FBP Food, Beverage and Pharmaceutical

Release: 5.2

CONTENTS

FBP10117 Certificate I in Food Processing 37
FBP10217 Certificate I in Baking 40
FBP20117 Certificate II in Food Processing 43
FBP20217 Certificate II in Baking 55
FBP20317 Certificate II in Food Processing (Sales) 58
FBP20418 Certificate II in Pharmaceutical Manufacturing 69
FBP20518 Certificate II in Wine Industry Operations 72
FBP20618 Certificate II in Sugar Milling Support 78
FBP30117 Certificate III in Food Processing 83
FBP30217 Certificate III in Plant Baking 92
FBP30317 Certificate III in Cake and Pastry 99
FBP30417 Certificate III in Bread Baking 103
FBP30517 Certificate III in Baking 107
FBP30617 Certificate III in Food Processing (Sales) 111
FBP30717 Certificate III in Rice Processing 119
FBP30821 Certificate III in Pharmaceutical Manufacturing 126
FBP30920 Certificate III in Wine Industry Operations 130
FBP31018 Certificate III in Sugar Milling Industry Operations 139
FBP40117 Certificate IV in Flour Milling 144
FBP40217 Certificate IV in Baking 152
FBP40318 Certificate IV in Food Processing 157
FBP40418 Certificate IV in Food Science and Technology 163
FBP40518 Certificate IV in Pharmaceutical Manufacturing 168
FBP40619 Certificate IV in Artisan Fermented Products 173
FBP50118 Diploma of Food Science and Technology 178
FBP50218 Diploma of Food Safety Auditing 183
FBP50319 Diploma of Artisan Cheesemaking 187
FBPBPG2006 Operate the bottle capsuling process 191
Assessment Requirements for FBPBPG2006 Operate the bottle capsuling process 194
FBPBPG3008 Operate an automated carton packing process 197
Assessment Requirements for FBPBPG3008 Operate an automated carton packing process 201
FBPBPG3009 Operate an automated palletising process 204
Assessment Requirements for FBPBPG3009 Operate an automated palletising process 208
FBPBPG4001 Manage bottling and packaging processes 211
Assessment Requirements for FBPBPG4001 Manage bottling and packaging processes 214
FBPBPG4002 Manage filling and packaging of fermented beverages 216
Assessment Requirements for FBPBPG4002 Manage filling and packaging of fermented beverages 220
FBPBPG4003 Coordinate wine operations packaging processes 222
Assessment Requirements for FBPBPG4003 Coordinate wine operations packaging processes 226
FBPCEL3019 Prepare and apply complex additions and finings 230
Assessment Requirements for FBPCEL3019 Prepare and apply complex additions and finings 234
FBPCEL4001 Coordinate wine operations vintage processes 240
Assessment Requirements for FBPCEL4001 Coordinate wine operations vintage processes 244
FBPCEL4002 Coordinate wine operations clarification processes 249

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance
Approved Page 2 of 5236

Assessment Requirements for FBPCEL4002 Coordinate wine operations clarification processes 253
FBPCEL4003 Coordinate wine operations filtration processes 258
Assessment Requirements for FBPCEL4003 Coordinate wine operations filtration processes 262
FBPCEL4004 Coordinate wine operations general cellar processes....267
Assessment Requirements for FBPCEL4004 Coordinate wine operations general cellar processes 271
FBPCHE4001 Prepare and present cheese....276
Assessment Requirements for FBPCHE4001 Prepare and present cheese 279
FBPCHE5005 Produce lactic acid coagulated artisan cheese....282
Assessment Requirements for FBPCHE5005 Produce lactic acid coagulated artisan cheese286
FBPCHE5006 Produce rennet coagulated artisan cheese....288
Assessment Requirements for FBPCHE5006 Produce rennet coagulated artisan cheese.293
FBPCHE5007 Produce acid and heat coagulated artisan cheese 296
Assessment Requirements for FBPCHE5007 Produce acid and heat coagulated artisan cheese 300
FBPCHE5008 Ripen artisan cheese 302
Assessment Requirements for FBPCHE5008 Ripen artisan cheese....305
FBPCHE5009 Carry out sampling and interpret tests for cheese production....307
Assessment Requirements for FBPCHE5009 Carry out sampling and interpret tests for cheese production....310
FBPFST4009 Label foods according to legislative requirements 313
Assessment Requirements for FBPFST4009 Label foods according to legislative requirements 316
FBPFST4013 Interpret and respond to food and/or beverage test results 318
Assessment Requirements for FBPFST4013 Interpret and respond to food and/or beverage test results....321
FBPFST4014 Apply sensory analysis in food and/or beverage production....323
Assessment Requirements for FBPFST4014 Apply sensory analysis in food and/or beverage production 326
FBPFST5010 Implement and review the preparation of milk for processing....328
Assessment Requirements for FBPFST5010 Implement and review the preparation of milk for processing 331
FBPFST5031 Identify the microbiological and biochemical properties of fermented food and/or beverages 334
Assessment Requirements for FBPFST5031 Identify the microbiological and biochemical properties of fermented food and/or beverages 337
FBPFSY4001 Supervise and maintain a food safety plan 340
Assessment Requirements for FBPFSY4001 Supervise and maintain a food safety plan.343
FBPLAB2001 Use basic laboratory equipment....345
Assessment Requirements for FBPLAB2001 Use basic laboratory equipment 348
FBPLAB2002 Prepare laboratory solutions and stains....350
Assessment Requirements for FBPLAB2002 Prepare laboratory solutions and stains 353
FBPLAB2003 Perform basic analytical tests....355
Assessment Requirements for FBPLAB2003 Perform basic analytical tests 358
FBPOPR2073 Work in a socially diverse environment....360
Assessment Requirements for FBPOPR2073 Work in a socially diverse environment 363
FBPPHM3018 Operate a sterilisation process using an autoclave....365
Assessment Requirements for FBPPHM3018 Operate a sterilisation process using an autoclave....368
FBPPHM3019 Operate a chromatography manufacturing process 372

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance
Approved Page 3 of 5236
© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Requirements for FBPPHM3019 Operate a chromatography manufacturing process....375
FBPPPL4008 Prepare and present artisan food and/or beverages....378
Assessment Requirements for FBPPPL4008 Prepare and present artisan food and/or beverages....381
FBPSUG1001 Install pre-ballast....383
Assessment Requirements for FBPSUG1001 Install pre-ballast....386
FBPSUG1002 Undertake shunting operations....388
Assessment Requirements for FBPSUG1002 Undertake shunting operations....391
FBPSUG1003 Move cane bins in a marshalling yard....393
Assessment Requirements for FBPSUG1003 Move cane bins in a marshalling yard....396
FBPSUG1005 Manually clean and maintain housekeeping standards....398
Assessment Requirements for FBPSUG1005 Manually clean and maintain housekeeping standards....401
FBPSUG2001 Lay sleepers for cane rail systems....403
Assessment Requirements for FBPSUG2001 Lay sleepers for cane rail systems....406
FBPSUG2002 Lay rails for cane rail systems....408
Assessment Requirements for FBPSUG2002 Lay rails for cane rail systems....411
FBPSUG2003 Lay skeleton track for cane rail system....413
Assessment Requirements for FBPSUG2003 Lay skeleton track for cane rail system....416
FBPSUG2004 Operate tamping equipment....418
Assessment Requirements for FBPSUG2004 Operate tamping equipment....421
FBPSUG2005 Construct turnouts....423
Assessment Requirements for FBPSUG2005 Construct turnouts....426
FBPSUG2007 Conduct cane weighbridge operations....428
Assessment Requirements for FBPSUG2007 Conduct cane weighbridge operations....431
FBPSUG2008 Operate a tipping station....433
Assessment Requirements for FBPSUG2008 Operate a tipping station....436
FBPSUG2009 Operate an extraction station....438
Assessment Requirements for FBPSUG2009 Operate an extraction station....441
FBPSUG2010 Operate a juice clarification process....443
Assessment Requirements for FBPSUG2010 Operate a juice clarification process....446
FBPSUG2011 Operate a mud filtration process....448
Assessment Requirements for FBPSUG2011 Operate a mud filtration process....451
FBPSUG2012 Chemically clean equipment....453
Assessment Requirements for FBPSUG2012 Chemically clean equipment....456
FBPSUG2013 Operate a pan station....458
Assessment Requirements for FBPSUG2013 Operate a pan station....461
FBPSUG2014 Operate a low grade fugal station....463
Assessment Requirements for FBPSUG2014 Operate a low grade fugal station....466
FBPSUG2015 Operate a high grade fugal station....468
Assessment Requirements for FBPSUG2015 Operate a high grade fugal station....471
FBPSUG2016 Operate a crystalliser station process....473
Assessment Requirements for FBPSUG2016 Operate a crystalliser station process....476
FBPSUG2017 Undertake simple fabrication....479
Assessment Requirements for FBPSUG2017 Undertake simple fabrication....482
FBPSUG2018 Undertake forming, bending and shaping....484
Assessment Requirements for FBPSUG2018 Undertake forming, bending and shaping....487
FBPSUG2019 Operate a bagasse fuel supply system....489
Assessment Requirements for FBPSUG2019 Operate a bagasse fuel supply system....492
FBPSUG2020 Operate a coal fuel supply system....495
Assessment Requirements for FBPSUG2020 Operate a coal fuel supply system....498
FBPSUG2021 Operate an ash separation system....501

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance
Approved Page 4 of 5236
© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Requirements for FBPSUG2021 Operate an ash separation system 504
FBPSUG2023 Operate a cooling water system.....506
Assessment Requirements for FBPSUG2023 Operate a cooling water system 509
FBPSUG2025 Perform general planing and shaping operations 511
Assessment Requirements for FBPSUG2025 Perform general planing and shaping operations 514
FBPSUG2026 Perform general drilling operations 516
Assessment Requirements for FBPSUG2026 Perform general drilling operations 519
FBPSUG2027 Perform general lathe operations.....521
Assessment Requirements for FBPSUG2027 Perform general lathe operations 524
FBPSUG2028 Perform general milling operations 526
Assessment Requirements for FBPSUG2028 Perform general milling operations.....529
FBPSUG3001 Drive a cane locomotive 531
Assessment Requirements for FBPSUG3001 Drive a cane locomotive.....535
FBPSUG3002 Control cane traffic movements 537
Assessment Requirements for FBPSUG3002 Control cane traffic movements 541
FBPSUG3003 Adjust cane delivery schedules to meet daily milling requirements 543
Assessment Requirements for FBPSUG3003 Adjust cane delivery schedules to meet daily milling requirements.....546
FBPSUG3004 Drive a master-slave locomotive.....549
Assessment Requirements for FBPSUG3004 Drive a master-slave locomotive 553
FBPSUG3005 Operate a sugar system.....555
Assessment Requirements for FBPSUG3005 Operate a sugar system 558
FBPSUG3006 Monitor a sugar mill powerhouse 560
Assessment Requirements for FBPSUG3006 Monitor a sugar mill powerhouse.....563
FBPTEC3003 Filter fermented beverages 565
Assessment Requirements for FBPTEC3003 Filter fermented beverages.....568
FBPTEC3004 Prepare, fill and store barrels for aging spirits 570
Assessment Requirements for FBPTEC3004 Prepare, fill and store barrels for aging spirits.....573
FBPTEC4003 Control food contamination and spoilage 575
Assessment Requirements for FBPTEC4003 Control food contamination and spoilage ..578
FBPTEC4012 Manage raw materials.....581
Assessment Requirements for FBPTEC4012 Manage raw materials 584
FBPTEC4013 Manage wort production for brewing 586
Assessment Requirements for FBPTEC4013 Manage wort production for brewing.....590
FBPTEC4014 Manage cellar operations.....592
Assessment Requirements for FBPTEC4014 Manage cellar operations 595
FBPTEC4015 Manage and propagate yeast.....597
Assessment Requirements for FBPTEC4015 Manage and propagate yeast 600
FBPTEC4016 Produce fruit-based wash for distillation 602
Assessment Requirements for FBPTEC4016 Produce fruit-based wash for distillation...605
FBPTEC4017 Produce grain-based wash for distillation.....607
Assessment Requirements for FBPTEC4017 Produce grain-based wash for distillation .610
FBPTEC4018 Manage still operations to produce white spirits.....612
Assessment Requirements for FBPTEC4018 Manage still operations to produce white spirits.....615
FBPTEC4019 Manage still operations to produce brown spirits 617
Assessment Requirements for FBPTEC4019 Manage still operations to produce brown spirits.....620
FBPTEC4020 Blend spirits 622
Assessment Requirements for FBPTEC4020 Blend spirits.....625
FBPTEC4021 Apply regulatory requirements to the production of alcoholic beverages .627

Assessment Requirements for FBPTEC4021 Apply regulatory requirements to the production of alcoholic beverages 630
FBPTEC4022 Prepare starter cultures for fermentation 633
Assessment Requirements for FBPTEC4022 Prepare starter cultures for fermentation 636
FBPTEC4023 Control and monitor fermentation 638
Assessment Requirements for FBPTEC4023 Control and monitor fermentation 641
FBPTEC4024 Produce fermented and dry-cured meat products 643
Assessment Requirements for FBPTEC4024 Produce fermented and dry-cured meat products 647
FBPTEC5003 Design an artisan food production facility 649
Assessment Requirements for FBPTEC5003 Design an artisan food production facility 652
FBPVIT2007 Tend containerised nursery plants 654
Assessment Requirements for FBPVIT2007 Tend containerised nursery plants 657
FBPVIT2019 Operate the irrigation system 659
Assessment Requirements for FBPVIT2019 Operate the irrigation system 662
FBPVIT3012 Implement an irrigation schedule 664
Assessment Requirements for FBPVIT3012 Implement an irrigation schedule 667
FBPWHS3001 Contribute to work health and safety processes 669
Assessment Requirements for FBPWHS3001 Contribute to work health and safety processes 673
FBPWHS4002 Maintain work health and safety processes 675
Assessment Requirements for FBPWHS4002 Maintain work health and safety processes 679
AHCBAC204 Prepare grain storages 682
Assessment Requirements for AHCBAC204 Prepare grain storages 685
AHCBUS516 Develop and review a business plan 687
Assessment Requirements for AHCBUS516 Develop and review a business plan 690
AHCCHM101 Follow basic chemical safety rules 692
Assessment Requirements for AHCCHM101 Follow basic chemical safety rules 695
AHCCHM201 Apply chemicals under supervision 697
Assessment Requirements for AHCCHM201 Apply chemicals under supervision 701
AHCCHM304 Transport and store chemicals 704
Assessment Requirements for AHCCHM304 Transport and store chemicals 708
AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases 711
Assessment Requirements for AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases 715
AHCIRG215 Assist with low volume irrigation operations 719
Assessment Requirements for AHCIRG215 Assist with low volume irrigation operations 722
AHCIRG217 Assist with pressurised irrigation operations 724
Assessment Requirements for AHCIRG217 Assist with pressurised irrigation operations 727
AHCIRG328 Operate irrigation controller and sensor technology 729
Assessment Requirements for AHCIRG328 Operate irrigation controller and sensor technology 732
AHCIRG343 Operate irrigation injection equipment 734
Assessment Requirements for AHCIRG343 Operate irrigation injection equipment 737
AHCIRG344 Implement an irrigation schedule 740
Assessment Requirements for AHCIRG344 Implement an irrigation schedule 743
AHCIRG345 Install pressurised irrigation systems 746
Assessment Requirements for AHCIRG345 Install pressurised irrigation systems 750
AHCIRG347 Maintain pressurised irrigation systems 752
Assessment Requirements for AHCIRG347 Maintain pressurised irrigation systems 755
AHCMOM202 Operate tractors 757
Assessment Requirements for AHCMOM202 Operate tractors 761
AHCMOM213 Operate and maintain chainsaws 763

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Requirements for AHCMOM213 Operate and maintain chainsaws.....768
AHCPCM301 Implement a plant nutrition program.....771
Assessment Requirements for AHCPCM301 Implement a plant nutrition program 774
AHCPHT201 Plant horticultural crops 776
Assessment Requirements for AHCPHT201 Plant horticultural crops.....778
AHCPHT401 Assess olive oil for style and quality 780
Assessment Requirements for AHCPHT401 Assess olive oil for style and quality.....782
AHCSOL202 Assist with soil or growing media sampling and testing 783
Assessment Requirements for AHCSOL202 Assist with soil or growing media sampling and testing.....785
AHCSOL401 Sample soils and interpret results.....787
Assessment Requirements for AHCSOL401 Sample soils and interpret results 790
AHCWRK209 Participate in environmentally sustainable work practices.....792
Assessment Requirements for AHCWRK209 Participate in environmentally sustainable work practices 794
AHCWRK308 Handle bulk materials in storage area 796
Assessment Requirements for AHCWRK308 Handle bulk materials in storage area 800
AHCWRK309 Apply environmentally sustainable work practices 803
Assessment Requirements for AHCWRK309 Apply environmentally sustainable work practices 806
AMPA2006 Apply animal welfare and handling requirements.....808
Assessment Requirements for AMPA2006 Apply animal welfare and handling requirements 811
AMPA2174 Clean after operations - boning room 813
Assessment Requirements for AMPA2174 Clean after operations - boning room.....816
AMPP201 Operate a poultry dicing, stripping or mincing process.....818
Assessment Requirements for AMPP201 Operate a poultry dicing, stripping or mincing process.....821
AMPP202 Operate a poultry evisceration process.....824
Assessment Requirements for AMPP202 Operate a poultry evisceration process 827
AMPP203 Grade poultry carcase 830
Assessment Requirements for AMPP203 Grade poultry carcase.....833
AMPP204 Harvest edible poultry offal 835
Assessment Requirements for AMPP204 Harvest edible poultry offal.....838
AMPP205 Operate a poultry marinade injecting process.....841
Assessment Requirements for AMPP205 Operate a poultry marinade injecting process 844
AMPP206 Operate a poultry washing and chilling process 847
Assessment Requirements for AMPP206 Operate a poultry washing and chilling process850
AMPP207 Operate the bird receival and hanging process.....853
Assessment Requirements for AMPP207 Operate the bird receival and hanging process856
AMPP208 Operate a poultry stunning, killing and defeathering process 858
Assessment Requirements for AMPP208 Operate a poultry stunning, killing and defeathering process 861
AMPP301 Operate a poultry carcase delivery system.....864
Assessment Requirements for AMPP301 Operate a poultry carcase delivery system 867
AMPP302 Debone and fillet poultry product (manually) 869
Assessment Requirements for AMPP302 Debone and fillet poultry product (manually) .872
AMPR322 Prepare and produce value added products 874
Assessment Requirements for AMPR322 Prepare and produce value added products....877
AMPX207 Vacuum pack product.....879
Assessment Requirements for AMPX207 Vacuum pack product 882
AMPX209 Sharpen knives 884
Assessment Requirements for AMPX209 Sharpen knives.....887

Assessment Requirements for FBPBPG2001 Operate the bottle supply process....1210
FBPBPG2002 Operate the carton erection process....1213
Assessment Requirements for FBPBPG2002 Operate the carton erection process....1216
FBPBPG2003 Operate the carton packing process....1219
Assessment Requirements for FBPBPG2003 Operate the carton packing process....1222
FBPBPG2004 Operate the palletising process....1225
Assessment Requirements for FBPBPG2004 Operate the palletising process....1228
FBPBPG2005 Operate the electronic coding process....1231
Assessment Requirements for FBPBPG2005 Operate the electronic coding process....1234
FBPBPG2007 Operate manual bottling and packaging processes....1237
Assessment Requirements for FBPBPG2007 Operate manual bottling and packaging processes....1240
FBPBPG2008 Perform basic packaging tests and inspections....1243
Assessment Requirements for FBPBPG2008 Perform basic packaging tests and inspections....1246
FBPBPG3001 Operate the bottle filling process....1249
Assessment Requirements for FBPBPG3001 Operate the bottle filling process....1252
FBPBPG3002 Operate the labelling process....1255
Assessment Requirements for FBPBPG3002 Operate the labelling process....1258
FBPBPG3003 Operate the softpack filling process....1261
Assessment Requirements for FBPBPG3003 Operate the softpack filling process....1264
FBPBPG3004 Operate the bottle sealing process....1267
Assessment Requirements for FBPBPG3004 Operate the bottle sealing process....1270
FBPBPG3005 Operate the tirage and transfer process....1273
Assessment Requirements for FBPBPG3005 Operate the tirage and transfer process....1276
FBPBPG3006 Operate traditional sparkling wine processes....1279
Assessment Requirements for FBPBPG3006 Operate traditional sparkling wine processes....1282
FBPBPG3007 Perform packaging equipment changeover....1285

Assessment Requirements for FBPBPG3007 Perform packaging equipment changeover1288
FBPCDS2001 Conduct a standard product tasting 1291
Assessment Requirements for FBPCDS2001 Conduct a standard product tasting 1295
FBPCDS2002 Provide and present wine tourism information 1298
Assessment Requirements for FBPCDS2002 Provide and present wine tourism information 1301
FBPCDS2003 Sell cellar door products and services 1304
Assessment Requirements for FBPCDS2003 Sell cellar door products and services 1308
FBPCDS3001 Conduct winery and site tours 1310
Assessment Requirements for FBPCDS3001 Conduct winery and site tours 1314
FBPCDS3002 Plan and deliver a wine tasting event 1317
Assessment Requirements for FBPCDS3002 Plan and deliver a wine tasting event 1321
FBPCDS3003 Coordinate winery hospitality activities 1324
Assessment Requirements for FBPCDS3003 Coordinate winery hospitality activities 1328
FBPCEL2001 Perform oak handling activities 1330
Assessment Requirements for FBPCEL2001 Perform oak handling activities 1334
FBPCEL2002 Perform fermentation operations 1336
Assessment Requirements for FBPCEL2002 Perform fermentation operations 1339
FBPCEL2003 Operate the ion exchange process 1342
Assessment Requirements for FBPCEL2003 Operate the ion exchange process 1345
FBPCEL2004 Perform heat exchange operations 1347
Assessment Requirements for FBPCEL2004 Perform heat exchange operations 1350
FBPCEL2005 Perform must draining operations 1352
Assessment Requirements for FBPCEL2005 Perform must draining operations 1355
FBPCEL2006 Operate the crushing process 1357
Assessment Requirements for FBPCEL2006 Operate the crushing process 1360
FBPCEL2007 Prepare and make additions and finings 1362
Assessment Requirements for FBPCEL2007 Prepare and make additions and finings 1365
FBPCEL2008 Carry out inert gas handling operations 1368
Assessment Requirements for FBPCEL2008 Carry out inert gas handling operations 1371
FBPCEL2009 Carry out transfer operations 1374
Assessment Requirements for FBPCEL2009 Carry out transfer operations 1377
FBPCEL3001 Handle and store spirits 1380
Assessment Requirements for FBPCEL3001 Handle and store spirits 1383
FBPCEL3002 Operate the continuous clarification by separation (flotation) process 1385
Assessment Requirements for FBPCEL3002 Operate the continuous clarification by separation (flotation) process 1388
FBPCEL3003 Operate the concentration process 1390
Assessment Requirements for FBPCEL3003 Operate the concentration process 1393
FBPCEL3004 Operate an earth filtration process 1395
Assessment Requirements for FBPCEL3004 Operate an earth filtration process 1398
FBPCEL3005 Operate the pressing process 1400
Assessment Requirements for FBPCEL3005 Operate the pressing process 1403
FBPCEL3006 Operate the fine filtration process 1406
Assessment Requirements for FBPCEL3006 Operate the fine filtration process 1409
FBPCEL3007 Operate clarification by separation (centrifugation) process 1411
Assessment Requirements for FBPCEL3007 Operate clarification by separation (centrifugation) process 1414
FBPCEL3008 Operate the rotary vacuum filtration process 1416
Assessment Requirements for FBPCEL3008 Operate the rotary vacuum filtration process1419
FBPCEL3009 Operate the crossflow filtration process 1421
Assessment Requirements for FBPCEL3009 Operate the crossflow filtration process 1424
FBPCEL3010 Operate the decanter process 1427

Approved Page 11 of 5236

FBP10117 Certificate I in Food Processing

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0.

Qualification Description

This qualification provides the basic skills and knowledge required for entry level workers in the food processing industries for a range of sectors including:

- grain processing (including stock feed, animal feeds, milling wheat, barley, oats and flour milling)
- baking (including large scale production of cakes, pastry, bread, biscuits and plant baking)
- retail baking
- beverages (including juices, soft drinks, cordials, aerated and still waters, energy drinks and other modified beverages, such as vitamin and antioxidant beverages, coffee, tea and ice)
- confectionery
- dairy processing
- fruit and vegetables
- grocery products and supplies (including honey, jams, spreads, sauces, dressings, condiments, spices, edible oils and fats and pasta)
- poultry.

The qualification is designed for application in a highly supervised context, such as VET in schools, induction to industry, or other equivalent introductory environments. All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, work health and safety and environmental codes, regulations and legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 9 units of competency:
  - 4 core units plus
  - 5 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualifications Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 1 must be selected from Group A. If this qualification is to be applied in a work environment where food is processed for non-human consumption, such as pet food and stock feed or other situations where human food safety skills are not required, FBPOPR2032 Apply work procedures to maintain integrity of product should be selected.
- 3 must be selected from Group B
- 1 may be selected from remaining units in Group B or any currently endorsed Training Package or accredited course packaged at a Certificate I or Certificate II.

Core Units

FBPOPR1003	Communicate workplace information
FBPOPR1009	Follow work procedures to maintain quality
FBPWHS1001	Identify safe work practices
MSMENV272	Participate in environmentally sustainable work practices

Elective Units

Group A

FBPFSY1001	Follow work procedures to maintain food safety
FBPOPR2032	Apply work procedures to maintain integrity of product

Group B

FBPOPR1001	Pack or unpack product manually
FBPOPR1002	Operate automated washing equipment

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPOPR1004	Prepare basic mixes
FBPOPR1005	Operate basic equipment
FBPOPR1006	Monitor process operation
FBPOPR1007	Participate effectively in a workplace environment
FBPOPR1008	Take and record basic measurements
FBPOPR1010	Carry out manual handling tasks
FBPOPR2069	Use numerical applications in the workplace
FBPRBK1001	Finish products
FBPWIN2002	Communicate wine industry information
SIRXSLS002	Follow point-of-sale procedures
SITXCCS003	Interact with customers
TLIA2014	Use product knowledge to complete work operations

FBP10217 Certificate I in Baking

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Qualification Description

This qualification describes the basic skills and knowledge of an individual preparing for entry level work or training in a commercial baking environment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, and work health and safety, regulations and legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 8 units of competency:
  - 6 core units plus
  - 2 elective units.

Elective units must ensure the integrity of the qualification's Australian Quality Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome.

The electives are to be chosen as follows:

- 1 from the electives listed below

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- 1 from the electives listed below, or any currently endorsed Training Package or accredited course that is packaged at a Certificate I or II level.

Core Units

FBPFSY1001	Follow work procedures to maintain food safety
FBPOPR1004	Prepare basic mixes
FBPOPR1005	Operate basic equipment
FBPRBK1001	Finish products
FBPWHS1001	Identify safe work practices
FSKNUM09	Identify, measure and estimate familiar quantities for work

Elective Units

FBPRBK2001	Assist non laminated pastry production
FBPRBK2003	Assist sponge cake production
FBPRBK2004	Assist basic bread production

Qualification Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
FBP10217 Certificate I in Baking	Not applicable	New qualification	No equivalent qualification

FBP20117 Certificate II in Food Processing

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Qualification Description

This qualification describes the skills and knowledge for food processing workers employed in the following sectors:

- grain processing (including stock feed, animal feeds, milling wheat, barley, oats and flour milling)
- baking (including large scale production of cakes, pastry, bread, biscuits and plant baking)
- retail baking
- beverages (including juices, soft drinks, cordials, aerated and still waters, energy drinks and other modified beverages, such as vitamin and antioxidant beverages, coffee, tea and ice)
- confectionery
- dairy processing
- fruit and vegetables
- grocery products and supplies (including honey, jams, spreads, sauces, dressings, condiments, spices, edible oils and fats and pasta)
- poultry.

This qualification is designed for application in supervised environments where the work is predictable with some basic problem solving requirements. All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, work health and safety and environmental codes, regulations and legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

^ From 1 July 2022 the elective unit HLTAID002 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID010 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 13 units of competency:
  - 4 core units plus
  - 9 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualifications Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 1 must be selected from Group A. If this qualification is to be applied in a work environment where food is processed for non-human consumption, such as pet food and stock feed or other situations where human food safety skills are not required, then *FBPOPR2032 Apply work procedures to maintain integrity of product* should be selected.
- 5 must be selected from Group B
- 1 must be selected from Group B or Group C
- 2 may be selected from the remaining units in Groups B or C, or any currently endorsed Training Package or accredited course packaged at Certificate I (maximum 1 unit), Certificate II or Certificate III (maximum 1 unit) levels.

Core Units

FDFOHS2001A	Participate in OHS processes
FDFOP2063A	Apply quality systems and procedures
FDFOP2064A	Provide and apply workplace information
MSMENV272	Participate in environmentally sustainable work practices

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

FBPOPR2032	Apply work procedures to maintain integrity of product
FDFFS2001A	Implement the food safety program and procedures

Group B – Sector Specialist and Cross Sector elective units

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Baking

FBPOPR2024	Operate a cooling, slicing and wrapping process
FBPOPR2055	Freeze dough
FBPPBK2001	Operate a cooling and slicing process
FBPPBK2002	Operate a pastry forming and filling process
FBPPBK2003	Manufacture rye crisp breads
FBPPBK2004	Manufacture wafer products
FBPPBK2005	Operate a doughnut making process
FBPPBK2006	Operate a griddle production process
FBPPBK2007	Operate a pastry production process

Beverages

FBPBEV2001	Operate a deaeration, mixing and carbonation process
FBPBEV2002	Manufacture roast and ground coffee
FBPBEV2003	Operate an ice manufacturing process

Confectionery

FBPCON2001	Examine raw ingredients used in confectionery
FBPCON2002	Operate a boiled confectionery process
FBPCON2003	Operate a chocolate conching process
FBPCON2004	Operate a chocolate depositing or moulding process
FBPCON2005	Operate a confectionery depositing process
FBPCON2006	Operate a granulation and compression process
FBPCON2007	Operate a panning process
FBPCON2008	Operate a chocolate refining process
FBPCON2009	Operate a starch moulding process

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Dairy processing

FBPDPR2001	Operate a butter churning process
FBPDPR2002 *	Operate a butter oil process
FBPDPR2003	Operate a curd production and cutting process
FBPDPR2004	Operate a cooling and hardening process
FBPDPR2005	Operate a cheese pressing and moulding process
FBPDPR2006	Operate a fermentation process

Fruit and vegetables

FBPFAV2001	Apply hydro-cooling process to fresh produce

Grain processing

AHCBAC204	Prepare grain storages
FBPGRA2001	Operate a liquid, mash or block stockfeed process
FBPGRA2002	Recognise mill operations and technologies
FBPGRA2003	Operate a grain conditioning process
FBPGRA2004	Operate a grain cleaning process
FBPGRA2005	Operate a purification process
FBPGRA2006	Operate a scalping and grading process
FBPGRA2007	Operate a scratch and sizing process
FBPGRA2008	Operate a break roll process
FBPGRA2009	Operate a pelleting process
FBPGRA2010	Handle grain in a storage area
FBPGRA2011 *	Receive grain for malting

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPGRA2012 *	Prepare malted grain
FBPGRA2013	Blend and dispatch malt
TLIJ2004	Implement grain monitoring measures

Grocery products and supplies

FBPGPS2001	Operate a bleaching process
FBPGPS2002	Operate a complecting process
FBPGPS2003	Operate a deodorising process
FBPGPS2004	Operate a flake preparation process
FBPGPS2005	Operate a fractionation process
FBPGPS2006	Operate a hydrogenation process
FBPGPS2007	Operate an interesterification process
FBPGPS2008	Operate a neutralisation process
FBPGPS2009	Operate a soap splitting process
FBPGPS2010	Operate a winterisation process
FBPGPS2011	Operate a creamed honey manufacture process

Poultry

AMPA2006	Apply animal welfare and handling requirements
AMPA2174	Clean after operations - boning room
AMPP201	Operate a poultry dicing, stripping or mincing process
AMPP202	Operate a poultry evisceration process
AMPP203	Grade poultry carcass
AMPP204	Harvest edible poultry offal
AMPP205	Operate a poultry marinade injecting process

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

AMPP206	Operate a poultry washing and chilling process
AMPP207	Operate the bird receival and hanging process
AMPP208	Operate a poultry stunning, killing and defeathering process
FBPEGG2001	Work on an egg grading floor
FBPEGG2002 *	Operate egg grading and packing floor equipment

Cross sector units

AMPX207	Vacuum pack product
AMPX209	Sharpen knives
FBPOPR2001	Work effectively in the food processing industry
FBPOPR2002	Inspect and sort materials and product
FBPOPR2003	Prepare and monitor beer yeast propagation processes
FBPOPR2004	Operate a beer packaging process
FBPOPR2005	Operate a beer filling process
FBPOPR2006	Operate a bulk dry goods transfer process
FBPOPR2007	Work in a freezer storage area
FBPOPR2008	Operate a bulk liquid transfer process
FBPOPR2009	Load and unload tankers
FBPOPR2010	Work with temperature controlled stock
FBPOPR2011	Identify key stages and beer production equipment in a brewery
FBPOPR2012	Maintain food safety when loading, unloading and transporting food
FBPOPR2013 *	Operate a bright beer tank process

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPOPR2014	Participate in sensory analyses
FBPOPR2015*	Operate a beer filtration process
FBPOPR2016*	Operate a beer maturation process
FBPOPR2017	Operate a blending, sieving and bagging process
FBPOPR2018	Operate a case packing process
FBPOPR2019	Fill and close product in cans
FBPOPR2020	Operate a form, fill and seal process
FBPOPR2021	Operate a fill and seal process
FBPOPR2022	Operate a high speed wrapping process
FBPOPR2023	Operate a packaging process
FBPOPR2025	Manufacture extruded and toasted products
FBPOPR2026	Operate a forming or shaping process
FBPOPR2027	Dispense non-bulk ingredients
FBPOPR2028	Operate a mixing or blending process
FBPOPR2029	Operate a baking process
FBPOPR2030*	Operate a brewery fermentation process
FBPOPR2031	Operate a coating application process
FBPOPR2033	Operate a depositing process
FBPOPR2034	Operate an evaporation process
FBPOPR2035	Operate an enrobing process
FBPOPR2036	Operate an extrusion process
FBPOPR2037	Operate a filtration process
FBPOPR2038	Operate a grinding process

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPOPR2039	Operate a frying process
FBPOPR2040	Operate a heat treatment process
FBPOPR2041	Operate a mixing or blending and cooking process
FBPOPR2042	Operate a drying process
FBPOPR2043	Operate an homogenising process
FBPOPR2044	Operate a retort process
FBPOPR2045	Operate pumping equipment
FBPOPR2046	Operate a production process
FBPOPR2047	Operate a portion saw
FBPOPR2048	Pre-process raw materials
FBPOPR2049	Operate a reduction process
FBPOPR2050	Operate a separation process
FBPOPR2051	Operate a spreads production process
FBPOPR2052	Operate a chocolate tempering process
FBPOPR2053	Operate a washing and drying process
FBPOPR2054	Operate a water purification process
FBPOPR2056	Operate a freezing process
FBPOPR2057	Operate a membrane process
FBPOPR2058	Operate a holding and storage process
FBPOPR2059	Operate a continuous freezing process
FBPOPR2060	Operate an automated cutting process
FBPOPR2061 *	Operate a wort production process
FDFSUG222A	Operate a waste water treatment system
FDFOP1003A	Carry out manual handling tasks

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FDFOP2003A	Clean equipment in place
FDFOP2004A	Clean and sanitise equipment
FDFOP2005A	Work in a socially diverse environment
FDFOP2011A	Conduct routine maintenance
FDFOP2013A	Apply sampling procedures
FDFOP2015A*	Apply principles of statistical process control
FDFOP2016A	Work in a food handling area for non-food handlers
FDFOP2030A	Operate a process control interface
FDFOP2032A*	Work in a clean room environment
FDFOP2061A	Use numerical applications in the workplace
FDFPPL2001A	Participate in work teams and groups
MSL973001	Perform basic tests
PMBPROD211	Operate blow moulding equipment
PMBPROD270	Operate injection blow moulding equipment
TLIA2009	Complete and check import/export documentation
TLIA2014	Use product knowledge to complete work operations
TLIA2021	Despatch stock
TLIA4025	Regulate temperature controlled stock
TLID2003	Handle dangerous goods/hazardous substances
TLID2004	Load and unload goods/cargo
TLID2010	Operate a forklift
TLIK2010	Use infotechnology devices in the workplace

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Group C

BSBITU201	Produce simple word processed documents
BSBITU202	Create and use spreadsheets
BSBWOR204	Use business technology
FDFSUG218A	Operate a boiler - basic
HLTAID002 ^ **HLTAID010**	Provide basic emergency life support **Provide basic emergency life support (must be delivered from 1 July 2022)**
MSS402001	Apply competitive systems and practices
MSS402002	Sustain process improvements
MSS402010	Manage the impact of change on own work
MSS402021	Apply Just in Time procedures
MSS402030	Apply cost factors to work practices
MSS402031	Interpret product costs in terms of customer requirements
MSS402040	Apply 5S procedures
MSS402050	Monitor process capability
MSS402051	Apply quality standards
MSS402060	Use planning software systems in operations
MSS402061	Use SCADA systems in operations
MSS402080	Undertake root cause analysis
MSS402081	Contribute to the application of a proactive maintenance strategy
SIRRMER001	Produce visual merchandise displays
SIRRRTF001	Balance and secure point-of-sale terminal
SIRXPDK001	Advise on products and services

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

SIRXRSK001	Identify and respond to security risks
SITHFAB005*	Prepare and serve espresso coffee

FBP20217 Certificate II in Baking

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Qualification Description

This qualification describes the skills and knowledge of a baker's assistant working in a commercial baking environment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, and work health and safety, regulations and legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

^ From 1 July 2022 the elective unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 11 units of competency:
  - 7 core units plus
  - 4 elective units.

Elective units must ensure the integrity of the qualification's Australian Quality Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome.

The electives are to be chosen as follows:

- 1 from the units listed in Group A
- 2 from the remaining units listed in Group A or units listed in Group B

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- 1 from the remaining units listed in Group A, or units listed in Group B, or any currently endorsed Training Package or accredited course that is packaged at a Certificate II or III level.

Core Units

FBPRBK2002	Use food preparation equipment to prepare fillings
FBPRBK2005	Maintain ingredient stores
FBPRBK3005	Produce basic bread products
FDFFS2001A	Implement the food safety program and procedures
FDFOHS2001A	Participate in OHS processes
FDFOP2061A	Use numerical applications in the workplace
FDFOP2064A	Provide and apply workplace information

Elective Units

Group A

FBPRBK3002	Produce non laminated pastry products
FBPRBK3008	Produce sponge cake products
FBPRBK3014	Produce sweet yeast products

Group B

FBPRBK3009	Produce biscuit and cookie products
FDFOP2005A	Work in a socially diverse environment
HLTAID003 ^ **HLTAID011**	Provide first aid **Provide First Aid (must be delivered from 1 July 2022)**
SIRRMER002	Merchandise food products
SIRXPDK001	Advise on products and services
SIRXSLS001	Sell to the retail customer

FBP20317 Certificate II in Food Processing (Sales)

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Qualification Description

This qualification describes the skills and knowledge for workers assisting with sales within a food manufacturing or retail food processing workplace that involves routine work with some basic problem solving in a supervised environment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, work health and safety and environmental codes, regulations and legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

^ From 1 July 2022 the elective unit HLTAID002 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID010 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 13 units of competency:
  - 5 core units plus
  - 8 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualifications Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- 1 must be selected from Group A. If this qualification is to be applied in a work environment where food is processed for non-human consumption, such as pet food and stock feed or other situations where human food safety skills are not required, FBPOPR2032 Apply work procedures to maintain integrity of product should be selected.
- 2 must be selected from Group B
- 2 must be selected from Group C
- 3 may be selected from the remaining units in Groups B, C or D, or any currently endorsed Training Package or accredited course packaged at Certificate I (maximum 1 unit), Certificate II or Certificate III (maximum 1 unit) levels.

Core Units

FDFOHS2001A	Participate in OHS processes
FDFOP2061A	Use numerical applications in the workplace
FDFOP2063A	Apply quality systems and procedures
FDFOP2064A	Provide and apply workplace information
MSMENV272	Participate in environmentally sustainable work practices

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

FBPOPR2032	Apply work procedures to maintain integrity of product
FDFFS2001A	Implement the food safety program and procedures

Group B

SIRRMER001	Produce visual merchandise displays
SIRRRTF001	Balance and secure point-of-sale terminal
SIRXPDK001	Advise on products and services
SIRXRSK001	Identify and respond to security risks

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Group C - Sector Specialist Units

Baking

FBPOPR2024	Operate a cooling, slicing and wrapping process
FBPOPR2055	Freeze dough
FBPPBK2001	Operate a cooling and slicing process
FBPPBK2002	Operate a pastry forming and filling process
FBPPBK2003	Manufacture rye crisp breads
FBPPBK2004	Manufacture wafer products
FBPPBK2005	Operate a doughnut making process
FBPPBK2006	Operate a griddle production process
FBPPBK2007	Operate a pastry production process

Beverages

FBPBEV2001	Operate a deaeration, mixing and carbonation process
FBPBEV2002	Manufacture roast and ground coffee
FBPBEV2003	Operate an ice manufacturing process

Confectionery

FBPCON2001	Examine raw ingredients used in confectionery
FBPCON2002	Operate a boiled confectionery process
FBPCON2003	Operate a chocolate conching process
FBPCON2004	Operate a chocolate depositing or moulding process
FBPCON2005	Operate a confectionery depositing process
FBPCON2006	Operate a granulation and compression process
FBPCON2007	Operate a panning process

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPCON2008	Operate a chocolate refining process
FBPCON2009	Operate a starch moulding process

Dairy processing

FBPDPR2001	Operate a butter churning process
FBPDPR2002*	Operate a butter oil process
FBPDPR2003	Operate a curd production and cutting process
FBPDPR2004	Operate a cooling and hardening process
FBPDPR2005	Operate a cheese pressing and moulding process
FBPDPR2006	Operate a fermentation process

Fruit and vegetables

FBPFAV2001	Apply hydro-cooling process to fresh produce

Grain processing

AHCBAC204	Prepare grain storages
FBPGRA2001	Operate a liquid, mash or block stockfeed process
FBPGRA2002	Recognise mill operations and technologies
FBPGRA2003	Operate a grain conditioning process
FBPGRA2004	Operate a grain cleaning process
FBPGRA2005	Operate a purification process
FBPGRA2006	Operate a scalping and grading process
FBPGRA2007	Operate a scratch and sizing process
FBPGRA2008	Operate a break roll process
FBPGRA2009	Operate a pelleting process

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPGRA2010	Handle grain in a storage area
TLIJ2003	Apply grain protection measures
TLIJ2004	Implement grain monitoring measures

Grocery products and supplies

FBPGPS2001	Operate a bleaching process
FBPGPS2002	Operate a complecting process
FBPGPS2003	Operate a deodorising process
FBPGPS2004	Operate a flake preparation process
FBPGPS2005	Operate a fractionation process
FBPGPS2006	Operate a hydrogenation process
FBPGPS2007	Operate an interesterification process
FBPGPS2008	Operate a neutralisation process
FBPGPS2009	Operate a soap splitting process
FBPGPS2010	Operate a winterisation process
FBPGPS2011	Operate a creamed honey manufacture process

Poultry

AMPA2006	Apply animal welfare and handling requirements
AMPA2174	Clean after operations - boning room
AMPP201	Operate a poultry dicing, stripping or mincing process
AMPP202	Operate a poultry evisceration process
AMPP203	Grade poultry carcass
AMPP204	Harvest edible poultry offal
AMPP205	Operate a poultry marinade injecting process
AMPP206	Operate a poultry washing and chilling process

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

AMPP207	Operate the bird receival and hanging process
AMPP208	Operate a poultry stunning, killing and defeathering process
FBPEGG2001	Work on an egg grading floor
FBPEGG2002 *	Operate egg grading and packing floor equipment

Cross sector

AHCWRK308	Handle bulk materials in storage area
AMPX207	Vacuum pack product
AMPX209	Sharpen knives
FBPOPR2001	Work effectively in the food processing industry
FBPOPR2002	Inspect and sort materials and product
FBPOPR2006	Operate a bulk dry goods transfer process
FBPOPR2007	Work in a freezer storage area
FBPOPR2008	Operate a bulk liquid transfer process
FBPOPR2009	Load and unload tankers
FBPOPR2010	Work with temperature controlled stock
FBPOPR2012	Maintain food safety when loading, unloading and transporting food
FBPOPR2014	Participate in sensory analyses
FBPOPR2017	Operate a blending, sieving and bagging process
FBPOPR2018	Operate a case packing process
FBPOPR2019	Fill and close product in cans
FBPOPR2020	Operate a form, fill and seal process
FBPOPR2021	Operate a fill and seal process
FBPOPR2022	Operate a high speed wrapping process

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPOPR2023	Operate a packaging process
FBPOPR2025	Manufacture extruded and toasted products
FBPOPR2026	Operate a forming or shaping process
FBPOPR2027	Dispense non-bulk ingredients
FBPOPR2028	Operate a mixing or blending process
FBPOPR2029	Operate a baking process
FBPOPR2031	Operate a coating application process
FBPOPR2033	Operate a depositing process
FBPOPR2034	Operate an evaporation process
FBPOPR2035	Operate an enrobing process
FBPOPR2036	Operate an extrusion process
FBPOPR2037	Operate a filtration process
FBPOPR2038	Operate a grinding process
FBPOPR2039	Operate a frying process
FBPOPR2040	Operate a heat treatment process
FBPOPR2041	Operate a mixing or blending and cooking process
FBPOPR2042	Operate a drying process
FBPOPR2043	Operate an homogenising process
FBPOPR2044	Operate a retort process
FBPOPR2045	Operate pumping equipment
FBPOPR2046	Operate a production process
FBPOPR2047	Operate a portion saw
FBPOPR2048	Pre-process raw materials
FBPOPR2049	Operate a reduction process
FBPOPR2050	Operate a separation process

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPOPR2051	Operate a spreads production process
FBPOPR2052	Operate a chocolate tempering process
FBPOPR2053	Operate a washing and drying process
FBPOPR2054	Operate a water purification process
FBPOPR2056	Operate a freezing process
FBPOPR2057	Operate a membrane process
FBPOPR2058	Operate a holding and storage process
FBPOPR2059	Operate a continuous freezing process
FBPOPR2060	Operate an automated cutting process
FDFSUG218A	Operate a boiler - basic
FDFSUG222A	Operate a waste water treatment system
FDFOP2003A	Clean equipment in place
FDFOP2004A	Clean and sanitise equipment
FDFOP2005A	Work in a socially diverse environment
FDFOP2011A	Conduct routine maintenance
FDFOP2013A	Apply sampling procedures
FDFOP2016A	Work in a food handling area for non-food handlers
FDFOP2030A	Operate a process control interface
FDFOP2032A *	Work in a clean room environment
MSL973001	Perform basic tests
PMBPROD211	Operate blow moulding equipment
PMBPROD270	Operate injection blow moulding equipment
TLIA2009	Complete and check import/export documentation

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

TLIA2021	Despatch stock
TLIA4025	Regulate temperature controlled stock
TLID2003	Handle dangerous goods/hazardous substances
TLID2004	Load and unload goods/cargo

Group D

BSBITU201	Produce simple word processed documents
BSBITU202	Create and use spreadsheets
BSBWOR204	Use business technology
FDFOP1003A	Carry out manual handling tasks
FDFOP2015A*	Apply principles of statistical process control
FDFPPL2001A	Participate in work teams and groups
HLTAID002 ^ **HLTAID010**	Provide basic emergency life support **Provide basic emergency life support (must be delivered from 1 July 2022)**
MSS402001	Apply competitive systems and practices
MSS402002	Sustain process improvements
MSS402010	Manage the impact of change on own work
MSS402021	Apply Just in Time procedures
MSS402030	Apply cost factors to work practices
MSS402031	Interpret product costs in terms of customer requirements
MSS402040	Apply 5S procedures
MSS402050	Monitor process capability
MSS402051	Apply quality standards
MSS402060	Use planning software systems in operations

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

MSS402061	Use SCADA systems in operations
MSS402080	Undertake root cause analysis
MSS402081	Contribute to the application of a proactive maintenance strategy
SITHFAB005*	Prepare and serve espresso coffee
TLIA2014	Use product knowledge to complete work operations
TLID2010	Operate a forklift
TLIK2010	Use infotechnology devices in the workplace

FBP20418 Certificate II in Pharmaceutical Manufacturing

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Qualification Description

This qualification describes the skills and knowledge for support roles within pharmaceutical manufacturing environments. Roles covered include equipment and facility cleaners, production machinery operators and packing line workers that work under routine supervision where the work is predictable and structured with limited judgement requirements.

Work must comply with good manufacturing practice, health and safety and environmental regulations and legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency:
  - 5 core units, plus
  - 7 elective units.

Elective units must ensure the integrity of the qualifications' Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 4 must be from electives Group A
- 3 from the remaining units listed in groups A or B, or any currently endorsed Training Package or accredited course.

Core Units

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPOPR2071	Provide and apply workplace information
FBPPHM2001	Follow work procedures to maintain Good Manufacturing Practice requirements
FBPPHM3004	Clean and sanitise facilities and equipment
FBPWHS2001	Participate in work health and safety processes
MSMENV272	Participate in environmentally sustainable work practices

Elective Units

Group A

FBPBPG3002	Operate the labelling process
FBPOPR1010	Carry out manual handling tasks
FBPOPR2002	Inspect and sort materials and product
FBPOPR2007	Work in a freezer storage area
FBPOPR2009	Load and unload tankers
FBPOPR2010	Work with temperature controlled stock
FBPOPR2023	Operate a packaging process
FBPPHM3002	Operate a pharmaceutical production process
FBPPHM3003	Work in a controlled environment
TLIG2007	Work in a socially diverse environment

Group B

AMPX207	Vacuum pack product
BSBWOR203	Work effectively with others
BSBWOR204	Use business technology
FBPOPR2069	Use numerical applications in the workplace
FBPOPR2070	Apply quality systems and procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

TLIA2014	Use product knowledge to complete work operations
TLIA2020	Replenish stock
TLIA2021	Despatch stock
TLID2003	Handle dangerous goods/hazardous substances
TLID2004	Load and unload goods/cargo
TLID2010	Operate a forklift
TLIK2010	Use infotechnology devices in the workplace
TLILIC0003	Licence to operate a forklift truck

FBP20518 Certificate II in Wine Industry Operations

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 5.1.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 2.0.

Qualification Description

This qualification describes the skills and knowledge required for entry level workers in the wine industry. These workers carry out routine work under supervision, in a range of sectors, including:

- process tasks in bottling and packaging, cellar operations and laboratory testing
- customer service tasks in cellar door
- tasks related to viticulture, harvesting and post-harvesting.

All work must be carried out to comply with workplace procedures, in accordance with state/territory food safety, and health and safety, regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

^ From 1 July 2022 the elective unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 13 units of competency:
  - 3 core units, plus
  - 10 elective units.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome.

The electives are to be chosen as follows:

- up to 10 may be selected from the elective units listed below
- up to 3 units may be selected from any currently endorsed Training Package or accredited course.

No more than 4 of the 10 electives selected can be coded with an AQF indicator above level 2 or reflect outcomes above AQF level 2.

Core Units

FBPFSY2001	Implement the food safety program and procedures
FBPOPR2070	Apply quality systems and procedures
FBPWHS2001	Participate in work health and safety processes

Elective Units

Group A Bottling and Packaging

FBPBPG2001	Operate the bottle supply process
FBPBPG2002	Operate the carton erection process
FBPBPG2003	Operate the carton packing process
FBPBPG2004	Operate the palletising process
FBPBPG2005	Operate the electronic coding process
FBPBPG2006	Operate the bottle capsuling process
FBPBPG2007	Operate manual bottling and packaging processes
FBPBPG2008	Perform basic packaging tests and inspections

Group B Cellar Door

FBPCDS2001	Conduct a standard product tasting
FBPCDS2002	Provide and present wine tourism information
FBPCDS2003	Sell cellar door products and services

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPCDS3001	Conduct winery and site tours
FBPWIN2003	Conduct sensory evaluation of wine
SITHFAB002	Provide responsible service of alcohol

Group C Cellar Operations

FBPCEL2001	Perform oak handling activities
FBPCEL2002	Perform fermentation operations
FBPCEL2003	Operate the ion exchange process
FBPCEL2005	Perform must draining operations
FBPCEL2006	Operate the crushing process
FBPCEL2007	Prepare and make additions and finings
FBPCEL2008	Carry out inert gas handling operations
FBPCEL2009	Carry out transfer operations

Group D Laboratory

MSL912001	Work within a laboratory or field workplace (induction)
MSL922001	Record and present data
MSL943004	Participate in laboratory or field workplace safety
MSL952001	Collect routine site samples
MSL952002	Handle and transport samples or equipment
MSL972001	Conduct routine site measurements
MSL973013	Perform basic tests

Group E Viticulture

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

AHCCHM201	Apply chemicals under supervision
AHCIRG215	Assist with low volume irrigation operations
AHCIRG217	Assist with pressurised irrigation operations
AHCMOM202	Operate tractors
AHCSOL202	Assist with soil or growing media sampling and testing
FBPVIT2001	Bench graft vines
FBPVIT2002	Carry out potting operations
FBPVIT2003	Hand prune vines
FBPVIT2004	Pick grapes by hand
FBPVIT2005	Maintain callusing environment
FBPVIT2006	Obtain and process rootlings
FBPVIT2007	Tend containerised nursery plants
FBPVIT2008	Train vines
FBPVIT2009	Plant vines by hand
FBPVIT2010	Take and process vine cuttings
FBPVIT2011	Operate vineyard equipment
FBPVIT2012	Identify and treat nursery plant disorders
FBPVIT2013	Recognise disorders and identify pests and diseases
FBPVIT2014	Perform pest control activities
FBPVIT2015	Carry out basic canopy maintenance
FBPVIT2016	Carry out hot water treatment
FBPVIT2018*	Support mechanical harvesting operations

Group F General

AHCWRK209	Participate in environmentally sustainable work practices

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 2.0.

Qualification Description

This qualification desdribes the skills and knowledge required for entry level workers in the sugar milling industry. These workers carry out routine work, under supervision, in a range of areas including sugar processing, cane supply and transport, and milling services.

All work must be carried out to comply with workplace procedures, in accordance with state/territory food safety, health and safety and environmental codes, regulations and legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
  - 3 core units, plus
  - 13 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualifications Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 6 from the electives listed below
- up to 7 may be selected from this or any other currently endorsed Training Package or accredited course.

Core Units

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPOPR1003	Communicate workplace information
FBPWHS1001	Identify safe work practices
MSMENV272	Participate in environmentally sustainable work practices

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

CPCCDO3011A*	Perform dogging
CPCCRI3012A*	Perform basic rigging
CPCCSC2002A*	Erect and dismantle basic scaffolding
FBPOPR2034	Operate an evaporation process
FBPORR2068	Operate a process control interface
FBPSUG1004	Check a cane sample for extraneous matter
FBPSUG1005	Manually clean and maintain housekeeping standards
FBPSUG2001	Lay sleepers for cane rail systems
FBPSUG2002	Lay rails for cane rail systems
FBPSUG2003	Lay skeleton track for cane rail system
FBPSUG2004	Operate tamping equipment
FBPSUG2005*	Construct turnouts
FBPSUG2006	Collect and prepare samples
FBPSUG2007	Conduct cane weighbridge operations
FBPSUG2008	Operate a tipping station
FBPSUG2009	Operate an extraction station
FBPSUG2010	Operate a juice clarification process

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPSUG2011	Operate a mud filtration process
FBPSUG2012	Chemically clean equipment
FBPSUG2013	Operate a pan station
FBPSUG2014	Operate a low grade fugal station
FBPSUG2015	Operate a high grade fugal station
FBPSUG2016	Operate a crystalliser station process
FBPSUG2017	Undertake simple fabrication
FBPSUG2019	Operate a bagasse fuel supply system
FBPSUG2020	Operate a coal fuel supply system
FBPSUG2021	Operate an ash separation system
FBPSUG2022	Operate a waste water treatment system
FBPSUG2023	Operate a cooling water system
FBPSUG2024	Perform standard tests on cane samples
FBPSUG2026	Perform general drilling operations
FBPSUG2027	Perform general lathe operations
FBPSUG2028	Perform general milling operations
FBPSUG3001	Drive a cane locomotive
MEM09002B	Interpret technical drawing
MEM12023A	Perform engineering measurements
MEM18001C	Use hand tools
MEM18002B	Use power tools/hand held operations
MEM18055B*	Dismantle, replace and assemble engineering components
MSMBLIC001	Licence to operate a standard boiler
RIICBM305D	Install pre-cast concrete bridge decks
RIIHAN305D	Operate a gantry or overhead crane

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

RIIMPO319E	Conduct backhoe/loader operations
TLID3035	Operate a boom type elevating work platform
TLID3036	Lift and move load using a mobile crane
TLILIC0003	Licence to operate a forklift truck
TLILIC0008	Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity)
TLILIC2014	Licence to drive a light rigid vehicle
TLILIC2015	Licence to drive a medium rigid vehicle
UEPOPL001	Licence to operate a steam turbine

Prerequisite requirements

Note: Units listed in the *Prerequisite requirement* column that have their own prerequisite requirements are shown with an asterisk (*)

Unit of competency	**Prerequisite requirement**
CPCCDO3011A Perform dogging	CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry

FBP30117 Certificate III in Food Processing

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Qualification Description

This qualification describes the skills and knowledge for food processing workers employed in the following sectors:

- grain processing (including stock feed, animal feeds, milling wheat, barley, oats and flour milling)
- baking (including large scale production of cakes, pastry, bread, biscuits and plant baking)
- retail baking
- beverages (including juices, soft drinks, cordials, aerated and still waters, energy drinks and other modified beverages, such as vitamin and antioxidant beverages, coffee, tea and ice)
- confectionery
- dairy processing
- fruit and vegetables
- grocery products and supplies (including honey, jams, spreads, sauces, dressings, condiments, spices, edible oils and fats and pasta)
- poultry.

This qualification is designed for production related roles that require application of industry specific skills and knowledge across a range of processes, including some technical and problem solving ability. It caters for multi-skilled outcomes and roles that include team leader functions within the production environment. All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, work health and safety and environmental codes, regulations and legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

^ From 1 July 2022 the elective unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 17 units of competency:
  - 5 core units plus
  - 12 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualifications Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives must include a minimum of 6 units beginning with the code FDF or FBP, and are to be chosen as follows:

- 1 must be selected from Group A
- 6 must be selected from Group B
- 5 elective units may be selected from:
  - Groups A, B or C
  - this Training Package or any other currently endorsed Training Package or accredited course.

Core Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

FDFFS2001A	Implement the food safety program and procedures
FDFFS3001A*	Monitor the implementation of quality and food safety programs
FDFOHS3001A	Contribute to OHS processes
FDFOP2064A	Provide and apply workplace information
MSMENV272	Participate in environmentally sustainable work practices

Elective Units

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

FDFOP3003A	Operate interrelated processes in a production system
FDFOP3004A	Operate interrelated processes in a packaging system

Group B – Sector specialist and cross sector units

AHCPHT401	Assess olive oil for style and quality
AMPP301	Operate a poultry carcase delivery system
AMPP302	Debone and fillet poultry product (manually)
FBPCHE3001	Conduct cheese making operations
FBPCHE3002	Carry out processes for a range of artisan cheeses
FBPFAV3001	Conduct chemical wash for fresh produce
FBPFAV3002	Program fresh produce grading equipment
FBPGRA2011*	Receive grain for malting
FBPGRA2012*	Prepare malted grain
FBPGRA2013	Blend and dispatch malt
FBPGRA3001	Work with micronutrients or additions in stockfeed manufacturing processes
FBPGRA3002	Apply knowledge of animal nutrition principles to stockfeed product
FBPGRA3003	Lead flour milling shift operations
FBPGRA3004	Control mill processes and performance
FBPOPR2003	Prepare and monitor beer yeast propagation processes
FBPOPR2004	Operate a beer packaging process
FBPOPR2005	Operate a beer filling process

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPOPR2011	Identify key stages and beer production equipment in a brewery
FBPOPR2013*	Operate a bright beer tank process
FBPOPR2015*	Operate a beer filtration process
FBPOPR2016*	Operate a beer maturation process
FBPOPR2030*	Operate a brewery fermentation process
FBPOPR2061*	Operate a wort production process
FBPOPR3001*	Control contaminants and allergens in the workplace
FBPOPR3002*	Prepare food products using basic cooking methods
FBPOPR3003	Identify cultural, religious and dietary considerations for food production

Cross sector units

BSBSMB405	Monitor and manage small business operations
BSBSMB407	Manage a small team
FBPPPL3001	Support and mentor individuals and groups
FBPPPL3002	Establish compliance requirements for work area
FDFOP2061A	Use numerical applications in the workplace
FDFOP3002A	Set up a production or packaging line for operation
FDFPPL3001A	Participate in improvement processes
FDFPPL3002A	Report on workplace performance
FDFPPL3004A	Lead work teams and groups
FDFPPL3005A*	Participate in an audit process
FDFTEC3001A*	Participate in a HACCP team
FDFTEC3002A	Implement the pest prevention program

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FDFTEC3003A	Apply raw materials, ingredient and process knowledge to production problems
MEM13003B	Work safely with industrial chemicals and materials
MSL973001	Perform basic tests
MSMENV472	Implement and monitor environmentally sustainable work practices
MSMSUP303	Identify equipment faults
MSMSUP330	Develop and adjust a production schedule
MSS403011	Facilitate implementation of competitive systems and practices
MSS403013	Lead team culture improvement
MSTGN3007	Monitor and operate trade waste process
SIRRINV002	Control stock
SIRXRSK002	Maintain store security
TLIA3015	Complete receival/despatch documentation
TLIA3016	Use inventory systems to organise stock control
TLIA3018	Organise despatch operations
TLIA3019	Organise receival operations
TLIA3026	Monitor storage facilities
TLIA3038	Control and order stock
TLIA3039	Receive and store stock

Group C

BSBCUS301	Deliver and monitor a service to customers
BSBSMB301	Investigate micro business opportunities
BSBSMB401	Establish legal and risk management requirements of small business

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

BSBSMB402	Plan small business finances
BSBSMB403	Market the small business
BSBSMB404	Undertake small business planning
BSBSMB406	Manage small business finances
BSBWRT301	Write simple documents
FDFOHS2001A	Participate in OHS processes
FDFOP2063A	Apply quality systems and procedures
HLTAID003 ^ **HLTAID011**	Apply first aid **Provide First Aid (must be delivered from 1 July 2022)**
MEM09002B	Interpret technical drawing
MEM30011A	Set up basic pneumatic circuits
MSL922001	Record and present data
MSMPER300*	Issue work permits
MSMSUP310	Contribute to the development of workplace documentation
MSMSUP390	Use structured problem-solving tools
MSMSUP405	Identify problems in fluid power system
MSMSUP406	Identify faults in electronic control
MSS402001	Apply competitive systems and practices
MSS402002	Sustain process improvements
MSS402010	Manage the impact of change on own work
MSS402021	Apply Just in Time procedures
MSS402030	Apply cost factors to work practices
MSS402031	Interpret product costs in terms of customer requirements
MSS402040	Apply 5S procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

MSS402050	Monitor process capability
MSS402051	Apply quality standards
MSS402060	Use planning software systems in operations
MSS402061	Use SCADA systems in operations
MSS402080	Undertake root cause analysis
MSS402081	Contribute to the application of a proactive maintenance strategy
MSS403002	Ensure process improvements are sustained
MSS403010	Facilitate change in an organisation implementing competitive systems and practices
MSS403021	Facilitate a Just in Time system
MSS403023	Monitor a levelled pull system of operations
MSS403040	Facilitate and improve implementation of 5S
MSS403041	Facilitate breakthrough improvements
MSS403051	Mistake proof an operational process
MSS404050*	Undertake process capability improvements
MSS404052	Apply statistics to operational processes
MSS404060	Facilitate the use of planning software systems in a work area or team
MSS404082	Assist in implementing a proactive maintenance strategy
MSS404083	Support proactive maintenance
TAEASS401	Plan assessment activities and processes
TAEASS402	Assess competence
TAEASS403	Participate in assessment validation
TAEDEL301	Provide work skill instruction

FBP30217 Certificate III in Plant Baking

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 4.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Qualification Description

This qualification describes the skills and knowledge for workers in a production bakery, where large scale production and packaging of bread and other baked products is undertaken.

The qualification is designed for production related roles that require application of specific plant baking skills and knowledge across a range of processes, including some technical and problem solving ability. It caters for multi-skilled outcomes and roles that include team leader functions within the production environment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, work health and safety and environmental codes, regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

^ From 1 July 2022 the elective unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 17 units of competency:
  - 8 core units plus
  - 9 elective units.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 4 must be selected from Group A
- 5 may be selected from:
  - Groups A or B
  - elsewhere in this training package, any other currently endorsed training package or accredited course packaged at Certificate II (maximum 2 units), Certificate III or Certificate IV (maximum of 3 units) levels.

Core Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

FBPPBK3001	Operate a dough mixing process
FBPPBK3002	Operate a final prove and baking process
FBPPBK3003	Operate a dough make up process
FDFFS2001A	Implement the food safety program and procedures
FDFFS3001A*	Monitor the implementation of quality and food safety programs
FDFOHS3001A	Contribute to OHS processes
FDFOP2064A	Provide and apply workplace information
MSMENV272	Participate in environmentally sustainable work practices

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

FBP30317 Certificate III in Cake and Pastry

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Qualification Description

This qualification describes the skills and knowledge of a pastry cook who bakes cake, pastry and biscuit products working in a commercial baking environment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, and work health and safety, regulations and legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

^ From 1 July 2022 the elective unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 15 units of competency:
  - 11 core units plus
  - 4 elective units.

Elective units must ensure the integrity of the qualification's Australian Quality Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 2 must be from those units listed in Group A and an additional 2 may be chosen from Group A
- up to 1 from those units listed in Group B

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- up to 2 from those units listed in Group C.

Core Units

FBPRBK2002	Use food preparation equipment to prepare fillings
FBPRBK3001	Produce laminated pastry products
FBPRBK3002	Produce non laminated pastry products
FBPRBK3008	Produce sponge cake products
FBPRBK3009	Produce biscuit and cookie products
FBPRBK3010	Produce cake and pudding products
FBPRBK3013	Schedule and produce cake and pastry production
FBPRBK3018	Produce basic artisan products
FDFFS2001A	Implement the food safety program and procedures
FDFOHS2001A	Participate in OHS processes
FDFOP2061A	Use numerical applications in the workplace

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

FBPRBK3003	Produce specialist pastry products
FBPRBK3004	Produce meringue products
FBPRBK3005	Produce basic bread products
FBPRBK4003*	Produce gateaux, tortes and entremets
SITXHRM001	Coach others in job skills

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Group B

SIRRMER002	Merchandise food products
SIRXPDK001	Advise on products and services
SIRXSLS001	Sell to the retail customer

Group C

FBPOPR3002*	Prepare food products using basic cooking methods
FBPOPR3003	Identify cultural, religious and dietary considerations for food production
FBPRBK3016	Control and order bakery stock
FBPRBK4004	Develop baked products
FDFTEC3001A*	Participate in a HACCP team
HLTAID003 ^ **HLTAID011**	Provide first aid **Provide First Aid (must be delivered from 1 July 2022)**

FBP30417 Certificate III in Bread Baking

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Qualification Description

This qualification describes the skills and knowledge of a bread baker who bakes bread products working in a commercial baking environment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, and work health and safety, regulations and legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

^ From 1 July 2022 the elective unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency:
  - 9 core units plus
  - 5 elective units.

Elective units must ensure the integrity of the qualification's Australian Quality Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 2 must be from those units listed in Group A and an additional 3 units may be chosen from Group A
- up to 1 from those units listed in Group B

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- up to 2 from those units listed in Group C.

Core Units

FBPRBK3005	Produce basic bread products
FBPRBK3006	Produce savoury bread products
FBPRBK3007	Produce specialty flour bread products
FBPRBK3012	Schedule and produce bread production
FBPRBK3014	Produce sweet yeast products
FBPRBK3018	Produce basic artisan products
FDFFS2001A	Implement the food safety program and procedures
FDFOHS2001A	Participate in OHS processes
FDFOP2061A	Use numerical applications in the workplace

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

FBPRBK3008	Produce sponge cake products
FBPRBK3011 *	Produce frozen dough products
FBPRBK3017 *	Operate plant baking processes
FBPRBK4001 *	Produce artisan bread products
FBPRBK2002	Use food preparation equipment to prepare fillings
SITXHRM001	Coach others in job skills

Group B

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

SIRRMER002	Merchandise food products
SIRXPDK001	Advise on products and services
SIRXSLS001	Sell to the retail customer

Group C

FBPOPR3002*	Prepare food products using basic cooking methods
FBPOPR3003	Identify cultural, religious and dietary considerations for food production
FBPRBK3016	Control and order bakery stock
FBPRBK4004	Develop baked products
FDFTEC3001A*	Participate in a HACCP team
HLTAID003 ^ **HLTAID011**	Provide first aid **Provide First Aid (must be delivered from 1 July 2022)**

Prerequisite requirements

Unit of competency	**Prerequisite requirement**
FBPRBK3011 Produce frozen dough products	FBPRBK3005 Produce basic bread products

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 19 units of competency:
  - 15 core units plus
  - 4 elective units.

Elective units must ensure the integrity of the qualification's Australian Quality Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 2 must be from those units listed in Group A and an additional 2 may be chosen from Group A
- up to 1 from those units listed in Group B

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- up to 2 from those units listed in Group C.

Core Units

FBPRBK2002	Use food preparation equipment to prepare fillings
FBPRBK3001	Produce laminated pastry products
FBPRBK3002	Produce non laminated pastry products
FBPRBK3005	Produce basic bread products
FBPRBK3006	Produce savoury bread products
FBPRBK3007	Produce specialty flour bread products
FBPRBK3008	Produce sponge cake products
FBPRBK3009	Produce biscuit and cookie products
FBPRBK3010	Produce cake and pudding products
FBPRBK3014	Produce sweet yeast products
FBPRBK3015	Schedule and produce bakery production
FBPRBK3018	Produce basic artisan products
FDFFS2001A	Implement the food safety program and procedures

FBP30617 Certificate III in Food Processing (Sales)

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Qualification Description

This qualification covers the sales specialisations within the food processing industry and targets those workers that provide sales advice and services for food manufacturing or retail food processing contexts.

The qualification is designed for roles that require the ability to perform a range of sales activities independently and as a team member, applying food processing technical skills and knowledge and problem solving. All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, work health and safety and environmental codes, regulations and legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

^ From 1 July 2022 the elective unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency:
  - 6 core units plus
  - 8 elective units.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elective units must ensure the integrity of the qualification's Australian Qualifications Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 2 must be selected from Group A
- 2 must be selected from Group B
- the remaining 4 units may be selected from:
  - Groups A, B or C
  - elsewhere in this training package, any other currently endorsed training package or accredited course at Certificate II (maximum of two units), Certificate III or Certificate IV (maximum of three units) levels.

Core Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

FDFFS2001A	Implement the food safety program and procedures
FDFFS3001A*	Monitor the implementation of quality and food safety programs
FDFOHS3001A	Contribute to OHS processes
FDFOP2061A	Use numerical applications in the workplace
FDFOP2064A	Provide and apply workplace information
MSMENV272	Participate in environmentally sustainable work practices

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

BSBCUS301	Deliver and monitor a service to customers
BSBMKG501	Identify and evaluate marketing opportunities
BSBMKG507	Interpret market trends and developments
BSBMKG514	Implement and monitor marketing activities

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

BSBSMB301	Investigate micro business opportunities
BSBSMB401	Establish legal and risk management requirements of small business
BSBSMB402	Plan small business finances
BSBSMB403	Market the small business
BSBSMB404	Undertake small business planning
BSBSMB405	Monitor and manage small business operations
BSBSMB406	Manage small business finances
BSBSMB407	Manage a small team
SIRRINV002	Control stock
SIRXRSK002	Maintain store security

Group B – Sector specialist and cross sector elective units

Sector specialist units

AHCPHT401	Assess olive oil for style and quality
AMPP301	Operate a poultry carcase delivery system
AMPP302	Debone and fillet poultry product (manually)
AMPR322	Prepare and produce value-added products
FBPFAV3001	Conduct chemical wash for fresh produce
FBPFAV3002	Program fresh produce grading equipment
FBPGRA3001	Work with micronutrients or additions in stockfeed manufacturing processes
FBPGRA3002	Apply knowledge of animal nutrition principles to stockfeed product
FBPOPR3001 *	Control contaminants and allergens in the work area
FBPOPR3002 *	Prepare food products using basic cooking methods

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPOPR3003	Identify cultural, religious and dietary considerations for food production

Cross sector units

FBPPPL3001	Support and mentor individuals and groups
FBPPPL3002	Establish compliance requirements for work area
FDFOP3002A	Set up a production or packaging line for operation
FDFPPL3001A	Participate in improvement processes
FDFPPL3002A	Report on workplace performance
FDFPPL3004A	Lead work teams and groups
FDFPPL3005A*	Participate in an audit process
FDFTEC3001A*	Participate in a HACCP team
FDFTEC3002A	Implement the pest prevention program
FDFTEC3003A	Apply raw materials, ingredient and process knowledge to production problems
MEM13003B	Work safely with industrial chemicals and materials
MSL973001	Perform basic tests
MSMENV472	Implement and monitor environmentally sustainable work practices
MSMSUP303	Identify equipment faults
MSMSUP330	Develop and adjust a production schedule
MSS403011	Facilitate implementation of competitive systems and practices
MSS403013	Lead team culture improvement

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

MSTGN3007	Monitor and operate trade waste
TLIA3015	Complete receival/despatch documentation
TLIA3016	Use inventory systems to organise stock control
TLIA3018	Organise despatch operations
TLIA3019	Organise receival operations
TLIA3026	Monitor storage facilities
TLIA3038	Control and order stock
TLIA3039	Receive and store stock

Group C

BSBWRT301	Write simple documents
FDFOHS2001 A	Participate in OHS processes
FDFOP2063A	Apply quality systems and procedures
HLTAID003 ^ **HLTAID011**	Apply first aid **Provide First Aid (must be delivered from 1 July 2022)**
MSL922001	Record and present data
MSMPER300*	Issue work permits
MSMSUP310	Contribute to the development of workplace documentation
MSMSUP390	Use structured problem-solving tools
MSMSUP405	Identify problems in fluid power system
MSMSUP406	Identify problems in electronic control
MSS402001	Apply competitive systems and practices
MSS402002	Sustain process improvements
MSS402010	Manage the impact of change on own work

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

MSS402021	Apply Just in Time procedures
MSS402030	Apply cost factors to work practices
MSS402031	Interpret product costs in terms of customer requirements

FBP30717 Certificate III in Rice Processing

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceuticals Training Package version 1.0.

Qualification Description

The qualification provides a general vocational outcome in rice production work that enables individuals to mill process and package rice grain products, mill rice flour and manufacture rice consumer products on an industrial scale.

Individuals with this qualification perform tasks involving a broad range of skills that are applied in a wide variety of contexts, which will involve discretion and judgement in selecting and operating equipment, coordinating resources and applying contingency measures during work.

Job roles vary across different industry sectors and may include:

- Rice miller
- Rice flour miller
- Rice production worker
- Rice packaging worker
- Rice food manufacturing worker.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, and work health and safety, regulations and legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Packaging Rules

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 15 units of competency made up of:
  - 8 core units plus
  - 7 elective units

Elective units must ensure the integrity of the qualification's Australian Quality Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 2 must be from group A
- 3 must be from any in group B, C, D and E
- 2 from the remaining units listed in groups A, B, C, D, E or F or any currently endorsed Training Package or accredited course packaged at Certificate III or Certificate IV, with no more than 1 unit packaged at Certificate IV.

Any combination of electives that meets the packaging rules can be selected for the award of the Certificate III in Rice Processing.

Where appropriate, electives may be packaged to provide a qualification with a specialisation area as follows:

- A minimum of 3 electives from Group B must be selected for award of the *Certificate III in Rice Processing (Rice Miller)*
- A minimum of 3 electives from Group C must be selected for award of the *Certificate III in Rice Processing (Rice Flour Miller)*
- A minimum of 3 electives from Group D must be selected for award of the *Certificate III in Rice Processing (Rice Product Manufacturer)*
- A minimum of 3 electives from Group E must be selected for award of the *Certificate III in Rice Processing (Rice Receival and Storage)*

Core Units

FDFFS2001A	Implement the food safety program and procedures
FDFFS3001A*	Monitor the implementation of quality and food safety programs
FDFOHS3001A	Contribute to OHS processes
FDFOP2063A	Apply quality systems and procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FDFPPL3004A	Lead work teams and groups
FDFSUG308A	Analyse and convey workplace information
FSKNUM31	Apply a wide range of mathematical calculations for work
MSL973001	Perform basic tests

Elective Units

Group A Rice Processing

FDFOP3002A	Set up a production or packaging line for operation
FDFOP3003A	Operate interrelated processes in a production system
FDFOP3004A	Operate interrelated processes in a packaging system
FDFTEC3003A	Apply raw materials, ingredient and process knowledge to production problems

Group B Rice Miller

FBPGRA3006	Implement a paddy receival and grain cleaning process
FBPGRA3007	Implement a rice blending and cleaning process
FBPGRA3008	Implement a rice colour sorting process
FBPGRA3011	Implement a rice grading process
FBPGRA3012	Implement a rice hulling and separation process
FBPGRA3015	Implement a rice whitening process

Group C Rice Flour Miller

FBPGRA3003	Lead flour milling shift operations
FBPGRA3004	Control mill processes and performance
FBPGRA3009	Implement a rice flour break process
FBPGRA3010	Implement a rice flour grading process

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPGRA3016	Implement a rice flour blending process

Group D Rice Product Manufacturer

FBPGRA3013	Implement a rice product manufacturing process
FBPOPR2044	Operate a retort process
FBPPBK2006	Operate a griddle production process
FBPPPL3002	Establish compliance requirements for work area
FDFBP3002A	Operate the labelling process
FDFPPL3001A	Participate in improvement processes

Group E Rice Receival and Storage

FBPGRA3005	Conduct rice harvest receivals
FBPGRA3014	Implement a rice seed preparation and storage system
FDFTEC3002A	Implement the pest prevention program

Group F General Electives

AHCBAC204	Prepare grain storages
FBPGRA2009	Operate a pelleting process
FBPGRA2010	Handle grain in a storage area
FBPGRA2014	Operate a rice vitamin enrichment process
FBPOPR2028	Operate a mixing or blending process
FBPOPR2036	Operate an extrusion process
FBPOPR2041	Operate a mixing or blending and cooking process
FBPOPR2042	Operate a drying process
FBPPPL4001*	Manage people in the work area

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPPPL4002	Plan and coordinate production equipment maintenance
FBPPPL4003	Schedule and manage production
FBPPPL4004*	Optimise a work process
FDFSUG218A	Operate a boiler - basic
FDFOP2015A*	Apply principles of statistical process control
FDFOP2030A	Operate a process control interface
FDFPPL3001A	Participate in improvement processes
FDFPPL3002A	Report on workplace performance
FDFPPL3005A*	Participate in an audit process
FDFTEC3001A*	Participate in a HACCP team
FDFTEC4003A*	Control food contamination and spoilage
FDFTEC4004A*	Apply basic process engineering principles to food processing
FDFTEC4005A	Apply an understanding of food additives
FDFTEC4008A	Apply principles of food packaging
MSMENV272	Participate in environmentally sustainable work practices.
MSMPER200	Work in accordance with an issued permit
MSMPER201	Monitor and control work permits
MSMPER300*	Issue work permits
MSMSUP303	Identify equipment faults
PMASUP420	Minimise environmental impact of process

FBP30821 Certificate III in Pharmaceutical Manufacturing

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 5.0.

Qualification Description

This qualification describes the skills and knowledge for production and packaging roles carried out under broad supervision within pharmaceutical manufacturing environments. Individuals with this qualification perform tasks involving a broad range of skills that are applied in a wide variety of contexts, which will involve discretion and judgement in selecting and operating equipment, coordinating resources and applying contingency measures during work.

Work must comply with good manufacturing practice, health and safety and environmental regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
  - 5 core units, plus
  - 11 elective units.

Elective units must ensure the integrity of the qualifications' Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 5 must be from group A
- 4 must be from group B
- 2 from the remaining units listed in groups A or B, or any currently endorsed Training Package or accredited course.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Core Units

BSBWHS311	Assist with maintaining workplace safety
FBPPHM3001	Apply Good Manufacturing Practice requirements
FBPPHM3002	Operate a pharmaceutical production process
FBPPHM3003	Work in a controlled environment
FBPPHM3004	Clean and sanitise facilities and equipment

Elective Units

Group A

FBPOPR2028	Operate a mixing or blending process
FBPOPR3005	Operate interrelated processes in a production system
FBPOPR3006	Operate interrelated processes in a packaging system
FBPPHM3005	Operate a concentration process
FBPPHM3006	Operate an extraction process
FBPPHM3008	Operate an aseptic fill and seal process
FBPPHM3009	Operate an aseptic form, fill and seal process
FBPPHM3010	Operate a compressing process
FBPPHM3011	Dispense pharmaceutical raw materials
FBPPHM3012	Operate an encapsulation process
FBPPHM3013	Operate a granulation process
FBPPHM3014	Operate a liquid manufacturing process
FBPPHM3015	Operate a tablet coating process
FBPPHM3017	Coordinate a label store
FBPPHM3018	Operate a sterilisation process using an autoclave
FBPPHM3019	Operate a chromatography manufacturing process

FBP30920 Certificate III in Wine Industry Operations

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 5.1.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 4.0.

Qualification Description

This qualification describes the skills and knowledge required for operational workers in the wine industry. These workers carry out skilled tasks under broad direction in a range of sectors, including:

- procedural and technical tasks in bottling and packaging, cellar operations and laboratory testing
- customer service tasks in cellar door
- tasks related to wine grape growing, harvesting and post-harvesting.

This qualification offers a general outcome as well as sector-specific specialisations.

All work must be carried out to comply with workplace procedures, in accordance with state/territory food safety, and work health and safety, regulations and legislation that apply to the workplace.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

^ From 1 July 2022 the elective unit HLTAID003 must no longer be delivered and will be replaced in the Packaging Rules by the unit HLTAID011 - for more information see: https://asqa.gov.au/news-events/news/reminder-about-superseded-hlt-first-aid-units

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 19 units of competency:
  - 4 core units, plus

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- 15 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- up to 15 from the elective units listed below, with no more than 6 units coded with an AQF level 2 indicator or that reflect AQF level 2 outcomes
- up to 4 units may be selected from any currently endorsed Training Package or accredited course that are coded with an AQF indicator above level 2 or reflect outcomes above AQF level 2
- no more than 5 units may be selected that are coded with an AQF indicator above level 3 or reflect outcomes above AQF level 3
- only one of the following units may be selected:
  - FBPCEL2007 Prepare and make additions and finings
  - FBPCEL3019 Prepare and apply complex additions and finings.

Any combination of electives that meets the packaging rules can be selected for the award of the *Certificate III in Wine Industry Operations*.

Where appropriate, electives may be packaged to provide a qualification with a specialisation area as follows.

- For the award of the *Certificate III in Wine Industry Operations (Bottling and Packaging)* at least 6 units from Group A Bottling and Packaging must be chosen
- For the award of the *Certificate III in Wine Industry Operations (Cellar Door)* at least 6 units from Group B Cellar Door must be chosen
- For the award of the *Certificate III in Wine Industry Operations (Cellar Operations)* at least 6 units from Group C Cellar Operations must be chosen
- For the award of the *Certificate III in Wine Industry Operations (Laboratory)* at least 6 units from Group D Laboratory must be chosen
- For the award of the *Certificate III in Wine Industry Operations (Viticulture)* at least 6 units from Group E Viticulture must be chosen.

Core Units

BSBWHS301	Maintain workplace safety
FBPFSY2001	Implement the food safety program and procedures
FBPPPL3003	Participate in improvement processes
FBPPPL3006	Report on workplace performance

Elective Units

Group A Bottling and Packaging

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPBPG2001	Operate the bottle supply process
FBPBPG2002	Operate the carton erection process
FBPBPG2003	Operate the carton packing process
FBPBPG2004	Operate the palletising process
FBPBPG2005	Operate the electronic coding process
FBPBPG2006	Operate the bottle capsuling process
FBPBPG2008	Perform basic packaging tests and inspections
FBPBPG3001	Operate the bottle filling process
FBPBPG3002	Operate the labelling process
FBPBPG3003	Operate the softpack filling process
FBPBPG3004	Operate the bottle sealing process
FBPBPG3005	Operate the tirage and transfer process
FBPBPG3006	Operate traditional sparkling wine processes
FBPBPG3007	Perform packaging equipment changeover
FBPBPG3008	Operate an automated carton packing process
FBPBPG3009	Operate an automated palletising process
FBPBPG4003	Coordinate wine operations packaging processes
FBPOPR3004	Set up a production or packaging line for operation
FBPOPR3006	Operate interrelated processes in a packaging system

Group B Cellar Door

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

FBPCDS2001	Conduct a standard product tasting
FBPCDS2002	Provide and present wine tourism information

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPCDS3001	Conduct winery and site tours
FBPCDS3002	Plan and deliver a wine tasting event
FBPCDS3003	Coordinate winery hospitality activities
FBPWIN2003	Conduct sensory evaluation of wine
FBPWIN3001*	Evaluate wines (advanced)
SIRXCEG004	Create a customer-centric culture
SIRXMKT003	Manage promotional activities
SITHFAB002	Provide responsible service of alcohol
SITHFAB012	Provide advice on Australian wines
SITHFAB013	Provide advice on imported wines

Group C Cellar Operations

FBPCEL2001	Perform oak handling activities
FBPCEL2002	Perform fermentation operations
FBPCEL2003	Operate the ion exchange process
FBPCEL2004	Perform heat exchange operations
FBPCEL2007	Prepare and make additions and finings
FBPCEL2008	Carry out inert gas handling operations
FBPCEL2009	Carry out transfer operations
FBPCEL3001	Handle and store spirits
FBPCEL3002	Operate the continuous clarification by separation (flotation) process
FBPCEL3003	Operate the concentration process
FBPCEL3004	Operate an earth filtration process
FBPCEL3005	Operate the pressing process
FBPCEL3006	Operate the fine filtration process

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPCEL3007	Operate clarification by separation (centrifugation) process
FBPCEL3008	Operate the rotary vacuum filtration process
FBPCEL3009	Operate the crossflow filtration process
FBPCEL3010	Operate the decanter process
FBPCEL3011	Operate the reverse osmosis process
FBPCEL3013	Perform rectification (continuous still) operations
FBPCEL3014	Prepare and monitor wine cultures
FBPCEL3017	Perform single column lees stripping (continuous still brandy) operations
FBPCEL3018	Perform dual column distillation (continuous still brandy) operations
FBPCEL3019	Prepare and apply complex additions and finings
FBPCEL4001	Coordinate wine operations vintage processes
FBPCEL4002	Coordinate wine operations clarification processes
FBPCEL4003	Coordinate wine operations filtration processes
FBPCEL4004	Coordinate wine operations general cellar processes

Group D Laboratory

MSL904002	Perform standard calibrations
MSL924003	Process and interpret data
MSL924004	Use laboratory application software
MSL933008	Perform calibration checks on equipment and assist with its maintenance
MSL973013	Perform basic tests
MSL973014	Prepare working solutions
MSL973015	Prepare culture media

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

MSL973016	Perform aseptic techniques
MSL973019	Perform microscopic examination
MSL974017	Prepare, standardise and use solutions

Group E Viticulture

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

AHCCHM304	Transport and store chemicals
AHCCHM307	Prepare and apply chemicals to control pest, weeds and diseases
AHCIRG328	Operate irrigation controller and sensor technology
AHCIRG343	Operate irrigation injection equipment
AHCIRG344	Implement an irrigation schedule
AHCIRG345	Install pressurised irrigation systems
AHCIRG347	Maintain pressurised irrigation systems
AHCPCM301	Implement a plant nutrition program
AHCSOL401	Sample soils and interpret results
FBPVIT2003	Hand prune vines
FBPVIT2011	Operate vineyard equipment
FBPVIT2012	Identify and treat nursery plant disorders
FBPVIT2013	Recognise disorders and identify pests and diseases
FBPVIT2015	Carry out basic canopy maintenance
FBPVIT3001	Coordinate vineyard operations
FBPVIT3003	Operate spreading and seeding equipment
FBPVIT3004*	Monitor and maintain nursery plants
FBPVIT3005	Install and maintain vine trellis

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPVIT3006	Field graft vines
FBPVIT3007*	Operate specialised canopy management equipment
FBPVIT3008	Operate a mechanical harvester
FBPVIT3009	Monitor and control vine disorders and damage
FBPVIT3010	Implement a soil management program

Group F General

AHCMOM202	Operate tractors
AHCMOM213	Operate and maintain chainsaws
AHCWRK309	Apply environmentally sustainable work practices
BSBINT303	Organise the importing and exporting of goods
BSBLDR403	Lead team effectiveness
BSBSMB407	Manage a small team
FBPFSY3001	Monitor the implementation of quality and food safety programs
FBPOPR2063	Clean equipment in place
FBPOPR2064	Clean and sanitise equipment
FBPOPR3005	Operate interrelated processes in a production system
FBPPPL3005	Participate in an audit process
FBPTEC3002	Implement the pest prevention program
FBPTEC4002	Apply principles of food packaging
FBPWIN2002	Communicate wine industry information
FBPWIN2003	Conduct sensory evaluation of wine
HLTAID003	Provide first aid
^ HLTAID011	**Provide First Aid (must be delivered from 1 July 2022)**

FBP31018 Certificate III in Sugar Milling Industry Operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 2.0.

Qualification Description

This qualification describes the skills and knowledge required for operational workers in the sugar milling industry. These workers carry out skilled tasks under broad direction in a range of areas including sugar processing, cane supply and transport, and milling services.

All work must be carried out to comply with workplace procedures, in accordance with state/territory food safety, health and safety and environmental codes, regulations and legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 24 units of competency:
  - 3 core units, plus
  - 21 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 9 from the electives listed below, with at least 3 from Group A
- up to 12 from the electives listed below, or from any currently endorsed Training Package or accredited course.

Core Units

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

BSBWHS201	Contribute to health and safety of self and others
FBPSUG3008	Analyse and convey workplace information
MSMENV272	Participate in environmentally sustainable work practices

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

CPCCDO3011A*	Perform dogging
CPCCRI3012A*	Perform basic rigging
FBPOPR2034	Operate an evaporation process
FBPPPL3004	Lead work teams and groups
FBPSUG2009	Operate an extraction station
FBPSUG2013	Operate a pan station
FBPSUG3002	Control cane traffic movements
FBPSUG3003	Adjust cane delivery schedules to meet daily milling requirements
FBPSUG3004*	Drive a master-slave locomotive
FBPSUG3005	Operate a sugar system
FBPSUG3006*	Monitor a sugar mill powerhouse
FBPSUG3007	Perform factory control tests
MSMBLIC002	Licence to operate an advanced boiler
TLILIC2016	Licence to drive a heavy rigid vehicle
TLILIC3017	Licence to drive a heavy combination vehicle

Group B

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry
CPCCSC2002A*	Erect and dismantle basic scaffolding
FBPOPR2068	Operate a process control interface
FBPSUG2001	Lay sleepers for cane rail systems
FBPSUG2002	Lay rails for cane rail systems
FBPSUG2003	Lay skeleton track for cane rail system
FBPSUG2004	Operate tamping equipment
FBPSUG2005*	Construct turnouts
FBPSUG2006	Collect and prepare samples
FBPSUG2007	Conduct cane weighbridge operations
FBPSUG2008	Operate a tipping station
FBPSUG2010	Operate a juice clarification process
FBPSUG2011	Operate a mud filtration process
FBPSUG2012	Chemically clean equipment
FBPSUG2014	Operate a low grade fugal station
FBPSUG2015	Operate a high grade fugal station
FBPSUG2016	Operate a crystalliser station process
FBPSUG2017	Undertake simple fabrication
FBPSUG2018	Undertake forming, bending and shaping
FBPSUG2019	Operate a bagasse fuel supply system
FBPSUG2020	Operate a coal fuel supply system
FBPSUG2021	Operate an ash separation system
FBPSUG2022	Operate a waste water treatment system
FBPSUG2023	Operate a cooling water system

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPSUG2024	Perform standard tests on cane samples
FBPSUG2025	Perform general planing and shaping operations
FBPSUG2026	Perform general drilling operations
FBPSUG2027	Perform general lathe operations
FBPSUG2028	Perform general milling operations
FBPSUG3001	Drive a cane locomotive
MSMBLIC001	Licence to operate a standard boiler
RIICBM305D	Install pre-cast concrete bridge decks
RIIHAN305D	Operate a gantry or overhead crane
RIIMPO319E	Conduct backhoe/loader operations
TLID3035	Operate a boom type elevating work platform
TLID3036	Lift and move load using a mobile crane
TLILIC0003	Licence to operate a forklift truck
TLILIC0008	Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity)
TLILIC2014	Licence to drive a light rigid vehicle
TLILIC2015	Licence to drive a medium rigid vehicle
UEPOPL001	Licence to operate a steam turbine

Prerequisite requirements

Note: Units listed in the *Prerequisite requirement* column that have their own prerequisite requirements are shown with an asterisk (*)

FBP40117 Certificate IV in Flour Milling

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Qualification Description

The qualification covers the skills and knowledge for mill managers and senior supervisors (above the shift miller level) who supervise operations across departments, set or participate in setting production targets and monitor key performance indicators for a flour mill. These roles require technical, leadership and business skills and knowledge to implement and manage systems and procedures to mill a wide range of flours.

It covers flour milling operations for all types of grain including wheat, oats, barley, corn, rice, sorghum, millet, rye, and non-grain flours such as peas and arrowroot for human consumption. All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, work health and safety and environmental codes, regulations and legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 22 units of competency:
  - 10 core units plus
  - 12 elective units.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elective units must ensure the integrity of the qualification's Australian Qualifications Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives must include a minimum of 3 units beginning with the code FDF or FBP, and are to be chosen as follows:

- 6 must be selected from Group A
- 6 may be selected from:
  - the remaining units listed in Groups A or B
  - elsewhere in this Training Package packaged at Certificate III (maximum of 5 units), Certificate IV, or Diploma (maximum of 2 units)
  - any other currently endorsed training package or accredited course packaged at Certificate III (maximum of 2 units), Certificate IV (maximum of 4 units) or Diploma (maximum of 2 units).

Core Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

FBPGRA3003	Lead flour milling shift operations
FBPGRA3004	Control mill processes and performance
FBPGRA4001	Control power and automation for milling processes
FBPGRA4002	Supervise testing processes for wheat and flour
FBPGRA4003	Manage mill logistics and support services
FBPGRA4004	Establish and supervise dust control procedures in a grain processing enterprise
FDFFS2001A	Implement the food safety program and procedures
FDFFS3001A*	Monitor the implementation of quality and food safety programs
FDFOHS4002A	Maintain OHS processes
MSMENV472	Implement and monitor environmentally sustainable work practices

Elective Units

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A

BSBLED401	Develop teams and individuals
BSBMGT402	Implement operational plan
BSBMGT403	Implement continuous improvement
BSBSMB407	Manage a small team
FBPPPL4001*	Manage people in the work area
FBPPPL4002	Plan and coordinate production equipment maintenance
FBPPPL4003	Schedule and manage production
FBPPPL4004*	Optimise a work process
FBPPPL4005	Manage supplier agreements and contracts
FBPPPL4006	Manage a work area within budget
FDFFST4002A	Monitor the development and implementation of a food QA system
FDFFST4003A	Apply digital technology in food processing
FDFFST4005A	Document processes and procedures for a food product
FDFFST4007A	Establish operational requirements for a food processing enterprise
FDFFST4012A	Apply water management principles to the food industry
FDFOP3003A	Operate interrelated processes in a production system
FDFOP3004A	Operate interrelated processes in a packaging system
FDFPPL3002A	Report on workplace performance
FDFPPL3005	Participate in audit processes

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

A*	
FDFPPL4005 A*	Establish process capability
FDFTEC4001 A	Determine handling processes for perishable food items
FDFTEC4002 A	Manage controlled atmosphere storage
FDFTEC4003 A*	Control food contamination and spoilage
FDFTEC4004 A*	Apply basic process engineering principles to food processing
FDFTEC4005 A	Apply an understanding of food additives
FDFTEC4006 A	Apply an understanding of legal requirements of food production
FDFTEC4007 A*	Describe and analyse data using mathematical principles
FDFTEC4008 A	Apply principles of food packaging
FDFTEC4009 A	Identify the physical and chemical properties of materials, food and related products
FDFTEC4010 A*	Manage water treatment processes
FDFTEC4011 A*	Participate in product recalls
MEM09002B	Interpret technical drawing
MEM30011A	Set up basic pneumatic circuits
MSMOPS400	Optimise process/plant area
MSMOPS401	Trial new process or product
MSMSUP405	Identify problems in fluid power system
MSMSUP406	Identify problems in electronic control systems

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

MSS014003	Optimise sustainability of a process or plant area
MSS014004	Develop team strategies for more sustainable use of resources
MSS015005	Develop required sustainability reports
MSS024003	Apply an understanding of environmental principles to a site
MSS403001	Review competitive systems and practices
MSS403002	Ensure process improvements are sustained
MSS403011	Facilitate implementation of competitive systems and practices
MSS403030	Improve cost factors in work practices
MSS403032	Analyse manual handling processes
MSS403051	Mistake proof an operational process
MSS404050	Undertake process capability improvements
MSS404052	Apply statistics to operational processes
MSS404081	Undertake proactive maintenance analyses
MSS404082	Assist in implementing a proactive maintenance strategy
MSS404083	Support proactive maintenance
PMBTECH406	Diagnose production equipment problems

Group B

AHCBAC204	Prepare grain storages
BSBCUS501	Manage quality customer service
BSBHRM405	Support the recruitment, selection and induction of staff
BSBINN301	Promote innovation in a team environment
BSBLDR403	Lead team effectiveness

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

BSBMGT401	Show leadership in the workplace
BSBWOR403	Manage stress in the workplace
BSBWOR404	Develop work priorities
BSBWRT401	Write complex documents
FBPGRA2003	Operate a grain conditioning process
FBPGRA2004	Operate a grain cleaning process
FBPGRA2005	Operate a purification process
FBPGRA2006	Operate a scalping and grading process
FBPGRA2007	Operate a scratch and sizing process
FBPGRA2008	Operate a break roll process
FBPGRA2010	Handle grain in a storage area
FDFOP2030A	Operate a process control interface
FDFTEC3002A	Implement the pest prevention program
MEM15001B	Perform basic statistical quality control
MSMSUP390	Use structured problem-solving tools
MSS402060	Use planning software systems in operations
MSS402061	Use SCADA systems in operations
MSS402080	Undertake root cause analysis
MSS403005	Facilitate use of a Balanced Scorecard for performance improvement
MSS403010	Facilitate change in an organisation implementing competitive systems and practices
MSS403013	Lead team culture improvement
MSS403021	Facilitate a Just in Time system
MSS403023	Monitor a levelled pull system of operations

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

MSS403040	Facilitate and improve implementation of 5S
MSS403041	Facilitate breakthrough improvements
MSS404053	Use DMAIC techniques
MSS404060	Facilitate the use of planning software systems in a work area or team
MSS404061	Facilitate the use of SCADA systems in a team or work area
RIIRIS201D	Conduct local risk control
TLIJ2004	Implement grain monitoring measures

FBP40217 Certificate IV in Baking

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Qualification Description

This Qualification describes the specialist technical skills and knowledge of an advanced bread baker, advanced pastry cook or advanced baker working in a commercial baking environment. It may be packaged to reflect a specialisation in advanced bread baking skills or in advanced pastry skills, or a combination of both.

This Qualification includes technical, artisan and creative skills and knowledge required to produce bakery products, solve baking problems, and ensure that baking and business operations are implemented and maintained to optimal performance.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, and work health and safety, regulations and legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Entry Requirements

To commence this qualification an individual must have:

- completed a Certificate III qualification in a field of study related to commercial baking, or
- at least 3 year’s full time relevant employment in a commercial baking environment.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency:
  - 7 core units plus
  - 7 elective units.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Electives must ensure the integrity of the qualification's Australian Quality Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- A minimum of 3 from Group A and B
- Up to 4 from Group C
- Up to 2 from any currently endorsed Training Package or accredited course that is packaged at a Certificate IV or Diploma level.

Any combination of electives that meets the packaging rules can be selected for the award of the Certificate IV in Baking.

Electives may be packaged to provide a qualification with a specialisation area as follows:

- A minimum of 5 electives from Group A must be selected for award of the Certificate IV in Baking (Advanced Bread)
- A minimum of 6 electives from Group B must be selected for award of the Certificate IV in Baking (Advanced Pastry)

Core Units

BSBSUS401	Implement and monitor environmentally sustainable work practices
FBPRBK3016	Control and order bakery stock
FBPRBK4004	Develop baked products
FBPRBK4006	Coordinate baking operations
FDFFS4001A	Supervise and maintain a food safety plan
FDFOHS4002A	Maintain OHS processes
SITXHRM001	Coach others in job skills

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Group A Advanced Bread

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPRBK3005	Produce basic bread products
FBPRBK3011	Produce frozen dough products
FBPRBK3017*	Operate plant baking processes
FBPRBK4001*	Produce artisan bread products
FBPRBK4002*	Develop advanced artisan bread methods
FBPRBK4007	Assess and evaluate bread products
FBPRBK4008	Apply bread baking science

Group B Advanced Pastry

FBPRBK3003	Produce specialist pastry products
FBPRBK3010	Produce cake and pudding products
FBPRBK4003*	Produce gateaux, tortes and entremets
FBPRBK4005	Apply advanced finishing techniques for specialty cakes
SITHPAT005*	Produce petit fours
SITHPAT006*	Produce desserts
SITHPAT008*	Produce chocolate confectionery
SITXFSA001	Use hygienic practices for food safety

Group C Bakery Operations

BSBCUS401	Coordinate implementation of customer service strategies
BSBFRA401	Manage compliance with franchisee obligations and legislative requirements
BSBSMB405	Monitor and manage small business operations

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

BSBSMB407	Manage a small team

Prerequisite requirements

Unit of competency	Prerequisite requirement
FBPRBK3017 Operate plant baking processes	FBPRBK3005 Produce basic bread products
FBPRBK4001 Produce artisan bread products	FBPRBK3005 Produce basic bread products
FBPRBK4002 Develop advanced artisan bread methods	FBPRBK4001 Produce artisan bread products
FBPRBK4003 Produce gateaux, tortes and entremets	FBPRBK3010 Produce cake and pudding products
SITHPAT005 Produce petit fours	SITXFSA001 Use hygienic practices for food safety
SITHPAT006 Produce desserts	SITXFSA001 Use hygienic practices for food safety
SITHPAT008 Produce chocolate confectionery	SITXFSA001 Use hygienic practices for food safety

FBP40318 Certificate IV in Food Processing

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 2.0.

Qualification Description

This qualification reflects the role of workers who work in supervisory or middle management roles within food processing environments. Workers contribute specialist technical skills and knowledge to solve food production problems and supervise the work of others. Emphasis is on monitoring the implementation and quality control of food processing systems and procedures for optimal performance.

Legislative and regulatory requirements apply to food safety and are enforced through state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 20 units of competency:
  - 8 core units, plus
  - 12 elective units, including up to 4 from any currently endorsed Training Package or accredited course.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome.

Core Units

BSBLDR401	Communicate effectively as a workplace leader
BSBPMG522	Undertake project work

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

BSBRSK401	Identify risk and apply risk management processes
BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements
FBPFSY4001	Supervise and maintain a food safety plan
FBPTEC4003	Control food contamination and spoilage
FBPTEC4007	Describe and analyse data using mathematical principles
MSMENV472	Implement and monitor environmentally sustainable work practices

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

BSBLDR402	Lead effective workplace relationships
BSBMGT401	Show leadership in the workplace
BSBRES411	Analyse and present research information
FBPAUD4001	Assess compliance with food safety programs
FBPFST4001	Apply food processing technologies
FBPFST4002	Carry out sampling and testing of milk at receival
FBPFST4003	Apply digital technology in food processing
FBPFST4005	Document food processes and supporting procedures
FBPFST4007	Establish operational requirements for a food processing enterprise
FBPFST4012	Apply water management principles to the food industry
FBPFST5001	Monitor refrigeration and air conditioning systems in food processing
FBPFST5002	Identify and implement required process control for a food processing operation

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPFST5003	Construct a process control chart for a food processing operation
FBPFST5009	Implement and review the processing of market milk and related products
FBPFST5010	Implement and review the preparation of milk for processing
FBPFST5011	Implement and review the processing of chocolate and sugar-panned products
FBPFST5012	Implement and review the processing of aerated confectioneries
FBPFST5013	Implement and review the production of gums and jellies
FBPFST5014	Implement and review the production of chocolate products
FBPFST5015	Implement and review the processing of chocolate
FBPFST5016	Implement and review the processing of high and low boil confectionery
FBPFST5017	Implement and review the processing of confectionery products
FBPFST5018	Implement and review the processing of chilled or frozen poultry products
FBPFST5019	Implement and review the processing of cooked poultry products
FBPFST5020	Implement and review the processing of egg based products
FBPFST5021	Implement and review processing of fruit, vegetables, nuts, herbs and spices
FBPFST5022	Implement and review the processing of fish and seafood products
FBPFST5023	Implement and review the production of milk fat products
FBPFST5024	Implement and review the production of fermented dairy products and dairy desserts
FBPFST5025	Implement and review the production of concentrated and dried dairy products

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPFST5026	Implement and review the production of ice creams and frozen dairy products
FBPFST5027	Implement and review the production of milk and related products by the membrane system
FBPFST5028	Implement and review the manufacturing and processing of edible fats and oils
FBPFST5029	Implement and review manufacturing, packaging and testing of beverage products
FBPFST5030	Implement and review manufacturing of cereal products
FBPFSY4002	Supervise and verify supporting programs for food safety
FBPOPR4001	Apply principles of statistical process control
FBPPPL4001*	Manage people in the work area
FBPPPL4002	Plan and coordinate production equipment maintenance
FBPPPL4003	Schedule and manage production
FBPPPL4004*	Optimise a work process
FBPPPL4005	Manage supplier agreements and contracts
FBPPPL4006	Manage a work area within budget
FBPPPL4007	Manage internal audits
FBPTEC4001	Determine handling processes for perishable food items
FBPTEC4002	Apply principles of food packaging
FBPTEC4004	Apply basic process engineering principles to food processing
FBPTEC4005	Apply an understanding of food additives to products
FBPTEC4006	Apply an understanding of legal compliance of food production
FBPTEC4008	Participate in product recalls
FBPTEC4010	Manage water treatment processes
FBPTEC4011*	Establish process capability

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

MSL934004	Maintain and calibrate instruments and equipment
MSMSUP390	Use structured problem-solving tools
MSS403013	Lead team culture improvement
MSS403040	Facilitate and improve implementation of 5S
MSS403041	Facilitate breakthrough improvements
MSS404081	Undertake proactive maintenance analyses
MSS404082	Assist in implementing a proactive maintenance strategy
MSS404083	Support proactive maintenance
PMBTECH406	Diagnose production equipment problems
SITXHRM002	Roster staff
TAEDEL301	Provide work skill instruction
TLIL3003	Conduct induction process

Prerequisite requirements

Unit of competency	**Prerequisite requirement**
FBPPPL4001 Manage people in the work area	FBPPPL3001 Support and mentor individuals and groups

FBP40418 Certificate IV in Food Science and Technology

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 3.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 2.0.

Qualification Description

This qualification targets those working in technical and supervisory roles covering product development, food safety and quality, food production and distribution, environmental functions, and the maintenance and monitoring of food processing systems. The job roles require specialist technical skills and knowledge in food science and technology to complete routine and non-routine tasks and functions, and workers have responsibility for their own functions and outputs, along with limited responsibility for the output of others.

This qualification offers an optional specialisation in Food Safety Auditing. Users interested in this option must refer to relevant state, territory and Commonwealth food safety legislation and the National Regulatory Food Safety Auditor Guideline and Policy for details of auditing requirements in low, medium and high-risk settings, and to understand the food safety auditing work context.

Legislative and regulatory requirements apply to food safety and are enforced through state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 20 units of competency:
  - 8 core units, plus
  - 12 elective units, including up to 4 from any currently endorsed Training Package or accredited course.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome.

Any combination of electives that meets the packaging rules can be selected for the award of the Certificate IV in Food Science and Technology.

Where appropriate, electives may be packaged to provide a qualification with a specialisation in Food Safety Auditing. All electives from Group A must be selected for the award of the Certificate IV in Food Science and Technology (Food Safety Auditing).

Core Units

BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements
FBPFST4004	Perform microbiological procedures in the food industry
FBPFST4011	Apply the principles of nutrition to food processing
FBPFSY4001	Supervise and maintain a food safety plan
FBPTEC4003	Control food contamination and spoilage skills
FBPTEC4007	Describe and analyse data using mathematical principles
MSL974020	Perform food tests
MSMENV472	Implement and monitor environmentally sustainable work practices

Elective Units

Group A - Food safety auditing

FBPAUD4001	Assess compliance with food safety programs
FBPAUD4002	Communicate and negotiate to conduct food safety audits
FBPAUD4003	Conduct food safety audits
FBPAUD4004	Identify, evaluate and control food safety hazards
FBPFST5006	Apply food microbiological techniques and analysis
FBPFSY3001	Monitor the implementation of quality and food safety programs
SIRRFSA001	Handle food safely in a retail environment

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Group B - General electives

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

FBPCHE5002	Produce acid-coagulated soft cheese
FBPCHE5003	Produce a range of rennet-coagulated cheeses
FBPCHE5004	Produce acid and heat coagulated cheese
FBPCHE5009*	Carry out sampling and interpret tests for cheese production
FBPFST4003	Apply digital technology in food processing
FBPFST4005	Document food processes and supporting procedures
FBPFST4006	Apply food preservation technologies
FBPFST4007	Establish operational requirements for a food processing enterprise
FBPFST4008	Preserve food in cans or sealed containers
FBPFST4009	Label foods according to legislative requirements
FBPFST4010	Apply sensory analysis in food processing
FBPFST4012	Apply water management principles to the food industry
FBPFST5003	Construct a process control chart for a food processing operation
FBPFST5009	Implement and review the processing of market milk and related products
FBPFST5014	Implement and review the production of chocolate products
FBPFST5016	Implement and review the processing of high and low boil confectionery
FBPFST5017	Implement and review the processing of confectionery products
FBPFST5021	Implement and review processing of fruit, vegetables, nuts, herbs and spices

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPFST5024	Implement and review the production of fermented dairy products and dairy desserts
FBPFST5028	Implement and review the manufacturing and processing of edible fats and oils
FBPFST5030	Implement and review manufacturing of cereal products
FBPFSY4002	Supervise and verify supporting programs for food safety
FBPOPR4001	Apply principles of statistical process control
FBPPPL3003	Participate in improvement processes
FBPPPL4007	Manage internal audits
FBPTEC4001	Determine handling processes for perishable food items
FBPTEC4002	Apply principles of food packaging
FBPTEC4004	Apply basic process engineering principles to food processing
FBPTEC4005	Apply an understanding of food additives
FBPTEC4006	Apply an understanding of legal requirements of food production
FBPTEC4008	Participate in product recalls
FBPTEC4009	Identify the physical and chemical properties of materials, food and related products
FBPTEC4010	Manage water treatment processes
FBPTEC4011*	Establish process capability
MSL973013	Perform basic tests
MSL974019	Perform chemical tests and procedures
MSL974021	Perform biological procedures
MSMOPS401	Trial new process or product
MSMSUP390	Use structured problem-solving tools

Prerequisite requirements

FBP40518 Certificate IV in Pharmaceutical Manufacturing

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Qualification Description

This qualification reflects the skills and knowledge for team leaders, supervisors and specialist technical roles within pharmaceutical manufacturing environments. The qualification includes technical skills, problem solving and supervisory skills to operate, monitor and improve the performance of pharmaceutical manufacturing systems, processes and team members.

Work must comply with good manufacturing practice, health and safety and environmental regulations and legislation that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
  - 8 core units, plus
  - 8 elective units.

Elective units must ensure the integrity of the qualifications' Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- 4 must be from group A
- 4 from the remaining units listed in groups A or B, or any currently endorsed Training Package or accredited course packaged at Certificate III, Certificate IV or Diploma, with no more than 2 units packaged at Certificate III or Diploma.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Core Units

BSBSMB407	Manage a small team
BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements
FBPPHM4001	Monitor and maintain good manufacturing practice requirements
FBPPHM4002	Prepare and review workplace documentation to support good manufacturing practice requirements
FBPPHM4003	Facilitate contamination control
FBPPHM4005	Participate in validation of pharmaceutical manufacturing processes
FBPPHM4006	Respond to non-conformance
FBPPPL3006	Report on workplace performance

Elective Units

Group A

FBPOPR3005	Operate interrelated processes in a production system
FBPOPR3006	Operate interrelated processes in a packaging system
FBPPHM3002	Operate a pharmaceutical production process
FBPPHM3003	Work in a controlled environment
FBPPHM3004	Clean and sanitise facilities and equipment
FBPPHM4004	Participate in change control procedures
FBPPPL4002	Plan and coordinate production equipment maintenance
FBPTEC4007	Describe and analyse data using mathematical principles
FBPTEC4011*	Establish process capability
MSMOPS400	Optimise process/plant area
MSMSUP406	Identify faults in electronic control
MSMWHS401	Assess risk

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

MSS403011	Facilitate implementation of competitive systems and practices
MSS403032	Analyse manual handling processes
MSS403085	Ensure process improvements are sustained
MSS403087	Mistake proof an operational process
MSS404052	Apply statistics to operational processes
MSS404061	Facilitate the use of SCADA systems in a team or work area
MSS404082	Assist in implementing a proactive maintenance strategy
MSS404084	Undertake process capability improvements
PMBTECH406	Diagnose production equipment problems

Group B

BSBHRM405	Support the recruitment, selection and induction of staff
BSBINN301	Promote innovation in a team environment
BSBLDR402	Lead effective workplace relationships
BSBLDR403	Lead team effectiveness
BSBLED401	Develop teams and individuals
BSBMGT401	Show leadership in the workplace
BSBMGT402	Implement operational plan
BSBMGT403	Implement continuous improvement
BSBRES411	Analyse and present research information
BSBWOR403	Manage stress in the workplace
BSBWOR404	Develop work priorities
FBPOPR2069	Use numerical applications in the workplace
FBPOPR4001	Apply principles of statistical process control

FBP40619 Certificate IV in Artisan Fermented Products

Modification History

Release	Comments
Release 1	This version released with FBP Food, beverage and Pharmaceutical Training Package Version 3.0.

Qualification Description

This qualification reflects the role of those using artisanal methods to produce fermented food and/or beverage products, such as beer, spirits, miso, table olives and fermented meat products. In this role, makers analyse materials and products, exercising judgement to guide the fermentation process and the work of others.

This qualification offers specialisations in:

- Brewing
- Distilling, and
- Food and non-alcoholic beverages.

Individuals with this qualification apply a broad range of specialised skills and knowledge in varied contexts that involve selecting and operating equipment, coordinating resources and finding solutions to routine and non-routine problems as they arise. They may also have limited responsibility for the organisation of others.

No licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing and food businesses exist, so local requirements must be checked. All work must comply with Australian food safety standards and relevant codes of practice.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 22 units of competency:
  - 9 core units plus
  - 13 elective units.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 10 different units from Group A, B, C and/or D
- up to 3 units from this or any other endorsed training package or accredited course.

Any combination of electives that meets the rules above can be selected for the award of the *FBP40619 Certificate IV in Artisan Fermented Products* providing one of the electives chosen is *FBPTEC4015 Manage and propagate yeast or FBPTEC4022 Prepare starter cultures for fermentation.*

Where appropriate, electives may be packaged to provide a qualification with a specialisation.

Packaging for Specialisations

Electives must be packaged to provide a qualification with a specialisation area as follows:

- All Group A electives must be selected for the award of the *FBP40619 Certificate IV in Artisan Fermented Products (Brewing)*, plus at least 4 units not already selected from Group B, C and/or D and up to 3 units from this or any other endorsed training package or accredited course
- All Group B electives must be selected for the award of the *FBP40619 Certificate IV in Artisan Fermented Products (Distilling)* plus 3 units not already selected from Group A, C and/or D or from this or any other endorsed training package or accredited course
- All Group C electives must be selected for the award of the *FBP40619 Certificate IV in Artisan Fermented Products (Food and non-alcoholic beverages)* plus at least 6 different units from Group A, B and/or D and up to 3 units from this or any other endorsed training package or accredited course.

Core Units

FBPFST4009	Label foods according to legislative requirements
FBPFST4013	Interpret and respond to food and/or beverage test results
FBPFST4014	Apply sensory analysis in food and/or beverage production
FBPFSY5001	Develop a HACCP-based food safety plan
FBPTEC4003	Control food contamination and spoilage
FBPTEC4006	Apply an understanding of legal requirements of food production
FBPTEC4012	Manage raw materials
FBPWHS4002	Maintain work health and safety processes
MSL973013	Perform basic tests

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elective Units

Group A – Brewing

FBPBPG4002	Manage filling and packaging of fermented beverages
FBPTEC3003	Filter fermented beverages
FBPTEC4013	Manage wort production for brewing
FBPTEC4014	Manage cellar operations
FBPTEC4015	Manage and propagate yeast
FBPTEC4021	Apply regulatory requirements to the production of alcoholic beverages

Group B – Distilling

FBPTEC3003	Filter fermented beverages
FBPTEC3004	Prepare, fill and store barrels for aging spirits
FBPTEC4014	Manage cellar operations
FBPTEC4015	Manage and propagate yeast
FBPTEC4016	Produce fruit-based wash for distillation
FBPTEC4017	Produce grain-based wash for distillation
FBPTEC4018	Manage still operations to produce white spirits
FBPTEC4019	Manage still operations to produce brown spirits
FBPTEC4020	Blend spirits
FBPTEC4021	Apply regulatory requirements to the production of alcoholic beverages

Group C – Food and non-alcoholic beverages

FBPFST5031	Identify the microbiological and biochemical properties of fermented food and/or beverages
FBPTEC4002	Apply principles of food packaging

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPTEC4022	Prepare starter cultures for fermentation
FBPTEC4023	Control and monitor fermentation

Group D – Other electives

AHCBUS516	Develop and review a business plan
BSBSMB401	Establish legal and risk management requirements of small business
BSBSMB402	Plan small business finances
FBPBPG4001	Manage bottling and packaging processes
FBPCEL2009	Carry out transfer operations
FBPFST5008	Develop a new food product
FBPFSY4001	Supervise and maintain a food safety plan
FBPOPR3004	Set up a production or packaging line for operation
FBPPPL3003	Participate in improvement processes
FBPPPL3004	Lead work teams and groups
FBPPPL4002	Plan and coordinate production equipment maintenance
FBPPPL4003	Schedule and manage production
FBPPPL4007	Manage internal audits
FBPPPL4008	Prepare and present artisan food and/or beverages
FBPTEC3001	Apply raw materials, ingredient and process knowledge to production problems
FBPTEC4008	Participate in product recalls
FBPTEC4024	Produce fermented and dry-cured meat products
FBPTEC5002	Manage utilities and energy for a production process
FBPTEC5003	Design an artisan food production facility
MSL922001	Record and present data

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

MSMENV272	Participate in environmentally sustainable work practices
SIRRFSA001	Handle food safely in a retail environment
TLIA3016	Use inventory systems to organise stock control

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 3.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 2.0.

Qualification Description

This qualification reflects the role of workers who apply specialist knowledge and skills in food science and technology to food product development and to quality assurance of food manufacturing. They conduct a wide range of specialist tasks to develop, monitor and evaluate food products, including production trials.

Workers contribute to the modification of standard operating procedures (SOPs) and enterprise methods when necessary. They may also have a role in the planning new work and monitoring resources in their work area.

Legislative and regulatory requirements apply to food safety and are enforced through state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 20 units of competency:
  - 11 core units, plus
  - 9 elective units including up to 3 from any currently endorsed Training Package or accredited course

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Core Units

BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements
FBPFST4004	Perform microbiological procedures in the food industry
FBPFST5002	Identify and implement required process control for a food processing operation
FBPFST5005	Examine the biochemical properties of food
FBPFST5006	Apply food microbiological techniques and analysis
FBPFST6001	Develop, manage and maintain quality systems for food processing
FBPFSY4001	Supervise and maintain a food safety plan
FBPFSY5001	Develop a HACCP-based food safety plan
FBPTEC4007	Describe and analyse data using mathematical principles
MSL975038	Conduct sensory analysis
MSMENV472	Implement and monitor environmentally sustainable work practices

Elective Units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

BSBPMG522	Undertake project work
FBPCHE5002	Produce acid-coagulated soft cheese
FBPCHE5003	Produce a range of rennet-coagulated cheeses
FBPCHE5004	Produce acid and heat coagulated cheese
FBPCHE5009*	Carry out sampling and interpret tests for cheese production
FBPFST4006	Apply food preservation technologies
FBPFST5003	Construct a process control chart for a food processing

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

	operation
FBPFST5004	Specify and monitor the nutritional value of processed food
FBPFST5007	Monitor the development and implementation of a food QA system
FBPFST5008	Develop a new food product
FBPFST5009	Implement and review the processing of market milk and related products
FBPFST5010	Implement and review the preparation of milk for processing
FBPFST5011	Implement and review the processing of chocolate and sugar-panned products
FBPFST5012	Implement and review the processing of aerated confectioneries
FBPFST5013	Implement and review the production of gums and jellies
FBPFST5014	Implement and review the production of chocolate products
FBPFST5015	Implement and review the processing of chocolate
FBPFST5016	Implement and review the processing of high and low boil confectionery
FBPFST5017	Implement and review the processing of confectionery products
FBPFST5018	Implement and review the processing of chilled or frozen poultry products
FBPFST5019	Implement and review the processing of cooked poultry products
FBPFST5020	Implement and review the processing of egg based products
FBPFST5021	Implement and review processing of fruit, vegetables, nuts, herbs and spices
FBPFST5022	Implement and review the processing of fish and seafood products

FBP50218 Diploma of Food Safety Auditing

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 2.0.

Qualification Description

This qualification reflects the role of workers who apply specialist knowledge and skills in food safety for auditing purposes. They conduct a range of audits in different environments to monitor food quality and safety according to relevant legislation, including food standards included in the Australia New Zealand Food Standards Code and industry codes of practice relating to validation and verification of a food safety program, and the audit requirements detailed in the National Regulatory Food Safety Auditor Guideline and Policy.

Regulatory food safety audits in Australia are covered by state, territory and Commonwealth legislative frameworks that support the requirements of the National Food Safety Audit Policy 2009. Users must check requirements with the relevant regulatory authority before delivery.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
  - 11 core units, plus
  - 5 elective units including up to 3 from any currently endorsed Training Package or accredited course.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome.

Core Units

BSBAUD503	Lead a quality audit

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

BSBAUD504	Report on a quality audit
FBPAUD4001	Assess compliance with food safety programs
FBPAUD4002	Communicate and negotiate to conduct food safety audits
FBPAUD4003	Conduct food safety audits
FBPAUD4004	Identify, evaluate and control food safety hazards
FBPFST5006	Apply food microbiological techniques and analysis
FBPFST6001	Develop, manage and maintain quality systems for food processing
FBPFSY5001	Develop a HACCP-based food safety plan
FBPTEC4006	Apply an understanding of legal requirements of food production
FBPTEC4007	Describe and analyse data using mathematical principles

Electives

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

BSBAUD501	Initiate a quality audit
FBPAUD5001*	Audit bivalve mollusc growing and harvesting processes
FBPAUD5002*	Audit a cook chill process
FBPAUD5003*	Audit a heat treatment process
FBPAUD5004*	Audit manufacturing of ready-to-eat meat products
FBPFST4009	Label foods according to legislative requirements
FBPFST5005	Examine the biochemical properties of food

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

FBPPPL4007	Manage internal audits
FBPPPL5001	Design and maintain programs to support legal compliance
FBPTEC4009	Identify the physical and chemical properties of materials, food and related products

Prerequisite requirements

FBP50319 Diploma of Artisan Cheesemaking

Modification History

Release	Comments
Release 1	This version released with FBP Food, beverage and Pharmaceutical Training Package Version 3.0.

Qualification Description

This qualification reflects the role of those making premium, high-value cheeses on a small scale, where the provenance of the milk is known, and where specialised techniques that are controlled and monitored by the cheesemaker are used. In this role, makers analyse materials and products exercising judgement to guide the cheesemaking process and the work of others.

Individuals with this qualification apply integrated technical and theoretical concepts in varied contexts, to analyse situations, synthesize information, and design and evaluate approaches to sometimes unpredictable problems. They use initiative and judgement to organise the work of self and others, and plan and coordinate the work of teams.

No licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing and food businesses exist, so local requirements must be checked. All work must comply with Australian food safety standards and relevant codes of practice.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
  - 11 core units plus
  - 5 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- up to 5 units from the elective list
- up to 2 units from this or any other endorsed training package or accredited course.

FBPBPG2006 Operate the bottle capsuling process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate and shut down a range of semi-automated and automated bottling and packaging equipment involved in the bottle capsuling process.

The unit applies to individuals who work under general supervision in bottling and packaging and are responsible for operating and monitoring a bottle capsuling process and associated equipment.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Bottling and Packaging (BPG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to operate bottle capsuling equipment	1.1 Confirm work instructions, including identifying potential health and safety in the workplace hazards and controls with supervisor

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Select, fit and use appropriate personal protective equipment 1.3 Ensure that product and dry goods are available to meet bottle capsuling requirements 1.4 Ensure that services are available and ready for operation 1.5 Prepare bottle capsuling equipment and check to confirm readiness for use 1.6 Setup equipment to meet bottle capsuling requirements
2. Operate and monitor the bottle capsuling process	2.1 Start up bottle capsuling equipment according to operating instructions 2.2 Monitor control points to confirm performance is maintained within equipment operation specification 2.3 Ensure bottles are supplied according to requirements 2.4 Monitor bottle capsuling equipment to confirm operating condition 2.5 Identify, rectify and report out-of-specification end product, process and equipment performance according to workplace procedures 2.6 Liaise with operators in other work areas to ensure ongoing bottling process runs efficiently and effectively
3. Shut down the bottle capsuling process	3.1 Shut down bottle capsuling equipment according to operating instructions 3.2 Prepare bottle capsuling equipment for cleaning according to workplace procedures
4. Conduct housekeeping activities	4.1 Carry out cleaning procedures 4.2 Collect, treat and dispose of or recycle waste generated by both the process and cleaning procedures 4.3 Record workplace information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Reading	• Interpret key messages in standard operating procedures
Navigate the world of work	• Follow clear instructions within defined level of responsibility • Recognise organisational expectations and follows explicit protocols and procedures • Seek clarification when required
Get the work done	• Respond to routine problems using step by step instruction and procedures

Assessment Requirements for FBPBPG2006 Operate the bottle capsuling process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up, operated and shut down all items of equipment in the bottle capsuling process on at least one occasion, including:

- confirming equipment is ready for operation, including:
  - cleaning and sanitation processes are completed
  - capsule magazines, wax disc hoppers and wax pots are operational
  - any adjacent coding equipment is set up and operational
  - line controls (conveyors) are operational
  - line lube is operational and being correctly applied
  - heat shrink settings are adjusted to suit capsule type
  - metal-spinner tension is correct for capsule type
  - equipment is set for correct bottle height
  - hot melt for wax disc application is operational
  - bottle feeds are filled with correct screws and stars and accurately aligned
- monitoring and adjusting process equipment to achieve required quality outcomes, ensuring:
  - compressed air pressure is at correct level
  - supply and quality of bottles to be capsuled
  - fill heights of bottles to be capsuled
  - clarity of content in bottles being capsuled
  - ongoing quality and appearance (shrinkage and fit) of capsule application
  - ongoing quality of materials used in the process
  - glue application and supply to wax disc process
- taking corrective action in response to typical faults and inconsistencies
- liaising with other work areas involved in the packaging process

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- completing workplace records as required
- applying safe work practices and identifying workplace health and safety hazards and controls.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of bottle capsuling equipment
- key features of bottle capsuling equipment and components
- links to related processes
- effect of process stages on end product
- quality characteristics and uses of end product
- effect of product and materials on process outcomes
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services required
- significance and methods of monitoring control points
- common causes of variation and corrective action required
- technological advances that include automation, such as use of robots
- health and safety in the workplace hazards and controls
- routine maintenance requirements
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- recording requirements and procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - bottle capsuling equipment
  - bottle capsuling resources and consumables
  - tools and equipment for adjusting and maintaining equipment
  - personal protective equipment
- specifications:
  - work procedures and operating instructions or instructions.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPBPG3008 Operate an automated carton packing process

Modification History

Release	Comments
Release 1	This version released with Food, Beverage and Pharmaceutical Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate and shut down an automated carton packing process using a range of complex equipment, including a case packing machine, divider inserter, case sealer, conveyers and other quality control equipment.

The unit applies to individuals who work under broad direction in a packaging environment and are responsible for operating and monitoring a carton packing process, including safety compliance, production changeovers, consumables, cleaning and solving problems that arise with the process. Operators are responsible for solving problems that arise with machinery and reporting unresolved problems to technical specialists.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety and food safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FBPBPG3008 Operate an automated carton packing process

Modification History

Release	Comments
Release 1	This version released with Food, Beverage and Pharmaceutical Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has independently set up, operated, and shut down two automated packing processes for different work orders. Each process must use a conveyor fed automatic case packing machine packing at least 12,000 containers per hour, and include at least two of the following:

- divider inserter
- case sealer
- check weigher or other quality inspection device
- conveyer controls.

The processes must package at least two of the following carton types:

- 4-pack
- 6-pack
- 12-pack
- 18-pack
- 24-pack
- 30-pack.

For each process, the individual must have safely and efficiently performed the following:

- identified, rectified and/or reported machinery faults, including:
  - defective tulip heads
  - carton divider problems
  - glue application system problems
- reset machinery that is creating products that do not meet specifications
- accurately and effectively handed over a packing process to another team member
- communicated effectively with a supervisor and at least one of the following:
  - maintenance team member
  - laboratory or quality assurance team member

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - bottling and packaging team member
  - logistics team member
- accurately completed workplace production records.

The individual must also complete a packing run changeover that requires a complete machine changeover, including the picking head and centring frame, according to workplace safety and time requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- product knowledge related to the containers to be packaged as stipulated in the performance evidence, including:
  - size, weight and volume
  - client or receiver requirements or specifications
- operating principles of machinery and equipment, including:
  - conveyor fed automatic case packing machine capable of packing at least 12,000 containers per hour
  - divider inserter
  - case sealer
  - check weigher
  - conveyer controls
- features and functions of machinery and equipment, including:
  - manufacturer and workplace instructions for safe operation
  - control panels and ancillary controls
  - operating capacities, efficiencies and applications
  - location and purpose of guards, rails and sensors
  - feedback instrumentation
  - services required, including compressed air, electricity and water
  - cleaning and maintenance requirements
- machinery and equipment checks, including:
  - pre-start checks, including emergency stop checks
  - lock-out and tag-out procedures, including return to service after isolation
- the interrelationships between the bottling, carton packing and palletising
- product and process changeover procedures and responsibilities
- quality control requirements, processes and actions, including:
  - packing order specifications
  - requirements of containers, variation in containers and the packing process
  - methods used to check quality
  - common causes of carton packing quality issues and corrective action required, including removal of out-of-specification containers and cartons

  - planned sampling and testing associated with process monitoring and control
  - responding to machinery alerts and notifications
  - recording of results
  - isolating samples for testing
- product identification and traceability requirements, including:
  - client or receiver requirements or specifications
  - carton coding
- health and safety hazards and controls, including awareness of the limitations of personal protective clothing and equipment relevant to the work process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the carton packing process, including:
  - rework and reuse of products
  - waste processing
- manual handling procedures related to the packing process.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
  - an industrial carton packaging plant
- resources, equipment and materials:
  - the equipment stipulated in the performance evidence
  - packaging cartons and inserts
  - the containers to be packaged stipulated in the performance evidence
  - packaging consumables, including glue and ink
- specifications:
  - two packing work orders stipulated in the performance evidence
  - workplace procedures for an automatic packing process and the machinery and equipment stipulated in the performance evidence
- relationships:
  - supervisor and others stipulated in the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPBPG3009 Operate an automated palletising process

Modification History

Release	Comments
Release 1	This version released with Food, Beverage and Pharmaceutical Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate and shut down an automated palletising process using complex equipment, including an automated pallet wrapper.

The unit applies to individuals who work under broad direction in a packaging and/or palletising environment and are responsible for operating and monitoring a carton palletising process, including safety compliance, production changeovers, consumables, cleaning and solving problems that arise with the process. Operators are responsible for solving problems that arise with machines and reporting unresolved problems to technical specialists.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety and food safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Bottle and Packaging (BPG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for palletising	1.1 Check work order to determine the pallet type, layer format and

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	confirm parts, sensors, rails and stoppers have been adjusted and set 3.5 Remove and store unused consumables and equipment parts not required after changeover 3.6 Conduct test run and make adjustments as required
4. Shut down palletising process	4.1 Empty machinery and equipment of product 4.2 Shut down machinery and equipment according to workplace procedures 4.3 Remove and store unused materials 4.4 Complete carton palletising records and reports 4.5 Clean and maintain palletising equipment 4.6 Dispose of waste according to workplace and environmental procedures 4.7 Report issues requiring maintenance by technicians

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret technical text and symbols in machinery operations manuals
Writing	• Complete maintenance reports using correct terminology
Oral communication	• Use open and closed questions to obtain and confirm information from team members

Assessment Requirements for FBPBPG3009 Operate an automated palletising process

Modification History

Release	Comments
Release 1	This version released with Food, Beverage and Pharmaceutical Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has independently set up, operated, and shut down two complete palletising processes for different work orders, using automatic palletising machines, including a pallet wrapper. One process must palletise 12-pack cartons and the other 6-pack cartons, that are configured differently.

Each process must complete at least 20 pallets per hour during a three-hour shift. Each pallet must have at least three carton layers, and be correctly configured, stacked and stretch wrapped using an automated pallet wrapper.

For each of the palletising work orders, the individual must have safely and efficiently performed the following:

- confirmed the product and palletising requirements and set up all the equipment and machinery, including individual pallet configuration requirements
- operated, monitored and shut down the palletising process, equipment and machinery
- correctly labelled each pallet for end users to track the date and location of production
- used sample checks to identify quality issues
- identified, rectified and/or reported machinery faults, including:
  - blockages caused by damaged pallets
  - cartons not correctly orientated
  - pallets not stopping in the correct position
  - carriage or pusher not making the end position
  - excessive stretch wrap and slip sheet breakage causing sensor faults
  - machinery settings resulting in incorrect palletising
- accurately and effectively handed over a palletising process to another team member
- accurately completed workplace production records
- communicated effectively with a supervisor and at least one of the following:
  - maintenance team member

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- laboratory or quality assurance team member
- bottling and packaging team member
- logistics team member.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- product knowledge related to the containers to be palletised as stipulated in the performance evidence, including:
  - size, weight and volume
  - client or receiver requirements or specifications
  - regulatory requirements
- operating principles of machinery and equipment, including:
  - conveyor fed automatic palletising machine
  - automated stretch wrapper
  - pallet tag applicators
  - carton orientation devices
- features and functions of machinery and equipment, including:
  - manufacturer and workplace instructions for safe operation
  - control panel and ancillary devices
  - operating capacities, efficiencies and applications
  - location and purpose of guards, rails and sensors
  - feedback instrumentation
  - services required and action to take if services are not available
  - cleaning requirements
- machinery and equipment checks, including:
  - pre-start checks, including emergency stop checks
  - lock-out and tag-out procedures, including return to service after isolation
- consumables including slip sheets, interlayers, hot melt glue and stretch film
- the interrelationships between bottling, carton packing, palletising and end of line dispatch processes
- product and process changeover procedures and responsibilities
- quality control requirements, processes and actions, including:
  - palletising order specifications
  - pallets for domestic and export use
  - methods used to check quality
  - common causes of palletising quality and corrective action required, including removal of out-of-specification pallets
  - planned sampling and testing associated with palletising process monitoring and control

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

    - responding to machinery alerts and notifications
    - recording of results
    - isolating non-conforming pallets
- product identification and traceability requirements, including:
    - workplace requirements
    - client or receiver requirements or specifications
    - pallet identification/tagging requirements
- health and safety hazards and controls, including awareness of the limitations of protective clothing and equipment relevant to the work process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the palletising process, including:
    - rework and reuse of products
    - waste processing
- materials and manual handling procedures related to the palletising process.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
    - an industrial packaging and/or palletising plant
- resources, equipment and materials:
    - automated palletising equipment, including an automated wrapper
    - pallets and packaging consumables, including glue, slip sheets, interlayers, pallets and stretch wrap
- specifications:
    - two palletising work orders as stipulated in the performance evidence
    - workplace procedures for operating an automatic palletising process, machinery and equipment
- relationships:
    - supervisor and others stipulated in the performance evidence
- timeframes:
    - as stipulated in the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed bottling and packaging processes for two different products, including:

- confirming services and staff are ready for operation
- confirming equipment is made ready for operation, including:
  - hygiene and sanitation standards have been met
  - adjusting air pressure
  - checking conveyor speed
  - adjusting heights and widths to accommodate specific product and material specifications
  - completing a test run
  - flow of line lube and water
  - realigning diverters and turners to ensure flow is as instructed
  - cartons, bottles and labels meet specifications
- confirming equipment is monitored and adjusted to achieve required quality outcomes, ensuring:
  - bottle cleanliness and draining effectiveness
  - dryness of bottles
  - glue supply
  - strength of carton seals
  - shrinkage or fit of capsules
  - stacking and stacking patterns meet specifications
  - bottle counters are re-set at the start of each product
  - stencils applied are clear and legible
  - bottle contents levels meet specification
  - ongoing quality of materials used

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

    - ongoing appearance of applications
- taking corrective action in response to typical faults and inconsistencies.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- bottling and packaging requirements and specifications for product
- stages and changes required for equipment operation, specific to product
- quality characteristics and uses of end product and output
- materials preparation requirements and effect of variation on the equipment operation
- emergency and troubleshooting procedures, including failure of services
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- significance and method of monitoring control points within the equipment operation
- common causes of variation and corrective action required
- hazards and controls, including manual handling
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- routine maintenance requirements
- recording requirements and procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
    - product to be bottled and packaged
    - bottling and packaging equipment
    - bottling and packaging resources and consumables
    - tools and equipment for adjusting and maintaining equipment
- relationships:
    - relevant personnel.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPBPG4002 Manage filling and packaging of fermented beverages

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to oversee the set-up and operation of a manual filling and packaging process of fermented and carbonated beverages, such as beer or kombucha, into cans, bottles or kegs.

This unit applies to those workers who have responsibility for overseeing the filling and packaging of beverages and the quality assurance requirements associated with that process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

FBPBPG4003 Coordinate wine operations packaging processes

Modification History

Release	Comments
Release 1	This version released with Food, Beverage and Pharmaceutical Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to coordinate work teams to set up, operate, hand over and shut down wine operation packaging processes, including de-palletising, filling, labelling carton erecting, carton packing, coding and palletising.

The unit applies to individuals who work in an industrial packaging plant and are responsible for coordinating several work teams in wine operations packaging processes. They take responsibility for their own work and the outcomes of others and apply high level planning and problem-solving skills. The processes may also include soft pack filling and storage of palletised wine.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety and food safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FBPBPG4003 Coordinate wine operations packaging processes

Modification History

Release	Comments
Release 1	This version released with Food, Beverage and Pharmaceutical Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has independently coordinated the safe and efficient set-up, operation, handover and shutdown of two packaging runs for two different products over two separate shifts. Each shift is to be at least three hours, have its own work order, and include:

- at least four of the following processes and related equipment:
  - de-palletising
  - filling
  - carton erecting
  - carton packing
  - palletising
  - labelling
  - coding.

For each shift, the individual must have:

- ensured sufficient supply of consumables to complete the packaging run
- ensured finished product meets required specifications
- coordinated at least four packaging operations workers, including scheduling start and finish times, meal and rest breaks
- communicated with filling and packaging team members, and at least two of the following:
  - maintenance team member
  - laboratory or quality assurance team member
  - logistics team member
  - supervisor
- addressed quality issues and anomalies caused by equipment failure and operator error
- addressed team members' health and safety requirements, including:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

    - correct fit and use of personal protective equipment
    - correct use of machinery guards, including lock-out and isolation
    - compliance with vehicle and pedestrian traffic control
- monitored timely and accurate completion of workplace records, including:
    - packaging notes
    - productivity reports
    - machinery and equipment logs
    - workplace safety reports
- effectively coordinated the changeover of two packaging runs according to workplace time requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- packaging work orders and production schedules
- operating principles of machinery and equipment, including:
    - de-palletiser
    - bottle or other container fillers
    - carton erecter
    - carton packer
    - palletiser
    - delivery tanks
    - labeller
    - coder
    - inert gas related equipment, including bulk and small cylinders, regulators, valves and pipes
- features and functions of machinery and equipment, including:
    - manufacturer and workplace instructions for safe operation
    - control panels and ancillary controls, including manual operations mode
    - operating capacities, efficiencies and applications
    - congestion points and other limiting factors
    - location and purpose of guards, rails and sensors
    - knowledge of maintenance required and action to take if maintenance services are not available
    - cleaning requirements
    - routine and non-routine machine and equipment faults, and process for rectification
- services, including electricity, water, compressed air and inert gases
- vessel cooling and heating systems and equipment
- machinery and equipment checks, including:
    - pre-start checks, including emergency stop checks

- environmental issues and controls relevant to the process, including:
  - rework and reuse of products
  - water use and recycling
  - waste processing
- materials and manual handling procedures related to packaging processes.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
  - an industrial packaging plant
- resources, equipment and materials:
  - the machinery and equipment stipulated in the performance evidence
  - packing consumables
- specifications:
  - two work orders for different packaging runs
  - workplace procedures for packaging processes, machinery and equipment stipulated in the performance evidence
- relationships:
  - team members and other workers stipulated in the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPCEL3019 Prepare and apply complex additions and finings

Modification History

Release	Comments
Release 1	This version released with Food, Beverage and Pharmaceutical Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to receive, test, store, prepare, add and follow up the application of complex additions and finings in wine making processes.

The unit applies to cellar hands who work under broad direction in a cellar operations environment and are responsible for all of the processes related to the application of complex additions and finings in various stages of wine making, including vintage, clarification and filtration. They take responsibility for their own work, have limited responsibility for the outcomes of other workers and solve problems related to cellar operations processes.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety and food safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret technical text and symbols on raw material information sheets and work orders
Writing	• Complete workplace records using correct terminology and format
Numeracy	• Estimate and calculate quantity, weight, volume and ratio • Interpret readings of gauges and scales • Use fractions, decimals, proportions and percentages to measure materials and record data • Use weight (g, kg, T) and volume (ml, L, ML, KL, HL) to describe product quantities

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the individual, accessibility of the item, and local industry and *regional contexts) are included.*

Additions must include five of the following:	• ammonium bisulfite • caramel • ascorbic acid/erythorbic acid • diammonium phosphate (DAP) • grape concentrate • hydrogen peroxide • malic acid • malolactic bacteria • potassium sorbate • sulphur dioxide products • tannin • tartaric acid • yeast • yeast nurtients

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Finings must include three of the following:	• activated carbon • bentonite • casien • copper sulphate • enzymes • egg white • gelatine • isinglass • polypvinylpolyppyrrolidone (PVPP)
Application method must include three of the following:	• pour in or drip over the top • pump in over the top • pump in through tank valve • venturi via pump • via doorway
Integrating methods must include three of the following:	• gas rummaging • in place agitation • manual mixing • pumping over • submergible mixing • valve to valve

Assessment Requirements for FBPCEL3019 Prepare and apply complex additions and finings

Modification History

Release	Comments
Release 1	This version released with Food, Beverage and Pharmaceutical Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has independently prepared, mixed and applied eight different additions and finings to juice or wine according to addition and fining work orders, including:

- used one of the following additions:
  - yeast
  - malolactic bacteria
- used at least four of the following additions:
  - ammonium bisulfite
  - caramel
  - ascorbic acid/erythorbic acid
  - diammonium phosphate (DAP)
  - grape concentrate
  - hydrogen peroxide
  - malic acid
  - malolactic bacteria
  - potassium sorbate
  - sulphur dioxide products
  - tannin
  - tartaric acid
  - yeast
  - yeast nutrients
- used at least three of the following finings:
  - activated carbon
  - bentonite

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - copper sulphate
  - enzymes
  - gelatine
  - polyvinylpolypyrrolidone (PVPP)
  - egg white
  - isinglass
  - casien.

In doing so, the individual must have:

- used at least three of the following media:
  - cold water
  - warm water
  - juice
  - wine
- used at least two of the following vessels and devices:
  - scales and other measuring equipment
  - barrel
  - bucket
  - mixing tub
  - manual agitator
  - mechanical agitator
  - wine tank
- used at least three of the following application methods:
  - pour or drip in over the top
  - pump in over the top
  - pump in through tank valve
  - via doorway
  - venturi via pump
- used at least two of the following integration methods:
  - gas rummaging
  - in place agitation
  - manual mixing
  - pumping over
  - submergible mixing
  - valve to valve
- completed accurate and timely records of additions and finings applied according to workplace requirements, including:
  - juice or wine identification
  - addition or fining identification
  - date, time and operator

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- quantity of material added by weight or volume.

After each addition and fining has been applied to a batch of juice or wine, the individual must have:

- collected, labelled and transferred a sample to a laboratory for analysis or tasting, using at least two of the following methods:
  - over the top
  - sample tap or valve
  - in line sample during transfer.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the physical properties, functions and benefits of wine additions, including:
  - ammonium bisulfite
  - ascorbic acid/erythorbic acid
  - caramel
  - hydrogen peroxide
  - grape concentrate
  - malic acid
  - malolactic bacteria
  - potassium sorbate
  - sulphur dioxide products
  - tannin
  - tartaric acid
  - yeast
  - yeast nutrients
- the physical properties, functions and benefits of wine fining agents, including:
  - activated carbon
  - bentonite
  - casien
  - cream of tartar
  - copper sulphate
  - egg white
  - enzymes
  - gelatine
  - isinglass
  - polyvinylpolypyrrolidone (PVPP)
- quality process and indicators related to the storage, mixing and application of additions and finings, including:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - quarantine and testing of raw materials, including batch codes
  - sampling and testing of juice or wine prior to and after the application of additions and finings
  - contamination risks and controls associated with the preparation and application of additions and finings
  - requirements for vegan and allergen control, including label integrity requirements
- weights and measures for additions and finings, including:
  - calibration of scales
  - units of measurement, including grams, kilograms, tonnes, millilitres, litres, hectolitres and kilolitres
- mixing media used to prepare additions and finings used in wine making, including:
  - cold water
  - warm water
  - juice
  - wine
- mixing vessels and devices used to prepare additions and finings used in wine making, including:
  - barrel
  - bucket
  - mixing tub
  - manual agitator
  - mechanical agitator
- application methods for applying additions and finings to wine, including:
  - pour in over the top
  - pump in over the top
  - tank to tank transfer
  - valve to valve
  - venturi
- equipment and methods for integrating additions and finings with wine or juice, including:
  - gas rummaging
  - in place mixing
  - manual mixing
  - submergible mixing
  - pumping over
  - valve to valve
- record keeping requirements for additions and finings in wine making, including:
  - juice or wine identification
  - addition or fining identification
  - date, time and operator
  - quantity of material added by weight or volume

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- principles and methods for collection of wine samples for laboratory analysis, including:
  - over the top
  - sample tap
  - in line sample during transfer
  - cross-contamination
  - containers used
  - labelling
  - effects of time
- workplace health and safety hazards and controls, including:
  - awareness of the limitations of controls
  - personal protective equipment
  - entering and working in confined spaces
  - hazardous substances, including additions and finings, cleaning products and gases
- environmental issues and controls relevant to the storage, mixing and application of additions and finings, including:
  - rework and reuse of products
  - water use and recycling
  - waste processing
  - energy usage
- materials and manual handling procedures related to the preparation, mixing and application of additions and finings.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
  - a commercial winery
- resources, equipment and materials:
  - the vessels, machinery and equipment stipulated in the performance evidence
  - the juice or wine stipulated in the performance evidence
  - the additions and finings stipulated in the performance evidence
- specifications:
  - addition and fining work orders stipulated in the performance evidence
  - workplace procedures for preparation and application of the additions, finings, equipment and machinery stipulated in the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards

FBPCEL4001 Coordinate wine operations vintage processes

Modification History

Release	Comments
Release 1	This version released with Food, Beverage and Pharmaceutical Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to coordinate work teams to set up, operate, hand over and shut down vintage wine operation processes, including crushing, must draining, pressing and fermentation.

The unit applies to individuals who work in a commercial winery and are responsible for coordinating several work teams in vintage wine operations processes to produce red or white wine. They take responsibility for their own work and the outcomes of others, and apply high level planning and problem-solving skills.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety and food safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Release	Comments
Release 1	This version released with Food, Beverage and Pharmaceutical Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has independently coordinated the safe and efficient set-up, operation, handover and shutdown of two shifts of vintage wine operations processes. Each shift must be at least eight hours, have its own work order, and include at least two of the following processes:

- crushing
- must draining
- pressing
- fermentation.

For each shift, the individual must have:

- coordinated at least two cellar operators, including scheduling start and finish times, meal and rest breaks
- coordinated use of at least three of the following:
  - de-stemmer crusher
  - press (either bag or continuous)
  - juice separation vessels and equipment
  - receival tanks
  - fermentation vessels
- communicated with at least two cellar operations workers and at least two of the following:
  - vineyard worker
  - grape receival worker
  - wine maker
  - cellar operations manager
  - maintenance team member
  - laboratory team member

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- addressed quality issues and anomalies caused by equipment failure and operator error
- addressed team members' health and safety requirements, including:
  - correct fit and use of personal protective equipment
  - correct use of machinery guards, including lock-out and isolation
  - compliance with workplace procedures for entry and work in confined spaces, including authorisation
  - compliance with vehicle and pedestrian traffic control requirements
- monitored timely and accurate completion of workplace records, including:
  - production notes, including additions to products
  - machinery and equipment logs
  - workplace safety reports
- effectively coordinated a batch changeover according to workplace time requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- production work orders and production schedules
- general operating principles of machinery and equipment, including:
  - crushers
  - mixers
  - juice separation equipment
  - fermentation vessels
  - presses
  - pumps
- features and functions of machinery and equipment used for the two processes selected in the performance evidence, including:
  - manufacturer and workplace instructions for safe operation
  - control panels and ancillary controls, including manual operations mode
  - operating capacities, efficiencies and applications
  - location and purpose of guards, rails and sensors
  - knowledge of maintenance services required and action to take if services are not available
  - cleaning requirements
  - routine and non-routine machine and equipment faults, and process for rectification
- utility services, including electricity, water, compressed air and inert gases
- heat exchanging systems and equipment
- machinery and equipment processing capacity, including:
  - staging areas
  - crusher capacity
  - press capacity

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

    - constraints and other limiting factors
    - forklifts and other materials handling equipment
- equipment and vessels, including:
    - volume
    - processing capacity
    - openings, doors and seals
    - valves and process flow
    - line check authorisations and procedures
- machinery and equipment checks, including:
    - pre-start checks, including emergency stop checks
    - lock-out and tag-out
    - return to service after isolation
- consumables, including:
    - cleaning products
    - gas supplies
    - wine making consumables
- typical problems related to consumables, including insufficient supplies, preparation, quality and identification
- staff welfare, including:
    - working conditions, including temperature, vibration, noise and dust
    - rostering, breaks, rest and fatigue management
- product and process quality indicators, including:
    - baume
    - pH and acid, sulphur dioxide
    - temperature
    - oxidation
- quality control requirements, processes and actions, including:
    - production and processing order specifications
    - methods used to check quality
    - causes of vintage operations process quality issues and corrective action required, including over-additions, product loss, time constraints and dilution
    - planned sampling and testing associated with process monitoring and control
    - responding to machinery alerts and notifications
    - recording of results
    - isolating samples for testing
- records and reporting requirements, including:
    - quality
    - productivity
    - handover
    - health and safety

    - batch status
- application of push through processes, including:
    - water
    - gas
    - pigging
    - wine or juice
- machinery and equipment maintenance, including:
    - repairs
    - lubrication
    - dismantling and cleaning
- product knowledge related to the batch being processed, including:
    - fruit variety
    - size and volume
    - client or receiver requirements or specifications
    - regulatory requirements
- the interrelationships between the crushing, draining and pressing, and subsequent wine operations processes
- product and process changeover procedures and responsibilities
- product batch identification and traceability requirements, including:
    - workplace requirements
    - client or receiver requirements or specifications
    - batch records
- work health and safety hazards and controls, including awareness of the limitations of protective clothing and equipment relevant to the work process
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to vintage processes, including:
    - rework and reuse of products
    - water use and recycling
    - waste processing
    - energy usage
- manual handling procedures related to vintage processes.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
    - a commercial winery
- resources, equipment and materials:
    - the machinery and equipment stipulated in the performance evidence
- specifications:

Release	Comments
Release 1	This version released with Food, Beverage and Pharmaceutical Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has independently coordinated the safe and efficient set-up, operation, handover and shutdown of two complete shifts of wine clarification processes. Each shift must be a minimum of eight hours. The individual must coordinate the clarification of at least two different batches of juice or wine, according to work orders.

For each shift, the individual must have:

- coordinated at least two of the following processes:
  - centrifuging
  - flotation
  - racking after cold settling
  - rotary vacuum
- coordinated at least three of the following:
  - centrifuge equipment
  - flotation equipment
  - racking and cold settling equipment
  - pumps
  - rotary vacuum drum
  - storage tanks
- controlled the product temperature to meet wine making specifications
- communicated with at least two cellar operations workers and with at least two of the following:
  - wine maker
  - cellar operations manager
  - maintenance team member
  - laboratory team member.

- monitored timely and accurate completion of workplace records, including:
  - production notes, including additions to products
  - machinery and equipment logs
  - workplace safety reports
- effectively coordinated a batch changeover according to workplace time requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- work orders and production schedules
- general operating principles of machinery and equipment, including:
  - centrifuge
  - continuous or batch flotation equipment
  - rotary vacuum drum
  - receival tanks
  - pumps
  - inert gas related equipment, including bulk and small cylinders, regulators, valves and pipes
- features and functions of machinery and equipment used for the two processes selected in the performance evidence, including:
  - manufacturer and workplace instructions for safe operation
  - control panels and ancillary controls, including manual operations mode
  - operating capacities, efficiencies and applications
  - constraints and other limiting factors
  - location and purpose of guards, rails and sensors
  - knowledge of maintenance required and action to take if maintenance services are not available
  - cleaning requirements
  - routine and non-routine machine and equipment faults, and process rectification
- utility services, including electricity, water, compressed air and inert gases
- heat exchanging systems and equipment
- equipment and vessels, including:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - volume
  - processing capacity
  - openings, doors and seals
  - valves and process flow
  - line check authorisations and procedures
- machinery and equipment checks, including:
  - pre-start checks, including emergency stop checks
  - lock-out and tag-out
  - return to service after isolation
- consumables, including:
  - cleaning products
  - water and gas supplies
  - filtration media
  - flotation aids
- typical problems related to consumables, including insufficient supplies, preparation, quality and identification
- staff welfare, including:
  - working conditions, including temperature, vibration, noise and dust
  - rostering, breaks, rest and fatigue management
- product and process quality indicators, including:
  - temperature
  - oxidation
  - pectin
  - solids
  - nephelometric turbidity units (NTU) clarification
- quality control requirements, processes and actions, including:
  - production and processing order specifications
  - methods used to check quality
  - common causes of clarification process quality issues, and corrective action required
  - planned sampling and testing associated with process monitoring and control
  - responding to machinery alerts and notifications
  - recording of results
- records and reporting requirements, including:
  - quality
  - productivity
  - handover
  - health and safety
  - process information, including wine tracking
- application of push through processes, including:
  - water

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - gas
  - wine or juice
- product knowledge related to the batch being processed, including:
  - batch
  - volume
  - wine making and food safety regulatory requirements
- the interrelationships between clarification processes and previous and subsequent wine making operations processes
- product and process changeover procedures and responsibilities
- product batch identification and traceability requirements, including:
  - workplace requirements
  - batch records
- workplace health and safety hazards and controls, including:
  - awareness of the limitations of controls
  - personal protective equipment
  - entering and working in confined spaces, including training and authorisation
  - hazardous substances, including additions and finings, cleaning products and gases
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the clarification process, including:
  - rework and reuse of products
  - water use and recycling
  - waste processing
  - energy usage
- materials and manual handling procedures related to clarification processes.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
  - a commercial winery
- resources, equipment and materials:
  - the machinery and equipment stipulated in the performance evidence
  - the juice or wine stipulated in the performance evidence
- specifications:
  - two work orders as stipulated in the performance evidence
  - workplace procedures for operating clarification processes, machinery and equipment stipulated in the performance evidence
- relationships:
  - team members and others stipulated in the performance evidence.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPCEL4003 Coordinate wine operations filtration processes

Modification History

Release	Comments
Release 1	This version released with Food, Beverage and Pharmaceutical Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to coordinate work teams to set up, operate, hand over and shut down filtration wine operation processes.

The unit applies to individuals who work in a commercial winery and are responsible for coordinating several work teams in filtration wine operations processes to produce red or white wine. They take responsibility for their own work and the outcomes of others, and apply high level planning and problem-solving skills.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety and food safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Cellar Operations (CEL)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to coordinate a filtration shift	1.1 Confirm handover information from previous shift 1.2 Check work orders and other processing requirements for shift

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Determine equipment preparation work required for the shift 1.4 Confirm capacity of equipment and vessels for required volumes 1.5 Identify and prioritise work tasks and allocate team responsibilities 1.6 Schedule team member rest and meal breaks according to workplace requirement and environmental conditions 1.7 Coordinate equipment checks and set-up, and ensure safety equipment is operational 1.8 Ensure integrity testing on filters is carried out to meet required parameters 1.9 Coordinate supply of consumables
2. Monitor the filtration production	2.1 Oversee handover or start-up of production processes 2.2 Check workplace health and safety, housekeeping and staff welfare 2.3 Apply approved problem-solving principles and techniques to identify and rectify product, process, machine, equipment and operator faults 2.4 Ensure quantity, productivity and quality specifications are met 2.5 Ensure flow rates and differential pressures meet production requirements, and determine when filters are compromised 2.6 Report any outcomes that do not meet specifications, and major process problems 2.7 Report maintenance issues to machinery and equipment technicians 2.8 Communicate with filtration process team members and other team leaders about information that impacts on their work 2.9 Ensure accurate completion of records
3. Coordinate product changeover	3.1 Ensure current batch is complete, including push through 3.2 Coordinate cleaning and sanitising of machinery, equipment and vessels according to workplace requirements 3.3 Prepare equipment and consumables for upcoming batch 3.4 Oversee start-up of new batch 3.5 Coordinate completion of changeover records

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
4. Coordinate shutdown of the filtration processes	4.1 Ensure current batch is complete, including push through 4.2 Coordinate cleaning of machinery, equipment and vessels 4.3 Ensure filter change-outs are completed when filter media are expired 4.4 Advise machine technicians that machinery and equipment are ready for maintenance 4.5 Ensure disposal of waste according to workplace and environmental procedures 4.6 Ensure accurate completion of shutdown records

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret technical text and symbols in machinery operations manuals and procedures
Writing	• Complete quality reports using correct terminology
Numeracy	• Estimate and calculate known and expected volumes in litres, hectolitres and kilolitres • Estimate and calculate quantity and time • Measure and calculate flow rates, including volume per hour
Oral communication	• Use open and closed questions to gather information from team members • Give clear instructions using industry terminology

Assessment Requirements for FBPCEL4003 Coordinate wine operations filtration processes

Modification History

Release	Comments
Release 1	This version released with Food, Beverage and Pharmaceutical Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has independently coordinated the safe and efficient set-up, operation, handover and shutdown of two complete shifts of wine filtration processes. Each shift must be a minimum of eight hours. The individual must coordinate the filtration of at least two different batches of juice or wine, according to work orders.

For each shift, the individual must have:

- coordinated at least two of the following:
  - cross flow
  - earth
  - lenticular or pad
  - reverse osmosis
  - membrane
- checked filtration performance parameters, including the specified integrity testing
- controlled product specifications, including:
  - temperature
  - carbon dioxide
  - dissolved oxygen
  - nephelometric turbidity units (NTU)
- communicated with at least two cellar operations workers and with at least two of the following:
  - wine maker
  - cellar operations manager
  - maintenance team member
  - laboratory team member.

For each shift, the individual must have:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- coordinated at least two cellar operations workers, including scheduling start and finish times, meal and rest breaks
- addressed quality issues and anomalies caused by equipment failure and operator error
- addressed team members' health and safety requirements, including:
  - correct fit and use of personal protective equipment
  - machinery lock-out and isolation
  - compliance with vehicle and pedestrian traffic control
- monitored timely and accurate completion of workplace records, including:
  - production notes, including additions to products
  - machinery and equipment logs
  - workplace safety reports
- effectively coordinated a batch changeover according to workplace time requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- work orders and production schedules
- general operating principles of machinery and equipment, including:
  - cross flow filter equipment
  - earth filter equipment
  - membrane filter, including lenticular cartridge
  - reverse osmosis machine
  - inert gas related equipment, including bulk and small cylinders, regulators, valves and pipes
- features and functions of machinery and equipment used for the two processes selected in the performance evidence, including:
  - manufacturer and workplace instructions for safe operation
  - control panels and ancillary controls, including manual operations mode
  - operating capacities, efficiencies and applications
  - constraints and other limiting factors
  - location and purpose of sensors
  - knowledge of maintenance required and action to take if maintenance services are not available
  - cleaning requirements
  - filter change-out, integrity testing of filters, filter parameters and actions required to rectify
  - flow rates and differential pressures, and actions to take when filters are compromised
  - routine and non-routine machine and equipment faults, and process for rectification
- utility services, including electricity, water, compressed air and inert gases
- heat exchanging systems and equipment

- coordinated use of two of the following:
  - heat exchanger
  - positive displacement pumps
  - centrifugal pumps
  - receival tanks or barrels
- coordinated use of one of the following:
  - manual agitator
  - mechanical agitator
  - pump over
  - valve to valve.

For each shift, the individual must have:

- coordinated at least two cellar operations workers, including scheduling start and finish times, meal and rest breaks
- addressed quality issues and anomalies caused by equipment failure and operator error
- addressed team members' health and safety requirements; including:
  - correct fit and use of personal protective equipment
  - correct use of machinery guards, including lock out and isolation
  - compliance with vehicle and pedestrian traffic control
- monitored timely and accurate completion of workplace records, including:
  - production notes, including additions to products
  - machinery and equipment logs
  - workplace safety reports
- effectively coordinated a batch change over according to workplace time requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- work orders and production schedules
- general operating principles of machinery and equipment related to general cellar operations, including at least four of the following:
  - preparing wine cultures
  - fermentation
  - additions and finings
  - heat exchanging
  - transfer of juice and wine
  - vessels including tanks or barrels
  - pumps
  - inert gas related equipment, including bulk and small cylinders, regulators, valves and pipes

FBPCHE4001 Prepare and present cheese

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to prepare and present cheese to a customer in a retail environment.

This unit applies to individuals who work in a cheesemongering setting, with responsibility for storing, cutting, wrapping, displaying and presenting cheese to a customer.

No licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing exist, so local requirements must be checked. All work must comply with Australian food safety standards and relevant codes of practice.

Pre-requisite Unit

Nil

Unit Sector

Cheese (CHE)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Recognise and identify cheese types	1.1 Identify different cheese types and characteristics 1.2 Identify cheeses made from different processes 1.3 Identify cheeses made from different milk types 1.4 Identify factors affecting cheese affinage

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Cut different cheeses	2.1 Sanitise hands, equipment and workspace, ready to handle cheese 2.2 Cut small and large cheeses to specified weight using correct utensils 2.3 Cut soft and hard cheeses to specified weight using correct utensils
3. Present cheese	3.1 Design a display of a selection of cheeses for a display cabinet 3.2 Design a cheese tasting with an identified theme 3.3 Cut cheese for customer tasting 3.4 Present cheese for customer tasting with specified theme, identifying the characteristics, provenance and processing techniques of each 3.5 Make recommendations for post-purchase storage
4. Wrap cheese	4.1 Identify appropriate wrap material for different cheeses 4.2 Wrap different shaped cheeses and cut pieces neatly, with appropriate folding
5. Store cheese	5.1 Store different cheeses to maintain quality and flavour 5.2 Complete records to meet regulatory and sales requirements 5.3 Clean workspace to meet regulatory requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	• Interact effectively with customers in a retail environment • Describe cheese characteristics using industry-specific language
Numeracy	• Estimate weights of cheese with reasonable accuracy

Assessment Requirements for FBPCHE4001 Prepare and present cheese

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively prepared and presented cheeses, including:

- identifying and describing the main characteristics of the following cheeses, including a summary of the processing and ripening conditions for each:
  - fresh cheese
  - soft ripened
  - surface mould ripened
  - semi-soft
  - semi-hard
  - hard
  - eye cheese
  - blue cheese
  - pasta filata
- cutting cheese for retail sale, to specified weights
- wrapping at least three different cheeses appropriately
- preparing and presenting a cheese tasting to a customer, based on an identified theme.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- different cheese types and varieties, including: fresh cheese, soft ripened, surface mould ripened, semi-soft, semi-hard, hard, cheese with and without eyes, blue cheese and pasta filata
- cheese ripened principally with bacteria, with bacteria and surface microorganisms, and blue mould

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- main processing steps in making cheese, including setting the milk, cutting or breaking curd, cooking curd, draining or dipping, knitting curd, salting, pressing, applications and treatments
- different milks used to make cheese and their properties and characteristics, including cow, sheep, and goat
- the effects that animal breed, diet and seasonality can have on cheese
- the effect of pH on the cheese making process
- various coagulants used in cheese making
- factors that affect affinage of cheese
- packaging and wrapping for different cheese types
- language to describe the characteristics of cheese
- use of the five senses for describing cheese
- origin of cheese defects
- temperature for storing cheese
- methods for maintaining cheese quality from packaging through to retail sale
- general nutritional properties of cheese
- ways to organise cheese for display
- ways to select cheese for tastings and appropriate accompaniments
- cutting methods and equipment for different styles of cheese
- differences between pre-cut versus cut to order, and the requirements of business for each
- Food Standards Code in relation to dairy processing
- pathogens that can exist in cheese
- raw milk cheeses and regulations in Australia
- general requirements for importing cheese.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a retail cheese environment
- resources, equipment and materials:
  - different types of cheeses and suitable accompaniments
  - materials to cut, present and store cheeses
  - access to potential customer/s.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPCHE5005 Produce lactic acid coagulated artisan cheese

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to produce lactic acid coagulated soft cheese in an artisan cheese making environment.

This unit applies to cheesemakers who have responsibility for overseeing the production of cheese, adapting the process where required to suit the specified outcome, and complying with workplace health and safety, food safety, record keeping and quality assurance requirements for the cheese making process.

No licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing exist, so local requirements must be checked. All work must comply with Australian food safety standards and relevant codes of practice.

Pre-requisite Unit

Nil

Unit Sector

Cheese (CHE)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for cheese making	1.1 Identify characteristics, make parameters and production goals of type of lactic acid coagulated cheese to be produced 1.2 Identify hazards and manage risks associated with producing cheese of specific type

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Prepare milk and starter cultures using good hygiene practice (GHP) 1.4 Ensure all surfaces meet cleanliness and sanitisation requirements 1.5 Manage GHP and good manufacturing practice (GMP) throughout cheese making process 1.6 Record cheese production information according to workplace procedures
2. Prepare milk	2.1 Sample raw or pre-pasteurised milk to assess milk composition (fat, proteins, minerals, pH, titratable acidity) of milk in vat, and adjust make parameters accordingly 2.2 Confirm desired outcome of the cheese making process, based on milk composition and production goals 2.3 Standardise milk or modify make process for consistent outcome, as required
3. Inoculate milk to promote coagulation	3.1 Add starter culture to the milk and mix evenly according to cheese type and production goals 3.2 Add coagulating enzymes to the milk according to production goals 3.3 Maintain temperature throughout the tank or vat according to production goals 3.4 Maintain a log of pH, titratable acidity and temperature to control make, ripening and yield according to production goals
4. Process curds	4.1 Manage curd ladling, breaking or cutting to meet production goals 4.2 Plan the curd processing schedule to meet production goals 4.3 Drain curd to ensure required pH level and consistency according to production goals
5. Monitor and adjust cheese processing	5.1 Monitor the amount of moisture in cheese by regulating syneresis 5.2 Adjust calcium phosphate levels to influence basic cheese structure if required 5.3 Control texture of the cheese by regulating pH, salt, moisture and fat 5.4 Control cheese flavour through choice of ingredients, such as milks, cultures, coagulating agents and salt, make parameters and pH levels

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	5.5 Optimise yield by refining process control parameters
6. Manage ripening	6.1 Observe effects of ripening agents on cheeses 6.2 Optimise curing and ripening agents by planning for and adjusting the key composition ratios of acid-coagulated soft cheeses 6.3 Use surface treatments according to cheese type and recipe 6.4 Maintain records of cheese production and ripening, as specified by legislation
7. Conduct housekeeping activities	7.1 Clean equipment and work area in line with workplace procedures 7.2 Conduct routine maintenance activities 7.3 Dispose of waste in line with regulatory requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret cheese make requirements from a variety of sources to consolidate information for cheese production
Writing	• Document details of make process, including weights, temperature, humidity, pH, titratable acidity, salt and organoleptic parameters
Numeracy	• Accurately weigh and measure ingredients for cheese making • Sample cheese to analyse pH, fat, moisture and salts • Calculate cheese yields
Get the work done	• Adjust processing parameters and problem-solve issues as they arise

Assessment Requirements for FBPCHE5005 Produce lactic acid coagulated artisan cheese

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has produced at least one type of lactic acid coagulated cheese, on two different occasions, with consistent texture, colour, finish and flavour.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the main types of lactic acid coagulated cheeses
- the chemical and physical composition of bovine and non-bovine milks (including on a seasonal basis) and components important in cheese making
- the main components of milk and cheese (both curds and whey, proteins, fats, carbohydrates and minerals) and how they change through processing and ripening
- types and impact of inhibitory substances in milk
- specifications of desired cheese product at each stage of making and ripening
- milk assessment and preparation for cheese making
- ways to adjust the make process for the desired cheese depending on the milk composition
- types of starters and adjuncts used and their role in the fermentation and ripening processes
- typical bacterial, yeast and mould cultures and the flavours and textures they produce
- control points and critical control points in the manufacture and ripening of each cheese type
- moisture and drainage control in cheese making
- processes of coagulation and syneresis and their role in cheese making and ripening
- curd size and its impact on moisture and acidification
- buffer power in cheese and how it affects the cheese

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- effects of pH, temperature, humidity and time on cheese processing performance and product quality
- impact of unwanted microorganisms in cheese (lipolytic bacteria, yeasts, moulds, bacillus, listeria, Escherichia coli, salmonella, coliforms and staphylococci)
- contamination risk of inoculants and contaminants
- temperature and humidity requirements for curing and ripening
- ripening agents for lactic acid coagulated cheeses
- techniques used to monitor the cheese making process, such as inspecting, measuring and testing
- common causes of variation and corrective action required for each cheese making process
- principles of dry salting for dry salted cheeses
- organoleptic properties of lactic acid coagulated cheeses and their relationship to processes and ingredients in cheese making
- sampling and testing procedures for microbes
- sampling procedures for cheese making
- yield efficiency
- cleaning and sanitation procedures for cheese making and ripening
- workplace safety hazards and controls
- procedures for recording production and performance information
- environmental issues and controls relevant to the process, including waste recycling, collection and handling procedures
- Food Standards Code in relation to dairy processing
- state/territory, Commonwealth and industry requirements relevant to food processing.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real food processing workplace
- resources, equipment and materials:
  - cheese making ingredients and production process equipment
  - cheese ripening resources
  - sampling and testing equipment and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for artisan cheese making	1.1 Identify characteristics, make parameters and production goals of type of rennet coagulated cheese to be produced 1.2 Identify hazards and manage risks associated with producing cheese of that type

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Prepare make and ripening sheet for the cheese to be made, showing reference parameters for that cheese type, and record all actual make and ripening parameters on the sheet as they occur 1.4 Prepare milk and starter culture using good hygiene practice (GHP) 1.5 Ensure all surfaces meet cleanliness and sanitisation requirements 1.6 Manage GHP and good manufacturing practice (GMP) throughout cheese making process 1.7 Record cheese production and ripening information according to workplace procedures
2. Prepare milk	2.1 Sample raw or pre-pasteurised milk and analyse composition 2.2 Confirm desired outcome of the cheese making process, based on milk composition and production goals 2.3 Standardise milk or modify make process for consistent outcome, as required
3. Inoculate milk and mix cheese ingredients in vat	3.1 Add colour to the milk to change the colour of the cheese according to cheese type 3.2 Add starter cultures and mould spores according to cheese type 3.3 Add adjunct cultures to influence the texture and flavour of the ripened cheese according to cheese type 3.4 Add enzymes to alter the flavour profile of the ripened cheese according to required cheese type 3.5 Acidify the milk with organic or inorganic acids before renneting according to required cheese type 3.6 Use acid to partly acidify the milk prior to adding culture to control the calcium phosphate level in the curd during cheese making, according to required cheese type 3.7 Add cultures and rennet to milk and hold at temperature according to required cheese type 3.8 Maintain a log of pH and temperature to monitor yield
4. Cut, stir and process the curd	4.1 Calculate total time, flocculation and hardening times for optimum acidification curve, coagulation and moisture content, according to desired cheese type and parameters 4.2 Supervise curd hardening, temperature and cutting to achieve

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	optimal yield and the required acidification curve and moisture level for the cheese 4.3 Monitor stirring, agitation, temperature and size of the curd and whey 4.4 Plan the heating schedule to ensure optimal syneresis for cheese type 4.5 Heat and stir curd and whey as required and check for uneven curd or overheating according to required outcome 4.6 Remove part of the whey and replace with water to wash lactose and lactic acid from the curd if required for specific cheese 4.7 Mat the curd under the whey to achieve required outcome if required for specific cheese 4.8 Remove all or part of the whey from the curds by draining out the vat, in line with required outcome 4.9 Prepare moulds into which curds will be hooped 4.10 Prepare curd for milling if required for specific cheese 4.11 Prepare curd for stretching if required for specific cheese 4.12 Prepare curd for hooping into chosen moulds
5. Monitor and adjust processing	5.1 Monitor processing to control moisture in cheeses 5.2 Control the rate and the amount of acid development 5.3 Control calcium phosphate levels to influence basic cheese structure 5.4 Control flavour and texture of the cheese by cutting and stirring, turning and draining and regulating pH, salt, moisture and fat 5.5 Control cheese flavour and pH levels by adding ingredients, such as milks, cultures, coagulating agents and salt 5.6 Control processing parameters to achieve optimal yield and parameters of desired cheese
6. Mould, turn, salt, press and age cheese	6.1 Hoop curd into prepared moulds at appropriate time 6.2 Turn cheeses in moulds at appropriate intervals to maximise optimal drainage and acidification 6.3 Press cheese and remove from moulds where appropriate for cheese type

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	6.4 Prepare the curd or cheese for salting if required 6.5 Apply salting treatments to ensure adverse salt profile effects are minimised in the finished product 6.6 Maintain brine bath, if used, for optimal salting and food safety outcomes, according to type of cheese being brined 6.7 Apply treatments to, and age, rennet coagulated cheeses to develop optimal flavour and texture, in line with required outcome and food safety requirements 6.8 Monitor, adjust and record ripening parameters for the cheese according to type, including turning, washing, brushing, ambient air temperature, humidity, air movement, air renewal
7. Conduct housekeeping activities	7.1 Clean equipment and work area in line with workplace procedures 7.2 Conduct routine maintenance activities 7.3 Dispose of waste in line with regulatory requirements

Assessment Requirements for FBPCHE5006 Produce rennet coagulated artisan cheese

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has produced at least three varieties of rennet coagulated cheeses, including:

- one washed curd cheese
- one mould ripened cheese
- one milled curd cheese.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the common types of rennet coagulated cheeses
- processes for making different types of rennet coagulated cheeses
- the chemical and physical composition of bovine and non-bovine milks, including on a seasonal basis, and components important in cheese making
- the main components of milk and cheese (both curds and whey, proteins, fats, carbohydrates and minerals) and how they change through processing and ripening
- specifications of desired cheese product at each stage of making and ripening
- typical bacterial, yeast and mould cultures and the flavours and textures they produce
- moisture control in cheese making
- types and impact of inhibitory substances in milk
- microbial contaminants of cheese (lipolytic bacteria, yeasts, moulds, bacillus, listeria, Escherichia coli, salmonella, coliforms and staphylococci) and their impact on cheese quality
- milk assessment and preparation for cheese making
- how to adjust the process for the desired cheese depending on the milk's composition

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- types of starters and adjuncts used and their role in the fermentation and ripening processes
- types of adjunct cultures and their role in the flavour and texture characteristics of the ripened cheese
- using rennet as a coagulating enzyme
- processes of coagulation and syneresis and their role in rennet coagulated cheese making
- curd size and its impact on moisture and acidification
- buffer power in cheese and how it affects the cheese
- moisture and drainage control in cheese making
- white and blue mould and yeast treatments and their role in cheese making and ripening
- control points and critical control points in the manufacture and ripening of each cheese type
- the relationship between acidification and various physical manipulations of the curd, including cutting, stirring, washing, hooping, turning and pressing
- effects of pH and temperature on cheese processing performance and product quality
- principles of brine salting and maintenance of brine salting systems for brine salted cheeses
- principles of dry salting for dry salted cheeses
- sampling and testing procedures for microbes
- sampling procedures for cheese making
- contamination/food safety risks associated with the process, and related control measures
- techniques used to monitor the cheese making process, such as inspecting, measuring and testing
- common causes of variation and corrective action required for each cheese making process
- organoleptic properties of rennet coagulated cheeses and their relationship to processes and ingredients in cheese making
- yield efficiency
- cleaning and sanitation requirements for cheese making and ripening
- workplace health and safety hazards and controls
- procedures for recording production and performance information
- environmental issues and controls relevant to the process, including waste recycling, collection and handling procedures
- Food Standards Code in relation to dairy processing
- state/territory, Commonwealth and industry requirements relevant to food processing.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- ingredients, production process and related equipment for rennet coagulated cheese
- sampling and testing equipment and procedures
- food safety related information, including requirements for raw milk.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has set up conditions and processes to ripen at least one soft cheese and one hard cheese.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- ripening processes, including interior ripening and surface ripening
- the effect that temperature and humidity have on the maturation process and product quality
- surface treatments carried out during maturation, such as washed rind, dry scraped
- various wraps used for ripening
- set-up and composition of shelving for maturation of cheese
- organoleptic properties of different cheeses throughout the maturation process, for quality products and for the identification of defects
- typical tests carried out during ripening, including sensory
- typical testing equipment, including pH meter
- ripening agents
- typical ripening times and environments for different types of cheese
- the requirement to turn cheese during maturation
- microbial contaminants of cheese (lipolytic bacteria, yeasts, moulds, bacillus, listeria, Escherichia coli, salmonella, coliforms and staphylococci) and their impact on cheese quality
- contamination risk of inoculants and contaminants
- yeasts and moulds and other microorganisms of significance in cheese maturation
- cross-contamination risks when working with blue and washed rind mould cheeses
- record keeping requirements of cheese maturation

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- Food Standards Code in relation to dairy processing
- state/territory, Commonwealth and industry requirements relevant to food processing.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real food processing workplace
- resources, equipment and materials:
  - cheese to be ripened
  - suitable environment for ripening cheese.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPCHE5009 Carry out sampling and interpret tests for cheese production

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to carry out sampling and basic testing, and interpreting the results for artisan cheese production.

This unit applies to individuals employed as production managers who take responsibility for their own work and for the quality of the work of others in an artisan cheese enterprise. They develop and implement procedures, prepare ingredients and maintain product safety and quality throughout production.

No licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing exist, so local requirements must be checked. All work must comply with Australian food safety standards and relevant codes of practice.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- MSL973013 Perform basic tests.

Unit Sector

Cheese (CHE)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement sampling procedures in cheese	1.1 Determine and document sampling points for physical, chemical and microbial properties

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
making	1.2 Determine an appropriate sampling size 1.3 Select and sterilise sampling equipment 1.4 Document and implement the sampling plan
2. Monitor chemistry in cheese making	2.1 Develop, implement and record an acidity profile for each stage in the production process 2.2 Carry out tests at stages for indicators, including pH, moisture levels and fat levels, according to workplace procedures 2.3 Carry out tests post-production for indicators, including moisture, pH, water activity (Aw), and observe fat and salt levels 2.4 Analyse whey content for fat and other solids to gauge efficiency of acidification, curd cutting and yield potential 2.5 Establish and review safe work procedures for processes requiring handling of chemicals and microbes, and involving chemical and microbial reactions in cheese making
3. Monitor microbiological changes through the cheese making process	3.1 Prepare samples for testing according to workplace procedures 3.2 Make observations and record data for yeasts and moulds 3.3 Carry out sampling and testing for inhibitory substances in milk
4. Carry out testing and interpret results to make adjustments to cheese making processes	4.1 Use tactile and visual senses to detect physical and chemical changes during milk receival and cheese making 4.2 Evaluate organoleptic properties of final cheese product using sensory testing 4.3 Record and interpret test results for information on composition, properties and reactions 4.4 Document recommended specifications for physical, chemical and microbial properties 4.5 Evaluate yield efficiency by comparing to established process control parameters 4.6 Reference specifications against test data 4.7 Implement changes to cheese making process based on test results

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Read and interpret technical information to determine food properties and reactions
Numeracy	• Interpret test results for yeasts and moulds, coliforms and staphylococci
Get the work done	• Use the main features and functions of digital tools to complete computational analysis and recording of results

Unit Mapping Information

Assessment Requirements for FBPCHE5009 Carry out sampling and interpret tests for cheese production

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has carried out sampling and interpreting tests for cheese production, including:

- interpreting and applying three different sampling plans and procedures, including:
  - in relation to the process chart for a cheese product
  - hard cheeses using a cheese trier or sample shaft
  - liquid cheese homogenate for microbiological analysis
- measuring and altering pH
- interpreting test results for yeasts and moulds, coliforms and staphylococci
- determining and applying methods for the control of growth of microorganisms
- identifying and reviewing safety hazards and control methods required when handling microbes and chemicals and working with processes that involve microbial and chemical reactions.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- use of technical terms used to communicate information on properties of food and materials commonly used in the food industry
- physical characteristics or phenomena that occur through cheese processing:
  - chemistry, including pH and titratable acidity
  - microbiological development and counts
  - handle and feel of the product
  - total solids (or moisture)
  - heat and temperature
  - timeframes for processes

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - taste, smell and appearance of the final cheese product
- processes for the making of different types of cheese
- the processing stages designed to affect the structure of these compounds (e.g. the use of fermentation to coagulate the casein micelles for acid-coagulated cheeses, compared to the use of rennet for rennet-coagulated cheeses)
- common chemical reactions that occur, factors required to cause a reaction, and the effect of reactions for cheese making, including both spontaneous and controlled reactions, such as:
  - oxidation
  - enzymic
  - acid-based reactions
  - other reactions relevant to a given cheese type and production process
- physical changes that occur to ingredients and product through cheese making and ripening
- reactions and properties of carbohydrates, proteins and fats through the cheese making process
- behaviour of each type of matter and its relationship to the production process
- changes in acidity through the cheese making process and its influence on spoilage, moisture and mineral content, texture and flavour
- instruments used for measuring and how each is calibrated (and calibration schedules)
- temperature control and its impact throughout a cheese making process
- acidity profile (either pH or titratable acidity) ranges for the different types of cheeses
- the significance of fermentation for the control of spoilage and pathogens in cheese, and its influence on moisture levels, mineral content, texture and flavour
- the basic molecular structures of carbohydrates, proteins and fats and minerals
- the role of enzymes in generating biological reactions (e.g. the use of rennet as a coagulating agent)
- coagulation time and setting time for rennet
- factors that influence syneresis, proteolysis and lipolysis and their importance in cheese making
- types of microbial cells and their components and function
- the main types of microorganisms and their activity in cheese making, both those that enhance the process and those that impact negatively on cheese characteristics
- types of pathogenic bacteria that can be present in milk and cheese products
- sampling requirements for cheese making
- pH, moisture and salt gradients in brine salted cheese (need for homogeneity in sampling)
- buffering in milk and the role of casein and phosphate levels
- basic molecular structures of carbohydrates, proteins and fats
- disinfection and sterilisation as applied to practical aspects of microbiological diversity and growth
- microorganisms of significance in the production and spoilage of cheese
- raw milk quality tests

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- testing methods and interpretation of results for salmonella, staphylococcus, listeria and E. coli in both pasteurised and raw milk cheese
- interpreting measurements at stages in a cheese making process, covering:
  - salt to moisture ratio (S/M)
  - moisture in the non-fat substance (MNFS)
  - fat in the dry matter (FDM)
- biological, chemical and physical methods available for controlling microbial growth
- health and safety hazards and control methods, and food safety standards relevant to the workplace
- sources of technical information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - production process and related equipment for cheese production
  - sampling and testing equipment
  - a range of cheeses at different stages of production for sampling
  - test results for a range of different cheeses or different stages of production
- specifications:
  - manufacturer advice and product specifications.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPFST4009 Label foods according to legislative requirements

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to label foods and/or beverages according to legislative requirements.

The unit applies to individuals who have responsibility for maintaining the product safety, quality and legislative requirements for labelling food and/or beverage items.

No licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing exist, so local requirements must be checked. All work must comply with Australian food safety standards and relevant codes of practice.

Pre-requisite Unit

Nil

Unit Sector

Food science and technology (FST)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify specific criteria required for a food and/or beverage	1.1 Identify legal requirements of food and/or beverage labels 1.2 Identify the relationship between label and consumer information 1.3 Confirm that the ingredients in a food or beverage product are

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
label	accurately described 1.4 Confirm that date marking is completed and linked to information on batch number and date of processing 1.5 Confirm that directions for use and storage information are provided 1.6 Confirm that country of origin information is completed to comply with requirements for food source and place of processing 1.7 Identify additional general information requirements 1.8 Source commodity-specific labelling requirements
2. Document information from the processing operation required on the product label	2.1 Identify exemptions for nutrition information panel 2.2 Provide information on energy, protein, fat, saturated fat, carbohydrate, sugars and sodium content, and any other nutritional information required by legislation 2.3 Provide the number of servings, the average quantity of food or beverage in a serving and the unit quantity of the product 2.4 Document the declaration of weights and measures 2.5 Confirm that legislative requirements for specifying allergens and irradiated food or beverages, percentage labelling and mandatory warning and advisory statements and declarations (including genetically modified ingredients) are included on the label
3. Produce a label for a specified food or beverage product	3.1 Collate label data and format 3.2 Use software packages to produce a nutritional panel for a food or beverage label 3.3 Assess food and/or beverage labels to determine compliance, and modify if necessary 3.4 Monitor the operation of labelling equipment

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Reading	• Interpret legislative requirements and standards for food and/or beverage labelling • Interpret food safety guidelines, codes of practice, standards and regulations relevant to a food and/or beverage processing enterprise • Identify the legal responsibilities of a food processing company relating to product content, packaging, nutritional panels and use-by dates
Numeracy	• Source, collect and organise a range of data for use on product labels • Apply units of measurement and percentage compositions of food make-up for nutrition information panel

Assessment Requirements for FBPFST4009 Label foods according to legislative requirements

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has produced accurate labels for two different items of food and/or beverages that comply with the current Food Standards Code.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislation, regulations and standards relating to food and/or beverage labelling
- legal, industry and enterprise requirements of a food or beverage label, including requirements for specifying allergens and irradiated foods or beverages, percentage labelling and mandatory warning and advisory statements and declarations (including genetically modified ingredients)
- data to be accessed to populate a product label
- legal implications of incorrect food or beverage labelling
- exemptions for nutrition information
- the relationship between the consumer and information required on a label.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - personal protective equipment required for labelling food and/or beverages according to legislative requirements
  - labelling equipment
- specifications:
  - production process, manufacturer advice and operating procedures
  - workplace documentation, including specifications and procedures for food and/or beverage labels
  - food and/or beverage labelling legislation, codes of practice and guidelines
  - workplace information recording systems, requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPFST4013 Interpret and respond to food and/or beverage test results

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has accurately interpreted and suitably responded to test results in a food production environment, including:

- at least four of the following test types most relevant to the job role:
  - pH
  - alcohol
  - bitterness
  - colour
  - microbiological counts
  - moisture
  - vicinal diketones (VDKs)
  - carbon dioxide (CO2) and nitrogen (N2)
  - dissolved oxygen (DO)
  - total packed oxygen (TPO)
  - water activity (Aw)
  - test type specific to food or beverage product
- performing calculations that include decimals and percentages, volume, ratios, dosage and concentration
- recording actions carried out in response to test results.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of tests performed as part of job role and principles of the standard methods/specifications used

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- typical basic tests, equipment and methods relevant to product
- measurements used for typical tests
- acceptable parameters for typical test results
- sources of uncertainty in measurement and methods for control
- workplace and/or legal traceability requirements
- numeracy skills relevant to job role:
  - convert units involving multiples and submultiples
  - use fractions, decimals, proportions and percentages to determine responses to results
  - use areas (m2) and volumes (ml, L, m3) to describe product quantities
  - calculate dose (mg), average mass, mass percentage, density, moisture, relative and absolute humidity
  - determine ratios, such as mass to mass, mass to volume and volume to volume percentages
  - calculate concentration, such as g/100mL, mg/L and dilution ml/L
  - analyse statistical data to identify processing issues
  - calculate food properties, such as % concentration (dry), % content of moisture, ash, fat, protein, alcohol, sulphur dioxide and trace metals
- methods for controlling atypical outcomes of tests, relevant to process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real food or beverage production environment
- resources, equipment and materials:
  - food or beverage process test results.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPFST4014 Apply sensory analysis in food and/or beverage production

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to carry out sensory analysis of food and/or beverages, and to use appropriate terminology when describing the organoleptic properties.

This unit applies to workers who have responsibility for overseeing the production of food and/or beverages and the quality assurance requirements, and who are responsible for making changes to processing based on the results of the sensory analysis.

No licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing exist, so local requirements must be checked. All work must comply with Australian food safety standards and relevant codes of practice.

Pre-requisite Unit

Assessment Requirements for FBPFST4014 Apply sensory analysis in food and/or beverage production

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively applied sensory analysis in a food and/or beverage production environment, including:

- analysing and describing the organoleptic properties of three different food products, or three different beverage products, including:
  - taste – sweet, salty, bitter, sour and umami (savoury)
  - texture
  - aroma
  - flavour
  - colour
  - visual properties
- identifying differences between the three products
- identifying product faults
- identifying any personal sensory blind spots.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- industry codes of practice relevant to industry sector
- anatomy, physiology and functions of taste and smell to determine sample appearance, texture, aroma and flavour
- the primary flavour characteristics of sweet/sour, umami (savoury) and bitter/salty
- frameworks for organoleptic evaluation, relevant to product
- clarity around what makes a quality product (style, context, specification)
- interaction of sensory activity, including the interaction between taste and smell, and effect of temperature on samples

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- associated characteristics of mouth feel and appearance
- the various sensory evaluation tests used in the food processing industry
- principles and purpose of test methods implemented (why they are used and what they demonstrate)
- quality requirements for conducting a taste panel
- sensory panels and their makeup (and acknowledgement that people have different sensory skills)
- descriptive, discriminative and affective sensory methods
- typical samples used for sensory analysis, including:
  - raw materials, ingredients, final products, packaging materials, and materials that come in contact with the product
  - materials at stages of production
  - process aids and adjuncts
- common testing methods:
  - triangular test, duo-trio test, ranking test, paired comparison test and blending test
  - flavour profile
  - threshold analysis
  - discriminative testing, descriptive testing and affective testing
- typical uses of the results obtained from the sensory analysis:
  - quality assurance at various stages of production
  - quality control and troubleshooting
  - research and development of new products
  - blending.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real food or beverage production environment
- resources, equipment and materials:
  - food and/or beverage product samples for analysis.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPFST5010 Implement and review the preparation of milk for processing

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to implement and review the standards and procedures for receiving and preparing milk for product manufacture.

This unit applies to individuals who are responsible for maintaining product safety, quality and efficiency in the dairy processing sector, utilising knowledge of food science and processes to determine the required food safety, quality and performance of food production equipment.

No licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing exist, so local requirements must be checked. All work must comply with Australian food safety standards and relevant codes of practice.

Assessment Requirements for FBPFST5010 Implement and review the preparation of milk for processing

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively implemented and reviewed the preparation of milk for processing on at least one occasion, including:

- assessing the impact of processing on milk
- establishing critical control points (CCPs) and critical limits for each step in the preparation of milk for processing
- monitoring production of milk for further processing
- monitoring the implementation of the Hazard Analysis and Critical Control Points (HACCP) plan
- determining data collection and documentation requirements
- carrying out milk sampling and testing according to the HACCP plan and operational procedures
- accurately interpreting test results
- making procedural adjustments to address non-compliance
- ensuring relevant food safety standards and associated regulations are adhered to.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the components of milk
- the hazards associated with raw milk
- the various spoilage organisms associated with milk
- the testing and processing stages in preparing milk for further processing
- the risks to milk product quality from incorrect preparation and handling of fresh milk

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- output of each of the processes used in the preparation of milk for further processing
- compositional requirements for milk prepared for further processing for a range of processed milk products
- principles of operation of equipment and accessories used in the preparation of milk for further processing
- critical factors in the testing and preparation of received milk for further processing into dairy products
- processes used in the preparation and manufacture of non-fermented dairy products
- resource requirements for the preparation of milk for further processing
- potential product defects and their causes, which may arise in the preparation of milk for further processing
- milk sampling and testing
- data requirements appropriate for food safety, quality and production standards
- manufacturing processes, including materials and equipment, involved in preparing delivered milk for further processing
- milk handling and its impact on properties for further processing
- chemical and physical hazards that may affect milk
- procedures for milk storage, handling and preparation
- health and safety in the workplace procedures
- sanitation and hygiene procedures
- HACCP principles and critical limits in a HACCP program
- food safety standards and regulatory requirements associated with the preparation of milk for processing.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real milk processing workplace
- resources, equipment and materials:
  - production process and related equipment, manufacturers' advice and operating procedures
  - testing equipment
- specifications:
  - tests used to report relevant product/process information and recorded results.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPFST5031 Identify the microbiological and biochemical properties of fermented food and/or beverages

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to identify the microbiological and chemical properties of fermented food and/or beverages, including the identification of food contamination and spoilage.

This unit applies to individuals who apply technical and theoretical knowledge and who design and communicate solutions to sometimes complex problems.

No licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing exist, so local requirements must be checked. All work must comply with Australian food safety standards and relevant codes of practice.

Pre-requisite Unit

Nil

Unit Sector

Food Science and Technology (FST)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Apply the principles of microbiological quality control for successful fermentation	1.1 Determine the fermentation critical control points (CCPs) for successful fermentation for different fermented food and beverage categories 1.2 Identify the indicators of unsuccessful fermentation for different

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	fermented food and beverage categories 1.3 Determine the correct microbiological quality control program for specific fermented food and beverage in terms of the Food Standards Code
2. Identify key microorganisms involved in fermentation	2.1 Identify the key microorganisms used in different fermentation processes 2.2 Identify the differences between different fermentation processes and when they are used 2.3 Identify the indicators of successful fermentation for each different fermentation process
3. Identify food poisoning and spoilage microorganisms that may result from incorrect fermentation practices	3.1 Identify the major pathogenic organisms and any associated toxins that may be present in an unsuccessful ferment 3.2 Interpret and determine appropriate action based on microbiological and chemical test results 3.3 Determine the ramifications of fermented product contamination in terms of public health and product shelf-life quality
4. Perform microbiological sampling and testing techniques	4.1 Perform microbiological sampling techniques to collect production samples 4.2 Take samples to determine the presence of the pathogenic and spoilage organisms to confirm adequacy of operating processes, including plant sanitation 4.3 Organise appropriate storage and transport of samples to testing facility 4.4 Identify the appropriate range of actions required when out-of-specification test results are received
5. Identify the biochemical pathways that occur in fermented food and beverage production	5.1 Identify the biochemical pathways associated with the different categories of fermented food and beverages 5.2 Identify the reactions and properties of sugars and starches through a fermentation process
6. Identify and conduct simple biochemical tests to track the process of fermenting food	6.1 Identify the significance of a range of chemical parameters to track the progress of the fermentation process, including sugar levels, pH, acidity, water activity (Aw), salinity, alcohol 6.2 Test for sugar levels to determine fermentation progress

Assessment Requirements for FBPFST5031 Identify the microbiological and biochemical properties of fermented food and/or beverages

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has identified and analysed microbiological and biochemical effects that take place in the fermentation of three different food and/or beverage products, including:

- conducting relevant in-process tests required to monitor the progress of fermentation.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of fermentation, including yeasts, bacteria, symbiotic culture of bacteria and yeast (SCOBY) and fungi
- types and effects of microbiological and chemical hazards from incorrect fermentation (for each product)
- spoilage in fermented food and/or beverages and how they could be avoided
- processes used in the control of microbial growth in food products
- criteria for successful fermentation of different types of fermented food and beverages, including: organism, fermentation time, fermentation temperature, fermentation atmosphere (aerobic vs anaerobic), pH for different fermented food and beverage categories, water activity (Aw)
- major microorganisms responsible for food poisoning and spoilage
- Food Standards Code in relation to fermented food and beverages
- standard microbiological techniques to identify food poisoning and spoilage organisms
- the importance of plant hygiene and how it can affect the finished product
- microbiological toxins and aflatoxins
- typical spoilage patterns in fermented foods caused by chemical and microbiological issues

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- microbiological quality control programs
- plant hygiene, including sanitation and verification techniques
- rapid microbiological techniques:
  - accelerated culture techniques
  - rapid biochemical tests
  - measurement of total bacteria metabolism
  - measurement of spoilage
  - non-traditional methods
  - automated and mechanised methods
- the relevance of rapid microbiological technology, as related to control of plant hygiene
- potential microbiological pathogens
- chemical hazards
- critical control limits and microbiological processes and species in fermented food and beverage production
- characteristics and phenomena that occur during fermentation
- common chemical reactions that occur in food processing, including both spontaneous and controlled reactions, including:
  - the role of enzymes in generating biological reactions
  - tests commonly used to measure phenomena, and related units of measurement
  - transition phases applicable to a given production process
  - the role of temperature and pressure in the transition process
- pH and its impact on fermentation
- role of secondary fermentation.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - test equipment, manufacturers' advice and operating procedures
- specifications:
  - product standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPFSY4001 Supervise and maintain a food safety plan

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to maintain and implement a hazard analysis critical control point (HACCP) based food safety plan. It includes the ability to monitor the implementation of a food safety plan, to revise, verify and validate the system, and to respond to audit findings for the system.

This unit applies to individuals who monitor and maintain a food safety plan in the workplace.

Legislative and regulatory requirements apply to food safety and are enforced through state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Pre-requisite Unit

Nil

Unit Sector

Food Safety (FSY)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Review the existing food safety plan	1.1 Collect data and results from critical control point (CCP) records to verify the food safety system 1.2 Identify major and minor non-conformances to the food safety

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	plan 1.3 Monitor critical control points to confirm performance 1.4 Analyse problem areas and suggest corrective actions and strategies to prevent recurrence of the problem 1.5 Document required amendments to the food safety plan 1.6 Report recommendations and amendments to appropriate personnel
2. Communicate the requirements of the food safety plan	2.1 Explain food safety principles, food safety procedures and requirements, including regulatory requirements, to the team 2.2 Develop commitment to and responsibility for food safety through work team communication 2.3 Define, document and implement procedures to support the food safety plan 2.4 Provide training and mentoring to the team to assist implementation
3. Monitor the implementation of the food safety plan	3.1 Monitor team's implementation of the food safety plan 3.2 Monitor personal behaviour, including hygiene, housekeeping and use of clothing and equipment, and correct where necessary 3.3 Complete and maintain records and reports 3.4 Take prompt action to correct non-conformance 3.5 Identify and analyse causes of non-conformance 3.6 Implement control measures to prevent future non-conformance 3.7 Report non-conformance to appropriate personnel
4. Maintain the food safety plan	4.1 Seek feedback from all personnel to identify potential hazards, corrective actions and controls 4.2 Identify processes or conditions that could result in breaches of food safety procedures, and take preventive or corrective action 4.3 Update corrective action and control procedures to improve food safety 4.4 Complete safety plan documentation

Assessment Requirements for FBPFSY4001 Supervise and maintain a food safety plan

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively supervised and maintained a critical control point (CCP) food safety program in a food processing environment, working with a small team on at least one occasion, including:

- reviewing a food safety plan for a food processing operation
- communicating the requirements of a food safety plan to workers
- demonstrating safe food handling work practices
- completing records and reports related to the implementation of food safety
- responding to non-compliances and taking corrective actions.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- Food Standards Code and relevant food legislation
- current technical and process knowledge required to participate in investigations of food safety/quality hazards, risks and incidents
- common microbiological, physical and chemical hazards to food safety, and related control methods
- the way changes in equipment and/or processing methods can affect food safety hazards and level of risk
- the objectives of a hazard analysis critical control point (HACCP) based food safety program
- the steps in the development of a CCP-based food safety plan
- the steps in the systematic introduction of a HACCP-based food safety program

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- workplace recall and traceability procedures
- purpose of the CCP development and review process
- the document controls associated with a procedure change
- the purpose of standard operating procedures and work instructions
- the process of auditing and verifying a HACCP-based food safety program
- the importance of role-modelling good personal hygiene, safe food handling and quality procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - food processing equipment
  - methods and related software systems for collecting data, analysing data and compiling a report
- specifications:
  - workplace operating procedures
  - a CCP-based food safety plan for the food processing workplace
- relationships:
  - interactions with work team and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPLAB2001 Use basic laboratory equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to operate a range of basic laboratory equipment to accurately measure, weigh, separate and filter substances.

The unit applies to those who work in food and wine production and processing environments and carry out routine tests in line with established test methods and clear workplace procedures.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has set up, accurately used and cleaned basic laboratory equipment to perform four tasks from the following list:

- weighing
- centrifuging
- separating
- pipetting
- measuring
- titrating
- sterilising.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and methods of use for a range of basic laboratory equipment
- purpose and methods used to calibrate equipment
- operation of equipment and instrumentation components
- standard tests carried out in the workplace and their purpose
- health and safety requirements for hazards and controls relevant to work role
- environmental issues and controls relevant to work role
- safety data sheets (SDS) for chemicals used
- workplace requirements for recording and reporting problems
- cleaning and sanitising requirements of equipment and work area.

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Use verbal and non-verbal communication in a culturally sensitive manner	1.1 Identify responsibilities according to the principles of anti-discrimination legislation 1.2 Treat people from all social and cultural groups with respect and sensitivity 1.3 Use verbal and non-verbal communication that takes into account social and cultural differences

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Make efforts to communicate through use of gestures or simple words where language barriers exist 1.5 Seek assistance from colleagues, specialist resources or outside organisations when cultural considerations could be affecting workplace communication
2. Respond to cross-cultural misunderstandings	2.1 Identify issues that may cause conflict or misunderstanding in the workplace 2.2 Consider possible cultural and social differences when difficulties or misunderstandings occur 2.3 Address difficulties with appropriate personnel in the workplace and seek assistance to facilitate understanding where required 2.4 Make efforts to resolve misunderstandings, taking into account cultural and social considerations 2.5 Refer potential issues and problems that cannot be resolved to appropriate personnel for follow-up in accordance with workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Interact with others	• Treat people from differing backgrounds with respect and sensitivity

Assessment Requirements for FBPOPR2073 Work in a socially diverse environment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has worked effectively in a socially diverse environment on a minimum of two different occasions, including:

- recognising cultural and social differences in the workplace
- responding to cross-cultural or cross-social misunderstandings.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles of equal employment opportunity (EEO) and anti-discrimination legislation as they apply to company and employee rights and responsibilities in the workplace
- recognition of differences between people from different cultural and social backgrounds, including those differing from own
- understanding of the basis of cultural difference, including behaviour or practices that can cause offence, and related strategies for interacting in ways that are culturally and socially sensitive
- communication strategies and styles appropriate to diverse audiences related to the workplace.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- specifications:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- rights and responsibilities relating to anti-discrimination and EEO
- relevant company policies and procedures

- relationships (internal and/or external):
  - opportunities to interact with others using typical workplace communication processes
  - interactions with team members and supervisors or realistic scenarios or role plays.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPPHM3018 Operate a sterilisation process using an autoclave

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a sterilisation process using an autoclave.

The unit applies to individuals who apply Good Manufacturing Practice (GMP) or other accreditation or certification requirements if relevant in other industries/settings, and operating principles to the terminal sterilisation of product and sterilisation of goods for aseptic processing using an autoclave. Individuals work under broad direction and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Pharmaceutical (PHM)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare and initiate operation of equipment	1.1 Check autoclave is operational and sterilisation load is available 1.2 Prepare items for sterilisation load by stacking, wrapping, taping or sealing according to Standard Operating Procedures (SOP) 1.3 Mark bags as required according to SOP

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Load autoclave and position temperature load probe according to load pattern requirements detailed in the SOP 1.5 Run pre-start leak test cycle and select the correct sterilisation cycle according to SOP 1.6 Initiate the autoclave cycle
2. Review autoclave printout at end of cycle	2.1 Review autoclave cycle printout or electronic report and confirm correct cycle was run with no faults or alarms detected 2.2 Complete documentation according to SOP
3. Remove items and follow shut down procedures	3.1 Commence shutdown of autoclave by confirming autoclave cycle is complete and autoclave is safe to open according to SOP 3.2 Remove items safely from autoclave and check contents 3.3 Check data logging or relevant indicators have been activated according to SOP 3.4 Confirm items are dry and sterilised 3.5 Clean autoclave according to SOP 3.6 Complete records according to SOP

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Identify relevant information from workplace documentation and interpret requirements for the sterilisation process
Writing	• Complete workplace documentation using appropriate language and in required format
Numeracy	• Confirm number of items according to loading pattern • Interpret time and temperature specifications for cycle parameters • Confirm post cycle results meet sterilisation requirements

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Requirements for FBPPHM3018 Operate a sterilisation process using an autoclave

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated at least one sterilisation process using an autoclave, including:

- accessed Standard Operating Procedure (SOP) information to confirm sterilisation requirements
- confirmed supply of product or materials for the sterilisation process
- prepared items by stacking autoclave dolly with product for terminal sterilisation or wrapping, taping, or sealing in an autoclave bag product for aseptic processing
- marked bags with temperature-sensitive tape or chemical indicators
- positioned any moveable load probe and loaded items in correct orientation according to SOP and validated load pattern requirements
- conducted pre-start checks required for safe operation of the autoclave, including:
  - carried out required area or line clearances
  - inspected equipment condition to identify signs of wear
  - confirmed all safety equipment in place and operational
  - confirmed sterilising equipment clean or sanitised
  - confirmed all pre-start cycles have been run, including a leak test
- confirmed sterilising equipment correctly set up for processing requirements
- selected correct sterilisation cycle as per the SOP
- reviewed cycle print out to confirm the cycle was completed satisfactorily with no alarms or faults
- taken corrective action in response to a non-conformance
- opened autoclave and removed items from autoclave according to workplace procedures
- safely shut down the process according to workplace procedures
- cleaned and maintained work area to meet workplace cleaning standards and environmental requirements
- completed records according to SOP.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- requirements for autoclaving for microbial reduction/sterility
- stages of the sterilisation process, including:
  - relationship between time, temperature and pressure as they affect kill rate
  - variables that impact effectiveness of sterilisation
- nature of items to be sterilised using an autoclave, different cycle types used and related handling and preparation requirements, including:
  - porous loads
  - non-porous loads
  - position of probes
- nature of wrapping materials suitable for use, including:
  - methods used to wrap or bag items
  - methods used to monitor whether time and temperature parameters are met, including heat-sensitive tape or markers
  - significance of validated loading patterns in achieving effective sterilisation
- basic operating principles of equipment, requirements and parameters of autoclave, including:
  - main equipment components including filters, vacuum pumps, condensers and the autoclave chamber
  - utilities requirements for a GMP autoclave including compressed air, electricity, processed water steam supply and cooling water
  - time and temperature parameters required to achieve sterilisation and corrective actions required where operation falls outside specified parameters
  - typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
  - status and purpose of guards
  - equipment operating capacities and applications
  - purpose and location of sensors and related feedback instrumentation
  - corrective actions required where operation is outside of specified parameters
  - calibration schedule and procedures to confirm that instruments are within calibration
- health and safety hazards related to autoclave operation and associated control measures, including working with superheated steam and hot surfaces, manual handling and steam leaks
- pre-start check requirements, including:
  - carrying out required area or line clearances
  - inspecting equipment condition to identify signs of wear
  - confirming all safety equipment in place and operational
  - confirming equipment is clean or sanitised
  - confirming equipment is correctly configured for processing requirements

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- evaluation and in-process monitoring of sterilisation process indicators, including:
  - biological
  - chemical
  - physical
- methods used to monitor the sterilisation process, including:
  - inspecting
  - measuring
  - testing
- requirements of different shutdowns, including:
  - emergency and routine shutdowns
  - procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- operating principles of process control
- Good Manufacturing Practice (GMP) requirements associated with a sterilisation process and related control measures
- environmental issues and controls relevant to the sterilisation process including waste collection and handling procedures
- requirements for completion of workplace documentation.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - autoclave and handling equipment
  - loading bags or wrapping materials and tape/heat sensitive markers
  - materials for sterilisation
  - test equipment
  - cleaning materials and equipment associated with sterilisation process
  - record keeping system
- specifications:
  - sterilisation specifications, control points and processing parameters
  - recording requirements and procedures
  - product and intermediate product specifications, control points and processing parameters
  - workplace documentation relating to sterilisation process and procedures that comply with GMP
  - load pattern requirements
  - sampling schedules and test procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- cleaning procedures associated with sterilisation process.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPPHM3019 Operate a chromatography manufacturing process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a chromatography separation process in a pharmaceutical manufacturing facility.

The unit applies to individuals who use Good Manufacturing Practice (GMP) and operating principles in the chromatography separation process. Individuals work under broad direction and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Pharmaceutical (PHM)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare chromatography equipment for operation	1.1 Identify production requirements from workplace documentation 1.2 Confirm materials meet production requirements 1.3 Confirm required facilities, storage, equipment and personnel are available

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Select and fit personal protective equipment and contamination prevention clothing according to workplace procedures 1.5 Clean, assemble and adjust equipment according to workplace procedures and operation and maintenance manual 1.6 Set equipment components and related instrumentation to meet production requirements 1.7 Conduct pre-start checks according to workplace procedures 1.8 Complete equipment status reports according to workplace procedures
2. Prepare samples and load products	2.1 Conduct pre-sampling tests and interpret test results to confirm process operation 2.2 Identify and report out of limit test results according to workplace procedures 2.3 Load product and pack into columns according to specifications and production requirements
3. Operate and monitor separation process	3.1 Start up and monitor separation process to confirm process cycles occur in correct sequence according to specifications and production requirements 3.2 Identify and report out of limit products or processes according to workplace procedures 3.3 Confirm separation of solution meets specifications 3.4 Conduct process according to safety and environmental requirements 3.5 Complete documentation according to workplace requirements
4. Shut down separation process	4.1 Confirm isolation and lock out procedures and product and process changeovers for shutting down 4.2 Safely shut down process 4.3 Clean work area according to workplace procedures 4.4 Complete records according to workplace procedures

Assessment Requirements for FBPPHM3019 Operate a chromatography manufacturing process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely operated at least one separation process using chromatography, including:

- accessed workplace information to confirm requirements for the process
- selected, fitted and used personal protective equipment and contamination prevention clothing
- conducted pre-start checks required for the safe operation of a chromatography separation process, including:
  - carried out required area or line clearances
  - inspected equipment condition to identify signs of wear
  - confirmed all safety equipment in place and operational
  - confirmed that equipment is clean or sanitised
  - confirmed that equipment is correctly configured for processing requirements
- performed procedures for packing columns and for loading material into columns
- started, operated, monitored and adjusted a process to achieve required outcomes
- conducted in-process control checks to confirm the process remains within limits
- maintained security, integrity and traceability of:
  - samples
  - sub-samples
  - documentation
- followed isolation and lock out procedures to take process and related equipment off-line in preparation for cleaning and maintenance according to workplace procedures
- performed product and process changeovers, including demonstrating column storage procedures
- taken corrective action in response to out-of-specification results
- safely shut down the process according to workplace procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- cleaned and maintained work area to meet workplace cleaning standards and environmental requirement
- completed records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- stages of the chromatography separation process, including:
  - the purpose, methods and outcomes of each stage
  - quality characteristics achievable by the separation process
  - methods of analysis
- basic operating principles, requirements and parameters of chromatography equipment, including:
  - main equipment components, operating capacities and applications
  - consequences of incorrect equipment preparation, such as incorrectly positioned non-return valve, supply pump failure and air in the column
  - typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- line clearance cleaning and sanitation procedures
- functions and limitations of personal protective equipment and contamination prevention clothing
- pre-start check requirements, including:
  - carrying out required area or line clearances
  - inspecting equipment condition to identify signs of wear
  - confirming all safety equipment is in place and operational
  - confirming that equipment is clean or sanitised
  - confirming that equipment is correctly configured for processing requirements
  - sample test methods analysis and interpretation of results
  - implications and actions taken if results are out-of-specification
- procedures used for:
  - collecting in process samples as specified in documentation appropriate to columns and process requirements
  - interpreting traces and corrective action where traces are not within specifications
- typical profile for a production cycle and events to be monitored during the cycle
- common causes of out-of-specification product or process and corrective actions required
- procedures and requirements of different shutdowns, including:
  - an understanding of the requirements for column storage
  - emergency and routine shutdowns
  - procedures to follow in the event of power outage
- isolation, lock out and tag out procedures and responsibilities

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- Good Manufacturing Practice (GMP) requirements associated with a separation process and related control measures
- requirements for completion of workplace documentation.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
  - a pharmaceutical manufacturing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective equipment and contamination prevention clothing
  - chromatography equipment
  - materials dispensed for the process
  - cleaning materials and equipment associated with a separation process using chromatography
  - record keeping system
- specifications:
  - product and intermediate product specifications, control points and processing parameters
  - workplace documentation relating to separation process and procedures that comply with GMP requirements
  - cleaning procedures associated with a separation process using chromatography.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPPPL4008 Prepare and present artisan food and/or beverages

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to prepare and present artisanal food and beverages to a customer in a retail environment.

This unit applies to those individuals who work in a food and beverage sales setting, with responsibility for storing, displaying and presenting products to a customer.

Where this unit includes serving alcoholic beverages, the requirements for Responsible Service of Alcohol (RSA) must be met. Food business licensing and regulatory requirements also apply to this unit, so local requirements must be checked before delivery. All work must comply with Australian food safety standards and relevant codes of practice.

Pre-requisite Unit

Nil

Unit Sector

People, Planning and Logistics (PPL)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Recognise and identify key product features	1.1 Identify specific artisan food or beverage product and its characteristics 1.2 Identify raw materials used to make product and their characteristics 1.3 Identify different processes used to make variations of the product

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Identify key sensory traits of the product 1.5 Identify factors affecting product storage
2. Set up product tasting area	2.1 Prepare products for tasting using appropriate techniques for product style or characteristics 2.2 Check products to ensure they are fit for customer consumption 2.3 Prepare tasting equipment suitable to product and tasting requirements and set up ready for use by customers 2.4 Prepare adequate supplies of suitable support materials and place ready for use 2.5 Confirm tasting preparation meets health and safety requirements
3. Conduct product tastings	3.1 Design and assemble sample product tasting based on an identified theme 3.2 Encourage customers to sample product range in the most beneficial order to experience product characteristics effectively 3.3 Explain product features and processing techniques to customers 3.4 Give customers time and privacy to sample each product 3.5 Encourage customers to ask questions and provide feedback on products 3.6 Answer customer queries accurately and comprehensively, or refer to another information resource 3.7 Adjust tasting order and product range to suit customer requirements 3.8 Follow safety requirements for durations food can be left out of controlled temperature storage
4. Store artisan food or beverage product	4.1 Store products to maintain quality and flavour 4.2 Complete records to meet regulatory and sales requirements 4.3 Clean workspace to meet regulatory requirements

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	• Interact effectively with customers in a retail environment • Describe product characteristics using industry-specific language
Numeracy	• Estimate weights or volume of product with reasonable accuracy

Assessment Requirements for FBPPPL4008 Prepare and present artisan food and/or beverages

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively prepared and presented artisanal food or beverage products, including:

- identifying and describing the main characteristics of two different artisanal food and/or beverage products
- identifying and describing the raw materials used to make each product
- describing the production techniques used to make each product
- preparing and presenting a sample tasting for a customer, based on an identified theme.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- main processing steps in making the product and the factors that result in variations in the end product
- different raw materials used to make types of product
- the effects that raw materials can have on end product
- factors that affect maturation of product
- packaging types, typical for product
- language to describe the characteristics of product
- use of the five senses for describing identified products
- temperature for storing identified products
- general nutritional properties of product
- ways to organise products for display
- care and handling of products
- shelf life, use-by dates and best before dates
- price and availability

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- Food Standards Code in relation to identified products
- pathogens that can exist in food preparation
- general requirements for importing artisan products.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - different types of artisan food and beverage products
  - materials or equipment to present product
- relationships:
  - access to potential customer/s.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG1001 Install pre-ballast

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to prepare for and lay pre-ballast.

The unit applies to individuals who work under supervision installing pre-ballast in preparation for laying railway track for a cane haulage system in the sugar industry.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and prepare work	1.1 Identify the location and scope of work according to job specifications 1.2 Organise materials required to complete the work 1.3 Confirm equipment operational and safety status 1.4 Select, fit and use personal protective equipment according to

Assessment Requirements for FBPSUG1001 Install pre-ballast

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has installed pre-ballast for at least one given project in line with workplace contexts, and demonstrated each of the following points at least once:

- organised required materials
- checked equipment operation
- correctly selected, fitted and used personal protective equipment (PPE)
- correctly used signage and communications equipment
- safely operated pre-ballast equipment to lay and compact materials to the required location, width and thickness
- performed site clean-up, and stored materials, tools and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- functions and basic operating principles of pre-ballast laying equipment
- common problems related to laying pre-ballast, and corrective action required
- the impact of the pre-ballast base on related track laying operations
- foundation specifications, including the materials used, thickness and compactness
- the steps involved in constructing/repairing track
- safe work procedures:
  - hazards and control measures related to laying pre-ballast
  - key health and safety requirements in the workplace
  - correct use of PPE
  - correct techniques for manual handling
- workplace cleaning standards for the work area
- requirements to liaise with and advise others in related work areas

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- use of traffic control signage relevant to installing pre-ballast.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a cane railway system or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - spreader, roller and related equipment
  - materials handling equipment
  - base materials – typically gravel and stone
  - PPE
  - traffic control signage and communication equipment
  - workplace information recording system
- specifications:
  - site and related project information
  - relevant health and safety workplace documentation
  - operating procedures and related advice on equipment operation
  - workplace cleaning standards and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to plan and carry out shunting of rolling stock to meet requirements of the marshalling strategy.

The unit applies to individuals who work under supervision with rolling stock in a cane haulage system in the sugar industry.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and prepare for shunting operation	1.1 Select, fit and use personal protective equipment according to workplace requirements 1.2 Identify and report hazards and damage or faults in bins and equipment to supervisor 1.3 Confirm shunting requirements with supervisor

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Locate and prepare vehicles and equipment according to workplace procedures 1.5 Identify rolling stock movements, availability and locations to determine appropriate siding or track locations for vehicle placement
2. Carry out shunting control procedures	2.1 Use points, levers, switches, signals and line of sight communications to assist the control of rolling stock movement 2.2 Use hand, light and radio shunting commands that conform with operational and statutory requirements 2.3 Check consignment notes or tickets and locate and sort bins according to marshalling requirements 2.4 Couple and uncouple rolling stock according to workplace procedures
3. Complete work	3.1 Record workplace information according to workplace procedures 3.2 Clean and store tools, plant and equipment according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Count bins, rakes and rolling stock
Navigate the world of work	• Understand main tasks, responsibilities and boundaries of own role
Interact with others	• Communicate with others according to workplace communication practices
Get the work done	• Complete tasks in required sequence • Apply decision-making processes to control hazards in routine situations

Assessment Requirements for FBPSUG1002 Undertake shunting operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has undertaken shunting operations, in line with workplace contexts, and demonstrated each of the following points at least once:

- identified shunting requirements
- safely fitted and used personal protective equipment (PPE)
- identified and reported hazards and maintenance requirements for bins and rakes
- determined siding or track locations for vehicles
- attached and detached rolling stock
- correctly used controls and communications equipment during shunting
- recorded required shunting information
- cleaned and stored tools, plant and equipment according to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- functions and basic operating principles of equipment used for shunting operations
- methods used to render equipment safe to inspect, maintain and/or clean, including lock-out, tag-out and isolation procedures
- acceptable locomotive, bin and rake condition and requirements for reporting any items needing repair
- requirements of cut-to-crush sequencing of cane rakes
- key health and safety requirements in the workplace:
  - correct use of PPE
  - safe work procedures
  - hazards related to work responsibilities and associated control measures
  - procedures for responding to emergency situations

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- how to communicate using hand, light and audible communication signals
- workplace cleaning standards for the work area.
- requirements to liaise with or advise personnel in related work areas.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a cane railway system or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - consignment notes, tickets, logs and running sheets
  - PPE
  - communication equipment
  - media for recording workplace information
- specifications:
  - operating procedures and related advice on equipment operation
  - workplace cleaning standards and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG1003 Move cane bins in a marshalling yard

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to move cane bins to ensure efficient cane supply operations.

The unit applies to individuals who work under supervision in sugar mill storage and marshalling yards.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for work in a cane bin marshalling yard	1.1 Select, fit and use personal protective equipment according to safe work practices 1.2 Identify and report health and safety hazards and maintenance requirements to supervisor

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Move full cane bins	2.1 Check continuity of cane supply to mill to meet cut-to-crush sequence using communication system 2.2 Connect cane bins to the weighbridge system 2.3 Operate yard control systems for full cane bins according to operating procedures
3. Move empty cane bins	3.1 Handle bin supply to meet traffic schedule requirements 3.2 Re-couple or pin bins according to workplace procedures 3.3 Operate yard control systems for empty can bins according to operating procedures
4. Recognise and report unacceptable performance	4.1 Observe system operating conditions and identify causes of unacceptable performance 4.2 Report and fix yard derailments according to workplace requirements 4.3 Identify and remove bins requiring repair according to workplace requirements 4.4 Report system error messages and follow instructions to take corrective action according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret system and schedule information
Writing	• Record information in required format
Numeracy	• Count bins and bin movements
Navigate the world of work	• Understand main tasks, responsibilities and boundaries of own role
Interact with others	• Communicate with others according to workplace communication

Assessment Requirements for FBPSUG1003 Move cane bins in a marshalling yard

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has moved cane bins in a marshalling yard in line with workplace contexts, and demonstrated each of the following points at least once:

- coupled and uncoupled cane bins safely to meet required length
- safely used personal protective equipment (PPE)
- reported safety hazards and maintenance requirements
- liaised with others using communication systems and equipment effectively
- checked yard capacity to direct cane bins to appropriate yard location
- handled the supply of full bins to the weighbridge system to meet cut-to-crush sequence
- moved empty cane bins
- operated the yard control system to its full potential
- identified and removed damaged bins
- reported and followed instructions to correct system error messages.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- function and location of signalling devices used to monitor cane bin movements
- functions and basic operating principles of equipment and systems
- cane yard system layout and line holding capacities
- implications of sub-optimal cut-to-crush times for mill performance and of disrupted supply
- key health and safety requirements in the workplace:
  - correct use of PPE
  - safe work procedures
  - hazards related to yard control associated control measures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

    - procedures for responding to emergency situations
- hand and audible communication signals for cane bin movement
- reporting and recording requirements relevant to cane bin movement.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in cane yards with related signalling and control systems, or an environment that accurately represents workplace conditions
- resources, equipment and materials:
    - loaded and empty bins
    - PPE
    - communication equipment
    - cane locos (excludes operation)
    - workplace information recording system
- specifications:
    - relevant codes of practice and industry standards
    - bin consignment and trip/cut-to-crush documentation
    - operating procedures and related advice on equipment operation
    - workplace information requirements and procedures, including safe work practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG1005 Manually clean and maintain housekeeping standards

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to carry out manual cleaning and housekeeping procedures.

The unit applies to individuals who work under supervision across all sectors of the sugar milling industry.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for cleaning	1.1 Prepare cleaning and sanitising agents, equipment and services for use according to workplace and safety requirements 1.2 Ensure equipment is safe to clean according to specifications

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Manually clean equipment	2.1 Clean equipment to meet workplace requirements 2.2 Prepare equipment for sanitation after cleaning 2.3 Record cleaning data according to workplace procedures 2.4 Store agents and equipment according to workplace and safety procedures
3. Collect and dispose of waste	3.1 Sort and collect waste according to workplace procedures 3.2 Recycle and transfer waste for rework, further treatment or disposal
4. Maintain housekeeping standards of the work area	4.1 Check the work area for compliance with safety requirements 4.2 Ensure equipment and the work area meet workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	• Record information in required format
Numeracy	• Calculate quantities and ratios for mixing cleaning agents
Navigate the world of work	• Understand main tasks, responsibilities and boundaries of own role
Get the work done	• Completes tasks in required sequence

Assessment Requirements for FBPSUG1005 Manually clean and maintain housekeeping standards

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has manually cleaned and maintained housekeeping standards in line with workplace contexts, and demonstrated each of the following points at least once:

- prepared, used and stored equipment and agents for cleaning tasks
- safely cleaned and sanitised equipment
- recorded cleaning of equipment
- sorted, collected and disposed of waste
- checked that work meets housekeeping standards.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic purpose of cleaning, sanitising and housekeeping
- properties and uses of cleaning and sanitising agents
- methods used to make equipment safe to clean, including lock-out, tag-out and isolation procedures
- personal protective equipment (PPE) needed for carrying out required cleaning tasks
- workplace procedures for:
  - safe use of cleaning and sanitising equipment and chemicals, including safety data sheets
  - preparing cleaning and sanitising agents, including consequences of mixing incorrectly and combining incompatible chemicals
  - spill control and recycling or disposal of spilled materials, including environmental responsibilities under environmental legislation
- workplace standards and requirements for:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - handling and storage of cleaning agents and equipment
  - cleaning equipment and the work area
- types of waste generated by the production and the cleaning process and related collection, treatment and disposal requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - cleaners, sanitisers and related equipment
  - equipment for cleaning
- specifications:
  - workplace procedures for safe work practices
  - equipment specifications
  - waste collection and treatment/disposal procedures
  - housekeeping standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPSUG2003 Lay skeleton track for cane rail system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has laid skeleton track for a cane rail system in line with workplace contexts and demonstrated each of the following points at least once:

- confirmed rail lengths meet required design and construction specifications
- carried out pre-operational checks of equipment
- estimated and prepared required materials
- applied safety procedures to prepare work area
- positioned and fixed skeleton track to specification
- correctly communicated workplace information using available communications equipment
- recorded track laying information
- cleared the work area and completed cleaning and storage tasks according to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- site operating procedures and practices for construction of railway systems
- steps involved in laying and fixing skeleton track
- functions and basic operating principles of equipment used in laying skeleton track
- the importance of rail positioning and alignment on track quality and performance
- the quality requirements of skeleton tracks for use in rail systems
- common problems related to laying skeleton tracks, and corrective action
- key health and safety requirements in the workplace:
  - safe work procedures
  - hazards related to track laying, and associated control measures

  - manual handling procedures for rail system construction
  - correct use of personal protective equipment (PPE)
- traffic control signage and communication procedures for rail system construction
- workplace cleaning standards for the work area.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a cane rail system or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - materials handling equipment and relevant hand and power tools
  - rails and related materials
  - PPE
  - communications equipment
  - workplace information recording system
- specifications:
  - specifications, site and related project information
  - operating procedures and related advice on equipment operation
  - workplace procedures for safe work practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG2004 Operate tamping equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to operate tamping equipment used to lift and pack track in sugar cane haulage systems. It relates to construction of new track and repair of existing track that has been pre-welded to meet track design and construction specifications.

The unit applies to individuals who work under supervision in the sugar milling industry.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and prepare work	1.1 Identify the location and scope of work according to specifications 1.2 Confirm and prepare materials required to complete the work to specifications 1.3 Carry out pre-operational checks, confirm operational status of

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	equipment, and report any faults 1.4 Select and fit personal protective equipment as required 1.5 Confirm that work is clearly signed according to safety procedures and that relevant authorities have been advised that work is in progress 1.6 Identify and remove potential hazards from construction area before commencing work
2. Operate tamping equipment	2.1 Operate ballast hopper to supply an even flow of ballast to the specified thickness 2.2 Operate tamper equipment to lift, line track and pack ballast to specification 2.3 Dress track by final ballast spread and trim to meet the specified profile 2.4 Check track to confirm that design and construction specifications are met
3. Analyse and respond to abnormal performance	3.1 Identify causes of abnormal performance from operating data and plant operating conditions 3.2 Identify and report hazards according to workplace safety requirements 3.3 Take corrective action to rectify abnormal performance according to workplace procedures 3.4 Implement emergency procedures according to workplace safety procedures
4. Complete work	4.1 Clear the construction area of debris according to workplace procedures 4.2 Store unused materials according to workplace procedures 4.3 Shut down and park equipment according to operating procedures 4.4 Clean and store tools, plant and equipment according to workplace procedures 4.5 Record workplace information according to workplace requirements

Assessment Requirements for FBPSUG2004 Operate tamping equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated tamping equipment, in line with workplace contexts and demonstrated each of the following points at least once:

- checked operation of tamper equipment and identified and reported faults
- prepared materials for tamping operation
- applied safety procedures to prepare work area
- safely operated tamper to apply and compact ballast and lift and align track to specification
- correctly communicated workplace information to relevant authorities
- corrected abnormal or unacceptable tamping
- recorded track laying information
- cleared the work area and completed cleaning and storage tasks according to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- site operating procedures and practices for construction and repair of railway systems
- steps in constructing/repairing track
- functions and operating principles of tamper equipment, including the layout and purpose of major air, hydraulic, mechanical and electrical systems relevant to equipment
- required operational checks and operating capacity of equipment
- track construction specifications
- the impact of tamper operation on track laying operations
- factors that can affect the tamper operation
- common problems related to tamping and corrective action

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- key health and safety requirements for railway system construction in the workplace:
  - health and safety hazards and associated control measures
  - manual handling procedures
  - correct use of personal protective equipment (PPE)
- traffic control signage and communication procedures relevant to railway system construction
- workplace cleaning standards for the work area.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a cane rail system or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - materials handling equipment and relevant hand and power tools
  - tamping equipment and related equipment
  - ballast
  - trackwork
  - PPE
  - workplace information recording system
- specifications:
  - specifications, site and related project information
  - operating procedures and related advice on tamping equipment operation
  - workplace procedures for safe work practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG2005 Construct turnouts

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to construct turnouts in sugar cane haulage systems. It relates to construction of new turnouts and repair of existing turnouts.

The unit applies to individuals who work under supervision in the sugar milling industry.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Prerequisite unit of competency for this unit is:

- FBPSUG2002 Lay rails for cane rail systems

Unit Sector

Sugar milling (SUG)

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has constructed turnouts in line with workplace contexts and demonstrated each of the following points at least once:

- carried out operational checks of equipment
- estimated material requirements
- applied safety procedures to prepare work area
- selected, fitted and used personal protective equipment (PPE)
- prepared sleepers for turnout construction
- confirmed that switching gear is operational
- safely operated track laying equipment, related attachments, hand tools and pneumatic tools for track laying
- constructed turnouts to specification
- correctly communicated workplace information to relevant authorities
- cleared the work area, and completed cleaning and storage tasks according to housekeeping requirements
- recorded turnouts information.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- track system layout and characteristics of each section
- functions and operating principles of equipment used for rail track construction
- the impact of turnout construction on related track laying operations
- factors that can affect turnout construction
- key health and safety requirements in the workplace:
  - health and safety hazards and associated control measures
  - manual handling procedures for rail system construction

FBPSUG2007 Conduct cane weighbridge operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to set up and operate a weighbridge to weigh and record incoming cane deliveries in sugar milling operations.

The unit applies to individuals who work under supervision in the sugar milling industry.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Set up weighbridge operations	1.1 Check weighbridge systems, including equipment, computer and recording arrangements, for operational status 1.2 Conduct tests to confirm accuracy of weighbridge operations and related functions in accordance with enterprise procedures, manufacturer’s instructions and relevant statutory requirements 1.3 Keep accurate reporting of the results of the inspection and testing

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	according to workplace procedures 1.4 Identify hazards and faults/discrepancies in weighbridge operation and undertake action according to workplace requirements
2. Weigh loaded vehicles/bins	2.1 Select, fit and use personal protective equipment according to safe work practices 2.2 Reject bins exceeding weight limit 2.3 Register weight of loaded bins or vehicles against bin identification 2.4 Calculate net weight of bins and vehicles 2.5 Record bins or vehicles and cane type according to workplace procedures
3. Prepare for shift changeover	3.1 Secure weighbridge systems, including equipment, computer and recording arrangements, or make ready for the next shift 3.2 Maintain records of operations and file according to workplace procedures 3.3 Undertake shift changeover according to workplace procedures 3.4 Inform incoming weighbridge operators of weighbridge and related equipment status procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret workplace requirements, standard operating procedures and specifications relevant to job role
Numeracy	• Check and confirm operational status of equipment and calibration of weighbridges using test weights
Navigate the world of work	• Understand main tasks, responsibilities and boundaries of own role • Apply workplace procedures relevant to own role

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Interact with others	• Apply communication practices and protocols relevant to own role
Get the work done	• Complete tasks in required sequence • Apply decision-making processes to control hazards in routine situations

Assessment Requirements for FBPSUG2007 Conduct cane weighbridge operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted cane weighbridge operations in line with workplace contexts and demonstrated each of the following points at least once:

- checked and tested accuracy of weighbridge equipment
- correctly selected, fitted and used personal protective equipment (PPE)
- accurately weighed loaded vehicles/bins
- calculated net weights and identified overweight loads
- completed and maintained accurate weighbridge operation records
- confirmed status of weighbridge and related equipment at start-up
- conducted shift changeover.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- functions and operating principles of weighbridge and related equipment components
- cut-to-crush sequence
- relationship between the weighbridge and downstream operations
- purpose and procedures for testing accuracy of weighbridge using test weights
- method to calculate net bin weight
- legislation relating to cane payment as it affects weighing and sampling, and weights and measures legislation
- key health and safety requirements in the workplace:
  - health and safety hazards and associated control measures
  - manual handling procedures relevant to weighbridge operations
  - correct use of PPE.

Assessment Requirements for FBPSUG2008 Operate a tipping station

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated a tipping station in line with workplace contexts and demonstrated each of the following points at least once:

- correctly carried out pre-operational checks
- selected, fitted and used personal protective equipment (PPE)
- operated plant to tip cane according to specifications
- monitored tipping process to maintain a full carrier
- took corrective action in response to abnormal or unacceptable performance
- completed all requirements for shift handover tipping process
- completed tipping operation records
- safely shut down operation and dealt with waste
- identified faulty bins and equipment and arranged transfer for repair.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- functions and basic operating principles of tipping process and related control system and equipment components
- consequences of tipping contaminated cane
- typical faults in cane bins that affect haulage and tipping operations
- acceptable bin and rake condition, and procedure for tagging and reporting bins requiring repair
- key health and safety requirements in the workplace:
  - health and safety hazards related to tipping operation, and associated control measures
  - manual handling procedures for tipping station operations
  - correct use of PPE

FBPSUG2009 Operate an extraction station

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to prepare and operate an extraction station in sugar cane operation.

The unit applies to individuals who work under supervision in the sugar milling industry and who are competent to operate turbines and reciprocating engines where required.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare the extraction process for operation	1.1 Confirm cane is available to meet production requirements 1.2 Confirm services are available and ready for operation 1.3 Check equipment in readiness for use according to operating specifications

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Select, fit and use personal protective equipment as required 1.5 Set the extraction process to meet production requirements
2. Operate and monitor the extraction process	2.1 Start and operate the extraction process according to operating procedures 2.2 Confirm process performance is maintained within specification 2.3 Ensure bagasse quality meets specifications 2.4 Monitor equipment to confirm operating condition 2.5 Identify, rectify or report bagasse, process and equipment non-conformance according to workplace procedures
3. Hand over the extraction station	3.1 Maintain workplace records according to workplace requirements 3.2 Carry out shift changeover according to workplace procedures 3.3 Ensure extraction station operators are aware of system and related equipment status at completion of handover
4. Shut down the extraction system	4.1 Identify the appropriate shutdown procedure for operational and long-term shutdown conditions 4.2 Safely shut down the extraction system according to operating specifications and workplace procedures 4.3 Prepare the extraction system for storage in shutdown mode 4.4 Identify and report operational maintenance requirements according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret workplace and standard operating procedures and production requirements relevant to job role
Writing	• Record maintenance, handover and shutdown information in required format

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Numeracy	• Interpret production and process control indicators and data
Navigate the world of work	• Follow workplace procedures applicable to own role and responsibilities • Understand main tasks, responsibilities and boundaries of own role
Interact with others	• Apply communication practices and protocols relevant to own role
Get the work done	• Complete tasks in required sequence • Apply decision-making processes to respond to routine performance abnormalities

Assessment Requirements for FBPSUG2009 Operate an extraction station

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated an extraction station in line with workplace contexts and demonstrated each of the following points at least once:

- confirmed availability of equipment, services and cane to meet production requirements
- selected, fitted and used personal protective equipment (PPE)
- safely started up and monitored supply and flow of cane to the process, and bagasse and juice from the process
- monitored the process and equipment operation
- took corrective action in response to typical operating faults and product and process non-conformance
- reported and recorded process and production data
- conducted shift changeover procedure
- shut down equipment in both automatic and manual modes and reported maintenance requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of extraction, including shredder operation, mills and diffusers as required in the workplace
- the flow of this process and the relationship between extraction, boilers and evaporation
- the effect of cane quality, added water and mill operation on extraction
- consequences of poor lubrication
- the role of cooling water for equipment operation
- quality characteristics of bagasse and their effect on boiler operation

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- equipment purpose and basic operating principles of extraction equipment
- significance and method of monitoring control points within the process
- common causes of variation, and corrective action required
- key health and safety requirements when operating an extraction station in the workplace:
  - hazards and associated control measures
  - manual handling procedures
  - correct use of PPE
  - procedures for responding to emergency situations
  - lock-out and tag-out procedures
- requirements of operational and long-term shutdown conditions to ensure the equipment is left in a safe state for the period of the shutdown and to minimise any delays in future start-up
- procedures and responsibility for reporting problems associated with the extraction process
- environmental and waste handling requirements and procedures for the extraction process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - extraction station equipment
  - materials and services required for operating an extraction station
  - workplace information recording system
  - maintenance tools
- specifications:
  - workplace and operating procedures and related advice on equipment operation, including advice on safe work practices and environmental requirements
  - product and process specifications and operating parameters
  - sampling schedule and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Select, fit and use personal protective equipment as required 1.5 Set the clarification process to meet production requirements
2. Operate and monitor the clarification process	2.1 Start and operate the clarification process according to operating procedures 2.2 Confirm process performance is maintained within specification 2.3 Ensure clarified product meets specifications 2.4 Monitor equipment to confirm operating condition 2.5 Identify, rectify or report product, process and equipment non-conformance according to workplace procedures
3. Hand over the clarification process	3.1 Maintain workplace records according to workplace procedures 3.2 Carry out shift changeover according to workplace procedures 3.3 Ensure clarification operators are aware of system and related equipment status at completion of handover
4. Shut down the clarification process	4.1 Identify the appropriate shutdown procedure for operational and long-term shutdown conditions 4.2 Safely shut down the clarification system according to operating specifications and workplace procedures 4.3 Prepare the clarification system for storage in shutdown mode 4.4 Identify and report operational maintenance requirements according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret production requirements, workplace and standard operating procedures relevant to job role • Interpret production requirements
Numeracy	• Interpret production and process control indicators and data

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Navigate the world of work	• Follow workplace procedures applicable to own role and responsibilities • Understand main tasks, responsibilities and boundaries of own role
Interact with others	• Apply communication practices and protocols relevant to own role
Get the work done	• Complete tasks in required sequence • Apply decision-making processes to respond to abnormal performance

Assessment Requirements for FBPSUG2010 Operate a juice clarification process

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated a juice clarification process in line with workplace contexts and demonstrated each of the following points at least once:

- checked availability of raw juice and services
- conducted pre-start checks on machinery used for clarification
- selected, fitted and used personal protective equipment (PPE)
- safely operated, monitored and adjusted the process from the juice tanks through to the clarifiers
- recorded process and production information
- taken corrective action in response to typical operating faults and product and process non-conformance
- conducted shift changeover procedure
- shut down the process in both automatic and manual modes and reported maintenance requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of clarification, including heating, liming, juice degasification, saccharate and flocculant addition
- the flow of the process and the relationship to related processes, including the consequences of poor clarification on downstream processes
- equipment purpose and basic operating requirements of juice clarification equipment
- the effect of recycle streams on the clarification process
- the effect of faulty preparation of materials
- quality characteristics of raw juice and of clarified product

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- the impact of dextran on sugar quality
- the function of the incubation tank and starch removal
- conditions that can cause deterioration in juice
- significance and method of monitoring control points within the process
- plant and equipment manufacturer's operating procedures
- key health and safety requirements when operating a juice clarification process in the workplace:
  - hazards and associated control measures
  - manual handling procedures
  - correct use of PPE
  - procedures for responding to emergency situations
  - lock-out and tag-out procedures
- procedures and responsibility for reporting problems associated with the juice clarification process
- environmental and waste handling requirements and procedures for the juice clarification process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - juice clarification equipment and services as required
  - workplace information recording system
  - maintenance tools
- specifications:
  - workplace and operating procedures and related advice on equipment operation, including advice on safe work practices and environmental requirements
  - product and process specifications and operating parameters
  - sampling schedule and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG2011 Operate a mud filtration process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to operate a mud filtration process from the clarifiers to mud disposal.

The unit applies to individuals who work under supervision in the sugar milling industry.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare the mud filtration process for operation	1.1 Assess and condition mud to meet filtration requirements 1.2 Confirm services are available and ready for operation 1.3 Check equipment in readiness for use according to operating specifications 1.4 Select, fit and use personal protective equipment as required

Assessment Requirements for FBPSUG2011 Operate a mud filtration process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated a mud filtration process in line with workplace contexts and demonstrated each of the following points at least once:

- prepared materials for filtration requirements
- checked the availability of services
- conducted required pre-start checks on machinery used for filtration
- selected, fitted and used personal protective equipment (PPE)
- safely started, operated, monitored and adjusted the mud filtration process from the clarifiers to mud disposal
- correctly conducted shift changeover
- taken corrective action in response to typical faults, inconsistencies and product non-conformance
- correctly recorded process and production information
- safely shut down mud filtration process and related equipment and reported maintenance requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the purpose and principles of mud filtration, including the role of materials added, and their effect on filter operation
- the effect of recycle streams, addition rates, variations in process parameters and mud age on the mud filtration process
- the circuit flow of the process, and the relationship to related processes, including mud output, filter speed, water addition and cake permeability
- equipment purpose and operating principles of mud filtration equipment, including vacuum pumps and condensers

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- significance and method of monitoring control points within the process
- common causes of variation in the mud filtration process, and corrective action
- key health and safety requirements when operating a mud filtration process:
  - hazards and associated control measures
  - manual handling procedures
  - correct use of PPE
  - procedures for responding to emergency situations
  - lock-out and tag-out procedures
- requirements of operational and long-term shutdown conditions to ensure the equipment is left in a safe state for the period of the shutdown and to minimise any delays in future start-up
- environmental and waste handling requirements and procedures for the mud filtration process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - filtration and related equipment, services and materials
  - workplace information recording system
- specifications:
  - operating procedures and related advice on equipment operation, including advice on safe work practices and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule/batch instructions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG2012 Chemically clean equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to use chemical agents to clean in-line plant and equipment. It applies to cleaning of in-line plant and equipment, including evaporators, pans, heaters, filters and pipework.

The unit applies to individuals who work under supervision in the sugar milling industry.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for cleaning	1.1 Confirm chemical stocks are available to meet cleaning and sanitation requirements 1.2 Confirm services are available and ready for operation 1.3 Select, fit and use personal protective equipment according to workplace safety procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Check equipment to confirm readiness for use according to operating specifications 1.5 Plan equipment shut down and take equipment off-line for cleaning according to operating procedures 1.6 Set the plant for the cleaning cycle
2. Operate and monitor the cleaning process	2.1 Undertake the cleaning process according to operating procedures 2.2 Monitor the cleaning process to confirm cleaning meets workplace requirements 2.3 Record cleaning data according to workplace requirements 2.4 Identify, rectify or report process non-conformance and equipment faults according to workplace procedures
3. Dispose of waste and return plant to operating condition	3.1 Flush and dispose of cleaning chemicals from plant according to workplace environmental procedures 3.2 Return plant to operational requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret workplace procedures and environmental care requirements relevant to job role
Navigate the world of work	• Apply legislative requirements and workplace procedures to own role and responsibilities
Interact with others	• Report operational and safety information in required format
Get the work done	• Complete tasks in required sequence

Assessment Requirements for FBPSUG2012 Chemically clean equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has chemically cleaned equipment in line with workplace contexts and demonstrated each of the following points at least once:

- selected, fitted and used personal protective equipment (PPE)
- completed steps required to prepare the plant for cleaning
- cleaned equipment according to cleaning process cycle and procedures
- carried out relevant checks and inspections to confirm effectiveness of cleaning, including completion of required records
- handled cleaning and sanitation agents safely
- returned the plant to operating order.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of cleaning in place (in-line), including the use and functions of caustic and acid solutions, and cleaning sequence and stages
- cleaning and sanitation requirements for work area, including different levels of cleaning requirements depending on the reason for cleaning
- methods used to render equipment safe to clean, including lock-out, tag-out and isolation procedures
- equipment settings required for cleaning and for operating
- inspection points for cleaning and sanitation
- consequences of contamination of process flows by cleaning solutions
- types of waste generated by both the production and the cleaning process, and related collection, treatment and disposal requirements
- environmental consequences of incorrect waste disposal procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- health and safety in the workplace requirements when chemically cleaning in-line plant and equipment:
  - appropriate signage of cleaning activities
  - safe handling and storage of cleaners and sanitisers
  - correct use of PPE.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - equipment to be cleaned and related cleaning system
  - chemicals and/or automated chemical addition system
  - workplace information recording system
- specifications:
  - workplace procedures and related advice on equipment operation, including advice on safe work practices and environmental requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG2013 Operate a pan station

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to operate the panning process from the liquor and A/B molasses tanks to the high grade fugal distributor and low grade pan receiver.

The unit applies to individuals who work under supervision in the sugar milling industry.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FBPSUG2013 Operate a pan station

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated a pan station in line with workplace contexts and demonstrated each of the following points at least once:

- conducted pre-start checks and confirmed equipment status and condition
- started up and operated equipment in both automatic and manual modes
- safely operated, monitored and adjusted the process and equipment operation
- added process additives as required by pan performance
- prepared magma and grain for high/low grade seed production
- prepared slurry for seed production
- controlled station throughput and A/B balance to meet factory throughput through pan scheduling
- conducted shift changeover procedure
- shut down and cleaned pans according to schedule or as indicated by equipment monitoring
- taken corrective action in response to typical operating faults and product and process non-conformance
- correctly recorded process and production information.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of pan station operation, including the principles of crystallisation that may relate to operation of batch and continuous pans
- sugar industry quality standards for each brand of sugar
- factors that affect throughput and recovery, including the relationship between sugar pol and throughput; the balance between A, B and C pans and the effect of cane quality and boiling formula

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- factors that affect flow of massecuite through the system
- the effects of massecuite quality on operations
- relationship between boiling point and pressure in the pans station
- equipment purpose and basic operating principles of pans station equipment, including vacuum pumps and condensers
- significance and method of monitoring control points within the process
- common causes of variation, and corrective action
- shutdown requirements:
  - shutdown sequence, including massecuite pumps and stock management
  - requirements of operational and long-term shutdowns
- key health and safety requirements when operating a panning process:
  - hazards and associated control measures
  - correct use of personal protective equipment (PPE)
  - lock-out and tag-out procedures
- environmental and waste handling requirements and procedures for operating a pan station.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - pan station equipment
  - materials, including molasses and liquor
  - workplace information recording system
  - routine maintenance tools
- specifications:
  - workplace operating procedures and related advice on equipment operation, including advice on safe work practices and environmental requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPSUG2014 Operate a low grade fugal station

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated a low grade fugal station in line with workplace contexts and demonstrated each of the following points at least once:

- confirmed availability of equipment, services and massecuite to meet production requirements
- selected, fitted and used personal protective equipment (PPE)
- conducted pre-start checks and followed start-up procedure
- started up and operated in both automatic and manual modes
- safely operated, monitored and adjusted the process and equipment from the re-heater to the magma pump and molasses cooler within required parameters
- controlled station throughput to meet factory flows
- performed an operational shutdown according to workplace procedure
- conducted shift handover according to workplace procedure
- taken corrective action in response to typical operating faults and product and process non-conformance.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of low grade fugal operation, including C molasses cooling and storage, and operating efficiencies for low grade fugals
- the effect of C molasses dilution and temperature on C massecuite viscosity
- the effect of C massecuite conditioning on low grade fugal performance
- factors that affect throughput and recovery, including the relationship between crystalliser throughput, magma stock and remelt rate
- equipment purpose and operating principles of low grade fugal equipment

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- services used for low grade fugal process
- significance and method of monitoring control points within the process
- key health and safety requirements when operating a low grade fugal process:
  - hazards and associated control measures
  - correct use of PPE
  - procedures for responding to emergency situations
  - lock-out and tag-out procedures
- requirements of operational and long-term shutdown conditions
- procedures and responsibility for reporting problems relating to the low grade fugal process
- environmental and waste handling requirements and procedures relevant to the low grade fugal process
- recording requirements and procedures relevant to low grade fugal process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - low grade fugal station equipment
  - materials, including massecuite
  - maintenance tools
  - workplace information recording system
- specifications:
  - workplace and operating procedures and related advice on equipment operation, including advice on safe work practices and environmental requirements
  - product and process specifications and operating parameters
  - cleaning procedures, sampling schedule and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

2. Operate and monitor high grade fugal station	2.1 Start and operate the high grade fugal station according to operating procedures 2.2 Confirm process performance is maintained within specification 2.3 Ensure output meets specification 2.4 Monitor equipment to confirm operating condition 2.5 Identify, rectify or report product, process and equipment non-conformance according to workplace procedures
3. Hand over the high grade fugal station	3.1 Maintain workplace records according to workplace requirements 3.2 Carry out handover according to workplace procedures 3.3 Ensure operators are aware of system and related equipment status at completion of handover
4. Shut down the high grade fugal station	4.1 Identify the appropriate shutdown procedure for operational and long-term shutdown conditions 4.2 Safely shut down the system according to operating procedures 4.3 Prepare the high grade fugal system for storage in shutdown mode 4.4 Identify and report operational maintenance requirements according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret workplace and standard operating procedures relevant to job role
Reading	• Interpret information in workplace and standard operating procedures
Numeracy	• Monitor and interpret production and process control indicators

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
	and data • Check operation or calibration of measuring instrumentation
Navigate the world of work	• Apply workplace procedures to own role and responsibilities
Interact with others	• Apply communication practices and protocols relevant to own role
Get the work done	• Complete tasks in required sequence • Apply decision-making processes to respond to routine performance abnormalities

Assessment Requirements for FBPSUG2015 Operate a high grade fugal station

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated a high grade fugal station in line with workplace contexts and demonstrated each of the following points at least once:

- confirmed availability of equipment, services and massecuite to meet production requirements
- selected, fitted and used personal protective equipment (PPE)
- conducted pre-start checks and followed start-up procedure
- started up and operated in both automatic and manual modes
- safely operated, monitored and adjusted the high grade fugal distributor to the sugar bin and the A and B molasses storage tanks within required parameters
- controlled dryer airflows to achieve target sugar temperature and moisture
- controlled station throughput and A/B balance to meet pan stage throughput
- performed an operational shutdown according to schedule or as indicated by equipment monitoring
- conducted shift handover according to workplace procedure
- taken corrective action in response to typical operating faults and product and process non-conformance.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of high grade fugal station operation, including sugar drying and operation of batch and continuous fugals
- factors that affect throughput and recovery, including the relationship between sugar pol and throughput and the balance between A and B fugals
- the effect of massecuite quality on fugal operation and the effect of variation in operating parameters on the fugal output

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- equipment purpose and basic operating principles of high grade fugal equipment
- significance and method of monitoring control points within the process
- key health and safety requirements when operating a high grade fugal process:
  - hazards and associated control measures
  - correct use of PPE
  - procedures for responding to emergency situations
  - lock-out and tag-out procedures
- shutdown sequence, including massecuite feed pumps and re-heaters
- requirements of operational and long-term shutdown conditions
- procedures and responsibility for reporting problems relating to the high grade fugal process
- environmental and waste handling requirements and procedures relevant to the high grade fugal process
- recording requirements and procedures relevant to high grade fugal process operations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - high grade fugal station equipment
  - materials, including massecuite
  - routine maintenance tools
  - workplace information recording system
- specifications:
  - workplace and operating procedures and related advice on equipment operation, including advice on safe work practices and environmental requirements
  - product and process specifications and operating parameters
  - cleaning procedures, sampling schedule and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG2016 Operate a crystalliser station process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to operate the crystalliser station process from the low grade pan receiver through the crystallisers to the re-heater.

The unit applies to individuals who work under supervision in the sugar milling industry.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare the crystalliser station for operation	1.1 Confirm massecuite is available to meet production requirements 1.2 Confirm services are available and ready for operation 1.3 Check equipment in readiness for use according to workplace procedures 1.4 Select, fit and use personal protective equipment according to

Assessment Requirements for FBPSUG2016 Operate a crystalliser station process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion and in line with workplace contexts, the individual has operated a crystalliser station process, including:

- confirmed availability of equipment, massecuite and services to meet production requirements
- conducted pre-start checks of equipment according to procedures
- selected, fitted and used personal protective equipment (PPE)
- safely started up, operated and monitored the process and equipment operation
- started up from empty or from full in manual and automatic modes
- operated the process from the low grade pan receiver through the crystallisers to the re-heater
- conducted shift changeover according to workplace procedure
- performed an operational shutdown
- taken corrective action in response to typical operating faults and product and process non-conformance
- reported and/or recorded process and production and corrective action.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of crystallisation, including a basic understanding of crystal growth and super saturation of solutions
- the effect of C molasses dilution on C-massecuite viscosity
- the effect on C molasses purity of variation in:
  - end of cooling and re-heating temperatures
  - residence time

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- equipment purpose and basic operating principles of crystallisation equipment
- requirements when starting up full crystallisers containing cold massecuite
- requirements when shutting down full crystallisers containing hot massecuite
- significance and method of monitoring control points within the process
- key health and safety requirements when operating a crystalliser station process:
  - hazards and associated control measures
  - correct use of PPE
  - procedures for responding to emergency situations
  - lock-out and tag-out procedures
- shut down sequence, including massecuite pumps and re-heaters
- requirements of both operational and long-term shutdown conditions
- procedures and responsibility for reporting problems relating to the crystalliser station process
- environmental and waste handling requirements and procedures relevant to crystalliser station process operations
- recording requirements and procedures relevant to crystalliser station process operations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - crystalliser station equipment
  - materials, including massecuite
  - routine maintenance tools
  - workplace information recording system
- specifications:
  - workplace and operating procedures and related advice on equipment operation, including advice on safe work practices and environmental requirements
  - product and process specifications and operating parameters
  - workplace cleaning procedures, sampling schedule and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG2017 Undertake simple fabrication

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to carry out fabrication-associated general jobbing work. It includes producing general fabricated components in plate, pipe and section or sheet.

The unit applies to individuals who work under supervision in the sugar milling industry.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for assembly of parts	1.1 Identify fabrication requirements according to job specifications 1.2 Select appropriate fabrication method according to workplace procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Select, fit and use personal protective equipment according workplace safety procedures 1.4 Identify and collect required materials and equipment according to job specifications 1.5 Prepare materials for fabrication according to workplace procedures 1.6 Ensure the work area is ready for the fabrication job according to work place health and safety requirements
2. Assemble fabricated components	2.1 Position and clamp components according to job specifications and workplace safety procedures 2.2 Check component positioning against job specifications 2.3 Fix components using appropriate fixing method according to workplace procedures and health and safety requirements 2.4 Check assembly to confirm conformance to job specifications

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Identify routine fabrication requirements, including tolerances, dimensions and finishes, from written work instructions and technical drawings and sketches • Interpret standard operating procedures
Numeracy	• Measure parts to be joined to specified tolerances and dimensions • Check for conformance to specification
Navigate the world of work	• Apply workplace procedures relevant to own role • Understand main tasks, responsibilities and boundaries of own role
Get the work done	• Recognise and make routine decisions to respond to non-conforming components • Identify and correct routine fabrication problems

Assessment Requirements for FBPSUG2017 Undertake simple fabrication

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has undertaken simple fabrication in line with workplace contexts and demonstrated each of the following points at least once:

- identified fabrication requirements and methods
- identified and obtained components, materials, equipment and measuring and levelling devices
- prepared materials for fabrication
- checked accuracy of component positioning
- identified and corrected non-conforming component assembly
- used squares, levels and rules to measure materials and fabricated components
- prepared and joined components
- applied safety procedures to prepare work area and materials and complete the work.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of fabrication, including methods used to assemble and fix components and the effects of distortion on fabricated components
- use of equipment to position components to meet assembly requirements
- use of rules, tapes, squares and levels relevant for general metal fabrication
- methods used to prepare ends for joining
- appropriate joining methods, including welding and bolt/screw fixing
- typical defects that can occur for given assembly and fabrication methods
- options for correcting out-of-tolerance components and assemblies
- key health and safety requirements for general metal fabrication:
  - safe work procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- hazards and risk assessment
- manual handling procedures
- correct use of personal protective equipment (PPE).

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - fabrication equipment
  - PPE
  - rules, tapes, squares and levels
  - components to be fabricated
  - drawings, sketches and specifications as required for task
- specifications:
  - operating procedures and related advice on equipment/instrumentation operation
  - health and safety policies and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG2018 Undertake forming, bending and shaping

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to carry out forming, bending and shaping operations. It includes hot or cold forming of pipes, cylinders, cones, angles, and ductwork using presses, shapers, benders and drop hammers.

The unit applies to individuals who work under supervision in the sugar milling industry.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Assessment Requirements for FBPSUG2018 Undertake forming, bending and shaping

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has undertaken forming, bending and shaping in line with workplace contexts and demonstrated each of the following points at least once:

- identified forming, bending and shaping requirements
- selected dyes, formers and accessories
- selected, fitted and used personal protective equipment (PPE)
- marked out and produced simple templates
- safely set up equipment and conducted pre-operational checks
- operated, monitored and adjusted equipment
- positioned and clamped or fed material according to equipment requirements
- measured components using dividers, trammels, rules, tapes, gauges and templates
- produced, formed and/or shaped material to meet job specification
- confirmed that the formed or shaped material meets specification
- safely shut down equipment
- maintained workplace cleaning standards
- reported health and safety risks and maintenance requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for undertaking metal forming, bending and shaping
- site operating procedures and practices
- purpose and operating principles of forming, bending and shaping equipment, including equipment operating capacities
- the effect of heating materials on the forming and bending process
- scope to adjust equipment parameters, and related effect on outcome

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- awareness of hazards related to the operation of forming, bending and shaping equipment
- workplace cleaning standards for the work area.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - forming, bending and shaping equipment
  - relevant measuring devices
  - materials to be formed, bent and/or shaped
  - drawings, templates and specifications as required
- specifications:
  - operating procedures and related advice on safe equipment operation, including information on safe work practices and environmental requirements
  - equipment operating procedures and related information
  - workplace cleaning standards and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG2019 Operate a bagasse fuel supply system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to operate a bagasse fuel system and related auxiliary fuel system to supply a boiler. The auxiliary fuel supply system is typically an oil system.

The unit applies to individuals who work under supervision in the sugar milling industry.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply in the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare the fuel supply system for operation	1.1 Select, fit and use personal protective equipment according to workplace safety procedures 1.2 Conduct pre-operational checks according to operating procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Identify and control health and safety hazards 1.4 Identify and report maintenance requirements according to workplace procedures 1.5 Ensure primary and auxiliary fuel is available to meet combustion requirements 1.6 Confirm services are available and ready for operation
2. Start and monitor operation of the fuel supply system	2.1 Start and operate the system to meet workplace requirements 2.2 Confirm process performance is maintained within operating requirements 2.3 Ensure work area meets workplace cleaning standards
3. Analyse and respond to abnormal performance	3.1 Identify causes of abnormal performance in the system 3.2 Take corrective action in response to hazards and abnormal plant performance 3.3 Implement emergency procedures according to health and safety procedures
4. Hand over fuel system operations	4.1 Maintain workplace records according to workplace procedures 4.2 Carry out handover according to workplace procedures 4.3 Ensure operators are aware of system and related equipment status at completion of handover
5. Shut down the fuel supply system	5.1 Safely shut down the system according to workplace procedures 5.2 Prepare the system for storage in shutdown mode according to operating procedures 5.3 Identify and report operational maintenance requirements according to workplace procedures 5.4 Store fuel to meet fuel requirements and workplace standards

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Reading	• Interpret information in workplace documentation
Numeracy	• Interpret production and process control indicators and data
Navigate the world of work	• Apply workplace procedures to own role and responsibilities
Interact with others	• Use modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Access and interpret bagasse fuel supply system process control panels and system • Make routine decisions to correct abnormal performance of bagasse fuel supply system

Assessment Requirements for FBPSUG2019 Operate a bagasse fuel supply system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated a bagasse fuel supply system in line with workplace contexts and demonstrated each of the following points at least once:

- selected, fitted and used required personal protective equipment (PPE)
- conducted pre-start checks of equipment, fuel and services
- followed start-up procedures in both manual and automatic modes
- safely operated, monitored and adjusted a bagasse fuel system and related auxiliary fuel system to supply a boiler
- cleared fuel blockages or chokes throughout the system according to workplace procedures
- applied fuel storage and/or reclamation procedures
- applied procedures for test firing burners
- removed, inspected, cleaned and replaced oil burners
- carried out shift handover procedures
- taken a fuel supply system off-line according to workplace procedures
- taken corrective action in response to abnormal or unacceptable performance
- reported fuel system operations and maintenance requirements
- controlled work health and safety risks
- safely shut down bagasse fuel supply system.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- properties of bagasse and bagacillo, and impact of variation on combustion
- impact of bagasse belt levels on system capacity to supply

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- principles of flame management systems, including understanding of when and how to purge boiler before relighting in a flame-out situation
- purpose and operation of auxiliary fuel supply
- functions and basic operating principles of fuel supply system, components and auxiliary equipment
- fuel storage requirements relevant to a bagasse fuel system
- fuel reclamation options and procedures
- the effect of fuel quality and supply on boiler operation
- bagasse fuel supply system layout to supply a boiler
- relationship between viscosity and temperature for burner operation
- purpose of atomising steam and/or air
- purpose of purge cycle for the burner
- relationship between fuel supply system and other processes
- key health and safety requirements relevant to operating a bagasse fuel system:
  - hazards related to operation of fuel supply system, and associated control measures
  - correct use of PPE
  - methods used to render equipment safe to inspect, maintain and clean, including lock-out, tag-out and isolation procedures
  - procedures for responding to emergency situations, including emergency shutdown
- handover and long-term shutdown and storage procedures
- procedures and responsibility for reporting problems relevant to operating a bagasse fuel system
- environmental and waste handling requirements and procedures relevant to operating a bagasse fuel system
- recording requirements and procedures for operating a bagasse fuel system.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - bagasse fuel supply equipment
  - fuel and services as required
  - maintenance tools
  - workplace information recording system
- specifications:
  - operating procedures and related advice on equipment operation, including advice on safe work practices and environmental requirements
  - product and process specifications and operating parameters

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- workplace cleaning standards and procedures
- workplace information recording procedures
- sampling schedule and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

	workplace safety procedures 1.4 Identify and report maintenance requirements according to workplace procedures 1.5 Ensure primary and auxiliary fuel is available to meet combustion requirements according to workplace procedures 1.6 Confirm services are available and ready for operation
2. Start and monitor operation of the fuel supply system	2.1 Operate the system according to operating procedures 2.2 Confirm performance is maintained within operating procedures 2.3 Ensure the work area is maintained according to workplace cleaning standards
3. Analyse and respond to abnormal performance	3.1 Identify causes of abnormal performance in the operation 3.2 Take corrective action to rectify causes of abnormal performance 3.3 Implement emergency procedures according to health and safety
4. Hand over fuel system operations	4.1 Maintain workplace records according to workplace procedures 4.2 Carry out handover according to workplace procedures 4.3 Ensure operators are aware of system and related equipment status at completion of handover
5. Shut down the fuel supply system	5.1 Shut down the system according to operating procedures 5.2 Prepare the system for storage in shutdown mode according to operating procedures 5.3 Identify and report maintenance requirements according to workplace procedures 5.4 Store fuel to meet fuel requirements and workplace standards

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Reading	• Interpret information in workplace documentation
Numeracy	• Monitor and interpret production and process control indicators and data • Calculate amount of caustic addition for each tonne of coal burnt
Navigate the world of work	• Apply workplace procedures to own role and responsibilities
Interact with others	• Use modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Access and interpret coal fuel supply system control panels and system • Make routine decisions to correct abnormal performance of coal fuel supply system

Assessment Requirements for FBPSUG2020 Operate a coal fuel supply system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated a coal fuel supply system in line with workplace contexts and demonstrated each of the following points at least once:

- followed set-up and start-up procedures
- confirmed status of fuel supply system and related services
- operated, monitored and adjusted a coal fuel system and related auxiliary fuel system to supply a boiler
- cleared fuel blockages or chokes throughout the system
- carried out procedures for test firing burners
- carried out procedures to take fuel supply system off-line
- removed, inspected, cleaned and replaced oil burners
- followed shift handover procedure
- taken corrective action in response to abnormal or unacceptable performance.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles of flame management systems, including understanding of when and how to purge boiler before relighting in a flame-out situation
- the amount of caustic addition for each tonne of coal burnt
- purpose and operation of auxiliary fuel supply
- functions and operating principles of fuel supply system, components and auxiliary equipment
- supply system layout
- the effect of fuel quality and supply on boiler operation
- relationship between fuel supply system and other processes

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- fuel storage requirements
- fuel reclamation options and procedures as appropriate for the workplace and fuel type
- key health and safety requirements relevant to operating a coal fuel supply system:
  - hazards related to operation of fuel supply system and associated control measures
  - correct use of personal protective equipment (PPE)
  - methods used to render equipment safe to inspect, maintain and clean, including lock-out, tag-out and isolation procedures
  - procedures for responding to emergency situations, including emergency shutdown procedure
- handover and long-term shutdown and storage procedures for operating a coal fuel supply system
- procedures and responsibility for reporting problems
- environmental and waste handling requirements and procedures for operating a coal fuel supply system
- recording requirements and procedures relevant to operating a coal fuel supply system.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately reflects performance in a real workplace setting
- resources, equipment and materials:
  - PPE
  - coal fuel supply equipment
  - auxiliary fuel supply equipment
  - fuel and services as required
  - maintenance tools
  - workplace information recording system
- specifications:
  - operating procedures and related advice on equipment operation, including advice on safe work practices and environmental requirements
  - product and process specifications and operating parameters
  - workplace cleaning standards and procedures
  - workplace information recording procedures
  - sampling schedule and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG2021 Operate an ash separation system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to operate a system to separate ash solids from boiler sluice water by use of clarifiers and filters.

The unit applies to individuals who work under supervision in the sugar milling industry.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare the ash separation system for operation	1.1 Confirm materials are available to meet requirements 1.2 Confirm services are available and ready for operation 1.3 Select, fit and use personal protective equipment according to workplace safety procedures 1.4 Check equipment in readiness for use according to operating

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	procedures 1.5 Set the ash separation process to meet production requirements 1.6 Identify and report health and safety hazards and maintenance requirements
2. Operate the ash separation process	2.1 Start and operate the ash separation system according to operating procedures 2.2 Confirm process performance is maintained within manufacturer's specifications to meet workplace requirements 2.3 Ensure the work area meets workplace cleaning standards
3. Analyse and respond to abnormal performance	3.1 Monitor ash separation system operating conditions 3.2 Take corrective action to rectify causes of abnormal performance 3.3 Implement emergency procedures according to workplace safety procedures
4. Hand over ash separation operations	4.1 Maintain operating log according to workplace procedures 4.2 Carry out handover according to workplace procedures 4.3 Ensure system operators are aware of system and related equipment status at completion of handover
5. Complete ash separation operations	5.1 Collect and dispose of ash according to workplace, environmental and waste handling requirements and procedures 5.2 Identify and report operational maintenance requirements according to workplace procedures 5.3 Record workplace information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret workplace information relevant to job role

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Numeracy	• Monitor and interpret production and process control indicators and data • Estimate storage capacities of ash holding areas • Calculate correct quantities of chemicals, including caustic soda and flocculants for use in system
Navigate the world of work	• Apply workplace procedures to own role and responsibilities
Interact with others	• Use modes of communication suitable to purpose to confirm and clarify understanding
Get the work done	• Access and interpret ash separation system process control panels and system • Make routine decisions to correct abnormal plant performance of ash separation system

Assessment Requirements for FBPSUG2021 Operate an ash separation system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated an ash separation system in line with workplace contexts and demonstrated each of the following points at least once:

- conducted pre-start checks and followed start-up procedure
- selected, fitted and used required personal protective equipment (PPE)
- maintained work area to meet cleaning standards
- monitored the ash separation system
- recorded operating information
- observed safe chemical preparation and handling
- reported health and safety risks and maintenance requirements
- followed shift handover procedure
- taken corrective action in response to typical operating faults and product and process non-conformance
- safely disposed of ash.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- properties of ash or soot and the impact on filter operation
- functions and operating principles of ash separation system and related equipment
- relationship between vacuum, filter speed and cake permeability
- key health and safety requirements for operating an ash separation system in the workplace:
  - correct use of PPE
  - procedures for responding to emergency situations, including safe shutdown procedure

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

    - health and safety hazards related to operation of the ash removal system, and associated lock-out, tag-out and isolation procedures
- handover procedures for operating an ash separation system
- procedures and responsibility for reporting problems for operating an ash separation system
- environmental and waste handling requirements and procedures relevant to operating an ash separation system
- recording requirements and procedures for operating an ash separation system.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
    - PPE
    - ash separation system and related equipment
    - workplace information recording system
- specifications:
    - operating procedures and related advice on equipment operation, including advice on safe work practices and environmental requirements
    - product and process specifications and operating parameters
    - workplace cleaning standards and procedures
    - workplace information recording procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG2023 Operate a cooling water system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to operate cooling towers or spray ponds to supply treated, cool water for factory requirements.

The unit applies to individuals who work under supervision in the sugar milling industry.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare the cooling tower for operation	1.1 Follow tower cleaning procedures and complete cleaning records according to workplace procedures 1.2 Confirm chemicals are available and delivery systems are ready for operation 1.3 Ensure make-up water supply is available and meets quality requirements

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Select, fit and use personal protective equipment according to workplace safety procedures 1.5 Conduct pre-operational checks according to operating procedures 1.6 Identify and report health and safety hazards and maintenance requirements to appropriate personnel
2. Start and monitor cooling tower	2.1 Start the system according to operating procedures 2.2 Confirm operating condition and cleanliness according to operating procedures 2.3 Monitor, test and adjust water quality according to operating procedures 2.4 Ensure the work area is maintained to meet workplace cleaning standards
3. Analyse and respond to abnormal performance	3.1 Check water condition and plant operating conditions for abnormal performance 3.2 Take corrective action in response to hazards, out-of-specification test results or abnormal plant performance 3.3 Implement emergency procedures according to health and safety procedures in the workplace
4. Shut down and clean the cooling water system	4.1 Ensure the timing and sequencing of system shutdown meets production requirements 4.2 Clean the system according to workplace procedures 4.3 Identify and report operational maintenance requirements 4.4 Record workplace information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret information in workplace documentation

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Numeracy	• Monitor and interpret cooling water system control indicators and data against specifications
Navigate the world of work	• Understand main tasks, responsibilities and boundaries of own role • Apply workplace procedures relevant to own role
Interact with others	• Apply workplace communication practices to report issues or provide information
Get the work done	• Access and interpret cooling water system controls and indicators • Make routine decisions to correct abnormal plant performance

Assessment Requirements for FBPSUG2023 Operate a cooling water system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated a cooling water system in line with workplace contexts and demonstrated each of the following points at least once:

- followed set up and start-up procedures
- selected, fitted and used required personal protective equipment (PPE)
- operated, monitored and adjusted cooling water system operation according to procedures
- maintained work area to meet cleaning standards
- reported health and safety risks and maintenance requirements
- cleaned and shut down the cooling water system according to procedures
- taken corrective action in response to typical operating faults, out-of-specification results or non-compliance
- recorded cooling water system information.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of evaporative cooling and water treatment to prevent corrosion and microbiological fouling
- equipment purpose and operating principles of cooling water system and related equipment, including pumps, valves, tower and fans and dosing system
- cooling water system layout
- purpose of chemicals used for operating a cooling water system
- water quality test procedures for operating a cooling water system
- the effect of make-up water quality on blow down rates and fouling rates
- typical causes of water contamination, and corrective action
- typical causes and consequences of system fouling

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- key health and safety requirements for a cooling water system:
  - hazards related to cooling water system operation, and associated control measures
  - correct use of PPE
  - methods used to render equipment safe to inspect, maintain and/or clean, including lock-out, tag-out and isolation procedures
- procedures for operating the emergency cooling water system
- environmental issues and controls, including those relating to chemical and/or container disposal and any overflow of the system to waters of the state
- recording requirements and procedures relevant to operating a cooling water system
- cleaning standards for maintaining the equipment and work area.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - cooling water system and related equipment
  - chemicals
  - test equipment
  - communication system
- specifications:
  - relevant standard operating procedures and related advice on equipment operation
  - workplace cleaning standards for the work area workplace information requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG2025 Perform general planing and shaping operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to carry out general planing and shaping operations. It excludes the use of CNC planers and shapers. Typical operations include slotting, planing and cutting flats.

The unit applies to individuals who work under supervision in the sugar milling industry.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Assessment Requirements for FBPSUG2025 Perform general planing and shaping operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed general planing and shaping operations in line with workplace contexts and demonstrated each of the following points at least once:

- identified planing and shaping requirements
- collected and positioned materials according to job and equipment requirements
- safely set up equipment and conducted pre-operational checks
- selected, fitted and used personal protective equipment (PPE)
- confirmed that components meet specification
- operated, monitored and adjusted process and equipment during operation
- measured components using rulers, calipers and dividers, vernier calipers and micrometers
- safely shut down equipment
- maintained workplace cleaning standards
- reported health and safety risks and maintenance requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for performing general planing and shaping operations
- relevant site operating procedures and practices for general planing and shaping operations
- purpose and operating principles of planing and shaping equipment and accessories, including equipment operating capacities
- care, maintenance and storage of tool parts and accessories
- scope to adjust machining parameters, and related effect on outcome
- the impact of speeds, feeds, coolant, cutting lubricant and materials used on tool life

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- hazards related to the operation of the planing and shaping equipment
- workplace cleaning standards for the work area.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be conducted in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - planing and shaping equipment
  - relevant measuring instrumentation
  - materials for planing and/or shaping
  - drawings, templates and specifications as required
- specifications:
  - operating procedures and related advice on safe machine operation, including advice on safe work practices and environmental requirements
  - equipment operating procedures and related information
  - workplace cleaning standards and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPSUG2027 Perform general lathe operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed general lathe operations in line with workplace contexts and demonstrated each of the following points at least once:

- identified machining requirements
- collected and prepared materials
- safely set up the lathe and conducted pre-operational checks on equipment
- selected, fitted and used personal protective equipment (PPE)
- operated, monitored and adjusted process and equipment during parallel cutting, parting off, drilling, tapping and knurling
- measured components using rulers, calipers and dividers, vernier calipers and micrometers
- confirmed that work conforms to specification
- safely shut down the lathe
- maintained workplace cleaning standards
- reported health and safety risks and maintenance requirements in the workplace.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for performing general lathe operations
- site operating procedures and practices for lathe operations
- purpose and operating principles of lathe and accessory equipment, including equipment operating capacities
- care, maintenance and storage of tooling, accessories and measuring equipment for lathe operations
- scope to adjust machining parameters, and related effect on outcome
- the impact of speeds, feeds, coolant, cutting lubricant and materials on tool life

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- safe work procedures, including awareness of hazards related to the operation of the lathe and related equipment
- workplace cleaning standards for the work area.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - lathe and related tooling and equipment
  - relevant measuring instrumentation
  - materials for machining
  - drawings, templates and specifications as required
- specifications:
  - equipment operating procedures and related safety information
  - workplace cleaning standards and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG2028 Perform general milling operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to carry out general milling operations. It excludes the use of dividing heads and CNC mills. Typical operations include slotting and cutting flats.

The unit applies to individuals who work under supervision in the sugar milling industry.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for milling operations	1.1 Identify milling requirements according to job specifications 1.2 Select, fit and use personal protective equipment according to health and safety procedures 1.3 Collect and prepare materials to be drilled 1.4 Set up milling equipment for operation according to operating

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	procedures 1.5 Conduct pre-operational equipment checks according to operating procedures 1.6 Identify and report health and safety hazards and machine damage or faults according to health and safety procedures
2. Operate milling equipment to achieve specifications	2.1 Set machining parameters to meet job requirements 2.2 Position and clamp materials for milling operation according to operating procedures 2.3 Start, operate and shut down milling equipment according to operating procedures 2.4 Identify non-conforming components against specification, and correct as required 2.5 Undertake basic routine operational maintenance according to operating procedures 2.6 Ensure the work area is maintained to meet workplace cleaning standards

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Identify routine machining requirements, including tolerances, dimensions and finishes, from work instructions and technical drawings and sketches • Interpret standard operating procedures
Numeracy	• Select mill speeds, feeds and stops • Measure and calculate to specified tolerances and dimensions • Check for conformance to specification
Navigate the world of work	• Apply workplace procedures relevant to own role • Understand main tasks, responsibilities and boundaries of own role
Interact with others	• Follow accepted communication practices to communicate and

FBPSUG3001 Drive a cane locomotive

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to prepare, start-up, operate and shut down a cane locomotive.

The unit applies to individuals who work in the sugar milling industry driving locomotives that may or may not be fitted with brake vans and may be single- or double-headed.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for locomotive operation	1.1 Identify and report hazards and maintenance requirements according to workplace procedures 1.2 Check workplace records to confirm operational status 1.3 Select, fit and use personal protective equipment according to workplace procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Carry out pre-operational checks and warm-up procedures of locomotive and related equipment, confirm operational status of equipment, and report any faults according to workplace procedures 1.5 Conduct pre-departure checks to confirm locomotive and related equipment meet operating standards 1.6 Fit appropriate end of train tail flags and brake vans according to operating procedures
2. Start, operate and monitor locomotive	2.1 Obtain authority to move locomotive 2.2 Operate locomotive to meet transport requirements 2.3 Monitor locomotive, rake and related equipment to maintain optimum operating condition, and report operating faults or defects 2.4 Monitor operation against schedule, and communicate information as required to appropriate personnel
3. Analyse and respond to abnormal conditions and performance	3.1 Maintain safety of personnel and equipment in response to hazardous situations and conditions 3.2 Assess faults to determine risk of injury to personnel or damage to equipment 3.3 Take corrective action in response to hazards, abnormal or unacceptable equipment condition or performance 3.4 Implement emergency procedures according to workplace safety procedures
4. Prepare for shift changeover	4.1 Maintain workplace records according to workplace procedures 4.2 Carry out shift changeover according to workplace procedures 4.3 Ensure changeover drivers are aware of locomotive and related equipment status, track conditions and incidents at completion of handover
5. Shut down locomotive	5.1 Follow shutdown procedures for master and slave locomotives according to operating procedures 5.2 Confirm and complete shutdown sequence and secure locomotives according to operating procedures
6. Complete work	6.1 Record workplace information according to workplace procedures 6.2 Clean, store and park plant and equipment according to workplace procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	6.3 Identify and report defects and faults according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret workplace requirements, standard operating procedures and schedules relevant to job role
Oral communication	• Speak clearly and use accurate terminology to communicate with others
Navigate the world of work	• Understand main tasks, responsibilities and boundaries of own role • Apply workplace procedures relevant to own role
Interact with others	• Apply communication practices and protocols relevant to own role
Get the work done	• Complete tasks in required sequence and according to schedule • Apply decision-making processes to control hazards in routine situations

Assessment Requirements for FBPSUG3001 Drive a cane locomotive

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has driven a cane locomotive in line with workplace contexts and demonstrated each of the following points at least once:

- selected, fitted and used personal protective equipment (PPE)
- reported health and safety risks and maintenance requirements in the workplace
- carried out all required pre-departure checks
- prepared the locomotive and related equipment
- safely operated a locomotive and associated equipment
- communicated with other personnel using required communication methods and equipment
- ensured safety of personnel and equipment
- taken corrective action in response to abnormal or unacceptable performance of control systems or operating equipment
- carried out a shift changeover
- safely shut down a locomotive
- completed workplace records
- cleaned and stored plant and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- functions and operating principles of a locomotive and related equipment, including the layout and purpose of the principal mechanical, pneumatic and electrical systems of all equipment and components and impact of different alternatives on efficient performance
- safe operating capacities of equipment relevant to cane locomotive operations
- acceptable bin and rake condition

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- methods used to render equipment safe to inspect, maintain or clean, including lock-out, tag-out and isolation procedures
- procedures for responding to unplanned events or emergencies including derailments, breakdowns, accidents or track damage
- safe operating conditions and speeds, including awareness of typical conditions and situations that are hazardous, and appropriate preventative action
- safety issues when parking/dropping off damaged bins or locomotives
- key health and safety requirements in the workplace:
  - health and safety hazards and associated control measures
  - manual handling procedures for operating a cane locomotive
  - correct use of PPE
- communication procedures, methods and equipment, including warning devices and signals
- reporting and recording responsibilities relevant to cane locomotive operations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a cane railway system or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - locomotive and related equipment, including brake vans
  - relevant equipment required to carry out inspections, checks and monitoring
  - communications equipment
  - workplace information recording system
- specifications:
  - running slips and/or daily schedule
  - operating procedures and related advice on equipment operation
  - workplace procedures for safe work practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG3002 Control cane traffic movements

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to control movements on the cane railway delivery and transport network to ensure safe train separation, efficient running of the traffic system and continuous, fresh supply of cane to the mill.

The unit applies to individuals who work in the sugar milling industry and are responsible for controlling cane transport and truck movements.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for operation	1.1 Select, fit and use personal protective equipment according to workplace procedures 1.2 Participate in shift handover process to identify status and occurrences affecting traffic control

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Confirm status of traffic activities on the cane railway network and in empty and full yards 1.4 Establish communication with drivers, crews and other relevant personnel according to workplace procedures
2. Implement schedule	2.1 Issue train movement instructions to maintain safe operations 2.2 Use the communication system to provide timely information to relevant personnel
3. Issue train clearances	3.1 Issue clearance instructions to maintain train separation according to workplace procedures 3.2 Issue point-to-point clearances according to workplace procedures
4. Maintain train separation	4.1 Control access to the rail network, including access by drivers, navvies, contractors, harvesting crews and other third parties according to workplace procedures 4.2 Arrange and coordinate train passing 4.3 Manage transportation movements using rail network procedures and systems
5. Maintain efficient running	5.1 Coordinate and adjust transport departures and arrivals according to workplace procedures 5.2 Monitor train running times and act on opportunities to improve efficiency 5.3 Maximise train loads within load limits according to workplace procedures 5.4 Manage train passing to minimise delays and maintain safe operations 5.5 Monitor and optimise overall operating efficiencies
6. Complete traffic control operations	6.1 Record train movements and related workplace information according to workplace procedures 6.2 Ensure recording systems and advice reflect accurate information at the time of handover 6.3 Carry out handover according to workplace procedures 6.4 Ensure traffic controllers are aware of system and related equipment status at completion of handover

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret routine information on marshalling strategy, traffic schedule and running sheets, and standard operating procedures • Interpret log books, incident reports, mimic boards and related documentation
Oral communication	• Speak clearly and use accurate terminology to communicate with others
Numeracy	• Interpret transport information system indicators for traffic movements and scheduling • Calculate loads and compare with load limits
Navigate the world of work	• Apply workplace procedures relevant to own role • Understand own role and associated responsibilities
Interact with others	• Apply communication practices and protocols relevant to own role
Get the work done	• Complete tasks in required sequence and according to schedule • Use print and screen-based information technology • Make routine decisions to correct abnormal system performance • Recognise, respond to and solve problems related to cane traffic movements

Assessment Requirements for FBPSUG3002 Control cane traffic movements

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has controlled cane traffic movements in line with workplace contexts and demonstrated each of the following points at least once:

- selected, fitted and used personal protective equipment (PPE)
- calculated efficient loads within equipment capacities and rail system limits
- confirmed status of traffic movements
- operated transport information and communication systems to control access, monitor and maintain safe operations and schedules
- provided traffic information, instructions and clearances to personnel
- coordinated train running to optimal overall efficiency
- prepared for and conducted handover
- recorded traffic control information.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- conditions that are unusual or unplanned, and related options for response, including implications of different options for maintaining safe and efficient traffic movement
- communication systems, protocols and standards
- factors that impact on efficient performance, including:
  - labour
  - crib breaks
  - holding locos
  - waiting time (last bin)
  - fuel use
  - loads

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- factors that impact on the scheduling of traffic movements, including the relationship between these factors
- procedures for coordinating locomotive and/or truck departures and arrivals and train crossings
- procedures for recording information
- personnel to be notified of traffic movement instructions and advice, including the information relevant to each group/person
- requirements of relevant health and safety legislation, standards and industry codes of practice relating to work responsibilities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a cane transport system or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - transport system information and communication systems and equipment
  - workplace information recording systems
- specifications:
  - operating procedures and related advice, including advice on safe work practices
  - workplace information required to determine and monitor safe traffic movements on the cane transport network, including traffic schedule to assess, adjust and monitor work
  - operating procedures related to work responsibilities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG3003 Adjust cane delivery schedules to meet daily milling requirements

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to adjust cane delivery schedules to meet daily sugar mill operational requirements.

The unit applies to individuals who work in the sugar milling industry and are responsible for scheduling operations.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify daily factory requirements for cane supply	1.1 Access workplace information for daily cane supply requirements 1.2 Identify factors that impact on cane supply

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Calculate zero hour	2.1 Calculate zero hour to take account of daily variables 2.2 Inform relevant personnel of zero hour according to workplace procedures
3. Amend daily bin allotment and bin allocations	3.1 Determine bin allotment requirements 3.2 Calculate daily bin allotment and bin allocations based on amended requirements 3.3 Amend schedule for bin allocation and locomotive runs to harvest groups to meet requirements 3.4 Document and submit amended schedule for approval
4. Monitor supply and demand to maintain and adjust schedule	4.1 Coordinate and adjust transport departures and arrivals to meet schedule requirements 4.2 Use regular two-way communication with locomotive drivers and harvester operators to maintain schedules and safe operations 4.3 Monitor cane stock and deliveries against schedule 4.4 Identify variations between supply and schedule and take corrective action as required 4.5 Identify resource implications of amended schedules, and access resources to meet requirements 4.6 Monitor progress against schedule according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret information from various sources of workplace information
Writing	• Record cane scheduling information and data in required format
Oral communication	• Speak clearly and use accurate terminology to communicate with others

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Numeracy	• Interpret system information and data • Identify network yard and siding capacities, and bin weights
Navigate the world of work	• Apply workplace procedures relevant to own role • Understand own role and associated responsibilities in terms of workplace information, and how it contributes to the work of others
Interact with others	• Apply communication practices and protocols relevant to own role
Get the work done	• Plan, organise, prioritise and adjust cane delivery scheduling within time and resource constraints • Access, interpret and enter system information • Recognise and respond to problems related to cane schedule variations

Assessment Requirements for FBPSUG3003 Adjust cane delivery schedules to meet daily milling requirements

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has adjusted cane delivery schedules to meet daily milling requirements in line with workplace contexts and demonstrated each of the following points at least once:

- calculated and amended daily schedule bin allotments and bin allocations
- applied workplace information to calculate zero hour
- confirmed resources and personnel to meet amended schedule
- coordinated and adjusted locomotive movements, and responded to update schedule
- reallocated cane bin deliveries to harvesters
- used communication systems and equipment
- maintained workplace records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- conditions that are unusual or unplanned, and options for response, including the implications of different options for maintaining the continuous and efficient supply of cane
- communication systems, protocols and standards
- purpose and use of a computerised traffic system
- purpose and procedure for calculating zero hour
- factors that can affect the calculation of zero hour, including:
  - factory performance, including planned and unplanned mill stops
  - weather
  - transport system delays, including locomotive/motor truck breakdown
  - availability of empty bins, taking into account mixed bin fleet if appropriate

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

    - availability of full-yard space
    - availability of empty-yard space
    - siding status
    - track infrastructure condition
    - harvester failure
- factors that impact on efficient performance, including:
    - labour
    - crib breaks
    - holding locos
    - waiting time (last bin)
    - fuel use
    - loads
- personnel to be notified of zero hour and related amendments to schedule, including the information relevant to each group/person
- work schedule planning, including the inter-relationships between:
    - planned crushing rate
    - current stocks (yards and sidings)
    - yard and siding capacities
    - average bin weights
    - harvesting rosters
    - cut-to-crush delays
    - loco loads and performance
    - bin fleet size and availability
    - rail network capacity
    - labour requirements and availability.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
    - transport system and associated information and communication systems and equipment
    - workplace information to assess, adjust and monitor work progress against schedule
    - workplace information recording system
- specifications:
    - operating procedures related to work responsibilities.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG3004 Drive a master-slave locomotive

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to drive a master-slave locomotive in a cane railway system.

The unit applies to individuals who work in the sugar milling industry and are required to operate a slave locomotive.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Prerequisite unit of competency for this unit is:

- FBPSUG3001 Drive a cane locomotive

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare and connect the slave locomotive for operation	1.1 Select, fit and use personal protective equipment according to health and safety procedures in the workplace 1.2 Identify and report health and safety hazards and operational maintenance requirements

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Check workplace records to confirm operational status 1.4 Set the remote control system according to operating requirements 1.5 Prepare slave locomotive and select required operating mode 1.6 Conduct pre-start checks according to operating procedures
2. Prepare and connect the master locomotive	2.1 Confirm the system is in link mode 2.2 Check control system and conduct system self-test to confirm that the system is operating effectively according to workplace procedures and manufacturer's guidelines 2.3 Confirm braking system is operating effectively 2.4 Establish and confirm total control of the system 2.5 Conduct pre-departure tests to confirm control system and locomotive equipment meet operating standards 2.6 Couple front and rear train safely to form a single train according to operating procedures
3. Start, operate and monitor locomotive	3.1 Start and operate master-slave locomotive according to transport requirements 3.2 Monitor condition of locomotive equipment according to operating procedures 3.3 Assess faults to determine risk of injury to personnel or damage to equipment 3.4 Take corrective action to address abnormal or unacceptable equipment condition or performance 3.5 Implement emergency procedures according to workplace procedures
4. Prepare for shift handover	4.1 Maintain workplace records according to workplace procedures 4.2 Carry out handover according to workplace procedures 4.3 Ensure changeover drivers are aware of locomotive and related equipment status, track conditions and incidents at completion of handover
5. Shut down locomotive	5.1 Follow shutdown procedures for master and slave locomotives 5.2 Confirm and complete shutdown sequence and secure locomotives according to operating procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
6. Complete work	6.1 Record workplace information according to workplace procedures 6.2 Clean, store and park plant and equipment 6.3 Identify and report defects and faults according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret routine information on marshalling strategy, traffic schedule log and running sheets, and standard operating procedures
Oral communication	• Speak clearly and use accurate terminology to communicate with others
Numeracy	• Monitor and interpret system control indicators and data
Navigate the world of work	• Understand main tasks, responsibilities and boundaries of own role • Apply workplace procedures relevant to own role
Interact with others	• Apply communication practices and protocols relevant to own role
Get the work done	• Complete tasks in required sequence and according to schedule • Apply decision-making processes to control hazards in routine situations • Use screen-based information technology • Make routine decisions to correct abnormal system performance and control hazards in routine situations • Recognise and respond to routine problems

Assessment Requirements for FBPSUG3004 Drive a master-slave locomotive

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has driven a master-slave locomotive in line with workplace contexts and demonstrated each of the following points at least once:

- carried out all required pre-departure checks
- selected, fitted and used personal protective equipment (PPE)
- reported health and safety risks and maintenance requirements
- prepared and connected the master and slave locomotives, systems and operating settings
- safely started and operated the master-slave locomotive and associated equipment
- communicated with other personnel using available equipment
- monitored locomotive and equipment operating condition
- assessed equipment faults to determine appropriate corrective action
- took corrective action in response to abnormal or unacceptable performance of control systems or operating equipment
- carried out a shift changeover
- recorded shift information
- safely shut down the master-slave locomotive and associated equipment
- cleaned and stored plant and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- communication procedures, methods and equipment, including an understanding of warning devices and signals
- functions and operating principles of master and slave locomotive operating equipment
- purpose and limitations of protective clothing and equipment for driving a master and slave locomotive

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- purpose of the master and slave locomotives in controlling the train, and operating principles of all instruments and controls
- safe operating capacities of equipment
- typical faults that can occur when operating a locomotive in a master-slave configuration and how to assess severity and risk in order to determine appropriate corrective action
- key health and safety requirements for driving a master and slave locomotive in the workplace:
  - health and safety hazards related to driving a locomotive and associated control measures
  - correct use of PPE
- procedures for responding to unplanned events or emergencies including derailments, breakdowns, accidents or track damage.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a cane railway system or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - master and slave locomotive and related equipment
  - relevant equipment required to carry out inspections, checks and monitoring
  - communications equipment
  - workplace information recording system
- specifications:
  - operating procedures and related advice, including advice on safe work practices
  - workplace information, including running slips and daily schedule, to advise of driving requirements
  - operating procedures and related advice on equipment operation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG3005 Operate a sugar system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to prepare and operate an integrated group of sugar milling sub-systems or unit operations in the sugar milling industry.

The unit applies to individuals who work in one or more connected unit operations, including preparation, crushing and power generation.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare the system for operation	1.1 Confirm supply of materials to meet production requirements 1.2 Prepare work area for operation according to workplace procedures 1.3 Confirm services as available and ready for operation

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Check equipment to confirm readiness for use according to workplace procedures and manufacturer's guidelines 1.5 Select, fit and use personal protective equipment according to workplace safety procedures
2. Operate and monitor the system	2.1 Start the system according to workplace procedures 2.2 Confirm process performance is maintained within specification 2.3 Operate system to optimise performance for the current factory conditions within limits of manufacturer's specifications 2.4 Monitor equipment to confirm operating condition 2.5 Ensure system outputs meet specification
3. Hand over the system	3.1 Maintain workplace records according to workplace procedures 3.2 Carry out handover according to workplace procedures 3.3 Ensure operators are aware of system and related equipment status at completion of handover
4. Shut down the system	4.1 Identify the appropriate shutdown procedure for operational and long-term shutdown conditions 4.2 Collect, treat and dispose of or recycle waste generated by both the process and cleaning procedures 4.3 Safely shut down the system according to workplace procedures and manufacturer's recommendations 4.4 Prepare the system for storage in shutdown mode 4.5 Identify and address operational maintenance requirements according to workplace procedures
5. Contribute to continuous improvement of the system	5.1 Identify and investigate opportunities for improvement 5.2 Develop and implement proposals for improvements within company planning arrangements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Writing	• Record information in required format • Communicate proposed improvements in clearly constructed text
Numeracy	• Monitor and interpret system control indicators and data
Navigate the world of work	• Apply workplace procedures relevant to own role • Understand own role and associated responsibilities
Interact with others	• Apply workplace communication practices to report issues or provide information
Get the work done	• Access and interpret sugar system control panels and system indicators • Make decisions to correct abnormal plant performance within level of responsibility • Identify and propose sugar system process, product or service improvements within scope of own role

Assessment Requirements for FBPSUG3005 Operate a sugar system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated a sugar system in line with workplace contexts and demonstrated each of the following points at least once:

- selected, fitted and used personal protective equipment (PPE)
- conducted pre-start checks, prepared the work area and followed start-up procedure
- safely operated, monitored and adjusted sugar system to maintain process within specified parameters
- reported and/or recorded process and production and corrective action
- conducted shift handover procedure
- shut down the system according to procedures
- planned maintenance and cleaning procedures to minimise disruption
- identified and developed proposals for system improvements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- equipment purpose and operation, including sugar system process controls
- relevant procedures, specifications and operating parameters for the system and individual units
- process improvement procedures and related consultative arrangements
- purpose and principles of the system, including process optimisation
- key health and safety requirements for operating a sugar system:
  - hazards, risks, controls and methods for monitoring processes within the system
  - correct use of PPE
  - safe work procedures
- operational maintenance and cleaning requirements of equipment in system

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- environmental management requirements for operating a sugar system
- recording requirements and procedures for operating a sugar system.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - sugar system equipment, processes and related materials and services
  - workplace information recording systems
- specifications:
  - operating procedures and related information on safe work practices and environmental requirements
  - product and process specifications and operating parameters.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPSUG3006 Monitor a sugar mill powerhouse

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to operate and monitor one or more turbines with attached alternators supplying factory power. It applies to both continuous and short-term powerhouse operation, including start-up and shutdown after a prolonged break.

The unit applies to individuals working in the sugar milling industry. The work is typically carried out in liaison with an electrician.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Prerequisite unit of competency for this unit is:

- UEPOPL001A Licence to operate a steam turbine.

Unit Sector

Sugar milling (SUG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to operate the powerhouse	1.1 Select, fit and use personal protective equipment according to workplace safety procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Run warm-up sequence of turbines and alternators in preparation for handover from local powerhouse to powerhouse consul
2. Monitor powerhouse operation	2.1 Monitor powerhouse output against site requirements 2.2 Monitor equipment to confirm operating condition according to workplace requirements 2.3 Ensure the workplace meets cleaning standards
3. Analyse and respond to abnormal performance	3.1 Analyse plant operating data and conditions to identify causes of abnormal performance 3.2 Take corrective action in response to workplace hazards and abnormal plant performance 3.3 Implement emergency procedures according to health and safety procedures
4. Hand over powerhouse operation	4.1 Maintain workplace records according to workplace procedures 4.2 Carry out handover according to workplace procedures 4.3 Notify powerhouse operators of powerhouse and related equipment status
5. Shut down the powerhouse	5.1 Identify the powerhouse shut down procedure and implement 5.2 Prepare the powerhouse for storage in shutdown mode 5.3 Identify and report operational maintenance requirements according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	• Speak clearly and use accurate terminology to communicate with others
Numeracy	• Monitor and interpret powerhouse control indicators and data
Navigate the world of	• Apply workplace procedures relevant to own role

Assessment Requirements for FBPSUG3006 Monitor a sugar mill powerhouse

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has monitored a sugar mill powerhouse in line with workplace contexts and demonstrated each of the following points at least once:

- selected, fitted and used personal protective equipment (PPE)
- conducted warm-up sequence
- confirmed that turbines and alternators are ready for warm-up and operation
- handed over control to operating consul
- performed run-up procedures in both manual and automatic modes
- monitored powerhouse operation
- maintained cleaning standards in work area
- performed shift handover procedure
- recorded operating information
- taken corrective action in response to abnormal or unacceptable performance
- applied an understanding of emergency trip procedure and related re-start.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- operating principles of process control, including the relationship between control panels and systems and the physical equipment
- purpose and principles of power generation, including the impact of out-of-range frequency voltage on equipment operation
- operating principles of powerhouse, and instrumentation components, purpose and operation, including the requirement to bar over alternators on start-up, shutdown and emergency stops
- layout of powerhouse, including location of overload protection for equipment and switches

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- key health and safety requirements for sugar mill powerhouse operations:
  - hazards related to powerhouse operation, and associated control measures
  - correct use of PPE
  - methods used to render equipment safe to inspect, maintain and/or clean, including lock-out, tag-out and isolation procedures
  - procedures for responding to emergency situations, including safe shutdown procedure
- handover and long-term shutdown and storage procedures
- site procedures for the import and export of power
- environmental issues and controls, including controlling oil spillages.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a sugar milling workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - appropriate steam turbine with an attached alternator and related equipment
  - communication equipment
  - workplace information recording system
- specifications:
  - operating procedures and related advice on equipment operation, including advice on safe work practices and environmental requirements
  - workplace cleaning standards and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPTEC3003 Filter fermented beverages

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to prepare and operate filtration equipment using lenticular, plate and frame and/or centrifugal systems, to filter fermented beverages.

The unit applies to individuals who work in brewing operations and take responsibility for their own work using discretion and judgement in the selection and use of available resources.

Legislative requirements relating to producing alcohol apply to this unit. Users are advised to check current requirements with the Australian Tax Office and state / territory liquor licensing and health agencies.

Pre-requisite Unit

Nil

Unit Sector

Technical (TEC)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare the filtration process for operation	1.1 Identify and confirm production requirements 1.2 Confirm availability and prepare services, product and materials to meet production requirements 1.3 Confirm environmental guidelines and identify potential health and safety hazards and controls according to workplace procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Select, fit and use personal protective equipment relevant to the job role 1.5 Assemble filtration equipment 1.6 Check filters are in place and confirm readiness for use according to workplace procedures 1.7 Check the flow path of product and ensure equipment is ready for operation 1.8 Set the process to meet filtration requirements
2. Operate and monitor the filtration process	2.1 Start up the filtration process according to workplace procedures 2.2 Sanitise system before feeding product through 2.3 Monitor filtration process and pressure to confirm filtered product meets specifications 2.4 Monitor dissolved oxygen (DO) levels 2.5 Identify and address non-conformance of product, process and equipment 2.6 Record quality parameters throughout process
3. Shut down the filtration process	3.1 Identify and implement appropriate shutdown procedures 3.2 Drain and dismantle equipment safely and prepare for cleaning 3.3 Clean equipment thoroughly 3.4 Dispose of waste generated by the filtration process and cleaning procedures, in line with regulatory requirements 3.5 Record workplace information according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret production and process information from a variety of workplace documents

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Numeracy	• Calculate numerical information relating to measurements, quantities, pressure and operational specifications • Interpret gauge readings during monitoring of process including pound of force per square inch (psi), kilopascal (kPa), temperature, dissolved oxygen • Interpret measurements and volumes including microns (µ), litres (L), hectolitres (hL)
Get the work done	• Plan, sequence and implement tasks required to achieve production requirements

Assessment Requirements for FBPTEC3003 Filter fermented beverages

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively operated the filtration process to filter fermented beverages to specification on at least two occasions, using one or more of the following systems:

- lenticular
- plate and frame
- centrifugal
- diatomaceous earth (DE).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles of filter aid filtration (or dynamic depth filtration)
- lenticular, plate and frame and centrifugal filtration processes, their basic operating principles and system parts
- filtration media, including diatomaceous earth, cellulose sheets
- grades of filters
- the effects that filtering has on end product and acceptable degrees of haze
- links between filtration and other processes used in producing fermented beverages
- importance of cleaning, sanitising and sterilising
- methods to clean and sanitise filters
- pump operation
- instruments used for monitoring pressure, dissolved oxygen (DO) and calibration requirements
- the effects that DO has on fermented beverages

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- common causes of non-conformance results for product, process and equipment and corrective action required including:
  - issues that can be rectified
  - issues that must be reported
- responsibilities for health and safety in the workplace including:
  - health and safety hazards associated with the filtration process
  - methods for controlling risks associated with work health and safety hazards
- responsibilities for identifying and controlling environmental issues
- how to safely dispose of the sediment filtered out the fermented beverage
- workplace procedures and responsibility for:
  - reporting problems
  - shutting down the process
  - cleaning
  - handling waste
- Food Standards Code in relation to production of beverages
- regulatory record keeping requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a beverage production workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective equipment for filtration operations
  - filtration equipment and filters and related materials required for operations
  - product for filtration
  - system for recording and reporting information
- specifications:
  - workplace procedures for filtration operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPTEC3004 Prepare, fill and store barrels for aging spirits

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceuticals Training Package version 3.0.

Application

This unit of competency describes the skills and knowledge required to prepare barrels for aging spirits such as whisky.

This unit applies to those workers who work in operational roles in a distillery.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Note: This unit does not cover working with forklifts, which requires a forklift licence.

Pre-requisite Unit

Nil

Unit Sector

Technical (TEC)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare and maintain barrel condition	1.1 Identify standards, regulations and guidance materials that cover the requirements of storing flammable and explosive materials 1.2 Identify hazards associated with preparing, filling and storing barrels of spirits and manage risks 1.3 Identify features of barrel, including type of wood, toast, size and age

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Check barrel wood for blemishes, leaks and unsavoury smells 1.5 Hydrate barrel to check for leaks 1.6 Seal wood to stop any leaks 1.7 Check and tighten hoops where required
2. Fill barrel	2.1 Transfer spirit into barrel 2.2 Replace bung and seal 2.3 Move barrel to storage area, using lifting equipment 2.4 Complete records of barrel fill and storage conditions, as required by organisational procedures and Australian Tax Office (ATO) requirements
3. Store barrel	3.1 Monitor conditions in barrel store to ensure they are safe 3.2 Monitor barrels for any leakages 3.3 Repair any leakages by tightening hoops or moistening staves 3.4 Complete barrel records, in line with organisational and regulatory requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	• Label barrels with fill details (in sequential order)
Numeracy	• Record volume filled (mL, L) • Accurately read and interpret readings from thermometer and hygrometer
Get the work done	• Problem solve issues as they arise

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Requirements for FBPTEC3004 Prepare, fill and store barrels for aging spirits

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceuticals Training Package version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has appropriately prepared, filled and stored at least two barrels with spirit for aging.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of barrels required for designated spirit
- types of wood used for barrels, including oak, and its characteristics
- purpose of barrelling
- effects of aging in oak
- parts of barrel, including staves, hoop, bung
- pre-uses of barrels and their qualities
- barrel hydration methods
- the effect that temperature and humidity can have of the health of a barrel
- the expanding and contracting nature of barrels
- instruments used to monitor storage of barrels, including thermometer and hygrometer
- problems created by dry conditions or too much sunlight
- procedures and equipment used for transfer operations, including pumps, membranes, hoses, valves
- equipment and instrumentation components, purpose and operation
- significance and method of monitoring control points within the equipment operation
- common causes of variation and corrective action required
- hazards and controls, including manual handling, working with ethanol and flammable substances

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- Australian Standards, legislation, regulations and workplace licence requirements related to the production and storage of alcohol
- Australian Taxation Office (ATO) requirements for excise
- recording requirements for traceability of product and ATO regulations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - barrels
  - spirit for aging
  - pump
  - lifting equipment
  - humidity and temperature gauges.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPTEC4003 Control food contamination and spoilage

Modification History

Release	Comments
Release 3	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 4.0.
Release 2	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to control contamination and spoilage in food or beverages, and to manage food safety using cleaning and sanitation programs.

The unit applies to workers who oversee food contamination control measures across a food or beverage production or processing site or facility.

No licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing exist, so local requirements must be checked. All work must comply with Australian food safety standards and relevant codes of practice.

Pre-requisite Unit

Nil

Unit Sector

Technical (TEC)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

Assessment Requirements for FBPTEC4003 Control food contamination and spoilage

Modification History

Release	Comments
Release 3	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 4.0.
Release 2	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has effectively controlled food contamination and spoilage, including:

- identifying contamination and/or spoilage in at least three different processed food and/or beverage samples
- determining likely causes of non-conformance of ingredients/raw materials
- analysing the results of tests to identify contamination and/or spoilage
- identifying and applying legal, workplace and quality standards for food and/or beverage products
- recognising indicators of unacceptable (or non-conforming) processing, handling and/or storage outcomes
- managing control measures used to address risks of food and/or beverage contamination
- managing cleaning procedures to ensure workplace standards meet food safety requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic composition and function of each main raw material/ingredient used, such as awareness of ingredient grades or types

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- common causes of contamination/unacceptable quality of raw materials/ingredients, relevant to work role
- practical application of science to hygiene and sanitation in the workplace, relevant to job role
- methods used to confirm quality standard, such as accessing information (e.g. certificates of analysis and/or laboratory clearance information)
- Food Standards Code for safe food production
- definitions of and techniques for cleaning and sanitation
- the effect of variation in raw materials/ingredients on processing stages and final product outcome, including factors likely to cause variation, and scope to adjust or correct for variation at each processing stage
- how time and temperature impact on the growth of microorganisms
- appropriate handling and storage requirements for raw materials/ingredients and final product, and the effect of failing to meet required storage conditions
- the changes and reactions that occur through processing stages, including the signs and symptoms of poor/unacceptable processing or equipment operation
- factors that affect the shelf-life of product
- the inter-relationships between processing stages and the effect of variation in processing parameters on process outcome and on final product, including factors likely to cause variation, and scope to adjust or correct for variation at subsequent process stages
- procedures for identifying and isolating non-conforming product
- troubleshooting information and techniques
- procedures and related documentation required to amend or introduce a new method or procedure, such as short-term procedures for amending or updating specifications and processing parameters
- reporting requirements and responsibilities
- test methods to confirm raw material/ingredient and/or final product quality characteristics where relevant.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - samples of contaminated and spoiled food and/or beverages
  - cleaning and sanitation equipment
- specifications:
  - methods to detect contamination and spoilage
  - food safety plan and related information, including operating procedures, cleaning and sanitation regimes/plans
  - cleaning and sanitation methods and procedures.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPTEC4012 Manage raw materials

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to receive, handle and store raw materials that will be used in the production of food and/or beverages.

This unit applies to workers who have responsibility for overseeing the production of food and/or beverages and the quality assurance requirements associated with those products.

No licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing exist, so local requirements must be checked. All work must comply with Australian food safety standards and relevant codes of practice.

Pre-requisite Unit

Technical (TEC)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify quality parameters for raw materials	1.1 Identify raw materials required to produce end product 1.2 Identify key quality attributes of raw materials 1.3 Identify compliance issues associated with each raw material 1.4 Identify hazards associated with each raw material

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.5 Develop key raw material product specifications
2. Research suppliers of raw materials	2.1 Identify suppliers of raw materials relevant to end product 2.2 Investigate potential suppliers' capability and capacity to supply consistent quality raw materials 2.3 Identify costs and delivery methods 2.4 Order raw materials
3. Receive raw materials	3.1 Check details of order for raw materials 3.2 Compare order details to details on delivery docket 3.3 Check quality of raw material meets specifications 3.4 Take action to respond to out-of-specification materials 3.5 Perform basic analytical tests on raw materials 3.6 Confirm raw materials meet processing requirements 3.7 Receive raw materials for processing that meet quality requirements 3.8 Record delivery of raw materials, in line with workplace procedures
4. Handle raw materials	4.1 Identify risks and hazards of handling raw materials specific to job role 4.2 Wear appropriate personal protective equipment to manage risks 4.3 Use appropriate equipment to move raw materials to storage area
5. Monitor and store raw materials	5.1 Check storage conditions meet quality requirements 5.2 Ensure stock is rotated so that older stock is used before new stock 5.3 Adjust storage conditions that do not meet quality requirements 5.4 Monitor storage to ensure quality of raw material is maintained 5.5 Maintain records of storage conditions and quantities 5.6 Re-order raw materials when stocks are low, in line with workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy skills	• Interpret readings of gauges and scales for temperature, moisture • Use areas (m2), weight (g, kg, T) and volumes (ml, L, m3, ML, GL) to describe product quantities
Get the work done	• Problem-solve issues with raw materials and storage as they arise

Assessment Requirements for FBPTEC4012 Manage raw materials

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed raw materials for processing food or beverage products, including:

- assessed at least one supplier of raw materials
- develop product specification
- checked quality of two different raw materials to be received
- responded to out-of-specification materials
- handled and stored two different raw materials to maintain quality.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- raw materials used in production of food and/or beverages, relevant to job role
- specifications for raw materials relevant to end product
- compliance issues and/or hazards that may occur in relevant raw materials, such as microbiological, chemical, physical, allergens, regulatory, quality
- typical analytical tests and checks to determine quality of raw materials, including observation, smell and rapid tests
- range of actions to take in response to out-of-specification materials, including rejecting order, adjusting processing requirements
- methods to determine water quality
- Certificates of Analysis for raw materials, and their purpose
- storage requirements to ensure quality of raw material is maintained
- safe work practices to handle raw materials, relevant to job role
- workplace and/or legal traceability requirements
- safe work requirements relevant to the job role.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real fermented food or beverage processing environment
- resources, equipment and materials:
  - raw materials relevant to food and/or beverage processing environment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPTEC4013 Manage wort production for brewing

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to manage the production of wort that will be fermented and used in the production of beer.

This unit applies to workers who have responsibility for overseeing the production of wort for fermented beverages and the quality assurance requirements associated with those products. It may include supervising the work of others.

Legislative requirements relating to producing alcohol apply to this unit. Users are advised to check current requirements with the Australian Taxation Office and state/territory liquor licensing and health agencies.

Pre-requisite Unit

Nil

Technical (TEC)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to produce wort	1.1 Identify and apply standards, regulations and guidance materials that cover the risks associated with working in hazardous environments, including potentially explosive environments, dust, heat and steam 1.2 Wear appropriate personal protective equipment (PPE) to ensure personal safety

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Apply effective clean-in-place (CIP) and sanitation procedures 1.4 Identify specification for product 1.5 Ensure adequate quantities of raw materials for specification 1.6 Check quality of raw materials meets quality specifications and record details
2. Mill grain	2.1 Set mill to crush malted grain to specification 2.2 Carry out test run to ensure malt is crushed to specification 2.3 Operate mill to crush malt and produce grist
3. Convert mash	3.1 Transfer grist to mash tun 3.2 Set water level, temperature and time in line with product specification, to convert starches to sugars 3.3 Operate mash tun to produce and convert mash 3.4 Monitor quality of mash using simple tests 3.5 Analyse test results and adjust process as required
4. Separate mash	4.1 Transfer mash into separation vessel 4.2 Monitor separation process by using simple tests 4.3 Dispose of spent grist in line with environmental requirements 4.4 Complete processing and batch records in line with workplace procedures
5. Boil wort	5.1 Transfer wort into kettle 5.2 Set temperature of kettle for controlled boil 5.3 Add hops and adjuncts to influence flavour, in line with specifications 5.4 Monitor quality of wort using simple tests 5.5 Analyse test results and adjust process as required 5.6 Complete processing and batch records to ensure traceability
6. Cast wort	6.1 Set operating parameters of equipment for wort transfer to cellar/fermentation vessel 6.2 Monitor quality of wort using simple tests 6.3 Analyse test results and adjust process as required

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	6.4 Cool and oxygenate wort to fermentation specification 6.5 Complete processing and batch records to ensure traceability
7. Conduct housekeeping activities	7.1 Clean equipment and work area in line with workplace procedures 7.2 Conduct routine maintenance activities 7.3 Dispose of waste in line with regulatory requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Measure and record weight of raw materials and volume of wort (using kg, L and hL) • Accurately read and interpret gauges and test results
Get the work done	• Identify changes in quality of product and trace source

Assessment Requirements for FBPTEC4013 Manage wort production for brewing

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed the production of one batch of wort that meets product specification, including:

- addressing risks and managing hazards
- taking samples to monitor quality
- completing batch records in line with workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of milling grain to expose starchy material in the husk
- problems created from grain that is too heavily crushed or milled
- stage and changes that occur during wort production
- purpose of malt, hops, water, adjuncts and the preparation procedure
- quality characteristics and uses of end product and output
- typical tests carried out on wort to check pH, bitterness, colour
- instruments used for testing and how each is calibrated and certified
- procedures and equipment used for transfer operations, including pumps, membranes, hoses, valves, control instruments
- formulae and calculations used in recipe design in order to adjust process as required
- isomerisation of hops
- roles of enzymes in mash process, particularly alpha and beta amylase
- equipment and instrumentation components, purpose and operation
- cleaning, sanitisation and sterilisation procedures and purpose
- significance and method of monitoring control points within the equipment operation
- common causes of variation and corrective action required

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- hazards and controls, including manual handling, working with dust, potential for explosion when working with grain and milling, risks of burns when working with heat and steam
- routine maintenance requirements
- waste handling and disposal requirements
- hazards and controls, including manual handling, working with ethanol and flammable substances
- Australian Standards, legislation, regulations and workplace licence requirements related to working in hazardous and potentially explosive environments
- Food Standards Code in relation to brewing
- Australian Taxation Office (ATO) requirements for excise
- recording requirements for traceability of product and ATO regulations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - raw materials for wort production
  - access to equipment for production of wort
  - testing equipment
  - safety equipment and personal protective equipment (PPE)
- specifications:
  - product specifications.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPTEC4014 Manage cellar operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceuticals Training Package version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed cellar operations for the production of fermented beverages to meet specification, on at least one occasion.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purposes of each stage of cellaring operation
- stages and changes required for equipment operation, specific to product
- yeast handling parameters
- adjuncts typically added to end product, their effects and handling parameters
- quality characteristics and uses of end product and output
- materials preparation requirements and effect of variation on the equipment operation
- typical tests carried out on wort to check pH, alcohol, bitterness, colour, yeast count
- instruments used for testing and how each is calibrated
- procedures and equipment used for transfer operations, including pumps, membranes, hoses valves, control instruments
- dry hops techniques, as required for product
- equipment and instrumentation components, purpose and operation
- significance and method of monitoring control points within the equipment operation
- common causes of variation and corrective action required
- sanitisation and clean-in-place procedures and purpose
- hazards and controls, including manual handling, working with ethanol, working in confined spaces and with pressure vessels
- waste handling requirements and procedures
- routine maintenance requirements

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- Australian Standards, legislation, regulations and workplace licence requirements related to the production and storage of alcohol
- Food Standards Code in relation to production of beverages
- legislation, regulation and workplace licence requirements related to the production of alcohol, Australian Taxation Office (ATO) in relation to excise tax, waste disposal
- recording requirements for traceability of product and taxation office requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - wort
  - fermentation, maturation tanks
  - testing equipment
- specifications:
  - product specifications.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPTEC4015 Manage and propagate yeast

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed and propagated yeast processes for the production of fermented beverages to specification, for at least one fermented beverage, including:

- handling yeast to maintain its health and viability
- determining how much yeast to pitch
- carrying out a yeast count
- monitoring the yeast propagation process
- storing yeast to maintain its health and viability.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- different types and strains of yeast used to make fermented beverages, including wild yeast
- technical sheets for yeast products
- yeast culture propagation requirements, including time, temperature and nutrition
- how yeast grows
- good practice for yeast handling
- methods for carrying out a yeast count
- purpose and principles of propagating yeast cultures
- relationship of propagation to alcoholic fermentation
- stages and changes that occur during culture propagation
- effect of process stages on end product
- quality characteristics and uses of yeast cultures
- main methods used in propagating yeast for beer or spirit production

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- the fermentation reaction for yeast cultures
- specific gravity of wort at different stages during fermentation
- techniques that may be used to manipulate the propagation process and end product characteristics, including:
  - temperature
  - yeast strain
  - wort stream
  - wort gravity
  - additions (nutrients)
  - oxygen
  - pitching rates
- process specifications, procedures and operating parameters relevant to beer or spirit yeast propagation
- equipment and instrumentation components, purpose and operation required for yeast propagation processes
- services used in brewer's or distiller's yeast propagation processes
- significance and method of monitoring control points within the process
- common causes of variation with equipment and corrective action required
- work health and safety hazards and controls for handling and propagating yeast processes
- waste handling requirements and procedures for yeast propagation processes
- recording requirements of yeast processing.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a beverage production workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - different varieties of yeast
  - propagation and fermentation equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPTEC4016 Produce fruit-based wash for distillation

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed the production of one batch of fruit-based wash, to meet product specification, including:

- taking samples to monitor quality
- completing batch records in line with workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purposes of each stage of preparing and producing wash
- uses of different types of wash, including fruit/sugar/molasses sugar wash
- stages and changes required for equipment operation, specific to wash
- quality characteristics and uses of end product and output
- materials preparation requirements and effect of variation on the equipment operation
- typical tests carried out on wash to check pH, alcohol, colour, yeast count
- instruments used for testing and how each is calibrated
- procedures and equipment used for transfer operations, including pumps, membranes, hoses, valves, control instruments
- significance and method of monitoring control points within the equipment operation
- common causes of variation and corrective action required
- sanitisation and clean-in-place procedures and purpose
- hazards and controls, including manual handling
- waste handling requirements
- Food Standards Code in relation to the production of beverages
- recording requirements for traceability of product and Australian Taxation Office (ATO) regulations.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - raw materials specific to end product
  - fermentation vessel
- specifications:
  - product specifications.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPTEC4017 Produce grain-based wash for distillation

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to manage the production of grain-based wash that will be used to distil brown spirits.

This unit applies to workers who have responsibility for overseeing the production wash for fermented beverages and the quality assurance requirements associated with those products. It may include supervising the work of others.

Legislative requirements relating to producing alcohol apply to this unit. Users are advised to check current requirements with the Australian Taxation Office and state/territory liquor licensing and health agencies.

Pre-requisite Unit

Nil

Unit Sector

Technical (TEC)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to produce wash	1.1 Identify standards, regulations and guidance materials that cover the requirements of working in hazardous and potentially explosive environments 1.2 Identify hazards and manage risks associated with producing wash, including dust, heat and steam 1.3 Wear appropriate personal protective equipment (PPE) to ensure

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	personal safety 1.4 Identify specification for product 1.5 Check quality of raw materials meets quality specifications
2. Mill grain	2.1 Set mill to crush malted grain to specification 2.2 Carry out test run to ensure malt is crushed to specification 2.3 Operate mill to crush malt and produce grist
3. Convert mash	3.1 Transfer grist to mash tun 3.2 Set water level, temperature and time in line with product specification, to convert starches to sugars 3.3 Operate mash tun to produce and convert mash 3.4 Monitor quality of mash using simple tests 3.5 Analyse test results and adjust process as required
4. Separate mash	4.1 Transfer mash into separation vessel 4.2 Monitor separation process by using simple tests 4.3 Dispose of grain husks in line with environmental requirements 4.4 Complete processing and batch records to ensure traceability
5. Conduct housekeeping activities	5.1 Clean equipment and work area in line with workplace procedures 5.2 Conduct routine maintenance activities 5.3 Dispose of waste in line with regulatory requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Measure and record weight of raw materials and volume of wash (using kg and L) • Accurately read and interpret gauges and test results

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Get the work done	• Identify changes in quality of product and trace source

Assessment Requirements for FBPTEC4018 Manage still operations to produce white spirits

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed still operations to collect spirit in line with pre-determined specifications for a white spirit, on at least one occasion.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- white spirits typically distilled including gin and vodka
- definitions of gin and vodka
- types of wash/spirit typically used to produce white spirits
- products that are typically distilled
- different methods used for distilling spirits
- shape and parts of a still and their purpose
- critical differences between a pot still and a column still
- purposes of first and subsequent distillations
- alcohol boiling points
- quality and characteristics of different parts of the still run, including heads, hearts and tails
- harmful chemicals that are produced through distillation, including methanol, and boiling point
- alcohol content of different parts of the still run
- stages and changes required for equipment operation, specific to product
- typical tests carried out to check alcohol content, flavour and quality
- sensory analysis techniques to determine parts of distillation run
- instruments used for testing and how each is calibrated, such as hydrometer, alchometer
- methods for adding to botanicals to spirits, relevant to still used

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- sensory features of commonly used botanicals
- options for using heads and tails of distillation run
- procedures and equipment used for transfer operations
- common causes of variation to product and corrective action required
- hazards, risks and controls, including for working with explosive atmosphere, heat, steam and ethanol
- routine maintenance requirements
- waste handling and disposal requirements
- Australian Standards, legislation, regulations and workplace licence requirements related to the production and storage of alcohol
- legislation, regulation and workplace licence requirements related to distilled spirits, including license to operate a still, Australian Taxation Office (ATO) in relation to excise tax, waste disposal
- recording requirements for traceability of product and ATO requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - wash/spirit to be distilled
  - still
  - testing equipment
  - safety equipment, including personal protective equipment (PPE)
- specifications:
  - product specifications for white spirit.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPTEC4020 Blend spirits

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has blended spirits to meet requirements of a pre-determined specification, on at least two occasions.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- anatomy, physiology and functions of taste and smell to determine sample appearance, texture, aroma and flavour
- the primary flavour characteristics of sweet/sour, umamic and bitter/salty
- interaction of sensory activity including the interaction between taste and smell, and effect of temperature on samples
- associated characteristics of mouth feel and appearance
- methods for blending spirits and liqueurs
- how to determine quality of water for blending
- quality characteristics of end product and output
- typical tests carried out to check alcohol content, flavour and quality
- methods to reduce or increase alcohol content
- instruments used for testing and how each is calibrated, such as hydrometer, alchometer
- sanitisation procedures and purpose
- common causes of variation and corrective action required
- hazards and controls, including manual handling and working with ethanol
- legislation, regulation and workplace licence requirements related to the production of alcohol, Australian Taxation Office (ATO) in relation to excise tax
- ATO definitions of brandy, whisky, rum, other excisable beverages
- recording requirements for traceability of product and Australian Taxation Office (ATO) regulations.

FBPTEC4021 Apply regulatory requirements to the production of alcoholic beverages

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 3.0.

Application

This unit of competency describes the skills and knowledge required to ensure that the production of alcoholic beverages complies with legislation and regulations, particularly with obligations related to excise.

The unit applies to individuals who may not be directly responsible for designing procedures for compliance with legislation, but who should be aware of the existence of legislation, its intent and the arrangements in place to ensure compliance.

No licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing exist, so local requirements must be checked. All work must comply with Australian food safety standards and relevant codes of practice.

Pre-requisite Unit

Nil

Unit Sector

Technical (TEC)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify legal requirements of alcoholic beverage production	1.1 Identify legislation and regulations relevant to the production of alcohol type produced at facility

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Investigate purpose and intent of regulatory requirements 1.3 Identify roles and responsibilities of authorities responsible for administering requirements 1.4 Identify requirements of alcoholic beverage producers, including licencing requirements where required 1.5 Review workplace procedures to ensure compliance with legal requirements 1.6 Determine appropriate method to establish dutiable quantities
2. Complete records to comply with legal requirements	2.1 Record details of raw materials used to manufacture excisable products 2.2 Record fermentation details for each batch 2.3 Record distillation or brew house details for each batch 2.4 Record dilution details for each batch 2.5 Record bulk storage details that traces excisable product as it moves in and out of bulk vessels, including any spillage and processing losses 2.6 Record packaging details for product run 2.7 Record packaged stock records that trace product as it moves in and out of underbond package storage area 2.8 Maintain calibration schedules for measuring equipment

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Analyse compliance and legal documentation from a variety of sources to determine compliance requirements
Numeracy	• Calculation to determine dutiable quantity of alcohol (litres x strength = Lals) • Calculations to determine excise duty payable (volume x strength = dutiable litres of alcohol, dutiable litres of alcohol x excise duty

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
	rate = duty payable) • Measure accurately using L, mL • Determine container fill tolerances

Assessment Requirements for FBPTEC4021 Apply regulatory requirements to the production of alcoholic beverages

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 3.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has effectively monitored the production of alcoholic beverages to ensure compliance with legislation, including:

- identifying legal requirements that apply to the production of at least one alcoholic beverage
- accurately completing records for the production of at least one type of alcoholic beverage, including records that cover:
  - raw materials
  - fermentation
  - brew house or distillation
  - bulk storage
  - packaging
  - packaged stock.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the legal responsibilities of an alcoholic beverage manufacturing company as they relate to excise, product content and packaging, trade measurements:
  - *Excise Tariff Act 1921*
  - *Excise Act 1901* and *Excise Regulation 2015*
  - National Measurement Act 1960 and the National Trade Measurement Regulations 2009 (trade measurement law)
  - Food Standards Code
- authorities responsible for administering the legislation and their roles

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- Australian Taxation Office (ATO) guidelines to clarify excise requirements (available at the ATO website)
- requirement to hold a licence to manufacture or store underbond excisable alcohol products
- activities that the ATO consider as manufacturing for excise purposes:
  - fermentation (except for wine)
  - distillation
  - the addition of flavours and/or colours (including in-line mixing as part of packaging into bottles, cans or kegs)
  - reduction (adding water)
  - blending
  - diluting
  - denaturing spirits
  - maturation of spirits in wood
  - repackaging of duty-paid beer from bulk containers
- services provided by the National Measurement Institute including requirements of trade measurement laws for the retail sale of beer, wine and spirits
- methods to establish the volume of containers
- allowable tolerances in alcoholic strength of product
- calibration and certification testing requirements for measuring and testing equipment
- requirement for a liquor licence to sell and consume alcohol from a production site
- excise tariffs and classification of excisable alcohol products (brandy, rum, whisky, wine, other excisable beverage)
- excise rates for alcohol product manufactured at specified site
- when excise duty is imposed and how it is acquitted
- allowable methods to determine alcohol content and volume and permitted variations
- instruments used to determine alcohol content and volume of excisable good and the requirement for calibration and certification
- legal definition of brandy, whisky and rum and the requirement to be stored in wood for 2 years
- requirements of blended alcoholic spirits and the declared maturation age of the product (taken to be the youngest constituent of the spirit)
- records required by the ATO for the production excisable alcohol products, including:
  - details of raw materials used in the manufacture of excisable products
  - fermentation records
  - distillation records (only for spirits)
  - bulk storage records
  - packaging records
  - packaged stock records

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real food processing workplace
- resources, equipment and materials:
  - alcoholic beverage production operations
- specifications:
  - workplace processes and procedures
  - relevant legislation
  - ATO resources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPTEC4022 Prepare starter cultures for fermentation

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 3.0.

Application

This unit of competency describes the skills and knowledge required to prepare for the fermentation of food or beverages, including producing a starter culture.

This unit applies to those workers who have responsibility for overseeing the production of fermented food and/or beverages and the quality assurance requirements associated with those products.

No licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for fermented food processing, and commercial sale of food and beverage products, exist so local requirements must be checked. All work must comply with Australian food safety standards and relevant codes of practice.

Pre-requisite Unit

Nil

Unit Sector

Technical (TEC)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Set up for starter culture production	1.1 Identify hazards in the starter culture production and manage risks 1.2 Clean and sanitise equipment and environment according to workplace procedures 1.3 Identify specification for starter culture

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Confirm availability of raw materials to prepare starter 1.5 Check quality of raw materials meets specification for starter culture
2. Produce starter	2.1 Check the integrity of the yeast, bacteria and/or fungi to ensure it is clear of contamination 2.2 Inoculate cultivation medium with yeast, bacteria and/or fungi, specific to product specification 2.3 Mix medium with yeast, bacteria and/or fungi 2.4 Incubate for specified time, in line with starter culture requirements 2.5 Stop incubation process when starter medium reaches desired parameters 2.6 Record details of process for traceability, in line with organisational and regulatory requirements 2.7 Store starter for future use

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy skills	• Convert units involving multiples and submultiples • Use fractions, decimals, proportions and percentages to determine responses to results • Use volumes (ml, L) and weights (mg, g, kg) to describe product quantities • Calculate dose (mg), average mass, mass percentage, density, moisture, relative and absolute humidity • Determine ratios, such as mass to mass, mass to volume and volume to volume percentages • Calculate concentration, such as g/100mL, mg/L and dilution ml/L
Get the work done	• Think through options to identify and respond to atypical results of tests

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
	• Trace and source obvious cause of artefact or malfunction

Assessment Requirements for FBPTEC4022 Prepare starter cultures for fermentation

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared for fermentation by producing two different starter cultures from the following list, each on two separate occasions, that consistently meets specifications for the product:

- yeast
- bacteria
- fungi
- yeast and bacterial symbiotic culture of bacteria and yeast (SCOBY)
- combinations of fermentation organisms above relevant to product.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- general fermented products that require a starter culture to begin the fermentation process
- ideal temperature to promote enzyme activity, relevant to starter culture
- specific starters used for different products, including yeast, bacteria, fungi, and yeast and bacterial SCOBY, or combinations of these relevant to product
- contaminants that may affect different types of starters
- natural starters versus commercial starters, including mothering process
- typical basic tests, equipment and methods relevant to starter culture preparation, such as temperature, pH and humidity
- sanitation requirements and purpose
- instruments and measurements used for typical tests relevant to product, such as thermometer probe, pH meter, hygrometer and calibration requirements for each
- acceptable parameters for typical test results
- anaerobic and aerobic pathogen risks associated with starter culture preparation

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- air circulation requirements of specific starter cultures
- possible effects of temperature fluctuations, relative humidity and air circulation on starter culture
- workplace and/or legal traceability requirements
- interpretation of test results, including simple calculations
- methods for controlling atypical outcomes of tests, relevant to process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real fermented food or beverage production environment
- resources, equipment and materials:
  - raw materials and equipment to produce starter
  - test equipment
- specifications:
  - specification for product.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPTEC4023 Control and monitor fermentation

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has controlled and monitored the fermentation of six different products, utilising three different fermentation categories from the following list:

- yeast
- bacteria
- fungi
- yeast and bacteria symbiotic culture of bacteria and yeast (SCOBY)
- combinations of fermentation organisms above relevant to product.

For each category utilised, there should be two products that show consistent colour, smell, texture, taste and appearance.

There must also be evidence that the individual can identify contamination or spoilage in each of the three categories chosen.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- different starter organisms for fermentation
- licensing requirements for the production and sale of fermented food and beverage products
- specific starters used for different products, including yeast, bacteria, fungi, and yeast and bacterial SCOBY, or combinations of these relevant to product
- ideal temperature to promote successful fermentation, relevant to product
- specific starters used for different products, including SCOBY for kombucha
- natural starters versus commercial starters, and which are allowed under the Food Standards Code
- typical adjuncts added to the fermentation process

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- essential ingredients for fermentation, including salt and sugar
- typical microbiological, chemical and physical tests carried out in production and on end products
- acceptable parameters for typical test results
- interpretation of test results, including simple calculations
- risks of pathogens, fungi, parasites and bacteria associated with fermentation processes
- instruments and measurements used for typical tests including thermometer probe, pH meter, hygrometer
- calibration requirements of measuring and testing equipment
- aerobic/anaerobic requirements for specific fermentation processes
- how to sanitise equipment and where necessary, ingredients
- how changes in pH indicate success or otherwise of the fermentation process
- air circulation requirements of specific products
- possible effects of temperature fluctuations, relative humidity and air circulation on product
- methods for controlling atypical outcomes of tests, relevant to process
- Food Standards Code and local health department requirements in relation to production and sale of fermented food and beverages, including local licensing requirements
- tensions between the Food Standards Code and the fermentation process
- waste handling and disposal requirements
- safe handling and transport procedures for samples to be tested at laboratory
- record keeping requirements for traceability of product.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real fermented food or beverage production environment
- resources, equipment and materials:
  - raw materials and equipment to ferment food and/or beverage
  - testing equipment
- specifications:
  - specification for product.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPTEC4024 Produce fermented and dry-cured meat products

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 3.0.

Application

This unit of competency describes the skills and knowledge required to produce uncooked fermented and dry-cured meat products, such as cacciatore, chorizo, mettwurst, salami and cabanossi.

The individual is required to demonstrate knowledge in a specific technical area and to design and communicate solutions to sometimes complex problems.

This unit applies to individuals who are responsible for the production of artisan fermented meat products.

No licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing exist so local requirements must be checked. All work must comply with Australian food safety standards and relevant codes of practice.

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
meat products	1.2 Identify potential sources of microorganism contamination 1.3 Identify chemical hazards that can affect fermented and dry-cured meat products 1.4 Identify critical control points (CCPs) for preventing hazards and controlling processing of fermented and dry-cured meat products, taking regulatory requirements into account 1.5 Identify workplace health and safety hazards associated with processing fermented and dry-cured meat products 1.6 Plan to manage hazards and risks associated with producing fermented and cured meat products
2. Prepare to process fermented and dry-cured meat products	2.1 Identify specification for fermented and dry-cured meat product 2.2 Identify Food Standards Code requirements for product 2.3 Procure ingredients 2.4 Ensure all surfaces meet cleanliness and sanitisation requirements 2.5 Manage good hygiene practice (GHP) and good manufacturing practice (GMP) procedures 2.6 Record food safety related information throughout process in line with regulatory requirements
3. Process fermented and dry-cured meat products	3.1 Prepare meat and ingredients according to product specification 3.2 Prepare equipment according to safe operating procedures 3.3 Mix or prepare meat product according to product specification 3.4 Clean work area and dispose of waste according to regulatory requirements
4. Ferment meat product	4.1 Determine time, temperature and humidity requirements for fermentation and curing 4.2 Monitor fermentation and maturation in line with product specification 4.3 Identify critical control points (CCPs) for preventing and controlling bacterial contamination, in line with food safety plan 4.4 Implement control methods to prevent microbial contamination during fermentation and curing 4.5 Finish fermentation process and store product according to product specifications 4.6 Keep records of fermentation process in line with food safety

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	requirements 4.7 Identify appropriate actions based on test results
5. Conduct tests to monitor progress and completion of process	5.1 Identify required test activities and frequency for each fermented and dry- cured product 5.2 Conduct required tests and record test results 5.3 Obtain samples for each product for independent microbial, chemical and physical testing prior to product release 5.4 Identify appropriate actions based on test results

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interprets food safety guidelines, standards and regulations • Interprets documented processes for control of microbial growth in food products • Interprets product specifications for production activities
Numeracy	• Correctly calculates ingredients and additives for each production batch • Scales up or down recipe quantities

Assessment Requirements for FBPTEC4024 Produce fermented and dry-cured meat products

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has produced three different fermented and/or dry-cured meat products:

- cacciatore
- chorizo (spanish style fermented)
- csabai
- landjaeger
- mettwurst
- salami
- cabanossi
- prosciutto
- pancetta
- capocollo
- guanciale
- other

including managing microorganism and chemical contamination throughout the production of each.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- type of meat cuts used for fermented products and what influences its quality
- equipment typically used to produce fermented meat products and safe use methods
- the role and use of flavouring ingredients
- the role of salt, nitrates and nitrites

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- use of lactobacillus starter cultures and preventative cultures
- casings for fermented meat products
- conditions for fermentation and dry curing
- processes used in the control of microbial growth in fermented and dry cured meat products
- major bacteria responsible for food poisoning and spoilage
- the importance of plant hygiene and how it can affect the finished product
- typical spoilage patterns in fermented and dry cured foods caused by chemical and microbiological issues
- microbiological test requirements for fermented and dry cured meat products
- plant hygiene monitoring processes
- Food Safety Standards relevant to the production and sale of fermented and dry-cured meats
- development and implementation of hazard analysis and critical control points (HACCP) plans.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - equipment and raw materials specific to product
  - safety equipment and personal protective equipment (PPE)
- specifications:
  - relevant to product.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPTEC5003 Design an artisan food production facility

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 3.0.

Application

This unit of competency describes the skills and knowledge required to design the layout of an artisan food and/or beverage production facility, including its location, required work spaces, work flow and regulatory requirements.

This unit applies to individuals who will set up a new or reworked facility for the production of food and/or beverages, to meet regulatory and specific processing requirements.

No licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing exist so local requirements must be checked. All work must comply with Australian food safety standards and relevant codes of practice.

Pre-requisite Unit

Nil

Technical (TEC)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine the regulatory requirements of the facility	1.1 Identify regulatory bodies that apply to the food production business in your area 1.2 Determine workplace health and safety requirements of food processing facility

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Determine food safety requirements of food processing facility 1.4 Determine requirements for waste disposal and environmental impact of noise and emissions 1.5 Plan facility for optimum production, safety and biosecurity 1.6 Determine requirements for cleaning and sanitisation 1.7 Determine requirements for storage of equipment, raw materials and products
2. Determine the location requirements of the facility	2.1 Identify regulatory requirements for industry, and choose suitable location based on zoning and access to utilities 2.2 Identify suitable location of facility to access raw materials and potential markets 2.3 Identify a suitable environment with space for waste treatment, and safe ingress and egress 2.4 Identify suitable orientation for facility to optimise environmental factors
3. Determine the processing requirements of the facility	3.1 Identify maximum quantities of materials to be processed at once 3.2 Identify number of staff required for production and administration at the site, and any specific individual needs 3.3 Determine sizes of work spaces required for different stages of production 3.4 Identify optimal work flow for process 3.5 Determine equipment and plant required of each workspace and its capacity 3.6 Determine the surface areas required of each workspace and their optimal height 3.7 Identify location of electricity and gas for light, heating, cooling and drying 3.8 Identify fluid flow requirements for water and drainage for plant design 3.9 Consider temperature, ventilation and airflow requirements of work spaces 3.10 Consider current and future production capacity
4. Plan design of food	4.1 Draft size and layout of facility, including work spaces, staff

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
processing facility	amenities and parking 4.2 Incorporate raw materials receival, waste disposal, location of utilities 4.3 Incorporate processing requirements suitable for product/s 4.4 Map the production process identifying the relationship between each step in the process

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Draft diagrams to represent layout of facility, services and utilities
Get the work done	• Problem solve issues as they arise

Assessment Requirements for FBPTEC5003 Design an artisan food production facility

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has produced a plan for at least one artisan food production facility of specified capacity that incorporates food specific processing and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- processing plant design parameters for specified product/s
- characteristics of plant and equipment, limitations and capabilities
- work flow requirements of facility for specified product
- legislation, regulations and standards specific to product
- requirements of Food Standards Code
- health and safety requirements relevant to workplace set up
- basic drafting techniques.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace environment
- specifications:
  - specification for food and/or beverage product being produced

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPVIT2007 Tend containerised nursery plants

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to tend containerised nursery plants.

The unit applies to individuals in wine grape nurseries who complete nursery activities such as treating plants and maintaining nursery facilities.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Viticulture (VIT)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Maintain nursery facilities	1.1 Confirm job requirements 1.2 Identify potential health and safety hazards and controls according to workplace procedures 1.3 Select, fit and use personal protective equipment according to the job requirements

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Undertake work according to safety data sheets and workplace environmental procedures 1.5 Maintain irrigation system according to workplace procedures 1.6 Check temperature controls according to workplace procedures
2. Treat plants to maintain growth	2.1 Select and prepare materials, equipment and tools according to job requirements 2.2 Select, mix and apply chemical treatments according to workplace procedures 2.3 Apply irrigation according to workplace procedures 2.4 Recognise and report non-conformances according to workplace procedures
3. Carry out post-treatment operations	3.1 Collect and dispose of waste according to workplace procedures 3.2 Shut down, clean and store equipment according to workplace procedures 3.3 Clean and sanitise facilities according to workplace procedures 3.4 Record workplace information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Comprehend information from a variety of workplace documents
Numeracy	• Calculate numerical information relating to preparing treatments and environmental conditions
Navigate the world of work	• Apply workplace procedures and legislative responsibilities to own role
Get the work done	• Respond to routine problems by referring to workplace procedures • Plan and organise tasks to achieve job requirements

Assessment Requirements for FBPVIT2007 Tend containerised nursery plants

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has tended to containerised nursery plants by treating plants to maintain growth and maintaining nursery facilities and demonstrating the following on at least one occasion:

- using personal protective equipment (PPE)
- identifying and following safety data sheets and health and safety in the workplace procedures
- sanitising equipment and following hygiene procedures
- selecting, mixing and applying chemical treatments according to workplace procedures
- monitoring irrigation system
- irrigating and monitoring plants according to workplace procedures
- identifying and reporting non-conformances
- maintaining workplace records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace
- purpose and application of PPE
- principles and operations of irrigation systems used in tending plants in nurseries
- maintaining irrigation system:
  - fixing blockages, leaking heads and hoses
  - servicing irrigation system components
  - identifying and reporting non-compliances
- recognising underperformance of the irrigation system, including:
  - dry spots

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - water dumping
  - abnormal water flow
- principles and practices of tending nursery plants:
  - weed control
  - removing dead or diseased plant materials
- workplace procedures for operating equipment:
  - calibrating and adjusting equipment
  - carrying out pre-operational checks
  - applying particular settings
  - shut down procedures
- environmental issues and controls including waste disposal
- workplace procedures for reporting non-conformances
- procedures for maintaining workplace records.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a plant nursery workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - irrigation and maintenance equipment, services and corresponding information
  - products and materials
  - cleaning materials and equipment
  - system for recording information
- specifications:
  - workplace procedures, including advice on company practices, safe work practices, quality and environmental requirements
  - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPVIT2019 Operate the irrigation system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to operate the irrigation system and implement the irrigation system maintenance schedule according to instructions.

The unit applies to individuals who work under general supervision to use irrigation systems.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare the irrigation system for operation	1.1 Confirm work instructions 1.2 Confirm environmental guidelines and identify potential health and safety hazards and controls 1.3 Select and fit personal protective equipment relevant to the job requirements

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Check equipment is ready for use according to workplace procedures
2. Operate the irrigation system	2.1 Start the irrigation system according to workplace procedures 2.2 Set irrigation requirements according to instructions 2.3 Monitor the control points to confirm that performance is maintained within specification 2.4 Rectify out-of-specification system performance and report details
3. Complete operation of the irrigation system	3.1 Shut down the irrigation system according to workplace procedures 3.2 Implement cleaning and maintenance activities, in line with schedule 3.3 Out of specification performance is identified, rectified and reported to supervisor in accordance with responsibilities of own role 3.4 Collect, treat and sustainably dispose of waste generated by both the process and cleaning procedures, according to workplace procedures 3.5 Record workplace information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Access and interpret work instructions, standard operating procedures and maintenance schedules
Oral communication	• Interact effectively with supervisor, including actively listening to instructions, asking for clarification and seeking advice
Get the job done	• Problem solve issues as they arise

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has effectively operated the irrigation system on at least one occasion, including:

- using appropriate personal protective clothing and equipment
- setting equipment correctly to achieve specified irrigation time, application rate and pressure
- monitoring irrigation process control points and equipment
- taking corrective action in response to out-of-specification activity
- recording performance and maintenance information accurately.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic plant physiology in relation to the irrigation system, including:
  - transpiration
  - water intake
  - nutrient uptake
  - respiration
  - translocation
- different types of irrigation systems and the advantages and disadvantages of each
- components of irrigation equipment and the function of each, including:
  - drippers
  - pipelines
  - sprinklers
  - filters
  - microjets

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - pumps
  - furrows
  - valves
  - motors
  - timers
  - windmills
- types of maintenance and repairs that need to be undertaken, including issues with:
  - breakages
  - leaks
  - blocks
  - replacing drippers
  - making joins
  - filters and turbo keys
  - monitoring devices
  - priming pumps and motors
- routine cleaning and maintenance requirements and procedures for the system
- information technology systems where relevant
- environmentally sound methods to treat and dispose of waste
- organisational recording and reporting requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - irrigation equipment
  - irrigation site
- specifications:
  - work instructions and maintenance schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPVIT3012 Implement an irrigation schedule

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to monitor soil requirements and implement and review a vineyard irrigation schedule.

The unit applies to individuals who are required to follow workplace procedures in completing tasks associated with implementing irrigation schedules, and take responsibility for their own work using discretion and judgement in the selection and use of available resources.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Viticulture (VIT)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Monitor vineyard for irrigation requirements	1.1 Monitor vineyard to assess requirements for water and/or nutrients 1.2 Collect routine samples according to workplace procedures 1.3 Test samples, in line with workplace procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Interpret test results and identify irrigation activities to match requirements
2. Implement irrigation requirements	2.1 Plan irrigation activities and schedule, including nutrient injection and application rates 2.2 Coordinate resources and brief personnel to deliver irrigation requirements 2.3 Implement agreed irrigation plan 2.4 Address problems and anomalies in the irrigation system as required
3. Evaluate effectiveness of irrigation activities	3.1 Monitor vineyard to evaluate the impact of irrigation activities 3.2 Monitor surrounding areas to evaluate the environmental impact of irrigation activities 3.3 Evaluate the overall effectiveness of the irrigation activity 3.4 Record irrigation activity according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	• Accurately mix chemicals according to specified ratios • Measure and adjust flow rates • Measure soil moisture, nutrient and chemical output
Get the work done	• Plan, sequence and implement tasks according to set routines and procedures

Assessment Requirements for FBPVIT3012 Implement an irrigation schedule

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has implemented an irrigation schedule for at least one vineyard, or part of, including:

- determining requirements for water and nutrients
- planning an irrigation schedule
- implementing the irrigation plan and addressing problems and anomalies
- evaluating the effectiveness of the irrigation schedule.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- effect of irrigation techniques on vine growth, cropping levels and wine quality, including partial root zone drying (PRD) and regulated deficit irrigation (RDI)
- effect of water and additives on vines during different key phenological stages
- visual symptoms of vine nutrient deficiencies, water stress and frost
- principles of soil moisture monitoring, including volumetric soil moisture content, and percentage compared to soil moisture tension
- factors to be considered when planning irrigation, including:
  - soil moisture content
  - water table level
  - water quality
  - signs of vine nutrient deficiencies
  - climatic conditions
  - frost risk
  - grape variety
  - soil type and depth
  - closeness to harvest

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - yield parameters
  - age of vine
  - grape quality requirements
  - symptoms of vine water stress
  - effective root depth
- methods to calculate chemical application rates for injection requirements
- sampling and testing techniques typically used in a vineyard
- issues to be monitored and corrected:
  - measuring nitrogen output
  - measuring chlorine output
  - identifying soil moisture content and depth to which water will reach
  - identifying emitter output consistency
  - interaction between different irrigation valves or shifts
- recording requirements and procedures
- information technology systems where relevant.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - irrigation equipment
  - irrigation site
  - sampling and testing equipment
- specifications:
  - work instructions and schedules
  - manufacturer instructions for equipment
  - safety data sheets for chemicals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPWHS3001 Contribute to work health and safety processes

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to support the implementation of health and safety policies and procedures, and contribute to the development and implementation of risk control measures and safety practices within a workplace.

The unit applies to skilled workers with responsibility for maintaining a safe work environment and contributing to workplace practices. In this role, workers have limited responsibility for ensuring members of the work group are implementing safe work practices.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work Health and Safety (WHS)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and conduct work safely	1.1 Plan work in accordance with relevant provisions of legislation, standards, codes of practice/compliance codes, guidance material and workplace safe working procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Identify hazards as part of work planning and work process 1.3 Address identified hazards prior to starting work using judgement within defined scope of responsibilities 1.4 Ensure availability of suitable personal protective equipment (PPE) for self and others in the work area 1.5 Report inadequacies in control measures according to workplace procedures 1.6 Report incidents and injuries in line with workplace policies and procedures 1.7 Undertake housekeeping of health and safety in work area in accordance with workplace requirements
2. Support safe work practices in work area	2.1 Monitor implementation of safe work practice policies and procedures 2.2 Share information on safe work practices and safety issues in the workplace with members of the work group 2.3 Check the health and safety practices of less experienced members of the work group and provide support as required to ensure safe work practices are followed 2.4 Support members of the work group to accurately record incidents and complete associated workplace documentation according to workplace procedures
3. Contribute to health and safety processes	3.1 Raise health and safety issues in accordance with workplace procedures 3.2 Contribute to workplace meetings, workplace inspections or other consultative activities in a constructive manner to improve safety 3.3 Identify roles and responsibilities of health and safety representatives and committees
4. Contribute to hazard identification, risk assessment and risk control activities	4.1 Identify and respond to hazards, and communicate as required with members of the work group 4.2 Report identified hazards and inadequacies in risk controls 4.3 Check the workplace for hazards using itemised checklists in accordance with work procedures 4.4 Contribute to risk assessments in accordance with workplace procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.5 Provide input to development and implementation of control measures, with reference to the hierarchy of control
5. Participate in the control of emergency situations	5.1 Identify and respond appropriately to emergency signals and alarms 5.2 Take initial action to control an emergency according to workplace procedures 5.3 Implement emergency response procedures within scope of training and competence
6. Maintain and use health and safety records	6.1 Complete records for the work area in accordance with legislative and enterprise requirements 6.2 Access and interpret health and safety information to inform work practice

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Analyse and consolidate health and safety information from a range of sources for implementation
Writing	• Accurately record information, complete forms and prepares basic reports using clear language according to organisational practices
Oral communication	• Clearly explain and present safety information using language, tone and pace appropriate to audience
Interact with others	• Cooperate with others and contributes to work practices where joint health and safety outcomes are expected

Assessment Requirements for FBPWHS3001 Contribute to work health and safety processes

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has contributed effectively to work health and safety processes on at least two separate occasions, including:

- identifying and assessing potential hazards in work activities
- monitoring implementation of safe work practices in the workplace
- providing advice and feedback to work group members
- contributing to the development and implementation of control measures
- completing health and safety records and reports according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- Commonwealth, state or territory legislation, regulations, standards, codes of practice and industry standards/guidance notes relevant to own work, role and responsibilities
- safety signs and their meanings, including signs for:
  - personal protective equipment (PPE)
  - emergency equipment
  - dangerous goods class signs
  - specific hazards such as sharps, radiation
  - the difference between hazard and risk
- sources of health and safety information (internal and external)
- nature of common workplace hazards, including chemicals, bodily fluids, noise, manual handling, work postures, underfoot hazards and moving parts of machinery
- basic hazard identification procedures, including workplace inspections and review of workplace data
- standard emergency signals, alarms and required responses

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- principles of basic risk assessment
- hierarchy of control and its application
- PPE requirements, including use, storage and maintenance
- roles and responsibilities of employees, supervisors and managers in the workplace
- roles and responsibilities of health and safety representatives and committees
- potential consequences of non-compliance and failing to follow safe work practices
- workplace specific information, including:
  - hazards of the particular work environment
  - hazard identification procedures relevant to the hazards in their workplace
  - designated person with whom to raise health and safety issues
- potential emergency situations, alarms and signals and required response.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - scenarios or case studies for simulated emergency responses
- specifications:
  - health and safety legislation, regulations and codes of practice
- relationships:
  - interactions with work group members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPWHS4002 Maintain work health and safety processes

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has maintained work health and safety processes for a work group of at least three members, on at least one occasion, including:

- accessing and interpreting health and safety information, including legislation, guidance material and benchmarks
- communicating clearly and accurately with work group members, other technicians/specialists, managers and expert advisers
- ensuring work group is provided with safety equipment, information and training on safe work practices
- consulting with work groups and documenting safe work practices
- reviewing and maintaining work procedures to ensure compliance with safety policies
- identifying and addressing hazards and assessing risk by developing and implementing risk control measures
- monitoring work practices and identifying and addressing non-compliances
- contributing to investigations and consultative processes
- completing and maintaining health and safety records
- implementing and reviewing emergency procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the difference between hazard and risk
- sources of health and safety information both internal and external to the workplace
- general duty requirements of health and safety legislation and also regulatory requirements relevant to the particular industry/type of work site
- the roles and responsibilities of employees, supervisors and managers in the workplace

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- nature of common workplace hazards, such as chemicals, noise, manual handling, work postures, underfoot hazards and moving parts of machinery
- guidance material, including codes of practice/compliance codes relevant to the particular industry/type of work site
- hazard identification procedures, such as workplace inspections and review of workplace data
- principles of risk management including the hierarchy of control and its application
- personal protective equipment requirements, including use, storage and maintenance
- legislative requirements for record keeping and reporting
- standards and guidelines related to emergency procedures
- roles and responsibilities of health and safety representatives and committees
- workplace specific information, including:
  - hazards of the particular work environment
  - hazard identification procedures relevant to the hazards in the work place
  - risk controls for specific hazards
  - designated person for raising health and safety issues
  - workplace procedures related to health and safety, including hazard, incident and injury reporting, hazard identification, risk assessment and control, consultation and participation, incident investigation and record keeping
  - workplace procedures related to the work of the group, including use of personal protective equipment and emergency response
  - potential emergency situations, alarms and signals and required response.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - access to health and safety advice and direction
- specifications:
  - legislation, regulations, standards and codes of practice
  - workplace policies and procedures for health and safety, and for emergencies
- relationships (internal and/or external):
  - access to a work group of at least three members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBAC204 Prepare grain storages

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to safely prepare storages, surrounding areas and equipment in readiness for receiving grain at an acceptable level of hygiene. This unit applies to workers in specialist grain storages or on grain farms.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all work in confined spaces must comply with state and federal legislation requirements.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Element	Performance criteria
1. Prepare to work in bulk material storage area	1.1 Follow the work program and clarify with supervisor 1.2 Identify work health and safety hazards in grain storage and report to supervisor and implement suitable controls 1.3 Select, use and maintain suitable personal protective equipment 1.4 Select, prepare and maintain appropriate equipment and tools
2. Prepare storage area	2.1 Clean the storage site of weeds, dust and spillage appropriately 2.2 Dispose refuse appropriately 2.3 Prepare and maintain the storage site appropriately
3. Prepare storages	3.1 Clean bulk material storages appropriately of all residues 3.2 Check bulk material storages for structural safety, damage or deterioration, and repaired or reported appropriately 3.3 Prepare and erect temporary storages appropriately
4. Prepare bulk material handling machinery	4.1 Clean bulk material handling machinery appropriately to be free of contamination and residues 4.2 Assist in the adjustment and setting bulk material handling equipment appropriately 4.3 Prepare bulk material handling equipment according to manufacturer’s instructions and enterprise requirements
5. Complete maintenance operation	5.1 Record workplace information 5.2 Dispose of all waste and debris according to enterprise polices and minimising the impact on the environment 5.3 Clean and store tools and equipment appropriately 5.4 Apply enterprise biosecurity policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBAC204A Prepare grain storages.

Assessment Requirements for AHCBAC204 Prepare grain storages

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safe work procedures
- erect simple temporary bulk material storages
- check equipment and storage facilities, and identify current or impending faults
- perform pre-operational checks and routine safety, service and maintenance procedures on tools, equipment and machinery
- operate hand and independently powered tools and cleaning equipment to industry standards
- clean, secure and store machinery and equipment
- handle hazardous substances (fuels) safely
- read and interpret manufacturer's specifications, work and maintenance programs, and Safety Data Sheets (SDS)
- prepare the storage area for access by grain carriers
- prepare grain storages by removing all residues and checking structure
- work in confined spaces in accordance with State/Territory legislation, where required
- prepare and test grain handling machinery
- communicate with supervisor
- follow enterprise work health and safety policies in the context of own work
- follow enterprise biosecurity policies the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- range of construction methods, potential hazards, safety and structural requirements for storage

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- erection and dismantling for types of temporary storage used by organisation
- organisation and commodity quality requirements for grain storage
- grain storage hygiene requirements
- typical signs of structural damage to be documented and reported
- pre-operational and safety checks, servicing and maintenance procedures for tools and equipment
- machinery maintenance procedures and operating principles
- machinery and equipment cleaning, storage and protection methods
- appropriate action in contingency situations
- organisation requirements for protective equipment and safe practices in relation to work health and safety
- State/Territory legislation in respect to working in confined spaces
- potential hazards associated with the operation of basic tools and equipment
- regulations and codes of practice with regard to work health and safety, environment and the use and control of machinery and equipment
- personal protective clothing and equipment and when and how it should be used
- organisational recording and reporting procedures.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBUS516 Develop and review a business plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to develop and review a business plan.

This unit applies to individuals whose role is to set the short, medium or long term goals and targets for the business plan. Roles may relate to marketing and production targets, resource and asset development and management, supply chain management, acquisitions, capital, property improvements, and operational systems.

At this level, workers take personal responsibility and exercise autonomy in undertaking complex work. They analyse information and exercise judgement to complete a range of advanced skilled activities.

All work must be carried out to comply with organisational requirements, work health and safety legislation and codes, sustainability practices and in consultation with the management team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Business (BUS)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine scope of business plan	1.1 Determine scope of the business plan and associated systems in consultation with key and specialist personnel 1.2 Access information to inform business plan development including potential business opportunities 1.3 Account for and incorporate trends and seasonal variations 1.4 Account for strategic goals, targets and directions of the enterprise 1.5 Identify legal obligations and compliance requirements
2. Prepare business plan	2.1 Develop operational goals and targets that enhance opportunities to meet the enterprise strategic plan 2.2 Check indicators of operational performance are clear and measurable and allow for realistic analysis of performance 2.3 Identify and include resource requirements and input supply chain options 2.4 Identify and incorporate human resource strategies 2.5 Identify and incorporate marketing strategies 2.6 Identify risks for the business and develop minimisation strategies 2.7 Trial systems to test budgetary impact and operational potential before implementation
3. Document and review business plan	3.1 Develop the business plan 3.2 Incorporate financial and operational systems that enhance performance management and suit enterprise requirements 3.3 Communicate business plan to relevant parties 3.4 Monitor performance against the business plan to identify strengths, weaknesses and areas for improvement 3.5 Make recommendations to improve the business plan and associated systems

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for AHCBUS516 Develop and review a business plan

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has developed and reviewed a business plan for at least one enterprise, including:

- set strategic goals, targets and directions for the enterprise
- determined clear and measurable indicators of operational performance
- identified and designed risk management strategies
- developed appropriate operational plans
- documented the business plan
- monitored the business plan to identify strengths, weaknesses and areas for improvement.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- profit and loss and cash flow systems
- forecasting trends in expenditure and production for an enterprise
- communication techniques typically used to negotiate business strategies and directions
- risk management strategies relevant to the enterprise
- marketing strategies relevant to the enterprise
- measures of operational performance
- financial and operational systems and resource considerations relevant to business planning
- logical and analytical methods to interpret and analyse financial reports
- industrial relations, taxation, corporate and industry legislation, environmental and work health and safety legislation as they relate to the enterprise
- capital investment analysis.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - access to business records for an enterprise.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCHM101 Follow basic chemical safety rules

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to follow instructions and direction for safe handling, storage and use of chemicals.

The unit applies to individuals who undertake a range of defined routine activities alongside a supervisor in most situations. They exercise limited autonomy within established and well-known parameters and identify and seek help for simple problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	correct fit as directed by supervisor 1.4 Identify functions of chemicals in the workplace
2. Identify risks associated with chemicals	2.1 Identify and interpret chemical labels, safety signs, symbols and safety data sheets according to supervisors' instructions 2.2 Identify health and safety hazards and risks in the workplace and report to supervisor 2.3 Control risks as directed
3. Follow chemical handling and storage rules	3.1 Identify and locate chemical store 3.2 Interpret and follow safe chemical handling, transport, and storage according to product label and supervisor instructions 3.3 Observe instructions for maintenance and storage of PPE and application equipment 3.4 Follow safety rules when working in areas where chemicals are stored 3.5 Identify emergency procedures to follow in the event of an accident or spillage 3.6 Record information as directed by supervisor

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret chemical labels, instructions and information
Oral Communication	• Use clear language and concepts, tone and pace appropriate when communicating with supervisor
Navigate the world of work	• Recognises organisational expectations and follows explicit instructions, protocols and procedures when working with chemicals
Get the work done	• Follow clearly defined instructions and sequencing, and monitors own progress for the task, seeks assistance when necessary

Assessment Requirements for AHCCHM101 Follow basic chemical safety rules

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have followed basic rules relevant to chemical safety, including:

- confirmed work requirements and equipment for chemical use with supervisor
- located and followed information on chemical labels and relevant safety data sheets according to supervisors' instructions
- recognised the use of chemicals and complied with chemical safety signs and symbols in the workplace
- recognised chemical hazards and risks and reported to supervisor and applied risk controls
- used, maintained and stored personal protective equipment (PPE)
- maintained and stored chemical application equipment according to supervisors' instructions
- located chemical store, handled, transported, stored and worked with chemicals according to supervisors' instructions
- followed emergency procedures for accidents or chemical spillage and reported to supervisor
- maintained records according to supervisor instructions.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- rules and instructions for working with and around chemicals
- common types of chemicals used in the workplace
- common types of chemical application equipment to be maintained and stored
- the structure and purpose of chemical labels and safety data sheets

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- basics of hazards and risks of chemical use
- safety signage and symbols for chemical use in the workplace
- level of hazard and risks associated with common chemicals used in the workplace and methods of control
- PPE, when and how it should be worn, stored and maintained
- methods of reporting to supervisors' chemical hazards and risks
- safe methods of transporting, handling and storage of chemicals
- types of emergencies and the procedures for accidents and spills of chemicals
- records commonly kept for chemical use.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
  - access to chemicals and chemical store
- resources, equipment and materials:
  - PPE
- specifications:
  - workplace instructions and procedures
  - chemical safety data sheets
  - common chemical labels
- relationships:
  - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Identify and select tools and equipment required according to supervisor instructions 1.3 Identify health and safety hazards and risks and apply controls according to supervisor instructions and workplace procedures 1.4 Select, ensure serviceability, fit and use personal protective equipment (PPE)
2. Check application equipment	2.1 Carry out pre-operational checks of application equipment and identify and replace any damaged or worn components or report to supervisor 2.2 Prepare application equipment for use according to workplace practice and safe chemical handling processes
3. Handle and transport chemicals	3.1 Confirm safety precautions for the handling and transport of chemicals with supervisor 3.2 Handle and transport chemicals according to chemical label, safety data sheets and supervisor instructions
4. Prepare chemical for application	4.1 Interpret and apply chemical label instructions according to safety data sheets for the chemical or substance being used 4.2 Select and use appropriate mixing equipment 4.3 Measure, mix and load application equipment with chemical according to application rates 4.4 Clear chemical spills according to chemical label and supervisor instructions 4.5 Check that output of application equipment is correct and in accordance with chemical application plan
5. Apply chemicals	5.1 Assess and record weather conditions and forecasts prior to and during application according to workplace requirements 5.2 Apply chemical safely according to chemical application plan, chemical label and supervisor instructions 5.3 Monitor conditions for application and take appropriate action when conditions are unsuitable according to workplace procedures 5.4 Minimise risks to others, product integrity and the environment prior to and during application
6. Finalise work	6.1 Clean and store PPE and application equipment in accordance with manufacturers and health and safety in the workplace

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	requirements 6.2 Dispose of excess chemicals and clean containers in accordance with label instructions and regulatory requirements 6.3 Complete incident reports according to workplace procedures 6.4 Complete chemical application records according to workplace procedures 6.5 Store unused chemical and products according to workplace procedures 6.6 Adhere to all re-entry requirements for treated areas

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret instructions, chemical labels and safety documentation to identify relevant and key information to apply to mixing and application of chemicals
Writing	• Use clear language and correct concepts and terminology when reporting incidents and completing chemical application records
Numeracy	• Perform basic mathematical calculations when measuring and mixing chemicals and checking chemical application equipment
Oral Communication	• Use clear language, concepts, tone and pace appropriate when confirming chemical application parameters with supervisor
Get the work done	• Follow clearly defined instructions and sequencing, and monitors own progress for the task, seeks assistance when necessary

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated that chemicals have been applied under supervision, ensuring they have:

- identified hazards and risks and adopted safe work practices and used appropriate personal protective equipment (PPE) according to supervisors' instructions
- confirmed activity with supervisor and identified and selected tools and equipment necessary for the application of chemical treatment
- carried out pre-operational checks of application equipment and made it ready for operation
- handled and transported chemicals to be used according to chemical labels and supervisors' instructions
- followed directions on chemical labels and relevant safety data sheets to safely mix and prepare chemicals
- selected appropriate measuring equipment and measured, mixed and loaded application equipment with chemicals safely and correctly
- ensured chemical spills were cleared according to chemical label instruction and supervisor instructions
- checked the application equipment for output against plan and applied chemical safely complying with weather conditions
- monitored and recorded weather and applied chemical appropriate to prevailing conditions
- maintained a healthy and safe condition for the environment and others while applying and following chemical application
- cleaned application equipment and PPE and disposed of waste according to equipment manufacturer instructions, chemical label and supervisor instructions
- complied with equipment manufacturer instructions, chemical label and supervisor instructions

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- maintained chemical application records and incident reports according to workplace procedures
- stored protection equipment, application equipment and unused chemicals according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- various handling and transport techniques and requirements for chemicals
- structure and content of chemical labels and safety data sheets and their use and purpose for safe chemical application
- principles and methods of measuring, mixing and applying chemicals
- features and functions of a range of application equipment relevant to the workplace their operations, and maintenance requirements
- risk factors to be taken into account for human and animal health, spillage and environmental impact relevant to chemical use before, during and following chemical application
- basic chemical groupings and types used in the workplace, including:
  - the of mode of action
  - the impact on chemical safety
  - application methods
- paths of entry of poisons into the body and the methods of limiting exposure through practices and personal protective clothing
- maintenance practices for chemical application related equipment and PPE and disposal procedures for chemical contaminants and containers
- assessing weather conditions and the impact on safe application of chemicals
- components of a workplace chemical application plan
- chemical related records and reports and their purpose.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
  - access to chemical store
- resources, equipment and materials:
  - common chemicals
  - PPE
  - chemical application equipment
  - chemical measuring and mixing equipment
- specifications:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- workplace documents, including work instructions and procedures
- chemical labels and safety data sheets
- chemical application plan and relevant chemical application rates
- manufacturers' operation and maintenance instructions for chemical measuring and application equipment

- relationships:
  - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have safely transported and stored chemicals, including:

- identified health and safety hazards, assessed risks and implemented controls
- ensured emergency services contact details are available
- ensured transport vehicle meets regulations and that chemicals were loaded, secured and protected according to regulations and procedures
- ensured emergency equipment and procedures were available
- handled, transported and stored chemicals safely
- carried out emergency procedures safely and according to procedures
- maintained a chemical storage manifest and safety data sheets (SDS) according to legislative and regulatory requirements
- complied with chemical label instructions and SDS for transporting and storage of chemicals and legislative and regulatory requirements
- maintained inventory and records according to workplace procedures and legislative and regulatory requirements
- monitored chemical expiration and disposed of chemicals and waste according to workplace procedures and legislative and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- chemical labels and SDS their purpose, use and terminology, including:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - chemical signs, symbols and coding
  - basic chemical properties and reactivity related to SDS and labels
- legislation and regulations that apply to transporting and storing chemicals, including:
  - transport vehicle requirements
  - information and documentation
  - dangerous and hazardous chemicals
  - placarding requirements
- risk factors including human and animal health and environmental
- processes and procedures for the disposal of excess, unwanted, expired chemicals and chemical waste including industry disposal programs
- health and safety in the workplace requirements including personal protective equipment (PPE) and manual handling
- emergency procedures for spills and accidents
- recording and monitoring of chemical stores including, expiration and disposal procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
  - access to storage facility for chemicals
  - access to vehicle for transporting chemicals
- resources, equipment and materials:
  - chemicals
  - PPE
  - materials and equipment to handle, secure and protect chemical loads
- specifications:
  - specific workplace documents, including work instructions and procedures for chemical handling, storage and transport
  - chemical labels and safety data
  - legislation and regulations about handling, storage and transport of chemicals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine the need for chemical use and prepare an application plan	1.1 Identify the pest, weed or disease, and assess the need for control 1.2 Assess the requirement for chemical use 1.3 Assess health and safety hazard, risks and controls for different chemicals

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Confirm requirement for chemical application according to workplace procedures 1.5 Assess off target risk of each application method 1.6 Assess the environmental risk for application method 1.7 Notify stakeholders of intended chemical application according to workplace procedures and legislative and regulatory requirements 1.8 Prepare application plan according to workplace procedures
2. Prepare chemical mixes	2.1 Identify and select chemical required for target according to application plan 2.2 Calculate the volume, rate or dose according to chemical label instructions 2.3 Identify and select application equipment and set-up requirements according to application plan and operator instructions 2.4 Identify hazards, assess risks and implement control measures for application method according to chemical label and health and safety in the workplace procedures 2.5 Identify, select, fit and use personal protective equipment (PPE) according to workplace procedures 2.6 Select appropriate mixing equipment and suitable location to prepare and load chemicals according to workplace procedures 2.7 Prepare chemicals according to chemical label instructions 2.8 Return unused chemical to store and clean preparation equipment and work site of residues and spillage according to chemical label instructions and workplace procedures
3. Calibrate application equipment	3.1 Select application equipment for chemical according to application plan, off target risks and workplace procedures 3.2 Conduct pre-operational checks of application equipment according to operator and maintenance manual 3.3 Calibrate equipment according to operating instructions and application plan 3.4 Load equipment with chemical according to operating instructions and workplace safety procedures
4. Apply chemicals	4.1 Monitor and assess weather conditions and forecasts to ensure effective chemical application according to application plan

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.2 Select, ensure serviceability, fit and use PPE according to chemical label instructions and workplace procedures 4.3 Apply chemical according to label directions and application plan relating to the control of the pest, weed or disease 4.4 Monitor application equipment for correct performance and ensure effective chemicals application according to operating instructions 4.5 Identify health and safety in the workplace hazards and risks and implement controls 4.6 Clean up spills during application according to chemical label instructions and workplace procedures
5. Clean up equipment and complete records	5.1 Clean and decontaminate application equipment according to operator instructions, safety data sheets (SDS) and legislative requirements 5.2 Dispose of chemicals and used containers according to chemical label instructions, SDS and legislative requirements 5.3 Clean and store PPE according to workplace procedures 5.4 Record and report safety and environmental incidents according to workplace procedures and regulatory requirements 5.5 Record details of chemical application according to workplace procedures and legislative requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Read and interpret SDS, chemical labels, operating instruction and other documentation and consolidates information to determine chemical application actions and activity
Writing	• Accurately record and complete organisational records using clear language and terminology
Numeracy	• Perform mathematical calculations to determine rates of application chemical mixtures and calibration of equipment

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Navigate the world of work	• Take responsibility for following policies, procedures and regulations • Identify and implement chemical label requirements
Get the work done	• Take responsibility for planning, sequencing and prioritising tasks required for chemical application activities

Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated the ability to safely prepare and apply chemicals ensuring they have:

- determined and confirmed the need for chemical application by assessing the infestation, off target risk, and environmental risks
- developed an application plan for chemical application
- identified health and safety hazards, risk and implemented control procedures according to chemical label
- notified stakeholders of planned chemical application
- used personal protective equipment (PPE) according to workplace procedures
- interpreted chemical labels and applied chemical according to safety data sheets (SDS) and application plan
- identified and selected the chemical required for the target and calculated the amount and rates required according to chemical label
- identified and selected application equipment and suitable location, and determined the set up parameters according to application plan and operator instructions
- monitored and assessed weather conditions and equipment performance to ensure effective chemical application
- selected, conducted pre-operational checks according to operator and maintenance manual
- completed at least one calibration activity for application equipment
- prepared and loaded chemicals and returned unused chemicals to store in accordance with label, application plan and workplace procedures
- applied chemicals safely according to chemical labels, regulations and workplace procedures
- complied with chemical labels, SDS, regulations, maintenance manual, environmental procedures, operator instructions and application plan
- cleaned equipment and spills, and disposed of waste according to workplace and environmental procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- maintained records and reported incidents according to workplace procedures and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- control options when selecting chemicals for pests, diseases and weeds infestations, including:
  - chemical
  - mechanical
  - cultural
  - biological
  - integrated pest management including resistance management principles
- types of pest, diseases and weed their treatment and resistance
- legal implications and requirements of chemical labels and SDS
- stakeholders and required notifications including, neighbours, staff and statutory notifications
- impact of weather factors on the safe and effective application of chemicals
- characteristics of chemicals, their mode of action and relevance to chemical selection and use, including:
  - translocated/systemic
  - contact
  - ingested poison
  - protectant
  - eradicant
  - knock-down
  - residual
  - selective/non selective
- factors that contribute to off target damage, including:
  - physical movement of chemicals (e.g. animals moving baits or soil movement)
  - chemical formulation
  - wind speed and direction
  - temperature and relative humidity
  - temperature inversions
  - controlling off target damage
  - rainfall
  - buffer zones and barriers
- hazards of chemical application, including:
  - human and animal health
  - environmental contamination

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - residues in environment, plants and animals
  - withholding/re-entry periods
- safety requirements when applying chemicals, including:
  - procedures
  - PPE
  - signage
- safe handling, transporting and storage of chemicals
- preparing chemicals including preparation, compatibility, adjuvants and water quality
- requirements for disposal of excess chemicals, clearing spillages and equipment clean up
- selecting and operating suitable application equipment
- features, functions and calibration techniques for powered and hand held application equipment, including:
  - pressure and volume of chemical
  - travel speed
  - nozzle identification, selection, operation
- legislation, regulations and licensing requirements in relation to chemical use.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - chemicals
  - PPE
  - application equipment
  - chemical measuring and mixing equipment
- specifications:
  - specific workplace documents, including work instructions and procedures for chemical application
  - chemical labels and SDS
  - regulations about use of chemicals
  - manufacturers' operation and maintenance instructions for equipment
  - access to weather forecasts or means to measure local weather.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCIRG215 Assist with low volume irrigation operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to assist with installing, operating and maintaining low volume irrigation systems. These systems use emitters such as drippers and generally use poly pipe.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work	1.1 Confirm work instructions with supervisor 1.2 Select appropriate materials, tools, equipment and machinery 1.3 Select personal protective equipment and clothing and ensure correct fit

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Element	Performance criteria
	1.4 Identify manual handling and other workplace health and safety hazards 1.5 Identify the site for installation of the irrigation system
2. Install irrigation components	2.1 Prepare the site for installation works 2.2 Assemble and connect system components and test joints 2.3 Connect system to water supply 2.4 Flush and commission system 2.5 Identify and report operating and take corrective actions as directed 2.6 Maintain a clean and safe work area
3. Complete installation work	3.1 Remove waste material from the site and dispose of 3.2 Clean, maintain and store tools, equipment and machinery 3.3 Flush and commission system
4. Carry out start up and shutdown procedures as directed	4.1 Follow start-up sequence 4.2 Shut down system components in sequence 4.3 Drain system 4.4 Record irrigation activity
5. Assist with system maintenance	5.1 Check emitters for serviceability and output 5.2 Maintain delivery components 5.3 Check water supply and pumping system periodically, where required 5.4 Keep maintenance records up to date

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCIRG215 Assist with low volume irrigation operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assemble and join irrigation system components
- carry out basic maintenance tasks
- carry out low volume irrigation operating tasks
- complete installation work
- fix identified faults
- follow directions to operate pumps, filters and valves
- install irrigation components
- look for leaks and faulty emitters
- prepare materials, tools and equipment
- recognise and report faults
- undertake site preparation tasks as directed

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practice of low volume irrigation operation
- characteristics and operation of joints, valves and emitter components
- components in low volume irrigation systems
- emitter spacing, coverage and pressure
- indicators of over and under watering
- installation techniques and procedures
- irrigation controllers
- irrigation pipes, types and sizes

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- irrigation times to deliver sufficient volume without over watering
- methods and techniques of low volume irrigation installation
- operation of low volume irrigation system
- set out procedures
- system malfunctions and their likely causes
- use of recycled water and colour coding of pipes
- water requirements of relevant plants

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG217 Assist with pressurised irrigation operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to assist installing, operating and maintaining pressurised irrigation systems. These systems use sprinklers and generally use glued PVC pipe.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work	1.1 Confirm work instructions with supervisor 1.2 Select appropriate materials, tools, equipment and machinery 1.3 Select personal protective equipment and clothing and ensure correct fit

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Element	Performance criteria
	1.4 Identify manual handling and other work health and safety hazards 1.5 Identify the site for installation of the irrigation system
2. Install irrigation components	2.1 Prepare the site for installation works 2.2 Lay irrigation components out 2.3 Dig or tidy trenches where required 2.4 Add or insert system components 2.5 Position and secure lines 2.6 Assist with fitting pumps and valves
3. Complete installation activities	3.1 Check the irrigation system for leaks or blockages 3.2 Identify and report problems and anomalies 3.3 Clean and store equipment, tools and materials 3.4 Collect waste and dispose of or recycle 3.5 Record workplace information in the appropriate format
4. Carry out start up and shutdown procedures as directed	4.1 Follow start-up sequence 4.2 Shut down system components in sequence 4.3 Drain system 4.4 Record irrigation activity
5. Assist with system maintenance	5.1 Check sprinklers for serviceability and output 5.2 Maintain delivery components 5.3 Check water supply and pumping system periodically, where required 5.4 Keep maintenance records up to date

AHCIRG328 Operate irrigation controller and sensor technology

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to operate irrigation controller and sensor technology as part of irrigation installation, construction and operation.

The unit applies to individuals who operate irrigation controller and sensor technology under broad direction and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare for work	1.1 Confirm activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks 1.2 Select required tools and equipment, and check for safe operation and accuracy 1.3 Select, fit and use personal protective equipment applicable to the task

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
2. Operate irrigation controllers	2.1 Link valves to controllers by wiring or radio signals 2.2 Program controllers according to operating procedures 2.3 Operate controller according to site requirements 2.4 Troubleshoot controller and rectify cause of faults
3. Operate irrigation sensors	3.1 Link sensors to controllers by wiring or radio signals 3.2 Program controllers to monitor sensor 3.3 Operate and monitor accuracy and reliability of sensor control equipment, and adjust where necessary 3.4 Collect samples according to sampling techniques 3.5 Record and interpret readings and observations 3.6 Troubleshoot sensors and rectify cause of faults 3.7 Report discrepancies or malfunctions to management

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	• Complete records of readings and observations legibly and accurately using correct technical terminology
Oral communication	• Use clear language to report discrepancies or malfunctions
Numeracy	• Interpret the measurements of sample results • Make calculations to check the accuracy of program irrigation controllers and adjust electronic flow equipment
Navigate the world of work	• Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and *regional contexts) are included.*

Controllers must include at least 3 of the following:	• stand-alone • Bluetooth • wifi • remote radio controllers • multi-site central controllers.
Sensors must include at least 4 of the following:	• water meters • soil moisture and temperature sensors • air temperature sensors • weather stations • pump pressure sensors • rainfall sensors.

Assessment Requirements for AHCIRG328 Operate irrigation controller and sensor technology

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated irrigation controller and sensor technology on at least two occasions, and has:

- applied workplace health and safety requirements
- selected tools and equipment appropriate to the scope of works
- maintained and checked irrigation controller and sensor equipment for accuracy
- operated irrigation controllers and sensors
- checked the accuracy of controller and sensor equipment, and adjusted
- recorded the results of sampling and testing
- recorded observations and data.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for operating irrigation controller and sensor technology, including working with extra low voltage wiring according to Australian Standards
- basic electrical testing procedures and safety practices
- irrigation controller and sensor operating and testing procedures
- environmental procedures for use, storage and recycling of electronic equipment and batteries
- data recording procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - irrigation controller and sensor installation and operating equipment
  - irrigation controllers and sensors
  - personal protective equipment applicable to installing and operating irrigation controller and sensor technology
- specifications:
  - work instructions and workplace procedures applicable to operating irrigation controller and sensor technology
  - workplace requirements applicable to health and safety in the workplace for operating irrigation controller and sensor technology
  - Australian Standards applicable to working with extra low voltage wiring
  - irrigation controller and sensor operating and testing procedures
  - data recording procedures
  - environmental procedures for use, storage and recycling of electronic equipment and batteries
- relationships:
  - supervisor
- timeframes:
  - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCIRG343 Operate irrigation injection equipment

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to prepare, start up, operate and shut down irrigation injection equipment, monitor impacts of injection process and record information of irrigation injection equipment operation.

The unit applies to individuals who operate irrigation injection equipment under broad direction and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare equipment for injection operation	1.1 Confirm activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks 1.2 Select required tools and equipment and check for safe operation 1.3 Select, fit and use suitable personal protective equipment applicable to the task

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Select materials and services and confirm they are available and ready for operation 1.5 Prepare equipment and materials to meet injection requirements
2. Operate injection equipment process	2.1 Start up injection process according to operation and maintenance manual 2.2 Monitor control points to confirm performance is maintained within specification 2.3 Identify, rectify and report out-of-specification equipment performance 2.4 Deliver injection requirements 2.5 Put emergency procedures in place for spillage or chemical accidents
3. Shut down injection equipment	3.1 Carry out shut down on injection equipment according to operation and maintenance procedure 3.2 Clean injection equipment according to maintenance procedure 3.3 Collect, treat, dispose or recycle waste generated by both the process and cleaning procedures
4. Monitor plant response and environmental impacts of injection	4.1 Monitor plant response to injection 4.2 Record and report environmental hazards of injection process 4.3 Maintain withholding periods for chemical application on food crops 4.4 Restrict access to areas where chemicals have been applied through injection if required
5. Record information	5.1 Record workplace information in the appropriate format 5.2 Record chemical application and storage details according to recording procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Reading	• Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	• Document environmental hazards of injection process
Oral communication	• Use clear language to report out-of-specification equipment performance
Numeracy skills	• Calculate chemical dilution rates
Navigate the world of work	• Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Assessment Requirements for AHCIRG343 Operate irrigation injection equipment

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has operated irrigation injection equipment on at least two occasions and has:

- applied workplace health and safety requirements
- selected tools and equipment appropriate to the scope of works
- selected and prepared injection materials
- completed relevant calculations such as dilution rates
- identified injection requirements
- implemented routine maintenance and minor repairs of the system
- reported and recorded corrective action
- taken corrective action in response to out-of-specification results or non-compliance
- handled hazardous chemicals safely
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- implemented routine system cleaning requirements
- monitored usage and dilution rates.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for operating irrigation injection equipment, including backflow prevention
- purpose and operation of equipment and instrumentation components
- chemicals, cleaning agents and fertilisers used for injection and their purpose
- safety data sheet (SDS) information for substances to be injected
- services required
- irrigation injection equipment operation and maintenance manual

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- basic irrigation injection equipment operating principles and process control systems where relevant
- procedures for prevention of backflow
- process specifications, procedures and operating parameters
- control points and significance and methods of monitoring
- common causes of variation and corrective action required
- correct chemical handling techniques
- environmental issues and controls
- shutdown sequence
- lock-out and tag-out procedures
- irrigation injection equipment cleaning requirements and procedures
- recording requirements and procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - irrigation injection equipment operation and maintenance manual
  - irrigation injection equipment
  - injection chemicals, cleaning agents and fertilisers
  - personal protective equipment applicable to operating irrigation injection equipment
- specifications:
  - work instructions and workplace procedures applicable to operating irrigation injection equipment workplace requirements applicable to health and safety in the workplace and operating irrigation injection equipment
  - irrigation injection tools and equipment and procedures
  - SDS for substances being injected
  - recording procedures
  - environmental procedures for collection, treatment, disposal or recycling of waste
- relationships:
  - supervisor
- timeframes:
  - according to job requirements.

Assessors of this unit must satisfy the requirements of assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCIRG344 Implement an irrigation schedule

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to interpret an irrigation schedule, determine irrigation shifts, implement and monitor an irrigation schedule, and record irrigation information and activities.

The unit applies to individuals who implement an irrigation schedule under broad direction and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Interpret the irrigation schedule	1.1 Confirm activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks 1.2 Select required tools and equipment and check for safe operation 1.3 Select, fit and use personal protective equipment applicable to the task

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.4 Access information on plant growing requirements 1.5 Interpret growing season moisture requirements 1.6 Read the predicted seasonal moisture deficit and watering requirements and check with management 1.7 Record parameters for the irrigation system
2. Determine irrigation shifts	2.1 Subdivide irrigated area into units capable of individual irrigation and note area and irrigation equipment characteristics for each 2.2 Define soil irrigation capability for each unit 2.3 Define crop and plant water requirement for each unit 2.4 Combine units requiring similar irrigation into irrigation shifts 2.5 Ensure irrigation shifts do not exceed water delivery capacity of the property irrigation infrastructure 2.6 Determine the water volume required to meet irrigation needs over specified period
3. Implement irrigation schedule	3.1 Coordinate resources and brief personnel to deliver requirements 3.2 Implement watering program
4. Monitor irrigation	4.1 Inspect plants and crops for growth rate and signs of stress 4.2 Record frequency of irrigation 4.3 Measure and record water usage and confirm water allocation is not exceeded for a given period 4.4 Calculate the difference between estimated and actual water use 4.5 Measure water quality 4.6 Assess plant and crop growth and water use efficiency 4.7 Measure soil for readily available water (RAW) 4.8 Record climate and weather conditions 4.9 Adjust watering program in response to rainfall events and changes to evapotranspiration rates
5. Record irrigation information and activities	5.1 Record plant or crop environment data according to workplace recording procedures 5.2 Record water usage 5.3 Record irrigation shifts

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	5.4 Record system process data

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Oral communication	• Initiate discussions with personnel using clear language to communicate irrigation schedule delivery requirements
Navigate the world of work	• Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility
Interact with others	• Use appropriate language and communication skills to disseminate information about irrigation schedule delivery requirements

Assessment Requirements for AHCIRG344 Implement an irrigation schedule

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has implemented an irrigation schedule on at least one occasion and has:

- applied workplace health and safety requirements
- selected tools and equipment appropriate to the scope of works
- accessed and interpreted the information in an irrigation schedule
- compared plant health and growth to benchmark requirements
- consulted with appropriate senior personnel or consultants
- instructed irrigation system operators
- implemented the irrigation schedule including consideration of:
  - application rates
  - interaction between different irrigation employees or shifts
  - maintenance programs and supplies
  - materials, chemicals, services
  - resources, including operators with appropriate skills
  - timing and length
- liaised with other work areas
- identified irrigation requirements throughout the growing season by monitoring:
  - climatic conditions
  - crop stage and requirements if applicable
  - effective root depth
  - frost risk
  - plant varietal characteristics and requirements
  - signs of plant nutrient deficiencies
  - soil moisture levels
  - soil type and depth
  - symptoms of water stress

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - water quality
  - water table level
- monitored irrigation activities, including:
  - environmental impact of irrigation activities
  - identified emitter output consistency
  - identified soil moisture content and depth to which water will reach
  - reported and recorded problems and corrective action taken
  - taken corrective action in response to out-of-specification results or non- compliance
- applied sampling techniques
- conducted soil moisture tests
- identified, rectified and reported environmental non-compliance.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for implementing an irrigation schedule
- resource requirements and availability
- irrigation strategies
- principles of soil moisture monitoring, including:
  - volumetric soil moisture content
  - percentage compared to soil moisture tension
- consultation requirements and procedures
- effect of irrigation techniques on plant growth
- visual symptoms of plant nutrient deficiencies, water stress and frost
- recording requirements and procedures
- sampling techniques and procedures
- testing techniques and procedures
- interpretation of routine soil moisture tests
- environmental impacts, hazards and controls for irrigation
- water budgeting tools.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:

AHCIRG345 Install pressurised irrigation systems

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to organise resources, set out and prepare an irrigation installation site and install, commission and complete pressurised irrigation system installation.

The unit applies to individuals who install pressurised irrigation systems under broad direction and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Organise resources for installation work	1.1 Confirm activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks 1.2 Select required materials, tools, equipment and machinery and check for safe operation 1.3 Check that parts and equipment match system drawings and

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	specifications 1.4 Select, fit, use and maintain safety and personal protective equipment applicable to the task 1.5 Carry out pre-operational checks on tools, equipment and machinery 1.6 Identify environmental considerations of irrigation installation activities 1.7 Check water supply to ensure that it is compatible with system specifications
2. Set out and prepare site	2.1 Measure and mark out irrigation lines 2.2 Confirm trenches are at the specified depth without damage to services, facilities, features and established plants 2.3 Observe regulations relevant to the situation 2.4 Use work practices that reflect sustainable horticulture principles and environmental requirements
3. Install irrigation components	3.1 Interpret the irrigation system plan and, where applicable, supervise contractors and monitor work to ensure it conforms to the plan 3.2 Assemble and connect components and complete and test joints 3.3 Fit and adjust fittings and valves and secure all joints 3.4 Maintain a clean and safe work area while installation work is carried out
4. Commission irrigation system	4.1 Calibrate testing and monitoring equipment 4.2 Confirm start-up sequence according to operations manual 4.3 Flush system as required 4.4 Identify operating faults and take corrective where required 4.5 Record work outcomes and report to supervisor
5. Complete installation work	5.1 Finish off earthworks to specifications 5.2 Confirm system configuration and capacity matches installation plan 5.3 Restore site and clear materials and equipment from the site on completion of maintenance works

Assessment Requirements for AHCIRG345 Install pressurised irrigation systems

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has installed pressurised irrigation systems on at least one occasion and has:

- applied workplace health and safety requirements
- selected materials, tools, equipment and machinery appropriate to the scope of works
- organised resources for installation work
- set out and prepared the site
- completed installation work
- calibrated testing and monitoring equipment
- commissioned irrigation system.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for installing pressurised irrigation systems
- water quality and water filtration techniques
- the behaviour of water on varying terrain and soil types
- soil characteristics
- soil water retention testing techniques
- calculations for installing pressurised irrigation systems
- characteristics and operation of joints, valves and sprinkler components
- components of a pressurised irrigation system
- methods and techniques of installing pressurised irrigation
- operation of pumps and water flow rates.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - pressurised irrigation system operation and maintenance manual
  - pressurised irrigation system installation equipment
  - personal protective equipment applicable to installing pressurised irrigation systems
- specifications:
  - work instructions and workplace procedures applicable to installing pressurised irrigation systems workplace requirements applicable to health and safety in the workplace and installing pressurised irrigation systems
  - pressurised irrigation system installation tools and equipment and procedures
  - recording procedures
- relationships:
  - supervisor
- timeframes:
  - according to job requirements.

Assessors of this unit must satisfy the requirements of assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCIRG347 Maintain pressurised irrigation systems

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to interpret a maintenance program, inspect and maintain pressurised irrigation systems, and record and report maintenance activities.

The unit applies to individuals who maintain pressurised irrigation systems under broad direction and take responsibility for their own.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Interpret a pressurised irrigation maintenance program	1.1 Determine the scope of maintenance 1.2 Determine the frequency of maintenance works 1.3 Establish irrigation maintenance standards 1.4 Plan and prepare maintenance works 1.5 Identify potential hazards and risks and implement safe working

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	practices to manage risks 1.6 Minimise environmental impacts of irrigation maintenance activities 1.7 Select, fit and use personal protective equipment applicable to the task
2. Inspect an irrigation system	2.1 Create an inspection checklist and inspect the system regularly 2.2 Identify remedial action required and undertake repairs to restore system to full effectiveness 2.3 Undertake servicing of irrigation mechanical equipment according to operation and maintenance manual 2.4 Assess the results of maintenance works and record to ensure repairs or maintenance standards have been achieved
3. Carry out periodic system maintenance	3.1 Record damage and blockages with contaminants by damage type, location and the section of the system affected 3.2 Record and report damaged or faulty components and computer control systems and take action to effect repairs 3.3 Implement end of season maintenance procedures 3.4 Implement routine and preventative maintenance procedures
4. Complete and record maintenance activities	4.1 Restore site and clear materials and equipment from the site on completion of maintenance works 4.2 Complete maintenance and servicing records according to workplace recording procedures 4.3 Record parts removed or replaced 4.4 Record and report faults and breakages

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Assessment Requirements for AHCIRG347 Maintain pressurised irrigation systems

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has maintained a pressurised irrigation system on at least two occasions and has:

- interpreted and applied maintenance procedures
- applied workplace health and safety requirements
- identified adverse environmental impacts of irrigation activities and taken appropriate remedial action
- checked connections and controllers
- checked sprinkler/emitter output and function
- ensured proper operation of automatic flush valves
- removed, serviced and replaced valves and filters
- confirmed operational pressures
- tested irrigation equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for maintaining pressurised irrigation systems
- pressurised irrigation equipment operation and maintenance manual
- characteristics, operation and common operation and maintenance problems of pressurised irrigation system components, including:
  - pipes,
  - joints,
  - valves,
  - emitters, and
  - pumps.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - pressurised irrigation system operation and maintenance manual
  - personal protective equipment applicable to maintaining pressurised irrigation systems
- specifications:
  - work instructions and workplace procedures applicable to maintaining pressurised irrigation systems
  - pressurised irrigation system tools, equipment and procedures
  - workplace requirements applicable to health and safety in the workplace and maintaining pressurised irrigation systems
  - recording procedures
- relationships:
  - supervisor
- timeframes:
  - according to job requirements.

Assessors of this unit must satisfy the requirements of assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM202 Operate tractors

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare for, operate and complete tractor operations under general supervision in the agriculture, horticulture and land management sectors.

Working with tractors is an inherently dangerous activity. Individuals who work at this level must be thoroughly instructed in all health and safety in the workplace aspects of operating tractors. The tractor must also comply with relevant Australian standards for tractors.

The unit applies to individuals who operate tractors to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare tractor for operation	1.1 Confirm with supervisor activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks 1.2 Source and interpret machinery operation and maintenance manual and manufacturer instructions for tractor operation 1.3 Select and maintain personal protective equipment and safety equipment according to workplace safety requirements 1.4 Fit and use personal protective equipment according to job requirements and task to be undertaken 1.5 Select and attach equipment as directed by supervisor 1.6 Conduct tractor routine pre-operational checks according to operation and maintenance manual and report faults or malfunctions to supervisor
2. Operate tractor	2.1 Carry out pre-start and start up procedures required for tractor operation 2.2 Drive and operate tractor in a smooth and controlled manner 2.3 Apply workplace environmental and biosecurity procedures associated with tractor operation and minimise impact 2.4 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment 2.5 Complete work according to agreed plan as directed by supervisor 2.6 Report abnormal monitoring system indicators and alarms to supervisor
3. Complete tractor operation	3.1 Park tractor and conduct shut down procedures 3.2 Perform routine operational servicing according to the operation and maintenance manual 3.3 Report malfunctions, faults, irregular performance or damage to supervisor 3.4 Clean, decontaminate, secure and store tractor and attached equipment 3.5 Remove and store keys in the required location 3.6 Maintain tractor and equipment use records in required format

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	• Document tractor and equipment use
Oral communication	• Use clear language to report malfunctions, faults, irregular performance or damage • Participate in verbal exchanges to respond to questions and clarify instructions
Numeracy	• Calculate quantities of vehicle fluids including fuel • Identify correct tyre pressure or track tension
Navigate the world of work	• Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:	• maintenance interval schedule daily check • machine damage and serviceability • guards are in place and undamaged • checking for missing parts • fluid leaks and levels • fuel level • brakes and clutch operation • condition of tyres or tracks • machine controls.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared for, safely operated and completed tractor operations under general supervision at least once and has:

- identified and reported hazards and implemented safe operating procedures
- carried out tractor pre-operational checks and reported faults to supervisor
- driven and operated a tractor safely, in a smooth and controlled manner
- operated tractors in even and uneven terrain conditions
- carried out tractor shut down procedures
- maintained tractor use records and reported faults or malfunctions
- minimised environmental impacts associated with tractor operation
- followed workplace health and safety procedures for safe tractor operation
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- tractor components, controls and features and operational functions
- tractor operation and maintenance manuals
- tractor steering systems and features
- features, operational functions and procedures for attached equipment
- load limits and the principles of weight distribution with regard to load shifting and tractor movement
- distinguishing characteristics of individual tractors including rated performance capacities

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- effects of various surface and difficult terrain conditions on tractor operation
- duty of care to self, others and the environment
- relevant legislation with regard to tractor operation and licensing requirements
- environmental impacts relevant to operation of vehicles
- health and safety in the workplace requirements to operate a tractor safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
  - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
  - tractors
  - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
  - tractor operation and maintenance manual
  - industry and workplace biosecurity procedures applicable to tractor operation
  - legislation relevant to tractor operation and licensing requirements
- timeframes:
  - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM213 Operate and maintain chainsaws

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to safely operate a hand-held chainsaw and maintain it in working condition.

This unit applies to cross-cutting fallen timber using safe cutting techniques.

The unit applies to individuals who apply low risk work procedures and comply with worksite health and safety requirements when operating hand-held chainsaws to carry out routine work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assist in preparation of work-site	1.1 Identify location of worksite and fallen timber from scope of works and confirm with supervisor 1.2 Identify site hazards, assess risks and report to supervisor

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Confirm first aid and emergency personnel, equipment and procedures 1.4 Document and implement site health and safety in the workplace, environmental and traffic control measures according to workplace procedures
2. Recognise and apply workplace safety procedures	2.1 Identify hazards and risks relevant to the maintenance and operation of chainsaws and implement safe working practices to manage risks 2.2 Select, fit and use personal protective equipment according to workplace safety procedures 2.3 Confirm with supervisor relevant licensing and legislative requirements with regard to the operation of chainsaws 2.4 Transport chainsaw safely according to operation and maintenance manual
3. Check and prepare chainsaw for use	3.1 Select tools and materials required for maintenance 3.2 Conduct routine checks and maintenance prior to operation, according to chainsaw operation and maintenance manual 3.3 Calculate required fuel oil ratios prior to mixing 3.4 Mix fuel and fuel chainsaw according to operation and maintenance manual 3.5 Identify, tag, record and report chainsaw faults or malfunctions to supervisor
4. Operate chainsaw	4.1 Communicate with work team during operations using voice, hand or whistle signals 4.2 Place supports to ensure a stable base for cutting 4.3 Identify materials to be cut and position them for operation 4.4 Visually assess material to be cut for defects and embedded hazards 4.5 Determine cutting methods appropriate to material type and implement risk controls 4.6 Select and use tools associated with chainsaw use 4.7 Operate chainsaw to cross-cut timber using documented low risk work methods 4.8 Identify and report work-site communication issues to supervisor

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.9 Identify and report environmental impacts of chainsaw operation to supervisor
5. Complete and check chainsaw operation	5.1 Record and report chainsaw damage, malfunction and irregular performance according to workplace procedures 5.2 Clean and store chainsaw according to workplace procedures and operation and maintenance manual 5.3 Dispose of debris from operation in accordance with environmental requirements 5.4 Maintain workplace documentation according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	• Document site health and safety in the workplace, environmental and traffic control measures
Oral communication	• Use clear language to report hazards and risks and to confirm work site, first aid and emergency personnel, equipment and procedures • Participate in verbal exchanges to respond to questions and clarify information
Numeracy	• Calculate fuel oil ratios and fuel quantities
Navigate the world of work	• Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility
Interact with others	• Use verbal and non-verbal communications with work team during operations using voice, hand and whistle signals

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Personal protective equipment must include:	• safety helmet • mesh visor • gloves • hearing protection • safety glasses or goggles • safety boots.
Routine checks and maintenance must include at least two of the following:	• checking and adjusting bar • cleaning air filter • cleaning and/or replacing spark plug • sharpening chain.
Supports must include at least one of the following:	• fallen timber • saw horse trestle • v-shaped supports.
Cutting methods must include:	• pulling chains cuts (bottom of bar) • pushing chainsaw cuts (top of bar) • bore / plunge cuts (tip of bar).
Tools must include:	• bars • chains • files • plug spanner.

Assessment Requirements for AHCMOM213 Operate and maintain chainsaws

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a hand-held chainsaw at least once, maintained it in working condition and demonstrated the following:

- determined site location for work and work details and clarified with supervisor
- identified site hazards, assessed risks and reported to supervisor
- confirmed work zone with work crew and monitored site
- confirmed first aid and emergency personnel, equipment and procedures
- applied hazard and risk assessment and implemented controls for chainsaw use
- performed routine checks and maintenance for chainsaw usage according to operation and maintenance manual
- identified, tagged and reported chainsaw faults and malfunctions
- recorded and implemented site health and safety in the workplace, environmental and traffic control measures
- used personal protective equipment that complies with Australian Standards
- safely cross-cut fallen timber using compression and tension cuts with a hand held chainsaw
- used appropriate tools and materials to maintain chainsaw
- applied environmentally responsible workplace practices
- applied low risk work practices including stopping, disengaging quickly and dealing with foreign matter
- cleaned and stored chainsaw
- followed workplace procedures relevant to safely operating a chainsaw.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the principles and practice for operating chainsaws
- chainsaw routine checks and maintenance according to operation and maintenance manual, including:
  - checking and adjusting bar
  - cleaning air filter
  - cleaning and replacing spark plug
  - sharpening chain
- workplace safe operating procedures
- hazards and risks when operating a chainsaw
- relevant Australian Standards concerning chainsaw operation including use of personal protective equipment
- components of chainsaws and their respective functions
- common defects in woody materials
- cutting methods and techniques, patterns and sequence of cuts
- health and safety in the workplace requirements for the operation of a chainsaw including caution and hazard signs and symbols
- environmental impacts associated with operating chainsaws.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
  - personal protective equipment must be worn whilst operating chainsaw
  - individual must not be under the influence of alcohol or drugs
  - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
- resources, equipment and materials:
  - chainsaws
  - chainsaw tools
  - wood
  - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
  - chainsaw manufacturer specifications and operator manuals
- timeframes:
  - according to the job requirements.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPCM301 Implement a plant nutrition program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor and control the nutritional requirements of and applications to plants across a range of situations and environments.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for implementation of the plant nutrition program	1.1 Identify goals, target site, soils, plant species and varieties for implementing the program 1.2 Identify materials for soil and plant treatments and locate the storage site or supplier details

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Element	Performance criteria
	1.3 Locate services using site plans and in consultation with the supervisor 1.4 Identify work health and safety hazard, assess risks and implement control measures 1.5 Select and use suitable personal protective equipment (PPE)
2. Monitor soil pH	2.1 Monitor soil pH in the implementation site in relation to plant nutrition 2.2 Identify, select, compare and source products useful in changing soil pH 2.3 Assess product application methods according to product type and type of growing media
3. Determine nutritional problems in plants	3.1 Identify common nutrient deficiency and toxicity problems in plants, using visual inspection 3.2 Consult supervisor or horticulturist, as required, to determine causes of nutritional or toxicity problems 3.3 Identify, compare, select and source soil ameliorants to improve soil fertility
4. Prepare to use fertilisers	4.1 Select a fertiliser that is compatible with plant species and type of growing media 4.2 Assess fertiliser application methods, taking into account the fertiliser type, soils and the environmental implications 4.3 Apply fertilisers appropriate to the plant growing cycle and the organisation’s fertiliser calendar
5. Prepare application equipment	5.1 Select tools, equipment and machinery 5.2 Carry out pre-operational and safety checks on tools, equipment and machinery 5.3 Calibrate tools, equipment and machinery
6. Apply specific products at appropriate rates	6.1 Select specific products based on their analysis to meet plant needs 6.2 Calculate product application rates to optimise plant benefit and minimise environmental impact 6.3 Apply specific products at the correct rate, timing and method according to the product type and analysis and with consideration of the environmental implications 6.4 Record product applications 6.5 Monitor, document and report target plant response to the plant nutrition program, as well as non-target effects responses including environmental impacts or pests

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Requirements for AHCPCM301 Implement a plant nutrition program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify goals, target site, soils and plants for implementing the program
- identify materials and their supply source
- monitor soil pH in the implementation site
- identify appropriate products and application methods appropriate to implementing nutrition program
- estimate treatment and product requirements, material sizes and quantities
- conduct a site hazard identification and risk control assessment
- determine nutritional problems in plants
- plant nutrition program specifications
- apply specific products at appropriate rates and record their application
- select, check and calibrate tools, equipment and machinery

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant nutrition
  - botany and plant physiology
  - methods of nutrient uptake by plants
  - nutrient cycling and its practical relevance to the specific plants and soils
  - nutrients required by plants grown within the enterprise
  - soil ameliorants commonly required to treat the soil problems experienced by the enterprise
  - the effects of nutrient deficiency and toxicity on plant species and varieties

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- the environmental implications of soil ameliorant and fertiliser use
- the main simple and compound fertiliser products available to the enterprise including analysis, solubility, salt index, application rates and costs
- the relationship between soil characteristics and the availability of nutrients

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPHT201 Plant horticultural crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plant horticultural crops in the annual, vegetable and flower growing industries.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for crop planting operations	1.1 Follow instructions about planting the crop 1.2 Prepare machinery, equipment and tools for crop planting 1.3 Recognise workplace hazards and report safety concerns 1.4 Use and maintained personal protective equipment (PPE)

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Element	Performance criteria
2. Prepare the site and plant material for planting	2.1 Prepare soil or growing media 2.2 Implement crop protection 2.3 Apply pre-planting treatments 2.4 Store planting material where required 2.5 Operate machinery, equipment and tools for soil preparation
3. Carry out planting operations	3.1 Select planting material 3.2 Store, handle and transport planting materials to the site 3.3 Carry out planting 3.4 Water plants in and apply post-planting treatments

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPHT201A Plant horticultural crops.

Assessment Requirements for AHCPHT201 Plant horticultural crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply agricultural chemicals under supervision
- apply enterprise quality standards
- estimate spacing and planting patterns
- follow safety procedures
- identify workplace hazards
- measure quantities of plant materials and treatments
- operate machinery to manufacturers specifications and low risk operating procedures
- select planting material
- use and maintain planting equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for planting horticultural crops
  - basic plant physiology
  - basic preparation of soil and growing media
  - environmental impacts and risks of planting horticultural crops
  - growing requirements of plants
  - importance of correct timing and procedures for crop planting
  - importance of field hygiene and quality control in regard to crop planting
  - nutritional, water and other requirements of the crop
  - principles of pest, weed and disease control
  - pre-planting soil and plant treatments and their importance

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- soil structure and health

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPHT401 Assess olive oil for style and quality

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assess olive oil for style and quality.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish and implement appropriate tasting protocols	1.1 Establish appropriate tasting conditions 1.2 Apply accepted industry tasting procedures 1.3 Taste oils in the order that will best show the character of each oil

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Element	Performance criteria
2. Determine style and sensory quality of the olive oil	2.1 Identify and assess characteristics of the olive oil 2.2 Taste oil to assess 2.3 Smell and taste oil to assess sensory quality 2.4 Analyse and record observed defects for future action
3. Determine the analytical quality of the olive oil	3.1 Send oil samples to laboratory to test key chemical indices 3.2 Interpret key chemical indices to assess analytical quality of oil 3.3 Record for future action observed chemical indices that are beyond the normal range
4. Identify factors influencing the style and quality of the olive oil	4.1 Identify horticultural factors that may influence style and quality of the olive oil 4.2 Identify processing factors that may influence style and quality of the olive oil 4.3 Identify other factors that may influence style and quality of the olive oil
5. Implement findings of tastings and chemical analyses	5.1 Maintain records of season's tastings and chemical analyses 5.2 Evaluate horticultural and processing activities and methods in terms of modifications and improvements to be made 5.3 Adjust and document horticultural production plan for next season 5.4 Document and communicate processing requirements for next season to processing personnel

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPHT401A Assess olive oil for style and quality.

Assessment Requirements for AHCPHT401 Assess olive oil for style and quality

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify olive oil styles
- identify common olive oil defects
- modify horticultural and/or processing practices to remedy variations from desired style and quality

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for assessing olive oil
  - cause of olive oil defects and how they can be remedied
  - horticultural and processing practices that affect olive oil style, and reasons for the effect
  - relationship between critical chemical parameters and oil style and quality

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCSOL202 Assist with soil or growing media sampling and testing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect soil and media samples
- perform basic descriptive tests for soil texture, salinity and pH
- describe soils or media using commonly used descriptive terms
- assist with the use of simple soil testing equipment for testing pH and salinity
- prepare records of soil sampling results as required

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for recognising soils or growing media properties
  - basic soil or media field tests
  - soil or media chemical properties
  - soil or media physical properties
  - soil or media plant relationships
  - soil sampling techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSOL401 Sample soils and interpret results

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to take a soil sample and interpret the test results.

This unit applies to individuals whose job role includes undertaking soil or growing media sampling and interpreting the results as a foundation for further horticultural operations such as nutrition programs and irrigation scheduling.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AHCSOL401 Sample soils and interpret results

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect soil and media samples using appropriate sampling methodology
- file and record analytic results for future use
- implement a nutrient and nutrition program
- prepare soil and media samples for dispatch to soil analysis laboratory
- receive and interpret analytic results

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of soils sampling
  - environmental implications associated with soil surveying activities and the application of analytical results
  - practical understanding of the range of sample collection, testing and analytical methods that may be used to perform soil surveys, and the association of surveying methods with site conditions, environmental implications and intended horticultural use of the surveyed site
  - soil ameliorants and soil improvement techniques for addressing site limitations identified through surveying
  - the capacity of soils to provide water to plants
  - the importance of organic matter in soil in relation to the intended horticultural use
  - the physical and chemical properties of soils in relation to their ability to support specified horticultural production

AHCWRK308 Handle bulk materials in storage area

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to safely receive, move and sample bulk materials in a storage area to minimise loss or damage according to industry standards and storage program.

The unit applies to individuals who work in a bulk storage environment under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources and to solve problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to work in bulk materials storage area	1.1 Confirm job requirements according to workplace procedures 1.2 Identify health and safety in the workplace hazards, assess risks and implement control measures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Select, fit, use and maintain suitable personal protective equipment 1.4 Select, check and maintain tools and equipment for bulk storage work 1.5 Identify environmental implications of undertaking work in the bulk materials storage area, assess likely outcomes and determine action required 1.6 Maintain biosecurity protocols 1.7 Identify and comply with legislative, regulatory and industry requirements
2. Sample bulk materials for testing	2.1 Take representative samples of bulk material for testing according to workplace procedures 2.2 Follow workplace safety procedures when taking samples 2.3 Prepare and label representative bulk material samples for dispatch according to workplace procedures 2.4 Dispatch samples according to workplace procedures
3. Move bulk materials into and out of storage	3.1 Identify bulk materials for handling and storage according to job requirements 3.2 Segregate bulk materials by volume, type, variety and quality characteristics according to workplace specifications 3.3 Check and take measures to minimise infestation and contamination of bulk materials during movement according to workplace procedures 3.4 Select storage type and handling equipment for each bulk material according to the material characteristics and properties 3.5 Implement suitable measures to minimise the effect of product properties on the flow of bulk materials 3.6 Operate, clean and store equipment used for bulk storage according to workplace practices and environmental guidelines 3.7 Update and store records according to workplace procedures
4. Repair and maintain storage facility	4.1 Identify equipment and facilities requiring repair or maintenance 4.2 Conduct maintenance and repairs according to workplace procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	4.3 Complete maintenance records according to workplace procedures 4.4 Clean and maintain work areas according to workplace and environmental guidelines 4.5 Report maintenance and repairs, damage, malfunctions or irregular performance for machinery, tools and equipment according to workplace procedures 4.6 Clean, maintain and store tools and equipment according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret workplace documentation to determine requirements
Writing	• Complete workplace documentation using appropriate terminology and in required format
Navigate the world of work	• Takes responsibility for identifying and following workplace procedures, legislative, regulatory and industry requirements
Interact with others	• Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts
Get the work done	• Takes responsibility for planning, sequencing and prioritising workload • Makes routine decisions and implements procedures for tasks, using decision making processes

Assessment Requirements for AHCWRK308 Handle bulk materials in storage area

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they can handle bulk materials in storage, including:

- confirmed work instructions for tasks required and bulk materials to be handled according to workplace procedures
- identified work safety hazards and risks, selected and used appropriate personal protective equipment (PPE) and implemented control measures
- prepared and safely used equipment for bulk storage activities
- assessed work implications for the storage environment and determined actions and activity to address possible outcomes
- maintained records for bulk storage, handling and equipment maintenance according to procedures
- identified bulk materials legislative, regulatory and biosecurity implications and implemented appropriate protocols and procedures for compliance
- collected, prepared, labelled and despatched samples of bulk materials for testing according to workplace procedures
- selected appropriate storage type and equipment and moved bulk material in storage area according to required bulk material characteristics
- maintained quality and minimised infestations and contamination of the product
- cleaned, maintained, secured and stored machinery and equipment and related work facilities according to workplace procedures and maintenance requirements
- recognised, reported and rectified operational faults of storage facilities and equipment according to workplace procedures
- applied measures to ensure product flow was maintained.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of materials and their characteristics suitable for bulk storage
- sampling techniques, quality and classification
- common bulk material biological and product contamination and the problems they can cause for storage
- effect of product properties, including contaminants and desiccant dusts, on the flow of the product
- bulk storage legislative requirements, manufacturer's instructions and workplace procedures
- storage operations and configuration
- work place safety requirements for equipment and facilities in a bulk storage environment
- organisation and industry guidelines for segregation of bulk materials and related quality assurance principles
- bulk storage tools and equipment and their operation including:
  - pre-start checks
  - safety checks
  - maintenance requirements
- cleaning and storage of machinery and equipment
- environmental impact associated with bulk storage operations
- safety hazards, and risks associated with bulk storage
- safety risk controls associated with bulk storage, including PPE
- work place recording and reporting procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a bulk storage facility or an environment that accurately represents workplace conditions for the relevant industry sector
- resources, equipment and materials:
  - access to bulk materials
  - tools, equipment and machinery used to handle bulk materials
  - PPE
- specifications:
  - workplace procedures for bulk storage environment operations
  - operating instructions for required tools, equipment and machinery
  - safety data sheets for cleaning products
  - workplace job specifications or client briefs

AHCWRK309 Apply environmentally sustainable work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to apply environmentally sustainable work practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

Work routines meet organisational and compliance requirements for ethical handling and welfare of animals, environmental sustainability, work health and safety, and biosecurity appropriate to the work role.

No licencing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Element	Performance criteria
1. Identify current practices in relation to resource usage and sustainability	1.1 Identify current environmental regulations and associated procedures applying to the workplace 1.2 Identify environmental sustainability policy and procedures applicable to the workplace 1.3 Identify resource usage in the workplace using purchasing and other relevant data 1.4 Access information on impact of resource usage on environmental sustainability 1.5 Conduct a safety hazard analysis and risk assessment
2. Contribute to the review of workplace environmental sustainability practices	2.1 Collect information on environmental sustainability and resource efficiency systems relevant to the workplace 2.2 Review current practices and identify potential areas for improvement 2.3 Seek suggestions and ideas from stakeholders to improve the management of the environment and resource efficiency 2.4 Contribute to development of tools or resources to help make improvements in the workplace, using collected information 2.5 Communicate proposed improvements to management
3. Apply improvement strategies	3.1 Use appropriate techniques and tools to assist in achieving efficiencies and environmental targets 3.2 Apply life cycle management principles 3.3 Apply strategies to minimise waste and employ recycling, re-use or re-purposing where appropriate 3.4 Apply strategies to minimise environmental risks and impacts
4. Record and report on work practices	4.1 Use monitoring and evaluation tools and technology where available 4.2 Record incidents where sustainability policy and procedures have been breached 4.3 Record and report on progress against resource efficiency and environmental targets 4.4 Provide feedback to management on environmental sustainability review and improvement process 4.5 Promote organisational improvement strategies

1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify current procedures and practices related to environmental regulations
- identify current procedures and practices related to minimising impact of resource usage on environment
- make contributions to the review of environmental sustainability procedures and practices through research and development of tools or techniques
- use appropriate techniques and tools to assist in achieving resource efficiencies and environment targets
- use communication skills to:
  - convey proposed improvements
  - provide feedback on improvement processes
  - promote organisational improvement strategies
- apply life cycle management principles in strategies to improve resource usage, reduce waste, employ recycling, re-use, or re-purposing, and to minimise environmental risks and impacts
- use tools and technology to monitor effectiveness of improvement strategies, and incidents that breach sustainability policy and procedures
- record and report on progress against resource efficiency and environmental targets.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- basic environmental sustainability principles
- environmental legislation, regulations, standards, codes of practices as may be relevant to industry sector and workplace

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- relevant internal and external sources of information that can be used to identify sustainability improvements
- common environmental and energy efficiency issues within the industry
- environmental hazards and risks associated with the relevant industry sector
- organisation's sustainability work policies and procedures
- principles of resources efficiency and life cycle management
- practices for disposal or recycling of waste associated with relevant industry sector
- organisation's recording and reporting systems.

Assessment Conditions

Assessors must satisfy current standards for RTOs

AMPA2006 Apply animal welfare and handling requirements

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to identify animal welfare issues and comply with the necessary requirements when handing animals. The requirements include all workplace and regulatory requirements for humane handling.

This unit is applicable to all personnel responsible for handling livestock.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations, in particular legislative requirements related to animal welfare.

Pre-requisite Unit

Nil.

essential outcomes.	achievement of the element.
1. Identify and explain animal handling practices	1.1 Identify work instructions and work practices for the welfare and handling of animals 1.2 Identify the impact on the quality of meat of stressing and/or injuring animals 1.3 Identify defects in meat quality resulting from poor handling techniques of live animals
2. Identify and explain animal welfare requirements	2.1 Identify risks to animals being handled 2.2 Identify and explain workplace and regulatory requirements for handling animals humanely 2.3 Identify and explain relevant sections of the applicable Animal Welfare Standard and relevant legislation
3. Identify and explain workplace health and safety requirements for handling animals safely	3.1 Identify risks associated with handling animals 3.2 Identify workplace health and safety requirements associated with handling animals
4. Identify and explain livestock identification procedures	4.1 Identify individual animal identification procedures, where appropriate, according to workplace, WHS and regulatory requirements 4.2 Explain the purpose of individual mob and lot identification 4.3 Identify lots according to workplace requirements 4.4 Explain the consequences of incorrect lot identification
5. Identify and explain requirements for dealing with sick and injured stock	5.1 Explain workplace and regulatory requirements 5.2 Describe humane destruction (euthanasing) arrangements
6. Apply animal welfare and handling techniques	6.1 Handle animals in a way that complies with workplace requirements and minimises stress 6.2 Maintain flow of stock to meet processing requirements 6.3 Handle animals safely in accordance with workplace and WHS requirements 6.4 Handle sick and injured stock in accordance with workplace requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPA2006 Apply animal welfare and handling requirements

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must identify animal welfare issues and comply with the necessary requirements when handing animals.

The candidate must:

- identify sick or injured animals
- identify out-of-specification animals
- accurately complete records of livestock movement
- communicate effectively and appropriately with fellow workers (e.g. to exchange information with stockperson)
- identify signs and causes of stress in animals
- comply with workplace procedures and requirements for handling livestock and minimising livestock stress
- maintain flow of livestock with minimal livestock stress
- identify the relevant sections of the animal welfare standard and code
- identify relevant regulatory requirements

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- workplace procedures for receival and/or dispatch of animals
- workplace requirements for maintaining flow and order of animals
- impact of stress and injury on the animal
- impact of stress and injury on product quality, including carcases, hides and skins
- stock identification systems including National Livestock Identification System (NLIS)
- lot identification of stock and its importance with regard to trace back
- workplace health and safety hazards of handling stock
- feed and water requirements where relevant
- the relevant sections of the animal welfare standard and code

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- relevant work instructions and Standard Operating Procedures (SOPs) associated with tasks undertaken
- customer and community expectations
- workplace and regulatory requirements

Assessment Conditions

Competency must be demonstrated utilising the most current legislation and codes.

Assessment must involve some practical demonstration of competency in the relevant workplace.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPA2174 Clean after operations - boning room

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to clean and sanitise a boning room. It deals with the skills and knowledge required to operate, strip down and clean all the mechanical aids in the boning room (e.g. packing machinery, conveyors, elevators, scales, recording and labelling machines). It also involves the operation of high pressure cleaning equipment and the use of approved cleaning chemicals in the plant.

This unit is applicable to workers cleaning boning rooms after production has finished. The boning rooms may be attached to abattoirs or in smallgoods plants or part of food services, game processing or wholesaling operations.

All work should be carried out to comply with workplace and hygiene requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

This unit must be delivered and assessed in the context of Australian meat processing standards and regulations.

Pre-requisite Unit

Nil.

Assessment Requirements for AMPA2174 Clean after operations - boning room

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must clean and sanitise a boning room.

The candidate must:

- clean boning room in accordance with workplace requirements
- clean boning room machinery in accordance with workplace requirements
- observe workplace health and safety requirements for cleaning the boning room
- identify and apply relevant regulatory requirements
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- monitor program for boning room hygiene and sanitation including surface swabbing and pre-operational checks

Knowledge Evidence

The candidate must clean and sanitise a boning room.

The candidate must:

- importance of drying, and of avoiding condensation in boning rooms
- cleaning schedule for the boning room
- major sources and locations of contamination in the boning room
- specific cleaning programs and workplace health and safety requirements for boning room machinery and conveyor systems

Assessment Conditions

Assessment must be conducted in a registered operating meat processing plant.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Competency must be demonstrated during normal cleaning operations.

As minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

AMPP201 Operate a poultry dicing, stripping or mincing process

Modification History

Release	Comments
Release 1	This version released with Australian Meat Industry Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a poultry product dicing, stripping or mincing process.

This unit applies to individuals who apply basic operating principles to the operation and monitoring of dicing, stripping or mincing equipment and processes in a poultry production environment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, work health and safety, and environmental codes, regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Poultry Processing (P)

Elements and Performance Criteria

Assessment Requirements for AMPP201 Operate a poultry dicing, stripping or mincing process

Modification History

Release	Comments
Release 1	This version released with Australian Meat Industry Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated the dicing, stripping or mincing process at least once, including:

- confirming availability of materials for dicing, stripping or mincing process
- identifying and applying safe work practices
- selecting, fitting and using appropriate personal protective clothing and equipment
- conducting pre-start checks on machinery used for dicing, stripping or mincing
- starting, operating, monitoring and adjusting dicing, stripping or mincing process equipment to achieve required quality outcomes
- taking corrective action in response to typical faults and inconsistencies
- completing workplace records in required format
- safely shutting down equipment
- applying food safety procedures to work practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the dicing, stripping and mincing process, including temperature generated by the process and effect on product
- basic operating principles and parameters of equipment, including the main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- services required for the dicing, stripping and mincing process and action to take if services are not available
- quality characteristics to be achieved by the dicing, stripping and mincing process
- quality requirements of materials suitable for processing and effect of variation on process performance
- methods used to monitor the process, including inspecting, measuring and testing
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination and food safety risks associated with the dicing and stripping and mincing process, and related control measures
- typical health and safety hazards associated with the poultry product dicing, stripping or mincing process and controls to managing hazards
- requirements of different shutdowns as appropriate to the dicing, stripping and mincing process, and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- workplace requirements for recording and reporting production and performance information
- environmental issues and controls relevant to the dicing, stripping and mincing process, including waste and rework collection and handling procedures
- workplace cleaning and sanitation procedures relevant to the poultry product dicing, stripping or mincing process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a poultry production workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - dicing, stripping and mincing equipment and tubs
  - raw product and associated additives or seasonings
  - testing equipment
  - cleaning materials and equipment
  - workplace information recording system
- specifications:
  - work procedures, including safe work practices, food safety, quality, cleaning and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule/batch instructions
  - sampling schedules and test procedures
  - recording requirements and procedures.

AMPP202 Operate a poultry evisceration process

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Industry Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down the evisceration process to deliver the poultry carcase ready for chilling.

This unit applies to individuals who apply basic operating principles to the operation and monitoring of evisceration equipment and processes in a poultry production environment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, work health and safety, and environmental codes, regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for AMPP203 Grade poultry carcase

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Industry Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has graded at least three different carcasses, including:

- identifying and applying safe work practices
- selecting, fitting and using appropriate personal protective clothing and equipment
- assessing the quality of carcase
- deciding on the grade of carcase
- identifying out-of-specification carcases
- completing workplace records in required format
- safely shutting down equipment
- applying food safety procedures to work practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of the grading and weighing process, including grading criteria and specifications at each level and the uses of product at each grade
- common types of damage or out-of-specification conditions and likely causes, including damage likely to be caused by poor handling of the carcase
- methods used to grade carcases, including visual inspection
- contamination and food safety risks associated with the grading process and related control measures
- work health and safety hazards associated with the grading process and related controls
- procedures for taking the grading process offline in preparation for cleaning and maintenance
- requirements for recording production and performance information
- workplace cleaning and sanitation procedures relevant to the poultry grading process
- environmental issues and controls relevant to the grading process, including waste collection and handling procedures related to the process.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a poultry production workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - carcases to be graded
  - cleaning materials and equipment
  - workplace information recording system
- specifications:
  - work procedures, including safe work practices, food safety, quality, cleaning and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule/batch instructions
  - sampling schedules and test procedures
  - recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

equipment and process for operation	1.2 Identify and fit personal protective clothing and equipment as required by workplace safety procedures 1.3 Check equipment is ready for use 1.4 Carry out pre-start checks according to workplace requirements
2. Harvest and sort edible offal	2.1 Start up and operate the harvesting and sorting process according to health and safety, food safety and environmental guidelines 2.2 Identify edible offal according to workplace guidelines 2.3 Separate, sort and collect offal to meet production requirements 2.4 Monitor and identify, rectify or report out-of-specification product or process outcomes and equipment 2.5 Identify and set aside offal of unacceptable quality 2.6 Maintain the work area according to workplace cleaning and sanitation standards 2.7 Maintain workplace records in required format
3. Shut down the offal harvesting process	3.1 Collect, handle and remove edible offal according to workplace procedures 3.2 Dispose of offal waste according to workplace procedures 3.3 Identify and follow workplace procedures for shutting down the process 3.4 Identify and report maintenance requirements according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret standard operating procedures
Writing	• Complete records according to workplace guidelines

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Numeracy	• Monitor supply and flow of materials to and from the harvesting and cleaning process
Navigate the world of work	• Apply workplace procedures relevant to own role • Understand main tasks, responsibilities and boundaries of own role, including use of personal protective clothing and equipment, housekeeping standards and environmental care requirements
Interact with others	• Report operational and safety information using required communication method
Get the work done	• Solve routine problems according to workplace guidelines

Assessment Requirements for AMPP204 Harvest edible poultry offal

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Processing Training Package Version 4.0.
Release 1	This version released with AMP Australian Meat Processing Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated all steps of the offal harvesting process at least once, including:

- confirming availability of materials
- selecting, fitting and using appropriate personal protective clothing and equipment
- conducting pre-start checks on machinery used for harvesting edible offal
- starting, operating, monitoring and adjusting process equipment to achieve required quality outcomes
- taking corrective action in response to typical faults and inconsistencies
- completing workplace records in required format
- applying safe work practices and identified work health and safety hazards and controls
- safely shutting down offal harvesting equipment
- applying food safety procedures to work practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the offal harvesting and cleaning process, including the structure and internal organs of poultry to identify, separate and remove
- contamination that can occur when offal is not correctly removed
- basic operating principles of equipment, such as main equipment components, their purpose and operating capacities, and the status and purpose of guards
- typical equipment faults and related causes, including signs and symptoms of faulty equipment

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- quality standards for types of edible offal collected
- methods used to monitor the harvesting process, including inspecting, measuring and testing
- inspection points (control points) in the harvesting and cleaning process and the related procedures and recording requirements
- contamination and food safety risks associated with the harvesting process and related control measures
- work health and safety hazards and controls, including the limitations of personal protective equipment relevant to the harvesting of offal
- requirements of different shutdowns as appropriate to the harvesting and cleaning process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- requirements for reporting production and performance information
- environmental issues and controls relevant to the harvesting process, including waste and rework collection, handling and recycling procedures
- workplace cleaning and sanitation procedures relevant to the harvesting process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a poultry production workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - offal harvesting, cleaning and washing equipment, accessories and services
  - offal to be harvested
  - cleaning materials and equipment
  - workplace information recording system
- specifications:
  - edible offal specifications, control points and processing parameters
  - work procedures, including advice on safe work practices, food safety, quality, cleaning and environmental requirements
  - information on equipment capacity and operating parameters
  - production schedule and batch instructions
  - recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AMPP205 Operate a poultry marinade injecting process

Modification History

Release	Comments
Release 1	This version released with Australian Meat Industry Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a poultry marinade injection process.

This unit applies to individuals who apply basic operating principles to the operation and monitoring of marinade injecting equipment and processes in a poultry production environment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, work health and safety, and environmental codes, regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Release	Comments
Release 1	This version released with Australian Meat Industry Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements, performance criteria in this unit. There must be evidence that the individual has demonstrated all steps of at least one complete marinade injecting process, including:

- confirming availability of materials
- selecting, fitting and using appropriate personal protective equipment
- conducting pre-start checks on machinery used for marinade injecting process
- starting, operating, monitoring and adjusting marinade injecting process equipment to achieve required quality outcomes
- taking corrective action in response to typical faults and inconsistencies
- completing workplace records in required format
- applying safe work practices and identifying work health and safety hazards and controls
- safely shutting down equipment
- applying food safety procedures to work practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the marinade injection process
- basic operating principles and parameters of equipment, such as main equipment components, including pumps and needle bed, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- corrective action required where operation is outside specified operating parameters
- the effect of marinade injection process on the quality of end product
- the flow of the marinade injection process and the effect of outputs on downstream processes

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- quality characteristics to be achieved by the marinade injection process
- quality requirements of marinade and bird carcases and effect of variation on process performance
- methods used to monitor the marinade injection process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the marinade injection process and the related procedures and recording requirements
- contamination and food safety risks associated with the marinade injection process and related control measures, including equipment checks required and traceability procedures to be followed where a broken or damaged needle is identified
- work health and safety hazards relevant to the poultry marinade process and appropriate controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- requirements for recording and reporting production and performance information
- environmental issues and controls relevant to the marinade injection process, including waste/rework collection, recycling and handling procedures related to the process
- workplace cleaning and sanitation procedures relevant to the marinade injection process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a poultry production workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - marinade preparation and injection and conveying process and related equipment and services
  - poultry and marinade mix for processing
  - cleaning materials and equipment
  - workplace information recording system
- specifications:
  - work procedures, including advice on safe work practices, food safety, cleaning, quality and environmental requirements
  - information on equipment capacity, control points and operating parameters
  - production schedule/batch instructions
  - recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AMPP206 Operate a poultry washing and chilling process

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Industry Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down spin and/or air chilling equipment used to wash and chill poultry carcases.

This unit applies to individuals who apply basic operating principles to the operation and monitoring of washing and chilling equipment and processes in a poultry production environment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, work health and safety, and environmental codes, regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for AMPP206 Operate a poultry washing and chilling process

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Industry Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated at least one entire washing and chilling process, including:

- confirming availability of materials and equipment
- selecting, fitting and using appropriate personal protective equipment
- conducting pre-start checks on machinery used for a washing and chilling process
- starting, operating, monitoring and adjusting washing and chilling process equipment to achieve required quality outcomes
- taking corrective action in response to typical faults and inconsistencies
- completing workplace records in required format
- applying safe work practices and identified work health and safety hazards and controls
- safely shutting down equipment
- applying food safety procedures to work practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the chilling process, including the purpose of both washing and chilling as it affects bacterial load
- basic operating principles and parameters of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- corrective action required where operation is outside specified operating parameters, such as specifications for temperature range of washers and chillers
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- services required for the washing and chilling process and action to take if services are not available

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- the effect of each stage on the quality of end product, including the relationship between immersion time, water temperature, and agitation on the amount of water absorbed by the carcase and on washing efficiency
- the flow of the chilling process and the effect of outputs on downstream processes
- quality characteristics to be achieved by the chilling process
- quality requirements of carcases and materials and effect of variation on chilling process performance
- methods used to monitor the chilling process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the chilling process and the related procedures and recording requirements, including procedures for measuring deep muscle temperature
- contamination and food safety risks associated with the chilling process and related control measures
- work health and safety hazards and controls relevant to poultry washing and chilling, including the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the chilling process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- requirements for recording and reporting production and performance information
- workplace cleaning and sanitation procedures
- environmental issues and controls relevant to the chilling process, including waste and rework collection, handling and recycling procedures related to the process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a poultry production workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - washing and chilling and conveying process, related equipment and services
  - carcases to be washed and chilled
  - cleaning materials and equipment
  - workplace information recording system
- specifications:
  - work procedures, including advice on safe work practices, food safety, cleaning, quality and environmental requirements
  - information on equipment capacity, control points and operating parameters
  - production schedule/batch instructions
  - recording requirements and procedures.

Assessment Requirements for AMPP207 Operate the bird receival and hanging process

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Industry Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated the following steps of the bird receival and hanging process at least once:

- confirmed availability of materials including live poultry for hanging
- selected, fitted and used appropriate personal protective equipment
- conducted pre-start checks on machinery used for receiving and hanging birds
- started, operated, monitored and adjusted bird receival and hanging equipment to achieve required quality outcomes
- taken corrective action in response to typical faults and inconsistencies
- completed workplace records in required format
- applied safe work practices and identified work health and safety hazards and controls
- safely shut down bird receival and hanging equipment
- applied food safety procedures to work practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic principles of bird handling, including humane treatment of birds; conditions that stress birds; and environmental design features to minimise stress, such as airflow, humidity and temperature controls
- acceptable time from bird receival to bird processing and consequences of delays in processing on product quality
- the flow of the receival and hanging process on further processing or packing stages to produce a final product
- basic operating requirements of equipment used in the bird receival and hanging process and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- methods used to monitor the receival and hanging process, including monitoring that the receival process is paced to deliver birds to processing and/or packing areas without delay, bird condition is acceptable, the receival environment is appropriate and birds are shackled correctly
- consequences of poor receival and hanging on product quality
- work health and safety hazards and controls associated with the bird receival and hanging process
- environmental issues and controls relevant to the receival and hanging process, including procedures for disposing of dead or unfit birds
- requirements of different shutdowns as appropriate to the receival and hanging process and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage
- requirements for recording and reporting production and performance information
- typical workplace receival documentation and related load identification procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a poultry production workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - receival, and hanging process and related equipment and services
  - birds to use in the process
  - workplace information recording system
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity, control points and operating parameters
  - production schedule/batch instructions
  - recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AMPP208 Operate a poultry stunning, killing and defeathering process

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Industry Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated all steps of a stunning, killing and defeathering process at least once including:

- confirming availability of materials including bird supply
- selecting, fitting and using appropriate personal protective equipment
- conducting pre-start checks on machinery used for stunning, killing and defeathering
- starting, operating, monitoring and adjusting stun, kill and defeathering process equipment to achieve required quality outcomes
- taking corrective action in response to typical faults and inconsistencies
- completing workplace records in required format
- applying safe work practices and identifying work health and safety hazards and controls
- shutting down equipment safely
- applying food safety procedures to work practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of each part of the stun, kill and defeather process
- basic principles of bird handling, including humane treatment of birds; conditions that stress birds; and environmental design features to minimise stress, such as airflow, humidity and temperature controls
- basic operating requirements and parameters of equipment used in the poultry stunning, killing and defeathering process and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- the effect of each stage on the quality of end product, including the relationship between the bleeding stage and final product quality and between scald temperature and immersion time on the defeathering stage
- quality characteristics to be achieved by the stun, kill and defeather process
- methods used to monitor the stun, kill and defeather process
- inspection or test points (control points) in the process and the related procedures
- contamination and food safety risks associated with the stun, kill and defeather process and related control measures
- work health and safety hazards and controls associated with poultry stunning, killing and defeathering process
- environmental issues and controls relevant to the stun, kill and defeather process, including systems in place to collect, treat and dispose of waste and by-products including blood, water, feathers and bird parts
- requirements of different shutdowns as appropriate to the stun, kill and defeather process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- requirements for recording and reporting production and performance information
- workplace cleaning and sanitation procedures relevant to the stun, kill and defeather process.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a poultry production workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - stunning, killing and defeathering equipment and related conveying process and services
  - birds to be processed
  - cleaning materials and equipment
  - workplace information recording system
- specifications:
  - work procedures, including advice on safe work practices, food safety, cleaning, quality and environmental requirements
  - information on equipment capacity, control points and operating parameters
  - production schedule
  - recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AMPP301 Operate a poultry carcase delivery system

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Industry Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to plan, set up and operate a carcase delivery system to deliver birds to the packaging area to meet production orders.

This unit applies to individuals who apply basic operating principles to the operation and monitoring of a carcase delivery system in a poultry production environment.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, work health and safety, and environmental codes, regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Poultry Processing (P)

Elements and Performance Criteria

Elements	Performance criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare the poultry carcase delivery system for operation	1.1 Select and load computer program to suit product requirements 1.2 Control line start-up to meet production requirements 1.3 Identify bird drop requirements

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance criteria
	1.4 Set system to meet production requirements 1.5 Identify and fit personal protective clothing and equipment as required by workplace safety procedures 1.6 Carry out pre-start checks according to workplace procedures
2. Monitor system operation	2.1 Enter new orders and set system parameters to meet requirements through the day 2.2 Adjust priorities to meet production and customer requirements 2.3 Monitor weight ranges and adjust system settings to meet customer orders 2.4 Identify variation in equipment operation and report maintenance requirements 2.5 Confirm that specifications are met 2.6 Identify, rectify or report out-of-specification product or process outcomes according to workplace requirements
3. Hand over system operation	3.1 Maintain workplace records in required format 3.2 Carry out handover according to workplace procedures 3.3 Ensure process operators are aware of system and related equipment status at completion of handover
4. Shut down the system	4.1 Identify and implement the appropriate shutdown procedure 4.2 Identify and report maintenance requirements according to workplace procedures
5. Contribute to continuous improvement of the system	5.1 Review system performance against output targets 5.2 Suggest opportunities for system improvements 5.3 Suggest improvements to operational procedures or processes

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret standard operating procedures and directions for the safe operation of equipment used in the carcase delivery system

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Writing	• Records information related to equipment operation in required format
Numeracy	• Confirm that number of birds matches production order requirements • Monitor system operation including timely flow and delivery of birds to meet production requirements
Navigate the world of work	• Apply workplace procedures relevant to own role • Understand main tasks, responsibilities and boundaries of own role, including use of personal protective clothing and equipment, housekeeping standards and environmental care requirements
Interact with others	• Use appropriate vocabulary, including technical language directly relevant to role • Report system performance using required communication method
Get the work done	• Identify and address routine problems according to workplace guidelines

Assessment Requirements for AMPP301 Operate a poultry carcase delivery system

Modification History

Release	Comments
Release 1	This version released with AMP Australian Meat Industry Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated all steps to operate a carcase delivery system at least once, including:

- selecting and loading correct computer program
- selecting, fitting and using appropriate personal protective equipment
- conducting pre-start checks on system
- setting computer settings to meet production requirements
- starting, operating, monitoring and adjusting equipment to achieve required quality outcomes
- taking corrective action in response to typical faults and inconsistencies
- completing workplace records in required format
- applying safe work practices and identifying work health and safety hazards and controls
- conducting production handover
- safely shutting down equipment
- applying food safety procedures to work practices
- contributing to workplace improvements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- carcase delivery system configuration, including system flow, layout and drop points
- customer ordering procedures, including common terms used to describe product and order requirements, and criteria to apply to prioritise customer orders
- basic operating principles of equipment and programs used to:
  - deliver the required birds to the correct locations within constraints of birds available
  - generate system reports

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- limits and ranges of system to adjust for weight distribution
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- main alarms and corrective action required if alarms are activated
- systems and responsibilities for communicating required information to others
- hazards, risks and controls associated with a poultry carcase delivery system
- methods for monitoring work health and safety, food safety, quality and environmental hazards and risks
- workplace procedures for identifying and communicating system improvements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a poultry production workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - system equipment and related accessories and services
  - birds for processing
  - packing area
  - workplace information recording system
- specifications:
  - information on equipment capacity and operating parameters
  - kill schedules, customer orders and related advice on system requirements
  - communication and recording procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AMPP302 Debone and fillet poultry product (manually)

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Industry Training Package Version 4.0.
Release 1	This version released with AMP Australian Meat Industry Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated all steps of the manual deboning and filleting process at least once, including:

- selecting, fitting and using appropriate personal protective equipment
- conducting pre-start checks on equipment used for deboning
- assessing carcase or pieces to ensure quality
- manually deboning and filleting poultry
- taking corrective action in response to typical faults and inconsistencies
- completing workplace records in required format
- applying safe work practices and identifying work health and safety hazards and controls
- cleaning deboning equipment
- applying food safety procedures to work practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of the deboning and filleting process, including the skeletal structure of poultry products and the effect of this process on portion control and yield
- the flow of the deboning and filleting process and the effect of outputs on downstream processes
- quality characteristics to be achieved for the different types of cuts required, including the consequences of failing to remove bones and preparing fillets to specification
- quality requirements of carcases and pieces suitable for processing and effect of variation on process performance

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- knife techniques and handling, sharpening, cleaning and storage procedures
- basic operating principles of equipment components used in the deboning and filleting process
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- contamination and food safety risks associated with the deboning and filleting process and related control measures
- work health and safety hazards and controls, including safety related to use of knives
- procedures and responsibility for recording and reporting production and performance information
- environmental issues and controls relevant to the deboning and filleting process, including waste collection and handling procedures related to the process
- workplace maintenance, cleaning and sanitation procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a poultry production workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - deboning and filleting equipment and services
  - carcases and pieces to be filleted
  - cleaning equipment and materials
  - workplace information recording system
- specifications:
  - work procedures, including advice on safe work practices, food safety, cleaning, quality and environmental requirements
  - information on equipment capacity, processing and operating parameters
  - production schedule/batch instructions
  - sampling schedules and test procedures
  - recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AMPR322 Prepare and produce value added products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to prepare and produce more complex value added products, such as those employing pastry, dairy products or cooking. It includes preparing ingredients and following recipes. The operation of processing equipment to produce value-added products may also be required.

This unit is applicable to workers in meat retailing and food services enterprises.

All training must be conducted in accordance with Australian meat industry standards and regulations.

All work should be carried out to comply with workplace requirements and hygiene standards.

This unit applies to individuals who work under broad direction and take responsibility for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AMPX209 Sharpen knives

Assessment Requirements for AMPR322 Prepare and produce value added products

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must be able to produce value-added meat products from a minimum of three species, using pastry, fresh produce, dried herbs and spices and marinades.

The candidate must:

- make adjustments to equipment when necessary according to manufacturer's, workplace and workplace health and safety requirements
- describe shelf life of products, factors affecting shelf life and effects of different ingredients on shelf life
- explain the permissible use of additives and ingredients in value-added products
- identify suitable alternatives from existing stock where quantities of required ingredients are not available, as applicable
- work with team members to develop new value-added products
- identify sub-standard product and rectify appropriately
- label value-added products according to workplace and regulatory requirements
- provide advice to customers on ingredients in value-added products
- seek advice on new recipes and products from appropriate sources
- use communication skills appropriate to the task
- use mathematical skills as required for production of value-added products
- estimate measures to verify calculations

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- regulatory requirements regarding use and storage of fruit and vegetables
- shelf life of products, factors affecting shelf life and effects of different ingredients on shelf life
- range of effects on the product and on consumer health of the use of incorrect and inadequate quantities of ingredients
- properties of correct blending

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- purpose and use of processing equipment in the preparation of value-added products
- use and purpose of stuffings, seasoning and force meat in producing value-added products
- use and purposes of ingredients in producing value-added products
- quality requirements related to production of value-added products
- effect of various ingredients on product shelf life
- procedures for cleaning processing equipment
- workplace health and safety and hygiene requirements related to producing value-added products

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

Where the candidate does not produce value-added products in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

The following three forms of assessment must be used:

- demonstration in the workplace or simulated environment
- quiz of underpinning knowledge
- workplace referee or third-party report of performance over time

Assessors must satisfy current standards for RTOs.

AMPX207 Vacuum pack product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Application

This unit describes the skills and knowledge required to pack meat products using vacuum packaging.

This unit is applicable to workers packing meat and meat products in boning rooms, offal rooms, smallgoods plants, wholesalers and food services operations. It is not applicable to small scale vacuum packaging in retail operations.

This unit must be delivered in the context of Australian meat processing standards and regulations.

All work should be carried out to comply with workplace and regulatory requirements.

This unit applies to individuals who work under general supervision, exercise limited autonomy and have some accountability for their own work.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select packaging	1.1 Bag product in appropriately sized bag

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Element	Performance criteria
	1.2 Arrange product in appropriate container
2. Set machine requirements	2.1 Complete requirements in preparation for start-up of vacuum packing machine to workplace requirements 2.2 Set machine requirements 2.3 Follow start-up procedures to workplace requirements 2.4 Attach and change packing materials to workplace requirements and product specification 2.5 Place bagged meat on the vacuum packing machine or in the formed pockets as appropriate 2.6 Place open ends of bags flat across the sealing bar or meat contained in pockets as appropriate 2.7 Follow workplace health and safety, hygiene and sanitation requirements
3. Operate machinery	3.1 Operate vacuum packaging machine in accordance with workplace requirements 3.2 Vacuum pack a variety of products to customer specifications, hygiene and sanitation, workplace health and safety, and Quality Assurance (QA) requirements at a speed that is the same as production requirements 3.3 Shrink bags using hot water baths where appropriate 3.4 Drain bagged cuts 3.5 Perform shut-down procedures to workplace requirements
4. Perform routine maintenance	4.1 Change dyes according to workplace requirements 4.2 Take corrective action when leaks and defects are identified, according to workplace requirements 4.3 Change plates as required
5. Ensure quality of packaging and product	5.1 Inspect bagged cuts for leaks and other defects 5.2 Place bagged cuts in cartons according to specifications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPX207 Vacuum pack product

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must be observed vacuum packing products.

The candidate must:

- prepare for vacuum packaging according to workplace health and safety, and workplace requirements
- vacuum pack bagged cuts with no leaks or defects
- explain defects that can occur during packaging
- demonstrate hygienic cleaning of equipment
- demonstrate hygienic work practices for vacuum packing
- apply relevant communication and mathematical skills
- apply relevant regulatory requirements
- manage time and priorities

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- sub-standard or contaminated product and workplace procedures for dealing with sub-standard or contaminated product
- defects that can occur during packaging
- packaging requirements
- specific workplace health and safety requirements for vacuum packing
- purpose of vacuum packaging
- relevant communication and mathematical skills
- relevant regulatory requirements
- general operating principles, including start-up and shut-down procedures
- manufacturer's and workplace requirements for vacuum packaging of product

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Conditions

Competency should be demonstrated at the normal speed of production.

Assessment should take place in an operating meat processing plant or food service operation.

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration or project
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Processing Training Package Version 5.0.
Release 1	This version released with AMP Australian Meat Processing Training Package Version 1.0.

Performance Evidence

The candidate must be observed maintaining knives for safe and effective use in a meat establishment. Competency must be demonstrated in conjunction with a skill or task requiring the use of a knife. Evidence must demonstrate the candidate's consistency of performance over time.

The candidate must:

- steel a knife correctly
- use safe techniques of knife sharpening to workplace, hygiene and sanitation, and health and safety requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- steps in steeling a knife to maintain edge
- technique to sharpen a knife with an appropriate bevel edge
- theory of knife sharpening
- sterilisation, and hygiene and sanitation requirements related to knife sharpening
- workplace health and safety issues related to the use and sharpening of knives
- relevant regulatory requirements.

Assessment Conditions

Assessment can be carried out in an actual or simulated workplace.

The following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration

BSBAUD501 Initiate a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to initiate and organise a quality audit with an auditee. It covers assessing the scope and objectives of a quality audit; communicating with the auditee regarding the proposed quality audit; identifying resources required to conduct the audit; and developing and submitting a quality audit plan. The types of audits may include external or internal systems audits or process or product/service audits.

It applies to individuals with a well-established theoretical knowledge base in quality auditing who are proficient in using a wide range of specialised, quality auditing and managerial techniques to plan, carry out and evaluate a quality audit. Individuals also supervise and monitor the processes and outcomes of others working in a quality audit team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Quality Auditing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Assess quality audit scope and objectives	1.1 Determine and discuss audit objectives with the auditee, client and all other relevant parties 1.2 Determine and discuss scope of the quality audit with the auditee, client and all other relevant parties

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	1.3 Identify relevant standards that impact the environment in which the audit operates 1.4 Determine scope commensurate with identified risks
2 Communicate with auditee regarding proposed quality audit	2.1 Determine audit history, organisational structure and culture through consultation with the auditee 2.2 Negotiate and ensure agreement with auditee, the proposed audit methods and techniques to be applied 2.3 Outline audit processes to establish sequence of audit activities, and the roles of the auditors and auditees in the process
3 Identify resources required to conduct quality audit	3.1 Identify resources required to perform the quality audit efficiently and effectively 3.2 Select audit team members on the basis of relevant expertise 3.3 Confirm availability of resources required to conduct the audit with auditee 3.4 Assign roles and responsibilities to audit team members
4 Develop and submit quality audit plan	4.1 Develop quality audit plan according to established scope and objectives 4.2 Assign timing, schedules and responsibilities for implementation of the audit plan 4.3 Develop audit priorities and ensure agreement with auditees and audit team members 4.4 Document and submit audit plan to auditee
5 Prepare audit team	5.1 Inform audit team members of their responsibilities, audit objectives and scope 5.2 Communicate audit plan and schedules to all audit team members 5.3 Discuss and clarify audit methods and techniques with audit team members
6 Review auditee documentation	6.1 Review auditee’s previous audits to establish possible impact on the conduct of the current audit 6.2 Review and check relevant organisational documents for accuracy 6.3 Resolve arising problems with auditee and relevant parties
7 Identify and prepare checklists and audit	7.1 Develop checklists to reflect audit scope and objectives

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
related documentation	7.2 Develop or obtain documentation required for the audit 7.3 Prepare agenda for entry meeting 7.4 Include value-adding activities in audit related documentation where required

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 4.1, 6.1, 6.2, 7.1	• Interprets and analyses information from organisational documentation
Writing	4.1-4.4, 6.2, 7.1-7.4	• Develops a range of documents using structure, tone and vocabulary appropriate to audience, context and purpose • Records or amends information and conveys details in accordance with audit objectives
Oral Communication	1.1, 1.2, 2.1-2.3, 4.3, 5.1-5.3, 6.3	• Participates in spoken exchanges using structure and language to suit the audience • Uses questioning and listening techniques to clarify requirements
Numeracy	4.2	• Uses mathematical calculations for project scheduling
Navigate the world of work	1.3	• Monitors adherence to organisational policies and relevant standards and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.2, 2.1, 2.2, 3.4, 4.4, 5.1, 5.2	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Recognises the importance of building rapport and building effective working relationships • Collaborates with others to negotiate acceptable outcomes, playing an active role in facilitating effective group interaction
Get the work done	1.1, 1.2, 1.4, 2.1, 2.3, 3.1, 3.2, 4.1,	• Organises, plans and sequences own workload and schedules work activities of others • Uses analytical processes to decide on a course of

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

	4.2, 4.3, 6.1, 6.3	action, establishing criteria for deciding between options and seeking advice from others before taking action when necessary • Addresses some unfamiliar problems of increasing complexity within own scope, recognising when to seek the expertise of others

Assessment Requirements for BSBAUD501 Initiate a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce documented audit plans for auditees across a variety of contexts including:
  - the scope and objectives of the audit
  - proposed audit methods and techniques to be used
  - required resources and schedules
  - allocation of individual audit team member responsibilities for conducting the proposed audit.
- use terminology relating to quality auditing in written or oral communications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the relevant auditing codes of practice or ethics
- describe auditing methods and techniques
- outline the requirements of auditing regulations and standards
- identify current audit practices
- outline quality auditing principles, techniques and systems
- describe the requirements of house or other style manual protocols for written communications
- identify software applications relevant to quality auditing activities.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk – quality auditing field of work and include access to:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- workplace documentation including previous quality audit reports, checklists, risk management plans and audit plans.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBAUD503 Lead a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead an audit team as it runs a quality audit. It covers conducting entry and exit meetings; identifying and gathering relevant information; managing audit team resources; and providing feedback to audit team members on their performance. The types of quality audit that may be covered by this unit include an external or internal systems audit or process or product/service audit.

It applies to individuals with a well-established theoretical knowledge base of quality auditing, who are proficient in using a wide range of specialised quality auditing and managerial techniques to carry out their own work and to supervise the quality audit team. It is relevant to audits where a lead auditor is responsible for a quality audit team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Quality Auditing

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Conduct entry meeting	1.1 Organise entry meeting in advance at a mutually agreed time 1.2 Prepare agenda for audit 1.3 Confirm objectives and scope of audit at entry meeting 1.4 Confirm schedules and logistical arrangements at entry

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	meeting 1.5 Make changes to plan, schedules and arrangements where required
2 Identify and gather information	2.1 Identify a range of potential sources of information 2.2 Interview appropriate persons 2.3 Gather relevant information and sample documentation
3 Manage audit team resources	3.1 Supervise activities of audit team members 3.2 Assess and review audit team findings in line with audit scope 3.3 Re-assign team members as required 3.4 Instigate contingency actions as required 3.5 Seek and reach agreement on corrective action reports
4 Conduct exit meeting	4.1 Make preparations for exit meeting 4.2 Examine results and findings against audit objectives and present to auditee 4.3 Ensure reporting arrangements are agreed on 4.4 Explain context and consequences of audit and discuss during follow-up
5 Guide team members in continuously improving their performance	5.1 Provide feedback on performance to audit team members 5.2 Encourage and support audit team members to critique their own work 5.3 Provide and document advice for individual improvement

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	3.2, 4.2	• Interprets and analyses information from audit scoping materials
Writing	1.2, 1.5, 5.3	• Develops a range of documents using relevant structure, tone and vocabulary appropriate to audience,

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

		context and purpose • Records or amends information and conveys details in accordance with audit objectives
Oral Communication	1.3, 1.4, 2.2, 3.5, 4.2-4.4, 5.1, 5.2, 5.3	• Participates in spoken exchanges using clear language, tone and pace • Uses questioning and listening techniques to clarify requirements
Numeracy	4.2	• Uses mathematical calculations to analyse and arrange numeric information
Interact with others	1.3, 1.4, 2.2, 3.1, 3.3, 4.2-4.4, 5.1, 5.2, 5.3	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Recognises the importance of rapport in establishing and building effective working relationships • Collaborates with others to negotiate acceptable outcomes, playing an active role in directing and facilitating effective group interaction
Get the work done	1.1, 1.2, 1.4, 2.1, 2.3, 3.2, 3.3, 3.4, 4.1	• Organises, plans and sequences own workload and schedules work activities of others • Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant information and evaluate appropriate strategies to achieve objectives • Responds to problems requiring immediate attention, drawing on past experiences to devise solutions • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of factors into account

BSBAUD504 Report on a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to report on the outcomes of a quality audit and to take appropriate follow up action. It covers compiling audit results; preparing a report for the auditee/client; negotiating follow up action with the auditee/client; and monitoring and reviewing the auditing system and activities. The types of quality audit that may be covered by this unit include an external or internal systems audit or process or product/service audit.

It applies to individuals with a well-established theoretical knowledge base in quality auditing who are proficient in using a wide range of specialised quality auditing and managerial techniques to carry out their own work and to supervise the quality audit team. It addresses the function performed by either an auditor having sole responsibility for the audit or a lead auditor of a quality audit team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Quality Auditing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Compile audit results	1.1 Compare results of the audit evaluation against audit objectives and criteria plan

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	1.2 Analyse audit results
2 Prepare report	2.1 Provide objective evidence relating to the need for reduction, elimination and prevention of non-conformance as the basis for the audit report 2.2 Produce audit report according to specified audit requirements 2.3 Present audit report to auditee and other stakeholders
3 Negotiate follow up process with auditee	3.1 Determine and initiate any corrective action required to deal with non-conformance, in consultation with auditee 3.2 Provide suggestions for improvements where applicable 3.3 Ensure timelines are agreed on for completion of corrective action activities 3.4 Ensure corrective action follow-up procedures are agreed with auditee
4 Monitor and review audit system and activities	4.1 Evaluate effectiveness and suitability in achieving audit objectives 4.2 Investigate possible improvements in audit methods, economy and efficiency

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 4.1	• Interprets and analyses information from a complex range of organisational documentation
Writing	2.1, 2.2, 4.1	• Develops a variety of complex documents using relevant structure, tone and vocabulary appropriate to audience, context and purpose
Oral Communication	2.3, 3.1-3.4	• Participates in spoken exchanges using clear language, tone and pace • Uses questioning and listening techniques to clarify understanding
Numeracy	1.1, 1.2, 3.3, 4.2	• Collects, represents, summarises and interprets a range of statistical data

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

		• Performs calculations required to measure output against timeframes
Navigate the world of work	2.2	• Monitors adherence to organisational policies and procedures • Considers own role in terms of its contribution to broader goals of the work environment
Interact with others	2.3, 3.1-3.4	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Collaborates with others to negotiate joint outcomes, playing an active role in facilitating team understanding
Get the work done	1.1, 1.2, 3.1, 4.1, 4.2	• Organises, plans and sequences own workload according to timelines and organisational requirements • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of factors into account • Analyses outcomes of decisions to identify opportunities for improvement • Recognises a range of familiar problems, their symptoms and causes, actively looking for suitable corrective actions

BSBCUS301 Deliver and monitor a service to customers

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify customer needs, deliver and monitor customer service and identify improvements in the provision of customer service.

It applies to individuals who apply a broad range of competencies in various work contexts. In this role, individuals often exercise discretion and judgement using appropriate theoretical knowledge of customer service to provide technical advice and support to customers over short or long term interactions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Identify customer needs	1.1 Use appropriate interpersonal skills to accurately identify and clarify customer needs and expectations 1.2 Assess customer needs for urgency to determine priorities for service delivery according to organisational and legislative requirements 1.3 Use effective communication to inform customers about available choices for meeting their needs and assist in the selection

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	of preferred options 1.4 Identify limitations in addressing customer needs and seek appropriate assistance from designated individuals
2 Deliver a service to customers	2.1 Provide prompt service to customers to meet identified needs in accordance with organisational and legislative requirements 2.2 Establish and maintain appropriate rapport with customers to ensure completion of quality service delivery 2.3 Sensitively and courteously handle customer complaints in accordance with organisational and legislative requirements 2.4 Provide assistance or respond to customers with specific needs according to organisational and legislative requirements 2.5 Identify and use available opportunities to promote and enhance services and products to customers
3 Monitor and report on service delivery	3.1 Regularly review customer satisfaction with service delivery using verifiable evidence according to organisational and legislative requirements 3.2 Identify opportunities to enhance the quality of service and products, and pursue within organisational and legislative requirements 3.3 Monitor procedural aspects of service delivery for effectiveness and suitability to customer requirements 3.4 Regularly seek customer feedback and use to improve the provision of products and services 3.5 Ensure reports are clear, detailed and contain recommendations focused on critical aspects of service delivery

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2 2.1, 2.3, 2.4, 3.1, 3.5	• Comprehends textual information to determine customer service requirements • Proofreads texts for clarity of meaning and accuracy of grammar and punctuation

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Writing	2.3, 3.5	• Completes responses to customer complaints in required format • Prepares reports using sequencing, format and words to communicate recommendations clearly and effectively
Oral Communication	1.1, 1.3, 1.4, 2.2, 2.3, 2.4	• Provides information or advice using structure and language to suit the audience • Asks questions and listens to gain information or confirm understanding
Navigate the world of work	1.2, 2.1-2.4, 3.1, 3.2	• Recognises, understands and applies organisational policies and procedures relevant to role
Interact with others	1.1, 1.3, 1.4, 2.2, 2.3, 2.4, 3.4	• Selects and uses appropriate communication conventions to establish connections, build rapport, seek information and develop professional working relationships • Adjusts personal communication style in response to the opinions, values and particular needs of others
Get the work done	1.2, 2.3, 2.5, 3.1-3.5	• Plans and implements systems to gather and organise information • Monitor actions and progress against goals and implements adjustments as appropriate • Uses problem-solving skills to analyse and respond to customer complaints or enquiries • Identifies and follows up on opportunities to improve work practices and outcomes

Assessment Requirements for BSBCUS501 Manage quality customer service

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and manage organisational systems for quality customer service
- develop and review plans, policies and procedures for delivering and monitoring quality customer service
- implement policies and procedures to ensure quality customer service
- solve complex customer complaints and system problems that lead to poor customer service
- monitor and assist teams to meet customer service requirements
- develop, procure and use human and physical resources to support quality customer service delivery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislative and regulatory context of the organisation relevant to customer service
- describe organisational policy and procedures for customer service including handling customer complaints
- identify service standards and best practice models
- summarise public relations and product promotion
- outline techniques for dealing with customers including customers with specific needs

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- explain techniques for solving complaints including the principles and techniques involved in the management and organisation of:
  - customer behaviour
  - customer needs research
  - customer relations
  - ongoing product and/or service quality
  - problem identification and resolution
  - quality customer service delivery
  - record keeping and management methods
  - strategies for monitoring, managing and introducing ways to improve customer service relationships
  - strategies to obtain customer feedback.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- legislation, regulations and codes of practice related to customer service
- business technology
- workplace documentation and resources
- complex customer complaints
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBFRA401 Manage compliance with franchisee obligations and legislative requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to comply with obligations set out in the franchising agreement and with relevant legislative requirements specific to the type of franchise.

It applies to individuals who require a broad knowledge of franchisee obligations and legislative requirements and who use this knowledge to develop compliance strategies.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Franchising

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Determine franchisee obligations and legislative requirements	1.1 Identify obligations under franchising agreement 1.2 Identify relevant legislative requirements 1.3 Access codes of practice and material that interprets and explains obligations and legislative requirements 1.4 Clarify obligations and legislative requirements with franchisor and relevant government and licensing agencies

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
2 Develop strategies for compliance with franchisee obligations and legislative requirements	2.1 Analyse available information on obligations and legislative requirements to develop strategies for compliance 2.2 Check strategies with franchisor to determine suitability to operate franchise within obligations and legislative requirements 2.3 Use strategies to develop regular, cyclical compliance checks 2.4 Complete training to facilitate compliance requirements
3 Undertake scheduled compliance checks	3.1 Communicate compliance requirements to staff 3.2 Delegate compliance checks to relevant staff and provide training and support for staff to carry out these checks 3.3 Record timing and outcomes of compliance checks according to organisational requirements 3.4 Identify instances of non-compliance from compliance checks
4 Act on identified instances of non-compliance with franchisee obligations and legislative requirements	4.1 Determine courses of action to address instances of non-compliance 4.2 Seek assistance of franchisor or other relevant parties to address non-compliance 4.3 Take action to address non-compliance 4.4 Make checks to ensure non-compliance has been addressed 4.5 Monitor compliance in a specific area to ensure continuing compliance 4.6 Analyse reasons for non-compliance to guide future compliance

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	2.4	• Undertakes skill development in line with compliance requirements
Reading	1.1-1.4, 2.1-2.3, 3.3, 3.4, 4.4-4.6	• Recognises and interprets a variety of textual information to determine legislative and regulatory requirements, trends and outcomes

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Writing	1.4, 2.1, 3.1, 3.3, 3.4, 4.2, 4.3, 4.6	• Develops material for a specific audience using clear and detailed language to convey explicit information, requirements and outcomes
Oral Communication	1.4, 2.2, 3.1, 3.2, 4.2	• Delivers factual information appropriate to audience and environment using appropriate language, tone and syntax • Uses active listening and questioning techniques to clarify and confirm understanding
Navigate the world of work	1.1-1.4, 2.1, 2.3, 2.4, 3.1, 3.3, 3.4, 4.1-4.6	• Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Interact with others	1.4, 3.1, 3.2, 4.2	• Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role • Plays an active role in workgroup discussions, playing some attention to the perspectives of others
Get the work done	1.1, 1.2, 2.1, 2.3, 3.2, 4.1, 4.6	• Takes responsibility for planning, sequencing and delegating tasks for efficiency and effective outcomes • Selects from a range of predetermined options in routine situations, identifying and taking some situational factors into account • Reflects on outcomes and determines key concepts that could be adapted in future situations • Seeks input before implementing problem solving strategies

Assessment Requirements for BSBFRA401 Manage compliance with franchisee obligations and legislative requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package version 1.0.

Performance Evidence

Evidence of the ability to:

- develop compliance strategies in accordance with franchising agreement obligations and legislative requirements
- communicate compliance requirements to staff
- provide support to staff who will carry out compliance checks
- develop and implement schedule to carry out compliance checks
- record outcomes of compliance checks according to organisational requirements
- take action to address instances of non-compliance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the evidence requirements safely and effectively, the individual must:

- identify work health and safety (WHS) requirements:
  - as specific to nature and type of franchise
  - as generic to all workplaces
- outline other relevant legislation, codes of practice and national standards that affect franchise operations
- explain franchise specific obligations:
  - as per franchise agreement
  - as per updates and amendments to agreement over time
- describe methods for carrying out compliance checks of franchise operations
- list penalties for non-compliance within the context for franchisee obligations and legislative requirements.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – franchising field of work and include access to:

- office equipment and resources
- relevant legislation and regulations
- examples of real franchise agreements and related documentation.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBHRM405 Support the recruitment, selection and induction of staff

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to execute tasks associated with the recruitment cycle and apply in-depth knowledge of the work of the organisation, and how recruitment and selection practices fit with other human resources functions.

This unit applies to individuals who support recruitment, selection and induction functions under the direction of a human resource manager.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Human Resource Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Plan for recruitment	1.1 Obtain approval to fill position, clarify time lines and requirement for appointment 1.2 Assist in preparing job descriptions that accurately reflect the role requirements, according to organisational policies and procedures, legislation, codes, national standards and work health and safety (WHS) considerations 1.3 Consult with relevant personnel about job descriptions and

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	workforce strategy 1.4 Assist in ensuring that job descriptions comply with legislative requirements and reflect the organisation's requirements for a diverse workforce 1.5 Obtain approvals to advertise position
2 Plan for selection	2.1 Choose appropriate channels and technology to advertise vacancies and/or identify potential talent pool 2.2 Advertise vacancies for staffing requirements according to organisational policies and procedures 2.3 Consult with relevant personnel to convene selection panel and develop interview questions 2.4 Assist in ensuring that interview questions comply with legislative requirements 2.5 Assist in short-listing applicants 2.6 Schedule interviews and advise relevant people of times, dates and venues
3 Support selection process	3.1 Participate in interview process and assess candidates against agreed selection criteria 3.2 Discuss assessment with other selection panel members 3.3 Correct biases and deviations from agreed procedures and negotiate for preferred candidate 3.4 Contact referees for referee reports 3.5 Prepare selection report and make recommendations to senior personnel for appointment 3.6 Advise unsuccessful candidates of outcomes and respond to any queries 3.7 Secure preferred candidate's agreement 3.8 Complete necessary documentation according to organisational procedures, observing confidentiality and privacy requirements
4 Induct successful candidate	4.1 Provide successful candidate with employment contract and other documentation 4.2 Advise manager and work team of new appointment 4.3 Advise managers and staff of candidate's starting date and make necessary administrative arrangements for pay and employee record keeping 4.4 Arrange successful candidate's induction according to

Assessment Requirements for BSBHRM405 Support the recruitment, selection and induction of staff

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare job descriptions
- use job descriptions to support sourcing, selecting and appointing suitable staff
- use different advertising channels to promote vacancies and/or establish a potential talent pool
- consult with managers to gain approvals
- develop selection criteria and interview questions in consultation with relevant personnel
- schedule interviews and advise relevant people of times, dates and venues
- participate in interviews and other selection techniques including assessing candidates against selection criteria to short list them
- obtain referees' reports
- prepare and distribute a selection report including feedback to give unsuccessful candidates
- advise unsuccessful candidates of the results
- secure preferred candidate’s agreement and provide an employment contract
- advise other staff of the successful candidate and arrange induction.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify documentation required for recruitment, selection and induction
- explain human resources life cycle and the place of recruitment and selection
- identify legislation relevant to recruitment, selection and induction of staff
- describe channels and technology to advertise vacancies

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- explain a range of interviewing techniques and other selection processes and their application.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

- workplace policies and procedures
- business technology
- position descriptions
- legislation, regulations, Codes and Standards relevant to staff recruitment, selection and induction
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINN301 Promote innovation in a team environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to be an effective and proactive member of an innovative team.

It applies to individuals who play a proactive role in demonstrating, encouraging or supporting innovation in a team environment. The individual may be a team participant or a team leader. Teams may be formal or informal and may comprise a range of personnel.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Create opportunities to maximise innovation within the team	1.1 Evaluate and reflect on what the team needs and wants to achieve 1.2 Check out information about current or potential team members' work in the context of developing a more innovative team 1.3 Bring people into the team or make suggestions for team members based on what needs to be achieved and the potential for cross fertilising ideas

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	1.4 Acknowledge, respect and discuss the different ways that people may contribute to building or enhancing the team
2 Organise and agree effective ways of working	2.1 Jointly establish ground rules for how the team will operate 2.2 Agree and communicate responsibilities in ways that encourage and reinforce team-based innovation 2.3 Agree and share tasks and activities to ensure the best use of skills and abilities within the team 2.4 Plan and schedule activities to allow time for thinking, challenging and collaboration 2.5 Establish personal reward and stimulation as an integral part of the team's way of working
3 Support and guide colleagues	3.1 Model behaviour that supports innovation 3.2 Seek external stimuli and ideas to feed into team activities 3.3 Proactively share information, knowledge and experiences with other team members 3.4 Challenge and test ideas within the team in a positive and collaborative way 3.5 Proactively discuss and explore ideas with other team members on an ongoing basis
4 Reflect on how the team is working	4.1 Debrief and reflect on activities and on opportunities for improvement and innovation 4.2 Gather and use feedback from within and outside the team to generate discussion and debate 4.3 Discuss the challenges of being innovative in a constructive and open way 4.4 Take ideas for improvement, build them into future activities and communicate key issues to relevant colleagues 4.5 Identify, promote and celebrate successes and examples of successful innovation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Performance Criteria	Description
Reading	1.2, 4.2	• Interprets and analyses textual information, from a wide range of sources, to identify information relevant to team activities
Writing	2.2, 3.3, 4.4	• Uses clear language and formats appropriate for the audience to highlight and present specific information
Oral Communication	1.2, 1.3, 1.4, 2.1, 2.2, 3.5, 4.1, 4.2, 4.3, 4.4, 4.5	• Actively participates in verbal exchanges of ideas and elicits the views and opinions of team members by listening and questioning • Uses clear language to clarify rules and roles relating to team activities in formal and informal situations
Numeracy	1.2, 4.2	• Interprets numeric information relevant to team activities
Navigate the world of work	1.1, 3.1, 3.2, 3.5	• Understands the nature and purpose of own role and how it affects others in the work context
Interact with others	1.1-1.4, 2.1, 2.2, 3.1, 3.2, 3.4, 3.5, 4.1, 4.2, 4.4, 4.5	• Uses inclusive techniques to initiate, contribute and promote discussion amongst potentially diverse team members • Recognises the importance of establishing and building effective working relationships • Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.3, 1.4, 2.2, 2.4, 2.5, 3.2, 3.4, 4.2, 4.4, 4.5	• Plans, sequences and prioritises tasks for efficient and effective outcomes • Contributes to continuous improvement of current work practices by applying basic principles of analytical and lateral thinking • Uses problem-solving processes to address less predictable problems, and when appropriate, seeking input from others • Reflects on outcomes and further explores own and the team’s role in implementing innovation

Assessment Requirements for BSBINN301 Promote innovation in a team environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply practices that promote innovation within a team including:
  - modelling open and respectful communications
  - contributing to the make-up and rules of the team
  - planning and scheduling of activities
  - reflecting on activities, feedback and challenges to identity improvement options
- encourage others to contribute to innovation in the team
- implement improvements and communicate about them.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain what innovation is, the different types of innovation and the benefits of innovation
- describe the internal and external factors that contribute to a team becoming and remaining innovative including:
  - team characteristics
  - the role of group dynamics and diversity
  - broader environmental factors
- explain how activities can encourage or hinder innovation in a team including:
  - allocation of time and activities
  - modelling behaviour
  - rewards and recognition
  - communications

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- feedback.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINT303 Organise the importing and exporting of goods

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to provide general assistance to senior staff organising importing and exporting of goods. Work may be for an external client or for the organisation in which the individual is employed.

It applies to individuals who work under the supervision of a more experienced colleague in various international work contexts. They may exercise discretion and judgement using appropriate knowledge of requirements for importing and exporting goods.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – International Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Follow organisational systems and processes for organising importation and exportation of goods	1.1 Detail goods to be imported or exported according to characteristics 1.2 Identify and access regulations and permits relating to international movement of specific goods with assistance of manager, supervisor or more senior personnel 1.3 Research and document required processes and trade routes to import or export specific goods as assigned by and under direction

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	of manager, supervisor or more senior personnel 1.4 Seek assistance as required to research import or export requirements
2 Contribute to cost calculations	2.1 Discuss and record components of costs of importing or exporting specific goods with supervisor or manager 2.2 Make a determination of components of costs 2.3 Seek assistance as required in assigned tasks related to calculating costs for international movement of goods 2.4 Document costs for international movement of goods in accordance with workplace procedures 2.5 Check cost calculation for accuracy and completeness prior to forwarding to supervisor or manager 2.6 Finalise and recheck any revisions to calculations by self and supervisor or manager
3 Assist in completing required documentation	3.1 Complete and collate required documentation for international movement of goods 3.2 Seek assistance as required in completing and checking documentation 3.3 Check required documents and forward for further checking by supervisor or manager 3.4 Finalise documents and submit or lodge with relevant parties 3.5 Identify and file copies of required documents in accordance with workplace procedures
4 Communicate with carriers	4.1 Identify customs licensed places and transportation services to be used in the international movement of goods with assistance of supervisor, manager or more senior personnel 4.2 Ensure communication facilitates arrangements to move goods within required timelines 4.3 Identify problems and take actions as required to facilitate resolution 4.4 Follow through arrangements for transportation of goods including arrangements with overseas representatives of carriers to finalisation, including arrival of goods at intended destination and settlement effected to complete the contract 4.5 Seek assistance as required in communicating with carriers

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.4-2.6, 3.1, 3.3, 3.5, 4.1	• Comprehends and applies relevant information in organisational and legislative documents
Writing	1.1-1.4, 2.1-2.4, 2.6, 3.1, 3.2, 3.4, 4.2, 4.5	• Uses clear simple vocabulary, everyday grammatical structures and workplace conventions to complete and update documentation
Oral Communication	1.2-1.4, 2.1, 2.3, 3.2, 4.1, 4.2, 4.5	• Uses appropriate vocabulary, including technical language, in discussions directly relevant to own role • Elicits the views and opinions of others by listening and questioning
Numeracy	2.1-2.6, 4.2	• Interprets relevant mathematical data that may be embedded in tables of fees and charges • Performs calculations required to determine costs and timeframes
Navigate the world of work	1.2, 2.4, 3.5	• Applies knowledge of regulatory compliance frameworks and organisational procedures to achieve expectations
Interact with others	1.2-1.4, 2.1-2.3, 2.5, 2.6, 3.2-3.4, 4.1, 4.2, 4.4, 4.5	• Selects the appropriate form and mode of communication when gathering, confirming and providing information, taking into account purpose and audience • Recognises limitations of own knowledge and skills and collaborates with more experienced work colleagues to supplement knowledge and achieve outcomes
Get the work done	1.1-1.3, 2.2, 2.3, 3.1, 4.2, 4.3, 4.4	• Plans, organises and implements tasks required to achieve required outcomes, including making arrangements with external persons • Recognises and responds to predictable routine problems related to role in immediate work context

Assessment Requirements for BSBINT303 Organise the importing and exporting of goods

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- follow legislative and organisational guidelines for importing and exporting goods
- communicate effectively with managerial and carrier personnel
- accurately calculate the cost of importing or exporting specific goods
- produce accurate documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline legislation, codes of practice and national standards relevant to business operations in an international trade context
- list international and Australian regulatory bodies and their roles and responsibilities
- identify organisational policies and procedures relating to business operations in an international trade context
- briefly outline the process used in the organisation for the importing or exporting of goods
- outline significant trade routes and modes of transport used by the organisation
- explain the penalties for incorrect customs declarations.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – international business field of work and include access to:

- office equipment and resources
- examples of importing and exporting documents

Release 2	This version first released with BSB Business Services Training Package Version 2.0. Version created to correct typographical error
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to correctly operate word processing applications in production of workplace documents.

It applies to individuals who perform a range of routine tasks in the workplace, using a limited range of practical skills and fundamental knowledge of word processing and software in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to produce documents	1.1 Use safe work practices to ensure ergonomic, work organisation, energy and resource conservation requirements are met

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	1.2 Identify document purpose, audience and presentation requirements, and clarify with relevant personnel as required 1.3 Identify organisational and task requirements for document layout and design
2. Produce documents	2.1 Format document using appropriate software functions to adjust page layout to meet information requirements, in accordance with organisational style and presentation requirements 2.2 Use system features to identify and manipulate screen display options and controls 2.3 Use manuals, user documentation and online help to overcome problems with document presentation and production
3. Finalise documents	3.1 Ensure final document is previewed, checked, adjusted and printed in accordance with organisational and task requirements 3.2 Ensure document is prepared within designated timelines and organisational requirements 3.3 Name and store document in accordance with organisational requirements and exit application without information loss/damage

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.1, 2.3, 3.1, 3.3	• Recognises textual information within organisational and task requirements to determine work requirements
Writing	3.1, 3.3	• Records numerical and textual information in accordance with requirements of task
Oral Communication	1.2	• Participates in a variety of spoken exchanges with relevant personnel in an effort to clarify document purpose, audience and presentation requirements
Navigate the world of work	1.1-1.3, 2.1, 3.1-3.3	• Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	1.2	• May seek guidance from more experienced work colleagues

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Get the work done	2.1-2.3, 3.1-3.3	• Understands functions and features of specific computer software and uses these to perform work tasks

Assessment Requirements for BSBITU201 Produce simple word processed documents

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to correct typographical error
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce documents following correct ergonomic, conservation requirements and organisational policies and procedures
- adhere to organisational style manual when formatting documents
- refer to help function and user documentation to rectify document problems
- use system features
- follow designated timelines when preparing documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify basic formatting styles and their effect on formatting, readability and appearance of documents
- describe purpose, use and function of word processing software
- outline organisational requirements for ergonomics, work periods and breaks, and conservation techniques
- describe what is contained in an organisational style guide.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- industry software packages
- computer user information
- relevant legislation and codes of practice
- organisational policies and procedures
- relevant workplace documentation and resources including a style guide and user manuals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBITU202 Create and use spreadsheets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to correctly create and use spreadsheets and charts using spreadsheet software.

It applies to individuals who perform a range of routine tasks in the workplace using a limited range of practical skills and fundamental knowledge of creating spreadsheets in a defined context under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Select and prepare resources	1.1 Adjust workspace, furniture and equipment to suit own ergonomic, work organisation and work health and safety (WHS) requirements 1.2 Use energy and resource conservation techniques to minimise wastage in accordance with organisational and statutory requirements 1.3 Identify spreadsheet task requirements and clarify with relevant personnel as required

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
2. Create simple spreadsheets	2.1 Ensure data is entered, checked and amended in accordance with organisational and task requirements, to maintain consistency of design and layout 2.2 Format spreadsheet using software functions; to adjust page and cell layout to meet information requirements, in accordance with organisational style and presentation requirements 2.3 Ensure formulae are used and tested to confirm output meets task requirements, in consultation with appropriate personnel as required 2.4 Use manuals, user documentation and online help to overcome problems with spreadsheet design and production
3. Produce simple charts	3.1 Select chart type and design that enables valid representation of numerical data and meets organisational and task requirements 3.2 Create chart using appropriate data range in spreadsheet 3.3 Modify chart type and layout using formatting features
4. Finalise spreadsheets	4.1 Ensure spreadsheet and any accompanying charts are previewed, adjusted and printed in accordance with organisational and task requirements 4.2 Ensure data input meets designated timelines and organisational requirements for speed and accuracy 4.3 Name and store spreadsheet in accordance with organisational requirements and exit application without data loss/damage

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 2.4, 4.1, 4.3	• Recognises numerical and textual information within a range of resources to determine and complete work according to requirements
Writing	2.1, 2.3, 3.2, 4.1, 4.3	• Enters and amends routine data into software using a format appropriate to requirements
Oral	1.3, 2.3	• Listens to short and specific instructions and uses questions to clarify understanding

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Communication		• Uses simple mathematical language to confirm and convey requirements
Numeracy	2.1, 2.3, 3.1, 3.2	• Uses basic mathematical skills to create and apply spreadsheet formulae
Navigate the world of work	1.1-1.3, 2.1, 2.2, 3.1, 4.1-4.3	• Recognises, understands and adheres to legislative and organisational requirements in undertaking own work
Interact with others	1.3	• Recognises purpose of various communications directly relevant to own role and clarifies as required
Get the work done	1.3, 2.1-2.4, 3.1-3.3, 4.1-4.3	• Uses key software features and functions in performing specific work tasks

BSBLDR401 Communicate effectively as a workplace leader

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to communicate effectively as a workplace leader, including understanding the context, choosing methods of communication to suit the audience, and following up.

This unit applies to managers, supervisors and team leaders required to communicate with other persons within the workplace.

Communication skills cover a range of methods and contexts within principally structured environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify context for communication	1.1 Identify reason and context for communication 1.2 Identify persons relevant to the communication context 1.3 Clarify specific environment and personnel factors that may impact on the success of the communication

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	1.4 Identify and clearly understand the desired outcome of the communication 1.5 Evaluate available methods of communication against their suitability for the specific communication requirements 1.6 Identify potential barriers to effective communication and develop solutions to minimise impact 1.7 Incorporate relevant business policies, procedures, regulations and legislation into communication processes
2. Clarify message and engage communication	2.1 Undertake communication using media and format relevant to the context 2.2 Incorporate respectful and positive approaches to communications 2.3 Employ two-way processes to ensure receipt and acknowledgement of message 2.4 Seek feedback on communication processes from all parties 2.5 Provide opportunities to clarify and confirm understanding
3. Take follow-up actions	3.1 Maintain record of the communication process and outcomes in line with enterprise policy and procedures 3.2 Identify follow up actions and communicate to relevant persons 3.3 Identify and incorporate opportunities to improve leadership communication processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.7, 3.1, 3.2, 3.3	• Analyses and evaluates textual information from a range of sources to inform communication processes
Writing	2.1, 3.1	• Plans and prepares workplace documentation for relevant stakeholders according to organisational formats
Oral Communication	2.1, 3.2	• Participates in a variety of spoken exchanges with a range of audiences using structure and language to suit

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

		the audience
Navigate the world of work	1.7, 3.1	• Adheres to organisational policies and procedures relevant to own role
Interact with others	1.3, 2.1, 2.2, 2.3, 2.4, 2.5	• Cooperates, collaborates and consults with others to clarify and confirm understanding and seek feedback • Selects and uses appropriate communication conventions and practices to build rapport, seek or present information
Get the work done	1.1, 1.2, 1.4, 1.5, 1.6, 3.1, 3.2, 3.3	• Plans and implements activities and processes to identify and establish communication and record keeping requirements • Uses analytical processes to identify potential problems and generate solutions • Systematically gathers and analyses all relevant information and evaluates options in order to make decisions about communication processes

Assessment Requirements for BSBLDR401 Communicate effectively as a workplace leader

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify the context for communication and adjust approach and responses accordingly
- create and present clear messages choosing method and mode appropriate to the audience and context undertake effective two-way communication from the perspective of a team leader
- identify and record actions required as a result of communication and follow-up in a timely manner.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list effective management communication characteristics
- describe a range of electronic and non-electronic communication methods, including situations where they would or would not be used
- describe the characteristics of effective listening techniques
- explain feedback process and methods
- identify team leadership communication responsibilities
- explain barriers to communication in a workplace context
- describe verbal and non-verbal communication characteristics
- explain the impact of legislation and organisational policies on workplace communication.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR402 Lead effective workplace relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit defines skills, knowledge and outcomes required to use leadership to promote team cohesion. It includes motivating, mentoring, coaching and developing the team and forming the bridge between the management of the organisation and team members.

This unit applies to team leaders, supervisors and new or emerging managers where leadership plays a role in developing and maintaining effective workplace relationships. It applies in any industry or community context.

At this level work will normally be carried out within routine and non-routine methods and procedures, which require planning and evaluation and leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Collect, analyse and communicate information and ideas	1.1 Collect relevant information from appropriate sources and analyse and share with the work team to improve work performance 1.2 Communicate ideas and information in a manner which is appropriate and sensitive to the cultural and social diversity of the

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	audience and any specific needs 1.3 Lead consultation processes to encourage employees to contribute to issues related to their work, and promptly relay feedback to the work team in regard to outcomes 1.4 Seek and value contributions from internal and external sources in developing and refining new ideas and approaches 1.5 Implement processes to ensure that issues raised are resolved promptly or referred to relevant personnel as required
2. Develop trust and confidence as leader	2.1 Treat all internal and external contacts with integrity, respect and empathy 2.2 Use the organisation's social, ethical and business standards to develop and maintain effective relationships 2.3 Gain and maintain the trust and confidence of colleagues, customers and suppliers through competent performance 2.4 Adjust interpersonal styles and methods to meet organisation's social and cultural environment 2.5 Lead and encourage other members of the work team to follow examples set according to organisation's policies and procedures
3. Develop and maintain networks and relationships	3.1 Use networks to identify and build relationships 3.2 Use networks and other work relationships to provide identifiable benefits for the team and organisation
4. Manage difficulties into positive outcomes	4.1 Identify and analyse difficulties and take action to rectify the situation within the requirements of the organisation and relevant legislation 4.2 Guide and support colleagues to resolve work difficulties 4.3 Regularly review and improve workplace outcomes in consultation with relevant personnel 4.4 Manage poor work performance within the organisation's processes 4.5 Manage conflict constructively within the organisation's processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Assessment Requirements for BSBLDR402 Lead effective workplace relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- access and analyse information to achieve planned outcomes
- apply techniques for resolving problems and conflicts and dealing with poor performance within organisational and legislative requirements
- review and improve workplace outcomes in consultation with relevant personnel
- adjust interpersonal style and communications to respond to cultural and social diversity
- apply relationship management and communication skills with a range of people that:
  - demonstrate integrity, respect, empathy and cultural sensitivity and promote trust
  - forge effective relationships with internal and/or external people and help to maintain these networks
  - encourage participation and foster contribution of and respect for ideas and feedback
  - provide support to colleagues to resolve difficulties.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of how work relationships, and the cultural and social environment, can support or hinder achieving planned outcomes
- explain techniques for developing positive work relationships and building trust and confidence in a team including interpersonal styles, communications, consultation, cultural and social sensitivity, networking
- explain the impact of legislation and organisational policies on workplace relationships
- describe a range of methods and techniques for communicating information and ideas to a range of stakeholders
- outline problems solving methods

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- explain methods to resolve workplace conflict
- explain methods to manage poor work performance
- explain how to monitor, analyse and introduce ways to improve work relationships.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR403 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit defines skills, knowledge and outcomes required to plan and supervise the performance of the team and develop team cohesion.

It applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams.

Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan to achieve team outcomes	1.1 Lead the team to identify, establish and document team purpose, roles, responsibilities, goals, plans and objectives in consultation with team members 1.2 Engage team members to incorporate innovation and

Assessment Requirements for BSBLDR403 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply knowledge of organisational goals, objectives and plans
- develop a team work plan including documentation of how it was generated and how it will be monitored
- identify and incorporate innovation and productivity measures into a team work plan
- communicate with team members and management to identify and establish the team purpose, roles, responsibilities, goals plans and objectives and resolve problems
- use techniques to consult, encourage, support and provide feedback to team members
- model team leadership behaviours and approaches
- liaise with management to develop the teamwork plan, resolve issues and ensure follow-up action is taken.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must explain principles and techniques associated with:

- delegation and work allocation
- goal setting
- group dynamics and processes
- individual behaviour and difference
- leadership styles
- motivation
- negotiation
- problem solving
- planning

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- workplace innovation
- workplace productivity.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- information about the organisation, including organisational structure, goals, objectives and plans
- case studies, and where possible, real situations
- workplace equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLED401 Develop teams and individuals

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify assessment requirements
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine individual and team development needs and to facilitate the development of the workgroup.

It applies to individuals with a broad knowledge of learning and development who apply their skills in addressing development needs to meet team objectives. They may have responsibility to provide guidance or to delegate aspects of tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Learning and Development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Determine development needs	1.1 Systematically identify and implement learning and development needs in line with organisational requirements 1.2 Ensure that a learning plan to meet individual and group training and development needs is collaboratively developed, agreed to and

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	implemented 1.3 Encourage individuals to self-evaluate performance and identify areas for improvement 1.4 Collect feedback on performance of team members from relevant sources and compare with established team learning needs
2. Develop individuals and teams	2.1 Identify learning and development program goals and objectives, ensuring a match to the specific knowledge and skill requirements of competency standards relevant to the industry 2.2 Ensure that learning delivery methods are appropriate to the learning goals, the learning style of participants, and availability of equipment and resources 2.3 Provide workplace learning opportunities, and coaching and mentoring assistance to facilitate individual and team achievement of competencies 2.4 Create development opportunities that incorporate a range of activities and support materials appropriate to the achievement of identified competencies 2.5 Identify and approve resources and time lines required for learning activities in accordance with organisational requirements
3. Monitor and evaluate workplace learning	3.1 Use feedback from individuals or teams to identify and implement improvements in future learning arrangements 3.2 Assess and record outcomes and performance of individuals/teams to determine the effectiveness of development programs and the extent of additional development support 3.3 Negotiate modifications to learning plans to improve the efficiency and effectiveness of learning 3.4 Document and maintain records and reports of competency according to organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Learning	1.1-1.4, 2.1-2.4, 3.1, 3.3	• Uses structured approaches to set goals, monitor progress and adjust learning approaches for self and others • Builds on knowledge and experience to facilitate interaction and learning with others
Reading	1.1, 1.2, 1.4, 2.1, 2.2, 2.4, 2.5, 3.1-3.4	• Analyses textual information from a range of sources to identify organisational requirements • Analyses information from a range of sources to evaluate performance
Writing	1.1, 1.2, 1.4, 2.1, 2.5, 3.1-3.4	• Develops materials to suit the requirements of different roles and individuals in the organisation • Maintains records using correct technical and organisational vocabulary
Oral Communication	1.2, 1.3, 1.4, 2.3, 3.1, 3.3	• Uses vocabulary appropriate to context and to establish a supportive and learning environment • Uses listening and questioning techniques to confirm or show understanding of different perspectives
Navigate the world of work	1.1, 2.5, 3.4	• Recognises and responds to explicit and implicit organisational procedures and protocols Understands how own role meshes with others and contributes to broader goals
Interact with others	1.2, 1.3, 1.4, 2.2, 2.3, 3.1, 3.3	• Selects and uses appropriate conventions and protocols when communicating with co-workers in a range of work contexts • Recognises the importance of building rapport to establish effective working relationships • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction • Negotiates with others to achieve joint/agreeable outcomes playing an active role in facilitating consensus in potentially contentious situations
Get the work done	1.1, 1.2, 1.4, 2.1, 2.2, 2.3, 2.5, 3.1, 3.2, 3.4	• Uses logical planning processes to organise, implement and monitor learning and development needs • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Evaluates outcomes of decisions to identify opportunities for improvement

Assessment Requirements for BSBLED401 Develop teams and individuals

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify assessment requirements
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- systematically identify and implement learning opportunities for others
- collect feedback on team and individual performance
- give and receive feedback from team members to encourage participation in and effectiveness of the team
- collaboratively develop learning plans to match skill needs of individuals and groups
- provide mentoring and coaching assistance to teams and individuals
- monitor and review workplace learning.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe facilitation techniques to encourage team development and improvement
- outline organisational policies, plans and procedures for developing teams
- identify career paths and competency standards relevant to the industry.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce learning and development field of work and include access to:

- office equipment and resources
- learning and development plans, policies and procedures
- case studies and, where available, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBMGT401 Show leadership in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead teams and individuals by modelling high standards of conduct to reflect the organisation's standards and values.

It applies to individuals who are making the transition from being a team member to taking responsibility for the work and performance of others and providing the first level of leadership within the organisation. These managers have a strong influence on the work culture, values and ethics of the teams they supervise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Model high standards of management performance and behaviour	1.1 Ensure management performance and behaviour meets the organisation’s requirements 1.2 Ensure management performance and behaviour serves as a positive role model for others 1.3 Develop and implement performance plans in accordance with organisation’s goals and objectives 1.4 Establish and use key performance indicators to meet

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	organisation's goals and objectives
2. Enhance organisation's image	2.1 Use organisation's standards and values in conducting business 2.2 Question, through established communication channels, standards and values considered to be damaging to the organisation 2.3 Ensure personal performance contributes to developing an organisation which has integrity and credibility
3. Make informed decisions	3.1 Gather and organise information relevant to the issue/s under consideration 3.2 Facilitate individual's and team's active participation in decision-making processes 3.3 Examine options and assess associated risks to determine preferred course/s of action 3.4 Ensure decisions are timely and communicate them clearly to individuals and teams 3.5 Prepare plans to implement decisions and ensure they are agreed by relevant individuals and teams 3.6 Use feedback processes effectively to monitor the implementation and impact of decisions

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.1, 3.1, 3.3, 3.5, 3.6	• Gathers, interprets and analyses text relating to organisational goals, standards and values to aid planning and decision making
Writing	1.3, 1.4, 3.1, 3.3, 3.5, 3.6	• Records and reports key information related to the organisational goals, standards and objectives • Researches, plans and prepares documentation for relevant stakeholders
Oral Communication	1.2, 1.3, 2.2, 2.3, 3.2, 3.4, 3.5, 3.6	• Uses appropriate structure and language when developing performance plans, or when seeking and providing information about organisational goals and

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

		objectives
Numeracy	1.4	• Identifies and comprehends mathematical information in familiar texts to establish key performance indicators
Navigate the world of work	1.1, 1.2, 1.3, 1.4, 2.1, 2.3	• Understands how own role meshes with others and contributes to broader work goals • Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.2, 1.3, 2.2, 2.3, 3.2, 3.4, 3.5, 3.6	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective outcomes • Recognises the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate with whom, why and how
Get the work done	1.1, 1.3, 1.4, 3.1, 3.2, 3.3, 3.4, 3.5, 3.6	• Develops plans to manage relatively complex, non-routine tasks with an awareness of how they contribute to longer term operational and strategic goals • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Evaluates effectiveness of decisions in terms of how well they meet stated goals

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Organisation's standards and values must be identified by considering:	• explicitly stated values • values that are implied by the way the organisation conducts its business.

Assessment Requirements for BSBMGT401 Show leadership in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify the organisation's standards and values, whether stated or implied by the way the organisation conducts its business
- evaluate own behaviour and performance against these and adjust to achieve required standards
- develop and implement performance plans and key performance indicators (KPIs) to meet organisation's goals and objectives
- use established communication channels to raise questions about standards and values that may be damaging to the organisation
- ensure own behaviour and performance contributes to the integrity and credibility of the organisation
- facilitate processes to make decisions that are based on:
  - relevant information
  - examination of options and associated risks
  - input from relevant people
- communicate about making and implementing decisions including:
  - facilitating agreement on the preferred course of action and implementation plans
  - monitoring and feedback on the implementation and impact of decisions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how to identify an organisation's standards and values when they are:
  - stated

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - implied
- articulate organisational values and expectations of behaviour
- explain basic theory of group behaviour
- outline the organisation's process for raising questions about standards and values
- give examples of behaviours and performance that would typically be considered damaging to an organisation
- explain concepts including:
  - organisational values
  - role modelling
  - integrity and credibility
  - leadership.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT402 Implement operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the operational plan by monitoring and adjusting operational performance, planning and acquiring resources and providing reports on performance as required.

It applies to individuals who plan activities to achieve the measurable, stated objectives of the team and the organisation. At this level work will normally be carried out within routine and non-routine methods and procedures which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement operational plan	1.1 Collate, analyse and organise details of resource requirements in consultation with relevant personnel, colleagues and specialist resource managers 1.2 Implement operational plans to contribute to the achievement of organisation's performance/business plan 1.3 Identify and use key performance indicators (KPIs) to monitor

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	operational performance 1.4 Manage contingencies by adjusting the implementation of the operational plan in consultation with others 1.5 Provide assistance in the development and presentation of proposals for resource requirements in line with operational planning processes
2. Implement resource acquisition	2.1 Recruit and induct employees within organisation's policies, practices and procedures 2.2 Implement plans for acquisition of physical resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel
3. Monitor operational performance	3.1 Monitor performance systems and processes to assess progress in achieving profit/productivity plans and targets 3.2 Analyse and use budget and actual financial information to monitor profit/productivity performance 3.3 Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies 3.4 Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely 3.5 Present recommendations for variation to operational plans to the designated persons/groups and gain approval 3.6 Implement systems, procedures and records associated with performance in accordance with organisation's requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.4	• Actively reinforces learning by applying new knowledge and skills in mentoring, coaching and supervising others
Reading	1.1-1.5, 2.1, 2.2, 3.1, 3.2, 3.6	• Identifies, interprets, analyses and reviews textual information related to the operational plan and

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

		monitoring of operational performance
Writing	1.1-1.5, 2.1, 2.2, 3.2-3.6	• Communicates relationships between ideas and information, matching style of writing to purpose and audience • Researches, plans and prepares workplace documentation for relevant stakeholders using organisational formats
Oral Communication	1.1, 1.4, 1.5, 2.1, 2.2, 3.3, 3.4, 3.5	• Participates in a variety of spoken exchanges with a range of audiences varying structure and language to suit the audience
Numeracy	1.1, 1.2, 1.3, 1.4, 1.5, 2.2, 3.1, 3.2, 3.3	• Selects and uses familiar mathematical techniques to organise timely supply of adequate resources for the operational plan and to use budgetary information to monitor performance
Navigate the world of work	1.5, 2.1, 2.2, 3.3, 3.4, 3.6	• Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.4, 1.5, 2.1, 2.2, 3.3, 3.4, 3.5	• Selects and uses appropriate conventions and protocols when communicating with diverse individuals to build rapport, seek or present information • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group communication, influencing direction and taking a leadership role on occasion
Get the work done	1.1, 1.2, 1.3, 1.4, 1.5, 2.2, 3.1, 3.2, 3.3, 3.6	• Takes responsibility for planning, organising, implementing and monitoring tasks required to achieve required outcomes • Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria • Evaluates effectiveness of decisions in terms of how well they met stated goals • Recognises and addresses an increasing range of familiar problems by implementing contingency plans

BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the organisation's continuous improvement systems and processes. It covers using systems and strategies to actively encourage the team to participate in the process, monitoring and reviewing performance, and identifying opportunities for further improvements.

It applies to managers who have an active role in implementing the continuous improvement process to achieve the organisation's objectives. Their position is closely associated with the creation and delivery of products and services which means that they have an important role in influencing the ongoing development of the organisation.

At this level, work will normally be carried out within routine and non-routine methods and procedures, which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement continuous improvement systems and	1.1 Implement systems to ensure that individuals and teams are actively encouraged and supported to participate in decision

Assessment Requirements for BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- implement continuous improvement systems and provide mentoring and coaching support to enable individuals and teams to participate in decisions, take responsibility, show initiative and implement improvement processes
- implement processes to inform team members about savings and productivity/service improvements achievements
- communicate effectively to support the continuous improvement system and implementation of improvements
- apply continuous improvement to customer services including internal and external customers
- implement, monitor and adjust improvement plans, processes and procedures to improve performance
- document performance to identify further opportunities for improvement
- manage records and reports within the organisation's systems and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of continuous improvement processes
- list typical areas of need for coaching and mentoring to support continuous improvement
- explain how change management techniques can support continuous improvement and initiative
- identify the organisation's systems and data that can be used for benchmarking and monitoring performance for continuous improvement.

BSBMKG501 Identify and evaluate marketing opportunities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify, evaluate and take advantage of marketing opportunities by analysing market data, distinguishing characteristics of possible markets and assessing viability of changes to operations.

It applies to individuals working in a supervisory or management marketing or advertising role within a marketing or advertising team or media organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify marketing opportunities	1.1 Analyse information on market and business needs to identify marketing opportunities 1.2 Research potential new markets and assess opportunities to enter, shape or influence each market, and the likely contribution to the business 1.3 Explore entrepreneurial, innovative approaches and creative ideas for their potential business application, and develop into potential marketing opportunities

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
2. Investigate marketing opportunities	2.1 Identify and analyse opportunities in terms of their likely fit with organisational goals and capabilities 2.2 Evaluate each opportunity to determine its impact on current business and customer base 2.3 Use an assessment of external factors, costs, benefits, risks and opportunities to determine the financial viability of each marketing opportunity 2.4 Determine probable return on investment and potential competitors 2.5 Describe and rank marketing opportunities on their viability, and likely contribution to the business
3. Evaluate required changes to current operations	3.1 Identify and document changes needed to current operations to take advantage of viable marketing opportunities 3.2 Ensure organisational changes to service an increased or different customer base including provision for continued quality of service to existing customers 3.3 Estimate resource requirements for changed operations 3.4 Determine and communicate viability of making changes to current operations to key stakeholders 3.5 Document newly identified marketing opportunities and required changes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.4, 3.1	• Evaluates and comprehends textual information from a range of sources and draws own conclusions
Writing	1.1-1.3, 2.5, 3.1, 3.4, 3.5	• Integrates information from a number of sources to develop material that supports purposes of documentation using suitable grammatical structure and clear, logical language
Oral Communication	2.5, 3.4	• Presents opinions, ideas and organisational requirements clearly and creatively using language and presentation techniques appropriate to audience and

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

		environment • Elicits views and opinions of others by listening and questioning
Numeracy	2.3, 2.4, 3.3	• Evaluates financial and marketing data using whole numbers, decimals and percentages to make accurate calculations
Navigate the world of work	2.1	• Recognises and follows explicit and implicit organisational protocols and meets expectations associated with own role
Interact with others	2.5, 3.4	• Selects appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.1-1.3, 2.1-2.4, 3.1, 3.2, 3.3, 3.4	• Develops plans to manage relatively complex tasks with an awareness of how they may contribute to longer-term operational and strategic goals • Makes decisions by systematically analysing information, identifying and evaluating options against set criteria, and choosing most appropriate option • Evaluates outcomes of decisions to identify opportunities for improvement • Develops new and innovative ideas through exploration, analysis and critical thinking

Assessment Requirements for BSBMKG501 Identify and evaluate marketing opportunities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and evaluate marketing opportunities to determine whether they can meet organisational objectives
- document how current business operations need to be modified, and list resources required, to take advantage of newly identified and evaluated opportunities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key provisions of relevant legislation, codes of practice and national standards affecting marketing operations
- describe organisational marketing plan, structure, products and services
- explain principles of marketing and marketing mix
- describe statistical methods and techniques to evaluate marketing opportunities, including forecasting techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- organisational strategic and marketing plans
- case studies and, where possible, real situations.

BSBMKG507 Interpret market trends and developments

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conduct an analysis of market data in order to determine organisational and competitor business performance and to prepare market and business forecasts. The information assists in developing an organisation's marketing plan and to determine the current or potential future success of marketing strategies.

This unit applies to marketing professionals who use statistical techniques to analyse organisational and competitor marketing performance and to interpret new and emerging trends when forecasting future business needs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Interpret trends and market developments	1.1 Use statistical analysis of market data to interpret market trends and developments 1.2 Analyse market trends and developments for their potential impact on the business 1.3 Use measures of central tendency or dispersion and correlations between sets of data for quantitative interpretation of comparative

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	market data 1.4 Perform qualitative analysis of comparative market information as a basis for reviewing business performance 1.5 Analyse the market performance of existing and potential competitors and their products or services to identify potential opportunities or threats
2. Analyse qualitative results	2.1 Analyse performance data from all areas of the business to determine success of marketing activities 2.2 Identify over-performing and under-performing products and services to be considered for redevelopment or withdrawal 2.3 Forecast existing and emerging market needs based on information available using forecasting techniques
3. Report on market data	3.1 Prepare, plot and interpret data for visual presentation 3.2 Assess visual presentation for potential problems, and take any necessary corrective action 3.3 Report on analysis of market data to meet organisational requirements in terms of content, format, level of detail and scheduling

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.5, 2.1, 2.3	• Researches, evaluates, analyses and interprets market information from a range of sources, and interprets requirements
Writing	3.1, 3.2, 3.3	• Prepares reports containing complex ideas and concepts and writes in a range of styles to suit different audiences
Numeracy	1.1-1.5, 2.1, 2.3	• Collects, organises and analyses data to draw conclusions or make forecasts about trends and probability • Uses specialised statistical analysis techniques
Oral Communication	3.1, 3.3	• Presents information to a range of audiences using appropriate vocabulary and non-verbal features

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Interact with others	3.1, 3.3	• Demonstrates sophisticated control over oral, visual and/or written formats, drawing on a range of communication practices to present findings
Get the work done	1.1, 1.2, 1.4, 1.5, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3	• Develops plans and uses effective organisational and time management skills to complete tasks with an awareness of how they may contribute to longer term operational and strategic goals • Applies systematic and analytical decision making processes in complex and non-routine situations • Uses digital technologies and systems to enter and analyse data and to present information

Assessment Requirements for BSBMKG507 Interpret market trends and developments

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply statistical and qualitative analysis techniques to identify:
  - current business performance
  - competitor performance
  - potential threats and opportunities
- apply qualitative and forecasting techniques to identify:
  - success of marketing activities
  - over and under-performing products and services
  - existing and emerging market needs
- document the analysis of market data including visual presentation of findings.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline internal and external sources of information relevant to forecasting market trends including:
  - business and strategic objectives
  - marketing and other business performance
  - comparative market information
  - changes in technology
  - demographic changes
  - social and cultural factors
  - economic trends

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - government activities and legislative changes
  - industry trends
  - supplier data
- outline the legislative and regulatory context as it applies to marketing
- identify software applications that are commonly used in quantitative and qualitative analysis and outline their key features
- outline statistical concepts, methods, techniques and reporting formats commonly used in marketing including:
  - conversion rate of leads to sales
  - measures of central tendency
  - measures of dispersion
  - nature and degree of relationship between variables
  - net response rate
  - normal distribution probability curve
  - sampling
  - speed of response curve
  - recency or frequency grids
  - lifetime value of customers
  - net present value of customers.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG514 Implement and monitor marketing activities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to apply and observe marketing plan objectives and action necessary improvements.

It applies to individuals who possess a sound theoretical knowledge base in advertising management, and demonstrate a range of managerial skills. In this role, they usually lead and coordinate a marketing team, implement a marketing plan, monitor performance of marketing strategies and evaluate their effectiveness.

They also involve team members in identifying improvements for marketing strategies and formulating recommendations for future marketing activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement marketing strategies and tactics	1.1 Brief stakeholders who participated in the marketing planning process on their implementation roles and responsibilities 1.2 Identify and brief marketing and non-marketing personnel critical to success of the marketing plan, on objectives,

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	performance measures, and their roles and responsibilities 1.3 Prioritise marketing strategies and identify resources for their implementation, in accordance with organisational requirements 1.4 Implement communication and team building strategies to ensure personnel responsible for each element of the marketing mix work together to meet the organisation's marketing objectives 1.5 Implement strategies for monitoring marketing activities and analysing marketing performance, in accordance with marketing plan
2. Monitor marketing strategies and tactics	2.1 Monitor and implement promotional activity against communication objectives in the marketing plan 2.2 Monitor product, pricing and distribution decisions against organisational policy and objectives of the marketing plan 2.3 Monitor marketing results against targets in the marketing plan 2.4 Monitor marketing revenue and costs against budget, and analyse record variations 2.5 Prepare and present marketing reports indicating ongoing progress towards marketing objectives
3. Evaluate and improve marketing performance	3.1 Regularly assess marketing performance against objectives 3.2 Identify opportunities for improvement through discussion with customers and personnel responsible for each element of marketing mix 3.3 Change business practices in line with changing customer requirements to maintain business relevance and viability 3.4 Document recommendations for improvement in accordance with organisational requirements 3.5 Communicate changes to marketing objectives and targets with relevant stakeholders, to facilitate implementation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Reading	1.3-1.5, 2.1-2.4, 3.1, 3.4	• Identifies and evaluates textual information to determine business achievements against workplace objectives
Writing	1.1, 1.2, 2.5, 3.4, 3.5	• Uses clear, accurate and relevant language to organise and record information and complete workplace documentation
Oral Communication	1.1, 1.2, 1.4, 1.5, 2.5, 3.2, 3.5	• Participates in verbal exchanges using appropriate language and non-verbal features • Elicits views and opinions of others using active listening and questioning
Numeracy	1.3, 2.2-2.4	• Uses mathematical techniques to analyse marketing performance, resource availability, revenue and cost
Navigate the world of work	1.3-1.5, 2.1-2.3, 2.5, 3.1, 3.4	• Monitors adherence to organisational policies and objectives and considers own role in terms of its contribution to broader goals of work environment
Interact with others	1.1, 1.2, 1.4, 1.5, 2.5, 3.2, 3.5	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction • Recognises importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate with whom, why and how
Get the work done	1.2, 1.3, 1.5, 2.1, 2.3, 2.4, 3.2, 3.3	• Develops plans and uses effective time management and organisational skills to complete tasks with an awareness of how they may contribute to longer-term operational and strategic goals • In more complex, non-routine situations, uses formal decision-making processes, setting or clarifying goals, gathering information and identifying and evaluating several choices against a limited set of criteria • When dealing with complex issues identifies cause of the problem, and uses analytical processes to generate possible solutions

Assessment Requirements for BSBMKG514 Implement and monitor marketing activities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- successfully implement marketing strategies identified in an organisation's marketing plan
- coordinate personnel involved in conducting marketing activities
- monitor, evaluate and report on marketing activities against defined objectives
- modify marketing activities in line with new or emerging trends.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline organisational strategic and marketing objectives, plans and performance measures
- summarise principles of marketing mix
- explain key provisions of relevant legislation, codes of practice and national standards affecting marketing operations.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- office equipment and resources
- relevant legislation, regulations, standards and codes
- organisational and marketing strategic plans
- case studies and, where possible, real situations
- interaction with others.

BSBPMG522 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake a straightforward project or a section of a larger project. It covers developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learned for application to future projects.

This unit applies to individuals who play a significant role in ensuring a project meets timelines, quality standards, budgetary limits and other requirements set for the project.

The unit does not apply to specialist project managers. For specialist project managers, the other units of competency in the project management field (BSBPMG) will be applicable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Define project	1.1 Access project scope and other relevant documentation 1.2 Define project stakeholders 1.3 Seek clarification from delegating authority of issues related to

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	project and project parameters 1.4 Identify limits of own responsibility and reporting requirements 1.5 Clarify relationship of project to other projects and to the organisation's objectives 1.6 Determine and access available resources to undertake project
2. Develop project plan	2.1 Develop project plan in line with the project parameters 2.2 Identify and access appropriate project management tools 2.3 Formulate risk management plan for project, including Work Health and Safety (WHS) 2.4 Develop and approve project budget 2.5 Consult team members and take their views into account in planning the project 2.6 Finalise project plan and gain necessary approvals to commence project according to documented plan
3. Administer and monitor project	3.1 Take action to ensure project team members are clear about their responsibilities and the project requirements 3.2 Provide support for project team members, especially with regard to specific needs, to ensure that the quality of the expected outcomes of the project and documented time lines are met 3.3 Establish and maintain required recordkeeping systems throughout the project 3.4 Implement and monitor plans for managing project finances, resources and quality 3.5 Complete and forward project reports as required to stakeholders 3.6 Undertake risk management as required to ensure project outcomes are met 3.7 Achieve project deliverables
4. Finalise project	4.1 Complete financial recordkeeping associated with project and check for accuracy 4.2 Ensure transition of staff involved in project to new roles or reassignment to previous roles 4.3 Complete project documentation and obtain necessary sign-offs for concluding project
5. Review project	5.1 Review project outcomes and processes against the project scope and plan

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	5.2 Involve team members in the project review 5.3 Document lessons learned from the project and report within the organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 3.4, 3.5, 4.1, 4.3, 5.1	• Organises, evaluates and critiques ideas and information from a range of complex texts
Writing	2.1, 2.3, 2.6, 3.3, 3.5, 4.1, 4.3, 5.3	• Develops plans, reports and recommendations using vocabulary, structure and conventions appropriate to text • Establishes and maintains records according to organisational requirements
Numeracy	1.6, 2.4, 3.4, 4.1	• Uses formal and some informal, oral and written mathematical language and representation to prepare and communicate budgetary and financial information
Oral communication	2.5, 5.2	• Participates in verbal discussions using clear language and appropriate features to present or seek information • Using listening and questioning skills to seek information and confirm understanding
Navigate the world of work	1.3, 1.4, 2.3, 3.1, 4.3	• Recognises and responds to organisational and legislative/regulatory requirements
Interact with others	2.5, 3.1, 3.2, 4.2, 5.2	• Selects and uses appropriate communication protocols and practices to ensure shared understanding of project roles and expectations • Uses collaborative techniques to engage stakeholders in consultations and negotiations
Get the work done	1.2, 1.5, 1.6, 2.1, 2.2, 2.3, 2.6, 3.1-3.7, 4.1, 4.2, 4.3, 5.1, 5.3	• Develops and implements plans to manage projects that involve diverse stakeholders with potentially competing demands • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Evaluates outcomes of decisions to identify

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

		opportunities for improvement • Uses digital technologies and applications to access, organise and share information

Assessment Requirements for BSBPMG522 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- define the parameters of the project including:
  - project scope
  - project stakeholders, including own responsibilities
  - relationship of project to organisational objectives and other projects
  - reporting requirements
  - resource requirements
- use project management tools to develop and implement a project plan including:
  - deliverables
  - work breakdown
  - budget and allocation of resources
  - timelines
  - risk management
  - recordkeeping and reporting
- consult and communicate with relevant stakeholders to generate input and engagement in planning, implementing and reviewing the project
- provide support to team members to enable them to achieve deliverables and to transition them as appropriate at completion of the project
- finalise the project including documentation, sign-offs and reporting
- review and document the project outcomes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- give examples of project management tools and how they contribute to a project
- outline types of documents and other sources of information commonly used in defining the parameters of a project
- explain processes for identifying and managing risk in a project
- outline the organisation's mission, goals, objectives and operations and how the project relates to them
- explain the organisation's procedures and processes that are relevant to managing a project including:
  - lines of authority and approvals
  - quality assurance
  - human resources
  - budgets and finance
  - recordkeeping
  - reporting
- outline the legislative and regulatory context of the organisation in relation to project work, including work health and safety (WHS) requirements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

BSBRES411 Analyse and present research information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to gather, organise, analyse and present workplace information using available systems and sources. This includes identifying research requirements and sources of information, applying information to a set of facts, evaluating the quality and reliability of the information, and preparing and producing reports.

It applies to individuals in roles in which they are required to apply their broad knowledge of the work environment to analysis and research tasks, evaluate information from a variety of sources and apply solutions to a range of predictable and unpredictable problems.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Research

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify reliable sources of research information	1.1 Identify potential sources for research information relevant to the organisation requirements 1.2 Assess reliability of potential sources, considering accuracy, authority, audience, relevance and likelihood of bias 1.3 Access research information and extract in a format suitable for analysis, interpretation and dissemination in accordance with

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	organisational requirements 1.4 Store research information, in accordance with organisational requirements
2. Analyse and synthesise research information	2.1 Clearly define objectives of research ensuring consistency with organisational requirements 2.2 Ensure that information research strategies are relevant to the requirements of the research and aligned to organisational objectives 2.3 Apply information research strategy to obtain relevant information, identifying themes and drawing conclusions in line with established objectives of research 2.4 Demonstrate that assumptions and conclusions used in analyses are clear, justified, supported by evidence and consistent with research and business objectives
3. Present research information	3.1 Identify appropriate methods of reporting, considering the intended audience and relevant organisational requirements 3.2 Report on findings in an appropriate format, style and structure within a pre-determined timeframe 3.3 Report and distribute research findings in accordance with organisational requirements 3.4 Obtain feedback and comments on suitability and sufficiency of findings in accordance with organisational requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Analyses and evaluates textual information to develop information research strategies, integrate facts and ideas and meet organisational requirements
Writing	• Gathers, evaluates and integrates information from a range of sources • Presents findings, recommendations and issues in required format using language, structure and style appropriate to audience
Oral	• Presents recommendations and issues using language appropriate to

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Communication	audience and according to organisational requirements
Navigate the world of work	• Recognises and follows organisational policies and procedures and meets expectations associated with own role
Interact with others	• Selects and uses appropriate communication practices when seeking or sharing information
Get the work done	• Plans, organises and implements tasks to meet organisational requirements • Takes responsibility for the outcomes of routine decisions related directly to own role • Uses the main features and functions of digital technologies and tools to complete work tasks • Recognises and takes responsibility for addressing foreseeable problems in familiar work contexts

Assessment Requirements for BSBRES411 Analyse and present research information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- identify research requirements and objectives
- gather, organise and present research information
- communicate effectively with research stakeholders to clarify requirements
- maintain and handle information and documents systematically and securely
- preparing reports on research findings including:
  - recommendations based on the analysis of research information
  - clear and justified assumptions and conclusions
  - use of efficient and reliable research methods
- analyse, evaluate and interpret research information to support organisational activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:

- Key features of organisational policies and procedures relating to:
  - the access of digital information
  - the storage/transmission of information
  - legal and ethical obligations relating to workplace information
- key concepts related to research and analysis including reliability and validity
- key features of research processes and strategies to identify new sources (online and print) of information and efficient and effective use.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- workplace information systems, equipment and resources
- workplace policies and procedures
- case studies and, where possible, real situations in the workplace.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBRSK401 Identify risk and apply risk management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify risks and to apply established risk management processes to a defined area of operations that are within the responsibilities and obligations of the role.

It applies to individuals with a broad knowledge of risk analysis or project management who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

In this unit, risks applicable within own work responsibilities and area of operation, may include projects being undertaken individually or by a team, or operations within a section of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Risk Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify risks	1.1 Identify the context for risk management 1.2 Identify risks using tools, ensuring all reasonable steps have

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	been taken to identify all risks 1.3 Document identified risks in accordance with relevant policies, procedures, legislation and standards
2. Analyse and evaluate risks	2.1 Analyse and document risks in consultation with relevant stakeholders 2.2 Undertake risk categorisation and determine level of risk 2.3 Document analysis processes and outcomes
3. Treat risks	3.1 Determine appropriate control measures for risks and assess for strengths and weaknesses 3.2 Identify control measures for all risks 3.3 Refer risks relevant to whole of organisation or having an impact beyond own work responsibilities and area of operation to others as per established policies and procedures 3.4 Choose and implement control measures for own area of operation and/or responsibilities 3.5 Prepare and implement treatment plans
4. Monitor and review effectiveness of risk treatment/s	4.1 Regularly review implemented treatment/s against measures of success 4.2 Use review results to improve the treatment of risks 4.3 Provide assistance to auditing risk in own area of operation 4.4 Monitor and review management of risk in own area of operation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2	• Comprehends documents and texts of varying complexity to extract and analyse relevant information
Writing	1.3, 2.1, 2.3, 3.5	• Uses specific, industry related terminology and logical organisational structure in workplace documents that identify and analyse risk and report management process outcomes

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Oral communication	2.1	• Participates effectively in interactions with stakeholders by using questioning and listening to elicit opinions and clarify understanding
Numeracy	1.2, 4.1	• Uses numerical tools to assess risk and uses numerical data to review plans
Navigate the world of work	1.1, 1.3, 3.3	• Complies with organisational and legislative requirements • Takes responsibility for identification and management of risk within own work context and refers matters to others as required
Interact with others	2.1	• Selects appropriate communication protocols and conventions when conferring with others to establish risk management requirements
Get the work done	1.1, 1.2, 2.1, 2.2, 3.1, 3.2, 3.4, 3.5, 4.1, 4.2, 4.3, 4.4	• Determines job sequence and works logically and systematically to undertake defined tasks • Uses analysis and consultative processes to inform decisions about selection and implementation of risk control measures • Evaluates effectiveness of plans and results to inform improvement decisions • Uses familiar digital technologies and systems to access information, prepare plans and communicate with others

Assessment Requirements for BSBRSK401 Identify risk and apply risk management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to apply organisational policies, procedures and processes to:

- identify risks
- consult with relevant stakeholders to analyse and evaluate risks
- identify and evaluate control measures
- develop and implement treatment plans for own area or responsibility
- refer risks that are beyond own area of responsibility to others
- maintain risk management documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline techniques for identifying and evaluating risks
- outline organisational policies, procedures or processes for risk management
- give examples of areas where risks are commonly identified in an organisation
- outline the purpose and key elements of current risk management standards
- outline the legislative and regulatory context of the organisation in relation to risk management
- describe the organisation's auditing requirements relating to risk management.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk - risk management field of work and include access to:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBSMB301 Investigate micro business opportunities

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to consider the major elements of a business idea, undertake research to determine viability of the business opportunity and present the idea with reference to the legislative frameworks affecting the business.

It applies to individuals who are establishing or operating a micro business for self-employment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Describe business ideas	1.1 Gather information for business ideas from appropriate sources 1.2 List details of business ideas and opportunities 1.3 Research alternative business ideas in light of available

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	resources 1.4 Specify and list products and services to match business ideas 1.5 Identify and research potential customer information for business ideas 1.6 Identify and take into account available financial, digital technology, business and technical skills when researching business opportunities
2. Identify market needs	2.1 Collect information regarding market size and potential from appropriate sources 2.2 Investigate market trends and developments to identify market needs relative to business ideas 2.3 Gather market information from primary and secondary sources to identify possible market needs in relation to business ideas 2.4 Identify ethical and cultural requirements of the market, and their relevance for business ideas 2.5 Identify new and emerging markets and document their features 2.6 Identify and organise information on expected market growth or decline and associated risk factors
3. Investigate factors affecting the market	3.1 Identify projected changes in population, economic activity and labour force that may impact business ideas 3.2 Identify movements in prices, and projected changes in availability of resources 3.3 Review trends and developments and identify their potential impact on business ideas

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.5, 2.1-2.6, 3.1-3.3	• Analyses and evaluates textual information to develop research strategies, integrate facts and ideas and meet

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

		business requirements
Writing	1.1, 1.2, 1.4, 1.5, 2.3, 2.5	• Uses factual information and industry related terminology to complete required documentation
Oral Communication	1.1, 1.5, 2.3, 2.5	• Clearly articulates requests using specific and relevant language, and uses listening and questioning techniques to confirm understanding
Numeracy	2.1, 3.1, 3.2	• Extracts, evaluates and compares numerical information to determine resources and identify trends
Get the work done	1.1, 1.5, 1.6, 2.1, 2.2, 2.5, 2.6, 3.1, 3.2	• Identifies changes to processes, products or services within scope of own business opportunities • May invest time in developing and shaping several options before making a final choice, using a combination of lateral and analytical thinking to tailor and strengthen an idea to suit needs, resources and constraints • Uses a range of digitally based technology and applications to access and filter data, and then extract, organise, integrate and share relevant information in increasingly effective ways.

Assessment Requirements for BSBSMB301 Investigate micro business opportunities

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- research and analyse information from a range of sources to investigate a business opportunity, including:
  - financial considerations
  - digital technologies
  - market size, potential and trends
  - ethical and cultural requirements of the market
  - resource availability
- review data for potential impact on the market, products, services and customers
- match products and services to the business opportunity.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- locate and outline legislation and regulation relevant to specific micro business opportunities being investigated
- identify sources of specialist advice on trends in new and emerging markets and decline and risk factors

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- summarise benefits and challenges of digital technologies relevant to micro business opportunities
- describe appropriate business research methods and data collection tools and software.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- internet access for research
- data collection tools and software
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies, or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- demonstrate a systematic approach to identifying, managing and meeting legal and regulatory requirements, specifically in regard to WHS, business registration and environmental requirements
- ensure compliance, by:
  - following taxation and industrial relations principles
  - updating and maintaining legal documents
  - investigating areas of non-compliance
  - monitoring provision of products and services
  - taking corrective action where necessary
- negotiate and arrange contracts, including:
  - seeking legal advice
  - investigating procurement rights
  - identifying options of leasing or ownership of business premises.
- Identify, assess and treat risks specific to the business including
  - prioritising risks with highest probability of occurrence and greatest negative impact on the business
  - identifying insurance requirements

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline business registration and licensing requirements
- identify all government legislative requirements relating to the specific business operation
- explain creation and termination of relevant legal contracts
- summarise relevant cultural differences and legal implications
- describe legal rights and obligations of alternative ownership structures
- outline necessary record keeping to meet minimum legal and taxation requirements
- summarise relevant consumer legislation and industry codes of practice
- outline the key steps in the risk management process
- explain relevant insurance requirements and products.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- office equipment and resources
- business technology including internet access
- specialist software for analysis of data
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies, or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBSMB403 Market the small business

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- determine marketing activity focus in line with objectives of the business plan
- evaluate customer base
- understand what is ethically and culturally appropriate
- determine a marketing mix according to market and business needs, including:
  - ability to optimise sales and profit
  - ability to evaluate costs and benefits
  - determine customer needs and promotional activities
- determine marketing strategies, including briefing appropriate personnel on their responsibilities
- identify marketing opportunities in the digital environment
- develop approaches to engage, respond and monitor customers in the digital space
- monitor and evaluate activities and performance, and correct performance gaps
- consult and communicate effectively with relevant people
- research and monitor ongoing changes and improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- discuss industry market trends
- identify performance evaluation methods
- explain methods of analysing costs and benefits of marketing strategies
- summarise methods of developing marketing objectives and marketing mix
- compare current digital devices, platforms and technologies for effectiveness in achieving marketing objectives
- outline methods of monitoring customer satisfaction
- identify relevant market analysis and research
- provide a detailed explanation of relevant marketing concepts and methods.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business technology
- software for analysis of data
- workplace documents and case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ELEMENT	PERFORMANCE CRITERIA
2. Develop a business plan	2.1 Research resources, legal and compliance requirements, specifically in relation to work health and safety (WHS), in accordance with business goals and objectives 2.2 Research market needs, and market size and potential 2.3 Identify sources and costs of finance, from financial plan, to provide required liquidity and profitability for the business 2.4 Identify methods, from marketing strategies, to promote market exposure of the business 2.5 Identify methods or means of production or operation from production or operations plan to conform with business goals and objectives 2.6 Identify staffing requirements to effectively produce or deliver products and services 2.7 Identify, assess and prioritise internal and external risks 2.8 Identify specialist services and sources of advice, where required, and cost in accordance with available resources
3. Develop strategies for minimising risks	3.1 Identify specific interests and objectives of relevant people and seek and confirm their support of planned business direction 3.2 Identify and develop risk management strategies according to business goals and objectives, and relevant legal requirements 3.3 Develop a contingency plan to address possible areas of non-conformance with the plan

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.7, 3.1, 3.2	• Identifies, analyses and evaluates complex workplace documentation during planning process
Writing	1.3, 2.3-2.7, 3.1-3.3	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral	1.1, 3.1	• Articulates ideas and requirements clearly and

Assessment Requirements for BSBSMB404 Undertake small business planning

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop a business plan which provides for finance, marketing and provision of products or services to facilitate all business goals and objectives
- identify and plan all work health and safety (WHS) and duty of care responsibilities
- identify and assess internal and external risks to the business
- develop risk management strategies including a contingency plan for non-conformance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss all government legislative requirements relating to business operation, especially in regard to WHS and environmental issues, equal employment opportunity, industrial relations and anti-discrimination
- explain methods of evaluation
- summarise WHS responsibilities and procedures for identifying hazards relevant to the business
- outline planning processes
- describe preparation of a business plan
- identify principles of risk management relevant to small business planning
- outline common risks particular to the small business type or industry
- explain reasons for, and benefits of, business planning

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- clarify relevant industry codes of practice
- outline setting goals and objectives
- explain types of business planning – feasibility studies; strategic, operational, financial and marketing planning.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSMB405 Monitor and manage small business operations

Modification History

Release	Comments
Release 3	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement a business plan and modify operations as required.

It applies to individuals who operate a small business which stands alone, or is part of a department within a larger organisation. Individuals in this role use problem-solving skills and take responsibility for developing approaches to manage business operations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the	*Performance criteria describe the performance needed to*

ELEMENT	PERFORMANCE CRITERIA
	objectives 4.2 Clearly record proposed changes to aid future planning and evaluation 4.3 Undertake ongoing research into new business opportunities and adjust business goals and objectives as new business opportunities arise

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.5, 2.1, 2.2, 2.4, 2.5, 3.1, 4.1	• Evaluates complex text to determine legislative, regulatory and workplace documentation
Writing	1.1, 1.3-1.5, 3.2, 3.4, 4.1, 4.2	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	3.2	• Articulates clearly using specific and relevant language suitable to audience to convey requirements, and employs listening and questioning techniques to confirm understanding
Numeracy	2.2, 2.3, 2.5	• Interprets numerical information to manage performance information and regulate cash flow
Navigate the world of work	1.1-1.3, 2.2, 2.4, 4.1	• Monitors adherence to organisational policies and procedures and considers own role for its contribution to broader goals of the work environment • Appreciates implications of legal and regulatory responsibilities related to own work with specific reference to safety
Get the work done	1.1, 1.3-1.5, 2.1-2.3, 2.5, 2.6, 3.1-3.3, 4.1, 4.3	• Reflects on how digital systems and tools are used or could be used to achieve work goals, and begins to recognise strategic and operational applications • Identifies concepts, principles and features of approaches in use in other contexts and considers how these may suit own situation • Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

		contribute to longer-term operational and strategic goals • Uses each experience to reflect on how variables impact decision outcomes, and to gain insights into what constitutes 'good' judgement and an effective decision in different contexts • Recognises and addresses some unfamiliar problems of increasing complexity within own scope

Performance Evidence

Evidence of the ability to:

- develop strategies and procedures to successfully manage business operations, including:
  - developing an action plan
  - identifying risk management procedures
  - developing a quality system
  - implementing performance measures
  - utilising technologies to optimise business performance
- implement and monitor strategies and procedures developed, including:
  - analysing and correcting business problems
  - reviewing and adjusting the business plan
- record and research business improvements
- make appropriate adjustments to business operations as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise relevant industry codes of practice
- explain methods for implementing operation and revenue control systems
- summarise methods for monitoring performance and implementing improvements
- outline work health and safety (WHS) responsibilities and procedures for managing hazards
- identify relevant principles of risk management, including risk assessment
- clarify quality system principles and methods
- summarise relevant performance measures
- discuss role of innovation
- outline systems to manage staff, stock, expenditure, services and customer service
- identify technical or specialist skills relevant to business operations.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources

BSBSMB406 Manage small business finances

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement and review financial management strategies on a regular basis.

It applies to individuals who operate a small business that stands alone, or is part of a department within a larger organisation. Individuals in this role interpret financial reports and other numerical data to develop financial management strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Implement financial plan	1.1 Identify financial information requirements and obtain specialist services, as required, to profitably operate the business in accordance with the business plan 1.2 Produce financial budgets or projections, including cash flow

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	estimates, as required for each forward period, and distribute to relevant people in accordance with legal requirements 1.3 Negotiate, secure and manage business capital to best enable implementation of the business plan and to meet requirements of financial backers 1.4 Develop and maintain strategies to enable adequate financial provision for taxation in accordance with legal requirements 1.5 Develop, monitor and maintain client credit policies, including contingencies for debtors in default, to maximise cash flow 1.6 Select key performance indicators to enable ongoing monitoring of financial performance 1.7 Record and communicate financial procedures to relevant people to facilitate implementation of the business plan
2. Monitor financial performance	2.1 Regularly monitor and report on financial performance targets, and analyse data to establish extent to which the financial plan has been met 2.2 Monitor marketing and operational strategies for their effects on the financial plan 2.3 Calculate and evaluate financial ratios according to own or industry benchmarks 2.4 Assess financial plan to determine whether variations or alternative plans are needed, and change as required

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1, 2.4	• Evaluates complex text to determine legislative, regulatory and workplace documentation
Writing	1.2-1.5, 1.7, 2.1	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	1.3, 1.7, 2.1	• Articulates clearly using specific and relevant language suitable to audience to convey requirements, and employs listening and questioning techniques to

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- operate the business according to the business plan, including:
  - adhering to legal requirements
  - meeting requirements of financial backers
  - defining strategies for debt collection and contingencies for debtors
  - managing cash flow
  - defining key performance indicators
  - communicating with relevant people
- monitor the business against financial plan and make changes as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss benchmarking
- explain financial decision-making relevant to the business
- summarise significant financial indicators
- outline purposes of financial reports
- clarify preparation and interpretation of budget/actual reports
- identify principles for preparing balance sheets and their interpretation
- outline debt collection procedures or strategies

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- characterise principles for preparing profit and loss statements and their interpretation
- discuss stock records and stock control relevant to the business.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSMB407 Manage a small team

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to select, induct, train and develop staff members to enhance business operations within the parameters of all relevant legislative requirements.

It applies to individuals who operate a small business that stands alone, or is part of a department within a larger organisation. Individuals in this role have a good knowledge of industrial relations and team management and use effective, responsive and supportive communication in workplace interactions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop staffing plan	1.1 Determine staffing requirements to allow the business to run effectively, in accordance with requirements outlined in the

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	business plan 1.2 Identify and compare existing skills of owner/s and staff with business requirements to identify any gaps 1.3 Develop policies and procedures for owner/s and staff, in accordance with the business plan
2. Recruit, induct, train and retain team	2.1 Develop job or position descriptions, competencies required and selection criteria to meet business' needs 2.2 Judge information obtained from each candidate against specified selection criteria, and select according to business needs and legal requirements 2.3 Induct new staff members in accordance with policies and procedures of the business 2.4 Make team members aware of their responsibilities and performance requirements as soon as practicable, and take opportunities to coach team members who are unfamiliar with procedures of the business 2.5 Develop and implement a staff development program and career paths based on requirements of business and staff competencies 2.6 Advertise staff vacancies appropriately in accordance with staffing plan
3. Comply with industrial relations obligations	3.1 Clarify workplace rights and obligations of employers and employees, in accordance with legal requirements and codes of practice 3.2 Counsel staff, if required, in a positive and constructive manner and record outcomes accurately
4. Maintain staff records	4.1 Develop staff records system to provide timely and accurate information, in accordance with confidentiality, legal and taxation requirements 4.2 Monitor and accurately maintain system for recording and retrieving personnel and payroll information, and seek specialist advice where required
5. Manage staff	5.1 Regularly review contribution and skills of self and other team members to ensure performance is in line with agreed performance measures 5.2 Monitor and adjust staffing requirements to respond to any changes in tasks and functions required by the business 5.3 Support and encourage staff, and acknowledge and reward

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	their contribution 5.4 Regularly provide opportunities for staff to discuss work related issues 5.5 Develop contingency plans to cope with unexpected or extreme situations and take appropriate corrective action as required
6. Review team performance	6.1 Develop positive and constructive relationships with and between team members 6.2 Review and update team objectives in support of business goals on a regular basis in consultation with team members 6.3 Identify strengths and weaknesses of team against current and expected work requirements 6.4 Schedule time, on a regular basis, for team members to review work operations to maintain and improve operational efficiency 6.5 Encourage team members to monitor their own performance, suggest improvements and identify professional development needs, in accordance with personal and business requirements 6.6 Monitor and review staff turnover rate

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.2, 2.3, 2.5, 2.6, 3.1, 4.1, 5.1, 6.3, 6.5, 6.6	• Evaluates complex text to determine legislative, regulatory and workplace documentation
Writing	1.3, 2.1-2.6, 3.1, 3.2, 4.1, 4.2, 5.5, 6.1-6.3, 6.5	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	1.2, 2.2-2.4, 3.1, 3.2, 4.2, 5.3, 5.4, 6.1, 6.2, 6.4, 6.5	• Articulates clearly using specific and relevant language suitable to audience to convey requirements, and employs listening and questioning techniques to confirm understanding • Participates in verbal negotiations and coaching using tone and language suitable to audience

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Numeracy	6.4	• Uses basic mathematical formulas to review staff performances within available work schedules
Navigate the world of work	1.3, 2.2. 3.1, 4.1	• Understands own legal rights and responsibilities and is extending understanding of general legal principles across work contexts • Monitors adherence to organisational policies and procedures and considers own role for its contribution to broader goals of the work environment
Interact with others	2.4, 2.6, 5.3, 6.1, 6.5	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role on occasion • Looks for ways of establishing connections and building genuine understanding with a diverse range of people • Actively identifies important communication exchanges, selecting appropriate channels, format, tone and context to suit purpose and audience, and monitors impact
Get the work done	1.1, 1.2, 2.2, 2.3, 2.5, 4.2, 5.1, 5.2, 5.5, 6.3, 6.6	• Uses digital technologies and systems safely, legally and ethically when gathering, storing, accessing and sharing information • Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer-term operational and strategic goals • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account • Uses formal and informal processes to monitor implementation of ideas and reflect on outcomes • Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, actively looking for early warning signs and implementing contingency plans

BSBSUS401 Implement and monitor environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0. Version created to better align unit to AQF level.

Application

This unit describes the skills and knowledge required to effectively analyse the workplace in relation to environmentally sustainable work practices and to implement improvements and monitor their effectiveness.

It applies to individuals with responsibility for a specific area of work or who lead a work group or team and addresses the knowledge, processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Investigate current practices in relation to resource usage	1.1 Identify environmental regulations applying to the enterprise 1.2 Analyse procedures for assessing compliance with

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	environmental/sustainability regulations 1.3 Collect information on environmental and resource efficiency systems and procedures, and provide to the work group where appropriate 1.4 Collect, analyse and organise information from a range of sources to provide information/advice and tools/resources for improvement opportunities 1.5 Measure and document current resource usage of members of the work group 1.6 Analyse and document current purchasing strategies 1.7 Analyse current work processes to access information and data to assist in identifying areas for improvement
2. Set targets for improvements	2.1 Seek input from stakeholders, key personnel and specialists 2.2 Access external sources of information and data as required 2.3 Evaluate alternative solutions to workplace environmental issues 2.4 Set efficiency targets
3. Implement performance improvement strategies	3.1 Source and use appropriate techniques and tools to assist in achieving efficiency targets 3.2 Apply continuous improvement strategies to own work area of responsibility, including ideas and possible solutions to communicate to the work group and management 3.3 Implement and integrate environmental and resource efficiency improvement plans for own work group with other operational activities 3.4 Supervise and support team members to identify possible areas for improved practices and resource efficiency in work area 3.5 Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon where appropriate 3.6 Implement costing strategies to fully utilise environmental assets
4. Monitor performance	4.1 Use and/or develop evaluation and monitoring, tools and technology 4.2 Document and communicate outcomes to report on efficiency targets to key personnel and stakeholders 4.3 Evaluate strategies and improvement plans 4.4 Set new efficiency targets, and investigate and apply new tools

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	and strategies 4.5 Promote successful strategies and reward participants where possible

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 1.6, 1.7, 2.3, 3.1	• Identifies and analyses complex texts to determine legislative, regulatory and business requirements • Reviews reported information to evaluate workplace strategies and improvement practices
Writing	1.5, 1.6, 2.1, 2.2, 2.4, 3.1-3.3, 4.4, 4.5	• Documents findings of investigations from written and oral sources according to organisational requirements • Provides updates about progress using formats and language appropriate to the audience and context
Oral Communication	2.1, 2.2, 3.3-3.5, 4.4, 4.5	• Presents information and seeks advice using structure and language appropriate to audience • Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Numeracy	1.5, 2.4, 3.1, 3.6, 4.4	• Analyses numerical information to measure usage and calculates metric measurements, quantities/ratios and financial data using appropriate tools
Navigate the world of work	1.1, 1.2	• Recognises and follows legislative requirements and organisational policies and procedures associated with own role
Interact with others	1.3, 2.1, 2.2, 3.3-3.5, 4.2, 4.4, 4.5	• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information • Collaborates and consults with a range of stakeholders to achieve shared understanding of individual roles in meeting objectives
Get the work done	1.2, 1.4-1.7, 2.3, 2.4, 3.1, 3.2, 3.3, 3.5, 3.6, 4.1, 4.3, 4.4	• Develops plans to manage routine and non-routine tasks for own work group with an awareness of how they contribute to the broader organisation • Uses systematic, analytical processes to set

Assessment Requirements for BSBSUS401 Implement and monitor environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0. Version created to better align unit to AQF level.

Performance Evidence

Evidence of the ability to:

- analyse information from a range of sources to identify current procedures, practices and compliance requirements in relation to environmental and resource sustainability
- consult and communicate with relevant stakeholders to seek input and encourage engagement with developing and implementing sustainability improvements, encourage feedback and suggestions and report on outcomes
- plan and organise work group activities to:
  - measure current resource usage
  - solve problems and generate ideas for improvements
  - evaluate and implement strategies to improve resource usage
  - plan, implement and integrate improvements into operations
  - meet environmental requirements
- apply continuous improvement approach to sustainability performance
- apply change management techniques to support sustainability performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify relevant internal and external sources of information and explain how they can be used to identify sustainability improvements

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- explain the compliance requirements for the work area with reference to legislation, regulations, codes of practice and workplace procedures that relate to environmental and resource issues
- outline common environmental and energy efficiency issues within the industry
- give examples of benchmarks for environmental and resource sustainability that are relevant to the organisation
- outline organisational systems and procedures that relate to environmental and resource sustainability improvements including:
  - supply chain, procurement and purchasing
  - quality assurance
  - making recommendations and seeking approvals

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS201 Contribute to health and safety of self and others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to work in a manner that is healthy and safe in relation to self and others and to respond to emergency incidents. It covers following work health and safety (WHS) and emergency procedures and instructions, implementing WHS requirements and participating in WHS consultative processes.

It applies to individuals who require a basic knowledge of WHS to carry out work in a defined context under direct supervision or with some individual responsibility, in a range of industry and workplace contexts.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS *Act* has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Work safely	1.1 Follow provided safety procedures and instructions when

Assessment Requirements for BSBWHS201 Contribute to health and safety of self and others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- follow all relevant procedures and instructions relating to work health and safety (WHS) and emergency incidents
- identify and report hazards to designated personnel
- contribute to WHS consultative processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain workplace safety procedures and instructions including:
  - checking systems and equipment
  - conducting routine work operations
  - requirements for personal protective equipment (PPE)
  - how to report incidents and injuries
- explain emergency procedures including those for fires and incidents
- define the meaning of commonly used hazard signs and safety symbols
- summarise the duty holder responsibilities, as specified in WHS Acts, regulations and codes of practice, of:
  - self and fellow workers
  - persons conducting businesses or undertakings (PCBUs)
  - officers
  - others in the workplace
- explain the difference between hazards and risks

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- describe typical WHS hazards that may be present in the workplace, the harm they can cause and how this harm occurs
- outline the process of hazard identification and risk reduction.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- relevant organisational policies, standard operating procedures and work instructions
- relevant Acts, regulations, codes of practice
- workplace tools, equipment and resources
- personal protective equipment appropriate to the role and work area.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS301 Maintain workplace safety

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement and monitor the organisation’s work health and safety (WHS) policies, procedures and programs as part of a small work team.

The unit applies to individuals who have a key role in maintaining workplace safety in an organisation. In their role they closely monitor aspects of work associated with the safe delivery of products and services, and they have a responsibility for influencing safety in the workplace.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Assist with	1.1 Use WHS legislation as the basis for meeting the health and

Assessment Requirements for BSBWHS301 Maintain workplace safety

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- implement and monitor the organisation's work health and safety (WHS) policies and procedures
- identify hazards and assess and control risks
- assist in explaining and improving WHS policies, procedures and legislative requirements applicable to the organisation
- assist in explaining hazards identification and risk assessment outcomes to other team members
- implement and monitor consultation about WHS according to legislative and organisational requirements
- deal promptly with issues raised as a result of WHS consultation
- encourage work team to contribute to identifying and implementing improvements to WHS feedback
- assist others to develop WHS competence and provide advice on training needs
- complete WHS documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe characteristics and composition of the work team
- describe procedures for identifying hazards and assessing and controlling associated risks to health and safety, including the hierarchy of control
- outline organisational WHS policies and procedures including those relating to risk management, fire, emergencies, evacuation, incident investigation and reporting

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- describe relevant Acts, regulations and codes of practice from all levels of government that impact on business operations, especially with regard to WHS and environmental issues, equal opportunity, industrial relations and anti-discrimination
- identify WHS aspects of other organisational systems and procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- safety processes relevant to the area of work
- organisational policies and procedures, standard operating procedures and plans
- WHS Acts, regulations, codes of practice, licensing requirements and standards
- appropriate office equipment and resources used in the identification and rectification of WHS compliance breaches.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS311 Assist with maintaining workplace safety

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to assist with implementing and monitoring an organisation's work health and safety (WHS) policies, procedures and programs as part of a small work team.

The unit applies to individuals who have roles in assisting with maintaining workplace safety in an organisation. Individuals closely monitor aspects of work associated with the safe delivery of products and services, and they contribute to influencing safety in the workplace.

NOTES

1. The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBWHS311 Assist with maintaining workplace safety

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- assist with implementing and monitoring at least three different organisational work health and safety (WHS) policies or procedures into a work team's processes.

During the above, the candidate must:

- assist with implementing and monitoring consultation about each policy or procedure according to legislative and organisational requirements
- identify opportunities to encourage work team to contribute to implementing improvements to each policy or procedure based on feedback received through consultation
- complete WHS documentation.

Knowledge Evidence

The candidate must demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- characteristics and composition of the work team
- procedures related to the following:
  - identifying hazards
  - assessing and controlling risks to health and safety, including the hierarchy of control measures
- organisational WHS policies and procedures, including those relating to:
  - risk management
  - fire
  - emergencies
  - evacuation
  - incident investigation

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

    - reporting
- relevant legislation, regulations and codes of practice from all levels of government that impact on business operations, including those relating to:
    - WHS and environmental issues
    - equal opportunity
    - industrial relations
    - anti-discrimination
- WHS aspects of other organisational systems and procedures.

Assessment Conditions

Assessment must comply with WHS laws, and WHS legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and include access to:

- safety processes relevant to the area of work
- organisational policies and procedures, standard operating procedures and plans
- standards, WHS laws and licensing requirements
- opportunities for interaction with others
- workplace equipment and resources required for the performance evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package release 1.0

Application

This unit describes the skills and knowledge required to implement and monitor an organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area in order to meet legislative requirements.

It applies to individuals with supervisory responsibilities for implementing and monitoring the organisation's WHS policies, procedures and programs in a work area. These individuals have a broad knowledge of WHS policies and contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They provide supervision and guidance to others and have limited responsibility for the output of others.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

ELEMENT	PERFORMANCE CRITERIA
essential outcomes.	*demonstrate achievement of the element.*
1. Provide information to the work team about WHS policies and procedures	1.1 Accurately explain to the work team relevant provisions of WHS Acts, regulations and codes of practice 1.2 Provide information about the organisation's WHS policies, procedures and programs, and ensure it is readily accessible to, and understandable by the work team 1.3 Regularly provide and clearly explain to the work team information about identified hazards and the outcomes of risk assessment and control
2. Implement and monitor participation arrangements for managing WHS	2.1 Communicate to workplace parties the importance of effective consultation mechanisms in managing health and safety risks in the workplace 2.2 Apply consultation procedures to facilitate participation of the work team in managing work area hazards 2.3 Promptly deal with issues raised through consultation, according to organisational consultation procedures and WHS legislative and regulatory requirements 2.4 Promptly record and communicate to the work team the outcomes of consultation over WHS issues
3. Implement and monitor organisational procedures for providing WHS training	3.1 Identify WHS training needs according to organisational requirements and WHS legislative and regulatory requirements 3.2 Make arrangements to meet WHS training needs of team members in consultation with relevant individuals 3.3 Provide workplace learning opportunities and coaching and mentoring assistance to facilitate team and individual achievement of identified WHS training needs 3.4 Identify and report to management the costs associated with providing training for work team, for inclusion in financial and management plans
4. Implement and monitor organisational procedures and legal requirements for identifying hazards and assessing and controlling risks	4.1 Identify and report on hazards in work area according to WHS policies and procedures and WHS legislative and regulatory requirements 4.2 Promptly action team member hazard reports according to organisational procedures and WHS legislative and regulatory requirements 4.3 Implement procedures to control risks using the hierarchy of control, according to organisational and WHS legislative requirements

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	4.4 Identify and report inadequacies in existing risk controls according to hierarchy of control and WHS legislative requirements 4.5 Monitor outcomes of reports on inadequacies, where appropriate, to ensure a prompt organisational response
5. Implement and monitor organisational procedures for maintaining WHS records for the team	5.1 Accurately complete and maintain WHS records of incidents of occupational injury and disease in work area, according to WHS policies, procedures and legislative requirements 5.2 Use aggregate information and data from work area records to identify hazards and monitor risk control procedures in work area

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 5.2	• Interprets and analyses complex WHS legislative and organisational texts
Writing	1.1-1.3, 2.3, 2.4, 3.1, 3.2, 3.4, 4.1, 4.4, 5.1	• Documents WHS legislative and organisational information using structure, layout and language suitable for audience • Records WHS issues and actions taken according to reporting requirements • Prepares and maintains required records using appropriate structure and vocabulary
Oral communication	1.1-1.3, 2.1, 2.4, 3.2, 3.3, 4.1, 4.4	• Provides WHS legislative and organisational information and advice using structure and language suitable for audience
Numeracy	3.4, 5.2	• Extracts, interprets and comprehends mathematical information in relation to training costs and risk management data
Navigate the world of work	1.1,1.2, 2.3, 3.1, 4.1-4.5, 5.1	• Takes responsibility for adherence to legal and regulatory responsibilities and organisational policies and procedures in relation to WHS • Keeps up to date on changes to WHS legislation or regulations and organisational policies and procedures
Interact with	2.2, 3.2, 3.3	• Selects and uses appropriate conventions and protocols to facilitate consultation or provide feedback

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

others		• Initiates and contributes to facilitating consultative role, responding, explaining, clarifying and expanding on ideas and information as required • Collaborates with others to achieve individual and team outcomes
Get the work done	2.2, 3.2, 3.3, 4.1-4.5, 5.1	• Uses combination of formal, logical planning and intuitive understanding of context to identify relevant information and risks, and identify and evaluate alternative strategies • Uses formal decision-making processes, setting or clarifying goals, gathering information and identifying and evaluating choices against a set of criteria • Recognises and takes responsibility for reporting WHS risk control inadequacies • Uses formal and informal processes to monitor implementations of WHS solutions and reflect on outcomes

Assessment Requirements for BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- explain clearly and accurately to work team the relevant work health and safety (WHS) information including:
  - WHS legislative and organisational requirements
  - identified hazards and outcomes of risk assessment and control
- ensure that the team has access to information about WHS policies, procedures and programs in appropriate structure and language
- implement and monitor procedures according to organisational and legislative WHS requirements including:
  - consultation and communications to enable team members to participate in managing WHS risks and hazards
  - identifying WHS training needs and providing learning opportunities, coaching and mentoring as appropriate to needs
  - identifying, reporting and taking action on WHS hazards and risks
  - identifying and reporting inadequacies in existing risk controls and monitoring outcomes to ensure a prompt organisational response
  - reporting on the cost of WHS training
  - keeping WHS records
  - analysing aggregate WHS data to identify hazards and monitor risk control procedures in work area.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

© Commonwealth of Australia, 2025
Manufacturing Industry Skills Alliance

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legal responsibilities and duties of managers, supervisors, persons conducting businesses or undertakings (PCBUs) and workers in relation to WHS risk management in the workplace
- identify key provisions of relevant WHS Acts, regulations and codes of practice that apply to the business and outline how they apply in the work area
- explain organisational policies and procedures relating to hazard identification, risk management, fire, emergency and evacuation, incident investigation and reporting
- explain the importance of effective consultation mechanisms in managing health and safety risks in the workplace
- explain how the hierarchy of control applies in the work area.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- an actual workplace or simulated environment
- workplace equipment and resources
- examples of documents relating to workplace safety, hazard identification and risk assessment
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR203 Work effectively with others

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to work cooperatively with others and deal effectively with issues, problems and conflict.

It applies to individuals who perform a range of routine tasks using a limited range of practical skills, and a fundamental knowledge of teamwork in a defined context under direct supervision or with limited individual responsibility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop effective workplace relationships	1.1 Identify own responsibilities and duties in relation to workgroup members and undertake activities in a manner that promotes cooperation and good relationships 1.2 Take time and resource constraints into account in fulfilling

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	work requirements of self and others 1.3 Encourage, acknowledge and act on constructive feedback provided by others in the workgroup
2. Contribute to workgroup activities	2.1 Provide support to team members to ensure workgroup goals are met 2.2 Contribute constructively to workgroup goals and tasks according to organisational requirements 2.3 Share information relevant to work with workgroup to ensure designated goals are met 2.4 Identify and plan strategies/opportunities for improvement of workgroup in liaison with workgroup
3. Deal effectively with issues, problems and conflict	3.1 Respect differences in personal values and beliefs and their importance in the development of relationships 3.2 Identify any linguistic and cultural differences in communication styles and respond appropriately 3.3 Identify issues, problems and conflict encountered in the workplace 3.4 Seek assistance from workgroup members when issues, problems and conflict arise and suggest possible ways of dealing with them as appropriate or refer them to the appropriate person

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1	• Identifies and interprets information to determine task requirements
Writing	2.3, 2.4	• Completes required documentation using organisational formats • Composes simple documents for others to read
Oral Communication	1.3, 3.2, 3.4	• Presents information and seeks advice using language and features appropriate to audience • Participates in discussions using listening and questioning to elicit views of others and to clarify or

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify own responsibilities in relation to the team and the organisation's requirements
- work effectively in a workgroup including:
  - supporting team members
  - using culturally appropriate communication skills
  - acting on constructive feedback
  - cooperating and contributing to team goals
  - identifying improvement opportunities
- identify problems and conflicts and address them appropriately.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the organisational standards, policies and procedures that relate to own work role
- outline team responsibilities and duties and their relationship to individual responsibilities and duties.
- summarise conflict resolution techniques.

Assessment Requirements for BSBWOR204 Use business technology

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- select and use technology safely and according to organisational requirements
- access, retrieve and store required data
- demonstrate basic maintenance on a range of equipment using manuals or help-files
- identify and address faults according to requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the organisation's work health and safety requirements
- outline the organisation's requirements for file naming and storage
- explain why regular back-ups of data are done
- list 'routine maintenance' tasks
- summarise the procedure for addressing equipment faults.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – workplace effectiveness field of work and include access to:

- office equipment and resources
- electronic files and data
- workplace documentation and equipment manuals
- case studies and, where possible, real situations

BSBWOR403 Manage stress in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify signs and sources of stress within job roles and according to key performance indicators (KPIs). Management strategies to aid recovery from stressful situations are also essential.

It applies to individuals who work at a managerial level, have excellent communication skills and apply knowledge of organisational policies, occupational health and safety (OHS) and other relevant legislation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop and implement personal stress management strategy	1.1 Recognise signs and sources of stress 1.2 Use appropriate techniques to manage own stress 1.3 Maintain personal stamina and resilience 1.4 Maintain personal work/life balance 1.5 Become a role model in managing stress and time
2. Develop stress	2.1 Analyse and understand potential sources of fatigue and stress

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
management strategies and techniques within a team	in the work environment 2.2 Develop an understanding of a range of stress management techniques within a team 2.3 Develop techniques to support achievement of key performance indicators (KPIs) and priorities 2.4 Encourage team members to support each other in managing stress 2.5 Adopt strategies to effectively reduce, manage and deal with stress within a team 2.6 Adopt stamina management strategies to maximise performance 2.7 Develop techniques to assist team members to recover effectively from a stressful or difficult situation
3. Implement stress management techniques within a team	3.1 Adopt work routine and procedural strategies to minimise stress and fatigue within a team 3.2 Use appropriate time management tools and techniques 3.3 Develop individual/group training and development program as required 3.4 Use team meetings and other opportunities to discuss stress management techniques and coach staff in using these techniques 3.5 Regularly evaluate tools, techniques and strategies 3.6 Develop team awareness of sources of internal and external support
4. Develop team and morale building strategies	4.1 Develop a strategy to engage and develop team members 4.2 Develop a communication strategy within a team 4.3 Manage and use team meetings effectively 4.4 Develop a supportive and responsive team environment 4.5 Delegate effectively to further empower and motivate team members
5. Monitor and address stress levels within a team	5.1 Monitor individual staff performance against performance requirements 5.2 Conduct regular staff reviews to identify variations and difficulties impacting work requirements 5.3 Monitor and support team members when in stressful situations 5.4 Respond appropriately to behavioural signs of stress among

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	team members 5.5 Monitor work/life balance of team members 5.6 Discuss outcomes and develop action plans with team members as appropriate

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.3, 3.3, 5.1	• Analyses and compares specific and complex text to determine and distinguish requirements
Writing	3.2, 3.3, 4.1, 4.2, 5.2, 5.6	• Develops documents that clearly explain ideas and advice • Records information using required tools
Oral Communication	2.4, 3.4, 3.6, 5.2, 5.4, 5.6	• Provides advice and information using language and features suitable to the audience in group and individual meetings • Uses listening and questioning techniques to confirm understanding
Numeracy	3.2	• Interprets mathematical information related to timelines
Navigate the world of work	2.1	• Understands legislative responsibility to provide a safe working environment
Interact with others	1.5, 2.4, 3.6, 4.3, 4.4, 4.5, 5.2, 5.4, 5.6	• Understands how own behaviour impacts others and leads by example • Establishes and builds rapport and relationships with team members • Provides effective support, feedback and coaching in difficult or tense situations
Get the work done	1.2, 2.1, 2.2, 2.3, 2.5, 2.6, 2.7, 3.1-3.5, 3.6, 4.1, 4.2, 4.4, 4.5, 5.1-5.5	• Plans and monitors tasks to ensure deadlines are met and competing demands are accommodated • Establishes, implements and monitors strategies, development plans and actions for team members • Uses problem-solving techniques to analyse and address issues that arise

Assessment Requirements for BSBWOR403 Manage stress in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use appropriate techniques and strategies to manage own stress
- identify potential sources of fatigue or stress in the work environment
- assist team members to develop and use strategies to manage or minimise stress
- build team morale and cohesion
- monitor performance and stress levels of team members, and respond appropriately.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe signs and sources of stress and fatigue
- summarise stress management and reduction techniques
- summarise stamina management techniques
- explain the relationship between time management and stress
- explain the requirements under work health and safety (WHS) legislation to address workplace stress.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – workplace effectiveness field of work and include access to:

- workplace equipment and resources
- organisational policies and procedures for stress management
- relevant legislation on health and safety

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR404 Develop work priorities

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to monitor and obtain feedback on own work performance and access learning opportunities for professional development.

This unit applies to individuals who are required to design their own work schedules and work plans and to establish priorities for their work. They will typically hold some responsibilities for the work of others and have some autonomy in relation to their own role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan and complete own work schedule	1.1 Prepare workgroup plans which reflect consideration of resources, client needs and workgroup targets 1.2 Analyse and incorporate work objectives and priorities into personal schedules and responsibilities

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
	1.3 Identify factors affecting the achievement of work objectives and establish contingencies and incorporate them into work plans 1.4 Efficiently and effectively use business technology to manage and monitor planning completion and scheduling of tasks
2. Monitor own work performance	2.1 Identify and analyse personal performance through self-assessment and feedback from others on the achievement of work objectives 2.2 Seek and evaluate feedback on performance from colleagues and clients in the context of individual and group requirements 2.3 Routinely identify and report on variations in the quality of service and performance in accordance with organisational requirements
3. Co-ordinate professional development	3.1 Assess personal knowledge and skills against organisational benchmarks to determine development needs and priorities 3.2 Research and identify sources and plan for opportunities for improvement in consultation with colleagues 3.3 Use feedback to identify and develop ways to improve competence within available opportunities 3.4 Identify, access and complete professional development activities to assist career development 3.5 Store and maintain records and documents relating to achievements and assessments in accordance with organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1, 3.2, 3.3, 3.4	• Develops strategies to reflect on own performance, obtain feedback, and plan and source professional development opportunities
Reading	1.2, 2.1, 2.3, 3.1, 3.5	• Recognises and interprets textual information from relevant sources to understand organisation's policies and practices

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Writing	1.1, 1.3, 2.2, 2.3, 3.2, 3.5	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	2.2, 2.3, 3.2	• Provides or seeks information using language suitable to audience and context • Employs listening and questioning techniques to confirm understanding
Numeracy	1.1, 1.2, 1.3	• Interprets numerical information related to budgets and timeframes
Navigate the world of work	1.2, 2.1, 2.3, 3.1, 3.5	• Identifies and understands roles and responsibilities in relation to organisational objectives, policies and procedures
Interact with others	2.2, 2.3, 3.2	• Selects and uses appropriate practices when communicating with internal and external stakeholders to seek or share information • Establishes and builds rapport and relationships with others to foster a culture of trust and honesty in communications
Get the work done	1.1-1.4, 2.3, 3.1, 3.2, 3.4, 3.5	• Plans, organises and implements tasks to meet organisational requirements • Systematically gathers and analyses information and evaluates options in order to anticipate potential problems and develop contingency plans • Uses the main features and functions of digital technologies and tools to complete work tasks efficiently and effectively

Assessment Requirements for BSBWOR404 Develop work priorities

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare and communicate own work plan
- schedule work objectives and tasks to support the achievement of the workgroup goals
- review own work performance against workgroup objectives through self-assessment and seeking and acting on feedback from clients and colleagues
- plan and access learning opportunities to extend personal work competencies.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how business technology applications can be used to schedule tasks and plan work
- explain techniques to prepare personal plans and establish priorities
- identify methods to identify and prioritise personal learning needs
- outline a range of professional development options
- explain methods to elicit, analyse and interpret feedback
- provide a detailed explanation of methods that can be used to evaluate own performance.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace documentation including policies and procedures, and benchmarks for work group productivity and performance
- workplace equipment and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWRT301 Write simple documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, draft and finalise a basic document.

It applies to individuals who apply a broad range of competencies in various work contexts and may exercise some discretion and judgement to produce a range of workplace documentation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Communication – Writing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1 Plan document	1.1 Determine audience and purpose for the document 1.2 Determine the format and structure 1.3 Establish key points for inclusion 1.4 Identify organisational requirements 1.5 Establish method of communication 1.6 Establish means of communication

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

ELEMENT	PERFORMANCE CRITERIA
2 Draft document	2.1 Develop draft document to communicate key points 2.2 Obtain and include any additional information that is required
3 Review document	3.1 Check draft for suitability of tone for audience, purpose, format and communication style 3.2 Check draft for readability, grammar, spelling, and sentence and paragraph construction 3.3 Check draft for sequencing and structure 3.4 Check draft to ensure it meets organisational requirements 3.5 Ensure draft is proofread, where appropriate, by supervisor or colleague
4 Write final document	4.1 Make and proofread necessary changes 4.2 Ensure document is sent to intended recipient 4.3 File copy of document in accordance with organisational policies and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 3.1-3.4, 4.1	• Recognises and interprets a variety of text to determine and confirm task requirements • Proofreads documents checking for grammar, spelling, structure, and suitability of style and format for audience
Writing	2.1, 2.2, 3.1-3.5, 4.1	• Produces and edits basic documents, according to organisational requirements, for a given audience and purpose
Oral Communication	2.2, 3.5	• Uses listening and questioning skills to seek additional information or confirmation of task completion
Navigate the world of work	1.4, 3.4, 4.3	• Understands and complies with organisational policies and procedures

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Interact with others	2.2, 3.5	• Follows accepted communication practices and protocols when seeking information or feedback from others
Get the work done	1.1-1.6, 2.1, 2.2, 3.4, 3.5, 4.1-4.3	• Takes responsibility for planning, sequencing and prioritising tasks to achieve required outcomes • Uses the main features and functions of digital tools to complete work tasks

Assessment Requirements for BSBWRT301 Write simple documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0

Performance Evidence

Evidence of the ability to:

- plan, draft and finalise three different simple documents that accurately convey the required basic information in a format suitable for the intended audience and in accordance with organisational policies and procedures for document production.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the process for checking basic grammar, spelling and punctuation
- describe different communication methods
- describe how audience, purpose and method of communication influence the tone of a document.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the communication – writing field of work and include access to:

- office equipment and resources to assist in document production
- organisational policies and procedures
- examples of documents to review.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBWRT311 Write simple documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- plan, draft and finalise three different simple documents that accurately convey the required basic information in a format suitable for the intended audience and purpose according to organisational policies and procedures for document production.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- processes for checking:
  - basic readability, grammar, spelling, sentence and paragraph sequencing and structure, and punctuation
  - suitability of document for audience, purpose, and format
- organisational policies and procedures relating to written communication
- written communication methods, including:
  - general emails
  - procedures
  - business letters
  - meeting agendas
- different formats, styles and structures for documents.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- office equipment and resources to assist in the production of documents

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- organisational policies and procedures
- examples of documents to review.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPAUD4001 Assess compliance with food safety programs

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to assess compliance against an approved food safety program, where the program is supported by a prescriptive template or tool, or where compliance is checked against a food safety program that has been validated by a technical expert.

This unit applies to individuals who undertake regulatory, commercial or internal audits.

This unit supports relevant legislation, including food standards included in the Australia New Zealand Food Standards Code, industry codes of practice relating to validation and verification of a food safety program, and the audit requirements detailed in the National Regulatory Food Safety Auditor Guideline and Policy, and should be read in conjunction with these documents.

Regulatory food safety audits in Australia are covered by state/territory legislative frameworks that support the requirements of the National Food Safety Audit Policy 2009.

Pre-requisite Unit

Nil

Unit Sector

Food safety auditing (AUD)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Plan the audit	1.1 Develop an audit plan to meet the audit scope 1.2 Ensure the plan is capable of delivering the required outcomes

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	within resource and time allocations 1.3 Ensure the plan includes audit purpose, scope and relevant templates or approved food safety program 1.4 Identify activities and responsibilities for the audit 1.5 Identify audit timing, including timetable for each stage of the audit 1.6 Identify resource, personnel and reporting requirements 1.7 Identify follow-up and completion procedures 1.8 Identify and establish communication protocols to facilitate the effective exchange of information and suited to the auditee environment
2. Confirm that the food business has documented required preliminary work	2.1 Define the food and the method of distribution 2.2 Identify customers and intended use of food 2.3 Describe and document the process 2.4 Ensure the food business has checked their documentation for accuracy and completeness
3. Confirm the food safety program is supported by a tool or template or has been validated	3.1 Assess the documented food safety program and related procedures and prerequisite programs to confirm that they have a prescriptive tool or have been validated by a technical expert 3.2 Review the food business's method of identifying and analysing food safety hazards 3.3 Select templates, or the approved food safety program, to meet audit scope 3.4 Adapt templates, or the approved food safety program, to suit the needs of the business without adversely affecting food safety 3.5 Review documented verification records to confirm that the requirements of the food safety program are being met 3.6 Assess corrective actions required, where processes are identified as not meeting targets or critical limits, to confirm they meet the requirements of the template or food safety program 3.7 Assess food safety prerequisite programs to confirm they are appropriate for the food business or industry sector to maintain a safe food environment 3.8 Review food safety program documents to confirm currency, accuracy and adequacy to facilitate maintenance of an adequate food

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	safety program
4. Collect evidence to review and assess implementation of food safety programs	4.1 Collect evidence to confirm that documented programs and procedures are working effectively, reflect actual practice and are consistently applied 4.2 Collect evidence to confirm that food safety monitoring and corrective actions are carried out according to procedure 4.3 Collect evidence to confirm that safety prerequisite programs are effective and consistently followed 4.4 Collect evidence to confirm that food safety records are completed and provide an accurate record of events 4.5 Collect evidence to confirm that records are accessed and analysed to confirm effective program maintenance according to the template or food safety program 4.6 Collect evidence to confirm that food safety skills and knowledge of food business personnel is commensurate with their work role 4.7 Collect evidence to confirm that the food safety program has been internally monitored and assessed, updated and improved by a technical expert
5. Manage the audit process	5.1 Monitor audit progress against the audit plan, and identify and address any variation to plan 5.2 Identify and negotiate circumstances requiring the audit plan to be adjusted in a timely manner 5.3 Ensure audit addresses audit scope and is conducted within time and resource constraints to meet quality and professional standards 5.4 Review the audit process to identify opportunities for improvement
6. Consolidate audit outcomes	6.1 Analyse and assess audit evidence to identify any areas of non-compliance with legislation and/or the food safety program 6.2 Identify and classify non-conformities as agreed by the audit plan 6.3 Report non-conformities according to agreed client and/or legislative requirements 6.4 Prepare and submit audit reports and/or certificates or present as required to meet regulatory and client requirements 6.5 Ensure a corrective action implementation plan defining proposed actions and timelines developed by the auditee is reviewed to confirm

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	that template or food safety program requirements are met 6.6 Review audit findings to confirm that evidence is sufficient as defined by the template or approved food safety program
7. Confirm and close out corrective actions	7.1 Monitor and verify implementation and effectiveness of corrective action against the template or the approved food safety program 7.2 Maintain audit records to record corrective actions

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret food safety guidelines and regulations • Interpret product quality and workplace procedures
Navigate the world of work	• Apply knowledge of regulations and policies relevant to workplace food safety programs • Monitor adherence to legal and regulatory standards and responsibilities
Get the work done	• Plan, monitor and manage relatively complex, routine and non-routine tasks, making adjustments as necessary • Use digital tools to monitor processes and access and organise complex data

Assessment Requirements for FBPAUD4001 Assess compliance with food safety programs

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has assessed a minimum of two different food safety programs, where the program is supported by a prescriptive template or tool, or where compliance is checked against a food safety program that has been validated by a technical expert, including:

- confirming that the food safety program and/or template is appropriate to the activities of the business and complies with requirements of the Australia New Zealand Food Standards Code
- reviewing food safety program records to assess compliance against the approved food safety program and/or template
- collecting and analysing evidence to confirm that the food safety program is consistently followed and controls all critical risks
- identifying circumstances where variation or customising of the template or food safety program requires further validation
- submitting at least one non-compliance report to clearly identify the aspects of the food safety program that have broken down or need further development in order to prevent recurrence.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- Australia New Zealand Food Standards Code, including information on labelling and product ingredients, relevant to the business
- required content and scope of food safety programs as defined in the National Food Safety Standard 3.2.1 or other relevant standards

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- purpose and minimum requirements of risk-based approaches to managing food safety hazards, including the role of prescriptive templates or approved food safety programs in supporting a risk-based approach and the process used to validate these tools
- guidelines on implementing industry templates or approved food safety programs
- legal requirements of food businesses, including underweights, true and accurate descriptions, and accuracy of claims (e.g. organic, free range)
- legal liability of auditors and protection against litigation and professional practice issues, including the circumstances under which an auditor could be prosecuted, and insurance requirements
- audit activities and principles, including guidelines on audit stages and activities as outlined in International Organization for Standardization (ISO) 19011:2011
- existence of international standards that cover traceability of food and the food chain supply, consumer product recalls, quality and food safety management systems
- personal attributes required of food safety auditors, including those outlined in ISO 19011:2011, and additional system owner requirements where required
- role, responsibilities and powers of enforcement agencies, authorised officers and commercial auditors, including reporting responsibilities, legal liability of auditors and delegation of authority to commercial auditors as may apply in some states and territories
- information handling and management system protocols, including rights of access to information, maintenance of confidentiality of audit information and reports and information dissemination requirements
- evidence appropriate for use in audit processes, including the difference between objective and hearsay evidence and methods for recording and managing evidence to provide reliable reference information in the event that evidence is challenged
- vocabulary and terms relating to food safety programs, including terms and jargon to describe technical processes, industry standards and common biological and chemical terms
- common biological, physical and chemical hazards that may occur in the food business, and appropriate methods of control and critical limits as outlined in the approved food safety program or template
- the impact of (1) the design and construction of premises and (2) the selection, application and condition of equipment, on food safety as defined in Food Safety Standard 3.2.3
- role of prerequisite programs in controlling hazards, including the relationship between prerequisite programs and risk-based approaches to controlling food safety hazards
- circumstances, implications and responsibilities in the event that the auditee requests that the audit ceases
- circumstances and authority to initiate cessation of an audit
- methods to assess skill requirements and options to confirm that the responsible personnel within the food business have knowledge of the food safety and food hygiene relevant to the food business.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

    - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
    - plant and equipment that would typically be used in a commercial manufacturing business
- specifications:
    - food safety plans
    - food safety-related documentation required to implement and record the food safety plan
    - evidence and documentation relevant to processes that would typically be used to assess compliance with the food safety program.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPAUD4002 Communicate and negotiate to conduct food safety audits

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to select and use appropriate methods of communication and negotiation to support audit processes.

This unit applies to individuals who undertake regulatory, commercial or internal audits. This includes taking responsibility for their own work and providing and communicating solutions to a range of predictable and sometimes unpredictable problems.

This unit supports relevant legislation, including food standards included in the Australia New Zealand Food Standards Code, industry codes of practice relating to validation and verification of a food safety program, and the audit requirements detailed in the National Regulatory Food Safety Auditor Guideline and Policy, and should be read in conjunction with these documents.

Regulatory food safety audits in Australia are covered by state/territory legislative frameworks that support the requirements of the National Food Safety Audit Policy 2009.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Develop a communication plan to support audit processes	1.1 Define and agree on scope of audit with client 1.2 Define, communicate and agree on roles and responsibilities of all personnel involved in the audit process, including those for whom English is a second language 1.3 Determine and agree on appropriate communication methods and protocols and specific arrangements, including reporting requirements 1.4 Document the communication plan
2. Select and use appropriate communication methods to conduct an audit	2.1 Select communication methods to take account of system owner and food business requirements, workplace culture and individual differences 2.2 Use appropriate communication methods to establish and maintain effective client relationships 2.3 Interpret information provided by the auditee in the context of the industry sector, language and culture of the business 2.4 Apply communication techniques to encourage all relevant parties to participate and express views throughout audit
3. Negotiate to achieve agreement on audit outcomes	3.1 Identify and clarify areas of disagreement over audit outcomes with the auditee 3.2 Seek understanding on actions to be followed to resolve outstanding issues 3.3 Treat auditee’s views with respect 3.4 Explore options for resolving differences to reach agreement and meet audit timeline and resource parameters 3.5 Explore appropriate issue resolution strategies to increase the likelihood of agreement on steps required to conclude the audit 3.6 Manage the negotiation process to maintain constructive client relationships 3.7 Report any areas of continuing non-compliance that result from unresolved differences to system owners and appropriate authorities as required

Assessment Requirements for FBPAUD4002 Communicate and negotiate to conduct food safety audits

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has used and applied appropriate communication methods in a food safety audit situation, with a minimum of two different clients or auditees, including:

- a situation where a number of workers have limited English language and literacy skills
- a conflict-based situation where the outcomes are contested by the auditee.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislation that impacts on acceptable communication methods and conduct, including anti-discrimination, anti-harassment and privacy legislation
- language relevant to audit process, including terms and jargon to describe food safety legislation, technical processes and industry standards
- effective communication strategies to communicate at different stages of the audit, including to collect audit evidence, provide and present information, facilitate meeting processes, facilitate issue management and conflict resolution, and communicate audit findings
- confidentiality needs and expectations of food businesses
- strategies to communicate in culturally diverse environments
- dynamics of conflict and strategies to manage resolution
- the structure, authority levels and lines of reporting within a food business
- communication methods relevant to different groups and audiences
- reporting formats and requirements to meet client and legislative needs.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - case studies of audit findings, including those that involve workers with limited English language and literacy skills, and those that are disputed by the auditee
- relationships:
  - interactions with food production clients and workers.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPAUD4003 Conduct food safety audits

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to verify and confirm validation of food safety programs in the context of food safety legislation and client requirements.

This unit applies to individuals who conduct on-site audits, and is relevant to regulatory and commercial food safety system auditors who may be auditing food safety in various contexts.

This unit supports relevant legislation, including food standards included in the Australia New Zealand Food Standards Code, industry codes of practice relating to validation and verification of a food safety program, and the audit requirements detailed in the National Regulatory Food Safety Auditor Guideline and Policy, and should be read in conjunction with these documents.

Regulatory food safety audits in Australia are covered by state/territory legislative frameworks that support the requirements of the National Food Safety Audit Policy 2009.

Assessment Requirements for FBPAUD4003 Conduct food safety audits

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has effectively planned and conducted a food safety audit, for a minimum of one client, that complies with legal and client requirements, including:

- preparing audit documentation
- preparing a final audit report that refers to:
  - non-conformity reports
  - corrective action reports
  - follow-up reports
  - suggestions for improvements to the food safety management system and to the audit process.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- auditor roles and responsibilities, including:
  - audit activities and stages, including guidelines on audit stages and activities as outlined in International Organization for Standardization (ISO) 19011:2011
  - personal attributes required of food safety auditors, including those outlined in ISO 19011:2011, and additional client requirements where required
  - role, responsibilities and powers of enforcement agencies, authorised officers and commercial auditors, including reporting responsibilities, legal liability of auditors and delegation of authority to commercial auditors as may apply in some states and territories

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - relevant competencies and certification/registration criteria and processes applying to both regulatory and commercial auditors
  - audit management to develop and implement an audit against an agreed plan, including the scope/level of authority to revise the resource and allocate time allocations to take account of variation to plan
- food safety management systems, including:
  - purpose and intent of each element of a food safety management system
  - the underlying principles of risk-based approaches to controlling food safety hazards, including using critical control points as described in the Codex Alimentarius Guidelines
  - vocabulary and terms relating to food safety, including terms and jargon to describe technical processes, industry standards and common biological and chemical terms
  - food safety management system knowledge relevant to the system being audited, including system requirements, definitions and levels of non-compliance and related reporting responsibilities as defined by legal and management system requirements
  - the interaction between different types of management systems, including the impact of food safety decisions on other management systems, including workplace health and safety, quality, environmental risk management and animal welfare
  - technical knowledge required to assess the adequacy of the food safety management system performance and corrective actions
  - role of prerequisite programs in controlling hazards, including the relationship between prerequisite programs and risk-based approaches, including using critical control points to control food safety hazards
  - information handling and management system protocols, including rights of access to information, maintenance of confidentiality of audit information and reports and information dissemination requirements
- food safety legislation, including:
  - the purpose and intent of food safety legislation, including sources of information on importing country requirements and of requirements of countries and retailer driven systems in importing markets
  - the content covered by the Australia New Zealand Food Standards Code and/or other relevant standards
  - the structure and responsibilities of Commonwealth, state and territory government departments and local government to manage and implement food safety legislation, including where to find information on relevant Commonwealth, state/territory legislative requirements, product or industry sector legislation and regulations and import and export market requirements
  - the regulatory framework and specific legislation relevant to the audit, including relevant risk profiling or classification systems where they apply
  - sources of information on legislation and codes governing primary production and primary processing
  - requirements for scheduling and conducting further auditing as determined by food safety legislation and/or client system requirements

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - legal liability of auditors and protection against litigation and professional practice issues, including the circumstances under which an auditor could be prosecuted, and insurance requirements
  - the role of auditors when called on to provide evidence as a witness in court
- food safety audit processes, including:
  - preliminary work required to identify food to be covered by the food safety program, define the food and the method of distribution, identify customers and intended use of food, describe the process (flow chart) and check accuracy and completeness
  - methods used to identify food safety hazards and assess food safety hazard risk levels, taking account of severity and likelihood of occurrence
  - methods used to identify critical control points and establish critical limits, suited to the nature of the hazard, the requirements of the audit and the industry sector
  - methods used to validate control techniques and critical limits, including industry or sector codes of practice, technical standards and research
  - types of evidence, including the difference between objective and hearsay evidence and methods for recording and managing evidence to provide reliable reference information in the event that evidence is challenged
  - evidence collection methods, including record sampling and sample analysis, the evidence collection options relevant to a given audit situation, the reliability of each collection method and the range and extent of evidence collection methods required to ensure that audit outcomes are objective, consistent, fair and reliable
  - methods to assess skill requirements and options to confirm that the responsible personnel within the food business have the required skills and knowledge of food safety and food hygiene relevant to the food business
  - circumstances, implications and responsibilities in the event that the auditee requests that the audit ceases
  - circumstances and authority of an auditor to initiate cessation of an audit
  - the context in which audits are conducted, including workplace culture and preferred communication methods, industry, process and/or product knowledge and related jargon
  - requirements for recording audit information and reporting.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - plant and equipment that would typically be used in a commercial food manufacturing business
- specifications:
  - food safety plans

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- food safety-related documentation typical of commercial food manufacturing businesses and used for the purpose of verification
- evidence and documentation relevant to processes that would typically be used by commercial manufacturing businesses to support validation processes.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has identified, evaluated and controlled food safety hazards for a minimum of one multi-staged food safety program, including:

- selecting a food supply chain and identifying:
  - known biological food safety hazards that could occur across the chain and could present a risk in food at the point of consumption
  - likely patterns of growth and transmission from source of contamination to onset of consumer symptoms for pathogens likely to occur in the supply chain, including threshold levels
  - sources of chemical and physical contamination that could present a food safety risk at the time of food consumption, across the chain
  - impact and indicators of the presence of biological or chemical food safety hazards throughout the food chain
  - impact and indicators of the presence of allergens that may present a hazard
  - acceptable levels of contamination (these may be established by reference to relevant legislation and/or reference to system requirements)
- selecting one stage in the food supply chain (which must be a medium or high risk business or process) and establishing or validating control measures and verification records and procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- Australia New Zealand Food Standards Code, including all chapters and sections relevant to the business

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- sources of advice and research on foods, processing methods, production technologies and associated food safety hazards and control methods, including allergens
- ways in which food can cause illness and injury, including incidence and trends in food-borne illness
- intrinsic and extrinsic factors that can impact on food safety
- common biological food safety hazards – including toxin production and spore formation – and conditions required for survival and growth of each, including growth rates, transmission routes, likely carriers and threshold levels
- sources of information on acceptable and legal levels of biological, chemical and physical contamination
- food supply chains and potential of a breakdown in control at one point to impact other parts of the chain
- survival and growth requirements of biological food safety hazards
- common allergenic substances as described by the Australia New Zealand Food Standards Code and which may be additionally defined by system owners
- existence of international standards that cover traceability of food and the food chain supply, consumer product recalls, quality and food safety management systems
- common control methods necessary to eliminate or reduce the risk of food-borne illness to acceptable levels for each common pathogen, including the role of food storage, temperature control, preservation and process methods, traceability, product shelf-life, cleaning and sanitation, and pest control
- methods to detect and minimise the risk of food contamination by personal carriers, including convalescent and symptomless carriers, and related minimum legal illness reporting requirements and personal hygiene procedures
- the role of microbiological sampling, swabbing and testing in assessing the presence of biological contamination
- methods to determine the appropriateness and effectiveness of control measures and critical limits, including identifying the effect of control measures on the identified food safety hazard, method and feasibility of monitoring, the relationship to other control measures, and the severity of consequences and required corrective action in the event of failure of control
- types and causes of acute and chronic chemical food-borne illness
- the food safety and legal impact of chemical contamination, including residual agricultural and environmental chemicals, residual industrial contamination, including cleaning chemicals, and chemical contamination as a result of packaging methods and materials
- physical hazards that pose a food safety risk
- common control methods to eliminate or reduce the risk of chemical or physical food-borne illness to acceptable levels for each common form of chemical and physical food safety hazard, including:
  - hazardous chemicals that pose a food safety risk
  - common food allergens
  - physical hazards
- the role and requirements of prerequisite programs and procedures to eliminate, prevent or reduce biological, chemical and physical food safety hazards to acceptable levels.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - supply chain that includes at least one medium or high risk business and/or process and provides opportunity to apply a depth and breadth of food safety knowledge
- specifications:
  - access to food safety programs for a multi-staged food supply chain that includes the point of delivery to the consumer.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPAUD5001 Audit bivalve mollusc growing and harvesting processes

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to support a food safety audit of food safety programs of bivalve mollusc producers. The unit covers on-shore and wild growing, harvesting, cleaning, post-harvest handling and storage, stock movement, depuration and wet storage.

This unit applies to individuals who are responsible for auditing a bivalve mollusc growing and harvesting process. These audits would typically occur within the context of auditing a food safety program that defines related prerequisite program requirements. The audits are supported by state, territory and Commonwealth government regulations prescribing processes and requirements relating to the production of bivalve molluscs.

This unit does not cover the skills and knowledge to audit the classification of growing areas.

This unit supports relevant legislation, including food standards included in the Australia New Zealand Food Standards Code, industry codes of practice relating to validation and verification of a food safety program, and the audit requirements detailed in the National Regulatory Food Safety Auditor Guideline and Policy, and should be read in conjunction with these documents.

Both regulatory and commercial audit system owners may specify additional certification requirements of auditors eligible to audit food safety programs within their system.

Pre-requisite Unit

The prerequisite units of competency for this unit are:

- FBPAUD4002 Communicate and negotiate to conduct food safety audits
- FBPAUD4003 Conduct food safety audits
- FBPAUD4004 Identify, evaluate and control food safety hazards

Unit Sector

Food safety auditing (AUD)

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify and assess food safety hazards and related control options for growing and harvesting bivalve molluscs	1.1 Identify microbiological food safety hazards, by type and origin, that could present a risk when bivalve molluscs are consumed, and assess to determine risk level and control requirements 1.2 Identify chemical food safety hazards that could present a risk in bivalve molluscs at the point of consumption, including toxin presence, by type, and assess to determine risk level and control requirements 1.3 Identify control requirements and methods to ensure that bivalve molluscs meet food safety objectives
2. Confirm that appropriate evidence supports validation of growing and harvesting bivalve molluscs	2.1 Review validation evidence and records to confirm that an appropriate level of validation has been applied 2.2 Identify and assess evidence used by the business to validate the process to confirm that it is credible and adequate to meet the food safety objective
3. Verify bivalve mollusc growing and harvesting processes	3.1 Identify, collect and review system records required to support verification against relevant shellfish quality programs 3.2 Review business documentation and conduct inspections to confirm that facilities and equipment design and components comply with regulatory and business standards 3.3 Review business documentation and conduct inspections to confirm that operational monitoring and testing procedures and frequency meet regulatory requirements, industry and business standards

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for FBPAUD5001 Audit bivalve mollusc growing and harvesting processes

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has actively participated in a minimum of one audit of a food safety program of a commercial bivalve mollusc growing, harvesting and processing operation, including:

- documenting evidence that details the review of the processor's hazard analysis critical control point (HACCP) plan to determine if the critical control points (CCPs) are correctly identified, valid, adequately monitored and verified.

Individuals must also show evidence of completing audit scenarios that include at least one audit involving relaying depuration and wet storage.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- regulations, codes of practice, guidelines and Australian standards relating to production of bivalve molluscs and related role of government in overseeing implementation of shellfish quality programs
- relevant sections of the Australia New Zealand Food Standards Code
- basic biology and physiology of bivalve molluscs and related sources of food safety risk
- pathogens that can occur in bivalve molluscs and related survival and growth characteristics and control methods, including:
  - hepatitis A virus
  - Norwalk virus
  - Vibrio parahaemolyticus

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - Vibrio vulnificus
  - Salmonella spp
  - pathogenic Escherichia coli
  - listeria monocytogenes (in ready-to-eat seafood)
- chemicals that pose a food safety risk in bivalve molluscs, including:
  - phycotoxins: harmful algal blooms, such as amnesic shellfish poisoning (ASP), neurotoxic shellfish poisoning (NSP), diarrhetic shellfish poisoning (DSP) and paralytic shellfish poisoning (PSP)
  - pesticides
  - water additives
  - toxic metals
  - polychlorinated biphenyls (PCBs)
- sources of environmental contamination that can present a food safety risk in the growing and harvesting of bivalve molluscs, and related food safety controls, including risks associated with both on-shore and wild fisheries
- sources of information on acceptable and legal product quality requirements, including legal limits to ensure product safety
- classifications applying to harvesting areas, system for monitoring and determining status, sources of advice on classification and methods of communicating classification information
- sources of pre- and post-harvest contamination, and related control requirements
- risks and related control methods to prevent cross-contamination, including sorting and cleaning
- prerequisite programs required to support bivalve mollusc growing and harvesting
- basic principles of water sampling and test methods
- principles and associated control measures relating to effective purging of shellfish, including methods, including relaying and depuration, when practised according to state and territory legal and regulatory requirements
- risks associated with depuration and wet storage methods, and related control methods and prerequisite programs that meet legal requirements
- sources of pre- and post-harvest contamination, including sewage, algal bio-toxins and vibrio organisms and related control requirements
- stock handling and storage risks and control methods
- facilities and equipment used in the growing and harvesting of bivalve molluscs, including features required to meet regulatory requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated as an individual (not part of a group) in a real workplace
- resources, equipment and materials:
  - food safety programs covering bivalve mollusc growing and harvesting processes

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - plant and equipment that would typically be used in a commercial bivalve mollusc growing and harvesting business
  - case studies of audit processes, including one that involves relaying, depuration or wet storage
- specifications:
  - standard and authorised work practices, safety requirements and environmental constraints
  - food safety-related documentation typical of commercial growing and harvesting businesses and used for the purpose of verification.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPAUD5002 Audit a cook chill process

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to support a food safety audit of food safety programs that include extended life cook chill processes and products, which are minimally heat-processed foods distributed as chilled products with defined shelf-life.

This unit applies to individuals who are responsible for auditing extended and short shelf-life cook chill processes. Audit processes would typically occur within the context of auditing a food safety program that defines related prerequisite program requirements.

This unit supports relevant legislation, including food standards included in the Australia New Zealand Food Standards Code, industry codes of practice relating to validation and verification of a food safety program, and the audit requirements detailed in the National Regulatory Food Safety Auditor Guideline and Policy, and should be read in conjunction with these documents.

Both regulatory and commercial audit system owners may specify additional certification requirements of auditors eligible to audit food safety programs within their system.

Pre-requisite Unit

The prerequisite units of competency for this unit are:

- FBPAUD4002 Communicate and negotiate to conduct food safety audits
- FBPAUD4003 Conduct food safety audits
- FBPAUD4004 Identify, evaluate and control food safety hazards

Unit Sector

Food safety auditing (AUD)

Elements and Performance Criteria

Elements	Performance Criteria

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify and assess food safety hazards and related control options for cook chill processes	1.1 Identify microbiological food safety hazards that could present a risk in cook chill products at the point of consumption, by type, origin and food association, and assess to determine the significance of the hazard 1.2 Identify chemical food safety hazards that could present a risk in cook chill products at the point of consumption, including toxin presence, by type and food association, and assess to determine risk level and control requirements 1.3 Identify and assess physical food safety hazards that could present a risk in the food at the point of consumption to determine risk level and control requirements 1.4 Identify cook chill process control requirements and methods to ensure that finished cook chill products meet food safety objectives
2. Confirm that appropriate evidence supports validation of the cook chill process	2.1 Review validation evidence and records to confirm that appropriate level of validation has occurred 2.2 Identify and assess evidence used by the business to validate the process to confirm that it is credible and adequate to achieve the food safety objective
3. Verify the food safety program for a cook chill process	3.1 Identify, collect and review system records required to support verification 3.2 Review business documentation and conduct inspections to confirm that facilities and equipment design and components comply with regulatory and business standards 3.3 Review business documentation and conduct inspections to confirm that operational monitoring and testing procedures and frequency meet regulatory requirements, industry and business standards

Foundation Skills

Assessment Requirements for FBPAUD5002 Audit a cook chill process

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has actively participated in a minimum of two food safety program audits of the extended and short shelf-life cook chill process, including two of the following:

- a five-day cook chill process
- a cook chill process resulting in an extended shelf-life product
- a kettle or cook tank cook chill process
- a sous vide cook chill process.

For each audit, individuals must also show evidence of:

- documenting evidence that details the review of the processor's hazard analysis critical control point (HACCP) plan to determine if the critical control points (CCPs) are correctly identified, valid, adequately monitored and verified
- identifying target organisms for a range of foods
- determining capacity of distribution chain to control temperature parameters
- determining requirements of specific extended and short shelf-life cook chill methods for a range of products.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- regulations, codes of practice, guidelines, technical standards and Australian Standards relating to all forms of cook chill processing of foods
- relevant sections of the Australia New Zealand Food Standards Code

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- target organisms that can occur in extended and short shelf-life cook chill foods, their survival and growth characteristics and related control methods
- specific hazards that affect vulnerable persons, including clients of facilities listed in Standard 3.2.2 of the Food Standards Code
- principles of heat treatment and chilling as they apply to extended and short shelf-life cook chill processing methods and product types
- criteria used to specify heat treatment, cooling, storage and shelf-life parameters for extended and short shelf-life cook chill products
- factors that impact on heat and chilling processes meeting food safety objective
- prerequisite programs required to support effectiveness of cook chill processes
- operational principles of commercial extended and short shelf-life cook chill equipment, including equipment features required to meet regulatory requirements, and critical factors to be controlled to ensure delivery of heating and chilling processes that meet food safety objective
- features of the environment in which cook chill foods are distributed, including risk factors
- foods and preparation methods that present a particular risk to vulnerable populations, including cross-contamination risks associated with multi-tasking and cold chain maintaining temperatures during storage, transport and distribution
- principles of packaging to form a suitable seal, and impact of processing parameters and conditions on packaging integrity
- effect of characteristics and pre-processing of raw materials and post-process packaging on the stability and safety of the product
- labelling requirements for extended and short shelf-life cook chill products
- food safety risks and controls to avoid post-process contamination of heat-treated product
- principles of test methods and frequency to confirm the effectiveness of cook chill processes and meet regulatory, industry and business standards.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated as an individual (not part of a group) in a real workplace
- resources, equipment and materials:
  - food safety programs covering extended and short shelf-life cook chill processes
  - plant and equipment that would typically be used by commercial businesses producing extended and short shelf-life cook chill products
  - audit scenarios, including a five-day cook chill process, a kettle or cook tank cook chill process, or a sous vide cook chill process
- specifications:
  - food safety-related documentation typical of commercial businesses producing extended and short shelf-life cook chill products and used for the purpose of verification

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- evidence that would typically be used by commercial businesses to support validation processes.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPAUD5003 Audit a heat treatment process

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to support a food safety audit that includes heat treatment processes designed to bring about a defined logarithmic reduction of the target organism to ensure safe food.

This unit applies to individuals who are responsible for auditing heat treatment processes. Audit processes would typically occur within the context of auditing a hazard analysis critical control point (HACCP)-based food safety program that defines related prerequisite program requirements. This unit applies to auditing aspects of the process that directly relate to delivering the prescribed heat treatment. It covers related factors, including raw materials receival, pre- and post-process storage and packaging methods and materials only to the extent that they impact on or are controlled by the heat treatment process.

This unit supports relevant legislation, including food standards included in the Australia New Zealand Food Standards Code, industry codes of practice relating to validation and verification of a food safety program, and the audit requirements detailed in the National Regulatory Food Safety Auditor Guideline and Policy, and should be read in conjunction with these documents.

Both regulatory and commercial audit system owners may specify additional certification requirements of auditors eligible to audit food safety programs within their system.

Pre-requisite Unit

The prerequisite units of competency for this unit are:

- FBPAUD4002 Communicate and negotiate to conduct food safety audits
- FBPAUD4003 Conduct food safety audits
- FBPAUD4004 Identify, evaluate and control food safety hazards

Unit Sector

Food safety auditing (AUD)

Assessment Requirements for FBPAUD5003 Audit a heat treatment process

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has actively participated in two food safety program audits of food heat treatment processes, including:

- retorting cans or pouches
- pasteurisation.

For each audit, individuals must also show evidence of:

- documenting evidence that details the review of the processor's hazard analysis critical control point (HACCP) plan to determine if the critical control points (CCPs) are correctly identified, valid, adequately monitored and verified
- using time temperature indicators (TTIs) to measure the effectiveness of a range of heat treatment
- evaluating raw materials
- evaluating sterilisation packaging and equipment (relevant to aseptic systems) and post-process handling.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- regulations, codes of practice, guidelines, technical specifications and, where appropriate, specific product heat treatment requirements and Australian Standards relating to heat treatment of foods
- relevant sections of the Australia New Zealand Food Standards Code
- target organisms that can occur in heat-treated foods and related survival and growth characteristics

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- principles of heat treatment and application of heat-processing methods to product types
- criteria used to specify and evaluate heat treatment for each heat processing method
- factors that impact on heat distribution and heat penetration according to both retorting and pasteurisation methods
- principles of operation of commercial heat-processing equipment, including equipment features required to meet regulatory requirements, and critical factors to be controlled to ensure delivery of prescribed heat treatment and related processes, including retorting and pasteurisation
- procedural safeguards used to track processing of product
- principles of packaging to form a suitable seal, and impact of packaging system and heat treatment methods and equipment on process effectiveness and packaging integrity
- characteristics of raw materials and pre-processing requirements that impact on the microbiological profile and that need to be considered in determining the thermal process
- post-processing packaging and handling that impact on the ability to maintain the food safety objective following thermal processing, and related prerequisite programs required to support effectiveness of heat treatment processes
- food safety risks and controls to avoid post-process contamination of heat-treated product
- principles of sampling requirements and test methods to confirm equipment integrity, effectiveness of heat treatment, packaging system and seal integrity, and post-processing conditions to meet regulatory, industry and business standards.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated as an individual (not part of a group) in a real workplace
- resources, equipment and materials:
  - food safety plans covering heat treatment processes
  - plant and equipment that would typically be used in a commercial manufacturing business
  - scenarios of different heat treatment processes
- specifications:
  - food safety-related documentation typical of commercial manufacturing businesses and used for the purpose of verification
  - evidence and documentation relevant to heat treatment processes that would typically be used by commercial manufacturing businesses to support validation processes.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPAUD5004 Audit manufacturing of ready-to-eat meat products

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to support a food safety audit of food safety programs relating to the manufacture of ready-to-eat meat products.

This unit applies to individuals who are responsible for auditing ready-to-eat meat manufacturing processes. Audit processes would typically occur within the context of auditing a hazard analysis critical control point (HACCP)-based food safety program that defines related prerequisite program requirements.

This unit covers raw materials receival, processing of ready-to-eat meat products and post-processing storage and handling of product undertaken by the manufacturer of ready-to-eat meat products.

This unit supports relevant legislation, including food standards included in the Australia New Zealand Food Standards Code, industry codes of practice relating to validation and verification of a food safety program, and the audit requirements detailed in the National Regulatory Food Safety Auditor Guideline and Policy, and should be read in conjunction with these documents.

Both regulatory and commercial audit system owners may specify additional certification requirements of auditors eligible to audit food safety programs within their system.

Pre-requisite Unit

The prerequisite units of competency for this unit are:

- FBPAUD4002 Communicate and negotiate to conduct food safety audits
- FBPAUD4003 Conduct food safety audits
- FBPAUD4004 Identify, evaluate and control food safety hazards

Unit Sector

Food safety auditing (AUD)

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify and assess food safety hazards and control options for ready-to-eat meat manufacturing and related handling processes	1.1 Identify microbiological food safety hazards that could present a risk in ready-to-eat meat products at the point of consumption, by type, origin and food association, and assess to determine risk level and control requirements 1.2 Identify chemical food safety hazards that could present a risk in ready-to-eat meat products at the point of consumption, including toxin presence, by type, origin and food association, and assess to determine risk level and control requirements 1.3 Identify and assess physical food safety hazards that present a risk in food to determine control requirements 1.4 Identify control requirements and methods to ensure that finished, ready-to-eat meat products meet food safety objectives
2. Confirm that appropriate evidence supports validation of the ready-to-eat meat manufacturing process	2.1 Review validation evidence and records to confirm that an appropriate level of validation has been applied 2.2 Identify and assess evidence used by the business to validate the process to confirm that it is credible and adequate to meet the food safety objective
3. Verify the food safety program for a ready-to-eat meat manufacturing process	3.1 Identify, collect and review system records required to support verification 3.2 Review business documentation and conduct inspections to confirm that facilities and equipment design and components comply with regulatory and business standards 3.3 Review business documentation and conduct inspections to confirm that operational monitoring and testing procedures and frequency meet regulatory requirements, industry and business standards

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Reading	• Interpret information relating to food safety and audit guidelines
Navigate the world of work	• Apply knowledge of regulations and policies relevant to food safety standards in the workplace • Monitor adherence to legal and regulatory standards and responsibilities for self and others
Get the work done	• Use problem-solving skills to identify and analyse non-conformance

Assessment Requirements for FBPAUD5004 Audit manufacturing of ready-to-eat meat products

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has actively participated in a minimum of two food safety audits of commercial manufacturing processes that produce different ready-to-eat meat products, including:

- documenting evidence that details the review of the processor's hazard analysis critical control point (HACCP) plan to determine if the critical control points (CCPs) are correctly identified, valid, adequately monitored and verified
- identifying product-specific risks and typical processing methods, including sources of information on processing parameters, for one product in each of the following categories:
  - uncooked fermented meat products
  - smoked or cooked meat products
  - slowly cured meat, such as prosciutto
  - pâté
- identifying storage and transport of safe ready-to-eat meat products for at least one product in each of the following product categories:
  - uncooked fermented meat products
  - smoked or cooked meat products
  - slowly cured meat, such as prosciutto
  - pâté.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- regulations, codes of practice, guidelines, technical specifications and Australian Standards relating to the formulation and manufacture of ready-to-eat meat products

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- relevant sections of the Australia New Zealand Food Standards Code
- sources of information on acceptable processing and related storage and handling methods and parameters for given products and target microorganisms
- pathogens that can occur in meat products, and related control methods required in manufacturing, post-processing and storage, including:
  - Campylobacter jejuni (poultry)
  - pathogenic Escherichia coli, including enterohaemorrhagic Escherichia coli
  - Clostridium perfringens and Clostridium botulinum
  - listeria monocytogenes
  - Salmonella spp
  - Staphylococcus aureus
  - Yersinia enterocolitica
  - viruses
  - moulds and fungi
  - parasites
  - algae
- risks posed by products that can be consumed without heating or cooking, including uncooked fermented meat, uncooked comminuted fermented meat (UCFM) and other salami products
- survival and growth characteristics of pathogens and ability of processed product to support pathogen growth
- chemicals that pose a food safety risk in meat products, and related control methods
- physical sources of contamination and related control methods
- effect of raw material characteristics, including bacterial load and temperature, and pre-processing conditions on the growth of pathogens
- prerequisite programs required to support safe manufacture of ready-to-eat meat products
- purpose, role and storage requirements of ingredients
- principles of manufacturing methods and factors that affect processing requirements
- use and effectiveness of hurdle technologies
- principles of packaging to form a suitable seal, and requirements of post-processing handling and conditions to ensure safe product
- principles of operation of ready-to-eat meat product manufacturing equipment, including equipment features required to meet regulatory requirements and critical factors to be controlled to ensure safe food outcomes
- indications of unacceptable product, and related test requirements
- principles of test methods and frequency in monitoring condition of raw materials and processing, and in confirming that final product is fit for human consumption.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated as an individual (not part of a group) in a real workplace

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- resources, equipment and materials:
  - plant and equipment that would typically be used in the commercial manufacture of ready-to-eat meat products
  - food safety programs and related documentation
- specifications:
  - records for the purpose of verification
  - evidence to support validation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPBEV2001 Operate a deaeration, mixing and carbonation process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down equipment used to deaerate, mix and carbonate aerated drink products prior to filling.

The unit applies to individuals who are production workers responsible for applying basic operating procedures to operate and monitor, a deaerator, a continuous flow mixing process and a carbonator.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

and process for operation	1.2 Identify and ensure cleaning and maintenance requirements have been met according to food safety requirements 1.3 Fit and adjust machine components and related attachments according to operating requirements 1.4 Enter processing or operating parameters to meet safety and production requirements 1.5 Check and adjust equipment to ensure optimum performance 1.6 Carry out pre-start checks according to operator instructions
2. Start and monitor the deaeration, mixing and carbonation process	2.1 Start and operate the process according to work health and safety and operating procedures 2.2 Monitor equipment to identify variation in operating conditions 2.3 Identify variation in equipment operation and report maintenance requirements 2.4 Ensure that product specifications are being met at each stage according to production specifications 2.5 Rectify or report out-of-specification product or process outcomes according to workplace procedures
3. Shut down the deaeration, mixing and carbonation process and report maintenance requirements	3.1 Identify the appropriate shutdown procedure 3.2 Shut down the process safely according to operating procedures 3.3 Maintain the work area and report identified maintenance requirements according to workplace procedures 3.4 Update and maintain records according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret textual information to identify relevant and key information from specifications, instructions, production schedules and operating and service manuals

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Writing	• Use clear language and correct concepts and industry terminology for reporting and keeping records
Numeracy	• Recognise and perform basic calculations for handling product and material weights and volumes and for setting processing parameters
Oral communication	• Use clear language and correct concepts and industry terminology to ensure clarity of meaning when reporting issues
Navigate the world of work	• Recognise and implement organisational expectations and follow explicit protocols and procedures
Get the work done	• Follow clearly defined instructions and sequencing, and monitor own progress for the task, seeks assistance when necessary • Respond to routine problems following instruction and procedures

Assessment Requirements for FBPBEV2001 Operate a deaeration, mixing and carbonation process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 1.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that, on at least one occasion, the individual has:

- conducted pre-start checks on machinery used for deaeration, mixing and carbonation
- started, operated, monitored and adjusted process equipment according to work health and safety policies and procedures to achieve required quality outcomes
- taken corrective action in response to typical faults and inconsistencies
- completed workplace records as required
- shut down equipment safely
- applied food safety policies and procedures to work practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of each stage of the deaeration, mixing and carbonation process, including the relationships between pressure, temperature and volume on processing outcomes
- basic operating principles of deaeration, mixing and carbonation equipment including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - purpose and location of process equipment sensors and related feedback instrumentation
  - equipment service requirements and actions to take if services are not available
- process flow of the deaeration, mixing and carbonation and the effect of outputs on downstream processes, including:
  - how each stage of the process affects related stages

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

    - how the outputs of this process affect the filling stage
- quality characteristics to be achieved by each stage of the process, including:
    - amount of dissolved air to be removed at deaeration
    - typical water and syrup ratios for product types
    - volume of carbon dioxide to be dissolved in the aerated product
- quality and condition requirements of inputs and effect of variation on process performance including:
    - characteristics of different ingredients
    - how ingredients behave when processed
- operating requirements of deareation, mixing and carbonation equipment and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the production process, including inspecting, measuring and testing as required by the process including:
    - inspection or test points (control points) in the process
    - procedures and recording requirements
    - test procedures for brix and carbonation
    - other tests
- contamination and food safety risks associated with the process and related procedures
- common causes of variation in output quality and corrective action required
- work health and safety hazards and controls for deaeration, mixing and carbonation equipment
- requirements of different shutdown procedures for the process including:
    - workplace production requirements
    - emergency and routine shutdowns
    - procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste and rework collection and handling procedures related to the deaeration, mixing and carbonation equipment and process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- routine maintenance procedures for deaeration, mixing and carbonation equipment
- cleaning and sanitation procedures for deaeration, mixing and carbonation equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - a workplace or an environment that accurately represents workplace conditions

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- resources, equipment and materials:
  - personal protective clothing used for food handling and safe operation of equipment
  - suitable water supply
  - procedures and equipment for cleaning deaeration, mixing and carbonation equipment and work area
- specifications:
  - workplace procedures, including safe work practices, food safety, quality, and environmental requirements
  - specifications, control points and parameters for the deaeration, mixing and carbonation equipment and process
  - deaeration, mixing and carbonation equipment operating and service manuals
  - record-keeping documents required for the work specified in the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPBPG2001 Operate the bottle supply process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate and shut down a range of semi-automated bottling equipment.

The unit applies to individuals who work under general supervision in bottling and packaging and are responsible for operating and monitoring a bottle supply process and associated equipment.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Bottling and Packaging (BPG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to operate bottle supply equipment	1.1 Confirm work instructions and identify potential health and safety in the workplace hazards and controls with supervisor 1.2 Select, fit and use appropriate personal protective equipment

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Ensure that product and materials are available to meet bottle supply requirements 1.4 Prepare product and materials to meet bottle supply requirements 1.5 Ensure that services are available and ready for operation 1.6 Prepare bottle supply equipment and check to confirm readiness for use 1.7 Setup equipment to meet bottle supply requirements
2. Operate and monitor the bottle supply process	2.1 Start-up bottle supply equipment according to operating instructions 2.2 Monitor control points to confirm performance is maintained within equipment operation specifications 2.3 Ensure bottles are supplied according to requirements 2.4 Monitor bottle supply equipment to confirm operating conditions 2.5 Identify, rectify and report out-of-specification end product, process and equipment performance according to workplace procedures 2.6 Liaise with operators in other work areas to ensure ongoing bottling process runs efficiently and effectively
3. Shut down the bottle supply process	3.1 Shut down bottle supply equipment according to operating instructions 3.2 Prepare bottle supply equipment for cleaning according to workplace procedures
4. Conduct housekeeping activities	4.1 Carry out cleaning and maintenance procedures 4.2 Collect, treat and dispose of or recycle waste generated by both the process and cleaning procedures 4.3 Record workplace information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Reading	• Interpret key messages in standard operating procedures
Navigate the world of work	• Follow clear instructions within defined level of responsibility • Recognise organisational expectations and follows explicit protocols and procedures • Seek clarification when required
Get the work done	• Respond to routine problems using step by step instruction and procedures

Assessment Requirements for FBPBPG2001 Operate the bottle supply process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively prepared for, started up, operated and shut down all items of equipment involved in a bottle supply process on at least one occasion, including:

- confirming equipment is ready for operation, including checking that:
  - cleaning and sanitation processes are completed
  - stripping plates, rubber (pickup) cups and guides are clean and operational
  - any adjacent coding equipment is set up and operational
  - line controls (conveyors) are operational
  - line lube is operational and being correctly applied
  - electronic bottle inspector is set up and operational
  - all equipment is set for correct bottle height
  - water filters and ultraviolet (UV) sterilising system are operational
  - bottle feeds are filled with correct screws and stars and accurately aligned
- monitoring and adjusting process equipment to achieve required quality outcomes, ensuring:
  - gas and compressed air pressures are correctly adjusted
  - quality bottles are depalletised
  - rinser cycles run effectively
  - bottles are clean after rinsing
  - water filtration does not block due to excessive pressure
  - UV lamps do not fail or exceed prescribed usage limits
  - levels and faults of bottles ejected by the electronic bottle inspector
- taking corrective action in response to typical faults and inconsistencies
- liaising with other work areas involved in the bottling process
- completing workplace records as required

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- applying safe work practices and identifying health and safety in the workplace hazards and controls.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of bottle supply equipment
- key features of bottle supply equipment and components
- links to related processes
- stages and changes which occur during the process
- effect of process stages on end product
- quality characteristics and uses of end product
- effect of product and materials on process outcomes
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services required
- significance and methods of monitoring control points
- common causes of variation and corrective action required
- technological advances that include automation and use of robots
- workplace health and safety hazards and controls
- routine maintenance requirements
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- recording requirements and procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - a bottling context
  - bottling resources and consumables
  - tools and equipment for adjusting and maintaining equipment
  - personal protective equipment
- specifications:
  - work procedures and operator manuals or instructions.

FBPBPG2002 Operate the carton erection process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate and shut down a range of semi-automated carton packing equipment.

The unit applies to individuals who work under general supervision in bottling and packaging and are responsible for operating and monitoring a carton erection process and associated equipment.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Bottling and Packaging (BPG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to operate carton erection equipment	1.1 Confirm work instructions and identify potential health and safety in the workplace hazards and controls with supervisor 1.2 Select, fit and use appropriate personal protective equipment

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.3 Ensure that product and dry goods are available and ready for use 1.4 Ensure that services are available and ready for operation 1.5 Prepare carton erection equipment and check to confirm readiness for use 1.6 Set equipment to meet carton erection requirements
2. Operate and monitor the carton erection process	2.1 Start-up carton erection equipment according to operating instructions 2.2 Monitor control points to confirm performance is maintained within equipment operation specification 2.3 Erect cartons according to specifications 2.4 Monitor carton erection equipment to confirm operating condition 2.5 Identify, rectify and report out-of-specification end product, process and equipment performance according to workplace procedures 2.6 Liaise with operators in other work areas to ensure ongoing packaging process runs efficiently and effectively
3. Shut down the carton erection process	3.1 Shut down carton erection equipment according to operating instructions 3.2 Prepare carton erection equipment for cleaning according to workplace procedures
4. Conduct housekeeping activities	4.1 Carry out cleaning procedures 4.2 Collect, treat and dispose of or recycle waste generated by both the process and cleaning procedures according to workplace procedures 4.3 Record workplace information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Reading	• Interpret key messages in standard operating procedures
Navigate the world of work	• Follow clear instructions within defined level of responsibility • Recognise organisational expectations and follows explicit protocols and procedures • Seek clarification when required
Get the work done	• Respond to routine problems using step by step instruction and procedures

Assessment Requirements for FBPBPG2005 Operate the electronic coding process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up, operated and shut down the electronic coding process on a minimum of one occasion, including:

- confirming equipment is ready for operation, including:
  - cleaning and sanitation processes are completed
  - all inkjet heads have been purged and are operational
  - equipment is set up for correct date and specified application
  - all related touch screens and computers are operational
  - line controls and conveyors are operational
  - vacuum pumps are operational
  - labels and inks are to specification
  - printers have been tested and are operational
  - pressure sensitive applicators are operational
  - bottle feeds are filled with correct screws and stars and accurately aligned
- monitoring and adjusting process equipment to achieve required quality outcomes, ensuring:
  - compressed air pressure is at correct level
  - vacuum pressure is at correct level
  - quality and legibility of coding
  - all coding is correct as specified
  - application of bar code pressure sensitive labels is as specified
  - sensors are detecting missed labels
  - fill height and volume is correct
- liaising with other work areas involved the packaging process
- completing workplace records as required

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- applying safe work practices and identifying workplace health and safety hazards and controls

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of electronic coding equipment
- key features of electronic coding equipment and components which can include the mouse, keyboard, screen and control panel
- basic principles of data entry, storage and retrieval using information technology
- software functions, including codes, prompts and menus, as required, to perform coding tasks
- security and data management procedures
- links to related processes
- stages and changes which occur during the electronic coding process
- effect of process stages on end product
- quality characteristics and uses of end product
- effect of product and materials on process outcomes
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services required
- significance and methods of monitoring control points
- common causes of variation and corrective action required
- workplace health and safety hazards and controls
- routine maintenance requirements
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- recording requirements and procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - electronic coding equipment
  - electronic coding resources and consumables

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- tools and equipment for adjusting and maintaining equipment
- personal protective equipment

- specifications:
  - work procedures and operating instructions or instructions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPBPG2007 Operate manual bottling and packaging processes

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate and shut down a range of manual and basic bottling and packaging equipment and to perform associated manual tasks in a bottling and packaging environment.

The unit applies to individuals who work under general supervision in bottling and packaging and are responsible for operating and monitoring a manual bottling and packaging process and associated equipment.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
equipment	1.2 Select, fit and use appropriate personal protective equipment 1.3 Ensure that product and materials are available to meet production requirements 1.4 Prepare product and materials to meet production requirements 1.5 Ensure that services are available and ready for operation 1.6 Prepare equipment and check to confirm readiness for use 1.7 Set up equipment to meet production requirements
2. Operate and monitor manual or basic bottling and packaging processes	2.1 Start up equipment for manual bottling and packaging according to workplace procedures 2.2 Monitor control points to confirm performance is maintained within specification 2.3 Ensure that bottling and packaging output meets specification 2.4 Monitor equipment to confirm operating condition 2.5 Identify, rectify and report out-of-specification product, process and equipment performance according to workplace procedures
3. Shut down manual or basic bottling and packaging processes	3.1 Shut down manual bottling and packaging equipment according to workplace procedures 3.2 Prepare equipment for cleaning according to workplace procedures
4. Conduct housekeeping activities	4.1 Carry out cleaning and maintenance procedures 4.2 Collect, treat and dispose of or recycle waste generated by both the process and cleaning procedures 4.3 Record workplace information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret key messages in standard operating procedures

Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up, operate and shut down at all items of equipment in a manual or basic bottling and packaging process, to bottle and pack a minimum of 20 items, including:

- confirming equipment is ready for operation, including:
  - confirming hygiene and sanitation standards have been met
  - adjusting air pressure
  - checking conveyor speed
  - adjusting heights and widths to accommodate specific product and material specifications
  - completing a test run
  - confirming flow of line lube and water
  - realigning diverters and turners to ensure flow is as instructed
  - cartons meet specifications
  - bottles meet specification
- monitoring and adjusting equipment to achieve required quality outcomes, ensuring:
  - bottle cleanliness and draining effectiveness
  - dryness of bottles
  - glue length
  - strength of carton seals
  - shrinkage or fit of capsules
  - stacking and stacking patterns meet specifications
  - bottle counters are re-set at the start of each product
  - stencils applied are clear and legible
  - bottle contents levels meet specification
  - ongoing quality of materials used

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

    - ongoing appearance of applications
- taking corrective action in response to typical faults and inconsistencies
- completing workplace records as required
- applying safe work practices and identifying health and safety in the workplace hazards and controls.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace information to identify bottling and packaging requirements for process specification, procedures and operating parameters
- stages and changes which occur during the equipment operation
- effect of equipment operation stages on end product and output
- quality characteristics and uses of end product and output
- materials preparation requirements and effect of variation on the equipment operation
- emergency and troubleshooting procedures, including failure of services
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- services required
- significance and method of monitoring control points within the equipment operation
- common causes of variation and corrective action required
- health and safety in the workplace hazards and controls, including manual handling
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- shutdown sequence
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- routine maintenance requirements
- waste handling requirements and procedures
- recording requirements and procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
    - manual bottling and packaging equipment
    - manual bottling and packaging resources and consumables
    - tools and equipment for adjusting and maintaining equipment
    - personal protective equipment

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- specifications:
  - work procedures and operating instructions or instructions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPBPG2008 Perform basic packaging tests and inspections

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to carry out the tests and inspections required to monitor product and process at various control points on an operating packaging line.

The unit applies to individuals who work under general supervision in bottling and packaging and are responsible for applying basic quality assurance principles to product.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed basic packaging tests and inspections at a minimum of two different critical control points on an operating packaging line, including:

- confirming test equipment is ready for operation, including:
  - recognising and rejecting contaminated or faulty glassware and equipment
  - conducting safety checks
  - replacing consumables
  - setting instrument and calibration
- operating test equipment according to workplace procedures and manufacturer instructions
- carrying out routine tests
- reading and interpreting results
- recording results as required
- monitoring the process and test equipment to identify out-of-specification results or non-compliance
- taking corrective action in response to out-of-specification results, anomalies or non-compliance
- reporting and/or recording corrective action according to workplace procedures
- following procedures to repeat or validate results
- liaising with other work areas involved the packaging process
- applying safe work practices and identifying health and safety in the workplace hazards and controls.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common bottling and packaging techniques
- enterprise policy and procedure with regard to:
  - packaging line quality assurance testing
  - health and safety in the workplace
- purpose and principles of the test
- relevant standards and specifications, and basic legislative requirements (e.g. quality, health, safety, labelling and equipment) and their implications
- procedure specification and operating parameters
- effect of sampling and testing stages on results or outcomes
- start-up and set-up procedures required
- common causes and knock-on effects of inaccuracies and preventive or corrective action required
- normal range of results on products or packaging items tested
- emergency procedures for a range of operational problems
- procedures and responsibility for reporting problems
- health and safety in the workplace hazards and controls
- cleaning and sanitising requirements of equipment and work area
- sampling plan and procedures relevant to work task.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - tools and equipment for conducting tests
  - personal protective equipment
  - instructions, information, specifications and schedules
  - products and materials on which to conduct tests
- specifications:
  - work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up, operated and shut down an automated or semi-automated bottle filling system on a minimum of one occasion, including:

- confirming equipment is ready for operation, including:
  - cleaning and sanitation processes are completed
  - filling tubes meet specification
  - doser is set up and is operational
  - bottle feeds are filled with correct screws and stars and accurately aligned
  - height of filler is adjusted to suit bottle height
  - lines and equipment are flushed with product to be bottled
- monitoring and adjusting process equipment to achieve required quality outcomes, ensuring:
  - compressed air pressure is at correct level
  - vacuum pressure is at correct level
  - product temperature
  - fill height and volume
- taking corrective action in response to typical faults and inconsistencies
- liaising with other work areas involved the packaging process
- completing workplace records as required
- applying safe work practices and identifying health and safety in the workplace hazards and controls.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- purpose and principles of bottle filling equipment
- key features of bottle filling equipment and components
- links to related processes
- effect of process stages on end product
- quality characteristics and uses of end product
- effect of product and materials on process outcomes
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- significance and methods of monitoring control points
- common causes of variation and corrective action required
- technological advances that include automation and use of robots
- health and safety in the workplace hazards and controls
- routine maintenance requirements
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- recording requirements and procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - bottling equipment
  - resources, tools and consumables
  - personal protective clothing and equipment
  - products, consumables and materials for filling purposes
  - cleaning procedures, materials and equipment
  - documentation and recording requirements and procedures
- specifications:
  - specifications and schedules
  - equipment operating instructions, service records and corresponding information

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPBPG3002 Operate the labelling process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up, operated and shut down an automated or semi-automated product labelling system on a minimum of one occasion, including:

- confirming equipment is ready for operation, including:
  - heating glue to correct temperature
  - checking glue meets specification according to label type
  - confirming dryness of container in readiness for labels
  - checking labels meet specification of product
  - inserting labels, correctly orientated in magazine
  - feeding label web through application mechanism
- monitoring and adjusting process equipment to achieve required quality outcomes, ensuring:
  - label adhesion
  - label orientation
  - label damage
  - label positioning
  - smooth versus bubbled labels
  - misprinted labels
  - any label or product coding applied as part of the process
- taking corrective action in response to typical faults and inconsistencies
- liaising with other work areas involved in the packaging process
- completing workplace records as required
- applying safe work practices and identifying health and safety in the workplace hazards and controls.

Assessment Requirements for FBPBPG3003 Operate the softpack filling process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up, operated and shut down an automated or semi-automated softpack filling system on a minimum of one occasion, including:

- confirming equipment is ready for operation, including:
  - checking head alignment and operation
  - testing bag weights and volumes
  - completing a test run
  - flushing lines and equipment with product to be packaged
  - making minor adjustments as required
  - confirming cleaning and sanitation processes are completed
  - checking evacuation of air from softpack via vacuum
  - ensuring inert gas release at end of filling cycle
- monitoring and adjusting process equipment to achieve required quality outcomes, ensuring:
  - continuity of supply of softpacks to filler
  - correct bag weight and volumes
  - bag quality and integrity (leaks)
  - inert gas is released
  - vacuum prior to fill
- taking corrective action in response to typical faults and inconsistencies
- liaising with other work areas involved in the packaging process
- completing workplace records as required
- applying safe work practices and identifying health and safety in the workplace hazards and controls.

- common causes of variation and corrective action required
- health and safety in the workplace hazards and controls
- lock-out and tag-out procedures
- routine maintenance requirements
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- waste handling requirements and procedures
- recording requirements and procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - a softpack filling context
  - products, materials and consumables
  - personal protective equipment
  - equipment, services and corresponding information as required
- specifications:
  - work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements
  - instructions, information, specifications and schedules to match the softpack filling task.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPBPG3004 Operate the bottle sealing process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate and shut down a range of semi-automated bottling and packaging equipment involved in the bottle sealing process in a bottling and packing environment.

The unit applies to individuals who are responsible for operating and monitoring a bottle sealing process and associated equipment. They work under broad direction and exercise autonomy and judgement where required.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Bottling and Packaging (BPG)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Prepare to operate bottle sealing equipment	1.1 Interpret work instructions, including identifying potential health and safety in the workplace hazards and controls

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	1.2 Select, fit and use appropriate personal protective equipment 1.3 Ensure that product and dry goods are available to meet bottle sealing requirements 1.4 Ensure that services are available and ready for operation 1.5 Prepare bottle sealing equipment and check to confirm readiness for use 1.6 Set-up equipment to meet bottle sealing requirements
2. Operate and monitor the bottle sealing process	2.1 Start up bottle sealing equipment according to operating instructions 2.2 Monitor control points to confirm performance is maintained within equipment operation specification 2.3 Seal bottles according to requirements 2.4 Monitor bottle sealing equipment to confirm operating condition 2.5 Identify, rectify and report out-of-specification end product, process and equipment performance according to workplace procedures 2.6 Liaise with operators in other work areas to ensure ongoing bottling process runs efficiently and effectively
3. Shut down the bottle supply process	3.1 Shut down bottle sealing equipment according to operating instructions 3.2 Prepare bottle sealing equipment for cleaning according to workplace procedures
4. Conduct housekeeping activities	4.1 Carry out cleaning procedures 4.2 Collect, treat and dispose of or recycle waste generated by both the process and cleaning procedures 4.3 Record workplace information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Skill	Description
Reading	• Interpret messages in standard operating procedures
Navigate the world of work	• Recognise organisational expectations and follows explicit protocols and procedures • Seek clarification when required
Get the work done	• Problem solve issues as they arise

Assessment Requirements for FBPBPG3004 Operate the bottle sealing process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up, operated and shut down all items of equipment on a bottle sealing process on a minimum of one occasion, including:

- confirming equipment is ready for operation, ensuring:
  - cleaning and sanitation processes are completed
  - magazine, hoppers, chutes and guides are operational
  - any adjacent coding equipment is set up and operational
  - line controls (conveyors) are operational
  - line lube is operational and being correctly applied
  - torque testers are correctly calibrated
  - equipment is set for correct bottle height
  - vacuum pump is operational
  - vacuum block and corker jaws are correctly lubricated
  - bottle feeds are filled with correct screws and stars and accurately aligned
- monitoring and adjusting process equipment to achieve required quality outcomes, ensuring:
  - compressed air pressure is at correct level
  - torque on Roll On Tamper Evident (ROTE) seals
  - cork depths as established by the workplace
  - effective seal on crown seals
  - correct vacuum is being applied to head space in bottle
  - wire muselet is consistently applied
  - appearance of sealing application to approved quality
  - quality materials are used in the sealing process
- taking corrective action in response to typical faults and inconsistencies

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- liaising with other work areas involved the packaging process
- completing workplace records as required
- applying safe work practices and identifying health and safety in the workplace hazards and controls.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of bottle sealing equipment
- key features of bottle sealing equipment and components
- links to related processes
- stages and changes which occur during the process
- effect of process stages on end product
- quality characteristics and uses of end product
- effect of product and materials on process outcomes
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services required
- significance and methods of monitoring control points
- common causes of variation and corrective action required
- technological advances that include automation
- health and safety in the workplace hazards and controls
- routine maintenance requirements
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- recording requirements and procedures
- equipment operation and out-of-specification actions for:
  - compressed air pressure
  - torque on ROTE seals, Roll On Pilfer Proof, Lux
  - inappropriate cork depths
  - ineffective seal on crown seals
  - incorrect vacuum applied to head space in bottle
  - inconsistent application of wire muselet
  - poor appearance of sealing application
  - poor quality of dry goods used in the sealing process.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real bottling and packaging workplace
- resources, equipment and materials:
  - bottle sealing equipment
  - bottle sealing resources and consumables
  - tools and equipment for adjusting and, maintaining equipment
  - personal protective equipment
- specifications:
  - work procedures and operator's manuals or instructions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively prepared, operated and shut down all items of equipment in the tirage and transfer process on a minimum of one occasion including:

- confirming equipment used for the tirage and transfer process is ready for operation ensuring:
  - cleaning and sanitation processes are completed
  - filling tubes meet specification
  - bottle feeds are filled with correct screws and stars and accurately aligned
  - crown seal hopper, chutes and guides are operational
  - crown sealer is operational
  - vacuum is operational
  - rinser is operational
  - inert gas is operational
  - disgorger bottle piercing tips are straight and correctly aligned to receive bottles
  - de-crowner is operational
  - line controls and conveyors are operational
  - automatic binning and de-binning is set up for operation
  - filler, crown sealer, rinser, disgorger and de-crowner are adjusted to suit bottle height
  - lines and equipment are flushed with product to be bottled
- operating, monitoring and adjusting process equipment to achieve required quality outcomes ensuring:
  - gas and compressed air pressures are at correct level
  - vacuum is operational
  - product or wine base temperature is set correctly
  - fill height and volume is set correctly

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - ongoing appearance and quality of wine filled to tirage
  - effectiveness of crown seals in sealing wine in bottle
  - disgorger bottle piercing tips are not bent or incorrectly aligned
  - ongoing disgorging is draining wine efficiently
  - de-crowner is removing all crown seals
  - bottles are rinsed efficiently and are suitable for filling
  - vacuum and gas are being applied
  - bins being filled to tirage are clearly marked as specified
  - all identifying markings are removed from bins once wine is transferred
  - smooth flow of automatic binning and de-binning
- monitoring supply and flow of product and materials to and from the process
- taking corrective action in response to typical faults and inconsistencies, out-of-specification results or non-compliance
- safely shutting down equipment in response to routine shut down requirements
- cleaning and sanitising equipment according to workplace procedures
- sorting, treating, recycling or disposing of wastes according to workplace procedures
- completing workplace records as required
- applying safe work practices, identifying hazards and controlling risks.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of tirage and transfer equipment
- key features of tirage and transfer equipment and components
- health and safety in the workplace hazards and controls for the use of triage and transfer equipment
- personal protective equipment required for operating the tirage and transfer process
- workplace environmental procedures and controls
- set up, operation and shut down of equipment involved in the tirage and transfer process, including:
  - equipment and instrumentation components, purpose and operation
  - significance and methods of monitoring control points
  - common causes of variation and corrective action required
  - routine maintenance requirements
  - procedures and responsibility for reporting problems
  - routine shutdown sequence
- necessary services for process including power, compressed air, water, inert gas, steam and vacuum
- process specification, procedures and operating parameters
- basic operating principles of process control systems where relevant
- technological advances that include automation

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- shutdown and maintenance procedures including:
  - routine maintenance procedures
  - shutdown and cleaning requirements associated with changeovers and types of shutdown
  - shut down of equipment in response to an emergency situation
  - preparing and dismantling equipment for cleaning
  - collection, treatment and handling requirement for waste generated by processes and cleaning operation
  - cleaning and sanitising equipment according to workplace procedures
- workplace procedures for recording information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real bottling and packaging workplace
- resources, equipment and materials:
  - wine operations tirage and transfer equipment

FBPBPG3006 Operate traditional sparkling wine processes

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate and shut down a range of manual, semi-automated and automated equipment involved in the traditional sparkling wine processes of shaking, neck freezing, de-crowning, dosing and topping up.

The unit applies to individuals who are responsible for operating and monitoring traditional sparkling wine processes and associated equipment in the bottling and packaging industry. They work under broad direction and exercise autonomy and judgement where required.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively prepared, operated and shut down all items of equipment in the traditional sparkling wine processes of shaking, neck freezing, de-crowning, dosing and topping up on a minimum of one occasion including:

- confirming equipment used for traditional sparkling wine processes is ready for operation ensuring:
  - cleaning and sanitation processes are completed
  - automatic shaker is programmed and operational or manual shaking tables are set up
  - bottles are correctly binned and lids secured for shaking
  - manual or automatic de-binning is set up for operation
  - neck freezer is set up and operational
  - bottle feeds are filled with correct screws and stars and accurately aligned
  - manual or automatic de-crowner is operational
  - manual or automatic dosing equipment is set up and operational
  - manual or automatic topping-up equipment is set up and operational
  - vacuum is operational
  - refrigerant is operational
  - line controls and conveyors are operational
  - all equipment is adjusted to suit bottle height
- operating, monitoring and adjusting process equipment to achieve required quality outcomes ensuring:
  - gas and compressed air pressures are at correct level
  - wine to be shaken is binned and secured correctly
  - automatic bin shaker is operating to program
  - smooth flow of automatic or manual de-binning
  - all identifying markings are removed from bins once wine is transferred

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - continued supply of refrigerants
  - temperature of neck freezer is at correct level
  - smooth flow of bottles through neck freezer
  - de-crowner is removing all crown seals
  - temperature of top-up wine and liqueur is at correct level
  - lees plug is disgorging correctly
  - liqueur doser is delivering correct amount
  - top-up procedure meets wine level or volume requirements
- monitoring supply and flow of product and materials to and from the process
- taking corrective action in response to typical faults and inconsistencies, out-of-specification results or non-compliance
- safely shutting down equipment in response to routine shut down requirements
- cleaning and sanitising equipment according to workplace procedures
- sorting, treating, recycling or disposing of wastes according to workplace procedures
- completing workplace records as required
- applying safe work practices, identifying hazards and controlling risks.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- industry methods used in the traditional sparkling wine process
- quality characteristics and specifications of sparkling wine products
- health and safety in the workplace hazards and controls, particularly in relation to handling refrigerants and wine stored under pressure
- workplace environmental procedures and controls
- personal protective equipment required for sparkling wine processes
- purpose of equipment used in the traditional sparkling wine process
- necessary services for the traditional sparkling wine process including power, compressed air, water, inert gas, refrigerants, steam and vacuum services
- monitoring of the process including:
  - stages and changes which occur during the process
  - effect of process stages on end product
  - significance and methods of monitoring control points
  - common causes of variation and corrective action required
  - procedures and responsibility for reporting problems
- process specification, procedures and operating parameters
- basic operating principles of process control systems where relevant
- technological advances that include automation
- shutdown and maintenance procedures including:
  - routine maintenance procedures
  - shutdown and cleaning requirements associated with changeovers

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- shutdown of equipment in response to an emergency situation
- preparing and dismantling equipment for cleaning
- collection, treatment and handling requirement for waste generated by processes and cleaning operation
- cleaning and sanitising equipment according to workplace procedures
- workplace procedures for recording information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
  - wine operations traditional sparkling wine equipment
  - traditional sparkling wine resources and consumables
  - tools and equipment for adjusting and maintaining equipment
  - personal protective equipment
- specifications:
  - work procedures and operating instructions or instructions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPBPG3007 Perform packaging equipment changeover

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively prepared, set up and tested a multi-stage continuous packaging line on a minimum of one occasion, including:

- changing equipment or process components in response to product change and specification, including:
  - label size, positioning, shape and type
  - bottle size and shape
  - carton size, type and format
  - capsule size and type
  - product type and style
  - closure type or size
  - type of inert gas used to flush bags or bottles of cover product
  - bottle rinsing method (water, alcohol or gas)
  - flushing lines
  - checking pressures, flow rates or quantities used per item
  - operating control program
- testing the process and equipment operation to ensure correct:
  - label height, orientation and adhesion
  - conveyor noise and product spacing
  - carton erection, orientation and seal
  - production capacity (such as bottles per hour)
  - fill pressure
- monitoring and adjusting process equipment to achieve required quality outcomes, adjusting:
  - stars, scrolls and bows
  - mandrels

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

    - filling head heights
    - label applicators
    - sighting guides
    - operational speeds
- taking corrective action in response to typical faults and inconsistencies
- liaising with other work areas involved the packaging process
- completing workplace records as required
- applying safe work practices and identifying health and safety in the workplace hazards and controls.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- quick changeover equipment principles, purpose and operation, including an understanding of process control systems
- equipment purpose and operation, including an understanding of process control systems, where used
- process specification, procedures and operating parameters across the system
- equipment components purpose and operation
- component changes and adjustments required
- test run procedures
- control points and monitoring methods
- services required
- isolation procedures
- material specification and preparation requirements
- health and safety in the workplace hazards and controls
- environmental issues and control
- routine maintenance procedures where relevant
- operating procedures for relevant work task.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
    - a bottling context
    - products, materials and consumables
    - personal protective clothing and equipment
    - equipment and services

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- specifications:
  - instructions, information, specifications and schedules
  - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPCDS2001 Conduct a standard product tasting

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to plan, prepare and conduct standard product samples and tastings for wine and/or spirits.

The unit applies to individuals who work in cellar door operations and conduct routine, 'on request' tastings from individual customers and small groups.

When applied in the workplace, compliance with state and territory legislative requirements relating to the Responsible Service of Alcohol will be required.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

Pre-requisite Unit

Nil

Unit Sector

Cellar Door (CDS)

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Comprehend information from a variety of workplace documents
Oral Communication	• Convey technical and specialised information using language appropriate to customer • Use questioning skills to gather information about customer preferences • Use active listening skills to respond to questions or feedback from customers
Numeracy	• Calculate numerical information relating to measurements, quantities, volumes and monetary value
Navigate the world of work	• Understand and apply legislative responsibilities and workplace procedures relevant to own role
Interact with others	• Use accepted practices and protocols for communicating with people external to the organisation

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated the following for an individual customer at least once, and for a group at least once:

- accessing workplace information to identify standard product tasting and preparation requirements
- cellaring and rotating tasting stock to maintain product quality and suitability for tastings
- preparing tasting area, equipment and supplies in a manner suitable for the range of products being tasted and the number of customers in the tasting
- ensuring products are correctly opened, checked and served to customers
- communicating effectively with customers, including finding preferences, answering questions, and adjusting tasting order or range to facilitate customer enjoyment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of standard product tasting
- available information resources:
  - product and price lists
  - background documentation
  - other personnel with special expertise
- overview of product range and quality characteristics
- common product faults, features, causes and corrective action necessary
- product sensory evaluation techniques (standard)
- optimum cellaring conditions for a range of products, such as wines of varying maturity, fortified and liqueur wines, and spirits

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- preparation requirements and procedures for glasses, spittoons, chilling equipment and support materials
- operating procedures for equipment and services used in product tasting
- product handling procedures and techniques:
  - opening
  - decanting
  - pouring
  - displaying the label
- procedures to maintain product quality between tastings
- product knowledge:
  - product style and taste characteristics
  - optimum serving requirements
  - preparation requirements
  - stock availability
  - label interpretation
- workplace policies and procedures and responsibilities related to product tastings:
  - customer service
  - customer complaints
  - responsible service of alcohol
  - safe food handling
  - product storage
  - product tastings
  - personal presentation
  - stock rotation
  - reporting problems
  - housekeeping
- health and safety in the workplace hazards and controls associated with product tastings.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - range of workplace products for tasting
  - materials and equipment needed to conduct tastings
  - product information or technology for accessing information
- specifications:
  - workplace procedures relating to product tastings
- relationships (internal and/or external):

FBPCDS2002 Provide and present wine tourism information

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to provide and present relevant and accurate tourist information to winery visitors on wine products, wine growing, local history, and workplace facilities.

The unit applies to individuals who work in cellar door operations of wineries or distilleries. Individuals generally work under supervision but have some autonomy and accountability for their own work.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has provided wine tourism information for at least two separate visitor enquiries and has demonstrated the following:

- accessed information about the history and product range of the organisation, regional and Australian wines
- accessed workplace information to identify wine industry tourism promotion requirements
- provided tourism information appropriate to the needs of visitors to the cellar door
- explained phylloxera threats and prevention measures to visitors
- maintained cellar door information resources and display areas
- used digital tools to access and present wine industry information
- presented clear and accurate wine tourism information covering:
  - wine varieties and production in the local region
  - main wine grape growing regions in Australia
  - links to history, tourism information and other wineries
  - workplace wine products and exports
  - wine industry bodies and awards.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- brief history of Australian wine production:
  - first planting of vines in Australia, including where and when
  - key successes and challenges in wine industry development
  - structure of the industry
  - trends in styles produced

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- location and key distinguishing features of Australia's main wine grape growing regions:
  - climate and soil
  - grape varieties and wine styles
  - specific viticultural and vinification techniques
  - key brands
- key features of local wine grape growing region:
  - climate
  - soil
  - grape varieties
  - wine styles
  - specific viticultural and vinification techniques
  - key brands
- position of Australian wine in the world market:
  - quantity and value of Australian exports
  - major importers of Australian wine
  - key brands exported
  - label interpretation and Australian wine label integrity program
- the threat of phylloxera to the Australian wine industry:
  - quarantine areas
  - effect of phylloxera on vine and wine
  - steps winery and vineyard visitors can take to minimise risk of transferring infection
- regional and local information:
  - overview of history
  - local events
  - local attractions, facilities and essential services
- key Australian wine industry bodies and their purpose
- organisation information:
  - history
  - parent company or owners
  - size and production capacity
  - key brands
  - product and service range
- workplace policy and procedures with regard to:
  - visitor service and interaction
  - providing information and advice
  - health and safety in the workplace hazards and controls
  - procedures and responsibility for reporting problems
- effective presentation skills and techniques.

FBPCDS2003 Sell cellar door products and services

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to sell wine and other products and services. It involves developing product knowledge, engaging with customers and using sales techniques to maximise sale opportunities.

The unit applies to individuals who work under general supervision to provide specialised industry knowledge to sell products and services to cellar door visitors.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

When applied in the workplace, compliance with state and territory legislative requirements relating to the Responsible Service of Alcohol will be required.

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has sold cellar door products and services and has demonstrated the following when selling at least two separate product types:

- developed and maintained workplace product and service knowledge, including knowledge of competitor products and services for comparison
- sought information from product or service resources and assistance from colleagues and/or product specialists
- determined customer needs and buying motives using effective communication:
  - questioning techniques
  - active listening skills
  - observing customer behaviour
- matched customer requirements to appropriate product or service
- conveyed product and service knowledge to customers
- provided solutions or alternatives to customer objections about potential purchases
- applied appropriate and effective sales approaches according to workplace procedures, customer behaviour or buying signals
- closed sales and maximised sales opportunities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- features of a range of products and services available from the sales outlet or workplace
- features of workplace customer service
- information sources for product information including:
  - product lists
  - expertise of colleagues

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

    - promotional materials
- features and characteristics of customer types and motivations for purchasing cellar door products and services
- sales techniques including:
    - use of effective communication
    - methods of sales approaches
    - understanding customer needs
    - promoting features and benefits of products and services
    - how to identify and overcome objections
    - how to close sales
    - methods to maximise sales and add-on products and services
- health and safety in the workplace and consumer regulatory requirements as they apply in the workplace in relation to serving or selling.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - a workplace or an environment that accurately represents workplace condition
- resources, equipment and materials:
    - range of workplace products and relevant equipment
    - product and service information or technology for accessing information
- specifications:
    - workplace procedures relating to selling cellar door products and services
- relationships (internal and/or external):
    - external customers for sales opportunities and internal personnel for assistance.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit

There must be evidence that the individual has planned and conducted winery and site tours on at least two separate occasions with two different groups and has demonstrated the following:

- identified characteristics and requirements of tour group
- planned tour in advance, including:
  - conducting background research
  - liaising with staff in areas to be visited
  - preparing presentation materials and equipment
  - ensuring availability of required protective equipment for tour members
- conducted welcome and pre-tour briefing, including information about health and safety in the workplace and pest control requirements, and other relevant site specific information
- conducted tour according to planned route and timing
- presented information in a clear and logical format
- engaged with tour group members when presenting information by encouraging questions and discussion
- monitored tour group members during tour to ensure health and safety in the workplace and security compliance
- sought feedback from tour members about their experience at the end of the tour and evaluated own performance
- evaluated and considered feedback for future tour planning, organisation and delivery.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- purpose and objectives of conducting winery and site tours
- workplace policies and procedures and responsibilities relating to site visitors, including:
  - health and safety in the workplace requirements
  - emergency and evacuation procedures
  - first aid situations
  - pest and disease biosecurity procedures – phylloxera
  - food safety procedures
  - contact details for emergencies and first aid
  - customer service and welfare
  - public relations and information transfer
  - personal presentation
  - customer complaints and reporting procedures
- key principles and components of a site tour plan
- key principles and techniques for group facilitation
- key background information about the workplace, including:
  - brand and workplace objectives
  - site features, equipment, processes and layout
  - product range and services provided.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective equipment
  - equipment and materials needed for presentation or tour
  - documentation or technology for recording customer feedback
- specifications:
  - information about tour group and tour instructions
  - workplace procedures relating to winery and site tours
- relationships (internal and/or external):
  - customers for winery or site tour.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPCDS3002 Plan and deliver a wine tasting event

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to plan and deliver a wine tasting event. It includes researching the needs of clients, sourcing products to be tasted, preparing product and tasting equipment, event planning, conducting the tasting event and providing advice and information on the products to be tasted.

The unit applies to individuals who work in cellar door operations. Individuals have specialised knowledge and work under broad direction with responsibility for their own work.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety in the workplace, and food safety regulations, legislation and standards that apply to the workplace.

When applied in the workplace, compliance with state and territory legislative requirements relating to the Responsible Service of Alcohol will be required.

Assessment Requirements for FBPCDS3002 Plan and deliver a wine tasting event

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned and delivered at least one wine tasting event and has demonstrated the following:

- prepared a plan for a wine tasting event
- identified and followed health and safety in the workplace procedures
- organised services and facilities to support a wine tasting event including:
  - records systems
  - technology
  - wine tasting equipment and materials
  - product availability
  - location and facilities
- identified and researched specific participant requirements and details on style, vintage, region and other background information about products to be tasted
- identified and prepared tasting resources and facilities including:
  - products at correct temperatures
  - glasses and supplies
  - suitable tasting environment
- conducted a specialised product tasting according to workplace procedures and industry practices including:
  - articulating an accurate sensory evaluation of product tasted
  - serving products in appropriate condition for specific tasting
  - identifying and removing faulty products prior to tasting
  - maintaining optimum tasting environment
  - providing customer service
- provided accurate and relevant information in line with participant requirements

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- evaluated and assessed performance against participant, personal and workplace objectives.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- different types of wine tasting events within industry practice
- health and safety in the workplace procedures and regulations for conducting wine tasting events
- basic event planning and delivery methods
- common industry systems for registration, finance and technology used in wine events
- purpose and principles of specialised product tasting, including:
  - link to related work areas and activities
  - quality characteristics of products and materials
  - promotional and brand objectives of the workplace and tasting events
- overview of international, national, regional and organisation-specific information about wine products
- workplace procedures relating to:
  - responsible service of alcohol
  - specialised and standard product tastings
  - customer service
  - customer complaints
  - information provision and presentation
  - activity performance review and evaluation
- product sensory evaluation techniques and procedures
- key presentation principles and techniques for engaging and informing customers about wine tasting
- workplace procedures and responsibility for reporting problems.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - facilities and services for wine tasting event planning
  - range of workplace products for tasting
  - materials and equipment needed to conduct tastings
- specifications:
  - workplace procedures relating to specialised product tastings
  - product information or technology for accessing information

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- relationships (internal and/or external):
  - external customers/participants with specialised requirements for tasting opportunities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPCDS3003 Coordinate winery hospitality activities

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to plan, conduct and evaluate winery hospitality activities. It includes limited responsibility for the work of others.

The unit applies to individuals who work under broad direction and take responsibility for coordinating hospitality activities conducted as part of cellar door operations in the wine industry.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Cellar Door (CDS)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Identify required hospitality activities	1.1 Interpret workplace or organisation promotional schedule and apply to hospitality activities 1.2 Respond to ad-hoc customer requests and bookings according to

Elements	**Performance Criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
	workplace procedures 1.3 Confirm health and safety in the workplace, regulatory and workplace procedures relating to winery hospitality activities
2. Plan and organise hospitality activities	2.1 Identify resources required to implement hospitality activities 2.2 Negotiate prices and services with suppliers and customers 2.3 Confirm supply of necessary resources and services according to supplier agreements and workplace procedures
3. Prepare for winery hospitality activities	3.1 Prepare a schedule of events to ensure timely and effective implementation of activities 3.2 Prepare or produce support materials in line with promotional schedule and workplace requirements 3.3 Brief team and suppliers on their roles and responsibilities
4. Implement hospitality activities	4.1 Coordinate resources effectively and efficiently to meet customer and workplace objectives 4.2 Monitor and maintain hospitality facilities within limits of responsibility 4.3 Recognise, rectify and report problems and anomalies to appropriate personnel
5. Evaluate winery hospitality activities	5.1 Evaluate team performance based on workplace and customer objectives 5.2 Encourage and review customer feedback to improve performance 5.3 Assess suppliers and give feedback according to workplace procedures 5.4 Collate information to use for the financial and promotional viability assessment 5.5 Identify areas for improvement based on evidence collected and make recommendations to appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	• Interpret information from a variety of workplace documents
Writing	• Produce workplace documentation in required format
Oral Communication	• Provide information using language appropriate to audience • Use questioning skills to gather feedback • Use active listening skills to respond to questions or feedback from others
Numeracy	• Perform calculations relating to measurements, quantities, volumes and monetary value
Navigate the world of work	• Understand and comply with legislative and workplace requirements relevant to own role
Interact with others	• Use accepted practices and protocols for communicating with internal personnel and people external to the organisation
Get the work done	• Plan, sequence and implement tasks required to achieve outcomes • Use analytical skills to address problems and make decisions related to hospitability activities requirements

Assessment Requirements for FBPCDS3003 Coordinate winery hospitality activities

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned, conducted and evaluated winery hospitality activities and has demonstrated the following at least once:

- accessed workplace information and schedules to identify winery hospitality activity coordination requirements
- planned and coordinated resources and supply of services appropriate to each hospitality event
- applied a high level of personal presentation
- handled customer requests, bookings and ad-hoc requests
- prepared schedules, briefing notes and other support materials for staff, suppliers and customers
- coordinated services, products and activities for hospitality events
- monitored hospitality facilities and service provision
- briefed team members and suppliers on roles and responsibilities
- monitored and dealt with problems and special requests during hospitality activities
- gathered feedback and data to evaluate winery hospitality activities
- used results of evaluations to improve future activities
- followed health and safety in the workplace procedures when coordinating winery hospitality activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- links to related work areas and resources such as cellar door, public relations and marketing
- workplace procedures and responsibility for:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - reporting problems
  - recording requirements
  - customer service and complaints
- workplace product and service range
- workplace and brand promotional objectives
- format and interpretation of promotional schedules
- roles and responsibilities of supporting functions
- legislative and regulatory requirements as they apply in the workplace, including:
  - serving and selling liquor
  - industry codes of practice
  - consumer law
  - health and safety in the workplace procedures for employees and customers.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or a realistic environment that allows the individual to conduct the required winery hospitality activity
- resources, equipment and materials:
  - documentation or technology for coordinating events
  - documentation or technology for preparing, recording and communicating information relating to the event
- specifications:
  - workplace promotional schedule and information about hospitality event and/or customer requirements
  - workplace procedures relating to winery and hospitality events
- relationships (internal and/or external):
  - staff and suppliers to brief
  - customers.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPCEL2001 Perform oak handling activities

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to use, treat, repair, store and stack oak barrels and casks. It may involve work in confined spaces.

The unit applies to individuals who work in winemaking operations and take responsibility for their own work. Individuals generally work under supervision but have some autonomy and accountability for their own work.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication. Users are advised to check with the relevant state or territory health and safety workplace authority for advice on confined space entry.

Assessment Requirements for FBPCEL2001 Perform oak handling activities

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated the following on at least one occasion:

- accessing workplace information to identify oak handling requirements
- identifying legislative and workplace requirements related to oak handling
- selecting and fitting personal protective equipment
- selecting, setting up and operating equipment
- carrying out oak handling and treatment according to workplace procedures
- monitoring oak handling activities and equipment to identify non-conformance results
- carrying out minor repairs
- stacking and securing oak vessels according to workplace procedures
- shutting down equipment in routine and emergency situations
- conducting work safely and following health and safety procedures including identifying hazards and controlling risks associated with working in confined spaces
- following workplace procedures for:
  - maintaining records
  - reporting and recording corrective action
  - sorting, collecting, treating, recycling or disposing of waste.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of oak use in winemaking and spirit production
- links between oak handling and related processes in cellar operations

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- effect of oak storage on end product
- types of oak used for storage
- common faults in oak barrels and casks and effect on end product
- possible sources of oak contamination and effect on end product
- minor repair methods and procedures
- main methods used in oak barrel and cask stacking
- common causes of variation and corrective action required
- types of shutdown and associated requirements for routine and emergency situations
- health and safety hazards and controls in the workplace including instructions for use of chemicals in oak treatment
- hazards and controls associated with confined space entry
- workplace procedures and responsibility for:
  - recording requirements
  - reporting problems
  - waste handling.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a wine operations workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective equipment for oak handling activities
  - materials and equipment for confined space entry (if required)
  - materials handling equipment
  - oak products for activities in performance evidence
  - system for recording and reporting information
- specifications:
  - workplace procedures for oak handling activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPCEL2002 Perform fermentation operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed at least one fermentation operation including:

- accessing workplace information to identify fermentation processing requirements
- conducting work according to environmental and health and safety requirements in the workplace
- selecting and fitting appropriate personal protective equipment
- checking supply and status of materials before commencing fermentation operation
- preparing and confirming status of equipment and services before commencing fermentation process
- setting up and starting the fermentation process
- conducting work safely and following health and safety procedures including identifying hazards and controlling risks associated with working in confined spaces
- monitoring the fermentation process
- taking corrective action in response to non-conformance results
- shutting down the process after fermentation operations are completed.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of the fermentation process and the links between fermentation and other processes used in wine operations
- basic operating principles of fermentation equipment
- materials used in the fermentation process including:
  - grape varieties, whole fruit bunches and common additives

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

    - preparation requirements and effect of variation on the fermentation process
- main fermentation techniques and how these techniques can affect the characteristics of the wine
- product, materials and equipment preparation requirements and effect of variation on the fermentation process
- techniques that may be used to manipulate the fermentation process and wine characteristics, including:
    - pressure
    - temperature
    - yeast variety or strain
    - carbon dioxide
    - skin contact
    - type of fermentation vessel
    - additions
- methods used to monitor the process
- common causes of non-conformance results for product, process and equipment and corrective action required including:
    - issues that can be rectified
    - issues that must be reported
- responsibilities for health and safety in the workplace including:
    - health and safety hazards associated with the fermentation process
    - methods for controlling risks associated with health and safety hazards, including confined space entry
- responsibilities for identifying and controlling environmental issues
- workplace procedures and responsibility for:
    - reporting problems
    - shutting down the process
    - cleaning
    - handling waste
    - recording required information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
    - a wine operations workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
    - personal protective equipment for fermentation operations
    - materials and equipment for confined space entry (if required)
    - equipment and materials for fermentation process

Assessment Requirements for FBPCEL2003 Operate the ion exchange process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated at least one ion exchange process:

- accessing workplace information to identify ion exchange requirements
- selecting and fitting appropriate personal protective equipment
- conducting work according to environmental and health and safety requirements in the workplace
- checking supply and status of product and ion exchange agents before commencing ion exchange process
- preparing and confirming status of equipment and services before commencing ion exchange process
- setting up and starting up the ion exchange process
- monitoring ion exchange process to maintain quality specifications
- taking corrective action in response to non-conformance results
- shutting down the process after ion exchange operations are completed.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit.

This includes knowledge of:

- purpose and principles of ion exchange process and links between ion exchange process and related processes in cellar operations
- stages and changes which occur during ion exchange process and the effect of process stages on the end product quality characteristics and uses of ion exchange product and materials
- manual and computer-controlled ion exchange equipment

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- methods used to monitor the process common causes of non-conformance and corrective action required
- health and safety hazards in the workplace and controls
- routine shutdown preparation requirements
- workplace procedures and responsibility for:
  - reporting problems
  - environmental issues and controls
  - waste handling requirements
  - recording requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a wine operations workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective equipment for ion exchange operations
  - equipment and materials for ion exchange process
  - products for ion exchange
  - system for recording and reporting information
- specifications:

Assessment Requirements for FBPCEL2004 Perform heat exchange operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated at least one heat exchange operation:

- accessing workplace information to identify heat exchange processing requirements
- selecting and fitting appropriate personal protective equipment (PPE)
- conducting work according to environmental and health and safety requirements in the workplace
- checking supply and status of materials before commencing heat exchange operation
- preparing and confirming status of equipment and services before commencing heat exchange process
- setting up and starting up heat exchange process
- monitoring the heat exchange process
- taking corrective action in response to non-compliance results
- shutting down the process after heat exchange operations are completed.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of the heat exchange process and the links between heat exchange and other processes used in wine operations
- basic operating principles of heat exchange equipment
- materials used in the heat exchange process including:
  - grape varieties, whole fruit bunches and common additives
  - preparation requirements and effect of variation on the heat exchange process

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

- main heat exchange techniques and how these techniques can affect the characteristics of the wine
- methods used to monitor the process
- common causes of non-conformance results for product, process and equipment and corrective action required including:
  - issues that can be rectified
  - issues that must be reported
- responsibilities for health and safety in the workplace including:
  - health and safety hazards associated with the heat exchange process
  - methods for controlling risks associated with health and safety hazards
- responsibilities for identifying and controlling environmental issues
- workplace procedures and responsibility for:
  - reporting problems
  - shutting down the process
  - cleaning
  - handling waste
  - recording required information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a wine operations workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE for heat exchange operations
  - equipment and materials for heat exchange process
  - system for recording and reporting information
- specifications:
  - workplace procedures for heat exchange operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPCEL2005 Perform must draining operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to perform must draining operations in wine making. It may involve work in confined spaces.

The unit applies to individuals who work in winemaking operations and take responsibility for their own work. Individuals generally work under supervision but have some autonomy and accountability for their own work.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication. Users are advised to check with the relevant state or territory health and safety workplace authority for advice on confined space entry.

Assessment Requirements for FBPCEL2007 Prepare and make additions and finings

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has made at least four different additions or finings using at least two different techniques and methods of addition, including:

- accessing workplace information to identify requirements for adding finings and additions
- selecting and fitting appropriate personal protective equipment
- checking supply and status of materials before commencing additions and finings operation
- preparing and confirming status of equipment and services before commencing additions and finings process
- setting up and starting the additions and finings process
- monitoring the additions and finings process
- taking corrective action in response to non-conformance results
- shutting down the process after additions and finings operations are completed
- conducting work according to environmental and workplace health and safety requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of additions and fining that is used and the links between additions and finings and other processes used in wine operations
- basic operating principles of preparing and making additions and finings
- quality characteristics of product and materials used and effect on process outcome
- main additions and finings mixing techniques and how these techniques can affect the characteristics of the wine:

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

  - pumping over
  - gas mixing
  - rummaging
  - stirring
  - submersible mixers
  - in-place mixers/tank agitators
  - portable guth agitators
- methods for adding:
  - venturi
  - dosing
  - direct, tipping in or pumping in while wine mixing
- methods used to monitor the process
- common causes of non-conformance results for product, process and equipment and corrective action required including:
  - issues that can be rectified
  - issues that must be reported
- responsibilities for health and safety in the workplace including:
  - health and safety hazards associated with the additions and finings process
  - methods for controlling risks associated with health and safety hazards, including confined space entry
- responsibilities for identifying and controlling environmental issues
- workplace procedures and responsibility for:
  - reporting problems
  - shutting down the process
  - cleaning
  - handling waste
  - recording required information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a wine operations workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective equipment for additions and finings operations
  - equipment and materials for additions and finings activities
  - system for recording and reporting information
- specifications:
  - workplace procedures for preparing and making additions and finings.

FBPCEL2008 Carry out inert gas handling operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to use and handle inert gases in solid or gaseous state including the manufacture of carbon dioxide bricks or snow.

The unit applies to individuals who work in cellar operations and take responsibility for their own work. Individuals generally work under supervision but have some autonomy and accountability for their own work.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FBPCEL2008 Carry out inert gas handling operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has carried out inert gas handling operations and demonstrated the following on at least two separate occasions:

- accessing workplace information to identify inert gas handling requirements
- selecting, fitting and using personal protective equipment (PPE)
- selecting appropriate gases to meet requirements:
  - single or blend of gases
  - gaseous or solid form
  - dosage
  - interpreting cylinder or service line information
- confirming supply of services and gases for requirements
- selecting equipment appropriate to the task and gas to be handled
- setting up, preparing and operating equipment according to workplace procedures
- manufacturing carbon dioxide bricks or snow
- delivering gas according to specifications
- monitoring gas handling process:
  - gas pressure
  - gas flow
  - integrity of seals
- taking corrective action in response to non-conformance results
- shutting down equipment in routine situations
- conducting work according to environmental and health and safety requirements in the workplace.

© Commonwealth of Australia, 2025 Manufacturing Industry Skills Alliance

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of using inert gases in cellar operations
- properties and functions of gases
- hazards and risks associated with different forms or types of gas
- gas handling policy and procedures
- factors affecting choice of gas or gas blends:
  - wine type and style
  - winemaker preference
- equipment set up, preparation and operation procedures and requirements including settings and key variables
- purpose of PPE
- legislative requirements as they affect immediate gas handling responsibilities
- steps in manufacturing process for dry ice bricks or snow
- requirements to liaise or advise related work areas
- routine shutdown and cleaning preparation requirements
- workplace health and safety requirements
- workplace procedures and responsibility for:
  - reporting problems
  - waste handling requirements
  - environmental issues and controls
  - recording requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a wine operations workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE for inert gas handling operations
  - equipment, cylinders and materials for inert gas handling operations
  - gas or gases to meet work instruction
  - system for recording and reporting information
- specifications:
  - workplace procedures for inert gas handling operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated at least one transfer process, including:

- accessing workplace information to identify transfer requirements
- selecting, fitting and using personal protective equipment
- checking supply and status of materials before commencing transfer operation
- preparing and confirming status of equipment and services before commencing transfer process
- setting up and starting the transfer process
- monitoring the transfer process
- taking corrective action in response to non-conformance results
- shutting down the process after transfer operations are completed
