secure and insecure, communications equipment
- utilising correct radio telephone procedure
- maintaining communications using alternative strategies when contact is lost

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- classified material handling procedures
- communications protocols, policy and procedures relevant to the operation of communications equipment
- composition of teams and roles and responsibility of team members
- message formats
- principles of teamwork and teams, aims and objectives
- radiation hazard (RADHAZ) awareness

© Commonwealth of Australia, 2025 Public Skills Australia

- radio telephone procedure, including the use of codes
- range of communications equipment and accessories available
- security procedures

Assessment Conditions

DEFMIL026 Perform an individual static line parachute descent

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA012 Perform an individual static line parachute descent. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 4.5 removed • PC 4.6 revised

Application

This unit describes the skills required to perform static line parachute descents carrying combat equipment by day or night. The addition of combat equipment adds considerable weight and bulk which affects all aspects of the descent.

This unit was developed for Defence personnel required to perform static line parachute descents carrying combat equipment in a deployed operational environment but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and as part of a team under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

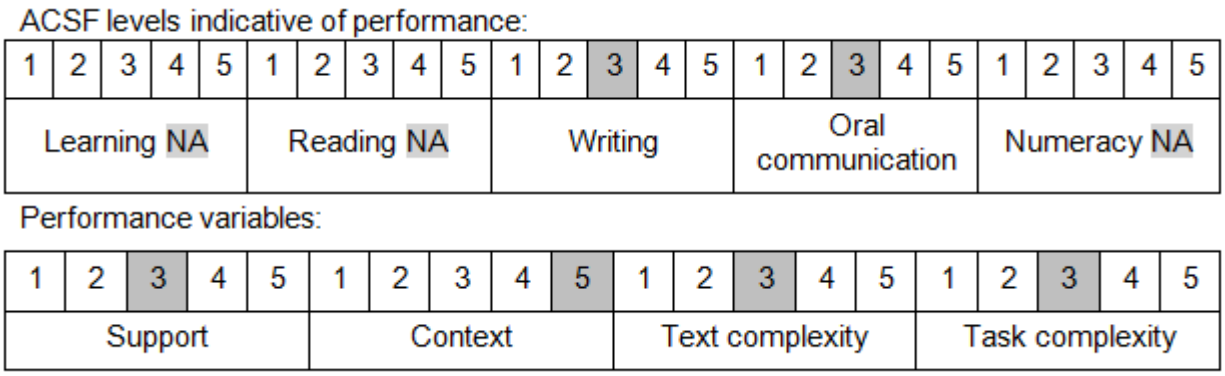
Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for static line parachute descent carrying combat equipment	1.1 Confirm instructions to conduct a static line parachute descent with combat equipment. 1.2 Select and fit equipment and inspect for serviceability. 1.3 Quarantine and report unserviceable equipment.
2. Complete on board aircraft procedures carrying combat equipment	2.1 Board aircraft with equipment and position and secure both self and equipment. 2.2 Communicate verbally and non-verbally with other personnel on board. 2.3 Carry out safety checks.
3. Exit from the aircraft and descend carrying combat equipment	3.1 Exit aircraft carrying combat equipment using approved techniques. 3.2 Conduct relevant drills to detect and rectify malfunctions. 3.3 Maintain situational awareness maintained during day or night descents. 3.4 Communicate verbally and non-verbally with other paratroopers as required. 3.5 Control canopy using basic flight and canopy control techniques. 3.6 Carry out in flight combat equipment drills. 3.7 Assess emergency situations and apply the correct drills to rectify the situation.
4. Land on a drop zone with combat equipment	4.1 Identify designated drop zone. 4.2 Lower combat equipment. 4.3 Apply landing and/or emergency landing techniques to land in accordance with environmental conditions. 4.4 Apply harness release and drag procedures. 4.5 Clear drop zone.
5. Complete static line post descent procedures	5.1 Review performance during the individual static line parachute descent. 5.2 Complete log card.

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA012 Perform an individual static line parachute descent.

Assessment Requirements for DEFMIL026 Perform an individual static line parachute descent

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying situational awareness during canopy flight
- using exit techniques canopy control techniques landing techniques
- carrying out basic flight drills malfunction drill
- applying harness release and drag procedures
- conducting individual safety checks
- undertaking day or night static line parachute descents while carrying combat equipment
- applying approved procedures, techniques and drills for exiting aircraft, canopy flight and landing while carrying combat equipment
- applying correct drills for emergency situations while carrying combat equipment

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- emergency situations

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Competency should be demonstrated over time and across a range of simulated or actual workplace situations, including a number of individual static line parachute descents with combat equipment and including at least one night descent, supported by simulated malfunctions and other emergencies.

Competency must be assessed during the preparation and performance of actual static line parachute descents by day or night carrying combat equipment, although due to safety limitations, assessment of the individual's response to malfunctions and other emergencies will need to be undertaken in a simulated environment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL027 Perform a team free fall parachute descent

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA013 Perform a team free fall parachute descent. • Unit code updated. • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 3.2 and 3.3 merged • Element 5 all PC reordered

Application

This unit describes the skills required to perform a free fall parachute descent, carrying combat equipment, as part of a team. Descents commence from an altitude below 12 000 feet above mean sea level and land on a drop zone during day and night. Team military free fall parachute descents are a method of deploying a team from an aircraft into an operational area and involve the exercise of both individual and team responsibilities.

This unit was developed for military personnel required to perform a free fall parachute descent in a deployed operational environment but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team, under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for a team free fall parachute descent with combat equipment	1.1 Confirm instructions to conduct a team free fall parachute descent. 1.2 Select, fit and pack equipment and inspect for serviceability. 1.3 Quarantine and report unserviceable equipment. 1.4 Rehearse conduct of the descent with team members prior to boarding the aircraft.
2. Complete on board aircraft procedures with combat equipment	2.1 Board aircraft with equipment and position and secure self and equipment. 2.2 Communicate verbally and non-verbally with other personnel on board. 2.3 Carry out safety checks.
3. Exit from the aircraft and descend by free fall as a member of a team while carrying combat equipment	3.1 Exit the aircraft using team techniques. 3.2 Establish and maintain stability in free fall flight and recover from instability when necessary. 3.3 Establish and maintain relative position within the team. 3.4 Maintain situational awareness during day and night descents. 3.5 Carry out individual and team free fall positions and manoeuvres. 3.6 Communicate verbally and non-verbally with other paratroopers as required.
4. Control a ram air canopy descent as a member of a team while carrying combat equipment	4.1 Activate parachute to open at a designated time or height. 4.2 Conduct relevant drills to detect and rectify malfunctions and routine opening problems. 4.3 Identify team leader and team members after canopy opening during day and night descents. 4.4 Maintain team day and night descent using canopy control and manoeuvre techniques. 4.5 Conduct controllability checks and malfunction drills.

© Commonwealth of Australia, 2025 Public Skills Australia

	4.6 Assess contingency and emergency situations and apply the correct drills to rectify the situation.
5. Land on a drop zone as a member of a team while carrying combat equipment	5.1 Identify designated drop zone marking and wind indicators for day and night descents and plan target approach. 5.2 Lower combat equipment at the correct height during approach. 5.3 Apply target approach techniques to land in accordance with environmental conditions. 5.4 Complete emergency landings drills. 5.5 Apply harness release and drag procedures. 5.6 Clear drop zone without adversely affecting other team members.
6. Complete free fall post descent procedures	6.1 Review performance during team free fall parachute descent. 6.2 Complete documentation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading NA					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA013 Perform a team free fall parachute descent.

Assessment Requirements for DEFMIL027 Perform a team free fall parachute descent

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- maintaining situational awareness during free fall descent and canopy flight
- using exit techniques, canopy control techniques, landing techniques
- maintaining free fall positions
- carrying out activation drills, malfunction drills, emergency drills

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- controllability checks
- effect of environmental conditions on parachuting
- contingency and emergency situations while carrying combat equipment

Assessment Conditions

Competency should be demonstrated over time and across a range of simulated or actual workplace situations involving a number of team parachute descents carrying combat equipment, supported by simulated opening problems, malfunctions and other contingencies and emergencies.

© Commonwealth of Australia, 2025 Public Skills Australia

Competency must be assessed during the preparation and performance of actual free fall parachute descents as part of a team, carrying combat equipment, although due to safety limitations, assessment of the individual's response to routine problems, malfunctions and other contingencies and emergencies will need to be undertaken in a simulated environment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL028 Navigate in remote and unmodified landscapes

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA014 Navigate in remote and unmodified landscapes. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to navigate in remote and unmodified landscapes. In the context of this unit an unmodified landscape is one with few modifications to the natural surface or the natural environment so that track alignment is indistinct and signage is generally not provided. The area may include steep sections of unmodified surfaces and other difficult terrain and man-made hazards. In a military context the navigation can be conducted on foot (for example; infantry) or by vehicle (for example; armour). This unit of competency requires the individual to navigate by both day and night to a destination, within standard tolerances of accuracy, without the use of electronic navigation aids such as GPS.

This unit was developed for military personnel required to operate in remote and unmodified landscapes usually in a deployed operational environment, but is applicable to any individual who is required to navigate in remote and unmodified landscapes.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and as part of a team under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

© Commonwealth of Australia, 2025 Public Skills Australia

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Use a map	1.1 Select the type of map(s) suitable for the activity. 1.2 Identify possible sources of error and inaccuracies on the map. 1.3 Identify symbols and information contained on the map that may be used in navigation. 1.4 Identify the way in which relevant symbols and information on the map can be used in navigation.
2. Use a compass	2.1 Identify the essential features of a compass. 2.2 Use a compass to maintain a designated course. 2.3 Use a compass to reflect understanding of factors which affect accuracy.
3. Plan a route in unmodified landscapes	3.1 Apply symbols and information contained on the map to plan an efficient route/course suitable to navigation and equipment. 3.2 Obtain additional information to assist in the preparation of a navigation data sheet from the map and from other suitable sources of information. 3.3 Identify hazards and obstacles to the route. 3.4 Prepare a navigation data sheet/route card. 3.5 Identify emergency or contingency routes.
4. Navigate in unmodified landscapes	4.1 Maintain orientation of map to surroundings. 4.2 Identify possible sources of navigation error in specific locations. 4.3 Demonstrate combined use of map, compass and other techniques whilst following a route in unmodified landscapes. 4.4 Demonstrate techniques for distance estimations of travel in the absence of identifying features. 4.5 Maintain the designated course whilst bypassing hazards and obstacles.

© Commonwealth of Australia, 2025 Public Skills Australia

	4.6 Demonstrate maintenance of a course in unmodified landscapes. 4.7 Fix position accurately and regularly using a combination of appropriate navigation techniques. 4.8 Choose route for the surroundings and conditions. 4.9 Fix position and identify unknown features using navigation techniques when lost.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	**3**	4	5	1	2	**3**	4	5	1	2	3	**4**	5	1	2	3	4	5	1	2	**3**	4	5
Learning					Reading					Writing					Oral communication NA					Numeracy					

Performance variables:

Assessment Requirements for DEFMIL028 Navigate in remote and unmodified landscapes

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying problem solving techniques
- maintaining a compass bearing in poor visibility and/or extreme conditions
- observing surroundings
- making decisions
- plotting a navigation route accurately and within accepted tolerances when following a route
- maintaining positional awareness
- reacting effectively to changes in the operating environment that require re-planning
- navigating both by day and night
- navigating without the use of electronic navigation aids such as GPS
- calculating speed, distance and estimating time taken

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- cartographic symbols and legends
- grid/magnetic conversion
- map and chart types
- methods for determining current location
- route planning techniques and calculations

© Commonwealth of Australia, 2025 Public Skills Australia

- factors affecting navigation techniques in extreme environmental conditions
- map types and sources of error
- use of a compass and factors that affect their accuracy
- route planning and issues that should be considered in extreme environmental conditions
- estimation of travelling times in unmodified landscape and/or difficult terrain/conditions
- techniques for estimating distance travelled in poor visibility
- back bearings and resections
- techniques to navigate around obstacles

Assessment Conditions

Competency should be demonstrated navigating a route on a minimum of three occasions; with at least two navigations being conducted at night. The route should contain a number of legs requiring one or more changes in direction.

Competency must be assessed in an area that has an unmodified landscape.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL030 Use individual protective equipment in a CBRN threat environment

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA016 Use individual protective equipment in a CBRN threat environment. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to prepare and utilise individual protective equipment in chemical, biological, radiological or nuclear (CBRN) threat environment. The individual will be responsible for preparing the protective equipment prior to deployment and once in location utilising the equipment to provide individual protection from a CBRN threat. Compliance with procedures, including the functional testing of the equipment, is an essential part of this unit.

This unit was developed for military personnel required to operate in CBRN threat environment usually in a deployed operational environment, but is applicable to any individual who is required to complete this type of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and as part of a team under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

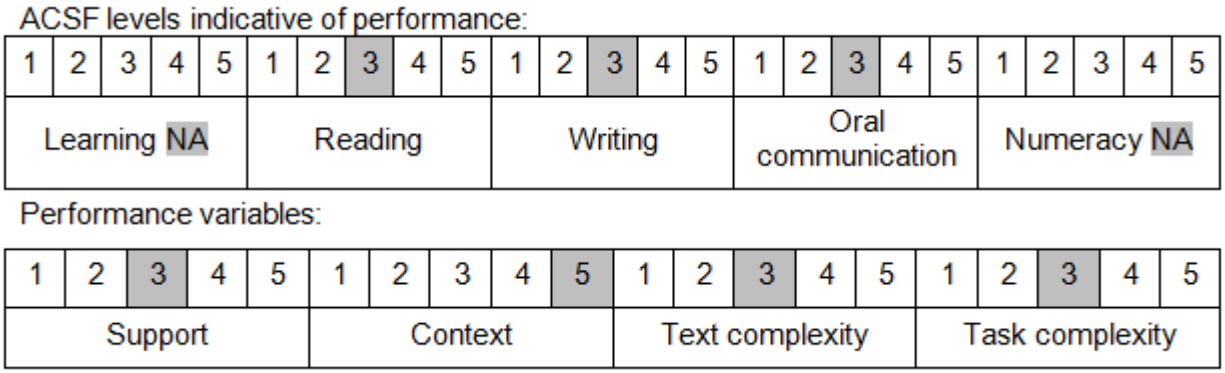
Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare respirator and protective clothing and equipment ensemble to meet CBRN threat	1.1 Identify, prepare, assemble and function test respirator and ensemble requirements. 1.2 Conduct user maintenance on respirator and ensemble. 1.3 Reject and/or report faulty equipment.
2. Plan and prepare for combat arms tasks	2.1 Use equipment to meet operational tasking and workplace requirements. 2.2 Work within a CBRN environment using authorised procedures to complete tasks including: decontamination reduction, detection of hazards. 2.3 Conduct confirmatory function testing of equipment periodically during operations.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Assessment Requirements for DEFMIL030 Use individual protective equipment in a CBRN threat environment

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying, inspecting, preparing and cleaning respirator and clothing and equipment ensemble
- identifying basic equipment faults
- using respirator and ensemble
- providing reports on faulty equipment
- using authorised CBRN drills to detect threats/hazards
- carrying out decontamination hazard reduction measures
- preparing and utilising equipment to meet changes in the operating environment, changes in threat, detection of hazards and the occurrence of an CBRN incident

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- equipment preparation and handling procedures
- policy and procedures relevant to the operation of NBC equipment
- responsibilities of individuals for operating equipment
- CBRN threat awareness
- CBRN individual protective procedures
- respirator and clothing and PPE available for use

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Competency should be demonstrated over time and across a range of simulated or actual workplace situations and is to include exposure to CS gas or a similar non-lethal chemical agent.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL041 Operate and maintain an armoured vehicle

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA104 Operate and maintain an armoured vehicle. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.4 removed • PC 1.1 and 1.2 revised

Application

This unit describes the skills required to operate and perform operational level maintenance on an armoured vehicle.

This unit applies to those working as combat arms soldiers, who are part of an armoured fighting vehicle crew, within an operational zone in Defence.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as individuals and as part of an armoured vehicle crew, under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

DEFMIL042 Operate and maintain armoured vehicle weapon systems

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA105 Operate and maintain armoured vehicle weapon systems • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.3 removed

Application

This unit describes the skills required to operate armoured vehicle direct fire weapon systems to effectively produce fire. Direct fire weapon systems are integral to, and operated in conjunction with, armoured vehicles. Direct fire is primarily used during conventional operations to establish fire supremacy in order to destroy the enemy's will to operate. It can also be applied in accordance with the Rules of Engagement during security operations.

This unit applies to those working as combat arms soldiers working within an operational zone in Defence.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit work independently and as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for DEFMIL042 Operate and maintain armoured vehicle weapon systems

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying operational safety
- applying relevant WHS requirements
- carrying out weapon drills
- conducting equipment maintenance
- identifying regional armoured fighting vehicles and aircraft
- responding to fire control orders
- selecting and preparing ammunition
- using communication systems
- using equipment/instruments
- reacting instinctively to fire orders
- working as an effective member of the crew
- operating the system without a breach of safety procedures

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- armoured fighting vehicle weapons drills and procedures
- characteristics, technical capabilities, effects, employment and limitations of relevant ammunition

© Commonwealth of Australia, 2025 Public Skills Australia

- characteristics, technical capabilities, effects, employment and limitations of relevant armoured fighting vehicle weapon systems
- characteristics, technical capabilities, effects, employment and limitations of relevant equipment
- fire control orders and fire discipline
- WHS requirements
- regional armoured fighting vehicles and aircraft recognition reporting requirements and procedures associated with the operation of equipment
- safety precautions associated with the equipment

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL043 Supervise an armoured vehicle and crew

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA106 Supervise an armoured vehicle and crew. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.1, 2.2, 2.4, 2.5 and 2.8 removed • PC 2.11 and 2.12 merged

Application

This unit describes the skills required to command, lead and manage an armoured vehicle and its crew on operations under extreme conditions in a high risk environment. Command is the authority a commander in the military service lawfully exercises over subordinates by virtue of rank or assignment.

This unit applies to combat arms soldiers working within an operational zone in Defence.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as individuals and as part of an armoured vehicle crew, under direct and/or indirect supervision while supervising others. They would use discretion and judgement, and take responsibility for the quality of their outputs. They would perform complex tasks in a broad range of contexts that can be unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare the armoured vehicle for operation	1.1 Assess and maintain crew competence. 1.2 Ensure crew is prepared. 1.3 Manage crew personnel administration. 1.4 Receive, interpret and accept requirement to supervise the crew, its weapons, and ancillary equipment. 1.5 Ensure vehicle is checked for serviceability and prepared for operations. 1.6 Determine and manage constraints and risks relevant to the task. 1.7 Supervise identification, handling and preparation of in service ammunition. 1.8 Determine resources required for the performance of the task. 1.9 Report identified problems/shortfalls to supervisor. 1.10 Supervise deployment of the armoured fighting vehicle into areas of operations.
2. Supervise and command the operation of the armoured vehicle	2.1 Coordinate and conduct battle procedure. 2.2 Drive the vehicle at a basic level in accordance with standing orders for vehicle operations. 2.3 Supervise crew tasks when employing the vehicle. 2.4 Apply vehicle tactical operating techniques. 2.5 Supervise the operation of the vehicle communications systems. 2.6 Assess incidents, deal with minor incidents, report major ones to manager and take appropriate actions.
3. Supervise the completion of armoured vehicle tasks	3.1 Complete and maintain documentation including reports and returns. 3.2 Supervise and ensure maintenance is conducted. 3.3 Debrief crew on completed operations.

Assessment Requirements for DEFMIL043 Supervise an armoured vehicle and crew

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- operating armoured fighting vehicle weapon systems and ancillary equipment
- applying the authority and responsibility for effective supervision using available resources and for planning the employment of, organising, directing, coordinating and controlling the crew in the accomplishment of assigned tasks
- liaising with staff and delivering orders

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- armoured tactics and standing operating procedures
- characteristics, technical capabilities, effects, employment and limitations of relevant:
  - ammunition
  - communications equipment
  - drive trains and sub systems
  - specialist equipment
  - weapons
- command and control procedures
- WHS requirements
- procedures and requirements in the performance of the task
- reporting requirements and procedures

© Commonwealth of Australia, 2025 Public Skills Australia

- resource allocation processes
- safety precautions associated with the task
- vehicle documentation and record compilation

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL061 Operate indirect fire weapons

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA201B Operate indirect fire weapons . • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.3 and 1.4 removed • Elements 1 and 2 merged

Application

This unit describes the skills required to safely handle, aim, fire, manoeuvre and maintain indirect fire weapons. The candidate must be thoroughly familiar with characteristics and capabilities of the weapon and competent in the application of fire in an operational environment.

This unit was developed for those working as combat arms personnel required to safely handle, aim, fire, manoeuvre and maintain indirect fire weapons in a deployed operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team, under direct supervision and receive orders that dictate all actions. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

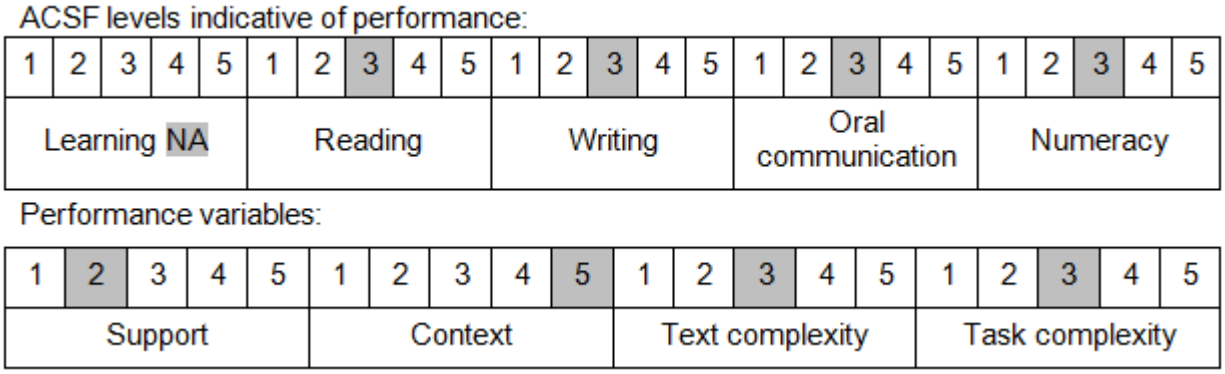
Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for firing	1.1 Move weapon into position. 1.2 Prepare weapon for firing. 1.3 Prepare ancillary equipment for use and operate. 1.4 Aim and adjust indirect fire weapon. 1.5 Maintain aiming calculations and recordings.
2. Fire the weapon	2.1 Handle ammunition. 2.2 Inspect ammunition visually, report defects to supervisor and quarantine defective ammunition. 2.3 Prepare ammunition selected by the supervisor. 2.4 Load and unload ammunition. 2.5 Fire weapon. 2.6 Complete misfire drills. 2.7 Unload ammunition residue or remove after firing.
3. Maintain the serviceability of the weapon	3.1 Report defects. 3.2 Conduct operating maintenance.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA201B Operate indirect fire weapons .

1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- demonstrating hand eye coordination and manual dexterity
- using communication equipment
- working in a stressful environment
- using ancillary equipment including at least one of:
  - collimator/aiming devices
  - fuse setters
  - orientation and positioning equipment
  - weapon sights
- identifying ammunition defects including at least two of:
  - corrosion
  - cracks
  - damaged packaging
  - dented cartridge cases
  - fluting of the cartridge case
  - incorrect fuse projectile combinations
  - incorrect propellants
  - proud or recessed primer
  - rust
  - weeping

DEFMIL064 Destroy hostile air targets using line of sight ground based air defence weapon systems

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA204B Destroy hostile air targets using line of sight ground based air defence weapon systems. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.3 removed • PC 3.1 revised

Application

This unit describes the skills required to safely handle, aim, fire, manoeuvre and maintain line of sight ground based air defence weapon systems designed to destroy hostile aircraft. The operator must be thoroughly familiar with the characteristics and capabilities of the missile system and competent in the application of fire in an operational or simulated operational environment.

This unit applies to those working as combat arms personnel required to operate line of sight ground based air defence weapon systems in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team and be under supervision for the whole operation except during the period of firing where the operator will be under direct control and receive orders that dictate all actions. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of unpredictable contexts.

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- demonstrating hand eye coordination and manual dexterity
- recognising aerial targets appropriately
- using binoculars
- identifying the number of aerial targets specified by CATC
- tracking and engaging targets using very short range air defence systems and short range air defence systems

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- aircraft types
- characteristics, technical capabilities of the system
- characteristics of a range of aerial targets likely to be encountered
- methods of range estimation
- WHS requirements
- safety precautions associated with the equipment

DEFMIL065 Observe targets and direct single asset firepower on a single target

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA205B Observe targets and direct single asset firepower on a single target. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 3.1 and 3.2 merged

Application

This unit describes the skills required to observe targets remotely from the firepower locations and to direct firepower to destroy/neutralise a single target. Firepower will normally be limited to the following assets:

- small arms
- indirect weapons

This unit applies to those working as combat arms personnel required to observe targets and to direct firepower to destroy/neutralise a single target in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team under direct and/or indirect supervision. While this work will be undertaken as part of a team and under the commander's direction, the capacity to act independently may also be required should communications with the commander breakdown. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Occupy and prepare a location	1.1 Occupy an appropriate vantage point and maintain concealment throughout the operation. 1.2 Establish occupied position. 1.3 Establish reference points and document information. 1.4 Observe and monitor possible threats so that an appropriate plan of action can be prepared by relevant authority.
2. Plan the engagement of firepower	2.1 Establish target location via a grid reference. 2.2 Determine altitude of the target from the map. 2.3 Determine direction from the observer to the target by compass or laser. 2.4 Describe target to command post. 2.5 Determine type and number of weapons. 2.6 Maintain communications with stakeholders throughout the operation and monitor personnel safety.
3. Direct fire on a target	3.1 Transmit planning information and direction to fire to the command post. 3.2 Conduct target analysis after impact and refer to supervisor where appropriate. 3.3 Provide adjustment and advice to terminate as required. 3.4 Maintain records.
4. Withdraw from an occupied location	4.1 Recondition occupied position and remove all evidence of occupation. 4.2 Withdrawal from the occupied position.

Assessment Requirements for DEFMIL065 Observe targets and direct single asset firepower on a single target

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- maintaining situational awareness
- recognising without exceeding own level of authority

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics, technical capabilities, effects, employment and limitations of weapons and weapon platforms
- communication procedures
- reporting requirements and procedures for multi-agency operations
- safety associated with the operations
- safety distances for various situations

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL066 Observe targets and direct multi asset firepower on multiple targets

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA206B Observe targets and direct multi asset firepower on multiple targets. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 3.2 removed

Application

This unit describes the skills required to observe targets remotely from the firepower locations and to provide advice so that firepower can be employed to engage targets. Firepower will normally be limited to the following assets:

- small arms
- indirect weapons

This unit applies to those working as combat arms personnel required to observe targets and to direct multi-asset firepower to destroy/neutralise multiple targets in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team under direct and/or indirect supervision. While this work will be undertaken as part of a team and under the commander's direction, the individual must also have the authority to act independently. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- allocating appropriate resources to the operation
- maintaining situational awareness
- providing reports and appropriate documentation
- maintaining awareness of safety of friendly personnel at all times
- recognising without exceeding own level of authority

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics, technical capabilities, effects, employment and limitations of weapons and weapon platforms
- communication procedures
- reporting requirements and procedures for multi-agency operations
- safety associated with the operations
- safety distances for various situations

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

DEFMIL068 Select sites for deployment in a threat environment

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA209B Select sites for deployment in a threat environment. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to select a work site in a threat environment through an independent reconnaissance to determine the most suitable location for deployment.

This unit applies to combat arms personnel required to select sites for deployment in an operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would normally work within a team providing protection from possible threats, but also must be prepared to act independently. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for DEFMIL068 Select sites for deployment in a threat environment

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- calculating mathematical data
- navigating
- using communications systems
- working in a team environment
- recording data accurately

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics and capabilities of the equipment to be deployed
- use of an appreciation process

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL070 Observe targets and engage with joint asset firepower from any agency

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA212 Observe targets and engage with joint asset firepower from any agency. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 3.3 removed

Application

This unit describes the skills required to observe targets remotely from the firepower locations and to provide advice so that single or multi-agency firepower can be employed to engage target/s. Agencies may include armour, artillery, coalition forces, close air support, helicopters, mortars, naval gun support, and tactical unmanned aerial vehicle.

While this work will be undertaken as part of a team and under the commander's direction, the capacity to act independently may also be required should communications with the commander breakdown.

This unit applies to combat arms personnel required to observe targets and to direct joint asset firepower from any agency to destroy/neutralise multiple targets in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

© Commonwealth of Australia, 2025 Public Skills Australia

Those undertaking this unit would typically work as part of a team under direct and/or indirect supervision, but also must be prepared to act independently. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Occupy and prepare a location	1.1 Occupy an appropriate vantage point and maintain concealment throughout the operation. 1.2 Establish occupied position. 1.3 Establish reference points and document information. 1.4 Observe and monitor possible threats so an appropriate plan of action can be prepared.
2. Plan the engagement of firepower	2.1 Transmit a warning order for intent of operations to the command post. 2.2 Use advice on overall operational plan to inform the planning process. 2.3 Make requests for resources outside own organisation to the command post when required. 2.4 Establish and record target data. 2.5 Calculate rate of movement of own personnel from available data. 2.6 Calculate resources for effective fire on targets and rates of fire. 2.7 Prioritise targets. 2.8 Develop and transmit schedule to the command post or liaison with other agency to organise engagement schedule.
3. Monitor fire on target	3.1 Communicate directly with other agencies to coordinate engagement procedures. 3.2 Maintain communications with stakeholders throughout operation.

© Commonwealth of Australia, 2025 Public Skills Australia

	3.3 Complete target analysis after impact and if necessary, refer to appropriate agency command centre. 3.4 Provide advice to terminate as required. 3.5 Maintain records.
4. Withdraw from an occupied location	4.1 Recondition occupied position and remove all evidence of occupation. 4.2 Conduct a secure withdrawal from the occupied position.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5
Learning NA	Reading NA	Writing	Oral communication	Numeracy

Performance variables:

1 2 3 4 5	1 2 3 4 5	1 2 3 4 5	1 2 3 4 5
Support	Context	Text complexity	Task complexity

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA212 Observe targets and engage with joint asset firepower from any agency.

Assessment Requirements for DEFMIL070 Observe targets and engage with joint asset firepower from any agency

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- allocating appropriate resources to the operation
- interpreting orders
- maintaining situational awareness
- providing reports and appropriate documentation
- working in a team
- maintaining awareness of safety of friendly personnel at all times
- recognising but not exceed own level of authority

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics, technical capabilities, effects, employment and limitations of weapons and weapon platforms
- communication procedures
- reporting requirements and procedures for multi-agency operations
- safety associated with the operations
- standard procedures and special requirements
- teamwork principles

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL071 Supervise the destruction of hostile air targets using line of sight ground based AD weapon systems

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA213 Supervise the destruction of hostile air targets using line of sight ground based air defence weapon systems. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to supervise and control all aspects of the operation of a direct fire ground based missile system designed to destroy hostile aircraft. It is specifically written for visual range ground based air defence weapon systems. The control of the ground based missile system requires target interrogation, analysis, engagement and decision making based on tactical information, situational awareness and observed target activity.

This unit applies to combat arms personnel involved in the operation of a direct fire ground based missile system in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under the commander’s direction, however they must be able to act independently. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of unpredictable contexts.

© Commonwealth of Australia, 2025 Public Skills Australia

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare and deploy	1.1 Determine and organise resources required for the performance of the task in accordance with orders. 1.2 Report identified problems/shortfalls to immediate supervisor. 1.3 Move to a directed location and maintain concealment, in accordance with orders. 1.4 Deploy ground based air defence system in accordance with orders. 1.5 Establish and integrate system and check for functionality.
2. Control the engagement of targets	2.1 Analyse advice on the operational situation to inform the engagement process. 2.2 Direct and control ground based air defence system operations in accordance with orders. 2.3 Transmit operational data to the command post. 2.4 Rectify minor incidents. 2.5 Report major incidents beyond own level of authority or competence to manager/s and take action as directed.
3. Conduct maintenance	3.1 Supervise operator maintenance activities. 3.2 Perform maintenance activities.
4. Redeploy	4.1 Prepare for redeployment. 4.2 Move from one directed location to another in accordance with orders.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia

ACSF levels indicative of performance:

1	2	3	**4**	5	1	2	**3**	4	5	1	2	**3**	4	5	1	2	**3**	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy NA					

Performance variables:

1	2	3	**4**	5	1	2	3	4	**5**	1	2	**3**	4	5	1	2	**3**	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA213 Supervise the destruction of hostile air targets using line of sight ground based air defence weapon systems.

Assessment Requirements for DEFMIL071 Supervise the destruction of hostile air targets using line of sight ground based AD weapon systems

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- communicating effectively
- interpreting orders, instructions and directions
- managing a small team
- operating communication equipment
- recognising aerial targets
- recognising own level of authority
- identifying correctly a number of different types of aerial targets
- prioritising targets in a high intensity situation encountered in a threat environment
- directing fire in a clear and concise manner
- taking appropriate action in the event of misfire and cancelling missile in flight

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- airspace control measures
- characteristics, technical capabilities, effects and limitations of air defence systems
- communication networks
- ground based air defence command structure
- principles of camouflage

© Commonwealth of Australia, 2025
Public Skills Australia

- radar principles
- relevant WHS requirements

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL083 Collect environmental information

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA310B Collect environmental information. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.1 removed • PC 1.4 and 2.2 merged • Elements 1 and 2 merged

Application

This unit describes the skills required to collect meteorological, hydrographic, geospatial and geological information for an area.

This unit was developed for combat engineer personnel required to collect environmental information for an area in a deployed operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work as part of a team under direct supervision. They use discretion and judgement, and take responsibility for the quality of their outputs while performing routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for DEFMIL083 Collect environmental information

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- analysing information and data
- communicating information and data
- conducting research
- using questioning techniques
- conducting tactical and technical reconnaissance
- taking measurements using a laser range finder, tape measure, ruler
- using communications equipment
- using global positioning systems
- using optical enhancement tools such as binoculars
- collecting information and data that is relevant and appropriate to the specific operation

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- basic research and analysis techniques
- collection methods
- communication requirements and equipment
- indigenous inhabitants and culture
- intelligence cycle – direction, collection, processing and dissemination
- legal responsibilities

© Commonwealth of Australia, 2025 Public Skills Australia

- navigation
- operational environment
- relevant legislation and procedures in relation to environmental requirements
- relevant WHS regulations/requirements, equipment, material and personal safety requirements
- site, personnel and information security
- terrain types and terrain analysis
- urban and rural demographics
- weather effects

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL084 Operate an inland tug boat

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA328B Operate an inland tug boat. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to operate an inland tug boat, specifically a purpose built motorised vessel up to ten metres in length capable of manoeuvring pontoons and rafts, with a maximum of five crew. It covers the operation of the tug while towing/pushing unloaded pontoons of up to thirty ton. The watercraft will normally be driven in an environment of protected or inland waterways, while conducting a range of tasks including transporting personnel and/or equipment.

While the technical aspects of this competency are concerned with ‘operating a boat’, the specialisation of the skill, and safety issues associated with waterborne operations confer additional responsibilities upon the operator.

To operate an inland tug boat, relevant state/territory and Commonwealth licensing requirements must be met.

This unit was developed for combat engineer personnel required to operate an inland tug boat in a deployed operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

© Commonwealth of Australia, 2025 Public Skills Australia

The individual will usually operate the boat independently or under indirect supervision and may command a crew of up to five persons. The individual must demonstrate sound judgement in the use of authority, and where possible, work within the existing lines of authority. They use discretion and judgement, and take responsibility for the quality of their outputs while performing routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

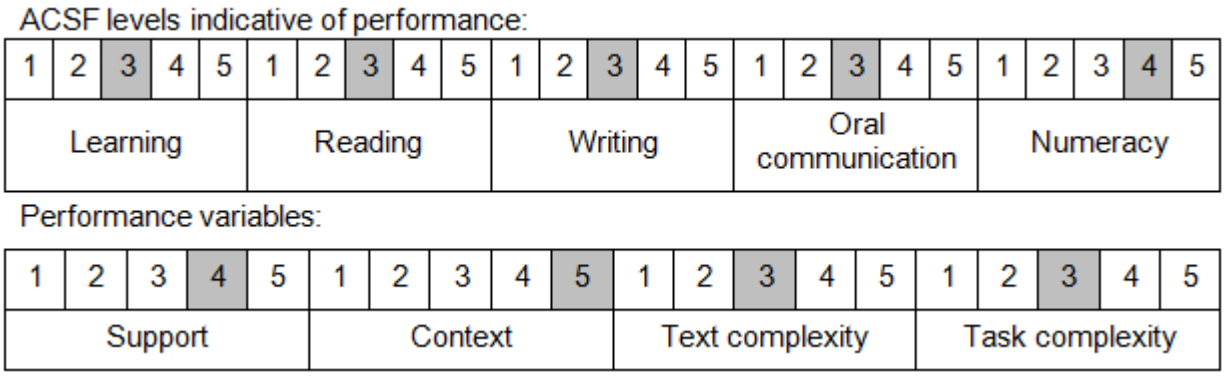
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for tug boat operations	1.1 Interpret operating instructions to determine the task, the cargo, the destination and route, and compile navigation data. 1.2 Check cargo weight is within the safe operating limit of the craft and complete manifests to ensure passengers and cargo are safe to move. 1.3 Check equipment for serviceability and replace or reject and report unserviceable items. 1.4 Conduct shore preparation and prepare watercraft for launch and watercraft operations. 1.5 Select and wear personal protective equipment.
2. Drive tug boat	2.1 Brief passengers and crew on safety issues prior to embarking. 2.2 Launch tug in accordance with local conditions. 2.3 Load and trim tug to ensure safety of crew and craft. 2.4 Drive tug consistent with hazards and environmental conditions. 2.5 Provide directions to passengers in order to maintain safety and efficient boat operation. 2.6 Conduct contingency and emergency drills to minimise threat to personnel and equipment.
3. Manoeuvre pontoon using tug boat	3.1 Direct crew to assist with securing and manoeuvring of pontoon. 3.2 Capture, secure and control uncontrolled pontoons. 3.3 Manoeuvre and assemble pontoons.

© Commonwealth of Australia, 2025 Public Skills Australia

	3.4 Comply with supervisor's directions/commands to control the movement and momentum of the pontoon.
4. Recover and restore tug boat	4.1 Disembark personnel and unload equipment. 4.2 Recover tug from a ramp or expedient landing site. 4.3 Check tug and associated equipment for serviceability, clean and service, report defects and complete documentation. 4.4 Complete debriefings. 4.5 Complete post activity reports and documentation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA328B Operate an inland tug boat.

Assessment Requirements for DEFMIL084 Operate an inland tug boat

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying launch and recovery procedures
- applying pre start, start and stop procedures
- calculating and record number and weight of passengers, stores and equipment
- capturing and controlling free launched pontoons without damage to equipment
- monitoring hazards and applying safety principles to operations
- reading and interpreting navigation charts
- using clear interpersonal communication as operator of the vessel
- using communications equipment
- using knots and lashings to secure watercraft
- providing directions to personnel within the boat concerning specific safety matters such as seating, movement and actions on incidents such as ‘man overboard’ and ‘capsize’
- managing the contingency and emergency drills:
  - abandon ship drills
  - action on capsize
  - diagnosing and rectifying minor engine faults
  - fire drills
  - man overboard drills
  - propeller replacement
  - towing vessels
  - use of improvised rudder
  - use of oars/improvised oars

© Commonwealth of Australia, 2025 Public Skills Australia

- manoeuvring a pontoon, with a minimum weight of five ton, by:
  - towing
  - pushing
  - effectively directing crew

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- anchorage methods and systems
- applicable statutory waterways rules for watercraft operation
- boat orders
- boat specific safety requirements and fire suppressant system
- complete equipment schedule list and locations
- controls and indicators
- effects of water moving over objects and obstacles
- emergency procedures
- environmental hazards of refuelling over water
- forces acting on boats
- hasty buoyancy/floatation calculations
- launch and recovery procedures
- legal responsibilities
- methods for towing/pushing pontoons
- methods of connection/securing to pontoons
- night operation constraints
- operating boundaries
- pre start, start, stop procedures

Assessment Conditions

Competency should be demonstrated over a time frame that allows for the preparation, launch, recovery, driving and maintenance of watercraft under a range of water operating conditions carrying personnel and cargo.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL085 Construct equipment bridging

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA312B Construct equipment bridging. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.10 removed

Application

This unit describes the skills required to facilitate the movement of personnel, vehicles, cargo and equipment through bridging. Equipment bridging is constructed from designed and certified bridge modules and parts to provide a temporary or permanent bridge over a gap.

Bridges will normally be constructed on a temporary basis under field conditions to meet the operational need to provide a crossing point over a gap for personnel and equipment. When the crossing is no longer required the bridge is either recovered to storage or redeployed to another crossing.

This unit applies to combat engineer personnel who are required to construct and recover gap crossing bridging equipment in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and lead a team. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of unpredictable contexts.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare and plan for gap crossing	1.1 Receive and process requirement and confirm with higher authority as necessary. 1.2 Identify resource availability and serviceability and determine constraints. 1.3 Conduct site survey, risk and environmental assessment. 1.4 Select suitable bridge design based on site survey and available resources. 1.5 Develop construction/dismantle plan in accordance with design, resources, risks and environmental considerations. 1.6 Refer problems that cannot be resolved locally to higher authority for resolution. 1.7 Confirm and monitor competence of team members. 1.8 Brief construction team. 1.9 Liaise with outside agencies.
2. Construct gap crossing	2.1 Direct and supervise construction team. 2.2 Recognise and respond to unexpected situations that require a quick and decisive response. 2.3 Check security, alignment and stability. 2.4 Organise and direct support from outside agencies. 2.5 Provide technical advice to higher authority or support agencies. 2.6 Maintain gap crossing site and gap crossing.
3. Dismantle gap crossing and refurbish site and equipment	3.1 Direct and supervise construction team in accordance with dismantle plan. 3.2 Recover, clean and maintain gap crossing equipment, tools and materials. 3.3 Store or redeploy gap crossing equipment, tools and materials. 3.4 Refurbish site in accordance with environmental requirements.

© Commonwealth of Australia, 2025 Public Skills Australia

	3.5 Complete documentation. 3.6 Conduct post activity analysis and make recommendations.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy					

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA312B Construct equipment bridging.

Assessment Requirements for DEFMIL085 Construct equipment bridging

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- commanding and controlling situations and people
- managing resources
- operating optical levelling and surveying devices
- producing design/plans
- producing written and verbal reports
- recording and processing data and information
- taking and recording accurate measurements
- leading a team to construct, maintain and dismantle a multi span bridging of not less than thirty metres made from modularised or improvised means

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- anchorages
- booming procedures and centre of gravity
- equipment bridge design features/requirements:
  - site requirements (reconnaissance):
    - location
    - gap width, depth, obstacles, etc.
    - current and direction

© Commonwealth of Australia, 2025 Public Skills Australia

    - angle of repose
    - abutment design or enhancement
    - soils testing and compaction methods
    - routes in/out
  - parts
  - specifications
  - user manual,
  - material handling equipment requirements and support
  - construction sequence
  - designed traffic/load (MLC/tonnage)
  - above ground or surface (stepped abutment)
- equipment bridge types:
  - medium girder bridge (MGB)
  - air portable bridge (APB)
  - rapid emplacement bridge (REB)
  - line of communication bridge (LOC)
  - bailey bridge, acrow bridge (FMB)
- jacking system
- mathematics to a level necessary to meet all design and construction requirements
- types of bridge category:
  - single span, multi span,
  - simply supported or continuous
- variations in construction sequences:
  - restricted sites
  - floating piers
  - multiple piers

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL086 Supervise engineering operations

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA315B Supervise engineering operations. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.6 and 2.3 removed

Application

This unit describes the skills required to command, lead and manage an engineering organisation of up to thirty personnel on operations. Command is the authority a commander in the military service lawfully exercises over subordinates by virtue of rank or assignment.

It includes the skills and knowledge required to lead and manage under extreme conditions in a high risk environment. It therefore requires individuals to be incisive in a fluid and demanding environment, to act independently, and to lead by example.

This unit applies to land engineering personnel required to deploy in an operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and lead a team under direct and/or indirect supervision. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of unpredictable contexts.

© Commonwealth of Australia, 2025 Public Skills Australia

No licensing, legislative or certification requirements apply to unit at the time of publication.

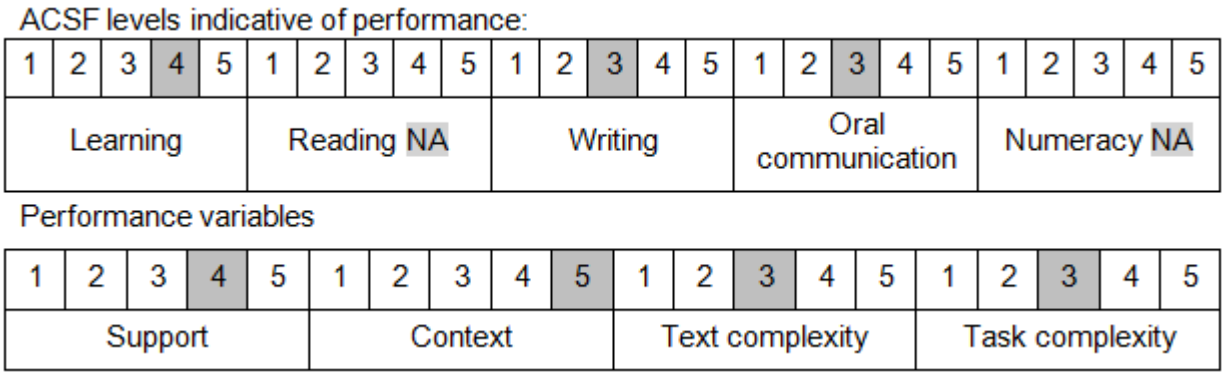
Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare and plan for engineering operations	1.1 Confirm and maintain competence of subordinates. 1.2 Maintain personnel administration. 1.3 Receive and clarify orders to determine commander's intent. 1.4 Determine and manage constraints and risks relevant to the task. 1.5 Assemble appropriate resources for the task and report any shortfalls that limit capability to the chain of command. 1.6 Make planning decisions based on a logical process to solve operational problems. 1.7 Conduct battle procedures.
2. Conduct engineering operations	2.1 Prepare and deliver orders. 2.2 Direct and supervise subordinates. 2.3 Organise and direct support from outside agencies.
3. Finalise engineering operations	3.1 Conduct debriefs. 3.2 Conduct post activity analysis and make recommendations. 3.3 Recondition, replace or return equipment, stores and ammunition. 3.4 Complete documentation. 3.5 Monitor subordinates' health and wellbeing and take appropriate action.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA315B Supervise engineering operations.

Assessment Requirements for DEFMIL086 Supervise engineering operations

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- demonstrating combat engineer skills
- developing instructions from given orders
- drawing simple construction plans
- operating Global Positioning System (GPS)
- operating weapons
- conducting simple levelling for construction tasks
- supervising subordinates
- writing reports
- supervising general construction of pre designed timber structures, sandbag walls, obstacles, expedient structures and field defences using techniques, including:
  - construction design and plans
  - excavation
  - revetment
  - basic carpentry
  - concreting
- designing and using field machines (including at least one of: slings, gyns, derricks and sheers) to move a load of at least three tonne
- supervising search of:
  - an occupied building
  - an unoccupied building
  - a vehicle (may include aircraft, boat, truck, train etc.)

© Commonwealth of Australia, 2025 Public Skills Australia

  - route (road)
  - area
- liaising with a higher authority (search advisor, cordon commander, police, explosive ordnance disposal)
- supervising offensive, defensive and security tasks (including patrolling, attacking or withdrawing) involving activities such as:
  - navigation (day, night, vehicle, foot)
  - tracking and patrolling
  - employment of unit weapon systems:
  - individual weapons
  - crew served weapons
  - direct fire support weapons
  - communications
  - living in the field

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- combat communications
- combat engineer skill sets and equipment
- chemical, biological, radiological and nuclear warfare (CBRN)
- combat skills
- emergency response engineering
- geometric engineering
- legal and organisational requirements in relation to environmental requirements and Rules of Engagement
- risk assessment techniques

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL087 Supervise the construction of short term roads or tracks

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA316B Supervise the construction of short term roads or tracks. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.13 removed • Element 1 reworded

Application

This unit describes the skills required to plan and direct the construction and to ensure the maintenance of a short-term road or track. It includes repairs to all weather dirt roads to prepare them for sealing without additional construction and repairs, that would normally involve:

- potholes that cause the slowing of traffic
- removal and replacement of culverts emergency repairs to bomb damaged airfield runway, taxi-way and hard standings
- small scale stabilisation tasks
- construction of short distance emergency bypass routes
- expedient roadways

This unit applies to combat engineer personnel who are required to plan and direct the construction and to ensure the maintenance of, a short term road or track in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

© Commonwealth of Australia, 2025 Public Skills Australia

Those undertaking this unit would work independently and lead a team under direct and/or indirect supervision. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform complex tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan road or track construction	1.1 Interpret road requirements and restrictions from instructions, expected time frame for usage and likely weather conditions. 1.2 Seek assistance to survey road location. 1.3 Survey water courses and other ground obstacles and note their impact on road design. 1.4 Plan crossing or entry points for other roads and tracks. 1.5 Investigate soil conditions to establish profile to sub-base level. 1.6 Plan extent and depth of clearing and cutting. 1.7 Plan soil dumping or storage areas to accommodate volume of soil to be removed, access and restoration. 1.8 Develop construction plan in accordance with design, resources, risks and environmental considerations. 1.9 Confirm availability of required road base and additional material. 1.10 Confirm and monitor competence of team members. 1.11 Brief construction team. 1.12 Liaise with outside agencies.
2. Supervise road or track construction	2.1 Direct and supervise construction team in accordance with the construction plan. 2.2 Recognise and respond to unexpected situations that require a quick and decisive response. 2.3 Check drainage, levelling, road alignment and soil stability.

© Commonwealth of Australia, 2025 Public Skills Australia

	2.4 Organise and direct support from outside agencies. 2.5 Provide technical advice to higher authority or support agencies.
3. Supervise maintenance of road or track	3.1 Monitor condition of road/track in relation to volume of traffic and expected future requirements. 3.2 Identify and repair, or report to controlling body, specific damage likely to lead to safety or environmental issues. 3.3 Plan and carry out normal wear and damage repair with minimal disruption. 3.4 Note and modify ineffective drainage. 3.5 Redesign and remake areas of consistent damage.
4. Finalise the task	4.1 Conduct post activity analysis and make recommendations. 4.2 Recondition, replace or return equipment and stores. 4.3 Complete documentation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1 2 3 **4** 5	1 2 **3** 4 5	1 2 3 **4** 5	1 2 **3** 4 5	1 2 **3** 4 5
Learning	Reading	Writing	Oral communication	Numeracy

Performance variables:

1 2 3 **4** 5	1 2 3 4 **5**	1 2 3 **4** 5	1 2 3 **4** 5
Support	Context	Text complexity	Task complexity

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA316B Supervise the construction of short term roads or tracks.

Assessment Requirements for DEFMIL087 Supervise the construction of short term roads or tracks

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- analysing pavement using cone penetrometer
- conducting reconnaissance for quarries and gravel pits
- conducting route reconnaissance:
  - route formula symbols
  - limiting factors
  - construction materials
  - overhead obstructions
  - tunnels and underpasses
  - map overlays
- conducting soils testing (CBR)
- designing and constructing culverts:
  - determining ground bearing pressure and angle of repose
  - determining soil characteristics and properties
  - employing geo textiles
  - employing soil stabilisation methods
- measuring roadway parts:
  - pavement widths and thickness
  - shoulders
  - camber and crossfall
  - drainage
- preparing terrain analysis

© Commonwealth of Australia, 2025 Public Skills Australia

- constructing roads and track to a standard that they could be classified as all-weather dirt roads and tracks capable of sustained heavy vehicle traffic
- constructing roads or tracks able to be sealed without further construction

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- techniques of:
  - compaction
  - pavement analysis using cone penetrometer
  - route reconnaissance
  - soil stabilisation methods
  - soil testing
  - terrain analysis
- construction standards
- types of:
  - geo textiles
  - ground bearing pressure and angle of repose
  - quarries and gravel pits
  - road systems and their relevant parts
  - soil characteristics and properties

Assessment Conditions

Competency should be demonstrated over a time frame that encompasses all aspects of the unit, in the workplace or in a simulated work environment. Assessment need only be conducted supervising the construction of one road or track due to the high cost and complex nature of the task. Specifically, access is required to the following resources:

- construction equipment and materials
- communications equipment
- suitable site
- construction team

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL090 Assist in the preparation, construction, operation and maintenance of a field water-point

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA319 Assist in the preparation, construction, operation and maintenance of a field water point. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 3.4 removed • PC 1.4 reworded

Application

This unit describes the skills required to assist in testing for water quality, selecting a suitable work site and preparing, constructing and operating a field water point. The unit also includes the assembly and operation of water purification equipment, and the production and storage of potable water to meet the requirements of personnel and equipment deployed into an area without adequate water supply.

This unit applies to combat engineer personnel required to assist in testing for water quality, selecting a suitable work site and preparing, constructing and operating a field water point in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work as part of a team under direct supervision, but may be responsible for completing individual tasks. They use discretion and judgement, and take responsibility for the quality of their outputs while performing complex tasks in a broad range of unpredictable contexts.

Elements and Performance Criteria

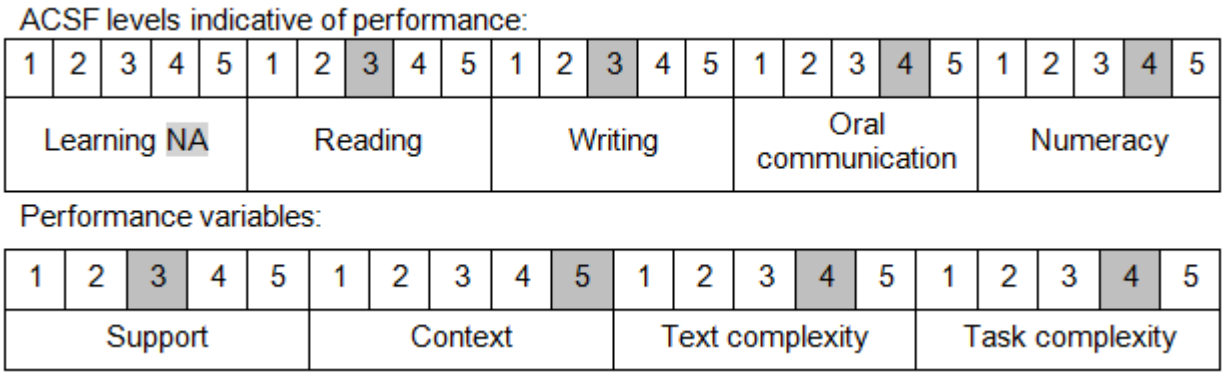
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Locate a supply of water	1.1 Locate a water supply within a designated area. 1.2 Test water for compliance with quality standards. 1.3 Assess suitability of water sources to be used for collection, treatment and storage. 1.4 Prepare site after gaining approval.
2. Prepare a field water point	2.1 Select and wear personal protective equipment. 2.2 Check equipment, tools and materials for serviceability and report faults. 2.3 Locate and mark local utility assets such as water, electricity and gas pipelines to prevent damage and liaise with local authorities as required. 2.4 Handle, prepare, test and store water point chemicals in accordance with standard procedures and report faults. 2.5 Establish and maintain contact with appropriate agencies to facilitate construction activities, when mechanical excavation equipment is required. 2.6 Construct water point and compact/backfill site using manual or mechanical equipment. 2.7 Construct structures such as water towers and storage tanks. 2.8 Assemble, operate and maintain field water supply equipment and accessories.
3. Operate a water point to produce potable water	3.1 Produce, store and distribute potable water. 3.2 Calibrate, service, operate and maintain water treatment and testing equipment. 3.3 Collect and test water samples. 3.4 Record information related to chemical supply, usage and disposal.

© Commonwealth of Australia, 2025 Public Skills Australia

	3.5 Collect, record, maintain and report process and performance data. 3.6 Inspect and maintain equipment in accordance with manufacturer's instructions.
4. Refurbish water point site	4.1 Restore work site to normal, when required. 4.2 Dispose of chemicals.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA319 Assist in the preparation, construction, operation and maintenance of a field water-point.

Assessment Requirements for DEFMIL090 Assist in the preparation, construction, operation and maintenance of a field water-point

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- assembling, operating and disassembling water supply and purification equipment
- calculating and recording water flows
- following instructions/directives and reporting information
- analysing water quality data
- handling water purification chemicals

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- WHS requirements
- effects of weather on water quality and the operation of the site and plant
- risk factors and potential hazards of surface water systems
- safe handling and disposal of chemicals
- team work principles and strategies
- composition of teams and roles and responsibilities of team members
- verbal and non-verbal communication techniques
- written communication to a level required to complete workplace forms and reports
- basic numeracy, such as addition, subtraction and multiplication
- formulae and method for calculating water flow and volume

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL091 Prepare, operate and maintain small watercraft

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA320 Prepare, operate and maintain small watercraft. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.2 removed • Elements 2 and 3 merged

Application

This unit describes the skills required to operate small watercraft. The watercraft will normally be operated in an environment of protected or calm inland waterways, conducting a range of tasks including the transport of personnel and/or equipment.

Examples of small watercraft may include:

- motorised and non-motorised boats up to five metres in length capable of accommodating a maximum ten personnel and the operator and crewman
- motorised and non-motorised rigid and non-rigid inflatable craft
- powered by outboard motors of up to 40 hp
- motorised and non-motorised bridge and ferry construction craft

While the technical aspects of this competency are concerned with ‘operating a boat’, the specialisation of the skill, and safety issues associated with waterborne operations confer additional responsibilities upon the operator.

This unit applies to those working as combat arms personnel required to operate small watercraft in a deployed operational environment, but is applicable to any individual in this field of work.

© Commonwealth of Australia, 2025 Public Skills Australia

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision but may need to provide directions. They must demonstrate sound judgement in the use of authority, and where possible, work within the existing lines of authority. They would perform routine tasks in a broad range of contexts, such as protected or calm inland waterways or in a threat environment.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

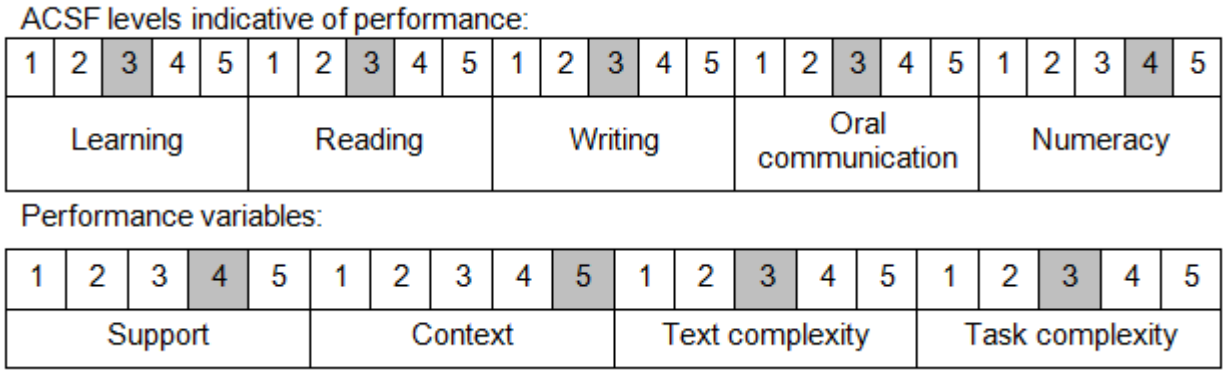
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for watercraft operations	1.1 Interpret operating instructions to determine the task, the cargo, the destination and route, and compile navigation data. 1.2 Complete hasty buoyancy/floatation calculations to ensure passengers and cargo are safe to move. 1.3 Select and check equipment is for serviceability and replace or reject unserviceable items, and report to the supervisor. 1.4 Conduct shore preparation and ensure watercraft is ready for launch. 1.5 Select and apply personal protective equipment. 1.6 Conduct a safety briefing for passengers and crew prior to embarking on watercraft operations.
2. Control operation of small watercraft	2.1 Construct improvised flotation craft, when required, in accordance with technical specifications and supervisor's instructions. 2.2 Launch in accordance with standard procedures and local conditions. 2.3 Load and trim watercraft to ensure safety of crew and load.

© Commonwealth of Australia, 2025 Public Skills Australia

	2.4 Operate watercraft consistent with hazards and environmental conditions. 2.5 Direct passengers in order to maintain safety and efficient boat operation. 2.6 Carry out contingency and emergency drills to minimise threat to personnel and equipment. 2.7 Disembark and/or unload personnel and/or loads.
3. Recover and restore vessel	3.1 Recover watercraft from a ramp or improvised landing site. 3.2 Check, clean and service watercraft and associated equipment, report defects and complete documentation. 3.3 Debrief staff and/or management.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA320 Prepare, operate and maintain small watercraft.

Assessment Requirements for DEFMIL091 Prepare, operate and maintain small watercraft

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- using knots and lashings
- monitoring hazards and applying safety principles to operations
- calculating and recording number and weight of passengers, stores and equipment
- carrying both equipment and personnel
- managing the full range of contingency and emergency actions
- providing directions to personnel within the boat concerning specific safety matters such as seating, movement and actions on incidents including man overboard and capsize

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- applicable statutory waterways rules for watercraft operation
- local water hazards and environmental conditions
- effects of water moving over objects and obstacles
- hasty buoyancy/floatation calculations

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL092 Assist in the construction of wet gap crossings

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA321 Assist in the construction of wet gap crossings. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.3 removed • PC 1.3 and 3.2 revised

Application

This unit describes the skills required to plan and prepare for wet gap crossing operations, construct gap crossing equipment, and maintain and clean up site and equipment.

Equipment may include:

- floating support bridges
- fixed floating span equipment
- ferry equipment (captive and free)
- floating support bridge
- rafts
- improvised floating structures
- any other to cross rivers and other wet gaps to facilitate the movement of personnel, vehicles, cargo and equipment

Wet gap crossing is defined as a bridge that is physically supported by the water, i.e. through pontoons and associated buoyancy measures. Bridges will normally be constructed on a temporary basis to meet the operational need to provide a crossing point over a gap for personnel and equipment. When the crossing is no longer required the bridge is either recovered to storage or redeployed to another crossing.

© Commonwealth of Australia, 2025 Public Skills Australia

This unit applies to those working as combat engineer personnel required to assist in the preparation, construction, operation and recovery of wet gap crossing bridging equipment, including floating support bridges, to cross rivers and other wet gaps to facilitate the movement of personnel, vehicles, cargo and equipment in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team, under supervision, but may undertake some autonomous tasks. They would perform routine tasks in a broad range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Military Skills

Elements and Performance Criteria

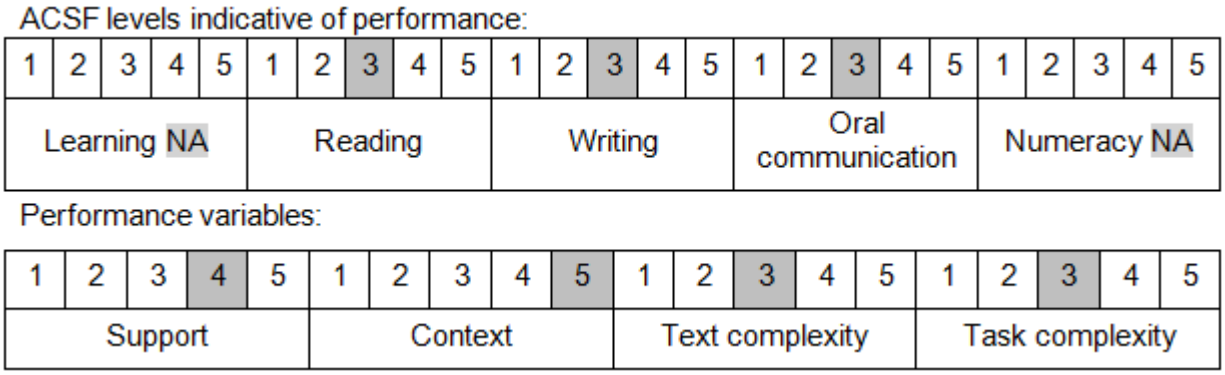
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for wet gap crossing operations	1.1 Select and wear appropriate personal protective equipment. 1.2 Conduct site layout and preparation. 1.3 Check all wet gap crossing bridging components against the inventory and materials list and prepare for operation. 1.4 Report component, tool and equipment faults and deficiencies to the supervisor. 1.5 Select tools and equipment required for the task, check them for serviceability.
2. Construct a wet gap crossing	2.1 Assemble and adjust jigs, fixtures and equipment to be used in construction. 2.2 Assemble and check bridge components for compliance, accuracy and alignment.
3. Maintain and clean up site and	3.1 Maintain gap crossing sites and crossing systems. 3.2 Recover, clean and maintain gap crossing equipment, tools and

© Commonwealth of Australia, 2025 Public Skills Australia

equipment	unused materials. 3.3 Document and report faults and deficiencies in gap crossing equipment, tools and unused materials. 3.4 Store or redeploy to another site gap crossing equipment, tools and materials.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA321 Assist in the construction of wet gap crossings.

Assessment Requirements for DEFMIL092 Assist in the construction of wet gap crossings

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- interpreting plans and job instructions
- manually handling construction materials and heavy bridging components
- working with plant
- following instructions/directives and report information
- participating in teams
- encouraging other team members
- using a variety of verbal and non-verbal communication techniques including language style, active listening
- assisting in the construction of at least two wet gap crossings anchorages
- participating in the construction of:
  - one gap crossing with a span of at least thirty metres
  - one crossing at night
- preparing a crossing site
- checking components, tools and equipment for serviceability and completeness
- participating in the assembly, construction operation and recovery of various types of crossing systems
- communicating effectively and work as part of a team
- operating construction equipment

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- WHS workplace and equipment safety requirements
- materials handling while operating tools
- site safety while working with plant
- anchorage systems, knots and lashings
- techniques for supporting others
- composition of teams and roles and responsibilities of team members
- verbal and non-verbal communication techniques including language style, active listening

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL093 Assist in the construction of dry gap crossings

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA322 Assist in the construction of dry gap crossings. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.3 removed • PC 1.3 and 3.2 revised

Application

This unit describes the skills required to assist in the preparation, construction, maintenance and recovery of dry gap crossing bridging equipment to cross any form of gap, including rivers and streams, to facilitate the movement of personnel, vehicles, cargo and equipment. When the crossing is no longer required the bridge is either recovered to storage or redeployed to another crossing.

This unit applies to for combat engineer personnel involved in the construction of dry gap crossings in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would usually be engaged in bridge construction as part of a team under supervision, but may undertake some autonomous tasks. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for DEFMIL093 Assist in the construction of dry gap crossings

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- selecting and using tools and equipment appropriate to the task
- following instructions/directives and reporting information
- assisting in the construction of at least two dry gap crossings using two types of dry gap crossing bridging equipment:
  - multiple or single span gap crossing equipment
  - fixed clear span equipment
  - non equipment bridging
  - improvised and/or expedient materials
  - suspended cable equipment
  - aerial ropeways
- participating in the construction of:
  - at least one bridge of not less than fifteen metres span
  - at least one bridge constructed at night
- preparing the work site
- checking components, tools and equipment
- operating construction equipment

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

© Commonwealth of Australia, 2025 Public Skills Australia

- WHS workplace and equipment safety requirements
- materials handling while operating tools
- site safety while working with plant
- composition of teams and roles and responsibilities of team members

Assessment Conditions

Competency should be demonstrated under field conditions over a time frame that allows for individuals to be assessed in the various tasks related to the construction of at least two dry gap crossings using two types of equipment, in the workplace or in a simulated workplace environment. Specifically, access is required to the following resources:

- selected dry gap crossing equipment and components (multiple or single span gap crossing equipment, fixed clear span equipment, non-equipment bridging, improvised and/or expedient materials, suspended cable equipment, aerial ropeways)
- tools, equipment and materials required to support the construction and operation of dry gap crossing equipment
- suitable dry gap training area

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL094 Assist in the preparation, construction and maintenance of roads and tracks

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA323 Assist in the preparation, construction and maintenance of roads and tracks. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to assist in the preparation, construction and maintenance of minor roads and tracks to provide access to work sites, camps and other installations. The minor roads and tracks will normally be of a temporary nature and can be expected to carry only a moderate amount of vehicular traffic without major upgrading, construction and maintenance work to bring it up to a permanent standard. Roads and tracks will normally be constructed in field conditions.

This unit was developed for combat engineer personnel required to assist in the preparation, construction and maintenance of minor roads and tracks to provide access to work sites, camps and other installations in a deployed operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would usually work as part of a team under supervision, but may undertake some tasks independently. They must use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of unpredictable contexts.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for construction	1.1 Select and wear appropriate personal protective equipment. 1.2 Select and check for serviceability tools and equipment required for the job and report any faults to the supervisor. 1.3 Lay out road/track line and clear it of vegetation and obstructions.
2. Construct road/track sub base	2.1 Remove soil manually or with the assistance of plant support to establish a base of suitable width, slope and stability. 2.2 Coordinate soil and waste removal with plant operators and dump or store. 2.3 Compact or stabilise soil (chemically or mechanically) with the assistance of plant support. 2.4 Make provision for drainage and crossing points progressively.
3. Construct road/track surface and drainage	3.1 Transfer, spread, compact and lay/fix road/track base and other surface materials to meet the planned road/track design. 3.2 Provide drains and establish water runoff.
4. Construct crossings	4.1 Cut and prepare road/track surface at crossing point using appropriate compaction. 4.2 Install culverts in accordance with the predicted volume of water. 4.3 Place, backfill and compact pipes or cords.
5. Maintain road/track and refurbish work site	5.1 Monitor condition of road/track in relation to volume of traffic, loads and expected future requirements. 5.2 Identify and repair or report damage likely to lead to safety or environmental issues. 5.3 Plan and carry out normal wear and tear damage repair with minimal disruption to other activities. 5.4 Identify and modify ineffective drainage.

DEFMIL095 Assist in the construction and maintenance of field structures

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA324 Assist in the construction and maintenance of field structures. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to construct and maintain a range of field structures, such as bunkers, strongpoints, towers and shelters. Construction is usually of a temporary nature and is undertaken employing expedient construction methods using both commercially available and improvised materials. Construction will normally be carried out in a field environment.

This unit was developed for combat arms personnel involved in the construction and maintenance of field structures in a deployed operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit will usually work as part of a team under supervision, but may undertake some tasks independently. They use discretion and judgement, and take responsibility for the quality of their outputs in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Assessment Requirements for DEFMIL095 Assist in the construction and maintenance of field structures

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- following instructions
- reading drawings, plans and sketches
- selecting construction materials
- measuring relative to the construction process
- utilising expedient and improvised methods to construct field structures
- reporting information
- laying out a site
- preparing materials and equipment for construction
- applying appropriate expedient construction methods and procedures to the construction including accurate measuring and levelling
- using standard processes to handle and place materials
- completing the construction of field structures to the specified standard

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- workplace and equipment safety requirements
- materials handling and storage
- measurement relative to construction
- expedient and improvised construction methods

© Commonwealth of Australia, 2025 Public Skills Australia

- types and use of field structures
- drawings, plans and graphic representation including lettering, symbols tables, charts, specifications
- techniques for supporting others
- composition of teams and roles and responsibilities of team members
- verbal and non-verbal communication techniques including language style, active listening

Assessment Conditions

Competency should be demonstrated under field conditions over a time frame that allows for constructing and maintaining a number of field structures utilising expedient construction methods and a variety of materials. Assessment should include construction of at least three types of field structures, at least one above and one below ground structure.

Competency should be assessed in the workplace or in a simulated workplace environment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL096 Prepare and operate a field water-point

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA325 Prepare and operate a field water point. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.10 and 2.7 removed

Application

This unit describes the skills required to prepare and operate a field water point. Suitable water sources include bores, canals, dams, existing piped supplies, lakes, oceans, rivers, or springs.

This unit applies to combat engineer personnel who are required to locate suitable water sources, select suitable work sites, operate and maintain a field water point, and refurbish sites in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would lead a team under direct and/or indirect supervision. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Military Skills

Elements and Performance Criteria

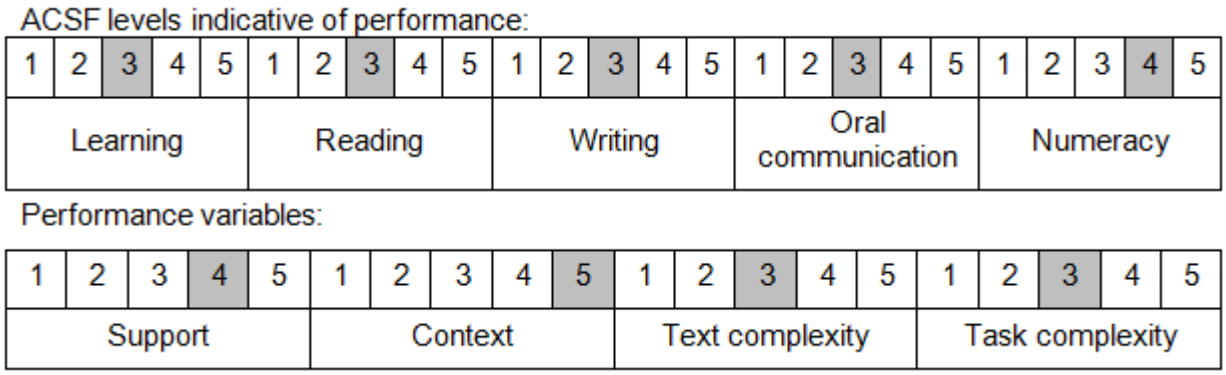
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare and plan for water acquisition	1.1 Receive and process requirement and confirm with higher authority as necessary. 1.2 Identify resource availability and serviceability and determine constraints. 1.3 Conduct analysis of the area from available data to identify potential water sources. 1.4 Conduct site surveys, risk and environmental assessments. 1.5 Develop field water point plan in accordance with survey, water quality and quantity, resources, risks and environmental considerations. 1.6 Refer problems that cannot be resolved locally to higher authority for resolution. 1.7 Confirm and monitor competence of team members. 1.8 Brief team. 1.9 Liaise with outside agencies.
2. Construct a field water point	2.1 Direct and supervise team in accordance with plan. 2.2 Organise and direct support from outside agencies. 2.3 Locate and mark local utility assets to prevent damage. 2.4 Establish routes in and out of water points. 2.5 Design and construct/establish structures. 2.6 Provide technical advice to the chain of command and/or support agencies.
3. Operate and maintain a field water point	3.1 Produce, store and distribute potable water. 3.2 Supervise water point team. 3.3 All unexpected situations that require a response are recognised and responded to in accordance with operational requirements and standard procedures. 3.4 Provide reports and data to higher authority.
4. Refurbish site and finalise activity	4.1 Refurbish site in accordance with environmental requirements. 4.2 Dispose of chemicals and waste in accordance with

© Commonwealth of Australia, 2025 Public Skills Australia

	environmental requirements. 4.3 Recover, clean and maintain equipment, tools and materials. 4.4 Store or redeploy equipment, tools and materials. 4.5 Complete documentation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA325 Prepare and operate a field water point.

Assessment Requirements for DEFMIL096 Prepare and operate a field water-point

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- analysing instructions
- conducting and quality assuring water analysis
- conducting risk assessment
- conducting tactical and technical water-point reconnaissance
- managing fuel/chemical spill containment
- managing the storage of water
- preparing and issuing instructions and orders
- providing advice
- selecting and maintaining routes
- supervising the construction of improvised water towers
- communicating effectively with team personnel and outside agencies
- monitoring water quality and quantity

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- design and construction requirements of improvised water towers
- environmental considerations:
  - chemical storage/MSDS
  - fuel/chemical spill containment

© Commonwealth of Australia, 2025 Public Skills Australia

- legal responsibilities
- pathology report of water samples
- relevant legislation and procedures in relation to environmental requirements
- relevant WHS regulations/requirements, equipment, material and personal safety requirements
- requirements of a technical reconnaissance of a water point
- water analysis and storage requirements

Assessment Conditions

Competency should be demonstrated over a time frame that allows the individual to be observed in all aspects of the operation, a typical time frame would be three days.

Competency should be assessed in the workplace or in a simulated work environment. Specifically, access is required to the following resources:

- field water point equipment and accessories relevant to the task
- team
- hand tools, power tools, plant and other equipment appropriate to the supply of water
- suitable water supply
- field water point site
- pathology report of water samples

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL097 Operate an inland modular raft or ferry

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA326 Operate an inland modular raft or ferry. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.13 removed

Application

This unit describes the skills required to operate an inland modular raft or ferry. The raft or ferry will consist of at least three connected, unpowered pontoons that are propelled by at least two tugs. This unit of competency covers the assembly, navigation, and manoeuvring of the raft or ferry. The raft or ferry will normally be driven in an environment of protected or inland waterways, while conducting a range of tasks including the transport of personnel and/or equipment.

This unit applies to combat engineer personnel who are required to operate an inland modular raft or ferry in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would lead a team under direct and/or indirect supervision. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for raft or ferry operation	1.1 Determine task, cargo, destination and route from operating instructions. 1.2 Compile navigation data. 1.3 Check cargo weight is within the safe operating limit of the craft and complete manifests to ensure passengers and cargo are safe to move. 1.4 Conduct launch site survey, risk and environmental assessment. 1.5 Determine suitable raft or ferry design. 1.6 Develop assembly and disassembly plan in accordance with design, resources, surveys, risks and environmental considerations. 1.7 Select equipment and check for serviceability, replace or reject, and report unserviceable items. 1.8 Check operator and crew conform to relevant state/territory and federal licensing requirements. 1.9 Refer problems that cannot be resolved locally to higher authority for resolution. 1.10 Brief crew. 1.11 Liaise with outside agencies as required. 1.12 Conduct shore preparation and prepare the pontoons and tugs for launch.
2. Assemble and manoeuvre the raft or ferry	2.1 Direct and supervise crew. 2.2 Launch tugs and pontoons. 2.3 Assemble raft or ferry in accordance with assembly plan. 2.4 Brief passengers on safety issues prior to embarking. 2.5 Load raft or ferry in accordance with manifest and check security, alignment and load stability. 2.6 Navigate and manoeuvre raft or ferry consistent with hazards and environmental conditions. 2.7 Conduct contingency and emergency drills to minimise threat to personnel and equipment.

© Commonwealth of Australia, 2025 Public Skills Australia

	2.8 Disembark personnel and unload equipment. 2.9 Recognise and respond to unexpected situations that require a quick and decisive response in accordance with operational requirements.
3. Recover and restore raft or ferry	3.1 Disassemble raft or ferry in accordance with disassembly plan. 3.2 Recover pontoons and tugs. 3.3 Check equipment for serviceability, clean and service it, and report any defects. 3.4 Complete documentation. 3.5 Complete debriefing requirements.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	**4**	5	1	2	**3**	4	5	1	2	**3**	4	5	1	2	**3**	4	5	1	2	**3**	4	5
Learning					Reading					Writing					Oral communication					Numeracy					

Performance variables:

1	2	3	**4**	5	1	2	3	4	**5**	1	2	**3**	4	5	1	2	**3**	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA326 Operate an inland modular raft or ferry.

Assessment Requirements for DEFMIL097 Operate an inland modular raft or ferry

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- commanding and controlling crew, passengers and loads
- commanding and navigating the raft or ferry by day and night
- monitoring hazards and applying safety principles to operations
- reading and interpreting navigation charts
- operating the LRV to launch and recover tugs and pontoons
- supervising raft and ferry construction
- using clear interpersonal communication as operator of the vessel
- using knots and lashings
- operating a raft or ferry on various waterways
- managing contingency and emergency actions
- manoeuvring a raft or ferry, with a minimum weight of twenty tonnes

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- applicable statutory waterways rules for watercraft operation
- boat specific safety requirements and fire suppressant system
- gap reconnaissance
- hasty buoyancy/floatation calculations
- launch and recovery procedure for the launch and recovery vehicle

© Commonwealth of Australia, 2025 Public Skills Australia

- loading procedures and centre of gravity
- effects of water moving over objects and obstacles
- effects of wind on floating objects
- manifest data
- raft and ferry design and construction sequence

Assessment Conditions

Competency should be demonstrated over a time frame that allows for the preparation, launch, recovery, navigation and manoeuvring of a raft or ferry under a range of water operating conditions carrying personnel or cargo, either in the workplace or in a simulated work environment. Specifically, access is required to the following resources:

- tugs and pontoons
- associated equipment and accessories, including cargo crew
- suitable waterways with access to flowing/tidal water

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL111 Undertake reconnaissance tasks

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA404B Undertake reconnaissance tasks. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.4 and 2.5 removed

Application

This unit describes the skills required to operate as a team member during the conduct of reconnaissance tasks in the Defence Force. Reconnaissance operations require soldiers to operate in small teams in close proximity to the enemy in order to gather information to inform their commanders.

This unit applies to those working as combat arms personnel required to deploy in an operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and as part of a team under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFMIL111 Undertake reconnaissance tasks

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying navigation techniques
- applying operational safety
- preparing and using reconnaissance equipment
- utilising reconnaissance techniques
- applying fieldcraft and battle craft

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- battle craft
- characteristics, technical capabilities, effects, employment and limitations of equipment
- cultural awareness
- fire control orders
- navigation techniques
- WHS requirements
- Orders for Opening Fire
- recognised safety precautions

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL112 Undertake surveillance tasks

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA405B Undertake surveillance tasks. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.6 reworded

Application

This unit describes the skills required to undertake surveillance patrols as part of a team during land operations in the Defence Force. Surveillance patrolling is carried out in both forward and rear areas to detect, locate, identify and report on threats and to monitor the threat environment. A surveillance patrol team consists of up to ten people (for example an infantry section). Surveillance patrols are conducted to both maintain security and to gain information such as:

- changes in patterns of normalcy
- characteristics of infrastructure and facilities
- sign of activity
- strength and disposition of threat

This unit applies to those working as arms personnel required to deploy in an operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and as part of a team under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of contexts.

Assessment Requirements for DEFMIL112 Undertake surveillance tasks

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- employing relevant patrol equipment
- preparing and using surveillance equipment
- applying fieldcraft and battle craft
- conducting surveillance on a target
- assimilating orders

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- administrative requirements
- battle craft
- characteristics, technical capabilities, effects, employment and limitations of patrol weapons
- characteristics, technical capabilities, effects, employment and limitations of relevant patrol equipment
- current operational environment
- fieldcraft
- first aid
- navigation techniques
- operational safety

© Commonwealth of Australia, 2025 Public Skills Australia

- patrol drills
- preventative health measures

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL113 Operate a service pistol

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA406B Operate a service pistol. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.1 removed • PC 1.2 and 1.4, and 4.1 and 4.3 merged

Application

This unit describes the skills required to operate a service pistol. Operating a service pistol involves the ability to safely handle, safely maintain, safely operate and safely fire the service pistol.

This unit applies to those working as combat arms personnel required to operate a service pistol.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a group usually in self-defence. They would work under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

DEFMIL114 Operate a sustained fire machine gun

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA407B Operate a sustained fire machine gun. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.1 removed • PC 1.2 and 1.4, and 4.1 and 4.3 merged

Application

This unit describes the skills required to operate a sustained fire machine gun. It involves the ability to safely handle, safely maintain, safely operate and safely fire the sustained fire machine gun. A sustained fire machine gun is normally fired from a tripod utilising a sighting system enabling direct and indirect fire.

This unit applies to those working as combat arms personnel required to operate a sustained fire machine gun.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, usually as part of a team and will operate under direct orders. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a range of contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

- aiming the sustained fire machine gun
- applying immediate action and stoppage drills
- applying recognised safety precautions
- conducting weapon drills including:
  - safety precautions
  - degrees of weapon readiness
  - immediate action and stoppage
- firing the weapon using, as a minimum, ball ammunition
- firing the weapon mounted on a tripod
- recognising the limit of own authority

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics, technical capabilities, effects, employment and limitations of the sustained fire machine gun and ammunition
- degrees of weapon readiness
- WHS requirements
- marksmanship principles
- range safety

© Commonwealth of Australia, 2025 Public Skills Australia

- safety precautions of the sustained fire machine gun
- types of targets

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL115 Operate sustained fire machine guns on operations

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA408B Operate sustained fire machine guns on operations. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.3 removed

Application

This unit describes the skills required to conduct battle shooting on operations with sustained fire machine guns, including but not limited to MAG 58 and 12.7 Quick Change Barrel (QCB), in the Defence Force. This is only assessed in an operational environment, for example, as a member of a direct fire support weapons platoon.

This unit applies to those working as combat arms personnel required to operate a sustained fire machine on operations in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, usually as part of a team and will usually operate under direct orders. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

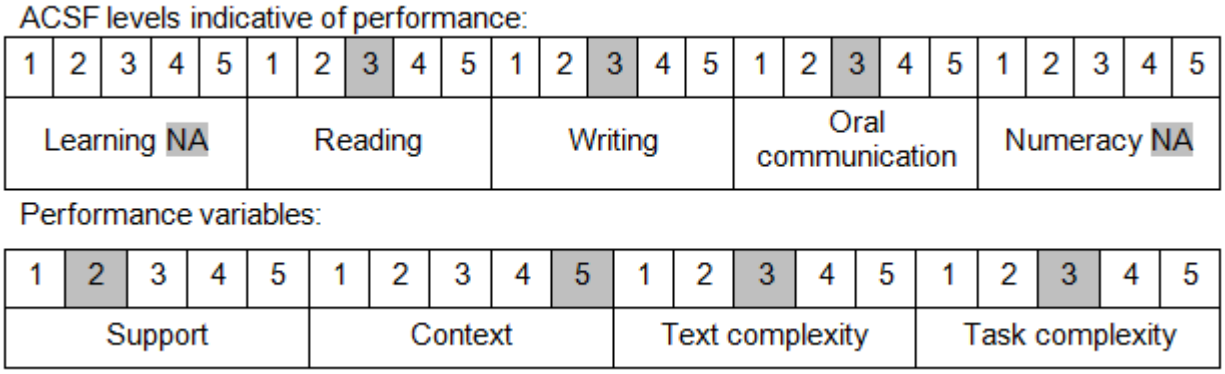
Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Handle a sustained fire machine gun	1.1 Conduct weapon drills. 1.2 Adopt fire positions as required by environment and threat. 1.3 Secure ammunition.
2. Apply fire with a sustained fire machine gun	2.1 Employ weapon sighting systems and associated equipment as required by the operational environment. 2.2 Comply with Rules of Engagement and Orders for Opening Fire when firing a sustained fire machine gun on operations, in accordance with operational requirements. 2.3 Identify and engage targets as required by the operational environment.
3. Maintain and stow a sustained fire machine gun	3.1 Clean and service sustained fire machine gun and associated equipment as required by the operational conditions. 3.2 Identify and rectify defects if within limits of authority or report them to supervisor. 3.3 Complete documentation. 3.4 Secure sustained fire machine gun.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA408B Operate sustained fire machine guns on operations.

Assessment Requirements for DEFMIL115 Operate sustained fire machine guns on operations

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- achieving the required effects of fire
- applying battle craft and fieldcraft
- applying recognised safety precautions
- carrying out weapon drills including:
  - action
  - checking clearances
  - degrees of weapon readiness
  - dismount
  - firing
  - immediate action and stoppage
  - mounting
  - parallel
  - safety precautions
  - scales adjustment
  - sight calibration
  - stripping and assembling
- firing the weapon using, as a minimum, linked ball ammunition
- applying a variety of engagement techniques including at least two of:
  - destruction
  - fixing
  - harassing

© Commonwealth of Australia, 2025 Public Skills Australia

  - neutralisation
  - suppression
  - varied rates of fire
- firing, as a minimum, from any unsupported position
- recognising limit of own authority

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- battle craft
- characteristics, technical capabilities, effects, employment and limitations of the sustained fire machine gun and ammunition
- fieldcraft
- fire control orders
- WHS requirements
- recognised safety precautions
- weapon drills

Assessment Conditions

Competency should be assessed in a simulated workplace environment using live ammunition in a range of actual live firing contexts based on a number of realistic operational scenarios. The context of assessment is simulated due to the nature of this high risk environment.

Specific resources for assessment include access to:

- sustained fire machine gun
- ammunition
- simulated operational environment

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL116 Operate a shotgun

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA409B Operate a shotgun. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.1, 4.1 and 4.2 removed • Element 1 one new PC • Elements 3 & 4 merged

Application

This unit describes the skills required to operate a shotgun, such as the Remington 870. Operating a shotgun involves the ability to safely handle, safely maintain, safely operate and safely fire it.

This unit applies to those working in Defence as combat arms personnel required to operate a shotgun.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, usually as part of a team and will operate under direct orders. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a range of contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

DEFMIL118 Operate a grenade launcher

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA411B Operate a grenade launcher. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.1 removed • PC 1.2 and 1.4, and 4.1 and 4.3 merged

Application

This unit describes the skills required to operate a grenade launcher. Operating a grenade launcher involves the ability to safely handle, maintain, operate and fire the grenade launcher. The grenade launcher fires a grenade designed to be used against area and point targets. The weapon is carried by one person and can be fired from normal small arms firing positions.

This unit applies to those working as combat arms personnel required to operate a grenade launcher.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, usually as part of a team and will operate under direct orders. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a range of contexts.

DEFMIL120 Operate a direct fire support weapon

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA413B Operate a direct fire support weapon. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.1 removed • PC 1.2 and 1.4, and 4.1 and 4.3 merged

Application

This unit describes the skills required to operate a direct fire support weapon, including any in service 66 mm or 84 mm direct fire support weapon. Operating a direct fire support weapon involves the ability to handle, maintain, operate and fire the direct fire support weapon. The weapon is designed to be carried by a person.

This unit applies to those working as combat arms personnel required to operate direct fire support weapons.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, usually as part of a team and will operate under direct orders. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Handle a direct fire support weapon	1.1 Identify, select and safely handle ammunition. 1.2 Secure, handle and carry direct fire support weapon.
2. Maintain a direct fire support weapon	2.1 Strip and assemble direct fire support weapon. 2.2 Clean and service direct fire support weapon and associated equipment. 2.3 Clean, inspect, carry and secure ammunition. 2.4 Identify and rectify defects within limits of authority or report them to supervisor. 2.5 Complete documentation.
3. Operate a direct fire support weapon	3.1 Conduct weapon drills. 3.2 Apply marksmanship principles. 3.3 Adopt fire positions as required by environment and threat. 3.4 Employ weapon equipment.
4. Fire a direct fire support weapon	4.1 Identify and engage target to fire direct fire support weapon. 4.2 Comply with Range Safety Brief and Practice Brief when firing a direct fire support weapon on a range.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

Assessment Requirements for DEFMIL120 Operate a direct fire support weapon

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- adopting appropriate firing position
- aiming the direct fire support weapon
- applying immediate action and stoppage drills
- applying recognised safety precautions
- conducting weapon drills
- firing the weapon
- recognising the limit of own authority

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics, technical capabilities, effects, employment and limitations of the direct fire support weapon and ammunition
- degrees of weapon readiness
- WHS requirements
- marksmanship principles
- range safety
- safety precautions of the direct fire support weapon
- types of targets

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL121 Operate direct fire support weapon systems on operations

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA414B Operate direct fire support weapon systems on operations. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.5 removed • PC 1.2 and 1.6 merged

Application

This unit describes the skills required to safely handle, aim, fire, and maintain direct fire support weapon systems (such as the 84 mm Carl Gustaf) designed to destroy targets and provide battlefield effects. The weapon system is carried and operated by a team.

All members of the team must be thoroughly familiar with target identification, the characteristics and capabilities of the weapon system and be competent in the application of fire in an operational environment. The team will usually operate under direct Orders for Opening Fire and in accordance with the Rules of Engagement.

This unit applies to those working in Defence as combat arms personnel.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under supervision, usually as part of a team and will usually operate under direct orders. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

© Commonwealth of Australia, 2025 Public Skills Australia

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

DEFMIL123 Employ hand operated pyrotechnics

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA416C Employ hand operated pyrotechnics. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.4 removed

Application

This unit describes the skills required to effectively employ pyrotechnics in the Defence Force. Pyrotechnics are usually used for illumination, signalling and obscuration.

This competency was developed for combat arms personnel working with pyrotechnics, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work independently under direct and/or indirect supervision. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

DEFMIL124 Destroy targets using a direct fire guided weapons system

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA417B Destroy targets using a direct fire guided weapons system. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.5, 2.2 and 2.5 removed • PC 1.2 and 1.6 merged

Application

This unit describes the skills required to safely handle, aim, fire, and maintain direct fire guided weapon systems designed to destroy targets, which may include Dragon, Javelin, Milan, and TOW. The weapon is designed to be carried by a person. The individual will usually operate under Orders for Opening Fire and in accordance with the Rules of Engagement.

This unit applies to those working as combat arms personnel required to operate direct fire guided weapon systems designed to destroy targets in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would normally operate the weapon in a team environment under supervision. The operators must be thoroughly familiar with characteristics and capabilities of the guided weapon system and competent in the application of fire in an operational or simulated operational environment. They would perform specific tasks in a broad range of contexts that can be unpredictable.

DEFMIL129 Observe and direct machine gun fire

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA424B Observe and direct machine gun fire. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to observe and direct machine gun fire onto targets in accordance with standard procedures in the Defence Force.

This unit applies to those working as combat arms personnel required to observe and direct machine gun fire in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under the commander’s direction, and must also have authority to act independently. They will perform specific tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Occupy and prepare a location	1.1 Occupy appropriate vantage point and maintain concealment throughout operation. 1.2 Establish occupied position. 1.3 Establish and document reference points. 1.4 Monitor possible threats and prepare an appropriate plan of action.
2. Plan the engagement of firepower	2.1 Use standard terminology so that clear communication with all stakeholders is maintained. 2.2 Establish target position. 2.3 Determine altitude of target from map. 2.4 Maintain communications with stakeholders throughout the operation and ensure personnel safety in the target area. 2.5 Describe target to stakeholders. 2.6 Determine type of engagement and convey instructions to the gun line.
3. Direct fire onto target	3.1 Transmit planning information to the command post. 3.2 Transmit direction to fire to the gun line. 3.3 Complete target analysis after impact and if appropriate refer to supervisor. 3.4 Complete or terminate adjustments of fire.
4. Withdraw from an occupied location	4.1 Recondition occupied position and remove all evidence of occupation. 4.2 Withdrawal from the occupied position.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Requirements for DEFMIL129 Observe and direct machine gun fire

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. ▸ Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- maintaining safety of friendly personnel at all times
- recognising and applying own level of authority

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics, technical capabilities, effects, employment and limitations of the weapon
- communication procedures
- safety associated with operations

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Candidates should complete a minimum of two live fire missions using sustained fire machine guns to engage the target.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL130 Supervise sniper operations

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA427B Supervise sniper operations. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.6 and 2.8 removed

Application

This unit describes the skills required to identify tasks and collect appropriate information, plan and prepare for sniping tasks, control sniping operations and finalise sniping tasks.

This unit applies to combat arms personnel required to supervise and control all aspects of sniper operations in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would perform independently and lead a team under indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. They would perform complex tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify tasks and collect appropriate information	1.1 Determine requirement to conduct sniping tasks from orders, and identify and apply appropriate standard procedures. 1.2 Determine and manage constraints imposed on tasks. 1.3 Identify and address training requirements. 1.4 Identify and address resource requirements. 1.5 Report shortfalls/problems through the chain of command.
2. Plan and prepare for sniping tasks	2.1 Assemble and analyse information and intelligence in support of operations. 2.2 Identify and manage risk. 2.3 Conduct decision making process. 2.4 Identify and advise sniper teams to perform specialist operations. 2.5 Adjust plans to accord with resource availability. 2.6 Prepare and issue orders to participating sniper teams indicating their missions, tasks, resources, constraints and limitations. 2.7 Supervise and conduct battle procedure.
3. Control sniping operations	3.1 Monitor operations to ensure efficient conduct and achievement of the mission. 3.2 Employ appropriate battlespace operating systems. 3.3 Modify plans to reflect requirements in effort, resources and support. 3.4 Coordinate operations as required, reallocating/adjusting resources to meet operational requirements. 3.5 Liaise with superiors, subordinates, supporting organisations and other operations being conducted as required, ensuring feedback and performance is addressed. 3.6 Action reported problems. 3.7 Provide reports.
4. Finalise sniping tasks	4.1 Document operations in accordance with current instructions. 4.2 Conduct debriefing. 4.3 Conduct post-activity analysis and make recommendations. 4.4 Compile and process reports and returns.

Assessment Requirements for DEFMIL130 Supervise sniper operations

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. ▸ Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- allocating appropriate materials and personnel to the operations
- developing and delivering orders, instructions, and directions
- controlling the operations to achieve the mission efficiently and safely
- writing reports and providing appropriate documentation
- identifying the application of legislative requirements
- coordinating multiple activities

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics, technical capabilities, effects, employment and limitations of relevant sniping equipment
- characteristics, technical capabilities, effects, employment and limitations of the sniping teams
- material, personnel skills and other requirements for the operations
- Rules of Engagement relevant to the sniping operations
- procedures and requirements of the operations
- reporting requirements and procedures associated with the operations
- safety precautions associated with the operations
- sniping operations to be performed

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL131 Undertake stability actions

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA428 Undertake stability actions. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to operate as a team member during the conduct of stability actions in the Australian Defence Force. Stability actions involve a variety of activities conducted in a threat environment. A security operations team is a grouping of up to approximately 30 personnel (for infantry this would be a section or platoon).

This unit was developed for combat arms personnel required to deploy in an operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit work independently and as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFMIL131 Undertake stability actions

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. ▸ Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying battle craft
- applying cultural sensitivity
- applying navigation techniques
- applying recognised safety precautions
- assimilating orders
- interpreting fire control orders
- working as part of a team
- carrying out duties during the following activities:
  - patrol key point security
  - vehicle check points
  - cordon and search
- completing the following drills and procedures:
  - contact drills
  - counter ambush drills
  - mine incident drills
  - obstacle crossing drills
  - harbour drills
  - short and long halts

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics, technical capabilities, effects, employment and limitations of equipment
- cultural awareness
- fire control orders
- navigation techniques
- Rules of Engagement

Assessment Conditions

Competency should be demonstrated over time in a range of contexts that could be expected in the workplace. Competency should be assessed in a simulated operational threat environment. The person should be exposed to the extremes of the operational environment under physical and mental stress. The context of assessment would usually be simulated due to the nature of this high risk environment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Assessment Requirements for DEFMIL132 Undertake defensive actions

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. ▸ Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying battle craft
- applying navigation techniques
- applying operational safety
- constructing defences such as:
  - shell scrapes
  - weapon pits
  - obstacles
  - fire lanes
  - weapon stakes
- adhering to all defensive routines as detailed below:
  - applying weapon readiness states
  - camouflage maintenance
  - clearing patrols
  - maintaining communications between individual/groups
  - maintaining hygiene plan
  - maintaining obstacles
  - monitoring surveillance devices
  - observing arcs
  - range cards
  - rehearsals
  - searching ground

DEFMIL134 Undertake sniper tasks

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA431 Undertake sniper tasks. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.2 removed

Application

This unit describes the skills required to operate as a two man team during the conduct of sniper tasks in the Defence Force. Sniper operations require soldiers to operate in close proximity to the enemy in order to hit targets with rifle fire and gather information to inform their commanders. The sniper must be thoroughly familiar with characteristics and capabilities of the weapon and competent in the application of fire in an operational environment.

This unit applies to combat arms personnel required to operate as a two man team during the conduct of sniper tasks in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit work independently and as part of a team under direct and/or indirect supervision, use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

DEFMIL137 Apply non-lethal unarmed self-defence techniques

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCM201B Apply non-lethal unarmed self-defence techniques. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 3.5 removed

Application

This unit describes the skills required to select and apply appropriate non-lethal unarmed self-defence (NUSD) techniques to control persons in operational situations. It includes the ability to minimise the risk to self and others, to quickly re-assess the situation and respond to unexpected changes in circumstances.

This unit was developed for Defence personnel required to apply NUSD techniques in deployed operational situations, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work independently and as part of a team under direct and/or indirect supervision. They use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Assess the need to use NUSD techniques	1.1 Evaluate need to use NUSD techniques against use of force guidelines. 1.2 Assess person's intentions based on risk assessment and identified opportunities. 1.3 Consider capacity to complete action effectively prior to commencement and assess alternative actions for viability. 1.4 Identify situations requiring assistance and request support.
2. Use NUSD techniques	2.1 Select NUSD techniques to ensure protection of self and efficient completion of movement. 2.2 Apply techniques in accordance with use of force guidelines. 2.3 Carry hand restraints in a secure, protected and accessible position for safe deployment. 2.4 Present and apply hand restraints using recognised techniques in accordance with use of force guidelines and legal requirements. 2.5 Compare sufficiency of response against identified opportunities constantly.
3. Contain the incident	3.1 Adjust response with changing circumstances in accordance with use of force guidelines and tactical options model. 3.2 Detain, handle and search people within the limits of legal requirements. 3.3 Provide care and protection to detainees. 3.4 Reassess situation to determine and request support requirements
4. Evaluate response	4.1 Evaluate and review effectiveness of response in a debrief. 4.2 Provide feedback to participants and supervisors based on accurate and constructive observations of incidents in order to optimise future performance. 4.3 Comply with systems, records and reporting procedures. 4.4 Identify and manage effects of stress using recognised stress management techniques.

Assessment Requirements for DEFMIL137 Apply non-lethal unarmed self-defence techniques

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying basic problem solving strategies
- applying first aid
- applying legislative and/or legal provisions including provisions governing the use of force, reactive force, misuse of force, proactive force, the duty of care under criminal, civil and international law.
- applying observation techniques
- communicating and negotiating under stressful situations
- interpreting instructions to facilitate solutions within operating parameters
- following instructions and reporting information
- recording and reporting information accurately
- interpreting and complying with legal and procedural requirements
- applying and terminating force
- applying control techniques that ensure continued protection of self and others and efficient completion of the movement
- applying the most appropriate NUSD techniques to counter the threat
- identifying current and potential risk factors and their impact on the incident/situation
- providing warnings and clear instructions/directions to a person/s posing a threat
- selecting response options within specified legal and statutory limits that most effectively meet the objective in accordance with the tactical options model
- recognising and managing stress

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- appropriate force according to threat
- defensive strike techniques that target or avoid vital areas of the body
- response options
- the tactical options model
- body dynamics and the affect of force on the body
- composition of teams and roles and responsibilities of team members
- current and potential risk factors and their impact on the incident/situation
- defence policies and procedures relating to the use of NUSD techniques
- legislative and/or legal provisions including provisions governing the use of force, reactive force, misuse of force, proactive force, the duty of care under criminal, civil and international law.
- powers of arrest and procedures for handling and handing over PWs and detainees
- response options within specified legal and strategic limits
- stress management techniques

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL138 Supervise a section during defensive operations

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCM133 Supervise a section during defensive operations. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.6, 2.2, 2.6 and 2.7 removed • PC 3.5 reworded

Application

This unit describes the skills required to command, lead and manage groups of up to twelve personnel during defensive operations. Defensive operations are characterised by extreme environmental conditions with high levels of risk of serious injury or death from hostile action. Supervision during defensive operations requires supervisors to be incisive in a fluid and demanding environment, to act independently, and to lead by example.

This unit applies to combat arms personnel involved in the conduct of defensive operations in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work as part of a team under direct and/or indirect supervision, but also must be prepared to act independently. They use discretion and judgement, and take responsibility for the quality of their outputs They would perform routine tasks in a broad range of unpredictable contexts.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare and plan for defensive operations	1.1 Confirm ability of subordinates to complete the task. 1.2 Action personnel administration. 1.3 Receive and clarify orders in accordance with the higher commander's intent. 1.4 Determine and manage constraints and risks relevant to the task. 1.5 Assemble appropriate resources for the task and report any shortfalls that limit capability to the chain of command. 1.6 Base planning decisions on a logical process to solve operational problems. 1.7 Conduct battle procedures.
2. Conduct defensive operations	2.1 Prepare and deliver orders. 2.2 Conduct liaison in accordance with operational requirements. 2.3 Coordinate support from outside agencies. 2.4 Provide technical advice to the chain of command or supported agencies. 2.5 Recognise and respond to unexpected situations that require a quick and decisive response. 2.6 Exercise command authority. 2.7 Lead subordinates by example. 2.8 Carry out mission and tasks in accordance with orders. 2.9 Maintain communication with the chain of command as required.
3. Finalise defensive operations	3.1 Conduct debriefs. 3.2 Conduct post activity analysis and make recommendations. 3.3 Recondition, replace or return equipment, stores and ammunition. 3.4 Complete documentation. 3.5 Monitor soldiers' health and wellbeing and take appropriate action.

DEFMIL139 Supervise a section during offensive operations

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCM134 Supervise a section during offensive operations. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.6, 2.2, 2.6 and 2.7 removed • PC 3.5 reworded

Application

This unit describes the skills required to command, lead and manage groups of up to twelve personnel during offensive operations. Offensive operations are characterised by extreme environmental conditions with high levels of risk of serious injury or death from hostile action. Supervision during offensive operations requires supervisors to be incisive in a fluid and demanding environment, to act independently, and to lead by example.

This unit was developed for combat arms personnel involved in the conduct of offensive operations in a deployed operational environment, but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work as part of a team under direct and/or indirect supervision, but also must be prepared to act independently. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

DEFMIL140 Supervise platoon level defensive operations

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCM109B Supervise platoon level defensive operations. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.6, 2.2, 2.6 and 2.7 removed • PC 3.5 reworded

Application

This unit describes the skills required to command, lead and administer groups of between 15 and 35 personnel during the conduct of defensive operations. Defensive operations are characterised by own forces delaying, accepting decisive engagement or withdrawing from action against hostile forces. It is primarily focused on the duties of a platoon second in command who, while mainly employed to administer the group, may be required to supervise group members in a dynamic environment, often acting independently and leading by example.

This unit applies to combat arms personnel involved in the conduct of defensive operations in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would typically work as part of a team under direct and/or indirect supervision, but also must be prepared to act independently. They use discretion and judgement, and take responsibility for the quality of their outputs. They would perform routine tasks in a broad range of unpredictable contexts.

DEFMIL141 Supervise platoon level offensive operations

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCM110B Supervise platoon level offensive operations. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.6, 2.2, 2.6 and 2.7 removed • PC 3.5 reworded

Application

This unit describes the skills required to administer, lead and command groups of between 15 and 35 personnel under extreme conditions in high risk environments. Offensive operations are characterised by rapid shifts of the main effort to take advantage of opportunities and momentum to defeat hostile forces through the capture or destruction of critical objectives. It is primarily focused on the duties of a platoon second in command who, while mainly employed to administer the platoon, may be required to supervise the group in a dynamic environment, often acting independently, and leading by example.

This unit applies to combat arms personnel involved in the conduct of offensive operations in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

- resupplying and redistributing supplies

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- administrative processes
- employment of battlespace operating systems
- employment of weapons and equipment
- Individual Military Appreciation Process
- laws of Armed Conflict
- navigation techniques

© Commonwealth of Australia, 2025 Public Skills Australia

- offensive tactics, techniques and procedures
- orders for Opening Fire
- orders for the Use of Force
- principles of offensive operations
- recognised safety precautions
- risk control processes
- Rules of Engagement
- tactics, techniques and procedures

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFMIL142 Support sub-unit level defensive operations

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to support the conduct of sub-unit (60–130 persons) level defensive operations.

It includes preparing and planning for operations and supporting sub-unit level defensive activities. It also includes coordinating sub-unit administrative activities.

It is primarily focussed on the duties of the sub-unit's warrant officer who, in many cases will act as a member of the sub-unit operational planning and coordination team providing technical advice and direct support to the commander and secondincommand of the sub-unit. Many duties are also administrative in nature.

In the absence of the commander or secondincommand, the person may be required to supervise the sub-unit requiring independent action and leadership by example.

Defensive operations are characterised by own forces delaying, accepting decisive engagement or withdrawing from action against hostile forces and are typically fluid and demanding environments.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare and plan for operations	**1.1** Obtain and clarify orders in accordance with commander's intent
	1.2 Provide assistance in planning defensive operations, in accordance with organisational procedures
	1.3 Make planning decisions based on a logical process to solve operational problems
	1.4 Prepare outline-plans to support sub-unit level defensive operations and present to personnel as required
2 Support sub-unit level defensive activities	**2.1** Prepare and deliver orders in accordance with organisational procedures
	2.2 Coordinate and integrate combat support and combat service support into operational plans
	2.3 Assist in the execution of sub-unit defensive operations
	2.4 Coordinate defensive routine in accordance with operational plan and orders
	2.5 Coordinate patrol activity in accordance with operational plan and orders
	2.6 Coordinate occupation of an echelon in a defensive position in accordance with operational plan and orders
	2.7 Coordinate early warning and security measures in accordance with task requirements and operational procedures
3 Coordinate sub-unit administrative activities	**3.1** Plan and execute sub-unit level battlefield clearance to meet task requirements
	3.2 Coordinate sub-unit re-supply and maintenance in accordance with organisational procedures
	3.3 Supervise sub-unit within an echelon in Defence in accordance with operational plan
	3.4 Coordinate combat service support to sub-unit in

Assessment Requirements for DEFMIL142 Support sub-unit level defensive operations

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant organisational administrative procedures
- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements including:
  - applying relevant safety precautions and procedures
  - applying safety, legislative and statutory requirements relevant to defensive operations
  - controlling risk
  - identifying, interpreting and analysing risk assessment requirements relevant to defensive operations
- communicating effectively
- conducting the individual military appreciation process
- coordinating sub-unit administrative activities
- displaying initiative and leadership
- employing equipment and weapons tactically
- managing resources
- navigating during defensive operations
- preparing and planning for operations
- preparing reports
- supporting relevant sub-unit level defensive activities and leading the group when required
- working as part of a team.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basis for security operations
- communication and liaison requirements
- laws of armed conflict
- logical process including:

© Commonwealth of Australia, 2025 Public Skills Australia

  - defensive tactics, techniques and procedures
  - employment of battlespace operating systems
  - employment of weapons and equipment
  - individual military appreciation process
  - navigation techniques
  - orders for opening fire
  - orders for the use of force
  - principles of defensive operations
  - rules of engagement
- principles of leadership
- relevant defensive operations and military law requirements
- relevant defensive operations re-supply and resource management
- relevant legislation, and organisational policies and procedures
- security tactics, techniques and operational procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment may be holistic where individuals rotate through specified appointments or involve a number of separate assessment activities such as Tactical Exercise Without Troops.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

DEFRNG012 Manage training areas and ranges

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFRM212A Manage training areas and ranges. • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to manage Defence training areas and ranges. Defence training areas and ranges are areas prescribed for the conduct of Defence activities and exercises. Their management is a process requiring a range of functions including the management of the activities being conducted on these training areas and ranges, the security of facilities and personnel, the investigation of incidents and accidents, and the maintenance and upgrading of the facilities.

This unit was developed for Defence personnel who work in range management and range control but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, while performing complex tasks in a moderate range of familiar contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to unit at the time of publication.

© Commonwealth of Australia, 2025 Public Skills Australia

Competency Field

Range

Elements and Performance Criteria

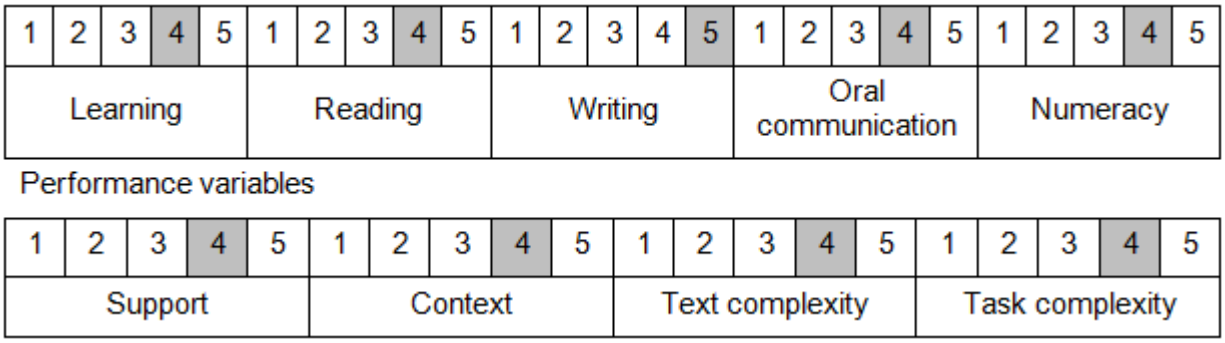
ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Manage training area and range activities	1.1 Identify the responsibilities associated with the management of training area and range activities. 1.2 Identify and implement plans and instructions for the efficient operation of the training area/range. 1.3 Identify resources and report shortfalls. 1.4 Identify stakeholders and forward relevant information to them. 1.5 Control and coordinate training area and range activities to ensure safe and sustainable operations.
2. Manage training area and range security	2.1 Identify security processes, procedures and plans. 2.2 Promulgate, monitor and adjust access, egress and circulate changes. 2.3 Identify and report unauthorised access and security breaches.
3. Facilitate investigations	3.1 Identify and report incidents and accidents. 3.2 Conduct investigations. 3.3 Implement recommendations for changes to policy and procedures resulting from investigations.
4. Monitor and maintain training area and range facilities	4.1 Monitor training area and range facilities. 4.2 Identify and report maintenance requirements. 4.3 Identify and report facility improvements and upgrades.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia

ACSF levels indicative of performance:



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFRM212A Manage training areas and ranges.

Assessment Requirements for DEFRNG012 Manage training areas and ranges

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- accessing interpreting and applying Range Standing Orders and other instructions and policy
- liaising and negotiating
- developing, implementing and modifying plans
- directing and controlling all aspects of range management
- exercising Defence regulations relevant to Defence practice areas
- exercising tact and judgement in a command and control environment
- interpreting and applying technical information
- reading and understanding technical specifications, maps, diagrams, traces
- representing mathematical ideas in appropriate format
- solving problems and making decisions
- managing training area and range security
- monitoring and maintaining training areas and ranges

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- communications equipment and systems
- composition of teams and roles and responsibilities of team members

© Commonwealth of Australia, 2025 Public Skills Australia

- Defence practice areas (DPA) – areas of land, sea or air declared for the purpose of conducting Defence operations or practices under Defence Force Regulations (DFR) Part XI, by the Minister for Defence and notified in the Commonwealth of Australia Gazette
- local alert and warning systems
- locally available resources, their capabilities and access to them
- nature of local hazards and plans, including effects on the provision of communications
- principles of risk assessment and risk management
- range danger area traces
- Range Standing Orders, instructions, clearance certificates and standard operating procedures (SOP) relevant policies, publications, legislation and regulations
- team work principles and strategies
- weapons/systems characteristics

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFRNG016 Coordinate training area and range activities

Modification History

Release 1. This unit was released in DEF Defence Training Package release 3.0

Application

This unit involves the skills and knowledge required to coordinate training area and range activities.

It includes the skills required to analyse proposed training area/range activities, including the management of a booking system, reading and interpreting traces and templates and promulgating activities.

This unit applies to Defence personnel who work in range management and range control but may be relevant to others who work in this field. Those undertaking this unit would work independently, or as part of a team, under indirect supervision, while performing routine tasks, in a variety of different contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Coordinate training area/range visits	**1.1** Coordinate visits to training area/range activities in accordance with Range Standing Orders and activity schedules

© Commonwealth of Australia, 2025 Public Skills Australia

		1.2	Clarify the agreed purpose and outcomes of a training area/range visit and in accordance with Range Standing Orders
		1.3	Coordinate clearances and access to training area/range using technical specifications, maps and diagrams
2	**Monitor training area/range visit**	**2.1**	Monitor training area/range visit in accordance with Range Standing Orders and relevant instructions
		2.2	Ensure visit complies with relevant policies and instructions
3	**Manage training area/range visit**	**3.1**	Resolve training area/range visit and activity coordination issues through direct contact and discussions
		3.2	Manage access and exit to training area/range for visit
4	**Coordinate reporting on training area/range activities**	**4.1**	Monitor submission of post-exercise/visit reports in accordance with Range Standing Orders and relevant instructions
		4.2	Action non-compliance reports to relevant authorities in accordance with Range Standing Orders and relevant contracts

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit supersedes and is not equivalent to DEFRNG004 Monitor and control training area and range activities.

Assessment Requirements for DEFRNG018 Monitor and control training area and range visits

Modification History

Release 1. These Assessment Requirements were released in DEF Defence Training Package release 3.0

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- accessing, interpreting and applying range and other instructions and policy
- accessing, interpreting and applying Range Standing Orders
- actioning non-compliance reports
- following instructions/directives and reporting information
- accessing technical specifications, maps and diagrams
- evaluating compliance of training area/range visits
- coordinating controlling training area/range visits

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- environmental instructions and policy
- post-activity reports
- training area and range exercise instructions
- range clearance certificates
- range instructions
- range practice manuals
- Range Standing Orders
- standing operating instructions

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

DEFSIM010 Apply knowledge of simulator systems and architecture

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Application

This unit describes the knowledge and skills required to apply knowledge of Simulator Systems and their Architecture.

It includes demonstrating and applying knowledge of simulation history, the benefits of simulator systems in training and operations, the building blocks of a simulator and the types of simulator systems. It also includes applying knowledge of simulator systems connectivity standards and their security.

In the context of this unit, simulator systems are used to replicate land, air, sea and undersea systems to facilitate training and operations. Simulator systems may include desktop trainers, procedural trainers, virtual reality trainers and complex simulators.

This unit applies to those working in the simulator management field and was developed for people who manage maintenance, maintenance teams, procurement and simulation projects.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those relating to simulation standards and International Organisation for Standardisation (ISO) standards.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing tasks, including maintenance management, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Simulator Operations

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Demonstrate an understanding of simulation history and its evolution	**1.1** Outline simulator systems origins and early devices
	1.2 Explain evolution of simulator systems
	1.3 Explain and identify impacts of conflict on simulator systems training requirements
	1.4 Explain impacts of computer technology on simulator systems and the construct of devices
2 Apply knowledge of the benefits of simulator systems in training and operations	**2.1** Determine requirements for the simulator system
	2.2 Apply advantages and benefits of the simulator systems to training and operations
	2.3 Apply limitations of the simulator systems to training and operations
3 Apply knowledge of the simulator system building blocks and key components	**3.1** Explain simulator system modelling principles
	3.2 Identify simulator system's key components and explain their purpose
	3.3 Determine requirements for hosted software
4 Apply knowledge of simulator types	**4.1** Explain simulator system types
	4.2 Determine most appropriated simulator system type

© Commonwealth of Australia, 2025 Public Skills Australia

5 Demonstrate an understanding of simulation connectivity standards and their security requirements	**5.1** Explain simulator systems connectivity types and standards
	5.2 Determine limitations of simulator systems connectivity
	5.3 Identify and outline simulator system security requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the DEF Defence Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This is a new unit. No equivalent unit.

Assessment Requirements for DEFSIM010 Apply knowledge of simulator systems and architecture

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- undertaking research and analysis related to simulator systems
- demonstrating a knowledge of the history and origins of simulation systems
- applying knowledge of simulation systems training and operations benefits
- applying knowledge of the simulator systems key components
- applying knowledge of the different types of simulator systems
- demonstrating a knowledge of simulator systems connectivity standards
- demonstrating a knowledge of simulator systems connectivity security requirements
- identifying, reviewing and analysing information and standards related to simulator systems.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- capabilities and limitations of the relevant simulator system
- standards, legislative and regulatory requirements related to the simulator systems
- organisational policy and procedures related to the relevant simulator systems
- simulator connectivity standards
- relevant International Organisation for Standardisation (ISO) standards
- relevant Simulation Interoperability Standards Organisation (SISO) standards.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

© Commonwealth of Australia, 2025 Public Skills Australia

requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations or simulated workplace operational situations that reflect workplace conditions.

Retail or commercial systems whose primary purpose is entertainment do not meet the requirements.

Individual domestic use systems whose primary purpose is entertainment do not meet the requirements.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

DEFSIM011 Fault find and repair simulator control systems

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0. Motion systems component removed and developed in a new unit.

Application

This unit describes the knowledge and skills required to conduct fault finding and repairs to simulator control systems. This includes analysing fault reports, identifying and rectifying faults, conducting functional tests and the documentation and certification processes. In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development.

Simulator control systems must be custom designed to replicate the device being simulated.

Consumer grade computer hardware peripherals such as Joysticks and Steering wheels do not meet the requirements.

Simulator control systems are pneumatic, electrical or hydraulic and includes:

- Primary and secondary aircraft control systems
- Throttle control systems
- Steering control systems
- Thruster/propulsion control systems (ships)
- Active and passive controls

This unit applies to those working in fault finding and repairing simulator control systems and was developed for technicians who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing tasks, including problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA	
Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Receive and analyse fault report**	**1.1**	Receive and analyse simulator control system fault report
		1.2	Identify and select appropriate fault finding method(s) that will apply across the range of simulator control systems
		1.3	Prepare the simulator control system for fault finding
2	**Identify and find fault**	**2.1**	Apply fault finding method(s)
		2.2	Identify and analyse fault indicators
		2.3	Identify the simulator control system fault
		2.4	Confirm that the fault is the one initially reported
3	**Repair fault**	**3.1**	Identify and confirm cause of fault
		3.2	Identify and confirm repair method
		3.3	Complete simulator control system repair
		3.4	Conduct post repair safety check
		3.5	Restart simulator control loading system
4	**Conduct functional test**	**4.1**	Test simulator control systems to ensure operational integrity
		4.2	Confirm operational parameters
5	**Finalise repair process**	**5.1**	Finalise simulator control system repair reports

© Commonwealth of Australia, 2025 Public Skills Australia

including a detailed synopsis of the fault and the repair process and any certification requirements

5.2 Report the operational status of the simulator control system

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is not equivalent to DEFSIM004 Fault find and repair simulator control systems.

Assessment Requirements for DEFSIM011 Fault find and repair simulator control systems

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0. Motion systems component removed and developed in a new unit.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- undertaking research and analysis related to simulator control systems
- following logical, fault finding techniques
- using tools measuring instruments and diagnostics
- applying simulator control and systems repair methodologies
- following configuration management processes
- using appropriate information technology and software including proprietary control system calibration software and general online diagnostic tool software
- identifying, reviewing and analysing information that may impact on the simulator control system fault finding
- conducting simulator control system functional testing
- negotiating and communicating effectively with key stakeholders.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational capabilities and limitations of the relevant simulator
- operational capabilities and limitations of the relevant simulator control system
- simulator operating modules comprising the simulator system being worked on
- fault indicators related to the simulator control systems being worked on
- repair methodologies related to the simulator control and systems being worked on
- legislative and regulatory requirements related to the simulator control systems being worked on
- organisational policy and procedures related to the relevant simulator control systems
- configuration management related to the simulator control and systems being worked on
- product knowledge related to systems and/or equipment in service.

DEFSIM012 Fault find and repair simulator motion systems

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Application

This unit describes the knowledge and skills required to conduct fault finding and repairs to the simulator motion systems. This includes analysing fault reports, identifying and rectifying faults, conducting functional tests and the documentation and certification processes. In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development. Simulator motion systems are mechanical/electric and/or mechanical/hydraulic.

This unit applies to those working in fault finding and repairing simulator motion systems and was developed for technicians who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing tasks, including problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFSIM012 Fault find and repair simulator motion systems

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- undertaking research and analysis related to simulator motion systems
- following logical fault finding techniques
- using tools, measuring instruments and diagnostics
- applying simulator motion systems repair methodologies
- following configuration management processes
- using appropriate information technology and software including proprietary motion system calibration software and general online diagnostic tool software
- identifying, reviewing and analysing information that may impact on the simulator motion systems fault finding
- conducting simulator motion systems functional testing
- negotiating and communicating effectively with key stakeholders.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational capabilities and limitations of the relevant simulator
- operational capabilities and limitations of the relevant simulator motion systems
- simulator operating modules comprising the simulator system being worked on
- fault indicators related to the simulator motion systems being worked on
- repair methodologies related to the simulator motion systems being worked on
- legislative and regulatory requirements related to the simulator motion systems being worked on
- organisational policy and procedures related to the relevant simulator motion systems
- configuration management related to the simulator motion systems being worked on
- product knowledge related to systems and/or equipment in service.

DEFSIM013 Manage simulator accreditation or in service testing

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Application

This unit describes the knowledge and skills required to manage Simulator Accreditation or In-Service Testing.

It includes the determination of accreditation or in-service test requirements. It also includes the management of accreditation/test schedules, human resources as well as quality and legislative requirements.

In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and operations.

Simulators may include desktop trainers, procedural trainers, virtual reality trainers and complex simulators. Accreditation or in-service testing may include formal accreditation/certification against a standard, initial acceptance testing and upgrade testing.

This unit applies to those working in the simulator management field and was developed for people who manage maintenance, maintenance teams, simulator procurement and simulation projects.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those relating to simulation standards and International Organisation for Standardisation (ISO) standards.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing tasks, including maintenance management, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Access and interpret accreditation standards or testing requirements	**1.1** Identify and obtain relevant accreditation standards or test requirements
	1.2 Review to determine relevant accreditation standard or test requirements obtained for relevance and application to the simulator and organisation
	1.3 Document outcomes of the analysis, and determine recommendations, relevant accreditation standard or test requirements
2 Define test plan that ensures accreditation standards and or test requirements are achieved	**2.1** Document test requirements into test plan
	2.2 Consider time requirements, schedule and operating requirements and factor into test plan
	2.3 Determine human resources required for testing and record into test plan
	2.4 Determined simulator access, support, test equipment and facility requirements and record into test plan
	2.5 Confirm the test plan with team, appropriate agency, accreditor or stakeholder if applicable
3 Manage accreditation/in service testing	**3.1** Manage testing to ensure desired outcomes
	3.2 Update the test plan and schedule to deal with changing development conditions
	3.3 Report any unexpected test outcomes with organisation
	3.4 Ensure test reruns are conducted to address failed tests

© Commonwealth of Australia, 2025 Public Skills Australia

4 Finalise testing	**4.1** Collate test results and ensure all testing requirements have been satisfied against organisational requirements
	4.2 Ensure all test results have been analysed against the required standards/requirements
	4.3 Conduct quality and compliance checks on all test results against organisational requirements
	4.4 Report any non-compliant tests to the appropriate agency or accreditor
	4.5 Produce test results to the appropriate agency, accreditor or stakeholder

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the DEF Defence Training Package Companion Volume Implementation Guide.

Assessment Requirements for DEFSIM013 Manage simulator accreditation or in service testing

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- managing the accreditation or in-service testing process
- defining test and quality requirements and an associated test plan
- finalising accreditation or in-service testing
- undertaking research and analysis related to simulator accreditation or in-service testing
- following configuration management processes
- identifying, reviewing and analysing information that may impact simulator accreditation or in-service testing
- negotiating and communicating effectively with key stakeholders.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- capabilities and limitations of the relevant simulator
- standards, legislative and regulatory requirements related to the simulator accreditation or in-service testing
- organisational policy and procedures related to the relevant simulator accreditation or in-service testing
- product knowledge related to systems and equipment in service.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

DEFSIM014 Work effectively with simulator systems

Modification History

Release 1. This is the first release of this unit in the DEF Defence Training Package Release 4.0.

Application

This unit involves the skills and knowledge required to work effectively in the simulator maintenance industry, in compliance with relevant regulatory requirements and national operating standards.

It includes determining appropriate work roles, contributing to the planning of activities, working with others and following Health, Safety and the Environment (HSE) procedures.

This unit addresses simulation non-technical skill requirements (mental, social and personal-management abilities) related to teamwork duties of simulation personnel and contributes to safe and effective performance in complex simulation operational environments.

In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development.

This unit was developed in a Defence environment but may be relevant to others who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing complex tasks, including complex problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Determine appropriate work roles within a simulator maintenance workplace	**1.1** Consider work instructions, performance requirements, workplace procedures and Health, Safety and the Environment (HSE) requirements when identifying work roles for each team member
	1.2 Make contributions to the team to assist in determining appropriate work roles and responsibilities required to successfully and safely complete work activities
2 Contribute to planning the successful and efficient outcome of a work activity	**2.1** Contribute suggestions and information to assist the planning of work activities and to minimise delays to stakeholders
	2.2 Make suggestions for improvements to processes and discuss with other team members
	2.3 Identify factors affecting the efficient completion of a work task
3 Work with others in the simulation maintenance industry	**3.1** Use correct simulator terminology relevant to the simulator type and the context of work being undertaken to communicate with stakeholders
	3.2 Provide assistance to team members within scope of own job role, to complete assigned tasks
	3.3 Complete work tasks in accordance with relevant simulator workplace procedures, industry rules and regulations
	3.4 Operate workplace equipment and technology and in accordance with manufacturer instructions, workplace policies and procedures, and HSE regulations
	3.5 Contribute to improving work roles within scope of own job role, with the team and supervisors to improve work practices and procedures
4 Follow HSE procedures within the simulator	**4.1** Follow simulator workplace emergency procedures and executed when emergencies occur

© Commonwealth of Australia, 2025 Public Skills Australia

workplace

4.2 Identify and report potential causes of incidents and safety issues

4.3 Take actions to remove hazards, minimise the risks to all simulator personnel, and the risk of property damage

4.4 Use personal protective equipment correctly in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit supersedes and is not equivalent to DEFSIM008 Work effectively with simulator systems.

Links

Assessment Requirements for DEFSIM014 Work effectively with simulator systems

Modification History

Release 1. This is the first release of this unit in the DEF Defence Training Package Release 4.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- applying simulator systems knowledge relevant to work being performed
- contributing suggestions and information to assist planning a work activity
- contributing to a group discussion to identify work roles and responsibilities
- identifying, reviewing and analysing information relevant to simulator systems
- identifying safety hazards in the simulation workplace and taking action to minimise risks to all team members by following Health, Safety and the Environment (HSE) procedures
- implementing HSE procedures
- interpreting organisation role relevant to simulator systems
- negotiating and communicating effectively with key stakeholders
- selecting and using required personal protective equipment (PPE) conforming to industry and HSE standards
- using workplace technology and equipment to achieve work tasks
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable simulator terminology
- appropriate PPE.
- capabilities and limitations of the relevant simulator
- HSE requirements and responsibilities in the simulator workplace
- legislative and regulatory requirements related to the relevant simulator systems
- organisational policy and procedures related to the relevant simulator
- roles and responsibilities of team members
- techniques to identify potential safety risks in the simulator maintenance workplace.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Retail or commercial systems whose primary purpose is entertainment do not meet the requirements.

Individual domestic use systems whose primary purpose is entertainment do not meet the requirements.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

DEFSIM015 Fault find and repair simulator power distribution and control systems

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Application

This unit describes the skills required to conduct fault finding and repairs to the simulator power distribution and control systems. This includes analysing fault reports, identifying and rectifying faults, conducting functional tests and the documentation and certification processes. In the context of this unit, simulator systems are used to replicate land, air, sea and undersea systems to facilitate training and development.

Power distribution systems may but is not limited to include power distribution software interfaces, programmable logic controllers, uninterruptible power supplies and control systems, power distribution cabinets/units, circuit breakers, emergency power/communication systems, emergency stop circuits and fire protection systems.

Simulator control systems include DC low voltage supplies, DC high voltage supplies, AC low voltage supplies (less than 600VAC), uninterrupted power supplies and control systems, power distribution cabinets/units, hydraulic systems and electric systems.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing complex tasks, including complex problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA	
Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Receive and analyse fault report**	**1.1**	Receive and analyse simulator power distribution and control system fault report
		1.2	Identify and select appropriate fault finding method(s) that will apply across the range of power distribution and control systems
		1.3	Prepare the simulator systems power distribution and control system for fault finding, including the isolation of all energy sources
2	**Identify and find fault**	**2.1**	Apply fault finding method(s)
		2.2	Identify and analyse fault indicators
		2.3	Identify the power distribution and control system fault
		2.4	Confirm that the fault is the one initially reported
3	**Repair fault**	**3.1**	Identify and confirm cause of fault
		3.2	Identify and confirm repair method(s)
		3.3	Complete power distribution and control systems repair
		3.4	Conduct post repair safety check
		3.5	Restart simulator systems power distribution and control system
4	**Conduct functional test**	**4.1**	Test simulator systems power distribution and control systems to ensure operational integrity
		4.2	Confirm operational parameters
5	**Finalise repair process**	**5.1**	Finalise simulator systems power distribution and/or control system repair reports including a detailed synopsis of the fault and the repair process and any

certification requirements

5.2 Report the operational status of the simulator systems power distribution and control system

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to DEFSIM001 Fault find and repair simulator power distribution and control systems

Assessment Requirements for DEFSIM015 Fault find and repair simulator power distribution and control systems

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- undertaking research and analysis related to simulator power distribution and control systems
- following logical fault finding techniques
- using measuring instruments such as megaohmeters, multimeters, cathode ray oscilloscopes (CRO), 240-415v portable appliance testers, 240-415v phase angle meters and 240-415v clamp meters
- applying simulator power distribution and control systems repair methodologies
- following configuration management processes
- using appropriate information technology and software including general online diagnostic tools and proprietary simulator management databases
- identifying, reviewing and analysing information that may impact on the simulator power distribution and control systems fault finding
- conducting simulator power distribution and control systems functional testing
- negotiating and communicating with key stakeholders.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational capabilities and limitations of the relevant simulator
- operational capabilities and limitations of the relevant simulator power distribution and control systems
- simulator operating modules comprising the simulator system being worked on
- fault indicators related to the simulator power distribution and control systems being worked on
- repair methodologies related to the simulator power distribution and control systems being worked on
- legislative and regulatory requirements related to the simulator being worked on
- organisational policy and procedures related to the relevant simulator power distribution and control systems

© Commonwealth of Australia, 2025 Public Skills Australia

- configuration management related to the simulator power distribution and control systems being worked on
- product knowledge related to systems and/or equipment in service.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Retail or commercial systems whose primary purpose is entertainment do not meet the requirements.

Individual domestic use systems whose primary purpose is entertainment do not meet the requirements.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

DEFSIM016 Fault find and repair simulator computer systems and peripheral hardware

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Application

This unit describes the knowledge and skills required to conduct fault finding and repairs to simulator computer systems and peripheral hardware. This includes analysing fault reports, identifying and rectifying faults, conducting functional tests and the documentation and certification processes. In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development.

Computer systems may include Generic Simulator Computer Systems (x86 and x64), host computers, input/output systems, visual computers and instructor operating systems of simulators.

Peripheral hardware may include instruments, visual display unit equipment, printers, hard drives and data storage devices, switches and routers.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing complex tasks, including complex problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFSIM016 Fault find and repair simulator computer systems and peripheral hardware

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- undertaking research and analysis related to simulator computer systems and peripheral hardware
- following logical, fault finding techniques
- applying simulator computer systems and/or peripheral hardware repair methodologies
- following configuration management processes
- using appropriate information technology and software including at least one of:
  - general online diagnostic tools
  - proprietary simulator management databases
  - customer diagnostics software
  - burn in test software
  - image management software
  - file comparison software
- identifying, reviewing and analysing information that may impact on the simulator computer systems and peripheral hardware fault finding
- conducting simulator computer systems and peripheral hardware functional testing
- negotiating and communicating with key stakeholders.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational capabilities and limitations of the relevant simulator
- operational capabilities and limitations of the relevant simulator computer systems and peripheral hardware
- simulator operating modules comprising the simulator system being worked on
- fault indicators related to the simulator computer systems and peripheral hardware being worked on
- repair methodologies related to the simulator computer systems and peripheral hardware being worked on

© Commonwealth of Australia, 2025 Public Skills Australia

- legislative and regulatory requirements related to the simulator being worked on
- organisational policy and procedures related to the relevant simulator computer systems and peripheral hardware
- configuration management related to the simulator computer systems and peripheral hardware being worked on
- product knowledge related to systems and/or equipment in service.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Retail or commercial systems whose primary purpose is entertainment do not meet the requirements.

Individual domestic use systems whose primary purpose is entertainment do not meet the requirements.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

DEFSIM017 Fault find and repair simulator image generator and visual display systems

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Application

This unit describes the knowledge and skills required to conduct fault finding and repairs to the simulator image generator and visual display systems. This includes analysing fault reports, identifying and rectifying faults, conducting functional tests and the documentation and certification processes. In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development.

Both software and hardware components may be involved. Image generator hardware components may include commercial off-the-shelf systems, proprietary designed systems and high-end rack mount personal computers with engineering graphic cards installed.

Image generator software components include proprietary software to process visual databases stored on the information gateway, under direction of simulators' host computing system, to produce drive signals for the visual display, and/or commercial software.

Maintenance tasks include fault finding hardware to line replacement at unit level, image and backup of software installation, configuration and updating.

Visual display systems may include liquid crystal display, digital light processing, liquid crystal on silicon, light emitting diode, organic light emitting diode, cathode ray tube and/or laser.

Mechanisms may include projection (direct and/or rear, including optics and display surfaces), and/or direct display (television, monitor).

Maintenance tasks may include setup, fault finding, alignment of projectors, optics alignment and colour matching and balance.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing complex tasks, including complex problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFSIM017 Fault find and repair simulator image generator and visual display systems

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- undertaking research and analysis related to simulator image generator
- undertaking research and analysis related to visual display systems
- following logical, complex fault finding techniques
- using measuring instruments including light meters, chroma meters and theodolites
- applying simulator image generator systems repair methodologies
- applying simulator image visual display systems repair methodologies
- following configuration management processes using appropriate information technology and software including proprietary projector software and proprietary image generation software
- identifying, reviewing and analysing information that may impact on the simulator image generator and visual display systems fault finding
- conducting simulator image generator functional testing
- conducting simulator image generator and visual display systems functional testing
- negotiating and communicating effectively with key stakeholders.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational capabilities and limitations of the relevant simulator
- operational capabilities and limitations of the relevant simulator image generator and visual display system
- simulator operating modules comprising the simulator system being worked on
- fault indicators related to the simulator image generator and visual display systems being worked on
- repair methodologies related to the simulator image generator and visual display systems being worked on
- legislative and regulatory requirements related to the simulator being worked on
- organisational policy and procedures related to the relevant simulator image generator and visual display systems

© Commonwealth of Australia, 2025 Public Skills Australia

- configuration management related to the simulator image generator and visual display systems being worked on
- product knowledge related to systems and/or equipment in service.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

DEFSIM018 Fault find and repair simulator sound systems

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Application

This unit describes the knowledge and skills required to conduct fault finding and repairs to the simulator sound systems. This may include analysing fault reports, identifying and rectifying faults, conducting functional tests and the documentation and certification processes. In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development.

Simulator sound systems include communication systems, amplifiers, samplers, speakers, microphones and headsets, equalisers, mixers, tone generators, audio switching and control systems and audio computers.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing complex tasks, including complex problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFSIM018 Fault find and repair simulator sound systems

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- undertaking research and analysis related to simulator sound systems
- following logical, fault finding techniques
- using tools, measuring instruments and diagnostics
- applying simulator sound systems repair methodologies
- following configuration management processes
- using appropriate information technology and software including at least one of:
  - proprietary sound analysis software
  - proprietary simulator management databases
  - proprietary simulator performance test systems
- identifying, reviewing and analysing information that may impact on the simulator sound systems fault finding
- conducting simulator sound systems functional testing
- negotiating and communicating effectively with key stakeholders.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational capabilities and limitations of the relevant simulator
- operational capabilities and limitations of the relevant simulator sound systems
- simulator operating modules comprising the simulator system being worked on
- fault indicators related to the simulator sound systems being worked on
- repair methodologies related to the simulator sound systems being worked on
- legislative and regulatory requirements related to the simulator being worked on
- organisational policy and procedures related to the relevant simulator sound systems
- configuration management related to the simulator sound systems being worked on
- product knowledge related to systems and/or equipment in service.

DEFSIM019 Fault find and repair simulator weapons systems

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Application

This unit describes the knowledge and skills required to conduct fault finding and repairs to the simulator weapons systems which may include fire control, aiming and sighting systems. The unit includes analysing fault reports, identifying and rectifying faults, conducting functional tests and the documentation and certification processes. In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development.

Simulator weapons systems which may include simulated cannons/guns, non-guided weapons and guided weapons.

Simulator fire control systems which may include simulator fire control safety interlock systems, simulator armament control systems and simulator armament control buses.

Simulator aiming and sighting systems which may include simulator helmet mounted displays, simulator head-up displays, simulator head-in displays, simulator TV sighting systems, simulator on-screen displays and simulator infrared/thermal sighting systems.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing complex tasks, including complex problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- undertaking research and analysis related to simulator weapons systems
- following logical, complex fault finding techniques
- using tools, measuring instruments and diagnostics
- applying simulator weapons systems repair methodologies
- following configuration management processes
- using appropriate information technology and software including at least one of:
  - customer diagnostics software
  - electronics configuration software
  - electronics instrument check diagnostics software
  - proprietary helmet mounted sight diagnostic software
  - Vector CANalyzer CAN bus diagnostic software
- identifying, reviewing and analysing information that may impact on the simulator weapons systems fault finding
- conducting simulator weapons systems functional testing
- negotiating and communicating effectively with key stakeholders.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational capabilities and limitations of the relevant simulator
- operational capabilities and limitations of the relevant simulator weapons systems, fire control, aiming and sighting systems
- simulator operating modules comprising the simulator system being worked on
- fault indicators related to the simulator weapons systems being worked on
- repair methodologies related to the simulator weapons systems being worked on
- legislative and regulatory requirements related to the simulator being worked on
- organisational policy and procedures related to the relevant simulator weapons systems, fire

© Commonwealth of Australia, 2025 Public Skills Australia

control, aiming and sighting systems
- configuration management related to the simulator weapons systems being worked on
- product knowledge related to systems and/or equipment in service.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Retail or commercial systems whose primary purpose is entertainment do not meet the requirements.

Individual domestic use systems whose primary purpose is entertainment do not meet the requirements.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

DEFSIM020 Conduct simulator performance evaluation

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Application

This unit describes the knowledge and skills required to evaluate the operational performance of components and/or elements of a simulator. This includes identifying the performance evaluation requirement, conducting the operational performance evaluation, analysing the results, and the documentation and certification processes. In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development.

The simulator components include the complete simulator, power and control systems, computers and peripheral hardware, image generator and visual display systems, motion and control systems, sound systems and weapons systems.

The simulator elements include subjective tests and credit sequences which affect the operational performance of the simulator.

The outcomes of the performance evaluation include immediate fault finding and repair, scheduling the simulator for routine maintenance or calibration of simulator systems.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing complex tasks, including complex problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA	
Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Identify evaluation requirement**	**1.1**	Identify the type of simulator evaluation to be undertaken
		1.2	Identify the components and/or elements to be evaluated
		1.3	Identify evaluation parameters to be met
2	**Undertake performance evaluation**	**2.1**	Prepare simulator for performance evaluation
		2.2	Conduct performance evaluation
		2.3	Collect and collate evaluation data
3	**Analyse performance results**	**3.1**	Conduct analysis of performance data
		3.2	Identify performance abnormalities
		3.3	Identify cause of performance variations
		3.4	Determine remedial action if necessary
4	**Finalise performance evaluation process**	**4.1**	Report abnormalities as required
		4.2	Complete documentation for future application according to organisational standards

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to DEFSIM007 Conduct simulator performance evaluation

DEFSIM021 Operate the simulator for testing purposes

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Application

This unit describes the skills required to operate the simulator for testing purposes following maintenance. The unit includes identifying the testing requirement, conducting the test and analysing the results, and the documentation and certification processes. In the context of this unit, simulators are used to replicate land, air, sea and undersea systems to facilitate training and development.

Testing includes particular component tests or complete simulator operational tests. The simulator components include the complete simulator or, power control and distribution systems, computers and peripheral hardware, image generator and visual display systems, motion and control systems, sound systems and weapons systems.

The outcomes of the test include immediate fault finding and repair or scheduling the simulator for routine maintenance.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, or as part of a team, with minimal supervision, while performing tasks, including problem solving, in a limited range of contexts. They would use discretion and judgement and take responsibility for the quality of their outputs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFSIM021 Operate the simulator for testing purposes

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package Release 4.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- undertaking research and analysis related to simulator operating procedures
- following logical analysis techniques
- using appropriate information technology and software
- identifying, reviewing and analysing information that may impact on the simulator operational testing
- identifying simulator test abnormalities
- determining simulator testing remedial action
- negotiating and communicating effectively with key stakeholders.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational capabilities and limitations of the relevant simulator
- simulator operating modules comprising the simulator system being worked on
- simulator operating procedures
- specified simulator tests
- complex analysis techniques
- legislative and regulatory requirements related to the simulator being evaluated
- organisational policy and procedures related to the relevant simulator
- product knowledge related to systems and/or equipment in service.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the

DEFTRP001 Operate a vehicle in an environment of threat

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFTP001B Operate a vehicle in an environment of threat. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Element 1 reworded

Application

This unit describes the skills required to operate a vehicle in a work environment where there are a range of threats to the security of the vehicle and driver. These threats may include actions by an adversarial or enemy force targeted at destroying the vehicle and driver. The focus of the threat may be towards disablement of the driver, vehicle and/or load and may be carried out using a range of weapons from the ground and/or the air.

This unit was developed for military drivers in a threat environment but is applicable to any individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Transport

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Camouflage and conceal a vehicle	1.1 Obtain specialist equipment appropriate to the task and check for serviceability. 1.2 Prepare vehicle for tactical employment and operational driving in a threat environment. 1.3 Camouflage vehicle from observation, surveillance and detection. 1.4 Conceal vehicle and its signature from observation, surveillance and detection using natural and artificial resources.
2. Apply tactical deployment drills and contingency actions when driving in a threat environment	2.1 Drive vehicle singularly and in convoy in a threat environment. 2.2 Deploy vehicle tactically during halts. 2.3 Employ vehicle contingency actions when threatened.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	**3**	4	5	1	2	3	4	5
Learning NA					Reading NA					Writing NA					Oral communication					Numeracy NA				

Performance variables:

1	2	**3**	4	5	1	2	3	4	**5**	1	2	**3**	4	5	1	2	**3**	4	5
Support					Context					Text complexity					Task complexity				

© Commonwealth of Australia, 2025 Public Skills Australia

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFTP001B Operate a vehicle in an environment of threat.

Assessment Requirements for DEFTRP001 Operate a vehicle in an environment of threat

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- preparing a vehicle for operational driving
- driving a vehicle under operational conditions
- following instructions/directives and verbally reporting information
- selecting halt and hide positions that make best use of the natural terrain and vegetation, and provide maximum concealment
- occupying halt and hide positions, optimising the position of the vehicle and the timely application and erection of camouflage
- applying procedures for camouflaging a vehicle, including use of natural vegetation and artificial aids including camouflage nets and support sets that allow emergency redeployment of the vehicle without entanglement
- reducing vulnerability through preparation of the vehicle, the use of camouflage and concealment, and the application of contingency actions that minimise risk
- carrying out contingency actions to prevent or minimise damage to the person, the vehicle and the load, both when travelling alone and in convoy with other vehicles when in a threat environment
- applying counter surveillance doctrine and procedures and the employment of operational driving techniques, in driving both a light and medium vehicle, carrying both general cargo and personnel, in a simulated operational environment

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- tactical deployment procedures including convoy driving procedures and actions at a halt and occupation of a hide or administrative position
- threats to vehicle security, observation and detection
- contingency actions

Assessment Conditions

Competency should be assessed carrying both general cargo and personnel. While assessment will normally be conducted as a team activity involving a number of vehicles and drivers, evidence of individual performance should be gathered on operational driving, the tactical deployment of vehicles, the use of camouflage to prevent observation and detection, and the employment of contingency actions including counter-ambush and counter-air attack. Most assessment tasks require the cooperation and assistance of other team members, therefore the ability to work as part of a team should be included in the overall assessment.

Assessment should be sequential from the actions of the individual on the receipt of instructions for movement through to the employment of contingency actions. Given that most of this unit of competency is based on the application of drills and procedures the assessment will be conducted primarily through the observation of practical skills. Errors detected in performance can be used to prompt a more detailed examination of a particular knowledge or skill and verbal and/or a written questioning of underpinning knowledge may complement practical assessments.

Competency should be demonstrated as part of a broader assessment activity involving the tactical deployment of drivers and vehicles over an extended period. Performance will need to demonstrate reacting to a range of threats and carrying out contingency actions on a number of occasions.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFTRP002 Operate a vehicle at night

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFTP002B Operate a vehicle at night. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to drive, navigate and direct a vehicle at night under field conditions using white, reduced and blackout lighting where the threat(s) by an adversary or enemy may prohibit the full use of normal vehicle headlights, tail lights and interior lighting. In these circumstances, to assist in the control, operation and navigation of the vehicle, the driver may use guides and other aids, including specialist ‘blackout’ lighting equipment fitted to vehicles.

This unit was developed for military drivers in a threat environment, but is applicable to any individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Transport

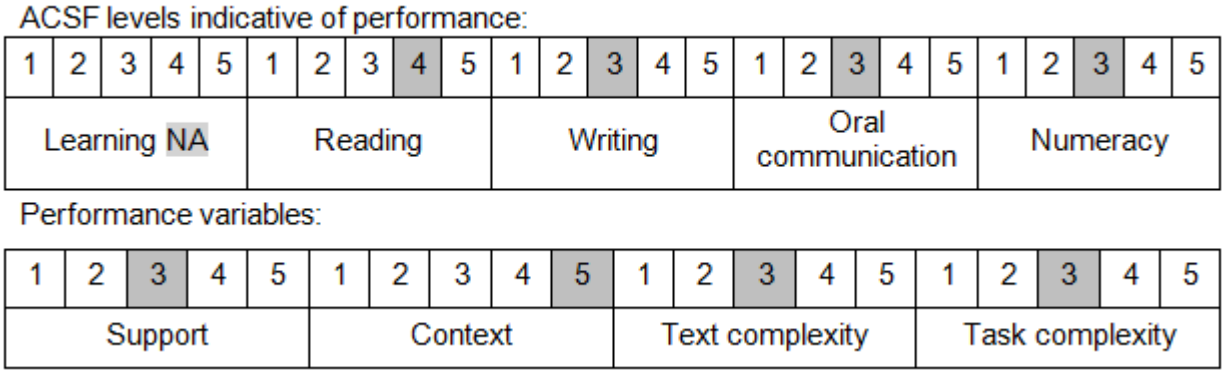
Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare a vehicle for driving at night	1.1 Conduct serviceability check of vehicle and any external aids to night driving. 1.2 Rectify and report any faults. 1.3 Configure vehicle for night driving.
2. Drive a vehicle at night	2.1 Drive vehicle at night using various types of lighting and external aids in different types of terrain, road and light conditions. 2.2 Respond to directions from a co-driver and a guide, both with and without the assistance of external aids. 2.3 Navigate vehicle at night using navigational equipment.
3. Direct a vehicle at night	3.1 Identify, obtain and check appropriate external aids for serviceability. 3.2 Rectify or report any vehicle faults. 3.3 Direct vehicle using external aids. 3.4 Retrieve and check aids and return external to storage area.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFTP002B Operate a vehicle at night.

Assessment Requirements for DEFTRP002 Operate a vehicle at night

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- scanning terrain
- judging terrain, distance and speed at night
- driving a vehicle at night under normal lighting conditions
- manoeuvring a vehicle in confined spaces
- navigating a vehicle
- responding to directions when driving
- reading maps and using navigational aids
- driving and navigating a vehicle at night using white, reduced and blackout lighting
- acting as guide while using external aids
- preparing a vehicle for night driving then driving the vehicle under field conditions in a range of environments including cross country, and on tracks and formed roads utilising the three types of lighting under a range of lighting and driving conditions

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- WHS requirements for driving at night
- characteristics of night vision
- vehicle navigation
- vehicle signalling and directing techniques

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Competency should be demonstrated as part of a broader assessment activity involving the tactical deployment of drivers and vehicles over an extended period.

Competency should be assessed progressively with the levels of complexity of driving with reduced lighting increasing i.e. the sequence should be white, reduced, then blackout. Activities should commence with the receipt of instructions for a night move. The individual should be assessed in the inspection and preparation of the vehicle for night driving.

Assessment under the particular light condition should test the individual's competence including the conduct of more complex tasks including manoeuvring in confined spaces with and without the use of guides and associated aids. Navigation may be assessed as part of a vehicle navigation exercise conducted under various lighting conditions driving cross country as well as on tracks and sealed roads.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFTRP003 Operate a vehicle over difficult terrain

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFTP003B Operate a vehicle over difficult terrain. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to prepare a vehicle and drive over difficult terrain, including cross country and other off road situations. This involves the application of low risk driving techniques, dealing with hazards, and the assessment (where necessary) and the safe negotiation of obstacles, including water courses such as rivers and streams. The driver must be able to deal with contingencies related to an emergency that may occur in the hazardous situations that may be encountered in driving over difficult terrain under field conditions.

This unit was developed for military drivers in a threat environment, but is applicable to any individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform complex tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Transport

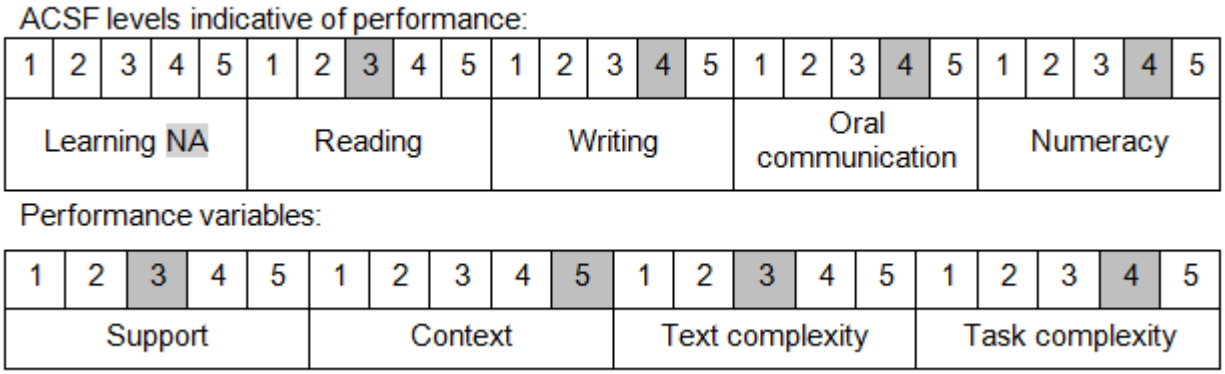
Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare a vehicle for driving over difficult terrain	1.1 Conduct serviceability check of a vehicle for driving over difficult terrain. 1.2 Rectify and/or report any vehicle faults. 1.3 Configure vehicle for driving in difficult terrain.
2. Drive over difficult terrain	2.1 Conduct reconnaissance of the terrain to be traversed by map and/or visual observation identifying potential hazards, including entry and exit routes, obstructions and bypasses. 2.2 Plan task and discuss potential hazards and contingency actions with a supervisor. 2.3 Reconfigure vehicle and adjust the load as necessary. 2.4 Apply low risk driving techniques when driving over difficult terrain. 2.5 Apply vehicle contingency actions when required to deal with accidents and emergencies that may occur when negotiating hazards.
3. Refurbish vehicle	3.1 Inspect vehicle for damage after hazardous situations are negotiated and on completion of the task. 3.2 Rectify and/or report faults and damage to the supervisor. 3.3 Clean and reconfigure vehicle and load as necessary for standard driving conditions.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia



Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFTP003B Operate a vehicle over difficult terrain.

Assessment Requirements for DEFTRP003 Operate a vehicle over difficult terrain

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- carrying out contingency actions
- recovering a vehicle
- applying first aid
- evacuating injured people
- reading maps and use navigational aids
- conducting route reconnaissance and task planning
- driving a vehicle over difficult terrain including:
  - crossing a defile
  - crossing soft terrain
  - crossing a water obstacle
  - negotiating thick scrub
- dealing with contingencies including:
  - engine stall on a steep grade
  - breakdown of a vehicle while crossing a water obstacle
  - recovery of a vehicle from an obstacle
  - recondition a vehicle after driving in difficult terrain
- preparing and driving a vehicle over difficult terrain in a range of environments by day and night, and dealing with contingencies in hazardous situations
- applying sound judgement, this must be displayed in the analysis of difficult terrain to determine whether it is trafficable, and if so, what are the implications for vehicle preparation, safety of passengers and load planning

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- route and task planning
- obstacles and hazards
- vehicle capabilities

Assessment Conditions

Competency should be demonstrated over a time frame that allows for driving a vehicle over a variety of difficult terrain, encountering hazardous situations and applying contingency actions all under a range of field conditions.

Competency should be assessed using a number of practical assessments of driving over difficult terrain including inclines and declines (to the rated capability of the vehicle), waterways, thick scrub, defiles, sand and soft bottoms. Individuals should be assessed in each of these environs and then collectively over a ‘vehicle run’ in which a number of the types of difficult terrain, including watercourses, are encountered requiring a contingency response.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFTRP004 Operate a vehicle using night fighting equipment (NFE)

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFTP004B Operate a vehicle using night fighting equipment (NFE). • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to operate a vehicle, including all wheeled road transport vehicles, using night fighting equipment (NFE) as an aid to driving at night in limited or no light under field conditions. NFE is a collective term that refers to image intensification equipment. It is used by the driver in limited or no light conditions to enhance and improve natural vision at night, when other forms of lighting are prohibited by the operational situation. The driver is required to perform all of the standard driving activities using NFE including vehicle preparation, serviceability checks, driving and navigation. In addition, the driver, while dismounted, is required to direct another vehicle using hand signals.

This unit was developed for military drivers in a threat environment, but is applicable to any individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform routine tasks in a broad range of unpredictable contexts.

© Commonwealth of Australia, 2025 Public Skills Australia

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Transport

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare a vehicle for driving at night using NFE	1.1 Inspect NFE for driving and set up. 1.2 Conduct serviceability check of the vehicle using NFE and rectify and/or report faults. 1.3 Configure vehicle for night driving using NFE.
2. Direct a vehicle using NFE	2.1 Identify, obtain and check appropriate NFE for serviceability. 2.2 Report any faults with NFE to appropriate personnel, rectify and/or return to store. 2.3 Direct vehicle as an external guide using NFE. 2.4 Retrieve and check NFE and return to storage area with any faults rectified and/or reported.
3. Drive a vehicle using NFE	3.1 Drive vehicle singularly and in convoy using NFE. 3.2 Respond to directions from an external guide while driving with NFE. 3.3 Navigate vehicle while driving with NFE. 3.4 Carry out contingency actions on failure of NFE.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

© Commonwealth of Australia, 2025 Public Skills Australia

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy					

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFTP004B Operate a vehicle using night fighting equipment (NFE).

Assessment Requirements for DEFTRP004 Operate a vehicle using night fighting equipment (NFE)

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- driving a vehicle at night under a variety of lighting conditions
- reading maps and using navigational aids
- setting up NFE for night driving
- preparing, checking for serviceability, driving, directing and navigating the vehicle at night using NFE
- operating a vehicle both on roads and cross country and in convoy using NFE

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- NFE safety requirements
- characteristics of night vision
- characteristics and operation of NFE

Assessment Conditions

Competency should be assessed in operating with NFE as a complete activity commencing with the issue of instructions for a night move. The individual should conduct all preliminaries using NFE and complete a number of night driving tasks on both roads and cross country.

© Commonwealth of Australia, 2025 Public Skills Australia

The individual should be responsible for navigation along the route using NFE. During the assessment, the individual will be required to drive the vehicle in accordance with instructions from an external guide and then dismount and act as a guide for another vehicle.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFTRP005 Operate a multi-axle trailer

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFTP005B Operate a multi-axle trailer. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Element 1 reworded

Application

This unit describes the skills required to configure, load, tow, manoeuvre and unload a multi-axle trailer coupled to a wheeled vehicle authorised to tow this type of trailer. Multi-axle trailers in this context are used to transport wheeled and tracked vehicles, containers and items of general cargo in a range of operating environments.

This unit was developed for military drivers in a threat environment, but is applicable to any individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or as part of a team, under direct and indirect supervision, use discretion and judgement, and take responsibility for the quality of their output. They would perform routine tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Transport

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to tow a multi-axle trailer	1.1 Conduct serviceability check of the trailer. 1.2 Rectify and/or report faults. 1.3 Prepare and configure trailer to meet the requirements of the load/cargo. 1.4 Load trailer with different types of loads. 1.5 Secure and protect load.
2. Tow a multi-axle trailer	2.1 Couple and uncouple multi-axle trailer to a vehicle. 2.2 Tow multi axle trailer.
3. Refurbish a multi-axle trailer	3.1 Unload multi-axle trailer on completion of the task. 3.2 Conduct serviceability and damage checks. 3.3 Rectify and/or report faults.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	**3**	4	5	1	**2**	3	4	5	1	2	3	4	5

Assessment Requirements for DEFTRP005 Operate a multi-axle trailer

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. • Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- loading, restraining and protecting loads
- manoeuvring a trailer through a range of driving situations and road conditions
- monitoring and anticipating traffic hazards
- managing stressful and emergency situations
- operating medium and heavy vehicles and towing multi-axle trailers applying WHS requirements
- inspecting, loading, coupling/uncoupling, towing, manoeuvring and unloading a multi-axle trailer under a range of road transport operating conditions by day and night carrying different types of loads
- configuring a multi-axle trailer to suit the requirements of different types of loads and tasks
- loading and unloading a trailer with different types of loads and securing devices
- handling emergency situations
- demonstrating the ability to manoeuvre, brake, corner, reverse, push the trailer, overtake other vehicles and handle emergency situations.

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- WHS requirements for operating medium and heavy vehicles and towing multi-axle trailers

© Commonwealth of Australia, 2025 Public Skills Australia

- road traffic rules and regulations for operating medium and heavy vehicles and towing multi-axle trailers
- safe loading and restraint procedures and limits for trailers
- trailer coupling systems
- emergency situations that may require towing trailers

Assessment Conditions

Competency should be demonstrated under a range of road transport operating environments towing a multi-axle trailer carrying various types of loads. Assessment will need to be undertaken on a number of occasions to provide the individual with the opportunity to demonstrate competence in manoeuvring a loaded trailer in a range of contexts and conditions.

Competency should be assessed under a range of road and traffic conditions to assess performance in stressful conditions. The assessment should be conducted as part of a ‘long haul’ activity of extended duration loading and towing a number of types of cargo. The individual should be assessed in the interpretation of an instruction for a transport task requiring a multi-axle trailer, preparation and configuration of the trailer and the subsequent loading, restraint and protection of the load.

The individual should then be assessed in coupling a trailer and driving the vehicle which includes the requirement to manoeuvre, brake, corner, reverse, push, overtake other vehicles and handle emergency situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

DEFWDV001 Dive using self-contained underwater breathing apparatus in open water to 30 metres

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to dive using self-contained underwater breathing apparatus (SCUBA) in an open water environment to a depth of 30 metres.

It includes planning the dive (including using decompression tables); selecting, inspecting and fitting equipment; entering the water from a range of platforms; conducting descent to, and servicing time at, the required depth. It also includes ascending (including using decompression techniques), exit from the water to the original platform, and removing and refurbishing equipment.

This unit has been aligned with existing standards in the Australian Diver Accreditation Scheme (ADAS). It relates, in part, to the minimum standard for a diver using SCUBA to a depth of 30 metres. ADAS refers to this as ‘restricted’. Further experience is required to gain an ADAS ‘unrestricted’ rating.

This unit was developed for Defence divers but may be applicable to anyone in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for a decompression dive	**1.1** Develop a dive plan using decompression tables and obtain supervisor's clearance in accordance with organisational procedures
	1.2 Select, fit and test equipment in accordance with manufacturer specifications
	1.3 Inspect equipment for serviceability, quarantine any unserviceable equipment and report defects to maximise diver safety
	1.4 Ensure independent safety check of fit and function of equipment is carried out by a diver's attendant or dive supervisor
2 Enter and exit the water	**2.1** Position markers in the water to identify presence of divers
	2.2 Conduct in-water leak test at the surface to ensure the integrity and functionality of equipment
	2.3 Adjust buoyancy to commence dive and as required throughout dive
3 Descend to, and ascend from, a 30 metres bottom	**3.1** Maintain measured and controlled breathing and finning
	3.2 Implement diving descent and ascent techniques, and decompression techniques in accordance with dive plan and safety procedures
	3.3 Monitor relevant risk factors throughout dive to manage threats and personal safety, in accordance with organisational procedures
	3.4 Recover spatial awareness when balance is lost under conditions of zero visibility
	3.5 Recover any lost and/or separated diver
	3.6 Maintain awareness of, and distance from, surface and sub surface hazards

© Commonwealth of Australia, 2025 Public Skills Australia

		3.7	Ensure minimal disturbance to bottom to enable maximum visibility and a safe work environment, in accordance with dive plan
		3.8	Undertake checks to ensure safety to surface
4	**Identify and manage dive-specific medical problems**	**4.1**	Recognise signs and symptoms of compression and/or decompression related problems in self and others, and take immediate corrective action in accordance with dive plan and safety procedures
		4.2	Recognise and manage heat and cold related problems in self or others and hazards, in accordance with dive plan and safety procedures
5	**Communicate underwater**	**5.1**	Inspect electronic communications device and accessories for serviceability and fit
		5.2	Transmit and receive messages using electronic communications devices in accordance with dive plan
		5.3	De-service and stow electronic communications device and accessories in accordance with manufacturer specifications
		5.4	Communicate non-verbally with other divers using hand signals, writing boards and standard single line signals, in accordance with dive plan
6	**Perform a simple navigation leg underwater**	**6.1**	Maintain compass bearing underwater
		6.2	Estimate and maintain distance for a constant swim rate underwater
		6.3	Estimate distance travelled in dive
7	**React to individual and group contingencies and/or emergencies**	**7.1**	Resolve flooded face mask and/or blocked mouthpiece by clearing and refitting
		7.2	Resolve failed primary breathing system and manage irrecoverable malfunctions in accordance with dive plan
		7.3	Manage lost and/or severed safety line/s, as required
		7.4	Manage significant systemic failures through ditching drill and emergency surfacing drill, in accordance with

© Commonwealth of Australia, 2025 Public Skills Australia

		dive plan and safety procedures
8	**Maintain equipment**	**8.1** Maintain equipment in accordance with manufacturer specifications
		8.2 De-service, test and stow post dive equipment
		8.3 Quarantine unserviceable equipment and report defects in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces but is not equivalent to DEFDV001B Dive using self-contained underwater breathing apparatus in open water to 30 metres.

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6bdbab1e-11ed-4bc9-9cba-9e1a55d4e4a9

Assessment Requirements for DEFWDV001 Dive using self-contained underwater breathing apparatus in open water to 30 metres

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- acting as a relay between two callsigns
- applying relevant legislation, and organisational policies and procedures
- communicating verbally by radio and non-verbally through signalling methods
- compiling briefs and clear messages
- complying with assigned callsigns
- conducting decompression stops and requirements
- conducting unplanned decompression procedures arising from the onset of (simulated) compression related problems
- demonstrating situational awareness of position and orientation, equipment (including depth, time and air gauges), and other divers
- implementing emergency surfacing
- managing hazards during dives
- managing medical complications during dives and perceiving these in self and others
- navigating underwater, using a compass only, a complete triangle of side length not less than 30 m (way-points only to be distinguishable within 8 m)
- performing buddy breathing
- switching from primary to reserve air system
- taking necessary corrective action/s and managing a range of individual and group contingencies and/or emergencies.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- decompression calculations
- decompression tables to determine decompression time/s and depth/s for a range of dive profiles
- decompression techniques

© Commonwealth of Australia, 2025 Public Skills Australia

- dive equipment
- dive physics
- dive physiology and medicine including:
  - heat and cold illnesses
  - compression illnesses
  - decompression illnesses
- diving descent and ascent techniques
- general diving safety awareness including:
  - diving in harbours
  - diving in tidal waters, currents and tides
  - diving on and/or near a ship's bottom
  - lost/separated
  - entrapment/foul lines
  - marine animal threats
  - pollution/weeds
  - working in confined spaces
- general precautions to be taken against a range of hazards
- handling procedures for nonfunctional items
- line signals
- marine hazards including marine animal threats
- navigation theory
- oceanography
- principles of underwater communication systems and diver intercom systems, and their limitations
- radio frequency hazards
- radio telephone procedures (RTP)
- relevant hand signals
- relevant legislation, industry standards, and organisational policies and procedures
- safe operating ranges for airsupplies
- surfacing procedures including awareness of surface and sub-surface hazards.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational

© Commonwealth of Australia, 2025 Public Skills Australia

situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- ocean with a range of oceanic, diurnal and nocturnal environments
- applicable documentation including organisational procedures, decompression tables, regulations, codes of practice and operation manuals.

When practicable, assessment should relate to the diver's vocational focus.

DEFWDV002 Support SCUBA diving operations from the surface

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to support self-contained underwater breathing apparatus (SCUBA) diving operations from the surface by acting as a 'lazy shot/bailout operator' and/or diver's attendant in an open water environment.

It includes preparing bailout cylinder, rigging 'lazy shot' and attending to SCUBA (air) diver/s from the surface.

The lazy shot/bailout operator's purpose is to mark the required decompression depth (through the use of the lazy shot) for ascending divers to service their decompression requirements. As part of the lazy shot rig, additional supplies of air (bailout cylinders) are provided in the event that divers' personal supplies expire prior to surfacing. This can occur when multiple and/or lengthy decompression periods must be served.

The diver's attendant covers all aspects of assistance given to a diver in preparation for the dive, the conduct of the dive (such as managing and monitoring safety/communications lines) and the post dive refurbishment of equipment.

This unit was developed for Defence divers but may be applicable to anyone in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work under supervision and perform specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare bail-out cylinder and rig lazy shot	**1.1** Inspect and prepare lazy shot, cordage and bail-out cylinder
	1.2 Deploy and set lazy shot, cordage and bail-out cylinder at required depth for decompression stop, in accordance with dive plan
	1.3 Ensure adjustment for subsequent decompression stops in accordance with dive plan
	1.4 Re-stow lazy shot, cordage and bail-out cylinder
2 Attend to a SCUBA (air) diver from the surface	**2.1** Assist diver in fitting and inspecting dive equipment prior to undertaking dive
	2.2 Assist diver's entry into, and exit from, the water
	2.3 Ensure diver's equipment is confirmed for fit and absence of leaks on entering the water
	2.4 Manage diver's safety line throughout the dive
	2.5 Interpret and respond to all line signals between diver and supervisor
	2.6 Report diver's condition, position and progress to supervisor as required
	2.7 Assist diver from the surface during a poor visibility search
	2.8 Assist diver in the removal and stowage of equipment

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Assessment Requirements for DEFWDV002 Support SCUBA diving operations from the surface

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant industry standards, and organisational policies and procedures
- assembling equipment
- assisting a searching diver in poor visibility (less than 2 metres) in a parallel search
- diving using selfcontained underwater breathing apparatus (SCUBA) in open water to 30 metres
- measuring distance
- maintaining attention to diver throughout dives
- reading gauges
- relaying at least two messages from diver to supervisor
- rigging and setting lazy shot and bailout at appropriate depth/s
- transmitting at least two messages from supervisor to diver.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- dive equipment including:
  - bailout cylinder
  - lazy shot
  - SCUBA and associated equipment
- dive physics
- dive physiology and medicine including:
  - heat and cold illnesses
  - compression illnesses
  - decompression illnesses
- diving descent and ascent techniques
- general diving safety awareness including:
  - diving in harbours

© Commonwealth of Australia, 2025 Public Skills Australia

  - diving in tidal waters, currents and tides
  - diving on and/or near a ship's bottom
  - lost/separated
  - entrapment/foul lines
  - marine animal threats
  - pollution/weeds
  - working in confined spaces
- general boat awareness and safety
- line signals
- marine animal threats
- marine hazards
- oceanography
- relevant industry standards, and organisational policies and procedures including:
  - dive plan and/or instructions
  - emergency response.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

DEFWDV003 Act as a standby diver

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to act as a standby (air) diver in support of diving operations (from a platform and in water) in an open water environment.

It includes preparing and positioning required diving equipment and emergency resources; meeting the readiness states as detailed by the dive supervisor; maintaining communications with dive supervisor throughout the dive; and taking rapid steps to resolve incidents, ranging from resupplying emergency air reserves to locating and rescuing injured or unconscious diver/s.

This unit covers the Australian Diver Accreditation Scheme (ADAS) occupational grouping of standby diver.

This unit was developed for Defence divers but may be applicable to anyone in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare as a standby diver	**1.1** Inspect and don diving equipment for immediate readiness
	1.2 Confirm dive plan and reaction to incidents with dive supervisor
	1.3 Prepare and position emergency resources in accordance with dive plan
2 Operate as a standby diver	**2.1** Maintain situational awareness and status of deployed diver/s during dive operation
	2.2 Respond to incidents or unplanned situations in accordance with emergency response and dive plan
	2.3 Locate deployed diver via life line or float line
	2.4 Ferry emergency air supplies to submerged divers
	2.5 Recover unconscious diver in accordance with emergency response and dive plan

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces but is not equivalent to DEFDV003B Act as a standby diver.

Assessment Requirements for DEFWDV003 Act as a standby diver

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant industry standards, and organisational policies and procedures
- assembling equipment
- interpreting orders and dive plan
- diving using self-contained underwater breathing apparatus (SCUBA) in open water to 30 metres
- locating and recovering an unconscious diver from a depth of 20 metres to the surface
- performing standby diver duties.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- dive equipment
- dive physics
- dive physiology and medicine including:
  - heat and cold illnesses
  - compression illnesses
  - decompression illnesses
- diving descent and ascent techniques
- general diving safety awareness including:
  - diving in harbours
  - diving in tidal waters, currents and tides
  - diving on and/or near a ship’s bottom
  - lost/separated
  - entrapment/foul lines
  - marine animal threats
  - pollution/weeds
  - working in confined spaces

© Commonwealth of Australia, 2025 Public Skills Australia

- general boat awareness and safety
- marine hazards including marine animal threats
- oceanography
- relevant industry standards and organisational policies and must include one of the following:
  - dive plan and/or instructions/orders
  - emergency response procedures/plan.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- ocean with a range of oceanic, diurnal and nocturnal environments
- relevant documentation including organisational procedures, regulations, codes of practice and operation manuals.

When practicable, assessment should relate to the diver’s vocational focus.

DEFWDV004 Dive using surface-supplied breathing apparatus in open water to 30 metres

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to dive using surface-supplied breathing apparatus (SSBA) in an open water environment to a depth of 30 metres.

It includes operating a surface-supply panel, and inspecting and operating SSBA equipment.

This unit has been aligned with existing Defence and Australian Diver Accreditation Scheme (ADAS) standards. It relates, in part, to the minimum standard for a diver using SSBA to a depth of 30 metres. ADAS refers to this as a Part 2 restricted qualification. Further experience is required to gain an ADAS Part 3 licence, based, in part, on SSBA diving to 50 metres.

This unit was developed for Defence divers but may be applicable to anyone in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA	
Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Operate a surface-supply panel**	**1.1**	Inspect surface-supply panel and associated equipment for serviceability and check all gauges to ensure they are in date
		1.2	Connect main and reserve air supplies and confirm supply
		1.3	Check seals and connections for integrity, correct function and correct line up
		1.4	Ensure each umbilical from the surface-supply panel is supplying a specific diver
		1.5	Perform operator level maintenance on surface-supply panel at the work site
		1.6	De-service surface-supply panel after use
2	**Conduct dive operations**	**2.1**	Select, inspect, fit and test SSBA in accordance with manufacturer specifications
		2.2	Conduct dive/s using SSBA and demonstrate dive contingencies in accordance with organisational procedures
		2.3	De-service SSBA and report defects in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for DEFWDV004 Dive using surface-supplied breathing apparatus in open water to 30 metres

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant industry standards, and organisational policies and procedures
- arranging for others to check equipment and maintain equipment during dive
- conducting inwater checks
- diving using self-contained underwater breathing apparatus (SSBA) in open water to 30 metres
- entering and exiting the water appropriate to the launch platform, equipment and conditions
- implementing contingency and emergency response plan
- preparing equipment for dive
- preparing surface control panel for dive
- recovering and clearing mask and mouthpiece
- switching from SSBA primary to reserve air system.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- dive physics
- dive physiology and medicine including:
  - heat and cold illnesses
  - compression illnesses
  - decompression illnesses
- diving descent and ascent techniques
- general occupational/diving safety awareness including:
  - diving in harbours
  - diving in tidal waters, currents and tides
  - diving on and/or near a ship’s bottom
  - lost/separated
  - entrapment/foul lines

© Commonwealth of Australia, 2025 Public Skills Australia

  - marine animal threats
  - pollution/weeds
  - working in confined spaces
- hazards to the umbilical
- marine hazards including marine animal threats
- oceanography
- relevant industry standards, and organisational policies and procedures
- safe operating ranges for air supplies
- SSBA dive equipment characteristics and limitations
- surface-supply panel characteristics and limitations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

DEFWDV005 Dive using closed-circuit breathing apparatus (N2O2) in open water to a maximum depth of 40 metres

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to dive using closed circuit breathing apparatus (CCBA) (N2O2) in an open water environment to a maximum depth of 40 metres.

It includes operating the N2O2 compressor/handbooster pump, inspecting and operating CCBA (N2O2) equipment, and conducting CCBA (N2O2) specific contingency drills.

This unit applies to persons working as Defence divers but can be applied to others working in this field

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFWDV005 Dive using closed-circuit breathing apparatus (N2O2) in open water to a maximum depth of 40 metres

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least 15 dives, with diver diving to a depth not greater than 40 metres using closed-circuit breathing apparatus (CCBA) (N2O2) in open water and include:

- applying relevant industry standards, and organisational policies and procedures
- arranging for others to check equipment
- conducting CCBA (N2O2) open water dive operations in accordance with dive plan during the day and at night
- conducting inwater apparatus checks
- handling nonfunctional equipment items
- maintaining equipment during dive operations
- monitoring CCBA (N2O2) equipment and gauges
- operating an N2O2 compressor/handbooster pump in accordance with manufacturer specifications.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- CCBA (N2O2) characteristics and limitations
- CCBA (N2O2) dive equipment specifications and limitations
- dive physics
- dive physiology and medicine including:
  - heat and cold illnesses
  - compression illnesses
  - decompression illnesses
- diving descent and ascent techniques
- general diving safety awareness including:
  - diving in harbours
  - diving in tidal waters, currents and tides

© Commonwealth of Australia, 2025 Public Skills Australia

  - diving on and/or near a ship's bottom
  - lost/separated
  - entrapment/foul lines
  - marine animal threats
  - pollution/weeds
  - working in confined spaces
- hazards of nitrox
- relevant industry standards, and organisational policies and procedures
- relevant occupational/diving safety awareness
- safe operating ranges for airsupplies.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

DEFWDV006 Dive using closed-circuit breathing apparatus (O2) in open water to a maximum depth of 10 metres

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to dive using closed-circuit breathing apparatus (CCBA) (O2) in an open water environment to a maximum depth of 10 metres.

It includes operating the oxygen compressor/handbooster pump, inspecting and operating CCBA (O2) equipment, and conducting CCBA (O2) specific contingency drills.

This unit applies to persons working as Defence divers, but can apply to others working as work divers.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

DEFWDV007 Dive using closed-circuit breathing apparatus (HeO2) in open water to a maximum depth of 60 metres

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to dive using closed circuit breathing apparatus (CCBA) (HeO2) in an open water environment to a maximum depth of 60 metres.

It includes operating the HeO2 compressor/handbooster pump, inspecting and operating CCBA (HeO2) equipment, and conducting CCBA (HeO2) specific contingency drills.

This unit applies to persons working as Defence Divers but could also apply to others working as work divers.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFWDV007 Dive using closed-circuit breathing apparatus (HeO2) in open water to a maximum depth of 60 metres

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least four separate dives, with diver diving to a depth not greater than 60 metres using closed-circuit breathing apparatus (CCBA) (HeO2) in open water (oceans, seas, lakes and rivers) and include:

- applying relevant industry standards, and organisational policies and procedures
- conducting CCBA (HeO2) dive operations:
  - in open water to a maximum depth of 60 metres during the day and at night
  - in water time of 60 minutes
  - with a total accrued sub-surface time of 0–60 minutes
  - in a range of sub-surface conditions including:
    - a range of surface and sub-surface hazards
    - current (0–2 knots)
    - temperature (0 degrees +)
    - visibility (0 metre +)
- conducting unconscious companion diver drills in accordance with dive plan
- identifying changes in divers, including distress and illness at depth
- inspecting and preparing CCBA (HeO2) equipment and gauges monitoring CCBA (HeO2) equipment and gauges
- operating an HeO2 compressor/handbooster pump in accordance with manufacturer specifications.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- CCBA (HeO2) characteristics and limitations
- CCBA (HeO2) dive equipment specifications and limitations
- dive physics
- dive physiology and medicine including:

© Commonwealth of Australia, 2025
Public Skills Australia

  - heat and cold illnesses
  - compression illnesses
  - decompression illnesses
- diving descent and ascent techniques
- general diving safety awareness including:
  - diving in harbours
  - diving in tidal waters, currents and tides
  - diving on and/or near a ship's bottom
  - lost/separated
  - entrapment/foul lines
  - marine animal threats
  - pollution/weeds
  - working in confined spaces
- hazards of Heliox
- relevant diving safety awareness
- relevant industry standards, and organisational policies and procedures
- safe operating ranges for airsupplies
- standby diver responsibilities.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

DEFWDV008 Employ hand tools in an underwater environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to use hand tools in an underwater environment.

It includes preparing appropriate hand tools for work task and inspecting them for serviceability, ensuring tools are secured on own body throughout dive, and employing tools during work task. It also includes recovering waste arising from work task and deservicing, maintaining and storing tools for ongoing use.

This unit relates, in part, to existing standards in the Australian Diver Accreditation Scheme (ADAS).

This unit applies to persons working as Defence divers but is applicable to all individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA	
Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Prepare hand tools**	**1.1**	Determine specific requirements for hand tools to meet work task and worksite requirements
		1.2	Develop a work plan that is consistent with dive plan
		1.3	Select and inspect hand tools and protective equipment, and report any faults
		1.4	Safely secure hand tools for transport to/from dive site
		1.5	Conduct a risk assessment of worksite hazards and take action/s to manage identified risks
2	**Operate hand tools underwater**	**2.1**	Secure hand tools on self during dive for ease of accessibility, and lack of interference with mobility and dive equipment
		2.2	Establish a work safe area and confirm location and safety of divers prior to commencing work task/s
		2.3	Operate hand tools underwater in accordance with work plan
3	**Maintain hand tools**	**3.1**	Minimise environmental impact arising from use of hand tools and recover waste products in accordance with dive plan
		3.2	Undertake activity to de-service hand tools and protective equipment after use

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include:

- applying relevant industry standards, organisational policies and procedures
- attending to personal and collective safety
- developing a work plan in agreement with dive plan
- employing hand tools underwater in accordance with work plan
- identifying hazards, assessing risks and implementing control measures
- inspecting hand tools and protective equipment
- maintaining hand tools
- using not less than four different hand tools in underwater work tasks for a total usage time of not less than 60 minutes across a number of work tasks.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- care of hand tools
- dive physics
- dive physiology and medicine including:
  - heat and cold illnesses
  - compression illnesses
  - decompression illnesses
- diving descent and ascent techniques
- general diving safety awareness including:
  - diving in harbours
  - diving in tidal waters, currents and tides
  - diving on and/or near a ship’s bottom
  - lost/separated
  - entrapment/foul lines
  - marine animal threats

© Commonwealth of Australia, 2025 Public Skills Australia

  - pollution/weeds
  - working in confined spaces
- identification of tool faults
- relevant dive equipment
- relevant industry standards, and organisational policies and procedures
- use of tools on land
- workplace hazards and risk mitigation procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- ocean with a range of oceanic, diurnal and nocturnal environments
- relevant documentation including organisational procedures, regulations, codes of practice and operation manuals.

When practicable, assessment should relate to the diver’s vocational focus.

DEFWDV009 Conduct an underwater search of a ship's hull

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to conduct an exterior search of the underwater component of a ship’s hull.

It includes defining a ship’s hull search area and searching the underwater component of a ship’s hull.

This unit relates, in part, to existing standards in the Australian Diver Accreditation Scheme (ADAS). All information was correct at the time of development; however, any diver seeking ADAS accreditation should consult ADAS and not rely on the information contained in this unit.

This unit applies to persons working as Defence personnel with diving duties. But can apply to others working as work divers

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently in a small team and perform routine tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Work Diving

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Define search area of ship's hull	**1.1** Determine and analyse search task and worksite data to define search area
	1.2 Develop a search plan consistent with dive plan, ensuring scope addresses task requirements
	1.3 Prepare and position search control devices on ship's hull in accordance with search and dive plan
2 Refurbish search site	**2.1** Apply manual or visual search methods in accordance with visibility levels, search plan and task requirements
	2.2 Refurbish search site in accordance with search plan
	2.3 Recover, disconnect, refurbish and stow search control devices on completion of search activity

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces but is not equivalent to DEFDV009B Conduct an underwater search of a ship's hull.

Assessment Requirements for DEFWDV009 Conduct an underwater search of a ship's hull

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant industry standards, organisational policies and procedures
- conducting an underwater dive to search ship’s hull in accordance with dive plan, organisational procedures and search plan
- locating an object (such as a mine) that is attached to a ship’s hull and is of a minimum underwater length of 30 metres during a search conducted under poor visibility (maximum of 0.5 metres) that demands the use of manual search techniques
- planning to conduct a ship’s hull manual search
- using search control devices in accordance with manufacturer specifications
- working safely throughout dive operation.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- dive equipment and search control devices
- dive physics
- dive physiology and medicine including:
  - heat and cold illnesses
  - compression illnesses
  - decompression illnesses
- diving descent and ascent techniques
- general diving safety awareness including:
  - diving in harbours
  - diving in tidal waters, currents and tides
  - diving on and/or near a ship’s bottom
  - lost/separated
  - entrapment/foul lines
  - marine animal threats

© Commonwealth of Australia, 2025 Public Skills Australia

  - pollution/weeds
  - working in confined spaces
- marine, ship and dive hazards
- oceanography
- relevant industry standards, and organisational policies and procedures
- relevant occupational/diving safety awareness
- relevant search device manufacturer specifications
- search techniques.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

DEFWDV010 Employ power tools in an underwater environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to use power tools in an underwater environment.

It includes operating a compressor, selecting appropriate tools for work task, inspecting them for serviceability and deservicing and storing tools. It also includes recovering waste arising from work task.

This unit relates, in part, to existing standards in the Australian Diver Accreditation Scheme (ADAS).

This unit applies to persons working as Defence Divers but is applicable to all individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare to use power tools under water	**1.1** Determine specific requirements for power tools in accordance with work task, worksite and work object requirements
	1.2 Develop a work plan consistent with dive plan
	1.3 Select and inspect power tools, protective equipment and compressor to meet task requirements
	1.4 Secure power tools, compressor, and associated leads and hoses for transport to/from dive site
	1.5 Assess access obstructions and other hazards, and manage risks as required
2 Operate power tools under water	**2.1** Secure power tools on self during dive for ease of accessibility, and lack of interference with mobility and dive equipment
	2.2 Determine safe route for leads and hoses for dive activity
	2.3 Determine work safe area and location and confirm safety of divers prior to commencing work task/s
	2.4 Operate power tools underwater ensuring management of their associated hazards
	2.5 Conduct operator maintenance at worksite on power tools, leads and hoses, as required
	2.6 Disconnect power tools temporarily and render safe to evaluate work task in accordance with operational procedures
3 Operate compressor	**3.1** Perform pre-start checks and connect hoses and leads in accordance with manufacturer instructions
	3.2 Develop pressure gradually without surging and stabilise compressor to establish required output
	3.3 Conduct routine operational checks, and diagnose and address any warning signs

© Commonwealth of Australia, 2025 Public Skills Australia

		3.4 Shut down compressor or conduct an emergency shut down procedure in accordance with dive plan
4	**Conclude power tool operations**	**4.1** Minimise environmental impact arising from use of power tools and recover waste products in accordance with operational procedures
		4.2 Undertake activity to de-service equipment and compressor after use
		4.3 Complete equipment log book/s, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces but is not equivalent to DEFDV010B Employ power tools in an underwater environment.

Assessment Requirements for DEFWDV010 Employ power tools in an underwater environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant industry standards, and organisational policies and procedures
- operating any four of the following power tools:
  - power wrench, including changing sockets on site, tightening and loosening nuts
  - drill, including drilling a hole in a steel plate and changing bits on site
  - disc cutter, including cutting steel or concrete and changing disc on site
  - jack hammer, including breaking concrete
  - chainsaw, including cutting wooden beams 230 mm x 100 mm
  - angle grinder, including cleaning and smoothing a fillet, chamfering a 12 mm plate and changing disc on site
  - scrubber, including cleaning 2 m2 of horizontal and vertical surface
- operating a pneumatic or hydraulic compressor must include one or more of the following:
  - connecting hoses and leads
  - connecting to power supply
  - adjusting output power
  - switching compressor on/off.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- dive equipment
- dive physics
- dive physiology and medicine including:
  - heat and cold illnesses
  - compression illnesses
  - decompression illnesses
- diving descent and ascent techniques
- general diving safety awareness including:

© Commonwealth of Australia, 2025 Public Skills Australia

  - diving in harbours
  - diving in tidal waters, currents and tides
  - diving on and/or near a ship's bottom
  - lost/separated
  - entrapment/foul lines
  - marine animal threats
  - pollution/weeds
  - working in confined spaces
- oceanography
- power tool equipment, compressor, hoses and leads for the power tools operated:
  - causes and remedies for surging
  - control of output
  - effects of temperature and compression ratio pressure/temperature relationships and effects on condensation (e.g. moisture and/or gas)
  - methods of resolving problems
  - principles of operation
  - physics of operation
- relevant industry standards, and organisational policies and procedures
- relevant workplace hazards
- use of compressor
- use of power tools.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

DEFWDV011 Perform non-technical structural inspections underwater

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to conduct underwater non-technical structural inspections, such as examining bridges, piers or ship hulls.

It includes preparing and conducting general qualitative underwear inspection (visual and manual), as well as quantitative analysis such as taking basic measurements including angles, dimensions and lengths.

This unit relates to existing standards in the Australian Diver Accreditation Scheme (ADAS).

This unit applies to person working as Defence Divers. but is applicable to all individuals who work in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform routine tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for underwater inspection	**1.1** Identify and determine inspection task, target and available worksite data
	1.2 Develop inspection plan consistent with dive plan in accordance with organisational procedures
	1.3 Select and inspect inspection equipment to meet task requirements
	1.4 Secure inspection equipment safely for transport to/from dive site
	1.5 Identify obstructions and underwater hazards, assess risks and manage risk control measures in accordance with dive plan
2 Conduct underwater inspection	**2.1** Secure inspection equipment on self for ease of accessibility and lack of interference to mobility and dive equipment
	2.2 Clear dive area surface of debris and/or marine growth in accordance with inspection plan
	2.3 Conduct visual analysis of dive area to identify significant features or defects
	2.4 Measure underwater structures and record lengths, gaps angle and holes, in accordance with inspection plan and task requirements
	2.5 Take appropriate visual imagery of target
3 Complete post inspection procedures	**3.1** Undertake activity to de-service and store inspection equipment after use
	3.2 Report inspection outcomes and identified faults in accordance with organisational procedures and inspection plan

Foundation Skills

Assessment Requirements for DEFWDV011 Perform non-technical structural inspections underwater

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant industry standards, organisational policies and procedures
- assisting in providing information for an inspection report
- completing underwater dives
- conducting an inspection task requiring angular and linear measurements on one of the following:
  - pier/bridge – assessment is to be constructed around the examination of an existing pier/bridge requiring some expedient reinforcement to make fit for operational use
  - ship's hull – assessment is to be constructed around a sonar dome housing inspection and poker/feeler gauge surveys
- developing inspection plan in accordance with relevant organisational procedure
- documenting non-technical inspection report
- making underwater field notes and sketches
- measuring and recording underwater structure lengths, gaps, angles and holes in accordance with inspection plan
- planning underwater inspection requirements
- taking measurements under water.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- dive equipment
- dive physics
- dive physiology and medicine including:
  - heat and cold illnesses
  - compression illnesses
  - decompression illnesses
- diving descent and ascent techniques
- general diving safety awareness including:

© Commonwealth of Australia, 2025 Public Skills Australia

  - diving in harbours
  - diving in tidal waters, currents and tides
  - diving on and/or near a ship's bottom
  - lost/separated
  - entrapment/foul lines
  - marine animal threats
  - pollution/weeds
  - working in confined spaces
- oceanography
- relevant architecture of piers and bridges
- relevant documentation and inspection proformas
- relevant industry standards, and organisational policies and procedures
- relevant mechanics requirements
- relevant pier/bridge non-technical structural assessment techniques
- relevant ship's hull non-technical structural assessment techniques
- underwater workplace hazards.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

DEFWDV012 Perform underwater beach and waterway surveys

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to conduct underwater surveys of beaches and waterways, such as estuaries and lakes.

It includes preparing and conducting an underwater beach and waterway survey relating to the potential establishment of structures such as bridges or piers, or to determine the feasibility of establishing a beachhead.

This unit relates, in part, to existing standards in the Australian Diver Accreditation Scheme (ADAS).

This unit applies to persons working as Defence Divers. but is applicable to all individuals who work in this field

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for DEFWDV012 Perform underwater beach and waterway surveys

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one underwater survey of a beach/waterway (which should include at least two of: bottom gradient, bottom composition, sub surface features marking of obstacles/channels) and include:

- applying relevant legislation, standards and organisational policies and procedures
- applying safe diving principles and relevant risk control measures
- carrying and securing equipment throughout dive
- determining scope of survey task
- developing beach and underwater survey plans
- documenting beach/waterway survey outcomes including:
  - measuring bottom gradient
  - determining bottom composition
  - recording waterway sub-surface features
  - identifying obstacles/channels and waterway hazards
  - making underwater field notes and sketches
- using survey equipment relevant to beach and underwater surveys effectively.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- dive equipment
- dive physics
- dive physiology and medicine including:
  - heat and cold illnesses
  - compression illnesses
  - decompression illnesses
- diving descent and ascent techniques
- general diving safety awareness including:
  - diving in harbours

© Commonwealth of Australia, 2025 Public Skills Australia

  - diving in tidal waters, currents and tides
  - diving on and/or near a ship's bottom
  - lost/separated
  - entrapment/foul lines
  - marine animal threats
  - pollution/weeds
  - working in confined spaces
- oceanography
- relevant legislation, and organisational policies and procedures
- relevant organisational documentation
- relevant references and Australian Standards
- underwater beach/waterway survey techniques including:
  - waterway bottom gradient
  - waterway bottom composition
  - waterway sub-surface features
  - obstacles/channels and waterway hazards
- underwater workplace hazards.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

DEFWDV013 Employ air-lift devices underwater

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to move submerged objects using air-lift devices.

It includes preparing, selecting and inspecting air-lift bags appropriate to the lift, securing bags to the object and inflating bags to required buoyancy to manoeuvre object under control.

This unit relates, in part, to existing standards in the Australian Diver Accreditation Scheme (ADAS).

This unit applies to persons working as Defence Work Divers, but may apply to others working in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Prepare for underwater air-lift operation**	**1.1** Identify and analyse load metrics and worksite data to determine specific requirements for air-lift bags
		1.2 Develop a work plan consistent with dive plan
		1.3 Select, inspect and prepare air-lift bags in accordance with manufacturer specifications and safe weight limits
		1.4 Secure air-lift bags to/from dive site
		1.5 Assess obstructions and other underwater hazards to determine risks and manage risk control measures in accordance with dive plan
2	**Operate air-lift devices**	**2.1** Secure air-lift bags to object's lift point/s
		2.2 Determine a safe work area, confirm location of other divers and nearby vessels and/or structures prior to commencing and during air-lift operation, in accordance with work plan
		2.3 Inflate air-lift bags in accordance with work plan
		2.4 Control buoyancy and movement in accordance with work plan
3	**Complete air-lift operations**	**3.1** Minimise environmental impact arising from work task and recover waste products
		3.2 Carry out de-servicing and storage requirements for air-lift bags

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for DEFWDV013 Employ air-lift devices underwater

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying centre of gravity of lifted object
- applying relevant legislation, standards and organisational policies and procedures
- applying underwater risk control measures and work plan requirements
- controlling neutrally buoyant objects
- coordinating with other operators during lift
- demonstrating air-lift operations with manually inflated air bags including:
  - 1 x vertical lift to surface
  - 1 x lateral lift
- determining hydrodynamics of object as it is raised through the water
- developing underwater air-lift work plan
- rigging and de rigging air-lift equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- calculations to determination hydrodynamics, centre of gravity and mass of submerged objects
- characteristics and employment of airlift bags
- dive equipment
- dive physics
- dive physiology and medicine including:
  - heat and cold illnesses
  - compression illnesses
  - decompression illnesses
- diving descent and ascent techniques
- general diving safety awareness including:
  - diving in harbours

© Commonwealth of Australia, 2025 Public Skills Australia

- oceanography
- relevant manufacturer specifications
- relevant marine workplace hazards
- relevant legislation, standards and organisational policies and procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, air-lift equipment and personal protective equipment currently used in industry
- ocean with a range of oceanic, diurnal and nocturnal environments
- applicable documentation including organisational procedures, regulations, codes of practice, industry standards and operation manuals.

When practicable, assessment should relate to the diver's vocational focus.

DEFWDV014 Perform concreting in an underwater environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to concrete simple forms and excavations in an underwater environment.

It includes preparing for underwater concreting, constructing simple formwork, and positioning reinforcement rods and fixed anchorages. It also includes pouring and screeding the concrete to the required finish, recovering formwork and waste, and deservicing and storing tools.

This unit relates, in part, to existing standards in the Australian Diver Accreditation Scheme (ADAS).

This unit applies to persons working as Defence Divers, but is applicable to other people in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Work Diving

Unit Sector

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for underwater concreting	**1.1** Identify and analyse work task and worksite data to determine the specific requirements for the concrete
	1.2 Develop work plan consistent with dive plan
	1.3 Select, inspect and prepare equipment
	1.4 Secure concreting equipment safely to/from dive site
	1.5 Assess access obstructions and other underwater hazards to determine risks and to manage risk control measures in accordance with dive plan
2 Concrete underwater site	**2.1** Determine safety of work area at worksite
	2.2 Prepare site in accordance with work plan
	2.3 Assemble formwork to meet task requirements
	2.4 Position reinforcing bars, rods, stirrups and mesh, bar chairs and spacers as required
	2.5 Mix cement and deliver to site in accordance with work plan and concrete strength specifications
	2.6 Take measures to confirm location and safety of divers prior to commencing pour, in accordance with operational procedures
	2.7 Spread and screed concrete in accordance with work plan
	2.8 Undertake tasks to finish surface, ensuring it is protected during curing
3 Complete underwater concreting	**3.1** Minimise environmental impact arising from concreting and recover waste materials on completion of task
	3.2 De-service and store all equipment, in accordance with operational procedures

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces but is not equivalent to DEFDV014B Perform concreting in an underwater environment.

Assessment Requirements for DEFWDV014 Perform concreting in an underwater environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation, standards and organisational policies and procedures
- applying underwater risk control measures and work plan requirements
- calculating cement mix ratios according to strength specifications
- completing underwater concrete work including:
  - assembling formwork and stripping agent
  - clearing and levelling site to prepare for pouring
  - ensuring a consistent pour when delivering cement
  - operating cement tools and equipment
  - protecting concrete during curing
- conducting at least one of the following underwater concreting tasks:
  - reinforcing pier legs
  - placing footings
  - laying a slab or ramp.
- developing underwater concreting work plan
- planning underwater concreting work
- using floats and brooms to finish surface.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- concrete setting and strength specifications
- dive equipment
- dive physics
- dive physiology and medicine including:
  - heat and cold illnesses
  - compression illnesses
  - decompression illnesses

© Commonwealth of Australia, 2025 Public Skills Australia

- diving descent and ascent techniques
- general diving safety awareness including:
  - diving in harbours
  - diving in tidal waters, currents and tides
  - diving on and/or near a ship's bottom
  - lost/separated
  - entrapment/foul lines
  - marine animal threats
  - pollution/weeds
  - working in confined spaces
- oceanography
- relevant legislation, standards, and organisational policies and procedures
- relevant risk mitigation organisational procedures including workplace hazard mitigation.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- dive location
- ocean with a range of oceanic, diurnal and nocturnal environments
- applicable documentation including organisational procedures, regulations, codes of practice and operation manuals.

When practicable, assessment should relate to the diver's vocational focus.

DEFWDV015 Employ explosive power tools in an underwater environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to employ explosive power tools (EPTs) in an underwater environment.

It includes preparing and selecting an appropriate EPT for underwater work task and inspecting it for serviceability. It also includes recovering waste, and deservicing and storing of equipment.

This unit applies to persons working as Defence Divers or to others working in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

outcomes.	demonstrate achievement of the element.
1 Prepare to use EPTs underwater	**1.1** Identify and analyse work task and worksite data to determine EPT specific requirements
	1.2 Develop work plan consistent with dive plan
	1.3 Select, inspect and prepare EPTs, explosive charges and protective equipment in accordance with work plan
	1.4 Secure EPTs and explosive charges safely to/from dive site
	1.5 Identify obstructions and other hazards, to determine risks and to manage appropriate risk control measures
2 Operate EPTs underwater	**2.1** Secure EPTs and explosive charges on self in accordance with operational and safety procedures
	2.2 Ensure material or base set out intended for explosive fasteners complies with detailed drawings and work plan specifications
	2.3 Install EPT attachments and chamber EPT charges in accordance with manufacturer specifications
	2.4 Determine safe work area, and confirm location of other divers prior to commencing work task/s in accordance with work plan
	2.5 Operate EPTs under water safely and manage identified risks
	2.6 Clear and render safe EPTs in accordance with manufacturer specifications
	2.7 Check fastener penetration for angle, depth and integrity of base in accordance with work plan
3 Complete underwater EPT operations	**3.1** Minimise environmental impact arising from use of EPTs and recover waste products
	3.2 De-service EPT and protective equipment in accordance with work plan
	3.3 Record explosive charge usage in accordance with organisational procedures

Assessment Requirements for DEFWDV015 Employ explosive power tools in an underwater environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria where the diver fires at least two charges into concrete, masonry or steel over a minimum of two underwater work tasks and include:

- applying relevant legislation, standards, and organisational policies and procedures
- applying underwater risk control measures and work plan requirements
- developing underwater explosive power tools work plan, including managing identified risks
- handling explosive charges and protective equipment safely
- using explosive power tools safely underwater in accordance with work plan.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- dive equipment
- dive physics
- dive physiology and medicine including:
  - heat and cold illnesses
  - compression illnesses
  - decompression illnesses
- diving descent and ascent techniques
- general diving safety awareness including:
  - diving in harbours
  - diving in tidal waters, currents and tides
  - diving on and/or near a ship’s bottom
  - lost/separated
  - entrapment/foul lines
  - marine animal threats
  - pollution/weeds
  - working in confined spaces

© Commonwealth of Australia, 2025 Public Skills Australia

- oceanography
- principles of underwater explosive power tool (EPT) operation
- relevant explosive hazards and control measures
- relevant EPT safety distances
- relevant legislation, standards, and organisational policies and procedures
- relevant underwater workplace hazards and control measures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

DEFWDV016 Perform underwater rigging work

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to complete underwater rigging work.

It includes securing and moving submerged loads by employing blocks and tackle, chains, slings and cordage. It also includes establishing secure lift points, setting rigging equipment between load and lifting platform, and controlling the conduct of the lift.

This unit applies to persons working as Defence divers.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

1	**Prepare for underwater rigging operation**	**1.1**	Identify load metrics and worksite data to meet task requirements
		1.2	Develop work plan consistent with dive plan in accordance with organisational procedures and task requirements
		1.3	Select, inspect and prepare rigging gear in accordance with safe lifting weight limits and work plan
		1.4	Secure rigging gear for safe transport to/from dive site
		1.5	Identify obstructions and other lift hazards to determine risks and to manage risk control measures in accordance with dive plan
2	**Lift and handle submerged objects using mechanical advantage**	**2.1**	Identify lift points to secure object to lifting device in accordance with safe lifting weight limits
		2.2	Determine a safe work area and confirm location of other divers and nearby surface vessels and/or structure prior to commencing lift, in accordance with work plan
		2.3	Operate lifting devices within accepted load tolerances
		2.4	Ensure lifting devices are anchored off raised objects in accordance with operational and safety procedures
3	**Complete underwater rigging operations**	**3.1**	Minimise environmental impact arising from work task and recover waste products
		3.2	Disassemble, inspect, de-service and store rigging gear
		3.3	Complete required documentation and records, in accordance with organisational procedures

Foundation Skills

Assessment Requirements for DEFWDV016 Perform underwater rigging work

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- analysing constraints of object to be lifted to determine technique
- applying relevant legislation, standards, and organisational policies and procedures
- applying underwater risk control measures and work plan requirements
- calculating load parameters
- conducting one vertical lift to the surface with mechanical devices
- constructing rigs including:
  - assembling equipment to ensure load can be lifted with available equipment
- determining load capacity of components
- developing underwater rigging work plan
- planning underwater rigging work
- preparing accurate reports and required documentation
- rigging load within safe lifting weight limits.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- determination of mass of submerged objects
- dive equipment
- dive physics
- dive physiology and medicine including:
  - heat and cold illnesses
  - compression illnesses
  - decompression illnesses
- diving descent and ascent techniques
- equipment inspection and checking specifications
- general diving safety awareness including:
  - diving in harbours

© Commonwealth of Australia, 2025 Public Skills Australia

DEFWDV017 Employ thermal cutting and welding tools (non-load bearing) in an underwater environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to use thermal cutting and welding tools in an underwater environment.

It includes preparing underwater cutting and welding tools, operating the generator, selecting appropriate work task tools and inspecting them for serviceability, and securing tools on own body throughout dive. It also includes the surface operation of the electrical generator or gas cylinders supplying the tools, recovering waste, and deservicing and storing equipment.

This unit applies to persons working as Defence Work Divers, or to others working in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit would work independently performing specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
1	**Prepare for cutting and welding underwater**	**1.1** Identify and analyse work task, worksite data and work object to determine task requirements
		1.2 Develop work plan consistent with dive plan in accordance with organisational procedures and task requirements
		1.3 Select, inspect and prepare thermal cutting and welding tools, electrical generator and associate leads, and oxy acetylene gas cylinders and associated hoses, in accordance with manufacturer specifications
		1.4 Secure equipment for transport to/from dive site
		1.5 Identify obstructions and other cutting/welding hazards to determine risk and to manage risk control measures in accordance with dive plan
2	**Operate thermal cutting and welding tools underwater**	**2.1** Secure thermal cutting and welding tools on self during dive
		2.2 Determine safe routes for leads and hoses to worksite in accordance with dive plan and operational safety procedures
		2.3 Determine safe work area and confirm location of other divers prior to commencing cutting/welding work tasks, in accordance with work plan
		2.4 Manage cutting and welding tool hazards in accordance with dive plan and operational safety procedures
		2.5 Disconnect and render tools safe in accordance with dive plan and operational safety procedures
3	**Operate generator**	**3.1** Conduct routine operational and pre-start checks and diagnose and address warning signs in accordance with manufacturer specifications
		3.2 Shut down and/or conduct emergency shut down drills in accordance with dive plan
4	**Complete underwater cutting and welding operations**	**4.1** Minimise environmental impact arising from use of thermal cutting and welding tools, and recover waste products

© Commonwealth of Australia, 2025 Public Skills Australia

4.2 De-service and store equipment on task completion in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for DEFWDV017 Employ thermal cutting and welding tools (non-load bearing) in an underwater environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying relevant legislation, standards, and organisational policies and procedures
- completing underwater cutting and welding operations safely
- cutting 12 mm steel plates
- identifying and addressing relevant cutting/welding workplace hazards and problems
- operating generator to support welding tasks in an underwater environment
- operating thermal cutting and welding tools underwater
- planning for cutting and welding underwater
- stabilising a generator
- undertaking underwater welding activities including:
  - preparing surface of work object for cut or weld
  - controlling voltage and amperage of arc welding equipment
  - turning on gas supplies
  - adjusting ratios of oxygen and acetylene
  - controlling pressure of oxy acetylene torch
  - making cuts and welds ensuring minimal distortion to object
  - inspecting and cleaning cuts and welds
  - developing power gradually without surging
- using a number of thermal cutting and welding tools (non-load bearing) in an underwater environment work tasks:
  - at depths between 5 metres and 20 metres
  - on at least one night work task
- welding manual metal arc using electric welding equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of

DEFWHS002 Develop noise management plans

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to:

- Foundation Skills
- Range of Conditions
- Assessment Conditions.

Release 1.0. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFOH004B Develop noise management plans.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- PC 2.2 removed
- Elements 1 and 2 merged
- Element 1 one new PC.

Application

This unit involves the skills and knowledge required to develop noise management plans.

It includes measuring and analysing work noise to develop and draft, procedures and plans/instructions for the management, amelioration and/or control of hazardous noise in the workplace.

This unit applies to Defence personnel involved in developing noise management plans as a workplace responsibility but is applicable to all individuals who work in this field. Those undertaking this unit would work independently or as part of a team under indirect supervision. They must be able to use discretion and judgement and take responsibility for the quality of their outputs. They would perform complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Work Health and Safety

© Commonwealth of Australia, 2025 Public Skills Australia

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA	
Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	**Prepare to develop a workplace noise management plan**	**1.1**	Recognise and acknowledge noise hazards and identify their sources
		1.2	Identify and access legislation and standards appropriate to noise hazard and work noise exposure levels
		1.3	Identify and access existing organisational records relevant to noise hazards
		1.4	Identify, acquire and prepare equipment and resources required for the measurement of noise
		1.5	Measure workplace noise
		1.6	Deploy measuring equipment and record readings
2	**Analyse workplace noise**	**2.1**	Interpret and confirm measurements
		2.2	Analyse and/or determine workplace noise and report findings to appropriate authorities/superiors
3	**Develop noise management plans**	**3.1**	Conduct consultation with stakeholders
		3.2	Identify and interpret technical standards, organisational environmental requirements and occupational noise exposure levels
		3.3	Develop noise management plans and forward to the relevant authority

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit supersedes and is equivalent to DEFOH004B Develop noise management plans.

Assessment Requirements for DEFWHS002 Develop noise management plans

Modification History

Release 2.0. This is the second release of this unit of competency in the DEF Defence Training Package Release 4.0. Modifications have been made to Assessment Conditions.

Release 1.0. These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages.

Assessment Requirements created drawing upon specified assessment information from superseded unit.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- analysing work environment and identifying hazards
- assessing resources needed to establish and maintain WHS in the workplace, including a range of control measures
- assessing risks and design and implementing appropriate WHS systems
- operating noise measuring/monitoring equipment
- measuring and analysing workplace noise
- developing noise management plans that adhere to Australian and organisational standards and recognising stakeholder requirements
- applying knowledge of relevant WHS legislative frameworks
- identifying inspection tools and methods appropriate to the workplace
- identifying intervention points for advice to assist in work and to guide problem solving.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- environmental factors relevant to workplace noise
- noise control requirements
- noise measuring and monitoring techniques and equipment
- occupational noise exposure level standards/requirements
- legislation, regulations, standards and organisational policy relevant to workplace noise levels including:
  - Australian or international standards
  - equipment manufacturers’ specifications

© Commonwealth of Australia, 2025 Public Skills Australia

  - exposure standards
  - previous testing reports
  - risk assessments
  - Standing Operating Procedures (SOPs)
  - state/territory/Commonwealth WHS acts, regulations, codes of practice and guidance material
- provisions and principles of effective WHS management requirements for the organisation/industry
- reliability of measures
- tolerances of error that may apply.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AHCPMG307 Apply animal trapping techniques

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to trap and hold live animals for release, transportation or destruction. Trapped animals can be native animals, domestic animals, animals determined to be pests or feral animals.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for trapping	1.1 Identify purpose of animal capture and set objectives 1.2 Confirm the location and size of the area designated for trapping activities

© Commonwealth of Australia, 2025 Public Skills Australia

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Confirm target animal movement patterns, behaviour and lifecycles to determine trapping location and placement of equipment and appropriate timing of trapping activity 1.4 Identify potential non-target animals 1.5 Estimate time required to complete trapping activities 1.6 Identify and check method of transport, materials and equipment required for trapping 1.7 Select appropriate traps for target animal and the environment 1.8 Clean, maintain and prepare trapping equipment according to manufacturer specifications 1.9 Identify hazards, risks and controls for trapping and select appropriate personal protective equipment 1.10 Identify and manage environmental risks associated with trapping animals 1.11 Obtain relevant approvals, permits and permission to carry out trapping activities 1.12 Determine precautions for minimising trapping of non-target animals
2. Place and set traps	2.1 Undertake site surveillance prior to setting traps 2.2 Select and prepare site to maximise opportunity for trapping target animals and minimise the chance of trapping non-target animals 2.3 Position, set and calibrate trapping equipment and check it for operation and safety 2.4 Apply lures, decoys, baits or toxins according to workplace procedures and permits 2.5 Camouflage traps according to workplace procedures 2.6 Apply precautions to prevent trapping of non-target animals 2.7 Set traps according to legislative requirements and animal welfare codes of practice
3. Check and remove traps	3.1 Inspect traps at the required frequency 3.2 Identify trapped animals then release, humanely destroy or prepare for transport according to trapping objectives and permits 3.3 Handle captured animals humanely according to animal welfare codes of practice

© Commonwealth of Australia, 2025 Public Skills Australia

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	3.4 Transport animals from site according to trapping objectives and animal welfare codes of practice 3.5 Observe health and safety in the workplace procedures and public safety requirements during trapping activities 3.6 Operate trap release mechanism safely and remove trap 3.7 Restore trap-site to its prior condition
4. Record data	4.1 Use global positioning system (GPS) loggers to record locations of trapped animals 4.2 Use recording instruments to record details of trapping activities according to trapping plan and workplace procedures
5. Clean and store equipment and material	5.1 Clean and store carcases for research or other purposes 5.2 Clean and store equipment and materials according to safety data sheets, workplace and biosecurity procedures 5.3 Record target and non-target kills
6. Report completion of work	6.1 Report results of trapping activities and incidents according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	• Accurately record and complete organisational documentation using clear language, and terminology when reporting and maintaining animal trapping records
Numeracy	• Perform basic mathematical calculations to determine and record trapping data and GPS locations
Navigate the world of work	• Take responsibility for following explicit and implicit policies, procedures and legislative requirements
Get the work done	• Take responsibility for planning, sequencing and prioritising tasks and workload for efficiency and effective trapping outcomes

Assessment Requirements for AHCPMG307 Apply animal trapping techniques

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have applied animal trapping techniques, including:

- determined objectives for trapping and confirmed target animal characteristics and trapping location and size
- estimated trapping period and identified, selected and prepared baits, equipment, traps and transport for trapping activities
- set and trapped animals humanely and released or destroyed animals according to workplace procedures and animal welfare code of practice
- identified presence of target and non-target animals
- identified environmental, health and safety in the workplace hazards, risks and applied controls according to workplace and environmental procedures
- checked method of transport, equipment and materials for serviceability and cleaned equipment before and after trapping activities
- selected, prepared and restored trapping site during trapping activities
- positioned, set, calibrated and checking trapping equipment according to workplace procedures
- applied lures or baits according to trapping plan
- selected, used and stored baits or toxins according to workplace procedures
- inspected traps in a timely manner and handled and euthanised captured animals in accordance with workplace procedures and animal welfare practices
- maintained records using global positioning system data
- summarised and presented trapping data and reports according to workplace procedures
- cleaned and stored equipment and carcases using approved chemicals according to safety data sheets (SDS) and workplace procedures to minimise biosecurity risks.

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- purpose for trapping the animal
- target animals and non-target animals
- target animal's range, movement patterns and behaviour and how to apply knowledge of these to selecting trapping location and equipment
- reproductive cycle of the target animal to determine appropriate timing of trapping activities
- food preferences, both general and local, of target animals
- capture and kill points for target animals
- traps and techniques for target animals
- permissions that may be required to undertake trapping
- principles relating to property, stock and duty of care when trapping
- precautions that need to be taken to minimise trapping of non-target animals
- trap camouflage materials and techniques
- trap types, setting and operating release to render them inactive
- health and safety in the workplace procedures that relate to trapping animals
- recording and reporting requirements
- use of decoys and lures
- baits or toxins types and preparation
- applicable state or territory legislation on the use and storage of baits or toxins
- applicable legislation on the capture and handling of animals
- suitable personal protective equipment
- transportation methods for captured animals.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - live animals in the field
  - traps appropriate to trapping technique required
  - baits, lures or poisons relevant to trapping context
  - methods of transport relevant to trapping context
  - cleaning products
- specifications:

© Commonwealth of Australia, 2025 Public Skills Australia

  - workplace documents including plans, procedures, records and forms
  - workplace instructions or briefs
  - specific regulations and animal welfare codes of practice
  - technical information and resources applicable to pest
  - specific SDS
- relationships:
  - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

In addition, the following specific assessor requirements apply to this unit if firearms are used to destroy animals:

- must possess firearms licences
- appropriate experience in using firearms for pest control.

AVIM0008 Operate a simulator

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to operate a simulator in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

Use of this unit for simulation activities outside of an aviation context is to be in accordance with relevant regulatory, organisational or enterprise procedures.

It includes applying simulation operations safety, conducting pre-operation planning, controlling a simulation activity and performing post-operation activities.

This unit addresses technical skill requirements (physical, mental and task-management abilities) related to training and assessment duties of simulator operators, instructors and assessors, and contributes to safe and effective performance in simple and/or complex operational or training environments.

Operations are conducted as part of recreational, commercial and military simulation activities across a variety of operational contexts within the Australian aviation industry, or other vocational operating environments when required.

Work is performed independently or under limited supervision as a single operator or within a team environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

M – Training and Assessment

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Apply simulation operations safety	**1.1** Access and egress to simulator is conducted in accordance with workplace procedures
	1.2 Safety and emergency procedures are communicated and actioned as required
	1.3 Simulator serviceability is monitored in accordance with workplace procedures
	1.4 Effects of simulation sickness are communicated to participants and treated as required in accordance with workplace procedures
	1.5 Workplace safety communications are followed in accordance with workplace procedures
2 Conduct pre-operation planning	**2.1** Appropriate simulation equipment is selected
	2.2 Simulation activity plan is developed in accordance with activity requirements
	2.3 Operating manuals are used to support work practices
	2.4 Simulation data is accessed to suit work practices in accordance with workplace procedures
	2.5 Simulation data is manipulated to suit work requirements in accordance with workplace procedures
	2.6 Simulation data is saved in accordance with workplace procedures
	2.7 Simulation data is stored to suit work requirements in accordance with workplace procedures
3 Control a simulation activity	**3.1** Liaison with relevant personnel is conducted to determine simulation activity requirements
	3.2 Simulation activity is commenced
	3.3 Simulation equipment is employed

© Commonwealth of Australia, 2025 Public Skills Australia

	3.4	Communication with simulation activity participants is maintained
	3.5	Abnormal/unusual conditions are monitored and addressed
	3.6	Variations to activity conditions are made as requested/required
	3.7	Activity is ceased in accordance with simulation activity plan
4 Perform post-operation activities	**4.1**	Simulation results are saved in accordance with workplace procedures
	4.2	Activity participants are debriefed as required
	4.3	Simulator faults are recorded in accordance with workplace procedures
	4.4	Simulation equipment is refurbished/maintained in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIM5001 Operate a simulator.

Assessment Requirements for AVIM0008 Operate a simulator

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- accessing simulation data, including:
  - downloading from database
  - inserting a digital storage device
  - opening applications, directories and files
- applying fine physical motor skills
- communicating safety and emergency procedures
- communicating simulation sickness effects
- completing administrative tasks and functions related to simulator operations, including:
  - simulation activity planning
  - participant performance records and reports
  - simulation safety briefs
  - participant briefings/debriefings
- coordinating activities that involve a range of simple and/or complex tasks
- conducting access and egress, including:
  - appropriate and safe entry to simulator in accordance with organisational work health and safety (WHS) and security policies
  - appropriate and safe exit methodologies from simulators
  - interpretation of signage, safety warnings and simulator status
  - monitoring access of visitors to simulator and providing safety/security briefs as required
- coordinating information communication technology related activities
- creating and storing documents using information communication technology
- identifying and rectifying abnormal/unusual simulator conditions, including:
  - participant simulation sickness
  - equipment malfunction/failure
  - smoke or overheat warnings
  - emergency communication
  - loading stops
  - motion stops

© Commonwealth of Australia, 2025 Public Skills Australia

    - hardware malfunction/failure
    - software malfunction/failure
    - poor/unusual participant performance
    - personnel equipment malfunction/failure
- implementing WHS procedures and relevant regulations
- implementing simulation activity variations, including:
    - adapting scenarios/activities based on participant feedback and/or performance
    - modifying hardware configurations
- modifying software settings
- manipulating, saving and storing simulation data in accordance with workplace procedures
- monitoring and addressing abnormal/unusual conditions
- monitoring simulator serviceability, including:
    - ensuring simulator is maintained to a level satisfactory to comply with organisational requirements
    - recording hardware/software issues that may arise during the course of routine equipment operation
    - submission of routine maintenance documentation
- reading, comprehending and interpreting written technical English
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- recording simulator faults
- refurbishing/maintaining simulator equipment and operating systems in accordance with workplace procedures
- selecting and employing simulation equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- abnormal conditions, including hardware, software and equipment malfunction/failure and poor/unusual participant performance
- application of simulation and synthetic activities including live, virtual and constructive (LVC) simulations
- basic database management
- basic briefing and debriefing techniques, including:
    - simulator safety
    - simulation event review
- documentation production and safe storage
- effects of simulation sickness, including:
    - nausea subscale:
        - increased salivation

© Commonwealth of Australia, 2025 Public Skills Australia

    - sweating
    - nausea
    - stomach awareness
    - burping
  - oculomotor subscale:
    - fatigue
    - headache
    - eyestrain
    - difficulty focusing
  - disorientation subscale:
    - vertigo
    - dizzy (eyes open)
    - dizzy (eyes closed)
    - blurred vision
- established procedures applicable to simulation operations
- functions of single-user, multi-user and distributed user operating systems
- identification of signs/symptoms and methods of rectifying abnormal/unusual simulator conditions, including:
  - participant simulation sickness
  - equipment malfunction/failure
  - smoke or overheat warnings
  - emergency communication
  - loading stops
  - motion stops
  - hardware malfunction/failure
  - software malfunction/failure
  - poor/unusual participant performance
  - personnel equipment malfunction/failure
  - relevant WHS and environmental procedures and regulations applicable to simulation operations and personnel safety/individual safety considerations
  - safety briefings
  - access and egress procedures
  - reporting and recording simulation WHS issues
- information communications technology in the simulation and synthetic learning environment
- simulation activity variations, including:
  - adapting scenarios/activities based on participant feedback and/or performance
  - modifying hardware configurations
  - modifying software settings.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- appropriate simulation equipment must include one or more of the following:
  - access database
  - compact discs
  - computer software subclass
  - digital insertion devices
  - gaming software
  - personnel equipment (e.g. hearing protection, eye protection, clothing and footwear)
  - software applications
  - storage strategy within organisational databases
  - synthetic environment software (e.g. SETHI)
  - universal serial bus devices
  - web-based database
- simulator must include one or more of the following:
  - associated simulator computer hardware and software
  - desktop simulator
  - full motion simulator
  - flight training device
  - operating system
  - part-task trainer
  - simulator
  - single, multiple or team operator simulator
  - synthetic training device

© Commonwealth of Australia, 2025 Public Skills Australia

- virtual reality training system.

AVIM0009 Facilitate training in a synthetic environment

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to facilitate training in a synthetic environment in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

Use of the unit for simulation training activities outside of an aviation context is in accordance with relevant regulatory, organisational or enterprise procedures.

It includes planning a synthetic learning activity; preparing a trainee for these activities; and guiding, facilitating and monitoring learning. It also includes conducting post-training activities and reviewing facilitation processes.

This unit addresses vocational training technical skill requirements (physical, mental and task-management abilities) related to synthetic training and assessment duties of vocational instructors and assessors and contributes to safe and effective performance in simple and/or complex operational and training environments.

Operations are conducted as part of commercial and military vocational training activities across a variety of operational contexts within Australian industry.

Work is performed independently or under limited supervision as a single operator or within a team environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan a synthetic learning activity	**1.1** Learning strategy and/or learning program is accessed, read and interpreted to determine learning outcomes or objectives to be met and relevant delivery requirements
	1.2 Potential risks, including those associated with human factor aspects of synthetic training devices, are identified
	1.3 Limitations of synthetic training device are identified
	1.4 Delivery plan is developed to plan, manage and sequence synthetic training activities and events to ensure logical progression of learning content, trainee safety and continuity of trainee progress
	1.5 Technical and human factor requirements for synthetic environment, including safety and emergency procedures, are confirmed
2 Prepare trainee for synthetic training activities	**2.1** Availability of suitable resources is confirmed
	2.2 Mental and physical preparedness of trainee to undertake training in synthetic environment is confirmed
	2.3 Introduction to synthetic environment is provided, including training objectives and relevant workplace procedures
	2.4 Instructional relationships are established between trainer/facilitator and trainees using appropriate communication tools and skills
	2.5 Trainee is briefed on how synthetic training activity will be conducted to meet training objectives
	2.6 Risk management issues applicable to synthetic training activity are discussed with trainee and trainee responsibility for managing relevant risks is confirmed
	2.7 Trainee ability to comprehend and/or recall training objectives, knowledge, handling techniques and planned

© Commonwealth of Australia, 2025 Public Skills Australia

		synthetic training activity/scenario is confirmed
3	**Guide and facilitate learning in a synthetic environment**	**3.1** Liaison with relevant personnel is conducted to determine simulation activity requirements
		3.2 Learning is facilitated in accordance with delivery plan using relevant synthetic devices and facilitation skills
		3.3 Good practice in facilitating learning in a synthetic environment is applied to ensure an effective and safe transfer of learning to the real world
		3.4 Technical issues are addressed as required using relevant technical support mechanisms and/or personnel
		3.5 Opportunities for authentic learning, practice and formative assessment are built into the learning experience
		3.6 Pre-loaded automatic demonstrations are employed as required
		3.7 Abnormal/unusual conditions are monitored and addressed
		3.8 Variations to activity conditions are implemented as required
		3.9 Handover/takeover procedures for control of synthetic device are implemented in accordance with workplace procedures
4	**Monitor learning in a synthetic environment**	**4.1** Trainee progress is monitored and documented in accordance with workplace procedures
		4.2 Trainee cognitive load is assessed, monitored and managed
		4.3 Support and guidance are provided within synthetic environment as appropriate
		4.4 Trainee is encouraged to develop self-assessment skills
		4.5 Trainee interaction with others and participation in synthetic training activities is continuously monitored, and interventions are made as required
		4.6 Opportunities are provided for trainees to reflect on their learning progress

© Commonwealth of Australia, 2025 Public Skills Australia

5	**Conduct post-training activities**	**5.1** Significant details of trainee performance are clearly and accurately debriefed
		5.2 Playback devices are employed during debriefing to illustrate key learning points as required
		5.3 Trainee is briefed on details of next training event as required
		5.4 Trainee records are maintained in accordance with workplace procedures
		5.5 Relevant stakeholders are kept informed about trainee progress
		5.6 Synthetic device faults are recorded and/or rectified in accordance with workplace procedures
		5.7 Support and guidance are provided post-synthetic environment activities as required
6	**Review synthetic environment facilitation processes**	**6.1** Synthetic training session outcomes are evaluated against desired session outcomes
		6.2 Review is undertaken post-completion of learning program, course or qualification
		6.3 Time is taken to reflect on own performance as a trainer or facilitator, and ways to improve performance are explored
		6.4 Recommendations for improvements in facilitating training and appropriateness of synthetic systems, tools and resources are identified and documented, and discussed with relevant personnel for future action

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

© Commonwealth of Australia, 2025 Public Skills Australia

Unit Mapping Information

This unit replaces and is equivalent to AVIM5004 Facilitate training in a synthetic environment.

Assessment Requirements for AVIM0009 Facilitate training in a synthetic environment

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying flexibility in facilitation when using synthetic devices, including:
  - applying intervention techniques
  - assessing learning and performance
  - effectively using a variety of activities or providing directions for different trainee needs
- conducting briefings and debriefings
- confirming technical and human factor requirements for a synthetic environment
- following safety and emergency procedures, including established procedures and industry safe practice
- coordinating activities involving a range of complex tasks
- coordinating information communications technology related activities
- debriefing significant details of trainee performance
- developing a delivery plan that ensures logical progression of learning content, trainee safety and continuity of trainee progress, including:
  - determination of learning management tools, such as feedback systems and support mechanisms
  - individual/group learning objectives or outcomes for learning program or segment of learning program to be addressed
  - learning/activities/events to be addressed in e-learning sessions
  - number of trainees and their specific support requirements
  - resources and/or tools to be used
  - timing, sequence and number of pre-planned sessions
  - types of pre-planned sessions – synchronous (in real time using conferencing, chats and forums) or asynchronous (not in real time using email, offline forums and bulletin boards)
  - topics to be addressed in learning sessions
- evaluating instructional effectiveness
- identifying potential risks, including those associated with human factor aspects of synthetic

© Commonwealth of Australia, 2025 Public Skills Australia

training devices
- identifying potential risks, including:
  - effects on what is learned and relationship with the real world
  - negative learning
- implementing handover/takeover procedures for control of synthetic device in accordance with workplace procedures
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting trainee needs and directing them to new learning opportunities
- maintaining trainee records in accordance with workplace procedures
- managing an environment that fosters learning and performance
- monitoring and addressing abnormal/unusual conditions
- monitoring and documenting trainee progress in accordance with workplace procedures
- reading, comprehending and interpreting written technical English
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying problems, faults or malfunctions promptly in accordance with workplace procedures
- selecting and employing appropriate simulation equipment
- selecting and using required personal protective (PPE) equipment conforming to industry and WHS standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- abnormal conditions, including hardware, software and equipment malfunction/failure and poor/unusual trainee performance, including:
  - emergency communication
  - equipment malfunction/failure
  - hardware malfunction/failure
  - loading stops
  - motion stops
  - participant simulation sickness
  - personnel equipment malfunction/failure
  - poor/unusual participant performance
  - smoke or overheat warnings
  - software malfunction/failure
- advantages of synthetic training environments in facilitating learning
- limitations of synthetic training devices, including:

© Commonwealth of Australia, 2025 Public Skills Australia

  - fidelity
  - instrumentation
  - movement
  - resolution
- good practice in facilitating learning in a synthetic environment, including:
  - assisting trainees in locating, using and evaluating online information
  - facilitating group work
  - guiding learning activities through setting up questions, issues, scenarios to be addressed
  - knowing when to intervene/when to let trainees direct themselves
  - maintaining momentum and motivation of trainees through ongoing individual contact and feedback
  - moderating disruptive, abusive or dominant trainees
  - observing trainee interaction and intervening as required to maintain focus/momentum/engagement
- application of simulation and synthetic activities including live, virtual and constructive (LVC) simulations
- common trainee errors and suggested suitable remedial instruction
- risk management issues, including:
  - emergency communication
  - equipment malfunction/failure
  - fidelity and resolution constraints/limitations smoke or overheat warnings
  - loading stops
  - motion stops
  - negative learning
  - simulator access/egress
  - simulation/motion sickness
  - threat and error management (TEM)
- debriefing and feedback techniques, including:
  - individual versus group debrief
  - basic techniques:
    - review simulation event
    - recall what happened
    - clarify facts
    - correct misconceptions
    - reinforce specific learning outcomes
  - intermediate techniques:
    - guided reflection of event
    - coaching methodology
    - transfer learning responsibility to participants
    - decision-making analysis

© Commonwealth of Australia, 2025 Public Skills Australia

        - cost versus benefit/trade-offs
        - skill and knowledge technique enhancement
    - advanced techniques:
        - less guidance
        - using media/checklists/video
        - oral and written evaluation
        - part of group talks/part listens
        - varied perspective (observers)
        - developing and evaluating new concepts
        - developing self-evaluative learning in participants
- debrief of stakeholders, including:
    - feedback to manufacturer, contracted suppliers and contracted maintainers
    - feedback to relevant organisational authorities
    - feedback to relevant personnel on conclusion of simulator activity
- documentation production and safe storage
- effective use of a course of training, curricula/syllabus and lesson plans
- effects of simulation sickness:
    - nausea subscale:
        - increased salivation
        - sweating
        - nausea
        - stomach awareness
        - burping
        - oculomotor subscale:
        - fatigue
        - headache
        - eyestrain
        - difficulty focusing
    - disorientation subscale:
        - vertigo
        - dizzy (eyes open)
        - dizzy (eyes closed)
        - blurred vision
        - established procedures applicable to simulation operations
- variations to training activity:
    - changes made in response to a strategic requirement
    - changes made in response to a training need
- functions of single-user, multi-user and distributed user operating systems
- fundamentals of instructing, questioning, engaging and motivating trainees
- handover/takeover procedures for controlling synthetic device/s

- how to distinguish between a technical problem and a content problem, and how to respond accordingly
- human factors implication and risks in a synthetic training environment
- information communications technology in a simulation and synthetic environment
- intervention strategies, principles and implications for a synthetic environment
- relevant learning management systems
- relevant WHS and environmental procedures and regulations applicable to simulation operations and personnel safety
- relevant sections of national and state/territory regulatory requirements and codes of practice
- sequencing and developing synthetic training activities and their relationship with real world training activities
- structure and content of relevant training resources
- techniques for introducing tasks in manageable segments to avoid overloading a trainee
- training and assessment competency standards
- cognitive load assessment, including:
  - anxiety
  - apathy
  - fatigue
  - impatience
  - inadequate demonstration
  - inadequate fault analysis
  - inadequate opportunity to practice
  - information overload
  - lack of preparation
  - outside pressures
  - physical discomfort
  - task complexity
  - unreasonable expectations
- when to intervene and when to let trainees direct themselves
- when interventions must be made to:
  - address safety
  - engage trainee
  - highlight a key learning point
  - initiate remedial actions
  - maintain momentum
- review of training, including:
  - effectiveness of learning protocols, their application and proposed changes
  - feedback from trainees, colleagues, learning designers via survey or discussion
  - identification of issues in managing/monitoring e-learners and the need for changes to contact/monitoring processes
  - identification of issues in using a delivery plan and the need for changes/modifications to

the plan
    - technology effectiveness
- self-reflection, including:
    - asking critical questions about performance, problems, methods used and success of trainees
    - seeking, listening to and acting on feedback from trainees and others.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.

Synthetic training devices must include one of the following:

- associated simulator computer hardware and software
- desktop simulator
- flight training device
- full motion simulator
- operating system
- part-task trainer
- simulator
- single, multiple or team operator simulator
- synthetic training device
- virtual reality training system.

AVIW3006 Refuel aircraft

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to refuel aircraft, in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes conducting pre-operational checks on fueller/dispenser vehicle and equipment, loading fueller, and positioning fueller/dispenser vehicle. It also includes carrying out refuelling operations, completing post-refuelling operations, and completing documentation.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to equipment and system operations of ground operations personnel, and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision as a single operator or within a team environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Use for Defence Aviation is to be in accordance with relevant Defence Orders, Instructions, Publications and Regulations.

Pre-requisite Unit

Not applicable.

Competency Field

W – Equipment and Systems Operations

© Commonwealth of Australia, 2025 Public Skills Australia

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Conduct pre-operational checks on fueller/dispenser vehicle and equipment	1.1 Personal protective equipment is selected and used in accordance with workplace procedures
	1.2 Hazards are identified, risks are assessed and hazard management is implemented
	1.3 Pre-operational checks of fueller/dispenser vehicle and auxiliary equipment are conducted
	1.4 Problems or defects identified during pre-operational checks are reported or rectified in accordance with workplace procedures and manufacturer requirements
	1.5 Outcomes of pre-operational checks are reported and recorded
2 Load fueller	2.1 Vehicle is positioned at loading bay and all precautionary and reporting requirements are carried out
	2.2 Vehicle is grounded and loading bay bonding lead is connected to fueller
	2.3 Fueller is dipped and ullage is determined
	2.4 Loading operations and quality control checks are completed
3 Position fueller/dispenser vehicle	3.1 Fueller/dispenser vehicle is moved to aircraft
	3.2 Aircraft is approached after checks are made to confirm aircraft engines have stopped and aircraft wheel chocks are in place
	3.3 Vehicle is positioned either underwing or standoff, depending on aircraft type
	3.4 Appropriate precautions are taken to avoid risk of collision with aircraft control surfaces and engines

© Commonwealth of Australia, 2025 Public Skills Australia

	3.5	Fueller/dispenser vehicle is parked in a position that provides easiest route for evacuation in an emergency
4 Carry out refuelling operations	4.1	Vehicle is grounded and bonding lead is connected to aircraft
	4.2	Pressure refuelling auxiliary equipment is positioned and hose is connected
	4.3	Hydrant dispenser delivery hoses and couplings are connected to aircraft and intake hose is connected to inlet coupler
	4.4	Aircraft is refuelled to required fuel quantity or tank capacity
5 Complete post-refuelling operations	5.1	Refuelling operations are completed
	5.2	Fuel sample is taken from filter sump/inlet and visual check is made prior to aircraft departure
	5.3	Hoses, couplings and auxiliary equipment are disconnected and stowed
	5.4	Hydrant dispenser lanyard is disconnected, and pit valve dust cover and hydrant pit lid are replaced
	5.5	Reel hoses are rewound and stowed
	5.6	Fueller/dispenser vehicle is driven either to depot or to next aircraft in accordance with workplace procedures, regulatory requirements and local instructions
6 Complete documentation	6.1	Hard copy documentation and paperwork is completed as required and airline representative's signature is obtained
	6.2	Electronic fuel management systems are used to report, record and verify refuel operations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

© Commonwealth of Australia, 2025 Public Skills Australia

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Pre-operational checks must include:	• air-pressure after start-up • auxiliary equipment • brake interlock override switch seal • brake test • fire extinguishers • personal protective equipment (PPE) • radio check with base • required documentation • sampling equipment and water detection capsules • serviceability of ladder or portable steps • sufficient fuel in fueller for planned refuelling job • vehicle parked in designated area • visual inspection for leaks, defects and obstructions
Personal protective equipment must include:	• approved uniform • gloves • hearing protection • high visibility clothing • mask or respirator • safety glasses • safety headwear and footwear
Hazards must include one or more of the following:	• contamination of, or from, materials being handled • dust • fuel vapours • hazardous or dangerous materials • hot engines, static electricity, sparks and other forms of ignition • jet blast • noise • other additives (such as water, methanol, icing inhibitors) • other vehicles on tarmac • rotating propellers • spill, leakages, ruptures

Unit Mapping Information

This unit replaces and is equivalent to AVIW3006B Refuel aircraft.

Assessment Requirements for AVIW3006 Refuel aircraft

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS)/occupational health and safety (OHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures and local instructions
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS/OHS standards
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- differences in refuelling procedures for various types of aircraft
- emergency procedures
- manufacturer instructions for fueller vehicle and auxiliary equipment
- relevant Australian Standards
- relevant information/documents:
  - airport airside driver handbook
  - conditions of service, legislation and industrial agreements including workplace agreements and awards
  - flight schedules
  - relevant International Air Transport Association (IATA) fuel guidelines
  - induction and training materials
  - loading and fuelling operational checklists
  - manufacturer specifications and instructions for fueller/dispenser vehicle and auxiliary equipment
  - workplace instructions and job specification
- relevant legislation and regulations such as the Australian Dangerous Goods Code (ADG) Code
- people to consult about refuelling operations:
  - aircrew
  - airline engineers or representatives
  - ground support staff
  - other refuelling staff
  - supervisors and managers
  - technical staff
- principles and processes of aircraft refuelling
- problems that may occur when refuelling an aircraft and appropriate action that should be taken in each case
- relevant sections of Civil Aviation Safety Regulations (CASRs) and Civil Aviation Orders and other regulations for the refuelling of aircraft
- relevant WHS/OHS and environmental procedures and regulations
- risks that exist when refuelling an aircraft and related risk control procedures and precautions
- selection and correct fitment of PPE
- workplace procedures for loading a fueller and refuelling aircraft.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in *the Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

BSBADM101 Use business equipment and resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to choose equipment and resources to complete a variety of tasks under direct supervision.

It applies to individuals looking to develop the basic skills and knowledge required to use a variety of business equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – General Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Select equipment or resources	1.1 Identify and access business equipment or resources required to complete the task under direct instructions 1.2 Estimate quantities and resources correctly to complete the task 1.3 Check equipment for serviceability in accordance with equipment instructions
2 Operate equipment	2.1 Operate equipment in accordance with manufacturer's specifications and under direct instructions 2.2 Identify equipment faults accurately and take action to ensure

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	equipment is repaired in accordance with manufacturer's specifications 2.3 Report repairs outside area of own responsibility to appropriate persons
3 Maintain equipment or resources	3.1 Maintain equipment or resources to support completion of tasks under direct instructions 3.2 Undertake maintenance to ensure equipment meets manufacturer's specifications 3.3 Maintain records concerning equipment or resources under direct instructions 3.4 Store equipment and resources under direct instructions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 2.1, 3.3	• Comprehends and follows instructions in familiar texts
Writing	3.3	• Records and updates documents according to instructions
Oral Communication	1.1, 2.3, 3.1, 3.4	• Comprehends simple instructions • Asks clarifying questions and responds to answers
Numeracy	1.2	• Uses rounding and other mathematical techniques to estimate quantity requirements
Navigate the world of work	2.3	• Follows organisational procedures when tasks are beyond own level of responsibility
Get the work done	1.1, 1.2, 1.3, 2.2, 3.1-3.4	• Follows clearly defined instructions provided by others • Completes routine tasks taking some limited responsibility for decisions regarding equipment and resource choices, operation and maintenance • Responds to routine problems by referring to instructions or standard procedures

Assessment Requirements for BSBADM101 Use business equipment and resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- choose equipment and resources required for tasks
- operate equipment according to manufacturer or organisational requirements
- report faults according to organisational requirements
- maintain equipment and records according to instructions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the functions of available business equipment
- list the key points in operating the available business equipment safely and correctly
- identify common equipment faults
- describe how to maintain and store equipment and resources.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the general administration field of work and include access to:

- operational and maintenance manuals
- organisational procedures related to operation and maintenance of equipment
- records relating to resources
- case studies and, where possible, real situations.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy NVR/AQTF assessor requirements.

BSBADM406 Organise business travel

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to organise domestic and overseas business travel, including developing associated itineraries, booking travel and accommodation, preparing travel related documentation and making travel arrangements.

It applies to individuals employed in a range of work environments who may work providing administrative support within an enterprise, or have responsibility for these tasks in relation to their own workgroup or role.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – General Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Organise business itinerary for domestic and overseas travel	1.1 Confirm purpose and requirements of domestic or overseas travel including planned itinerary, budget, meeting requirements and traveller preferences 1.2 Identify points of contact and names of contact persons, and make and confirm arrangements for meetings in accordance with planned itinerary 1.3 Prepare daily itineraries with appointments, arrival and

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	departure times, accommodation and other itinerary details in accordance with travel purpose 1.4 Source, prepare and provide documents and support material for meetings within designated timelines 1.5 Prepare itinerary in accordance with meeting requirements and traveller's work health and safety (WHS) requirements 1.6 Provide itinerary and meeting documents to the traveller within designated timelines
2 Make travel arrangements	2.1 Make bookings in accordance with organisational policies and procedures for business travel 2.2 Identify and arrange travel documents in accordance with itinerary and individual requirements 2.3 Confirm and check travel arrangements and dispatch confirmation documents to the traveller within designated timelines 2.4 Negotiate and confirm alternative arrangements in response to changed requirements 2.5 Record travel details and itinerary in accordance with organisational requirements 2.6 Negotiate and confirm communication arrangements in accordance with organisational requirements
3 Arrange credit facilities	3.1 Check and confirm methods of payment 3.2 Make credit arrangements in accordance with organisational policy and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.5, 2.1-2.3, 3.1, 3.2	• Researches and interprets information from various sources in a range of formats to establish and confirm travel requirements
Writing	1.1-1.5, 2.1-2.3, 2.5,	• Produces clear, detailed and logically organised texts in required format using vocabulary specific to travel

© Commonwealth of Australia, 2025 Public Skills Australia

	3.1, 3.2	requirements
Oral Communication	1.1, 1.2, 2.1, 2.4, 2.6	• Uses appropriate vocabulary, pitch and intonation to convey relevant information • Listens and asks questions to confirm requirements or clarify understanding
Numeracy	1.1, 1.3, 1.4, 1.6, 2.3, 3.1	• Interprets and comprehends a range of everyday mathematical information that is embedded in familiar texts • Uses basic mathematical formula to calculate credit requirements
Navigate the world of world	1.5, 2.1, 2.5, 2.6, 3.2	• Recognises and responds to both explicit and implicit organisational procedures and protocols and legislative/regulatory requirements
Interact with others	1.1, 1.4, 1.6, 2.1, 2.3, 2.4, 2.6	• Collaborates and negotiates with others to achieve agreeable outcomes, playing an active role in facilitating agreement • Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.1-1.6, 2.2, 2.3, 3.1	• Applies formal processes when planning complex tasks, producing plans with logically sequenced steps, reflecting an awareness of time constraints • Takes responsibility for the outcomes of routine decisions related directly to own role • Utilises a range of features within digital applications to improve personal productivity, optimising software functions for specific purposes

Assessment Requirements for BSBADM406 Organise business travel

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- organise business-related travel for others, including scheduling and developing itineraries and travel-related documents
- finalise all booking and travel arrangements including any necessary credit requirements according to predetermined budgets and time constraints.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify booking procedures relevant to business travel
- list the key provisions of relevant legislation that may affect aspects of business operations
- summarise organisational policies and procedures required to organise business travel, including use of internet sites and other online resources.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the general administration field of work and include access to:

- office equipment including telecommunications equipment
- travel-related reference material, such as accommodation and transport suppliers
- appointment books, scheduling software, diaries and other recording and scheduling systems
- preferred suppliers, contact details, websites
- maps.

BSBADM502 Manage meetings

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage a range of meetings including overseeing the meeting preparation processes, chairing meetings, organising the minutes and reporting meeting outcomes.

It applies to individuals employed in a range of work environments who are required to organise and manage meetings within their workplace, including conducting or managing administrative tasks in providing agendas and meeting material. They may work as senior administrative staff or may be individuals with responsibility for conducting and chairing meetings in the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – General Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Prepare for meetings	1.1 Develop agenda in line with stated meeting purpose 1.2 Ensure style and structure of meeting are appropriate to its purpose 1.3 Identify meeting participants and notify them in accordance with organisational procedures

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Confirm meeting arrangements in accordance with requirements of meeting 1.5 Despatch meeting papers to participants within designated timelines
2 Conduct meetings	2.1 Chair meetings in accordance with organisational requirements, agreed conventions for type of meeting and legal and ethical requirements 2.2 Conduct meetings to ensure they are focused, time efficient and achieve the required outcomes 2.3 Ensure meeting facilitation enables participation, discussion, problem-solving and resolution of issues 2.4 Brief minute-taker on method for recording meeting notes in accordance with organisational requirements and conventions for type of meeting
3 Follow up meetings	3.1 Check transcribed meeting notes to ensure they reflect a true and accurate record of the meeting and are formatted in accordance with organisational procedures and meeting conventions 3.2 Distribute and store minutes and other follow-up documentation within designated timelines, and according to organisational requirements 3.3 Report outcomes of meetings as required, within designated timelines

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 3.1, 3.2	• Identifies and interprets information from complex texts including legislation, organisational policies and procedures • Compares final output with original notes to check for accuracy
Writing	1.1-1.5, 3.2, 3.3	• Addresses the context, purpose and audience when generating a range of texts • Prepares complex texts from notes using appropriate

© Commonwealth of Australia, 2025 Public Skills Australia

		structure, and accurate spelling, grammar and punctuation • Records notes of meeting proceedings according to organisational requirements • Edits and corrects own work to ensure accuracy
Oral Communication	2.1-2.4	• Participates in verbal exchanges using appropriate style, tone and vocabulary for audience, context and purpose • Listens for specific information during meetings • Asks questions and listens to responses to clarify understanding
Numeracy	1.4, 1.5, 3.2, 3.3	• Recognises and interprets numerical information related to timeframes and budgets
Navigate the world of work	1.3, 2.1, 2.4, 3.1, 3.2	• Recognises and responds to both explicit and implicit organisational procedures and protocols and legislative/regulatory requirements
Interact with others	1.3, 1.5, 2.3, 3.2	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Cooperates with others as part of familiar activities, playing an active role in facilitating group interaction
Get the work done	1.1, 1.3, 1.4, 1.5, 2.1, 2.2, 2.4, 3.1, 3.2, 3.3	• Applies formal processes when planning complex tasks, producing plans with logically sequenced steps, reflecting an awareness of time constraints • Recognises and takes responsibility for addressing predictable problems in familiar work contexts

Assessment Requirements for BSBADM502 Manage meetings

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply conventions and procedures for formal and informal meetings including:
  - developing and distributing agendas and papers
  - identifying and inviting meeting participants
  - organising and confirming meeting arrangements
  - running the meeting and following up
- organise, take part in and chair a meeting
- record and store meeting documentation
- follow organisational policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline meeting terminology, structures, arrangements
- outline responsibilities of the chairperson and explain group dynamics in relation to managing meetings
- describe options for meetings including face-to-face, teleconferencing, web-conferencing and using webcams
- identify the relevant organisational procedures and policies regarding meetings, chairing and minutes including identifying organisational formats for minutes and agendas.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the general administration field of work and include access to:

© Commonwealth of Australia, 2025 Public Skills Australia

- reference material in regard to meeting venues and technology, catering and transport suppliers
- organisational policies and procedures for managing meetings
- office supplies and equipment
- computers and relevant software
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBAUD411 Participate in quality audits

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to prepare for and participate in quality audits as a member of a quality audit team. The types of audits may include internal or external systems audits, process audits or product/service audits. The process includes reviewing designated documentation; identifying and developing checklists and audit related documentation; preparing audit plans and evaluating information; and reporting findings to the lead auditor.

The unit applies to individuals with a broad knowledge of the quality auditing environment, who gather, analyse and evaluate information from a variety of sources and provide objective audit findings, to be included as part of the audit report.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Audit and Compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Review own role and documentation	1.1 Review own role and responsibilities within quality audit team 1.2 Review previous quality audits and determine impact on conduct of current audit, where required 1.3 Source required organisational documentation from lead auditor, and check the adequacy of the documentation 1.4 Review documents, and determine and request further documentation required

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.5 Identify and resolve documentation issues with lead auditor and relevant stakeholders, within scope of own role 1.6 Identify aspects of the audit that require the use of specialists and refer to lead auditor
2. Participate in audit preparation	2.1 Access or prepare checklists, tools and audit related documentation 2.2 Confirm schedule and required resources with lead auditor 2.3 Prepare for possible issues and outline mitigation strategies 2.4 Confirm that preparation activities and documentation align with the audit plan with required personnel 2.5 Determine appropriate methods and techniques in consultation with auditing team 2.6 Create entry and exit meeting agendas according to organisational templates, and present to required audit team member, where required 2.7 Participate in entry meeting
3. Gather and analyse information	3.1 Access a range of sources of information relevant to task 3.2 Collect, and make an initial assessment of, documentation 3.3 Communicate with relevant parties in relation to documentation 3.4 Analyse patterns, trends, interrelationships and areas of risk, and communicate to team according to own role and responsibilities
4. Evaluate information	4.1 Evaluate information against prescribed benchmarks 4.2 Form an objective decision regarding the level of compliance found 4.3 Check decision is formed from and supported by available information
5. Report findings	5.1 Formulate findings and prepare recommendations on corrective actions if discrepancies or non-compliances are detected 5.2 Examine results and findings against audit objectives and present to lead auditor 5.3 Report recommendations for improvements to lead auditor according to agreed documentation
6. Participate in exit meeting process	6.1 Prepare for exit meeting using exit meeting agenda 6.2 Confirm context and consequences of audit are explained, and follow-up is discussed

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Identifies and interprets information from organisational documentation and workplace procedures
Writing	• Records or amends information and conveys details • Produces reports matching style of writing to purpose and audience
Oral Communication	• Participates in spoken exchanges using structure and language to suit the audience • Listens for required information and asks clarifying questions
Teamwork	• Collaborates and cooperates with others to achieve joint outcomes • Selects and uses appropriate conventions and protocols when communicating with team members and other people in a range of work contexts
Self-management	• Organises, plans and prioritises workload with some sense of what can be achieved in a timeframe
Problem solving	• Recognises and addresses some problems within own scope, recognising when to seek the expertise of others
Technology	• Uses digital tools and systems to report audit findings

Unit Mapping Information

Supersedes and is equivalent to BSBAUD402 Participate in a quality audit.

Assessment Requirements for BSBAUD411 Participate in quality audits

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- participate in a quality audit as a member of a quality audit team on at least two occasions.

In the course of the above, the candidate must:

- source and review documentation
- develop audit plan using tools and strategies
- use predetermined reference criteria to evaluate findings and formulate well-founded objective decisions
- contribute to preparation of a corrective action report
- use terminology relating to auditing in written and oral communications.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- auditing benchmarks
- auditing methods and techniques
- current audit practices
- current industry products and services that support the auditing process
- key components of an audit plan
- patterns, trends, interrelationships and areas of risk in an organisational quality system
- key features of technology required for quality auditing participation and reporting.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

© Commonwealth of Australia, 2025 Public Skills Australia

This includes access to:

- workplace documentation including previous quality audit reports, checklists, risk management plans and audit plans.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBAUD412 Work within compliance frameworks

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to identify statutory, legislative and regulatory requirements and relate them to individual work practices to ensure ongoing adherence to the compliance framework.

The unit applies to individuals who carry out work in accordance with the compliance framework applying to a particular job role, occupation or profession.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Audit and Compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify compliance requirements	1.1 Identify and document statutory, legislative and regulatory requirements relevant to job role and industry 1.2 Identify and document organisational and industry requirements
2. Interpret compliance requirements	2.1 Map compliance requirements against position description and work practices 2.2 Discuss ethical considerations with relevant stakeholders

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3. Manage personal compliance	3.1 Consult with relevant stakeholders and identify procedures to be applied, applicable to work environment and own job role 3.2 Evaluate own actions in the context of compliance requirements 3.3 Record own compliance action according to organisational policies and procedures
4. Review own compliance	4.1 Seek feedback on personal compliance from relevant personnel 4.2 Access and analyse documentation relating to changes in compliance requirements 4.3 Discuss feedback and documentation with relevant personnel and check own ongoing compliance 4.4 Identify required changes to own compliance practice

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Identifies and analyses statutory, legislative and regulatory requirements to determine key information, specific requirements and responsibilities
Writing	• Collates and compiles information gathered from multiple sources in required format for using technical and enterprise specific language
Oral Communication	• Discusses compliance using structure and language to suit the audience • Uses listening and questioning techniques to confirm understanding of compliance requirements
Self-management	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements

Unit Mapping Information

Supersedes and is equivalent to BSBCOM406 Conduct work within a compliance framework.

Supersedes but is not equivalent to:

- BSBCOM401 Organise and monitor the operation of compliance management system
- BSBCOM402 Implement processes for the management of a breach in compliance requirements

© Commonwealth of Australia, 2025 Public Skills Australia

- BSBCOM403 Provide education and training on compliance requirements and systems
- BSBCOM404 Promote and liaise on compliance requirements, systems and related issues
- BSBCOM405 Promote compliance with legislation
- BSBEDU301 Assist with monitoring compliance in international education services.

Assessment Requirements for BSBAUD412 Work within compliance frameworks

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- on at least two occasions, interpret and apply personal compliance requirements for job role and industry.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislation, regulations and codes of conduct relevant to job role, occupation and profession
- sources of information to ensure currency with changes in compliance requirements
- organisational policies and procedures relevant to compliance framework in relevant industry
- individual work requirements and practices
- methods to map compliance requirements.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulations and codes of conduct relevant to job role, occupation and profession
- position descriptions
- organisation policies and procedures relevant to performance evidence.

BSBAUD501 Initiate a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to initiate and organise a quality audit with an auditee. It covers assessing the scope and objectives of a quality audit; communicating with the auditee regarding the proposed quality audit; identifying resources required to conduct the audit; and developing and submitting a quality audit plan. The types of audits may include external or internal systems audits or process or product/service audits.

It applies to individuals with a well-established theoretical knowledge base in quality auditing who are proficient in using a wide range of specialised, quality auditing and managerial techniques to plan, carry out and evaluate a quality audit. Individuals also supervise and monitor the processes and outcomes of others working in a quality audit team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Quality Auditing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Assess quality audit scope and objectives	1.1 Determine and discuss audit objectives with the auditee, client and all other relevant parties 1.2 Determine and discuss scope of the quality audit with the auditee, client and all other relevant parties

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.3 Identify relevant standards that impact the environment in which the audit operates 1.4 Determine scope commensurate with identified risks
2 Communicate with auditee regarding proposed quality audit	2.1 Determine audit history, organisational structure and culture through consultation with the auditee 2.2 Negotiate and ensure agreement with auditee, the proposed audit methods and techniques to be applied 2.3 Outline audit processes to establish sequence of audit activities, and the roles of the auditors and auditees in the process
3 Identify resources required to conduct quality audit	3.1 Identify resources required to perform the quality audit efficiently and effectively 3.2 Select audit team members on the basis of relevant expertise 3.3 Confirm availability of resources required to conduct the audit with auditee 3.4 Assign roles and responsibilities to audit team members
4 Develop and submit quality audit plan	4.1 Develop quality audit plan according to established scope and objectives 4.2 Assign timing, schedules and responsibilities for implementation of the audit plan 4.3 Develop audit priorities and ensure agreement with auditees and audit team members 4.4 Document and submit audit plan to auditee
5 Prepare audit team	5.1 Inform audit team members of their responsibilities, audit objectives and scope 5.2 Communicate audit plan and schedules to all audit team members 5.3 Discuss and clarify audit methods and techniques with audit team members
6 Review auditee documentation	6.1 Review auditee’s previous audits to establish possible impact on the conduct of the current audit 6.2 Review and check relevant organisational documents for accuracy 6.3 Resolve arising problems with auditee and relevant parties
7 Identify and prepare checklists and audit	7.1 Develop checklists to reflect audit scope and objectives

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
related documentation	7.2 Develop or obtain documentation required for the audit 7.3 Prepare agenda for entry meeting 7.4 Include value-adding activities in audit related documentation where required

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 4.1, 6.1, 6.2, 7.1	• Interprets and analyses information from organisational documentation
Writing	4.1-4.4, 6.2, 7.1-7.4	• Develops a range of documents using structure, tone and vocabulary appropriate to audience, context and purpose • Records or amends information and conveys details in accordance with audit objectives
Oral Communication	1.1, 1.2, 2.1-2.3, 4.3, 5.1-5.3, 6.3	• Participates in spoken exchanges using structure and language to suit the audience • Uses questioning and listening techniques to clarify requirements
Numeracy	4.2	• Uses mathematical calculations for project scheduling
Navigate the world of work	1.3	• Monitors adherence to organisational policies and relevant standards and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.2, 2.1, 2.2, 3.4, 4.4, 5.1, 5.2	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Recognises the importance of building rapport and building effective working relationships • Collaborates with others to negotiate acceptable outcomes, playing an active role in facilitating effective group interaction
Get the work done	1.1, 1.2, 1.4, 2.1, 2.3, 3.1, 3.2, 4.1,	• Organises, plans and sequences own workload and schedules work activities of others • Uses analytical processes to decide on a course of

© Commonwealth of Australia, 2025 Public Skills Australia

	4.2, 4.3, 6.1, 6.3	action, establishing criteria for deciding between options and seeking advice from others before taking action when necessary • Addresses some unfamiliar problems of increasing complexity within own scope, recognising when to seek the expertise of others

Assessment Requirements for BSBAUD501 Initiate a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce documented audit plans for auditees across a variety of contexts including:
  - the scope and objectives of the audit
  - proposed audit methods and techniques to be used
  - required resources and schedules
  - allocation of individual audit team member responsibilities for conducting the proposed audit.
- use terminology relating to quality auditing in written or oral communications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the relevant auditing codes of practice or ethics
- describe auditing methods and techniques
- outline the requirements of auditing regulations and standards
- identify current audit practices
- outline quality auditing principles, techniques and systems
- describe the requirements of house or other style manual protocols for written communications
- identify software applications relevant to quality auditing activities.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk – quality auditing field of work and include access to:

© Commonwealth of Australia, 2025 Public Skills Australia

- workplace documentation including previous quality audit reports, checklists, risk management plans and audit plans.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBAUD503 Lead a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead an audit team as it runs a quality audit. It covers conducting entry and exit meetings; identifying and gathering relevant information; managing audit team resources; and providing feedback to audit team members on their performance. The types of quality audit that may be covered by this unit include an external or internal systems audit or process or product/service audit.

It applies to individuals with a well-established theoretical knowledge base of quality auditing, who are proficient in using a wide range of specialised quality auditing and managerial techniques to carry out their own work and to supervise the quality audit team. It is relevant to audits where a lead auditor is responsible for a quality audit team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Quality Auditing

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Conduct entry meeting	1.1 Organise entry meeting in advance at a mutually agreed time 1.2 Prepare agenda for audit 1.3 Confirm objectives and scope of audit at entry meeting 1.4 Confirm schedules and logistical arrangements at entry

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	meeting 1.5 Make changes to plan, schedules and arrangements where required
2 Identify and gather information	2.1 Identify a range of potential sources of information 2.2 Interview appropriate persons 2.3 Gather relevant information and sample documentation
3 Manage audit team resources	3.1 Supervise activities of audit team members 3.2 Assess and review audit team findings in line with audit scope 3.3 Re-assign team members as required 3.4 Instigate contingency actions as required 3.5 Seek and reach agreement on corrective action reports
4 Conduct exit meeting	4.1 Make preparations for exit meeting 4.2 Examine results and findings against audit objectives and present to auditee 4.3 Ensure reporting arrangements are agreed on 4.4 Explain context and consequences of audit and discuss during follow-up
5 Guide team members in continuously improving their performance	5.1 Provide feedback on performance to audit team members 5.2 Encourage and support audit team members to critique their own work 5.3 Provide and document advice for individual improvement

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	3.2, 4.2	• Interprets and analyses information from audit scoping materials
Writing	1.2, 1.5, 5.3	• Develops a range of documents using relevant structure, tone and vocabulary appropriate to audience,

© Commonwealth of Australia, 2025 Public Skills Australia

		context and purpose • Records or amends information and conveys details in accordance with audit objectives
Oral Communication	1.3, 1.4, 2.2, 3.5, 4.2-4.4, 5.1, 5.2, 5.3	• Participates in spoken exchanges using clear language, tone and pace • Uses questioning and listening techniques to clarify requirements
Numeracy	4.2	• Uses mathematical calculations to analyse and arrange numeric information
Interact with others	1.3, 1.4, 2.2, 3.1, 3.3, 4.2-4.4, 5.1, 5.2, 5.3	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Recognises the importance of rapport in establishing and building effective working relationships • Collaborates with others to negotiate acceptable outcomes, playing an active role in directing and facilitating effective group interaction
Get the work done	1.1, 1.2, 1.4, 2.1, 2.3, 3.2, 3.3, 3.4, 4.1	• Organises, plans and sequences own workload and schedules work activities of others • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant information and evaluate appropriate strategies to achieve objectives • Responds to problems requiring immediate attention, drawing on past experiences to devise solutions • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of factors into account

BSBAUD504 Report on a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to report on the outcomes of a quality audit and to take appropriate follow up action. It covers compiling audit results; preparing a report for the auditee/client; negotiating follow up action with the auditee/client; and monitoring and reviewing the auditing system and activities. The types of quality audit that may be covered by this unit include an external or internal systems audit or process or product/service audit.

It applies to individuals with a well-established theoretical knowledge base in quality auditing who are proficient in using a wide range of specialised quality auditing and managerial techniques to carry out their own work and to supervise the quality audit team. It addresses the function performed by either an auditor having sole responsibility for the audit or a lead auditor of a quality audit team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Quality Auditing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Compile audit results	1.1 Compare results of the audit evaluation against audit objectives and criteria plan

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.2 Analyse audit results
2 Prepare report	2.1 Provide objective evidence relating to the need for reduction, elimination and prevention of non-conformance as the basis for the audit report 2.2 Produce audit report according to specified audit requirements 2.3 Present audit report to auditee and other stakeholders
3 Negotiate follow up process with auditee	3.1 Determine and initiate any corrective action required to deal with non-conformance, in consultation with auditee 3.2 Provide suggestions for improvements where applicable 3.3 Ensure timelines are agreed on for completion of corrective action activities 3.4 Ensure corrective action follow-up procedures are agreed with auditee
4 Monitor and review audit system and activities	4.1 Evaluate effectiveness and suitability in achieving audit objectives 4.2 Investigate possible improvements in audit methods, economy and efficiency

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 4.1	• Interprets and analyses information from a complex range of organisational documentation
Writing	2.1, 2.2, 4.1	• Develops a variety of complex documents using relevant structure, tone and vocabulary appropriate to audience, context and purpose
Oral Communication	2.3, 3.1-3.4	• Participates in spoken exchanges using clear language, tone and pace • Uses questioning and listening techniques to clarify understanding
Numeracy	1.1, 1.2, 3.3, 4.2	• Collects, represents, summarises and interprets a range of statistical data

© Commonwealth of Australia, 2025 Public Skills Australia

		• Performs calculations required to measure output against timeframes
Navigate the world of work	2.2	• Monitors adherence to organisational policies and procedures • Considers own role in terms of its contribution to broader goals of the work environment
Interact with others	2.3, 3.1-3.4	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Collaborates with others to negotiate joint outcomes, playing an active role in facilitating team understanding
Get the work done	1.1, 1.2, 3.1, 4.1, 4.2	• Organises, plans and sequences own workload according to timelines and organisational requirements • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of factors into account • Analyses outcomes of decisions to identify opportunities for improvement • Recognises a range of familiar problems, their symptoms and causes, actively looking for suitable corrective actions

BSBAUD511 Initiate quality audits

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to initiate and organise quality audits. It covers assessing the scope and objectives of quality audits; communicating with the auditees and developing and submitting a quality audit plans.

The unit applies to individuals who have an established knowledge base in quality auditing, and who are proficient in using a range of quality auditing and managerial techniques to initiate quality audits. Individuals may also supervise and monitor the processes and outcomes of others working in a quality audit team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Audit and Compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assess quality audit scope and objectives	1.1 Identify standards that impact on the environment in which audit operates 1.2 Determine and agree on audit objectives and scope with auditee and other required stakeholders 1.3 Identify risks within scope of quality audit
2. Communicate with auditee	2.1 Consult with auditee and determine relevant information 2.2 Prepare audit notifications according to organisational protocols 2.3 Confirm proposed audit methods and techniques to be applied

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	with auditee 2.4 Outline audit processes and establish sequence of audit activities, and the role of the audit team and auditee
3. Prepare resources for quality audit	3.1 Identify resources required to perform the quality audit 3.2 Select audit team members on the basis of relevant expertise 3.3 Identify resources required with auditee
4. Develop and submit quality audit plan	4.1 Develop quality audit plan according to established scope and objectives 4.2 Assign roles and responsibilities to audit team members 4.3 Assign timing, schedules and responsibilities for implementation of the audit plan 4.4 Document and submit audit plan to auditee for approval, where required
5. Prepare audit team	5.1 Inform audit team members of their responsibilities, audit objectives and scope 5.2 Communicate audit plan and schedules to all audit team members 5.3 Discuss and clarify audit methods and techniques with audit team members
6. Review auditee documentation	6.1 Determine auditee's previous quality audits as relevant and establish impact on the conduct of the current audit 6.2 Source organisational documentation from auditee, and check adequacy of documentation provided 6.3 Review documents, and determine and source any further documentation required
7. Prepare audit documentation	7.1 Develop checklist according to audit scope and objectives 7.2 Create entry and exit meeting agendas according to organisational templates

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Interprets and analyses information from organisational documentation
Writing	• Develops a range of documents using structure, tone and vocabulary

© Commonwealth of Australia, 2025 Public Skills Australia

Skill	Description
	appropriate to audience, context and purpose • Records and amends information and conveys details in accordance with audit objectives
Oral Communication	• Participates in spoken exchanges using structure and language to suit the audience • Uses questioning and listening techniques to clarify requirements
Numeracy	• Uses mathematical calculations for project scheduling
Planning and organising	• Monitors adherence to organisational policies and relevant standards
Teamwork	• Collaborates with others to negotiate acceptable outcomes, playing an active role in facilitating effective group interaction
Problem solving	• Identifies and addresses complex problems within own scope, recognising when to seek the expertise of others
Self-management	• Organises, plans and sequences own workload and schedules work activities of others
Technology	• Uses digital tools and systems to assist in initiating quality audits

Unit Mapping Information

Supersedes and is equivalent to BSBAUD501 Initiate a quality audit.

Assessment Requirements for BSBAUD511 Initiate quality audits

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- produce documented audit plans for auditees on at least two different occasions, including:
  - scope and objectives of the audit
  - proposed audit methods and techniques to be used
  - required resources and audit plan
  - allocation of individual audit team member responsibilities.

In the course of the above, the candidate must:

- use terminology relating to quality auditing in communications.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- auditing codes of practice and ethics
- auditing methods and techniques, including audit plans and value adding activities
- requirements of auditing regulations and standards
- current audit practices
- quality auditing principles, techniques and systems
- requirements of organisational and audit style manual protocols for written communications
- key features of technology required for quality auditing activities described in performance evidence.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

© Commonwealth of Australia, 2025 Public Skills Australia

This includes access to:

- workplace documentation including previous quality audit reports, checklists, risk management plans and audit plans.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBAUD512 Lead quality audits

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to lead audit teams as they conduct quality audits. It covers conducting entry and exit meetings; identifying and gathering relevant information; managing audit team resources; and providing feedback to audit team members on their performance.

The unit applies to individuals who have a well-established knowledge of quality auditing and who are proficient in using a range of quality auditing and managerial techniques to supervise quality audit teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Audit and Compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Lead entry meeting	1.1 Confirm agenda is prepared for entry meeting 1.2 Review and confirm proposed audit plan with relevant stakeholders in entry meeting 1.3 Make changes to audit plan, as required
2. Identify and gather evidence	2.1 Identify sources of information according to audit plan 2.2 Interview relevant stakeholders 2.3 Gather information and documentation
3. Manage audit team	3.1 Supervise activities of audit team members

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
resources	3.2 Re-assign team members, as required 3.3 Instigate contingency actions, as required
4. Lead exit meeting	4.1 Review, assess, and reach agreement on audit team findings according to audit plan 4.2 Prepare for exit meeting 4.3 Examine results and findings against audit objectives and present to relevant stakeholders 4.4 Confirm reporting arrangements for the quality audit with the auditee 4.5 Explain context and consequences of audit and discuss follow-up 4.6 Review and submit final audit report according to audit plan
5. Lead team members in performance improvement	5.1 Provide feedback on performance to audit team 5.2 Encourage and support audit team to review their own work 5.3 Provide and document advice for individual improvement

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Interprets and analyses information from audit scoping materials
Writing	• Develops a range of documents using relevant structure, tone and vocabulary appropriate to audience, context and purpose • Records and amends information and conveys details in accordance with audit objectives
Oral Communication	• Participates in spoken exchanges using clear language, tone and pace • Uses questioning and listening techniques to clarify requirements
Numeracy	• Uses mathematical calculations to analyse and arrange numeric information
Teamwork	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to team communication requirements • Recognises the importance of rapport in establishing and building effective working relationships • Collaborates with others to negotiate acceptable outcomes, playing an active role in directing and facilitating effective group interaction
Initiative and	• Makes a range of critical and non-critical decisions in relatively

© Commonwealth of Australia, 2025 Public Skills Australia

Skill	Description
enterprise	complex situations, taking a range of factors into account
Self-management	• Organises, plans and sequences own workload and schedules work activities of others
Problem solving	• Responds to problems requiring immediate attention, drawing on past experiences to devise solutions
Technology	• Uses digital tools and systems to assist in leading a quality audit team

Unit Mapping Information

Supersedes and is equivalent to BSBAUD503 Lead a quality audit.

Assessment Requirements for BSBAUD512 Lead quality audits

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- lead a quality audit team on at least two occasions, including:
  - leading entry and exit meetings
  - identifying all objectives, schedules and relevant information and confirming they have been included in the audit plan
  - managing the information gathering process by team members, and analysing, synthesising and reporting of the findings
  - assisting team members to continuously improve their performance.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- quality auditing principles, methods and techniques
- requirements of auditing standards
- key features of technology required for quality auditing activities for leading a quality audit team
- strategies to develop performance improvement in audit team members.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation including previous quality audit reports
- checklists
- risk management and audit plans.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBAUD513 Report on quality audits

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to report on the outcomes of quality audits and take appropriate follow up actions. It covers compiling audit results, preparing reports for relevant stakeholders, and negotiating follow up actions with relevant stakeholders.

The unit applies to individuals who have an established knowledge of quality auditing and are proficient in using a range of quality auditing techniques. It addresses the function performed by either an auditor having sole responsibility for the audit or an auditor required to report on quality audits as part of a quality audit team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Audit and Compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to report audit results	1.1 Compile audit results 1.2 Analyse compiled audit results against agreed audit plan and identify non-compliances 1.3 Consult with team members, if required
2. Prepare final audit report	2.1 Produce draft audit report according to audit plan 2.2 Provide draft report to relevant stakeholders and seek feedback 2.3 Finalise audit report, integrating stakeholder feedback, as required 2.4 Present final audit report to auditee and other relevant

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	stakeholders
3. Agree on follow up process with auditee	3.1 Determine timeframes for any corrective action required to deal with non-conformance, in consultation relevant stakeholders, including the auditee 3.2 Confirm corrective action follow-up procedures are agreed with relevant stakeholders

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Interprets and analyses information from a complex range of organisational documentation
Writing	• Develops a variety of complex documents using relevant structure, tone and vocabulary appropriate to audience, context and purpose
Oral Communication	• Participates in spoken exchanges using clear language, tone and pace • Uses questioning and listening techniques to clarify understanding
Numeracy	• Collects, represents, summarises and interprets a range of statistical data
Self-management	• Monitors adherence to organisational policy/ies and procedure/s • Organises, plans and sequences own workload according to timelines and organisational requirements • Analyses outcomes of decisions to identify opportunities for improvement
Teamwork	• Collaborates with others to negotiate joint outcomes, playing an active role in facilitating team understanding
Problem solving	• Recognises a range of familiar problems, their symptoms and causes, actively looking for suitable corrective actions
Initiative and enterprise	• Makes a range of decisions in complex situations, taking a range of factors into account
Technology	• Uses digital tools and systems to develop reports in an effective way

Assessment Requirements for BSBAUD513 Report on quality audits

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- interpret audit results and produce a detailed audit report containing detailed analysis according to specified organisational requirements on at least two different occasions.

In the course of the above, the candidate must:

- negotiate follow-up actions with relevant stakeholders
- use terminology relating to quality auditing.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- quality auditing principles, methods and techniques
- requirements of auditing regulations
- key features of technology required for producing quality auditing results and reports according to organisational requirements
- presentation of corrective action requirements.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation including quality audit reports, checklists, and audit plans
- technology required for quality auditing reporting.

BSBAUD514 Interpret compliance requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to identify and interpret the range of internal and external compliance requirements and obligations that must be fulfilled by an organisation or work area.

The unit applies to individuals who use their knowledge of compliance and skills in identifying compliance requirements to plan, carry out and evaluate their own work and/or the work of a team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Audit and Compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Clarify the scope of operations	1.1 Analyse organisational operations and identify the functions, products and services that may be subject to compliance requirements 1.2 Develop and document plan for determining relevant compliance requirements 1.3 Obtain approval of plans from relevant stakeholders
2. Identify compliance requirements	2.1 Research information on compliance requirements relevant to the organisation 2.2 Analyse and document information from search according to organisational requirements

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3 Organise and store collected information on relevant compliance requirements according to organisation policies and procedures
3. Interpret and prioritise compliance requirements	3.1 Discuss and clarify with relevant stakeholders ambiguities and issues experienced in interpreting identified compliance information 3.2 Prioritise compliance requirements according to organisational requirements
4. Document compliance requirements	4.1 Organise and document outcomes of the identification and interpretation activities 4.2 Prepare and distribute reports of compliance requirements and assessment of implications to relevant stakeholders

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Identifies, interprets, analyses and reviews complex texts from various sources to determine compliance requirements
Writing	• Collates and compiles results of research and analysis using technical language and organisational formats • Develops materials to convey information, requirements and recommendations using language and structure appropriate to the audience
Oral Communication	• Uses appropriate techniques, including active listening and questioning, to seek approvals and to confirm understanding
Self-management	• Takes responsibility for following policies, procedures and legislative requirements
Technology	• Uses digital tools and systems to locate, organise and share information in effective ways

Unit Mapping Information

Assessment Requirements for BSBCMM101 Apply basic communication skills

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- gather information about procedures, methods and equipment requirements for workplace communication, with the assistance of others
- use appropriate verbal and non-verbal skills to seek and convey information in face-to-face situations
- draft routine written documents within designated timeframes and check that the documents meet organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline organisational policies, plans and procedures related to the organisation's standards or protocols for workplace communication
- describe different communication styles.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals using interpersonal communication skills in the workplace and include access to:

- office equipment
- business resources
- workplace policies and procedures relating to communication
- case studies and, where possible, real situations
- interaction with others.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy NVR/AQTF assessor requirements.

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify communication requirements	1.1 Identify work task 1.2 Identify communication channels in the organisation 1.3 Identify relevant stakeholders 1.4 Seek advice from supervisor on communication methods
2. Communicate using verbal and non-verbal communication skills	2.1 Plan verbal communication 2.2 Use verbal communication to communicate with stakeholders 2.3 Use non-verbal behaviour to communicate with stakeholders 2.4 Seek and respond to feedback on communication

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3. Draft written communications	3.1 Identify formats for written information according to organisational policies and procedures 3.2 Draft written information and submit to supervisor for approval 3.3 Seek and respond to feedback on written communication

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Learning	• Develops skills required to carry out own role by seeking and acting on feedback
Reading	• Reviews textual information to identify communication requirements and organisational procedures
Writing	• Drafts simple texts using appropriate grammar, spelling and punctuation in accordance with organisational standards • Proofreads own texts for accuracy and compliance with organisational requirements
Teamwork	• Seeks to cooperate with others to achieve results in immediate work context
Self-management	• Follows clearly defined instructions, seeking assistance when necessary • Follows organisational policies and procedures and practices relevant to own role
Technology	• Uses digital tools to complete tasks
Initiative and enterprise	• Asks questions and listens to gain information and confirm understanding

Unit Mapping Information

No equivalent unit. Supersedes but is not equivalent to:

- BSBCMM101 Apply basic communication skills
- BSBCMM201 Communicate in the workplace.

Assessment Requirements for BSBCMM211 Apply communication skills

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- use verbal and non-verbal skills to seek and convey information in face-to-face situations on at least three occasions
- draft written documents and confirm that the documents meet organisational requirements on at least three occasions.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational policies and procedures related to workplace communication
- communication styles
- questioning, listening and speaking skills
- standards of written information applicable to own role
- presentation styles, format and detail relevant to own role.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace policies and procedures relating to communication.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBCMM401 Make a presentation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0

Application

This unit covers the skills and knowledge required to prepare, deliver and review a presentation to a target audience.

This unit applies to individuals who may be expected to make presentations for a range of purposes, such as marketing, training and promotions. They contribute well developed communication skills in presenting a range of concepts and ideas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Communication – Interpersonal Communication

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Prepare a presentation	1.1 Plan and document presentation approach and intended outcomes 1.2 Choose presentation strategies, format and delivery methods that match the characteristics of the target audience, location, resources and personnel needed 1.3 Select presentation aids, materials and techniques that suit the format and purpose of the presentation, and will enhance audience understanding of key concepts and central ideas

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Brief others involved in the presentation on their roles/responsibilities within the presentation 1.5 Select techniques to evaluate presentation effectiveness
2 Deliver a presentation	2.1 Explain and discuss desired outcomes of the presentation with the target audience 2.2 Use presentation aids, materials and examples to support target audience understanding of key concepts and central ideas 2.3 Monitor non-verbal and verbal communication of participants to promote attainment of presentation outcomes 2.4 Use persuasive communication techniques to secure audience interest 2.5 Provide opportunities for participants to seek clarification on central ideas and concepts, and adjust the presentation to meet participant needs and preferences 2.6 Summarise key concepts and ideas at strategic points to facilitate participant understanding
3 Review the presentation	3.1 Implement techniques to review the effectiveness of the presentation 3.2 Seek and discuss reactions to the presentation from participants or from key personnel involved in the presentation 3.3 Utilise feedback from the audience or from key personnel involved in the presentation to make changes to central ideas presented

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.2	• Reviews and analyses documents to identify information relevant to a specific presentation
Writing	1.1, 3.3	• Develops material to convey ideas and information to target audience in an engaging way
Oral	1.4, 2.1, 2.2, 2.3,	• Presents information using words and non-verbal features appropriate to the audience and context

© Commonwealth of Australia, 2025 Public Skills Australia

Communication	2.4, 2.5, 2.6, 3.2	• Uses listening and questioning techniques to gather information required to develop or modify presentations • Interprets audience reactions and changes words or non-verbal features accordingly
Interact with others	1.4, 2.1, 2.2, 2.4, 2.5, 2.6, 3.2	• Selects and uses appropriate conventions and protocols to encourage interaction or to present information • Demonstrates sophisticated control over oral, visual and written formats, drawing on a range of communication practices to achieve goals • Recognises the need to alter personal communication style in response to the needs or expectations of others
Get the work done	1.1-1.5, 2.2, 2.5, 3.1-3.3	• Takes responsibility for planning, sequencing and prioritising tasks and own workload to achieve outcomes • Uses feedback from others, analytical and lateral thinking to review current practices and develop new ideas • Uses the main features and functions of digital tools to complete work tasks

Assessment Requirements for BSBCMM401 Make a presentation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare and deliver presentations related to occupation or area of interest which demonstrate the use of:
  - effective presentation strategies and communication principles
  - aids and materials to support the presentation
- select and implement methods to review the effectiveness of own presentation and document any changes which would improve future presentations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify information collection methods that will support review and feedback of presentations
- identify regulatory and organisational obligations and requirements relevant to presentations
- describe the principles of effective communication
- describe the range of presentation aids and materials available to support presentations.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals using interpersonal communication skills in the workplace and include access to:

- equipment, materials and business software packages for making a presentation
- business technology
- interaction with others.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCMM402 Implement effective communication strategies

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to select and use communication strategies required to respond to an enquiry.

It applies to individuals who analyse information and then either respond personally or refer the enquiry to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Communication – interpersonal communication

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Receive enquiry	1.1 Establish nature of enquiry 1.2 Ensure interactions with person making enquiry are in accordance with organisation's standards and procedures and meet the person’s needs and expectations 1.3 Clearly outline legal and other limits of own responsibility to person making the enquiry 1.4 Record person's details and issues
2 Identify and apply	2.1 Use communication strategies that reflect organisational

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
appropriate communication techniques	standards and procedures 2.2 Use effective communication techniques during the enquiry 2.3 Ensure confidentiality of the enquiry is respected
3 Determine action to be taken	3.1 Identify personal limitations in taking action and seek appropriate assistance from designated individuals 3.2 Respond in an appropriate manner 3.3 Involve other parties in action if appropriate 3.4 Manage expectations of person making enquiry
4 Review outcomes of communication	4.1 Follow up with person making enquiry to ensure action was effected 4.2 Seek feedback about the communication strategies 4.3 Undertake appropriate record keeping and reporting

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1	• Interprets textual information from a range of sources to determine organisational standards and procedures
Writing	1.4, 2.1, 3.1, 3.2, 4.1, 4.3	• Accurately records information and completes documentation using required format, terminology and conventions • Prepares reports according to organisational requirements
Oral Communication	1.1, 1.2, 1.3, 2.1, 2.2, 3.1, 3.2, 3.3, 4.1, 4.2	• Uses listening and questioning techniques to gather information required to respond to queries • Presents information using words and non-verbal features appropriate to the audience and context
Navigate the world of work	1.2, 1.3, 2.1, 3.1	• Recognises and applies organisational policies and procedures and meets expectations associated with own work

© Commonwealth of Australia, 2025 Public Skills Australia

Interact with others	1.2, 2.1, 2.2, 3.1, 3.2, 3.3	• Uses appropriate communication practices showing awareness of the need to adjust personal communication style when handling enquiries of a sensitive nature
Get the work done	1.1, 1.4, 3.1, 3.3, 3.4, 4.1-4.3	• Plans a range of routine and non-routine tasks and implements actions in accordance with plan to meet desired outcomes • Uses problem solving skills to analyse enquiries and propose possible solutions, seeking input from others as required • Evaluates outcomes of decisions to identify opportunities for improvement

BSBCOM501 Identify and interpret compliance requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify and interpret the range of internal and external compliance requirements and obligations that must be fulfilled by an organisation.

It applies to individuals who use their sound theoretical knowledge of compliance and skills in identifying compliance requirements to plan, carry out and evaluate their own work and/or the work of a team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, licensing and risk – compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Clarify the scope of operations	1.1 Identify and review the relevant range of operations and the sphere of business arrangements of the organisation 1.2 Conduct an analysis of the operations and business arrangements of the organisation and identify the functions, products and services that may be subject to compliance requirements 1.3 Develop and document work activity plans for determining

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	relevant compliance requirements 1.4 Obtain approval of plans from relevant organisational personnel
2 Identify compliance requirements	2.1 Conduct a search of information on internal and external compliance requirements using appropriate search resources, including relevant Australian and international standards 2.2 Ensure the search of compliance requirements scans across all relevant jurisdictions of laws, regulations, and industry and organisational codes and standards and identify pertinent compliance requirements 2.3 Progressively review information collected in terms of its relevance to the organisation's operations, services and products 2.4 Organise and store gathered information on relevant compliance requirements in an appropriate format for further analysis
3 Interpret, analyse and prioritise identified compliance requirements	3.1 Review and interpret collected information in terms of its relevance to the organisation's functions, services and products 3.2 Discuss and clarify with relevant internal or external personnel ambiguities, uncertainties and problems experienced in interpreting identified compliance information 3.3 Identify, analyse and prioritise relevant compliance requirements in terms of critical implications for the organisation and risks and consequence of possible breaches 3.4 Group pertinent compliance requirements into those that are critical and central to the organisation's operations, those that are important in some circumstances but are not central to the organisation's operations, and those that are pertinent but are incidental to the organisation's operations
4 Document compliance requirements	4.1 Organise and document outcomes of the identification and interpretation activities 4.2 Prepare and communicate reports of relevant compliance requirements and assessment of implications to relevant personnel performing specific compliance management functions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Public Skills Australia

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 2.3, 3.1, 3.3, 3.4	• Identifies, interprets, analyses or reviews complex texts from various sources to determine legal requirements, organisational operations, specific requirements and responsibilities
Writing	1.2, 1.3, 1.4, 2.4, 3.2, 3.3, 3.4, 4.1, 4.2	• Collates and compiles results of research and analysis using appropriate technical language and organisational formats • Develops materials to convey information, requirements or recommendations using language and structure appropriate to the audience
Oral Communication	1.4, 3.2, 4.2	• Presents specialised information using structure and language to suit the audience • Uses appropriate techniques, including active listening and questioning, to seek approvals and to confirm understanding
Navigate the world of work	1.2, 2.2, 3.1, 3.3	• Takes full responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulations
Interact with others	1.4, 3.2, 4.2	• Identifies and uses appropriate conventions and practices when communicating with internal and external personnel
Get the work done	1.1, 1.3, 2.1-2.4, 3.1, 3.3, 3.4, 4.1, 4.2	• Plans, organises and implements activities required to identify, prioritise and document compliance requirements • Systematically gathers, analyses and evaluates all relevant information in order to make informed decisions about management of compliance breaches • Uses digital tools and systems to locate, organise and share information in effective ways

Assessment Requirements for BSBCOM501 Identify and interpret compliance requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse an organisation's operations to identify areas subject to compliance requirements
- interpret and analyse information from Australian and international standards, legislation, regulations, industry and organisational codes of practice to determine their relevance to the organisation
- document and store the outcomes of identification and interpretation activities related to the organisation's compliance requirements
- report on key compliance requirements and the implications of these for the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline elements of compliance programs and related management systems breaches
- identify relevant Australian and international standards.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the compliance field of work and include access to:

- relevant Australian and international standards, laws, regulations, industry and organisational codes and standards
- appropriate computer resources for online searching
- case studies and, where possible, real situations.

BSBCOM502 Evaluate and review compliance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to evaluate and review an organisation's compliance program/management system and how it is fulfilling its obligations and responsibilities under applicable compliance requirements.

It applies to individuals who are responsible for evaluating and reporting on the operation and effectiveness of an organisation's planned compliance program/management system to ensure that compliance is an integral part of normal business operations.

Application of this unit must be consistent with the pertinent sections of relevant Australian and international standards and legislative requirements including: AS 3806:2006 Compliance programs, AS ISO 10002:2006 Customer satisfaction – Guidelines for complaints handling in organizations, AS/NZS 4360:2004 Risk management and AS ISO 15489:2004 Records management.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Develop the evaluation	1.1 Obtain details of the organisation's compliance policies,

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
plan	objectives and assessment criteria 1.2 Obtain and interpret information on current compliance requirements applicable to the organisation 1.3 Develop a suitable evaluation methodology to enable sufficiently valid and reliable outcomes for the required research and suitable arrangements for both internal and external monitoring processes 1.4 Prepare the evaluation plan for the proposed project including the detailing of established evaluation criteria and the data to be collected 1.5 Obtain approval of plan from relevant internal and/or external personnel
2 Gather required evaluation data	2.1 Collect relevant evaluation data on how the organisation is fulfilling its compliance requirements using appropriate techniques and sources in accordance with the agreed evaluation plan 2.2 Organise, interpret and review collected data against established evaluation criteria including those specified in relevant Australian and international standards 2.3 Discuss ambiguities, uncertainties and problems experienced while interpreting collected data and address appropriately in conjunction with relevant internal and/or external personnel 2.4 Organise interpreted evaluation data for later analysis
3 Analyse the collected data	3.1 Analyse evaluation data in accordance with planned methodology 3.2 Review and discuss outcomes and findings of the analysis with relevant internal and/or external personnel
4 Determine evaluation findings and outcomes	4.1 Develop and discuss preliminary findings and any identified issues with relevant internal and/or external personnel 4.2 Undertake any additional data collection and analysis required to clarify aspects of findings, issues and related action options if necessary 4.3 Prepare recommendations for any action to improve identified deficiencies in conjunction with relevant internal and/or external personnel
5 Document and disseminate the outcomes and recommendations of the evaluation	5.1 Prepare a draft report of the outcomes, findings and recommendations of the compliance evaluation in accordance with the agreed structure and format and distribute to relevant internal and/or external personnel for comment and feedback

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	5.2 Edit the report based on the feedback obtained 5.3 Proofread the report in preparation for publishing 5.4 Ensure the report of outcomes, findings and recommendations of the evaluation is signed off by authorised personnel 5.5 Produce and disseminate the report to nominated internal and external personnel in accordance with agreed arrangements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1-2.3, 3.1, 3.2, 4.2, 5.2, 5.3	• Identifies, interprets, analyses or reviews complex texts from various sources to determine legal requirements, organisational operations, specific requirements and responsibilities • Checks documents for accuracy of content, consistency of layout and grammar, spelling and punctuation
Writing	1.3-1.52.2, 4.1-4.3, 5.1-5.	• Collates and compiles results of research and analysis using appropriate technical language and organisational formats • Develops materials to convey information, requirements or recommendations using language and structure appropriate to the audience • Composes and edits texts, selecting appropriate vocabulary and structure for audience and purpose
Oral Communication	2.3, 3.2, 4.1,	• Presents specialised information using structure and language to suit the audience • Elicits the view and opinions of others by listening and questioning
Navigate the world of work	1.1-1.3, 2.2	• Takes full responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulations

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- access and interpret information about Australian and international standards related to compliance requirements
- develop an evaluation methodology including:
  - preparation of an evaluation plan
  - analysis and interpretation of collected data and feedback with/from stakeholders
- prepare and submit final report for approval and implementation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe evaluation methods and techniques suitable for compliance related evaluation and review
- list sources of data relevant to compliance related evaluation and review
- identify relevant Australian and international standards
- outline elements of relevant compliance program/management systems
- identify relevant organisational policies and procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the compliance field of work and include access to:

© Commonwealth of Australia, 2025 Public Skills Australia

- relevant Australian and international standards, laws, regulations, industry and organisational codes and standards
- relevant data
- office equipment and business technology
- computer resources for online searching
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCRT412 Articulate, present and debate ideas

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to articulate, present and debate ideas in a work or broader life context using creative techniques in order to provoke response, reaction and critical discussion.

The unit applies to individuals who contribute and present ideas that may be complex in nature and may relate to new products, services, processes or creative works. These individuals are required to communicate ideas persuasively.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking & Problem Solving – Critical Thinking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish framework for communication	1.1 Assess purpose of, and audience for communication according to task requirements 1.2 Evaluate advantages and disadvantages of various methods of communication according to task requirements 1.3 Research organisational or legislative frameworks applicable to communication
2. Develop ideas for communication	2.1 Assess persuasive communication techniques against objectives of communication 2.2 Identify specific ways to provoke and encourage response in individuals or groups in consultation with others

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3 Consider potential communication challenges and strategies for mitigation 2.4 Research and document selected key ideas for presentation according to objectives of communication
3. Debate and discuss ideas	3.1 Present substantiated communication to audience 3.2 Facilitate conversations that challenge existing, and explore new, approaches to idea generation 3.3 Respond to questions about communication with relevant information 3.4 Use feedback to refine communication

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Oral communication	• Articulates ideas and requirements clearly and creatively using techniques appropriate to audience and environment • Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning • Uses a range of persuasive responses and makes comparisons which show an understanding of topics and concepts
Writing	• Presents clearly written formats, drawing on a range of communication practices to achieve goals
Initiative and enterprise	• Identifies opportunities to develop and apply new ideas and select ideas for implementation • Identifies key themes and ideas to be explored and identifies ways to respond to and use diverse perspectives
Technology	• Uses features and functions of digital tools and technologies to store and present information

Unit Mapping Information

Supersedes and is equivalent to BSBCRT401 Articulate, present and debate ideas.

Assessment Requirements for BSBCRT412 Articulate, present and debate ideas

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- facilitate a discussion and debate on ideas with at least two different audience types.

In the course of the above, the candidate must:

- evaluate the purpose, audience and legislative and organisational frameworks applicable to task
- identify and analyse methods to elicit responses from audiences in consultation with others
- identify challenges to communication of ideas for mitigation
- research selected ideas for presentation
- adopt persuasive communication techniques
- participate actively in presentation and critical discussion of ideas
- respond constructively to presentation feedback
- use feedback to further refine developed communication.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- ways in which individuals receive and respond to ideas and information, and factors that influence response
- advantages and disadvantages of various methods of communication
- organisational or legislative frameworks applicable to subject or format of communication
- key features of persuasive communication techniques, including storytelling
- methods of researching ideas including:
  - desktop research
  - consultation with relevant experts
- common techniques to tailor comments to audiences.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to opportunities to present, discuss and debate ideas with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBCUS501 Manage quality customer service

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify assessment conditions
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop strategies to manage organisational systems that ensure products and services are delivered and maintained to standards agreed by the organisation.

It applies to individuals who supervise the provision of quality customer service within an organisation's procedures framework by others. At this level, individuals must exercise considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Plan to meet internal and external customer	1.1 Investigate, identify, assess, and include the needs of customers in planning processes

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
requirements	1.2 Ensure plans achieve the quality, time and cost specifications agreed with customers
2 Ensure delivery of quality products and services	2.1 Deliver products and services to customer specifications within organisation's business plan 2.2 Monitor team performance to consistently meet the organisation's quality and delivery standards 2.3 Help colleagues overcome difficulties in meeting customer service standards
3 Monitor, adjust and review customer service	3.1 Develop and use strategies to monitor progress in achieving product and/or service targets and standards 3.2 Develop and use strategies to obtain customer feedback to improve the provision of products and services 3.3 Develop, procure and use resources effectively to provide quality products and services to customers 3.4 Make decisions to overcome problems and to adapt customer services, products and service delivery in consultation with appropriate individuals and groups 3.5 Manage records, reports and recommendations within the organisation's systems and processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 3.1, 3.2, 3.3, 3.5	• Interprets and analyses textual information from a variety of sources and applies the knowledge that has been gained to evaluate standards for organisation's products and services
Writing	1.2, 3.1, 3.2, 3.3, 3.5	• Produces a range of text types to convey information, requirements or recommendations matching style of writing to purpose and audience
Oral Communication	1.1, 1.2, 2.1, 2.3, 3.2	• Clearly articulates systems and standards in a team environment using language suitable to diverse audiences • Uses listening and questioning techniques to obtain

© Commonwealth of Australia, 2025 Public Skills Australia

		feedback and confirm understanding
Numeracy	1.2	• Interprets and comprehends mathematical information in organisation's business and customer service plans.
Navigate the world of work	2.1, 2.2, 3.1, 3.5	• Recognises and applies organisational protocols and meets expectations associated with own work
Interact with others	1.1, 2.3, 3.4	• Identifies and uses appropriate conventions and protocols when communicating with colleagues and customers • Collaborates with others, taking into account their strengths and experience, to achieve desired outcomes • Provides support in field of expertise to team
Get the work done	1.1, 1.2, 2.1, 2.2, 3.1-3.5	• Develops and implements plans using logical processes and monitors and evaluates progress against stated goals • Accepts responsibility for addressing complex or non-routine difficulties, applying problem solving processes in determining a solution. • Uses digital technology to access, organise and present information in a format that meets requirements

Assessment Requirements for BSBCUS501 Manage quality customer service

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and manage organisational systems for quality customer service
- develop and review plans, policies and procedures for delivering and monitoring quality customer service
- implement policies and procedures to ensure quality customer service
- solve complex customer complaints and system problems that lead to poor customer service
- monitor and assist teams to meet customer service requirements
- develop, procure and use human and physical resources to support quality customer service delivery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislative and regulatory context of the organisation relevant to customer service
- describe organisational policy and procedures for customer service including handling customer complaints
- identify service standards and best practice models
- summarise public relations and product promotion
- outline techniques for dealing with customers including customers with specific needs

© Commonwealth of Australia, 2025 Public Skills Australia

- explain techniques for solving complaints including the principles and techniques involved in the management and organisation of:
  - customer behaviour
  - customer needs research
  - customer relations
  - ongoing product and/or service quality
  - problem identification and resolution
  - quality customer service delivery
  - record keeping and management methods
  - strategies for monitoring, managing and introducing ways to improve customer service relationships
  - strategies to obtain customer feedback.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- legislation, regulations and codes of practice related to customer service
- business technology
- workplace documentation and resources
- complex customer complaints
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBFIM501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use financial skills to work with and interpret budgets, ageing summaries, cash flow, petty cash, Goods and Services Tax (GST), and profit and loss statements
- communicate with relevant people to clarify budget/financial plans, negotiate changes and disseminate information
- prepare, implement and modify financial contingency plans
- monitor expenditure and control costs
- support and monitor team members
- report on budget and expenditure
- review and make recommendations for improvements to financial processes
- meet record keeping requirements for the Australian Taxation Office (ATO) and for auditing purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe basic accounting principles
- identify and explain the relevant legislation and current requirements of the Australian Taxation Office, including the Goods and Services Tax (GST)
- explain the key requirements for financiall record keeping and auditing
- describe the principles and techniques involved in managing:
  - budgeting
  - cash flows
  - electronic spreadsheets

© Commonwealth of Australia, 2025 Public Skills Australia

- GST
- ledgers and financial statements
- profit and loss statements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial management field of work and include access to:

- resources and documentation used in the workplace
- workplace policies and procedures
- workplace budgets and financial plans
- business technology
- case studies and, where available, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBFIN501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage the budget and financial plan of an organisation for one reporting period.

In the course of the above, the candidate must:

- communicate with relevant people to clarify budget and financial plans, negotiate changes and disseminate information
- prepare, implement and modify financial contingency plans
- monitor expenditure and control costs
- support and monitor team members
- report on budget and expenditure
- review and make recommendations for improvements to financial processes
- meet record-keeping requirements for Australian Taxation Office (ATO) and for auditing purposes.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- basic accounting principles
- types of budgets and financial plans
- legislation and current ATO requirements, including the Goods and Services Tax (GST)
- key requirements for financial record keeping and auditing
- principles for managing work teams
- principles and techniques involved in managing:
  - budgeting
  - cash flows
  - electronic spreadsheets

© Commonwealth of Australia, 2025 Public Skills Australia

- Goods and Services Tax
- ledgers and financial statements
- profit and loss statements
- evaluation of budget and financial plans.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace policies and procedures
- workplace budgets and financial plans.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBHRM413 Support the learning and development of teams and individuals

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to determine individual and team development needs and to facilitate the development of the workgroup.

The unit applies to individuals with a broad knowledge of learning and development who apply their skills in addressing development needs to meet team objectives. They may have responsibility to provide guidance or to delegate aspects of tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Human Resources

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Contribute to needs development	1.1 Collect information on performance of team members from relevant sources 1.2 Identify individual and team learning and development needs in line with organisational requirements 1.3 Confirm learning plans meet individual and group training and development needs 1.4 Provide opportunities to individuals to self-evaluate performance and identify areas for improvement
2. Support implementation of	2.1 Develop collaborative learning plans to match skill needs of individuals and groups and match the competency standards

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
learning and development	relevant to the industry 2.2 Ensure learning delivery methods are relevant to the participants 2.3 Identify and coordinate workplace learning opportunities to facilitate individual and team achievement of competencies 2.4 Identify and manage resources and timelines relevant for learning activities according to organisational requirements
3. Monitor and evaluate workplace learning	3.1 Monitor learning plans to improve the efficiency and effectiveness of learning 3.2 Seek feedback from individuals or teams to identify and implement improvements in future learning arrangements 3.3 Assess and record outcomes and performance of individuals and teams to determine the effectiveness of development programs and the extent of additional development support 3.4 Document and maintain records and reports of competency according to organisational requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Learning	• Uses structured approaches to set goals, monitor progress and adjust learning approaches for self and others • Builds on knowledge and experience to facilitate interaction and learning with others
Reading	• Analyses textual information from a range of sources to identify organisational requirements • Analyses information from a range of sources to evaluate performance
Writing	• Develops materials to suit the requirements of different roles and individuals in the organisation • Maintains records using correct technical and organisational vocabulary
Oral Communication	• Uses vocabulary appropriate to context and to establish a supportive and learning environment • Uses listening and questioning techniques to confirm or show understanding of different perspectives • Selects and uses appropriate conventions and protocols when communicating with co-workers in a range of work contexts

© Commonwealth of Australia, 2025 Public Skills Australia

SKILL	DESCRIPTION
Self-management	• Recognises and responds to explicit and implicit organisational procedures and protocols • Understands how own role meshes with others and contributes to broader goals
Teamwork	• Recognises the importance of building rapport to establish effective working relationships • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction • Negotiates with others to achieve agreeable outcomes playing an active role in facilitating consensus in potentially contentious situations
Problem solving	• Uses logical planning processes to organise, implement and monitor learning and development needs • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Evaluates outcomes of decisions to identify opportunities for improvement

Unit Mapping Information

Supersedes and is equivalent to BSBLED401 Develop teams and individuals.

Supersedes but is not equivalent to:

- BSBFLM311 Support a workplace learning environment
- BSBLED301 Undertake e-learning.

BSBHRM523 Coordinate the learning and development of teams and individuals

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to coordinate the learning and development of teams and individuals. Particular emphasis is on the coordination of strategies to facilitate and promote learning and to monitor and improve learning performance.

The unit applies to individuals who have a role in coordinating the development of a learning environment in which work and learning come together. At this level work will normally be carried out within complex and diverse methods and procedures, which require the exercise of considerable discretion and judgement, using a range of problem solving and decision-making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Human Resources

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Coordinate creation of learning opportunities	1.1 Identify potential formal and informal learning opportunities 1.2 Identify learning requirements of teams and individuals according to requirements of organisation and available learning opportunities 1.3 Coordinate implementation of learning plans and ensure that learning plans reflect diversity of needs 1.4 Review relevant organisational procedures and ensure they

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	support individual and team access to learning opportunities, where required 1.5 Consult with training and development specialists and use their advice to contribute to learning opportunities
2. Coordinate learning	2.1 Coordinate strategies to ensure workplace learning opportunities are used by teams and individuals 2.2 Coordinate implementation of policies and procedures to encourage team members to assess their own competencies and identify their own learning and development needs 2.3 Communicate benefits of learning with others in the team and organisation 2.4 Recognise workplace achievement by relevant recognition, feedback and rewards
3. Monitor and improve learning effectiveness	3.1 Monitor team and individual learning performance to determine type and extent of any additional work-based support required 3.2 Use feedback from individuals and teams to identify and recommend improvements in future learning arrangements 3.3 Suggest adjustments, negotiated with training and development specialists, for improvements to learning 3.4 Record and report learning and development of teams and individuals

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	• Interprets textual information obtained from a range of sources and determines how content may be applied to individuals and to organisational requirements
Writing	• Uses information from a range of sources to develop and document plans, strategies and feedback according to organisational requirements • Maintains records using correct technical and organisational vocabulary
Oral Communication	• Present information and opinions using language and features appropriate to the audience and context • Uses questioning and listening techniques to identify learning needs and obtain feedback
Initiative and	• Recognises and responds to both explicit and implicit organisational procedures and protocols and legislative and regulatory requirements

© Commonwealth of Australia, 2025 Public Skills Australia

SKILL	DESCRIPTION
enterprise	• Understands how own role meshes with others and contributes to broader goals
Teamwork	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role on occasion • Recognises the importance of building rapport to establish effective working relationships • Applies a range of communication strategies to encourage others to share their knowledge and skills and reflect on the effectiveness of the interaction
Problem solving	• Uses logical processes to plan, implement and monitor learning in the workplace • Systematically gathers and analyses relevant information and evaluates options to make informed decisions
Technology	• Uses digital tools to organise, store, integrate and share relevant information

Unit Mapping Information

No equivalent unit. Supersedes but is not equivalent to BSBLED501 Develop a workplace learning environment.

Assessment Requirements for BSBHRM523 Coordinate the learning and development of teams and individuals

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- coordinate learning and development for at least one team and for at least one individual.

In the course of the above, the candidate must:

- liaise with training and development specialists
- recognise workplace achievement by giving feedback, recognition and rewards
- monitor and recommend improvements for workplace learning
- record and report workplace learning outcomes.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- how management of relationships can achieve a learning environment
- principles and techniques involved in the management and organisation of:
  - adult learning
  - coaching and mentoring
  - consultation and communication
  - improvement strategies
  - leadership
  - learning environment and learning culture
  - monitoring and reviewing workplace learning
  - problem identification and resolution
  - record keeping and management methods
  - structured learning
  - work-based learning.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- relevant organisational policies and procedures
- workplace equipment and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBINM201 Process and maintain workplace information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to collect, process and store, and maintain workplace information and systems. It also includes the maintenance of filing and records systems.

It applies to individuals who perform a range of routine tasks in the workplace, using a limited range of practical skills and fundamental knowledge of information and information systems in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Collect information	1.1 Collect information in a timely manner and ensure it is relevant to organisational needs 1.2 Use business equipment/technology available in the work area to effectively obtain information 1.3 Apply organisational requirements relating to security and confidentiality in handling information

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2 Process workplace information	2.1 Use business equipment/technology to process information in accordance with organisational requirements 2.2 Process information in accordance with defined timeframes, guidelines and procedures 2.3 Update, modify and file information in accordance with organisational requirements 2.4 Collate and despatch information in accordance with specified timeframes and organisational requirements
3 Maintain information systems	3.1 Maintain information and filing systems in accordance with organisational requirements 3.2 Identify, remove and/or relocate inactive or dead files in accordance with organisational requirements 3.3 Establish and assemble new files in accordance with organisational requirements 3.4 Update reference and index systems in accordance with organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.4, 3.1-3.4	• Recognises and interprets textual information to complete tasks according to organisational requirements
Writing	1.3, 2.1-2.4, 3.4	• Records simple and routine content using an established format to organise information
Oral Communication	1.1, 1.2	• Uses listening and questioning skills to clarify and adhere to requirements
Numeracy	2.2, 2.4, 3.4	• Comprehends basic mathematical measurements relating to times and number sequences
Navigate the world of work	1.3, 2.1, 2.3, 2.4, 3.1-3.4	• Recognises organisational procedures and understands relevance of legislative requirements
Get the work	1.1-1.3, 2.1, 2.2, 2.4,	• Follows clearly defined instructions and monitors own

© Commonwealth of Australia, 2025 Public Skills Australia

done	3.1-3.3	progress to achieve timelines • Solves problems directly related to tasks, and makes low-impact decisions • Uses digital technologies following instructions regarding data entry and retrieval

Assessment Requirements for BSBINM201 Process and maintain workplace information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- collect and process workplace information according to organisational policies and procedures and related regulatory requirements
- record and document information accurately within expected timeframes
- store, classify and maintain documents and records correctly.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify key provisions of relevant legislation, regulations, standards and codes of practice that may affect information management
- outline organisational policies and procedures relating to collecting and processing workplace information
- identify and describe organisational recordkeeping/filing systems and security procedures
- describe a range of filing systems including paper-based and software-based.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – information management field of work and include access to:

- office equipment and resources
- examples of workplace information systems.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINM302 Utilise a knowledge management system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to access a knowledge management system, use monitoring and review processes to provide feedback and improve own work practices using the system.

This includes a whole range of strategies, methods, activities and techniques used formally and informally by individuals and the organisation (as formalised in a knowledge management system) to identify, collect, organise, store, retrieve, analyse, share and apply knowledge to the work of the organisation.

It applies to individuals who apply a broad range of competencies in various work contexts. They may exercise discretion and judgement using appropriate theoretical knowledge of knowledge management to assist in increasing productivity, to improve quality or to recognise the benefits to the organisation through the improved use of knowledge.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Access and use	1.1 Access knowledge management system to assist with specific

Assessment Requirements for BSBINM303 Handle receipt and despatch of information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- register and distribute incoming mail in accordance with firm's policies and procedures, promptly and accurately
- despatch and register outgoing mail in accordance with firm's policies and procedures and carrier's requirements and relevant legislation
- check all details routinely, including addresses, numerical information, spelling and contents of mail for accuracy
- seek clarification from designated person/s and apply correct addressing protocols for despatch with a range of carriers
- apply the principles of legal practitioner/support, responsibilities and obligations for despatch of information.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe accepted codes of conduct related to duty of care, privacy and confidentiality, and compliance with reasonable direction
- outline criteria for courier selection
- identify and describe organisation's policies and procedures as they apply to despatch
- list roles and locations of a firm's personnel
- describe scope of mail and document handling support role.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – information management field of work and include access to:

- a real or simulated work environment
- typical samples of mail and documents.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINM501 Manage an information or knowledge management system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to organise training for others for an information or knowledge management system and to manage the use of the system.

It applies to individuals who are responsible for seeing that key information and corporate knowledge are retained, accessible to others and improve business outcomes.

The unit applies to information or knowledge management systems which comprise policies, protocols, procedures and practices to manage information or knowledge within the organisation and among relevant stakeholders.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Organise learning to use information or knowledge management system	1.1 Identify learning needs of relevant personnel and stakeholders for input into and use of an information or knowledge management system 1.2 Identify and secure human, financial and physical resources

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	required for learning activities to use an information or knowledge management system 1.3 Organise and facilitate learning activities 1.4 Promote and support use of the system throughout the organisation 1.5 Monitor and document effectiveness of learning activities
2 Manage use of information or knowledge management system	2.1 Ensure implementation of policies and procedures for the information or knowledge management system are monitored for compliance, effectiveness and efficiency 2.2 Address implementation issues and problems as they arise 2.3 Monitor integration and alignment with data and information systems 2.4 Collect information on achievement of performance measures 2.5 Manage contingencies such as system failure or technical difficulties by accessing technical specialist help as required
3 Review use of information or knowledge management system	3.1 Analyse effectiveness of system and report on strengths and limitations of the system 3.2 Review business and operational plan and determine how effectively the system is contributing to intended outcomes 3.3 Make recommendations for improvement to system, policy or work practices

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.5, 2.1-2.5, 3.1-3.3	• Researches and critically analyses documentation from a variety of sources to determine requirements
Writing	1.1-1.5, 2.1-2.4, 3.2, 3.3	• Prepares and produces documentation for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations

© Commonwealth of Australia, 2025 Public Skills Australia

Oral Communication	1.1, 1.2, 1.3, 1.4, 2.2, 2.5, 3.3	• Presents information using structure and language to suit the audience • Uses active listening and questioning and reading of verbal and non-verbal signals to clarify information and to confirm understanding
Navigate the world of work	2.1, 3.3	• Takes full responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulation • Modifies or develops organisational policies and procedures to comply with legislative requirements and organisation goals
Interact with others	1.1-1.4, 2.5, 3.3	• Implements strategies for a diverse range of colleagues and clients in order to build rapport and foster strong relationships • Collaborates with others sharing information to build strong work groups and avoid behaviours that are not conducive to a productive environment • Elicits feedback and provides feedback to others in order to improve self or workgroup behaviours
Get the work done	1.1-1.5, 2.1-2.5, 3.1, 3.2	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Monitors progress of plans and schedules and reviews and changes them to meet new demands and priorities • Applies systematic and analytical processes to address problems and make decisions in complex situations • Investigates new and innovative ideas as a means to continuously improve, work practices and processes • Uses and investigates new digital technologies and applications to manage and manipulate data and communicate effectively with others

Assessment Requirements for BSBINM501 Manage an information or knowledge management system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify learning needs and plan and implement learning activities to enable personnel to use information or knowledge management system including
  - providing human, financial and physical resources as required
  - use of coaching, mentoring, information sessions, workshops, training programs and e-learning as appropriate
- monitor performance and address issues and contingencies as they arise including
  - accessing technical specialists as required
  - correct application of policies and procedures for the information or knowledge management system
  - alignment and effectiveness of the policies and procedures
  - effectiveness of information or knowledge management system for intended outcomes
- recommend improvements to systems, policies and practices as appropriate.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant legislation, codes of practice and national standards relevant to privacy, freedom of information and knowledge management
- explain organisational policies and procedures including:
  - records management
  - information management
  - customer service
  - commercial confidentiality

© Commonwealth of Australia, 2025 Public Skills Australia

- describe the organisational operations and existing data and information systems.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – information management field of work and include access to:

- relevant legislation, regulation, standards and codes
- relevant workplace systems, documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN301 Promote innovation in a team environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to be an effective and proactive member of an innovative team.

It applies to individuals who play a proactive role in demonstrating, encouraging or supporting innovation in a team environment. The individual may be a team participant or a team leader. Teams may be formal or informal and may comprise a range of personnel.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Create opportunities to maximise innovation within the team	1.1 Evaluate and reflect on what the team needs and wants to achieve 1.2 Check out information about current or potential team members' work in the context of developing a more innovative team 1.3 Bring people into the team or make suggestions for team members based on what needs to be achieved and the potential for cross fertilising ideas

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Acknowledge, respect and discuss the different ways that people may contribute to building or enhancing the team
2 Organise and agree effective ways of working	2.1 Jointly establish ground rules for how the team will operate 2.2 Agree and communicate responsibilities in ways that encourage and reinforce team-based innovation 2.3 Agree and share tasks and activities to ensure the best use of skills and abilities within the team 2.4 Plan and schedule activities to allow time for thinking, challenging and collaboration 2.5 Establish personal reward and stimulation as an integral part of the team's way of working
3 Support and guide colleagues	3.1 Model behaviour that supports innovation 3.2 Seek external stimuli and ideas to feed into team activities 3.3 Proactively share information, knowledge and experiences with other team members 3.4 Challenge and test ideas within the team in a positive and collaborative way 3.5 Proactively discuss and explore ideas with other team members on an ongoing basis
4 Reflect on how the team is working	4.1 Debrief and reflect on activities and on opportunities for improvement and innovation 4.2 Gather and use feedback from within and outside the team to generate discussion and debate 4.3 Discuss the challenges of being innovative in a constructive and open way 4.4 Take ideas for improvement, build them into future activities and communicate key issues to relevant colleagues 4.5 Identify, promote and celebrate successes and examples of successful innovation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Public Skills Australia

Skill	Performance Criteria	Description
Reading	1.2, 4.2	• Interprets and analyses textual information, from a wide range of sources, to identify information relevant to team activities
Writing	2.2, 3.3, 4.4	• Uses clear language and formats appropriate for the audience to highlight and present specific information
Oral Communication	1.2, 1.3, 1.4, 2.1, 2.2, 3.5, 4.1, 4.2, 4.3, 4.4, 4.5	• Actively participates in verbal exchanges of ideas and elicits the views and opinions of team members by listening and questioning • Uses clear language to clarify rules and roles relating to team activities in formal and informal situations
Numeracy	1.2, 4.2	• Interprets numeric information relevant to team activities
Navigate the world of work	1.1, 3.1, 3.2, 3.5	• Understands the nature and purpose of own role and how it affects others in the work context
Interact with others	1.1-1.4, 2.1, 2.2, 3.1, 3.2, 3.4, 3.5, 4.1, 4.2, 4.4, 4.5	• Uses inclusive techniques to initiate, contribute and promote discussion amongst potentially diverse team members • Recognises the importance of establishing and building effective working relationships • Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.3, 1.4, 2.2, 2.4, 2.5, 3.2, 3.4, 4.2, 4.4, 4.5	• Plans, sequences and prioritises tasks for efficient and effective outcomes • Contributes to continuous improvement of current work practices by applying basic principles of analytical and lateral thinking • Uses problem-solving processes to address less predictable problems, and when appropriate, seeking input from others • Reflects on outcomes and further explores own and the team's role in implementing innovation

Assessment Requirements for BSBINN301 Promote innovation in a team environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply practices that promote innovation within a team including:
  - modelling open and respectful communications
  - contributing to the make-up and rules of the team
  - planning and scheduling of activities
  - reflecting on activities, feedback and challenges to identity improvement options
- encourage others to contribute to innovation in the team
- implement improvements and communicate about them.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain what innovation is, the different types of innovation and the benefits of innovation
- describe the internal and external factors that contribute to a team becoming and remaining innovative including:
  - team characteristics
  - the role of group dynamics and diversity
  - broader environmental factors
- explain how activities can encourage or hinder innovation in a team including:
  - allocation of time and activities
  - modelling behaviour
  - rewards and recognition
  - communications

© Commonwealth of Australia, 2025 Public Skills Australia

- feedback.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINS201 Process and maintain workplace information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to receive, process, and store workplace information and maintain information systems. It also includes the maintenance of records management systems.

The unit applies to individuals who perform a variety of routine tasks in the workplace, using a limited range of practical skills and fundamental knowledge of information and information systems in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Information Services

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Collect information	1.1 Confirm task requirements 1.2 Collect physical and digital information items 1.3 Allocate time and date of receipt to relevant information items 1.4 Apply organisational policies and procedures relating to security and confidentiality in handling information
2. Process workplace information	2.1 Enter metadata applying to information items into relevant system according to organisational policies and procedures 2.2 Collate and distribute information according to task requirements

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3. Manage information systems	3.1 Maintain information and relevant classification system according to organisational policies and procedures 3.2 Identify and dispose of inactive unpublished information items or deaccession published information items according to organisational policies and procedures 3.3 Create new files of unpublished information materials according to organisational policies and procedures 3.4 Update registration, accessioning, classification and index systems according to organisational policies and procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Recognises and interprets textual information to complete tasks according to organisational policies and procedures
Writing	• Records simple and routine content using an established format to organise information
Oral Communication	• Uses listening and questioning skills to clarify and adhere to requirements
Numeracy	• Comprehends basic mathematical measurements relating to times and number sequences
Self-management	• Follows clearly defined instructions and monitors own progress to achieve timelines
Technology	• Uses digital technologies regarding data entry and retrieval

Unit Mapping Information

Supersedes and is equivalent to BSBINM201 Process and maintain workplace information.

Assessment Requirements for BSBINS201 Process and maintain workplace information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- receive and process three pieces of workplace information according to organisational policies and procedures.

In the course of the above, the candidate must:

- record and document information accurately
- store, classify and maintain information materials.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational policies and procedures relating to collecting and processing workplace information
- key aspects of organisational information items management systems and security and confidentiality procedures.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- examples of workplace information systems.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBINS302 Organise workplace information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to receive, collect, organise and apply workplace information in the context of an organisation's work processes, record managing and knowledge management systems.

The unit applies to those who perform a defined range of skilled operations in various work contexts. They may exercise discretion and judgement using appropriate knowledge of information management to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Information Services

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Receive, acquire and assess information	1.1 Confirm that proposed methods of receiving and acquiring information meet organisational policies and procedures 1.2 Receive and acquire information according to organisational policies and procedures 1.3 Confirm information is clear, accurate, current and relevant to intended tasks 1.4 Access additional required information from relevant stakeholders

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Organise information	2.1 Organise information in a format suitable for analysis, interpretation and distribution according to organisational policies and procedures 2.2 Store information using relevant systems and technology according to organisational policies and procedures 2.3 Distribute information to relevant stakeholders 2.4 Identify issues accessing, organising and storing information and solve collaboratively with relevant stakeholders
3. Review information needs	3.1 Seek feedback on clarity, accuracy, relevancy and sufficiency of information 3.2 Review feedback and suggest updates to receipt and acquisition processes, where required 3.3 Identify and document future information needs and suggest modifications to collection and organisation processes

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Recognises and assesses textual information to complete tasks according to requirements
Writing	• Completes workplace records, forms and documentation accurately using correct format, accurate spelling and grammar and terminology specific to requirements
Oral Communication	• Collects information by listening and questioning • Participates in a verbal exchange using clear language to contribute information and convey issues
Self-management	• Understands rights and responsibilities and complies with explicit policies and procedures and legal and regulatory requirements
Teamwork	• Complies with work instructions and contributes to work group discussions using accepted conventions
Planning and organising	• Plans and implements routine tasks and workload making decisions about sequencing and timing
Technology	• Uses digital technology to access and record information and to communicate with others

© Commonwealth of Australia, 2025 Public Skills Australia

Skill	Description
Problem solving	• Makes low impact decisions within familiar situations, based on a range of predefined or routine solutions, and evaluates the effectiveness of the outcome

Unit Mapping Information

Supersedes and is equivalent to BSBINM301 Organise workplace information.

Assessment Requirements for BSBINS302 Organise workplace information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- gather, assess, organise and distribute three pieces of workplace information.

In the course of the above, the candidate must:

- provide information according to organisational policies and procedures
- use business technology to coordinate information
- communicate with relevant stakeholders to obtain and check workplace information
- monitor, review and modify information organisation processes.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- methods for checking information is clear, accurate, current and relevant for purpose
- organisational policies and procedures relating to workplace information
- features and functions of technology required to store and organise information.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- organisational policies and procedures relevant to workplace information
- examples of information documents found in the workplace.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBINS401 Analyse and present research information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to collect, organise, analyse and present information using available systems and sources. This includes identifying research requirements and sources of information, evaluating the quality and reliability of the information, and preparing and producing reports.

The unit applies to those who are required to analyse and apply their knowledge of the organisation to research tasks, evaluate information from a variety of sources and apply solutions to a range of predictable and unpredictable problems.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Information Services

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify and confirm research strategy	1.1 Identify research objectives according to organisational requirements 1.2 Identify potential sources for research information relevant to organisation requirements 1.3 Assess reliability of potential sources 1.4 Identify and confirm information research strategy is relevant to the research objectives
2. Collect and store research information	2.1 Access and extract relevant information in a format suitable for analysis and distribution according to research strategy

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.2 Store research information according to security requirements and organisational policies and procedures
3. Analyse and synthesise research information	3.1 Analyse stored information according to research strategy 3.2 Identify themes and draw conclusions according to research strategy 3.3 Demonstrate that assumptions and conclusions used in analysis are clear, justified, supported by evidence and consistent with research strategy
4. Present research information	4.1 Identify methods of reporting that align with the intended audience and relevant organisational requirements 4.2 Draft research report on findings 4.3 Facilitate review of draft report according to organisational policies and procedures 4.4 Distribute research report according to organisational policies and procedures 4.5 Obtain feedback and comments on suitability and sufficiency of findings in accordance with organisational requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Analyses and evaluates textual information to develop information research strategies, integrate facts and ideas and meet organisational requirements
Writing	• Gathers, evaluates and integrates information from a range of sources • Presents findings, recommendations and issues in required format using language, structure and style appropriate to audience
Oral Communication	• Presents recommendations and issues using language appropriate to audience and according to organisational requirements
Self-management	• Plans, organises and implements tasks to meet organisational requirements • Takes responsibility for the outcomes of routine decisions related directly to own role
Problem solving	• Identifies and solves foreseeable problems in familiar work contexts
Technology	• Uses the main features and functions of digital technologies and tools to

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- research, analyse and present research findings according to organisational requirements on at least two occasions.

In the course of the above, the candidate must:

- identify research requirements and objectives
- collect, organise and present research information
- maintain information securely
- prepare report on research findings, including:
  - justified assumptions and conclusions
  - efficient and reliable research methods.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational policies and procedures relating to:
  - accessing information
  - storing information
  - security requirements
  - form and content of research report
- key aspects of the reliability and validity of research and analysis
- common research strategies
- key aspects of relevant information sources, including:
  - reliability
  - accuracy
  - authority

BSBINS501 Implement information and knowledge management systems

Modification History

Release	Comments
Release 2	This version first released with the Business Services Training Package Version 8.0. Typographical error in Foundation Skills corrected.
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to organise training for an information and knowledge management system and to implement the use of the system.

The unit applies to individuals who are responsible for ensuring relevant information and corporate knowledge are retained, accessible and improve business outcomes.

It applies to information and knowledge management systems that comprise policies, protocols, procedures and practices to manage information or knowledge within the organisation and among relevant stakeholders.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Information Services

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement use of management system	1.1 Identify legislative requirements, and organisational policies and procedures

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.2 Implement information and knowledge management system according to legislative requirements and organisational policies and procedures 1.3 Address implementation issues and problems, where required 1.4 Collect information on relevant key performance indicators 1.5 Identify contingencies and refer technical specialist help, where required
2. Organise learning to use management systems	2.1 Identify learning requirements of relevant stakeholders for use of an information and knowledge management system 2.2 Identify and secure resources required for learning activities to use an information and knowledge management system 2.3 Organise and facilitate learning activities 2.4 Promote and support use of the system throughout the organisation 2.5 Monitor and document effectiveness of learning activities
3. Review use of management system	3.1 Analyse effectiveness of system and report on strengths and limitations of the system 3.2 Recommend improvements to information and knowledge management system, where required

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Writing	• Prepares and produces documentation for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations
Oral Communication	• Presents information using structure and language to suit the audience • Uses active listening and questioning and reading of verbal and non-verbal signals to clarify information and to confirm understanding
Self-management	• Takes responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulation
Teamwork	• Collaborates with others, sharing information to build strong work groups and avoid behaviours that are not conducive to a productive environment • Elicits feedback and provides feedback to others in order to improve

© Commonwealth of Australia, 2025 Public Skills Australia

Skill	Description
	self or workgroup behaviours
Planning and organising	• Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Monitors progress of plans and schedules and reviews and changes them to meet new demands and priorities
Problem solving	• Applies systematic and analytical processes to address problems and make decisions in complex situations
Initiative and enterprise	• Investigates new and innovative ideas to continuously improve, work practices and processes
Technology	• Uses and investigates new digital technologies and applications to manage and manipulate data and communicate effectively with others

Unit Mapping Information

Supersedes and is equivalent to BSBINM501 Manage an information or knowledge management system.

Assessment Requirements for BSBINS501 Implement information and knowledge management systems

Modification History

Release	Comments
Release 2	This version first released with the Business Services Training Package Version 8.0. Typographical error in Foundation Skills corrected.
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement and review one information management system
- implement and review one knowledge management system
- facilitate learning on both these information and knowledge management systems.

In the course of the above, the candidate must:

- identify learning needs and plan and implement learning activities to enable personnel to use information and knowledge management system
- monitor performance and address issues and contingencies as they arise including:
  - accessing technical specialists, as required
  - applying correct policies and procedures for the information or knowledge management system
  - evaluating effectiveness of information or knowledge management system for intended outcomes
- recommend improvements to systems, policies and practices, where required.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- relevant legislation, regulation, standards and codes
- organisational policies and procedures, including those related to:
  - information management
  - knowledge management

© Commonwealth of Australia, 2025 Public Skills Australia

- organisational operations and existing data and information systems
- relevant learning activities and key performance indicators.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulation, standards and codes relevant to information and knowledge management
- workplace systems, documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBITU304 Produce spreadsheets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop spreadsheets through the use of spreadsheet software.

It applies to individuals employed in a range of environments who tend to be personally responsible for designing and working with spreadsheets under minimal supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Select and prepare resources	1.1 Adhere to ergonomic, work organisation and occupational health and safety requirements 1.2 Use energy and resource conservation techniques to minimise wastage 1.3 Identify spreadsheet task requirements in relation to data entry, storage, output and presentation
2. Plan spreadsheet design	2.1 Ensure spreadsheet design suits purpose, audience and information requirements of task

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.2 Ensure spreadsheet design enhances readability and appearance, and meets organisational and task requirements for style and layout 2.3 Use style sheets and automatic functions to ensure consistency of design and layout
3. Create spreadsheet	3.1 Ensure data is entered, checked and amended to maintain consistency of design and layout, in accordance with organisational and task requirements 3.2 Format spreadsheet using software functions to adjust page and cell layout to meet information requirements, in accordance with organisational style and presentation requirements 3.3 Ensure formulae are tested and used to confirm output meets task requirements, in consultation with appropriate personnel as required 3.4 Use manuals, user documentation and online help to overcome problems with spreadsheet design and production
4. Produce simple charts	4.1 Select chart type and design that enables valid representation of numerical data, and meets organisational and task requirements 4.2 Create charts using appropriate data range in spreadsheet 4.3 Modify chart type and layout using formatting features
5. Finalise spreadsheets	5.1 Preview, adjust and print spreadsheet and any accompanying charts, in accordance with task requirements 5.2 Ensure data input meets designated timelines and organisational requirements for speed and accuracy 5.3 Name and store spreadsheet in accordance with organisational requirements and exit application without data loss/damage

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.2, 3.1-3.4, 5.1	• Recognises and interprets numerical and textual information to determine organisational and task

© Commonwealth of Australia, 2025 Public Skills Australia

		requirements
Writing	2.1, 3.1-3.3, 4.2, 4.3, 5.1-5.3	• Inputs numerical and key reporting information when creating and finalising spreadsheets and uses format, layout, style guides and standard naming conventions to organise data according to purpose and audience
Oral Communication	3.3	• Participates in exchange of information to determine whether formulae utilised produce result required
Numeracy	4.1, 4.2	• Uses mathematical equations to create simple formulae and validate numerical data
Navigate the world of work	1.1-1.3, 2.1-2.3, 3.1-3.3, 4.1, 5.1-5.3	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	3.3	• Collaborates with others to achieve joint outcomes
Get the work done	2.1-2.3, 3.1-3.4, 4.1-4.3, 5.1-5.3	• Uses advanced features within applications to address routine and complex work tasks

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- design spreadsheets that address a range of data and organisational requirements
- use software functions, graphics and support materials to create spreadsheets
- apply knowledge of formatting requirements for workplace documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe formatting requirements of workplace documents
- identify organisational guidelines on spreadsheet design and use
- explain organisational requirements for ergonomic standards, work periods and breaks, and conservation techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- industry software packages
- computer user information
- relevant legislation and codes of practice
- organisational policies and procedures
- relevant workplace documentation and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITU401 Design and develop complex text documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to design and develop business documents using complex technical features of word processing software.

It applies to individuals who work in a range of business environments and have skills which may be applied in the provision of administrative support within an enterprise, or by technical/knowledge experts responsible for producing their own word processed documents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to produce word processed documents	1.1 Use safe work practices to ensure ergonomic, work organisation, energy and resource conservation requirements are met 1.2 Identify document purpose, audience and presentation requirements, and clarify with relevant personnel as required 1.3 Identify organisational requirements for text-based business documents to ensure consistency of style and image 1.4 Evaluate complex technical functions of software for its

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	usefulness in fulfilling requirements of the task 1.5 Match document requirements with software functions to provide efficient production of documents
2. Design complex documents	2.1 Design document structure and layout to suit purpose, audience and information requirements of task 2.2 Design document to enhance readability and appearance, and to meet organisational and task requirements for style and layout 2.3 Use complex software functions to enable efficient manipulation of information and other material, and ensure consistency of design and layout 2.4 Use manuals, user documentation and online help to overcome problems with document design and production
3. Add complex tables and other data	3.1 Insert a standard table into document, changing cells to meet information requirements 3.2 Format rows and columns as required 3.3 Insert images and other data, formatting as required
4. Produce documents	4.1 Use complex operations to develop documents, and achieve required results 4.2 Preview, adjust and print documents in accordance with organisational and task requirements 4.3 Name and store documents in accordance with organisational requirements and exit application without information loss/damage 4.4 Prepare documents within designated timelines and for speed and accuracy

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 2.2, 2.4, 4.3, 4.4	• Recognises and interprets textual information from a range of resources to determine and confirm requirements and to assist with document issues

© Commonwealth of Australia, 2025 Public Skills Australia

Writing	2.1-2.4, 3.3, 4.2-4.4,	• Develops material using required format and incorporating technical functions to meet business needs
Oral Communication	1.2	• Uses specific and relevant language to confirm understanding of requirements and listens carefully to verbal instructions and discussions
Numeracy	1.4, 3.3	• Recognises and inputs numerical information according to requirements
Navigate the world of work	1.1-1.3, 1.5, 2.1-2.3, 3.1-3.3, 4.1-4.4	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	1.2	• Collaborates with others to achieve joint outcomes
Get the work done	1.4, 1.5, 2.1-2.4, 3.1-3.3, 4.1-4.4	• Applies formal processes when planning more complex/unfamiliar tasks, producing plans with logically sequenced steps • Uses advanced features within applications to access, store, organise data and perform routine and complex work tasks

Assessment Requirements for BSBITU401 Design and develop complex text documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- follow organisational and safe work practices including:
  - ergonomic requirements
  - energy and resource conservation techniques
- adhere to organisational requirements for:
  - producing documents within designated timelines
  - naming and storing documents
- adhere to task requirements when producing complex documents including:
  - using appropriate styles and layout consistently throughout the document
  - using correct formatting and document structure
- resolve issues by referring to user documentation and online help
- use appropriate data storage options
- apply knowledge of complex operation and functions of industry software applications
- communicate with relevant personal.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline various formatting styles and their effect on formatting, readability and appearance of documents
- explain organisational requirements for ergonomics, work periods and breaks, and conservation techniques
- describe purpose and contents of an organisational style guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- organisational policies and procedures
- relevant workplace documentation and resources
- industry software packages and user instructions.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITU402 Develop and use complex spreadsheets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to use spreadsheet software to complete business tasks and produce complex documents.

It applies to individuals employed in a range of work environments who require skills in creation of complex spreadsheets to store and retrieve data. They may work as individuals providing administrative support within an enterprise, or may be independently responsible for designing and working with spreadsheets relevant to their own work roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to develop spreadsheet	1.1 Organise personal work environment in accordance with ergonomic requirements 1.2 Analyse task and determine specifications for spreadsheets 1.3 Identify organisational and task requirements of data entry, storage, output, reporting and presentation requirements 1.4 Apply work organisation strategies and energy and resource

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	conservation techniques to plan work activities
2. Develop a linked spreadsheet solution	2.1 Utilise spreadsheet design software functions and formulae to meet identified requirements 2.2 Link spreadsheets in accordance with software procedures 2.3 Format cells and use data attributes assigned with relative and/or absolute cell references, in accordance with task specifications 2.4 Test formulae to confirm output meets task requirements
3. Automate and standardise spreadsheet operation	3.1 Evaluate tasks to identify those where automation would increase efficiency 3.2 Create, use and edit macros to fulfil requirements of task and automate spreadsheet operation 3.3 Develop, edit and use templates to ensure consistency of design and layout for forms and reports, in accordance with organisational requirements
4. Use spreadsheets	4.1 Enter, check and amend data in accordance with organisational and task requirements 4.2 Import and export data between compatible spreadsheets and adjust host documents, in accordance with software and system procedures 4.3 Use manuals, user documentation and online help to overcome problems with spreadsheet design and production 4.4 Preview, adjust and print spreadsheet in accordance with organisational and task requirements 4.5 Name and store spreadsheet in accordance with organisational requirements and exit application without data loss or damage
5. Represent numerical data in graphic form	5.1 Determine style of graph to meet specified requirements and manipulate spreadsheet data if necessary to suit graph requirements 5.2 Create graphs with labels and titles from numerical data contained in a spreadsheet file 5.3 Save, view and print graph within designated timelines

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.3, 2.4, 3.1, 3.3, 4.1-4.5, 5.1, 5.2	• Recognises and interprets numerical and textual information within a range of sources to determine and complete work according to requirements • Reviews information to determine accuracy and consistency
Writing	2.1-2.4, 3.2, 3.3, 4.1, 4.2, 4.4, 4.5, 5.2, 5.3	• Uses formal mathematical language to create formulas and enters routine data using a format appropriate to requirements • Develops material using syntactic structure, required format and incorporating technical functions to meet business needs
Oral Communication	1.2	• Uses listening and questioning skills to clarify requirements
Numeracy	2.1-2.4, 3.2, 4.1, 4.2, 5.2	• Represents mathematical information in an alternative form and analyses information to determine required spreadsheet formulae and macros
Navigate the world of work	1.1, 1.3, 1.4, 2.1-2.4, 3.2, 3.3, 4.1, 4.2, 4.4, 4.5, 5.1, 5.3	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Get the work done	1.2, 1.4, 2.1-2.4, 3.2, 3.3, 4.1-4.5, 5.1-5.3	• Applies formal processes when planning more complex/unfamiliar tasks, producing plans with logically sequenced steps • Uses formal thinking techniques to generate new ideas • Uses advanced features within applications to access, store, organise data and perform routine and complex work tasks

BSBLDR301 Support effective workplace relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to gather information and support effective relationships and networks, with particular regard to communication and representation.

The unit applies to individuals who use leadership skills to support the development of teams and help facilitate communication between team members.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Social Competence – Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Gather information and ideas	1.1 Identify information on work roles and objectives of work team 1.2 Locate and communicate to work team organisational processes for communication and teamwork 1.3 Establish scope of own role 1.4 Seek contributions for refining ideas and approaches to teamwork and communication according to organisational processes 1.5 Identify and consult with team members on potential work-related issues
2. Develop team relationships and networks	2.1 Encourage communication within team according to organisation’s social, ethical and business policies and procedures

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.2 Adjust interpersonal styles and methods in relation to the organisation's social and cultural environment 2.3 Identify and use workplace networks to help build relationships 2.4 Identify and describe the value of networks and other work relationships for the team and the organisation
3. Contribute to positive team outcomes	3.1 Identify issues to be rectified within own level of responsibility and according to organisational and legal requirements 3.2 Support colleagues in resolving work difficulties related to own level of responsibility, according to organisational and legal requirements 3.3 Review team outcomes and implement improvements in consultation with relevant personnel 3.4 Contribute constructively to conflict resolution according to organisational policies and processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	• Applies textual information to determine regulatory requirements and adhere to job processes and internal policies
Writing	• Uses appropriate language to record key information related to the outcomes of the job • Varies writing style to meet requirements of audience and purpose
Oral Communication	• Speaks clearly using tone and pace appropriate for the audience and purpose • Uses appropriate techniques, including active listening and questioning, to clarify information and to confirm understanding
Initiative and enterprise	• Takes personal responsibility for adherence to explicit and implicit organisational policies, procedures, standards and legislative requirements within own job role and in all interactions with others
Teamwork	• Adjusts personal communication style in response to diversity of individuals in the work context • Implements strategies to respond appropriately to conflict and poor work performance
Planning and organising	• Takes responsibility for planning, sequencing and prioritising tasks for own workload

© Commonwealth of Australia, 2025 Public Skills Australia

Technology	• Uses familiar digital technologies and systems to access, present and communicate information

Unit Mapping Information

Supersedes and is equivalent to BSBFLM303 Contribute to effective workplace relationships.

Supersedes but is not equivalent to BSBEDU302 Assist in resolution of issues and incidents in an international education environment.

Assessment Requirements for BSBLDR301 Support effective workplace relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- support the development of at least one team
- facilitate communication between individuals on at least two occasions.

In the course of the above, the candidate must:

- adjust interpersonal style and communications to respond to cultural and social diversity
- apply relationship management and communication skills with a range of people that:
  - demonstrate integrity, respect, empathy and cultural sensitivity and promote trust
  - forge effective relationships with internal and/or external people and help to maintain these networks
  - encourage participation and foster contribution of and respect for ideas and feedback
  - provide support to colleagues to resolve difficulties
- communicate ideas and information to diverse audiences.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- internal and external sources of information to improve organisational processes
- social and ethical requirements, and organisational policies and procedures relevant to communication
- legislative requirements relevant to communication
- strategies required to adapt communication for diverse audiences
- potential team issues including poor work performance
- examples of how work relationships and the cultural and social environment can support or hinder achieving planned outcomes
- techniques for developing positive work relationships and building trust and confidence in a team

© Commonwealth of Australia, 2025 Public Skills Australia

- methods and techniques for communicating information and ideas to a range of stakeholders
- common problem-solving methods
- common methods to resolve workplace conflict
- process for monitoring, analysing and introducing ways to improve work relationships
- value of networks and work relationships for the team and the organisation
- own level of responsibility.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation and resources relevant to workplace relationships.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBLDR414 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills, knowledge and outcomes required to lead the performance of a team and to develop team cohesion.

The unit applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams. Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Social Competence – Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan team outcomes	1.1 Lead team to identify and establish team objectives and work processes 1.2 Support team to document identified objectives and work processes according to organisational processes 1.3 Encourage team members to incorporate innovation and productivity measures in work plans 1.4 Lead and support team members to meet expected outcomes
2. Promote team cohesion	2.1 Provide opportunities for input of team members into planning, decision making and operational aspects of work team

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.2 Support team members to take responsibility for own work and to assist each other in undertaking required roles and responsibilities 2.3 Provide feedback to team members on their efforts and contributions 2.4 Address or refer issues, concerns and problems identified by team members 2.5 Model expected behaviours and approaches
3. Supervise team performance	3.1 Encourage team members to participate in and take responsibility for team activities and communication processes 3.2 Support team to identify and resolve problems which impede performance 3.3 Ensure own contribution to work team serves as a role model for others
4. Liaise with management	4.1 Establish open communication with line management 4.2 Communicate information from line management to the team 4.3 Communicate unresolved issues, concerns and problems raised by the team to line management to action 4.4 Communicate issues raised by management to the team to action

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Writing	• Prepares workplace plans that communicate intent and elicits feedback clearly and effectively
Oral communication	• Engages in discussions or provides information using structure and language appropriate to the audience and situation
Teamwork	• Selects and uses appropriate conventions and protocols when communicating with team members • Adapts personal communication style to model required behaviours, build trust and positive working relationships and to show respect for the opinions and values of others • Plays a lead role in situations requiring effective collaboration, demonstrating conflict resolution skills and ability to engage and motivate others

© Commonwealth of Australia, 2025 Public Skills Australia

Planning and organising	• Develops, implements and monitors plans and processes to ensure team engagement and effectiveness • Uses formal analytical thinking techniques to identify issues and generate possible solutions, seeking input from others, as required

Unit Mapping Information

Supersedes and is equivalent to BSBLDR403 Lead team effectiveness.

Supersedes but is not equivalent to BSBSMB407 Manage a small team.

BSBLDR522 Manage people performance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.
Release 2	This version first released with BSB Business Services Training Package Version 7.1. Release created to amend typographical error with performance criteria.

Application

This unit describes the skills and knowledge required to manage the performance of staff that are direct reports.

The unit applies to individuals who manage people. It covers work allocation and the methods to review performance, reward excellence and provide feedback. The unit makes the link between performance management and performance development and reinforces both functions as a key requirement for effective managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Social Competence – Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Allocate work	1.1 Consult relevant groups and individuals on work to be allocated and resources available 1.2 Develop work plans and allocate work according to organisational requirements and operational plans 1.3 Develop and confirm performance standards and key

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	performance indicators with relevant staff 1.4 Conduct risk analysis according to organisational risk management plan and legal requirements
2. Assess performance	2.1 Review performance management and processes according to legislation, organisational objectives and policies 2.2 Train participants in the performance management and review process 2.3 Conduct performance management according to organisational policies procedures and relevant timelines 2.4 Monitor and evaluate performance according to performance standards and key performance indicators
3. Provide feedback	3.1 Provide informal feedback and coaching to staff 3.2 Advise relevant personnel, where performance is poor and take necessary actions 3.3 Document feedback according to the organisational performance management system 3.4 Conduct formal structured feedback sessions as necessary and according to organisational policy
4. Manage follow up	4.1 Develop performance improvement and development plans according to organisational policies 4.2 Monitor underperforming individuals according to organisational policies 4.3 Respond to underperforming individuals, as required 4.4 Reinforce excellence in performance through recognition and continuous feedback

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Learning	• Consolidates and improves own knowledge and skills by coaching, mentoring or training others
Reading	• Gathers, interprets and analyses texts in organisational documents to facilitate performance management
Writing	• Plans and prepares documents for allocating work and managing performance suitable for the target audience and in accordance with organisational requirements

© Commonwealth of Australia, 2025 Public Skills Australia

Oral Communication	• Uses language and structure appropriate to context and audience to explain expected standards of performance, provide feedback and coach staff
Self-management	• Applies legal and regulatory responsibilities related to own work and the organisation as a whole • Adheres to organisational policies and procedures
Teamwork	• Applies the protocols governing what to communicate to whom and how in a range of work contexts • Collaborates with others to achieve joint outcomes, influencing direction and taking a leadership role on occasion
Planning and organising	• Sequences and schedules complex activities, monitors implementation and manages relevant communication • Seeks advice, feedback and support, as required to assist in the decision-making process • Uses experiences to reflect on the ways in which variables impact on performance

Unit Mapping Information

Supersedes and is equivalent to BSBMGT502 Manage people performance.

Supersedes but is not equivalent to:

- BSBMGT404 Lead and facilitate off-site staff
- BSBSLS502 Lead and manage a sales team.

BSBLED501 Develop a workplace learning environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to encourage and support the development of a learning environment in which work and learning come together. Particular emphasis is on the development of strategies to facilitate and promote learning and to monitor and improve learning performance.

It applies to individuals who have a prominent role in encouraging, supporting and facilitating the development of a learning environment in which work and learning come together.

At this level work will normally be carried out within complex and diverse methods and procedures, which require the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Learning and Development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Create learning opportunities	1.1 Identify potential formal and informal learning opportunities 1.2 Identify learning needs of individuals in relation to the needs of

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	the team and/or enterprise and available learning opportunities 1.3 Develop and implement learning plans as an integral part of individual and team performance plans 1.4 Develop strategies to ensure that learning plans reflect the diversity of needs 1.5 Ensure organisational procedures maximise individual and team access to, and participation in, learning opportunities 1.6 Ensure effective liaison occurs with training and development specialists and contributes to learning opportunities which enhance individual, team and organisational performance
2. Facilitate and promote learning	2.1 Develop strategies to ensure that workplace learning opportunities are used and that team members are encouraged to share their skills and knowledge to encourage a learning culture within the team 2.2 Implement organisational procedures to ensure workplace learning opportunities contribute to the development of appropriate workplace knowledge, skills and attitudes 2.3 Implement policies and procedures to encourage team members to assess their own competencies and to identify their own learning and development needs 2.4 Share the benefits of learning with others in the team and organisation 2.5 Recognise workplace achievement by timely and appropriate recognition, feedback and rewards
3. Monitor and improve learning effectiveness	3.1 Use strategies to ensure that team and individual learning performance is monitored to determine the type and extent of any additional work-based support required and any Work Health and Safety (WHS) issues 3.2 Use feedback from individuals and teams to identify and introduce improvements in future learning arrangements 3.3 Make adjustments, negotiated with training and development specialists, for improvements to the efficiency and effectiveness of learning 3.4 Use processes to ensure that records and reports of competency are documented and maintained within the organisation’s systems and procedures to inform future planning

Assessment Requirements for BSBLED501 Develop a workplace learning environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0

Performance Evidence

Evidence of the ability to:

- collaboratively review performance development needs of individuals and teams
- plan professional development for individuals and teams that enhances organisational performance
- develop and implement learning plans
- liaise with training and development specialists
- recognise workplace achievement by giving feedback, recognition and rewards
- monitor and improve workplace learning
- record and report workplace learning outcomes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how management of relationships can achieve a learning environment
- identify principles and techniques involved in the management and organisation of:
  - adult learning
  - coaching and mentoring
  - consultation and communication
  - improvement strategies
  - leadership
  - learning environment and learning culture
  - monitoring and reviewing workplace learning
  - problem identification and resolution
  - record keeping and management methods

© Commonwealth of Australia, 2025 Public Skills Australia

- structured learning
- work-based learning.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce learning and development field of work and include access to:

- workplace policies and procedures
- workplace equipment and resources
- case studies and, where available, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLED503 Maintain and enhance professional practice

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required by individuals to manage their own professional development and ongoing performance.

This unit addresses the process required to maintain a high level of professional performance in a particular field. It includes modelling high standards of performance according to professional standards and procedures, and the processes and outcomes involved in determining professional development needs and participating in associated activities.

It applies to individuals who are required to maintain and manage their professional development at a high standard. Its application in the workplace will be determined by the job role of the individual and the legislation, rules, regulations and codes of practice relevant to different jurisdictions.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Learning and Development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Model high standards of performance	1.1 Ensure personal performance is consistent with the organisation's goals and objectives

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.2 Ensure work goals and plans reflect individual responsibilities in accordance with organisational and legal requirements
2. Determine personal development needs	2.1 Assess personal skills and knowledge against relevant benchmarks to determine development needs and priorities 2.2 Identify changes in professional practices and codes of conduct 2.3 Use feedback from colleagues and clients to identify personal learning needs and areas of professional development 2.4 Identify future career options 2.5 Update and document personal learning needs 2.6 Discuss personal development needs with relevant personnel for inclusion in professional development plan
3. Participate in professional development activities	3.1 Select development opportunities suitable to personal learning styles to support continuous learning and maintain currency of professional practice 3.2 Participate in professional networks to support continuous learning and to maintain professional practice 3.3 Use technology to maintain regular communication with relevant networks, organisations and individuals
4. Reflect on and evaluate professional practice	4.1 Research developments and trends impacting professional practice and integrate into work performance 4.2 Use feedback from colleagues, supervisors, staff and clients to identify and introduce improvements in work performance 4.3 Identify innovative and responsive approaches for improving professional practice using continuous improvement techniques and processes 4.4 Track progress through a personal portfolio or other mechanism 4.5 Manage records, reports and recommendations for improvement

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance	Description

© Commonwealth of Australia, 2025 Public Skills Australia

	Criteria	
Learning	2.1, 2.3, 2.5, 2.6, 3.1, 3.2, 4.1, 4.2	• Identifies and implements strategies to build on knowledge and skills
Reading	1.2, 2.1-2.5, 3.1-3.3, 4.1-4.5	• Interprets textual information obtained from a range of sources and determines how content may be applied to individual and organisational requirements
Writing	1.1, 1.2, 2.1-2.5, 3.1-3.3, 4.1-4.5	• Researches and integrates information from a number of sources and develops content that supports the purposes and format of the material, using clear and logical language and structures
Oral Communication	2.3, 2.6, 3.2, 4.2	• Uses listening and questioning skills to gather information • Derives meaning from language used in a range of oral contexts
Navigate the world of work	1.1, 1.2, 2.2, 2.4	• Recognises, responds and adheres to organisational procedures and protocols and legislative requirements • Understands how own role meshes with others and contributes to broader goals • Reviews current situation and future career and work options
Interact with others	2.3, 2.6, 3.2, 4.2	• Uses collaborative processes to gather required feedback • Recognises the importance of networking to establish effective working relationships
Get the work done	1.2, 3.1, 3.3, 4.2, 4.3, 4.4, 4.5	• Plans, implements and managers relatively complex, tasks with an awareness of how they may contribute to longer-term operational and strategic goals • Analyses information, including feedback from others, to make decisions about how performance could be improved • Actively looks for innovative ways to introduce improvements • Uses digital technologies to communicate information and ideas to an expanding range of audiences

Assessment Requirements for BSBLED503 Maintain and enhance professional practice

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- adhere to organisation's framework when setting personal goals and plans
- determine personal learning needs incorporating feedback obtained from colleagues and clients
- document personal learning needs in a professional development plan
- use networking and professional development activities to maintain own professional practice
- identify and implement improvements to own professional practice and keep records of progress.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe organisational goals and objectives and how they impact personal work goals and objectives
- list a range of continuous improvement techniques and processes, and their application
- identify networks relevant to professional practice
- describe the types and availability of professional development activities and opportunities
- outline relevant legislation, codes of practice and standards that apply to professional practice.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce learning and development field of work and include access to:

- relevant legislation, regulations and codes of practice
- workplace documentation detailing organisational goals, objectives, policies and procedures
- business technology
- case studies and, where available, real situations
- interaction with others
- contemporary information on professional development and career planning relevant to occupation.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLEG308 Assist in prioritising and planning activities in a legal practice

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to assist others within a legal practice to organise a legal schedule.

It applies to individuals who work under supervision to arrange appointments and other activities based on court dates and required legislative timeframes. In this role, individuals apply a broad range of administrative competencies in a legal office work environment, using some discretion and judgement. They provide support to legal practitioners and may provide technical advice and support to a team.

This unit underpins all units of competency in the Legal Services stream.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – Legal Services Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Record file-related critical dates and times	1.1 Identify file-related deadlines 1.2 Record file-related deadlines according to a firm's policies and

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	procedures
2. Make and record appointments on behalf of designated person	2.1 Establish and clarify priorities of designated person/s 2.2 Ensure timelines for achievement of priorities are agreed and documented/recorded 2.3 Arrange and/or re-arrange appointments to a time or date which is more convenient for parties involved
3. Assist designated person/s to prepare for critical dates	3.1 Check records daily for upcoming appointments and commitments 3.2 Remind designated person/s of critical file dates 3.3 Prepare and distribute information meeting legislative requirements to designated person/s prior to critical dates 3.4 Monitor timelines regularly in consultation with designated person
4. Follow up outcomes of meetings or other activities	4.1 Plan and organise appropriate follow-up actions and activities in conjunction with designated person and relevant parties 4.2 Update file notes according to a firm's policies and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 3.1, 3.4, 4.2	• Recognises and interprets textual data to identify and plan job deadlines to adhere to requirements
Writing	1.2, 2.2, 3.2-3.4, 4.1, 4.2	• Uses clear, accurate and relevant language to organise, record and update information and complete workplace documentation
Oral Communication	2.1, 2.2, 3.2, 3.4, 4.1	• Articulates clearly using specific terminology and relevant tone to convey requirements • Uses active listening and questioning techniques to confirm understanding
Numeracy	2.2, 2.3	• Uses basic mathematical formula to calculate and monitor work timeframes
Navigate the	1.2, 3.3, 4.2	• Takes personal responsibility for adherence to legal

Assessment Requirements for BSBLEG308 Assist in prioritising and planning activities in a legal practice

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- demonstrate an understanding of responsibility involved in making arrangements for others and legal consequences of not meeting critical timelines
- interact courteously and efficiently with other parties when making, confirming and changing appointments
- apply organisational skills and firm's procedures to accurately and legibly diarise all relevant details of appointments and file deadlines and follow up as required
- apply standard procedures to solve problems (such as double-bookings or non-attendances) promptly and satisfactorily
- create and maintain up-to-date, legible, accurate and accessible records of all activities and outcomes according to firm's policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline scope of legal practitioner/support role and own responsibilities and obligations to provide legal advice, complete or sign off on legal work and/or appear in court as described by relevant jurisdiction(s)
- firm's policies and procedures
- discuss firm's administrative systems and files
- adhere to codes of conduct including:
  - privacy and confidentiality
  - use of company property
  - duty of care
  - ethical behaviour

© Commonwealth of Australia, 2025 Public Skills Australia

- non-discriminatory practice
- conflict of interest
- compliance with reasonable direction.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the legal services administration field of work and include access to:

- office equipment and resources
- legislation and regulations relevant to common legal matters
- people with expert knowledge.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMED305 Apply the principles of confidentiality, privacy and security within the medical environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to apply principles and procedures relating to confidentiality, privacy and security to own work within the medical environment.

It applies to individuals required to maintain confidentiality, privacy and security under legislation, and workplace policies and procedures in a medical environment. It covers working within accepted codes of conduct and following confidentiality, privacy and security provisions.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – Medical Services Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Work within accepted codes of conduct	1.1 Ensure work is reviewed and approved by a health practitioner or senior administrator who has delegated tasks 1.2 Keep records up-to-date and complete tasks as required, neatly, accurately and in a timely manner 1.3 Seek clarification with relevant personnel of unclear or ambiguous procedures

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Treat patients, colleagues and health practitioners with respect 1.5 Refer health related matters raised by patients back to medical practitioners 1.6 Act with honesty and integrity at all times 1.7 Communicate conflict of interest or potential conflict of interest promptly to manager or supervisor
2. Follow confidentiality and privacy procedures	2.1 Assess information and requests for information with regard to what is and what is not disclosable 2.2 Use discretion and judgement in all communications 2.3 Discuss patient-related matters within the confines of the facility and with appropriate personnel only 2.4 Seek advice and clarification with relevant personnel where potential confidentiality issues arise in dealings with patients, their families and others
3. Follow security procedures	3.1 Store and appropriately secure patient records and other confidential documentation 3.2 Clearly label and store securely according to organisational policies and procedures, all documents required by legislation to be stored for certain periods 3.3 Ensure drugs, equipment and other materials potentially posing a work health and safety (WHS) threat to others are stored securely at all times

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.1, 3.1, 3.2	• Recognises familiar text types within job specifications and regulatory requirements and uses different strategies to identify relevant information
Writing	1.2, 3.2	• Produces records and labels according to workplace requirements
Oral	1.1, 1.3, 1.4, 1.5,	• Uses appropriate language and non-verbal features to provide information

© Commonwealth of Australia, 2025 Public Skills Australia

Communication	1.7, 2.4	• Obtains information from others by active listening and questioning
Navigate the work of work	1.6, 2.1, 2.2, 3.1, 3.2, 3.3	• Operates according to ethical guidelines and legislative requirements • Follows organisational procedures and protocols
Interact with others	1.1, 1.3, 1.4, 1.5, 1.7, 2.2, 2.3, 2.4	• Collaborates with others to achieve outcomes, playing an active role in facilitating respectful interactions
Get the work done	1.1, 1.2, 1.7, 2.1, 3.1, 3.2	• Plans and sequences workload to ensure tasks are completed accurately and in a timely manner • Takes responsibility for the outcomes of routine decisions related directly to own role • Recognises and takes responsibility for addressing predictable problems in familiar work contexts • Understands the importance of secure information and privacy in relation to own work

	organisation's goals and objectives
2. Enhance organisation's image	2.1 Use organisation's standards and values in conducting business 2.2 Question, through established communication channels, standards and values considered to be damaging to the organisation 2.3 Ensure personal performance contributes to developing an organisation which has integrity and credibility
3. Make informed decisions	3.1 Gather and organise information relevant to the issue/s under consideration 3.2 Facilitate individual's and team's active participation in decision-making processes 3.3 Examine options and assess associated risks to determine preferred course/s of action 3.4 Ensure decisions are timely and communicate them clearly to individuals and teams 3.5 Prepare plans to implement decisions and ensure they are agreed by relevant individuals and teams 3.6 Use feedback processes effectively to monitor the implementation and impact of decisions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.1, 3.1, 3.3, 3.5, 3.6	• Gathers, interprets and analyses text relating to organisational goals, standards and values to aid planning and decision making
Writing	1.3, 1.4, 3.1, 3.3, 3.5, 3.6	• Records and reports key information related to the organisational goals, standards and objectives • Researches, plans and prepares documentation for relevant stakeholders
Oral Communication	1.2, 1.3, 2.2, 2.3, 3.2, 3.4, 3.5, 3.6	• Uses appropriate structure and language when developing performance plans, or when seeking and providing information about organisational goals and

© Commonwealth of Australia, 2025 Public Skills Australia

		objectives
Numeracy	1.4	• Identifies and comprehends mathematical information in familiar texts to establish key performance indicators
Navigate the world of work	1.1, 1.2, 1.3, 1.4, 2.1, 2.3	• Understands how own role meshes with others and contributes to broader work goals • Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.2, 1.3, 2.2, 2.3, 3.2, 3.4, 3.5, 3.6	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective outcomes • Recognises the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate with whom, why and how
Get the work done	1.1, 1.3, 1.4, 3.1, 3.2, 3.3, 3.4, 3.5, 3.6	• Develops plans to manage relatively complex, non-routine tasks with an awareness of how they contribute to longer term operational and strategic goals • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Evaluates effectiveness of decisions in terms of how well they meet stated goals

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Organisation's standards and values must be identified by considering:	• explicitly stated values • values that are implied by the way the organisation conducts its business.

Assessment Requirements for BSBMGT401 Show leadership in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify the organisation's standards and values, whether stated or implied by the way the organisation conducts its business
- evaluate own behaviour and performance against these and adjust to achieve required standards
- develop and implement performance plans and key performance indicators (KPIs) to meet organisation's goals and objectives
- use established communication channels to raise questions about standards and values that may be damaging to the organisation
- ensure own behaviour and performance contributes to the integrity and credibility of the organisation
- facilitate processes to make decisions that are based on:
  - relevant information
  - examination of options and associated risks
  - input from relevant people
- communicate about making and implementing decisions including:
  - facilitating agreement on the preferred course of action and implementation plans
  - monitoring and feedback on the implementation and impact of decisions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how to identify an organisation's standards and values when they are:
  - stated

© Commonwealth of Australia, 2025 Public Skills Australia

  - implied
- articulate organisational values and expectations of behaviour
- explain basic theory of group behaviour
- outline the organisation's process for raising questions about standards and values
- give examples of behaviours and performance that would typically be considered damaging to an organisation
- explain concepts including:
  - organisational values
  - role modelling
  - integrity and credibility
  - leadership.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the organisation's continuous improvement systems and processes. It covers using systems and strategies to actively encourage the team to participate in the process, monitoring and reviewing performance, and identifying opportunities for further improvements.

It applies to managers who have an active role in implementing the continuous improvement process to achieve the organisation's objectives. Their position is closely associated with the creation and delivery of products and services which means that they have an important role in influencing the ongoing development of the organisation.

At this level, work will normally be carried out within routine and non-routine methods and procedures, which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement continuous improvement systems and	1.1 Implement systems to ensure that individuals and teams are actively encouraged and supported to participate in decision

ELEMENT	PERFORMANCE CRITERIA
processes	making processes, assume responsibility and exercise initiative 1.2 Communicate the organisation's continuous improvement processes to individuals and teams, and obtain feedback 1.3 Ensure effective mentoring and coaching allows individuals and teams to implement the organisation's continuous improvement processes
2. Monitor and review performance	2.1 Use the organisation's systems and technology to monitor and review progress and to identify ways in which planning and operations could be improved 2.2 Improve customer service through continuous improvement techniques and processes 2.3 Formulate and communicate recommendations for adjustments to those who have a role in their development and implementation
3. Provide opportunities for further improvement	3.1 Implement processes to ensure that team members are informed of savings and productivity/service improvements in achieving the business plan 3.2 Document work performance to aid the identification of further opportunities for improvement 3.3 Manage records, reports and recommendations for improvement within the organisation's systems and processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 3.2, 3.3	• Evaluates and integrates facts and ideas to construct meaning from a range of text types in an effort to implement continuous improvement systems and processes
Writing	1.1, 1.2, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3	• Selects vocabulary, grammatical structures and conventions appropriate to text • Researches, plans and prepares continuous improvement documentation for relevant stakeholders
Oral	1.2, 1.3, 2.3	• Participates in a variety of spoken exchanges with a range of audiences using structure and language to suit

© Commonwealth of Australia, 2025 Public Skills Australia

Communication		the audience
Navigate the world of work	2.1	• Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact the work of others	1.2, 1.3, 2.3, 3.1	• Selects and uses appropriate conventions and protocols when communicating with diverse individuals to seek or share information • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group communication, influencing direction and taking a leadership role on occasion
Get the work done	1.1, 1.3, 2.1, 2.2, 3.1, 3.2, 3.3	• Takes responsibility for planning and organising own workload to achieve required outcomes • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Evaluates effectiveness of decisions in terms of how well they meet stated goals • Uses digital applications to access and filter data, extract, organise, integrate and share relevant information • Recognises the potential of new approaches to enhance work practices and outcomes

Assessment Requirements for BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- implement continuous improvement systems and provide mentoring and coaching support to enable individuals and teams to participate in decisions, take responsibility, show initiative and implement improvement processes
- implement processes to inform team members about savings and productivity/service improvements achievements
- communicate effectively to support the continuous improvement system and implementation of improvements
- apply continuous improvement to customer services including internal and external customers
- implement, monitor and adjust improvement plans, processes and procedures to improve performance
- document performance to identify further opportunities for improvement
- manage records and reports within the organisation's systems and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of continuous improvement processes
- list typical areas of need for coaching and mentoring to support continuous improvement
- explain how change management techniques can support continuous improvement and initiative
- identify the organisation's systems and data that can be used for benchmarking and monitoring performance for continuous improvement.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT516 Facilitate continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead and manage continuous improvement systems and processes. Particular emphasis is on the development of systems and the analysis of information to monitor and adjust performance strategies, and to manage opportunities for further improvements.

It applies to individuals who take an active role in managing a continuous improvement process in order to achieve an organisation's objectives.

At this level, work will normally be carried out using complex and diverse methods and procedures which require the exercise of considerable discretion and judgement, using a range of problem-solving and decision-making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Lead continuous improvement systems and processes	1.1 Develop strategies to ensure that team members are actively encouraged and supported to participate in decision-making processes, assume responsibility and exercise initiative as

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	appropriate 1.2 Establish systems to ensure that the organisation's continuous improvement processes are communicated to stakeholders 1.3 Ensure that change and improvement processes meet sustainability requirements 1.4 Develop effective mentoring and coaching processes to ensure that individuals and teams are able to implement and support the organisation's continuous improvement processes 1.5 Ensure that insights and experiences from business activities are captured and accessible through knowledge management systems
2. Monitor and adjust performance strategies	2.1 Develop strategies to ensure that systems and processes are used to monitor operational progress and to identify ways in which planning and operations could be improved 2.2 Adjust and communicate strategies to stakeholders according to organisational procedures
3. Manage opportunities for further improvement	3.1 Establish processes to ensure that team members are informed of outcomes of continuous improvement efforts 3.2 Ensure processes include recording of work team performance to assist in identifying further opportunities for improvement 3.3 Consider areas identified for further improvement when undertaking future planning

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 1.4, 1.5, 2.1, 2.2, 3.3	• Identifies and extracts relevant information from a range of complex texts • Locates, interprets and analyses workplace documentation to gather information relating to continuous improvement
Writing	1.1, 1.2, 1.4, 1.5, 2.1, 2.2, 3.1-3.3	• Develops complex texts related to continuous improvement processes according to organisational requirements

© Commonwealth of Australia, 2025 Public Skills Australia

		• Ensures the vocabulary, grammatical structures and conventions are appropriate for the context and target audience
Oral Communication	1.1, 1.2, 1.4, 2.2	• Presents information to a range of audiences using appropriate structure and language • Listens and comprehends information from a variety of spoken exchanges with clients, co-workers and other stakeholders • Confirms understanding through questioning and active listening
Navigate the world of work	1.1-1.3, 2.1, 2.2	• Develops strategies to enable compliance with legislative requirements and achievement of the organisation's goals • Monitors adherence to organisational policies, procedures and protocols and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.2, 1.4, 2.2	• Identifies and uses appropriate conventions and protocols when communicating with colleagues and external stakeholders • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction and influencing direction
Get the work done	1.1, 1.2, 1.4, 1.5, 2.1, 3.1, 3.2, 3.3	• Takes responsibility for developing, implementing and monitoring systems and processes to achieve organisational outcomes • Uses analytical and lateral thinking to review current practices and develop ideas for improvement • Reflects on the ways in which digital systems and tools are used, or could be used, to achieve work goals

Assessment Requirements for BSBMGT516 Facilitate continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to establish systems and processes for continuous improvement that:

- facilitate effective contributions to and communications about continuous improvement processes and outcomes
- address sustainability requirements
- incorporate mentoring, coaching and other support to enable people to participate effectively in continuous improvement processes
- capture insights, experiences and ideas for improvements and incorporate them into the organisation's knowledge management systems and future planning.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how systems and procedures can support effective continuous improvement
- explain how continuous improvement systems and processes relate to other business systems and requirements including, knowledge management, quality, performance management and sustainability.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

BSBMGT517 Manage operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop and monitor implementation of the operational plan to provide efficient and effective workplace practices within the organisation's productivity and profitability plans.

Management at a strategic level requires systems and procedures to be developed and implemented to facilitate the organisation's operational plan.

This unit applies to individuals who manage the work of others and operate within the parameters of a broader strategic and/or business plan.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop operational plan	1.1 Research, analyse and document resource requirements and develop an operational plan in consultation with relevant personnel, colleagues and specialist resource managers 1.2 Develop and/or implement consultation processes as an

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	integral part of the operational planning process 1.3 Ensure the operational plan includes key performance indicators to measure organisational performance 1.4 Develop and implement contingency plans for the operational plan 1.5 Ensure the development and presentation of proposals for resource requirements is supported by a variety of information sources and seek specialist advice as required 1.6 Obtain approval for the plan from relevant parties and explain the plan to relevant work teams
2. Plan and manage resource acquisition	2.1 Develop and implement strategies to ensure that employees are recruited and/or inducted within the organisation's human resources management policies, practices and procedures 2.2 Develop and implement strategies to ensure that physical resources and services are acquired in accordance with the organisation's policies, practices and procedures 2.3 Recognise and incorporate requirements for intellectual property rights and responsibilities in recruitment and acquisition of resources and services
3. Monitor and review operational performance	3.1 Develop, monitor and review performance systems and processes to assess progress in achieving profit and productivity plans and targets 3.2 Analyse and interpret budget and actual financial information to monitor and review profit and productivity performance 3.3 Identify areas of under-performance, recommend solutions and take prompt action to rectify the situation 3.4 Plan and implement systems to ensure that mentoring and coaching are provided to support individuals and teams to effectively, economically and safely use resources 3.5 Negotiate recommendations for variations to operational plans and gain approval from designated persons/groups 3.6 Develop and implement systems to ensure that procedures and records associated with documenting performance are managed in accordance with organisational requirements

Assessment Requirements for BSBMGT517 Manage operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and implement an operational plan using a variety of information sources and consultation (including using specialist advice if required) which includes:
  - resource requirements
  - key performance indicators
  - monitoring processes
  - contingency plans
- communicate effectively with relevant stakeholders to explain the plan and supporting information, seek approvals, negotiate variations and engage work teams
- develop and implement strategies to achieve the operational plan within the organisation's policies, practices and procedures including:
  - recruiting, inducting and developing personnel
  - acquiring physical resources and services
  - protecting intellectual property
  - making variations to the plan
  - monitoring and documenting performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe models and methods for operational plans
- explain the role of an operational plan in achieving the organisation's objectives
- explain budgeting processes

© Commonwealth of Australia, 2025 Public Skills Australia

- list alternative approaches to developing key performance indicators to meet business objectives
- outline the legislative and regulatory context relevant to the operational plan of the organisation
- outline the organisation's policies, practices and procedures that directly relate to the operational plan.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation and regulations
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBOPS101 Use business resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to identify, use and maintain resources to complete a variety of tasks under direct supervision.

The unit applies to those who are required to use a variety of business resources. These individuals typically work under supervision and guidance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Business Operations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare resources	1.1 Identify business resources according to task requirements 1.2 Estimate quantities of resources required to complete the task 1.3 Access business resources with supervision 1.4 Check resources for usability according to task and organisational requirements
2. Operate resources	2.1 Use resource according to task requirements and under direct instruction 2.2 Identify resource shortages or faults and take action to ensure issue is resolved 2.3 Report issues outside area of own responsibility to appropriate personnel

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3. Maintain resources	3.1 Identify maintenance requirements of resources 3.2 Undertake maintenance for resource according to organisational requirements 3.3 Maintain records relating to resources under direct instructions 3.4 Store resources under direct instructions

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Follows instructions in familiar texts
Writing	• Records and updates documents according to instructions
Oral communication	• Follows simple instructions • Asks clarifying questions and responds to answers
Numeracy	• Uses rounding and other mathematical techniques to estimate quantity requirements
Self-management	• Follows organisational procedures when tasks are beyond own level of responsibility • Follows clearly defined instructions provided by others
Planning and organising	• Completes routine tasks taking some limited responsibility for decisions regarding equipment and resource choices, operation and maintenance
Problem solving	• Responds to routine problems by referring to instructions or standard procedures

Unit Mapping Information

Supersedes and is equivalent to BSBADM101 Use business equipment and resources.

Assessment Requirements for BSBOPS101 Use business resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- use business resources on at least two occasions, including:
  - choosing business resources required for tasks
  - operating resources according to manufacturer and organisational requirements
  - reporting shortages and faults according to organisational requirements
  - maintaining resources and records according to instructions.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- functions of available business resources
- procedures for operating the available business resources, including safety requirements
- common faults of business resources
- procedures for maintaining and storing resources.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- operational and maintenance manuals
- organisational procedures related to operation and maintenance of resources
- records relating to resources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBOPS402 Coordinate business operational plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to implement operational plans by planning and acquiring resources, monitoring and adjusting operational performance and providing reports on performance, as required.

The unit applies to individuals who plan activities to achieve team and organisational objectives. At this level, work will normally be carried out within routine and non-routine methods and involve procedures that require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Business Operations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to implement operational plan	1.1 Consult with stakeholders to identify resource requirements relevant to operational plan 1.2 Collate, analyse and document details of resource requirements 1.3 Develop operational plan and determine implementation method 1.4 Plan for contingencies 1.5 Develop and present proposals for resource requirements
2. Implement operational plan	2.1 Assist in recruiting and onboarding employees required to implement operational plan according to organisational policies

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and procedures 2.2 Acquire physical resources and services according to organisational policies and procedures 2.3 Support efficient, cost-effective and safe use of resources 2.4 Adjust implementation of the operational plan in consultation with others to manage contingencies
3. Monitor operational performance	3.1 Collate relevant information and determine operational and productivity performance 3.2 Identify and use key performance indicators (KPIs) and assess operational performance 3.3 Identify unsatisfactory performance and take action to rectify the situation according to organisational policies
4. Review operations based on performance	4.1 Develop recommendations for variation to operational plans 4.2 Present recommendations to the designated persons or groups to gain approval 4.3 Maintain records related to operational performance according to organisational policies and procedures 4.4 Report information on operational performance to management

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Description
Reading	• Identifies, interprets, analyses and reviews textual information related to the operational plan and monitoring of operational performance
Writing	• Communicates relationships between ideas and information, matching style of writing to purpose and audience • Researches, plans and prepares workplace documentation for relevant stakeholders using organisational formats
Oral communication	• Participates in a variety of spoken exchanges with a range of audiences varying structure and language to suit the audience
Numeracy	• Selects and uses familiar mathematical techniques to organise timely supply of adequate resources for the operational plan and to use budgetary information to monitor performance
Enterprise and initiative	• Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment

© Commonwealth of Australia, 2025 Public Skills Australia

Skill	Description
Teamwork	• Selects and uses appropriate conventions and protocols when communicating with diverse individuals to build rapport, seek or present information • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group communication, influencing direction and taking a leadership role on occasion
Planning and organising	• Takes responsibility for planning, organising, implementing and monitoring tasks required to achieve required outcomes • Evaluates effectiveness of decisions in terms of how well they met stated goals • Identifies and addresses an increasing range of familiar problems by implementing contingency plans

Unit Mapping Information

No equivalent unit. Supersedes but is not equivalent to:

- BSBFLM305 Support operational plan
- BSBMGT402 Implement operational plan.

Assessment Requirements for BSBOPS402 Coordinate business operational plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare, implement and review two operational plans.

In the course of the above, the candidate must:

- interact with a range of people and groups to identify resource requirements, performance objectives, systems, procedures and records relating to the operational plan
- plan and acquire physical and human resources using organisation's systems and procedures
- manage and support personnel to achieve performance objectives including facilitating new employee onboarding
- present information and recommendations to support implementation and variation of the operational plan
- monitor operational performance against the performance objectives and budgets and implement improvements to rectify unsatisfactory performance
- vary the operational plan and gain approval to deal with contingencies
- document and provide reports on performance as required by the organisation.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- processes to identify resource requirements
- sources of information to identify resource requirements
- methods to manage contingencies including through consultation with relevant stakeholders
- key features of performance monitoring systems and processes
- common methods for problem solving
- methods to support staff including mentoring, coaching and supervision

© Commonwealth of Australia, 2025 Public Skills Australia

- implementation methods for operational plan
- budget and other financial information related to the organisation
- organisational objectives including costs, identified shortfalls and surpluses.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- organisational operational plans, policies and procedures relevant to performance evidence
- workplace documentation and resources including budgets
- physical and human resource procurement documentation
- employee onboarding and performance monitoring procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBOPS403 Apply business risk management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to identify business risks and to apply established risk management processes to a defined area of operations that are within the responsibilities and obligations of the work role.

The unit applies to individuals with a broad knowledge of risk analysis or project management who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or delegate aspects of these tasks to others. Risks applicable to own work responsibilities and area of operation may include projects being undertaken individually or by a team, or operations within a section of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Business Operations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify risks	1.1 Identify context for risk management 1.2 Undertake required steps to identify risks 1.3 Document identified risks according to relevant policies, procedures, legislation and standards
2. Analyse and evaluate risks	2.1 Analyse risks in consultation with relevant stakeholders 2.2 Undertake risk categorisation and determine level of risk 2.3 Document analysis processes and outcomes

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3. Treat risks	3.1 Identify control measures for risks 3.2 Assess strengths and weaknesses of control measures 3.3 Refer risks to relevant personnel, where required, according to policies and procedures 3.4 Select and implement control measures for personal area of operation and responsibilities
4. Monitor and review effectiveness of risk treatments	4.1 Review implemented treatments against measures of success 4.2 Use review results to improve the treatment of risks 4.3 Monitor and review management of risk in personal area of operation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Description
Learning	• Uses analysis and consultative processes to inform decisions about selection and implementation of risk control measures • Evaluates effectiveness of plans and results to inform improvement decisions
Reading	• Comprehends documents and texts of varying complexity to extract and analyse relevant information
Writing	• Uses specific, industry related terminology and logical organisational structure in workplace documents that identify and analyse risk and report management process outcomes
Oral communication	• Participates effectively in interactions with stakeholders by using questioning and listening to elicit opinions and clarify understanding
Numeracy	• Uses numerical tools to assess risk and uses numerical data to review plans
Enterprise and initiative	• Complies with organisational and legislative requirements • Takes responsibility for identification and management of risk within own work context and refers matters to others as required
Teamwork	• Selects appropriate communication protocols and conventions when conferring with others to establish risk management requirements
Planning and organising	• Determines job sequence and works logically and systematically to undertake defined tasks

© Commonwealth of Australia, 2025 Public Skills Australia

Skill	Description
Technology	• Uses familiar digital technologies and systems to access information, prepare plans and communicate with others

Unit Mapping Information

Supersedes and is equivalent to BSBRSK401 Identify risk and apply risk management processes.

Assessment Requirements for BSBOPS403 Apply business risk management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to apply organisational policies, procedures and processes to:

- treat at least three risks by:
  - identifying different types of organisational risks
  - consulting with stakeholders to analyse and evaluate risks
  - implementing control measures
  - referring risks that are beyond own area of responsibility to others
  - maintaining risk management documentation.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory context of the organisation in relation to risk management
- techniques for identifying and evaluating risks
- organisational policies and procedures for risk management
- areas where risks are commonly identified in an organisation
- risks beyond scope of individual responsibility to be referred to relevant organisational personnel
- purpose and key elements of current risk management standards.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulations, standards and codes relating to business risk

© Commonwealth of Australia, 2025 Public Skills Australia

- workplace documentation on selected organisational risks.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBOPS404 Implement customer service strategies

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and implement at least two strategies to improve customer service delivery.

In the course of the above, the candidate must:

- respond to and report on customer feedback and complaints
- review client satisfaction using verifiable data
- consult and communicate effectively with relevant people
- develop and implement strategies and methods to improve customer service delivery, including:
  - budgeting
  - promotion to staff
  - documentation and follow up.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- customer communication techniques
- principles of customer service
- sources of verified client information
- techniques for identifying customer needs and reviewing customer satisfaction
- organisational business structure, products and services related to customer service
- techniques for drawing insights from verifiable evidence to develop recommendations and conclusions
- product and service standards and best practice models.

BSBOPS502 Manage business operational plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to develop and monitor the implementation of operational plans to support efficient and effective workplace practices and organisational productivity and profitability.

The unit applies to individuals who manage the work of others and operate within the parameters of a broader strategic and/or business plans.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Business Operations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish operational plan	1.1 Research, analyse and document resource requirements 1.2 Develop operational plan in consultation with, and with approval from, relevant stakeholders 1.3 Develop contingencies for operational plan 1.4 Explain plan to relevant work teams
2. Manage resource acquisition	2.1 Confirm that employees are recruited and inducted according to the organisation's human resources management policies, practices and procedures 2.2 Confirm that physical resources and services are acquired according to the organisation's policies, practices and procedures

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3 Identify and incorporate requirements for intellectual property rights and responsibilities related to acquisition of resources
3. Monitor and review operational performance	3.1 Assess progress of operational plan in achieving profit and productivity plans and targets 3.2 Identify areas of under-performance, recommend solutions and rectify the situation 3.3 Plan and implement relevant processes for ongoing monitoring and confirm that support is provided for individuals and teams 3.4 Negotiate recommendations for variations to operational plans and gain approval from designated persons

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Description
Reading	• Gathers, interprets and analyses workplace documentation to determine requirements for the operational plan
Writing	• Develops and documents a range of detailed texts relating to the management of an operational plan according to organisational requirements
Oral communication	• Presents information to a range of audiences using appropriate register, vocabulary and paralinguistic features • Listens and comprehends information from a variety of spoken exchanges with clients, co-workers and other stakeholders
Numeracy	• Selects and uses mathematical problem-solving strategies to organise resource requirements, performance benchmarks and financial viability of the operational plan
Enterprise and initiative	• Monitors adherence to organisational policies, procedures and considers own role in terms of its contribution to broader goals of the work environment
Teamwork	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role on occasion
Planning and organising	• Takes responsibility for developing and implementing systems and processes to achieve organisational objectives, seeking advice, feedback and support as required to assist in the development and planning phase • Sequences and schedules complex activities, monitors

Assessment Requirements for BSBOPS502 Manage business operational plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage an operational plan for at least one business or work area.

In the course of the above, the candidate must:

- develop and implement an operational plan using a variety of information sources and consultation including:
  - resource requirements
  - key performance indicators
  - monitoring processes
  - contingency plans
- communicate with stakeholders to explain the plan and supporting information, seek approvals, negotiate variations and engage work teams
- confirm existence of relevant strategies, including strategies relating to:
  - recruiting, inducting and developing personnel
  - acquiring physical resources and services
  - protecting intellectual property
  - making variations to the plan
  - monitoring and documenting performance.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- stakeholders involved in development and management of operations plan including escalation points, colleagues and specialist resource managers
- key information sources for proposal development and presentation including resource requirement specialists

© Commonwealth of Australia, 2025 Public Skills Australia

- consultation processes
- content of operational plans, including:
  - procurement processes
  - employee recruitment and induction strategies
  - physical resource and service acquisition strategies
  - key indicators of organisational performance
- budget and actual financial relating to profit and productivity
- methods for preparing operational plans and contingency plans
- role of an operational plan in achieving an organisation's objectives
- procedures and records associated with documenting performance
- approaches for developing key performance indicators to meet business objectives
- legislative and regulatory framework relating to the development and implementation of operational plan of the organisation, including:
  - fair trading laws
  - work health and safety
- organisational policies, practices and procedures that relate to the operational plan.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation and regulations relevant to operational plans
- workplace documentation and resources relevant to performance evidence.

BSBOPS504 Manage business risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes skills and knowledge required to manage business risks in a range of contexts across an organisation or for a specific business unit or area in any industry setting.

The unit applies to individuals who are working in positions of authority and who are approved to implement change across the organisation, business unit, program or project area. They may or may not have responsibility for directly supervising others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Business Operations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish risk context	1.1 Evaluate organisational processes, procedures and requirements and determine scope for risk management process 1.2 Review strengths and weaknesses of existing arrangements 1.3 Document critical success factors, goals and objectives for area included in scope 1.4 Communicate risk management process to relevant stakeholders
2. Identify risks	2.1 Invite stakeholders to assist in the identification of risks 2.2 Research risks that may apply to scope 2.3 Document risks that apply to the scope, in consultation with relevant parties

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3. Analyse risks	3.1 Assess likelihood of risks occurring 3.2 Assess impact or consequence if risks occur 3.3 Evaluate and prioritise risks for treatment
4. Select and implement treatments	4.1 Determine and select from options for treating risks 4.2 Develop action plan for implementing risk treatment 4.3 Communicate risk management processes to relevant parties 4.4 Implement action plan according to organisational policies and procedures 4.5 Monitor and evaluate risk management process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Description
Reading	• Synthesises a variety of relatively complex texts • Gathers, interprets and analyses textual information from a range of sources to identify relevant information
Writing	• Develops textual material and organises content in a manner that effectively documents risk management analysis and assessment priorities and processes
Oral communication	• Participates in interactions with stakeholders using questioning and listening to elicit opinions, and to confirm and clarify understanding
Numeracy	• Uses numerical tools to assess risk and uses numerical data to review plans
Teamwork	• Selects appropriate conventions and protocols when communicating with stakeholders about risk management • Consults and negotiates with stakeholders about risk management processes and outcomes
Planning and organising	• Sequences and schedules a range of routine and complex activities, monitors implementation, evaluates processes and manages relevant communication • Systematically analyses information to decide on appropriate risk management treatments • Refers to organisational processes, procedures and requirements when making decisions about risk management
Technology	• Uses digital technologies and systems to access information,

BSBPEF202 Plan and apply time management

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to implement time management processes to organise and complete work tasks. It also addresses skills and knowledge to seek and review feedback for performance improvement regarding time management and use technology appropriate to the task.

The unit applies to individuals working under direct supervision. These individuals apply basic skills and knowledge in a broad range of work settings.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking & Problem Solving – Personal Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Organise work schedule	1.1 Discuss and agree on work goals and plans with assistance from relevant personnel 1.2 Identify relationship between own work goals and plans, and organisational goals and plans 1.3 Research time management techniques and strategies 1.4 Plan and prioritise work tasks within allocated timeframes
2. Complete work tasks	2.1 Perform tasks according to designated timelines and instructions 2.2 Seek assistance from colleagues when difficulties arise in achieving allocated tasks

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3 Identify factors affecting work plan 2.4 Communicate progress on work plan to relevant personnel according to organisational policies and procedures
3. Review work performance	3.1 Seek feedback on time management from relevant personnel 3.2 Record changes to time management approach according to task instructions 3.3 Identify and plan opportunities for improvement in discussion with colleagues

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Identifies and interprets textual information to determine and adhere to organisational and task requirements
Writing	• Completes required documents using organisational formats
Oral communication	• Uses listening and questioning techniques to seek information and confirm understanding • Participates in verbal interactions using language and features suitable to audience and context
Numeracy	• Interprets numerical information related to timeframes
Enterprise and initiative	• Complies with organisational policies, procedures and standards
Planning and organising	• Prioritises work and completes activities within designated timeframes • Identifies and solves routine problems
Technology	• Selects and uses appropriate digital tools to complete tasks

Unit Mapping Information

Supersedes and is equivalent to BSBWOR202 Organise and complete daily work activities.

Assessment Requirements for BSBPEF202 Plan and apply time management

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and implement at least one time management plan with support of relevant personnel.

In the course of the above, the candidate must:

- complete each work task within specified timeframe, seeking opportunities to use digital tools where applicable
- seek and use feedback from others to monitor and improve work performance.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- time management techniques and strategies
- features of a time management plan
- organisational standards, policies and procedures relevant to own work role
- relationship between own work goals and plans and organisation's goals and plans
- factors affecting work progress and performance improvement techniques.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to challenges and situations to demonstrate application of performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPEF301 Organise personal work priorities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.
Release 2	This version first released with BSB Business Services Training Package Version 7.2. Release created to amend typographical error in the foundation skills.

Application

This unit describes the skills and knowledge required to organise personal work schedules, to monitor and obtain feedback on work performance and to maintain required levels of competence.

The unit applies to individuals who exercise discretion and judgement and apply a broad range of competencies in various work contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking & Problem Solving – Personal Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Organise and complete own work schedule	1.1 Develop work goals and key performance indicators (KPIs) according to task and organisational requirements 1.2 Prioritise workload according to task timeframes 1.3 Identify factors affecting achievement of work objectives 1.4 Develop personal work plans
2. Evaluate own work	2.1 Identify variations between expected and actual work

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
performance	performance according to task requirements and KPIs 2.2 Report variations to relevant personnel 2.3 Seek feedback from relevant personnel for solutions to minimise variations in expected and actual work outputs 2.4 Research sources of stress and access appropriate supports according to organisational policies and procedures
3. Coordinate personal skill development and learning	3.1 Identify personal and professional development needs for job role 3.2 Identify opportunities to undertake personal skill development activities in consultation with supervisor 3.3 Access professional development opportunities 3.4 Record professional development undertaken for continuous learning and career development process 3.5 Incorporate feedback into review of further learning needs

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	• Employs a range of approaches and investigative techniques to source the knowledge necessary to arrange personal learning experiences
Reading	• Interprets textual information to determine organisation's procedures, own work performance and objectives
Writing	• Prepares written reports and workplace documents that communicate information clearly and effectively
Oral communication	• Provides and receives feedback using specific and relevant language • Uses listening and questioning techniques to confirm understanding
Self-management	• Complies with organisational policies, procedures and protocols
Teamwork	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Proactively collaborates with others to achieve specific goals
Planning and organising	• Plans and organises work commitments to ensure deadlines and objectives are met • Uses formal analytical thinking techniques to recognise and respond to routine problems

© Commonwealth of Australia, 2025 Public Skills Australia

Skill	Description
Technology	• Uses digital systems and tools to enter, store and monitor information

Unit Mapping Information

Supersedes and is equivalent to BSBWOR301 Organise personal work priorities and development.

Release 1	This version first released with BSB Business Services Training Package Version 7.0.
Release 2	This version first released with BSB Business Services Training Package Version 7.2. Release created to amend typographical error in the foundation skills.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare and implement a personal work plan.

In the course of the above, the candidate must:

- prepare a work plan according to organisational requirements and work objectives
- use technology to schedule, prioritise and monitor completion of tasks in a work plan
- assess and prioritise own work tasks and address contingencies
- monitor and assess personal performance against job role requirements by seeking feedback from relevant personnel
- identify personal development needs and access, complete and record skill development and learning.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational policies and procedures relevant to work tasks
- goals, objectives and key performance indicators for task within scope of job role
- methods to elicit, analyse and interpret feedback when communicating with other people in the workplace
- content of work plans including:
  - timeframes
  - tasks requirements

© Commonwealth of Australia, 2025 Public Skills Australia

  - risks
  - contingencies for identified risks
- types of personal learning and professional development requirements
- principles and techniques of goal setting, measuring performance and time management
- signs and sources of stress and strategies to deal with stress in the workplace
- methods to identify and prioritise personal learning needs.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- challenges and situations to demonstrate application of performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPEF402 Develop personal work priorities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to plan and prioritise own work tasks. It also addresses the skills and knowledge to monitor and obtain feedback on personal work performance.

The unit applies to individuals who are required to design their own work schedules and work plans and to establish priorities for their work. They will typically hold some responsibilities for the work of others and have some autonomy in relation to their own role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking & Problem Solving – Personal Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan personal work schedule	1.1 Identify task requirements 1.2 Identify own accountabilities in line with task requirements 1.3 Assess barriers for performance of personal accountabilities 1.4 Develop a personal work schedule
2. Implement personal work schedule	2.1 Communicate personal work schedule to relevant personnel 2.2 Monitor own performance according to personal work schedule 2.3 Document variations between expected and actual work performance according to task requirements and communicate to relevant personnel

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3. Review personal work priorities	3.1 Seek and evaluate feedback from relevant stakeholders on own work performance 3.2 Analyse variations between expected and actual work performance 3.3 Update personal work schedule according to internal and external feedback and changes in circumstances

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	• Develops strategies to reflect on own performance and obtain feedback
Reading	• Identifies and applies textual information from relevant sources to understand organisation's policies and practices
Writing	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Numeracy	• Analyses numerical information related work accountabilities
Enterprise and initiative	• Identifies and understands roles and responsibilities in relation to organisational objectives, policies and procedures
Planning and organising	• Plans, organises and implements tasks to meet organisational requirements • Uses the main features and functions of digital technologies and tools to complete work tasks efficiently and effectively

Unit Mapping Information

Supersedes and is equivalent to BSBWOR404 Develop work priorities.

Supersedes but is not equivalent to:

- BSBSMB408 Manage personal, family, cultural and business obligations
- BSBWOR424 Develop a time management plan.

BSBPEF501 Manage personal and professional development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to implement systems and process that support the personal and professional development of self and others.

The unit applies to individuals working in a range of managerial positions who are accountable for the development and performance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking & Problem Solving – Personal Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Manage work goal development	1.1 Document team member responsibilities and identify organisational framework for development of work goals 1.2 Support others to develop work goals, plans and activities that align with their responsibilities 1.3 Assess others' work goals, plans and activities for alignment with organisational goals and provide feedback to team members 1.4 Facilitate access to personal and professional development opportunities that align to team member goals, plans and activities
2. Facilitate achievement of work priorities	2.1 Assess and prioritise personal, team and organisational demands 2.2 Use technology to manage work priorities of the team

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3 Identify and implement techniques to manage team health and wellbeing in the workplace
3. Develop and maintain professional competence	3.1 Document own development needs, priorities and plans using applicable competency standards, where required 3.2 Seek feedback from relevant personnel on own development needs 3.3 Participate in personal and professional development activities that address identified needs, priorities and plans

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	• Investigates and uses a range of strategies to develop personal competence
Reading	• Analyses and interprets textual information from organisational policies and practices or feedback to inform personal development planning
Writing	• Uses feedback to prepare reports that summarise ways to improve competence
Oral communication	• Uses active listening and questioning to seek and receive feedback
Enterprise and Initiative	• Identifies how own role contributes to broader organisational goals • Considers organisational protocols when planning career development of self and others
Teamwork	• Selects and uses appropriate conventions and protocols when communicating with diverse stakeholders • Uses interpersonal skills to establish and build positive working relationships with others
Planning and organising	• Plans and prioritises tasks in order to meet deadlines, manage role responsibilities and to manage own personal welfare • Identifies and uses appropriate technology to improve work efficiency
Technology	• Uses technology to manage and prioritise work tasks

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Requirements for BSBPEF501 Manage personal and professional development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and implement a plan for own personal and professional development
- manage personal and professional development of at least two other individuals.

In the course of the above, the candidate must:

- identify roles and responsibilities of team members
- support two different individuals to develop work goals that align with their role and responsibilities
- facilitate team member access to relevant personal and professional development activities
- use technology to organise and prioritise tasks and commitments of a team or work area
- research and implement techniques for maintaining health and wellbeing of self and others
- develop personal work goals, plans and activities to meet work goals
- measure personal work performance, including assessing competency against competency standards
- participate in personal and professional development activities to develop professional competence.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- roles and responsibilities of team members
- principles and techniques involved in the management or organisation of:
  - performance measurement
  - personal behaviour, self-awareness and personality traits identification
  - personal development plans
  - personal goal setting

© Commonwealth of Australia, 2025 Public Skills Australia

  - task prioritisation
- common personal and professional development activities relevant to the industry
- technology to plan and prioritise work tasks
- techniques to manage health and wellbeing in the workplace
- organisation's human resources policies and procedures relevant to professional development.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to challenges and situations to demonstrate the application of performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG409 Apply project scope management techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to contribute to the control of a project's scope by assisting with identifying its objectives, deliverables, constraints, assumptions and outcomes; and by applying controls once the project has commenced.

It applies to individuals who are project practitioners working in a project support role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Contribute to defining project scope	1.1 Review project initiation documentation and assist in identifying project objectives and requirements 1.2 Contribute to identifying project deliverables 1.3 Contribute to identifying measurable outcomes to enable evaluation of project performance 1.4 Contribute to developing and documenting the scope management plan 1.5 Assist in obtaining agreement to scope from relevant project

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	authority
2. Apply project scope controls	2.1 Undertake work according to agreed project scope management plan and by using established change control procedures and performance measurement procedures 2.2 Communicate instances of non-compliance with overall scope to the project manager and other team members
3. Contribute to review of scope controls	3.1 Measure progress to determine potential, perceived and actual scope changes 3.2 Appropriately report scope changes 3.3 Assist in review of project outcomes to determine effectiveness of initial and subsequent scope management approaches

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1	• Interprets and analyses complex texts
Writing	1.4, 1.5, 3.2	• Develops and amends plans and associated documentation using appropriate organisational formats and vocabulary
Oral Communication	1.2-1.5, 2.2	• Interacts effectively in verbal exchanges, using clear language to convey information, and active listening and questioning to clarify understanding
Numeracy	1.3, 3.1	• Selects and applies a range of mathematical and problem-solving strategies to develop timelines and monitor progress
Interact with others	1.2-1.5, 2.2	• Uses appropriate communication practices in a range of work contexts • Collaborates and cooperates with others to achieve shared goals
Get the work done	2.1, 3.1, 3.2, 3.3	• Plans and organises tasks required to monitor and report on project implementation • Analyses outcomes to identify future

Assessment Requirements for BSBPMG409 Apply project scope management techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- contribute to delineating and controlling project scope
- record project scope management plan
- interpret and follow project initiation documentation for purposes of documenting project scope.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list components of a project scope management plan
- identify and describe factors likely to impact project scope
- outline formal change-control processes
- identify and discuss methods for measuring work outcomes and progress against plans
- identify and discuss methods for segmenting and documenting a work breakdown structure
- explain procedures for reporting a change in scope
- describe types of project initiation documentation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- project documentation which includes information about project scope
- case studies and, where possible, real situations.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG413 Apply project human resources management approaches

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to assist with aspects of human resources management of a project. It involves establishing human resource requirements, identifying the learning and development needs of people working on the project, facilitating these needs being met, and resolving conflict in the team.

It applies to individuals who are project practitioners working in a project support role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assist in determining human resource requirements	1.1 Analyse work breakdown structure to determine human resource requirements 1.2 Prepare a skills analysis of project personnel against project task requirements 1.3 Assist in assigning responsibilities for achieving project deliverables

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Contribute to establishing and maintaining productive team relationships	2.1 Actively seek views and opinions of team members during task planning and implementation 2.2 Promote cooperation and effective activities, goals and relationships within team 2.3 Communicate with others using styles and methods appropriate to organisational standards, group expectations and desired outcomes 2.4 Communicate information and ideas to others in a logical, concise and understandable manner 2.5 Regularly seek feedback on nature and quality of work relationships, and use feedback as basis for own improvement and development
3. Assist with human resource monitoring	3.1 Monitor work of project personnel against assigned roles and responsibilities within delegated authority levels 3.2 Monitor and control actual effort against project plan 3.3 Review skill levels against allocated tasks and recommend solutions, where required, to others 3.4 Advise others within delegated authority when assigned responsibilities are not met by project personnel 3.5 Undertake work in a multi-disciplinary environment according to established human resource management practices, plans, guidelines and procedures 3.6 Resolve conflict within delegated authority according to agreed dispute-resolution processes 3.7 Assist in offering human resource development opportunities to individuals with skill gaps
4. Contribute to evaluating human resource practices	4.1 Contribute to assessing effectiveness of project human resources management 4.2 Document lessons learned to support continuous improvement processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Public Skills Australia

Skill	Performance Criteria	Description
Learning	2.5	• Actively seeks feedback from others as a strategy to improve own skills or knowledge
Reading	1.1-1.3, 3.2, 3.3, 3.5	• Identifies and interprets information from organisational documentation
Writing	1.2, 2.3, 2.4, 3.4, 4.1, 4.2	• Develops a range of documents using structure and vocabulary appropriate to audience, context and purpose
Oral Communication	2.1-2.5, 3.3, 3.4, 3.6, 3.7	• Participates in a range of verbal exchanges using clear language and appropriate non-verbal features to provide and seek information • Uses active listening and questioning techniques to elicit views and opinions of others
Navigate the world of work	1.3, 3.4	• Understands responsibilities associated with own role
Interact with others	2.1-2.5, 3.3, 3.4, 3.6, 3.7	• Uses accepted communication practices and protocols when sharing or providing information • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction • Uses a range of strategies to facilitate solutions to conflicts
Get the work done	1.3, 3.1-3.3, 3.5, 3.6, 4.1	• Plans and implements required tasks, monitors actions against requirements, and adjusts plans and resources to cope with contingencies • Reflects on outcomes to identify opportunities for future improvement

Assessment Requirements for BSBPMG413 Apply project human resources management approaches

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce work breakdown structures in human resource project planning
- construct effective methods for monitoring roles, responsibilities and performance in projects
- demonstrate methods for providing feedback on performance and improving performance of project team members.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify alternative project personnel engagement options
- explain job design principles and work breakdown structures
- describe learning and development approaches that can be incorporated into project life cycle
- list methods for skills analysis
- identify and describe project roles, responsibilities and reporting requirements for human resources.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations.

BSBPMG414 Apply project information management and communications techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to provide a critical link between people, ideas and information at all stages in the project life cycle. It involves assisting the project team to plan communications, communicating information related to the project, and reviewing communications.

It applies to individuals who are project practitioners working in a project support role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Contribute to communications planning	1.1 Identify, source and contribute relevant information requirements to initial project documentation 1.2 Contribute to developing and implementing the project communications plan and communications networks
2. Conduct information-management	2.1 Act on and process project information according to agreed procedures as directed, to aid decision-making processes

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
activities	throughout project life cycle 2.2 Maintain information to ensure data is secure and auditable
3. Communicate project information	3.1 Communicate with clients and other stakeholders during project using agreed networks, processes and procedures to ensure flow of necessary information 3.2 Ensure reports are prepared and released according to authorisation, or produced for release by others 3.3 Seek information and advice from appropriate project authorities as required
4. Contribute to assessing effectiveness of communication	4.1 Assist in ongoing review of project outcomes to determine effectiveness of communications-management activities 4.2 Report communications-management issues and responses to higher project authorities for application of lessons learned to future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1	• Interprets textual information from a range of sources and determines how content may be applied
Writing	1.2, 2.2, 3.1, 3.2, 4.2	• Develops plans and reports using structure and vocabulary appropriate to audience, context and purpose • Maintains records according to organisational requirements
Oral Communication	1.2, 3.1, 3.3, 4.2	• Participates in a verbal exchanges using clear language and appropriate non-verbal features to provide and seek information • Uses active listening and questioning techniques to elicit views and opinions of others
Interact with others	1.2, 3.1, 3.3, 4.2	• Recognises importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how

Assessment Requirements for BSBPMG414 Apply project information management and communications techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- lead an effective team in planning and implementing all necessary communications for a workplace project
- evaluate and review project communication outcomes and make recommendations for future improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise models and methods of communications management in context of project life cycle and other project management functions
- explain importance of managing risk by treating information securely
- outline methods of reviewing outcomes
- identify organisational policies and procedures relevant to this role in a specific context.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- examples of project management documentation for communications-management purposes
- documentation about project team involvement in communications activities
- case studies and, where possible, real situations
- interaction with others.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG416 Apply project procurement procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to assist with procurement for a project. It involves identifying procurement requirements, assisting with supplier selection, conducting procurement activities, and assisting with procurement finalisation activities for the project.

It applies to individuals who are project practitioners working in a project support role. The individual may be operating in a large or small organisation, and applying skills in the context of enterprise projects.

The project practitioner may be part of a project team under the direction of a project manager, or may work as part of a smaller scale, self-directed team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assist with procurement planning	1.1 Contribute to establishing procurement requirements to achieve project objectives 1.2 Act under delegated authority to contribute to development of

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	procurement-management plan 1.3 Contribute to developing procurement documentation
2. Contribute to supplier selection process	2.1 Gather and evaluate information on potential suppliers 2.2 Make recommendations to assist in selection of preferred suppliers 2.3 Contribute to establishing agreed terms and conditions with preferred suppliers 2.4 Identify and act in line with probity and project governance constraints 2.5 Assist in developing contractual documentation
3. Conduct procurement activities	3.1 Test and accept supplies to ensure they are fit for purpose in both quality and suitability 3.2 Undertake procurement activities and maintain information in line with reporting, confidentiality and audit requirements 3.3 Receive, reconcile and register supplies according to established procedures 3.4 Monitor and control suppliers according to contractual supply documentation
4. Assist in finalising procurement activities	4.1 Assist in finalising procurement agreements 4.2 Assist in review of project outcomes using available records to determine effectiveness of procurement activities 4.3 Contribute to identifying lessons learned and possible improvements to procurement management

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 2.4, 3.2, 3.3, 3.4, 4.2	• Applies appropriate strategies to construct meaning from a variety of texts
Writing	1.1, 1.3, 2.2, 2.3,	• Develops informative project documents using vocabulary and structure appropriate to audience,

© Commonwealth of Australia, 2025 Public Skills Australia

	2.5, 3.2, 3.3, 4.1, 4.2	context and purpose • Completes project documentation using required formats and structure
Oral Communication	1.1, 1.3, 2.2, 2.3, 2.5	• Participates verbal exchanges using clear language and appropriate non-verbal features to provide and seek information • Uses questioning and listening skills to check and confirm understanding
Numeracy	1.3, 2.5, 3.2, 3.3	• Uses basic mathematical formula to calculate whole numbers and decimals to ensure financial accounts match purchased items
Navigate the world of work	1.2, 2.4, 3.2-3.4	• Understands responsibilities and boundaries associated with own role • Adheres to organisational policies and procedures when planning and undertaking work
Interact with others	1.1, 1.3, 2.2, 2.3, 2.5	• Uses accepted communication practices and protocols to share or provide information • Collaborates with others to achieve project outcomes
Get the work done	1.2, 2.1, 3.1, 3.2, 3.4, 4.2, 4.3	• Plans, organises and implements tasks required to achieve outcomes according to organisational requirements • Reflects on outcomes to gain insights into future improvements

Assessment Requirements for BSBPMG416 Apply project procurement procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- document procurement requirements for a workplace project, including clear descriptions of product and service, quality specifications, resource identification, supply and delivery requirements and supply and engagement metrics
- apply procurement-management procedures to a workplace project, including selection criteria, testing and accepting, monitoring and receiving supplies
- finalise procurement agreements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe procurement-management policy, processes and procedures
- explain the procurement documentation requirements
- describe the components of contractual documentation and the legal obligations of all parties
- explain the process used to select preferred contractors
- identify and describe project procurement-management tools and techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- examples of project procurement documentation
- examples of procurement tasks and activities

© Commonwealth of Australia, 2025 Public Skills Australia

- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to assist in implementing project life cycle management processes.

It applies to individuals who are project practitioners working in a project support role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assist in establishing project	1.1 Identify and clarify project initiation documentation where required 1.2 Establish relationship between the project and broader organisational strategies and goals 1.3 Assist in negotiating and documenting project objectives, outcomes and benefits 1.4 Assist in establishing the project governance structure 1.5 Assist in drafting a project charter for approval
2. Support project	2.1 Support breakdown of project objectives into achievable

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
planning and design processes	project deliverables 2.2 Assist in identifying project stages, and key requirements for stage completion 2.3 Identify project milestones and map clearly against time and objectives 2.4 Assist in consolidating associated plans and baselines in project management plan 2.5 Support negotiation with relevant stakeholders and project authority to gain approval of project plan
3. Assist with project control and execution	3.1 Maintain and update records against project deliverables and plans at required intervals 3.2 Prepare status reports on project progress and identified issues 3.3 Assist with undertaking an impact analysis of proposed changes to the project 3.4 Maintain relevant project logs and registers accurately and regularly to assist with project audit 3.5 Update associated plans to reflect project progress against baselines and approved changes
4. Assist with project finalisation	4.1 Assist with project finalisation activities where required 4.2 Prepare project products and associated documentation for handover to client 4.3 Assist in completing financial, legal and contractual obligations where required 4.4 Contribute perspectives on project performance to assist with project review assessments

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1,1.2, 2.3, 2.4, 3.1, 3.2, 3.5, 4.3	• Recognises and interprets textual information from a range of sources and determines how content may be applied to organisational requirements

© Commonwealth of Australia, 2025 Public Skills Australia

Writing	1.1-1.5, 2.3, 2.4, 3.1-3.5, 4.1-4.4	• Uses clear, industry specific terminology, and appropriate structure, to complete and update, workplace documentation • Maintains records using required vocabulary and formats
Oral Communication	1.3-1.5, 2.2, 2.4, 2.5, 3.3, 4.1, 4.4	• Participates in verbal exchanges using clear language and appropriate non-verbal features to provide relevant information • Uses active listening and questioning to elicit views and opinions of others
Numeracy	2.3, 2.4, 4.3	• Interprets mathematical information to finalise financial obligations and measure work outputs against projections
Navigate the world of work	1.2, 2.5, 4.3	• Understands own responsibilities and considers implications of these when negotiating, planning and undertaking work • Adheres to organisational policies and procedures and legislative requirements
Interact with others	1.3-1.5, 2.2, 2.4, 2.5, 3.3, 4.1, 4.3, 4.4	• Recognises importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how • Collaborates with others as part of familiar routine activities and contributes to specific activities
Get the work done	1.1, 2.1, 2.2, 2.3, 3.3, 3.4, 3.5, 4.1, 4.4	• Sequences and schedules required tasks, monitors implementation and manages relevant communication • Reflects on outcomes to identify opportunities for improvement

Assessment Requirements for BSBPMG417 Apply project life cycle management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- work with others to plan and document a project based on organisational parameters
- complete and update all relevant documentation
- examine impact that project changes could have on final outcomes
- undertake project finalisation activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain basic project governance models
- describe project finalisation and evaluation products
- identify and describe project life cycle stages, phases and structures relevant to industry and project
- explain project planning documents and their specific formats relevant to industry and context
- outline key organisational policies and procedures
- describe various types of project initiation documentation
- identify types of project logs and registers in use in this context.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- project documentation, including information about life cycle processes

© Commonwealth of Australia, 2025 Public Skills Australia

- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG418 Apply project stakeholder engagement techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to assist in managing stakeholder relationships during a project. It involves ensuring timely and appropriate involvement of key individuals, organisations and groups throughout the project.

It applies to individuals who are project practitioners working in a project support role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assist in identifying and addressing stakeholder interests	1.1 Assist in identifying stakeholders relevant to project objectives 1.2 Segment stakeholder interests and assist in determining forms of engagement 1.3 Consider interests of stakeholders when advising on project operations 1.4 Support actions to address differing stakeholder interests where required
2. Actively participate in	2.1 Apply interpersonal skills to ensure stakeholder engagement is

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
stakeholder engagement	effective 2.2 Conduct stakeholder engagement in line with agreed and defined project roles 2.3 Establish and clarify stakeholder behaviour expectations where required 2.4 Openly engage with stakeholder performance reviews 2.5 Recognise and address development needs and opportunities to support stakeholder engagement
3. Assist stakeholder communications	3.1 Assist in determining and documenting stakeholder communication needs 3.2 Assist in negotiating agreement on project communication method, and content and timing of stakeholder engagement 3.3 Support communication of information as planned within authority levels, identifying and addressing variances

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2	• Recognises and interprets textual information to determine and adhere to objectives
Writing	1.2, 3.1	• Documents findings on communication needs using required formats and structure
Oral Communication	1.1-1.3, 2.1-2.4, 3.1-3.3	• Participates in verbal exchanges using clear and detailed language to provide relevant information • Uses active listening and questioning techniques to elicit views and opinions of others
Navigate the world of work	2.2, 3.3	• Understands how own role meshes with others and contributes to broader work goals
Interact with others	1.1-1.4, 2.1-2.5, 3.1-3.3	• Recognises importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how • Collaborates with others as part of familiar routine

© Commonwealth of Australia, 2025 Public Skills Australia

		activities and contributes to specific activities • Uses interpersonal skills to build rapport, negotiate agreement and maintain positive working relationships
Get the work done	1.1, 1.2, 2.2, 2.5, 3.1, 3.3	• Uses analytical skills to identify stakeholders and determine their needs • Follows pre-determined plans to achieve required outcomes

Assessment Requirements for BSBPMG418 Apply project stakeholder engagement techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- work with others to establish various stakeholders needs and interests
- engage with project stakeholders using effective interpersonal skills and appropriate methods of communication
- select and use communications methods relevant to the project needs and stakeholder expectations
- complete all relevant documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe different types of stakeholders
- explain the different levels of stakeholder engagement on projects
- describe techniques and strategies for stakeholder engagement
- explain why the interests and expectations of stakeholders must be considered
- describe common problems leading to variances in stakeholder engagement.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- project documentation detailing stakeholder engagement
- examples of stakeholder engagement activities.

BSBPMG430 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to undertake a minor project or a section of a larger project. It covers developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learned for application to future projects.

The unit applies to individuals who play a significant role in ensuring a project meets timelines, quality standards, budgetary limits and other requirements set for the project.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish project parameters	1.1 Identify project scope 1.2 Define project stakeholders 1.3 Seek clarification from delegating authority of issues related to project and project parameters 1.4 Identify responsibilities of relevant stakeholders and reporting requirements 1.5 Clarify relationship of project to other projects and to the objectives of the organisation 1.6 Identify availability and access of resources for undertaking the project

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Develop project plan	2.1 Identify risks and develop a risk management plan for project, including Work Health and Safety (WHS) 2.2 Develop project budget and timeframe and seek approval from relevant stakeholders 2.3 Consult team members and apply their views in planning the project 2.4 Identify and access appropriate project management tools 2.5 Develop project plan according to project parameters and deliverables 2.6 Finalise project plan and gain necessary approvals to commence project according to documented plan
3. Administer and monitor project	3.1 Communicate to project team members their responsibilities and project requirements 3.2 Establish and maintain required recordkeeping systems throughout the project 3.3 Implement and monitor plans for managing the project 3.4 Undertake risk management as required
4. Finalise and review project	4.1 Complete financial recordkeeping associated with project and confirm according to agreed budget 4.2 Complete project documentation and obtain sign-offs for concluding project 4.3 Review project outcomes and processes against the project scope and plan 4.4 Document feedback and suggested improvements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	• Organises, evaluates and critiques ideas and information from a range of complex texts
Writing	• Develops plans, reports and recommendations using vocabulary, structure and conventions appropriate to text • Establishes and maintains records according to organisational requirements
Numeracy	• Uses formal and some informal, oral and written mathematical language and representation to prepare and communicate budgetary and financial

© Commonwealth of Australia, 2025 Public Skills Australia

SKILL	DESCRIPTION
	information
Oral communication	• Participates in verbal discussions using clear language and appropriate features to present or seek information • Using listening and questioning skills to seek information and confirm understanding
Self-management	• Identifies and responds to organisational and legislative/regulatory requirements
Teamwork	• Selects and uses appropriate communication protocols and practices to ensure shared understanding of project roles and expectations • Uses collaborative techniques to engage stakeholders in consultations and negotiations
Planning and organising	• Develops and implements plans to manage projects that involve diverse stakeholders with potentially competing demands • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Evaluates outcomes of decisions to identify opportunities for improvement
Technology	• Uses digital technologies and applications to access, organise and share information

Unit Mapping Information

Supersedes and is equivalent to BSBPMG522 Undertake project work.

Supersedes but is not equivalent to BSBADM407 Administer projects.

Assessment Requirements for BSBPMG430 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- undertake project work on a minor project or a section of a larger project.

In the course of the above, the candidate must:

- confirm the quality of project outcomes according to expectations of the organisation
- consult and communicate with relevant stakeholders to generate input and engagement in planning, implementing and reviewing the project
- provide support to team members to enable them to achieve deliverables and to transition them as appropriate at completion of the project.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- project management tools
- types of documents and other sources of information commonly used in defining the parameters of a project
- mission, goals, objectives and operations of the organisation
- relevant legislation and regulations, including work health and safety (WHS) requirements, for project planning
- project management processes according to policies and procedures of the organisation and including:
  - lines of authority and approvals
  - quality assurance
  - human resources
  - budgets and finance
  - risk management
  - recordkeeping

© Commonwealth of Australia, 2025 Public Skills Australia

- reporting.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- relevant legislation, regulations, standards and codes
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG511 Manage project scope

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine and manage project scope. It involves obtaining project authorisation, developing a scope management plan, and managing the application of project scope controls.

It applies to individuals responsible for managing and leading a project in an organisation, business or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Conduct project authorisation activities	1.1 Develop and confirm procedures for project authorisation with an appropriate authority 1.2 Obtain authorisation to expend resources 1.3 Confirm project delegations and authorities in project governance arrangements
2. Define project scope	2.1 Identify, negotiate and document project boundaries 2.2 Establish measurable project benefits, outcomes and outputs

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3 Establish a shared understanding of desired project outcomes with relevant stakeholders 2.4 Document scope management plan
3. Manage project scope control process	3.1 Implement agreed scope management procedures and processes 3.2 Manage impact of scope changes within established time, cost and quality constraints according to change control procedures 3.3 Identify and document scope management issues and recommend improvements for future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 2.1, 3.1, 3.2	• Interprets and analyses information from a range of complex texts
Writing	1.1-1.3, 2.1-2.4, 3.3	• Develops project documentation and procedures using formats and language appropriate to context
Oral Communication	1.1-1.3, 2.1- 2.3, 3.3	• Participates in discussions and negotiations using clear language and appropriate non-verbal features • Uses active listening and questioning to elicit views and opinions of others
Numeracy	2.2, 3.2	• Interprets numerical information to determine project timelines and measure outcomes against project scope
Navigate the world of work	1.3, 3.1, 3.2	• Adheres to organisational policies and procedures and considers own role in terms of its contribution to broader goals of work environment
Interact with others	1.1-1.3, 2.1, 2.3, 3.3	• Identifies and uses appropriate conventions and protocols when communicating with diverse stakeholders • Collaborates with others to achieve joint outcomes, playing an active role in negotiating and facilitating agreement
Get the work done	1.1, 2.1, 2.2, 3.1, 3.2, 3.3	• Sequences and schedules complex activities, monitors implementation and manages relevant communications • Makes a range of critical and non-critical decisions in

© Commonwealth of Australia, 2025 Public Skills Australia

		relatively complex situations, taking a range of factors into account • Uses experience to reflect on ways variables impact outcomes and identify future improvements

Assessment Requirements for BSBPMG511 Manage project scope

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- complete project authorisation activities
- collaborate with stakeholders to produce a scope-management plan
- implement scope-management plan according to procedures
- review and document scope-management implementation and recommend improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify components of a project scope-management plan
- describe factors likely to impact the project scope
- explain formal change-control processes
- describe methods for measuring work outcomes and progress against plans
- describe methods for segmenting and documenting a work breakdown structure
- identify and describe problem areas likely to be encountered in scope management
- explain procedures for reporting scope change
- explain project life cycle and the significance of scope management
- identify project management tools used for managing scope
- outline roles and responsibilities of project manager in relation to project planning
- identify types of project initiation documentation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

ELEMENT	PERFORMANCE CRITERIA
	communication of the schedule to stakeholders
2. Implement project schedule	2.1 Implement mechanisms to measure, record and report progress of activities according to agreed schedule 2.2 Conduct ongoing analysis to identify baseline variance 2.3 Analyse and forecast impact of changes to the schedule 2.4 Review progress throughout project life cycle and implement agreed schedule changes 2.5 Develop responses to potential or actual schedule changes and implement them to maintain project objectives
3. Assess time management outcomes	3.1 Review schedule performance records to determine effectiveness of time management activities 3.2 Identify and document time management issues and recommend improvements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1-2.4, 3.1	• Identifies, interprets and analyses textual information obtained from a range of sources
Writing	1.1, 2.1, 2.4, 2.5, 3.2	• Drafts and develops documentation required for project scheduling and reporting using appropriate formats and language
Oral Communication	1.4, 2.5	• Participates in a verbal exchanges using clear and detailed language and appropriate non-verbal features to convey expectations and advise others on progress
Numeracy	1.1, 1.2, 1.3, 1.4, 2.1-2.5	• Calculates time requirements for project scheduling • Uses basic mathematical formula to determine costs and other necessary resources
Interact with others	1.4, 2.5	• Actively identifies requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience
Get the work	1.1-1.4, 2.1-2.5, 3.1,	• Plans and schedules complex activities, monitors

© Commonwealth of Australia, 2025 Public Skills Australia

done	3.2	implementation and manages relevant communication • Monitors actions against goals, adjusting plans and resources where necessary • Uses analytical skills to review and evaluate process and decide on future improvements • Uses digital applications to access, organise, integrate and share relevant information in effective ways

Assessment Requirements for BSBPMG512 Manage project time

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop a project schedule using project management tools and techniques
- implement, analyse and monitor a project schedule
- conduct a review of project scheduling and recommend improvements for the future.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain estimation techniques to determine task duration and resource effort
- explain procedures for identifying critical path
- explain procedures for managing project baselines, establishment and variance
- summarise project life cycle phases and describe each phase
- explain best-practice time management methodologies, their capabilities, limitations, applications and outcomes
- summarise key tools for project scheduling
- explain work breakdown structures and application to project schedules.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to workplace documentation, including:

- examples of project schedules, reports and feedback from project stakeholders regarding time management
- case studies and, where possible, real situations
- interaction with others.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG513 Manage project quality

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.2. Version created to correct missing element
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage quality within projects. It involves determining quality requirements, implementing quality control and assurance processes, and using review and evaluation to make quality improvements in current and future projects.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine quality requirements	1.1 Determine quality objectives and standards with input from stakeholders

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.2 Document, in a quality management plan, quality metrics for the project and product output 1.3 Select established quality management methods, techniques and tools to resolve quality issues 1.4 Distribute, discuss and support quality requirements with project team and stakeholders 1.5 Include agreed quality requirements in the project management plan, and implement as basis for performance measurement
2. Implement quality processes	2.1 Undertake quality assurance audit of project processes for compliance with agreed plans 2.2 Assess quality control of project and product output according to agreed quality specifications 2.3 Identify causes of variance to quality metrics and undertake remedial action 2.4 Maintain a quality management system to enable accurate and timely recording of quality audit data
3. Implement project quality improvements	3.1 Review processes and implement agreed changes continually throughout the project life cycle to ensure continuous quality improvement 3.2 Review project outcomes against performance requirements to determine the effectiveness of quality-management processes and procedures 3.3 Identify and document lessons learned and recommended improvements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 3.1-3.3	• Interprets, analyses and assesses textual information obtained from a range of sources and determines how content may be applied to requirements
Writing	1.2, 1.5, 2.1, 2.4, 3.3	• Develops and documents quality requirements for project plan

© Commonwealth of Australia, 2025 Public Skills Australia

		• Records results of quality audits according to organisational requirements
Oral Communication	1.1, 1.4	• Participates in a verbal exchanges using clear language and appropriate non-verbal features to provide and seek relevant information • Uses active listening and questioning techniques to elicit views and opinions of others
Numeracy	1.1, 1.2, 2.2, 2.3	• Interprets information to determine measurable objectives • Interprets numerical information to measure outcomes against objectives
Navigate the world of work	1.1	• Takes responsibility for identifying and following policies, procedures and standards
Interact with others	1.1, 1.4	• Selects and uses appropriate communication practices in a range of work contexts • Collaborates with others to foster shared understanding of quality requirements
Get the work done	1.3, 1.5, 2.1, 2.2-2.4, 3.1-3.3	• Sequences and schedules complex activities, monitors actions against goals, adjusting plans and resources where necessary • Uses analytical skills to review and evaluate process and decide on future improvements • Uses digital applications to access, organise, integrate and share relevant information in effective ways

Assessment Requirements for BSBPMG513 Manage project quality

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.2. Version created to correct missing elements
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- work with others to decide a project's quality requirements
- document a quality-management plan
- implement quality control and assurance processes for a defined project using a range of tools and methodologies
- review outcomes and recommend process improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain quality management theory
- explain relevant standards that apply in the organisation
- describe quality assurance and control techniques, key tools and methodologies
- describe roles and responsibilities of quality management personnel
- explain methods for managing continuous improvement.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- project documentation including quality criteria, evidence of quality monitoring and improvement practices
- case studies or, where possible, real situations
- Interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG515 Manage project human resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage human resources related to projects. It involves planning for human resources, implementing personnel training and development, and managing the project team.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan human resources relevant to projects	1.1 Determine resource requirements for individual tasks to determine required project personnel levels and competencies 1.2 Establish project organisation and structure to align individual and group competencies with project tasks 1.3 Allocate personnel to the project to meet planned work outputs throughout project timeline 1.4 Apply human resources management (HRM) methods, techniques and tools to support engagement and performance of

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	personnel
2. Implement project personnel training and development	2.1 Negotiate, define and communicate clear project role descriptions 2.2 Identify, plan and implement ongoing development and training of project team members to support personnel and project performance 2.3 Measure individuals' performance against agreed criteria and initiate actions to overcome shortfalls in performance
3. Lead project team	3.1 Implement processes and take action to improve individual performance and overall project effectiveness 3.2 Monitor and report, for remedial action, internal and external influences on individual and project team performance and morale 3.3 Implement procedures for interpersonal communication, counselling, and conflict resolution to maintain a positive work environment 3.4 Identify and manage inter-project and intra-project resource conflict to minimise impact on achievement of project objectives
4. Finalise human resource activities related to projects	4.1 Disband project team according to organisational policies and procedures 4.2 Identify and document human resource issues and recommended improvements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.3, 3.3, 4.1	• Interprets textual information obtained from a range of sources and determines how content may be applied to requirements
Writing	1.1-1.3, 2.1-2.3, 3.1, 3.2, 4.2	• Develops plans, role descriptions and reports using clear, specific and industry-related terminology, appropriate structures and conventions • Documents personnel requirements, results of performance measurements and improvement

© Commonwealth of Australia, 2025 Public Skills Australia

		recommendations
Oral Communication	1.3, 1.4, 2.1, 3.1, 3.3, 3.4	• Participates in verbal exchanges using clear language and appropriate non-verbal features • Uses active listening and questioning to elicit views and opinions of others and confirm understanding
Numeracy	1.1, 2.3, 3.4	• Uses mathematical formulae to calculate resources against project requirements and to measure work output against predetermined criteria
Navigate the world of work	3.3, 4.1	• Understands and adheres to organisational policies and procedures
Interact with others	1.3, 1.4, 2.1, 2.3, 3.1, 3.3, 3.4	• Collaborates with co-workers to negotiate and facilitate shared understanding of individual roles and group objectives • Manages workplace conflict by recognising contributing factors and implementing resolution strategies
Get the work done	1.1-1.4, 2.2, 2.3, 3.1, 3.2, 3.4, 4.2	• Develops plans to identify project responsibilities and needs, and allocate project personnel, with an awareness of how this contributes to overall project goals • Uses analytical skills to review performance and decide on actions needed • Reflects on how variables impact outcomes to gain insights into concepts that may be adapted in future situations

Assessment Requirements for BSBPMG515 Manage project human resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan and allocate human resources to a project
- identify and organise project personnel training and development
- manage project personnel to achieve project outcomes
- apply human resource management (HRM) methods, techniques and tools to the project.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise human resource management (HRM) methods, techniques and tools
- explain strategies for managing project human resources and their application to different situations
- explain processes used to measure individuals' performance against agreed criteria
- explain techniques for managing and improving performance.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- project documentation
- case studies and, where possible, real situations
- interaction with others.

BSBPMG517 Manage project risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage risks that may impact achievement of project objectives. It involves identifying, analysing, treating and monitoring project risks, and assessing risk management outcomes.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify project risks	1.1 Determine risk objectives and standards, with input from stakeholders 1.2 Establish project risk context to inform risk management processes 1.3 Identify project risks using valid and reliable risk identification methods 1.4. Classify project risks within agreed risk categories

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Analyse project risks	2.1 Determine risk analysis classification criteria and apply to agreed risk ranking system 2.2 Use risk analysis processes, within delegated authority, to analyse and qualify risks, threats and opportunities 2.3 Determine risk priorities in agreement with project client and other stakeholders 2.4 Document risk analysis outcomes for inclusion in risk register and risk management plan
3. Establish risk treatments and controls	3.1 Identify and document existing risk controls 3.2 Consider and determine risk treatment options using agreed consultative methods 3.3 Record and implement agreed risk treatments 3.4 Update risk plans and allocate risk responsibilities to project team members
4. Monitor and control project risks	4.1 Establish regular risk review processes to maintain currency of risk plans 4.2 Regularly monitor risk environment to identify changed circumstances impacting project risks 4.3 Determine risk responses to changed environment 4.4 Implement agreed risk responses and modify plans to maintain currency of risk treatments and controls
5. Assess risk management outcomes	5.1 Review project outcomes to determine effectiveness of risk-management processes and procedures 5.2 Identify and document risk management issues and recommended improvements for application to future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1, 2.2, 3.1, 3.2, 4.2, 5.1, 5.2	• Interprets and critically analyses complex texts from a range of sources and determines how content may be applied according to organisational requirements

© Commonwealth of Australia, 2025 Public Skills Australia

Writing	1.3, 1.4, 2.1, 2.4, 3.1, 3.3, 3.4, 4.1, 4.3, 4.4, 5.2	• Documents risks, risk analysis and risk controls using required formats and structure • Modifies and updates workplace documentation according to requirements
Oral Communication	1.1, 2.3, 3.4	• Participates in verbal exchanges using clear language to provide and seek information • Uses active listening and questioning techniques to confirm understanding
Numeracy	1.3, 2.1, 2.3	• Analyses numerical data to identify project risk levels and rank risks according to agreed system of classification
Navigate the world of work	1.1, 2.2	• Determines and adheres to organisational policies and standards • Considers own role in terms of its contribution to broader goals of work environment
Interact with others	1.1, 2.3, 3.4	• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information • Actively identifies requirements of important communication exchanges, selecting appropriate channels, format and content to suit purpose and audience
Get the work done	1.1-1.4, 2.1, 3.2, 4.1, 4.4, 5.1	• Identifies and develops approaches to risk management and implements complex tasks to achieve outcomes • Analyses information to make decisions, involving others when appropriate • Uses formal and informal processes to monitor implementation of decisions and reflect on outcomes

Assessment Requirements for BSBPMG517 Manage project risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- conduct effective risk management for a project of sufficient complexity to demonstrate the full range of performance requirements
- apply risk management techniques, strategies and tools.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify project risks in a range of risk categories
- explain key components of a risk management plan
- outline industry sector risk classifications and relate these to different risk contexts
- summarise organisational and industry standard risk frameworks
- identify and describe characteristics, techniques and appropriate applications of quantitative and qualitative risk management techniques and approaches.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- workplace risk management documentation
- feedback from project stakeholders about how risks were managed.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG519 Manage project stakeholder engagement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage stakeholder relationships.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify and address stakeholder interests	1.1 Identify stakeholders relevant to project objectives 1.2 Segment stakeholder interests and determine forms of engagement 1.3 Consider interests of stakeholders when considering and advising on project management issues 1.4 Identify and implement actions to address differing interests where required
2. Manage effective stakeholder engagement	2.1 Support development of team members' interpersonal skills in effective stakeholder engagement

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.2 Distribute team work effectively to ensure defined project roles are followed 2.3 Identify and clarify stakeholder behavioural expectations, where required 2.4 Openly lead stakeholder performance reviews 2.5 Identify and address individual development needs and opportunities to support stakeholder engagement
3. Manage stakeholder communications	3.1 Determine and document stakeholder communication needs 3.2 Ensure relevant stakeholders agree to communication method, content and timing of engagement 3.3 Communicate information as planned and in line with authority levels, identifying and addressing variances

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2	• Recognises and interprets workplace documentation to determine pertinent information
Writing	1.1, 1.2, 3.1, 3.3	• Documents information about stakeholder interests and communication needs using appropriate vocabulary and formats
Oral Communication	1.3, 2.1, 2.3, 2.4, 2.5, 3.2, 3.3	• Participates in verbal exchanges using clear and detailed language to provide and seek information • Uses active listening and questioning to confirm understanding
Navigate the world of work	3.3	• Understands and works according to role parameters
Interact with others	2.1-2.5, 3.2, 3.3	• Actively identifies requirements of important communication exchanges, selecting appropriate channels, format and content to suit purpose and audience • Collaborates with others to achieve joint outcomes, playing an active role in facilitating and leading activities

© Commonwealth of Australia, 2025 Public Skills Australia

Get the work done	1.1-1.4, 2.3, 3.1, 3.3	• Takes responsibility for decisions in complex situations involving multiple variables and constraints • Uses analytical skills to identify and address problems

Assessment Requirements for BSBPMG519 Manage project stakeholder engagement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and implement stakeholder engagement for a project of sufficient complexity to demonstrate the full range of performance requirements
- implement a range of appropriate stakeholder communication mechanisms for a project
- demonstrate effective team leadership for project team and stakeholders.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify common problems leading to variances in stakeholder engagement
- explain and analyse interests and expectations of stakeholders
- describe levels and means of stakeholder engagement
- identify and explain stakeholder engagement theory and strategies
- describe types of project stakeholders.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- examples of project management documentation for stakeholder engagement
- records of project team leadership in stakeholder engagement activities
- case studies and, where possible, real situations.

BSBPMG521 Manage project integration

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to integrate and balance overall project management functions of scope, time, cost, quality, human resources, communications, risk and procurement across the project life cycle; and to align and track project objectives to comply with organisational goals, strategies and objectives.

It applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish project	1.1 Identify, clarify and prepare project initiation documentation 1.2 Identify relationship between the project and broader organisational strategies and goals 1.3 Negotiate and document project objectives, outcomes and benefits 1.4 Negotiate project governance structure with relevant

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	authorities and stakeholders 1.5 Prepare and submit project charter for approval by relevant authorities
2. Undertake project planning and design processes	2.1 Establish and implement a methodology to disaggregate project objectives into achievable project deliverables 2.2 Identify project stages and key requirements for stage completion against client requirements and project objectives 2.3 Analyse project management functions to identify interdependencies and impacts of constraints 2.4 Develop a project management plan that integrates all project-management functions with associated plans and baselines 2.5 Establish designated mechanisms to monitor and control planned activity 2.6 Negotiate approval of project plan with relevant stakeholders and project authority
3. Execute project in work environment	3.1 Manage the project in an established internal work environment to ensure work is conducted effectively throughout the project 3.2 Maintain established links to align project objectives with organisational objectives throughout the project 3.3 Within authority levels, resolve conflicts negatively affecting attainment of project objectives
4. Manage project control	4.1 Ensure project records are updated against project deliverables and plans at required intervals 4.2 Analyse and submit status reports on project progress and identified issues with stakeholders and relevant authorities 4.3 Analyse and submit impact analysis of change requests for approval, where required 4.4 Maintain relevant project logs and registers accurately and regularly to assist with project audit 4.5 Ensure associated plans are updated to reflect project progress against baselines and approved changes
5. Manage project finalisation	5.1 Identify and allocate project finalisation activities 5.2 Ensure project products and associated documentation are prepared for handover to client in a timely manner 5.3 Finalise financial, legal and contractual obligations

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	5.4 Undertake project review assessments as input to future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.4, 4.1, 4.2, 4.3	• Applies appropriate strategies to construct meaning from complex texts
Writing	1.1, 1.3, 1.5, 2.2, 2.4, 4.1, 4.4, 4.5	• Develops and maintains project documentation using formats and language appropriate to context
Oral Communication	1.3, 1.4, 2.6	• Participates in verbal exchanges using clear and detailed language to provide and seek information • Uses active listening and questioning to confirm understanding
Numeracy	1.1, 2.1-2.4, 4.2, 4.3, 5.3	• Uses a wide range of mainly formal and some informal, oral and written mathematical language and representation to communicate mathematically
Navigate the world of work	1.2, 1.5, 5.3	• Adheres to organisational and legislative requirements
Interact with others	1.3,1.4, 2.6, 3.3	• Selects and uses appropriate communication practices to seek or share information with stakeholders • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction and negotiating outcomes
Get the work done	1.1, 1.2, 1.5, 2.1-2.5, 3.1, 3.2, 4.1-4.5, 5.1-5.4	• Organises time and effort around priorities and results, focusing beyond immediate tasks to consider work performance of the group • Sequences and schedules complex activities, monitors implementation and manages relevant communication • Reflects on outcomes to contribute to future projects

Assessment Requirements for BSBPMG521 Manage project integration

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- work closely with others to integrate all project management functions across a project life cycle according to organisational objectives
- negotiate with internal and external stakeholders
- create accurate project management documentation
- make suggestions for improvements to managing project integration in the future.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise project governance models
- describe range of methodologies to break project objectives into achievable project deliverables
- outline role of project life cycle stages, phases and structures relevant to industry and project context
- identify and describe appropriate organisational documentation for recording strategies and goals for integration processes.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- project documentation
- case studies and, where possible, real situations

© Commonwealth of Australia, 2025 Public Skills Australia

- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG522 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake a straightforward project or a section of a larger project. It covers developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learned for application to future projects.

This unit applies to individuals who play a significant role in ensuring a project meets timelines, quality standards, budgetary limits and other requirements set for the project.

The unit does not apply to specialist project managers. For specialist project managers, the other units of competency in the project management field (BSBPMG) will be applicable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Define project	1.1 Access project scope and other relevant documentation 1.2 Define project stakeholders 1.3 Seek clarification from delegating authority of issues related to

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	project and project parameters 1.4 Identify limits of own responsibility and reporting requirements 1.5 Clarify relationship of project to other projects and to the organisation's objectives 1.6 Determine and access available resources to undertake project
2. Develop project plan	2.1 Develop project plan in line with the project parameters 2.2 Identify and access appropriate project management tools 2.3 Formulate risk management plan for project, including Work Health and Safety (WHS) 2.4 Develop and approve project budget 2.5 Consult team members and take their views into account in planning the project 2.6 Finalise project plan and gain necessary approvals to commence project according to documented plan
3. Administer and monitor project	3.1 Take action to ensure project team members are clear about their responsibilities and the project requirements 3.2 Provide support for project team members, especially with regard to specific needs, to ensure that the quality of the expected outcomes of the project and documented time lines are met 3.3 Establish and maintain required recordkeeping systems throughout the project 3.4 Implement and monitor plans for managing project finances, resources and quality 3.5 Complete and forward project reports as required to stakeholders 3.6 Undertake risk management as required to ensure project outcomes are met 3.7 Achieve project deliverables
4. Finalise project	4.1 Complete financial recordkeeping associated with project and check for accuracy 4.2 Ensure transition of staff involved in project to new roles or reassignment to previous roles 4.3 Complete project documentation and obtain necessary sign-offs for concluding project
5. Review project	5.1 Review project outcomes and processes against the project scope and plan

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	5.2 Involve team members in the project review 5.3 Document lessons learned from the project and report within the organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 3.4, 3.5, 4.1, 4.3, 5.1	• Organises, evaluates and critiques ideas and information from a range of complex texts
Writing	2.1, 2.3, 2.6, 3.3, 3.5, 4.1, 4.3, 5.3	• Develops plans, reports and recommendations using vocabulary, structure and conventions appropriate to text • Establishes and maintains records according to organisational requirements
Numeracy	1.6, 2.4, 3.4, 4.1	• Uses formal and some informal, oral and written mathematical language and representation to prepare and communicate budgetary and financial information
Oral communication	2.5, 5.2	• Participates in verbal discussions using clear language and appropriate features to present or seek information • Using listening and questioning skills to seek information and confirm understanding
Navigate the world of work	1.3, 1.4, 2.3, 3.1, 4.3	• Recognises and responds to organisational and legislative/regulatory requirements
Interact with others	2.5, 3.1, 3.2, 4.2, 5.2	• Selects and uses appropriate communication protocols and practices to ensure shared understanding of project roles and expectations • Uses collaborative techniques to engage stakeholders in consultations and negotiations
Get the work done	1.2, 1.5, 1.6, 2.1, 2.2, 2.3, 2.6, 3.1-3.7, 4.1, 4.2, 4.3, 5.1, 5.3	• Develops and implements plans to manage projects that involve diverse stakeholders with potentially competing demands • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Evaluates outcomes of decisions to identify

Assessment Requirements for BSBPMG522 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- define the parameters of the project including:
  - project scope
  - project stakeholders, including own responsibilities
  - relationship of project to organisational objectives and other projects
  - reporting requirements
  - resource requirements
- use project management tools to develop and implement a project plan including:
  - deliverables
  - work breakdown
  - budget and allocation of resources
  - timelines
  - risk management
  - recordkeeping and reporting
- consult and communicate with relevant stakeholders to generate input and engagement in planning, implementing and reviewing the project
- provide support to team members to enable them to achieve deliverables and to transition them as appropriate at completion of the project
- finalise the project including documentation, sign-offs and reporting
- review and document the project outcomes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

© Commonwealth of Australia, 2025 Public Skills Australia

- give examples of project management tools and how they contribute to a project
- outline types of documents and other sources of information commonly used in defining the parameters of a project
- explain processes for identifying and managing risk in a project
- outline the organisation's mission, goals, objectives and operations and how the project relates to them
- explain the organisation's procedures and processes that are relevant to managing a project including:
  - lines of authority and approvals
  - quality assurance
  - human resources
  - budgets and finance
  - recordkeeping
  - reporting
- outline the legislative and regulatory context of the organisation in relation to project work, including work health and safety (WHS) requirements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPUR402 Negotiate contracts

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to negotiate terms of contracts with suppliers, and prepare and finalise contracts.

It applies to individuals who negotiate contracts as part of a broad purchasing role but are not specialist legal practitioners. They are required to negotiate and formalise complex purchasing arrangements involving significant risk and/or significant expenditure and detailed legal and documentation arrangements and are typically guided by organisational contract negotiation guidelines. They work under minimal supervision of a senior purchasing manager or in consultation with senior management.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – Purchasing and Contracting

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Negotiate terms of contracts with suppliers	1.1 Offer advice and undertake negotiations without prejudice 1.2 Advise suppliers of the organisation’s intent to accept their offers 1.3 Negotiate issues with suppliers 1.4 Determine desired outcomes, negotiation plans and schedules

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	for negotiations 1.5 Undertake negotiations and reach agreements with suppliers in accordance with plans 1.6 Negotiate and document contract requirements to the satisfaction of the organisation and suppliers
2. Prepare contracts	2.1 Draft required contracts using legal expertise if required 2.2 Distribute draft contracts to relevant personnel and suppliers 2.3 Ensure any discrepancies or disagreements are clarified and resolved to the satisfaction of all parties 2.4 Ensure checks of the legality and validity of draft contracts are made 2.5 Obtain approvals to sign contracts
3. Finalise contracts	3.1 Ensure contracts are signed and exchanged between the organisation and suppliers 3.2 Ensure contracts and related documents are stored and safeguarded 3.3 Advise relevant personnel of contract requirements 3.4 Advise unsuccessful suppliers of non-acceptance of offers

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.5, 2.1, 2.4	• Interprets and analyses textual information from a range of sources and identifies relevant key information to assist in the negotiation process
Writing	1.2, 1.6, 2.1, 2.3, 2.5, 3.3, 3.4	• Develops material to convey explicit information and results using clear and detailed language appropriate to audience and context
Oral Communication	1.1-1.3, 1.5, 1.6, 2.5, 3.3	• Uses clear language and suitable features to provide information to a variety of individuals • Uses active listening and questioning techniques to convey and clarify information

© Commonwealth of Australia, 2025 Public Skills Australia

Navigate the world of work	1.5, 1.6, 2.1, 2.4	• Monitors adherence to implicit and explicit organisational procedures and policies • Recognises the implications of legal and regulatory responsibilities related to own work and is beginning to recognise some general legal principles applicable across work contexts
Interact with others	1.1-1.3, 1.5, 1.6, 2.2, 2.3, 2.5, 3.1, 3.3, 3.4	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Collaborates and negotiates with others as part of familiar routine activities
Get the work done	1.4, 2.2, 2.3, 3.1, 3.2	• Takes responsibility for planning, sequencing and prioritising tasks for efficient and effective outcomes • Implements standard procedures to make routine decisions • Recognises and takes responsibility for addressing predictable problems in familiar work contexts • Understands the importance of secure information in relation to own work

Assessment Requirements for BSBPUR402 Negotiate contracts

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce a documented agreement of terms with suppliers
- draft and complete a contract with a supplier for goods and services
- produce a document to inform successful and unsuccessful suppliers.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and provide an overview of key provisions of relevant legislation, codes of practice and national standards that affect purchasing
- outline organisation practices, policies and procedures for purchasing
- explain purchasing and procurement principles for:
  - accountability
  - probity and transparency
  - risk management
  - value for money.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the administration – purchasing and contracting field of work and include access to:

- organisation policies and procedures
- purchasing strategies and relevant purchasing records
- office equipment and supplies

© Commonwealth of Australia, 2025 Public Skills Australia

- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRES404 Research legal information using primary sources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to work under supervision researching primary sources of legal information, locating relevant information and writing up a basic summary.

It applies to individuals who provide legal support services while under supervision. Its application in the workplace will be determined by the job role of the individual and the legislation, rules, regulations and codes of practice relevant to different jurisdictions

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge management – research

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Receive and process request for information	1.1 Document request using appropriate recording system 1.2 Confirm client identity and other party's right to receive information 1.3 Clarify client needs and establish relevant criteria in consultation with designated person to ensure client needs are met 1.4 Research and identify appropriate response methods and

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	format 1.5 Forward request for information to others where appropriate
2. Identify information sources	2.1 Identify and research relevant sources and locations of information 2.2 Obtain access to identified sources 2.3 Resolve problems with accessing information promptly and efficiently
3. Prepare to extract information	3.1 Locate and extract information relevant to particular request 3.2 Discuss and implement resolutions to problems in accessing information with designated person where appropriate 3.3 Copy extracted information according to organisation's security and confidentiality procedures 3.4 Maintain integrity of content/information
4. Ensure information meets request	4.1 Analyse, evaluate and edit extracted information to fit client needs 4.2 Combine different types of information, where appropriate, to provide response to request
5. Compose report or correspondence	5.1 Develop plan and synopsis for report or correspondence 5.2 Write report or correspondence using clear and concise language 5.3 Check spelling, punctuation and grammar, and amend where necessary
6. Prepare to format report or correspondence	6.1 Format report or correspondence according to organisation's requirements, policies and procedures 6.2 Check report or correspondence for accuracy and to ensure that intended meaning will be readily understood by recipient
7. Finalise report or correspondence	7.1 Arrange review and sign-off of report or correspondence with designated person within designated timelines 7.2 Apply organisation's information-recording procedures 7.3 Forward report or correspondence to client

Assessment Requirements for BSBRES404 Research legal information using primary sources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- follow correct procedures for receiving, documenting and processing requests for information
- source and access information that meets the requirements of the request
- process and format information correctly and in accordance with organisational policies and procedures, particularly with regard to security and confidentiality
- finalise documents within designated timelines and according to organisational procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the organisation's policies and procedures that must be followed when completing the the full range of tasks covered
- list relevant information sources and for each source briefly explain:
  - how each source is accessed
  - the type of information
- briefly explain the legislative requirements that apply when researching, accessing and using legal information.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

© Commonwealth of Australia, 2025 Public Skills Australia

- appropriate legislation and regulations relevant to common legal matters
- organisational policies and procedures for formatting of documents, security and confidentiality
- office equipment and resources
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRES502 Research legal information using secondary sources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake legal research using secondary sources and under supervision. This includes identifying research requirements and sources of information, applying information to a set of facts, evaluating the quality of the information, and preparing and producing reports.

It applies to individuals who apply a well-established, sound theoretical knowledge base and use a range of specialised, technical or managerial competencies to plan and carry out work in a legal context in accordance with legislation, regulations and codes of practice relevant to different jurisdictions.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge management – research

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify specific legal data and information requirements	1.1 Liaise with designated person to clarify specific legal data and information needs 1.2 Prepare research plan and prioritise activities 1.3 Identify resources and technical requirements

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Assign timelines to tasks and delegate tasks where appropriate
2. Undertake research	2.1 Identify sources of legal data and information 2.2 Research and identify key information to be extracted
3. Review research	3.1 Check information to ensure that extracted details are acknowledged and recorded for copyright and other legal requirements 3.2 Analyse legal data and information for relevance to facts 3.3 Edit and collate legal data and information to fit research and relevant legal and ethical requirements
4. Prepare drafts	4.1 Draft document in appropriate format taking into account precedent documents and using appropriate language 4.2 Present legal data and information according to organisation's policies and procedures and legal requirements 4.3 Evaluate draft against previously identified criteria and take action to address identified gaps or deficits 4.4 Liaise with supervisor to review document 4.5 Make amendments where necessary
5. Prepare final draft	5.1 Identify key points and prepare executive summary, where appropriate 5.2 Prepare appendices, bibliography and table of contents as required 5.3 Check final draft and present it to supervisor for review and sign-off 5.4 Make arrangements to disseminate report as required

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 1.4, 2.1, 2.2, 3.1, 3.2, 3.3,	• Interprets documents to determine legal requirements • Identifies and analyses complex texts to assess

Assessment Requirements for BSBRES502 Research legal information using secondary sources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare a research plan including
  - liasing with others to clarify needs or to delegate tasks
  - prioriting required tasks
  - identifying resources, technical requirements and timelines
- conduct research using secondary sources according to organisational and legal requirements
- edit research findings and use relevant information to prepare draft report
- review draft, seek feedback from relevant person(s) and implement modifications
- produce a final report using appropriate format and language, according to the requirements of the request and within agreed timelines

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list and describe sources of legal data and information
- explain some situations where there would be an obligation to refer matters to supervisors and/or obtain sign-off on legal work
- briefly explain the organisation’s policies and procedures relating to researching, accessing and using legal information
- briefly explain the legislative requirements that apply when researching, accessing and using legal information
- describe the format for presenting written reports

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- appropriate legislation and regulations relevant to common legal matters
- workplace documentation and resources
- case studies and, where possible, real situations
- secondary research sources for legal matters.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRSK501 Manage risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to manage risks in a range of contexts across an organisation or for a specific business unit or area in any industry setting.

It applies to individuals who are working in positions of authority and are approved to implement change across the organisation, business unit, program or project area. They may or may not have responsibility for directly supervising others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Risk Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish risk context	1.1 Review organisational processes, procedures and requirements for undertaking risk management in accordance with current risk management standards 1.2 Determine scope for risk management process 1.3 Identify internal and external stakeholders and their issues 1.4 Review political, economic, social, legal, technological and policy context

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.5 Review strengths and weaknesses of existing arrangements 1.6 Document critical success factors, goals or objectives for area included in scope 1.7 Obtain support for risk management activities 1.8 Communicate with relevant parties about the risk management process and invite participation
2. Identify risks	2.1 Invite relevant parties to assist in the identification of risks 2.2 Research risks that may apply to scope 2.3 Use tools and techniques to generate a list of risks that apply to the scope, in consultation with relevant parties
3. Analyse risks	3.1 Assess likelihood of risks occurring 3.2 Assess impact or consequence if risks occur 3.3 Evaluate and prioritise risks for treatment
4. Select and implement treatments	4.1 Determine and select most appropriate options for treating risks 4.2 Develop an action plan for implementing risk treatment 4.3 Communicate risk management processes to relevant parties 4.4 Ensure all documentation is in order and appropriately stored 4.5 Implement and monitor action plan 4.6 Evaluate risk management process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 1.5, 2.2	• Comprehends a variety of relatively complex texts • Gathers, interprets and analyses textual information from a range of sources to identify relevant information
Writing	1.6, 1.8, 2.1, 2.3, 4.3	• Develops textual material and organises content in a manner that effectively documents

© Commonwealth of Australia, 2025 Public Skills Australia

		risk management analysis and assessment priorities and processes
Oral Communication	1.8, 2.1, 2.3, 4.3	• Participates in interactions with stakeholders using questioning and listening to elicit opinions, and to confirm and clarify understanding
Numeracy	2.2	• Uses numerical tools to assess risk and uses numerical data to review plans
Navigate the world of work	1.1, 2.1, 4.3	• Refers to organisational processes, procedures and requirements when making decisions about risk management
Interact with others	1.8, 2.1, 2.3, 4.3	• Establishes and uses appropriate conventions and protocols when communicating with stakeholders about risk management • Consults and negotiates with stakeholders about risk management processes and outcomes
Get the work done	1.2, 1.3, 1.5, 1.7, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 4.1, 4.2, 4.4, 4.5, 4.6	• Sequences and schedules a range of routine and complex activities, monitors implementation, evaluates processes and manages relevant communication • Systematically analyses information to decide on appropriate risk management treatments • Uses digital technologies and systems to access information, document plans and communicate with others

Assessment Requirements for BSBRSK501 Manage risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse information from a range of sources to identify the scope and context of the risk management process including:
  - stakeholder analysis
  - political, economic, social, legal, technological and policy context
  - current arrangements
  - objectives and critical success factors for the area included in scope
  - risks that may apply to scope
- consult and communicate with relevant stakeholders to identify and assess risks, determine appropriate risk treatment actions and priorities and explain the risk management processes
- develop and implement an action plan to treat risks
- monitor and evaluate the action plan and risk management process
- maintain documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the purpose and key elements of current risk management standards
- outline the legislative and regulatory context of the organisation in relation to risk management
- outline organisational policies, procedures and processes for risk management.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk - risk management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBSTR402 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to implement continuous improvement of systems and processes of an organisation. It includes using systems and strategies to encourage the team to participate in the process, monitoring and reviewing performance, and identifying opportunities for further improvements.

The unit applies to managers who are responsible for implementing the continuous improvement process to achieve the objectives of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking and Problem Solving – Business Strategy

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify and plan for improvement	1.1 Identify relevant stakeholders and establish improvements required 1.2 Identify where new systems and processes could be implemented 1.3 Promote team involvement in decision making processes for team systems and processes 1.4 Communicate and agree on new improvement systems and processes with relevant stakeholders 1.5 Manage reports and recommendations for using systems and processes of the organisation

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.6 Establish risk review processes
2. Monitor implementation of continuous improvement	2.1 Use workplace systems and technology, and monitor team performance according to organisational policies and procedures 2.2 Implement new systems and processes in consultation with relevant stakeholders 2.3 Maintain new system and processes in consultation with relevant stakeholders 2.4 Identify and resolve system and process issues
3. Evaluate implementation of continuous improvement	3.1 Communicate productivity improvements to relevant stakeholders and confirm their understanding 3.2 Seek and respond to feedback from relevant stakeholders on proposed improvement systems and process 3.3 Review improvement systems and process, and make changes, as required

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	• Evaluates and integrates facts and ideas to construct meaning from a range of text types in order to implement continuous improvement systems and processes
Writing	• Selects vocabulary, grammatical structures and conventions appropriate to text • Researches, plans and prepares continuous improvement documentation for required stakeholders
Oral communication	• Participates in a variety of spoken exchanges with a range of audiences using structure and language to suit the audience
Initiative and enterprise	• Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment • Recognises the potential of new approaches to enhance work practices and outcomes • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering required information and identifying and evaluating options against agreed criteria

© Commonwealth of Australia, 2025 Public Skills Australia

SKILL	DESCRIPTION
Teamwork	• Selects and uses required conventions and protocols when communicating with diverse individuals to seek and share information • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group communication, influencing direction and taking a leadership role on occasion
Self-management	• Evaluates effectiveness of decisions in terms of how well they meet stated goals
Technology	• Uses digital applications to access and filter data, extract, organise, integrate and share required information
Planning and organising	• Takes responsibility for planning and organising own workload to achieve required outcomes

Unit Mapping Information

Supersedes and is equivalent to BSBMGT403 Implement continuous improvement.

Supersedes but is not equivalent to:

- BSBCON401 Work effectively in a business continuity context
- BSBMGT406 Plan and monitor continuous improvement.

Assessment Requirements for BSBSTR402 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement at least one continuous improvement system or process in an organisation or work area.

In the course of the above, the candidate must:

- provide support to enable individuals and teams to participate in decisions, take responsibility, show initiative and implement improvement processes
- communicate effectively to support the implementation of improvements and improvement system and processes
- implement, monitor and update improvement plans, processes and procedures to improve performance
- document performance to identify further opportunities for improvement
- manage records and reports in the systems and procedures of the organisation.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- continuous improvement systems and processes
- coaching and mentoring needs to support continuous improvement
- change management techniques that support continuous improvement and initiative
- organisation’s systems and data used for benchmarking and monitoring performance for continuous improvement.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

© Commonwealth of Australia, 2025 Public Skills Australia

This includes access to:

- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSTR501 Establish innovative work environments

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to create an environment that enables and supports practice which focuses on a holistic approach to the integration of innovation across all areas of work practice.

The unit applies to individuals working in leadership or management roles in any industry or community context. The individual could be employed by the organisation, but may also be an external contractor, the leader of a cross organisation team or of a self-formed team of individuals.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking and Problem Solving – Business Strategy

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish work practices	1.1 Identify relevant stakeholders 1.2 Identify organisational objectives and practices 1.3 Evaluate current work conditions 1.4 Determine working conditions that allow innovative practices according to organisational policies and procedures 1.5 Identify organisational resources relating to innovation 1.6 Build and lead team and maximise opportunities for innovation
2. Create an innovative	2.1 Evaluate the impacts of changing work environment

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
environment	2.2 Collaborate with stakeholders and develop ideas for enhancing work environment 2.3 Identify and select resources required for enhancing work environment 2.4 Assess the ability of the workspace to support innovation 2.5 Assist team members to adapt and perform in new work environment
3. Implement innovative work environment	3.1 Encourage creative mindsets, collaborative working and development of positive workplace relationships 3.2 Reinforce the value of innovation according to organisational vision and objectives 3.3 Take risks to open up opportunities for innovation 3.4 Select ways of celebrating and encouraging innovation 3.5 Encourage and support evaluation of innovative ideas
4. Share and evaluate innovative ideas and work environment	4.1 Share relevant information, knowledge and skills on innovative practices with stakeholders 4.2 Provide and encourage formal and informal learning opportunities to develop skills required for innovation 4.3 Create opportunities where individuals can learn from the experience of others 4.4 Seek and respond to suggestions, improvements and innovations from all team members

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	• Interprets and evaluates information that may deal with complex ideas related to issues both within and outside a given workplace context
Writing	• Develops information for others using language to suit the context and audience
Oral communication	• Presents ideas and concepts to a range of audiences using structure and language to suit the audience • Uses active listening and questioning to discuss and clarify information and to confirm understanding
Self-management	• Takes responsibility for implementing practices and procedures to achieve organisational objectives in innovation according to role

© Commonwealth of Australia, 2025 Public Skills Australia

SKILL	DESCRIPTION
	requirements • Accepts responsibility for planning and implementing tasks and practices to achieve organisational goals, negotiating key aspects with others and taking into account current capabilities and needs
Initiative and enterprise	• Develops new and innovative ideas through exploration, evaluation, analysis and critical thinking
Teamwork	• Uses required communication techniques to build rapport and foster strong relationships with co-workers in a range of work contexts • Uses inclusive and collaborative techniques to share, promote and convey complex information about new ideas and systems within the workplace • Facilitates a climate where people feel comfortable suggesting and discussing improvements and new ideas
Problem Solving	• Uses problem solving processes to identify, assess and respond to challenges and risks around innovation

Unit Mapping Information

No equivalent unit. Supersedes but is not equivalent to:

- BSBINN501 Establish systems that support innovation
- BSBINN502 Build and sustain an innovative work environment.

Assessment Requirements for BSBSTR501 Establish innovative work environments

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- establish at least two different procedures and practices that foster innovation in areas of work practice, including at least three of the following:
  - collaborative work arrangements
  - building team capacity to contribute to innovation
  - providing formal and informal learning opportunities
  - evaluating ideas of innovation in work environment
  - celebrating and encouraging innovation
  - consulting with relevant stakeholders
  - changing physical work environment, including designing, fitting-out and decorating workspaces
  - communicating and sharing of ideas and feedback.

In the course of the above, the candidate must:

- reinforce the value of innovation to the vision and objectives of the organisation
- model behaviour, including:
  - being receptive to ideas
  - giving constructive advice
  - establishing and maintaining relationships based on mutual respect and trust
  - taking considered risks that provide opportunities for innovation
- support innovation and collaboration of ideas to make improvements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- concepts and theories of innovation

© Commonwealth of Australia, 2025 Public Skills Australia

- context for innovation in the workplace, including:
  - core business values
  - overall objectives
  - broader environmental context
  - value and benefit of innovative ideas and projects
- factors and tools that motivate individuals
- creative thinking and innovative work practices
- ways of celebrating and promoting innovation in the workplace
- approaches to management and leadership and how they support and hinder innovation
- challenges and barriers to innovation and ways of overcoming them, including:
  - rewarding and celebrating innovation
  - coaching and learning
  - modelling behaviour and managing the physical environment.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- relevant legislation and codes of practice
- relevant organisational policies and procedures
- workplace equipment and resources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSTR502 Facilitate continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to lead and manage continuous improvement systems and processes. Particular emphasis is on the development of systems and the analysis of information to monitor and adjust performance strategies, and to manage opportunities for further improvements.

The unit applies to individuals who take an active role in managing a continuous improvement process in order to achieve an organisation's objectives. At this level, work will normally be carried out using complex and diverse methods and procedures which require the exercise of considerable discretion and judgement, using a range of problem-solving and decision-making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking and Problem Solving – Business Strategy

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish systems and processes	1.1 Identify current systems and processes that facilitate continuous improvement 1.2 Identify and define improvement needs and opportunities for the organisation 1.3 Develop decision-making processes to assist continuous improvement and communicate to relevant stakeholders 1.4 Develop strategies for continuous improvement and encourage

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	team members to participate in decision-making processes 1.5 Develop knowledge management systems to capture team progress, insights and experiences from business activities 1.6 Develop new systems and processes that facilitate continuous improvement according to improvement needs and opportunities 1.7 Establish processes that confirm team members are informed about continuous improvement outcomes
2. Monitor and adjust performance strategies	2.1 Confirm relevant systems and processes meet organisation sustainability requirements 2.2 Confirm team progress, insights and experiences are captured and accessible using knowledge management systems 2.3 Coach individuals and teams to implement and support continuous improvement systems and processes 2.4 Identify and evaluate ways in which planning and operations could be improved 2.5 Make recommendations and communicate strategies to relevant stakeholders
3. Manage opportunities for further improvement	3.1 Evaluate outcomes and identify opportunities for improvement 3.2 Seek feedback from relevant stakeholders on systems and processes 3.3 Identify other areas for improvement and document feedback for future planning

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	• Identifies and extracts required information from a range of complex texts • Locates, interprets and analyses workplace documentation to gather information relating to continuous improvement
Writing	• Develops complex texts related to continuous improvement processes according to organisational requirements • Ensures the vocabulary, grammatical structures and conventions are required for the context and target audience
Oral	• Presents information to a range of audiences using appropriate structure and language

© Commonwealth of Australia, 2025 Public Skills Australia

SKILL	DESCRIPTION
communication	• Listens and comprehends information from a variety of spoken exchanges with clients, co-workers and other stakeholders • Confirms understanding through questioning and active listening
Initiative and enterprise	• Monitors adherence to organisational policies, procedures and protocols and considers own role in terms of its contribution to broader goals of the work environment • Identifies and uses appropriate conventions and protocols when communicating with colleagues and external stakeholders
Problem solving	• Uses analytical and lateral thinking to review current practices and develop ideas for improvement
Teamwork	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction and influencing direction
Self-management	• Takes responsibility for developing, implementing and monitoring systems and processes to achieve organisational outcomes
Technology	• Reflects on the ways in which digital systems and tools are used, or could be used, to achieve work goals

Unit Mapping Information

BSBSTR601 Manage innovation and continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.
Release 2	This version first released with BSB Business Services Training Package Version 7.1. Release created to amend typographical error within the foundation skills.

Application

This unit describes the skills and knowledge required to sustain and develop an environment in which continuous improvement, innovation and learning are promoted and rewarded.

The unit applies to individuals with managerial responsibilities who aim to build a better and more effective work environment. Continuous improvement and innovation have links with the model of the learning organisation and people working at this level play an important role in building the culture, values and attitudes of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking and Problem Solving – Business Strategy

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish ways of working within team	1.1 Identify relevant team members and communicate ways of working objectives, expectations and desired outcomes 1.2 Identify and establish strategies to monitor and evaluate performance and sustainability of key systems and processes 1.3 Consult and seek advice from stakeholders, to identify

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	opportunities for improvement 1.4 Communicate with and mentor team members on ways of working that contribute to continuous improvement 1.5 Communicate with and coach team members how they can be innovative
2. Identify improvements	2.1 Analyse performance reports and variance from organisational plans within workplace 2.2 Identify and analyse changing trends and opportunities relevant to the workplace 2.3 Collect data and analyse areas for improvement in supply chains, and operational and service systems 2.4 Conduct a gap analysis of supply chains, and operational and service systems and identify improvement needs and opportunities 2.5 Communicate with and agree on team members identified improvement needs and opportunities 2.6 Identify learning opportunities for team members
3. Implement innovative processes	3.1 Confirm objectives, timeframes, measures and communication plans are in place to manage implementation 3.2 Address the impact of change and consequences for people and implement transition plans 3.3 Implement contingency plans in the event of non-performance 3.4 Follow up failure by investigation and analysis of causes and manage emerging challenges and opportunities 3.5 Confirm that learnings from activities are captured and managed using relevant knowledge management system
4. Develop workplace culture and tools for continuous improvement, innovation and learning	4.1 Evaluate continuous improvement systems and processes and innovation on a regular basis 4.2 Identify and communicate with stakeholders costs and benefits of innovations and improvements 4.3 Establish rewards for continuous improvement, innovation and learning 4.4 Seek and respond to feedback from relevant stakeholders' systems and processes for continuous improvement, innovation and learning

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Public Skills Australia

SKILL	DESCRIPTION
Reading	• Analyses, evaluates and integrates facts and ideas to construct meaning from a range of text types
Writing	• Integrates information and ideas from a range of sources, utilising appropriate support materials • Communicates complex relationships between ideas and information, matching style of writing to purpose and audience
Numeracy	• Selects and interprets mathematical information to analyse performance • Performs calculations required to establish timeframes, cost-benefits and measures for continuous improvement and innovation processes
Initiative and enterprise	• Adheres to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment • Recognises the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how • Recognises that the current way is only one way of doing something and explores possibilities that challenge current approaches • Facilitates a climate in which creativity and innovation are accepted as an integral part of achieving outcomes
Self-management	• Plans and implements strategies to review and improve own performance
Teamwork	• Recognises the importance of building rapport to establish positive and effective working relationships • Collaborates with others to achieve joint outcomes, playing an active role in encouraging innovation and facilitating effective group interaction
Problem solving	• Applies problem-solving processes to identify risks, evaluate options and determine solutions • Uses lateral and analytical thinking to evaluate options against needs, resources and constraints before making decisions • Actively identifies systems, devices and applications with potential to meet current and or future needs
Planning and organising	• Plans, organises, implements or reviews organisational strategies, systems and processes

Assessment Requirements for BSBSTR601 Manage innovation and continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.
Release 2	This version first released with BSB Business Services Training Package Version 7.1. Release created to amend typographical error within the foundation skills.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage and promote innovation and continuous improvement for an organisation or work area on at least one occasion.

In the course of the above, the candidate must:

- identify opportunities for improvement
- consult with stakeholders
- promote the value of creativity, innovation and sustainability and recognising successes
- support testing and trialling of new ideas
- undertake risk management and cost-benefit analysis for options
- plan for and implement improvements using organisation’s processes for approvals, project management and change management
- facilitate contributions to and communications about continuous improvement and innovation
- capture insights, experiences and ideas for improvements and incorporate them into the organisation’s knowledge management systems and future planning.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- cost-benefit analysis methods
- knowledge management systems

© Commonwealth of Australia, 2025 Public Skills Australia

- continuous improvement systems and processes
- creativity and innovation theories and concepts
- organisational learning principles
- quality management and continuous improvement theories
- relevant risk management concepts
- key aspects of supply chains, and operational, product and service systems
- method for conducting gap analysis
- changing trends and opportunities in workplace.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation and resources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSUS201A Participate in environmentally sustainable work practices

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to effectively measure current resource use and to carry out improvements including reducing the negative environmental impact of work practices. This unit requires the ability to access industry information, and applicable legislative and occupational health and safety (OHS) guidelines. While no licensing, legislative, regulatory or certification requirements apply holistically to this unit at the time of publication, relevant national, state and territory legislation, regulations and codes of practice impact upon this unit.

Application of the Unit

Application of the unit	This unit applies to operators/team members under supervision or guidance, who are required to follow workplace procedures and instructions, and to work in an environmentally sustainable manner. It covers: efficient resource use potential environmental hazards regulatory compliance improving environmental performance (within the scope of competency, authority and own level of responsibility). It addresses the knowledge, processes and techniques necessary to participate in environmentally sustainable work practices.

© Commonwealth of Australia, 2025 Public Skills Australia

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Identify current resource use	1.1. Identify workplace ***environmental and resource efficiency issues*** 1.2. Identify resources used in own work role 1.3. Document and measure current usage of resources using ***appropriate techniques*** 1.4. Record and file documentation measuring current usage, using technology (such as software systems) where applicable 1.5. Identify and report workplace environmental

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	hazards to appropriate personnel
2. Comply with environmental regulations	2.1. Follow workplace procedures to ensure ***compliance*** 2.2. Report breaches or potential breaches to appropriate personnel
3. Seek opportunities to improve resource efficiency	3.1. Follow ***organisational plans*** to improve environmental practices and resource efficiency 3.2. Work as part of a team, where relevant, to identify possible areas for improvements to work practices in own work area 3.3. Make ***suggestions*** for improvements to workplace practices in own work area

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to comply with all relevant legislation associated with job specifications and procedures
- communication and problem-solving skills to question, seek clarification and make suggestions relating to work requirements and efficiency
- communication and teamwork skills to recognise procedures; to follow instructions; to respond to change, such as current workplace environmental/sustainability frameworks; and to support team work and participation in a sustainable organisation
- literacy, numeracy and technology skills to interpret workplace information in relation to work role, and to document and measure resource use
- technology skills to select and use technology appropriate for a task.

Required knowledge

- environmental and resource hazards/risks
- environmental or sustainability legislation, regulations and codes of practice applicable to own work role
- OHS issues and requirements
- organisational structure, and reporting channels and procedures
- relevant environmental and resource efficiency systems and procedures
- sustainability in the workplace
- terms and conditions of employment including policies and procedures, such as

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
daily tasks, employee and employer rights, equal opportunity.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • accessing, interpreting and complying with a range of environment/sustainability legislation and procedural requirements relevant to daily responsibilities • accurately following organisational information to participate in and support an improved resource efficiency process and reporting as required • developing and/or using tools such as inspection checklists, to collect and measure relevant information on organisation resource consumption, within work role • identifying organisational improvements by applying efficient resource use to daily activities • knowledge of environmental and resource hazards/risks.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • evidence is relevant to the particular workplace role, including work area, equipment, systems, and documentation • review of current work area directly relating to own work, to assess measurement of resources used, hazards and compliance • individual or team discussion about potential for increased resource efficiency within current work area • access to workplace documents, information and resources (such as compliance obligations, enterprise

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	plans, work responsibilities).
Method of assessment	A range of assessment methods should be used t assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of demonstrated techniques over time and in a range of situations • analysis of responses to case studies and scenarios • review of documentation measuring current resource usage • evaluation of techniques used to document and measure current usage of resources • review of identified and reported workplace environmental hazards • evidence of active participation in organisational plans to improve environmental practices and resource efficiency.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • BSBINN201A Contribute to workplace innovation • BSBSMB301A Investigate micro business opportunities • BSBWOR202A Organise and complete daily work activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Environmental and resource	• maximising opportunities to improve business environmental performance

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
efficiency issues may include:	• minimising environmental risks • promoting more efficient production and consumption of natural resources, for example minimising waste by participating in or using a waste management system • using resources efficiently such as material usage, energy usage (seeking alternative sources of energy or energy conservation) or efficient water usage
Appropriate techniques may include:	• examining and documenting resources in work area • examining invoices from suppliers • examining relevant information and data • measuring resource usage under different conditions • reports from other parties involved in the process of identifying and implementing improvements

Compliance may include:	• meeting relevant laws, by-laws and regulations or best practice to support compliance in environmental performance and sustainability at each level as required (such as Environmental Protection or Biodiversity Conservation Act):
	  • international
	  • commonwealth
	  • state/territory
	  • local government
	  • industry
	  • organisation

Organisational plans may include:	• documented policies and procedures • work plans to minimise waste or to increase efficiency of resources such as a green office program, supply chain program for purchasing sustainable products or an environmental management framework
Suggestions may include ideas that help to:	• improve energy efficiency • increase use of renewable, recyclable, reusable and recoverable resources • maximise opportunities such as use of solar power or other alternative forms of energy, where appropriate

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• prevent and minimise risks • reduce emissions of greenhouse gases • reduce use of non-renewable resources

BSBSUS211 Participate in sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to measure, support and find opportunities to improve the sustainability of work practices.

The unit applies to individuals, working under supervision or guidance, who are required to follow workplace procedures and instructions. These individuals work in an environmentally sustainable manner within scope of competency, authority and own level of responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Measure sustainable work practices	1.1 Identify sustainable work practices in own work role 1.2 Measure current usage of resources in own work role 1.3 Record and file resource usage documents 1.4 Identify resource inefficiencies from gathered information
2. Support sustainable work practices	2.1 Identify and comply with workplace sustainability procedures 2.2 Identify workplace environmental hazards according to environmental regulations and standards 2.3 Report any breaches and potential breaches to organisational personnel
3. Seek opportunities to	3.1 Identify areas of improvement to work practices in own work

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
improve sustainable work practices	area 3.2 Consult with colleagues and management to assess potential to improve sustainability of identified work practices 3.3 Make suggestions for improvements to workplace practices in own work area

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Numeracy	• Calculates basic metric measurements to determine resource usage
Reading	• Recognises and interprets textual information to establish job requirements
Writing	• Completes documents using required formats
Teamwork	• Selects and uses appropriate conventions and protocols when communicating with co-workers in range of work contexts • Collaborates and cooperates with others to achieve joint outcomes
Initiative and enterprise	• Implements actions according to requirements, taking some responsibility for sequencing and timing of tasks • Analyses current practices to identify opportunities for improvement
Self-management	• Understands and adheres to legal and regulatory responsibilities related to own work
Technology	• Uses main features and functions of digital tools to complete work tasks and access information

Unit Mapping Information

Supersedes and is equivalent to BSBSUS201 Participate in environmentally sustainable work practices.

Assessment Requirements for BSBSUS211 Participate in sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- participate in at least three sustainable work practices.

In the course of the above, the candidate must:

- identify benefits of sustainable work practices and areas of improvement for sustainable practices in the workplace
- identify and apply sustainability legislation and organisational sustainability policies and procedures
- participate in and support discussions for improved resource efficiency processes
- identify, measure and document usage of resources
- collaborate with team members to develop suggestions for improving workplace sustainability practices.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- environmental and resource hazards and risks
- Australian and international standards for corporate social sustainability
- sustainability regulations and codes of practice applicable to own role
- organisational sustainability policies and procedures
- reporting channels and procedures to report breaches and potential issues
- advantages of sustainable practices in the workplace.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

© Commonwealth of Australia, 2025 Public Skills Australia

This includes access to:

- documentation, information and resources on workplace environmental and resource efficiency
- sustainability legislation, regulations and standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSUS401 Implement and monitor environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0. Version created to better align unit to AQF level.

Application

This unit describes the skills and knowledge required to effectively analyse the workplace in relation to environmentally sustainable work practices and to implement improvements and monitor their effectiveness.

It applies to individuals with responsibility for a specific area of work or who lead a work group or team and addresses the knowledge, processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Investigate current practices in relation to resource usage	1.1 Identify environmental regulations applying to the enterprise 1.2 Analyse procedures for assessing compliance with

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	environmental/sustainability regulations 1.3 Collect information on environmental and resource efficiency systems and procedures, and provide to the work group where appropriate 1.4 Collect, analyse and organise information from a range of sources to provide information/advice and tools/resources for improvement opportunities 1.5 Measure and document current resource usage of members of the work group 1.6 Analyse and document current purchasing strategies 1.7 Analyse current work processes to access information and data to assist in identifying areas for improvement
2. Set targets for improvements	2.1 Seek input from stakeholders, key personnel and specialists 2.2 Access external sources of information and data as required 2.3 Evaluate alternative solutions to workplace environmental issues 2.4 Set efficiency targets
3. Implement performance improvement strategies	3.1 Source and use appropriate techniques and tools to assist in achieving efficiency targets 3.2 Apply continuous improvement strategies to own work area of responsibility, including ideas and possible solutions to communicate to the work group and management 3.3 Implement and integrate environmental and resource efficiency improvement plans for own work group with other operational activities 3.4 Supervise and support team members to identify possible areas for improved practices and resource efficiency in work area 3.5 Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon where appropriate 3.6 Implement costing strategies to fully utilise environmental assets
4. Monitor performance	4.1 Use and/or develop evaluation and monitoring, tools and technology 4.2 Document and communicate outcomes to report on efficiency targets to key personnel and stakeholders 4.3 Evaluate strategies and improvement plans 4.4 Set new efficiency targets, and investigate and apply new tools

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and strategies 4.5 Promote successful strategies and reward participants where possible

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 1.6, 1.7, 2.3, 3.1	• Identifies and analyses complex texts to determine legislative, regulatory and business requirements • Reviews reported information to evaluate workplace strategies and improvement practices
Writing	1.5, 1.6, 2.1, 2.2, 2.4, 3.1-3.3, 4.4, 4.5	• Documents findings of investigations from written and oral sources according to organisational requirements • Provides updates about progress using formats and language appropriate to the audience and context
Oral Communication	2.1, 2.2, 3.3-3.5, 4.4, 4.5	• Presents information and seeks advice using structure and language appropriate to audience • Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Numeracy	1.5, 2.4, 3.1, 3.6, 4.4	• Analyses numerical information to measure usage and calculates metric measurements, quantities/ratios and financial data using appropriate tools
Navigate the world of work	1.1, 1.2	• Recognises and follows legislative requirements and organisational policies and procedures associated with own role
Interact with others	1.3, 2.1, 2.2, 3.3-3.5, 4.2, 4.4, 4.5	• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information • Collaborates and consults with a range of stakeholders to achieve shared understanding of individual roles in meeting objectives
Get the work done	1.2, 1.4-1.7, 2.3, 2.4, 3.1, 3.2, 3.3, 3.5, 3.6, 4.1, 4.3, 4.4	• Develops plans to manage routine and non-routine tasks for own work group with an awareness of how they contribute to the broader organisation • Uses systematic, analytical processes to set

© Commonwealth of Australia, 2025 Public Skills Australia

		environmental targets, gather relevant information, identify and evaluate alternative approaches • Evaluates outcomes of decisions to identify opportunities for improvement • Uses the main features and functions of digital tools to complete work tasks and access information

Assessment Requirements for BSBSUS401 Implement and monitor environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0. Version created to better align unit to AQF level.

Performance Evidence

Evidence of the ability to:

- analyse information from a range of sources to identify current procedures, practices and compliance requirements in relation to environmental and resource sustainability
- consult and communicate with relevant stakeholders to seek input and encourage engagement with developing and implementing sustainability improvements, encourage feedback and suggestions and report on outcomes
- plan and organise work group activities to:
  - measure current resource usage
  - solve problems and generate ideas for improvements
  - evaluate and implement strategies to improve resource usage
  - plan, implement and integrate improvements into operations
  - meet environmental requirements
- apply continuous improvement approach to sustainability performance
- apply change management techniques to support sustainability performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify relevant internal and external sources of information and explain how they can be used to identify sustainability improvements

© Commonwealth of Australia, 2025 Public Skills Australia

- explain the compliance requirements for the work area with reference to legislation, regulations, codes of practice and workplace procedures that relate to environmental and resource issues
- outline common environmental and energy efficiency issues within the industry
- give examples of benchmarks for environmental and resource sustainability that are relevant to the organisation
- outline organisational systems and procedures that relate to environmental and resource sustainability improvements including:
  - supply chain, procurement and purchasing
  - quality assurance
  - making recommendations and seeking approvals

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSUS411 Implement and monitor environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to analyse and implement improvements to the environmental sustainability of work practices and monitor their effectiveness.

The unit applies to individuals with responsibility for the practices of a specific work area or who lead a work group or team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish sustainable work contexts	1.1 Identify and assess organisational compliance against environmental legislation, regulations and standards 1.2 Collect data on environmental efficiency in organisational systems and processes 1.3 Analyse data on environmental efficiency and current purchasing strategies and identify areas for improvement 1.4 Consult stakeholders and external data sources on sustainability best practice 1.5 Develop efficiency targets and methods to monitor outcomes
2. Implement sustainable	2.1 Identify and source tools to set efficiency targets

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
work practices	2.2 Implement and integrate efficiency targets with other operational activities 2.3 Support team members to identify possible areas for improved resource efficiency in work areas 2.4 Seek and act on feedback from stakeholders on implementation
3. Monitor performance of sustainable work practices	3.1 Assess outcomes using monitoring method developed 3.2 Document and communicate outcomes to key personnel and stakeholders 3.3 Identify changes required to targets and tools from strategies and improvement plans 3.4 Promote successful strategies in development of new efficiency targets

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Numeracy	• Analyses numerical information to measure usage and calculates metric measurements, quantities and ratios and financial data using appropriate tools
Oral communication	• Presents information and seeks advice using structure and language appropriate to audience • Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Reading	• Identifies and analyses texts to determine legislative and regulatory requirements relevant to work area • Reviews reported information to evaluate workplace strategies and improvement practices
Writing	• Documents findings of investigations from written and oral sources according to organisational requirements • Provides updates about progress using formats and language appropriate to the audience and context
Initiative and Enterprise	• Identifies and follows legislative requirements and organisational policies and procedures associated with own role
Teamwork	• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information

© Commonwealth of Australia, 2025 Public Skills Australia

Skill	Description
	• Collaborates and consults with a range of stakeholders to achieve shared understanding of individual roles in meeting objectives
Planning and organising	• Develops plans to manage routine and non-routine tasks for own work group with an awareness of how they contribute to the broader organisation • Uses systematic, analytical processes to set environmental targets, gather relevant information, identify and evaluate alternative approaches • Evaluates outcomes of decisions to identify opportunities for improvement
Technology	• Uses the main features and functions of digital tools to complete work tasks and access information

Unit Mapping Information

Supersedes and is equivalent to BSBSUS401 Implement and monitor environmentally sustainable work practices.

Supersedes but is not equivalent to:

- BSBSUS402 Implement an environmental management plan
- BSBSUS403 Measure, monitor and reduce carbon emissions
- BSBSUS404 Assess, implement, monitor and report on waste management
- BSBSUS405 Assess, monitor and reduce water use
- BSBSUS406 Identify and apply sustainability rating tools.

Assessment Requirements for BSBSUS411 Implement and monitor environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement and monitor at least three environmentally sustainable work practices.

In the course of the above, the candidate must:

- identify current procedures, practices and compliance requirements in relation to environmental and resource sustainability in the workplace
- engage and consult with relevant stakeholders to develop and implement sustainability improvements, encourage feedback and to report on outcomes
- plan and organise work group activities to:
  - measure current resource usage
  - evaluate alternative solutions to workplace environmental issues
  - resolve workplace sustainability issues and generate ideas for improvements
  - evaluate and implement strategies to improve resource usage
  - comply with environmental requirements
- apply continuous improvement approaches to enhance organisation's sustainability performance
- apply change management techniques to support sustainability performance.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- compliance requirements for the work area with reference to legislation, regulations, codes of practice and workplace procedures that relate to environmental and sustainability issues
- relevant internal and external sources of information for the development of efficiency targets
- benchmarks for environmental and resource sustainability relevant to organisation

© Commonwealth of Australia, 2025 Public Skills Australia

- Australian and international standards for corporate social sustainability
- continuous improvement approaches for workplace practices
- resources for monitoring sustainable work practices including:
  - questionnaires and surveys
  - visual calculations
  - supply records and invoices
  - previous internal and external audit documents
- organisational systems and procedures that relate to environmental and resource sustainability improvements, including:
  - supply chain, procurement and costing strategies
  - quality assurance
  - recommendation development and seeking approvals
  - sales strategies and operations.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- environmental sustainability legislation, regulations, standards and codes
- workplace reference materials for environmental sustainability and practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC101 Operate digital devices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to start up and use a range of basic functions on digital devices.

The unit applies to those who perform a range of routine digital tasks in the various sectors of the business services industry and generally work under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Activate digital device and access features	1.1 Prepare workspace, furniture and equipment to suit user ergonomic requirements, where required 1.2 Activate digital device, and access or log on according to organisation policies and procedures 1.3 Identify basic functions and features of digital devices 1.4 Customise desktop or application configuration 1.5 Request assistance from relevant personnel for using digital device, where required 1.6 Access help functions, where required
2. Navigate and organise file or application	2.1 Open, close and access file or application by selecting correct desktop or menu icons

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
environment	2.2 Create shortcuts onto the desktop or menu, and request assistance from relevant personnel, where required 2.3 Identify and apply keyboard functions for both alpha and numeric keyboard input devices 2.4 Create folders and subfolders with relevant names 2.5 Identify and access storage devices relevant to the digital device 2.6 Download new applications with assistance from relevant stakeholder 2.7 Use search functions to locate files or applications
3. Edit and update stored information	3.1 Rename and move folders and subfolders 3.2 Remove files or applications as required, with assistance from relevant stakeholder 3.3 Open relevant file, document, or application 3.4 Edit content of the file, document, application, or similar in accordance with simple instructions 3.5 Save changes in digital device
4. Deactivate personal digital device	4.1 Save and close all open files, documents or applications 4.2 Deactivate digital device according to user procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	• Recognises textual information within internal procedures and technical documents to determine and complete work requirements
Writing	• Inputs information using familiar text types and records numerical and textual information for file naming conventions

Unit Mapping Information

Supersedes and is equivalent to BSBITU111 Operate a personal digital device.

Supersedes but is not equivalent to:

- BSBITU112 Develop keyboard skills
- BSBITU307 Develop keyboarding speed and accuracy.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Requirements for BSBTEC101 Operate digital devices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- on at least three occasions, activate, navigate, and deactivate a digital device.

In the course of the above, the candidate must:

- follow user procedures to power up and access a digital device
- follow user procedures and system information when using the basic functions on digital device, seeking assistance where required
- shut down applications and the device.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- user procedures for powering up and accessing a digital device
- key components of the digital system, including what each component does
- ergonomic issues that impact the use of digital devices
- key functions of the operating system
- organisational conventions for naming files.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- device user information
- different types of digital device.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC401 Design and produce complex text documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to design and develop business documents using complex technical features of word processing software.

The unit applies to those who work in a range of business environments and have skills which may be applied in the provision of administrative support within an enterprise, or by technical experts responsible for producing their own word- processed documents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to produce word processed documents	1.1 Identify ergonomics requirements and organise personal work environment 1.2 Use safe work practices to ensure ergonomic, energy and resource conservation requirements are met 1.3 Identify document purpose, audience and presentation requirements, and clarify with relevant stakeholders, where required 1.4 Identify organisational requirements for text-based business documents to ensure consistency of style and image 1.5 Evaluate complex technical functions of software for usefulness in fulfilling requirements of the task

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Design complex documents	2.1 Design document structure and layout according to purpose, audience and information requirements of task 2.2 Design document to enhance readability and appearance, and to meet organisational and task requirements for style and layout 2.3 Use complex software functions to enable efficient manipulation of information and other material, and ensure consistency of design and layout 2.4 Use help function to overcome problems with document design and production
3. Add complex tables and other data	3.1 Insert a table into document, change cells according to information requirements 3.2 Format rows and columns, where required 3.3 Insert images and other data and format, where required
4. Produce documents	4.1 Develop documents, and achieve required results 4.2 Preview, adjust and publish documents according to organisational and task requirements 4.3 Name and store documents in accordance with organisational requirements and exit application 4.4 Prepare document according to organisational requirements, policies and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	• Recognises and interprets textual information from a range of resources to determine and confirm requirements and to assist with document issues
Writing	• Develops material using required format and incorporating technical functions to meet business needs
Self-management	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Teamwork	• Collaborates with others to achieve joint outcomes
Planning and organising	• Applies formal processes when planning complex tasks, producing plans with logically sequenced steps

© Commonwealth of Australia, 2025 Public Skills Australia

Unit Mapping Information

Supersedes and is equivalent to BSBITU401 Design and develop complex text documents.

Supersedes but is not equivalent to BSBITU404 Produce complex desktop published documents.

Assessment Requirements for BSBTEC401 Design and produce complex text documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare design and produce at least four complex text documents.

In the course of the above, the candidate must:

- follow organisational and safe work practices
- adhere to organisational requirements for:
  - producing documents within designated timelines
  - naming and storing documents
- adhere to task requirements when producing complex documents including:
  - using appropriate styles and layout consistently throughout the document
  - using correct formatting and document structure
- use the following features:
  - mail merge
  - document styles
  - references (footnotes/endnotes)
  - Table of Contents
  - paragraph
  - line spacing
  - section breaks
  - alternating headers
  - footers
- resolve issues by referring to user documentation and online help
- apply knowledge of complex operation and functions of industry software applications.

© Commonwealth of Australia, 2025 Public Skills Australia

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- formatting styles and their effect on formatting, readability and appearance of documents
- organisational requirements for ergonomics, work periods and breaks, and conservation techniques
- purpose and contents of an organisational style guide
- key aspects of organisational policies and procedures.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

- This includes access to:
- organisational policies and procedures
- workplace documentation and resources relevant to performance evidence
- industry software packages and user instructions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBTWK201 Work effectively with others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to work cooperatively with others and deal effectively with issues, problems and conflict.

The unit applies to individuals who perform a range of routine tasks in a team environment and use a basic knowledge of teamwork in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Social Competence – Teamwork and Relationships

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop effective workplace relationships	1.1 Identify individual responsibilities in relation to workgroup members 1.2 Clarify individual and workgroup responsibilities with work team 1.3 Participate in informal meetings and information sharing with workgroup 1.4 Request and apply feedback from supervisor on individual practices
2. Improve workgroup processes	2.1 Support team members to meet workgroup goals 2.2 Contribute to workgroup goals and tasks according to organisational requirements

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3 Share work-related information with workgroup according to organisational policies and procedures 2.4 Plan strategies for team performance improvement with workgroup
3. Resolve issues, problems and conflict	3.1 Identify advantages of differences in values and beliefs between workgroup members 3.2 Respond to any linguistic and cultural differences in communication styles according to legislation, organisational policies and procedures and ethical standards 3.3 Identify potential workgroup issues, problems and conflicts encountered in the workplace 3.4 Seek assistance from supervisor to address problems and conflicts that arise 3.5 Suggest possible ways of dealing with identified workplace issues

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	• Identifies and interprets information to determine task requirements
Writing	• Completes required documentation using organisational formats • Composes simple documents for others to read
Oral Communication	• Presents information and seeks advice using language and features appropriate to audience • Participates in discussions using listening and questioning to elicit views of others and to clarify or confirm understanding
Initiative and enterprise	• Identifies responsibilities of own role and follows explicit and implicit organisational protocols and procedures
Teamwork	• Selects and uses appropriate communication practices when seeking or sharing information • Establishes and builds rapport and relationships with others to foster a culture of respect and cooperation in communications • Listens to the ideas of others and considers their needs
Planning and organising	• Plans and organises work commitments to ensure deadlines and objectives are met

Assessment Requirements for BSBTWK201 Work effectively with others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- work with a group to achieve an objective on at least two occasions and address at least one identified problem or conflict on each occasion.

In the course of the above, the candidate must:

- distinguish individual responsibilities from workgroup responsibilities
- demonstrate the ability to:
  - support team members
  - communicate according to the cultural and linguistic requirements of the individual
  - act on constructive feedback
  - use communication channels to share information
  - cooperate and contribute to team goals
  - identify improvement opportunities
- identify problems and conflicts and address them according to organisational and ethical policies and procedures.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational and ethical standards, policies and procedures that relate to own work role
- team responsibilities and duties and their relationship to individual responsibilities and duties
- organisational policies and procedures relating to workplace discrimination and bullying
- personal values and beliefs including their importance in the development of relationships
- communication channels used to communicate in work teams including:
  - team meetings

© Commonwealth of Australia, 2025 Public Skills Australia

  - one-on-one interactions with individual team members
  - emails
  - instant messaging
  - calls
- key problems and conflicts arising in workgroup contexts
- methods of resolving team problems including referral to relevant organisational personnel
- conflict resolution techniques.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace discrimination and bullying legislation
- organisational and ethical standards, policies and procedures for working with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBTWK502 Manage team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to lead teams in the workplace and to actively engage with the management of the organisation.

The unit applies to individuals working at a managerial level who lead and build a positive culture within their work teams. At this level, work will normally be carried out using complex and diverse methods and procedures requiring the exercise of considerable discretion and judgement. It will also involve using a range of problem solving and decision-making strategies.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Social Competence – Teamwork and Relationships

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Establish team performance plan	1.1 Identify team purpose, roles, and responsibilities according to organisational and task objectives 1.2 Develop performance plans with expected outcomes, key performance indicators (KPIs) and goals for work team 1.3 Support team members in meeting expected performance outcomes
2. Develop and facilitate team cohesion	2.1 Develop strategies for facilitating team member input into planning, decision making and operational aspects of team tasks 2.2 Develop or modify policies and procedures for promoting team

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	member accountability for personal work and team tasks 2.3 Provide feedback to team members on team effort and contributions 2.4 Develop processes for identifying and addressing issues, concerns and problems identified by team members
3. Facilitate teamwork	3.1 Encourage team members to participate in and to take responsibility for team activities 3.2 Support the team in identifying and resolving work performance problems 3.3 Promote work team collaboration through individual behaviour
4. Liaise with stakeholders	4.1 Establish and maintain open communication processes with relevant stakeholders 4.2 Communicate information from line management to the team 4.3 Communicate and follow-up unresolved issues, concerns and problems raised by team members with line management 4.4 Address unresolved issues, concerns and problems raised by stakeholders

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	• Analyses and interprets textual information from the organisation's policies, goals and objectives to establish team goals or to determine corrective action
Writing	• Prepares workplace documentation that communicates complex information clearly and effectively
Oral Communication	• Engages in discussions or provides information using appropriate vocabulary and non-verbal features • Uses listening and questioning techniques to confirm understanding and to engage the audience
Enterprise and initiative	• Identifies how own role contributes to broader organisational goals • Modifies or develops policies and procedures to achieve organisational goals
Teamwork	• Selects and uses appropriate conventions and protocols when communicating with diverse stakeholders • Uses interpersonal skills to gain trust and confidence of team and

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage the effectiveness of at least one work team.

In the course of the above, the candidate must:

- provide feedback to encourage, value and reward others
- model desired behaviour and practices
- encourage and foster shared understanding of purpose, roles and responsibilities
- support team to meet expected performance outcomes including providing formal and informal learning opportunities as needed
- develop performance plans with key performance indicators (KPIs), outputs and goals for individuals or the team which incorporate input from stakeholders
- communicate effectively with a range of stakeholders about team performance plans and team performance
- evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- impacts of group dynamics on team performance
- methods of establishing team activities including communication processes
- strategies that can support team cohesion, participation and performance
- strategies for gaining consensus
- issue resolution strategies.

BSBWHS201 Contribute to health and safety of self and others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to work in a manner that is healthy and safe in relation to self and others and to respond to emergency incidents. It covers following work health and safety (WHS) and emergency procedures and instructions, implementing WHS requirements and participating in WHS consultative processes.

It applies to individuals who require a basic knowledge of WHS to carry out work in a defined context under direct supervision or with some individual responsibility, in a range of industry and workplace contexts.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS *Act* has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Work safely	1.1 Follow provided safety procedures and instructions when

Assessment Requirements for BSBWHS201 Contribute to health and safety of self and others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- follow all relevant procedures and instructions relating to work health and safety (WHS) and emergency incidents
- identify and report hazards to designated personnel
- contribute to WHS consultative processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain workplace safety procedures and instructions including:
  - checking systems and equipment
  - conducting routine work operations
  - requirements for personal protective equipment (PPE)
  - how to report incidents and injuries
- explain emergency procedures including those for fires and incidents
- define the meaning of commonly used hazard signs and safety symbols
- summarise the duty holder responsibilities, as specified in WHS Acts, regulations and codes of practice, of:
  - self and fellow workers
  - persons conducting businesses or undertakings (PCBUs)
  - officers
  - others in the workplace
- explain the difference between hazards and risks

© Commonwealth of Australia, 2025 Public Skills Australia

- describe typical WHS hazards that may be present in the workplace, the harm they can cause and how this harm occurs
- outline the process of hazard identification and risk reduction.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- relevant organisational policies, standard operating procedures and work instructions
- relevant Acts, regulations, codes of practice
- workplace tools, equipment and resources
- personal protective equipment appropriate to the role and work area.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS211 Contribute to the health and safety of self and others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to work in a manner that is healthy and safe in relation to self and others, and to assist in responding to incidents. It covers following work health and safety (WHS) policies, procedures, instructions and requirements; and participating in WHS consultative processes.

The unit applies to those who require a basic knowledge of WHS to carry out own work in a defined context, under direct supervision or with some individual responsibility, in a range of industry and workplace contexts.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBWHS211 Contribute to the health and safety of self and others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- actively participate in two different work activities that contribute to the health and safety of self and others
- identify and report at least one hazard to designated personnel.

During the above, the candidate must follow required procedures and instructions relating to work health and safety (WHS) and incidents.

Knowledge Evidence

The candidate must demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- organisational safety policies, procedures, instructions and requirements relating to own work role in relation to:
  - checking systems and equipment
  - conducting routine work operations
  - personal protective equipment (PPE)
  - recording existing and potential WHS issues
  - responding to and reporting incidents and injuries
  - responding to fires and incidents
- meaning of commonly used hazard signs and safety symbols
- duty holder responsibilities, as specified in WHS laws, including:
  - self and co-workers
  - persons conducting a business or undertaking (PCBUs)
  - officers
  - others in the workplace

© Commonwealth of Australia, 2025 Public Skills Australia

- distinction between hazards and risks
- WHS hazards that may be present in the workplace, including the harm they can cause and how this harm occurs
- process of hazard identification and risk control.

Assessment Conditions

Assessment must comply with WHS laws, and WHS legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- organisational policies, standard operating procedures, and work instructions covered in the knowledge evidence
- WHS laws relevant to performance evidence requirements
- opportunities for interaction with others
- workplace equipment and resources required for the performance evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS301 Maintain workplace safety

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement and monitor the organisation’s work health and safety (WHS) policies, procedures and programs as part of a small work team.

The unit applies to individuals who have a key role in maintaining workplace safety in an organisation. In their role they closely monitor aspects of work associated with the safe delivery of products and services, and they have a responsibility for influencing safety in the workplace.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assist with	1.1 Use WHS legislation as the basis for meeting the health and

Assessment Requirements for BSBWHS301 Maintain workplace safety

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- implement and monitor the organisation's work health and safety (WHS) policies and procedures
- identify hazards and assess and control risks
- assist in explaining and improving WHS policies, procedures and legislative requirements applicable to the organisation
- assist in explaining hazards identification and risk assessment outcomes to other team members
- implement and monitor consultation about WHS according to legislative and organisational requirements
- deal promptly with issues raised as a result of WHS consultation
- encourage work team to contribute to identifying and implementing improvements to WHS feedback
- assist others to develop WHS competence and provide advice on training needs
- complete WHS documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe characteristics and composition of the work team
- describe procedures for identifying hazards and assessing and controlling associated risks to health and safety, including the hierarchy of control
- outline organisational WHS policies and procedures including those relating to risk management, fire, emergencies, evacuation, incident investigation and reporting

© Commonwealth of Australia, 2025 Public Skills Australia

- describe relevant Acts, regulations and codes of practice from all levels of government that impact on business operations, especially with regard to WHS and environmental issues, equal opportunity, industrial relations and anti-discrimination
- identify WHS aspects of other organisational systems and procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- safety processes relevant to the area of work
- organisational policies and procedures, standard operating procedures and plans
- WHS Acts, regulations, codes of practice, licensing requirements and standards
- appropriate office equipment and resources used in the identification and rectification of WHS compliance breaches.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS303 Participate in WHS hazard identification, risk assessment and risk control

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to maintain a healthy and safe workplace through participation in the process of identifying work health and safety (WHS) hazards and assessing and controlling WHS risks, and the promotion and support of worker consultation.

It applies to individuals who assist with the identification of workplace hazards and the assessment and control of WHS risks as part of their WHS responsibilities, which are in addition to their main duties.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBWHS303 Participate in WHS hazard identification, risk assessment and risk control

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- participate in selection and use of required methods to identify, report and record hazards
- assess and record risks for identified hazards
- promote and support worker consultation and participation in hazard identification and risk assessment
- participate in developing, selecting and implementing risk control options and plans.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the relevant Commonwealth and state or territory Acts, regulations, codes of practice standards, guidance material and other relevant publications
- summarise work health and safety (WHS) legislative requirements about:
  - communication, consultation and participation
  - notification of incidents
  - recordkeeping
  - specific hazard identification and risk assessment and control methods
- list the basic principles of incident causation and injury processes
- explain the concept of hazards, risks and risk factors
- describe hazard identification and risk assessment methods
- identify internal and external sources of WHS information and data, and how to access them
- summarise organisational WHS policies, procedures, processes and systems

© Commonwealth of Australia, 2025 Public Skills Australia

- describe the range of WHS hazards that may be present in the workplace, the harm they can cause and how this harm occurs
- describe risk control options for different hazards and work situations
- identify types of hazard and risk registers
- describe the workplace communication processes for sharing information about hazard identification, and risk assessment and control.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- organisational policies, standard operating procedures and plans
- Acts, regulations, codes of practice, licensing requirements and standards
- relevant data files
- appropriate resources to manage the identification and rectification of breaches in compliance requirements.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS304 Participate effectively in WHS communication and consultation processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to participate in work health and safety (WHS) communication and consultation processes.

It applies to individuals who participate in WHS communication and consultation processes as part of their work health and safety responsibilities, which are in addition to their main duties.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Contribute to	1.1 Apply knowledge of WHS Acts, regulations, codes of practice,

Assessment Requirements for BSBWHS304 Participate effectively in WHS communication and consultation processes

Modification History

Release	Comments
Revision 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- participate in work health and safety (WHS) communication and consultation processes, including communicating WHS information to others
- raise WHS issues in meetings and follow up on outcomes
- take appropriate actions to remove barriers to communication and consultation processes
- support others to raise relevant WHS issues.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the purpose of organisational WHS policies, procedures, processes and systems
- outline the key requirements of relevant commonwealth and state/territory WHS Acts, regulations, codes of practice, standards and guidance material, and other relevant publications
- describe potential barriers to WHS consultation processes and how the barriers may be overcome
- explain the roles and responsibilities of WHS personnel
- describe how the consultation process influences and is related to workplace information management procedures, processes and systems
- describe methods to engage others with workplace procedures, and information sourcing and sharing.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- organisational policies, standard operating procedures, procedures and plans with information on compliance requirements
- relevant Acts, regulations, codes of practice, licensing requirements, standards
- relevant WHS data files
- appropriate office equipment and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS305 Contribute to WHS issue resolution

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to contribute to work health and safety (WHS) issue-resolution processes, and to communicate their outcomes.

It applies to individuals who contribute to the resolution of WHS issues in the workplace as part of their WHS responsibilities which are in addition to their main duties.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to contribute to the resolution of WHS issues	1.1 Identify relevant parts of WHS Acts, regulations, codes of practice and workplace policies and procedures that apply to the WHS issue-resolution process 1.2 Identify possible participants in the WHS issue-resolution

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	process and their legal rights, duties and responsibilities 1.3 Identify, clarify and record WHS issues and communicate and discuss these issues with other participants as appropriate 1.4 Provide support and advice to workers about issue-resolution tools, techniques and strategies that can be used to resolve WHS issues 1.5 Make other preparations as necessary
2. Progress the resolution of WHS issues	2.1 Participate in the issue-resolution process 2.2 Provide support and advice to participants as appropriate according to workplace procedures and processes 2.3 Contact external participants to help progress issue-resolution processes when appropriate
3. Effectively communicate outcomes of WHS issue-resolution process	3.1 Select the best means to communicate the results of the issue-resolution process to participants 3.2 Disseminate results of the issue-resolution process to all participants 3.3 Contribute to keeping records of WHS issue-resolution processes and outcomes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 3.3	• Interprets texts relating to WHS legislation, workplace policy and procedures • Interprets documentation relating to specific issues
Writing	1.3, 1.4, 2.2, 2.3, 3.2, 3.3	• Uses formats and language appropriate to audience and context in plans, summaries, reports and advice
Oral communication	1.3, 1.4, 2.1-2.3, 3.2, 3.3	• Presents information, provides assistance, or engages in discussions using vocabulary and features appropriate to the audience • Uses listening and questioning to clarify and confirm understanding

© Commonwealth of Australia, 2025 Public Skills Australia

Navigate the world of work	1.1, 1.2	• Takes responsibility for adherence to legal and regulatory responsibilities and organisational policies and procedures in relation to WHS role • Keeps up to date on changes to WHS legislation or regulations and organisational policies and procedures
Interact with others	1.4, 2.1-2.3, 3.2	• Understands what to communicate and to whom in a issue-resolution process • Cooperates with others as part of WHS issues-resolution activities and contributes to specific activities requiring joint responsibility and accountability • Plays an active role in group discussions, paying attention to perspectives of others when trying to reach agreement • When unable to resolve an issue, seeks advice and assistance in accordance with workplace protocols
Get the work done	1.3-1.5, 3.1, 3.3	• Plans and implements tasks to achieve required outcomes • Uses digital systems and programs to assist with planning, implementing and tracking progress • Uses formal decision-making processes, setting or clarifying goals, gathering information and identifying and evaluating choices against a set of criteria in selecting means of communication

Assessment Requirements for BSBWHS305 Contribute to WHS issue resolution

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare to contribute to work health and safety (WHS) issue resolution including:
  - identifying relevant Acts, regulations, codes of practice and workplace policies and procedures
  - identifying possible participants and their roles and responsibilities
  - recording WHS issues
  - communicating WHS issues with participants
  - providing advice and support to others about issue resolution tools, techniques and strategies
  - identifying and responding to other preparations that might be needed
- progress the WHS issue resolution process by:
  - communicating effectively to make a contribution
  - supporting and advising others to contribute according to workplace procedures and processes
  - contacting external participants when appropriate to help resolve of issues
- disseminate the results of the WHS issue resolution using appropriate methods and formats
- contribute to keeping records of WHS issue resolution and outcomes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify sources of WHS information and data, and how to access them

© Commonwealth of Australia, 2025 Public Skills Australia

- explain the legislative requirements for WHS issue resolution, information provision, data collection, consultation and reporting
- identify organisational policies and procedures for WHS agreements and issue resolution
- list and describe roles and responsibilities of individuals and parties under WHS legislation
- describe types of issue resolution tools, techniques and strategies.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- organisational policies, standard operating procedures, procedures and plans
- relevant Acts, regulations, codes of practice, licensing requirements and standards
- office equipment and resources
- interaction with others
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS311 Assist with maintaining workplace safety

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to assist with implementing and monitoring an organisation's work health and safety (WHS) policies, procedures and programs as part of a small work team.

The unit applies to individuals who have roles in assisting with maintaining workplace safety in an organisation. Individuals closely monitor aspects of work associated with the safe delivery of products and services, and they contribute to influencing safety in the workplace.

NOTES

1. The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the	*Performance criteria describe the performance needed to*

ELEMENT	**PERFORMANCE CRITERIA**
essential outcomes.	*demonstrate achievement of the element.*
1. Assist with incorporating WHS policies and procedures into work team processes	1.1 Identify health and safety requirements of work team according to applicable WHS laws 1.2 Assist with explaining organisational WHS policies, procedures, programs and legislative requirements to required personnel 1.3 Assist with explaining hazard identification and risk assessment outcomes to required personnel
2. Contribute to consultative arrangements for managing WHS	2.1 Assist with implementing consultative processes designed to engage work team in managing WHS 2.2 Respond to WHS issues in a timely manner and according to organisational policies and procedures for issue resolution 2.3 Encourage others to participate in arrangements for managing WHS 2.4 Assist in engaging with required personnel to identify and implement improvements in response to WHS feedback
3. Contribute to organisational procedures for providing WHS training	3.1 Identify WHS training needs of the work team and report to relevant stakeholders 3.2 Identify strategies and opportunities for developing work team's WHS competence and report to relevant stakeholders 3.3 Provide assistance to work team members to support the effective development of their WHS competence
4. Participate in identifying hazards, and assessing and controlling risks for the work area	4.1 Identify hazards in the work area and report to relevant stakeholders according to organisational policies and procedures, and WHS legislative requirements 4.2 Assist with implementing processes designed to control risks using the hierarchy of control measures according to organisational procedures and WHS legislative requirements 4.3 Identify and document inadequacies in existing risk control measures according to organisational policies and procedures, the hierarchy of control measures and WHS legislative requirements 4.4 Report inadequacies in existing risk control measures to relevant stakeholders 4.5 Complete and maintain WHS incident records in the work area according to organisational procedures and WHS legislative requirements

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Description
Reading	• Interprets WHS legislative and organisational documentation • Applies appropriate strategies to construct meaning from WHS legislative and organisational documentation
Writing	• Documents WHS information using required format and industry specific vocabulary
Oral communication	• Presents information using language and non-verbal communication appropriate to audience and context • Uses questioning and active listening to confirm understanding
Navigate the world of work	• Follows WHS policies, procedures and legislative requirements relevant to own role • Keeps up to date with changes to WHS laws relevant to own role
Interact with others	• Selects appropriate communication protocols and conventions to provide information to others • Collaborates with others to achieve joint outcomes • Plays an active role in facilitating effective group interaction, influencing direction and taking a leadership role on occasion • Provides feedback to others in forms with which they can engage and respond
Get the work done	• Sequences and schedules activities, monitors implementation and manages relevant communication • Initiates standard procedures when responding to issues raised through consultation • Uses feedback to participate in the identification and implementation of opportunities to improve arrangements for managing WHS issues

Unit Mapping Information

Supersedes and is equivalent to BSBWHS301 Maintain workplace safety.

Assessment Requirements for BSBWHS311 Assist with maintaining workplace safety

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- assist with implementing and monitoring at least three different organisational work health and safety (WHS) policies or procedures into a work team's processes.

During the above, the candidate must:

- assist with implementing and monitoring consultation about each policy or procedure according to legislative and organisational requirements
- identify opportunities to encourage work team to contribute to implementing improvements to each policy or procedure based on feedback received through consultation
- complete WHS documentation.

Knowledge Evidence

The candidate must demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- characteristics and composition of the work team
- procedures related to the following:
  - identifying hazards
  - assessing and controlling risks to health and safety, including the hierarchy of control measures
- organisational WHS policies and procedures, including those relating to:
  - risk management
  - fire
  - emergencies
  - evacuation
  - incident investigation

© Commonwealth of Australia, 2025 Public Skills Australia

    - reporting
- relevant legislation, regulations and codes of practice from all levels of government that impact on business operations, including those relating to:
    - WHS and environmental issues
    - equal opportunity
    - industrial relations
    - anti-discrimination
- WHS aspects of other organisational systems and procedures.

Assessment Conditions

Assessment must comply with WHS laws, and WHS legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and include access to:

- safety processes relevant to the area of work
- organisational policies and procedures, standard operating procedures and plans
- standards, WHS laws and licensing requirements
- opportunities for interaction with others
- workplace equipment and resources required for the performance evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package release 1.0

Application

This unit describes the skills and knowledge required to implement and monitor an organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area in order to meet legislative requirements.

It applies to individuals with supervisory responsibilities for implementing and monitoring the organisation's WHS policies, procedures and programs in a work area. These individuals have a broad knowledge of WHS policies and contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They provide supervision and guidance to others and have limited responsibility for the output of others.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

essential outcomes.	*demonstrate achievement of the element.*
1. Provide information to the work team about WHS policies and procedures	1.1 Accurately explain to the work team relevant provisions of WHS Acts, regulations and codes of practice 1.2 Provide information about the organisation's WHS policies, procedures and programs, and ensure it is readily accessible to, and understandable by the work team 1.3 Regularly provide and clearly explain to the work team information about identified hazards and the outcomes of risk assessment and control
2. Implement and monitor participation arrangements for managing WHS	2.1 Communicate to workplace parties the importance of effective consultation mechanisms in managing health and safety risks in the workplace 2.2 Apply consultation procedures to facilitate participation of the work team in managing work area hazards 2.3 Promptly deal with issues raised through consultation, according to organisational consultation procedures and WHS legislative and regulatory requirements 2.4 Promptly record and communicate to the work team the outcomes of consultation over WHS issues
3. Implement and monitor organisational procedures for providing WHS training	3.1 Identify WHS training needs according to organisational requirements and WHS legislative and regulatory requirements 3.2 Make arrangements to meet WHS training needs of team members in consultation with relevant individuals 3.3 Provide workplace learning opportunities and coaching and mentoring assistance to facilitate team and individual achievement of identified WHS training needs 3.4 Identify and report to management the costs associated with providing training for work team, for inclusion in financial and management plans
4. Implement and monitor organisational procedures and legal requirements for identifying hazards and assessing and controlling risks	4.1 Identify and report on hazards in work area according to WHS policies and procedures and WHS legislative and regulatory requirements 4.2 Promptly action team member hazard reports according to organisational procedures and WHS legislative and regulatory requirements 4.3 Implement procedures to control risks using the hierarchy of control, according to organisational and WHS legislative requirements

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.4 Identify and report inadequacies in existing risk controls according to hierarchy of control and WHS legislative requirements 4.5 Monitor outcomes of reports on inadequacies, where appropriate, to ensure a prompt organisational response
5. Implement and monitor organisational procedures for maintaining WHS records for the team	5.1 Accurately complete and maintain WHS records of incidents of occupational injury and disease in work area, according to WHS policies, procedures and legislative requirements 5.2 Use aggregate information and data from work area records to identify hazards and monitor risk control procedures in work area

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 5.2	• Interprets and analyses complex WHS legislative and organisational texts
Writing	1.1-1.3, 2.3, 2.4, 3.1, 3.2, 3.4, 4.1, 4.4, 5.1	• Documents WHS legislative and organisational information using structure, layout and language suitable for audience • Records WHS issues and actions taken according to reporting requirements • Prepares and maintains required records using appropriate structure and vocabulary
Oral communication	1.1-1.3, 2.1, 2.4, 3.2, 3.3, 4.1, 4.4	• Provides WHS legislative and organisational information and advice using structure and language suitable for audience
Numeracy	3.4, 5.2	• Extracts, interprets and comprehends mathematical information in relation to training costs and risk management data
Navigate the world of work	1.1,1.2, 2.3, 3.1, 4.1-4.5, 5.1	• Takes responsibility for adherence to legal and regulatory responsibilities and organisational policies and procedures in relation to WHS • Keeps up to date on changes to WHS legislation or regulations and organisational policies and procedures
Interact with	2.2, 3.2, 3.3	• Selects and uses appropriate conventions and protocols to facilitate consultation or provide feedback

© Commonwealth of Australia, 2025 Public Skills Australia

others		• Initiates and contributes to facilitating consultative role, responding, explaining, clarifying and expanding on ideas and information as required • Collaborates with others to achieve individual and team outcomes
Get the work done	2.2, 3.2, 3.3, 4.1-4.5, 5.1	• Uses combination of formal, logical planning and intuitive understanding of context to identify relevant information and risks, and identify and evaluate alternative strategies • Uses formal decision-making processes, setting or clarifying goals, gathering information and identifying and evaluating choices against a set of criteria • Recognises and takes responsibility for reporting WHS risk control inadequacies • Uses formal and informal processes to monitor implementations of WHS solutions and reflect on outcomes

Assessment Requirements for BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- explain clearly and accurately to work team the relevant work health and safety (WHS) information including:
  - WHS legislative and organisational requirements
  - identified hazards and outcomes of risk assessment and control
- ensure that the team has access to information about WHS policies, procedures and programs in appropriate structure and language
- implement and monitor procedures according to organisational and legislative WHS requirements including:
  - consultation and communications to enable team members to participate in managing WHS risks and hazards
  - identifying WHS training needs and providing learning opportunities, coaching and mentoring as appropriate to needs
  - identifying, reporting and taking action on WHS hazards and risks
  - identifying and reporting inadequacies in existing risk controls and monitoring outcomes to ensure a prompt organisational response
  - reporting on the cost of WHS training
  - keeping WHS records
  - analysing aggregate WHS data to identify hazards and monitor risk control procedures in work area.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025
Public Skills Australia

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legal responsibilities and duties of managers, supervisors, persons conducting businesses or undertakings (PCBUs) and workers in relation to WHS risk management in the workplace
- identify key provisions of relevant WHS Acts, regulations and codes of practice that apply to the business and outline how they apply in the work area
- explain organisational policies and procedures relating to hazard identification, risk management, fire, emergency and evacuation, incident investigation and reporting
- explain the importance of effective consultation mechanisms in managing health and safety risks in the workplace
- explain how the hierarchy of control applies in the work area.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- an actual workplace or simulated environment
- workplace equipment and resources
- examples of documents relating to workplace safety, hazard identification and risk assessment
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS403 Contribute to implementing and maintaining WHS consultation and participation processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to contribute to setting up, running and improving work health and safety (WHS) consultation and participation processes that are prescribed in legislation. It also covers contributing to communicating relevant information identifying and delivering related training and improving the consultation and participation processes.

This unit applies to individuals whose job role includes contributing to implementing and maintaining WHS consultation and participation processes in their work area and job role.

This unit applies to people who work in a broad range of WHS roles across all industries.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Identify individuals and parties involved in WHS consultation and participation processes	1.1 Apply knowledge of relevant parts of WHS Acts, regulations, codes of practice, policies and procedures to identify individuals and parties with roles, duties, rights and responsibilities regarding WHS consultation and participation 1.2 Identify what these roles, duties, rights and responsibilities are and, in line with own job role and work area, communicate this information to individuals and parties 1.3 Identify roles, duties, rights and responsibilities as they apply to own job role and work area
2 Contribute to WHS consultation and participation processes	2.1 Identify workplace WHS consultation and participation processes 2.2 Contribute to setting up and running these processes as appropriate to own job role and work area 2.3 Communicate to individuals and parties what these processes are and promote and support the participation of individuals and parties as appropriate to own job role and work area
3 Contribute to processes for communicating and sharing WHS information and data	3.1 Identify consultation and participation processes for communicating and sharing WHS information and data 3.2 Contribute to and participate in these processes, as appropriate to own job role and work area
4 Contribute to identifying and meeting training requirements for effective WHS consultation and participation	4.1 Identify training requirements for individuals and parties necessary for effective WHS consultation and participation 4.2 Contribute to the delivery of required training as appropriate to own job role and work area
5 Contribute to improving WHS consultation and participation processes	5.1 Contribute to the identification and assessment of barriers to the implementation and effectiveness of WHS consultation and participation processes 5.2 Contribute to the development, implementation and evaluation of measures to remove these barriers

© Commonwealth of Australia, 2025 Public Skills Australia

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.1, 3.1, 4.1	• Interprets and analyses complex WHS legislative and organisational texts
Writing	1.2, 2.2, 2.3, 4.1, 4.2, 5.1, 5.2	• Uses structure, layout and language suitable for audience to draft and document WHS legislative and organisational information • Records required WHS information using appropriate organisational formats
Oral communication	1.2, 2.2, 2.3	• Uses structure and language suitable for audience to provide WHS legislative and organisational information • Uses questioning and active listening to identify and discuss training requirements and barriers to WHS consultation processes
Navigate the world of work	1.1-1.3	• Takes responsibility for adherence to legal and regulatory responsibilities in relation to WHS role and responsibilities • Keeps up to date on changes to WHS legislation or regulations
Interact with others	2.2, 2.3, 3.1, 3.2, 4.2, 5.1, 5.2	• Understands what to communicate, with whom and how in context of consultation and participation processes • Uses a range of strategies to establish a sense of connection with others • Cooperates with others as part of WHS consultation and participation processes, and contributes to specific activities requiring joint responsibility and accountability • Initiates and contributes to facilitating consultative process, responding, explaining, clarifying and expanding on ideas and information as required
Get the work done	2.1, 2.2, 3.1, 4.1, 5.1, 5.2	• Applies formal processes when organising consultation processes, producing plans with logically sequenced steps, reflecting some awareness of time and resource constraints and the needs of others • Implements actions as per plans, making slight adjustments as necessary and addressing some unexpected issues

© Commonwealth of Australia, 2025 Public Skills Australia

		• Uses formal decision-making processes, setting or clarifying goals, gathering information and identifying and evaluating choices against a set of criteria • Uses formal and informal processes to monitor implementation of measures and reflect on outcomes • Uses familiar digital systems and tools to access, organise, analyse and present information

•

Assessment Requirements for BSBWHS403 Contribute to implementing and maintaining WHS consultation and participation processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- explain clearly and accurately to individuals and parties the legal roles, duties, rights and responsibilities of self and others regarding work health and safety (WHS) consultation and participation processes
- contribute, as appropriate to job role and work area, to:
  - setting up and running WHS consultation and participation processes to ensure that relevant individuals and parties understand and can participate in the processes
  - identifying training needs to support the WHS consultation and participation processes and providing learning opportunities, coaching and mentoring as appropriate to needs
  - communicating information and data about WHS consultation and participation processes
  - identifying barriers to effective WHS consultation and participation and developing, implementing and evaluating measures to remove the barriers.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe requirements under WHS legislation and organisational policies and procedures for consultation and participation processes and the individuals and parties who need to participate
- describe possible barriers to the implementation and effectiveness of WHS consultation and participation processes and strategies to remove them
- identify internal and external sources of WHS information and data and how to access them

© Commonwealth of Australia, 2025 Public Skills Australia

- describe training requirements for individuals and parties necessary for effective WHS consultation and participation processes

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- office equipment and resources
- relevant Acts, regulations, codes of practice, standards and guidelines
- workplace documentation and personnel.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS405 Contribute to implementing and maintaining WHS management systems

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify intent of application
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to contribute to the implementation and maintenance of a Work Health and Safety management system (WHSMS) as it applies to own work area and job role.

It applies to individuals with responsibilities for contributing to an organisation's WHSMS as part of their work health and safety (WHS) responsibilities in a range of industry and workplace contexts.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBWHS405 Contribute to implementing and maintaining WHS management systems

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify intent of application
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability contribute, as appropriate to own job role and work area, to:

- developing work health and safety (WHS) policy
- planning the Work Health and Safety management system (WHSMS) to incorporate return-to-work and injury management procedures and other elements relevant to the work area
- communicating and explaining WHS policy and the WHSMS to others to facilitate their contribution in developing, implementing and evaluating the systems
- implementing the plan
- evaluating WHS performance and communicating the outcomes
- reviewing and improving the WHSMS.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the elements of the organisation's WHSMS with reference to the relevant commonwealth and state or territory WHS Acts, regulations, codes of practice and standards.
- identify regulatory authority WHSMS tools, standards and guidance material and explain how they apply to the work area
- explain the importance of effective return-to-work and injury management in a WHSMS

© Commonwealth of Australia, 2025 Public Skills Australia

- identify limitations of a WHSMS, problems with WHSMS implementation and possible negative effects on WHS
- outline organisational WHS policies, procedures, processes and systems and how they apply to the work area.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- office equipment and resources
- relevant Acts, regulations, codes of practice, standards and guidelines
- workplace WHS policies and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS406 Assist with responding to incidents

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to assist with actions and activities performed in response to work health and safety (WHS) incidents which includes accidents.

It applies to individuals who work under supervision and use some discretion and judgement to respond to incidents within their level of responsibility.

The unit applies to people who work in a broad range of WHS roles across all industries.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to, as appropriate to job role and work area, assist with:

- identifying Work Health and Safety (WHS) legislative and organisational requirements and duty holders in relation to responding to WHS incidents
- communicating relevant WHS requirements clearly and accurately to individuals and parties
- providing first aid according to workplace procedures and processes
- reporting, notifying and documenting incidents, and meeting legislative requirements
- obtaining information about incidents using appropriate data collection techniques
- investigating incidents and communicating and implementing recommendations from investigations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain hierarchy of control and considerations for choosing between different risk controls including possible inadequacies of particular risk controls
- identify internal and external sources of WHS information and data, and how to access
- outline the organisation's WHS policies, procedures, processes and systems relevant to own job role or work area that relate to WHS incidents and accidents including initial response and first aid, investigations and reporting
- explain own role and role of duty holders in responding to incidents.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- organisational policies, standard operating procedures, procedures and plans
- relevant Acts, regulations, codes of practice, licensing requirements, standards
- relevant WHS data
- office equipment and resources
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS409 Assist with workplace monitoring processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to assist with monitoring a range of physical agents and conditions relevant to work health and safety (WHS).

It applies to individuals working in a broad range of WHS roles across all industries who assist with using a range of measuring devices to collect, interpret, evaluate and report on workplace information and data in relation to physical agents and conditions.

It does not extend to hazard identification, risk assessment or developing control measures based on the outcomes of monitoring, which are covered in BSBWHS404 Contribute to WHS hazard identification, risk assessment and risk control.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBWHS409 Assist with workplace monitoring processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to assist with processes for monitoring physical agents and/or conditions including:

- identifying regulatory requirements and standards that apply to monitoring of physical agents and/or conditions relevant to work health and safety (WHS)
- identifying the context of measurements to be undertaken including:
  - which physical agents and/or conditions will be measured and their characteristics
  - where the measurements will be taken
  - area or space available
  - movements of people and equipment, tasks or activities being undertaken, number of persons occupying area and other factors that may impact on the sampling or data-collection processes
  - physical features of equipment, such as emitting sources
- preparing for and collecting workplace WHS data and information including:
  - selecting and calibrating appropriate equipment and selecting appropriate scale
  - defining a sampling process and plan
  - performing tests
  - correct preparation, use, maintenance, cleaning storage and if required disposal of equipment
- consultation and communication with individuals and parties about the requirements, purpose and nature of the monitoring
- interpreting and evaluating results of monitoring including calculations using appropriate units of measurement, logarithmic scales, decimals and order of magnitude relevant to making and interpreting measurements and measurement error
- preparing and presenting clear and logical reports that are appropriate to purpose of report and the target audience
- keeping records that meet regulatory requirements
- seek expert advice, support and equipment as required.
- ensure own safety during monitoring process.

© Commonwealth of Australia, 2025 Public Skills Australia

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list typical physical agents and/or conditions relevant to WHS including:
  - biological agents, such as insects, mites and bacteria
  - electricity
  - fibres, dusts and particulates
  - fumes, mists, gases and vapours
  - heat and humidity
  - light
  - noise
  - radiation, including ionising, non-ionising and laser
  - vibration
- outline aspects of WHS Acts, regulations, codes of practice and standards that are relevant to measuring physical agents and/or conditions and how they apply to the organisation
- explain the mode of action of common physical, biological and chemical agents on the body and how they produce discomfort or harm
- list the characteristics, mode of action and units of measurement for major hazard types
- describe environmental conditions that impact on measurements
- explain types of measuring and monitoring equipment and techniques for correct and safe use including limitations on use and output, calibration, adjustment, maintenance and any in-built alarms.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- measuring devices and equipment
- office equipment and resources
- relevant Acts, regulations, codes of practice, licensing requirements, standards
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS411 Implement and monitor WHS policies, procedures and programs

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to implement and monitor an organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area in order to meet legislative requirements.

The unit applies to those with supervisory responsibilities in a work area who have a broad knowledge of WHS policies and contribute well-developed skills in creating solutions to problems through analysis and evaluation of information from a variety of sources. They provide supervision and guidance to others and have limited responsibility for the output of others.

NOTES

1. The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Provide information to work team about WHS policies and procedures	1.1 Identify and communicate relevant provisions about WHS laws to work team 1.2 Provide information about organisation's WHS policies, procedures and programs, and ensure it is readily accessible to work team 1.3 Communicate information about identified hazards and outcomes of risk assessment and control to work team
2. Implement and monitor work team consultative arrangements for managing WHS	2.1 Communicate importance of consultation mechanisms in managing WHS risks to work team 2.2 Apply consultation mechanisms to facilitate work team participation in managing work area hazards, according to organisational policies and procedures 2.3 Contribute to managing issues raised through consultation mechanisms, according to organisational consultation procedures and WHS legislative requirements 2.4 Communicate outcomes of consultation about WHS issues to work team
3. Implement and monitor organisational procedures for providing WHS training to work team	3.1 Identify and document team WHS training needs according to organisational requirements and WHS laws 3.2 Make arrangements to meet WHS training needs of team members in consultation with relevant stakeholders 3.3 Provide workplace learning opportunities to facilitate team and individual achievement of identified WHS training needs
4. Implement and monitor organisational procedures and legal requirements for identifying hazards, and assessing and controlling risks	4.1 Identify and report on hazards in work area according to organisational policies and procedures, and WHS legislative requirements 4.2 Contribute to managing and implementing hazard reports according to organisational policies and procedures, and WHS legislative requirements 4.3 Implement procedures to control risks using the hierarchy of control measures according to organisational policies and procedures, and WHS legislative requirements 4.4 Identify and report inadequacies in existing risk controls according to the hierarchy of control measures, and WHS legislative requirements 4.5 Monitor outcomes of reports on inadequacies, as required, to ensure prompt organisational response

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENTS	PERFORMANCE CRITERIA
5. Implement and monitor organisational procedures for maintaining WHS records	5.1 Complete and maintain WHS incident records of occupational injury and disease in work area according to organisational policies and procedures, and WHS legislative requirements 5.2 Use aggregate information and data from work area records to meet organisational recordkeeping requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Interprets and analyses WHS laws and organisational texts
Writing	• Documents organisational WHS policies, procedures and programs according to WHS laws, using structure, layout and language suitable for audience • Records WHS issues and actions taken according to reporting requirements • Prepares and maintains required records using appropriate structure and vocabulary
Oral communication	• Provides WHS organisational information and advice using structure and language suitable for audience • Uses questioning and active listening to clarify understanding
Navigate the world of work	• Adheres to legal and regulatory responsibilities, and organisational policies and procedures in relation to own WHS role and responsibilities • Keeps up to date on changes to WHS laws, and related organisational policies and procedures relevant to own role
Interact with others	• Selects and uses appropriate conventions and protocols to facilitate consultation and provide feedback • Initiates and contributes to facilitating consultative role: responding, explaining, clarifying and expanding on ideas and information as required • Collaborates with others to achieve individual team member and team outcomes
Get the work done	• Uses combination of logical planning and intuitive understanding of context to identify relevant information and risks, and to identify and evaluate alternative strategies • Uses decision-making processes: sets and clarifies goals, gathers

Assessment Requirements for BSBWHS411 Implement and monitor WHS policies, procedures and programs

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- implement and monitor the work health and safety (WHS) policies, procedures and programs for one work area in an organisation.

During the above, the candidate must:

- explain relevant WHS information clearly and accurately to work team
- provide work team with access to WHS policies, procedures and programs in appropriate structure and language
- implement and monitor procedures, according to WHS legislative and organisational requirements, for:
  - consultation on and communication about WHS hazards and risks
  - WHS training needs and learning opportunities
  - WHS records
  - using WHS aggregate data relating to hazards and risk control.

Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- key provisions of commonwealth and state/territory WHS laws that apply to the business, and procedures for their application in the work area
- organisational policies and procedures for:
  - consulting during WHS issue management
  - identifying hazards and managing risks, including using aggregate information and work area data
  - incident response, investigation and reporting

© Commonwealth of Australia, 2025 Public Skills Australia

- legal responsibilities and duties of managers, supervisors, persons conducting a business or undertaking (PCBUs) and workers in relation to WHS risk management in the workplace
- procedures for assessing implications of near misses in relation to incidents, injuries and illnesses in the work area
- effective consultation mechanisms in managing health and safety risks in the workplace
- features of effective workplace learning opportunities, including coaching and mentoring assistance that facilitates team and individual achievement of WHS training needs
- key principles and components of the hierarchy of control measures
- procedures for applying the hierarchy of control measures in own work area.

Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- actual workplace or simulated environment
- workplace equipment and resources
- examples of documents about workplace safety, hazard identification and risk assessment
- WHS laws and organisational documentation required to demonstrate the performance evidence
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.
