Release: 1

Assessment Requirements for FBPWHS4001 Identify, assess and control work health and safety risk in own work

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion:

- accessed, interpreted and applied work health and safety information, including work health and safety legislation, guidance material and benchmarks
- communicated with potential users of the product or system of work, other technicians/specialists, managers and expert advisers
- conducted risk assessments and analysed effectiveness of control measures
- analysed work systems and monitored safety performance
- assessed compliance with work health and safety legislation or procedures
- developed and maintained work health and safety records
- recognised and developed personal work health and safety expertise.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the difference between hazards and risks
- sources of work health and safety information both internal and external to the organisation
- nature of common workplace hazards, including chemicals, noise, manual handling work postures, underfoot hazards and moving parts of equipment
- regulatory requirements relevant to the particular industry/type of work site
- requirements for hazard identification and hazard identification processes
- principles of risk management, including risk analysis
- examples of safety benchmarks
- the hierarchy of control and its application
- principles of 'safe design' processes

- work health and safety legislative requirements for record keeping and reporting
- personal protective equipment requirements, including selection, use, storage and maintenance
- workplace specific information, including:
 - in-depth knowledge of hazards of the particular work environment and how they cause harm
 - hazard identification procedures relevant to the hazards in their workplace
 - work procedures
- organisation procedures related to work health and safety, including:
 - hazard, incident and injury reporting
 - hazard identification, risk assessment and control
 - consultation and participation
 - incident investigation
 - record keeping
- the legal rights and responsibilities of the workplace parties in relation to work health and safety.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- specifications:
 - work health and safety legislation, regulations and codes of practice
 - relevant workplace policies and procedures
- relationships (internal and/or external):
 - additional external expertise for advice
 - teams and/or committees for developing work health and safety procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
