

FBPCHE5008 Ripen artisan cheese

Release: 1

FBPCHE5008 Ripen artisan cheese

Modification History

Release	Comments	
	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.	

Application

This unit of competency describes the skills and knowledge required to ripen different types of artisan cheeses. The process is also referred to as cheese maturation or affinage.

This unit applies to cheesemakers who have responsibility for overseeing the ripening of cheese, adapting the process where required to suit the specified outcome, and complying with workplace health and safety, food safety, record keeping and quality assurance requirements for the cheese making and ripening process.

No licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing exist, so local requirements must be checked. All work must comply with Australian food safety standards and relevant codes of practice.

Pre-requisite Unit

Nil

Unit Sector

Cheese (CHE)

Elements and Performance Criteria

Elements	Performance Criteria	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare for cheese ripening	1.1 Identify cheese type to be ripened 1.2 Identify properties sought through ripening process	
	1.3 Identify conditions for ripening, including temperature, humidity, aeration conditions, time	
	1.4 Identify make parameters and processes for the cheese and prepare

Elements	Performance Criteria		
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.		
	ripening sheet, showing reference parameters for that cheese type		
	1.5 Record all actual ripening parameters and processes on the ripening sheet, as they occur, in line with regulatory requirements		
	1.6 Prepare cheese for ripening, including wrapping as required		
2. Monitor ripening	2.1 Check conditions for ripening, including racks to be used, humidity, temperature and aeration		
	2.2 Place cheese for ripening		
	2.3 Inspect cheese through ripening process		
	2.4 Take samples and test for appearance, pH, salt, texture, consistency, colour		
	2.5 Carry out treatments required of specific maturation process		
	2.6 Turn and rotate cheese to ensure ripening is even		
	2.7 Identify optimal ripening stage and ongoing care requirements for the cheese and communicate these to cheese buyers and sellers		
3. Problem-solve issues	3.1 Identify defects in cheese through the maturation process		
with ripening	3.2 Make adjustments to conditions to correct defects wherever possible		
	3.3 Maintain records of cheese maturation in accordance with workplace procedures		
	3.4 Record any wastage that occurs throughout maturation		

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description		
Reading	Interpret maturation requirements from a variety of sources to consolidate information for cheese production		
Writing	Document details of maturation, including weights, temperature, humidity, pH, salt and organoleptic parameters		
Navigate the world of	Problem-solve issues as they arise
