Unit Descriptor

This unit covers the competency required to administer, lead and command groups of between 15 and 35 personnel under extreme conditions in high-risk environments. It is primarily focused on the duties of a platoon second in command who, while mainly employed to administer the platoon, may be required to supervise the group in a dynamic environment, often acting independently, and leading by example.

Offensive operations are characterised by rapid shifts of the main effort to take advantage of opportunities and momentum to defeat hostile forces through the capture or destruction of critical objectives.

Command as mentioned above is the authority in which a commander in the military service lawfully exercises over subordinates by virtue of rank or assignment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication. In a Defence context, this means that there is no civilian need to hold this unit in order to meet licensing, legislative, regulatory or certification requirements.

Application of the Unit

This competency was developed for combat arms personnel required to command, lead and administer groups of between 15 and 35 personnel during the conduct of offensive operations in a deployed operational environment but is applicable to any individual in this field of work. Typically, individuals work as part of a team under direct and/or indirect supervision, but also must be prepared to act independently, use discretion and judgement, and take responsibility for the quality of their outputs. All activities are carried out in accordance with relevant organisational policies and procedures.
