FBPDPR3003 Control batch processing for powdered milk products

Release: 1

FBPDPR3003 Control batch processing for powdered milk products

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 6.0.

Application

This unit of competency describes the skills and knowledge required to handle, feed and dose micronutrients and additives when undertaking batch processing of powdered milk products.

This unit applies to individuals who handle, measure, set dosages and record micronutrients and additives in batch processing of powdered milk products.

All work must be carried out to comply with workplace procedures, in accordance with state/territory health and safety and food safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Dairy Processing (DPR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify finish feed requirement	1.1 Identify product to be manufactured from production schedule, customer order or standard operating procedure (SOP) 1.2 Identify micronutrient or additive requirements from screen, recipe, SOP or supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Obtain correct micronutrient or other additive	2.1 Identify storage location for micronutrient or additive according to workplace requirements 2.2 Obtain micronutrient or additive according to SOP 2.3 Read micronutrient or additive label to determine any special mixing, dosing or health and safety requirements 2.4 Confirm micronutrients and additive requirements with nutritionist and/or other technical staff
3. Add micronutrient or additive to product	3.1 Match micronutrient or additive to powdered milk product 3.2 Determine appropriate volume, measurement or proportion of micronutrient or additive 3.3 Measure, prepare and pre-mix micronutrient or additive in line with safety and production requirements 3.4 Add micronutrient or additive to product at appropriate location and stage of processing in line with workplace procedures 3.5 Follow appropriate contamination, quality and traceability procedures according to health, safety and food safety procedures 3.6 Take samples of product and conduct basic tests to ensure product meets specifications 3.7 Dispose of waste according to environmental guidelines
4. Record use of micronutrient or additive	4.1 Record type and amount of micronutrient or additive used in required format 4.2 Generate correct product batch labels and add to product using required method 4.3 Complete workplace records, including traceability records, according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
-------	-------------

Skill	Description
Reading	- Interpret names of powdered milk micronutrients and additives - Read and check information on product specification
Writing	Record use of micronutrients and additives using electronic, digital and/or paper-based formats
Oral communication	Use industry vocabulary, including names of micronutrients and additives
Numeracy	Measure products and ingredients by weight (mg, g, kg, T) and volume (ml, L)

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
FBPDPR3003 Control batch processing for powdered milk products	Not applicable	The unit has been created to address a skill or task required by industry that is not covered by an existing unit	Newly created
