FDF10 Food Processing

Release: 4.0

CONTENTS

Imprint	21
Preliminary Information	22
Full List of AQF Qualifications in FDF10v4 Training Package	22
Full List of Units of Competency including Imported Units	24
Qualification Mapping of FDF10 - all Versions	62
Unit Mapping FDF10v3 to FDF10v4.....	66
Unit Mapping FDF10v2 to FDF10v3.....	67
Unit Mapping SUG02 to FDF10v2	73
Unit Mapping FDF03 to FDF10v2.....	75
Overview	88
Qualifications Framework.....	97
Qualification Pathways.....	103
Assessment Guidelines	116
Assessment Guidelines - Industry Contextualisation.....	128
Competency Standards.....	138
Competency Standards - Industry Contextualisation.....	144
FDF10111 Certificate I in Food Processing	146
FDF10210 Certificate I in Pharmaceutical Manufacturing	153
FDF11012 Certificate I in Sugar Milling Industry Operations	159
FDF20111 Certificate II in Food Processing.....	165
FDF20211 Certificate II in Pharmaceutical Manufacturing.....	178
FDF20411 Certificate II in Wine Industry Operations	187
FDF20510 Certificate II in Retail Baking Assistance	203
FDF20911 Certificate II in Food Processing (Sales)	209
FDF21012 Certificate II in Sugar Milling Industry Operations.....	221
FDF30111 Certificate III in Food Processing	230
FDF30210 Certificate III in Pharmaceutical Manufacturing	241
FDF30310 Certificate III in Plant Baking.....	249
FDF30411 Certificate III in Wine Industry Operations.....	258
FDF30510 Certificate III in Retail Baking (Cake and Pastry)	278
FDF30610 Certificate III in Retail Baking (Bread)	285
FDF30710 Certificate III in Retail Baking (Combined)	291
FDF30910 Certificate III in Food Processing (Sales).....	298
FDF31012 Certificate III in Sugar Milling Industry Operations	307
FDF40110 Certificate IV in Food Processing	316
FDF40210 Certificate IV in Pharmaceutical Manufacturing	326
FDF40311 Certificate IV in Food Science and Technology.....	336
FDF40811 Certificate IV in Advanced Baking.....	348
FDF41012 Certificate IV in Flour Milling	358
FDF50110 Diploma of Food Processing	369
FDF50210 Diploma of Pharmaceutical Manufacturing	377
FDF50311 Diploma of Food Science and Technology.....	386
FDFSS00001 Cellar Door Sales Induction.....	398
FDFSS00002 Cellar Hand Induction.....	400
FDFSS00003 Chemical Handling Certification.....	402
FDFSS00004 Confined Space.....	404
FDFSS00005 Distillation Operations.....	406
FDFSS00006 Evaporator Station Operator.....	408
FDFSS00007 Food Safety	410

FDFSS00008 Forklift Operations	412
FDFSS00009 Fugal Operator	414
FDFSS00010 Hand Pruning Induction	416
FDFSS00011 Irrigation.....	418
FDFSS00012 Loco Driver.....	420
FDFSS00013 Manual Handling	421
FDFSS00014 Mechanical Harvesting for Seasonal Workers	423
FDFSS00015 Platform Operator	425
FDFSS00016 Responsible Service of Alcohol	427
FDFSS00017 Risk Management	429
FDFSS00018 Seasonal Nursery Induction	431
FDFSS00019 Sugar Boiler.....	433
FDFSS00020 Trellis Management.....	435
FDFSS00021 Vintage Laboratory Operations	437
FDFSS00022 Warehouse Induction.....	439
FDFSS00023 Water Tender	441
FDFSS00024 Wine Evaluation.....	443
FDFAU4001A Assess compliance with food safety programs.....	445
FDFAU4002A Communicate and negotiate to conduct food safety audits.....	458
FDFAU4003A Conduct food safety audits.....	467
FDFAU4004A Identify, evaluate and control food safety hazards.....	484
FDFAU4005A Audit bivalve mollusc growing and harvesting processes	497
FDFAU4006A Audit a cook chill process.....	507
FDFAU4007B Audit a heat treatment process	520
FDFAU4008A Audit manufacturing of ready-to-eat meat products	533
FDFBK2001A Operate a cooling and slicing process	547
FDFBK2002A Operate a pastry forming and filling process.....	557
FDFBK2003A Manufacture rye crisp breads	568
FDFBK2004A Manufacture wafer products	578
FDFBK2005A Operate a doughnut making process	588
FDFBK2006A Operate a griddle production process.....	599
FDFBK2007A Operate a pastry production process	610
FDFBP2001A Operate the bottle supply process.....	621
FDFBP2002A Operate the carton erection process	630
FDFBP2003A Operate the carton packing process	639
FDFBP2004A Operate the bottle sealing process.....	648
FDFBP2005A Operate the electronic coding process	657
FDFBP2006A Operate traditional sparkling wine processes.....	667
FDFBP2007A Operate the tirage and transfer process	677
FDFBP2008A Perform packaging equipment changeover	686
FDFBP2009A Operate the bottle capsuling process	695
FDFBP2010A Operate manual bottling and packaging processes	704
FDFBP2011A Operate the palletising process.....	714
FDFBP3001A Operate the bottle filling process	723
FDFBP3002A Operate the labelling process	732
FDFBP3003A Operate the softpack filling process.....	741
FDFBV2001A Operate a deaeration, mixing and carbonation process	750
FDFBV2002A Manufacture coffee (roast and ground)	760
FDFBV2003A Operate an ice manufacturing process.....	770
FDFCD2001A Conduct winery and or site tours	779
FDFCD2002A Promote wine tourism information	791
FDFCD2003A Evaluate wines (standard).....	803
FDFCD2004A Perform cellar door stock control procedure.....	815

FDFCD2005A Sell cellar door products and services.....	826
FDFCD2006A Conduct a standard product tasting	839
FDFCD3001A Evaluate wines (advanced).....	852
FDFCD3002A Conduct a specialised product tasting	861
FDFCD3003A Coordinate winery hospitality activities	872
FDFCEL2001A Perform oak handling activities	883
FDFCEL2002A Perform fermentation operations	892
FDFCEL2003A Operate the ion exchange process.....	901
FDFCEL2004A Perform single column lees stripping (continuous still brandy) operations.....	910
FDFCEL2005A Operate the pressing process.....	920
FDFCEL2006A Operate clarification by separation (centrifugation) process.....	930
FDFCEL2007A Prepare and monitor wine cultures	939
FDFCEL2008A Perform dual column distillation (continuous still brandy) operations ..	949
FDFCEL2009A Perform first distillation (pot still brandy) operations	959
FDFCEL2010A Operate the fine filtration process	968
FDFCEL2011A Perform heat exchange operations	977
FDFCEL2012A Handle spirits.....	985
FDFCEL2013A Operate the pressure leaf filtration process.....	992
FDFCEL2014A Operate the rotary vacuum filtration process	1000
FDFCEL2015A Perform must draining operations	1008
FDFCEL2016A Operate the crushing process	1018
FDFCEL2017A Prepare and make additions and finings.....	1027
FDFCEL2018A Carry out inert gas handling operations	1036
FDFCEL2019A Carry out transfer operations	1044
FDFCEL2020A Prepare and wax tanks	1054
FDFCEL3001A Perform second distillation (pot still brandy) operations	1062
FDFCEL3002A Operate the continuous clarification by separation (flotation) process.....	1072
FDFCEL3003A Operate the concentration process	1081
FDFCEL3004A Perform de-aromatising, de-alcoholising or de-sulphuring operations.....	1089
FDFCEL3005A Perform rectification (continuous still) operations	1098
FDFCH3001A Coordinate cheese making operations	1108
FDFCH3002A Carry out processes for a range of artisan cheeses.....	1118
FDFCH4001A Carry out sampling and interpret tests for cheese production.....	1129
FDFCH4002A Produce acid-coagulated soft cheese	1140
FDFCH4003A Produce a range of rennet-coagulated cheeses.....	1150
FDFCH4004A Produce acid - heat coagulated cheese	1163
FDFCON2001A Examine raw ingredients used in confectionery	1172
FDFCON2002A Operate a boiled confectionery process	1182
FDFCON2003A Operate a chocolate conching process	1193
FDFCON2004A Operate a chocolate depositing or moulding process	1203
FDFCON2005A Operate a confectionery depositing process	1213
FDFCON2006A Operate a granulation and compression process.....	1223
FDFCON2007A Operate a panning process.....	1235
FDFCON2008A Operate a chocolate refining process	1245
FDFCON2009A Operate a starch moulding process.....	1256
FDFDP2001A Operate a butter churning process.....	1268
FDFDP2002A Operate a butter oil process	1278
FDFDP2003A Operate a curd production and cutting process	1289
FDFDP2004A Operate a cooling and hardening process	1299
FDFDP2005A Operate a cheese pressing and moulding process.....	1309
FDFDP2006A Operate a fermentation process	1318
FDFFS1001A Follow work procedures to maintain food safety	1328
FDFFS2001A Implement the food safety program and procedures	1338

FDFFS3001A Monitor the implementation of quality and food safety programs	1349
FDFFS4001A Supervise and maintain a food safety plan	1361
FDFFS4002A Supervise and verify supporting programs for food safety.....	1370
FDFFS5001A Develop a HACCP-based food safety plan	1381
FDFFFST4001A Apply food processing technologies	1391
FDFFFST4002A Monitor the development and implementation of a food QA system	1399
FDFFFST4003A Apply digital technology in food processing	1407
FDFFFST4004A Perform microbiological procedures in the food industry	1415
FDFFFST4005A Document processes and procedures for a food product.....	1423
FDFFFST4006A Apply food preservation technologies	1429
FDFFFST4007A Establish operational requirements for a food processing enterprise	1438
FDFFFST4008A Preserve food in cans or sealed containers.....	1447
FDFFFST4009A Label foods according to legislative requirements	1455
FDFFFST4010A Apply sensory analysis in food processing	1460
FDFFFST4011A Apply the principles of nutrition to food processing.....	1465
FDFFFST4012A Apply water management principles to the food industry	1473
FDFFFST4020A Implement and review the processing of market milk and related products.....	1480
FDFFFST4021A Carry out sampling and testing of milk at receipt.....	1488
FDFFFST4022A Implement and review the preparation of milk for processing.....	1495
FDFFFST4030A Implement and review the processing of chocolate and sugar-panned products	1503
FDFFFST4031A Implement and review the processing of aerated confectioneries.....	1512
FDFFFST4032A Implement and review the production of gums and jellies.....	1520
FDFFFST4033A Implement and review the production of chocolate products	1528
FDFFFST4034A Implement and review the processing of chocolate.....	1535
FDFFFST4035A Implement and review the processing of high and low boil confectionery.....	1542
FDFFFST4036A Implement and review the processing of confectionery products.....	1550
FDFFFST4040A Identify & implement product safety and quality for chilled or frozen poultry product manufacturing.....	1558
FDFFFST4041A Identify and implement product safety and quality for cooked poultry product manufacturing	1568
FDFFFST4042A Identify and implement product safety and quality for egg based product manufacturing.....	1578
FDFFFST4050A Identify & implement product safety and quality for processing of fruit, vegetables & other produce	1586
FDFFFST4051A Identify and implement product safety and quality processes for fish and seafood products	1593
FDFFFST4052A Implement and review the manufacturing and processing of edible fats and oils	1600
FDFFFST4053A Implement and review manufacturing, packaging and testing of beverage products	1607
FDFFFST4054A Identify and implement product safety for manufacturing of cereal products	1614
FDFFFST5001A Monitor refrigeration and air conditioning systems in food processing	1621
FDFFFST5002A Identify and implement required process control for a food processing operation.....	1628
FDFFFST5003A Construct a process control chart for a food processing operation.....	1634
FDFFFST5004A Specify and monitor the nutritional value of processed food	1641
FDFFFST5005A Identify the biochemical properties of food	1648
FDFFFST5006A Apply food microbiological techniques and analysis	1655
FDFFFST5007A Evaluate sampling plans in relation to food industry standards	1664
FDFFFST5008A Develop a new food product	1669
FDFFFST5023A Implement and review the production of milk fat products	1675

FDFST5024A Implement and review the production of fermented dairy products and dairy desserts.....	1682
FDFST5025A Implement and review the production of concentrated and dried dairy products	1690
FDFST5026A Implement and review the production of ice creams and frozen dairy products	1699
FDFST5027A Implement and review the production of milk and related products by the membrane system	1707
FDFST5030A Develop, manage and maintain quality systems for food processing	1716
FDFV2001A Apply hydro-cooling processes to fresh produce.....	1728
FDFV3001A Conduct chemical wash for fresh produce.....	1737
FDFV3002A Program fresh produce grading equipment	1746
FDFGPS2001A Operate a bleaching process	1752
FDFGPS2002A Operate a comploting process	1762
FDFGPS2003A Operate a deodorising process.....	1772
FDFGPS2004A Operate a flake preparation process.....	1781
FDFGPS2005A Operate a fractionation process.....	1793
FDFGPS2006A Operate a hydrogenation process.....	1803
FDFGPS2007A Operate an interesterification process	1814
FDFGPS2008A Operate a neutralisation process	1823
FDFGPS2009A Operate a soap splitting process	1833
FDFGPS2010A Operate a winterisation process	1842
FDFGPS2011A Operate a creamed honey manufacture process	1853
FDFGR2001A Operate a liquid, mash or block stockfeed process	1863
FDFGR2002A Understand mill operations and technologies	1874
FDFGR2003A Operate a grain conditioning process	1882
FDFGR2004A Operate a grain cleaning process	1891
FDFGR2005A Operate a purification process	1903
FDFGR2006A Operate a scalping and grading process.....	1913
FDFGR2007A Operate a scratch and sizing process.....	1922
FDFGR2008A Operate a break roll process	1932
FDFGR2009A Operate a pelleting process.....	1942
FDFGR2010A Handle grain in a storage area	1953
FDFGR2011A Receive grain for malting.....	1963
FDFGR2012A Prepare malted grain	1971
FDFGR2013A Blend and dispatch malt	1979
FDFGR3001A Work with micronutrients or additions in stockfeed manufacturing processes	1987
FDFGR3002A Demonstrate knowledge of animal nutrition principles.....	1994
FDFGR3003A Lead flour milling shift operations.....	2000
FDFGR3004A Control mill processes and performance.....	2010
FDFGR4001A Control power and automation for milling processes	2020
FDFGR4002A Supervise testing processes for wheat and flour	2027
FDFGR4003A Manage mill logistics and support services	2036
FDFGR4004A Establish and supervise dust control procedures in a grain processing enterprise	2045
FDFLAB2001A Perform basic analytical tests.....	2053
FDFLAB2002A Perform basic microbiological tests.....	2061
FDFLAB2003A Perform basic packaging tests and inspections	2069
FDFLAB2004A Prepare laboratory solutions and stains.....	2078
FDFLAB2005A Prepare and pour culture media.....	2085
FDFLAB2006A Record laboratory data.....	2093
FDFLAB2007A Standardise laboratory solutions	2101

FDFLAB2008A Analyse laboratory data.....	2109
FDFLAB2009A Perform packaging quality control procedures	2116
FDFLAB2010A Prepare product or show samples.....	2126
FDFLAB2011A Use basic laboratory equipment.....	2136
FDFLAB2012A Maintain aseptic environment.....	2143
FDFLAB3001A Use computer technology for laboratory applications	2151
FDFLAB3002A Perform non-routine or specialised tests.....	2160
FDFLAB3003A Perform routine troubleshooting procedures	2169
FDFLAB3004A Check and maintain readiness of wine testing equipment.....	2177
FDFLAB3005A Perform instrumental tests or procedures on wine samples.....	2185
FDFOHS1001A Work safely	2195
FDFOHS2001A Participate in OHS processes	2208
FDFOHS3001A Contribute to OHS processes	2218
FDFOHS4001A Identify, assess and control OHS risk in own work	2231
FDFOHS4002A Maintain OHS processes	2246
FDFOHS5001A Manage OHS processes	2261
FDFOP1001A Pack or unpack product manually	2277
FDFOP1002A Operate automated washing equipment	2285
FDFOP1003A Carry out manual handling tasks	2293
FDFOP1004A Prepare basic mixes	2300
FDFOP1005A Operate basic equipment.....	2309
FDFOP1006A Monitor process operation	2317
FDFOP1007A Participate effectively in a workplace environment.....	2323
FDFOP1008A Take and record basic measurements.....	2329
FDFOP1009A Follow work procedures to maintain quality.....	2335
FDFOP1010A Communicate workplace information	2341
FDFOP2001A Work effectively in the food processing industry.....	2347
FDFOP2002A Inspect and sort materials and product	2356
FDFOP2003A Clean equipment in place	2364
FDFOP2004A Clean and sanitise equipment	2373
FDFOP2005A Work in a socially diverse environment.....	2381
FDFOP2006A Operate a bulk dry goods transfer process.....	2387
FDFOP2007A Work in a freezer storage area	2396
FDFOP2008A Operate a bulk liquid transfer process	2402
FDFOP2009A Load and unload tankers.....	2411
FDFOP2010A Work with temperature controlled stock.....	2422
FDFOP2011A Conduct routine maintenance.....	2430
FDFOP2012A Maintain food safety when loading, unloading and transporting food	2439
FDFOP2013A Apply sampling procedures	2447
FDFOP2014A Participate in sensory analyses	2455
FDFOP2015A Apply principles of statistical process control.....	2461
FDFOP2016A Work in a food handling area for non-food handlers.....	2466
FDFOP2017A Operate a blending, sieving and bagging process	2474
FDFOP2018A Operate a case packing process	2486
FDFOP2019A Fill and close product in cans.....	2496
FDFOP2020A Operate a form, fill and seal process	2507
FDFOP2021A Operate a fill and seal process	2518
FDFOP2022A Operate a high speed wrapping process	2529
FDFOP2023A Operate a packaging process	2539
FDFOP2024A Operate a cooling, slicing and wrapping process	2551
FDFOP2025A Manufacture extruded and toasted products	2561
FDFOP2026A Operate a forming or shaping process	2571
FDFOP2027A Dispense non-bulk ingredients.....	2581

FDFOP2028A Operate a mixing or blending process.....	2590
FDFOP2029A Operate a baking process	2602
FDFOP2030A Operate a process control interface.....	2612
FDFOP2031A Operate a coating application process	2620
FDFOP2032A Work in a clean room environment.....	2631
FDFOP2033A Operate a depositing process	2638
FDFOP2034A Operate an evaporation process	2648
FDFOP2035A Operate an enrobing process	2658
FDFOP2036A Operate an extrusion process.....	2669
FDFOP2037A Operate a filtration process.....	2681
FDFOP2038A Operate a grinding process	2690
FDFOP2039A Operate a frying process	2700
FDFOP2040A Operate a heat treatment process.....	2709
FDFOP2041A Operate a mixing or blending and cooking process.....	2719
FDFOP2042A Operate a drying process.....	2731
FDFOP2043A Operate an homogenising process	2741
FDFOP2044A Operate a retort process.....	2751
FDFOP2045A Operate pumping equipment	2762
FDFOP2046A Operate a production process	2771
FDFOP2047A Operate a portion saw	2780
FDFOP2048A Pre-process raw materials	2788
FDFOP2049A Operate a reduction process.....	2797
FDFOP2050A Operate a separation process	2807
FDFOP2051A Operate a spreads production process	2818
FDFOP2052A Operate a chocolate tempering process	2828
FDFOP2053A Operate a washing and drying process	2837
FDFOP2054A Operate a water purification process	2847
FDFOP2055A Freeze dough.....	2856
FDFOP2056A Operate a freezing process	2864
FDFOP2057A Operate a membrane process.....	2874
FDFOP2058A Operate a holding and storage process	2884
FDFOP2059A Operate a continuous freezing process.....	2893
FDFOP2060A Operate an automated cutting process.....	2904
FDFOP2061A Use numerical applications in the workplace	2913
FDFOP2062A Apply work procedures to maintain integrity of product	2919
FDFOP2063A Apply quality systems and procedures.....	2927
FDFOP2064A Provide and apply workplace information	2935
FDFOP2065A Work in confined spaces in the food and beverage industries	2944
FDFOP2066A Operate a wort production process	2956
FDFOP2067A Operate a brewery fermentation process.....	2965
FDFOP2068A Operate a beer maturation process	2973
FDFOP2069A Operate a beer filtration process	2982
FDFOP2070A Operate a bright beer tank process	2990
FDFOP2071A Identify key stages and beer production equipment in a brewery	2998
FDFOP2072A Operate a beer filling process	3006
FDFOP2073A Operate a beer packaging process.....	3014
FDFOP2074A Prepare and monitor beer yeast propagation processes.....	3021
FDFOP3001A Control contaminants and allergens in the workplace	3030
FDFOP3002A Set up a production or packaging line for operation	3040
FDFOP3003A Operate interrelated processes in a production system.....	3049
FDFOP3004A Operate interrelated processes in a packaging system	3060
FDFOP3005A Prepare food products using basic cooking methods.....	3071
FDFOP3006A Identify cultural, religious and dietary considerations for food production.....	3078

FDFPB3001A Operate a dough mixing process	3086
FDFPB3002A Operate a final prove and baking process.....	3097
FDFPB3003A Operate a dough make up process	3107
FDFPH1001A Follow work procedures to maintain Good Manufacturing Practice	3117
FDFPH2001A Apply Good Manufacturing Practice procedures.....	3125
FDFPH2002A Operate a concentration process	3134
FDFPH2003A Operate an extraction process	3142
FDFPH2004A Operate a separation process using chromatography	3150
FDFPH2005A Operate an aseptic fill and seal process	3159
FDFPH2006A Operate an aseptic form, fill and seal process	3170
FDFPH2007A Coordinate a label store.....	3182
FDFPH2008A Operate a compressing process.....	3188
FDFPH2009A Dispense pharmaceutical raw materials	3199
FDFPH2010A Operate an encapsulation process	3208
FDFPH2011A Operate a granulation process	3220
FDFPH2012A Operate a liquid manufacturing process	3231
FDFPH2013A Operate a tablet coating process.....	3243
FDFPH2014A Operate a terminal sterilisation process	3254
FDFPH3001A Monitor and maintain Good Manufacturing Practice procedures	3264
FDFPH4001A Prepare and review workplace documentation to support Good Manufacturing Practice	3274
FDFPH4002A Facilitate and monitor Good Manufacturing Practice	3282
FDFPH4003A Facilitate contamination control.....	3293
FDFPH4004A Participate in change control procedures	3302
FDFPH4005A Participate in validation processes	3311
FDFPH4006A Respond to non-conformance	3321
FDFPO2001A Operate a dicing, stripping or mincing process.....	3328
FDFPO2002A Operate an evisceration process	3338
FDFPO2003A Grade carcass	3348
FDFPO2004A Harvest edible offal	3356
FDFPO2005A Operate a marinade injecting process.....	3364
FDFPO2006A Operate a washing and chilling process	3374
FDFPO2007A Operate the bird receival and hanging process.....	3384
FDFPO2008A Operate a stunning, killing and defeathering process	3393
FDFPO2009A Work in an egg grading floor.....	3403
FDFPO2010A Operate egg grading and packing floor equipment	3412
FDFPO3001A Operate a chickway system	3423
FDFPO3002A Debone and fillet product (manually)	3433
FDFPPL2001A Participate in work teams and groups	3442
FDFPPL3001A Participate in improvement processes.....	3448
FDFPPL3002A Report on workplace performance.....	3456
FDFPPL3003A Support and mentor individuals and groups.....	3462
FDFPPL3004A Lead work teams and groups.....	3470
FDFPPL3005A Participate in an audit process.....	3478
FDFPPL3006A Establish compliance requirements for work area	3486
FDFPPL4001A Manage people in the work area.....	3492
FDFPPL4002A Plan and coordinate maintenance	3499
FDFPPL4003A Schedule and manage production.....	3509
FDFPPL4004A Optimise a work process	3518
FDFPPL4005A Establish process capability	3527
FDFPPL4006A Manage a work area within budget.....	3533
FDFPPL4007A Manage supplier agreements and contracts	3540
FDFPPL4008A Manage internal audits.....	3546

FDFPPL5001A Design and maintain programs to support legal compliance.....	3557
FDFRB1001A Finish products.....	3567
FDFRB2001A Form and fill pastry products.....	3575
FDFRB2002A Prepare fillings.....	3583
FDFRB2003A Produce meringue-based products.....	3591
FDFRB2004A Provide production assistance for bread products.....	3599
FDFRB2005A Provide assistance in cake, pastry and biscuit production.....	3606
FDFRB3001A Produce pastry.....	3615
FDFRB3002A Produce bread dough.....	3623
FDFRB3003A Produce sponge, cake and cookie batter.....	3631
FDFRB3004A Decorate cakes and cookies.....	3639
FDFRB3005A Bake bread.....	3648
FDFRB3006A Bake sponges, cakes and cookies.....	3656
FDFRB3007A Bake pastry products.....	3664
FDFRB3008A Store, handle and use frozen dough.....	3672
FDFRB3009A Retard dough.....	3681
FDFRB3010A Process dough.....	3689
FDFRB3011A Diagnose and respond to product and process faults (bread).....	3698
FDFRB3012A Diagnose and respond to product and process faults (pastry, cake and cookies).....	3706
FDFRB3013A Produce artisan breads.....	3714
FDFRB3014A Produce sweet yeast products.....	3722
FDFRB3015A Produce and decorate gateaux and tortes.....	3733
FDFRB3016A Plan and schedule production for retail bakery.....	3742
FDFRB3017A Participate in product development.....	3748
FDFRB4001A Apply marketing principles to retail bakery.....	3754
FDFRB4002A Control bakery operations to meet quality and production requirements.....	3762
FDFRB4003A Apply baking science to work practices.....	3770
FDFRB4004A Produce sourdough products.....	3779
FDFRB4005A Apply advanced finishing techniques for specialty cakes and desserts.....	3788
FDFRB4006A Explore and apply baking techniques to develop new products.....	3799
FDFRB4007A Evaluate and assess bakery product.....	3806
FDFRB4008A Set up sustainable baking operations.....	3814
FDFRB4009A Coordinate material supply for baking processes.....	3822
FDFRB4010A Prepare plated sweets and desserts.....	3829
FDFSUG101A Install pre-ballast.....	3837
FDFSUG102A Undertake shunting operations.....	3843
FDFSUG103A Move cane bins in a marshalling yard.....	3849
FDFSUG104A Check a cane sample for extraneous matter.....	3856
FDFSUG105A Manually clean and maintain housekeeping standards.....	3861
FDFSUG201A Lay sleepers for cane rail systems.....	3866
FDFSUG202A Lay rails for cane rail systems.....	3873
FDFSUG203A Lay skeleton track for cane rail system.....	3881
FDFSUG204A Operate tamping equipment.....	3888
FDFSUG205A Construct turnouts.....	3896
FDFSUG206A Drive a cane locomotive.....	3903
FDFSUG207A Conduct cane weighbridge operations.....	3912
FDFSUG208A Operate a tipping station.....	3918
FDFSUG209A Operate an extraction station.....	3925
FDFSUG210A Operate a juice clarification process.....	3933
FDFSUG211A Operate a mud filtration process.....	3941
FDFSUG212A Chemically clean equipment.....	3949
FDFSUG213A Operate a pans station.....	3957

FDFSUG214A Operate a low grade fugal station	3965
FDFSUG215A Operate a high grade fugal station	3973
FDFSUG216A Operate a crystalliser station process	3981
FDFSUG217A Operate a turbine	3989
FDFSUG218A Operate a boiler - basic	3997
FDFSUG219A Operate a bagasse fuel supply system.....	4007
FDFSUG220A Operate a coal fuel supply system.....	4015
FDFSUG221A Operate an ash separation system	4023
FDFSUG222A Operate a waste water treatment system	4031
FDFSUG223A Operate a cooling water system	4038
FDFSUG224A Perform standard tests on cane samples	4045
FDFSUG225A Collect and prepare samples	4051
FDFSUG226A Perform general drilling operations	4056
FDFSUG227A Perform general lathe operations	4062
FDFSUG228A Perform general milling operations.....	4068
FDFSUG229A Perform general planing and shaping operations	4074
FDFSUG230A Undertake forming, bending and shaping	4080
FDFSUG231A Undertake simple fabrication.....	4086
FDFSUG301A Drive a master-slave locomotive	4091
FDFSUG302A Control cane traffic movements.....	4100
FDFSUG303A Adjust cane delivery schedules to meet daily milling requirements	4108
FDFSUG304A Operate a boiler intermediate	4114
FDFSUG305A Operate a boiler advanced.....	4124
FDFSUG306A Monitor a sugar mill powerhouse	4134
FDFSUG307A Perform factory control tests.....	4141
FDFSUG308A Analyse and convey workplace information	4147
FDFSUG309A Operate a sugar system.....	4153
FDFTEC3001A Participate in a HACCP team	4161
FDFTEC3002A Implement the pest prevention program.....	4170
FDFTEC3003A Apply raw materials, ingredient and process knowledge to production problems	4179
FDFTEC4001A Determine handling processes for perishable food items	4188
FDFTEC4002A Manage controlled atmosphere storage.....	4196
FDFTEC4003A Control food contamination and spoilage	4206
FDFTEC4004A Apply basic process engineering principles to food processing.....	4215
FDFTEC4005A Apply an understanding of food additives	4226
FDFTEC4006A Apply an understanding of legal requirements of food production.....	4233
FDFTEC4007A Describe and analyse data using mathematical principles	4241
FDFTEC4008A Apply principles of food packaging	4248
FDFTEC4009A Identify the physical and chemical properties of materials, food and related products	4257
FDFTEC4010A Manage water treatment processes.....	4266
FDFTEC4011A Participate in product recalls	4276
FDFTEC5001A Manage and evaluate new product trials	4284
FDFTEC5002A Manage utilities and energy for a production process	4294
FDFWGG2001A Bench graft vines	4302
FDFWGG2002A Carry out potting operations.....	4309
FDFWGG2003A Hand prune vines	4318
FDFWGG2004A Undertake irrigation systems maintenance activities	4325
FDFWGG2005A Maintain callusing environment	4333
FDFWGG2006A Obtain and process rootlings.....	4343
FDFWGG2007A Tend containerised nursery plants	4353
FDFWGG2008A Train vines	4362

FDFWGG2009A Operate specialised canopy management equipment	4369
FDFWGG2010A Field graft vines	4379
FDFWGG2011A Install irrigation components	4386
FDFWGG2012A Identify and treat nursery plant disorders.....	4393
FDFWGG2013A Deliver injection requirements.....	4402
FDFWGG2014A Operate the irrigation system.....	4411
FDFWGG2015A Support mechanical harvesting operations.....	4421
FDFWGG2016A Install and maintain vine trellis	4430
FDFWGG2017A Recognise disorders and identify pests and diseases	4438
FDFWGG2018A Operate vineyard equipment.....	4447
FDFWGG2019A Perform vertebrate pest control activities.....	4455
FDFWGG2020A Carry out hot water treatment.....	4464
FDFWGG2021A Operate nursery cold storage facilities	4473
FDFWGG2022A Take and process vine cuttings.....	4481
FDFWGG2023A Carry out basic canopy maintenance	4491
FDFWGG2024A Pick grapes by hand	4499
FDFWGG2025A Plant vines by hand	4506
FDFWGG3001A Apply chemicals and biological agents	4513
FDFWGG3002A Coordinate canopy management activities	4523
FDFWGG3003A Coordinate crop harvesting activities.....	4533
FDFWGG3004A Coordinate nursery activities	4543
FDFWGG3005A Perform field nursery activities.....	4551
FDFWGG3006A Coordinate hand pruning activities	4558
FDFWGG3007A Implement an irrigation schedule	4566
FDFWGG3008A Operate a mechanical harvester	4575
FDFWGG3009A Monitor and maintain nursery plants	4585
FDFWGG3010A Implement a soil management program	4594
FDFWGG3011A Perform shed nursery activities	4603
FDFWGG3012A Monitor and control vine disorders and damage	4611
FDFWGG3013A Operate spreading and seeding equipment.....	4619
FDFWIN1001A Identify key operations in wine production	4629
FDFWIN1002A Identify viticulture processes	4636
FDFWIN2001A Perform effectively in a wine industry workplace.....	4642
FDFWIN2002A Identify and control risks in own work	4651
AHCARB205A Operate and maintain chainsaws.....	4658
AHCBAC101A Support agricultural crop work.....	4665
AHCBAC204A Prepare grain storages.....	4672
AHCBUS405A Participate in an e-business supply chain.....	4679
AHCCHM101A Follow basic chemical safety rules.....	4685
AHCCHM201A Apply chemicals under supervision	4691
AHCCHM303A Prepare and apply chemicals.....	4698
AHCCHM304A Transport, handle and store chemicals.....	4705
AHCINF204A Fabricate and repair metal or plastic structures	4711
AHCMOM101A Assist with routine maintenance of machinery and equipment.....	4718
AHCMOM202A Operate tractors.....	4724
AHCMOM203A Operate basic machinery and equipment	4730
AHCMOM204A Undertake operational maintenance of machinery	4736
AHCMOM207A Conduct front-end loader operations.....	4742
AHCMOM301A Coordinate machinery and equipment maintenance and repair	4748
AHCMOM302A Perform machinery maintenance	4754
AHCMOM304A Operate machinery and equipment.....	4760
AHCMOM305A Operate specialised machinery and equipment	4766
AHCPCM301A Implement a plant nutrition program	4772

AHCPGD301A Implement a plant establishment program	4779
AHCPTH401A Assess olive oil for style and quality	4786
AHCSOL201A Determine basic properties of soil and/or growing media	4792
AHCSOL401A Sample soils and interpret results	4798
AHCWRK305A Coordinate work site activities	4804
AHCWRK308A Handle bulk materials in storage area.....	4810
BSBCOM502B Evaluate and review compliance.....	4818
BSBCOM503B Develop processes for the management of breaches in compliance requirements	4831
BSBCUS201B Deliver a service to customers.....	4842
BSBCUS301B Deliver and monitor a service to customers.....	4849
BSBCUS401B Coordinate implementation of customer service strategies	4857
BSBCUS501C Manage quality customer service	4865
BSBFIM501A Manage budgets and financial plans	4872
BSBHRM402A Recruit, select and induct staff.....	4881
BSBINN301A Promote innovation in a team environment.....	4888
BSBINT303B Organise the importing and exporting of goods.....	4897
BSBITU201A Produce simple word processed documents	4907
BSBITU202A Create and use spreadsheets	4916
BSBLED401A Develop teams and individuals	4925
BSBMGT401A Show leadership in the workplace	4933
BSBMGT402A Implement operational plan	4939
BSBMGT403A Implement continuous improvement.....	4947
BSBMGT502B Manage people performance	4954
BSBMGT515A Manage operational plan.....	4961
BSBMGT516C Facilitate continuous improvement	4969
BSBMKG501B Identify and evaluate marketing opportunities	4977
BSBMKG507A Interpret Market Trends And Developments	4986
BSBMKG514A Implement and monitor marketing activities.....	4996
BSBOHS503B Assist in the design and development of OHS participative arrangements.....	5004
BSBPMG510A Manage projects	5015
BSBRES401A Analyse and present research information	5024
BSBSMB301A Investigate micro business opportunities	5033
BSBSMB401A Establish legal and risk management requirements of small business ...	5041
BSBSMB402A Plan small business finances.....	5050
BSBSMB403A Market the small business	5058
BSBSMB404A Undertake small business planning	5066
BSBSMB405B Monitor and manage small business operations.....	5077
BSBSMB406A Manage small business finances.....	5084
BSBSMB407A Manage a small team	5092
BSBWOR204A Use business technology	5101
BSBWOR401A Establish effective workplace relationships.....	5109
BSBWOR402A Promote team effectiveness	5118
BSBWOR403A Manage stress in the workplace.....	5126
BSBWOR404B Develop work priorities	5136
BSBWOR502B Ensure team effectiveness.....	5144
BSBWRT301A Write simple documents	5152
BSBWRT401A Write complex documents	5159
CPCCDO3011A Perform dogging.....	5167
CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry	5178
CPCCRI3012A Perform basic rigging	5193
CPCCSC2002A Erect and dismantle basic scaffolding	5204

HLTFA201B Provide basic emergency life support	5216
HLTFA301C Apply first aid	5224
LMTGN3007B Monitor and operate trade waste.....	5237
MEM09002B Interpret technical drawing.....	5244
MEM13003B Work safely with industrial chemicals and materials	5251
MEM15001B Perform basic statistical quality control	5259
MEM18001C Use hand tools.....	5266
MEM18002B Use power tools/hand held operations	5273
MEM30011A Set up basic pneumatic circuits.....	5280
MSACMT270A Use sustainable energy practices.....	5286
MSACMT671A Develop and manage sustainable environmental practices	5293
MSAENV272B Participate in environmentally sustainable work practices	5302
MSAENV472B Implement and monitor environmentally sustainable work practices... 	5311
MSAPMOHS216A Operate breathing apparatus	5321
MSAPMOHS217A Gas test atmospheres	5327
MSAPMOPS400A Optimise process/plant area	5333
MSAPMOPS401A Trial new process or product.....	5342
MSAPMOPS404A Co-ordinate maintenance.....	5350
MSAPMOPS405A Identify problems in fluid power system	5358
MSAPMOPS406A Identify problems in electronic control systems	5366
MSAPMPER200C Work in accordance with an issued permit.....	5374
MSAPMPER201A Monitor and control work permits	5387
MSAPMPER205C Enter confined space	5396
MSAPMPER300C Issue work permits	5409
MSAPMPER400A Coordinate permit process	5422
MSAPMSUP303A Identify equipment faults	5430
MSAPMSUP310A Contribute to the development of plant documentation	5438
MSAPMSUP330A Develop and adjust a production schedule	5444
MSAPMSUP390A Use structured problem solving tools.....	5450
MSL912001A Work within a laboratory/field workplace (induction)	5456
MSL922001A Record and present data	5467
MSL933001A Maintain the laboratory/field workplace fit for purpose	5478
MSL943002A Participate in laboratory/field workplace safety.....	5493
MSL952001A Collect routine site samples	5507
MSL952002A Handle and transport samples or equipment.....	5520
MSL972001A Conduct routine site measurements.....	5533
MSL973001A Perform basic tests.....	5545
MSL973004A Perform aseptic techniques.....	5557
MSL973007A Perform microscopic examination	5570
MSL974003A Perform chemical tests and procedures.....	5584
MSL974004A Perform food tests.....	5599
MSL974006A Perform biological procedures	5614
MSL975005A Conduct sensory analysis	5629
MSL975020A Apply routine spectrometric techniques.....	5639
MSL975021A Apply routine electrometric techniques.....	5654
MSL975022A Perform food analyses	5669
MSS014003A Optimise sustainability of a process or plant area	5685
MSS014004A Develop team strategies for more sustainable use of resources	5695
MSS015005A Develop required sustainability reports.....	5703
MSS024003A Apply an understanding of environmental principles to a site	5709
MSS402001A Apply competitive systems and practices.....	5721
MSS402002A Sustain process improvements.....	5728
MSS402010A Manage the impact of change on own work	5736

MSS402021A Apply Just in Time procedures.....	5744
MSS402030A Apply cost factors to work practices	5751
MSS402031A Interpret product costs in terms of customer requirements	5757
MSS402040A Apply 5S procedures.....	5764
MSS402050A Monitor process capability	5772
MSS402051A Apply quality standards	5779
MSS402060A Use planning software systems in operations	5788
MSS402061A Use SCADA systems in operations	5796
MSS402080A Undertake root cause analysis.....	5803
MSS402081A Contribute to the application of a proactive maintenance strategy	5811
MSS403001A Implement competitive systems and practices.....	5818
MSS403002A Ensure process improvements are sustained.....	5827
MSS403005A Facilitate use of a Balanced Scorecard for performance improvement	5836
MSS403010A Facilitate change in an organisation implementing competitive systems and practices	5844
MSS403011A Facilitate implementation of competitive systems and practices	5853
MSS403013A Lead team culture improvement.....	5861
MSS403021A Facilitate a Just in Time system.....	5869
MSS403023A Monitor a levelled pull system of operations	5878
MSS403030A Improve cost factors in work practices	5887
MSS403032A Analyse manual handling processes	5894
MSS403040A Facilitate and improve implementation of 5S.....	5902
MSS403041A Facilitate breakthrough improvements.....	5912
MSS403051A Mistake proof an operational process	5921
MSS404050A Undertake process capability improvements.....	5929
MSS404052A Apply statistics to operational processes.....	5937
MSS404053A Use six sigma techniques.....	5946
MSS404060A Facilitate the use of planning software systems in a work area or team ...	5954
MSS404061A Facilitate the use of SCADA systems in a team or work area.....	5962
MSS404081A Undertake proactive maintenance analyses.....	5969
MSS404082A Assist in implementing a proactive maintenance strategy	5977
MSS404083A Support proactive maintenance	5986
MSS405001A Develop competitive systems and practices for an organisation.....	5995
MSS405002A Analyse and map a value stream	6003
MSS405005A Manage competitive systems and practices responding to individual and unique customer orders.....	6011
MSS405006A Develop a Balanced Scorecard.....	6020
MSS405007A Introduce competitive systems and practices to a small or medium enterprise	6028
MSS405010A Manage relationships with non-customer external organisations	6036
MSS405011A Manage people relationships.....	6044
MSS405012A Manage workplace learning	6052
MSS405013A Facilitate holistic culture improvement in an organisation.....	6060
MSS405014A Develop a communications strategy to support operations.....	6068
MSS405020A Develop quick changeover procedures.....	6076
MSS405022A Design a process layout.....	6085
MSS405023A Develop a levelled pull system for operations and processes	6093
MSS405030A Optimise cost of a product or service	6101
MSS405031A Undertake value analysis of product or process costs in terms of customer requirements	6109
MSS405032A Analyse cost implications of maintenance strategy	6117
MSS405040A Manage 5S system in an organisation	6126
MSS405050A Determine and improve process capability.....	6135

MSS405060A	Develop the application of enterprise control systems in an organisation	6143
MSS405061A	Determine and establish information collection requirements and processes	6151
MSS405062A	Develop a documentation control strategy for an organisation	6158
MSS405070A	Develop and manage sustainable energy practices	6166
MSS405075A	Facilitate the development of a new product	6174
MSS405081A	Develop a proactive maintenance strategy	6183
MSS405082A	Adapt a proactive maintenance strategy to the process operations sector	6191
MSS405083A	Adapt a proactive maintenance strategy for a seasonal or cyclical business	6200
MTMCOR202A	Apply hygiene and sanitation practices	6209
MTMCOR404A	Facilitate hygiene and sanitation performance	6217
MTMP402B	Implement a Meat Hygiene Assessment program	6225
MTMP404B	Apply meat science	6234
MTMP2006B	Apply animal welfare and handling requirements	6244
MTMP2197C	Clean after operations - boning room	6252
MTMP2006A	Apply animal welfare and handling requirements	6260
MTMP2197B	Clean after operations - boning room	6268
MTMPS411C	Monitor meat preservation process	6276
MTMPS412C	Monitor and overview the production of processed meats and smallgoods	6284
MTMPS414B	Monitor and overview the production of Uncooked Comminuted Fermented Meat (UCFM)	6293
MTMPS5603C	Develop, manage and maintain quality systems	6305
MTMPSR201C	Vacuum pack product	6320
MTMPSR203A	Sharpen knives	6328
MTMPSR407A	Assess and evaluate meat industry requirements and processes	6336
MTMPSR408A	Specify beef product using AUS-MEAT language	6348
MTMPSR409A	Specify sheep product using AUS-MEAT language	6356
MTMPSR410A	Specify pork product using AUS-MEAT language	6364
MTMPSR5601C	Design and manage the food safety system	6372
MTMR308C	Prepare and produce value-added products	6385
PMASUP420B	Minimise environmental impact of process	6395
PMBPROD211B	Operate blow moulding equipment	6403
PMBPROD270B	Operate injection blow moulding equipment	6411
PMBTECH406A	Diagnose production equipment problems	6418
RIICBM305A	Install pre-cast concrete bridge decks	6426
RIIHAN305A	Operate a gantry or overhead crane	6435
RIIMPO319A	Conduct backhoe/loader operations	6443
RIIRIS201B	Conduct local risk control	6455
SFIPROC504C	Design and manage a product recall	6463
SIRRFSA001A	Apply retail food safety practices	6474
SIRRMER004A	Prepare and display bakery products	6485
SIRXCCS201	Apply point-of-sale handling procedures	6498
SIRXCCS202	Interact with customers	6506
SIRXCCS304	Coordinate interaction with customers	6515
SIRXFIN002A	Perform retail finance duties	6522
SIRXFIN201	Balance and secure point-of-sale terminal	6530
SIRXICT001A	Operate retail technology	6535
SIRXICT303	Operate retail information technology systems	6541
SIRXINV001A	Perform stock control procedures	6548
SIRXINV002A	Maintain and order stock	6554
SIRXMER201	Merchandise products	6563
SIRXMPR006A	Manage promotional activities	6571
SIRXRSK001A	Minimise theft	6578
SIRXRSK002A	Maintain store security	6586

SIRXSLS002A Advise on products and services.....	6593
SIRXSLS201 Sell products and services	6599
SITHCCC001B Organise and prepare food.....	6608
SITHCCC002A Present food	6619
SITHCCC005A Use basic methods of cookery	6625
SITHCCC014A Prepare pastries, cakes and yeast goods	6633
SITHCCC022A Prepare chocolate and chocolate confectionery.....	6641
SITHFAB003A Serve food and beverage to customers	6649
SITHFAB004A Provide food and beverage service	6658
SITHFAB005A Provide table service of alcoholic beverages.....	6669
SITHFAB009A Provide responsible service of alcohol	6677
SITHFAB011A Develop and update food and beverage knowledge.....	6689
SITHFAB012B Prepare and serve espresso coffee	6696
SITHFAB016A Plan and monitor espresso coffee service	6708
SITHFAB222A Conduct a product tasting for alcoholic beverages.....	6717
SITHFAB325A Provide specialised advice on Australian wines	6726
SITHFAB326A Provide specialised advice on imported wines	6737
SITHPAT001A Prepare and produce pastries.....	6746
SITHPAT002A Prepare and produce cakes.....	6755
SITHPAT003A Prepare and produce yeast goods.....	6763
SITHPAT004A Prepare bakery products for patisseries.....	6771
SITHPAT007A Prepare and display petits fours.....	6780
SITHPAT008A Prepare and model marzipan	6788
SITHPAT010A Prepare and display sugar work.....	6795
SITTIND001B Develop and update tourism industry knowledge.....	6804
SITXCCS001B Provide visitor information	6816
SITXCOM001A Work with colleagues and customers	6823
SITXFIN001A Process financial transactions	6833
SITXOHS002A Follow workplace hygiene procedures.....	6840
TAEASS401B Plan assessment activities and processes.....	6850
TAEASS402B Assess competence.....	6859
TAEASS403B Participate in assessment validation.....	6868
TAEASS502B Design and develop assessment tools.....	6874
TAEDEL301A Provide work skill instruction.....	6883
TAEDEL404A Mentor in the workplace	6893
TAEDES401A Design and develop learning programs	6900
TLIA2009A Complete and check import/export documentation	6907
TLIA2011A Package goods	6916
TLIA2012A Pick and process orders	6924
TLIA2014A Use product knowledge to complete work operations.....	6932
TLIA2021A Despatch stock	6940
TLIA2022A Participate in stocktakes	6948
TLIA3010A Coordinate goods to bond premises	6956
TLIA3015A Complete receival/despatch documentation.....	6963
TLIA3016A Use inventory systems to organise stock control.....	6971
TLIA3017A Identify products and store to specifications	6979
TLIA3018A Organise despatch operations.....	6988
TLIA3019A Organise receival operations	6996
TLIA3024A Organise warehouse records operations.....	7004
TLIA3026A Monitor storage facilities	7012
TLIA3038A Control and order stock.....	7021
TLIA3039A Receive and store stock	7029
TLIA4025A Regulate temperature controlled stock.....	7037

TLIB2009A Check conveyor operational status	7045
TLIC2041A Operate self-propelled equipment on track	7054
TLID1001A Shift materials safely using manual handling methods.....	7062
TLID1002A Shift a load using manually-operated equipment.....	7070
TLID2003A Handle dangerous goods/hazardous substances	7079
TLID2004A Load and unload goods/cargo.....	7088
TLID2010A Operate a forklift.....	7096
TLID2022A Conduct weighbridge operations	7104
TLID3011A Conduct specialised forklift operations	7113
TLID3035A Operate a boom type elevating work platform	7122
TLID3036A Lift and move load using a mobile crane.....	7132
TLIJ2003A Apply grain protection measures	7141
TLIJ2004A Implement grain monitoring measures	7149
TLIK2010A Use infotechnology devices in the workplace	7157
TLILIC2001A Licence to operate a forklift truck	7165
TLILIC2014A Licence to drive light rigid vehicle.....	7174
TLILIC2015A Licence to drive medium rigid vehicle.....	7183
TLILIC2016A Licence to drive heavy rigid vehicle.....	7192
TLILIC3006A Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity).....	7201
TLILIC3017A Licence to drive heavy combination vehicle.....	7213
TLIP2029A Prepare and process financial documents	7222

4		<p>Addition of new Qualification:</p> <ul style="list-style-type: none"> • FDF41012 Certificate IV in Flour Milling <p>Addition of six new Units of Competency:</p> <ul style="list-style-type: none"> • FDFGR3003A Lead flour milling shift operations • FDFGR3004A Control mill processes and performance • FDFGR4001A Control power and automation for milling processes • FDFGR4002A Supervise testing processes for wheat and flour • FDFGR4003A Manage mill logistics and support services • FDFGR4004A Supervise dust control procedures in a grain processing enterprise • Replacement of 17 superseded imported Units from MSA07 to MSS11 deemed 'not equivalent' by host ISC • <u>ISC Upgrade</u> • Addition of new Units to FDF30111 Certificate III in Food Processing to support flour milling outcomes: <ul style="list-style-type: none"> • FDFGR3003A Lead flour milling shift operations • FDFGR3004A Control mill processes and performance <p>Replacement of superseded imported Units from MSA07 to MSS11 deemed 'equivalent' by host ISC</p>

Version	Release Date	Comments
3	1 May 2012	Addition of a new Sugar Milling sector. Inclusion of new Qualifications and Units of Competency in sugar milling, and new Units of Competency in grains and operations. Updates to existing Qualifications to include new grains and operations units. Inclusion of new Skill Sets. Typographical corrections and edits for clarity in existing Qualifications and Skill Sets. Update of previously imported SUG02 Units of Competency to new native sugar milling Units.
2	4 November 2011	Inclusion of new qualifications and units of competency in wine, baking and food science and technology, and updates to existing qualifications and units of competency. Inclusion of new Skill Sets.
1	31 January 2011	Primary release of FDF10.

Preliminary Information

Important Note to Users

Training Packages are not static documents; they are amended periodically to reflect the latest industry practices and are version controlled. It is essential that the latest version is always used.

Check the version number before commencing training or assessment

This Training Package is Version 4 - check whether this is the latest version by going to the National Training Information Service (www.ntis.gov.au) and locating information about the Training Package. Alternatively, contact AgriFood Skills Australia at <http://www.agrifoodskills.net.au> to confirm the latest version number.

Explanation of version number conventions

The primary release Training Package is Version 1. When changes are made to a Training Package, sometimes the version number is changed and sometimes it is not, depending on the extent of the change. When a Training Package is reviewed it is considered to be a new Training Package for the purposes of version control, and is Version 1. Do not confuse the version number with the Training Packages national code (which remains the same during its period of endorsement).

Full List of AQF Qualifications in FDF10v4 Training Package

Code	Title
FDF10111	Certificate I in Food Processing
FDF10210	Certificate I in Pharmaceutical Manufacturing
FDF11012	Certificate I in Sugar Milling Industry Operations
FDF20111	Certificate II in Food Processing
FDF20211	Certificate II in Pharmaceutical Manufacturing
FDF20411	Certificate II in Wine Industry Operations
FDF20510	Certificate II in Retail Baking Assistance
FDF20911	Certificate II in Food Processing (Sales)
FDF21012	Certificate II in Sugar Milling Industry Operations
FDF30111	Certificate III in Food Processing
FDF30210	Certificate III in Pharmaceutical Manufacturing
FDF30310	Certificate III in Plant Baking

Code	Title
FDF30411	Certificate III in Wine Industry Operations
FDF30510	Certificate III in Retail Baking (Cake and Pastry)
FDF30610	Certificate III in Retail Baking (Bread)
FDF30710	Certificate III in Retail Baking (Combined)
FDF30910	Certificate III in Food Processing (Sales)
FDF31012	Certificate III in Sugar Milling Industry Operations
FDF40110	Certificate IV in Food Processing
FDF40210	Certificate IV in Pharmaceutical Manufacturing
FDF40311	Certificate IV in Food Science and Technology
FDF40811	Certificate IV in Advanced Baking
FDF41012	Certificate IV in Flour Milling
FDF50110	Diploma of Food Processing
FDF50210	Diploma of Pharmaceutical Manufacturing
FDF50311	Diploma of Food Science and Technology

Full List of Units of Competency including Imported Units

FDF10v4 Units of Competency and their Pre-Requisite Requirements

Code	Title	Pre-Requisite (Code/s)
FDFAU4001A	Assess compliance with food safety programs	
FDFAU4002A	Communicate and negotiate to conduct food safety audits	
FDFAU4003A	Conduct food safety audits	
FDFAU4004A	Identify, evaluate and control food safety hazards	
FDFAU4005A	Audit bivalve mollusc growing and harvesting processes	FDFAU4002A FDFAU4003A FDFAU4004A
FDFAU4006A	Audit a cook chill process	FDFAU4002A FDFAU4003A FDFAU4004A
FDFAU4007B	Audit a heat treatment process	FDFAU4002A FDFAU4003A FDFAU4004A
FDFAU4008A	Audit manufacturing of ready-to-eat meat products	FDFAU4002A FDFAU4003A FDFAU4004A
FDFBK2001A	Operate a cooling and slicing process	
FDFBK2002A	Operate a pastry forming and filling process	
FDFBK2003A	Manufacture rye crisp breads	
FDFBK2004A	Manufacture wafer products	
FDFBK2005A	Operate a doughnut making process	
FDFBK2006A	Operate a griddle production process	
FDFBK2007A	Operate a pastry production process	

Code	Title	Pre-Requisite (Code/s)
FDFBP2001A	Operate the bottle supply process	
FDFBP2002A	Operate the carton erection process	
FDFBP2003A	Operate the carton packing process	
FDFBP2004A	Operate the bottle sealing process	
FDFBP2005A	Operate the electronic coding process	
FDFBP2006A	Operate traditional sparkling wine processes	
FDFBP2007A	Operate the tirage and transfer process	
FDFBP2008A	Perform packaging equipment changeover	
FDFBP2009A	Operate the bottle capsuling process	
FDFBP2010A	Operate manual bottling and packaging processes	
FDFBP2011A	Operate the palletising process	
FDFBP3001A	Operate the bottle filling process	
FDFBP3002A	Operate the labelling process	
FDFBP3003A	Operate the softpack filling process	
FDFBV2001A	Operate a deaeration, mixing and carbonation process	
FDFBV2002A	Manufacture coffee (roast and ground)	
FDFBV2003A	Operate an ice manufacturing process	
FDFCD2001A	Conduct winery and/or site tours	FDFCD2002A SIRXCCS202
FDFCD2002A	Promote wine tourism information	SIRXCCS202
FDFCD2003A	Evaluate wines (standard)	
FDFCD2004A	Perform cellar door stock control procedure	FDFCD2003A
FDFCD2005A	Sell cellar door products and services	SIRXCCS202 FDFCD2003A

Code	Title	Pre-Requisite (Code/s)
		SITHFAB009A
FDFCD2006A	Conduct a standard product tasting	SIRXCCS202 FDFCD2003A SITHFAB009A
FDFCD3001A	Evaluate wines (advanced)	FDFCD2003A
FDFCD3002A	Conduct a specialised product tasting	FDFCD2002A SIRXCCS202 FDFCD2006A FDFCD2003A SITHFAB009A
FDFCD3003A	Coordinate winery hospitality activities	SIRXCCS202
FDFCEL2001A	Perform oak handling activities	FDFCEL2018A FDFCEL2019A
FDFCEL2002A	Perform fermentation operations	FDFCEL2017A
FDFCEL2003A	Operate the ion exchange process	FDFCEL2019A
FDFCEL2004A	Perform single column lees stripping (continuous still brandy) operations	FDFOP2004A FDFOP2013A MSL973001A
FDFCEL2005A	Operate the pressing process	FDFCEL2019A
FDFCEL2006A	Operate clarification by separation (centrifugation) process	FDFCEL2018A FDFCEL2019A
FDFCEL2007A	Prepare and monitor wine cultures	FDFCEL2019A
FDFCEL2008A	Perform dual column distillation (continuous still brandy) operations	FDFCEL2004A FDFCEL2012A FDFCEL2019A
FDFCEL2009A	Perform first distillation (pot still brandy) operations	FDFOP2013A MSL973001A

Code	Title	Pre-Requisite (Code/s)
FDFCEL2010A	Operate the fine filtration process	
FDFCEL2011A	Perform heat exchange operations	
FDFCEL2012A	Handle spirits	FDFCEL2019A
FDFCEL2013A	Operate the pressure leaf filtration process	FDFCEL2018A FDFCEL2019A
FDFCEL2014A	Operate the rotary vacuum filtration process	FDFCEL2018A FDFCEL2019A
FDFCEL2015A	Perform must draining operations	FDFCEL2019A
FDFCEL2016A	Operate the crushing process	FDFCEL2019A
FDFCEL2017A	Prepare and make additions and finings	
FDFCEL2018A	Carry out inert gas handling operations	
FDFCEL2019A	Carry out transfer operations	
FDFCEL2020A	Prepare and wax tanks	
FDFCEL3001A	Perform second distillation (pot still brandy) operations	FDFOP2013A MSL973001A
FDFCEL3002A	Operate the continuous clarification by separation (flotation) process	FDFCEL2018A FDFCEL2019A
FDFCEL3003A	Operate the concentration process	FDFCEL2019A
FDFCEL3004A	Perform de-aromatising, de-alcoholising or de-sulphuring operations	FDFCEL2018A FDFCEL2019A
FDFCEL3005A	Perform rectification (continuous still) operations	FDFCEL2004A FDFOP2004A FDFOP2013A MSL973001A FDFCEL2012A FDFCEL2019A

Code	Title	Pre-Requisite (Code/s)
FDFCH3001A	Coordinate cheese making operations	
FDFCH3002A	Carry out processes for a range of artisan cheeses	
FDFCH4001A	Carry out sampling and interpret tests for cheese production	MSL973001A
FDFCH4002A	Produce acid-coagulated soft cheeses	
FDFCH4003A	Produce a range of rennet-coagulated cheeses	
FDFCH4004A	Produce acid/heat-coagulated cheeses	
FDFCON2001A	Examine raw ingredients used in confectionery	
FDFCON2002A	Operate a boiled confectionery process	
FDFCON2003A	Operate a chocolate conching process	
FDFCON2004A	Operate a chocolate depositing or moulding process	
FDFCON2005A	Operate a confectionery depositing process	
FDFCON2006A	Operate a granulation and compression process	
FDFCON2007A	Operate a panning process	
FDFCON2008A	Operate a chocolate refining process	
FDFCON2009A	Operate a starch moulding process	
FDFDP2001A	Operate a butter churning process	
FDFDP2002A	Operate a butter oil process	FDFDP2001A OR FDFOP2043A
FDFDP2003A	Operate a curd production and cutting process	
FDFDP2004A	Operate a cooling and hardening process	
FDFDP2005A	Operate a cheese pressing and moulding process	
FDFDP2006A	Operate a fermentation process	
FDFFS1001A	Follow work procedures to maintain food safety	

Code	Title	Pre-Requisite (Code/s)
FDFFS2001A	Implement the food safety program and procedures	
FDFFS3001A	Monitor the implementation of quality and food safety programs	FDFFS2001A
FDFFS4001A	Supervise and maintain a food safety plan	
FDFFS4002A	Supervise and verify supporting programs for food safety	
FDFFS5001A	Develop a HACCP-based food safety plan	FDFFS4001A
FDFFST4001A	Apply food processing technologies	
FDFFST4002A	Monitor the development and implementation of a food QA system	
FDFFST4003A	Apply digital technology in food processing	
FDFFST4004A	Perform microbiological procedures in the food industry	
FDFFST4005A	Document processes and procedures for a food product	
FDFFST4006A	Apply food preservation technologies	
FDFFST4007A	Establish operational requirements for a food processing enterprise	
FDFFST4008A	Preserve food in cans or sealed containers	
FDFFST4009A	Label foods according to legislative requirements	
FDFFST4010A	Apply sensory analysis in food processing	
FDFFST4011A	Apply the principles of nutrition to food processing	
FDFFST4012A	Apply water management principles to the food industry	
FDFFST4020A	Implement and review the processing of market milk and related products	
FDFFST4021A	Carry out sampling and testing of milk at receipt	
FDFFST4022A	Implement and review the preparation of milk for	

Code	Title	Pre-Requisite (Code/s)
	processing	
FDFST4030A	Implement and review the processing of chocolate and sugar-panned products	
FDFST4031A	Implement and review the processing of aerated confectioneries	
FDFST4032A	Implement and review the production of gums and jellies	
FDFST4033A	Implement and review the production of chocolate products	
FDFST4034A	Implement and review the processing of chocolate	
FDFST4035A	Implement and review the processing of high and low boil confectionery	
FDFST4036A	Implement and review the processing of confectionery products	
FDFST4040A	Identify and implement product safety and quality for chilled or frozen poultry product manufacturing	
FDFST4041A	Identify and implement product safety and quality for cooked poultry product manufacturing	
FDFST4042A	Identify and implement product safety and quality for egg based product manufacturing	
FDFST4050A	Identify and implement product safety and quality for processing of fruit, vegetables and other produce	
FDFST4051A	Identify and implement product safety and quality processes for fish and seafood products	
FDFST4052A	Implement and review the manufacturing and processing of edible fats and oils	
FDFST4053A	Implement and review manufacturing, packaging and testing of beverage products	
FDFST4054A	Identify and implement product safety and quality for manufacturing of cereal products	

Code	Title	Pre-Requisite (Code/s)
FDFST5001A	Monitor refrigeration and air conditioning systems in food processing	
FDFST5002A	Identify and implement required process control for a food processing operation	
FDFST5003A	Construct a process control chart for a food processing operation	
FDFST5004A	Specify and monitor the nutritional value of processed foods	
FDFST5005A	Identify the biochemical properties of food	
FDFST5006A	Apply food microbiological techniques and analysis	FDFST4004A
FDFST5007A	Evaluate sampling plans in relation to food industry standards	
FDFST5008A	Develop a new food product	
FDFST5023A	Implement and review the production of milk fat products	
FDFST5024A	Implement and review the production of fermented dairy products and dairy desserts	
FDFST5025A	Implement and review the production of concentrated and dried dairy products	
FDFST5026A	Implement and review the production of ice creams and frozen dairy products	
FDFST5027A	Implement and review the production of milk and related products by the membrane system	
FDFST5030A	Develop, manage and maintain quality systems for food processing	
FDFV2001A	Apply hydro-cooling process to fresh produce	
FDFV3001A	Conduct chemical wash for fresh produce	
FDFV3002A	Program fresh produce grading equipment	
FDFGPS2001A	Operate a bleaching process	

Code	Title	Pre-Requisite (Code/s)
FDFGPS2002A	Operate a complecting process	
FDFGPS2003A	Operate a deodorising process	
FDFGPS2004A	Operate a flake preparation process	
FDFGPS2005A	Operate a fractionation process	
FDFGPS2006A	Operate a hydrogenation process	
FDFGPS2007A	Operate an interesterification process	
FDFGPS2008A	Operate a neutralisation process	
FDFGPS2009A	Operate a soap splitting process	
FDFGPS2010A	Operate a winterisation process	
FDFGPS2011A	Operate a creamed honey manufacture process	
FDFGR2001A	Operate a liquid, mash or block stockfeed process	
FDFGR2002A	Understand mill operations and technologies	
FDFGR2003A	Operate a grain conditioning process	
FDFGR2004A	Operate a grain cleaning process	
FDFGR2005A	Operate a purification process	
FDFGR2006A	Operate a scalping and grading process	
FDFGR2007A	Operate a scratch and sizing process	
FDFGR2008A	Operate a break roll process	
FDFGR2009A	Operate a pelleting process	
FDFGR2010A	Handle grain in a storage area	
FDFGR2011A	Receive grain for malting	FDFGR2010A
FDFGR2012A	Prepare malted grain	FDFGR2010A
FDFGR2013A	Blend and dispatch malt	

Code	Title	Pre-Requisite (Code/s)
FDFGR3001A	Work with micronutrients or additions in stockfeed manufacturing processes	
FDFGR3002A	Demonstrate knowledge of animal nutrition principles	
FDFGR3003A	Lead flour milling shift operations	
FDFGR3004A	Control mill processes and performance	
FDFGR4001A	Control power and automation for milling processes	
FDFGR4002A	Supervise testing processes for wheat and flour	
FDFGR4003A	Manage mill logistics and support services	
FDFGR4004A	Supervise dust control procedures in a grain processing enterprise	
FDFLAB2001A	Perform basic analytical tests	FDFLAB2011A
FDFLAB2002A	Perform basic microbiological tests	FDFLAB2012A FDFLAB2011A
FDFLAB2003A	Perform basic packaging tests and inspections	FDFLAB2011A
FDFLAB2004A	Prepare laboratory solutions and stains	FDFLAB2011A
FDFLAB2005A	Prepare and pour culture media	FDFLAB2012A FDFLAB2011A
FDFLAB2006A	Record laboratory data	
FDFLAB2007A	Standardise laboratory solutions	FDFLAB2011A
FDFLAB2008A	Analyse laboratory data	FDFLAB2006A
FDFLAB2009A	Perform packaging quality control procedures	FDFLAB2011A
FDFLAB2010A	Prepare product or show samples	FDFLAB2011A
FDFLAB2011A	Use basic laboratory equipment	
FDFLAB2012A	Maintain aseptic environment	FDFLAB2011A
FDFLAB3001A	Use computer technology for laboratory applications	FDFLAB2008A

Code	Title	Pre-Requisite (Code/s)
		FDFLAB2006A
FDFLAB3002A	Perform non-routine or specialised tests	FDFLAB2006A FDFLAB2001A FDFLAB2002A FDFLAB2009A FDFLAB2011A FDFLAB2012A
FDFLAB3003A	Perform routine troubleshooting procedures	FDFLAB2006A FDFLAB2001A FDFLAB2002A FDFLAB2009A FDFLAB2011A FDFLAB2012A
FDFLAB3004A	Check and maintain readiness of wine testing equipment	FDFLAB2006A FDFLAB2001A FDFLAB2002A FDFLAB2009A FDFLAB2011A FDFLAB2012A
FDFLAB3005A	Perform instrumental tests or procedures on wine samples	FDFLAB2006A FDFLAB2001A FDFLAB2002A FDFLAB2009A FDFLAB2011A FDFLAB2012A
FDFOHS1001A	Work safely	
FDFOHS2001A	Participate in OHS processes	
FDFOHS3001A	Contribute to OHS processes	
FDFOHS4001A	Identify, assess and control OHS risk in own work	

Code	Title	Pre-Requisite (Code/s)
FDFOHS4002A	Maintain OHS processes	
FDFOHS5001A	Manage OHS processes	
FDFOP1001A	Pack or unpack product manually	
FDFOP1002A	Operate automated washing equipment	
FDFOP1003A	Carry out manual handling tasks	
FDFOP1004A	Prepare basic mixes	
FDFOP1005A	Operate basic equipment	
FDFOP1006A	Monitor process operation	
FDFOP1007A	Participate effectively in a workplace environment	
FDFOP1008A	Take and record basic measurements	
FDFOP1009A	Follow work procedures to maintain quality	
FDFOP1010A	Communicate workplace information	
FDFOP2001A	Work effectively in the food processing industry	
FDFOP2002A	Inspect and sort materials and product	
FDFOP2003A	Clean equipment in place	
FDFOP2004A	Clean and sanitise equipment	
FDFOP2005A	Work in a socially diverse environment	
FDFOP2006A	Operate a bulk dry goods transfer process	
FDFOP2007A	Work in a freezer storage area	
FDFOP2008A	Operate a bulk liquid transfer process	
FDFOP2009A	Load and unload tankers	
FDFOP2010A	Work with temperature controlled stock	
FDFOP2011A	Conduct routine maintenance	

Code	Title	Pre-Requisite (Code/s)
FDFOP2012A	Maintain food safety when loading, unloading and transporting food	
FDFOP2013A	Apply sampling procedures	
FDFOP2014A	Participate in sensory analyses	
FDFOP2015A	Apply principles of statistical process control	FDFOP2061A
FDFOP2016A	Work in a food handling area for non-food handlers	
FDFOP2017A	Operate a blending, sieving and bagging process	
FDFOP2018A	Operate a case packing process	
FDFOP2019A	Fill and close product in cans	
FDFOP2020A	Operate a form, fill and seal process	
FDFOP2021A	Operate a fill and seal process	
FDFOP2022A	Operate a high speed wrapping process	
FDFOP2023A	Operate a packaging process	
FDFOP2024A	Operate a cooling, slicing and wrapping process	
FDFOP2025A	Manufacture extruded and toasted products	
FDFOP2026A	Operate a forming or shaping process	
FDFOP2027A	Dispense non-bulk ingredients	
FDFOP2028A	Operate a mixing or blending process	
FDFOP2029A	Operate a baking process	
FDFOP2030A	Operate a process control interface	
FDFOP2031A	Operate a coating application process	
FDFOP2032A	Work in a clean room environment	FDFFS2001A FDFPH2001A
FDFOP2033A	Operate a depositing process	

Code	Title	Pre-Requisite (Code/s)
FDFOP2034A	Operate an evaporation process	
FDFOP2035A	Operate an enrobing process	
FDFOP2036A	Operate an extrusion process	
FDFOP2037A	Operate a filtration process	
FDFOP2038A	Operate a grinding process	
FDFOP2039A	Operate a frying process	
FDFOP2040A	Operate a heat treatment process	
FDFOP2041A	Operate a mixing or blending and cooking process	
FDFOP2042A	Operate a drying process	
FDFOP2043A	Operate an homogenising process	
FDFOP2044A	Operate a retort process	
FDFOP2045A	Operate pumping equipment	
FDFOP2046A	Operate a production process	
FDFOP2047A	Operate a portion saw	
FDFOP2048A	Pre-process raw materials	
FDFOP2049A	Operate a reduction process	
FDFOP2050A	Operate a separation process	
FDFOP2051A	Operate a spreads production process	
FDFOP2052A	Operate a chocolate tempering process	
FDFOP2053A	Operate a washing and drying process	
FDFOP2054A	Operate a water purification process	
FDFOP2055A	Freeze dough	
FDFOP2056A	Operate a freezing process	

Code	Title	Pre-Requisite (Code/s)
FDFOP2057A	Operate a membrane process	
FDFOP2058A	Operate a holding and storage process	
FDFOP2059A	Operate a continuous freezing process	
FDFOP2060A	Operate an automated cutting process	
FDFOP2061A	Use numerical applications in the workplace	
FDFOP2062A	Apply work procedures to maintain integrity of product	
FDFOP2063A	Apply quality systems and procedures	
FDFOP2064A	Provide and apply workplace information	
FDFOP2065A	Work in confined spaces in the food and beverage industries	FDFOHS2001A
FDFOP2066A	Operate a wort production process	FDFOP2071A
FDFOP2067A	Operate a brewery fermentation process	FDFOP2071A
FDFOP2068A	Operate a beer maturation process	FDFOP2071A
FDFOP2069A	Operate a beer filtration process	FDFOP2071A
FDFOP2070A	Operate a bright beer tank process	FDFOP2071A
FDFOP2071A	Identify key stages and beer production equipment in a brewery	
FDFOP2072A	Operate a beer filling process	
FDFOP2073A	Operate a beer packaging process	
FDFOP2074A	Prepare and monitor beer yeast propagation processes	
FDFOP3001A	Control contaminants and allergens in the workplace	FDFFS2001A
FDFOP3002A	Set up a production or packaging line for operation	
FDFOP3003A	Operate interrelated processes in a production system	
FDFOP3004A	Operate interrelated processes in a packaging system	

Code	Title	Pre-Requisite (Code/s)
FDFOP3005A	Prepare food products using basic cooking methods	FDFFS2001A
FDFOP3006A	Identify cultural, religious and dietary requirements for food products	
FDFPB3001A	Operate a dough mixing process	
FDFPB3002A	Operate a final proof and baking process	
FDFPB3003A	Operate a dough make up process	
FDFPH1001A	Follow work procedures to maintain Good Manufacturing Practice	
FDFPH2001A	Apply Good Manufacturing Practice procedures	
FDFPH2002A	Operate a concentration process	
FDFPH2003A	Operate an extraction process	
FDFPH2004A	Operate a separation process using chromatography	FDFOP2032A FDFFS2001A FDFPH2001A
FDFPH2005A	Operate an aseptic fill and seal process	FDFOP2032A FDFFS2001A FDFPH2001A
FDFPH2006A	Operate an aseptic form, fill and seal process	FDFOP2032A FDFFS2001A FDFPH2001A
FDFPH2007A	Co-ordinate a label store	
FDFPH2008A	Operate a compressing process	
FDFPH2009A	Dispense pharmaceutical raw materials	
FDFPH2010A	Operate an encapsulation process	
FDFPH2011A	Operate a granulation process	
FDFPH2012A	Operate a liquid manufacturing process	

Code	Title	Pre-Requisite (Code/s)
FDFPH2013A	Operate a tablet coating process	
FDFPH2014A	Operate a terminal sterilisation process	
FDFPH3001A	Monitor and maintain Good Manufacturing Practice procedures	
FDFPH4001A	Prepare and review workplace documentation to support Good Manufacturing Practice	
FDFPH4002A	Facilitate and monitor Good Manufacturing Practice	
FDFPH4003A	Facilitate contamination control	
FDFPH4004A	Participate in change control procedures	
FDFPH4005A	Participate in validation processes	
FDFPH4006A	Respond to non-conformance	
FDFPO2001A	Operate a dicing, stripping or mincing process	
FDFPO2002A	Operate an evisceration process	
FDFPO2003A	Grade carcass	
FDFPO2004A	Harvest edible offal	
FDFPO2005A	Operate a marinade injecting process	
FDFPO2006A	Operate a washing and chilling process	
FDFPO2007A	Operate the bird receival and hanging process	
FDFPO2008A	Operate a stunning, killing and defeathering process	
FDFPO2009A	Work in an egg grading floor	
FDFPO2010A	Operate egg grading and packing floor equipment	FDFPO2009A
FDFPO3001A	Operate a chickway system	
FDFPO3002A	Debone and fillet product (manually)	
FDFPPL2001A	Participate in work teams and groups	

Code	Title	Pre-Requisite (Code/s)
FDFPPL3001A	Participate in improvement processes	
FDFPPL3002A	Report on workplace performance	
FDFPPL3003A	Support and mentor individuals and groups	
FDFPPL3004A	Lead work teams and groups	
FDFPPL3005A	Participate in an audit process	FDFOHS2001A FDFOP2063A MSAENV272B
FDFPPL3006A	Establish compliance requirements for work area	
FDFPPL4001A	Manage people in the work area	FDFPPL3003A
FDFPPL4002A	Plan and co-ordinate maintenance	
FDFPPL4003A	Schedule and manage production	
FDFPPL4004A	Optimise a work process	FDFPPL3001A
FDFPPL4005A	Establish process capability	FDFOP2015A FDFOP2061A FDFTEC4007A
FDFPPL4006A	Manage a work area within budget	
FDFPPL4007A	Manage supplier agreements and contracts	
FDFPPL4008A	Manage internal audits	FDFOHS2001A FDFOP2063A FDFPPL3005A MSAENV272B
FDFPPL5001A	Design and maintain programs to support legal compliance	FDFFS2001A FDFFS3001A FDFOHS4002A FDFTEC3001A MSAENV272B

Code	Title	Pre-Requisite (Code/s)
FDFRB1001A	Finish products	
FDFRB2001A	Form and fill pastry products	
FDFRB2002A	Prepare fillings	
FDFRB2003A	Produce meringue-based products	
FDFRB2004A	Provide production assistance for bread products	
FDFRB2005A	Provide assistance in cake, pastry and biscuit production	
FDFRB3001A	Produce pastry	
FDFRB3002A	Produce bread dough	
FDFRB3003A	Produce sponge, cake and cookie batter	
FDFRB3004A	Decorate cakes and cookies	
FDFRB3005A	Bake bread	
FDFRB3006A	Bake sponges, cakes and cookies	
FDFRB3007A	Bake pastry products	
FDFRB3008A	Store, handle and use frozen dough	
FDFRB3009A	Retard dough	
FDFRB3010A	Process dough	
FDFRB3011A	Diagnose and respond to product and process faults (bread)	FDFRB3002A FDFRB3005A FDFRB3010A
FDFRB3012A	Diagnose and respond to product and process faults (pastry, cake and cookies)	FDFRB2001A FDFRB2002A FDFRB3001A FDFRB3003A FDFRB3004A FDFRB3006A

Code	Title	Pre-Requisite (Code/s)
		FDFRB3007A
FDFRB3013A	Produce artisan breads	FDFRB3002A FDFRB3005A FDFRB3010A
FDFRB3014A	Produce sweet yeast products	
FDFRB3015A	Produce and decorate gateaux and tortes	FDFRB2002A FDFRB2003A FDFRB3001A FDFRB3003A FDFRB3004A FDFRB3006A FDFRB3007A
FDFRB3016A	Plan and schedule production for retail bakery	
FDFRB3017A	Participate in product development	
FDFRB4001A	Apply marketing principles to retail bakery	
FDFRB4002A	Control bakery operations to meet quality and production requirements	
FDFRB4003A	Apply baking science to work practices	
FDFRB4004A	Produce sourdough products	
FDFRB4005A	Apply advanced finishing techniques for specialty cakes and desserts	FDFRB2002A FDFRB2003A FDFRB3001A FDFRB3004A FDFRB3006A FDFRB3007A FDFRB3015A
FDFRB4006A	Explore and apply baking techniques to develop new products	

Code	Title	Pre-Requisite (Code/s)
FDFRB4007A	Evaluate and assess bakery product	
FDFRB4008A	Set up sustainable baking operations	
FDFRB4008A	Coordinate material supply for baking processes	FDFRB4003A
FDFRB4010A	Prepare plated sweets and desserts	
FDFSUG101A	Install pre-ballast	
FDFSUG102A	Undertake shunting operations	
FDFSUG103A	Move cane bins in a marshalling yard	
FDFSUG104A	Check a cane sample for extraneous matter	
FDFSUG105A	Manually clean and maintain housekeeping standards	
FDFSUG201A	Lay sleepers for cane rail systems	
FDFSUG202A	Lay rails for cane rail systems	
FDFSUG203A	Lay skeleton track for cane rails systems	
FDFSUG204A	Operate tamping equipment	
FDFSUG205A	Construct turnouts	FDFSUG202A
FDFSUG206A	Drive a cane locomotive	
FDFSUG207A	Conduct cane weighbridge operations	
FDFSUG208A	Operate a tipping station	
FDFSUG209A	Operate an extraction station	
FDFSUG210A	Operate a juice clarification process	
FDFSUG211A	Operate a mud filtration process	
FDFSUG212A	Chemically clean equipment	
FDFSUG213A	Operate a pans station	
FDFSUG214A	Operate a low grade fugal station	

Code	Title	Pre-Requisite (Code/s)
FDFSUG215A	Operate a high grade fugal station	
FDFSUG216A	Operate a crystalliser station process	
FDFSUG217A	Operate a turbine	
FDFSUG218A	Operate a boiler - basic	
FDFSUG219A	Operate a bagasse fuel supply system	
FDFSUG220A	Operate a coal fuel supply system	
FDFSUG221A	Operate an ash separation system	
FDFSUG222A	Operate a waste water treatment system	
FDFSUG223A	Operate a cooling water system	
FDFSUG224A	Perform standard tests on cane samples	
FDFSUG225A	Collect and prepare samples	
FDFSUG226A	Perform general drilling operations	
FDFSUG227A	Perform general lathe operations	
FDFSUG228A	Perform general milling operations	
FDFSUG229A	Perform general planing and shaping operations	
FDFSUG230A	Undertake forming, bending and shaping	
FDFSUG231A	Undertake simple fabrication	
FDFSUG301A	Drive a master-slave locomotive	FDFSUG206A
FDFSUG302A	Control cane traffic movements	
FDFSUG303A	Adjust cane delivery schedules to meet daily milling requirements	
FDFSUG304A	Operate a boiler - intermediate	
FDFSUG305A	Operate a boiler - advanced	
FDFSUG306A	Monitor a sugar mill powerhouse	FDFSUG217A

Code	Title	Pre-Requisite (Code/s)
FDFSUG307A	Perform factory control tests	
FDFSUG308A	Analyse and convey workplace information	
FDFSUG309A	Operate a sugar system	
FDFTEC3001A	Participate in a HACCP team	FDFFS2001A
FDFTEC3002A	Implement the pest prevention program	
FDFTEC3003A	Apply raw materials, ingredient and process knowledge to production problems	
FDFTEC4001A	Determine handling processes for perishable food items	
FDFTEC4002A	Manage controlled atmosphere storage	
FDFTEC4003A	Control food contamination and spoilage	FDFFS3001A
FDFTEC4004A	Apply basic process engineering principles to food processing	FDFOP2030A FDFTEC4007A FDFOP2015A FDFOP2061A
FDFTEC4005A	Apply an understanding of food additives	
FDFTEC4006A	Apply an understanding of legal requirements of food production	
FDFTEC4007A	Describe and analyse data using mathematical principles	FDFOP2015A FDFOP2061A
FDFTEC4008A	Apply principles of food packaging	
FDFTEC4009A	Identify the physical and chemical properties of materials, food and related products	
FDFTEC4010A	Manage water treatment processes	MSAENV272B
FDFTEC4011A	Participate in product recalls	FDFFS3001A
FDFTEC5001A	Manage and evaluate new product trials	
FDFTEC5002A	Manage utilities and energy for a production process	

Code	Title	Pre-Requisite (Code/s)
FDFWGG2001A	Bench graft vines	
FDFWGG2002A	Carry out potting operations	
FDFWGG2003A	Hand prune vines	
FDFWGG2004A	Undertake irrigation systems maintenance activities	
FDFWGG2005A	Maintain callusing environment	
FDFWGG2006A	Obtain and process rootlings	
FDFWGG2007A	Tend containerised nursery plants	
FDFWGG2008A	Train vines	
FDFWGG2009A	Operate specialised canopy management equipment	AHCMOM202A
FDFWGG2010A	Field graft vines	
FDFWGG2011A	Install irrigation components	
FDFWGG2012A	Identify and treat nursery plant disorders	
FDFWGG2013A	Deliver injection requirements	
FDFWGG2014A	Operate the irrigation system	
FDFWGG2015A	Support mechanical harvesting operations	AHCMOM202A FDFWGG218A
FDFWGG2016A	Install and maintain vine trellis	
FDFWGG2017A	Recognise disorders and identify pests and diseases	
FDFWGG2018A	Operate vineyard equipment	
FDFWGG2019A	Perform vertebrate pest control activities	
FDFWGG2020A	Carry out hot water treatment	
FDFWGG2021A	Operate nursery cold storage facilities	
FDFWGG2022A	Take and process vine cuttings	
FDFWGG2023A	Carry out basic canopy maintenance	

Code	Title	Pre-Requisite (Code/s)
FDFWGG2024A	Pick grapes by hand	
FDFWGG2025A	Plant vines by hand	
FDFWGG3001A	Apply chemicals and biological agents	
FDFWGG3002A	Coordinate canopy management activities	
FDFWGG3003A	Coordinate crop harvesting activities	FDFWGG2024A
FDFWGG3004A	Coordinate nursery activities	FDFWGG2002A FDFWGG2006A FDFWGG3009A FDFWGG2007A FDFWGG2012A
FDFWGG3005A	Perform field nursery activities	
FDFWGG3006A	Coordinate hand pruning activities	FDFWGG2003A
FDFWGG3007A	Implement an irrigation schedule	FDFWGG2014A
FDFWGG3008A	Operate a mechanical harvester	
FDFWGG3009A	Monitor and maintain nursery plants	FDFWGG2007A FDFWGG2012A
FDFWGG3010A	Implement a soil management program	FDFWGG2018A FDFWGG3001A
FDFWGG3011A	Perform shed nursery activities	
FDFWGG3012A	Monitor and control vine disorders and damage	
FDFWGG3013A	Operate spreading and seeding equipment	AHCMOM202A
FDFWIN1001A	Identify key operations in wine production	
FDFWIN1002A	Identify viticulture processes	
FDFWIN2001A	Perform effectively in a wine industry workplace	
FDFWIN2002A	Identify and control risks in own work	

Imported Units of Competency in FDF10v3 Training Package

Code	Title	Origin
AHCARB205A	Operate and maintain chainsaws	AHC10
AHCBAC101A	Support agricultural crop work	AHC10
AHCBAC204A	Prepare grain storages	AHC10
AHCBUS405A	Participate in an e-business supply chain	AHC10
AHCCHM101A	Follow basic chemical safety rules	AHC10
AHCCHM201A	Apply chemicals under supervision	AHC10
AHCCHM303A	Prepare and apply chemicals	AHC10
AHCCHM304A	Transport, handle and store chemicals	AHC10
AHCINF204A	Fabricate and repair metal or plastic structures	AHC10
AHCMOM101A	Assist with routine maintenance of machinery and equipment	AHC10
AHCMOM202A	Operator tractors	AHC10
AHCMOM203A	Operate basic machinery and equipment	AHC10
AHCMOM204A	Undertake operational maintenance of machinery	AHC10
AHCMOM207A	Conduct front end loader operations	AHC10
AHCMOM301A	Coordinate machinery and equipment maintenance and repair	AHC10
AHCMOM302A	Perform machinery maintenance	AHC10
AHCMOM304A	Operate machinery and equipment	AHC10
AHCMOM305A	Operate specialised machinery and equipment	AHC10
AHCP301A	Implement a plant nutrition program	AHC10
AHCPGD301A	Implement a plant establishment program	AHC10
AHCPHT401A	Assess olive oil for style and quality	AHC10
AHCSOL201A	Determine basic properties of soil/growing media	AHC10

Code	Title	Origin
AHCSOL401A	Sample soils and interpret results	AHC10
AHCWRK308A	Handle bulk materials in storage area	AHC10
BSBCOM502B	Evaluate and review compliance	BSB07
BSBCOM503B	Develop processes for the management of breaches in compliance requirements	BSB07
BSBCUS201B	Deliver a service to customers	BSB07
BSBCUS301B	Deliver and monitor a service to customers	BSB07
BSBCUS401B	Coordinate implementation of customer service strategies	BSB07
BSBCUS501C	Manage quality customer service	BSB07
BSBFIM501A	Manage budgets and financial plans	BSB07
BSBHRM402A	Recruit, select and induct staff	BSB07
BSBINN301A	Promote innovation in a team environment	BSB07
BSBINT303B	Organise the importing and exporting of goods	BSB07
BSBITU201A	Produce simple word processed documents	BSB07
BSBITU202A	Create and use spreadsheets	BSB07
BSBLED401A	Develop teams and individuals	BSB07
BSBMGT401A	Show leadership in the workplace	BSB07
BSBMGT402A	Implement operational plan	BSB07
BSBMGT403A	Implement continuous improvement	BSB07
BSBMGT502B	Manage people performance	BSB07
BSBMGT515A	Manage operational plan	BSB07
BSBMGT516C	Facilitate continuous improvement	BSB07
BSBMKG501B	Identify and evaluate marketing opportunities	BSB07
BSBMKG507A	Interpret market trends and developments	BSB07

Code	Title	Origin
BSBMKG514A	Implement and monitor marketing activities	BSB07
BSBOHS503B	Assist in the design and development of OHS participative arrangements	BSB07
BSBPMG510A	Manage projects	BSB07
BSBRES401A	Analyse and present research information	BSB07
BSBSMB301A	Investigate micro business opportunities	BSB07
BSBSMB401A	Establish legal and risk management requirements of small business	BSB07
BSBSMB402A	Plan small business finances	BSB07
BSBSMB403A	Market the small business	BSB07
BSBSMB404A	Undertake small business planning	BSB07
BSBSMB405B	Monitor and manage small business operations	BSB07
BSBSMB406A	Manage small business finances	BSB07
BSBSMB407A	Manage a small team	BSB07
BSBWOR204A	Use business technology	BSB07
BSBWOR401A	Establish effective workplace relationships	BSB07
BSBWOR402A	Promote team effectiveness	BSB07
BSBWOR403A	Manage stress in the workplace	BSB07
BSBWOR404B	Develop work priorities	BSB07
BSBWOR502B	Ensure team effectiveness	BSB07
BSBWRT301A	Write simple documents	BSB07
BSBWRT401A	Write complex documents	BSB07
CPCEDO3011A	Perform dogging	CPC08
CPCCOHS2001 A	Apply OHS requirements, policies and procedures in the construction industry	CPC08

Code	Title	Origin
CPCCRI3012A	Perform basic rigging	CPC08
CPCSC2002A	Erect and dismantle basic scaffolding	CPC08
HLTFA201B	Provide basic emergency life support	HLT07
HLTFA301C	Apply first aid	HLT07
LMTGN3007B	Monitor and operate trade waste process	LMT07
MEM13003B	Work safely with industrial chemicals and materials	MEM05
MEM15001B	Perform basic statistical quality control	MEM05
MEM18001C	Use hand tools	MEM05
MEM18002B	Use power tools / hand held operations	MEM05
MSACMT270A	Use sustainable energy practices	MSA07
MSACMT671A	Develop and manage sustainable environmental practices	MSA07
MSAENV272B	Participate in environmentally sustainable work practices	MSA07
MSAENV472B	Implement and monitor environmentally sustainable work practices	MSA07
MSAPMOHS21 6A	Operate breathing apparatus	MSA07
MSAPMOHS21 7A	Gas test atmospheres	MSA07
MSAPMOPS400 A	Optimise process/plant area	MSA07
MSAPMOPS401 A	Trial new process or product	MSA07
MSAPMOPS404 A	Co-ordinate maintenance	MSA07
MSAPMOPS405 A	Identify problems in fluid power system	MSA07

Code	Title	Origin
MSAPMOPS406 A	Identify problems in electronic control systems	MSA07
MSAPMPER200 C	Work in accordance with an issued permit	MSA07
MSAPMPER201 A	Monitor and control work permits	MSA07
MSAPMPER205 C	Enter confined space	MSA07
MSAPMPER300 C	Issue work permits	MSA07
MSAPMPER400 A	Coordinate permit process	MSA07
MSAPMSUP303 A	Identify equipment faults	MSA07
MSAPMSUP310 A	Contribute to the development of plant documentation	MSA07
MSAPMSUP330 A	Develop and adjust a production schedule	MSA07
MSAPMSUP390 A	Use structured problem solving tools	MSA07
MSL912001A	Work within a laboratory_field workplace (induction)	MSL09
MSL922001A	Record and present data	MSL09
MSL933001A	Maintain the laboratory_field workplace fit for purpose	MSL09
MSL943002A	Participate in laboratory_field workplace safety	MSL09
MSL952001A	Collect routine site samples	MSL09
MSL952002A	Handle and transport samples or equipment	MSL09
MSL972001A	Conduct routine site measurements	MSL09
MSL973001A	Perform basic tests	MSL09
MSL973004A	Perform aseptic techniques	MSL09

Code	Title	Origin
MSL973007A	Perform microscopic examination	MSL09
MSL974003A	Perform chemical tests and procedures	MSL09
MSL974004A	Perform food tests	MSL09
MSL974006A	Perform biological procedures	MSL09
MSL975005A	Conduct sensory analysis	MSL09
MSL975020A	Apply routine spectrometric techniques	MSL09
MSL975021A	Apply routine electrometric techniques	MSL09
MSL975022A	Perform food analyses	MSL09
MSS402001A	Apply competitive systems and practices	MSS11
MSS402002A	Sustain process improvements	MSS11
MSS402010A	Manage the impact of change on own work	MSS11
MSS402021A	Apply Just in Time procedures	MSS11
MSS402030A	Apply cost factors to work practices	MSS11
MSS402031A	Interpret product costs in terms of customer requirements	MSS11
MSS402040A	Apply 5S procedures	MSS11
MSS402050A	Monitor process capability	MSS11
MSS402051A	Apply quality standards	MSS11
MSS402060A	Use planning software systems in operations	MSS11
MSS402061A	Use SCADA systems in operations	MSS11
MSS402080A	Undertake root cause analysis	MSS11
MSS402081A	Contribute to the application of a proactive maintenance strategy	MSS11
MSS403001A	Implement competitive systems and practices	MSS11
MSS403002A	Ensure process improvements are sustained	MSS11

Code	Title	Origin
MSS403005A	Facilitate use of a Balanced Scorecard for performance improvement	MSS11
MSS403010A	Facilitate change in an organisation implementing competitive systems and practices	MSS11
MSS403011A	Facilitate implementation of competitive systems and practices	MSS11
MSS403013A	Lead team culture improvement	MSS11
MSS403021A	Facilitate a Just in Time system	MSS11
MSS403023A	Monitor a levelled pull system of operations	MSS11
MSS403030A	Improve cost factors in work practices	MSS11
MSS403032A	Analyse manual handling processes	MSS11
MSS403040A	Facilitate and improve implementation of 5S	MSS11
MSS403041A	Facilitate breakthrough improvements	MSS11
MSS403051A	Mistake proof an operational process	MSS11
MSS404050A	Undertake process capability improvements	MSS11
MSS404052A	Apply statistics to operational processes	MSS11
MSS404053A	Use six sigma techniques	MSS11
MSS404060A	Facilitate the use of planning software systems in a work area or team	MSS11
MSS404061A	Facilitate the use of SCADA systems in a team or work area	MSS11
MSS404081A	Undertake proactive maintenance analyses	MSS11
MSS404082A	Assist in implementing a proactive maintenance strategy	MSS11
MSS404083A	Support proactive maintenance	MSS11
MSS405001A	Develop competitive systems and practices for an organisation	MSS11

Code	Title	Origin
MSS405002A	Analyse and map a value stream	MSS11
MSS405005A	Manage competitive systems and practices responding to individual and unique customer orders	MSS11
MSS405006A	Develop a Balanced Scorecard	MSS11
MSS405007A	Introduce competitive systems and practices to a small or medium enterprise	MSS11
MSS405010A	Manage relationships with non-customer external organisations	MSS11
MSS405011A	Manage people relationships	MSS11
MSS405012A	Manage workplace learning	MSS11
MSS405013A	Facilitate holistic culture improvement in an organisation	MSS11
MSS405014A	Develop a communications strategy to support operations	MSS11
MSS405020A	Develop quick changeover procedures	MSS11
MSS405022A	Design a process layout	MSS11
MSS405023A	Develop a levelled pull system for operations and processes	MSS11
MSS405030A	Optimise cost of product or service	MSS11
MSS405031A	Undertake value analysis of product or process cost in terms of customer requirements	MSS11
MSS405032A	Analyse cost implications of maintenance strategy	MSS11
MSS405040A	Manage 5S system in an organisation	MSS11
MSS405050A	Determine and improve process capability	MSS11
MSS405060A	Develop the application of enterprise control systems in an organisation	MSS11
MSS405061A	Determine and establish information collection requirements and processes	MSS11

Code	Title	Origin
MSS405062A	Develop a documentation control strategy for an organisation	MSS11
MSS405070A	Develop and manage sustainable energy practices	MSS11
MSS405075A	Facilitate the development of a new product	MSS11
MSS405081A	Develop a proactive maintenance strategy	MSS11
MSS405082A	Adapt a proactive maintenance strategy to the process operations sector	MSS11
MSS405083A	Adapt a proactive maintenance strategy for a seasonal or cyclical business	MSS11
MTMCOR202A	Apply hygiene and sanitation practices	MTM11
MTMCOR404A	Facilitate hygiene and sanitation performance	MTM11
MTMP2006B	Apply animal welfare and handling requirements	MTM11
MTMP2197C	Clean after operations – boning room	MTM11
MTMP402B	Implement a Meat Hygiene Assessment Program	MTM11
MTMP404B	Apply meat science	MTM11
MTMPS411C	Monitor a meat preservation process	MTM11
MTMPS412C	Monitor and overview the production of processed meats and smallgoods	MTM11
MTMPS414B	Monitor and overview the production of Uncooked Comminuted Fermented Meat (UCFM)	MTM11
MTMPS5603C	Develop, manage and maintain quality systems	MTM11
MTMPSR201C	Vacuum pack product	MTM11
MTMPSR203A	Sharpen knives	MTM11
MTMPSR407A	Assess and evaluate meat industry requirements and processes	MTM11
MTMPSR408A	Specify beef product using AUS-MEAT language	MTM11
MTMPSR409A	Specify sheep product using AUS-MEAT language	MTM11

Code	Title	Origin
MTMPSR410A	Specify pork product using AUS-MEAT language	MTM11
MTMPSR5601C	Design and manage the food safety system	MTM11
MTMR308C	Prepare and produce value-added products	MTM11
PMA08	Minimise environmental impact of process	PMA08
PMBPROD211B	Operate blow moulding equipment	PMB07
PMBPROD270B	Operate injection blow moulding equipment	PMB07
PMBTECH406A	Diagnose production equipment problems	PMB07
RIICBM305A	Install pre-cast concrete bridge decks	RII09
RIIHAN305A	Operate gantry or overhead crane	RII09
RIIMPO319A	Conduct backhoe/loader operations	RII09
RIIRIS201B	Conduct local risk control	RII09
SFIPROC504C	Design and manage a product recall	SFI11
SIRRFSA001A	Apply retail food safety practices	SIR07
SIRRMER004A	Prepare and display bakery products	SIR07
SIRXCCS201	Apply point-of-sale handling procedures	SIR07
SIRXCCS202	Interact with customers	SIR07
SIRXCCS304	Coordinate interaction with customers	SIR07
SIRXFIN201	Balance and secure point-of-sale terminal	SIR07
SIRXFIN002A	Perform retail finance duties	SIR07
SIRXICT001A	Operate retail technology	SIR07
SIRXICT303	Operate retail information technology systems	SIR07
SIRXINV001A	Perform stock control procedures	SIR07
SIRXINV002A	Maintain and order stock	SIR07
SIRXMER201	Merchandise products	SIR07

Code	Title	Origin
SIRXMPR006A	Manage promotional activities	SIR07
SIRXRSK001A	Minimise theft	SIR07
SIRXRSK002A	Maintain store security	SIR07
SIRXSL201	Sell products and services	SIR07
SIRXSL002A	Advise on products and services	SIR07
SITHCCC001B	Organise and prepare food	SIT07
SITHCCC002A	Present food	SIT07
SITHCCC005A	Use basic methods of cookery	SIT07
SITHCCC014A	Prepare pastries, cakes and yeast goods	SIT07
SITHCCC022A	Prepare chocolate and chocolate confectionery	SIT07
SITHFAB003A	Serve food and beverage to customers	SIT07
SITHFAB004A	Provide food and beverage service	SIT07
SITHFAB005A	Provide table service of alcoholic beverages	SIT07
SITHFAB009A	Provide responsible service of alcohol	SIT07
SITHFAB011A	Develop and update food and beverage knowledge	SIT07
SITHFAB012B	Prepare and serve espresso coffee	SIT07
SITHFAB016A	Plan and monitor espresso coffee service	SIT07
SITHFAB222A	Conduct a product tasting of alcoholic beverages	SIT07
SITHFAB325A	Provide specialised advice on Australian wines	SIT07
SITHFAB326A	Provide specialised advice on imported wines	SIT07
SITHPAT001A	Prepare and produce pastries	SIT07
SITHPAT002A	Prepare and produce cakes	SIT07
SITHPAT003A	Prepare and produce yeast goods	SIT07
SITHPAT004A	Prepare baking product for patisseries	SIT07

Code	Title	Origin
SITHPAT007A	Prepare and display petits fours	SIT07
SITHPAT008A	Prepare and model marzipan	SIT07
SITHPAT010A	Prepare and display sugar work	SIT07
SITTIND001B	Develop and update tourism industry knowledge	SIT07
SITXCCS001B	Provide visitor information	SIT07
SITXCOM001A	Work with colleagues and customers	SIT07
SITXFIN001A	Process financial transactions	SIT07
SITXOHS002A	Follow workplace hygiene procedures	SIT07
TAEASS401B	Plan assessment activities and processes	TAE10
TAEASS402B	Assess competence	TAE10
TAEASS403B	Participate in assessment validation	TAE10
TAEASS502B	Design and develop assessment tools	TAE10
TAEDEL301A	Provide work skill instruction	TAE10
TAEDEL404A	Mentor in the workplace	TAE10
TAEDES401A	Design and develop learning programs	TAE10
TLIA2009A	Complete and check import/export documentation	TLI10
TLIA2011A	Package goods	TLI10
TLIA2012A	Pick and process orders	TLI10
TLIA2014A	Use product knowledge to complete work operations	TLI10
TLIA2021A	Despatch stock	TLI10
TLIA2022A	Participate in stocktakes	TLI10
TLIA3010A	Coordinate goods to bond premises	TLI10
TLIA3015A	Complete receipt / despatch documentation	TLI10
TLIA3016A	Use inventory systems to organise stock control	TLI10

Code	Title	Origin
TLIA3017A	Identify products and store to specifications	TLI10
TLIA3018A	Organise despatch operations	TLI10
TLIA3019A	Organise receival operations	TLI10

					statement.

Overview

What is a Training Package?

A Training Package is an integrated set of nationally endorsed competency standards, assessment guidelines and Australian Qualifications Framework (AQF) qualifications for a specific industry, industry sector or enterprise.

Each Training Package:

- provides a consistent and reliable set of components for training, recognising and assessing peoples skills, and may also have optional support materials
- enables nationally recognised qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training which suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

How do Training Packages fit within the National Skills Framework?

The National Skills Framework applies nationally, is endorsed by the Ministerial Council for Vocational and Technical Education, and comprises the Australian Quality Training Framework 2010 (AQTF 2010), and Training Packages endorsed by the National Quality Council (NQC).

How are Training Packages developed?

Training Packages are developed by Industry Skills Councils or enterprises to meet the identified training needs of specific industries or industry sectors. To gain national endorsement of Training Packages, developers must provide evidence of extensive research, consultation and support within the industry area or enterprise.

How do Training Packages encourage flexibility?

Training Packages describe the skills and knowledge needed to perform effectively in the workplace without prescribing how people should be trained. Training Packages acknowledge that people can achieve vocational competency in many ways by emphasising what the learner can do, not how or where they learned to do it. For example, some experienced workers might be able to demonstrate competency against the units of competency, and even gain a qualification, without completing a formal training program.

With Training Packages, assessment and training may be conducted at the workplace, off-the-job, at a training organisation, during regular work, or through work experience, work placement, work simulation or any combination of these.

Who can deliver and assess using Training Packages?

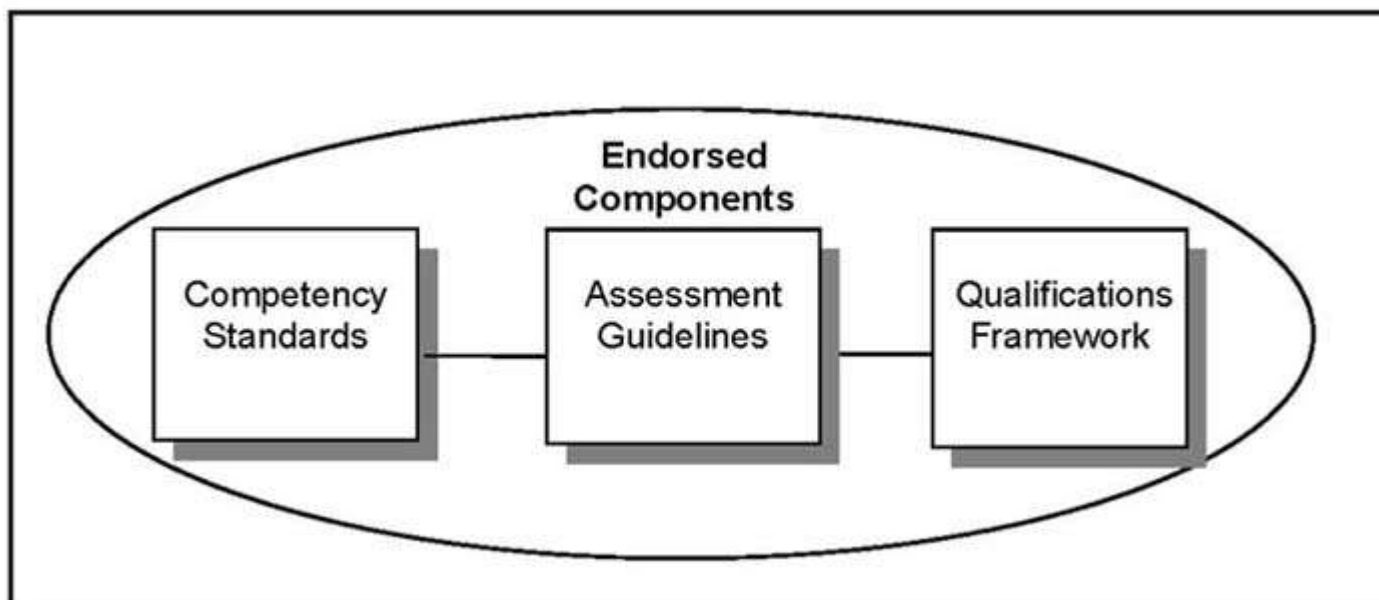

Training and assessment using Training Packages must be conducted by a Registered Training Organisation (RTO) that has the qualifications or specific units of competency on its scope of registration, or that works in partnership with another RTO, as specified in the AQTF 2010.

Training Package Components

Training Packages are made up of mandatory components endorsed by the NQC, and optional support materials.

Training Package Endorsed Components

The nationally endorsed components include the Competency Standards, Assessment Guidelines and Qualifications Framework. These form the basis of training and assessment in the Training Package and, as such, they must be used.

Competency Standards

Each unit of competency identifies a discrete workplace requirement and includes the knowledge and skills that underpin competency as well as language, literacy and numeracy; and occupational health and safety requirements. The units of competency must be adhered to in training and assessment to ensure consistency of outcomes.

Assessment Guidelines

The Assessment Guidelines provide an industry framework to ensure all assessments meet industry needs and nationally agreed standards as expressed in the Training Package and the AQTF 2010. The Assessment Guidelines must be followed to ensure the integrity of assessment leading to nationally recognised qualifications.

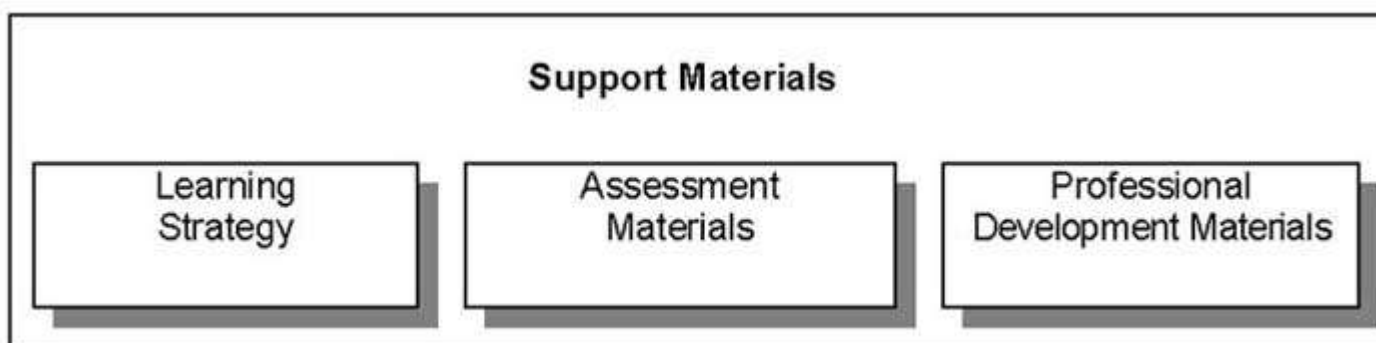

Qualifications Framework

Each Training Package provides details of those units of competency that must be achieved to award AQF qualifications. The rules around which units of competency can be combined to make up a valid AQF qualification in the Training Package are referred to as the "packaging rules". The packaging rules must be followed to ensure the integrity of nationally recognised qualifications issued.

Training Package Support Materials

The endorsed components of Training Packages are complemented and supported by optional support materials that provide for choice in the design of training and assessment to meet the needs of industry and learners.

Training Package support materials can relate to single or multiple units of competency, an industry sector, a qualification or the whole Training Package. They tend to fall into one or more of the categories illustrated below.

Training Package support materials are produced "by a range of stakeholders such as RTOs, individual trainers and assessors, private and commercial developers and Government agencies.

Training Package, Qualification and Unit of Competency Codes

There are agreed conventions for the national codes used for Training Packages and their components. Always use the correct codes, exactly as they appear in the Training Package, **and with the code always before the title.**

Training Package Codes

Each Training Package has a unique five-character national code assigned when the Training Package is endorsed, for example FDF10. The first three characters are letters identifying the Training Package industry coverage and the last two characters are numbers identifying the year of endorsement.

Qualification Codes

Within each Training Package, each qualification has a unique eight-character code, for example FDF10110. Qualification codes are developed as follows:

- the first three letters identify the Training Package;
- the first number identifies the qualification level (noting that, in the qualification titles themselves, arabic numbers are **not** used);
- the next two numbers identify the position in the sequence of the qualification at that level; and
- the last two numbers identify the year in which the qualification was endorsed. (Where qualifications are added after the initial Training Package endorsement, the last two numbers may differ from other Training Package qualifications as they identify the year in which those particular qualifications were endorsed.)

Unit of Competency Codes

Within each Training Package, each unit of competency has a unique code. Unit of competency codes are assigned when the Training Package is endorsed, or when new units of competency are added to an existing endorsed Training Package. Unit codes are developed as follows:

- a typical code is made up of 12 characters, normally a mixture of uppercase letters and numbers, as in FDFAU4001A;
- the first three characters signify the Training Package - FDF10 - in the above example and up to eight characters, relating to an industry sector, function or skill area, follow;

- the last character is always a letter and identifies the unit of competency version. An "A" at the end of the code indicates that this is the original unit of competency. "B", or another incremented version identifier means that minor changes have been made. Typically this would mean that wording has changed in the range statement or evidence guide, providing clearer intent; and
- where changes are made that alter the outcome, a new code is assigned and the title is changed.

Training Package, Qualification and Unit of Competency Titles

There are agreed conventions for titling Training Packages and their components. Always use the correct titles, exactly as they appear in the Training Package, and with the code always placed before the title.

Training Package Titles

The title of each endorsed Training Package is unique and relates the Training Packages broad industry coverage.

Qualification Titles

The title of each endorsed Training Package qualification is unique. Qualification titles use the following sequence:

- first, the qualification is identified as either Certificate I, Certificate II, Certificate III, Certificate IV, Diploma, Advanced Diploma, Vocational Graduate Certificate, or Vocational Graduate Diploma;
- this is followed by the words "in" for Certificates I to IV, and "of" for Diploma, Advanced Diploma, Vocational Graduate Certificate and Vocational Graduate Diploma;
- then, the industry descriptor, for example Telecommunications; and
- then, if applicable, the occupational or functional stream in brackets, for example (Computer Systems).

For example: FDF10110 Certificate I in Food Processing

Unit of Competency Titles

Each unit of competency title is unique. Unit of competency titles describe the competency outcome concisely, and are written in sentence case.

For example: FDFAU4001A Assess compliance with food safety programs

Introduction to the FDF10 Version 2 Food Processing Training Package

The 'food processing industry' covered by the FDF10v2 Food Processing Training Package includes a diverse range of sectors engaged in the production of human and animal food, pharmaceuticals and beverages. Together they form Australia's largest manufacturing industry with total sales of over \$100 billion and consistently account for more than 21 per cent of manufacturing industry employment.

Food Processing enterprises span from micro operations to large-scale manufacturing plants and are established across metropolitan and rural Australia. In 2010 the industry involved over 224,000 employees, 40 per cent of which are located in non-metropolitan areas. Over 1,900 wineries and 7,950 vineyards add to this picture, with the pharmaceutical sector employing approximately 14,000 workers and turning over \$8.8 billion a year.

The wine industry in Australia is very diverse covering many regions and enterprises ranging from small family companies to operations conducted by large multi-national businesses. According to the Wine Australia website there are approximately 2,500 wine companies with about 157,000 hectares under vine. The total grape crush in 2010 was 1.603 million tonnes. Wine is third on the list of Australian farm exports after wheat and beef/veal.

Job pathways in the industry typically start at entry level operator or support functions, through a wide application of operator and senior production positions which include specialist technical expertise and supervisory roles. Experienced workers may continue their development to specialist food science and technology outcomes or managerial positions.

Sectors covered by the Training Package include:

- Baking (including large scale production of cakes, pastry, bread, biscuits and plant baking)
- Beverages (including juices, soft drinks, cordials, aerated and still waters, energy drinks and other modified beverages such as vitamin and antioxidant beverages, coffee, tea and ice)
- Confectionery
- Dairy processing
- Egg processing
- Grain processing (including stock feed, animal feeds, milling wheat, barley, oats and flour milling)
- Fruit and vegetable
- Grocery products and supplies (including honey, jams, spreads, sauces, dressings, condiments, spices, edible oils and fats and pasta)
- Pharmaceutical manufacturing
- Plant baking
- Poultry
- Retail baking
- Sales
- Wine

History of the Food Processing Training Package

The initial food processing industry Training Package, FDF98, was developed in 1998 under the auspices of the National Food Industry Training Council and funded by the Australian National Training Authority (ANTA).

FDF98 aimed to improve the domestic and international competitiveness, productivity, and profitability of the industry by strengthening the competence of the workforce. It incorporated a wide range of industry sectors and offered training pathways across 18 direct entry qualifications.

In 2003 the Training Package underwent a review with significant updates made to the organisation of units, and expansion of options into more technical outcomes and qualifications at the Certificate IV and Diploma levels.

In mid-2008 AgriFood Skills Australia held initial consultations to determine the major issues and experiences with delivery of the FDF03 Food Processing Training Package. The initial consultations included State Training Authorities, State ITABs, major employer organisations and unions and major RTOs. These consultations indicated dissatisfaction with the complexity of the FDF03 qualification packaging rules and a desire to improve the overall layout of the Training Package. There was general satisfaction with the coverage of skills and sectors with recognition that some new units were needed especially at the AQF III level for senior operators.

Overall supervision of the Project has been the responsibility of the AgriFood Skills Australia Food Standing Committee.

FDF10 Version 1 incorporated changes to the presentation of units and qualifications and addition of content, in order to comply with current Training Package guidelines and improve the Training Package layout and outcomes. Further changes were made to broaden and update the scope of coverage through new and updated units.

In 2010/11 further work was conducted on the FDF Food Processing Training Package as part of AgriFood Skills Australia's Continuous Improvement Program, which resulted in higher level units and qualifications in food science and technology and advanced baking, revised units of competency in cheesemaking, and revised units of competency and qualifications in wine industry operations. This work also resulted in an amendment to the Certificate I and Certificate II in Food Processing qualifications. These components are included as part of the FDF10 Version 2 submission.

Some qualifications and units of competency currently endorsed as part of FDF03 were not covered by the submission. These qualifications are being reviewed and will be covered in a later submission planned for late 2011. The later submission will cover reviewed food safety auditing units and qualifications, and new units in flour milling, malting and brewing.

Code	Qualification	Comment
FDF41007	Certificate IV in Food Processing (Food Safety Auditing)	The commencement of the review of the Food Safety Auditing

		qualifications as well as the review of the Food Safety units was delayed to a review by Food Safety Authorities of the JASANZ Food Standards code. This review has now been completed and a review of these qualifications and units of competency has commenced.
FDF51007	Diploma of Food Processing (Diploma of Food Safety Auditing)	As above

Code Changes

For the FDF10 Version 2 Training Package the units are coded according to the Training Package Development Handbook policy and use the following form – FDFCATxyzA where

FDF is the Training Package identifier

CAT is the industry sector

x represents the initial AQF alignment of the unit in a qualification

yz is the unit number and

A is the unit version identifier

Units of competency in the FDF10 Version 2 Food Processing Training Package have been allocated to unit categories. They are:

AU	Food safety auditing
BK	Baking - biscuits / cakes / pastry
BP	Bottling and packaging (wine industry)
BV	Beverages - aerated waters/coffee/ice
CD	Cellar door (wine industry)
CEL	Cellar operations (wine industry)
CH	Cheesemaking
CON	Confectionary
DP	Dairy processing

FS	Food Safety
FST	Food science and technology
FV	Fruit and vegetable
GR	Grain processing – stock feed, flour milling, grain processing
GPS	Grocery products and supplies - edible oils and fats/honey
LAB	Laboratory (wine industry)
OHS	Occupational Health & Safety
OP	Cross sector operational skills
PB	Plant baking
PH	Pharmaceutical & complimentary
PO	Poultry
PPL	Cross sector skills targeting people, planning and logistics – information management, people management/work relationships, process improvement
RB	Retail baking
TEC	Technical
WGG	Wine grape growing (wine industry)
WIN	Wine industry induction (wine industry)

Qualifications Framework

What is the Australian Qualifications Framework?

A brief overview of the Australian Qualifications Framework (AQF) follows. For a full explanation of the AQF, see the AQF Implementation Handbook.

http://www.aqf.edu.au/Portals/0/Documents/Handbook/AQF_Handbook_07.pdf

The AQF provides a comprehensive, nationally consistent framework for all qualifications in post-compulsory education and training in Australia. In the vocational education and training (VET) sector it assists national consistency for all trainees, learners, employers and providers by enabling national recognition of qualifications and Statements of Attainment.

Training Package qualifications in the VET sector must comply with the titles and guidelines of the AQF. Endorsed Training Packages provide a unique title for each AQF qualification which must always be reproduced accurately.

Qualifications

Training Packages can incorporate the following eight AQF qualifications.

- Certificate I in ...
- Certificate II in ...
- Certificate III in ...
- Certificate IV in ...
- Diploma of ...
- Advanced Diploma of ...
- Vocational Graduate Certificate of ...
- Vocational Graduate Diploma of ...

Graduate Certificates and Graduate Diplomas can also be awarded in the vocational education and training sector under certain conditions see the *AQF Implementation Handbook* for details.

On completion of the requirements defined in the Training Package, a Registered Training Organisation (RTO) may issue a nationally recognised AQF qualification. Issuance of AQF qualifications must comply with the advice provided in the *AQF Implementation Handbook* and the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Statement of Attainment

A Statement of Attainment is issued by a Registered Training Organisation when an individual has completed one or more units of competency from nationally recognised qualification(s)/courses(s). Issuance of Statements of Attainment must comply with the advice provided in the current *AQF Implementation Handbook* and the *AQTF 2010 Essential Standards for Initial and Continuing Registration*.

Under the AQTF 2010, RTOs must recognise the achievement of competencies as recorded on a qualification testamur or Statement of Attainment issued by other RTOs. Given this, recognised competencies can progressively build towards a full AQF qualification.

AQF Guidelines and Learning Outcomes

The *AQF Implementation Handbook* provides a comprehensive guideline for each AQF qualification. A summary of the learning outcome characteristics and their distinguishing features for each VET related AQF qualification is provided below.

Certificate I

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and skills would prepare a person to perform a defined range of activities most of which may be routine and predictable.

Applications may include a variety of employment related skills including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. They may also include participation in a team or work group.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate knowledge by recall in a narrow range of areas;
- demonstrate basic practical skills, such as the use of relevant tools;
- perform a sequence of routine tasks given clear direction
- receive and pass on messages/information.

Certificate II

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and skills would prepare a person to perform in a range of varied activities or knowledge application where there is a clearly defined range of contexts in which the choice of actions required is usually clear and there is limited complexity in the range of operations to be applied.

Performance of a prescribed range of functions involving known routines and procedures and some accountability for the quality of outcomes.

Applications may include some complex or non-routine activities involving individual responsibility or autonomy and/or collaboration with others as part of a group or team.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate basic operational knowledge in a moderate range of areas;
- apply a defined range of skills;
- apply known solutions to a limited range of predictable problems;
- perform a range of tasks where choice between a limited range of options is required;
- assess and record information from varied sources;
- take limited responsibility for own outputs in work and learning.

Certificate III

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and competencies would cover selecting, adapting and transferring skills and knowledge to new environments and providing technical advice and some leadership in resolution of specified problems. This would be applied across a range of roles in a variety of contexts with some complexity in the extent and choice of options available.

Performance of a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency measures and within known time constraints.

Applications may involve some responsibility for others. Participation in teams including group or team co-ordination may be involved.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate some relevant theoretical knowledge
- apply a range of well-developed skills
- apply known solutions to a variety of predictable problems
- perform processes that require a range of well-developed skills where some discretion and judgement is required
- interpret available information, using discretion and judgement
- take responsibility for own outputs in work and learning
- take limited responsibility for the output of others.

Certificate IV

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and competencies would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance are involved when organising activities of self and others as well as contributing to technical solutions of a non-routine or contingency nature.

Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop new criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills. Applications involve responsibility for, and limited organisation of, others.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate understanding of a broad knowledge base incorporating some theoretical concepts
- apply solutions to a defined range of unpredictable problems
- identify and apply skill and knowledge areas to a wide variety of contexts, with depth in some areas
- identify, analyse and evaluate information from a variety of sources
- take responsibility for own outputs in relation to specified quality standards
- take limited responsibility for the quantity and quality of the output of others.

Diploma

Characteristics of Learning Outcomes

Breadth, depth and complexity covering planning and initiation of alternative approaches to skills or knowledge applications across a broad range of technical and/or management requirements, evaluation and co-ordination.

The self directed application of knowledge and skills, with substantial depth in some areas where judgment is required in planning and selecting appropriate equipment, services and techniques for self and others.

Applications involve participation in development of strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participation in teams including teams concerned with planning and evaluation functions. Group or team co-ordination may be involved.

The degree of emphasis on breadth as against depth of knowledge and skills may vary between qualifications granted at this level.

Distinguishing Features of Learning Outcomes

Do the competencies or learning outcomes enable an individual with this qualification to:

- demonstrate understanding of a broad knowledge base incorporating theoretical concepts, with substantial depth in some areas
- analyse and plan approaches to technical problems or management requirements
- transfer and apply theoretical concepts and/or technical or creative skills to a range of situations
- evaluate information, using it to forecast for planning or research purposes
- take responsibility for own outputs in relation to broad quantity and quality parameters
- take some responsibility for the achievement of group outcomes.

Advanced Diploma

Characteristics of Learning Outcomes

Breadth, depth and complexity involving analysis, design, planning, execution and evaluation across a range of technical and/or management functions including development of new criteria or applications or knowledge or procedures.

The application of a significant range of fundamental principles and complex techniques across a wide and often unpredictable variety of contexts in relation to either varied or highly specific functions. Contribution to the development of a broad plan, budget or strategy is involved and accountability and responsibility for self and others in achieving the outcomes is involved.

Applications involve significant judgement in planning, design, technical or leadership/guidance functions related to products, services, operations or procedures.

The degree of emphasis on breadth as against depth of knowledge and skills may vary between qualifications granted at this level.

Distinguishing Features of Learning Outcomes

Do the competencies or learning outcomes enable an individual with this qualification to:

- demonstrate understanding of specialised knowledge with depth in some areas
- analyse, diagnose, design and execute judgements across a broad range of technical or management functions
- generate ideas through the analysis of information and concepts at an abstract level
- demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills
- demonstrate accountability for personal outputs within broad parameters
- demonstrate accountability for personal and group outcomes within broad parameters.

Vocational Graduate Certificate

Characteristics of competencies or learning outcomes

- The self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Substantial breadth and complexity involving the initiation, analysis, design, planning, execution and evaluation of technical and management functions in highly varied and highly specialised contexts.
- Applications involve making significant, high-level, independent judgements in major broad or planning, design, operational, technical and management functions in highly varied and specialised contexts. They may include responsibility and broad ranging accountability for the structure, management and output of the work or functions of others.
- The degree of emphasis on breadth, as opposed to depth, of knowledge and skills may vary between qualifications granted at this level.

Distinguishing features of learning outcomes

- Demonstrate the self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Initiate, analyse, design, plan, execute and evaluate major broad or technical and management functions in highly varied and highly specialised contexts.
- Generate and evaluate ideas through the analysis of information and concepts at an abstract level.
- Demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills in complex contexts.
- Demonstrate responsibility and broad-ranging accountability for the structure, management and output of the work or functions of others.

Vocational Graduate Diploma

Characteristics of competencies or learning outcomes

- The self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Substantial breadth, depth and complexity involving the initiation, analysis, design, planning, execution and evaluation of major functions, both broad and highly specialised, in highly varied and highly specialised contexts.
- Further specialisation within a systematic and coherent body of knowledge.
- Applications involve making high-level, fully independent, complex judgements in broad planning, design, operational, technical and management functions in highly varied and highly specialised contexts. They may include full responsibility and accountability for all aspects of work and functions of others, including planning, budgeting and strategy development.
- The degree of emphasis on breadth, as opposed to depth, of knowledge and skills may vary between qualifications granted at this level.

Distinguishing features of learning outcomes

- Demonstrate the self-directed development and achievement of broad and highly specialised areas of knowledge and skills, building on prior knowledge and skills.
- Initiate, analyse, design, plan, execute and evaluate major functions, both broad and within highly varied and highly specialised contexts.
- Generate and evaluate complex ideas through the analysis of information and concepts at an abstract level.
- Demonstrate an expert command of wide-ranging, highly specialised, technical, creative or conceptual skills in complex and highly specialised or varied contexts.
- Demonstrate full responsibility and accountability for personal outputs.
- Demonstrate full responsibility and accountability for all aspects of the work or functions of others, including planning, budgeting and strategy.
-

Qualification Pathways

Qualifications and Packaging Rules

There are 26 Qualifications in FDF10 Version 4. Refer to each individual Qualification for details of its Packaging Rules.

Qualification Pathways

The following pathways charts are provided to show the types of pathways into and from Qualifications that are possible with this Training Package. For more information about Qualifications and pathways contact AgriFood Skills Australia.

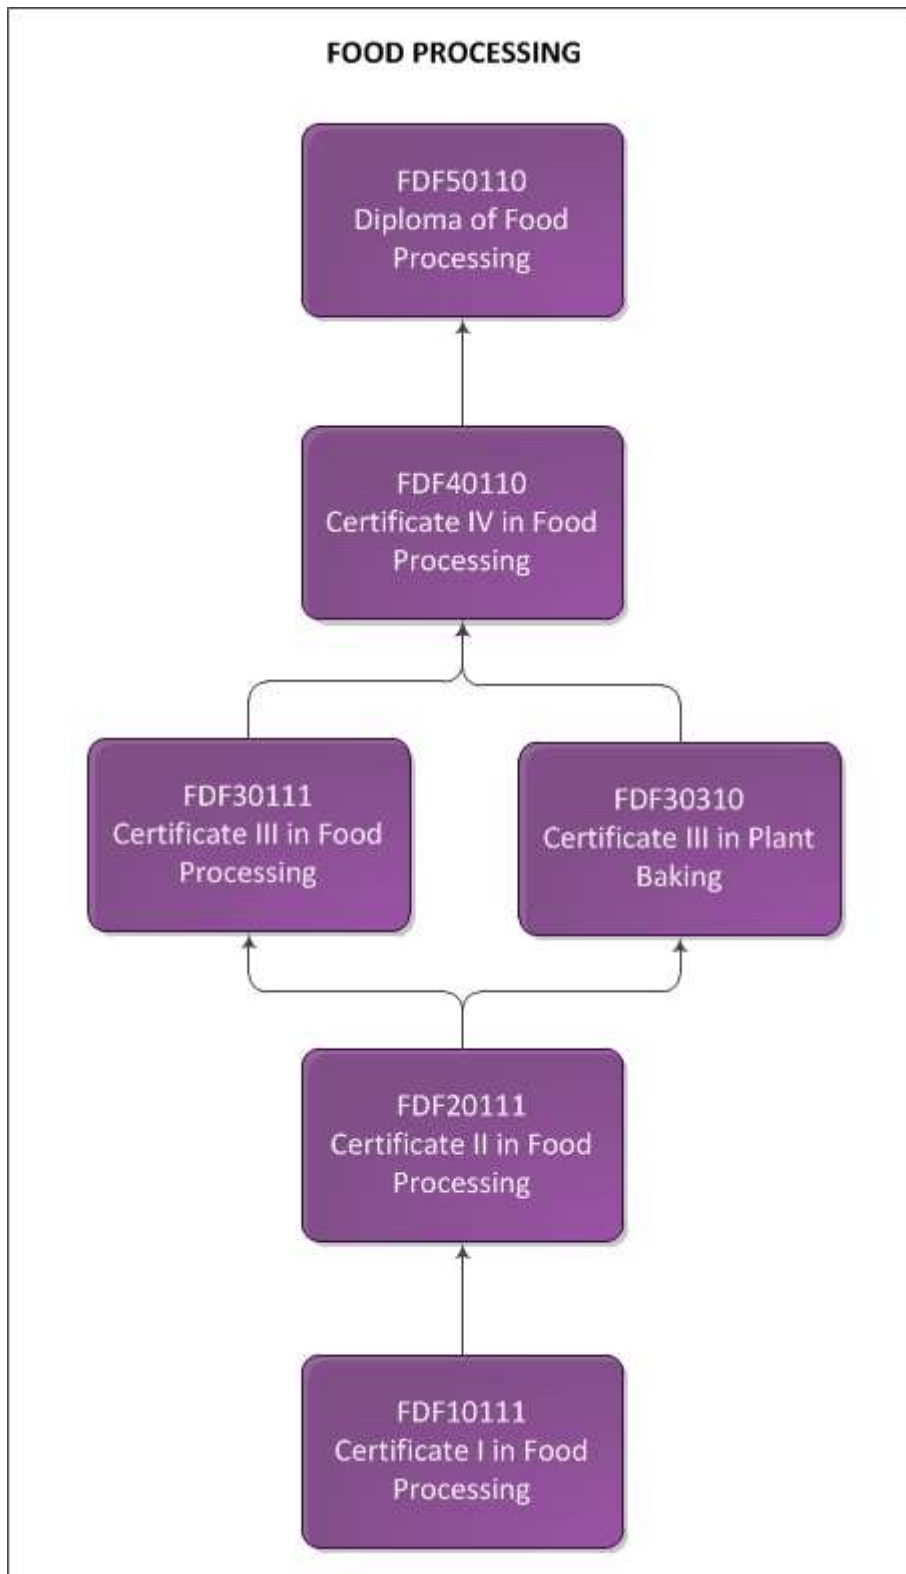

FDF10 Version 4 Qualification Pathways

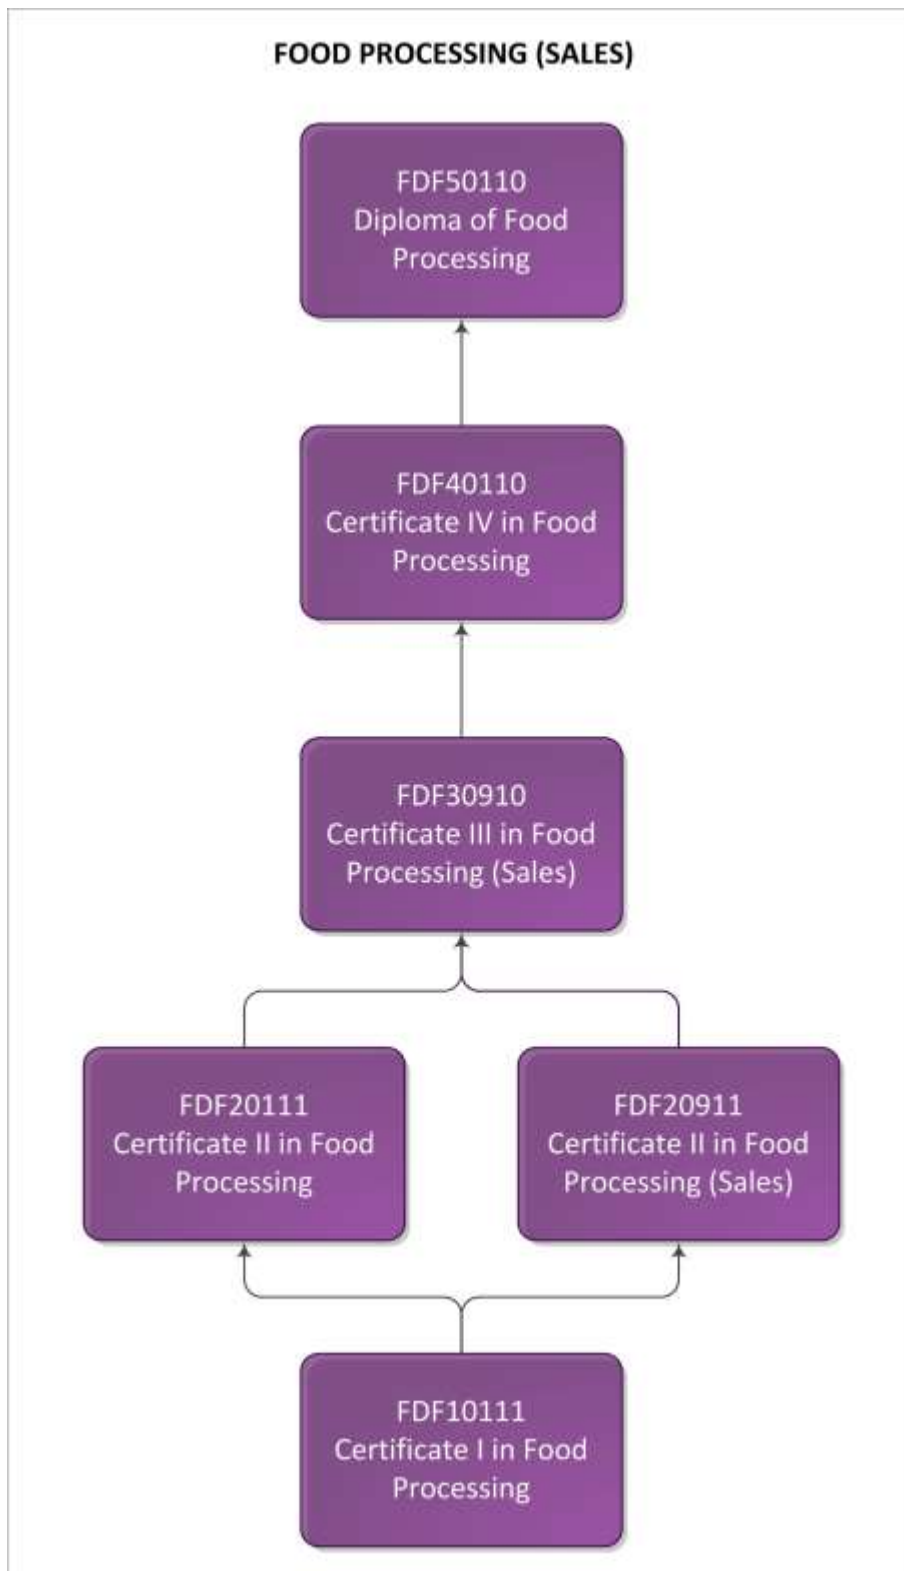

All Qualifications within the FDF10 Version 4 Food Processing Training Package can be accessed through direct entry. Packaging rules allow for key food processing operational units to be selected from lower levels, in order to ensure that all outcomes include fundamental skill and knowledge required by the food processing industry. In addition, recognition can be awarded for units achieved in lower level Qualifications, in order to facilitate a cumulative building of skills as the trainee moves from one level to another.

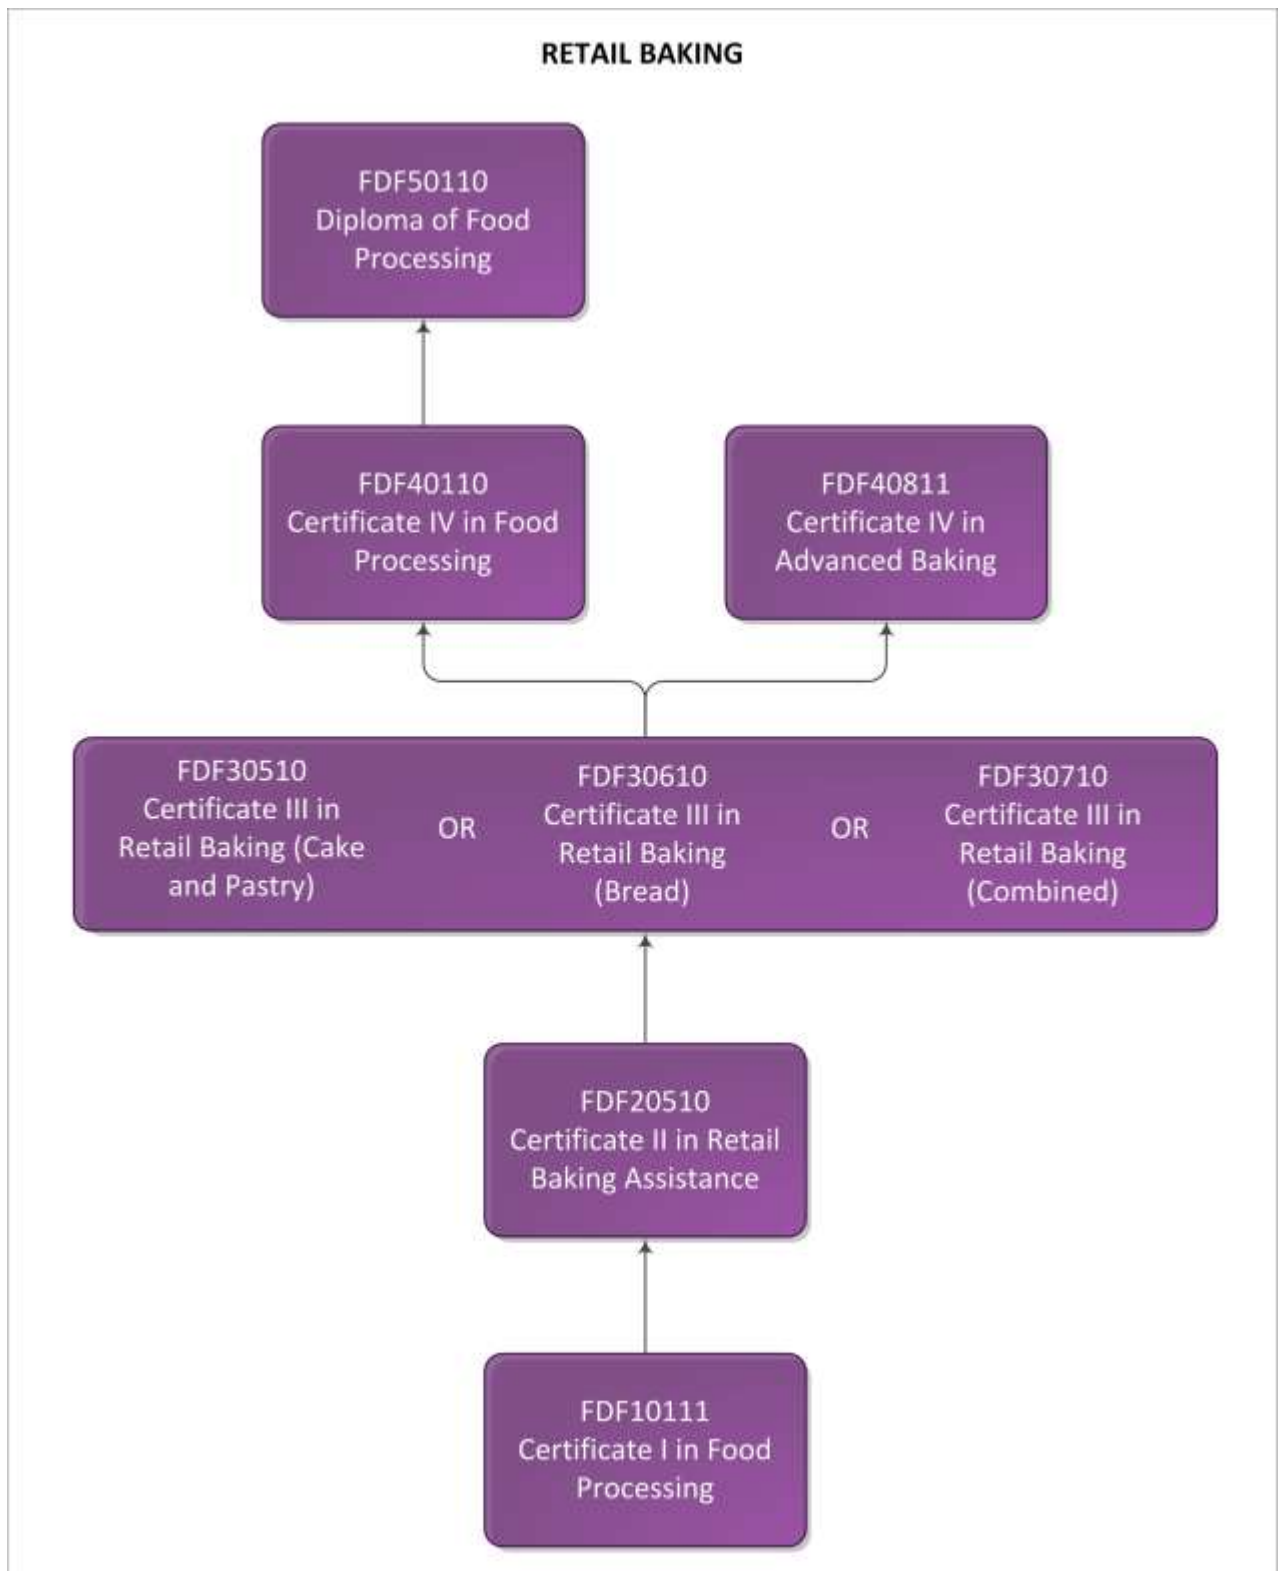

Many of the Qualifications access a common bank of elective units. This also provides maximum flexibility for those wanting to move from one area of specialisation to another with a minimum requirement for new specialist skills.

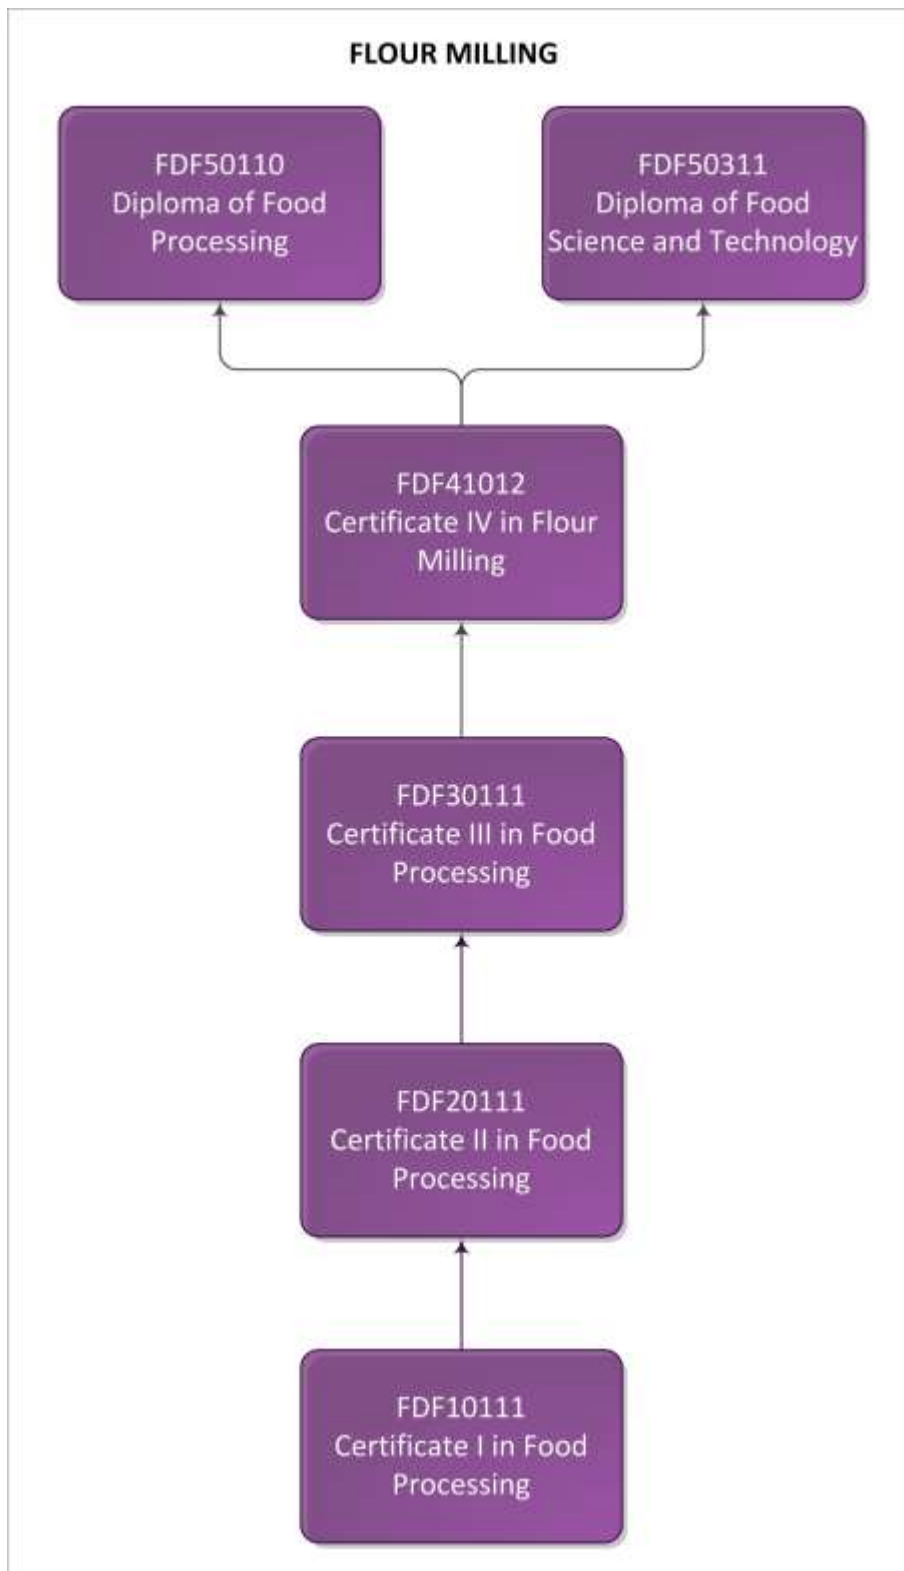

The units of competency in this Training Package may be attained in a number of ways including through:

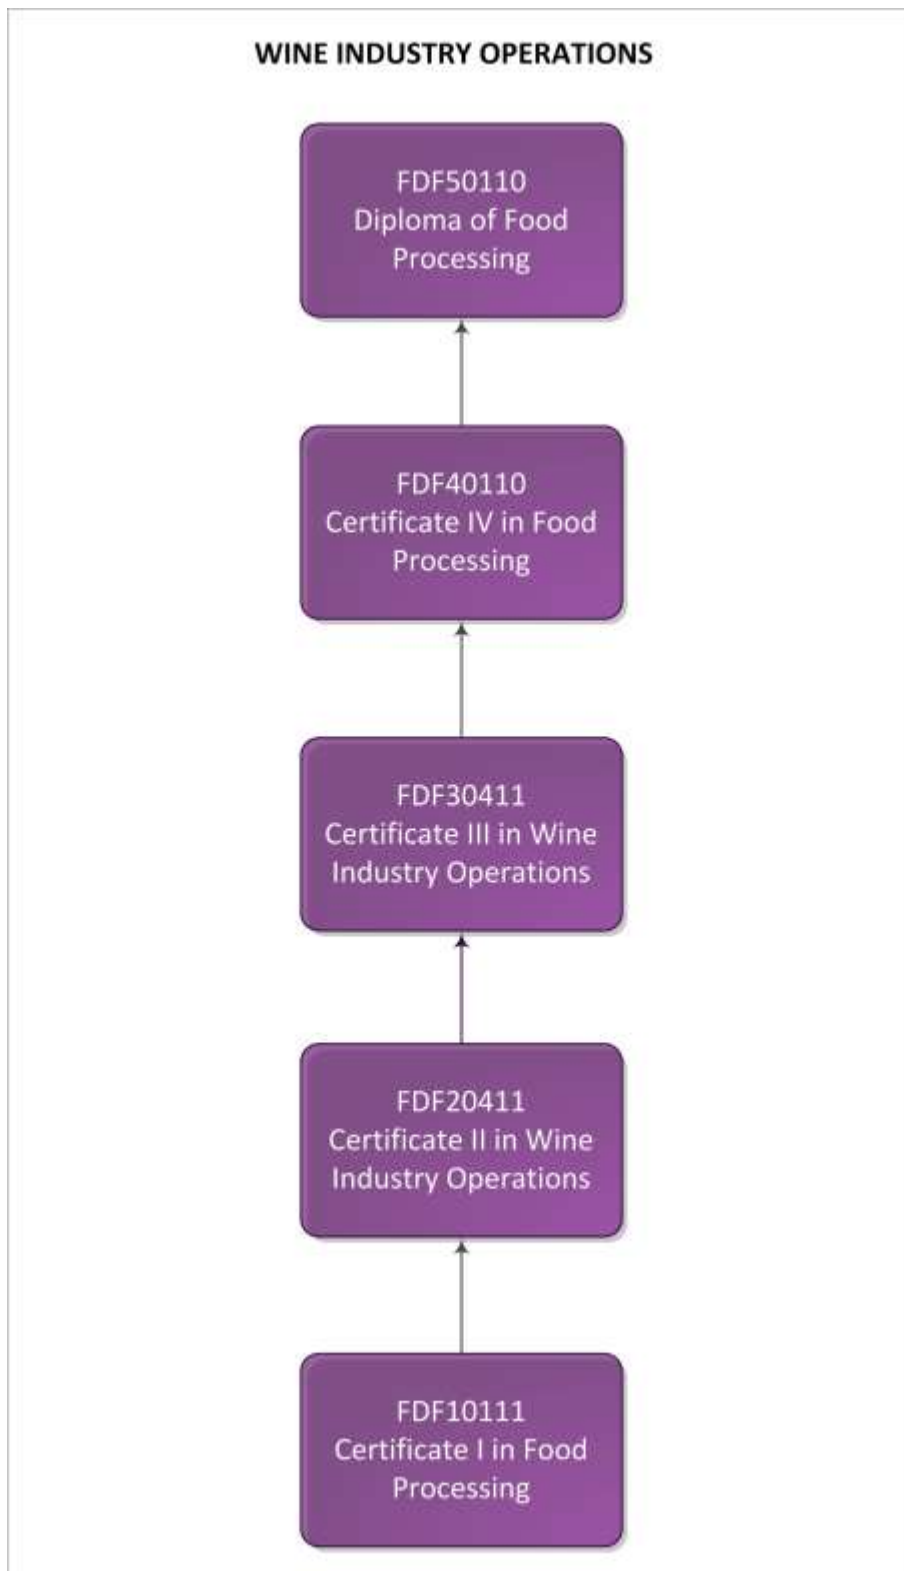

- formal or informal education and training
- experiences in the workplace
- general life experience
- any combination of the above.
- Assessment under this Training Package leading to an AQF Qualification or Statement of Attainment may follow a learning and assessment pathway, an assessment-only or recognition pathway, or a combination of the two.

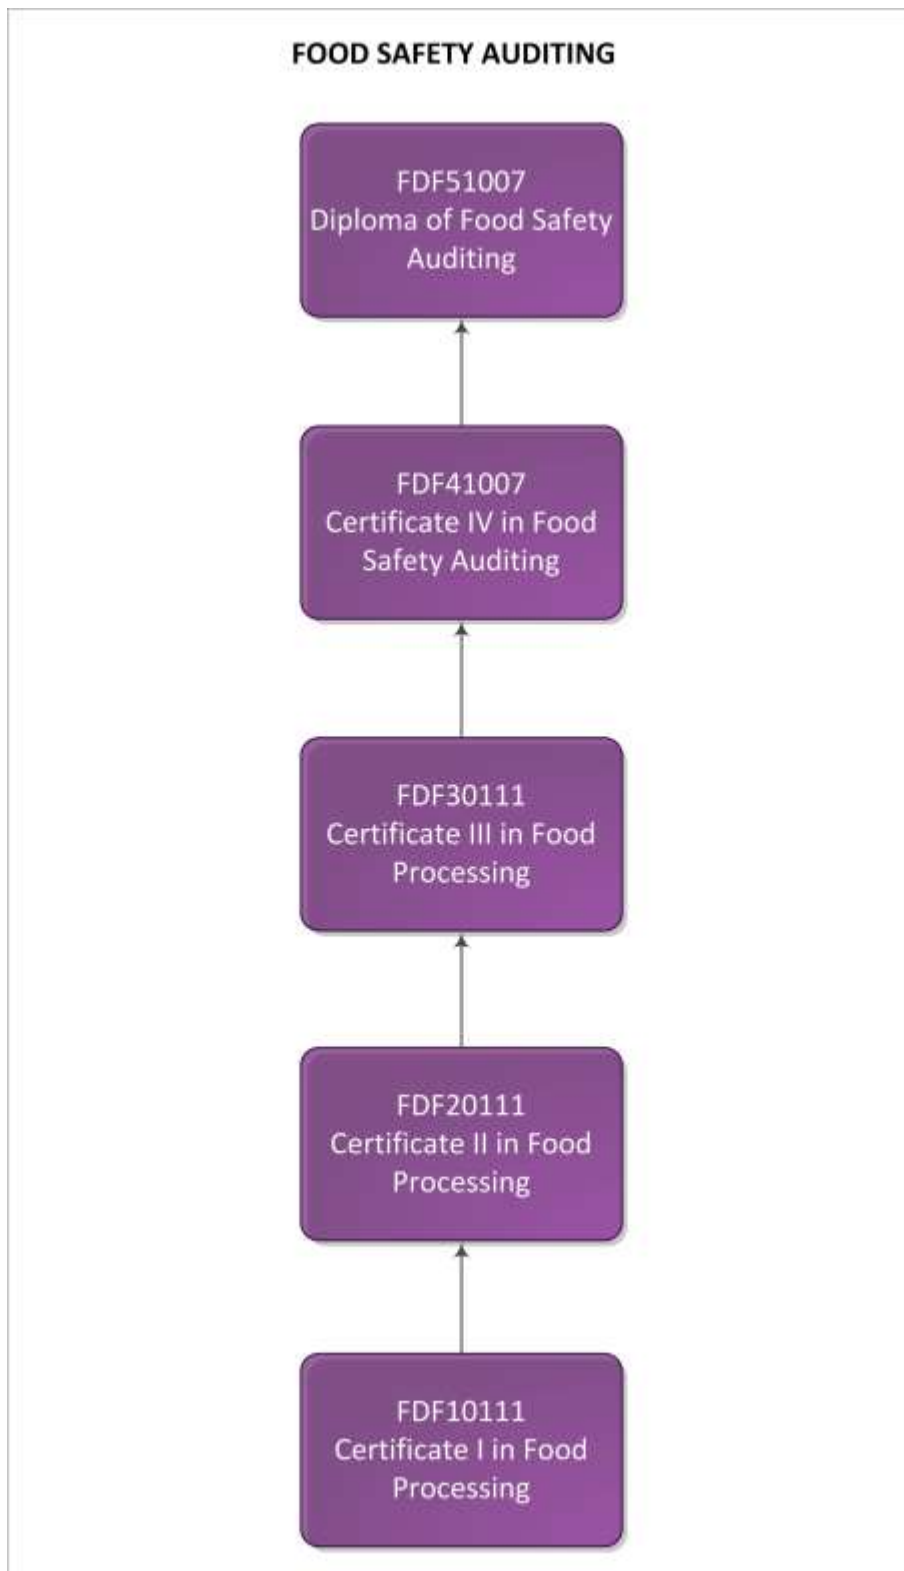

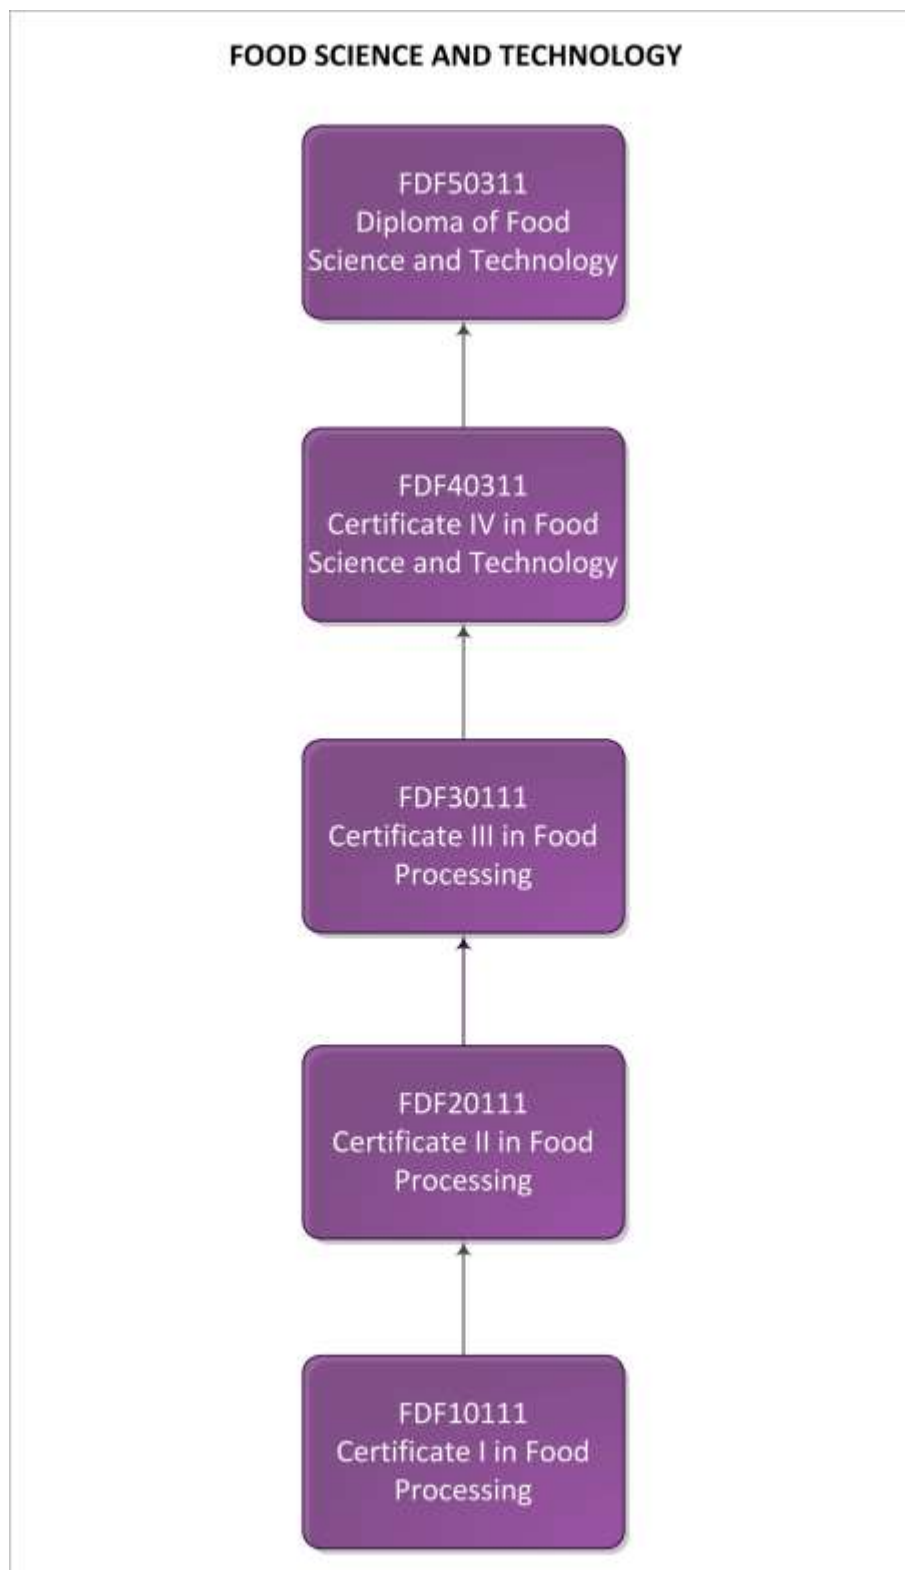

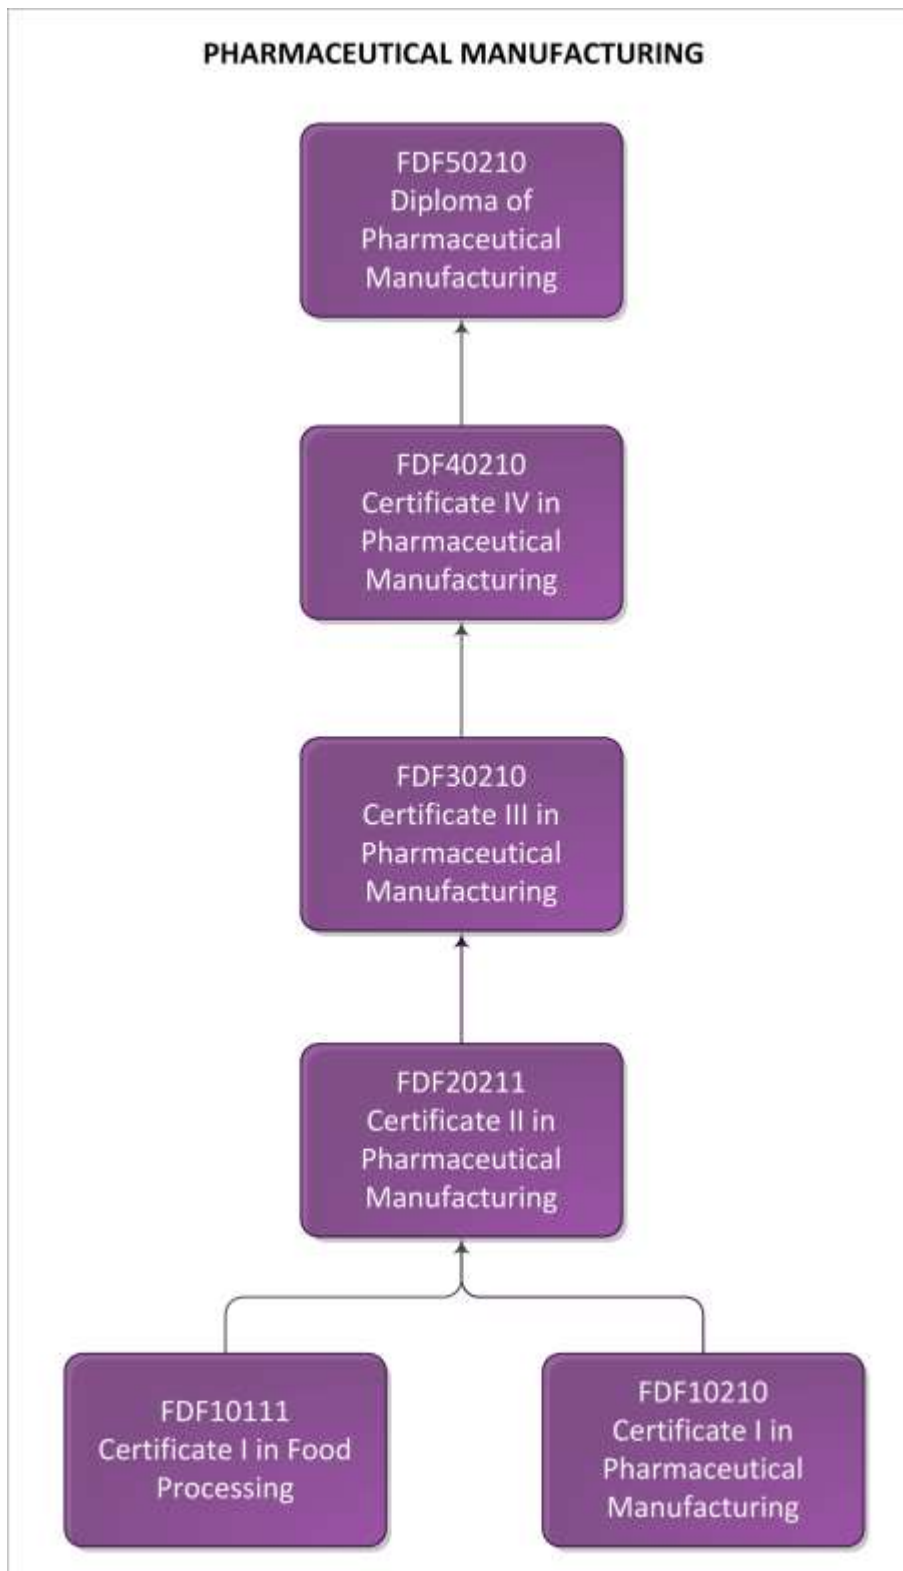

Australian apprenticeship arrangements

All Qualifications within the Training Package are suitable for Australian Apprenticeship pathways.

VET in schools delivery

These Qualifications have the potential to be used as a part of VET in Schools programs. This is conditional on local parties collaborating to agree on delivery, assessment and infrastructure arrangements.

Skill Sets in this Training Package

Skill Sets

Definition

Skill sets are defined as single units of competency, or combinations of units of competency from an endorsed Training Package, which link to a licence or regulatory requirement, or defined industry need.

Wording on Statements of Attainment

Skill sets are a way of publicly identifying logical groupings of units of competency which meet an identified need or industry outcome. Skill sets are not qualifications.

Where skill sets are identified in a Training Package, the Statement of Attainment can set out the competencies a person has achieved in a way that is consistent and clear for employers and others. This is done by including the wording "these competencies meet [insert skill set title or identified industry area] need" on the Statement of Attainment. This wording applies only to skill sets that are formally identified as such in the endorsed Training Package. See the 2010 edition of the AQF Implementation Handbook for advice on wording on Statements of Attainment.

http://www.aqf.edu.au/Portals/0/Documents/Handbook/AQF_Handbook_07.pdf

Skill Sets in this Training Package

There are twenty-four Skill Sets within the FDF10 Food Processing Training Package. These are:

- Cellar Door Sales Induction Skill Set
- Cellar Hand Induction Skill Set
- Chemical Handling Certification Skill Set
- Confined Space Skill Set
- Distillation Operations Skill Set
- Evaporator Station Operator Skill Set
- Food Safety Skill Set

Skill Sets in this Training Package

- Forklift Operations Skill Set
- Fugal Operator Skill Set
- Hand Pruning Induction Skill Set
- Irrigation Skill Set
- Loco Driver Skill Set
- Manual Handling Skill Set
- Mechanical Harvesting for Seasonal Workers Skill Set
- Platform Operator Skill Set
- Responsible Service of Alcohol Skill Set
- Risk Management Skill Set
- Seasonal Nursery Induction Skill Set
- Sugar Boiler Skill Set
- Trellis Management Skill Set
- Vintage Laboratory Operations Skill Set
- Warehouse Induction Skill Set
- Water Tender Skill Set
- Wine Evaluation Skill Set

Assessment Guidelines

Introduction

These Assessment Guidelines provide the endorsed framework for assessment of units of competency in this Training Package. They are designed to ensure that assessment is consistent with the *Australian Quality Training Framework (AQTF) Essential Standards for Initial and Continuing Registration*. Assessments against the units of competency in this Training Package must be carried out in accordance with these Assessment Guidelines.

Assessment System Overview

This section provides an overview of the requirements for assessment when using this Training Package, including a summary of the AQTF requirements; licensing and registration requirements; and assessment pathways.

Quality assessment underpins the credibility of the vocational education and training sector. The Assessment Guidelines of a Training Package are an important tool in supporting quality assessment.

Assessment within the National Skills Framework is the process of collecting evidence and making judgements about whether competency has been achieved to confirm whether an individual can perform to the standards expected in the workplace, as expressed in the relevant endorsed unit of competency.

Assessment must be carried out in accordance with the:

- benchmarks for assessment
- specific industry requirements
- principles of assessment
- rules of evidence
- assessment requirements set out in the AQTF

Benchmarks for Assessment

The endorsed units of competency in this Training Package are the benchmarks for assessment. As such, they provide the basis for nationally recognised Australian Qualifications Framework (AQF) qualifications and Statements of Attainment issued by Registered Training Organisations (RTOs).

Principles of Assessment

All assessments carried out by RTOs are required to demonstrate compliance with the principles of assessment:

- validity
- reliability
- flexibility
- fairness
- sufficiency

These principles must be addressed in the:

- design, establishment and management of the assessment system for this Training Package
- development of assessment tools, and
- the conduct of assessment.

Validity

Assessment is valid when the process is sound and assesses what it claims to assess. Validity requires that:

- (a) assessment against the units of competency must cover the broad range of skills and knowledge that are essential to competent performance
- (b) assessment of knowledge and skills must be integrated with their practical application
- (c) judgement of competence must be based on sufficient evidence (that is, evidence gathered on a number of occasions and in a range of contexts using different assessment methods). The specific evidence requirements of each unit of competency provide advice on sufficiency

Reliability

Reliability refers to the degree to which evidence presented for assessment is consistently interpreted and results in consistent assessment outcomes. Reliability requires the assessor to have the required competencies in assessment and relevant vocational competencies (or to assess in conjunction with someone who has the vocational competencies). It can only be achieved when assessors share a common interpretation of the assessment requirements of the unit(s) being assessed.

Flexibility

To be flexible, assessment should reflect the candidate's needs; provide for recognition of competencies no matter how, where or when they have been acquired; draw on a range of methods appropriate to the context, competency and the candidate; and support continuous competency development.

Fairness

Fairness in assessment requires consideration of the individual candidate's needs and characteristics, and any reasonable adjustments that need to be applied to take account of them. It requires clear communication between the assessor and the candidate to ensure that the candidate is fully informed about, understands and is able to participate in, the assessment process, and agrees that the process is appropriate. It also includes an opportunity for the person being assessed to challenge the result of the assessment and to be reassessed if necessary.

Sufficiency

Sufficiency relates to the quality and quantity of evidence assessed. It requires collection of enough *appropriate* evidence to ensure that all aspects of competency have been satisfied and that competency can be demonstrated repeatedly. Supplementary sources of evidence may be necessary. The specific evidence requirements of each unit of competency provide advice on sufficiency. Sufficiency is also one of the rules of evidence.

Rules of Evidence

The rules of evidence guide the collection of evidence that address the principles of validity and reliability, guiding the collection of evidence to ensure that it is valid, sufficient, current and authentic.

Valid

Valid evidence must relate directly to the requirements of the unit of competency. In ensuring evidence is valid, assessors must ensure that the evidence collected supports demonstration of the outcomes and performance requirements of the unit of competency together with the knowledge and skills necessary for competent performance. Valid evidence must encapsulate the breadth and depth of the unit of competency, which will necessitate using a number of different assessment methods.

Sufficient

Sufficiency relates to the quality and quantity of evidence assessed. It requires collection of enough appropriate evidence to ensure that all aspects of competency have been satisfied and that competency can be demonstrated repeatedly. Supplementary sources of evidence may be necessary. The specific evidence requirements of each unit of competency provide advice on sufficiency.

Current

In assessment, currency relates to the age of the evidence presented by a candidate to demonstrate that they are still competent. Competency requires demonstration of current performance, so the evidence collected must be from either the present or the very recent past.

Authentic

To accept evidence as authentic, an assessor must be assured that the evidence presented for assessment is the candidate's own work.

Assessment Requirements of the Australian Quality Training Framework

Assessment leading to nationally recognised AQF qualifications and Statements of Attainment in the vocational education and training sector must meet the requirements of the AQTF as expressed in the AQTF 2010 *Essential Standards for Registration*.

The AQTF 2010 *Essential Standards for Initial and Continuing Registration* can be downloaded from <www.training.com.au>.

The following points summarise the assessment requirements.

Registration of Training Organisations

Assessment must be conducted by, or on behalf of, an RTO formally registered by a State or Territory Registering Body in accordance with the AQTF. The RTO must have the specific units of competency and/or AQF qualifications on its scope of registration.

Quality Training and Assessment

Each RTO must provide quality training and assessment across all its operations. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*, Standard 1.

Assessor Competency Requirements

Each person involved in training and assessment must be competent for the functions they perform. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*, Standard 1 for assessor (and trainer) competency requirements. See also the AQTF 2010 *Users' Guide to the Essential Standards for Registration – Appendix 2*.

Assessment Requirements

The RTOs assessments, including RPL, must meet the requirements of the relevant endorsed Training Package. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Assessment Strategies

Each RTO must have strategies for training and assessment that meet the requirements of the relevant Training Package or accredited course and are developed in consultation with industry stakeholders. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

National Recognition

Each RTO must recognise the AQF qualifications and Statements of Attainment issued by any other RTO. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Access and Equity and Client Outcomes

Each RTO must adhere to the principles of access and equity and maximise outcomes for its clients. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Monitoring Assessments

Training and/or assessment provided on behalf of the RTO must be monitored to ensure that it is in accordance with all aspects of the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Recording Assessment Outcomes

Each RTO must manage records to ensure their accuracy and integrity. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Issuing AQF qualifications and Statement of Attainment

Each RTO must issue AQF qualifications and Statements of Attainment that meet the requirements of the current *AQF Implementation Handbook* and the endorsed Training Packages within the scope of its registration. An AQF qualification is issued once the full requirements for a qualification, as specified in the nationally endorsed Training Package are met. A Statement of Attainment is issued when an individual has completed one or more units of competency from nationally recognised qualification(s)/courses(s). See the AQTF and the edition of the *AQF Implementation Handbook*—available on the AQF Council website <www.aqf.edu.au>

Licensing/Registration Requirements

This section provides information on licensing/registration requirements for this Training Package, with the following important disclaimer.

Licensing and registration requirements that apply to specific industries, and vocational education and training, vary between each State and Territory, and can regularly change. The developers of this Training Package consider that the licensing/registration requirements described in this section apply to RTOs, assessors or candidates with respect to this Training Package. While reasonable care has been taken in its preparation, the developers of this Training Package and the Department cannot guarantee that the list is definitive or accurate at the time of reading; the information in this section is provided in good faith on that basis.

Contact the relevant State or Territory Department(s) to check if the licensing/registration requirements described below still apply, and to check if there are any others with which you must comply. For further information contact AgriFood Skills Australia at www.agrifoodskills.net.au.

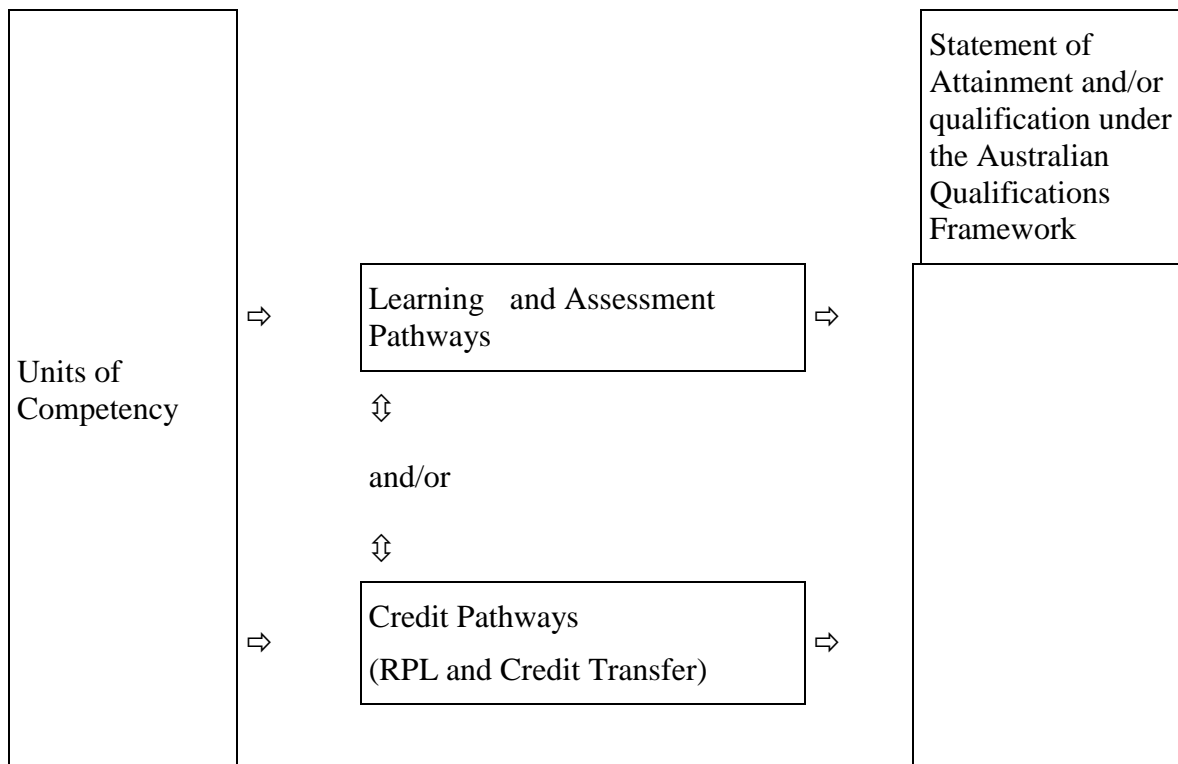

There are no qualifications in FDF10v3 linked to occupational licensing. However some FDF10v3 units are designed to support food safety legislation and regulations. These apply in every State and Territory with premises and enterprises being licensed. The food safety licensing applies to both food production (covered by FDF10v3) and food serving (can be covered by FDF10v3 as well as other training packages). Completion of relevant FDF10v3 food safety units can generally be used as evidence of appropriate training of staff in food safety. In a similar manner food safety auditing units of competency can contribute recognition by regulators as a food safety auditor in conjunction with other requirements such as relevant industry experience.

Pathways

The competencies in this Training Package may be attained in a number of ways including through:

- formal or informal education and training
- experiences in the workplace
- general life experience, and/or
- any combination of the above.

Assessment under this Training Package leading to an AQF qualification or Statement of Attainment may follow a learning and assessment pathway, or a recognition pathway, or a combination of the two as illustrated in the following diagram.

Each of these assessment pathways leads to full recognition of competencies held – the critical issue is that the candidate is competent, not how the competency was acquired. Assessment, by any pathway, must comply with the assessment requirements set out in the Assessment Guidelines of the Training Package, the AQTF and, where relevant, the Australian Qualifications Framework.

Learning and Assessment Pathways

Usually, learning and assessment are integrated, with evidence being collected and feedback provided to the candidate at anytime throughout the learning and assessment process. Learning and assessment pathways may include structured programs in a variety of contexts using a range of strategies to meet different learner needs. Structured learning and assessment programs could be: group-based, work-based, project-based, self-paced, action learning-based; conducted by distance or e-learning; and/or involve practice and experience in the workplace.

Learning and assessment pathways to suit Australian Apprenticeships have a mix of formal structured training and structured workplace experience with formative assessment activities through which candidates can acquire and demonstrate skills and knowledge from the relevant units of competency.

Credit Pathways

Credit is the value assigned for the recognition of equivalence in content between different types of learning and/or qualifications which reduces the volume of learning required to achieve a qualification.

Credit arrangements must be offered by all RTOs that offer Training Package qualifications. Each RTO must have a systematic institutional approach with clear, accessible and transparent policies and procedures.

Competencies already held by individuals can be formally assessed against the units of competency in this Training Package, and should be recognised regardless of how, when or where they were acquired, provided that the learning is relevant to the unit of competency outcomes.

Recognition of Prior Learning

Recognition of Prior Learning (RPL) is an assessment process which determines the credit outcomes of an individual application for credit.

The availability of Recognition of Prior Learning (RPL) provides all potential learners with access to credit opportunities.

The recognition of prior learning pathway is appropriate for candidates who have previously attained skills and knowledge and who, when enrolling in qualifications, seek to shorten the duration of their training and either continue or commence working. This may include the following groups of people:

- existing workers;
- individuals with overseas qualifications;
- recent migrants with established work histories;

- people returning to the workplace; and
- people with disabilities or injuries requiring a change in career.
-

As with all assessment, RPL assessment should be undertaken by academic or teaching staff with expertise in the subject, content of skills area, as well as knowledge of and expertise in RPL assessment policies and procedures.

Assessment methods used for RPL should provide a range of ways for individuals to demonstrate that they have met the required outcomes and can be granted credit. These might include:

- questioning (oral or written)
- consideration of a portfolio and review of contents
- consideration of third party reports and/or other documentation such as documentation such as articles, reports, project material, papers, testimonials or other products prepared by the RPL applicant that relate to the learning outcomes of the relevant qualification component
- mapping of learning outcomes from prior formal or non-formal learning to the relevant qualification components
- observation of performance, and
- participation in structured assessment activities the individual would normally be required to undertake if they were enrolled in the qualification component/s.

In a Recognition of Prior Learning (RPL) pathway, the candidate provides current, quality evidence of their competency against the relevant unit of competency. This process may be directed by the candidate and verified by the assessor. Where the outcomes of this process indicate that the candidate is competent, structured training is not required. The RPL requirements of the AQTF must be met.

As with all assessment, the assessor must be confident that the evidence indicates that the candidate is currently competent against the endorsed unit of competency. This evidence may take a variety of forms and might include certification, references from past employers, testimonials from clients, work samples and/or observation of the candidate. The onus is on candidates to provide sufficient evidence to satisfy assessors that they currently hold the relevant competencies. In judging evidence, the assessor must ensure that the evidence of prior learning is:

- authentic (the candidate's own work);
- valid (directly related to the current version of the relevant endorsed unit of competency);
- reliable (shows that the candidate consistently meets the endorsed unit of competency);
- current (reflects the candidate's current capacity to perform the aspect of the work covered by the endorsed unit of competency); and
- sufficient (covers the full range of elements in the relevant unit of competency and addresses the four dimensions of competency, namely task skills, task management skills, contingency management skills, and job/role environment skills).

Credit Transfer

Credit transfer is a process which provides learners with agreed and consistent credit outcomes based on equivalences in content between matched qualifications.

This process involves education institutions:

- mapping, comparing and evaluating the extent to which the defined *learning outcomes and assessment requirements* of the individual *components of one qualification* are equivalent to the learning outcomes and assessment requirements of the individual components of another qualification
- making an educational judgment of the credit outcomes to be assigned between the matched components of the two qualifications
- setting out the agreed credit outcomes in a documented arrangement or agreement, and
- publicising the arrangement/agreement and credit available.

Combination of Pathways

Credit may be awarded on the basis of a combination of credit transfer plus an individual RPL assessment for additional learning. Once credit has been awarded on the basis of RPL, subsequent credit transfer based on these learning outcomes should not include revisiting the RPL assessment but should be based on credit transfer or articulation or other arrangements between providers.

Where candidates for assessment have gained competencies through work and life experience and gaps in their competence are identified, or where they require training in new areas, a combination of pathways may be appropriate.

In such situations, the candidate may undertake an initial assessment to determine their current competency. Once current competency is identified, a structured learning and assessment program ensures that the candidate acquires the required additional competencies identified as gaps.

Assessor Requirements

This section identifies the specific requirements on the vocational competence and experience for assessors, to ensure that they meet the needs of industry and their obligations under AQTF, and clarifies how others may contribute to the assessment process where one person alone does not hold all the required competencies.

Assessor Competencies

The AQTF specifies mandatory competency requirements for assessors. For information, Element 1.4 from the AQTF 2007 *Essential Standards for Registration* follows:

- 1.4 Training and assessment are conducted by trainers and assessors who:
- a) have the necessary training and assessment competencies as determined by the National Quality Council or its successors, and
 - b) have the relevant vocational competencies at least to the level being delivered or assessed, and
 - c) can demonstrate current industry skills directly relevant to the training/assessment being undertaken, and
 - d) continue to develop their Vocational Education and Training (VET) knowledge and

skills as well as their industry currency and trainer/assessor competence.

* See AQTF 2010 *Users' Guide to the Essential Standards for Registration* – Appendix 2

Designing Assessment Tools

This section provides an overview on the use and development of assessment tools.

Use of Assessment Tools

Assessment tools provide a means of collecting the evidence that assessors use in making judgements about whether candidates have achieved competency.

There is no set format or process for the design, production or development of assessment tools. Assessors may use prepared assessment tools, such as those specifically developed to support this Training Package, or they may develop their own.

Using Prepared Assessment Tools

If using prepared assessment tools, assessors should ensure these relate to the current version of the relevant unit of competency. The current unit of competency can be checked on the National Register <www.ntis.gov.au>.

Developing Assessment Tools

When developing their own assessment tools, assessors must ensure that the tools:

- are benchmarked against the relevant unit or units of competency;
- are reviewed as part of the validation of assessment strategies required under the AQTF; and
- meet the assessment requirements expressed in the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

A key reference for assessors developing assessment tools is TAE10 Training and Education Training Package.

Language, Literacy and Numeracy

The design of assessment tools must reflect the language, literacy and numeracy competencies required for the performance of a task in the workplace and not exceed these expectations.

Conducting Assessment

This section details the mandatory assessment requirements and provides information on equity in assessment including reasonable adjustment.

Mandatory Assessment Requirements

Assessments must meet the criteria set out in the AQTF 2010 *Essential Standards for Initial and Continuing Registration*. For information, the mandatory assessment requirements from Standard 1 from the AQTF 2010 *Essential Standards for Initial and Continuing Registration* are as follows:

1.5 Assessment, including Recognition of Prior Learning (RPL):

- a) meets the requirements of the relevant Training Package or accredited course
- b) is conducted in accordance with the principles of assessment and the rules of evidence
- c) meets workplace and, where relevant, regulatory requirements
- d) is systematically validated.

Assessment of Employability Skills

Employability Skills are integral to workplace competency. As such, they must be considered in the design, customisation, delivery and assessment of vocational education and training programs in an integrated and holistic way, as represented diagrammatically below.

Employability Skills are embedded within each unit of competency, and an Employability Skills Summary is available for each qualification. Training providers must use Employability Skills information in order to design valid and reliable training and assessment strategies. This analysis could include:

- reviewing units of competency to locate relevant Employability Skills and determine how they are applied within the unit
- analysing the Employability Skills Summary for the qualification in which the unit or units are packaged to help clarify relevant industry and workplace contexts and the application of Employability Skills at that qualification outcome
- designing training and assessment to address Employability Skills requirements.

The National Quality Council has endorsed a model for assessing and reporting Employability Skills, which contains further suggestions about good practice strategies in teaching, assessing, learning and reporting Employability Skills. The model is available from <<http://www.training.com.au/>>.

The endorsed approach includes learners downloading qualification specific Employability Skills Summaries for Training Package qualifications from an online repository at <<http://employabilityskills.training.com.au>>

For more information on Employability Skills in

AgriFood Skills Australia Training Packages go to the AgriFood Skills Australian website at www.agrifoodskills.net.au.

Employability Skills are reported on each qualification using the following statement on the qualification testamur: "A summary of the Employability Skills developed through this qualification can be downloaded from <http://employabilityskills.training.com.au> "

Access and Equity

An individual's access to the assessment process should not be adversely affected by restrictions placed on the location or context of assessment beyond the requirements specified in this Training Package: training and assessment must be bias-free.

Under the rules for their development, Training Packages must reflect and cater for the increasing diversity of Australia's VET clients and Australia's current and future workforce. The flexibilities offered by Training Packages should enhance opportunities and potential outcomes for all people so that we can all benefit from a wider national skills base and a shared contribution to Australia's economic development and social and cultural life.

Reasonable Adjustments

It is important that education providers take meaningful, transparent and reasonable steps to consult, consider and implement reasonable adjustments for students with disability.

Under the Disability Standards for Education 2005, education providers must make reasonable adjustments for people with disability to the maximum extent that those adjustments do not cause that provider unjustifiable hardship. While 'reasonable adjustment' and 'unjustifiable hardship' are different concepts and involve different considerations, they both seek to strike a balance between the interests of education providers and the interests of students with and without disability.

An adjustment is any measure or action that a student requires because of their disability, and which has the effect of assisting the student to access and participate in education and training on the same basis as students without a disability. An adjustment is reasonable if it achieves this purpose while taking into account factors such as the nature of the student's disability, the views of the student, the potential effect of the adjustment on the student and others who might be affected, and the costs and benefits of making the adjustment.

An education provider is also entitled to maintain the academic integrity of a course or program and to consider the requirements or components that are inherent or essential to its nature when assessing whether an adjustment is reasonable. There may be more than one adjustment that is reasonable in a given set of circumstances; education providers are required to make adjustments that are reasonable and that do not cause them unjustifiable hardship. The Training Package Guidelines provides more information on reasonable adjustment, including examples of adjustments. Go to <http://www.deewr.gov.au/tpdh/Pages/home.aspx>.

Further Sources of Information

The section provides a listing of useful contacts and resources to assist assessors in planning, designing, conducting and reviewing of assessments against this Training Package.

Assessment Resources

Registered training organisations (RTOs) are at the forefront of vocational education and training (VET) in Australia. They translate the needs of industry into relevant, quality, client-focussed training and assessment.

RTOs should strive for innovation in VET teaching and learning practices and develop highly flexible approaches to assessment which take cognisance of specific needs of learners, in order to improve delivery and outcomes of training.

Resources can be purchased or accessed from:

- TVET Australia – provides an integrated service to enable users of the national training system to identify and acquire training materials, identify copyright requirements and enter licenses for use of that material consistent with the scope and direction of the NQC.

Assessment Guidelines - Industry Contextualisation

Additional Advice for Assessment Design

RTOs need to take into account a range of considerations when designing assessment strategies. In particular, the majority of Units in the FDF10 Food Processing Training Package Version 3 have been written with a focus on a workplace assessment environment. Where this is obligatory it is identified in the Unit of Competency.

Wherever possible integrated (holistic) assessment is the preferred means of assessment. Holistic assessment should reflect the grouping of competencies as they would be demonstrated in an actual work role. The context of assessment is defined in each Unit of Competency.

The design of assessment needs to ensure that all aspects of competency are covered:

- task skills (performance of individual tasks)
- job/role environment skills (deals with the responsibilities and expectations of the workplace)
- relevant underpinning knowledge

and where qualification levels require:

- task management skills (managing a number of different tasks within the job)
- contingency management skills (responding to problems, breakdowns and changes in routine).

Assessors may exercise limited discretion in response to organisational or individual requirements, but any changes must not alter the meaning or integrity of the Unit of Competency. *Refer to the section on Competency Standards for more information.*

Evidence Gathering Methods

Evidence gathering methods must be gender and culturally-inclusive and take into account the language, literacy and numeracy skills of both candidate and assessor. Assessors may consider:

- incorporating a range of assessment techniques
- integrating the assessment of units related to the performance of 'whole of work' tasks, roles or functions
- using a holistic approach which combines knowledge, understanding, problem-solving, technical skills and applications to new situations into the assessment process
- assessing in the workplace (wherever possible), using familiar skills and materials
- eliminating any unnecessary reading or written assessment (if these skills are not required to do the job, they should not be part of the assessment)
- ensuring understanding of questions by rephrasing to clarify and using the language and terms of the job and the workplace
- encouraging the candidate to ask questions to clarify instructions
- providing clarification of purpose and process of assessment
- considering cultural and gender issues when setting up the assessment.
-

Workplace Assessment Considerations

Where assessment is occurring in the workplace, assessors should consult on the assessment process with the parties involved. Candidates should be briefed on the process of making judgements against the standards and made to feel as relaxed as possible.

The assessment should take place over a reasonable length of time so that the candidate has the opportunity to demonstrate work responsibility and contingency management. Third-party reports of workplace performance, if available, are helpful for this.

Consider the other staff in the workplace likely to be affected by the process. All staff directly or indirectly involved in the process should be briefed on the factors which will impact on them, such as duration or changes in work routine.

Ensure that assessment is as compatible as possible with the normal pattern of work and causes minimal disruption. Assessment resources for this Training Package should provide ways in which to address these matters.

Assessment in a Simulated Environment

Where assessment is occurring out of the workplace, it is important to ensure that:

- the assessment takes place in a situation as close as possible to workplace reality
- all aspects of competency are assessed
- the assessment takes place over a reasonable length of time so that the candidate has the opportunity to demonstrate work responsibility and contingency management (third-party reports of workplace performance, if available, are helpful for this)
- equipment, resources and documents used in assessment closely reflect workplace reality.

It is critical that the designer of the simulation is thoroughly familiar with the application of the competency and is experienced in current and relevant workplace practices. The simulation or assessment environment must provide opportunities to:

- demonstrate use of required equipment and other resources
- show the complexity of dealing with multiple tasks
- reflect time pressures and deadlines
- involve prioritising among competing tasks
- deal with customers/clients, including difficult ones
- work with others in a team
- communicate with diverse groups
- find, discuss and test solutions to problems
- explore food safety and hygiene issues
- explore health and safety issues
- answer practically-oriented, applied knowledge questions
- show the level of verbal and written expression sufficient for, but not exceeding, the work requirements.

Training and Assessment in Remote and Regional Areas

Training and assessing candidates in remote and regional areas present a range of challenges. These include:

- lack of numbers preventing the establishment of traditional class sizes
- physical remoteness of some communities, where access to training facilities is limited
- scarcity of trainers with the required industry experience
- scarcity of physical training resources (e.g. current and emerging technology).

Some options for overcoming these challenges include:

- partnerships between RTOs to establish classes, i.e. programs delivered on a regional rather than local basis
- delivering certain units by distance mode
- partnerships between industry and RTOs to share resources and personnel
- partnerships between schools and RTOs
- recruiting suitably qualified workplace supervisors to oversee instruction and assessment on the job
- travelling to remote workplaces to provide instruction and assessment
- use of technology (e.g. email, video demonstration, CDs and internet) and self-paced resources
- use of block release delivery methodology.

Training and Assessment for Schools

Implementation of FDF10 Food Processing Training Package Version 3 within the school sector needs to ensure the following:

- currency of skills and knowledge of those charges with training and assessing students
- access to industry-current equipment, facilities and training resources so that students acquire a realistic view of the realities and conditions within the workplace
- comprehensive coverage of underpinning skills and knowledge as delineated within the units of competency
- appropriateness of learning and assessment experiences to ensure that these are current and realistic.

It is recommended that delivery of qualifications in schools should only include Certificates I and II.

Assessment for Equity Groups

It is important that assessment processes take into account a diversity of individual needs and learning styles related to disability, race, socio-economic status, gender, language, ethnicity, geographical isolation, sexuality, work commitments and family responsibilities.

Some inclusive assessment practices which will enhance the learning of all students include:

- know what, in particular, you are assessing, and make this clear to students
- create assessment activities in which students have the opportunity to link their learning to what they already know
- make your expectations clear
- make explicit the way in which competency will be assessed, both in discussion with the class beforehand and prior to any assessment activities
- provide alternative pathways to stated outcomes: allow for flexibility in approach, organisation and assessment. The greater the diversity of methods of assessment, the fairer the process for the greatest number of students
- make accommodations based on individual circumstance and need. Remember that students may need the opportunity to experiment to find the adaptation or accommodation which best meets their learning needs
- include self-assessment as a component of the course. Self-assessment involves discussion with students about the criteria according to which they assess their own performance and the level of performance required for different levels

- discuss assessment alternatives with staff with previous experience teaching students with disabilities. You (and your department) should regularly review any alternative arrangements to ensure that these meet both the student's needs (which may change over time) and stated course outcomes.

-

Assessment for Indigenous Learners

There is evidence that Aboriginal and Torres Strait Islander people, both traditional and contemporary, approach learning differently from the Western intellectual tradition, which is relevant to effective training and assessment. It is understood that Aboriginal and Torres Strait Islander people may:

- learn better in groups than individually
- learn better in the surroundings of their community than in an institutional environment
- prefer oral communications to written forms
- learn on the basis of trial and error in the presence of an experienced person in preference to concept building approaches
- have a highly-developed sense of spatial relations by which they learn; hence stories, maps and pictures would be preferable to oral explanations.

To be effective, it is necessary that training and assessment recognises, adopts and practises appropriate delivery and assessment approaches.

Trainers and assessors who are not Aboriginal or Torres Strait Islanders need information on aspects of Aboriginal and Torres Strait Islander culture. They need to work closely with Aboriginal and Torres Strait Islander people to adopt practices that reflect Aboriginal and Torres Strait Islander approaches. The community should be asked to identify experts to provide information and to assist with assessment of relevant protocols, for example, where required.

There are a number of ways an RTO can establish and maintain culturally appropriate training and assessment practices, including:

- ensuring a high proportion of Aboriginal and Torres Strait Islander participation in all aspects of planning, development, delivery and evaluation
- establishing and maintaining a collaborative relationship with local Aboriginal and Torres Strait Islander communities
- as a mainstream (non-Indigenous) RTO, establishing auspice relationships with Aboriginal and Torres Strait Islander organisations and individuals, including direct and indirect involvement of persons identified as appropriate by the local community
- ensuring ongoing training of non-Aboriginal and Torres Strait Islander staff at all levels of the RTO, delivered by Aboriginal and Torres Strait Islander personnel.

A flexible approach to assessment will be required by RTOs in order to meet the requirements of Aboriginal and Torres Strait Islander organisations and individuals under this domain within the FDF10 Food Processing Training Package Version 3. Principles that underpin assessment include:

- assessment should be transparent, i.e. clearly seen and understood by the candidate and others
- assessment should empower the candidate on the basis of consent, self-assessment and responsibility for the process

- assessment should involve designated community experts working in collaboration with RTO assessors in order to provide appropriate recognition of cultural and community skills and knowledge
- assessments must provide constructive feedback to candidates and support for further competency development.

Assessment for People with a Disability

A disability presents some impairment to everyday activity. Some people with a disability do not have any impairments resulting from their disability. For example, a person who has a hearing impairment which is compensated for by a hearing aid may function without any adjustments. Some people with a disability may have an impairment because of the environment, not the disability itself. For example, hearing loss can be accentuated in a room with loud, competing noise and poor acoustics.

A disability may affect or relate to a range of human functions, including mobility, stamina, lifting ability, memory, vision, hearing, speech, comprehension and mood swings. This may be due to accidents, illnesses or birth.

It is important to remember that it is not the disability itself that should be of interest but its impact on the student's ability to access material and demonstrate knowledge.

Training providers have a legal obligation under the Disability Standards for Education to ensure that students who have a disability are able to access and participate in education without experiencing discrimination. The information provided below is aimed at assisting teachers/trainers to meet the reasonable adjustment needs of people who have a disability.

Adjustments in Training and Assessment

An open mind, common sense and tailoring to individual circumstances will, as often as not, ensure individuals achieve the standards that employers and training providers expect.

Reasonable adjustments need only be that - reasonable. It is about identifying what adjustments might reasonably be made and how they may be put into place. Training and assessment can be made more appropriate and fairer for a person who has a disability through attitude, preparation and application.

Attitude

The attitude of others is often the greatest barrier for people who have a disability. While most people who have a disability will only ever require minor adjustments to ensure learning is positive, some will require additional support. There are many support agencies that can provide advice, however teachers/trainers may need to take additional time to ensure their teaching/training meets the learning support needs of the individual concerned.

Positive language creates an atmosphere of mutual respect, which is essential to learning. For example, using language that identifies learners as people rather than language that identifies them by one of their characteristics conveys that the person is more important than the characteristic, such as the difference between a 'person who has an intellectual disability' and an 'intellectually disabled person'. A person who has an intellectual disability could also be identified by a range of equally important characteristics - height, age, sporting interests, etc. However, the term 'intellectually disabled person' refers to the disability as the major, and often only, defining characteristic.

Preparation

It is important to identify any functional issues arising from the nature and extent of a person's disability. This can usually be done by discussing such issues with the individual. In most cases, this consultation will identify reasonable adjustment needs which can be put into place. There are many simple things that teachers/trainers can do to make reasonable adjustments to enable individuals who have a disability to succeed in training and assessment. In some cases, professional support may be required.

Application

Once reasonable adjustments have been implemented it is important to monitor and evaluate what has been done to ensure the best environment for continuous learning because:

- adjustments may only need to be temporary, i.e. mechanisms may only need to be in place during an induction period or due to a temporary disability, in which case evaluation will ensure appropriateness without the need for ongoing monitoring
- adjustments may need reinforcing - when adjustments need to be ongoing, monitoring may reinforce patterns of behaviour in order for them to become 'natural'
- adjustments may need improving - where adjustments are ongoing or substantial, a commitment to continuous improvement is recommended through monitoring.

In most cases an informal discussion with the person concerned may be all that is necessary. However, should adjustments be substantial, or a learner not be acquiring competence at a reasonable rate, a more formal process may be required. This may include:

- performance indicators - training providers, learners and employers should have agreed indicators of performance which can be measured and monitored
- independent support - a third party, independent of the training and/or assessment environment, may need to be involved
- experimentation - if existing adjustments are not proving satisfactory, creative solutions may be needed
- continuing review - formal monitoring is encouraged if adjustments are changed or if substantial adjustments are necessary.

For further information on training and assessment for people with specific needs, the DEEWR website has information about the National Disability Coordination Officer Program, which 'provides information, coordination and referral services for people with a disability interested in or enrolled in post-school education and training' (www.deewr.gov.au). The Disability Education Standards Guidance Notes can also be accessed at on the DEEWR web site at:

http://www.deewr.gov.au/Schooling/Programs/Documents/Disability_Standards_for_Education_2005_pdf.pdf.

Reasonable Adjustment

Below are some of the practical things that can be done as part of providing reasonable adjustment to learners with specific support needs to enable them to undertake training and assessment. Clearly, each case will be different and will need to be discussed with the person and in some cases expert help will be needed, at least in the initial stages.

Type of disability	Reasonable adjustment
Acquired brain injury	<ul style="list-style-type: none"> • Memory aids (posters and notes) • Reflective listening skills • Stress minimisation • Time and patience.
Hearing impairment	<ul style="list-style-type: none"> • Audio loops for people using hearing aids • Plain English documents • Fire and alarm systems with flashing lights • Sign language interpreters • Telephone typewriters.
Intellectual disability	<ul style="list-style-type: none"> • Additional time • Assessment which is appropriate to the skill (i.e. avoiding written assessment for practical tasks) • Mentors • Plain English documents • Practical learning sessions • Repetition of learning exercises.

Mobility impairment	<ul style="list-style-type: none"> • Access to aids, such as for holding documents • Adjustable tables • Lifting limits • Note-taking support • Verbal rather than written presentations • Personal computers • Wheelchair access.
Psychiatric disability	<ul style="list-style-type: none"> • Identification and avoidance of stresses • Ongoing rather than formal assessments • Reflective listening skills • 'Time-out' breaks in assessment.
Speech impairment	<ul style="list-style-type: none"> • Information summaries • Stress minimisation • Time and patience • Written rather than verbal opportunities • Additional writing time for assignments and tests.
Vision impairment	<ul style="list-style-type: none"> • Audiotapes • Braille translations • Enlarged computer screen images • Enlarged text and images • Good lighting or reading lamps • Guide dog provision • Informing the person before moving furniture • Voice synthesisers on computers.

Training and Assessment Resources and Information for Equity Groups

The following references provide a range of information and resources related to training and assessment for equity groups.

- The Australian Disability Clearing House on Education and Training www.adcet.edu.au website includes resources and articles about the training and assessment of people with a disability.
- Information source for Aboriginal and/or Torres Strait Islander people training and assessment include: National Aboriginal and Torres Strait Education website: <http://www.natsiew.edu.au>. In addition most State and Territory Education Departments have an Aboriginal and/or Torres Strait Islander Unit who may be able to provide advice and information.
- The Working with Diversity web site at <http://www.westone.wa.gov.au/workingwithdiversity> includes a range of resources including:
 - *Working with diversity: A Guide to Equity and the AQTF*
 - *Working with diversity: Quality Training for Indigenous Australians*
 - *Working with diversity: Quality Training for People with a Disability*

- Other relevant, up to date resources may be available in the resources section of the Skills area of the Department of Education, Employment and Workplace Relations at www.deewr.gov.au.
- 1) Other informative resources include:
 - LiteracyNet at <http://www.deewr.gov.au/skills/programs/litandnum/literacynet/Pages/default.aspx>. The site contains key information about Australian adult literacy activities and links to a range of additional program, professional development, resource and research sites.

Competency Standards

What is competency?

The broad concept of industry competency concerns the ability to perform particular tasks and duties to the standard of performance expected in the workplace. Competency requires the application of specified skills, knowledge and attitudes relevant to effective participation in an industry, industry sector or enterprise.

Competency covers all aspects of workplace performance and involves performing individual tasks; managing a range of different tasks; responding to contingencies or breakdowns; and, dealing with the responsibilities of the workplace, including working with others. Workplace competency requires the ability to apply relevant skills, knowledge and attitudes consistently over time and in the required workplace situations and environments. In line with this concept of competency Training Packages focus on what is expected of a competent individual in the workplace as an outcome of learning, rather than focussing on the learning process itself.

Competency standards in Training Packages are determined by industry to meet identified industry skill needs. Competency standards are made up of a number of units of competency each of which describes a key function or role in a particular job function or occupation. Each unit of competency within a Training Package is linked to one or more AQF qualifications.

Contextualisation of Units of Competency by RTOs

Registered Training Organisation (RTOs) may contextualise units of competency to reflect local outcomes required. Contextualisation could involve additions or amendments to the unit of competency to suit particular delivery methods, learner profiles, specific enterprise equipment requirements, or to otherwise meet local needs. However, the integrity of the overall intended outcome of the unit of competency must be maintained.

Any contextualisation of units of competency in this endorsed Training Package must be within the bounds of the following advice:

- RTOs must not remove or add to the number and content of elements and performance criteria.
- RTOs can add specific industry terminology in the range statement.
- Any amendments and additions to the range statement made by RTOs must not diminish the breadth of application of the competency and reduce its portability.
- RTOs may add detail to the evidence guide in areas such as the critical aspects of evidence or required resources and infrastructure - but only where these expand the breadth of the competency and do not limit its use.

Components of Units of Competency

The components of units of competency are summarised below, in the order in which they appear in each unit of competency.

Unit Title

The unit title is a succinct statement of the outcome of the unit of competency. Each unit of competency title is unique, both within and across Training Packages.

Unit Descriptor

The unit descriptor broadly communicates the content of the unit of competency and the skill area it addresses. Where units of competency have been contextualised from units of competency from other endorsed Training Packages, summary information is provided. There may also be a brief second paragraph that describes its relationship with other units of competency, and any licensing requirements.

Employability Skills

This sub-section contains a statement that the unit contain Employability skills.

Prerequisite Units (optional)

If there are any units of competency that must be completed before the unit, these will be listed.

Application of the Unit

This sub-section fleshes out the unit of competency's scope, purpose and operation in different contexts, for example, by showing how it applies in the workplace.

Competency Field (Optional)

The competency field either reflects the way the units of competency are categorised in the Training Package or denotes the industry sector, specialisation or function. It is an optional component of the unit of competency.

Sector (optional)

The industry sector is a further categorisation of the competency field and identifies the next classification, for example an elective or supervision field.

Elements of Competency

The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

Performance Criteria

The performance criteria specify the required performance in relevant tasks, roles, skills and in the applied knowledge that enables competent performance. They are usually written in passive voice. Critical terms or phrases may be written in bold italics and then defined in range statement, in the order of their appearance in the performance criteria.

Required Skills and Knowledge

The essential skills and knowledge are either identified separately or combined. Knowledge identifies what a person needs to know to perform the work in an informed and effective manner. Skills describe the application of knowledge to situations where understanding is converted into a workplace outcome.

Range Statement

The range statement provides a context for the unit of competency, describing essential operating conditions that may be present with training and assessment, depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. As applicable, the meanings of key terms used in the performance criteria will also be explained in the range statement.

Evidence Guide

The evidence guide is critical in assessment as it provides information to the Registered Training Organisation (RTO) and assessor about how the described competency may be demonstrated. The evidence guide does this by providing a range of evidence for the assessor to make determinations, and by providing the assessment context. The evidence guide describes:

- conditions under which competency must be assessed including variables such as the assessment environment or necessary equipment;
- relationships with the assessment of any other units of competency;
- suitable methodologies for conducting assessment including the potential for workplace simulation;
- resource implications, for example access to particular equipment, infrastructure or situations;

- how consistency in performance can be assessed over time, various contexts and with a range of evidence, and
- the required underpinning knowledge and skills.

Employability Skills in Units of Competency

The detail and application of Employability Skills facets will vary according to the job-role requirements of each industry. In developing Training Packages, industry stakeholders are consulted to identify appropriate facets of Employability Skills which are incorporated into the relevant units of competency and qualifications.

Employability Skills are not a discrete requirement contained in units of competency (as was the case with Key Competencies). Employability Skills are specifically expressed in the context of the work outcomes described in units of competency and will appear in elements, performance criteria, range statements and evidence guides. As a result, users of Training Packages are required to review the entire unit of competency in order to accurately determine Employability Skills requirements.

How Employability Skills relate to the Key Competencies

The eight nationally agreed Employability Skills now replace the seven Key Competencies in Training Packages. Trainers and assessors who have used Training Packages prior to the introduction of Employability Skills may find the following comparison useful.

Employability Skills	Mayer Key Competencies
Communication	Communicating ideas and information
Teamwork	Working with others and in teams
Problem solving	Solving problems Using mathematical ideas and techniques
Initiative and enterprise	
Planning and organising	Collecting, analysing and organising information Planning and organising activities
Self-management	
Learning	
Technology	Using technology

When analysing the above table it is important to consider the relationship and natural overlap of Employability Skills. For example, using technology may involve communication skills and combine the understanding of mathematical concepts.

Explicitly embedding Employability Skills in Units of Competency

This Training Package seeks to ensure that industry-endorsed Employability Skills are explicitly embedded in units of competency. The application of each skill and the level of detail included in each part of the unit will vary according to industry requirements and the nature of the unit of competency.

Employability Skills must be both explicit and embedded within units of competency. This means that Employability Skills will be:

- embedded in units of competency as part of the other performance requirements that make up the competency as a whole
- explicitly described within units of competency to enable Training Packages users to identify accurately the performance requirements of each unit with regards to Employability Skills.

This Training Package also seeks to ensure that Employability Skills are well-defined and written into units of competency so that they are apparent, clear and can be delivered and assessed as an essential component of unit work outcomes.

Sample Unit of Competency Components showing Employability Skills

The following table shows the sequence of a unit of competency, and each cell contains text taken from a range of units. It provides examples of where and how various Employability Skills could be embedded in each component.

Please note that in the example, the bracketed Employability Skills are provided for clarification only and would not be present in units of competency within this Training Package.

Unit Title	Give formal presentations and take part in meetings (Communication)
Unit Descriptor	This unit covers the skills and knowledge required to promote the use and implementation of innovative work practices to effect change. (Initiative and enterprise)
Element	Proactively resolve issues. (Problem solving)
Performance Criteria	Information is organised in a format suitable for analysis and dissemination in accordance with organisational requirements. (Planning and organising)
Range Statement	Software applications may include email, internet, word processing, spreadsheet, database or accounting packages. (Technology) Modify activities depending on differing workplace contexts, risk situations and environments. (Learning)

Required Skills and Knowledge	Work collaboratively with others during a fire emergency. (Teamwork) Instruction, procedures and other information relevant to the maintenance of vessel and port security. (Communication)
Evidence Guide	Evidence of having worked constructively with a wide range of community groups and stakeholders to solve problems and adapt or design new solutions to meet identified needs in crime prevention. In particular, evidence must be obtained on the ability to: <ul style="list-style-type: none"> • assess response options to identified crime-prevention needs and determine the optimal action to be implemented • in consultation with relevant others, design an initiative to address identified issues (Initiative and enterprise)

Employability Skills Summaries and Units of Competency

An Employability Skills Summary exists for each qualification. Summaries include broad advice on industry expectations with regard to Employability Skills at the qualification level. Summaries should be used by trainers and assessors to assist in identifying the Employability Skills requirements contained within units of competency.

Competency Standards - Industry Contextualisation

FDF10v3 Contextualisation Guidelines

This Training Package is relevant to the broad spectrum of Australian industries where food, beverage and pharmaceutical production is undertaken and users are encouraged to customise qualifications and contextualise units of competency to suit their enterprise or sector purposes, provided that the customisation rules are followed.

Customisation of this Training Package may be achieved by:

- choosing appropriate electives from units provided in this Training Package
- importing elective units from other Training Packages or accredited courses
- contextualising units of competency to better suit an enterprise or industry context.

The export of units to other Training Packages is encouraged provided the following rules are observed.

Choosing Appropriate Electives

The electives listed in the Food Processing Training Package provide for skill development in all areas identified by industry representatives during consultations.

Most qualifications are able to be customised since candidates are able to choose particular combinations of elective units to suit their individual needs or work context.

Importing Elective Units from Other Training Packages or Accredited Courses

To achieve maximum cross-industry application, the packaging rules enable units of competency to be imported from any Training Package or accredited course that is directly relevant to the candidate's current or intended work environment. In providing this flexibility it is incumbent on RTOs to ensure that the integrity of qualifications in the Training Package is maintained. The following guidelines for importing units apply.

- Imported units must relate to the core functions or roles in the candidate's current or intended work environment.
- The original title and code for the imported unit of competency must be retained.
- Imported units must come from other endorsed Training Packages or accredited courses.
- Imported units must align to the qualification level outlined in the relevant qualification packaging rules.

Exporting Competencies to Other Training Packages

FDF10v3 has some application across industries outside the scope of the FDF10v3 Training Package. All FDF10v3 units may be imported to other Training Packages provided that:

- the original unit code and unit title are retained
- they are only contextualised to the extent outlined in the *section on Competency Standards*
- the user advises the appropriate Industry Skills Council in writing of the specific competencies exported to enable input during future revisions and ongoing communication.

Contextualisation of Units of Competency

FDF10v3 competencies are able to be used in a wide range of industry sectors and enterprises. To enable this, contextualising of the units of competency is actively encouraged provided the requirements outlined in the earlier *section on Competency Standards* are met.

FDF10111 Certificate I in Food Processing

Modification History

This Qualification supersedes but is not equivalent to FDF10110 Certificate I in Food Processing and FDF10403 Certificate I in Food Processing (Wine).

September 2012: Replacement of superseded imported Units

November 2011: Inclusion of two (2) new elective wine Units, and updates to imported Units.

Description

This Qualification covers a range of food processing industries, such as:

- Grain processing (including stock feed, animal feeds, milling wheat, barley, oats and flour milling)
- Baking (including large scale production of cakes, pastry, bread, biscuits and plant baking)
- Retail baking
- Beverages (including juices, soft drinks, cordials, aerated and still waters, energy drinks and other modified beverages, such as vitamin and antioxidant beverages, coffee, tea and ice)
- Confectionery
- Dairy processing
- Fruit and vegetables
- Grocery products and supplies (including honey, jams, spreads, sauces, dressings, condiments, spices, edible oils and fats and pasta)
- Poultry.

Job Roles

The Certificate I in Food Processing is an introductory Qualification to food, beverage and grain processing that provides basic skills relevant to all FDF10 Food Processing Training Package sectors apart from pharmaceutical manufacturing. The Qualification is designed for application in a highly supervised context, such as VET in schools, induction to industry, or other equivalent introduction environments.

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this Qualification include direct entry.

Pathways from the Qualification

After achieving this Qualification, candidates may move into employment in a food, beverage or grain processing enterprise and undertake the FDF20110 Certificate II in Food Processing, FDF20510 Certificate II in Retail Baking or FDF20210 Certificate II in Pharmaceutical Manufacturing, or any other suitable Qualification according to the needs of the enterprise and higher level job functions.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, all work must comply with food safety, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace.

Entry Requirements

Not applicable.

Employability Skills Summary

Certificate I in Food Processing

The following table contains a summary of the employability skills as identified by the Food Processing industries for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Complete all reporting as required. • Receive and relay oral and written messages. • Read and apply workplace procedures and instructions. • Communicate information about problems with work.
Teamwork	<ul style="list-style-type: none"> • Work as a team member. • Identify own role and responsibilities within a team. • Share workplace information.
Problem-solving	<ul style="list-style-type: none"> • Recognise and report any workplace hazards. • Identify common problems and take required action. • Follow workplace food safety procedures.
Initiative and enterprise	<ul style="list-style-type: none"> • Inspect quality of work on an ongoing basis. • Take appropriate corrective action to routine work problems. • Select appropriate equipment. • Distinguish between urgent and non-urgent tasks.
Planning and organising	<ul style="list-style-type: none"> • Identify work requirements. • Identify work priorities. • Plan work activities to meet daily work requirements. • Direct items to the correct area for further processing. • Identify and use relevant personal protective equipment. • Organise work area to maintain housekeeping standards. • Organise relevant equipment and tools.
Self-management	<ul style="list-style-type: none"> • Identify personal responsibilities and work requirements. • Manage time to meet own work requirements. • Plan activity to meet own work requirements. • Keep the work area clean and tidy at all times. • Monitor the quality of own work against quality standards. • Follow OHS practices. • Identify safety requirements for working in food processing industry. • Seek assistance from other team members where appropriate.
Learning	<ul style="list-style-type: none"> • Check work outcomes against workplace standards and identify inconsistencies.

	<ul style="list-style-type: none"> • Assess own ability to meet job requirements. • Listen to feedback and advice of supervisors. • Identify own skill requirements and seek skill development if required. • Attend training or skill development activities. • Ask questions to expand own knowledge. • self-check numerical information.
Technology	<ul style="list-style-type: none"> • Use work tools, machines and equipment safely and according to workplace procedures. • Use manual handling technologies in the workplace. • Use information technology devices as required.

Packaging Rules

This Qualification requires the achievement of **nine (9)** Units of Competency in accordance with the following rules.

Total Units must include a minimum of five (5) Units coded FDF.

Five (5) Core Units

Four (4) Elective Units

Elective selection must include:

- Two (2) Group A elective Units

Two (2) remaining elective Units may be selected from:

- Group A elective Units below, not previously selected
- Units packaged in any Certificate I or II level Food Processing Training Package Qualification
- Units from any nationally endorsed Training Package and accredited course that are packaged at Certificate I level or Certificate II level (maximum 1 Unit)

CORE UNITS

Complete all five (5) core Units:

FDFFS1001A	Follow work procedures to maintain food safety#
FDFOHS1001A	Work safely
FDFOP1009A	Follow work procedures to maintain quality
FDFOP1010A	Communicate workplace information
MSAENV272B	Participate in environmentally sustainable work practices

In the case where this Qualification is to be applied in a work environment where food is processed for non-human consumption, such as pet food and stock feed or other situations where human food safety skills are not required, then this Unit may be replaced by **FDFOP2062A Apply work procedures to maintain integrity of product.**

ELECTIVE UNITS

GROUP A

Select a minimum of two (2) Group A Cross Sector elective Units

FDFOP1001A	Pack or unpack product manually
FDFOP1002A	Operate automated washing equipment
FDFOP1003A	Carry out manual handling tasks

FDFOP1004A	Prepare basic mixes
FDFOP1005A	Operate basic equipment
FDFOP1006A	Monitor process operation
FDFOP1007A	Participate effectively in a workplace environment
FDFOP1008A	Take and record basic measurements
FDFOP2061A	Use numerical applications in the workplace
FDFRB1001A	Finish products
FDFWIN1001A	Identify key operations in wine production
FDFWIN1002A	Identify viticulture processes
SIRXCCS201	Apply point-of-sale handling procedures
SIRXCCS202	Interact with customers
SIRXICT001A	Operate retail technology
SIRXINV001A	Perform stock control procedures
SIRXSLS201	Sell products and services
TLIA2014A	Use product knowledge to complete work operations

FDF10210 Certificate I in Pharmaceutical Manufacturing

Modification History

September 2012: Replacement of superseded imported Units.

November 2011: Update to imported Units.

Description

This Qualification covers the pharmaceutical manufacturing specialisation.

Job Roles

The Certificate I in Pharmaceutical Manufacturing is an introductory Qualification to pharmaceutical manufacturing that provides basic skills relevant to this sector. The Qualification is designed for application in a highly supervised context, such as VET in schools, induction to industry, or other equivalent introduction environments.

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Many Units in this Qualification assume a basic level of mathematics equivalent to a school sector Year 10 standard. If a student does not possess this level of mathematics then the Unit FDFOP2061A Use numerical applications in the workplace should be selected as part of this Qualification.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this Qualification include:

- direct entry.

Pathways from the Qualification

After achieving this Qualification, candidates may move into employment in a pharmaceutical manufacturing enterprise and undertake the FDF20210 Certificate II in Pharmaceutical Manufacturing or any other suitable Qualification.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, all work must comply with Good Manufacturing Practice, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace.

Entry Requirements

Not applicable.

Employability Skills Summary

Certificate I in Pharmaceutical Manufacturing

The following table contains a summary of the employability skills as identified by the Pharmaceutical Manufacturing industries for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Complete all reporting as required. • Receive and relay oral and written messages. • Read and apply workplace procedures and instructions. • Communicate information about problems with work.
Teamwork	<ul style="list-style-type: none"> • Work as a team member. • Identify own role and responsibilities within a team. • Share workplace information.
Problem-solving	<ul style="list-style-type: none"> • Recognise and report any workplace hazards. • Identify common problems and take required action. • Follow workplace food safety procedures.
Initiative and enterprise	<ul style="list-style-type: none"> • Inspect quality of work on an ongoing basis. • Take appropriate corrective action to routine work problems. • Select appropriate equipment. • Distinguish between urgent and non-urgent tasks.
Planning and organising	<ul style="list-style-type: none"> • Identify work requirements. • Identify work priorities. • Plan work activities to meet daily work requirements. • Direct items to the correct area for further processing. • Identify and use relevant personal protective equipment. • Organise work area to maintain housekeeping standards. • Organise relevant equipment and tools.
Self-management	<ul style="list-style-type: none"> • Identify personal responsibilities and work requirements. • Manage time to meet own work requirements. • Plan activity to meet own work requirements. • Keep the work area clean and tidy at all times. • Monitor the quality of own work against quality standards. • Follow OHS practices. • Identify safety requirements for work. • Seek assistance from other team members where appropriate.
Learning	<ul style="list-style-type: none"> • Check work outcomes against workplace standards and identify inconsistencies.

	<ul style="list-style-type: none">• Assess own ability to meet job requirements.• Listen to feedback and advice of supervisors.• Identify own skill requirements and seek skill development if required.• Attend training or skill development activities.• Ask questions to expand own knowledge.• self-check numerical information.
Technology	<ul style="list-style-type: none">• Use work tools, machines and equipment safely and according to workplace procedures.• Use manual handling technologies in the workplace.• Use information technology devices as required.

Packaging Rules

This Qualification requires the achievement of **eight (8)** Units of Competency in accordance with the following rules.

Total Units must include a minimum of four (4) Units coded FDF.

Four (4) Core Units

Four (4) Elective Units

Elective selection must include:

- Two (2) Group A elective Units

Two (2) remaining elective Units may be selected from:

- Group A elective Units below, not previously selected
- Units packaged in any Certificate I or II Food Processing Training Package Qualification
- Units from any nationally endorsed Training Package and accredited course that are packaged at Certificate I level or Certificate II level (maximum 1 Unit)

CORE UNITS

Complete all four (4) core Units.

FDFOHS1001A	Work safely
FDFOP1010A	Communicate workplace information
FDFPH1001A	Follow work procedures to maintain Good Manufacturing Practice
MSAENV272B	Participate in environmentally sustainable work practices

GROUP A

Select a minimum of two (2) Group A elective Units.

FDFOP1001A	Pack or unpack product manually
FDFOP1002A	Operate automated washing equipment
FDFOP1003A	Carry out manual handling tasks
FDFOP1004A	Prepare basic mixes
FDFOP1005A	Operate basic equipment
FDFOP1006A	Monitor process operation
FDFOP1007A	Participate effectively in a workplace environment
FDFOP1008A	Take and record basic measurements
FDFOP2061A	Use numerical applications in the workplace

FDFRB1001A	Finish products
SIRXCCS201	Apply point-of-sale handling procedures
SIRXCCS202	Interact with customers
SIRXICT001A	Operate retail technology
SIRXINV001A	Perform stock control procedures
SIRXSLS201	Sell products and services
TLIA2014A	Use product knowledge to complete work operations
TLID1002A	Shift a load using manually operated equipment

FDF11012 Certificate I in Sugar Milling Industry Operations

Modification History

This qualification has been derived from SUG10102 Certificate I in Sugar Milling. See Qualification Mapping Guide for notes on equivalence.

Description

Job Roles

This qualification covers work undertaken by sugar milling industry workers. Job roles may include for example:

Cane Supply Transport

Yard assistant

Loco driver assistant

Mill Services

Labourer

Maintenance worker

Additional Qualification Advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the qualification level.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

The FDF11011 Certificate I in Sugar Milling Industry Operations is an introductory qualification to sugar milling that provides basic skills. The qualification is designed for application in a highly supervised context, such as VET in schools, induction to industry, or other equivalent introduction environments.

Pathways from the Qualification

After achieving this qualification, candidates may move into employment in the sugar milling industry and undertake the FDF21012 Certificate II in Sugar Milling Industry Operations or any other suitable qualification according to the needs of the enterprise and higher level job functions.

Licensing/Regulatory Information

There is no direct link between this qualification and licensing, legislative and/or regulatory requirements. However, all work must comply with food safety, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace.

Entry Requirements

There are no entry requirements for this qualification.

Employability Skills Summary

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • Complete all reporting as required • Receive and relay oral and written messages • Read and apply workplace procedures and instructions • Communicate information about problems with work
Teamwork	<ul style="list-style-type: none"> • Work as a team member • Identify own role and responsibilities within a team • Share workplace information
Problem-solving	<ul style="list-style-type: none"> • Recognise and report any workplace hazards • Identify common problems and take required action • Follow workplace food safety procedures
Initiative and Enterprise	<ul style="list-style-type: none"> • Inspect quality of work on an ongoing basis • Take appropriate corrective action to routine work problems • Select appropriate equipment • Distinguish between urgent and non-urgent tasks
Planning and Organising	<ul style="list-style-type: none"> • Identify work requirements • Identify work priorities • Plan work activities to meet daily work requirements • Direct items to the correct area for further processing • Identify and use relevant personal protective equipment • Organise work area to maintain housekeeping standards • Organise relevant equipment and tools
Self-management	<ul style="list-style-type: none"> • Identify personal responsibilities and work requirements • Manage time to meet own work requirements • Plan activity to meet own work requirements • Keep the work area clean and tidy at all times • Monitor the quality of own work against quality standards • Follow OHS practices • Identify safety requirements for working in food processing industry • Seek assistance from other team members where appropriate
Learning	<ul style="list-style-type: none"> • Check work outcomes against workplace standards and identify inconsistencies • Assess own ability to meet job requirements • Listen to feedback and advice of supervisors • Identify own skill requirements and seek skill development if required • Attend training or skill development activities • Ask questions to expand own knowledge

	<ul style="list-style-type: none">• self-check numerical information
Technology	<ul style="list-style-type: none">• Use work tools, machines and equipment safely and according to workplace procedures• Use manual handling technologies in the workplace• Use information technology devices as required

Packaging Rules

Complete **nine (9)** units of competency comprised of:

- Four (4) Core Units
- Five (5) Elective Units

Core Units

Complete all four (4) core units

Unit Code	Unit Title
FDFOHS1001A	Work safely
FDFOP1007A	Participate effectively in a workplace environment
FDFOP1010A	Communicate workplace information
MSAENV272B	Participate in environmentally sustainable work practices

Elective Units

- Select a minimum of **two (2)** units from Group A below.
- An additional **three (3)** units can come from Group A and/or this or any other Training Package or accredited course at Certificate I or II.
- Selected units must be relevant to job outcomes in the sugar milling industry.

Group A Units

Sector Specialist Units	
Rail Infrastructure	
FDFSUG101A	Install pre-ballast
Rail Transport Operations	
FDFSUG102A	Undertake shunting operations
Factory Operations	
FDFSUG103A	Move cane bins in a marshalling yard
Laboratory	

FDFSUG104A	Check a cane sample for extraneous matter
FDFSUG105A	Manually clean and maintain housekeeping standards
Factory Maintenance	
AHCMOM101A	Assist with routine maintenance of machinery and equipment
FDFOP1005A	Operate basic equipment
MEM18001C	Use hand tools
MEM18002B	Use power tools/hand held operations
General	
FDFOP1006A	Monitor process operation
AHCBAC101A	Support agricultural crop work
TLID1001A	Shift materials safely using manual handling methods
TLID1002A	Shift a load using manually-operated equipment

FDF20111 Certificate II in Food Processing

Modification History

This Qualification supersedes and is equivalent to FDF20110 Certificate II in Food Processing.

September 2012: Replacement of superseded imported Units.

April 2012: Inclusion of new malting and brewing Units as electives. Update of imported SUG Units to new FDFSUG Units. Minor typographical corrections.

November 2011: Update to imported Units, including one non-equivalent Unit. Minor edits.

Description

This Qualification covers a range of food processing industries, such as:

- Grain processing (including stockfeed, animal feeds, milling wheat, barley, oats and flour milling)
- Baking (including large scale production of cakes, pastry, bread, biscuits and plant baking)
- Beverages (including juices, soft drinks, cordials, aerated and still waters, energy drinks and other modified beverages, such as vitamin and antioxidant beverages, coffee, tea and ice)
- Confectionery
- Dairy processing
- Fruit and vegetables
- Grocery products and supplies (including honey, jams, spreads, sauces, dressings, condiments, spices, edible oils and fats and pasta)
- Poultry.

Job Roles

The Certificate II in Food Processing targets those working within a production or production support role, for example, packaging, machine operations and bottling. This Qualification is designed for application in supervised environments where the work is predictable with some basic problem solving requirements.

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Many Units in this Qualification assume a basic level of mathematics equivalent to a school sector Year 10 standard. If a student does not possess this level of mathematics then the Unit FDFOP2061A Use numerical applications in the workplace should be selected as part of this Qualification.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this Qualification include:

- FDF10110 Certificate I in Food Processing
- direct entry
- limited vocational training and/or work experience.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake the FDF30110 Certificate III in Food Processing with an industry specialisation according to the needs of the enterprise and higher level job functions, FDF30810 Certificate III in Plant Baking or FDF30310 Certificate III in Food Processing (Sales) or any other suitable Qualification.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, all work must comply with food safety, OHS and environmental regulations and legislation that apply to the workplace.

Entry Requirements

Not applicable.

Employability Skills Summary

The following table contains a summary of the employability skills as identified by the Food Processing industries for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Complete work forms and required written documentation. • Use communication and information technologies to support work operations. • Demonstrate effective and appropriate interpersonal skills. • Interpret and apply workplace procedures and instructions. • Share workplace information. • Communicate information about problems with work. • Communicate information relating to OHS.
Teamwork	<ul style="list-style-type: none"> • Work as part of a team. • Provide assistance to others in the work area. • Identify own role and responsibilities within a team. • Identify team goals. • Share work related information. • Maintain health and safety of work area for self and others.
Problem-solving	<ul style="list-style-type: none"> • Identify and report any workplace hazards. • Identify workplace problems and make contributions to their solution. • Identify and apply health and safety issues relating to work in the food industry. • Apply knowledge of materials, product purpose and processes to work operations. • Check performance of machines and equipment and identify signs of faulty operations. • Monitor workplace activities and identify and report non-compliances.
Initiative and enterprise	<ul style="list-style-type: none"> • Provide feedback on procedures and processes. • Gather and interpret information to support safe and efficient work. • Ask questions regarding requirements and expectations. • Make suggestions for continuous improvement. • Inspect quality of work on an ongoing basis. • Record basic information on the quality and other indicators of work outcomes.

Planning and organising	<ul style="list-style-type: none"> • Identify work requirements and work load priorities. • Plan work activities to meet daily work requirements. • Direct items to the correct area for further processing. • Identify and use relevant personal protective equipment. • Organise work area to maintain housekeeping standards. • Select and organise relevant equipment and tools. • Identify and report issues affecting ability to meet work outcomes.
Self-management	<ul style="list-style-type: none"> • Understand own work activities. • Identify personal responsibilities. • Accept responsibility for quality of own work. • Participate in OHS practices. • Apply food safety practices. • Plan to meet required work outcomes of self and team. • Monitor own work. • Maintain own work efficiency. • Keep the work area clean and tidy at all times.
Learning	<ul style="list-style-type: none"> • Assess own competencies in meeting job requirements. • Listen to feedback and advice of supervisors. • Identify own skill requirements and seek skill development if required. • Attend training or skill development activities. • Ask questions to expand own knowledge.
Technology	<ul style="list-style-type: none"> • Use work tools, machines and equipment safely and effectively. • Perform minor maintenance on machinery in accordance with workplace practice. • Use manual handling technologies in the workplace.

Packaging Rules

This Qualification requires the achievement of **thirteen (13)** Units of Competency in accordance with the following rules.

Total Units must include a minimum of eight (8) Units coded FDF.

Five (5) Core Units

Eight (8) Elective Units

Elective selection must include:

- Five (5) Group A elective Units

Three (3) remaining elective Units may be selected from:

- Group A elective Units below, not previously selected
- Group B elective Units
- A maximum of two (2) Units from this Training Package, other endorsed Training Packages and accredited courses that are packaged at Certificate I level (maximum 1 Unit), Certificate II level (maximum 2 Units) and Certificate III level (maximum 1 Unit)

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

CORE UNITS

Complete all five (5) core Units:

FDFFS2001A	Implement the food safety program and procedures #
FDFOHS2001A	Participate in OHS processes
FDFOP2063A	Apply quality systems and procedures
FDFOP2064A	Provide and apply workplace information
MSAENV272B	Participate in environmentally sustainable work practices

In the case where this Qualification is to be applied in a work environment where food is processed for non-human consumption, such as pet food and stock feed or other situations where human food safety skills are not required, then this Unit may be replaced by **FDFOP2062A Apply work procedures to maintain integrity of product**

ELECTIVE UNITS

GROUP A

Select a minimum of five (5) Group A Sector Specialist and Cross Sector elective Units

Sector Specialist Units
Baking

FDFBK2001A	Operate a cooling and slicing process
FDFBK2002A	Operate a pastry forming and filling process
FDFBK2003A	Manufacture rye crisp breads
FDFBK2004A	Manufacture wafer products
FDFBK2005A	Operate a doughnut making process
FDFBK2006A	Operate a griddle production process
FDFBK2007A	Operate a pastry production process
FDFOP2024A	Operate a cooling, slicing and wrapping process
FDFOP2055A	Freeze dough
SIRRMER004A	Prepare and display bakery products* <i>SIRRFSA001A Apply retail food safety practices</i>
Beverages	
FDFBV2001A	Operate a deaeration, mixing and carbonation process
FDFBV2002A	Manufacture coffee (roast and ground)
FDFBV2003A	Operate an ice manufacturing process
Confectionery	
FDFCON2001A	Examine raw ingredients used in confectionery
FDFCON2002A	Operate a boiled confectionery process
FDFCON2003A	Operate a chocolate conching process
FDFCON2004A	Operate a chocolate depositing or moulding process
FDFCON2005A	Operate a confectionery depositing process
FDFCON2006A	Operate a granulation and compression process
FDFCON2007A	Operate a panning process
FDFCON2008A	Operate a chocolate refining process
FDFCON2009A	Operate a starch moulding process
Dairy processing	
FDFDP2001A	Operate a butter churning process
FDFDP2002A	Operate a butter oil process* <i>FDFOP2043A Operate an homogenising process OR FDFDP2001A Operate a butter churning process</i>
FDFDP2003A	Operate a curd production and cutting process
FDFDP2004A	Operate a cooling and hardening process

FDFDP2005A	Operate a cheese pressing and moulding process
FDFDP2006A	Operate a fermentation process
Grocery products and supplies	
FDFGPS2001A	Operate a bleaching process
FDFGPS2002A	Operate a complecting process
FDFGPS2003A	Operate a deodorising process
FDFGPS2004A	Operate a flake preparation process
FDFGPS2005A	Operate a fractionation process
FDFGPS2006A	Operate a hydrogenation process
FDFGPS2007A	Operate an interesterification process
FDFGPS2008A	Operate a neutralisation process
FDFGPS2009A	Operate a soap splitting process
FDFGPS2010A	Operate a winterisation process
FDFGPS2011A	Operate a creamed honey manufacture process
Grain processing	
FDFGR2001A	Operate a liquid, mash or block stockfeed process
FDFGR2002A	Understand mill operations and technologies
FDFGR2003A	Operate a grain conditioning process
FDFGR2004A	Operate a grain cleaning process
FDFGR2005A	Operate a purification process
FDFGR2006A	Operate a scalping and grading process
FDFGR2007A	Operate a scratch and sizing process
FDFGR2008A	Operate a break roll process
FDFGR2009A	Operate a pelleting process
FDFGR2010A	Handle grain in a storage area
FDFGR2011A	Receive grain for malting* <i>FDFGR2010A Handle grain in a storage area</i>
FDFGR2012A	Prepare malted grain* <i>FDFGR2010A Handle grain in a storage area</i>
FDFGR2013A	Blend and dispatch malt
AHCBAC204A	Prepare grain storages
TLIJ2004A	Implement grain monitoring measures

Fruit and vegetables	
FDFV2001A	Apply hydro-cooling process to fresh produce
Poultry	
FDFPO2001A	Operate a dicing, stripping or mincing process
FDFPO2002A	Operate an evisceration process
FDFPO2003A	Grade carcass
FDFPO2004A	Harvest edible offal
FDFPO2005A	Operate a marinade injecting process
FDFPO2006A	Operate a washing and chilling process
FDFPO2007A	Operate the bird receipt and hanging process
FDFPO2008A	Operate a stunning, killing and defeathering process
FDFPO2009A	Work in an egg grading floor
FDFPO2010A	Operate egg grading and packing floor equipment* <i>FDFPO2009A Work in an egg grading floor</i>
MTMP2006B	Apply animal welfare and handling requirements
MTMP2197C	Clean after operations – boning room

Cross Sector Units	
FDFOP1003A	Carry out manual handling tasks
FDFOP2001A	Work effectively in the food processing industry
FDFOP2002A	Inspect and sort materials and product
FDFOP2003A	Clean equipment in place
FDFOP2004A	Clean and sanitise equipment
FDFOP2005A	Work in a socially diverse environment
FDFOP2006A	Operate a bulk dry goods transfer process
FDFOP2007A	Work in a freezer storage area
FDFOP2008A	Operate a bulk liquid transfer process
FDFOP2009A	Load and unload tankers
FDFOP2010A	Work with temperature controlled stock
FDFOP2011A	Conduct routine maintenance
FDFOP2012A	Maintain food safety when loading, unloading and transporting food

Cross Sector Units	
FDFOP2013A	Apply sampling procedures
FDFOP2014A	Participate in sensory analyses
FDFOP2015A	Apply principles of statistical process control* <i>FDFOP2061A Use numerical applications in the workplace</i>
FDFOP2016A	Work in a food handling area for non-food handlers
FDFOP2017A	Operate a blending, sieving and bagging process
FDFOP2018A	Operate a case packing process
FDFOP2019A	Fill and close product in cans
FDFOP2020A	Operate a form, fill and seal process
FDFOP2021A	Operate a fill and seal process
FDFOP2022A	Operate a high speed wrapping process
FDFOP2023A	Operate a packaging process
FDFOP2025A	Manufacture extruded and toasted products
FDFOP2026A	Operate a forming or shaping process
FDFOP2027A	Dispense non-bulk ingredients
FDFOP2028A	Operate a mixing or blending process
FDFOP2029A	Operate a baking process
FDFOP2030A	Operate a process control interface
FDFOP2031A	Operate a coating application process
FDFOP2032A	Work in a clean room environment* <i>FDFFS2001A Implement the food safety program and procedures</i> <i>OR</i> <i>FDFPH2001A Apply Good Manufacturing Practice procedures</i>
FDFOP2033A	Operate a depositing process
FDFOP2034A	Operate an evaporation process
FDFOP2035A	Operate an enrobing process
FDFOP2036A	Operate an extrusion process
FDFOP2037A	Operate a filtration process
FDFOP2038A	Operate a grinding process
FDFOP2039A	Operate a frying process
FDFOP2040A	Operate a heat treatment process
FDFOP2041A	Operate a mixing or blending and cooking process

Cross Sector Units	
FD2042A	Operate a drying process
FD2043A	Operate an homogenising process
FD2044A	Operate a retort process
FD2045A	Operate pumping equipment
FD2046A	Operate a production process
FD2047A	Operate a portion saw
FD2048A	Pre-process raw materials
FD2049A	Operate a reduction process
FD2050A	Operate a separation process
FD2051A	Operate a spreads production process
FD2052A	Operate a chocolate tempering process
FD2053A	Operate a washing and drying process
FD2054A	Operate a water purification process
FD2056A	Operate a freezing process
FD2057A	Operate a membrane process
FD2058A	Operate a holding and storage process
FD2059A	Operate a continuous freezing process
FD2060A	Operate an automated cutting process
FD2061A	Use numerical applications in the workplace
FD2066A	Operate a wort production process* <i>FD2071A Identify key stages and beer production equipment in a brewery</i>
FD2067A	Operate a brewery fermentation process* <i>FD2071A Identify key stages and beer production equipment in a brewery</i>
FD2068A	Operate a beer maturation process* <i>FD2071A Identify key stages and beer production equipment in a brewery</i>
FD2069A	Operate a beer filtration process* <i>FD2071A Identify key stages and beer production equipment in a brewery</i>
FD2070A	Operate a bright beer tank process* <i>FD2071A Identify key stages and beer production equipment</i>

Cross Sector Units	
	<i>in a brewery</i>
FDFOP2071A	Identify key stages and beer production equipment in a brewery
FDFOP2072A	Operate a beer filling process
FDFOP2073A	Operate a beer packaging process
FDFOP2074A	Prepare and monitor beer yeast propagation processes
FDFPPL2001A	Participate in work teams and groups
FDFSUG222A	Operate a waste water treatment system
MSL973001A	Perform basic tests
MTMPSR201C	Vacuum pack product
MTMPSR203A	Sharpen knives
PMBPROD211B	Operate blow moulding equipment
PMBPROD270B	Operate injection blow moulding equipment
TLIA2009A	Complete and check import/export documentation
TLIA2014A	Use product knowledge to complete work operations
TLIA2021A	Despatch stock
TLIA4025A	Regulate temperature controlled stock
TLID2003A	Handle dangerous goods/hazardous substances
TLID2004A	Load and unload goods/cargo
TLID2010A	Operate a forklift
TLIK2010A	Use infotechnology devices in the workplace

GROUP B

BSBITU201A	Produce simple word processed documents
BSBITU202A	Create and use spreadsheets
BSBWOR204A	Use business technology
FDFSUG218A	Operate a boiler - basic
HLTFA201B	Provide basic emergency life support
MSS402010A	Manage the impact of change on own work
MSS402001A	Apply competitive systems and practices
MSS402002A	Sustain process improvements
MSS402021A	Apply Just in Time procedures

MSS402030A	Apply cost factors to work practices
MSS402031A	Interpret product costs in terms of customer requirements
MSS402040A	Apply 5S procedures
MSS402050A	Monitor process capability
MSS402051A	Apply quality standards
MSS402060A	Use planning software systems in operations
MSS402061A	Use SCADA systems in operations
MSS402080A	Undertake root cause analysis
MSS402081A	Contribute to the application of a proactive maintenance strategy
SIRXFIN201	Balance and secure point-of-sale terminal
SIRXFIN002A	Perform retail finance duties
SIRXMER201	Merchandise products
SIRXRSK001A	Minimise theft
SIRXSLS002A	Advise on products and services
SITHFAB012B	Prepare and serve espresso coffee

FDF20211 Certificate II in Pharmaceutical Manufacturing

Modification History

This Qualification supersedes and is equivalent to FDF20210 Certificate II in Pharmaceutical Manufacturing.

September 2012: Replacement of superseded imported Units.

April 2012: Update of imported SUG Units to new FDFSUG Units. Minor typographical corrections.

November 2011: Update to imported Units, including one non-equivalent Unit. Minor edits.

Description

This Qualification covers the Pharmaceutical Manufacturing specialisation.

Job Roles

The Certificate II in Pharmaceutical Manufacturing targets those working within production or production support roles, such as packing within pharmaceutical manufacturing environments. This Qualification is designed for application in supervised environments where the work is predictable with some basic problem solving requirements.

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Many Units in this Qualification assume a basic level of mathematics equivalent to a school sector Year 10 standard. If a student does not possess this level of mathematics then the Unit FDFOP2061A Use numerical applications in the workplace should be selected as part of this Qualification.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this Qualification include:

- FDF10110 Certificate I in Food Processing or FDF10210 Certificate I in Pharmaceutical Manufacturing
- direct entry
- limited vocational training and/or work experience.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake FDF30210 Certificate III in Pharmaceutical Manufacturing or any other suitable Qualification.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, an individual Unit of Competency may specify relevant licensing, legislative and/or regulatory requirements. In addition, all work must comply with Good Manufacturing Practice, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace.

Entry Requirements

Not applicable.

Employability Skills Summary

The following table contains a summary of the employability skills as identified by the Pharmaceutical Manufacturing industries for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Complete work forms and required written documentation. • Use communication and information technologies to support work operations. • Demonstrate effective and appropriate interpersonal skills. • Interpret and apply workplace procedures and instructions. • Share workplace information. • Communicate information about problems with work. • Communicate information relating to OHS.
Teamwork	<ul style="list-style-type: none"> • Work as part of a team. • Provide assistance to others in the work area. • Identify own role and responsibilities within a team. • Identify team goals. • Share work-related information. • Maintain health and safety of work area for self and others.
Problem-solving	<ul style="list-style-type: none"> • Identify and report any workplace hazards. • Identify workplace problems and make contributions to their solution. • Identify health and safety issues relating to work in the food industry. • Apply knowledge of materials, product purpose and processes to work operations. • Check performance of machines and equipment and identify signs of faulty operations. • Monitor workplace activities and identify and report non-compliances.
Initiative and enterprise	<ul style="list-style-type: none"> • Provide feedback on procedures and processes. • Gather and interpret information to support safe and efficient work. • Ask questions regarding requirements and expectations. • Make suggestions for continuous improvement. • Inspect quality of work on an ongoing basis. • Record basic information on the quality and other indicators of work outcomes.

<p>Planning and organising</p>	<ul style="list-style-type: none"> • Identify work requirements and work load priorities. • Plan work activities to meet daily work requirements. • Direct items to the correct area for further processing. • Identify and use relevant personal protective equipment. • Organise work area to maintain housekeeping standards. • Select and organise relevant equipment and tools. • Identify and report issues affecting ability to meet work outcomes.
<p>Self-management</p>	<ul style="list-style-type: none"> • Understand own work activities. • Identify personal responsibilities. • Accept responsibility for quality of own work. • Follow OHS and food safety practices. • Plan to meet required work outcomes of self and team. • Monitor own work. • Maintain own work efficiency. • Keep the work area clean and tidy at all times.
<p>Learning</p>	<ul style="list-style-type: none"> • Assess own competencies in meeting job requirements. • Listen to feedback and advice of supervisors. • Identify own skill requirements and seek skill development if require. • Attend training or skill development activities. • Ask questions to expand own knowledge.
<p>Technology</p>	<ul style="list-style-type: none"> • Use work tools, machines and equipment safely and effectively. • Perform minor maintenance on machinery in accordance with workplace practice. • Use manual handling technologies in the workplace.

Packaging Rules

This Qualification requires the achievement of **twelve (12)** Units of Competency in accordance with the following rules.

Total Units must include a minimum of seven (7) Units coded FDF.

Four (4) Core Units

Eight (8) Elective Units

Elective selection must include:

- Five (5) Group A elective Units

Three (3) remaining elective Units may be selected from:

- Group A elective Units below, not previously selected
- Group B elective Units
- Units from this Training Package, any other nationally endorsed Training Package and accredited course that are packaged at Certificate I level (maximum 1 Unit), Certificate II (maximum 2 Units), and Certificate III level (maximum 1 Unit)

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

CORE UNITS

Complete the following four (4) Units:

FDFOHS2001A	Participate in OHS processes
FDFOP2064A	Provide and apply workplace information
FDFPH2001A	Apply Good Manufacturing Practice procedures
MSAENV272B	Participate in environmentally sustainable work practices

ELECTIVE UNITS

GROUP A

Select a minimum of five (5) Units from the Sector Specialist and Cross Sector Units below. A minimum of one (1) pharmaceutical manufacturing specialist Unit coded FDFPH must be included in the selection.

Sector Specialist Units	
FDFPH2002A	Operate a concentration process
FDFPH2003A	Operate an extraction process
FDFPH2004A	Operate a separation process using chromatography* <i>FDFOP2032A Work in a clean room environment</i>

Sector Specialist Units	
FDFPH2005A	Operate an aseptic fill and seal process* <i>FDFOP2032A Work in a clean room environment</i>
FDFPH2006A	Operate an aseptic form, fill and seal process* <i>FDFOP2032A Work in a clean room environment</i>
FDFPH2007A	Coordinate a label store
FDFPH2008A	Operate a compressing process
FDFPH2009A	Dispense pharmaceutical raw materials
FDFPH2010A	Operate an encapsulation process
FDFPH2011A	Operate a granulation process
FDFPH2012A	Operate a liquid manufacturing process
FDFPH2013A	Operate a tablet coating process
FDFPH2014A	Operate a terminal sterilisation process
Cross Sector Units	
FDFOP1003A	Carry out manual handling tasks
FDFOP2001A	Work effectively in the food processing industry
FDFOP2002A	Inspect and sort materials and product
FDFOP2003A	Clean equipment in place
FDFOP2004A	Clean and sanitise equipment
FDFOP2006A	Operate a bulk dry goods transfer process
FDFOP2007A	Work in a freezer storage area
FDFOP2008A	Operate a bulk liquid transfer process
FDFOP2009A	Load and unload tankers
FDFOP2010A	Work with temperature controlled stock
FDFOP2011A	Conduct routine maintenance
FDFOP2012A	Maintain food safety when loading, unloading and transporting food
FDFOP2013A	Apply sampling procedures
FDFOP2014A	Participate in sensory analyses
FDFOP2015A	Apply principles of statistical process control* <i>FDFOP2061A Use numerical applications in the workplace</i>
FDFOP2016A	Work in a food handling area for non-food handlers

Sector Specialist Units	
FDFOP2017A	Operate a blending, sieving and bagging process
FDFOP2018A	Operate a case packing process
FDFOP2019A	Fill and close product in cans
FDFOP2020A	Operate a form, fill and seal process
FDFOP2021A	Operate a fill and seal process
FDFOP2022A	Operate a high speed wrapping process
FDFOP2023A	Operate a packaging process
FDFOP2024A	Operate a cooling, slicing and wrapping process
FDFOP2025A	Manufacture extruded and toasted products
FDFOP2026A	Operate a forming or shaping process
FDFOP2027A	Dispense non-bulk ingredients
FDFOP2028A	Operate a mixing or blending process
FDFOP2029A	Operate a baking process
FDFOP2030A	Operate a process control interface
FDFOP2031A	Operate a coating application process
FDFOP2032A	Work in a clean room environment* <i>FDFFS2001A Implement food safety program and procedures OR FDFPH2001A Apply Good Manufacturing Practice procedures</i>
FDFOP2033A	Operate a depositing process
FDFOP2034A	Operate an evaporation process
FDFOP2035A	Operate an enrobing process
FDFOP2036A	Operate an extrusion process
FDFOP2037A	Operate a filtration process
FDFOP2038A	Operate a grinding process
FDFOP2039A	Operate a frying process
FDFOP2040A	Operate a heat treatment process
FDFOP2041A	Operate a mixing or blending and cooking process
FDFOP2042A	Operate a drying process
FDFOP2043A	Operate an homogenising process
FDFOP2044A	Operate a retort process
FDFOP2045A	Operate pumping equipment

Sector Specialist Units	
FDFOP2046A	Operate a production process
FDFOP2047A	Operate a portion saw
FDFOP2048A	Pre-process raw materials
FDFOP2049A	Operate a reduction process
FDFOP2050A	Operate a separation process
FDFOP2051A	Operate a spreads production process
FDFOP2052A	Operate a chocolate tempering process
FDFOP2053A	Operate a washing and drying process
FDFOP2054A	Operate a water purification process
FDFOP2055A	Freeze dough
FDFOP2056A	Operate a freezing process
FDFOP2057A	Operate a membrane process
FDFOP2058A	Operate a holding and storage process
FDFOP2059A	Operate a continuous freezing process
FDFOP2060A	Operate an automated cutting process
FDFOP2061A	Use numerical applications in the workplace
FDFPPL2001A	Participate in work teams and groups
FDFSUG222A	Operate a waste water treatment system
MSL973001A	Perform basic tests
MTMPSR203A	Sharpen knives
MTMPSR201C	Vacuum pack product
PMBPROD211B	Operate blow moulding equipment
PMBPROD270B	Operate injection blow moulding equipment
TLIA2009A	Complete and check import/export documentation
TLIA2014A	Use product knowledge to complete work operations
TLIA2021A	Despatch stock
TLIA4025A	Regulate temperature controlled stock
TLID2003A	Handle dangerous goods/hazardous substances
TLID2004A	Load and unload goods/cargo
TLID2010A	Operate a forklift
TLIK2010A	Use infotechnology devices in the workplace

GROUP B

FDFOP2005A	Work in a socially diverse environment
FDFSUG218A	Operate a boiler - basic
BSBITU201A	Produce simple word processed documents
BSBITU202A	Create and use spreadsheets
BSBWOR204A	Use business technology
HLTFA201B	Provide basic emergency life support
MSS402010A	Manage the impact of change on own work
MSS402001A	Apply competitive systems and practices
MSS402002A	Sustain process improvements
MSS402021A	Apply Just in Time procedures
MSS402030A	Apply cost factors to work practices
MSS402031A	Interpret product costs in terms of customer requirements
MSS402040A	Apply 5S procedures
MSS402050A	Monitor process capability
MSS402051A	Apply quality standards
MSS402060A	Use planning software systems in operations
MSS402061A	Use SCADA systems in operations
MSS402080A	Undertake root cause analysis
MSS402081A	Contribute to the application of a proactive maintenance strategy
SIRXFIN201	Balance and secure point-of-sale terminal
SIRXFIN002A	Perform retail finance duties
SIRXMER201	Merchandise products
SIRXRSK001A	Minimise theft
SIRXSLS002A	Advise on products and services

FDF20411 Certificate II in Wine Industry Operations

Modification History

This qualification supersedes and is equivalent to FDF20403 Certificate II in Food Processing (Wine).

September 2012: Replacement of superseded imported Units.

April 2012: Update of imported SUG Units to new FDFSUG Units.

Description

This Qualification provides vocational skills for work in the wine industry. A range of specialist electives are included covering skills used in the following wine industry operational areas:

- bottling and packaging
- cellar door sales
- cellar operations
- laboratory
- warehousing
- wine grape growing.

Testamur issued for this Qualification are to be titled ‘Certificate II in Wine Industry Operations’.

An additional descriptor in brackets after the Qualification title e.g. FDF20411 Certificate II in Wine Industry Operations (Cellar Operations) may be added by a Registered Training Organisation (RTO). Any additional descriptor should reflect a minimum selection of at least five (5) specialist Units from one of the following Unit groups:

- bottling and packaging
- cellar door sales
- cellar operations
- laboratory
- warehousing
- wine grape growing.

Job Roles The FDF20411 Certificate II in Wine Industry Operations targets those working within a production or production support role. Job roles in the industry often vary in the degree of skill specialisation and the Qualification packaging rules reflect this diversity through allowing a choice of specialist electives in one specialisation area or a combination of grape growing, cellar operations, bottling and packaging, warehousing, laboratory and cellar door sales work.

This Qualification is designed for application in supervised environments where the work is predictable with some basic problem solving requirements.

Those performing a purely warehousing role in the wine production industry should consider the TLI21610 Certificate II in Warehousing Operations.

Those performing a purely laboratory operations role in the wine production industry should consider the MSL20109 Certificate II in Sampling and Measurement.

Those performing a purely cellar door role in the wine production industry should consider the SIT20207 Certificate II in Hospitality

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Many Units in this Qualification assume a basic level of mathematics equivalent to a school sector Year 10 standard. If a student does not possess this level of mathematics then the Unit FDFOP2061A Use numerical applications in the workplace, should be selected as part of this Qualification.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options, including on-the-job and work-based training, that support the development of competency.

Pathways Information

Pathways into the Qualification Pathways for candidates considering this Qualification include:

- FDF10111 Certificate I in Food Processing
- direct entry
- limited vocational training and/or work experience.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake a FDF30411 Certificate III in Wine Industry Operations with an industry specialisation according to the needs of the enterprise and higher level job functions.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, an individual Unit of Competency may specify relevant licensing, legislative and/or regulatory requirements.

Entry Requirements

Not applicable.

Employability Skills Summary

Certificate II in Wine Industry Operations

The following table contains a summary of the employability skills as identified by the wine industry for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Complete work forms and required written documentation • Use communication and information technologies to support work operations • Demonstrate effective and appropriate interpersonal skills • Interpret and apply workplace procedures and instructions • Share workplace information • Communicate information about problems with work • Communicate information relating to OHS.
Teamwork	<ul style="list-style-type: none"> • Work as part of a team • Provide assistance to others in the work area • Identify own role and responsibilities within a team • Identify team goals • Share work-related information • Maintain health and safety of work area for self and others.
Problem solving	<ul style="list-style-type: none"> • Identify and report any workplace hazards • Identify workplace problems and make contributions to their solution • Identify and apply health and safety issues relating to work in the wine industry • Apply knowledge of materials, product purpose and processes to work operations • Check performance of machines and equipment and identify signs of faulty operations • Monitor workplace activities and identify and report non-compliances.
Initiative and enterprise	<ul style="list-style-type: none"> • Provide feedback on procedures and processes • Gather and interpret information to support safe and efficient work • Ask questions regarding requirements and expectations • Make suggestions for continuous improvement • Inspect quality of work on an ongoing basis • Record basic information on the quality and other indicators of work outcomes.

Planning and organising	<ul style="list-style-type: none"> • Identify work requirements and work load priorities • Plan work activities to meet daily work requirements • Direct items to the correct area for further processing • Identify and use relevant personal protective equipment • Organise work area to maintain housekeeping standards • Select and organise relevant equipment and tools • Identify and report issues affecting ability to meet work outcomes,
Self-management	<ul style="list-style-type: none"> • Understand own work activities • Identify personal responsibilities • Accept responsibility for quality of own work • Participate in OHS practices • Apply food safety practices • Plan to meet required work outcomes of self and team • Monitor own work • Maintain own work efficiency • Keep the work area clean and tidy at all times.
Learning	<ul style="list-style-type: none"> • Assess own competencies in meeting job requirements • Listen to feedback and advice of supervisors • Identify own skill requirements and seek skill development if required • Attend training or skill development activities • Ask questions to expand own knowledge.
Technology	<ul style="list-style-type: none"> • Use work tools, machines and equipment safely and effectively • Perform minor maintenance on machinery in accordance with workplace practice • Use manual handling technologies in the workplace.

Packaging Rules

This Qualification requires the achievement of **seventeen (17)** Units of Competency in accordance with the following rules.

- **Five (5)** core Units of Competency
- **Twelve (12)** elective Units of Competency.

Elective selection must include:

- **Five (5)** Group A Wine specialist elective Units
- **Four (4)** Group B Wine specialist elective Units.

Elective Units from Group A and Group B may be a combination of Units selected from any of the wine industry operational Unit areas listed below:

- bottling and packaging
- cellar door sales
- cellar operations
- laboratory
- warehousing
- wine grape growing.

Three (3) remaining elective Units may be selected from:

- Group A Wine specialist elective Units, not previously selected
- Group B Wine specialist elective Units, not previously selected
- Group C General elective Units, listed below
- A maximum of three (3) Units from any nationally endorsed Training Package and accredited course that are packaged at Certificate II level, Certificate I level (maximum 1 Unit) and Certificate III level (maximum 1 Unit).

Prerequisite Units

Units marked with an asterisk (*) require completion of prerequisite Units identified under the Unit. Prerequisite Units count towards the total Units required for the Qualification.

CORE UNITS

- Complete the following five (5) Units.

FDFFS2001A	Implement the food safety program and procedures
FDFOHS2001A	Participate in OHS processes
FDFOP2063A	Apply quality systems and procedures
FDFOP2064A	Provide and apply workplace information

MSAENV272B	Participate in environmentally sustainable work practices
------------	---

ELECTIVE UNITS

- Select a total of **twelve (12)** elective Units from the following groups.

Elective Units may be selected from one specialist wine industry operational Unit area or from multiple Unit areas.

GROUP A: Wine specialist elective Units

- Select a minimum of five (5) Units.

Bottling and packaging

FDFBP2001A	Operate the bottle supply process
FDFBP2002A	Operate the carton erection process
FDFBP2003A	Operate the carton packing process
FDFBP2005A	Operate the electronic coding process
FDFBP2009A	Operate the bottle capsuling process
FDFBP2010A	Operate manual bottling and packaging processes
FDFLAB2003A	Perform basic packaging tests and inspections* <i>FDFLAB2011A Use basic laboratory equipment</i>
FDFOP2004A	Clean and sanitise equipment

Cellar door sales

BSBCUS201B	Deliver a service to customers
SIRXCCS201	Apply point-of-sale handling procedures
SIRXMER201	Merchandise products
SIRXRSK001A	Minimise theft
SITHCCC001B	Organise and prepare food <i>SITXOHS002A Follow workplace hygiene procedures</i>
SITHFAB003A	Serve food and beverage to customers* <i>SITXOHS002A Follow workplace hygiene procedures</i>

SITHFAB004A	Provide food and beverage service* <i>SITHFAB003A Serve food and beverage to customers</i> <i>SITXOHS002A Follow workplace hygiene procedures</i>
SITHFAB009A	Provide responsible service of alcohol
SITHFAB011A	Develop and update food and beverage knowledge
SITHFAB012B	Prepare and serve espresso coffee
SITTIND001B	Develop and update tourism industry knowledge
SITXCCS001B	Provide visitor information
SITXFIN001A	Process financial transactions
SITXOHS002A	Follow workplace hygiene procedures

Cellar operations

FDFCEL2001A	Perform oak handling activities* <i>FDFCEL2018A Carry out inert gas handling operations</i> <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2003A	Operate the ion exchange process* <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2004A	Perform single column lees stripping (continuous still brandy) operations* <i>FDFOP2004A Clean and sanitise equipment</i> <i>FDFOP2013A Apply sampling procedures</i> <i>MSL973001A Perform basic tests</i>
FDFCEL2009A	Perform first distillation (pot still brandy) operations* <i>FDFOP2013A Apply sampling procedures</i> <i>MSL973001A Perform basic tests</i>
FDFCEL2011A	Perform heat exchange operations
FDFCEL2015A	Perform must draining operations* <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2016A	Operate the crushing process* <i>FDFCEL2019A Carry out transfer operations</i>

FDFCEL2017A	Prepare and make additions and finings
FDFCEL2018A	Carry out inert gas handling operations
FDFCEL2019A	Carry out transfer operations
FDFCEL2020A	Prepare and wax tanks

Laboratory

FDFLAB2011A	Use basic laboratory equipment
MSL912001A	Work within a laboratory_field workplace (induction)
MSL922001A	Record and present data
MSL933001A	Maintain the laboratory_field workplace fit for purpose
MSL943002A	Participate in laboratory_field workplace safety
MSL952001A	Collect routine site samples
MSL952002A	Handle and transport samples or equipment
MSL972001A	Conduct routine site measurements

Warehousing

TLIA2011A	Package goods
TLIA2012A	Pick and process orders
TLIA2022A	Participate in stocktakes
TLID1001A	Shift materials safely using manual handling methods
TLID2004A	Load and unload goods/cargo
TLID2010A	Operate a forklift
TLIK2010A	Use infotechnology devices in the workplace

Wine grape growing

FDFWGG2001A	Bench graft vines
FDFWGG2002A	Carry out potting operations

FDFWGG2003A	Hand prune vines
FDFWGG2004A	Undertake irrigation systems maintenance activities
FDFWGG2008A	Train vines
FDFWGG2011A	Install irrigation components
FDFWGG2013A	Deliver injection requirements
FDFWGG2015A	Support mechanical harvesting operations* <i>AHCMOM202A Operate tractors</i> <i>FDFWGG2018A Operate vineyard equipment</i>
FDFWGG2019A	Perform vertebrate pest control activities
FDFWGG2021A	Operate nursery cold storage facilities
FDFWGG2022A	Take and process vine cuttings
FDFWGG2023A	Carry out basic canopy maintenance
FDFWGG2024A	Pick grapes by hand
FDFWGG2025A	Plant vines by hand
AHCCHM101A	Follow basic chemical safety rules
AHCCHM201A	Apply chemicals under supervision
AHCSOL201A	Determine basic properties of soil and/or growing media

GROUP B: Wine specialist elective Units

- Select a minimum of **four (4)** Units.

Bottling and packaging

FDFBP2004A	Operate the bottle sealing process
FDFBP2006A	Operate traditional sparkling wine processes
FDFBP2007A	Operate the tirage and transfer process
FDFBP2008A	Perform packaging equipment changeover
FDFBP2011A	Operate the palletising process

FDFOP2003A	Clean equipment in place
FDFOP2011A	Conduct routine maintenance
FDFOP2030A	Operate a process control interface

Cellar door sales

FDFCD2001A	Conduct winery and or site tours* <i>FDFCD2002A Promote wine tourism information*</i> <i>SIRXCCS202 Interact with customers</i>
FDFCD2002A	Promote wine tourism information* <i>SIRXCCS202 Interact with customers</i>
FDFCD2003A	Evaluate wines (standard)
FDFCD2004A	Perform cellar door stock control procedure* <i>FDFCD2003A Evaluate wines (standard)</i>
FDFCD2005A	Sell cellar door products and services* <i>FDFCD2003A Evaluate wines (standard)</i> <i>SIRXCCS202 Interact with customers</i> <i>SITHFAB009A Provide responsible service of alcohol</i>
FDFCD2006A	Conduct a standard product tasting* <i>FDFCD2003A Evaluate wines (standard)</i> <i>SIRXCCS202 Interact with customers</i> <i>SITHFAB009A Provide responsible service of alcohol</i>
SIRXCCS202	Interact with customers
SIRXFIN201	Balance and secure point-of-sale terminal
SIRXICT303	Operate retail information technology systems

Cellar operations

FDFCEL2002A	Perform fermentation operations* <i>FDFCEL2017A Prepare and make additions and finings</i>
FDFCEL2005A	Operate the pressing process*

	<i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2006A	Operate clarification by separation (centrifugation) process* <i>FDFCEL2018A Carry out inert gas handling operations</i> <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2007A	Prepare and monitor wine cultures * <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2008A	Perform dual column distillation (continuous still brandy) operations* <i>FDFCEL2004A Perform single column lees stripping (continuous still brandy) operations*</i> <i>FDFOP2004A Clean and sanitise equipment</i> <i>FDFOP2013A Apply sampling procedures</i> <i>MSL973001A Perform basic tests</i> <i>FDFCEL2012A Handle spirits*</i> <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2010A	Operate the fine filtration process
FDFCEL2012A	Handle spirits* <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2013A	Operate the pressure leaf filtration process* <i>FDFCEL2018A Carry out inert gas handling operations</i> <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2014A	Operate the rotary vacuum filtration process* <i>FDFCEL2018A Carry out inert gas handling operations</i> <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL3001A	Perform second distillation (pot still brandy) operations* <i>FDFOP2013A Apply sampling procedures</i> <i>MSL973001A Perform basic tests</i>

Laboratory

FDFLAB2001A	Perform basic analytical tests* <i>FDFLAB2011A Use basic laboratory equipment</i>
FDFLAB2002A	Perform basic microbiological tests*

	<i>FDFLAB2012A Maintain aseptic environment</i> <i>FDFLAB2011A Use basic laboratory equipment</i>
FDFLAB2004A	Prepare laboratory solutions and stains* <i>FDFLAB2011A Use basic laboratory equipment</i>
FDFLAB2005A	Prepare and pour culture media* <i>FDFLAB2012A Maintain aseptic environment</i> <i>FDFLAB2011A Use basic laboratory equipment</i>
FDFLAB2006A	Record laboratory data
FDFLAB2007A	Standardise laboratory solutions* <i>FDFLAB2011A Use basic laboratory equipment</i>
FDFLAB2008A	Analyse laboratory data* <i>FDFLAB2006A Record laboratory data</i>
FDFLAB2010A	Prepare product or show samples* <i>FDFLAB2011A Use basic laboratory equipment</i>
FDFLAB2012A	Maintain aseptic environment* <i>FDFLAB2011A Use basic laboratory equipment</i>

Warehousing

TLIA2009A	Complete and check import/export documentation
TLIA2021A	Despatch stock
TLIA3017A	Identify products and store to specifications
TLIA3038A	Control and order stock
TLIA3039A	Receive and store stock
TLIB2009A	Check conveyor operational status
TLID1002A	Shift a load using manually-operated equipment
TLID2003A	Handle dangerous goods/hazardous substances
TLID2022A	Conduct weighbridge operations
TLIP2029A	Prepare and process financial documents

Wine grape growing

FDFWGG2005A	Maintain callusing environment
FDFWGG2006A	Obtain and process rootlings
FDFWGG2007A	Tend containerised nursery plants
FDFWGG2009A	Operate specialised canopy management equipment* <i>AHCMOM202A Operate tractors</i>
FDFWGG2010A	Field graft vines
FDFWGG2012A	Identify and treat nursery plant disorders
FDFWGG2014A	Operate the irrigation system
FDFWGG2016A	Install and maintain vine trellis
FDFWGG2017A	Recognise disorders and identify pests and diseases
FDFWGG2018A	Operate vineyard equipment
FDFWGG2020A	Carry out hot water treatment
FDFWGG3013A	Operate spreading and seeding equipment* <i>AHCMOM202A Operate tractors</i>
AHCARB205A	Operate and maintain chainsaws
AHCCHM303A	Prepare and apply chemicals
AHCCHM304A	Transport, handle and store chemicals
AHCMOM202A	Operate tractors
HLTFA301C	Apply first aid

GROUP C: General elective Units

- Select a maximum of three (3) Units.

FDFOP1003A	Carry out manual handling tasks
FDFOP2005A	Work in a socially diverse environment
FDFOP2013A	Apply sampling procedures

FDFOP2016A	Work in a food handling area for non-food handlers
FDFOP2061A	Use numerical applications in the workplace
FDFOP2065A	Work in confined spaces in the food and beverage industries* <i>FDFOHS2001A Participate in OHS processes</i>
FDFPPL2001A	Participate in work teams and groups
FDFSUG218A	Operate a boiler - basic
FDFSUG222A	Operate a waste water treatment system
FDFWIN2001A	Perform effectively in a wine industry workplace
FDFWIN2002A	Identify and control risks in own work
AHCINF204A	Fabricate and repair metal or plastic structures
BSBITU201A	Produce simple word processed documents
BSBWOR204A	Use business technology
MEM18002B	Use power tools/hand held operations
MSACMT270A	Use sustainable energy practices
MSL973001A	Perform basic tests
MSS402002A	Sustain process improvements
MSS402010A	Manage the impact of change on own work
MSS402021A	Apply Just in Time procedures
MSS402030A	Apply cost factors to work practices
MSS402031A	Interpret product costs in terms of customer requirements
MSS402040A	Apply 5S procedures
MSS402050A	Monitor process capability
MSS402051A	Apply quality standards
MSS402060A	Use planning software systems in operations
MSS402061A	Use SCADA systems in operations

MSS402080A	Undertake root cause analysis
MSS402081A	Contribute to the application of a proactive maintenance strategy
SITXCOM001A	Work with colleagues and customers

FDF20510 Certificate II in Retail Baking Assistance

Modification History

September 2012: Replacement of superseded imported Units.

November 2011: Update to imported Units, minor edits.

Description

This Qualification covers the retail baking specialisation within the food processing industry.

Job Roles

The Certificate II in Retail Baking Assistance targets those working within a retail baking environments undertaking non-trade related work or working as a trade assistant. This Qualification is designed for application in supervised environments where the work is primarily predictable with some basic problem solving requirements. Typically this role would include some predetermined, routine baking functions with customer service and general preparation and cleaning skills.

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Some Units imported into this Qualification from the SIR07 Retail Services and SIT07 Tourism, Hospitality and Events Training Packages require prerequisite Units in hygiene and food safety from the source Training Packages. These prerequisite Units have not been imported as they duplicate food safety Units already required as core skills within the Food Processing Training Package Qualifications. If selecting these Units, the RTO should facilitate recognition of the FDF Units as suitable prerequisite Unit alternatives.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this Qualification include:

- FDF10111 Certificate I in Food Processing
- direct entry
- limited vocational training and/or work experience.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake FDF30510 Certificate III in Retail Baking (Cake and Pastry), FDF30610 Certificate III in Retail Baking (Bread) or FDF30710 Certificate III in Retail Baking (Combined).

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, all work must comply with food safety, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace.

Entry Requirements

Not applicable.

Employability Skills Summary

Certificate II in Retail Baking Assistance

The following table contains a summary of the employability skills as identified by the retail baking industries for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Complete work forms and required written documentation. • Use communication and information technologies to support work operations. • Demonstrate effective and appropriate interpersonal skills. • Interpret and apply workplace procedures and instructions. • Share workplace information. • Communicate information about problems with work. • Communicate information relating to OHS.
Teamwork	<ul style="list-style-type: none"> • Work as part of a team. • Provide assistance to others in the work area. • Identify own role and responsibilities within a team. • Identify team goals. • Share work-related information. • Maintain health and safety of work area for self and others.
Problem-solving	<ul style="list-style-type: none"> • Identify and report any workplace hazards. • Identify workplace problems and make contributions to their solution. • Identify health and safety issues relating to work in the retail baking industry. • Apply food safety procedures. • Apply knowledge of materials, product purpose and processes to work operations. • Check performance of machines and equipment and identify signs of faulty operations. • Monitor workplace activities and identify and report non-compliances.
Initiative and enterprise	<ul style="list-style-type: none"> • Provide feedback on procedures and processes. • Gather and interpret information to support safe and efficient work. • Ask questions regarding requirements and expectations. • Make suggestions for continuous improvement. • Inspect quality of work on an ongoing basis. • Record basic information on the quality and other indicators of work outcomes.

<p>Planning and organising</p>	<ul style="list-style-type: none"> • Identify work requirements and work load priorities. • Plan work activities to meet daily work requirements. • Direct items to the correct area for further processing. • Identify and use relevant personal protective equipment. • Organise work area to maintain housekeeping standards. • Select and organise relevant equipment and tools. • Identify and report issues affecting ability to meet work outcomes.
<p>Self-management</p>	<ul style="list-style-type: none"> • Understand own work activities. • Identify personal responsibilities. • Accept responsibility for quality of own work. • Follow OHS and food safety practices. • Plan to meet required work outcomes of self and team. • Monitor own work. • Maintain own work efficiency. • Keep the work area clean and tidy at all times.
<p>Learning</p>	<ul style="list-style-type: none"> • Assess own competencies in meeting job requirements. • Listen to feedback and advice of supervisors. • Identify own skill requirements and seek skill development if required. • Attend training or skill development activities. • Ask questions to expand own knowledge.
<p>Technology</p>	<ul style="list-style-type: none"> • Use work tools, machines and equipment safely and effectively. • Perform minor maintenance on machinery in accordance with workplace practice. • Use manual handling technologies in the workplace.

Packaging Rules

This Qualification requires the achievement of **thirteen (13)** Units of Competency in accordance with the following rules.

Total Units must include a minimum of eight (8) Units coded FDF.

Eight (8) Core Units

Five (5) Elective Units

Elective selection must include:

- Three (3) Group A elective Units

Two (2) remaining elective Units may be selected from:

- Group A elective Units below, not previously selected
- Units from this Training Package, any other nationally endorsed Training Package and accredited course that are packaged at Certificate I level (maximum 1 Unit) Certificate II level, and Certificate III level (maximum 1 Unit)

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

CORE UNITS

Complete all eight (8) core Units.

FDFFS2001A	Implement the food safety program and procedures
FDFOHS2001A	Participate in OHS processes
FDFOP2061A	Use numerical applications in the workplace
FDFOP2063A	Apply quality systems and procedures
FDFOP2064A	Provide and apply workplace information
FDFRB2004A	Provide production assistance for bread products
FDFRB2005A	Provide assistance in cake, pastry and biscuit production
MSAENV272B	Participate in environmentally sustainable work practices

GROUP A

Select a minimum of three (3) Group A Units. At least two (2) Units must start with the code FDFRB or FDFBK.

FDFBK2001A	Operate a cooling and slicing process
FDFBK2002A	Operate a pastry forming and filling process

FDFBK2005A	Operate a doughnut making process
FDFBK2006A	Operate a griddle production process
FDFBK2007A	Operate a pastry production process
FDFOP1003A	Carry out manual handling tasks
FDFOP2003A	Clean equipment in place
FDFOP2004A	Clean and sanitise equipment
FDFOP2005A	Work in a socially diverse environment
FDFOP2011A	Conduct routine maintenance
FDFOP2022A	Operate a high speed wrapping process
FDFPPL2001A	Participate in work teams and groups
FDFRB1001A	Finish products
FDFRB2001A	Form and fill pastry products
FDFRB2002A	Prepare fillings
FDFRB2003A	Produce meringue-based products
HLTFA301C	Apply first aid
SIRXFIN201	Balance and secure point-of-sale terminal
SIRXFIN002A	Perform retail finance duties
SIRXMER201	Merchandise products
SIRRMER004A	Prepare and display bakery products* <i>SIRRFSA001A Apply retail food safety practices</i>
SIRXRSK001A	Minimise theft
SIRXSLS002A	Advise on products and services
SITHFAB012B	Prepare and serve espresso coffee

FDF20911 Certificate II in Food Processing (Sales)

Modification History

This Qualification supersedes and is equivalent to FDF20910 Certificate II in Food Processing (Sales).

September 2012: Replacement of superseded imported Units.

April 2012: Update of imported SUG Units to new FDFSUG Units. Minor typographical corrections.

November 2011: Update to imported Units, including one non-equivalent Unit. Minor edits.

Description

This Qualification covers the sales specialisations within the food processing industry.

Job Roles

The Certificate II in Food Processing (Sales) targets those assisting in a sales capacity within a manufacturing or retail food processing environment. This Qualification is designed for application in supervised environments where the work is predictable with some basic problem solving requirements.

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Some Units imported into this Qualification from the SIR07 Retail Services Training Package require a prerequisite Unit in food safety from the source Training Package. This prerequisite Unit has not been imported as it duplicates food safety Units already required as core skills within the Food Processing Training Package Qualifications. If selecting this Unit, the RTO should facilitate recognition of the FDF Units as a suitable prerequisite Unit alternative.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this Qualification include:

- Certificate I in Food Processing
- direct entry
- limited vocational training and/or work experience.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake the FDF30910 Certificate III in Food Processing (Sales) with an industry specialisation according to the needs of the enterprise and higher level job functions, or any other suitable Qualification.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, an individual Unit of Competency may specify relevant licensing, legislative and/or regulatory requirements. In addition, all work must comply with food safety, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace.

Entry Requirements

Not applicable.

Employability Skills Summary

Certificate II in Food Processing (Sales)

The following table contains a summary of the employability skills as identified by the Food Processing industries for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Complete work forms and required written documentation. • Use communication and information technologies to support work operations. • Demonstrate effective and appropriate interpersonal skills to assess customer needs. • Interpret and apply workplace procedures and instructions. • Share workplace information. • Communicate information about problems with work. • Communicate information relating to OHS. • Establish rapport with customers and identify and use suitable communication mediums.
Teamwork	<ul style="list-style-type: none"> • Work as part of a team. • Provide assistance to others in the work area. • Identify own role and responsibilities within a team. • Identify team goals. • Share work-related information. • Maintain health and safety of work area for self and others. • Understand and communicate team processes that impact on product availability.
Problem-solving	<ul style="list-style-type: none"> • Identify and report any workplace hazards. • Identify workplace problems and make contributions to their solution. • Identify health and safety issues relating to work in the food industry. • Identify customer requirements and suitable service options. • Provide product and service advice to customers. • Apply knowledge of materials, product purpose and processes to work operations.
Initiative and enterprise	<ul style="list-style-type: none"> • Provide feedback on procedures and processes. • Gather and interpret information to support safe and efficient work. • Ask questions regarding customer requirements and expectations.

	<ul style="list-style-type: none"> • Make suggestions for continuous improvement. • Inspect quality of outcomes on an ongoing basis. • Seek to resolve customer issues.
Planning and organising	<ul style="list-style-type: none"> • Identify order priorities. • Plan work activities to meet daily work requirements. • Organise work area to maintain housekeeping standards. • Identify and report issues affecting ability to meet work outcomes. • Complete customer order information.
Self-management	<ul style="list-style-type: none"> • Understand own work activities. • Identify personal responsibilities. • Accept responsibility for quality of own work. • Follow OHS and food safety practices. • Plan to meet required work outcomes. • Monitor own work. • Maintain own work efficiency. • Keep the work area clean and tidy at all times. • Check accuracy of own documented information.
Learning	<ul style="list-style-type: none"> • Assess own competencies in meeting job requirements. • Listen to feedback and advice of supervisors. • Identify own skill requirements and seek skill development if required. • Attend training or skill development activities. • Ask questions to expand own knowledge. • Seek information to supply to customers.
Technology	<ul style="list-style-type: none"> • Use appropriate tools, machines and equipment safely and effectively. • Use information and communication technologies. • Understand production processes.

Packaging Rules

This Qualification requires the achievement of **thirteen (13)** Units of Competency in accordance with the following rules.

Total Units must include a minimum of eight (8) Units coded FDF.

Six (6) Core Units

Seven (7) Elective Units

Elective selection must include:

- Two (2) Group A elective Units
- Two (2) Group B Specialist and Cross Sector elective Units

Three (3) remaining elective Units may be selected from:

- Group A elective Units below, not previously selected
- Group B elective Units below, not previously selected
- Group C elective Units
- Units from this Training Package, any other nationally endorsed Training Package and accredited course that are packaged at Certificate I level (maximum 1 Unit), Certificate II level (maximum 2 Units) and Certificate III level (maximum 1 Unit)

NOTE 1: Units packaged at Certificate III in Retail Baking or Plant Baking cannot be included within the Certificate II in Food Processing (Sales).

NOTE 2: Units marked with an asterisk (*) require completion of prerequisite Unit/s identified under the Unit.

CORE UNITS

Complete the following six (6) Units.

FDFFS2001A	Implement the food safety program and procedures #
FDFOHS2001A	Participate in OHS processes
FDFOP2061A	Use numerical applications in the workplace
FDFOP2063A	Apply quality systems and procedures
FDFOP2064A	Provide and apply workplace information
MSAENV272B	Participate in environmentally sustainable work practices

In the case where this Qualification is to be applied in a work environment where food is processed for non-human consumption such as pet food and stock feed or other situations where human food safety skills are not required, then this Unit may be replaced by **FDFOP2062A Apply work procedures to maintain integrity of product.**

ELECTIVE UNITS

Group A

SIRRMER004A	Prepare and display bakery products* <i>SIRRFSA001A Apply retail food safety practices</i>
SIRXFIN201	Balance and secure point-of-sale terminal
SIRXFIN002A	Perform retail finance duties
SIRXMER201	Merchandise products
SIRXRSK001A	Minimise theft
SIRXSLS002A	Advise on products and services

Select a minimum of two (2) Group A elective Units.

Group B

Sector Specialist Units	
Baking	
FDFBK2001A	Operate a cooling and slicing process
FDFBK2002A	Operate a pastry forming and filling process
FDFBK2003A	Manufacture rye crisp breads
FDFBK2004A	Manufacture wafer products
FDFBK2005A	Operate a doughnut making process
FDFBK2006A	Operate a griddle production process
FDFBK2007A	Operate a pastry production process
FDFOP2024A	Operate a cooling, slicing and wrapping process
FDFOP2055A	Freeze dough
Beverages	
FDFBV2001A	Operate a deaeration, mixing and carbonation process
FDFBV2002A	Manufacture coffee (roast and ground)
FDFBV2003A	Operate an ice manufacturing process
Confectionery	
FDFCON2001A	Examine raw ingredients used in confectionery
FDFCON2002A	Operate a boiled confectionery process
FDFCON2003A	Operate a chocolate conching process
FDFCON2004A	Operate a chocolate depositing or moulding process

FDFCON2005A	Operate a confectionery depositing process
FDFCON2006A	Operate a granulation and compression process
FDFCON2007A	Operate a panning process
FDFCON2008A	Operate a chocolate refining process
FDFCON2009A	Operate a starch moulding process
Dairy processing	
FDFDP2001A	Operate a butter churning process
FDFDP2002A	Operate a butter oil process* <i>FDFOP2043A Operate an homogenisation process OR FDFDP2001A Operate a butter churning process</i>
FDFDP2003A	Operate a curd production and cutting process
FDFDP2004A	Operate a cooling and hardening process
FDFDP2005A	Operate a cheese pressing and moulding process
FDFDP2006A	Operate a fermentation process
Fruit and vegetables	
FDFFV2001A	Apply hydro-cooling process to fresh produce
Grain processing	
FDFGR2001A	Operate a liquid, mash or block stockfeed process
FDFGR2002A	Understand mill operations and technologies
FDFGR2003A	Operate a grain conditioning process
FDFGR2004A	Operate a grain cleaning process
FDFGR2005A	Operate a purification process
FDFGR2006A	Operate a scalping and grading process
FDFGR2007A	Operate a scratch and sizing process
FDFGR2008A	Operate a break roll process
FDFGR2009A	Operate a pelleting process
FDFGR2010A	Handle grain in a storage area
AHCBAC204A	Prepare grain storages
TLIJ2003A	Apply grain protection measures
TLIJ2004A	Implement grain monitoring measures
Grocery products and supplies	

FD20911A	Operate a bleaching process
FD20912A	Operate a complexing process
FD20913A	Operate a deodorising process
FD20914A	Operate a flake preparation process
FD20915A	Operate a fractionation process
FD20916A	Operate a hydrogenation process
FD20917A	Operate an interesterification process
FD20918A	Operate a neutralisation process
FD20919A	Operate a soap splitting process
FD20920A	Operate a winterisation process
FD20921A	Operate a creamed honey manufacture process
Poultry	
FD20922A	Operate a dicing, stripping or mincing process
FD20923A	Operate an evisceration process
FD20924A	Grade carcass
FD20925A	Harvest edible offal
FD20926A	Operate a marinade injecting process
FD20927A	Operate a washing and chilling process
FD20928A	Operate the bird receipt and hanging process
FD20929A	Operate a stunning, killing and defeathering process
FD20930A	Work in an egg grading floor
FD20931A	Operate egg grading and packing floor equipment* <i>FD20930A Work in an egg grading floor</i>
MT20932B	Apply animal welfare and handling requirements
MT20933C	Clean after operations – boning room

Cross Sector Units	
FD20934A	Work effectively in the food processing industry
FD20935A	Inspect and sort materials and product
FD20936A	Clean equipment in place
FD20937A	Clean and sanitise equipment
FD20938A	Operate a bulk dry goods transfer process

Cross Sector Units	
FDFOP2007A	Work in a freezer storage area
FDFOP2008A	Operate a bulk liquid transfer process
FDFOP2009A	Load and unload tankers
FDFOP2010A	Work with temperature controlled stock
FDFOP2011A	Conduct routine maintenance
FDFOP2012A	Maintain food safety when loading, unloading and transporting food
FDFOP2013A	Apply sampling procedures
FDFOP2014A	Participate in sensory analyses
FDFOP2016A	Work in a food handling area for non-food handlers
FDFOP2017A	Operate a blending, sieving and bagging process
FDFOP2018A	Operate a case packing process
FDFOP2019A	Fill and close product in cans
FDFOP2020A	Operate a form, fill and seal process
FDFOP2021A	Operate a fill and seal process
FDFOP2022A	Operate a high speed wrapping process
FDFOP2023A	Operate a packaging process
FDFOP2025A	Manufacture extruded and toasted products
FDFOP2026A	Operate a forming or shaping process
FDFOP2027A	Dispense non-bulk ingredients
FDFOP2028A	Operate a mixing or blending process
FDFOP2029A	Operate a baking process
FDFOP2030A	Operate a process control interface
FDFOP2031A	Operate a coating application process
FDFOP2032A	Work in a clean room environment * <i>FDFFS2001A Implement the food safety program and procedures OR</i> <i>FDFPH2001A Apply Good Manufacturing Practice procedures</i>
FDFOP2033A	Operate a depositing process
FDFOP2034A	Operate an evaporation process
FDFOP2035A	Operate an enrobing process

Cross Sector Units	
FDFOP2036A	Operate an extrusion process
FDFOP2037A	Operate a filtration process
FDFOP2038A	Operate a grinding process
FDFOP2039A	Operate a frying process
FDFOP2040A	Operate a heat treatment process
FDFOP2041A	Operate a mixing or blending and cooking process
FDFOP2042A	Operate a drying process
FDFOP2043A	Operate an homogenising process
FDFOP2044A	Operate a retort process
FDFOP2045A	Operate pumping equipment
FDFOP2046A	Operate a production process
FDFOP2047A	Operate a portion saw
FDFOP2048A	Pre-process raw materials
FDFOP2049A	Operate a reduction process
FDFOP2050A	Operate a separation process
FDFOP2051A	Operate a spreads production process
FDFOP2052A	Operate a chocolate tempering process
FDFOP2053A	Operate a washing and drying process
FDFOP2054A	Operate a water purification process
FDFOP2056A	Operate a freezing process
FDFOP2057A	Operate a membrane process
FDFOP2058A	Operate a holding and storage process
FDFOP2059A	Operate a continuous freezing process
FDFOP2060A	Operate an automated cutting process
FDFSUG218A	Operate a boiler - basic
FDFSUG222A	Operate a waste water treatment system
AHCWRK308A	Handle bulk materials in storage area
MSL973001A	Perform basic tests
MTMPSR203A	Sharpen knives
MTMPSR201C	Vacuum pack product
PMBPROD211B	Operate blow moulding equipment

Cross Sector Units	
PMBPROD270B	Operate injection blow moulding equipment
TLIA2009A	Complete and check import/export documentation
TLIA2021A	Despatch stock
TLIA4025A	Regulate temperature controlled stock
TLID2003A	Handle dangerous goods/hazardous substances
TLID2004A	Load and unload goods/cargo

Select a minimum of two (2) Group B Specialist and Cross Sector Units.

GROUP C

FD209111003A	Carry out manual handling tasks
FD209112005A	Work in a socially diverse environment
FD209112015A	Apply principles of statistical process control* <i>FD209112061A Use numerical applications in the workplace</i>
FD209112001A	Participate in work teams and groups
BSBITU201A	Produce simple word processed documents
BSBITU202A	Create and use spreadsheets
BSBWOR204A	Use business technology
HLTFA201B	Provide basic emergency life support
MSS402010A	Manage the impact of change on own work
MSS402001A	Apply competitive systems and practices
MSS402002A	Sustain process improvements
MSS402021A	Apply Just in Time procedures
MSS402030A	Apply cost factors to work practices
MSACMT231A	Interpret product costs in terms of customer requirements
MSS402040A	Apply 5S procedures
MSS402050A	Monitor process capability
MSS402051A	Apply quality standards
MSACMT260A	Use planning software systems in manufacturing
MSS402060A	Use SCADA systems in operations
MSS402080A	Undertake root cause analysis
MSS402081A	Contribute to the application of a proactive maintenance strategy

SITHFAB012B	Prepare and serve espresso coffee
TLIA2014A	Use product knowledge to complete work operations
TLID2010A	Operate a forklift
TLIK2010A	Use infotechnology devices in the workplace

FDF21012 Certificate II in Sugar Milling Industry Operations

Modification History

This qualification has been derived from SUG20102 Certificate II in Sugar Milling. See Qualification Mapping Guide for notes on equivalence.

Description

Job Roles

This qualification covers work undertaken by sugar milling industry workers. These may include for example:

Sugar Processing

Sugar boiler assistant

Steam plant attendant

Low grade fugal operator

Laboratory worker

Diffuser attendant

Effet operator

High grade fugal operator

Engine driver in mills

Cane Supply Transport

Cane rail construction worker

Cane rail maintenance worker

Truck driver

Locomotive operator

Tamping machine operator

Weighbridge clerk

Forklift operator

Mill Services

Dogger

Rigger

Scaffolder

Assistant bridge carpenter

Mobile crane operator

Backhoe operator

Dozer/front-end loader operator

Additional Qualification Advice

Units selected from other Training Packages must be relevant to the work outcome, local

industry requirements and the qualification level.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this qualification include completion of FDF11011 Certificate I in Sugar Milling Industry Operations or direct entry.

Pathways from the Qualification

After achieving this qualification, candidates may move into employment in the sugar milling industry and undertake the FDF31012 Certificate III in Sugar Milling Industry Operations or any other suitable qualification according to the needs of the enterprise and higher level job functions.

Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

Licensing/Regulatory Information

There is no direct link between this qualification and licensing, legislative and/or regulatory requirements. However, all work must comply with food safety, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace. There are elective Units available in this Qualification linked to the National Standard for Licensing Persons Performing High Risk Work. Refer to the host Training Package for details about the application of these Units and regulatory frameworks for their use.

Entry Requirements

There are no entry requirements for this qualification.

Employability Skills Summary

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • Complete work forms and required written documentation • Use communication and information technologies to support work operations • Demonstrate effective and appropriate interpersonal skills • Interpret and apply workplace procedures and instructions • Share workplace information • Communicate information about problems with work • Communicate information relating to OHS.
Teamwork	<ul style="list-style-type: none"> • Work as part of a team • Provide assistance to others in the work area • Identify own role and responsibilities within a team • Identify team goals • Share work related information • Maintain health and safety of work area for self and others.
Problem-solving	<ul style="list-style-type: none"> • Identify and report any workplace hazards • Identify workplace problems and make contributions to their solution • Identify and apply health and safety issues relating to work in the food industry • Apply knowledge of materials, product purpose and processes to work operations • Check performance of machines and equipment and identify signs of faulty operations • Monitor workplace activities and identify and report non-compliances.
Initiative and Enterprise	<ul style="list-style-type: none"> • Provide feedback on procedures and processes • Gather and interpret information to support safe and efficient work • Ask questions regarding requirements and expectations • Make suggestions for continuous improvement • Inspect quality of work on an ongoing basis • Record basic information on the quality and other indicators of work outcomes.
Planning and Organising	<ul style="list-style-type: none"> • Identify work requirements and work load priorities • Plan work activities to meet daily work requirements • Direct items to the correct area for further processing • Identify and use relevant personal protective equipment • Organise work area to maintain housekeeping standards

	<ul style="list-style-type: none"> • Select and organise relevant equipment and tools • Identify and report issues affecting ability to meet work outcomes.
Self-management	<ul style="list-style-type: none"> • Understand own work activities • Identify personal responsibilities • Accept responsibility for quality of own work • Participate in OHS practices • Apply food safety practices • Plan to meet required work outcomes of self and team • Monitor own work • Maintain own work efficiency • Keep the work area clean and tidy at all times.
Learning	<ul style="list-style-type: none"> • Assess own competencies in meeting job requirements • Listen to feedback and advice of supervisors • Identify own skill requirements and seek skill development if required • Attend training or skill development activities • Ask questions to expand own knowledge.
Technology	<ul style="list-style-type: none"> • Use work tools, machines and equipment safely and effectively • Perform minor maintenance on machinery in accordance with workplace practice • Use manual handling technologies in the workplace.

Packaging Rules

Complete **sixteen (16)** units of competency comprised of:

- Three (3) Core Units
- Thirteen (13) Elective Units

Core Units

Complete all three (3) core units

Unit Code	Unit Title
FDFOHS2001A	Participate in OHS processes
FDFOP2064A	Provide and apply workplace information
MSAENV272B	Participate in environmentally sustainable work practices

Elective Units

- Select a minimum of **six (6)** units from Group A
- **Seven (7)** additional units can come from Group A and or/this or any other endorsed Training Package or accredited course at Certificate I, II, or III.
- Selected units must be relevant to job outcomes in the sugar milling industry.

Group A Units

Sector Specialist Units	
Rail Infrastructure	
FDFSUG201A	Lay sleepers for cane rail systems
FDFSUG202A	Lay rails for cane rail systems
FDFSUG203A	Lay skeleton track for cane rail systems
FDFSUG204A	Operate tamping equipment
FDFSUG205A	Construct turnouts * <i>FDFSUG202A Lay rails for cane rail systems</i>
AHCMOM207A	Conduct front end loader operations
RIICBM305A	Install pre-cast concrete bridge decks
RIIMPO319A	Conduct backhoe/loader operations
TLIC2041A	Operate self-propelled equipment on track

Rail Transport Operations	
FDFSUG206A	Drive a cane locomotive
Factory Operations	
FDFSUG207A	Conduct cane weighbridge operations
FDFSUG208A	Operate a tipping station
FDFSUG209A	Operate an extraction station
FDFSUG210A	Operate a juice clarification process
FDFSUG211A	Operate a mud filtration process
FDFSUG212A	Chemically clean equipment
FDFSUG213A	Operate a pans station
FDFSUG214A	Operate a low grade fugal station
FDFSUG215A	Operate a high grade fugal station
FDFSUG216A	Operate a crystalliser station process
FDFSUG217A	Operate a turbine
FDFSUG218A	Operate a boiler - basic
FDFSUG219A	Operate a bagasse fuel supply system
FDFSUG220A	Operate a coal fuel supply system
FDFSUG221A	Operate an ash separation system
FDFSUG222A	Operate a waste water treatment system
FDFSUG223A	Operate a cooling water system
FDFOP2030A	Operate a process control interface
FDFOP2034A	Operate an evaporation process
Laboratory	
FDFSUG224A	Perform standard tests on cane samples
FDFSUG225A	Collect and prepare samples

Factory Maintenance	
FDFSUG226A	Perform general drilling operations
FDFSUG227A	Perform general lathe operations
FDFSUG228A	Perform general milling operations
FDFSUG229A	Perform general planing and shaping operations
FDFSUG230A	Undertake forming, bending and shaping
FDFSUG231A	Undertake simple fabrication
AHCMOM203A	Operate basic machinery and equipment
AHCMOM204A	Undertake operational maintenance of machinery
CPCCCO3011A	Perform dogging* <i>CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry</i>
CPCCRI3012A	Perform basic rigging * <i>CPCCCO3011A Perform dogging</i>
CPCCCSC2002A	Erect and dismantle basic scaffolding * <i>CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry</i>
RIIHAN305A	Operate gantry or overhead crane
TLID3035A	Operate a boom type elevating work platform
TLID3036A	Lift and move load using a mobile crane
TLILIC2001A	Licence to operate a forklift truck
General	
TLILIC2014A	Licence to drive light rigid vehicle
TLILIC2015A	Licence to drive medium rigid vehicle
TLILIC3006A	Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity)

FDF30111 Certificate III in Food Processing

Modification History

This Qualification supersedes and is equivalent to FDF30110 Certificate III in Food Processing.

September 2012: inclusion of two new Units to cover milling of all types of grain for human consumption.

April 2012: Inclusion of new malting and brewing Units as electives.

November 2011: inclusion of two (2) new elective cheese Units, updates to imported Units, and minor edits.

Description

This Qualification covers a range of food processing industries, such as:

- Grain processing (including stock feed, animal feeds, milling wheat, barley, oats and flour milling)
- Beverages (including juices, soft drinks, cordials, aerated and still waters, energy drinks and other modified beverages such as vitamin and antioxidant beverages, coffee, tea and ice)
- Confectionery
- Dairy processing
- Fruit and vegetables
- Grocery products and supplies (including honey, jams, spreads, sauces, dressings, condiments, spices, edible oils and fats and pasta)
- Poultry.

Job Roles The Certificate III in Food Processing targets those performing production related roles that require an application of industry specific skills and knowledge, including some technical and problem solving ability. This Qualification caters for multi-skilled outcomes and roles that include team leader functions within the production environment.

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Many units in this Qualification assume a basic level of mathematics equivalent to a school sector Year 10 standard. If a student does not possess this level of mathematics then the Unit FDFOP2061A Use numerical applications in the workplace should be selected as part of this Qualification.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this Qualification include:

- FDF20111 Certificate II in Food Processing.
- direct entry
- relevant vocational training and/or work experience.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake the FDF40110 Certificate IV in Food Processing or FDF41007 Certificate IV in Food Safety Auditing, other food processing related Qualifications or any other suitable Qualification.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, all work must comply with food safety, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace.

Entry Requirements

Not applicable.

Employability Skills Summary

Certificate III in Food Processing

The following table contains a summary of the employability skills as identified by the Food Processing industries for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Confirm relevant industry and workplace requirements. • Understand personal and team requirements of relevant industry and workplace standards, regulations and policies. • Complete standard documentation. • Use communication technologies efficiently. • Provide relevant work-related information to others. • Ensure records are accurate and legible. • Establish effective working relationships with colleagues. • Undertake interactive workplace communication. • Support team communication practices.
Teamwork	<ul style="list-style-type: none"> • Explain and implement work team reporting requirements. • Provide support to team members. • Monitor work team tasks in accordance with regulatory and workplace requirements. • Demonstrate and encourage others in working cooperatively with people of different ages, gender, race or religion. • Undertake appropriate and effective communication with team members.
Problem-solving	<ul style="list-style-type: none"> • Identify risks and implement risk control measures for machinery and equipment. • Identify and address problems and faults. • Provide problem solving support to team members. • Evaluate skill requirements of work tasks. • Use problem solving techniques to determine work requirements. • Assess processes and outcomes against quality criteria. • Implement food safety procedures.
Initiative and enterprise	<ul style="list-style-type: none"> • Contribute to and promote continuous improvement processes. • Seek and provide feedback on procedures and processes. • Collect and assess data and information on work processes. • Identify non-conformances to standards and take appropriate action. • Rectify problems promptly and appropriately.

	<ul style="list-style-type: none"> • Monitor and adjust activity in response to operational variations. • Identify, assess and act on existing and potential risks.
Planning and organising	<ul style="list-style-type: none"> • Determine work requirements in order to meet output targets. • Identify priorities and variables that impact on work planning. • Plan work tasks for self and others as required. • Allocate tasks to operators and monitor outcomes. • Implement contingency plan promptly when incidents occur. • Ensure work tools are ready and available for operations.
Self-management	<ul style="list-style-type: none"> • Manage own work to meet performance criteria. • Monitor information in work area. • Conduct regular housekeeping activities during shift to keep work area clean and tidy at all times. • Maintain currency of relevant, work-related information. • Monitor own work against quality standards and identify areas for improvement. • Understand own work activities and responsibilities. • Identify and apply safety procedures, including the use of protective equipment. • Manage work load priorities and timelines.
Learning	<ul style="list-style-type: none"> • Recognise limits of own expertise and seek skill development if required. • Assess competencies in meeting job requirements. • Ask questions to expand own knowledge. • Maintain skill and knowledge currency. • Participate in meetings to inform work practices.
Technology	<ul style="list-style-type: none"> • Use work machines or equipment in correct operational mode. • Monitor machine operation. • Perform minor maintenance on machinery. • Work with technology safely and according to workplace standards.

Packaging Rules

Completion of seventeen (17) Units made up of five (5) core Units and twelve (12) elective Units. Total Units must include a minimum of ten (10) Units coded FDF.

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

Core Units of Competency

Complete all five (5) core Units

Unit title	Unit title
FDFFS2001A	Implement the food safety program and procedures
FDFFS3001A	Monitor the implementation of quality and food safety programs* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFOHS3001A	Contribute to OHS processes
FDFOP2064A	Provide and apply workplace information
MSAENV272B	Participate in environmentally sustainable work practices

Elective Units of Competency

Elective section must include:

- One (1) Group A Unit
- Six (6) Group B Units.

The five (5) remaining elective Units may be selected from:

- Group A
- Group B
- Three (3) Group C Units
- Units packaged at Group A in the Certificate II in Food Processing
- Three (3) from Units packaged at Certificate IV in Food Processing
- Three (3) Units from any nationally endorsed Training Package and accredited course that are packaged at Certificate I level (1 Unit), Certificate II level (2 Units) and Certificate III level (3 Units)

GROUP A

Unit code	Unit title
FDFOP3003A	Operate interrelated processes in a production system

FDFOP3004A	Operate interrelated processes in a packaging system
------------	--

GROUP B

Sector Specialist Units	
Unit code	Unit title
AHCPHT401A	Assess olive oil for style and quality
FDFCH3001A	Coordinate cheese making operations
FDFCH3002A	Carry out processes for a range of artisan cheeses
FDFFFV3001A	Conduct chemical wash for fresh produce
FDFFFV3002A	Program fresh produce grading equipment
FDFGR3001A	Work with micronutrients or additions in stockfeed manufacturing processes
FDFGR3002A	Demonstrate knowledge of animal nutrition principles
FDFGR3003A	Lead flour milling shift operations
FDFGR3004A	Control mill processes and performance
FDFOP3001A	Control contaminants and allergens in the workplace* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFOP3005A	Prepare food products using basic cooking methods* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFOP3006A	Identify cultural, religious and dietary requirements for food products
FDFPO3001A	Operate a chickway system
FDFPO3002A	Debone and fillet product (manually)
MTMR308C	Prepare and produce value-added products
Cross Sector Units	

BSBSMB405B	Monitor and manage small business operations
BSBSMB407A	Manage a small team
FDFOP2061A	Use numerical applications in the workplace
FDFOP3002A	Set up a production or packaging line for operation
FDFPPL3001A	Participate in improvement processes
FDFPPL3002A	Report on workplace performance
FDFPPL3003A	Support and mentor individuals and groups
FDFPPL3004A	Lead work teams and groups
FDFPPL3005A	Participate in an audit process* <i>FDFOHS2001A Participate in OHS processes</i> <i>FDFOP2063A Apply quality systems and procedures</i> <i>MSAENV272B Participate in environmentally sustainable work practices</i>
FDFPPL3006A	Establish compliance requirements for work area
FDFTEC3001A	Participate in a HACCP team* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFTEC3002A	Implement the pest prevention program
FDFTEC3003A	Apply raw materials, ingredient and process knowledge to production problems
LMTGN3007B	Monitor and operate trade waste process
MEM13003B	Work safely with industrial chemicals and materials
MSAENV472B	Implement and monitor environmentally sustainable work practices
MSAPMSUP303A	Identify equipment faults
MSAPMSUP330A	Develop and adjust a production schedule
MSL973001A	Perform basic tests
MSS403011A	Facilitate implementation of competitive systems and practices

MSS403013A	Lead team culture improvement
SIRXINV002A	Maintain and order stock
SIRXRSK002A	Maintain store security
TLIA3015A	Complete receiptal/despatch documentation
TLIA3016A	Use inventory systems to organise stock control
TLIA3018A	Organise despatch operations
TLIA3019A	Organise receiptal operations
TLIA3026A	Monitor storage facilities
TLIA3038A	Control and order stock
TLIA3039A	Receive and store stock

GROUP C

Unit code	Unit title
BSBCUS301B	Deliver and monitor a service to customers
BSBSMB301A	Investigate micro business opportunities
BSBSMB401A	Establish legal and risk management requirements of small business
BSBSMB402A	Plan small business finances
BSBSMB403A	Market the small business
BSBSMB404A	Undertake small business planning
BSBSMB406A	Manage small business finances
BSBWRT301A	Write simple documents
FDFOHS2001A	Participate in OHS processes
FDFOP2063A	Apply quality systems and procedures
HLTFA301C	Apply first aid

MEM09002B	Interpret technical drawing
MEM30011A	Set up basic pneumatic circuits
MSAPMOPS405A	Identify problems in fluid power system
MSAPMOPS406A	Identify problems in electronic control systems
MSAPMPER300C	Issue work permits* <i>RIIRIS201B Conduct local risk control</i>
MSAPMSUP310A	Contribute to development of plant documentation
MSAPMSUP390A	Use structured problem solving tools
MSL922001A	Record and present data
MSS402001A	Apply competitive systems and practices
MSS402002A	Sustain process improvements
MSS402010A	Manage the impact of change on own work
MSS402021A	Apply Just in Time procedures
MSS402030A	Apply cost factors to work practices
MSS402031A	Interpret product costs in terms of customer requirements
MSS402040A	Apply 5S procedures
MSS402050A	Monitor process capability
MSS402051A	Apply quality standards
MSS402060A	Use planning software systems in operations
MSS402061A	Use SCADA systems in operations
MSS402080A	Undertake root cause analysis
MSS402081A	Contribute to the application of a proactive maintenance strategy
MSS403002A	Ensure process improvements are sustained
MSS403010A	Facilitate change in an organisation implementing competitive systems and practices
MSS403021A	Facilitate a Just in Time system

MSS403023A	Monitor a levelled pull system of operations
MSS403040A	Facilitate and improve implementation of 5S
MSS403041A	Facilitate breakthrough improvements
MSS403051A	Mistake proof an operational process
MSS404050A	Undertake process capability improvements* <i>MSS404052A Apply statistics to operational processes</i>
MSS404052A	Apply statistics to operational processes
MSS404060A	Facilitate the use of planning software systems in a work area or team
MSS404082A	Assist in implementing a proactive maintenance strategy
MSS404083A	Support proactive maintenance
TAEASS401B	Plan assessment activities and processes
TAEASS402B	Assess competence
TAEASS403B	Participate in assessment validation
TAEDEL301A	Provide work skill instruction

FDF30210 Certificate III in Pharmaceutical Manufacturing

Modification History

September 2012: Replacement of superseded imported Units.

November 2011: Update to imported Units, minor edits.

Description

This Qualification covers the Pharmaceutical Manufacturing specialisation.

Job Roles

The Certificate III in Pharmaceutical Manufacturing targets those requiring team leader and higher production skills for pharmaceutical manufacturing environments. It builds upon industry specific skills and knowledge and allows greater emphasis on leadership, problem solving as well as increased technical ability.

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Many Units in this Qualification assume a basic level of mathematics equivalent to a school sector Year 10 standard. If a student does not possess this level of mathematics then the Unit FDFOP2061A Use numerical applications in the workplace should be selected as part of this Qualification.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this Qualification include:

- FDF20211 Certificate II in Pharmaceutical Manufacturing
- direct entry
- relevant vocational training and/or work experience.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake the FDF40210 Certificate IV in Pharmaceutical Manufacturing or any other suitable Qualification.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, an individual Unit of Competency may specify relevant licensing, legislative and/or regulatory requirements. In addition, all work must comply with Good Manufacturing Practice, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace.

Entry Requirements

Not applicable.

Employability Skills Summary

Certificate III in Pharmaceutical Manufacturing

The following table contains a summary of the employability skills as identified by the Pharmaceutical Manufacturing industries for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Confirm relevant industry and workplace requirements. • Understand personal and team requirements of relevant industry and workplace standards, regulations and policies. • Complete standard documentation. • Use communication technologies efficiently. • Provide relevant work-related information to others. • Ensure records are accurate and legible. • Establish effective working relationships with colleagues. • Undertake interactive workplace communication. • Support team communication practices.
Teamwork	<ul style="list-style-type: none"> • Explain and implement work team reporting requirements. • Provide support to team members. • Monitor work team tasks in accordance with regulatory and workplace requirements. • Demonstrate and encourage others in working cooperatively with people of different ages, gender, race or religion. • Undertake appropriate and effective communication with team members.
Problem-solving	<ul style="list-style-type: none"> • Identify risks and implement risk control measures for machinery and equipment. • Identify and address problems and faults. • Provide problem solving support to team members. • Evaluate skill requirements of work tasks. • Use problem solving techniques to determine work requirements. • Assess processes and outcomes against quality criteria.
Initiative and enterprise	<ul style="list-style-type: none"> • Contribute to and promote continuous improvement processes. • Seek and provide feedback on procedures and processes. • Collect and assess data and information on work processes. • Identify non-conformances to standards and take appropriate action. • Rectify problems promptly and appropriately. • Monitor and adjust activity in response to operational

	<p>variations.</p> <ul style="list-style-type: none"> Identify, assess and act on existing and potential risks.
Planning and organising	<ul style="list-style-type: none"> Determine work requirements in order to meet output targets. Identify priorities and variables that impact on work planning. Plan work tasks for self and others as required. Allocate tasks to operators and monitor outcomes. Implement contingency plan promptly when incidents occur. Ensure work tools are ready and available for operations.
Self-management	<ul style="list-style-type: none"> Manage own work to meet performance criteria. Monitor information in work area. Conduct regular housekeeping activities during shift to keep work area clean and tidy at all times. Maintain currency of relevant work-related information. Monitor own work against quality standards and identify areas for improvement. Understand own work activities and responsibilities. Identify and apply safety procedures, including the use of protective equipment. Manage work load priorities and timelines.
Learning	<ul style="list-style-type: none"> Recognise limits of own expertise and seek skill development if required. Assess competencies in meeting job requirements. Ask questions to expand own knowledge. Maintain skill and knowledge currency. Participate in meetings to inform work practices.
Technology	<ul style="list-style-type: none"> Use work machines and equipment in correct operational mode. Monitor machine operation. Perform minor maintenance on machinery. Work with technology safely and according to workplace standards.

Packaging Rules

This Qualification requires the achievement of **sixteen (16)** Units of Competency in accordance with the following rules.

Total Units must include a minimum of nine (9) Units coded FDF.

Four (4) Core Units

Twelve (12) Elective Units

Elective selection must include:

- One (1) Group A elective Unit
- Five (5) Group B elective Units. The Group B selection may include the Unit not previously selected from Group A.

Six (6) remaining elective Units may be selected from:

- Group A elective Units below, not previously selected
- Group B elective Units, not previously selected
- Group C elective Units (maximum of 3 Units)
- Units packaged at Group A in FDF20210 Certificate II in Pharmaceutical Manufacturing (maximum of 5)
- Units packaged at FDF40210 Certificate in IV in Pharmaceutical Manufacturing (maximum of 3)
- Units from any nationally endorsed Training Package and accredited course that are packaged at Certificate I level (maximum 1 Unit), Certificate II level (maximum 2 Units) and Certificate III level (maximum 3)

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s identified under the Unit.

CORE UNITS

Complete the following four (4) Units.

FDFOHS3001A	Contribute to OHS processes
FDFOP2064A	Provide and apply workplace information
FDFPH3001A	Monitor and maintain Good Manufacturing Practice procedures
MSAENV272B	Participate in environmentally sustainable work practices

ELECTIVE UNITS

GROUP A

Complete one (1) Group A Unit

FD303A	Operate interrelated processes in a production system
FD304A	Operate interrelated processes in a packaging system

GROUP B

Select a minimum of five (5) Group B elective Units

FD301A	Participate in improvement processes
FD302A	Report on workplace performance
FD303A	Support and mentor individuals and groups
FD304A	Lead work teams and groups
FD305A	Participate in an audit process* <i>FD301A Participate in OHS processes</i> <i>FD303A Apply quality systems and procedures</i> <i>MSAENV272B Participate in environmentally sustainable work practices</i>
FD306A	Establish compliance requirements for work area
FD302A	Implement the pest prevention program
FD303A	Apply raw materials, ingredient and process knowledge to production problems
FD302A	Set up a production or packaging line for operation
FD2061A	Use numerical applications in the workplace
BS305B	Monitor and manage small business operations
BS307A	Manage a small team
LMT307B	Monitor and operate trade waste
MEM1303B	Work safely with industrial chemicals and materials
MSS403011A	Facilitate implementation of competitive systems and practices
MSS403013A	Lead team culture improvement
MSAENV472B	Implement and monitor environmentally sustainable work practices
MSAPMSUP303A	Identify equipment faults
MSAPMSUP330A	Develop and adjust a production schedule
MSL973001A	Perform basic tests
TLIA3015A	Complete receipt/despatch documentation
TLIA3016A	Use inventory systems to organise stock control
TLIA3018A	Organise despatch operations

TLIA3019A	Organise receival operations
TLIA3026A	Monitor storage facilities
TLIA3038A	Control and order stock
TLIA3039A	Receive and store stock
SIRXINV002A	Maintain and order stock
SIRXRSK002A	Maintain store security

GROUP C

FDFOHS2001A	Participate in OHS processes
FDFOP2063A	Apply quality systems and procedures
BSBCUS301B	Deliver and monitor a service to customers
BSBSMB301A	Investigate micro business opportunities
BSBSMB401A	Establish legal and risk management requirements of small business
BSBSMB402A	Plan small business finances
BSBSMB403A	Market the small business
BSBSMB404A	Undertake small business planning
BSBSMB406A	Manage small business finances
BSBWRT301A	Write simple documents
HLTFA301C	Apply first aid
MSS402010A	Manage the impact of change on own work
MSS403010A	Facilitate change in an organisation implementing competitive systems and practices
MSS402001A	Apply competitive systems and practices
MSS402002A	Sustain process improvements
MSS403002A	Ensure process improvements are sustained
MSS402021A	Apply Just in Time procedures
MSS402030A	Apply cost factors to work practices
MSS402031A	Interpret product costs in terms of customer requirements
MSS402040A	Apply 5S procedures
MSS402050A	Monitor process capability
MSS402051A	Apply quality standards

MSS402060A	Use planning software systems in operations
MSS402061A	Use SCADA systems in operations
MSS402080A	Undertake root cause analysis
MSS402081A	Contribute to the application of a proactive maintenance strategy

MSS403023A	Monitor a levelled pull system of operations
MSS403040A	Facilitate and improve implementation of 5S
MSS403041A	Facilitate breakthrough improvements
MSS404050A	Undertake process capability improvements* <i>MSS404052A Apply statistics to operational processes</i>
MSS403051A	Mistake proof an operational process
MSS404052A	Apply statistics to operational processes
MSS404060A	Facilitate the use of planning software systems in a work area or team
MSS404082A	Assist in implementing a proactive maintenance strategy
MSS404083A	Support proactive maintenance
MSAPMOPS405A	Identify problems in fluid power system
MSAPMOPS406A	Identify problems in electronic control systems
MSAPMPER300C	Issue work permits* <i>RIIRIS201B Conduct local risk control</i>
MSAPMSUP310A	Contribute to development of plant documentation
MSAPMSUP390A	Use structured problem solving tools
MSL922001A	Record and present data
TAEASS401B	Plan assessment activities and processes
TAEASS402B	Assess competence
TAEASS403B	Participate in assessment validation
TAEDEL301A	Provide work skill instruction

FDF30310 Certificate III in Plant Baking

Modification History

September 2012: Replacement of superseded imported Units.

November 2011: Updates to imported Units, minor edits.

Description

This Qualification covers the plant baking specialisation within the food processing industry. It targets work conducted in plant baking enterprises in the large scale production and packaging of bread products.

Job Roles

The FDF30310 Certificate III in Plant Baking targets those performing production related roles that require an application of specific plant baking skill and knowledge including some technical and problem solving ability. This Qualification caters for multi-skilled outcomes and roles that include team leader functions within the production environment.

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Many Units in this Qualification assume a basic level of mathematics equivalent to a school sector Year 10 standard. If a student does not possess this level of mathematics then the Unit FDFOP2061A Use numerical applications in the workplace should be selected as part of this Qualification.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this Qualification include:

- FDF20111 Certificate II in Food Processing
- direct entry
- relevant vocational training and/or work experience.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake the FDF40110 Certificate IV in Food Processing or other suitable Qualifications.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, all work must comply with food safety, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace.

Entry Requirements

Not applicable.

Employability Skills Summary

Certificate III in Plant Baking

The following table contains a summary of the employability skills as identified by the plant baking industries for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Confirm relevant industry and workplace requirements. • Understand personal and team requirements of relevant industry and workplace standards, regulations and policies. • Complete standard documentation. • Use communication technologies efficiently. • Provide relevant work-related information to others. • Ensure records are accurate and legible. • Establish effective working relationships with colleagues. • Undertake interactive workplace communication. • Support team communication practices.
Teamwork	<ul style="list-style-type: none"> • Explain and implement work team reporting requirements. • Provide support to team members. • Monitor work team tasks in accordance with regulatory and workplace requirements. • Demonstrate and encourage others in working cooperatively with people of different ages, gender, race or religion. • Undertake appropriate and effective communication with team members.
Problem-solving	<ul style="list-style-type: none"> • Identify risks and implement risk control measures for machinery and equipment. • Identify and address problems and faults. • Provide problem solving support to team members. • Implement food safety procedures. • Evaluate skill requirements of work tasks. • Use problem solving techniques to determine work requirements. • Assess processes and outcomes against quality criteria.
Initiative and enterprise	<ul style="list-style-type: none"> • Contribute to and promote continuous improvement processes. • Seek and provide feedback on procedures and processes. • Collect and assess data and information on work processes. • Identify non-conformances to standards and take appropriate action. • Rectify problems promptly and appropriately. • Monitor and adjust activity in response to operational variations.

	<ul style="list-style-type: none"> • Identify, assess and act on existing and potential risks.
Planning and organising	<ul style="list-style-type: none"> • Determine work requirements in order to meet output targets. • Identify priorities and variables that impact on work planning. • Plan work tasks for self and others as required. • Allocate tasks to operators and monitor outcomes. • Implement contingency plan promptly when incidents occur. • Ensure work tools are ready and available for operations.
Self-management	<ul style="list-style-type: none"> • Manage own work to meet performance criteria. • Monitor information in work area. • Conduct regular housekeeping activities during shift to keep work area clean and tidy at all times. • Maintain currency of relevant, work-related information. • Monitor own work against quality standards and identify areas for improvement. • Understand own work activities and responsibilities. • Identify and apply safety procedures, including the use of protective equipment. • Manage work load priorities and timelines.
Learning	<ul style="list-style-type: none"> • Recognise limits of own expertise and seek skill development if required. • Assess competencies in meeting job requirements. • Ask questions to expand own knowledge. • Maintain skill and knowledge currency. • Participate in meetings to inform work practices.
Technology	<ul style="list-style-type: none"> • Use plant machines and equipment in correct operational mode. • Monitor machine operation. • Perform minor maintenance on machinery. • Work with technology safely and according to workplace standards.

Packaging Rules

This Qualification requires the achievement of **seventeen (17)** Units of Competency in accordance with the following rules.

Total Units must include a minimum of ten (10) Units coded FDF.

Eight (8) Core Units

Nine (9) Elective Units

Elective selection must include:

- Four (4) Group A elective Units

Five (5) remaining elective Units may be selected from:

- Group A elective Units below, not previously selected
- Group B elective Units
- Units packaged at Group A in the Certificate II in Food Processing (maximum of 5)
- Units packaged at Certificate IV in Food Processing (maximum of 3)
- Units from any nationally endorsed Training Package and accredited course that are packaged at Certificate III level (maximum 3 Units), Certificate II level (maximum 2 Units) and Certificate I level (maximum 1 Unit)

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

CORE UNITS

Complete the following eight (8) Units:

FDFFS2001A	Implement the food safety program and procedures
FDFFS3001A	Monitor the implementation of quality and food safety programs* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFOHS3001A	Contribute to OHS processes
FDFOP2064A	Provide and apply workplace information
FDFPB3001A	Operate a dough mixing process
FDFPB3002A	Operate a final proof and baking process
FDFPB3003A	Operate a dough make up process
MSAENV272B	Participate in environmentally sustainable work practices

GROUP A

Select a minimum of four (4) Group A elective Units

FDFOP2061A	Use numerical applications in the workplace
FDFOP3001A	Control contaminants and allergens in the workplace* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFOP3002A	Set up a production or packaging line for operation
FDFOP3003A	Operate interrelated processes in a production system
FDFOP3004A	Operate interrelated processes in a packaging system
FDFPPL3001A	Participate in improvement processes
FDFPPL3002A	Report on workplace performance
FDFPPL3003A	Support and mentor individuals and groups
FDFPPL3004A	Lead work teams and groups
FDFPPL3005A	Participate in an audit process* <i>FDFOHS2001A Participate in OHS processes</i> <i>FDFOP2063A Apply quality systems and procedures</i> <i>MSAENV272B Participate in environmentally sustainable work practices</i>
FDFPPL3006A	Establish compliance requirements for work area
FDFTEC3001A	Participate in a HACCP team* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFTEC3002A	Implement the pest prevention program
FDFTEC3003A	Apply raw materials, ingredient and process knowledge to production problems
BSBSMB405B	Monitor and manage small business operations
BSBSMB407A	Manage a small team
LMTGN3007B	Monitor and operate trade waste
MEM13003B	Work safely with industrial chemicals and materials
MSAENV472B	Implement and monitor environmentally sustainable work practices

MSAPMSUP303A	Identify equipment faults
MSAPMSUP330A	Develop and adjust a production schedule
MSS403011A	Facilitate implementation of competitive systems and practices
MSS403013A	Lead team culture improvement
MSL973001A	Perform basic tests
SIRXINV002A	Maintain and order stock
SIRXRSK002A	Maintain store security
TLIA3015A	Complete receipt/despatch documentation
TLIA3016A	Use inventory systems to organise stock control
TLIA3018A	Organise despatch operations
TLIA3019A	Organise receipt operations
TLIA3026A	Monitor storage facilities
TLIA3038A	Control and order stock
TLIA3039A	Receive and store stock

GROUP B

FDFOHS2001A	Participate in OHS processes
FDFOP2063A	Apply quality systems and procedures
BSBCUS301B	Deliver and monitor a service to customers
BSBSMB301A	Investigate micro business opportunities
BSBSMB401A	Establish legal and risk management requirements of small business
BSBSMB402A	Plan small business finances
BSBSMB403A	Market the small business
BSBSMB404A	Undertake small business planning
BSBSMB406A	Manage small business finances

BSBWRT301A	Write simple documents
HLTFA301C	Apply first aid
MSL922001A	Record and present data
MSS402010A	Manage the impact of change on own work
MSS403010A	Facilitate change in an organisation implementing competitive systems and practices
MSS402001A	Apply competitive systems and practices
MSS402002A	Sustain process improvements
MSS403002A	Ensure process improvements are sustained
MSS402021A	Apply Just in Time procedures
MSS402030A	Apply cost factors to work practices
MSS402031A	Interpret product costs in terms of customer requirements
MSS402040A	Apply 5S procedures
MSS402050A	Monitor process capability
MSS402051A	Apply quality standards
MSS402060A	Use planning software systems in operations
MSS402061A	Use SCADA systems in operations
MSS402080A	Undertake root cause analysis
MSS402081A	Contribute to the application of a proactive maintenance strategy
MSS403021A	Facilitate a Just in Time system
MSS403023A	Monitor a manufacturing levelled pull system of operations
MSS403040A	Facilitate and improve implementation of 5S
MSS403041A	Facilitate breakthrough improvements
MSS404050A	Undertake process capability improvements* <i>MSS404052A Apply statistics to operational processes</i>
MSS403051A	Mistake proof an operational process

MSS404052A	Apply statistics to operational processes
MSS404060A	Facilitate the use planning software systems in a work area or team
MSS404082A	Assist in implementing a proactive maintenance strategy
MSS404083A	Support proactive maintenance
MSAPMOPS405A	Identify problems in fluid power system
MSAPMOPS406A	Identify problems in electronic control systems
MSAPMPER300C	Issue work permits* <i>RIIRIS201B Conduct local risk control</i>
MSAPMSUP310A	Contribute to development of plant documentation
MSAPMSUP390A	Use structured problem solving tools
TAEASS401B	Plan assessment activities and processes
TAEASS402B	Assess competence
TAEASS403B	Participate in assessment validation
TAEDEL301A	Provide work skill instruction

FDF30411 Certificate III in Wine Industry Operations

Modification History

This Qualification supersedes and is equivalent to FDF30403 Certificate III in Food Processing (Wine).

September 2012: Replacement of superseded imported Units.

April 2012: Update of imported SUG Units to new FDFSUG Units.

Description

This Qualification covers the following wine industry operational areas:

- bottling and packaging
- cellar door sales
- cellar operations
- laboratory
- warehousing
- wine grape growing.

Testamur issued for this Qualification are to be titled ‘Certificate III in Wine Industry Operations’.

An additional descriptor in brackets after the Qualification title e.g. FDF30411 Certificate III in Wine Industry Operations (Cellar Operations) may be added by a Registered Training Organisation (RTO). Any additional descriptor should reflect a minimum selection of at least nine (9) specialist Units from one of the following Unit groups:

- bottling and packaging
- cellar door sales
- cellar operations
- laboratory
- warehousing
- wine grape growing.

Job Roles The FDF30411 Certificate III in Wine Industry Operations targets those performing production related roles that require an application of wine industry specific skill and knowledge, including some technical and problem solving ability. This Qualification caters for specialised and multi-skilled outcomes and roles that include supervisory or team leader functions within an environment which may include wine grape growing, cellar operations, bottling and packaging, warehousing, laboratory and cellar door sales.

Those performing a purely warehousing role in the wine production industry should consider the TLI31610 Certificate III in Warehousing Operations.

Those performing a purely laboratory operations role in the wine production industry should consider the MSL30109 Certificate III in Laboratory Skills.

Those performing a purely cellar door role in the wine production industry should consider the SIT30707 Certificate III in Hospitality.

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Many Units in this Qualification assume a basic level of mathematics equivalent to a school sector Year 10 standard. If a student does not possess this level of mathematics then the Unit FDFOP2061A Use numerical applications in the workplace, should be selected as part of this Qualification.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options, including on-the-job and work-based training, that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this Qualification include:

- FDF20411 Certificate II in Wine Industry Operations
- direct entry
- relevant vocational training and/or work experience.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake a FDF40110 Certificate IV in Food Processing or other relevant Qualifications.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, an individual Unit of Competency may specify relevant licensing, legislative and/or regulatory requirements.

Entry Requirements

Not applicable.

Employability Skills Summary

Certificate III in Wine Industry Operations

The following table contains a summary of the employability skills as identified by the wine industry for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Confirm relevant industry and workplace requirements. • Understand personal and team requirements of relevant industry and workplace standards, regulations and policies. • Complete standard documentation. • Use communication technologies efficiently. • Provide relevant work-related information to others. • Ensure records are accurate and legible. • Establish effective working relationships with colleagues. • Undertake interactive workplace communication. • Support team communication practices.
Teamwork	<ul style="list-style-type: none"> • Explain and implement work team reporting requirements. • Provide support to team members. • Monitor work team tasks in accordance with regulatory and workplace requirements. • Demonstrate and encourage others in working cooperatively with people of different ages, gender, race or religion. • Undertake appropriate and effective communication with team members.
Problem solving	<ul style="list-style-type: none"> • Identify risks and implement risk control measures for machinery and equipment. • Identify and address problems and faults. • Provide problem solving support to team members. • Evaluate skill requirements of work tasks. • Use problem-solving techniques to determine work requirements. • Assess processes and outcomes against quality criteria. • Implement HACCP or food safety procedures.
Initiative and enterprise	<ul style="list-style-type: none"> • Contribute to and promote continuous improvement processes. • Seek and provide feedback on procedures and processes. • Collect and assess data and information on work processes. • Identify non-conformances to standards and take appropriate action. • Rectify problems promptly and appropriately. • Monitor and adjust activity in response to operational variations.

	<ul style="list-style-type: none"> • Identify, assess and act on existing and potential risks.
Planning and organising	<ul style="list-style-type: none"> • Determine work requirements in order to meet output targets. • Identify priorities and variables that impact on work planning. • Plan work tasks for self and others as required. • Allocate tasks to operators and monitor outcomes. • Implement contingency plan promptly when incidents occur. • Ensure work tools are ready and available for operations.
Self-management	<ul style="list-style-type: none"> • Manage own work to meet performance criteria. • Monitor information in work area. • Conduct regular housekeeping activities during shift to keep work area clean and tidy at all times. • Maintain currency of relevant, work-related information. • Monitor own work against quality standards and identify areas for improvement. • Understand own work activities and responsibilities. • Identify and apply safety procedures, including the use of protective equipment. • Manage work load priorities and timelines.
Learning	<ul style="list-style-type: none"> • Recognise limits of own expertise and seek skill development if required. • Assess competencies in meeting job requirements. • Ask questions to expand own knowledge. • Maintain skill and knowledge currency. • Participate in meetings to inform work practices.
Technology	<ul style="list-style-type: none"> • Use work machines or equipment in correct operational mode. • Monitor machine operation. • Perform minor maintenance on machinery. • Work with technology safely and according to workplace standards.

Packaging Rules

This Qualification requires the achievement of **twenty five (25)** Units of Competency in accordance with the following rules.

- **Seven (7)** core Units of Competency
- **Eighteen (18)** elective Units of Competency.

Elective selection must include:

- **Seven (7)** Group A Wine Specialist elective Units
- **Seven (7)** Group B Wine Specialist elective Units.

Elective Units from Group A and Group B may be a combination of Units selected from any of the wine industry operational Unit areas listed below:

- Bottling and packaging
- Cellar door sales
- Cellar operations
- Laboratory
- Warehousing
- Wine grape growing

Four (4) remaining elective Units may be selected from:

- Group A Wine specialist Units, not previously selected
- Group B Wine specialist Units, not previously selected
- Group C General elective Units, listed below
- Any nationally endorsed Training Package and accredited course that are packaged at Certificate III level, Certificate II level (maximum 1 Unit) and Certificate IV level (maximum 1 Unit).

Prerequisite Units

Units marked with an asterisk (*) require completion of prerequisite Units identified under the Unit. Prerequisite Units count towards the total Units required for the Qualification.

CORE UNITS

Complete the following **seven (7)** Units.

FDFFS2001A	Implement the food safety program and procedures
FDFOHS2001A	Participate in OHS processes
FDFOHS3001A	Contribute to OHS processes
FDFOP2063A	Apply quality systems and procedures

FDFOP2064A	Provide and apply workplace information
FDFPPL3002A	Report on workplace performance
MSAENV272B	Participate in environmentally sustainable work practices

ELECTIVE UNITS

- Select a total of **eighteen (18)** elective Units from the following groups.

Elective Units may be selected from one specialist wine industry operational Unit area or from multiple Unit areas.

GROUP A: Wine specialist elective Units

- Select a minimum of **seven (7)** Units.

Bottling and packaging

FDFBP2001A	Operate the bottle supply process
FDFBP2002A	Operate the carton erection process
FDFBP2003A	Operate the carton packing process
FDFBP2005A	Operate the electronic coding process
FDFBP2009A	Operate the bottle capsuling process
FDFBP2011A	Operate the palletising process
FDFLAB2003A	Perform basic packaging tests and inspections* <i>FDFLAB2011A Use basic laboratory equipment</i>
FDFOP2004A	Clean and sanitise equipment
FDFOP2011A	Conduct routine maintenance
FDFOP2016A	Work in a food handling area for non-food handlers
FDFOP2030A	Operate a process control interface

Cellar door sales

FDFCD2003A	Evaluate wines (standard)
BSBCUS201B	Deliver a service to customers
SIRXCCS201	Apply point-of-sale handling procedures

SIRXICT303	Operate retail information technology systems
SIRXMER201	Merchandise products
SIRXRSK001A	Minimise theft
SITHCCC001B	Organise and prepare food * <i>SITXOHS002A Follow workplace hygiene procedures</i>
SITHFAB003A	Serve food and beverage to customers* <i>SITXOHS002A Follow workplace hygiene procedures</i>
SITHFAB004A	Provide food and beverage service* <i>SITHFAB003A Serve food and beverage to customers</i> <i>SITXOHS002A Follow workplace hygiene procedures</i>
SITHFAB009A	Provide responsible service of alcohol
SITHFAB011A	Develop and update food and beverage knowledge
SITHFAB012B	Prepare and serve espresso coffee
SITHFAB325A	Provide specialised advice on Australian wines* <i>SITHFAB009A Provide responsible service of alcohol</i> <i>SITHFAB222A Conduct a product tasting for alcoholic beverages</i> <i>SITHFAB005A Provide table service of alcoholic beverages*</i> <i>SITXOHS002A Follow workplace hygiene procedures</i>
SITTIND001B	Develop and update tourism industry knowledge
SITXCCS001B	Provide visitor information
SITXFIN001A	Process financial transactions
SITXOHS002A	Follow workplace hygiene procedures

Cellar operations

FDFCEL2001A	Perform oak handling activities* <i>FDFCEL2018A Carry out inert gas handling operations</i> <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2002A	Perform fermentation operations*

	<i>FDFCEL2017A Prepare and make additions and finings</i>
FDFCEL2003A	Operate the ion exchange process* <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2004A	Perform single column lees stripping (continuous still brandy) operations* <i>FDFOP2004A Clean and sanitise equipment</i> <i>FDFOP2013A Apply sampling procedures</i> <i>MSL973001A Perform basic tests</i>
FDFCEL2009A	Perform first distillation (pot still brandy) operations* <i>FDFOP2013A Apply sampling procedures</i> <i>MSL973001A Perform basic tests</i>
FDFCEL2011A	Perform heat exchange operations
FDFCEL2015A	Perform must draining operations* <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2016A	Operate the crushing process* <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2018A	Carry out inert gas handling operations
FDFCEL2019A	Carry out transfer operations
FDFCEL2020A	Prepare and wax tanks
FDFOP2003A	Clean equipment in place

Laboratory

FDFLAB2011A	Use basic laboratory equipment
MSL912001A	Work within a laboratory_field workplace (induction)
MSL922001A	Record and present data
MSL943002A	Participate in laboratory_field workplace safety
MSL952001A	Collect routine site samples
MSL952002A	Handle and transport samples or equipment
MSL972001A	Conduct routine site measurements

MSL973001A	Perform basic tests
------------	---------------------

Warehousing

TLIA2009A	Complete and check import/export documentation
TLIA2021A	Despatch stock
TLIA3017A	Identify products and store to specifications
TLIA3039A	Receive and store stock
TLIB2009A	Check conveyor operational status
TLID1001A	Shift materials safely using manual handling methods
TLID2003A	Handle dangerous goods/hazardous substances
TLID2010A	Operate a forklift
TLID2022A	Conduct weighbridge operations
TLID3011A	Conduct specialised forklift operations
TLIK2010A	Use infotechnology devices in the workplace
TLIP2029A	Prepare and process financial documents

Wine grape growing

FDFWGG2001A	Bench graft vines
FDFWGG2002A	Carry out potting operations
FDFWGG2003A	Hand prune vines
FDFWGG2004A	Undertake irrigation systems maintenance activities
FDFWGG2006A	Obtain and process rootlings
FDFWGG2008A	Train vines
FDFWGG2011A	Install irrigation components
FDFWGG2013A	Deliver injection requirements
FDFWGG2015A	Support mechanical harvesting operations* <i>AHCMOM202A Operate tractors</i>

	<i>FDFWGG2018A Operate vineyard equipment</i>
FDFWGG2016A	Install and maintain vine trellis
FDFWGG2017A	Recognise disorders and identify pests and diseases
FDFWGG2019A	Perform vertebrate pest control activities
FDFWGG2022A	Take and process vine cuttings
FDFWGG2023A	Carry out basic canopy maintenance
FDFWGG2024A	Pick grapes by hand
FDFWGG2025A	Plant vines by hand
FDFWGG3013A	Operate spreading and seeding equipment* <i>AHCMOM202A Operate tractors</i>
AHCARB205A	Operate and maintain chainsaws
AHCCHM101A	Follow basic chemical safety rules
AHCCHM201A	Apply chemicals under supervision
AHCMOM202A	Operate tractors
AHCPCM301A	Implement a plant nutrition program
AHCSOL401A	Sample soils and interpret results
HLTFA301C	Apply first aid

GROUP B: Wine specialist elective Units

- Select a minimum of **seven (7)** Units

Bottling and packaging

FDFBP2004A	Operate the bottle sealing process
FDFBP2006A	Operate traditional sparkling wine processes
FDFBP2007A	Operate the tirage and transfer process
FDFBP2008A	Perform packaging equipment changeover
FDFBP3001A	Operate the bottle filling process

FDFBP3002A	Operate the labelling process
FDFBP3003A	Operate the softpack filling process
FDFOP3002A	Set up a production or packaging line for operation
FDFOP3004A	Operate interrelated processes in a packaging system
FDFTEC4008A	Apply principles of food packaging

Cellar door sales

FDFCD2001A	Conduct winery and/or site tours* <i>FDFCD2002A Promote wine tourism information*</i> <i>SIRXCCS002A Interact with customers</i>
FDFCD2002A	Promote wine tourism information* <i>SIRXCCS002A Interact with customers</i>
FDFCD2004A	Perform cellar door stock control procedures <i>FDFCD2003A Evaluate wines (standard)</i>
FDFCD2005A	Sell cellar door products and services* <i>FDFCD2003A Evaluate wines (standard)</i> <i>SIRXCCS002A Interact with customers</i> <i>SITHFAB009A Provide responsible service of alcohol</i>
FDFCD2006A	Conduct a standard product tasting* <i>FDFCD2003A Evaluate wines (standard)</i> <i>SIRXCCS002A Interact with customers</i> <i>SITHFAB009A Provide responsible service of alcohol</i>
FDFCD3001A	Evaluate wines (advanced)* <i>FDFCD2003A Evaluate wines (standard)</i>
FDFCD3002A	Conduct a specialised product tasting* <i>FDFCD2002A Promote wine tourism information</i> <i>FDFCD2003A Evaluate wines (standard)</i> <i>FDFCD2006A Conduct a standard product tasting</i> <i>SIRXCCS002A Interact with customers</i> <i>SITHFAB009A Provide responsible service of alcohol</i>

FDFCD3003A	Coordinate winery hospitality activities* <i>SIRXCCS002A Interact with customers</i>
SIRXCCS202	Interact with customers
SIRXCCS304	Coordinate interaction with customers
SIRXFIN201	Balance and secure point-of-sale terminal
SIRXICT303	Operate retail information technology systems
SIRXMPR006A	Manage promotional activities
SITHFAB326A	Provide specialised advice on imported wines* <i>SITHFAB009A Provide responsible service of alcohol</i> <i>SITHFAB222A Conduct a product tasting for alcoholic beverages</i> <i>SITHFAB005A Provide table service of alcoholic beverages*</i> <i>SITXOHS002A Follow workplace hygiene procedures</i>

Cellar operations

FDFCEL2005A	Operate the pressing process* <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2006A	Operate clarification by separation (centrifugation) process* <i>FDFCEL2018A Carry out inert gas handling operations</i> <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2007A	Prepare and monitor wine cultures * <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2008A	Perform dual column distillation (continuous still brandy) operations* <i>FDFCEL2004A Perform single column lees stripping (continuous still brandy) operations*</i> <i>FDFCEL2012A Handle spirits*</i> <i>FDFCEL2019A Carry out transfer operations</i> <i>FDFOP2004A Clean and sanitise equipment</i> <i>FDFOP2013A Apply sampling procedures</i> <i>MSL973001A Perform basic tests</i>
FDFCEL2010A	Operate the fine filtration process

FDFCEL2012A	Handle spirits* <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2013A	Operate the pressure leaf filtration process* <i>FDFCEL2018A Carry out inert gas handling operations</i> <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2014A	Operate the rotary vacuum filtration process* <i>FDFCEL2018A Carry out inert gas handling operations</i> <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL2017A	Prepare and make additions and finings
FDFCEL3001A	Perform second distillation (pot still brandy) operations* <i>FDFOP2013A Apply sampling procedures</i> <i>MSL973001A Perform basic tests</i>
FDFCEL3002A	Operate the continuous clarification by separation (flotation) process* <i>FDFCEL2018A Carry out inert gas handling operations</i> <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL3003A	Operate the concentration process* <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL3004A	Perform de-aromatising, de-alcoholising or de-sulphuring operations* <i>FDFCEL2018A Carry out inert gas handling operations</i> <i>FDFCEL2019A Carry out transfer operations</i>
FDFCEL3005A	Perform rectification (continuous still) operations* <i>FDFCEL2004A Perform single column lees stripping (continuous still brandy) operations*</i> <i>FDFCEL2012A Handle spirits*</i> <i>FDFCEL2019A Carry out transfer operations</i> <i>FDFOP2004A Clean and sanitise equipment</i> <i>FDFOP2013A Apply sampling procedures</i> <i>MSL973001A Perform basic tests</i>
FDFOP3003A	Operate interrelated processes in a production system

Laboratory

FDFLAB2001A	Perform basic analytical tests* <i>FDFLAB2011A Use basic laboratory equipment</i>
FDFLAB2002A	Perform basic microbiological tests* <i>FDFLAB2012A Maintain aseptic environment*</i> <i>FDFLAB2011A Use basic laboratory equipment</i>
FDFLAB2004A	Prepare laboratory solutions and stains* <i>FDFLAB2011A Use basic laboratory equipment</i>
FDFLAB2005A	Prepare and pour culture media* <i>FDFLAB2012A Maintain aseptic environment*</i> <i>FDFLAB2011A Use basic laboratory equipment</i>
FDFLAB2006A	Record laboratory data
FDFLAB2007A	Standardise laboratory solutions* <i>FDFLAB2011A Use basic laboratory equipment</i>
FDFLAB2008A	Analyse laboratory data* <i>FDFLAB2006A Record laboratory data</i>
FDFLAB2009A	Perform packaging quality control procedures* <i>FDFLAB2011A Use basic laboratory equipment</i>
FDFLAB2010A	Prepare product or show samples* <i>FDFLAB2011A Use basic laboratory equipment</i>

FDFWGG3010A	Implement a soil management program* <i>FDFWGG2018A Operate vineyard equipment</i> <i>FDFWGG3001A Apply chemicals and biological agents</i>
FDFWGG3011A	Perform shed nursery activities

FDFWGG3012A	Monitor and control vine disorders and damage
AHCCHM303A	Prepare and apply chemicals
AHCCHM304A	Transport, handle and store chemicals
AHCPGD301A	Implement a plant establishment program

GROUP C: General elective Units

- Select a maximum of **four (4)** Units.

FDFFS3001A	Monitor the implementation of quality and food safety programs* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFOP2005A	Work in a socially diverse environment
FDFOP2013A	Apply sampling procedures
FDFOP2065A	Work in confined spaces in the food and beverage industries* <i>FDFOHS2001A Participate in OHS processes</i>
FDFPPL3001A	Participate in improvement processes
FDFPPL3004A	Lead work teams and groups
FDFPPL3005A	Participate in an audit process* <i>FDFOHS2001A Participate in OHS processes</i> <i>FDFOP2063A Apply quality systems and procedures</i> <i>MSAENV272B Participate in environmentally sustainable work practices</i>
FDFSUG218A	Operate a boiler - basic
FDFSUG222A	Operate a waste water treatment system
FDFTEC3001A	Participate in a HACCP team* <i>FDFFS2001A Implement the food safety program and procedurs</i>
FDFTEC3002A	Implement the pest prevention program
FDFWIN2001A	Perform effectively in a wine industry workplace
FDFWIN2002A	Identify and control risks in own work
BSBINT303B	Organise the importing and exporting of goods

MSS402001A	Apply competitive systems and practices
MSS402002A	Sustain process improvements
MSS402021A	Apply Just in Time procedures
MSS402030A	Apply cost factors to work practices
MSS402031A	Interpret product costs in terms of customer requirements
MSS402040A	Apply 5S procedures
MSS402050A	Monitor process capability
MSS402051A	Apply quality standards
MSS402060A	Use planning software systems in operations
MSS402061A	Use SCADA systems in operations
MSACMT270A	Use sustainable energy practices
MSS402080A	Undertake root cause analysis
MSS402081A	Contribute to the application of a proactive maintenance strategy
MSAENV472B	Implement and monitor environmentally sustainable work practices
TAEASS401B	Plan assessment activities and processes
TAEASS402B	Assess competence
TAEASS403B	Participate in assessment validation
TAEDEL301A	Provide work skill instruction
TAEDEL404A	Mentor in the workplace

FDF30510 Certificate III in Retail Baking (Cake and Pastry)

Modification History

September 2012: Replacement of superseded imported Units.

November 2011: Updates to imported Units, minor edits.

Description

This Qualification covers the retail baking - cake and pastry specialisation within the food processing industry.

Job Roles

The Certificate III in Retail Baking (Cake and Pastry) provides trade baking skills and knowledge for those working in a retail baking environment with a focus on cakes and pastry.

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Some Units imported into this Qualification from the SIR07 Retail Services and SIT07 Tourism, Hospitality and Events Training Packages require prerequisite Units in hygiene and food safety from the source Training Packages. These prerequisite Units have not been imported as they duplicate food safety Units already required as core skills within the Food Processing Training Package Qualifications. If selecting these Units, the RTO should facilitate recognition of the FDF Units as suitable prerequisite Unit alternatives.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this Qualification include:

- FDF20510 Certificate II in Retail Baking Assistance
- direct entry
- relevant vocational training and/or work experience.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake FDF40110 Certificate IV in Food Processing or other suitable Certificate IV Qualifications.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, all work must comply with food safety, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace.

Entry Requirements

Not applicable.

Employability Skills Summary

The following table contains a summary of the employability skills as identified by the retail baking industries for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Confirm relevant industry and workplace requirements. • Understand personal and team requirements of relevant industry and workplace standards, regulations and policies. • Complete standard documentation. • Use communication technologies efficiently. • Provide relevant work-related information to others. • Ensure records are accurate and legible. • Establish effective working relationships with colleagues. • Undertake interactive workplace communication. • Support team communication practices.
Teamwork	<ul style="list-style-type: none"> • Implement work team reporting requirements. • Work as a team member. • Implement team tasks in accordance with regulatory and workplace requirements. • Work cooperatively with people of different ages, gender, race or religion. • Undertake appropriate and effective communication with team members.
Problem-solving	<ul style="list-style-type: none"> • Identify risks and implement risk control measures for machinery and equipment. • Identify and address problems and faults. • Use problem solving techniques to determine work requirements. • Assess processes and outcomes against quality criteria. • Identify non-compliances. • Implement food safety procedures. • Comply with environmental standards and requirements of the workplace.
Initiative and enterprise	<ul style="list-style-type: none"> • Contribute to continuous improvement processes. • Seek and provide feedback on procedures and processes. • Identify non-conformances to quality standards and take appropriate action. • Rectify problems promptly and appropriately. • Monitor and adjust activity in response to operational variations.

	<ul style="list-style-type: none"> Identify, assess and act on existing and potential risks.
Planning and organising	<ul style="list-style-type: none"> Determine work requirements in order to meet output targets. Identify priorities and variables that impact on work planning. Ensure work tools are ready and available for operations. Plan activities to meet work targets.
Self-management	<ul style="list-style-type: none"> Manage own work to meet performance criteria. Conduct regular housekeeping activities to keep work area clean and tidy at all times. Maintain currency of relevant, work-related information. Monitor own work against quality standards and identify areas for improvement. Understand own work activities and responsibilities. Identify and apply safety procedures, including the use of protective equipment. Manage work load priorities and timelines. Comply with environmental standards and requirements of the workplace.
Learning	<ul style="list-style-type: none"> Recognise limits of own expertise and seek skill development if required. Assess competencies in meeting job requirements. Ask questions to expand own knowledge. Maintain skill and knowledge currency. Participate in learning and development opportunities.
Technology	<ul style="list-style-type: none"> Use baking machines and equipment in correct operational mode. Monitor machine operation. Perform minor maintenance on machinery. Work with technology safely and according to workplace standards.

Packaging Rules

This Qualification requires the achievement of **sixteen (16)** Units of Competency in accordance with the following rules.

Thirteen (13) Core Units

Three (3) Elective Units

Elective selection must include:

- One (1) Group A elective Unit

Two (2) remaining elective Units may be selected from:

- Group A elective Units below, not previously selected
- Units packaged at Group A in FDF20510 Certificate II in Retail Baking Assistance
- Units packaged at FDF40110 Certificate IV in Food Processing (maximum of 1)
- Units from any nationally endorsed Training Package and accredited course that are packaged at Certificate I level (maximum 1 Unit), Certificate II level (maximum 1 Unit) and Certificate III level

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

CORE UNITS

Complete all thirteen (13) core Units.

FDFFS2001A	Implement the food safety program and procedures
FDFOHS3001A	Contribute to OHS processes
FDFOP2061A	Use numerical applications in the workplace
FDFOP2064A	Provide and apply workplace information
FDFRB2001A	Form and fill pastry products
FDFRB2002A	Prepare fillings
FDFRB3001A	Produce pastry
FDFRB3003A	Produce sponge, cake and cookie batter
FDFRB3004A	Decorate cakes and cookies
FDFRB3006A	Bake sponges, cakes and cookies
FDFRB3007A	Bake pastry products
FDFRB3012A	Diagnose and respond to product and process faults (pastry, cake and cookies)* <i>FDFRB2001A Form and fill pastry products</i> <i>FDFRB2002A Prepare fillings</i> <i>FDFRB3001A Produce pastry</i>

	<i>FDFRB3003A Produce sponge, cake and cookie batter</i> <i>FDFRB3004A Decorate cake and cookies</i> <i>FDFRB3006A Bake sponges, cakes and cookies</i> <i>FDFRB3007A Bake pastry products</i>
MSAENV272B	Participate in environmentally sustainable work practices

GROUP A

Select a minimum of one (1) Group A elective Units.

FDFOP3005A	Prepare food products using basic cooking methods* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFOP3006A	Identify cultural, religious and dietary requirements for food products
FDFRB2003A	Produce meringue-based products
FDFRB3014A	Produce sweet yeast products
FDFRB3015A	Produce and decorate gateaux and tortes* <i>FDFRB2002A Prepare fillings</i> <i>FDFRB2003A Produce meringue-based products</i> <i>FDFRB3001A Produce pastry</i> <i>FDFRB3003A Produce sponge, cake and cookie batter</i> <i>FDFRB3004A Decorate cakes and cookies</i> <i>FDFRB3006A Bake sponges, cakes and cookies</i> <i>FDFRB3007A Bake pastry products</i>
FDFRB3016A	Plan and schedule production for retail bakery
FDFRB3017A	Participate in product development
FDFPPL3003A	Support and mentor individuals and groups
FDFTEC3001A	Participate in a HACCP team* <i>FDFFS2001A Implement the food safety program and procedures</i>
BSBCUS301B	Deliver and monitor a service to customers
HLTFA301C	Apply first aid
MSS403002A	Ensure process improvements are sustained
SITHCCC022A	Prepare chocolate and chocolate confectionery* <i>SITXOHS002A Follow workplace hygiene procedures</i>
SITHFAB012B	Prepare and serve espresso coffee
SITHPAT007A	Prepare and display petits fours* <i>SITHPAT001A Prepare and produce pastries</i>

	<p><i>SITHPAT002A Prepare and produce cakes</i></p> <p><i>SITHPAT003A Prepare and produce yeast goods or,</i></p> <p><i>SITHCCC014A Prepare pastries, cakes and yeast goods*</i></p> <p><i>SITHCCC001B Organise and prepare food</i></p> <p><i>SITHCCC002A Present food</i></p> <p><i>SITHCCC005A Use basic methods of cookery</i></p> <p><i>SITXOHS002A Follow workplace hygiene procedures</i></p>
SITHPAT008A	<p>Prepare and model marzipan*</p> <p><i>SITXOHS002A Follow workplace hygiene procedures</i></p>
SITHPAT010A	<p>Prepare and display sugar work*</p> <p><i>SITXOHS002A Follow workplace hygiene procedures</i></p>
TLIA3038A	Control and order stock

FDF30610 Certificate III in Retail Baking (Bread)

Modification History

September 2012: Replacement of superseded imported Units.

November 2011: Updates to imported Units, minor edits.

Description

This Qualification covers the retail baking - bread specialisation within the food processing industry.

Job Roles

The Certificate III in Retail Baking (Bread) provides trade baking skills and knowledge for those working in a retail baking environment with a focus on bread baking.

Some Units imported into this Qualification from the SIR07 Retail Services and SIT07 Tourism, Hospitality and Events Training Packages require prerequisite Units in hygiene and food safety from the source Training Packages. These prerequisite Units have not been imported as they duplicate food safety Units already required as core skills within the Food Processing Training Package Qualifications. If selecting these Units, the RTO should facilitate recognition of the FDF Units as suitable prerequisite Unit alternatives.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Self-management	<ul style="list-style-type: none"> Manage own work to meet performance criteria. Conduct regular housekeeping activities to keep work area clean and tidy at all times. Maintain currency of relevant work-related information. Monitor own work against quality standards and identify areas for improvement. Understand own work activities and responsibilities. Identify and apply safety procedures, including the use of protective equipment. Manage work load priorities and timelines. Comply with environmental standards and requirements of the workplace.
Learning	<ul style="list-style-type: none"> Recognise limits of own expertise and seek skill development if required. Assess competencies in meeting job requirements. Ask questions to expand own knowledge. Maintain skill and knowledge currency. Participate in learning and development opportunities.
Technology	<ul style="list-style-type: none"> Use baking machines and equipment in correct operational mode. Monitor machine operation. Perform minor maintenance on machinery. Work with technology safely and according to workplace standards.

Packaging Rules

This Qualification requires the achievement of **thirteen (13)** Units of Competency in accordance with the following rules.

Nine (9) Core Units

Four (4) Elective Units

Elective selection must include:

- Two (2) Group A elective Units

Two (2) remaining elective Units may be selected from:

- Group A elective Units below, not previously selected
- Units packaged at Group A in FDF20510 Certificate II in Retail Baking Assistance
- Units packaged at FDF40110 Certificate IV in Food Processing (maximum of 1)
- Units from any nationally endorsed Training Package and accredited course that are packaged at Certificate I level (maximum 1 Unit), Certificate II level (maximum 1 Unit) and Certificate III level

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

CORE UNITS

Complete all nine (9) core Units.

FDFFS2001A	Implement the food safety program and procedures
FDFOHS3001A	Contribute to OHS processes
FDFOP2061A	Use numerical applications in the workplace
FDFOP2064A	Provide and apply workplace information
FDFRB3002A	Produce bread dough
FDFRB3005A	Bake bread
FDFRB3010A	Process dough
FDFRB3011A	Diagnose and respond to product and process faults (bread)* <i>FDFRB3002A Produce bread dough</i> <i>FDFRB3005A Bake bread</i> <i>FDFRB3010A Process dough</i>
MSAENV272B	Participate in environmentally sustainable work practices

GROUP A

Select a minimum of two (2) Group A elective Units.

FDFOP3005A	Prepare food products using basic cooking methods* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFOP3006A	Identify cultural, religious and dietary requirements for food products
FDFPPL3003A	Support and mentor individuals and groups
FDFRB3008A	Store, handle and use frozen dough
FDFRB3009A	Retard dough
FDFRB3013A	Produce artisan breads* <i>FDFRB3002A Produce bread dough</i> <i>FDFRB3005A Bake bread</i> <i>FDFRB3010A Process dough</i>
FDFRB3016A	Plan and schedule production for retail bakery
FDFRB3017A	Participate in product development
FDFTEC3001A	Participate in a HACCP team* <i>FDFFS2001A Implement the food safety program and procedures</i>
BSBCUS301B	Deliver and monitor a service to customers
BSBSMB401A	Establish legal and risk management requirements of small business
HLTFA301C	Apply first aid
MSS403002A	Ensure process improvements are sustained
SITHFAB012B	Prepare and serve espresso coffee
TLIA3038A	Control and order stock

- Units packaged at Group A in FDF20510 Certificate II in Retail Baking Assistance
- Units packaged at FDF40110 Certificate IV in Food Processing (maximum of 1)
- Units from any nationally endorsed Training Package and accredited course that are packaged at Certificate I level (maximum 1 Unit), Certificate II level (maximum 1 Unit) and Certificate III level

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

CORE UNITS

Complete all seventeen (17) core Units.

FDFFS2001A	Implement the food safety program and procedures
FDFOHS3001A	Contribute to OHS processes
FDFOP2061A	Use numerical applications in the workplace
FDFOP2064A	Provide and apply workplace information
FDFRB2001A	Form and fill pastry products
FDFRB2002A	Prepare fillings
FDFRB3001A	Produce pastry
FDFRB3002A	Produce bread dough
FDFRB3003A	Produce sponge, cake and cookie batter
FDFRB3004A	Decorate cakes and cookies
FDFRB3005A	Bake bread
FDFRB3006A	Bake sponges, cakes and cookies
FDFRB3007A	Bake pastry products
FDFRB3010A	Process dough

FDFRB3011A	Diagnose and respond to product and process faults (bread)* <i>FDFRB3002A Produce bread dough</i> <i>FDFRB3005A Bake bread</i> <i>FDFRB3010A Process dough</i>
FDFRB3012A	Diagnose and respond to product and process faults (pastry, cake and cookies)* <i>FDFRB2001A Form and fill pastry products</i> <i>FDFRB2002A Prepare fillings</i> <i>FDFRB3001A Produce pastry</i> <i>FDFRB3003A Produce sponge, cake and cookie batter</i> <i>FDFRB3004A Decorate cake and cookies</i> <i>FDFRB3006A Bake sponges, cakes and cookies</i> <i>FDFRB3007A Bake pastry products</i>
MSAENV272B	Participate in environmentally sustainable work practices

GROUP A

Select a minimum of one (1) Group A elective Units

FDFOP3005A	Prepare food products using basic cooking methods* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFOP3006A	Identify cultural, religious and dietary requirements for food products
FDFPPL3003A	Support and mentor individuals and groups
FDFPPL3004A	Lead work teams and groups
FDFRB2003A	Produce meringue-based products
FDFRB3008A	Store, handle and use frozen dough
FDFRB3009A	Retard dough
FDFRB3013A	Produce artisan breads* <i>FDFRB3002A Produce bread dough</i> <i>FDFRB3005A Bake bread</i> <i>FDFRB3010A Process Dough</i>
FDFRB3014A	Produce sweet yeast products
FDFRB3015A	Produce and decorate gateaux and tortes* <i>FDFRB2002A Prepare fillings</i> <i>FDFRB2003A Produce meringue-based products</i> <i>FDFRB3001A Produce pastry</i> <i>FDFRB3003A Produce sponge, cake and cookie batter</i>

	<i>FDFRB3004A Decorate cakes and cookies</i> <i>FDFRB3006A Bake sponges, cakes and cookies</i> <i>FDFRB3007A Bake pastry products</i>
FDFRB3016A	Plan and schedule production for retail bakery
FDFRB3017A	Participate in product development
FDFTEC3001A	Participate in a HACCP team* <i>FDFFS2001A Implement the food safety program and procedures</i>
BSBCUS301B	Deliver and monitor a service to customers
HLTFA301C	Apply first aid
MSS403002A	Ensure process improvements are sustained
SITHCCC022A	Prepare chocolate and chocolate confectionery* <i>SITXOHS002A Follow workplace hygiene procedures</i>
SITHFAB012B	Prepare and serve espresso coffee
SITHPAT007A	Prepare and display petits fours* <i>SITHPAT001A Prepare and produce pastries</i> <i>SITHPAT002A Prepare and produce cakes*</i> <i>SITHPAT003A Prepare and produce yeast goods* or,</i> <i>SITHCCC014A Prepare pastries, cakes and yeast goods*</i> <i>SITHCCC001B Organise and prepare food</i> <i>SITHCCC002A Present food</i> <i>SITHCCC005A Use basic methods of cookery</i> <i>SITXOHS002A Follow workplace hygiene procedures</i>
SITHPAT008A	Prepare and model marzipan* <i>SITXOHS002A Follow workplace hygiene procedures</i>
SITHPAT010A	Prepare and display sugar work* <i>SITXOHS002A Follow workplace hygiene procedures</i>
TLIA3038A	Control and order stock

FDF30910 Certificate III in Food Processing (Sales)

Modification History

September 2012: Replacement of superseded imported Units.

November 2011: Updates to imported Units, minor edits.

Description

This Qualification covers sales specialisation within the food processing industry.

Job Roles The Certificate III in Food Processing (Sales) targets those providing sales advice and services for manufacturing or retail food processing contexts. This Qualification requires the ability to work independently and as a team member, performing a range of sales activities and applying technical skill and knowledge relating to the food processing industry.

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.
-

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this Qualification include:

- FDF20111 Certificate II in Food Processing or FDF20911 Certificate II in Food Processing (Sales)
- direct entry
- relevant vocational training and/or work experience.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake the FDF40110 Certificate IV in Food Processing or any other suitable Qualification.

Licensing/Regulatory Information

Licensing, Legislative, Regulatory or Certification Considerations There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, all work must comply with food safety, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace.

Entry Requirements

Not applicable.

Employability Skills Summary

Certificate III in Food Processing (Sales)

The following table contains a summary of the employability skills as identified by the Food Processing industries for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Confirm relevant industry and workplace requirements. • Understand personal and team requirements of relevant industry and workplace standards, regulations and policies. • Complete a range of sales related documentation. • Use communication technologies efficiently. • Provide relevant work-related information to others. • Ensure records are accurate and legible. • Establish effective working relationships with colleagues and customers. • Provide advice and information that is relevant to meeting customer needs. • Undertake interactive workplace communication. • Support team communication practices.
Teamwork	<ul style="list-style-type: none"> • Provide support and information to team members • Monitor work team tasks in accordance with regulatory and workplace requirements. • Work cooperatively with people of different ages, gender, race or religion. • Undertake appropriate and effective communication with team members. • Understand and communicate team processes that impact on product availability.
Problem-solving	<ul style="list-style-type: none"> • Identify and address service problems and product faults. • Provide problem solving support to customers and team members. • Evaluate skill requirements of work tasks. • Use problem solving techniques to determine work requirements. • Assess processes and outcomes against quality criteria. • Determine best solutions to meet customer needs. • Ensure customer service is completed according to agreements.
Initiative and enterprise	<ul style="list-style-type: none"> • Contribute to and promote continuous improvement processes. • Seek and provide feedback from customers on procedures and

	<p>processes.</p> <ul style="list-style-type: none"> • Collect and assess data and information on work processes. • Identify non-conformances to standards and take appropriate action. • Rectify problems promptly and appropriately. • Identify, assess and act on existing and potential risks. • Seek ways to ensure customer satisfaction.
Planning and organising	<ul style="list-style-type: none"> • Determine work requirements in order to meet order specifications. • Identify priorities and variables that impact on service delivery. • Plan work tasks for self and others as required. • Communicate plan changes to customers. • Schedule work orders.
Self-management	<ul style="list-style-type: none"> • Manage own work to meet performance criteria. • Monitor information in work area. • Conduct regular housekeeping activities to keep work area clean and tidy at all times. • Maintain currency of relevant, work-related information. • Monitor own work against quality standards and identify areas for improvement. • Understand own work activities and responsibilities. • Identify and apply safety procedures. • Manage work load priorities and timelines.
Learning	<ul style="list-style-type: none"> • Recognise limits of own expertise and seek skill development if required. • Assess competencies in meeting job requirements. • Ask questions to expand own knowledge. • Maintain skill and knowledge currency. • Participate in meetings to inform work practices.
Technology	<ul style="list-style-type: none"> • Use information and communication technology efficiently and safely. • Work with technology safely and according to workplace standards.

Packaging Rules

This Qualification requires the achievement of **fourteen (14)** Units of Competency in accordance with the following rules.

Total Units must include a minimum of eight (8) Units coded FDF.

Six (6) Core Units

Eight (8) Elective Units

Elective selection must include:

- Two (2) Group A elective Units
- Two (2) Group B elective Units

Four (4) remaining elective Units may be selected from:

- Group A elective Units below, not previously selected
- Group B elective Units below, not previously selected
- Group C elective Units
- Units packaged in FDF20310 Certificate II in Food Processing (Sales)
- Units packaged in FDF40110 Certificate IV in Food Processing (maximum of 3)
- Units from any nationally endorsed Training Package and accredited course that are packaged at Certificate I level (maximum 1 Unit), Certificate II level (maximum 2 Units) and Certificate III level (maximum 3 Units).

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s identified under the Unit.

CORE UNITS

Complete the following six (6) Units.

FDFFS2001A	Implement the food safety program and procedures
FDFFS3001A	Monitor the implementation of quality and food safety programs* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFOHS3001A	Contribute to OHS processes
FDFOP2061A	Use numerical applications in the workplace
FDFOP2064A	Provide and apply workplace information
MSAENV272B	Participate in environmentally sustainable work practices

ELECTIVES

GROUP A

Select a minimum of two (2) Group A elective Units.

BSBCUS301B	Deliver and monitor a service to customers
BSBMKG501B	Identify and evaluate marketing opportunities
BSBMKG507A	Interpret market trends and developments
BSBMKG514A	Implement and monitor marketing activities
BSBSMB301A	Investigate micro business opportunities
BSBSMB401A	Establish legal and risk management requirements of small business
BSBSMB402A	Plan small business finances
BSBSMB403A	Market the small business
BSBSMB404A	Undertake small business planning
BSBSMB405B	Monitor and manage small business operations
BSBSMB406A	Manage small business finances
BSBSMB407A	Manage a small team
SIRXINV002A	Maintain and order stock
SIRXRSK002A	Maintain store security

GROUP B

Select a minimum of two (2) Group B Sector Specialist and Cross Sector elective Units.

Sector Specialist Units	
FDFV3002A	Program fresh produce grading equipment
FDFV3001A	Conduct chemical wash for fresh produce
FDFGR3001A	Work with micronutrients or additions in stockfeed manufacturing processes
FDFGR3002A	Demonstrate knowledge of animal nutrition principles
FDFOP3001A	Control contaminants and allergens in the work area* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFOP3005A	Prepare food products using basic cooking methods* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFOP3006A	Identify cultural, religious and dietary requirements for food products

FD301A	Operate a chickway system
FD302A	Debone and fillet product (manually)
MTMR308C	Prepare and produce value-added products
AHCPHT401A	Assess olive oil for style and quality
Cross Sector Units	
FD302A	Set up a production or packaging line for operation
FD301A	Participate in improvement processes
FD302A	Report on workplace performance
FD303A	Support and mentor individuals and groups
FD304A	Lead work teams and groups
FD305A	Participate in an audit process* <i>FD301A Participate in OHS processes</i> <i>FD303A Apply quality systems and procedures</i> <i>MSAENV272B Participate in environmentally sustainable work practices</i>
FD306A	Establish compliance requirements for work area
FD301A	Participate in a HACCP team* <i>FD301A Implement the food safety program and procedures</i>
FD302A	Implement the pest prevention program
FD303A	Apply raw materials, ingredient and process knowledge to production problems
LMTGN3007B	Monitor and operate trade waste process
MEM13003B	Work safely with industrial chemicals and materials
MSS403011A	Facilitate implementation of competitive systems and practices
MSS403013A	Lead team culture improvement
MSAENV472B	Implement and monitor environmentally sustainable work practices
MSAPMSUP303A	Identify equipment faults
MSAPMSUP330A	Develop and adjust a production schedule
MSL973001A	Perform basic tests
TLIA3015A	Complete receipt/despatch documentation
TLIA3016A	Use inventory systems to organise stock control

TLIA3018A	Organise despatch operations
TLIA3019A	Organise receival operations
TLIA3026A	Monitor storage facilities
TLIA3038A	Control and order stock
TLIA3039A	Receive and store stock

GROUP C

FDFOHS2001A	Participate in OHS processes
FDFOP2063A	Apply quality systems and procedures
BSBWRT301A	Write simple documents
HLTFA301C	Apply first aid
MSS402010A	Manage the impact of change on own work
MSS403010A	Facilitate change in an organisation implementing competitive systems and practices
MSS402001A	Apply competitive systems and practices
MSS402002A	Sustain process improvements
MSS403002A	Ensure process improvements are sustained
MSS402021A	Apply Just in Time procedures
MSS402030A	Apply cost factors to work practices
MSS402031A	Interpret product costs in terms of customer requirements
MSS402040A	Apply 5S procedures
MSS402050A	Monitor process capability
MSS402051A	Apply quality standards
MSS402060A	Use planning software systems in operations
MSS402061A	Use SCADA systems in operations
MSS402080A	Undertake root cause analysis
MSS402081A	Contribute to the application of a proactive maintenance strategy
MSS403021A	Facilitate a Just in Time system
MSS403023A	Monitor a levelled pull system of operations
MSS403040A	Facilitate and improve implementation of 5S
MSS403041A	Facilitate breakthrough improvements

MSS404050A	Undertake process capability improvements* <i>MSS404052A Apply statistics to processes in manufacturing</i>
MSS403051A	Mistake proof an operational process
MSS404052A	Apply statistics to processes in manufacturing
MSS404060A	Facilitate the use of planning software systems in a work area or team
MSS404082A	Assist in implementing a proactive maintenance strategy
MSS404083A	Support proactive maintenance
MSAPMOPS405A	Identify problems in fluid power system
MSAPMOPS406A	Identify problems in electronic control systems
MSAPMPER300C	Issue work permits* <i>RIIRIS201B Conduct local risk control</i>
MSAPMSUP310A	Contribute to the development of plant documentation
MSAPMSUP390A	Use structured problem solving tools
MSL922001A	Record and present data
TAEASS401B	Plan assessment activities and processes
TAEASS402B	Assess competence
TAEASS403B	Participate in assessment validation
TAEDEL301A	Provide work skill instruction

FDF31012 Certificate III in Sugar Milling Industry Operations

Modification History

This qualification has been derived from SUG30102 Certificate III in Sugar Milling. See Qualification Mapping Guide for notes on equivalence.

Description

Job Roles

This qualification covers work undertaken by sugar milling industry workers. Job roles may include for example:

Sugar Processing

Sugar boiler operator

Operator in charge of milling train or power trains

Operator in charge of boiler, milling train and powerhouse

Cane Supply Transport

Loco driver

Traffic officer

Mill Services

Foreman/bridge carpenter

Engine driver in mills

Additional Qualification Advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the qualification level.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this qualification include completion of FDF21011 Certificate II in Sugar Industry Operations or equivalent or direct entry.

Pathways from the Qualification

There are no higher level qualifications in sugar industry or sugar milling operations. However these qualifications will provide some credit within higher level Food Processing qualifications.

Australian Apprenticeships

This qualification is suitable for an Australian Apprenticeship.

Licensing/Regulatory Information

There is no direct link between this qualification and licensing, legislative and/or regulatory requirements. However, all work must comply with food safety, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace. There are elective Units available in this Qualification linked to the National Standard for Licensing Persons Performing High Risk Work. Refer to the host Training Package for details about the application of these Units and regulatory frameworks for their use.

Entry Requirements

There are no entry requirements for this qualification.

Employability Skills Summary

Employability Skill	Industry/enterprise requirements for this qualification include:
Communication	<ul style="list-style-type: none"> • Complete all reporting as required • Receive and relay oral and written messages • Read and apply workplace procedures and instructions • Communicate information about problems with work.
Teamwork	<ul style="list-style-type: none"> • Work as a team member • Identify own role and responsibilities within a team • Share workplace information.
Problem-solving	<ul style="list-style-type: none"> • Recognise and report any workplace hazards • Identify common problems and take required action • Follow workplace food safety procedures.
Initiative and Enterprise	<ul style="list-style-type: none"> • Inspect quality of work on an ongoing basis • Take appropriate corrective action to routine work problems • Select appropriate equipment • Distinguish between urgent and non-urgent tasks.
Planning and Organising	<ul style="list-style-type: none"> • Identify work requirements • Identify work priorities • Plan work activities to meet daily work requirements • Direct items to the correct area for further processing • Identify and use relevant personal protective equipment • Organise work area to maintain housekeeping standards • Organise relevant equipment and tools.
Self-management	<ul style="list-style-type: none"> • Identify personal responsibilities and work requirements • Manage time to meet own work requirements • Plan activity to meet own work requirements • Keep the work area clean and tidy at all times • Monitor the quality of own work against quality standards • Follow OHS practices • Identify safety requirements for working in food processing industry • Seek assistance from other team members where appropriate.
Learning	<ul style="list-style-type: none"> • Check work outcomes against workplace standards and identify inconsistencies • Assess own ability to meet job requirements • Listen to feedback and advice of supervisors • Identify own skill requirements and seek skill development if required • Attend training or skill development activities

	<ul style="list-style-type: none">• Ask questions to expand own knowledge• self-check numerical information.
Technology	<ul style="list-style-type: none">• Use work tools, machines and equipment safely and according to workplace procedures• Use manual handling technologies in the workplace• Use information technology devices as required.

Packaging Rules

Complete **twenty four (24)** units of competency in comprised of:

- Three (3) Core Units
- Twenty one (21) Elective Units

Core Units

Unit Code	Unit Title
FDFSUG308A	Analyse and convey workplace information
FDFOHS3001A	Contribute to OHS processes
MSAENV272B	Participate in environmentally sustainable work practices

Elective Units

- Select a minimum of five (5) units from Group A
- Select a minimum of seven (7) additional units from Group A or Group B
- Nine (9) additional units can come from Group A, Group B and or/this or any other endorsed Training Package or accredited course at Certificate I, II, III or IV.
- A maximum of eight (8) units may be packaged at AQF Level 1.
- Selected units must be relevant to job outcomes in the sugar milling industry.

Group A Units

Special Sector Units	
Rail Transport Operations	
FDFSUG301A	Drive a master-slave locomotive * <i>FDFSUG206A Drive a cane locomotive</i>
FDFSUG302A	Control cane traffic movements
FDFSUG303A	Adjust cane delivery schedules to meet daily milling requirements
Factory Operations	
AHCMOM301A	Coordinate machinery and equipment maintenance and repair
AHCMOM302A	Perform machinery maintenance
AHCMOM304A	Operate machinery and equipment
AHCMOM305A	Operate specialised machinery and equipment
FDFSUG304A	Operate a boiler - intermediate

FD3SUG305A	Operate a boiler - advanced
FD3SUG306A	Monitor a sugar mill powerhouse * <i>FD3SUG217A Operate a turbine</i>
FD3SUG309A	Operate a sugar system
Laboratory	
FD3SUG307A	Perform factory control tests
General	
FDFPPL3004A	Lead work teams and groups
TLILIC2016A	Licence to drive heavy rigid vehicle
TLILIC3017A	Licence to drive heavy combination vehicle

Group B Units

FD3SUG201A	Lay sleepers for cane rail systems
FD3SUG202A	Lay rails for cane rail systems
FD3SUG203A	Lay skeleton track for cane rail systems
FD3SUG204A	Operate tamping equipment
FD3SUG205A	Construct turnouts * <i>FD3SUG202A Lay rails for cane rail systems</i>
FD3SUG206A	Drive a cane locomotive
FD3SUG207A	Conduct cane weighbridge operations
FD3SUG208A	Operate a tipping station
FD3SUG209A	Operate an extraction station
FD3SUG210A	Operate a juice clarification process
FD3SUG211A	Operate a mud filtration process
FD3SUG212A	Chemically clean equipment
FD3SUG213A	Operate a pans station
FD3SUG214A	Operate a low grade fugal station

FDFSUG215A	Operate a high grade fugal station
FDFSUG216A	Operate a crystalliser station process
FDFSUG217A	Operate a turbine
FDFSUG218A	Operate a boiler - basic
FDFSUG219A	Operate a bagasse fuel supply system
FDFSUG220A	Operate a coal fuel supply system
FDFSUG221A	Operate an ash separation system
FDFSUG222A	Operate a waste water treatment system
FDFSUG223A	Operate a cooling water system
FDFSUG224A	Perform standard tests on cane samples
FDFSUG225A	Collect and prepare samples
FDFSUG226A	Perform general drilling operations
FDFSUG227A	Perform general lathe operations
FDFSUG228A	Perform general milling operations
FDFSUG229A	Perform general planing and shaping operations
FDFSUG230A	Undertake forming, bending and shaping
FDFSUG231A	Undertake simple fabrication
FDFOP2030A	Operate a process control interface
FDFOP2034A	Operate an evaporation process
AHCMOM203A	Operate basic machinery and equipment
AHCMOM204A	Undertake operational maintenance of machinery
AHCMOM207A	Conduct front end loader operations
CPCCD03011A	Perform dogging * <i>CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry</i>
CPCCR13012A	Perform basic rigging *

	<p><i>CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry</i></p> <p><i>CPCCDO3011A Perform dogging</i></p>
CPCCSC2002A	<p>Erect and dismantle basic scaffolding *</p> <p><i>CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry</i></p>
RIICBM305A	Install pre-cast concrete bridge decks
RIIHAN305A	Operate gantry or overhead crane
RIIMPO319A	Conduct backhoe/loader operations
TLIC2041A	Operate self-propelled equipment on track
TLID3035A	Operate a boom type elevating work platform
TLID3036A	Lift and move load using a mobile crane
TLILIC2001A	Licence to operate a forklift truck
TLILIC2014A	Licence to drive light rigid vehicle
TLILIC2015A	Licence to drive medium rigid vehicle
TLILIC3006A	Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity)

FDF40110 Certificate IV in Food Processing

Modification History

September 2012: Replacement of superseded imported Units.

April 2012: Minor typographical corrections.

November 2011: Updates to imported Units, minor edits.

Description

This Qualification covers a range of food processing industries, such as:

- Baking (including large scale production of cakes, pastry, bread and plant baking)
- Beverages (including juices, soft drinks, cordials, aerated and still waters, energy drinks and other modified beverages, such as vitamin and antioxidant beverages, coffee, tea and ice)
- Confectionery
- Dairy processing
- Fruit and vegetables
- Grocery products and supplies (including honey, jams, spreads, sauces, dressings, condiments, spices, edible oils and fats and pasta)
- Poultry.

Job Roles

The Certificate IV in Food Processing targets those working in supervisory or middle management roles within food processing environments. This Qualification includes technical skill and knowledge required to solve food production problems and ensure that operations are implemented and maintained at optimal performance. Emphasis is on monitoring the implementation of food processing systems and procedures with input into management functions of the organisation.

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this Qualification include:

- FDF30110 Certificate III in Food Processing
- direct entry
- relevant vocational training and/or work experience.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake the FDF50110 Diploma of Food Processing or any other suitable Qualification.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, all work must comply with food safety, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace.

Entry Requirements

Not applicable.

Employability Skills Summary

Certificate IV in Food Processing

The following table contains a summary of the Employability Skills as identified by the food processing related industries for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Complete workplace documentation and records. • Use a range of communication technologies to support work operations. • Develop work instructions, specifications and procedures. • Demonstrate effective and appropriate communication and interpersonal skills when dealing with people. • Communicate with all team members in a professional manner. • Demonstrate effective and appropriate documentation, communication and interpersonal skills when dealing with internal and external clients. • Use most appropriate communication method given priority, cost and audience needs. • Access, interpret and apply technical information. • Analyse data and information to determine implications for work operations.
Teamwork	<ul style="list-style-type: none"> • Work cooperatively with people of different ages, gender, race or religion. • Liaise with and provide support to other team members. • Demonstrate leadership skills. • Identify and manage performance required to meet internal and external customer needs in own work and team work. • Manage organisational processes and provide problem solving support to others.
Problem-solving	<ul style="list-style-type: none"> • Investigate problem causes. • Identify, rectify or report potential and actual problems associated with work operations. • Identify factors which may affect the product or service to be provided. • Use material and process knowledge to solve problems. • Identify hazards and suggest control measures. • Monitor food safety practices. • Implement food safety procedures in the workplace.
Initiative and enterprise	<ul style="list-style-type: none"> • Gather and analyse feedback on products, processes and

	<p>procedures.</p> <ul style="list-style-type: none"> • Assess quality and other indicators of products. • Support achievement of efficient production processes. • Determine and act on situations requiring further information or problem solving. • Assist in the implementation of continuous improvement processes. • Provide leadership in the workplace.
Planning and organising	<ul style="list-style-type: none"> • Identify hazards and implement appropriate hazard control measures. • Demonstrate time management skills. • Source and prepare materials and resources and ensure availability to support work operations. • Schedule and sequence work to maximise safety and productivity. • Optimise work processes.
Self-management	<ul style="list-style-type: none"> • Interpret and apply relevant acts and regulations. • Keep the work area clean and tidy at all times. • Monitor own work and work of team and identify and act on any quality issues. • Manage own time to meet deadlines. • Implement and monitor workplace procedures and instructions.
Learning	<ul style="list-style-type: none"> • Implement learning activities as appropriate to ensure achievement of specified work requirements. • Be supportive, assertive and use interpersonal skills to encourage workplace learning. • Identify own training needs and seek skill development if required. • Gather feedback to own work to assess effectiveness in meeting objectives and integrate information into own practice. • Assess work data and information to identify areas for improved performance.
Technology	<ul style="list-style-type: none"> • Use computer software applications effectively. • Work with machines and workplace technology safely and according to workplace standards. • Help others use technology efficiently and safely. • Ensure readiness and operational efficiency of workplace technology.

Packaging Rules

This Qualification requires the achievement of **twenty two (22)** Units of Competency in accordance with the following rules.

Total Units must include a minimum of twelve (12) Units coded FDF.

Six (6) Core Units

Sixteen (16) Elective Units

Elective selection must include ten (10) Elective Units consisting of:

- A minimum of one (1) Group A elective Unit
- A minimum of one (1) Group B elective Unit
- A minimum of eight (8) Specialist Technical and Cross Sector Group C elective Units

Six (6) remaining elective Units may be selected from:

- Group A, B and C Units listed below, not previously selected
- Group D Units listed below, not previously selected
- Units packaged at Certificate II in Food Processing (maximum of 3)
- Units packaged at Certificate III in Food Processing (maximum of 5)
- Units packaged at Diploma of Food Processing (maximum of 2)
- A maximum of 4 Units from any nationally endorsed Training Package and accredited course that are packaged at Certificate II level (maximum 2 Units), Certificate III level (maximum 2 Units), Certificate IV level (maximum 4 Units), and Diploma level (maximum 2 Units)

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s identified under the Unit.

CORE UNITS

Complete all six (6) core Units.

FDFFS2001A	Implement the food safety program and procedures
FDFFS3001A	Monitor the implementation of quality and food safety programs* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFOP2061A	Use numerical applications in the workplace
FDFPPL3002A	Report on workplace performance
FDFTEC3003A	Apply raw materials, ingredient and process knowledge to production problems
MSAENV472B	Implement and monitor environmentally sustainable work practices

ELECTIVE UNITS

GROUP A

Select a minimum of one (1) Group A elective Units.

FDFOHS4001A	Identify, assess and control OHS risk in own work
FDFOHS4002A	Maintain OHS processes

GROUP B

Select a minimum of one (1) Group B elective Units.

FDFOP3003A	Operate interrelated processes in a production system
FDFOP3004A	Operate interrelated processes in a packaging system

GROUP C

Select a minimum of eight (8) Group C Specialist Technical and Cross Sector elective units.

Specialist Technical units	
FDFPPL4002A	Plan and coordinate maintenance
FDFPPL4004A	Optimise a work process* <i>FDFPPL3001A Participate in improvement processes</i>
FDFPPL4005A	Establish process capability* <i>FDFOP2015A Apply principles of statistical process control</i> <i>FDFOP2061A Use numerical applications in the workplace</i> <i>FDFTEC4007A Describe and analyse data using mathematical principles</i>
FDFTEC4001A	Determine handling processes for perishable food items
FDFTEC4002A	Manage controlled atmosphere storage
FDFTEC4003A	Control food contamination and spoilage* <i>FDFFS3001A Monitor the implementation of quality and food safety programs</i>
FDFTEC4004A	Apply basic process engineering principles to food processing* <i>FDFTEC4007A Describe and analyse data using mathematical principles</i> <i>FDFOP2030A Operate a process control interface</i>
FDFTEC4005A	Apply an understanding of food additives
FDFTEC4006A	Apply an understanding of legal requirements of food production
FDFTEC4007A	Describe and analyse data using mathematical principles* <i>FDFOP2015A Apply principles of statistical process control</i>

	<i>FDFOP2061A Use numerical applications in the workplace</i>
FDFTEC4008A	Apply principles of food packaging
FDFTEC4009A	Identify the physical and chemical properties of materials, food and related products
FDFTEC4010A	Manage water treatment processes* <i>MSAENV272B Participate in environmentally sustainable work practices</i>
FDFTEC4011A	Participate in product recalls* <i>FDFFS3001A Monitor the implementation of quality and food safety programs</i> <i>FDFFS2001A Implement the food safety program and procedures</i>
MSS404081A	Undertake proactive maintenance analyses
MSS404082A	Assist in implementing a proactive maintenance strategy
MSS404083A	Support proactive maintenance
MSAPMOPS400A	Optimise process_plant area* <i>MSAPMSUP390A Use structured problem solving tools</i>
MSAPMOPS401A	Trial new process or product
MSAPMOPS404A	Co-ordinate maintenance
MSAPMOPS405A	Identify problems in fluid power system
MSAPMOPS406A	Identify problems in electronic control systems
PMASUP420B	Minimise environmental impact of process
PMBTECH406A	Diagnose production equipment problems
Cross Sector units	
FDFAU4001A	Assess compliance with food safety programs
FDFAU4002A	Communicate and negotiate to conduct food safety audits
FDFAU4003A	Conduct food safety audits
FDFAU4004A	Identify, evaluate and control food safety hazards
FDFAU4005A	Audit bivalve mollusc growing and harvesting processes* <i>FDFAU4002A Communicate and negotiate to conduct food safety audits</i> <i>FDFAU4003A Conduct food safety audits</i> <i>FDFAU4004A Identify, evaluate and control food safety hazards</i>
FDFAU4006A	Audit a cook chill process* <i>FDFAU4002A Communicate and negotiate to conduct food safety audits</i>

	<i>FDFAU4003A Conduct food safety audits</i> <i>FDFAU4004A Identify, evaluate and control food safety hazards</i>
FDFAU4007B	Audit a heat treatment process* <i>FDFAU4002A Communicate and negotiate to conduct food safety audits</i> <i>FDFAU4003A Conduct food safety audits</i> <i>FDFAU4004A Identify, evaluate and control food safety hazards</i>
FDFAU4008A	Audit manufacturing of ready-to-eat meat products* <i>FDFAU4002A Communicate and negotiate to conduct food safety audits</i> <i>FDFAU4003A Conduct food safety audits</i> <i>FDFAU4004A Identify, evaluate and control food safety hazards</i>
FDFPPL4001A	Manage people in the work area* <i>FDFPPL3003A Support and mentor individuals and groups</i>
FDFPPL4003A	Schedule and manage production
FDFPPL4006A	Manage a work area within budget
FDFPPL4007A	Manage supplier agreements and contracts
FDFPPL4008A	Manage internal audits* <i>FDFOP2063A Apply quality systems and procedures</i> <i>FDFPPL3005A Participate in an audit process</i> <i>MSAENV272B Participate in environmentally sustainable work practices</i>
BSBLED401A	Develop teams and individuals
BSBMGT402A	Implement operational plan
BSBMGT403A	Implement continuous improvement
BSBSMB407A	Manage a small team
MSS403001A	Implement competitive systems and practices
MSS403002A	Ensure process improvements are sustained
MSS403011A	Facilitate implementation of competitive systems and practices
MSS403030A	Improve cost factors in work practices
MSS403032A	Analyse manual handling processes
MSS403051A	Mistake proof an operational process
MSS404050A	Undertake process capability improvements* <i>MSS404052A Apply statistics to operational processes</i>
MSS404052A	Apply statistics to operational processes

TAEASS401B	Plan assessment activities and processes
TAEASS402B	Assess competence
TAEASS403B	Participate in assessment validation
TAEDDES401B	Design and develop learning programs

GROUP D

FDFOHS2001A	Participate in OHS processes
FDFOP2030A	Operate a process control interface
FDFOP2063A	Apply quality systems and procedures
FDFPPL3005A	Participate in audit processes* <i>FDFOHS2001A Participate in OHS processes</i> <i>FDFOP2063A Apply quality systems and procedures</i> <i>MSAENV272B Participate in environmentally sustainable work practices</i>
AHCBUS405A	Participate in an e-business supply chain
BSBCUS501C	Manage quality customer service
BSBHRM402A	Recruit, select and induct staff
BSBINN301A	Promote innovation in a team environment
BSBMGT401A	Show leadership in the workplace
BSBRES401A	Analyse and present research information
BSBSMB401A	Establish legal and risk management requirements of small business
BSBSMB402A	Plan small business finances
BSBSMB403A	Market the small business
BSBSMB404A	Undertake small business planning
BSBSMB405B	Monitor and manage small business operations
BSBSMB406A	Manage small business finances
BSBWOR401A	Establish effective workplace relationships
BSBWOR402A	Promote team effectiveness
BSBWOR403A	Manage stress in the workplace
BSBWOR404B	Develop work priorities
BSBWRT401A	Write complex documents

MEM15001B	Perform basic statistical quality control
RIIRIS201B	Conduct local risk control
MSS402060A	Use planning software systems in operations
MSS402061A	Use SCADA systems in operations
MSS402080A	Undertake root cause analysis
MSS403005A	Facilitate use of a Balanced Scorecard for performance improvement
MSS403010A	Facilitate change in an organisation implementing competitive systems and practices
MSS403013A	Lead team culture improvement
MSS403021A	Facilitate a Just in Time system
MSS403023A	Monitor a levelled pull system of operations
MSS403040A	Facilitate and improve implementation of 5S
MSS403041A	Facilitate breakthrough improvements
MSS404053A	Use six sigma techniques* <i>MSS404052A Apply statistics to operational processes</i>
MSS404060A	Facilitate the use of planning software systems in a work area or team
MSS404061A	Facilitate the use of SCADA systems in a team or work area
MSAENV272B	Participate in environmentally sustainable work practices
MSAPMPER201A	Monitor and control work permits
MSAPMPER300C	Issue work permits* <i>RIIRIS201B Conduct local risk control</i>
MSAPMPER400A	Coordinate permit process* <i>MSAPMPER300C Issue work permits*</i> <i>RIIRIS201B Conduct local risk control</i>
MSAPMSUP310A	Contribute to development of plant documentation
MSAPMSUP390A	Use structured problem solving tools

FDF40210 Certificate IV in Pharmaceutical Manufacturing

Modification History

September 2012: Replacement of superseded imported Units.

November 2011: Updates to imported Units, minor edits.

Description

This Qualification covers the Pharmaceutical Manufacturing specialisation.

Job Roles

The Certificate IV in Pharmaceutical Manufacturing targets those working in supervisory, middle management or those requiring technical roles within pharmaceutical manufacturing environments. Emphasis is on monitoring of pharmaceutical manufacturing systems and procedures with input into management functions of the organisation.

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this qualification include:

- FDF30210 Certificate III in Pharmaceutical Manufacturing
- direct entry
- relevant vocational training and/or work experience.

Pathways from the Qualification

After achieving this qualification, candidates may undertake the FDF50210 Diploma of Pharmaceutical Manufacturing or any other suitable Qualification.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, an individual Unit of Competency may specify relevant licensing, legislative and/or regulatory requirements. In addition, all work must comply with Good Manufacturing Practice, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace.

Entry Requirements

Not applicable.

Employability Skills Summary

Certificate IV in Pharmaceutical Manufacturing

The following table contains a summary of the Employability Skills as identified by the pharmaceutical manufacturing related industries for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Complete workplace documentation and records. • Use a range of communication technologies to support work operations. • Develop work instructions, specifications and procedures. • Demonstrate effective and appropriate communication and interpersonal skills when dealing with people. • Communicate with all team members in a professional manner. • Demonstrate effective and appropriate documentation, communication and interpersonal skills when dealing with internal and external clients. • Use most appropriate communication method given priority, cost and audience needs. • Access, interpret and apply technical information. • Analyse data and information to determine implications for work operations.
Teamwork	<ul style="list-style-type: none"> • Work cooperatively with people of different ages, gender, race or religion. • Liaise with and provide support to other team members. • Demonstrate leadership skills. • Identify and manage performance required to meet internal and external customer needs in own work and team work. • Manage organisational processes and provide problem solving support to others.
Problem-solving	<ul style="list-style-type: none"> • Investigate problem causes. • Identify, rectify or report potential and actual problems associated with work operations. • Identify factors which may affect the product or service to be provided. • Use material and process knowledge to solve problems. • Identify hazards and suggest control measures. • Monitor food safety practices.
Initiative and enterprise	<ul style="list-style-type: none"> • Gather and analyse feedback on products, processes and procedures.

	<ul style="list-style-type: none"> • Assess quality and other indicators of products. • Support achievement of efficient production processes. • Determine and act on situations requiring further information or problem solving. • Assist in the implementation of continuous improvement processes. • Provide leadership in the workplace.
Planning and organising	<ul style="list-style-type: none"> • Identify hazards and implement appropriate hazard control measures. • Demonstrate time management skills. • Source and prepare materials and resources and ensure availability to support work operations. • Schedule and sequence work to maximise safety and productivity. • Optimise work processes.
Self-management	<ul style="list-style-type: none"> • Interpret and apply relevant acts and regulations. • Keep the work area clean and tidy at all times. • Monitor own work and work of team and identify and act on any quality issues. • Manage own time to meet deadlines. • Implement and monitor workplace procedures and instructions.
Learning	<ul style="list-style-type: none"> • Implement learning activities as appropriate to ensure achievement of specified work requirements. • Be supportive, assertive and use interpersonal skills to encourage workplace learning. • Identify own training needs and seek skill development if required. • Gather feedback to own work to assess effectiveness in meeting objectives and integrate information into own practice. • Assess work data and information to identify areas for improved performance.
Technology	<ul style="list-style-type: none"> • Use computer software applications effectively. • Work with technology safely and according to workplace standards. • Help others use technology efficiently and safely. • Ensure readiness and operational efficiency of workplace technology.

Packaging Rules

This Qualification requires the achievement of **twenty one (21)** Units of Competency in accordance with the following rules.

Total Units must include a minimum of eleven (11) Units coded FDF.

Seven (7) Core Units

Fourteen (14) Elective Units

Elective selection must include:

- A minimum of one (1) Group A elective Unit
- A minimum of one (1) Group B elective Unit
- A minimum of five (5) Specialist Technical Group C elective Units

Seven (7) remaining elective Units may be selected from:

- Group A elective Units below, not previously selected
- Group B elective Units below, not previously selected
- Group C elective Units below, not previously selected
- Group D elective Units
- Units packaged at FDF20210 Certificate II in Pharmaceutical Manufacturing (maximum of 3)
- Units packaged at FDF30210 Certificate III in Pharmaceutical Manufacturing (maximum of 5)
- Units packaged at FDF50210 Diploma of Pharmaceutical Manufacturing (maximum of 2)
- A maximum of 4 Units from any nationally endorsed Training Package and accredited course that are packaged at Certificate II level (maximum 2 Units), Certificate III level (maximum 2 Units), Certificate IV level (maximum 4 Units), and Diploma level (maximum 2 Units)

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s identified under the Unit.

CORE UNITS

Complete the following seven (7) Units.

FDFPH4001A	Prepare and review workplace documentation to support Good Manufacturing Practice
FDFPH4002A	Facilitate and monitor Good Manufacturing Practice
FDFPH4003A	Facilitate contamination control
FDFPH4005A	Participate in validation processes
FDFPH4006A	Respond to non-conformance
FDFPPL3002A	Report on workplace performance

MSAENV472B	Implement and monitor environmentally sustainable work practices
------------	--

ELECTIVE UNITS

Select a minimum of one (1) Group A elective Unit.

GROUP A

FDFOHS4001A	Identify, assess and control OHS risk in own work
FDFOHS4002A	Maintain OHS processes

Select a minimum of one (1) Group B elective Unit

GROUP B

FDFOP3003A	Operate interrelated processes in a production system
FDFOP3004A	Operate interrelated processes in a packaging system

Select a minimum of five (5) Group C Specialist Technical and Cross Sector elective Units.

GROUP C

Specialist Technical units	
FDFPH4004A	Participate in change control procedures
FDFPH4005A	Participate in validation processes
FDFPPL4002A	Plan and coordinate maintenance
FDFPPL4004A	Optimise a work process* <i>FDFPPL3001A Participate in improvement processes</i>
FDFPPL4005A	Establish process capability* <i>FDFOP2015A Apply principles of statistical process control</i> <i>FDFOP2061A Use numerical applications in the workplace</i> <i>FDFTEC4007A Describe and analyse data using mathematical principles</i>
FDFTEC4001A	Determine handling processes for perishable food items
FDFTEC4002A	Manage controlled atmosphere storage
FDFTEC4003A	Control food contamination and spoilage* <i>FDFFS3001A Monitor the implementation of quality and food safety programs</i>
FDFTEC4004A	Apply basic process engineering principles to food processing* <i>FDFOP2030A Operate a process control interface</i>

	<i>FDTEC4007A Describe and analyse data using mathematical principles</i>
FDTEC4005A	Apply an understanding of food additives
FDTEC4006A	Apply an understanding of legal requirements of food production
FDTEC4007A	Describe and analyse data using mathematical principles* <i>FDOP2015A Apply principle of statistical process control</i> <i>FDOP2061A Use numerical applications in the workplace</i>
FDTEC4008A	Apply principles of food packaging
FDTEC4009A	Identify the physical and chemical properties of materials, food and related products
FDTEC4010A	Manage water treatment processes* <i>MSAENV272B Participate in environmentally sustainable work practices</i>
FDTEC4011A	Participate in product recalls* <i>FDFFS3001A Monitor the implementation of quality and food safety programs</i>
MSS404081A	Undertake proactive maintenance analyses
MSS404082A	Assist in implementing a proactive maintenance strategy
MSS404083A	Support proactive maintenance
MSAPMOPS404A	Co-ordinate maintenance
MSAPMOPS405A	Identify problems in fluid power system
MSAPMOPS406A	Identify problems in electronic control systems
MSAPMOPS401A	Trial new process or product
MSAPMOPS400A	Optimise process_plant area* <i>MSAPMSUP390A Use structured problem solving tools</i>
PMASUP420B	Minimise environmental impact of process
PMBTECH406A	Diagnose production equipment problems
Cross Sector units	
FDPPPL4001A	Manage people in the work area* <i>FDPPPL3003A Support and mentor individuals and groups</i>
FDPPPL4003A	Schedule and manage production
FDPPPL4006A	Manage a work area within budget
FDPPPL4007A	Manage supplier agreements and contracts
FDPPPL4008A	Manage internal audits* <i>FDFOHS2001A Participate in OHS processes</i>

	<i>FD40210 Certificate IV in Pharmaceutical Manufacturing</i> <i>FD40210 Certificate IV in Pharmaceutical Manufacturing</i> MSAENV272B Participate in environmentally sustainable work practices
BSBINN301A	Promote innovation in a team environment
BSBLED401A	Develop teams and individuals
BSBMGT402A	Implement operational plan
BSBMGT403A	Implement continuous improvement
BSBSMB407A	Manage a small team
MSS403001A	Implement competitive systems and practices
MSS403002A	Ensure process improvements are sustained
MSS403011A	Facilitate implementation of competitive systems and practices
MSS403030A	Improve cost factors in work practices
MSS403032A	Analyse manual handling processes
MSS403051A	Mistake proof an operational process
MSS404050A	Undertake process capability improvements* <i>MSS404052A Apply statistics to operational processes</i>
MSS404052A	Apply statistics to operational processes
TAEASS401B	Plan assessment activities and processes
TAEASS402B	Assess competence
TAEASS403B	Participate in assessment validation
TAEDDES401A	Design and develop learning programs

GROUP D

FDFOHS2001A	Participate in OHS processes
FDFOP2030A	Operate a process control interface
FDFOP2061A	Use numerical applications in the workplace
FDFOP2063A	Apply quality systems and procedures
FDFPPL3005A	Participate in audit processes
AHCBUS405A	Participate in an e-business supply chain
BSBCUS501C	Manage quality customer service
BSBHRM402A	Recruit, select and induct staff
BSBMGT401A	Show leadership in the workplace

BSBRES401A	Analyse and present research information
BSBSMB401A	Establish legal and risk management requirements of small business
BSBSMB402A	Plan small business finances
BSBSMB403A	Market the small business
BSBSMB404A	Undertake small business planning
BSBSMB405B	Monitor and manage small business operations
BSBSMB406A	Manage small business finances
BSBWOR401A	Establish effective workplace relationships
BSBWOR402A	Promote team effectiveness
BSBWOR403A	Manage stress in the workplace
BSBWOR404B	Develop work priorities
BSBWRT401A	Write complex documents
MEM15001B	Perform basic statistical quality control
MSS402060A	Use planning software systems in operations
MSS402061A	Use SCADA systems in operations
MSS402080A	Undertake root cause analysis
MSS403005A	Facilitate use of a Balanced Scorecard for performance improvement
MSS403010A	Facilitate change in an organisation implementing competitive systems and practices
MSS403013A	Lead team culture improvement
MSS403021A	Facilitate a Just in Time system
MSS403023A	Monitor a levelled pull system of operations
MSS403040A	Facilitate and improve implementation in 5S
MSS403041A	Facilitate breakthrough improvements
MSS404053A	Use six sigma techniques* <i>MSS404052A Apply statistics to operational processes</i>

FDF40311 Certificate IV in Food Science and Technology

Modification History

September 2012: Replacement of superseded imported Units.

April 2012: Minor typographical corrections.

Description

This Qualification provides a senior technical level occupational outcome in food processing and supporting functions and covers a range of food related industries including but not limited to:

- general food processing
- meat
- seafood
- poultry including chicken meat and egg processing
- dairy processing
- confectionery
- beverages
- baking and cereals.

Job roles

This Qualification targets those working in technical and supervisory roles covering product development, food safety and quality, food production and distribution, environmental functions, and the maintenance and monitoring of food processing systems. The job role requires technical skills and knowledge in the science and technology that support food processing.

Job titles may include:

- food technologist
- production line manager
- quality systems coordinator
- food safety systems officer
- product development team member
- processing systems coordinator
- environmental systems officer (food processing).

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this Qualification include:

- direct entry
- relevant vocational training and/or work experience.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake FDF50311 Diploma of Food Science and Technology.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, all work must comply with food safety, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace.

Entry Requirements

Not applicable.

Employability Skills Summary

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Complete workplace documentation and records. • Use a range of communication technologies to support work operations. • Develop work instructions, specifications and procedures. • Demonstrate effective and appropriate communication and interpersonal skills when dealing with people. • Communicate with all team members in a professional manner. • Demonstrate effective and appropriate documentation, communication and interpersonal skills when dealing with internal and external clients. • Use most appropriate communication method given priority, cost and audience needs. • Access, interpret and apply technical information. • Use written materials and personal presentations to convey information.
Teamwork	<ul style="list-style-type: none"> • Work cooperatively with people of different ages, gender, race or religion. • Liaise with and provide support to other team members. • Demonstrate leadership skills. • Identify and manage performance required to meet internal and external customer needs in own work and team work. • Manage organisational processes and provide problem solving support to others. • Contribute to team efforts in solving problems and making changes.
Problem solving	<ul style="list-style-type: none"> • Investigate problem causes. • Identify, rectify or report potential and actual problems associated with work operations. • Identify factors which may affect the product or service to be provided. • Use material and process knowledge to solve problems. • Identify hazards and suggest control measures. • Monitor food safety practices and resolve issues. • Implement food safety procedures in the workplace. • Analyse data and information to determine implications for work operations. • Demonstrate a systematic approach to problem solving.
Initiative and enterprise	<ul style="list-style-type: none"> • Gather and analyse feedback on products, processes and procedures.

	<ul style="list-style-type: none"> • Assess quality and other indicators of products. • Source information to provide background to decision making. • Support achievement of efficient production processes. • Determine and act on situations requiring further information or problem solving. • Assist in the implementation of continuous improvement processes. • Provide leadership in the workplace.
Planning and organising	<ul style="list-style-type: none"> • Identify hazards and implement appropriate hazard control measures. • Demonstrate time management skills. • Source and prepare materials and resources and ensure availability to support work operations. • Schedule and sequence work to maximise safety and productivity. • Plan for production and organise processing through a knowledge of process control. • Plan and organise the collection of data. • Optimise work processes.
Self-management	<ul style="list-style-type: none"> • Interpret and apply relevant acts and regulations. • Keep the work area clean and tidy at all times. • Monitor own work and work of team and identify and act on any quality issues. • Manage own time to meet deadlines. • Implement and monitor workplace procedures and instructions. • Manage work time to incorporate investigations, data collection and reporting into work flow.
Learning	<ul style="list-style-type: none"> • Implement learning activities as appropriate to ensure achievement of specified work requirements. • Be supportive, assertive and use interpersonal skills to encourage workplace learning. • Identify own training needs and seek skill development if required. • Gather feedback to own work to assess effectiveness in meeting objectives and integrate information into own practice. • Assess work data and information to identify areas for improved performance. • Maintain currency of industry skills and knowledge. • Maintain technical knowledge through reading, research and professional conversations.
Technology	<ul style="list-style-type: none"> • Select and use computer software applications to support research, analysis of findings and reporting. • Work with machines and workplace technology safely and

	<p>according to workplace standards.</p> <ul style="list-style-type: none">• Help others use technology efficiently and safely.• Ensure readiness and operational efficiency of workplace technology.• Apply high-level technical skills in chemical and biological analysis techniques.• Integrate technology into existing production processes.
--	---

Packaging Rules

This Qualification requires the achievement of **twenty (20)** Units of Competency in accordance with the following rules.

Total Units must include a minimum of twelve (12) Units coded FDF or MTM.

Twelve (12) Core Units

Eight (8) Elective Units

Elective selection must include:

- Three (3) elective Units from Group A
- Two (2) elective Units from Groups A or B.

Three (3) remaining elective Units may be selected from:

- Group A elective Units below, not previously selected
- Group B elective Units below, not previously selected
- A maximum of 3 Units from any nationally endorsed Training Package or accredited course that are packaged at Certificate III level, Certificate IV level or Diploma level.

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

CORE UNITS

Complete all twelve (12) core Units.

FDFFS2001A	Implement the food safety program and procedures
FDFFS3001A	Monitor the implementation of quality and food safety programs* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFFS4001A	Supervise and maintain a food safety plan
FDFFST4002A	Monitor the development and implementation of a food QA system
FDFFST4004A	Perform microbiological procedures in the food industry
FDFFST4007A	Establish operational requirements for a food processing enterprise
FDFOHS4002A	Maintain OHS processes
FDFOP2015A	Apply principle of statistical process control* <i>FDFOP2061A Use numerical applications in the workplace</i>
FDFTEC4003A	Control food contamination and spoilage*

	<i>FDFFS3001A Monitor the implementation of quality and food safety programs*</i> <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFTEC4007A	Describe and analyse data using mathematical principles* <i>FDFOP2015A Apply principle of statistical process control*</i> <i>FDFOP2061A Use numerical applications in the workplace</i>
MSAENV472B	Implement and monitor environmentally sustainable work practices
MSL974003A	Perform chemical tests and procedures

GROUP A: TECHNICAL ELECTIVES

Select a minimum of three (3) elective Units from Group A.

Scientific principles and laboratory operations

MSL974004A	Perform food tests
FDFOP2061A	Use numerical applications in the workplace
FDFST4010A	Apply sensory analysis in food processing
FDFST4011A	Apply the principles of nutrition to food processing
FDFTEC4009A	Identify the physical and chemical properties of materials, food and related products

Food quality and safety

FDFAU4001A	Assess compliance with food safety programs
FDFAU4002A	Communicate and negotiate to conduct food safety audits
FDFAU4003A	Conduct food safety audits
FDFAU4004A	Identify, evaluate and control food safety hazards
FDFFS4002A	Supervise and verify supporting programs for food safety

Food processing

FDFST4001A	Apply food processing technologies
FDFST4003A	Apply digital technology in food processing

FDFST4005A	Document processes and procedures for a food product
FDFST4006A	Apply food preservation technologies

Manufacturing systems

FDFPPL4005A	Establish process capability* <i>FDFOP2015A Apply principle of statistical process control*</i> <i>FDFOP2061A Use numerical applications in the workplace</i> <i>FDFTEC4007A Describe and analyse data using mathematical principles</i>
FDFTEC4002A	Manage controlled atmosphere storage
FDFTEC4004A	Apply basic engineering principles to food processing* <i>FDFOP2030A Operate a process control interface</i> <i>FDFTEC4007A Describe and analyse data using mathematical principles*</i> <i>FDFOP2015A Apply principle of statistical process control*</i> <i>FDFOP2061A Use numerical applications in the workplace</i>
FDFTEC4011A	Participate in product recalls* <i>FDFFS3001A Monitor the implementation of quality and food safety programs*</i> <i>FDFFS2001A Implement the food safety program and procedures</i>
MSS402080A	Undertake root cause analysis
MSS403010A	Facilitate change in an organisation implementing competitive systems and practice
MSS403013A	Lead team culture improvement
MSAPMOPS401A	Trial new process or product
MSAPMSUP390A	Use structured problem solving tools

Environment

FDFST4012A	Apply water management principles to the food industry
------------	--

Packaging and labelling

FDFST4008A	Preserve food in cans or sealed containers
FDFST4009A	Label foods according to legislative requirements
FDFTEC4008A	Apply principles of food packaging

GROUP B: INDUSTRY SPECIALISATION ELECTIVES

Select a minimum of two (2) elective Units from Group A or B.

Meat processing

MTMCOR202A	Apply hygiene and sanitation practices
MTMCOR404A	Facilitate hygiene and sanitation performance
MTMP402B	Implement a Meat Hygiene Assessment Program
MTMP404B	Apply meat science
MTMPS411C	Monitor a meat preservation process
MTMPS412C	Monitor and overview the production of processed meats and smallgoods
MTMPS414B	Monitor and overview the production of Uncooked Comminuted Fermented Meat (UCFM)* <i>MTMCOR202A Apply hygiene and sanitation practices</i> <i>MTMCOR404A Facilitate hygiene and sanitation performance</i>
MTMPSR407A	Assess and evaluate meat industry requirements and processes
MTMPSR408A	Specify beef product using AUS-MEAT language
MTMPSR409A	Specify sheep product using AUS-MEAT language
MTMPSR410A	Specify pork product using AUS-MEAT language

Dairy processing

FDFST4020A	Implement and review the processing of market milk and related products
FDFST4021A	Carry out sampling and testing of milk at receipt
FDFST4022A	Implement and review the preparation of milk for processing

Confectionery manufacture

FDFFST4030A	Implement and review the processing of chocolate and sugar-panned products
FDFFST4031A	Implement and review the processing of aerated confectioneries
FDFFST4032A	Implement and review the production of gums and jellies
FDFFST4033A	Implement and review the production of chocolate products
FDFFST4034A	Implement and review the processing of chocolate
FDFFST4035A	Implement and review the processing of high and low boil confectionery
FDFFST4036A	Implement and review the processing of confectionery products

Poultry industry processing

FDFFST4040A	Identify and implement product safety and quality for chilled or frozen poultry product manufacturing
FDFFST4041A	Identify and implement product safety and quality for cooked poultry product manufacturing
FDFFST4042A	Identify and implement product safety and quality for egg-based product manufacturing

Cheese production

FDFFCH4001A	Carry out sampling and interpret tests for cheese production* <i>MSL973001A Perform basic tests</i>
FDFFCH4002A	Produce acid-coagulated soft cheese
FDFFCH4003A	Produce a range of rennet-coagulated cheeses
FDFFCH4004A	Produce acid/heat-coagulated cooked cheese
MSL973001A	Perform basic tests

Other sectors

FDFFST4050A	Identify and implement product safety and quality for processing of fruit, vegetables and other produce
FDFFST4051A	Identify and implement product safety and quality processes for

	fish and seafood products
FDFST4052A	Implement and review the manufacturing and processing of edible fats and oils
FDFST4053A	Implement and review manufacturing, packaging and testing of beverage products
FDFST4054A	Identify and implement product safety and quality for manufacturing of cereal products

FDF40811 Certificate IV in Advanced Baking

Modification History

September 2012: Replacement of superseded imported Units.

Description

This Qualification covers post-trade outcomes for retail bakers, bread makers and pastry cooks. It may be packaged to reflect a specialisation in advanced technical baking skills or in bakery business management skills, or to reflect a combination of both.

Testamur issued for this Qualification are to be titled 'Certificate IV in Advanced Baking'. An additional descriptor may be added by the RTO to reflect Unit selection. When a minimum of four (4) Technical Baking stream Units is selected, the testamur may be titled Certificate IV in Advanced Baking (Technical Baking). When a minimum of four (4) Baking Business Operations stream Units is selected, the testamur may be titled Certificate IV in Advanced Baking (Baking Business Operations).

Job roles

The FDF40811 Certificate IV in Advanced Baking targets those working in a retail baking enterprise as owners, managers and/or senior bakers or pastry cooks.

This Qualification includes technical, artisan and creative skills and knowledge required to produce bakery products, solve baking problems, and ensure that operations are implemented and maintained to optimal performance. It also covers skills in monitoring the implementation of systems and procedures, and management functions of the organisation.

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Units completed as part of a Certificate III in Retail Baking can be counted towards the Units required for FDF40811 Certificate IV in Advanced Baking where they are listed in the Certificate IV packaging rules.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake FDF50110 Diploma of Food Processing or any other suitable Qualification.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, all work must comply with food safety, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace.

Entry Requirements

This Qualification is a post-trade Qualification and requires one of the following trade-related Qualifications for entry:

- FDF30510 Certificate III in Retail Baking (Cake and Pastry)
- FDF30610 Certificate III in Retail Baking (Bread)
- FDF30710 Certificate III in Retail Baking (Combined)

Entry may also occur on the basis of an RTO assessment of equivalent industry skills and knowledge to one of the above Qualifications.

Employability Skills Summary

Certificate IV in Advanced Baking

The following table contains a summary of the Employability Skills as identified by the retail baking industry for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Complete workplace documentation and records. • Use a range of communication technologies to support work operations. • Develop work instructions, specifications and procedures. • Demonstrate effective and appropriate communication and interpersonal skills when dealing with people. • Undertake numerical calculations to determine ingredient quantities. • Communicate with all team members in a professional manner. • Demonstrate effective and appropriate documentation, communication and interpersonal skills when dealing with internal and external clients. • Use most appropriate communication method given priority, cost and audience needs. • Access, interpret and apply technical information. • Analyse data and information to determine implications for work operations.
Teamwork	<ul style="list-style-type: none"> • Work cooperatively with people of different ages, gender, race or religion. • Liaise with, and provide support to, other team members. • Demonstrate leadership skills. • Identify and manage performance required to meet internal and external customer needs in own work and team work. • Manage organisational processes and provide problem solving support to others.
Problem solving	<ul style="list-style-type: none"> • Investigate problems and determine root cause. • Identify, rectify or report potential and actual problems associated with work operations. • Identify factors which may affect the product or service to be provided. • Assess product quality and determine potential improvements. • Use ingredient and process knowledge to solve problems. • Identify safety hazards and suggest control measures. • Identify environmental hazards and implement corrective measures.

	<ul style="list-style-type: none"> • Monitor food safety practices. • Implement food safety procedures in the workplace.
Initiative and enterprise	<ul style="list-style-type: none"> • Gather and analyse feedback on products, processes and procedures. • Assess quality and other indicators of products. • Support achievement of efficient production processes. • Determine and act on situations requiring further information or problem solving.. • Assist in the implementation of continuous improvement processes • Identify opportunities for product development. • Test product ideas on the market. • Provide leadership in the workplace.
Planning and organising	<ul style="list-style-type: none"> • Identify hazards and implement appropriate hazard control measures. • Demonstrate time management skills. • Determine production scheduling requirements. • Determine suitable strategies to control production times and processes. • Source and prepare materials and resources and ensure availability to support work operations. • Schedule and sequence work to maximise safety and productivity. • Optimise work processes.
Self-management	<ul style="list-style-type: none"> • Interpret and apply relevant Acts and regulations. • Keep work area clean and tidy at all times. • Monitor own work and work of team and identify and act on any quality issues. • Manage own time to meet deadlines and production schedules. • Implement and monitor workplace procedures and instructions. • Lead by example in work practices. • Monitor own work to ensure it meets workplace environmental requirements.
Learning	<ul style="list-style-type: none"> • Implement learning activities as appropriate to ensure achievement of specified work requirements. • Be supportive and assertive and use interpersonal skills to encourage workplace learning. • Identify own training needs and seek skill development, if required. • Gather feedback to own work to assess effectiveness in meeting objectives and integrate information into own practice. • Assess work data and information to identify areas for improved performance.
Technology	<ul style="list-style-type: none"> • Use computer software applications effectively. • Work with machines and workplace technology safely and according to workplace standards.

	<ul style="list-style-type: none">• Help others use technology efficiently and safely.• Ensure readiness and operational efficiency of workplace technology.
--	---

Packaging Rules

This Qualification requires the achievement of **fourteen (14)** Units of Competency in accordance with the following rules.

Five (5) Core Units

Nine (9) Elective Units

Elective selection must include seven (7) elective Units consisting of:

- A minimum of four (4) Group A Specialist Elective Units PLUS three (3) Units from Group A, B OR C, not previously selected in this Qualification
- OR
- A minimum of four (4) Group B Specialist Elective Units PLUS three (3) Units from Group A, B OR C, not previously selected in this Qualification

Two (2) remaining elective Units may be selected from:

- Group A, B and C Units listed below, not previously selected
- Units from any nationally endorsed Training Package and accredited course that are packaged at Certificate IV level (maximum 2 Units), Certificate III level (maximum 1 Unit) and Diploma level (maximum 1 Unit)

NOTE: Units marked with an asterisk (*) require completion of prerequisite unit/s identified under the unit.

CORE UNITS

Complete the following five (5) Units

FDFFS3001A	Monitor the implementation of quality and food safety programs* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFOHS4002A	Maintain OHS processes
FDFPPL3002A	Report on workplace performance
FDFRB4002A	Control bakery operations to meet quality and production requirements
MSAENV472B	Implement and monitor environmentally sustainable work practices

SPECIALIST ELECTIVE UNITS

Select seven (7) Specialist Elective Units

- A minimum of four (4) Units must be selected from the specialist Group A Technical Baking stream OR Group B Bakery Business Operations stream
- The remaining Units can be selected from any Group A, B or C Units, not previously selected in this Qualification.

Group A: Technical Baking Stream

FDFRB3013A	Produce artisan breads* <i>FDFRB3005A Bake bread</i> <i>FDFRB3010A Process dough</i> <i>FDFRB3002A Produce bread dough</i>
FDFRB4003A	Apply baking science to work practices
FDFRB4004A	Produce sourdough products
FDFRB4005A	Apply advanced finishing techniques for specialty cakes and desserts* <i>FDFRB3015A Produce and decorate gateaux and tortes*</i> <i>FDFRB2002A Prepare fillings AND</i> <i>FDFRB2003A Produce meringue-based products AND</i> <i>FDFRB3001A Produce pastry AND</i> <i>FDFRB3003A Produce sponge, cake and cookie batter AND</i> <i>FDFRB3004A Decorate cakes and cookies AND</i> <i>FDFRB3006A Bake sponges, cakes and cookies AND</i> <i>FDFRB3007A Bake pastry products</i>
FDFRB4006A	Explore and apply baking techniques to develop new products
FDFRB4007A	Evaluate and assess bakery product
FDFRB4010A	Prepare plated sweets and desserts
FDFST4011A	Apply the principles of nutrition to food processing
SITHPAT004A	Prepare baking product for patisseries* <i>SITXOHS002A Follow workplace hygiene procedures</i>

Group B: Bakery Business Operations Stream

FDFRB4001A	Apply marketing principles to retail bakery
FDFRB4008A	Set up sustainable baking operations
FDFRB4009A	Coordinate material supply for baking processes* <i>FDFRB4003A Apply baking science to work practices</i>
FDFPPL4001A	Manage people in the work area*

	<i>FDFPPL3003A Support and mentor individuals and groups</i>
FDFTEC4006A	Apply an understanding of legal requirements of food production
BSBHRM402A	Recruit, select and induct staff
BSBSMB404A	Undertake small business planning
BSBSMB405B	Monitor and manage small business operations
BSBSMB406A	Manage small business finances

Group C: Bakery Electives

FDFFS2001A	Implement the food safety program and procedures
FDFFST4005A	Document processes and procedures for a food product
FDFFST4054A	Identify and implement product safety and quality for manufacturing of cereal products
FDFOP3005A	Prepare food products using basic cooking methods* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFOP3006A	Identify cultural, religious and dietary requirements for food products
FDFPPL3001A	Participate in improvement processes
FDFPPL3003A	Support and mentor individuals and groups
FDFPPL4004A	Optimise a work process* <i>FDFPPL3001A Participate in improvement processes</i>
FDFRB2002A	Prepare fillings
FDFRB2003A	Produce meringue-based products
FDFRB3001A	Produce pastry
FDFRB3002A	Produce bread dough
FDFRB3003A	Produce sponge, cake and cookie batter
FDFRB3004A	Decorate cakes and cookies
FDFRB3005A	Bake bread
FDFRB3006A	Bake sponges, cakes and cookies

FDFRB3007A	Bake pastry products
FDFRB3010A	Process dough
FDFRB3015A	Produce and decorate gateaux and tortes* <i>FDFRB2002A Prepare fillings AND</i> <i>FDFRB2003A Produce meringue-based products AND</i> <i>FDFRB3001A Produce pastry AND</i> <i>FDFRB3003A Produce sponge, cake and cookie batter AND</i> <i>FDFRB3004A Decorate cakes and cookies AND</i> <i>FDFRB3006A Bake sponges, cakes and cookies AND</i> <i>FDFRB3007A Bake pastry products</i>
FDFTEC3001A	Participate in a HACCP team* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFTEC4003A	Control food contamination and spoilage* <i>FDFFS3001A Monitor the implementation of quality and food safety programs*</i> <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFTEC4008A	Apply principles of food packaging
FDFTEC4011A	Participate in product recalls* <i>FDFFS3001A Monitor the implementation of quality and food safety programs*</i> <i>FDFFS2001A Implement the food safety program and procedures</i>
BSBCUS401B	Coordinate implementation of customer service strategies
BSBLED401A	Develop teams and individuals
BSBMGT403A	Implement continuous improvement
BSBSMB401A	Establish legal and risk management requirements of small business
BSBWOR204A	Use business technology
PMBTECH406A	Diagnose equipment problems
SITHCCC022A	Prepare chocolate and chocolate confectionery* <i>SITXOHS002A Follow workplace hygiene procedures</i>

SITHFAB012B	Prepare and serve espresso coffee
SITHFAB016A	Plan and monitor espresso coffee service* <i>SITHFAB012B Prepare and serve espresso coffee</i>
SITHOHS002A	Follow workplace hygiene procedures
SITHPAT010A	Prepare and display sugar work* <i>SITXOHS002A Follow workplace hygiene procedures</i>
TAEASS403B	Participate in assessment validation
TAEDEL301A	Provide work skill instruction

FDF41012 Certificate IV in Flour Milling

Modification History

Not applicable.

Description

The FDF41012 Certificate IV in Flour Milling targets people working in a technical leadership role in the flour milling industry. The Qualification includes technical, leadership and business skills and knowledge required to mill a wide range of flours for human consumption and ensure that operations are implemented and maintained to optimal performance. It also covers skills in monitoring the implementation of systems and procedures, and management functions of the organisation.

This Qualification applies to mill managers and senior supervisors above the shift miller level in the flour milling industry who supervise across departments and either set or participate in setting production and key performance indicators for the flour mill. It applies to flour milling operations for all types of grain including wheat, oats, barley, corn, rice, sorghum, millet, rye, and non-grain flours such as peas and arrowroot.

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Common pathways into this Qualification will include the FDF30110 Certificate III in Food Processing or FDF20110 Certificate II in Food Processing. Entry may also be from industry recognised overseas Qualifications e.g. correspondence study conducted by the National Association of British and Irish Millers (NABIM). Individuals with substantial industry experience in flour milling may also enter this Qualification. This Qualification is not suitable for school leavers.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake

- FDF50110 Diploma of Food Processing
- FDF50311 Diploma of Food Science and Technology

or any other suitable Diploma Qualification.

This Qualification is suitable for Australian Apprenticeships.

Licensing/Regulatory Information

There are no specific licences that relate to this Qualification.

Entry Requirements

Entry into this Qualification requires significant prior work experience at least at the operator level in flour milling in grain receipt, grain breaking and grain reduction processes. Preferred work experience is as a shift miller in a flour mill.

Employability Skills Summary

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Complete workplace documentation and records. • Use a range of communication technologies to support work operations. • Develop work instructions, specifications and procedures. • Demonstrate effective and appropriate communication and interpersonal skills when dealing with people. • Undertake numerical calculations to determine ingredient quantities. • Communicate with all team members in a professional manner. • Demonstrate effective and appropriate documentation, communication and interpersonal skills when dealing with internal and external clients. • Use most appropriate communication method given priority, cost and audience needs. • Access, interpret and apply technical information. • Analyse data and information to determine implications for work operations.
Teamwork	<ul style="list-style-type: none"> • Work cooperatively with people of different ages, gender, race or religion. • Liaise with, and provide support to, other team members. • Demonstrate leadership skills. • Identify and manage performance required to meet internal and external customer needs in own work and team work. • Manage organisational processes and provide problem solving support to others.
Problem-solving	<ul style="list-style-type: none"> • Investigate problems and determine root cause. • Identify, rectify or report potential and actual problems associated with work operations. • Identify factors which may affect the product or service to be provided. • Assess product quality and determine potential improvements. • Use ingredient and process knowledge to solve problems. • Identify safety hazards and suggest control measures. • Identify environmental hazards and implement corrective measures. • Monitor food safety practices. • Implement food safety procedures in the workplace.

<p>Initiative and enterprise</p>	<ul style="list-style-type: none"> • Gather and analyse feedback on products, processes and procedures. • Assess quality and other indicators of products. • Support achievement of efficient production processes. • Determine and act on situations requiring further information or problem solving. • Assist in the implementation of continuous improvement processes. • Identify opportunities for product development. • Test product ideas on the market. • Provide leadership in the workplace.
<p>Planning and organising</p>	<ul style="list-style-type: none"> • Identify hazards and implement appropriate hazard control measures. • Demonstrate time management skills. • Determine production scheduling requirements. • Determine suitable strategies to control production times and processes. • Source and prepare materials and resources and ensure availability to support work operations. • Schedule and sequence work to maximise safety and productivity. • Optimise work processes.
<p>Self-management</p>	<ul style="list-style-type: none"> • Interpret and apply relevant Acts and regulations. • Keep work area clean and tidy at all times. • Monitor own work and work of team and identify and act on any quality issues. • Manage own time to meet deadlines and production schedules. • Implement and monitor workplace procedures and instructions. • Lead by example in work practices. • Monitor own work to ensure it meets workplace environmental requirements.
<p>Learning</p>	<ul style="list-style-type: none"> • Implement learning activities as appropriate to ensure achievement of specified work requirements. • Be supportive and assertive and use interpersonal skills to encourage workplace learning. • Identify own training needs and seek skill development, if required. • Gather feedback to own work to assess effectiveness in meeting objectives and integrate information into own practice. • Assess work data and information to identify areas for improved performance.

Technology	<ul style="list-style-type: none">• Use computer software applications effectively.• Work with machines and workplace technology safely and according to workplace standards.• Help others use technology efficiently and safely.• Ensure readiness and operational efficiency of workplace technology.
------------	--

Packaging Rules

Completion of twenty two (22) Units made up of ten (10) core Units and twelve (12) elective Units. Total Units must include a minimum of twelve (12) units coded FDF.

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s identified under the Unit.

Core Units of Competency

Unit code	Unit title
FDFFS2001A	Implement the food safety program and procedures
FDFFS3001A	Monitor the implementation of quality and food safety programs * <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFGR3003A	Lead flour milling shift operations
FDFGR3004A	Control mill processes and performance
FDFGR4001A	Control power and automation for milling processes
FDFGR4002A	Supervise testing processes for wheat and flour
FDFGR4003A	Manage mill logistics and support services
FDFGR4004A	Establish and supervise dust control procedures in a grain processing enterprise
FDFOHS4002A	Maintain OHS processes
MSAENV472B	Implement and monitor environmentally sustainable work practices

Elective Units of Competency

Elective selection must include a minimum of six (6) Group A specialist technical and cross sector elective Units. The six (6) remaining elective Units may be selected from:

- Group A
- Group B
- Three (3) from Units packaged at Certificate II in Food Processing
- Five (5) from Units packaged at Certificate III in Food Processing

- Two (2) from Units packaged at Diploma of Food Processing
- Four (4) Units from any nationally endorsed Training Package or accredited course that are packaged at Certificate II (up to 2 Units), Certificate III (up to 2 Units), Certificate IV (up to 4 Units), and Diploma (up to 2 Units)

GROUP A

Unit code	Unit title
BSBLED401A	Develop teams and individuals
BSBMGT402A	Implement operational plan
BSBMGT403A	Implement continuous improvement
BSBSMB407A	Manage a small team
FDFST4002A	Monitor the development and implementation of a food QA system
FDFST4003A	Apply digital technology in food processing
FDFST4005A	Document processes and procedures for a food product
FDFST4007A	Establish operational requirements for a food processing enterprise
FDFST4012A	Apply water management principles to the food industry
FDFOP3003A	Operate interrelated processes in a production system
FDFOP3004A	Operate interrelated processes in a packaging system
FDFPPL3002A	Report on workplace performance
FDFPPL3005A	Participate in audit processes
FDFPPL4001A	Manage people in the work area
FDFPPL4002A	Plan and coordinate maintenance
FDFPPL4003A	Schedule and manage production
FDFPPL4004A	Optimise a work process
FDFPPL4005A	Establish process capability
FDFPPL4006A	Manage a work area within budget
FDFPPL4007A	Manage supplier agreements and contracts

Unit code	Unit title
FDFTEC4001A	Determine handling processes for perishable food items
FDFTEC4002A	Manage controlled atmosphere storage
FDFTEC4003A	Control food contamination and spoilage
FDFTEC4004A	Apply basic process engineering principles to food processing* <i>FDFTEC4007A Describe and analyse data using mathematical principles</i> <i>FDFOP2030A Operate a process control interface</i>
FDFTEC4005A	Apply an understanding of food additives
FDFTEC4006A	Apply an understanding of legal requirements of food production
FDFTEC4007A	Describe and analyse data using mathematical principles
FDFTEC4008A	Apply principles of food packaging
FDFTEC4009A	Identify the physical and chemical properties of materials, food and related products
FDFTEC4010A	Manage water treatment processes
FDFTEC4011A	Participate in product recalls
MEM09002B	Interpret technical drawing
MEM30011A	Set up basic pneumatic circuits
MSAPMOPS400A	Optimise process/plant area* <i>MSAPMSUP390A Use structured problem solving tools</i>
MSAPMOPS401A	Trial new process or product
MSAPMOPS405A	Identify problems in fluid power system
MSAPMOPS406A	Identify problems in electronic control systems
MSS014003A	Optimise sustainability of a process or plant area
MSS014004A	Develop team strategies for more sustainable use of resources
MSS015005A	Develop required sustainability reports
MSS024003A	Apply an understanding of environmental principles to a site

Unit code	Unit title
MSS403001A	Implement competitive systems and practices
MSS403002A	Ensure process improvements are sustained
MSS403011A	Facilitate implementation of competitive systems and practices
MSS403030A	Improve cost factors in work practices
MSS403032A	Analyse manual handling processes
MSS403051A	Mistake proof an operational process
MSS404050A	Undertake process capability improvements* <i>MSS404052A Apply statistics to operational processes</i>
MSS404052A	Apply statistics to operational processes
MSS404081A	Undertake proactive maintenance analyses
MSS404082A	Assist in implementing a proactive maintenance strategy
MSS404083A	Support proactive maintenance
PMBTECH406A	Diagnose production equipment problems

Group B

Unit code	Unit title
AHCBAC204A	Prepare grain storages
BSBCUS501C	Manage quality customer service
BSBHRM402A	Recruit, select and induct staff
BSBINN301A	Promote innovation in a team environment
BSBMGT401A	Show leadership in the workplace
BSBWOR402A	Promote team effectiveness
BSBWOR403A	Manage stress in the workplace
BSBWOR404B	Develop work priorities
BSBWRT401A	Write complex documents

Unit code	Unit title
FDFGR2003A	Operate a grain conditioning process
FDFGR2004A	Operate a grain cleaning process
FDFGR2005A	Operate a purification process
FDFGR2006A	Operate a scalping and grading process
FDFGR2007A	Operate a scratch and sizing process
FDFGR2008A	Operate a break roll process
FDFGR2010A	Handle grain in a storage area
FDFOP2030A	Operate a process control interface
FDFTEC3002A	Implement the pest prevention program
MEM15001B	Perform basic statistical quality control
MSAPMSUP390A	Use structured problem solving tools
MSS402060A	Use planning software systems in operations
MSS402061A	Use SCADA systems in operations
MSS402080A	Undertake root cause analysis
MSS403005A	Facilitate use of a Balanced Scorecard for performance improvement
MSS403010A	Facilitate change in an organisation implementing competitive systems and practices
MSS403013A	Lead team culture improvement
MSS403021A	Facilitate a Just in Time system
MSS403023A	Monitor a levelled pull system of operations
MSS403040A	Facilitate and improve implementation of 5S
MSS403041A	Facilitate breakthrough improvements
MSS404052A	Apply statistics to operational processes
MSS404053A	Use six sigma techniques* <i>MSS404052A Apply statistics to operational processes</i>

Unit code	Unit title
MSS404060A	Facilitate the use of planning software systems in a work area or team
MSS404061A	Facilitate the use of SCADA systems in a team or work area
RIIRIS201B	Conduct local risk control
TLIJ2004A	Implement grain monitoring measures

FDF50110 Diploma of Food Processing

Modification History

September 2012: Replacement of superseded imported Units.

November 2011: Updates to imported Units, minor edits.

Description

This Qualification covers a range of food processing industries, such as:

- Baking (including large scale production of cakes, pastry, bread and plant baking)
- Beverages (including juices, soft drinks, cordials, aerated and still waters, energy drinks and other modified beverages, such as vitamin and antioxidant beverages, coffee, tea and ice)
- Confectionery
- Dairy processing
- Fruit and vegetables
- Grocery products and supplies (including honey, jams, spreads, sauces, dressings, condiments, spices, edible oils and fats and pasta)
- Poultry.

Job Roles This Qualification targets those in senior management, technician or similar roles within food processing industries. It provides extensive skill and knowledge of industry management functions and environment, and the ability to take responsibility for workplace systems.

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this Qualification include:

- FDF40110 Certificate IV in Food Processing
- direct entry
- relevant vocational training and/or work experience.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake a relevant Advanced Diploma Qualification.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, all work must comply with food safety, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace.

Entry Requirements

Not applicable.

Employability Skills Summary

Diploma of Food Processing

The following table contains a summary of the Employability Skills as identified by the food processing related industries for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Complete a range of workplace documentation and records. • Select communication technologies to support work operations. • Develop work instructions, specifications and procedures. • Demonstrate effective and appropriate communication and interpersonal skills when dealing with people. • Communicate with all people at all levels of the organisation in a professional manner. • Select and apply documentation, communication and interpersonal strategies when dealing with internal and external clients. • Select communication methods according to priority, cost and audience needs. • Analyse and apply technical information. • Analyse data and information to determine implications for work operations.
Teamwork	<ul style="list-style-type: none"> • Lead cooperative work relations with people of different ages, gender, race or religion. • Provide leadership. • Determine performance required to meet internal and external customer needs. • Manage organisational processes and provide problem solving support to others. • Facilitate team achievements.
Problem-solving	<ul style="list-style-type: none"> • Investigate problem causes and implement corrective strategies. • Identify and address potential and actual problems associated with work operations or in achieving work outcomes. • Identify environmental features, regulations, insurance requirements, legal requirements and other factors which may affect the product or service to be provided. • Use material and process knowledge to solve problems. • Identify hazards and suggest control measures. • Analyse food safety practices.

Initiative and enterprise	<ul style="list-style-type: none"> • Determine information gathering requirements to monitor work processes and procedures. • Determine quality and other indicators of work. • Identify efficient production processes. • Determine and act on situations requiring further information or problem solving. • Implement continuous improvement processes. • Provide leadership in the workplace. • Implement business development processes.
Planning and organising	<ul style="list-style-type: none"> • Identify hazards and implement appropriate hazard control measures. • Demonstrate time management skills. • Determine resource requirements. • Determine work timelines and output targets. • Optimise work processes.. • Conduct business planning processes
Self-management	<ul style="list-style-type: none"> • Analyse implications of relevant acts and regulations on work practices. • Monitor work operations and identify and act on any quality and performance issues. • Manage own time to meet deadlines. • Determine workplace procedures and instructions. • Conduct work reviews to determine improvement requirements.
Learning	<ul style="list-style-type: none"> • Develop learning opportunities. • Be supportive, assertive and use interpersonal skills to encourage workplace learning. • Identify own training needs and seek skill development if required. • Gather feedback to own work to assess effectiveness in meeting objectives and integrate information into own practice. • Assess work data and information to identify areas for improved performance. • Maintain currency of industry skill and knowledge.
Technology	<ul style="list-style-type: none"> • Select computer software applications to perform work operations. • Work with technology safely and according to workplace standards. • Help others use technology efficiently and safely. • Ensure readiness and operational efficiency of workplace technology.

Packaging Rules

This Qualification requires the achievement of **thirty (30)** Units of Competency in accordance with the following rules.

Total Units must include a minimum of twelve (12) Units coded FDF.

Six (6) Core Units

Twenty four (24) Elective Units

Elective selection must include:

- One (1) Group A elective Unit
- One (1) Group B elective Unit
- Eight (8) Group C elective Units and Units not previously selected from Group A and B (up to a total of 8 Units).
- Eight (8) Specialist and Cross Sector Units packaged at Group C in FDF40110 Certificate IV in Food Processing

Six (6) remaining elective Units may be selected from:

- Groups A, B, C and D elective Units listed below
- Units packaged at Certificate III or IV in Food Processing (maximum of 5)
- Units packaged at Certificate II in Food Processing (maximum of 5)
- A maximum of 5 Units from any nationally endorsed Training Package and accredited course that are packaged at Certificate II level (maximum 2 Units), Certificate III level (maximum 2 Units), Certificate IV level (maximum 3 Units), Diploma or Advanced Diploma level (maximum 3 Units)

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

CORE UNITS

Complete the following six (6) Units.

FDFFS2001A	Implement the food safety program and procedures
FDFFS3001A	Monitor the implementation of quality and food safety programs* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFPPL3002A	Report on workplace performance
FDFTEC3003A	Apply raw materials, ingredient and process knowledge to production problems
FDFTEC4007A	Describe and analyse data using mathematical principles
MSAENV472B	Implement and monitor environmentally sustainable work practices

ELECTIVE UNITS**GROUP A**

Complete a minimum of one (1) Group A elective Units.

FDFOHS4001A	Identify, assess and control OHS risk in own work
FDFOHS5001A	Manage OHS processes

GROUP B

Complete a minimum of one (1) Group B elective Units

FDFOP3003A	Operate interrelated processes in a production system
FDFOP3004A	Operate interrelated processes in a packaging system

GROUP C

Select a minimum of eight (8) Group C elective Units

FDFPPL4007A	Manage supplier agreements and contracts
FDFPPL5001A	Design and maintain programs to support legal compliance* <i>FDFFS2001A Implement the food safety program and procedures</i> <i>FDFFS3001A Monitor the implementation of quality and food safety programs</i> <i>FDFOHS4002A Maintain OHS processes</i> <i>FDFTEC3001A Participate in a HACCP team</i> <i>MSAENV472B Implement and monitor environmentally sustainable work practices</i>
FDFTEC5001A	Manage and evaluate new product trials
FDFTEC5002A	Manage utilities and energy for a production process
BSBCOM502B	Evaluate and review compliance
BSBCOM503B	Develop processes for the management of breaches in compliance requirements
BSBMGT502B	Manage people performance
BSBMGT515A	Manage operational plan
BSBMGT516C	Facilitate continuous improvement
BSBPMG510A	Manage projects

MEM15001B	Perform basic statistical quality control
MSS405011A	Manage people relationships
MSS405001A	Develop competitive systems and practices for an organisation
MSS405002A	Analyse and map a value stream
MSS404052A	Apply statistics to operational processes
MSS405020A	Develop quick changeover procedures
MSS405050A	Determine and improve process capability* <i>MSS404052A Apply statistics to operational processes</i>
MSS405070A	Develop and manage sustainable energy practices
MSACMT671A	Develop and manage sustainable environmental practices

GROUP D

BSBCUS501C	Manage quality customer service
BSBFIM501A	Manage budgets and financial plans
BSBMKG501B	Identify and evaluate marketing opportunities
BSBOHS503B	Assist in the design and development of OHS participative arrangements
BSBWOR502B	Ensure team effectiveness
MSS403010A	Facilitate change in an organisation implementing competitive systems and practices
MSS405010A	Manage relationships with non-customer external organisations
MSS405012A	Manage workplace learning
MSS405013A	Facilitate holistic culture improvement in an organisation
MSS405014A	Develop a communications strategy to support operations
MSS405005A	Manage competitive systems and practices responding to individual and unique customer orders
MSS405006A	Develop a Balanced Scorecard
MSS405007A	Introduce competitive systems and practices to a small or medium enterprise
MSS402030A	Apply cost factors to work practices
MSS402080A	Undertake root cause analysis
MSS404052A	Apply statistics to operational processes
MSS405022A	Design a process layout

MSS405023A	Develop a levelled pull system for operations and processes
MSS405030A	Optimise cost of product or service
MSS405031A	Undertake value analysis of product or process costs in terms of customer requirements
MSS405032A	Analyse cost implications of maintenance strategy
MSS405040A	Manage 5S system in an organisation
MSS405060A	Develop the application of enterprise control systems in an organisation
MSS405061A	Determine and establish information collection requirements and processes
MSS405062A	Develop a documentation control strategy for an organisation
MSS405075A	Facilitate the development of a new product* <i>MSS404052A Apply statistics to operational processes</i>
MSS405081A	Develop a proactive maintenance strategy
MSS405082A	Adapt a proactive maintenance strategy to the process operations sector* <i>MSS405081A Develop a proactive maintenance strategy</i>
MSS405083A	Adapt a proactive maintenance strategy for a seasonal or cyclical business* <i>MSS405081A Develop a proactive maintenance strategy</i>

FDF50210 Diploma of Pharmaceutical Manufacturing

Modification History

September 2012: Replacement of superseded imported Units.

November 2011: Updates to imported Units, minor edits.

Description

This Qualification covers the pharmaceutical manufacturing specialisation.

Job Roles The Diploma of Pharmaceutical Manufacturing targets those in senior management, technician or similar roles within pharmaceutical manufacturing industries. It provides extensive skills and knowledge of industry management functions and environment, and the ability to take responsibility for workplace systems.

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this Qualification include:

- FDF40210 Certificate IV in Pharmaceutical Manufacturing
- direct entry
- relevant vocational training and/or work experience.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake a relevant Advanced Diploma Qualification.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However, an individual Unit of Competency may specify relevant licensing, legislative and/or regulatory requirements. In addition, all work must comply with Good Manufacturing Practice, occupational health and safety (OHS) and environmental regulations and legislation that apply to the workplace.

Entry Requirements

Not applicable.

Employability Skills Summary

Diploma of Pharmaceutical Manufacturing

The following table contains a summary of the Employability Skills as identified by the pharmaceutical manufacturing related industries for this Qualification. This table should be interpreted in conjunction with the detailed requirements of each Unit of Competency packaged in this Qualification. The outcomes described here are broad industry requirements that reflect skill requirements for this level.

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Complete a range of workplace documentation and records. • Select communication technologies to support work operations • Develop work instructions, specifications and procedures. • Demonstrate effective and appropriate communication and interpersonal skills when dealing with people. • Communicate with all people at all levels of the organisation in a professional manner. • Select and apply documentation, communication and interpersonal strategies when dealing with internal and external clients. • Select communication methods according to priority, cost and audience needs. • Analyse and apply technical information. • Analyse data and information to determine implications for work operations.
Teamwork	<ul style="list-style-type: none"> • Lead cooperative work relations with people of different ages, gender, race or religion. • Provide leadership. • Determine performance required to meet internal and external customer needs. • Manage organisational processes and provide problem solving support to others. • Facilitate team achievements.
Problem-solving	<ul style="list-style-type: none"> • Investigate problem causes and implement corrective strategies. • Identify and address potential and actual problems associated with work operations or in achieving work outcomes. • Identify environmental features, regulations, insurance requirements, legal requirements and other factors which may affect the product or service to be provided. • Use material and process knowledge to solve problems. • Identify hazards and suggest control measures. • Analyse food safety practices.
Initiative and enterprise	<ul style="list-style-type: none"> • Determine information gathering requirements to monitor work

	<p>processes and procedures.</p> <ul style="list-style-type: none"> • Determine quality and other indicators of work. • Identify efficient production processes. • Determine and act on situations requiring further information or problem solving. • Implement continuous improvement processes. • Provide leadership in the workplace. • Implement business development processes.
Planning and organising	<ul style="list-style-type: none"> • Identify hazards and implement appropriate hazard control measures. • Demonstrate time management skills. • Determine resource requirements. • Determine work timelines and output targets. • Optimise work processes. • Conduct business planning processes.
Self-management	<ul style="list-style-type: none"> • Analyse implications of relevant acts and regulations on work practices. • Monitor work operations and identify and act on any quality and performance issues. • Manage own time to meet deadlines. • Determine workplace procedures and instructions. • Conduct work reviews to determine improvement requirements.
Learning	<ul style="list-style-type: none"> • Develop learning opportunities. • Be supportive, assertive and use interpersonal skills to encourage workplace learning. • Identify own training needs and seek skill development if required. • Gather feedback to own work to assess effectiveness in meeting objectives and integrate information into own practice. • Assess work data and information to identify areas for improved performance. • Maintain currency of industry skill and knowledge.
Technology	<ul style="list-style-type: none"> • Select computer software applications to perform work operations. • Work with technology safely and according to workplace standards. • Help others use technology efficiently and safely. • Ensure readiness and operational efficiency of workplace technology.

Packaging Rules

This Qualification requires the achievement of **twenty nine (29)** Units of Competency in accordance with the following rules.

Total Units must include a minimum of eleven (11) Units coded FDF.

Nine (9) Core Units

Twenty (20) Elective Units

Elective selection must include:

- One (1) Group A elective Unit
- One (1) Group B elective Unit
- Six (6) Group C elective Units
- Five (5) Specialist and Cross Sector Units packaged at Certificate IV Group C

Seven (7) remaining elective Units may be selected from:

- Group A elective Units below, not previously selected
- Group B elective Units below, not previously selected
- Group C elective Units below, not previously selected
- Group D elective Units
- Units packaged at FDF30210 Certificate III in Pharmaceutical Manufacturing or FDF40210 Certificate IV in Pharmaceutical Manufacturing (maximum of 5)
- Units packaged at FDF20210 Certificate II in Pharmaceutical Manufacturing (maximum of 5)
- A maximum of 4 Units from any nationally endorsed Training Package and accredited course that are packaged at Certificate II level (maximum 2 Units), Certificate III level (maximum 2 Units), Certificate IV level (maximum 3 Units), Diploma or Advanced Diploma level (maximum 3 Units)

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

CORE UNITS

Complete the following nine (9) Units:

FDFPH4001A	Prepare and review workplace documentation to support GMP
FDFPH4002A	Facilitate and monitor Good Manufacturing Practice
FDFPH4003A	Facilitate contamination control
FDFPH4005A	Participate in validation processes
FDFPH4006A	Respond to non-conformance

FDFPH4001A	Prepare and review workplace documentation to support GMP
FDFPPL3002A	Report on workplace performance
FDFPPL4001A	Manage people in the work area
FDFTEC4007A	Describe and analyse data using mathematical principles
MSAENV472B	Implement and monitor environmentally sustainable work practices

ELECTIVE UNITS

GROUP A

Select a minimum of one (1) Group A elective Units.

FDFOHS4001A	Identify, assess and control OHS risk in own work
FDFOHS5001A	Manage OHS processes

GROUP B

Select a minimum of one (1) Group B elective Units.

FDFOP3003A	Operate inter-related processes in a production system
FDFOP3004A	Operate inter-related processes in a packaging system

GROUP C

Select a minimum of six (6) Group C elective Units.

FDFPPL4003A	Schedule and manage production
FDFPPL4007A	Manage supplier agreements and contracts
FDFPPL5001A	Design and maintain programs to support legal compliance
FDFTEC5001A	Manage and evaluate new product trials
FDFTEC5002A	Manage utilities and energy for a production process
BSBATSIM507B	Establish and maintain a strategic planning cycle

FDFPPL4003A	Schedule and manage production
BSBCOM502B	Evaluate and review compliance
BSBCOM503B	Develop processes for the management of breaches in compliance requirements
BSBMGT502B	Manage people performance
BSBMGT515A	Manage operational plan
BSBMGT516C	Facilitate continuous improvement
BSBPMG510A	Manage projects
MEM15001B	Perform basic statistical quality control
MSS405011A	Manage people relationships
MSS405001A	Develop competitive systems and practices for an organisation
MSS405020A	Develop quick changeover procedures
MSS405050A	Determine and improve process capability* <i>MSS404052A Apply statistics to operational processes</i>
MSS405070A	Develop and manage sustainable energy practices
MSACMT671A	Develop and manage sustainable environmental practices

GROUP D

BSBCUS501C	Manage quality customer service
BSBFIM501A	Manage budgets and financial plans
BSBMKG501B	Identify and evaluate marketing opportunities
BSBOHS503B	Assist in the design and development of OHS participative arrangements
BSBWOR502A	Ensure team effectiveness
MSS403010A	Facilitate change in an organisation implementing competitive systems and practices

BSBCUS501C	Manage quality customer service
MSS405010A	Manage relationships with non-customer external organisations
MSS405012A	Manage workplace learning
MSS405013A	Facilitate holistic culture improvement in an organisation
MSS405014A	Develop a communications strategy to support operations
MSS405002A	Analyse and map a value stream
MSS405006A	Develop a Balanced Scorecard
MSS405007A	Introduce competitive systems and practices to a small or medium enterprise
MSS402030A	Apply cost factors to work practices
MSS402080A	Undertake root cause analysis
MSS404052A	Apply statistics to operational processes
MSS405022A	Design a process layout
MSS405023A	Develop a levelled pull system for operations and processes
MSS405030A	Optimise cost of a product or service
MSS405031A	Undertake value analysis of product or process costs in terms of customer requirements
MSS405032A	Analyse cost implications of maintenance strategy
MSS405040A	Manage 5S system in an organisation
MSS405061A	Determine and establish information collection requirements and processes
MSS405062A	Develop a documentation control strategy for an organisation
MSS405075A	Facilitate the development of a new product* <i>MSS404052A Apply statistics to operational processes</i>

BSBCUS501C	Manage quality customer service
MSS405081A	Develop a proactive maintenance strategy
MSS405082A	Adapt a proactive maintenance strategy to the process operations sector* <i>MSS405081A Develop a proactive maintenance strategy</i>
MSS405083A	Adapt a proactive maintenance strategy for a seasonal or cyclical business* <i>MSS405081A Develop a proactive maintenance strategy</i>
MSS405060A	Develop the application of enterprise control systems in an organisation

FDF50311 Diploma of Food Science and Technology

Modification History

September 2012: Replacement of superseded imported Units.

Description

This Qualification provides a management level occupational outcome in a technical or quality role in food processing and supporting functions and covers a range of food related industries, including but not limited to:

- general food processing
- meat
- seafood
- poultry including chicken meat and egg processing
- dairy processing
- confectionery
- beverages
- baking and cereals.

Job roles This Qualification targets those working in technical and management roles covering product development, food safety and quality, food production and distribution, environmental factors and functions, and the management and review of workplace systems. The job role requires technical skills and knowledge in the science and technology that support food processing.

Job titles may include:

- food technologist
- production manager
- food testing manager
- quality systems manager
- food safety systems manager
- product development team leader
- processing systems manager
- environmental manager (food processing).

Additional Qualification advice

Units selected from other Training Packages must be relevant to the work outcome, local industry requirements and the Qualification level.

Note: AgriFood Skills Australia expects that the design of any training delivery and assessment program to support the achievement of this Qualification is based on:

- the context required by the industry and/or enterprise
- a holistic and integrated training delivery and assessment plan that identifies learning activities and evidence required
- flexible delivery options including on-the-job and work-based training that support the development of competency.

Pathways Information

Pathways into the Qualification

Pathways for candidates considering this Qualification include:

- FDF40311 Certificate IV in Food Science and Technology
- direct entry
- relevant vocational training and/or work experience.

A person who holds FDF40311 Certificate IV in Food Science and Technology will gain credit for Units already completed.

Pathways from the Qualification

After achieving this Qualification, candidates may undertake a relevant Advanced Diploma Qualification.

Licensing/Regulatory Information

There is no direct link between this Qualification and licensing, legislative and/or regulatory requirements. However all work must comply with food safety, OHS and environmental regulations and legislation that apply to the workplace.

Entry Requirements

Not applicable.

Employability Skills Summary

Employability Skill	Industry/enterprise requirements for this Qualification include:
Communication	<ul style="list-style-type: none"> • Complete a range of workplace documentation and records. • Select communication technologies to support work operations. • Develop work instructions, specifications and procedures. • Demonstrate effective and appropriate communication and interpersonal skills when dealing with people. • Communicate with all people at all levels of the organisation in a professional manner. • Select and apply documentation, communication and interpersonal strategies when dealing with internal and external clients. • Select communication methods according to priority, cost and audience needs. • Analyse and apply technical information. • Prepare reports for research, marketing or process improvement processes. • Demonstrate high level presentation skills.
Teamwork	<ul style="list-style-type: none"> • Lead cooperative work relations with people of different ages, gender, race or religion. • Provide leadership. • Determine performance required to meet internal and external customer needs. • Manage organisational processes and provide problem solving support to others. • Facilitate team achievements. • Work collaboratively to research and solve technical problems and develop new processes or products.
Problem solving	<ul style="list-style-type: none"> • Investigate problem causes and implement corrective strategies. • Identify and address potential and actual problems associated with work operations or in achieving work outcomes. • Use material and process knowledge to solve problems. • Identify hazards and suggest control measures. • Analyse data and information at a technical level. • Evaluate food safety practices. • Apply technical knowledge to analyse problems and develop solutions. • Use a range of problem-solving techniques.
Initiative and enterprise	<ul style="list-style-type: none"> • Determine information gathering requirements to monitor work processes and procedures.

	<ul style="list-style-type: none"> • Determine quality and other indicators of work. • Identify efficient production processes. • Determine and act on situations requiring further information or problem solving. • Implement continuous improvement processes. • Provide leadership in the workplace. • Implement technical development processes.
Planning and organising	<ul style="list-style-type: none"> • Identify hazards and implement appropriate hazard control measures. • Demonstrate time management skills. • Determine resource requirements • Determine work timelines and output targets. • Optimise work processes. • Plan and organise the collection of data. • Plan new technical processes to integrate with production operations. • Plan the delivery of information and advice to management or workers.
Self-management	<ul style="list-style-type: none"> • Analyse implications of relevant acts and regulations on work practices. • Monitor work operations and identify and act on any quality and performance issues. • Manage own time to meet deadlines. • Determine workplace procedures and instructions. • Conduct work reviews to determine improvement requirements. • Plan individual time and resources required to investigate problems and develop and trial solutions.
Learning	<ul style="list-style-type: none"> • Develop learning opportunities. • Be supportive, assertive and use interpersonal skills to encourage workplace learning. • Identify own training needs and seek skill development if required. • Gather feedback to own work to assess effectiveness in meeting objectives and integrate information into own practice. • Assess work data and information to identify areas for improved performance. • Maintain currency of industry skill and knowledge. • Maintain technical knowledge through reading, research and professional conversations.
Technology	<ul style="list-style-type: none"> • Select and use computer software applications to support research, analysis of findings and reporting.

	<ul style="list-style-type: none">• Work with technology safely and according to workplace standards.• Help others use technology efficiently and safely.• Ensure readiness and operational efficiency of workplace technology.• Apply high level technical skills in chemical and biological analysis techniques.• Integrate technology into existing production processes.
--	--

Packaging Rules

This Qualification requires the achievement of twenty two (22) Units of Competency in accordance with the following rules.

Total Units must include a minimum of fourteen (14) Units coded FDF or MTM.

Ten (10) Core Units

Twelve (12) Elective Units

Elective selection must include:

- Five (5) elective Units from Group A
- One (1) elective Unit from Group B
- Three (3) Units from Groups A or B

Three (3) remaining elective Units may be selected from:

- Group A elective Units below, not previously selected
- Group B elective Units below, not previously selected
- A maximum of three (3) Units from any nationally endorsed Training Package and accredited course that are packaged at Certificate IV level, Diploma level or Advanced Diploma level.

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

CORE UNITS

Complete all ten (10) core Units.

FDFFS4001A	Supervise and maintain a food safety plan
FDFFS5001A	Develop a HACCP-based food safety program* <i>FDFFS4001A Supervise and maintain a food safety plan</i>
FDFFST4004A	Perform microbiological procedures in the food industry
FDFFST5002A	Identify and implement required process control for a food processing operation
FDFFST5004A	Specify and monitor the nutritional value of processed foods
FDFFST5005A	Identify the biochemical properties of food
FDFFST5006A	Apply food microbiological techniques and analysis* <i>FDFFST4004A Perform microbiological procedures in the food industry</i>

FDFFST5030A	Develop, manage and maintain quality systems for food processing
FDFOHS4002A	Maintain OHS processes
MSAENV472B	Implement and monitor environmentally sustainable work practices

GROUP A: TECHNICAL ELECTIVES

Select a minimum of five (5) elective Units from Group A.

Scientific principles and laboratory operations

FDFFST5007A	Evaluate sampling plans in relation to food industry standards
FDFOP2015A	Apply principles of statistical process control* <i>FDFOP2061A Use numerical applications in the workplace</i>
FDFOP2061A	Use numerical applications in the workplace
FDFTEC4005A	Apply an understanding of food additives
FDFTEC4007A	Describe and analyse data using mathematical principles* <i>FDFOP2015A Apply principle of statistical process control*</i> <i>FDFOP2061A Use numerical applications in the workplace</i>
MSL973004A	Perform aseptic techniques
MSL973007A	Perform microscopic examination
MSL974004A	Perform food tests
MSL974006A	Perform biological procedures* <i>MSL973004A Perform aseptic techniques</i> <i>MSL973007A Perform microscopic examination</i>
MSL975005A	Conduct sensory analysis
MSL975022A	Perform food analyses* <i>MSL974004A Perform food tests</i> <i>OR</i> <i>MSL974006A Perform biological procedures*</i> <i>MSL973004A Perform aseptic techniques</i> <i>MSL973007A Perform microscopic examination</i>

Food quality and safety

FDFAU4002A	Communicate and negotiate to conduct food safety audits
FDFAU4003A	Conduct food safety audits
FDFAU4004A	Identify, evaluate and control food safety hazards
FDFAU4005A	Audit bivalve mollusc growing and harvesting processes* <i>FDFAU4002A Communicate and negotiate to conduct food safety audits</i> <i>FDFAU4003A Conduct food safety audits</i> <i>FDFAU4004A Identify, evaluate and control food safety hazards</i>
FDFAU4006A	Audit a cook chill process* <i>FDFAU4002A Communicate and negotiate to conduct food safety audits</i> <i>FDFAU4003A Conduct food safety audits</i> <i>FDFAU4004A Identify, evaluate and control food safety hazards</i>
FDFAU4007B	Audit a heat treatment process* <i>FDFAU4002A Communicate and negotiate to conduct food safety audits</i> <i>FDFAU4003A Conduct food safety audits</i> <i>FDFAU4004A Identify, evaluate and control food safety hazards.</i>
FDFAU4008A	Audit manufacturing of ready-to-eat meat products* <i>FDFAU4002A Communicate and negotiate to conduct food safety audits</i> <i>FDFAU4003A Conduct food safety audits</i> <i>FDFAU4004A Identify, evaluate and control food safety hazards</i>
SFIPROC504C	Design and manage a product recall

Food processing

FDFEST5001A	Monitor refrigeration and air conditioning systems in food processing
FDFEST5003A	Construct a process control chart for a food processing operation
FDFOP2030A	Operate a process control interface

FDFTEC4004A	Apply basic engineering principles to food processing* <i>FDFOP2030A Operate a process control interface</i> <i>FDFTEC4007A Describe and analyse data using mathematical principles*</i> <i>FDFOP2015A Apply principle of statistical process control*</i> <i>FDFOP2061A Use numerical applications in the workplace</i>
-------------	--

Management - technical and research

BSBRES401A	Analyse and present research information
FDFST5008A	Develop a new food product
FDFTEC5001A	Manage and evaluate new product trials
MSS403011A	Facilitate implementation of competitive systems and practices
MSS403001A	Implement competitive systems and practices

Environment

FDFST4012A	Apply water management principles to the food industry
FDFTEC5002A	Manage utilities and energy for a production process

GROUP B: INDUSTRY SPECIALISATION ELECTIVES

Select one (1) elective Unit from Group B, and
Select a minimum of three (3) elective Units from Group A and B.

Meat processing

MTMPS5603C	Develop, manage and maintain quality systems
MTMPSR5601C	Design and manage the food safety system

Dairy processing

FDFST5023A	Implement and review the processing of milk fat products
FDFST5024A	Implement and review the processing of fermented dairy products and dairy desserts
FDFST5025A	Implement and review the processing of concentrated and dried dairy products

FDFST5026A	Implement and review the processing of ice creams and frozen dairy products
FDFST5027A	Implement and review the processing of milk and related products by the membrane system

Confectionery manufacture

FDFST4030A	Implement and review the processing of chocolate and sugar-panned products
FDFST4031A	Implement and review the processing of aerated confectioneries
FDFST4032A	Implement and review the production of gums and jellies
FDFST4033A	Implement and review the production of chocolate products
FDFST4034A	Implement and review the processing of chocolate
FDFST4035A	Implement and review the processing of high and low boil confectionery
FDFST4036A	Implement and review the processing of confectionery products

Poultry industry processing

FDFST4040A	Identify and implement product safety and quality for chilled or frozen poultry product manufacturing
FDFST4041A	Identify and implement product safety and quality for cooked poultry product manufacturing
FDFST4042A	Identify and implement product safety and quality for egg based product manufacturing

Other sectors

FDFST4050A	Identify and implement product safety and quality for fruits, vegetables and other produce
FDFST4051A	Identify and implement product safety and quality processes for fish and seafood products
FDFST4052A	Implement and review the manufacturing and processing of edible fats and oils
FDFST4053A	Implement and review manufacturing, packaging and testing of

	beverage products
FDFST4054A	Identify and implement product safety and quality for manufacturing of cereal products

FDFSS00001 Cellar Door Sales Induction

Modification History

September 2012: added missing information to Skill Set Requirements.

April 2012: minor clarification in Suggested words for Statement of Attainment.

Description

Not applicable.

Pathways Information

Pathway	These units of competency may provide credit towards FDF20411 Certificate II in Wine Industry Operations and FDF30411 Certificate III in Wine Industry Operations.
----------------	--

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

FDPCD2002A	Promote wine tourism information
FDPCD2003A	Evaluate wines (standard)
FDPCD2006A	Conduct a standard product tasting
FDFOHS2001 A	Participate in OHS processes
SIRXCCS202	Interact with customers
SITHFAB009 A	Provide responsible service of alcohol

Target Group

Target Group	<p>Those working in cellar door sales roles.</p> <p>Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.</p> <p>Consider implementation of the Wine Evaluation Skill Set to further induction skills.</p>
---------------------	---

Suggested words for Statement of Attainment

Suggested words for Statement of Attainment	<p>These competencies meet wine industry requirements for cellar door sales induction.</p>
--	--

Custom Content Section

Not applicable.

FDFSS00002 Cellar Hand Induction

Modification History

September 2012: added missing information to Skill Set Requirements.

April 2012: minor clarification in Suggested words for Statement of Attainment.

Description

Not applicable.

Pathways Information

Pathway	These units of competency may provide credit towards FDF20411 Certificate II in Wine Industry Operations and FDF30411 Certificate III in Wine Industry Operations.
----------------	--

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

FDFCEL2019 A	Carry out transfer operations
FDFOHS2001 A	Participate in OHS processes
FDFOP2004A	Clean and sanitise equipment
FDFWIN1001 A	Identify key operations in wine production
TLID2003A	Handle dangerous goods/hazardous substances

Target Group

Target Group	<p>Induction for casual workers providing cellar operations support within a wine production enterprise.</p> <p>Where manual handling and confined space work is required, consider addition of Manual Handling Skill Set and Confined Space Skill Set.</p> <p>Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.</p>
---------------------	---

Suggested words for Statement of Attainment

Suggested words for statement of attainment	These competencies meet the wine industry requirements for cellar hand induction.
--	---

Custom Content Section

Not applicable.

FDFSS00003 Chemical Handling Certification

Modification History

September 2012: added missing information to Skill Set Requirements.

April 2012: minor clarification in Suggested words for Statement of Attainment.

Description

Not applicable.

Pathways Information

Pathway	These units of competency may provide credit towards FDF20411 Certificate II in Wine Industry Operations and FDF30411 Certificate III in Wine Industry Operations.
----------------	--

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

AHCCHM101 A	Follow basic chemical safety rules
AHCCHM201 A	Apply chemicals under supervision
AHCCHM303 A	Prepare and apply chemicals
AHCCHM304 A	Transport, handle and store chemicals

Target Group

Target Group	<p>Those needing to meet regulatory requirements for safe use and application of chemicals.</p> <p>Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.</p>
---------------------	---

Suggested words for Statement of Attainment

Suggested words for statement of attainment	These competencies meet the wine industry and regulatory requirements for applying chemicals.

FDFSS00006 Evaporator Station Operator

Modification History

September 2012: added missing information to Skill Set Requirements.

Description

Not applicable.

Pathways Information

These units provide credit towards the FDF21011 Certificate II in Sugar Milling Industry Operations.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

FDFOHS2001 A	Participate in OHS processes
FDFOP2034A	Operate an evaporation process
FDFOP2030A	Operate a process control interface
FDFSUG210A	Operate a juice clarification process
FDFSUG211A	Operate a mud filtration process
FDFSUG212A	Chemically clean equipment
FDFSUG225A	Collect and prepare samples

Target Group

Those working as evaporator station operators in sugar mills.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for evaporator station operators in the Sugar Milling industry.

FDFSS00007 Food Safety

Modification History

September 2012: added missing information to Skill Set Requirements.

April 2012: minor clarification in Suggested words for Statement of Attainment.

Description

Not applicable.

Pathways Information

Pathway	These units of competency may provide credit towards FDF20411 Certificate II in Wine Industry Operations and FDF30411 Certificate III in Wine Industry Operations.
----------------	--

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

FDFFS1001A	Follow work procedures to maintain food safety
FDFFS2001A	Implement the food safety program and procedures

Target Group

Target Group	<p>Those needing to meet regulatory requirements for work which involves the production of food or beverage products.</p> <p>Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.</p>
---------------------	---

Suggested words for Statement of Attainment

Suggested words for statement of attainment	These competencies from the FDF10 Version 2 Food Processing Training Package meet the wine industry and regulatory requirements for food safety.

FDFSS00009 Fugal Operator

Modification History

September 2012: added missing information to Skill Set Requirements.

Description

Not applicable.

Pathways Information

These units provide credit towards the FDF21011 Certificate II in Sugar Milling Industry Operations.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

FDFOHS2001 A	Participate in OHS processes
FDFOP2030A	Operate a process control interface
FDFSUG215A	Operate a low grade fugal station
FDFSUG216A	Operate a high grade fugal station
FDFSUG225A	Collect and prepare samples

Target Group

Those working as fugal operators in sugar mills.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for fugal operators in the Sugar Milling industry.

FDFSS00010 Hand Pruning Induction

Modification History

September 2012: added missing information to Skill Set Requirements.

April 2012: minor clarification in Suggested words for Statement of Attainment.

Description

Not applicable.

Pathways Information

Pathway	These units of competency may provide credit towards FDF20411 Certificate II in Wine Industry Operations and FDF30411 Certificate III in Wine Industry Operations.
----------------	--

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

FDFOHS2001 A	Participate in OHS processes
FDFWGG2003 A	Hand prune vines

Target Group

Target Group	<p>Induction for casual workers conducting hand pruning work within a wine vineyard.</p> <p>Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.</p>
---------------------	--

Suggested words for Statement of Attainment

Suggested words for statement of attainment	These competencies from the FDF10 Version 2 Food Processing Training Package meet the wine industry requirements for hand pruning induction.

FDFSS00015 Platform Operator

Modification History

September 2012: added missing information to Skill Set Requirements.

Description

Not applicable.

Pathways Information

These units provide credit towards the FDF21011 Certificate II in Sugar Milling Industry Operations.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

FDFOHS2001 A	Participate in OHS processes
FDFOP2030A	Operate a process control interface
FDFSUG209A	Operate an extraction station
FDFSUG217A	Operate a turbine
FDFSUG306A	Monitor a sugar mill powerhouse

Target Group

Those working as platform operators in sugar mills.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for platform operators in the Sugar Milling industry.

FDFSS00016 Responsible Service of Alcohol

Modification History

September 2012: added missing information to Skill Set Requirements.

April 2012: minor clarification in Suggested words for Statement of Attainment.

Description

Not applicable.

Pathways Information

Pathway	This unit of competency may provide credit towards FDF20411 Certificate II in Wine Industry Operations and FDF30411 Certificate III in Wine Industry Operations.
----------------	--

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

SITHFAB009 A	Provide responsible service of alcohol
-----------------	--

Target Group

Target Group	Those needing to meet regulatory requirements for serving alcohol. Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements and contextualise the application accordingly.
---------------------	--

Suggested words for Statement of Attainment

Suggested words for statement of attainment	This competency meets the wine industry and regulatory requirements for serving alcohol.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan the audit	1.1. An audit plan is developed to meet the audit scope 1.2. The plan is capable of delivering the required outcomes within resource and time allocations 1.3. Plan includes audit purpose, scope and relevant templates or approved food safety program 1.4. Activities and responsibilities for the audit are identified 1.5. Audit timing (as required by legislation and/or client) is identified including timetable for each stage of the audit 1.6. Resource, personnel and reporting requirements are identified 1.7. Follow up and completion procedures are identified 1.8. Communication protocols are identified and established to facilitate the effective exchange of information and suited to the auditee environment
2. Confirm that the food business has documented required preliminary work	2.1. The food and the method of distribution are defined 2.2. Customers and intended use of food is identified 2.3. The process is described and documented 2.4. The food business has checked their documentation for accuracy and completeness
3. Confirm the food safety program is supported by a tool or template or has been validated	3.1. The documented food safety program and related procedures and prerequisite programs are assessed to confirm that they have a prescriptive tool or have been validated by a technical expert 3.2. The food business method of identifying and analysing food safety hazards is reviewed 3.3. Templates or the approved food safety program are correctly selected to meet audit scope 3.4. Templates or the approved food safety program are appropriately adapted to suit the needs of the business without adversely affecting food safety 3.5. Documented verification records are reviewed to confirm that the requirements of the food safety program are being met 3.6. Corrective actions required where processes are identified as not meeting targets or critical limits are assessed to confirm they meet the requirements of the template or food safety program 3.7. Food safety prerequisite programs are assessed to

ELEMENT	PERFORMANCE CRITERIA
	<p>confirm they are appropriate for the food business/industry sector to maintain a safe food environment</p> <p>3.8. Food safety program documents are reviewed to confirm currency, accuracy and adequacy to facilitate maintenance of an adequate food safety program</p>
<p>4. Collect evidence to review and assess implementation of food safety programs</p>	<p>4.1. Evidence is collected to confirm that documented programs and procedures are working effectively, reflect actual practice and are consistently applied</p> <p>4.2. Evidence is collected to confirm that food safety monitoring and corrective actions are carried out according to procedure</p> <p>4.3. Evidence is collected to confirm that safety prerequisite programs are effective and consistently followed</p> <p>4.4. Evidence is collected to confirm that food safety records are completed and provide an accurate record of events</p> <p>4.5. Evidence is collected to confirm that records are accessed and analysed to confirm effective program maintenance in accordance with the template or food safety program</p> <p>4.6. Evidence is collected to confirm that food safety skills and knowledge of food business personnel is commensurate with their work role</p> <p>4.7. Evidence is collected to confirm that the food safety program has been internally monitored and assessed, updated and improved by a technical expert</p>
<p>5. Manage the audit process</p>	<p>5.1. Audit progress is monitored against the audit plan and any variation to plan is identified and addressed</p> <p>5.2. Circumstances requiring the audit plan to be adjusted are identified and negotiated in a timely manner</p> <p>5.3. Audits address audit scope and are conducted within time and resource constraints to meet quality and professional standards</p> <p>5.4. The audit process is reviewed to identify opportunities for improvement</p>
<p>6. Consolidate audit outcomes</p>	<p>6.1. Audit evidence is analysed and assessed to identify any areas of non-compliance with legislation and/or the food safety program</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>6.2. Non-conformities are identified and classified as agreed by the audit plan</p> <p>6.3. Non-conformities are reported in accordance with agreed client and/or legislative requirements</p> <p>6.4. Audit reports and/or certificates are prepared and submitted or presented as required to meet regulatory and client requirements</p> <p>6.5. A corrective action implementation plan defining proposed actions and timelines developed by the auditee is reviewed by the auditor to confirm that template or food safety program requirements are met</p> <p>6.6. Audit findings are reviewed to confirm that evidence is sufficient as defined by the template or approved food safety program</p>
7. Confirm and close out corrective actions	<p>7.1. Implementation and effectiveness of corrective action is monitored and verified against the template or the approved food safety program</p> <p>7.2. Audit records are maintained to record corrective actions</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- plan and organise audit activities
- identify work processes and work flow
- interpret food safety programs including flow charts, standard operating procedures (SOPs), and other process documentation
- describe each process step and identify food safety hazards
- conduct research to identify, collect and analyse evidence of compliance with food safety programs
- use communication skills to support evidence collection and outcome presentation
- identify and classify non-compliances
- prepare audit reports and certificates to meet regulatory and client requirements
- review corrective action implementation plans
- monitor the implementation of corrective actions
- maintain audit records

Required knowledge

Knowledge of:

- required content and scope of food safety programs as defined in the National Food Safety Standard 3.2.1 or other relevant standards
- purpose and minimum requirements of risk-based approaches to managing food safety hazards, including the role of prescriptive templates or approved food safety programs in supporting a risk-based approach and the process used to validate these tools
- guidelines on implementing industry templates or approved food safety programs
- legal requirements of food businesses
- legal liability of auditors and protection against litigation and professional practice issues, including the circumstances under which an auditor could be prosecuted and insurance requirements
- audit activities and principles, including guidelines on audit stages and activities as outlined in ISO 19011:2002
- personal attributes required of food safety auditors, including those outlined in ISO 19011:2002, and additional system owner requirements where required
- role, responsibilities and powers of enforcement agencies, authorised officers and commercial auditors, including reporting responsibilities, legal liability of auditors and delegation of authority to commercial auditors as may apply in some states and territories

REQUIRED SKILLS AND KNOWLEDGE

- information handling and management system protocols, including issues, such as rights of access to information, maintenance of confidentiality of audit information and reports and information dissemination requirements
- evidence appropriate for use in audit processes, including the difference between objective and hearsay evidence and methods for recording and managing evidence to provide reliable reference information in the event that evidence is challenged
- vocabulary and terms relating to food safety programs, including terms and jargon to describe technical processes, industry standards and common biological and chemical terms
- common biological, physical and chemical hazards that may occur in the food business and appropriate methods of control and critical limits as outlined in the approved food safety program or template
- the impact of (1) the design and construction of premises and (2) the selection, application and condition of equipment, on food safety as defined in Food Safety Standard 3.2.3
- role of prerequisite programs in controlling hazards, including the relationship between prerequisite programs and risk-based approaches, such as HACCP to controlling food safety hazards
- circumstances, implications and responsibilities in the event that the auditee requests that the audit ceases
- circumstances and authority to initiate cessation of an audit
- methods to assess skill requirements and options to confirm that the responsible personnel within the food business have the of food safety and food hygiene relevant to the food business

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competence in this unit must be able to assess compliance against an approved food safety program where the program is supported by a prescriptive template or tool or where compliance is checked against a food safety program that has been validated by a technical expert.

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- confirm that the food safety program and/or template is appropriate to the activities of the business
- review food safety program records to assess compliance against the approved food safety program and/or template
- collect and analyse evidence to confirm that the food safety program is consistently followed and controls all critical risks
- identify circumstances where variation or customising of the template or food safety program requires further validation
- submit non-compliance reports to clearly identify the aspects of the food safety program that have broken down/need further development in order to prevent recurrence.

Context of and specific resources for assessment

Competency may be assessed in an actual workplace or simulated environment that provides access to the required resources. At least one of the scenarios should be assessed in an actual workplace context.

Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints.

The following resources must be available:

- food safety plans

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • food safety-related documentation required to implement and record the food safety plan • evidence and documentation relevant to processes that would typically be used to assess compliance with the food safety program • plant and equipment that would typically be used in a commercial manufacturing business.
Method of assessment	<p>Assessment methods must satisfy the endorsed Assessment Guidelines of FDF10 Food Processing Industry Training Package. The following assessment methods should be considered to gather sufficient and valid evidence of competency:</p> <ul style="list-style-type: none"> • observation and a report covering the critical aspects for assessment identified above • questioning to test the level and application of knowledge • workplace example or scenario to allow a valid decision on the compliance of the food safety program to be made, with evidence of recording and feedback.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Food safety program	<p>Food safety programs include both prerequisite programs and a risk-based analysis of food safety hazards to determine required control measures to eliminate, prevent or reduce hazards.</p> <p>Minimum legal requirements for food safety programs are specified in National Food Safety Standard 3.2.1 or other relevant legislative requirements.</p> <p>The food safety program may be based on a template or externally developed program that is adapted to the needs of the business</p>
Licensing/certification requirements	<p>Licensing and certification requirements are determined by system owners</p>
Technical expert	<p>The requirements of a technical expert are determined by the system owner. System owners may include:</p> <ul style="list-style-type: none"> • government regulators as well as private system owners
Audit scope	<p>The scope describes the purpose, extent and boundaries of the audit. This may include:</p> <ul style="list-style-type: none"> • physical locations • products • processes • time period covered by the audit • extent of authority of the auditor
Prerequisite programs	<p>Prerequisite programs are also referred to as support programs, such as Good Manufacturing Practice (GMP), Good Agricultural Practice (GAP) and Good Hygiene Practice (GHP)</p> <p>Prerequisite programs can be divided into two categories.</p>

RANGE STATEMENT

	<p>Infrastructure and maintenance programs. These may include:</p> <ul style="list-style-type: none"> • layout, design and construction of buildings and facilities • supplies of air, water energy and other utilities • equipment, including preventative maintenance, sanitary design and accessibility for maintenance and cleaning • support services, including waste and sewage disposal <p>Operational prerequisite programs. These may include:</p> <ul style="list-style-type: none"> • personal hygiene • cleaning and sanitation • pest control • measures for the prevention of cross-contamination • packaging and labelling procedures • supplier assurance • chemical storage • employee training • maintenance • calibration • document control • internal audit programs • traceability and recall programs • on-farm food safety schemes • inspecting and testing regimes, including analytical and microbiological testing
Legal requirements	<p>The scope of the audit determines and may be determined by food safety legislation which may include:</p> <ul style="list-style-type: none"> • Food Standards Code • relevant state and territory legislation and related codes of practice, including industry sector-specific legislation and related codes of practice, such as that relating to meat, seafood, dairy and primary production and processing • regulatory and commercial requirements

RANGE STATEMENT	
	<p>relevant to importing countries</p> <ul style="list-style-type: none"> • Commonwealth legislation (e.g. Export Control Act) <p>Other legislation which may impact on the conduct of a food safety auditor may include legislation covering:</p> <ul style="list-style-type: none"> • occupational health and safety (OHS), anti-harassment, anti-discrimination and industrial relations • trade practices legislation • environmental risk management • legal contracts or agreements
Food businesses	A food business refers to a business, enterprise or activity where food is produced, processed, stored, displayed and/or sold. It may also include primary producers
Food safety program documents	<p>Food safety program documents may include:</p> <ul style="list-style-type: none"> • documented statements of food safety policy and objectives • documented procedures and records • documented complaints register • documents and records to ensure the effective development, implementation and updating of the food safety program
Risk-based approaches	Risk-based approaches to controlling food safety are typically based on HACCP, described in the Codex Alimentarius guidelines

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Develop a communication plan to support audit processes</p>	<p>1.1. Roles and responsibilities of the auditee are defined and agreed by both parties to address the audit scope</p> <p>1.2. Roles and responsibilities of all personnel involved in the audit process are defined, communicated and agreed</p> <p>1.3. Appropriate communication methods and protocols are determined and specific arrangements, including reporting requirements, are agreed</p> <p>1.4. A communication plan is developed to identify the communication requirements and responsibilities of personnel involved in the audit process</p>
<p>2. Select and use appropriate communication methods to conduct an audit</p>	<p>2.1. Appropriate communication methods are used to establish and maintain effective client relationships, collect audit evidence, provide and present information, facilitate meeting processes, facilitate issue management and conflict resolution and communicate audit findings</p> <p>2.2. Communication methods are selected to take account of system owner and food business requirements, workplace culture and individual differences</p> <p>2.3. Information provided by the auditee is interpreted in the context of the industry sector, language and culture of the business</p>
<p>3. Negotiate to achieve agreement on audit outcomes</p>	<p>3.1. Areas of disagreement over audit outcomes are identified and clarified with the auditee</p> <p>3.2. Understanding is sought on actions to be followed to resolve outstanding issues</p> <p>3.3. Communication techniques are applied to encourage all relevant parties to participate and express their views fully</p> <p>3.4. Auditee views are treated with respect</p> <p>3.5. Options for resolving differences are explored to reach agreement and meet audit timeline and resource parameters</p> <p>3.6. Appropriate issue resolution strategies are explored to increase the likelihood of agreement on steps required to conclude the audit</p> <p>3.7. The negotiation process is managed to maintain constructive client relationships</p> <p>3.8. Any areas of continuing non-compliance that result</p>

ELEMENT	PERFORMANCE CRITERIA
	from unresolved differences are reported to system owners and appropriate authorities as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- select, design and use appropriate communication methods and techniques to support the audit process and the needs of the audience
- apply strategies to communicate with people at different levels of the food business with different English language, literacy and technical skill levels
- facilitate groups to resolve sensitive and/or conflict-based issues
- structure and present written and verbal information that is thorough, legible, clear, accurate and appropriate to the purpose and the audience
- use information systems, technologies and software to manage security, authorisation and distribution of audit data and records
- communicate information in environments where the recipients may be hostile to the information being presented
- apply issue resolution strategies

Required knowledge

Knowledge of:

- legislation that impacts on acceptable communication methods and conduct, including anti-discrimination, anti-harassment and privacy legislation
- vocabulary and terms relevant to audit process, including terms and jargon to describe food safety legislation, technical processes and industry standards
- confidentiality needs and expectations of food businesses
- strategies to communicate in culturally diverse environments
- dynamics of conflict and strategies to manage resolution
- the structure, authority levels and lines of reporting within a food business
- communication methods relevant to different groups and audiences
- reporting formats and requirements to meet client and legislative needs

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competence in this unit must be able to select and use appropriate methods of communication and negotiation to support audit processes. This unit should be assessed together with other food safety auditing units.</p> <p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • design a communication plan to meet the needs of stakeholders in an audit process, specifically where a number of participants have limited English language and literacy skills • facilitate and negotiate to seek understanding of audit outcomes in a conflict-based situation where the outcomes are contested by the auditee. This component of assessment must provide opportunities to select and apply appropriate communication methods.
<p>Context of and specific resources for assessment</p>	<p>Competency may be assessed in an actual workplace or simulated environment where the simulated context provides access to audit findings which are disputed by the auditee. At least one of the audit scenarios should be assessed in an actual workplace context. A simulated environment must provide access to a typical range of personnel with communication skill levels appropriate to food businesses and to the roles of personnel involved in food safety audit processes.</p>
<p>Method of assessment</p>	<p>The following assessment methods should be considered to gather sufficient and valid evidence of competency:</p> <ul style="list-style-type: none"> • observation of communication and conflict management skills • a report for a communication plan to conduct a food safety audit

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • questioning to test the level and application of knowledge • a journal or report on communication strategies used in conducting a food safety audit. <p>Assessment methods must satisfy the endorsed Assessment Guidelines of FDF10 Food Processing Industry Training Package.</p>
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Licensing/certification requirements	<p>This unit is part of a set of units that are a minimum requirement for auditors of food safety programs</p>
Communication plan	<p>A communication plan identifies:</p> <ul style="list-style-type: none"> • the type and purpose of information to be provided through each stage of the audit process • audiences for types of information • the form or method of communication (e.g. written report, verbal presentation) • when/how often the communication will occur reporting procedures and responsibilities, including reporting timelines, formats and procedure for reporting serious/critical food safety hazards
Communication methods and protocols	<p>Methods of communication may include:</p> <ul style="list-style-type: none"> • written presentations and reports • two-way verbal interaction • constructive feedback • active listening • questioning to elicit, confirm and clarify information • interview techniques • facilitation of meetings and group processes • interpreting non-verbal skills and body language <p>Communication protocols may include:</p> <ul style="list-style-type: none"> • confidentiality • objectivity • information access and dissemination • levels of communication/lines or reporting • timeliness of providing

RANGE STATEMENT	
	information/responding to information requests
Food business requirements	<p>Business requirements may require that communication is consistent with:</p> <ul style="list-style-type: none"> • confidentiality requirements • legal requirements and related policies and procedures relating to communication requirements • professional codes of conduct/personal attributes of auditors • information that is accurate, thorough and clearly presented • resource parameters • organisational structure and delegated levels of authority • existing communication mechanisms and systems used in the auditee's workplace
Individual differences	<p>Individual differences may include but are not limited to:</p> <ul style="list-style-type: none"> • age • race • gender • culture • religion • impairment/disability • physical features • educational background • technical skill level • communication styles and skill levels • English language and literacy • any other individual characteristics that may need to be taken into account in designing communication as covered by relevant legislation
Issue resolution strategies	<p>Issue resolution strategies may include:</p> <ul style="list-style-type: none"> • establishing open communication practices to encourage the trust and engagement of all parties • designing processes that ensure all parties have opportunities to fully express their

RANGE STATEMENT

	position <ul style="list-style-type: none"> • involving personnel with additional expertise (this may include other expertise from the auditing body and/or the regulator) • validating evidence used to support audit findings

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define the scope of the audit	<p>1.1. Audit scope is identified and defines the extent of the audit to meet legislative and audit client requirements</p> <p>1.2. Audit criteria meet legislative and client requirements</p> <p>1.3. The definition and levels of non-conformity and related reporting responsibilities are identified consistent with legislative requirements and client requirements</p> <p>1.4. Evidence required to address audit scope and criteria is identified and appropriate collection methods are selected</p> <p>1.5. Food safety management system documents are reviewed to determine adequacy for the purposes of the audit</p>
2. Plan the audit	<p>2.1. An audit plan is developed that includes definitions and levels of non-conformity to meet the audit scope</p> <p>2.2. Activities and responsibilities for the audit are identified</p> <p>2.3. Audit timing (as required by legislation and/or client) is identified, including timetable for each stage of the audit</p> <p>2.4. Resource, personnel and reporting requirements are identified</p> <p>2.5. Follow up and completion procedures are identified</p> <p>2.6. Communication protocols are established to facilitate the effective exchange of information and suited to the auditee environment</p>
3. Conduct the audit	<p>3.1. Information on the audit scope and methodology is communicated in an effective and timely manner</p> <p>3.2. Stages and activities of the audit process are followed</p> <p>3.3. Methods used by the food business to carry out preliminary work, identify food safety hazards and assess level of risk are reviewed to confirm that they are appropriate and correctly applied</p> <p>3.4. Evidence used by the food business to support identification of control measures and establish control limits is identified and evaluated to determine adequacy and relevance</p> <p>3.5. Methods used by the food business to control</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>hazards and determine corrective action where processes are identified as not meeting targets or critical limits are reviewed to confirm they are adequate, effective and appropriate</p> <p>3.6.Evidence is collected to confirm that the documented food safety policies and procedures are working effectively, reflect actual practice and are consistently applied</p>
4. Manage the audit process	<p>4.1.Audit progress is monitored against the audit plan and any variation to plan is identified and addressed</p> <p>4.2.Circumstances requiring the audit plan to be adjusted are identified and negotiated in a timely manner</p> <p>4.3.Audits address audit scope and are conducted within time and resource constraints to meet quality and professional standards</p> <p>4.4.The audit process is reviewed to identify opportunities for improvement</p>
5. Consolidate audit outcomes	<p>5.1.Evidence is analysed and assessed to identify any areas of non-compliance with legislation and/or client requirements as appropriate to the audit scope</p> <p>5.2.Non-conformities are identified and classified as agreed by the audit plan</p> <p>5.3.Non-conformities are reported in accordance with agreed client and/or legislative requirements</p> <p>5.4.Audit findings are communicated to the auditee</p> <p>5.5.Audit reports and/or certificates are prepared and submitted or presented as required to meet regulatory and client requirements</p> <p>5.6.Corrective actions proposed by the auditee in response to non-conformances are reviewed for compliance with the template or food safety program</p> <p>5.7.Audit findings are reviewed to confirm that evidence is appropriate and sufficient and findings are accurate</p> <p>5.8.The food safety management system is reviewed to identify areas of potential improvement of the system according to audit scope</p>
6. Confirm and close out corrective actions	<p>6.1.Implementation and effectiveness of corrective actions are monitored and verified and any variation to the food safety plan is identified and addressed</p> <p>6.2.Audit records are maintained to record corrective</p>

ELEMENT	PERFORMANCE CRITERIA
	actions

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- locate relevant commonwealth, state and/or territory legislation, regulations and related codes of practice and determine the legal responsibilities of food businesses relevant to the industry sector
- plan and manage audit activities
- communicate information in ways appropriate to the purpose and the audience and to facilitate opening and closing meetings
- negotiate and facilitate audit processes, including following meeting procedures and resolving issues
- select and use research skills relevant to audit activities, including researching technical sources to validate food safety programs and collecting evidence to support verification
- consolidate audit findings based on objective evidence
- prepare records and reports appropriate to the purpose of the audit and the needs of the auditee and the client (system owner/regulator)

Required knowledge

Knowledge of:

Auditor roles and responsibilities

- audit activities and stages, including guidelines on audit stages and activities as outlined in ISO 19011:2002
- personal attributes required of food safety auditors, including those outlined in ISO 19011:2002, and additional client requirements where required
- role, responsibilities and powers of enforcement agencies, authorised officers and commercial auditors, including reporting responsibilities, legal liability of auditors and delegation of authority to commercial auditors as may apply in some states and territories
- relevant competencies and certification/registration criteria and processes applying to both regulatory and commercial auditors
- audit management to develop and implement an audit against an agreed plan, including the scope/level of authority to revise the resource and allocate time allocations to take account of variation to plan

Food safety management systems

- purpose and intent of each element of a food safety management system
- the underlying principles of risk-based approaches to controlling food safety hazards, including HACCP as described in the Codex Alimentarius Guidelines

REQUIRED SKILLS AND KNOWLEDGE

- vocabulary and terms relating to food safety, including terms and jargon to describe technical processes, industry standards and common biological and chemical terms
- food safety management system knowledge relevant to the system being audited., including system requirements, definitions and levels of non-compliance and related reporting responsibilities as defined by legal and management system requirements
- the interaction between different types of management systems, including the impact of food safety decisions on other management systems, such as occupational health and safety (OHS), quality, environmental risk management and animal welfare
- technical knowledge required to assess the adequacy of the food safety management system performance and corrective actions
- role of prerequisite programs in controlling hazards, including the relationship between prerequisite programs and risk-based approaches, such as HACCP to controlling food safety hazards
- information handling and management system protocols, including issues, such as rights of access to information, maintenance of confidentiality of audit information and reports and information dissemination requirements

Food safety legislation

- the purpose and intent of food safety legislation, including sources of information on importing country requirements and of requirements of countries and retailer driven systems in importing markets
- the content covered by the Food Standards Code and/or other relevant standards
- the structure and responsibilities of commonwealth, state and territory government departments and local government to manage and implement food safety legislation, including where to find information on relevant commonwealth, state/territory legislative requirements, product or industry sector legislation and regulations and import and export market requirements
- the regulatory framework and specific legislation relevant to the audit, including relevant risk profiling or classification systems where they apply
- sources of information on legislation and codes governing primary production and primary processing
- requirements for scheduling and conducting further auditing as determined by food safety legislation and/or client system requirements
- legal liability of auditors and protection against litigation and professional practice issues, including the circumstances under which an auditor could be prosecuted and insurance requirements
- the role of auditors when called on to provide evidence as a witness in court

Food safety audit processes

- preliminary work required to identify food to be covered by the food safety program, define the food and the method of distribution, identify customers and intended use of food, describe the process (flowchart) and check accuracy and

REQUIRED SKILLS AND KNOWLEDGE

completeness

- methods used identify food safety hazards and assess food safety hazard risk levels taking account of severity and likelihood of occurrence
- methods used to identify critical control points and establish critical limits, suited to the nature of the hazard, the requirements of the audit and the industry sector
- methods used to validate control techniques and critical limits, including industry or sector codes of practice, technical standards and research
- types of evidence, including the difference between objective and hearsay evidence and methods for recording and managing evidence to provide reliable reference information in the event that evidence is challenged
- evidence collection methods, including record sampling and sample analysis, and the evidence collection options relevant to a given audit situation, the reliability of each collection method and the range/extent of evidence collection methods required to ensure that audit outcomes are objective, consistent, fair and reliable
- methods to assess skill requirements and options to confirm that the responsible personnel within the food business have the required skills and knowledge of food safety and food hygiene relevant to the food business
- circumstances, implications and responsibilities in the event that the auditee requests that the audit ceases
- circumstances and authority of an auditor to initiate cessation of an audit
- understanding of the context in which audits are conducted, including workplace culture and preferred communication methods, industry, process and/or product knowledge and related jargon
- information recording requirements and audit reporting requirements

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competence in this unit must be able to verify and confirm validation of food safety programs in the context of food safety legislation and client requirements.

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- Identify food safety legislation applying to a food business. Legislative requirements may relate to actual or hypothetical food businesses. A minimum of two scenarios must be covered providing that at least one food business operates in a market segment that has to meet compliance requirements in place of or in addition to the Food Standards Code. One such market segment is export meat processors who must comply with the Export Control Act and the Export Meat Orders.
- The assessment activity must:
 - identify the relevant legislation applying to the food business taking account of the industry sector, range of food handling activities undertaken and the markets into which products and/or services are sold.
 - locate advice on relevant authorities and enforcement agencies in a state or territory and for international markets as appropriate.
 - explain the legal responsibilities of a given food business.
- Plan and conduct an audit that complies with legal and client requirements as appropriate. The criteria and evidence requirements may be developed to apply to an actual or hypothetical food business. The assessee must substantiate:
 - how audit scope and criteria meet legislative and

EVIDENCE GUIDE	
	<p>client requirements.</p> <ul style="list-style-type: none"> the evidence required to assess compliance with the criteria and to support an objective, reliable and consistent audit outcome. definitions, levels and related reporting of non-conformance to comply with legislative requirements. <ul style="list-style-type: none"> Submit completed audit records for the selected audit including the final audit report, non-conformity reports, corrective action reports, follow up reports and suggestions for improvements to the food safety management system and to the audit process. These latter items may be documented in personal notes rather than part of the formal audit report according to the audit scope.
Context of and specific resources for assessment	<p>Competency may be assessed in an actual workplace or simulated environment that provides access to the required resources. At least one of the audit scenarios should be assessed in an actual workplace context.</p> <p>Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints.</p> <p>The following resources must be available:</p> <ul style="list-style-type: none"> food safety plans food safety-related documentation typical of commercial manufacturing businesses and used for the purpose of verification evidence and documentation relevant to processes that would typically be used by commercial manufacturing businesses to support validation processes plant and equipment that would typically be used in a commercial manufacturing business.
Method of assessment	<p>The following assessment methods should be considered to gather sufficient and valid evidence of competency:</p> <ul style="list-style-type: none"> observation, including the completion of documentation to show the planning and conducting of an audit a report on the legal responsibilities of the food business questioning to test the level and application of knowledge

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • documentation to show validation and verification processes used • completion of all audit records. <p>The whole audit process must be witnessed by the assessor.</p> <p>Assessment methods must satisfy the endorsed Assessment Guidelines of FDF10 Food Processing Industry Training Package.</p>
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Food safety audits	Audits may be conducted for either regulatory or commercial food safety systems for low, medium or high risk food safety hazards
Licensing/certification requirements	Licensing and registration arrangements are determined by system owners
Audit scope	<p>The audit scope describes the purpose, extent and boundaries of the audit. This may include:</p> <ul style="list-style-type: none"> • physical locations • products • processes • time period covered by the audit • extent of authority of the auditor
Legal requirements	<p>The scope of the audit determines and may be determined by food safety legislation which may include:</p> <ul style="list-style-type: none"> • Food Standards Code • relevant state legislation and related codes of practice, including industry sector-specific legislation and related codes of practice, such as those relating to meat, seafood, dairy and primary production and processing • regulatory and commercial requirements relevant to importing countries • commonwealth legislation (e.g. Export Control Act) • other legislation which may impact on the conduct of a food safety auditor and may include legislation covering: <ul style="list-style-type: none"> • OHS, anti-harassment, anti-discrimination and industrial relations • trade practices legislation • environmental risk management

RANGE STATEMENT	
	<ul style="list-style-type: none"> • legal contracts or agreements
Audit client	<p>Audit client refers to the organisation or person requesting an audit (system owner). This may be the same as the auditee or any other organisation which has the regulatory or contractual right to request an audit.</p> <p>The system owner may be the regulator</p>
Auditee	Auditee refers to the organisation being audited
Audit client requirements	<p>Client requirements are typically defined in audit contracts or agreements and may relate to:</p> <ul style="list-style-type: none"> • legal requirements • food safety management system requirements • compliance with client site operational policies and procedures • confidentiality • business size, activities and processes • business culture • professional standards of conduct
Audit criteria	<p>The audit criteria must comply with relevant food safety legislation and may extend to address additional system owner/client requirements. In addition to meeting the requirements of food safety legislation, reference against which conformity is determined may include:</p> <ul style="list-style-type: none"> • management systems policies and procedures • industry standards or codes • contractual requirements • international treaties and conventions
Levels of non-conformity	<p>Levels of non-conformity are defined and based on food safety risk. They may be determined by:</p> <ul style="list-style-type: none"> • the management system • the audit client • legislation • where legislation applies, definitions may be determined by: <ul style="list-style-type: none"> • state and territory authorities • AQIS • primary industry jurisdiction

RANGE STATEMENT	
	<ul style="list-style-type: none"> • primary food production jurisdiction
Audit evidence	<p>Evidence required for the purposes of meeting relevant food safety legislation may be defined by:</p> <ul style="list-style-type: none"> • the client and/or the regulatory authority <p>Audit evidence should be based on objective information rather than hearsay and may include:</p> <ul style="list-style-type: none"> • system records • evidence collection records • statements of fact or other information relevant to the audit criteria and which is verifiable • observations • records of audit stage progression
Evidence collection methods and sources	<p>Evidence collection methods and sources will depend on the purpose and scope of the audit and may include:</p> <ul style="list-style-type: none"> • observation • interviews • checklists • auditee documentation review • reports/data from other sources, such as customer feedback, technical references, computerised databases • results of analyses
Food safety management system	<p>A food safety management system is a documented arrangement implemented (and resourced) by a business for control of food safety. A food safety management system includes:</p> <ul style="list-style-type: none"> • commitment from management, procedures and practices to identify and control food safety hazards and prevent their recurrence. It may incorporate recognised food safety tools, such as HACCP and its prerequisite programs
Resource requirements	<p>Resource requirements will depend on the purpose and scope of the audit and may include:</p> <ul style="list-style-type: none"> • audit personnel directly involved in undertaking the audit

RANGE STATEMENT	
	<ul style="list-style-type: none"> • access to relevant personnel and information within the business • access to any additional resources as required
Food businesses	A food business refers to a business, vehicle, enterprise or activity where food is produced, processed, stored, displayed, transported and/or sold. It may also include primary producers
Preliminary work	<p>Preliminary work includes but is not limited to:</p> <ul style="list-style-type: none"> • identifying food to be covered by the food safety program • defining the food and the method of distribution • identifying customers and intended use of food • describing the process (flowchart) • checking for accuracy and completeness of the previous steps
Validation	Validation refers to obtaining evidence to confirm that a HACCP-based food safety program is complete and effective and will deliver the expected food safety outcomes
Verification	Verification refers to methods and procedures used to carry out monitoring, including sampling and testing to provide evidence that the specifications set by relevant legislation and codes of practice continue to be met
Audit records	<p>Audit records are maintained to demonstrate the implementation of the audit process. These may include but are not limited to:</p> <ul style="list-style-type: none"> • audit plans • audit reports • non-conformity reports • corrective action reports • follow up reports
Close out	<p>Auditors have different levels of responsibility and authority to close out audits according to the level of non-conformity and whether they are an authorised officer or a commercial auditor. Closing out may involve notifying the regulator</p>

RANGE STATEMENT	
	with the power to enforce legislation
Commercial auditor	Commercial auditor refers to any auditor other than a regulatory auditor, who is external to and independent of the food business being audited
Risk-based approaches	Risk-based approaches to controlling food safety are typically based on HACCP, described in the Codex Alimentarius guidelines
Prerequisite programs	<p>Prerequisite programs are also referred to as support programs, such as Good Manufacturing Practice (GMP), Good Agricultural Practice (GAP) and Good Hygiene Practice (GHP)</p> <p>Prerequisite programs can be divided into two categories.</p> <p>Infrastructure and maintenance programs. These may include:</p> <ul style="list-style-type: none"> • layout, design and construction of buildings and facilities • supplies of air, water, energy and other utilities • equipment, including preventative maintenance, sanitary design and accessibility for maintenance and cleaning • support services, including waste and sewage disposal <p>Operational prerequisite programs. These may include:</p> <ul style="list-style-type: none"> • personal hygiene • cleaning and sanitation • pest control • measures for the prevention of cross-contamination • packaging and labelling procedures • supplier assurance • chemical storage • employee training • maintenance • calibration • document control • internal audit programs

RANGE STATEMENT	
	<ul style="list-style-type: none"> • traceability and recall programs • on-farm food safety schemes • inspecting and testing regimes, including analytical and microbiological testing
Critical control point	Critical control point is a step at which control can be applied and is essential to prevent or eliminate a food safety hazard or reduce it to an acceptable level
Critical limit	Critical limit refers to criterion which separates acceptability from unacceptability

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify food safety hazards in a food business	<p>1.1. Biological food safety hazards that could present a risk in the food at the point of consumption are identified by type, origin and food association and assessed to determine risk level and control requirements</p> <p>1.2. Intrinsic and extrinsic chemical food safety hazards that could present a risk in the food at the point of consumption, including toxin presence, are identified by type, origin and food association and assessed to determine risk level and control requirements</p> <p>1.3. Physical food safety hazards that present a risk in food are identified and assessed to determine control requirements</p>
2. Control food safety hazards in a food business	<p>2.1. Processing hazards and related control measures and critical limits, monitoring and recording requirements are established and validated to eliminate or reduce food safety hazards to acceptable levels</p> <p>2.2. Food storage and handling requirements necessary to eliminate or reduce food safety hazards are determined</p> <p>2.3. Personal hygiene practices required to eliminate or reduce food safety hazards are established</p> <p>2.4. Cleaning and sanitation, housekeeping and pest control practices and procedures required to prevent or reduce food safety hazards are established</p> <p>2.5. Other prerequisite programs are developed to eliminate or reduce food safety hazards to acceptable levels</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- interpret and apply relevant legislation, codes of practice and technical standards
- identify biological, chemical and physical food safety hazards
- determine critical control points and critical limits for identified hazards
- establish the required procedures, systems and records to monitor critical control points in order to demonstrate that the critical control point is in control
- specify required corrective actions and corrections to be taken when critical limits are not achieved

Required knowledge

Knowledge of:

- sources of advice and research on foods, processing methods, production technologies and associated food safety hazards and control methods
- ways in which food can cause illness and injury, including incidence and trends in food-borne illness
- intrinsic and extrinsic factors that can impact on food safety
- common biological food safety hazards (including toxin production and spore formation) and conditions required for survival and growth of each, including growth rates, transmission routes, likely carriers and threshold levels
- sources of information on acceptable (and legal) levels of biological, chemical and physical contamination
- food supply chains and potential of a breakdown in control at one point to impact other parts of the chain
- survival and growth requirements of biological food safety hazards
- common allergenic substances as described by the Food Standards Code (and may be additionally defined by system owners)
- common control methods necessary to eliminate or reduce the risk of food-borne illness to acceptable levels for each common pathogen, including the role of food storage, temperature control, preservation and process methods, traceability, product shelf-life, cleaning and sanitation, and pest control
- methods to detect and minimise the risk of food contamination by personal carriers, including convalescent and symptomless carriers, and related minimum legal illness reporting requirements and personal hygiene procedures
- the role of microbiological sampling, swabbing and testing in assessing the presence of biological contamination
- methods to determine the appropriateness and effectiveness of control measures and critical limits, including identifying the effect of control measures on the

REQUIRED SKILLS AND KNOWLEDGE

identified food safety hazard, method and feasibility of monitoring, the relationship to other control measures, and the severity of consequences and required corrective action in the event of failure of control

- types and causes of acute and chronic chemical food borne illness
- the food safety and legal impact of chemical contamination, including residual agricultural and environmental chemicals, residual industrial (including cleaning) chemicals, and chemical contamination as a result of packaging methods and materials
- physical hazards that pose a food safety risk
- common control methods to eliminate or reduce the risk of chemical or physical food-borne illness to acceptable levels for each common form of chemical and physical food safety hazard, including:
 - chemicals that pose a food safety risk
 - common food allergens
 - physical hazards
- the role and requirements of prerequisite programs and procedures to eliminate, prevent or reduce biological, chemical and physical food safety hazards to acceptable levels

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to establish or validate specific control measures in a food safety program based on demonstration of the identification, evaluation and control of food safety hazards.</p> <p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • select a food supply chain and identify: <ul style="list-style-type: none"> • known biological food safety hazards that could occur across the chain and could present a risk in food at the point of consumption • likely patterns of growth and transmission from source of contamination to onset of consumer symptoms for pathogens likely to occur in the supply chain, including threshold levels • sources of chemical and physical contamination that could present a food safety risk at the time of food consumption, across the chain • impact and indicators of the presence of biological or chemical food safety hazards throughout the food chain • acceptable levels of contamination. These may be established by reference to relevant legislation and/or reference to system requirements • select one stage in the food supply chain (which must be a medium or high risk business or process) and establish or validate control measures and verification records and procedures.
<p>Context of and specific resources for assessment</p>	<p>Assessment may occur in a real or simulated food business context where the simulated context provides access to food safety programs for a multi-staged food supply chain which includes the point of delivery to the</p>

EVIDENCE GUIDE	
	<p>consumer.</p> <p>The selected supply chain must include at least one medium or high risk business and/or process and provide opportunity to apply a depth and breadth of food safety knowledge.</p>
Method of assessment	<p>The following assessment methods should be considered to gather sufficient and valid evidence of competency:</p> <ul style="list-style-type: none"> • observation and documentation showing the identification of critical aspects of a food chain • questioning to test the level and application of knowledge • workplace example or scenario to produce validated control measures and verification records and procedures for food safety hazards.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Licensing/certification requirements

Licensing and registration arrangements are determined by system owners

Food safety hazards

A food safety hazard is a biological, chemical, or physical agent in, or condition of, food with the potential to cause an adverse health effect in humans (defined in 'Hazard Analysis and Critical Control Point System and Guidelines for its Application', Codex Alimentarius Commission)

Biological food safety hazards

Common biological food safety hazards include but are not limited to:

- Salmonella spp
- Campylobacter jejuni
- Bacillus cereus
- Clostridium perfringens
- Clostridium botulinum
- Cryptosporidium
- Pathogenic escherichia coli
- Giardia
- Listeria monocytogenes
- Shigella spp
- Staphylococcus aureus
- Vibrio parahaemolyticus
- Yersinia enterocolitica
- Hepatitis A virus
- Norwalk virus

Classifications by type of micro-organism include:

- bacteria
- viruses
- moulds/fungi
- parasites

RANGE STATEMENT	
	<ul style="list-style-type: none"> algae
Chemical food safety hazards	<p>Common origins of chemical contamination may include:</p> <ul style="list-style-type: none"> cleaning chemicals pesticides veterinary residues chemical additives allergenic substances toxic metals nitrites, nitrates and N-nitroso compounds polychlorinated biphenyls (PCBs) plasticizers and packaging migration phytotoxins zootoxins
Physical food safety hazards	<p>Physical food safety hazards refer to objects not normally found in food which may cause illness or injury to the consumer</p>
Acceptable levels	<p>Acceptable levels define the level of a particular hazard in the end product that is acceptable to ensure food safety. Acceptable levels are typically defined by:</p> <ul style="list-style-type: none"> the Food Standards Code commonwealth, state or territory legislation or codes industry codes of practice international protocols (CODEX Alimentarius) customer food safety requirements (including intended use)
Prerequisite programs	<p>Prerequisite programs are also referred to as support programs, such as Good Manufacturing Practice (GMP), Good Agricultural Practice (GAP) and Good Hygiene Practice (GHP).</p> <p>Prerequisite programs can be divided into two categories.</p> <p>Infrastructure and maintenance programs. These may include:</p> <ul style="list-style-type: none"> layout, design and construction of buildings and facilities

RANGE STATEMENT	
	<ul style="list-style-type: none"> • supplies of air, water, energy and other utilities • equipment, including preventative maintenance, sanitary design and accessibility for maintenance and cleaning • support services, including waste and sewage disposal <p>Operational prerequisite programs. These may include:</p> <ul style="list-style-type: none"> • personal hygiene • cleaning and sanitation • pest control • measures for the prevention of cross-contamination • packaging and labelling procedures • supplier assurance • chemical storage • employee training • maintenance • calibration • document control • internal audit programs • traceability and recall programs • on-farm food safety schemes • inspecting and testing regimes, including analytical and microbiological testing
Critical control point	Critical control point is a step at which control can be applied and is essential to prevent or eliminate a food safety hazard or reduce it to an acceptable level
Critical limit	Critical limit refers to criterion which separates acceptability from unacceptability
Food supply chain	Food supply chain refers to a sequence of stages and operations involved in the production, processing, distribution and handling of food from primary production to consumption
Growth requirements	<p>Factors which influence the growth of pathogenic micro-organisms may include:</p> <ul style="list-style-type: none"> • temperature

RANGE STATEMENT	
	<ul style="list-style-type: none"> • water activity • gases • pH • time • moisture • nutrients
Validation	Validation refers to obtaining evidence to confirm that a HACCP-based food safety program is complete and effective and will deliver the expected food safety outcomes
Validation evidence	<p>Validation evidence confirms that control measures are capable of being consistently effective and may include the application of:</p> <ul style="list-style-type: none"> • existing Australian legislative requirements • challenge tests • peer reviewed scientific papers • targeted scientific reports • validation already carried out in other jurisdictions and recognised by the responsible authority • mathematical modelling (e.g. predictive microbiology models) • industry codes of practice (where implementation by food business is verified during audits)

Co-requisite units

Co-requisite units		

FDFAU4005A Audit bivalve mollusc growing and harvesting processes

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit of competency covers the skills and knowledge to support a food safety audit of food safety programs of bivalve mollusc producers.</p> <p>The unit covers on-shore and wild growing, harvesting, cleaning, post-harvest handling and storage, stock movement, depuration (where applicable) and wet storage.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>This unit applies to the role of a food safety auditor responsible for auditing a bivalve mollusc growing and harvesting process. These audits would typically occur within the context of auditing a HACCP-based food safety program that defines related prerequisite program requirements. The audits are supported by state and territory government regulations for prescribing processes and requirements relating to the production of bivalve molluscs.</p> <p>This unit does not cover the skills and knowledge to audit the classification of growing areas.</p> <p>This unit supports relevant legislation, such as food standards contained in the Food Standards Code and industry codes of practice relating to validation and verification of a HACCP-based food safety program, and should be read in conjunction with these documents.</p> <p>Both regulatory and commercial audit system owners may specify additional certification requirements of auditors eligible to audit food safety programs within their system.</p>
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		
	FDFAU4002A	Communicate and negotiate to conduct food safety audits
	FDFAU4003A	Conduct food safety audits

Employability Skills Information

Employability skills	
	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Identify and assess food safety hazards and related control options for growing and harvesting bivalve molluscs</p>	<p>1.1. Microbiological food safety hazards that could present a risk in bivalve molluscs at the point of consumption are identified by type and origin and assessed to determine risk level and control requirements</p> <p>1.2. Chemical food safety hazards that could present a risk in bivalve molluscs at the point of consumption, including toxin presence, are identified by type and assessed to determine risk level and control requirements</p> <p>1.3. Control requirements and methods to ensure that bivalve molluscs meet food safety objectives are identified</p>
<p>2. Confirm that appropriate evidence supports validation of growing and harvesting bivalve molluscs</p>	<p>2.1. Validation evidence and records are reviewed to confirm that an appropriate level of validation has been applied</p> <p>2.2. Evidence used by the business to validate the process is identified and assessed to confirm that it is credible and adequate to meet the food safety objective</p>
<p>3. Verify bivalve mollusc growing and harvesting processes</p>	<p>3.1. System records required to support verification against relevant shellfish quality programs are identified, collected and reviewed</p> <p>3.2. Business documentation is reviewed and inspections are conducted to confirm that facilities and equipment design and components comply with regulatory and business standards</p> <p>3.3. Business documentation is reviewed and inspections are conducted to confirm that operational monitoring and testing procedures and frequency meet regulatory requirements, and industry and business standards</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to

- interpret and apply relevant legislation, codes of practice and technical standards relating to growing and harvesting bivalve molluscs
- identify microbiological and chemical food safety hazards to be controlled by bivalve mollusc growing and harvesting practices and processes
- inspect facilities and equipment to confirm that regulatory, industry and business standards are met
- review evidence used to validate the food safety control process
- review workplace records and other documentation to verify that the food safety program relating to the production of bivalve molluscs meets regulatory requirements and is effectively implemented

Required knowledge

Knowledge of:

- regulations, codes of practice, guidelines and Australian standards relating to production of bivalve molluscs and related role of government in overseeing implementation of shellfish quality programs
- basic biology and physiology of bivalve molluscs and related sources of food safety risk
- pathogens that can occur in bivalve molluscs and related survival and growth characteristics and control methods
- chemicals that pose a food safety risk in bivalve molluscs
- sources of environmental contamination that can present a food safety risk in the growing and harvesting of bivalve molluscs and related food safety controls, including risks associated with both on-shore and wild fisheries
- sources of information on acceptable and legal product quality requirements, including legal limits to ensure product safety
- classifications applying to harvesting areas, system for monitoring and determining status, sources of advice on classification and methods of communicating classification information
- sources of pre- and post-harvest contamination and related control requirements
- risks and related control methods to prevent cross-contamination, including sorting and cleaning
- prerequisite programs required to support bivalve mollusc growing and harvesting
- basic principles of water sampling and test methods
- principles and associated control measures relating to effective purging of shellfish, including methods, such as relaying and depuration, when practised in accordance

REQUIRED SKILLS AND KNOWLEDGE

- with state and territory legal and regulatory requirements
- risks associated with depuration and wet storage methods, and related control methods and prerequisite programs that meet legal requirements
- sources of pre- and post-harvest contamination, such as sewage, algal biotoxins and vibrio organisms and related control requirements
- stock handling and storage risks and control methods
- facilities and equipment used in the growing and harvesting of bivalve molluscs, including features required to meet regulatory requirements

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competence in this unit must be able to provide evidence that they can verify that food safety programs covering growing and harvesting bivalve molluscs meet regulatory, industry and business standards.</p> <p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> participate in audits of HACCP-based food safety programs to demonstrate ability and knowledge of technical aspects of growing and harvesting bivalve molluscs. Audit scenarios must include at least one audit involving relaying, depuration or wet storage.
<p>Context of and specific resources for assessment</p>	<p>Competency is to be assessed in an environment where bivalve molluscs are grown and harvested.</p> <p>Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints.</p> <p>The following resources must be available:</p> <ul style="list-style-type: none"> food safety programs covering bivalve mollusc growing and harvesting processes food safety related documentation typical of commercial growing and harvesting businesses and used for the purpose of verification plant and equipment that would typically be used in a commercial bivalve mollusc growing and harvesting business.
<p>Method of assessment</p>	<p>This unit only covers the technical skills and knowledge related to the specific area of risk. Generic food safety auditing skills and knowledge are covered in prerequisite units. While participation in audit processes should follow good auditing practice as specified by prerequisite units, formal assessment of generic food safety auditing</p>

EVIDENCE GUIDE

	<p>competence does not need to be repeated when assessing this unit.</p> <p>The following assessment methods should be considered to gather sufficient and valid evidence of competence:</p> <ul style="list-style-type: none"> • observation and a report covering the audits specified in this • oral and written questioning to test the level and application of underpinning knowledge • workplace example or scenario to allow verification of records for food safety to be demonstrated. <p>Audits conducted for the purpose of assessment must be witnessed by an auditor competent to audit bivalve growing and harvesting processes.</p> <p>The audits conducted for the purpose of assessment must be witnessed by an auditor competent to audit bivalve mollusc growing and harvesting processes.</p> <p>Assessment methods must satisfy the endorsed Assessment Guidelines of the FDF10 Food Processing Industry Training Package.</p>
<p>Guidance information for assessment</p>	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Microbiological food safety hazards	Microbiological food safety hazards may include: <ul style="list-style-type: none"> • Hepatitis A virus • Norwalk virus • <i>Vibrio parahaemolyticus</i> • <i>V. vulnificus</i> • <i>Salmonella spp</i> • pathogenic <i>Escherichia coli</i>
Bivalve molluscs	Bivalve molluscs may include: <ul style="list-style-type: none"> • oysters (Pacific, Sydney rock, Angassi (native) and pearl) • mussels • pipis • clams (strawberry and razor) • cockles (sand, dog, blood and mud) • scallops and other adductor bivalves, including pearl oyster meat (unless adductor muscle only)
Chemical food safety hazards	Chemical food safety hazards may include common origins of chemical contamination, including: <ul style="list-style-type: none"> • phycotoxins: harmful algal blooms, such as amnesic shellfish poisoning (ASP), neurotoxic shellfish poisoning (NSP), diarrhetic shellfish poisoning (DSP) and paralytic shellfish poisoning (PSP) • pesticides • water additives • toxic metals • polychlorinated biphenyls (PCBs)
Validation	Validation refers to obtaining evidence to confirm that a HACCP-based food safety program is complete and effective and will deliver the

RANGE STATEMENT	
	expected food safety outcomes
Validation evidence	<p>Validation evidence confirms that control measures are capable of being consistently effective and may include the application of:</p> <ul style="list-style-type: none"> • existing Australian legislative requirements • challenge tests • peer reviewed scientific papers • targeted scientific reports • validation already carried out in other jurisdictions and recognised by the responsible authority • mathematical modelling (e.g. predictive microbiology models) • industry codes of practice (where implementation by food business is verified during audits)
Verification	<p>Verification refers to methods and procedures used to carry out monitoring, including sampling and testing to provide evidence that the specifications set by relevant legislation and codes of practice continue to be met</p>
Shellfish quality programs	<p>Australian shellfish quality assurance programs administered by state and territory shellfish control authorities</p>
Business standards	<p>Business standards refer to standards or technical specifications set by the system owner based on and in addition to regulatory requirements that relate specifically to food safety</p>
Relevant legislation, codes of practice and technical standards	<p>Relevant legislation, codes of practice and technical standards relating to bivalve molluscs may include:</p> <ul style="list-style-type: none"> • Food Standards Code 4.2.1: Primary Production and Processing Standards for Seafood (Australia only), FSANZ • Australian Shellfish Quality Assurance Program: Operations Manual, May 2005 • AQIS Australian Shellfish Quality Assurance Program, Export Standards, 2004 • state and territory regulations, codes of

RANGE STATEMENT	
	practice and guidelines
Role of government in overseeing implementation of shellfish quality programs	<p>Role of government in overseeing implementation of shellfish quality programs:</p> <ul style="list-style-type: none"> responsibility and capacity to control food safety hazards is shared by the state and territory governments through the relevant state and territory authority responsible for managing harvesting areas and by the farmer who is responsible for managing the harvest and post-harvest handling and storage

Co-requisite units

Co-requisite units		

FDFAU4006A Audit a cook chill process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to support a food safety audit of food safety programs that include extended life cook chill processes.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies to the role of a food safety auditor responsible for auditing extended and short shelf-life cook chill processes. Audit processes would typically occur within the context of auditing a HACCP-based food safety program that defines related prerequisite program requirements.</p> <p>This unit applies to cook chill products which are minimally heat-processed foods distributed as chilled products with defined shelf-life. It supports relevant legislation, such as food standards contained in the Food Standards Code and industry codes of practice relating to the validation and verification of a HACCP-based food safety program, and should be read in conjunction with these documents.</p> <p>Both regulatory and commercial audit system owners may specify additional certification requirements of auditors eligible to audit food safety programs within their system.</p>
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		
	FDFAU4002A	Communicate and negotiate to conduct food safety audits
	FDFAU4003A	Conduct food safety audits
	FDFAU4004A	Identify, evaluate and control food safety hazards

Employability Skills Information

Employability skills	
	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Identify and assess food safety hazards and related control options for cook chill processes</p>	<p>1.1. Microbiological food safety hazards that could present a risk in cook chill products at the point of consumption are identified by type, origin and food association and assessed to determine the significance of the hazard</p> <p>1.2. Chemical food safety hazards that could present a risk in cook chill products at the point of consumption, including toxin presence, are identified by type and food association and assessed to determine risk level and control requirements</p> <p>1.3. Physical food safety hazards that could present a risk in the food at the point of consumption are identified and assessed to determine risk level and control requirements</p> <p>1.4. Cook chill process control requirements and methods are identified to ensure that finished, cook chill products meet food safety objectives</p>
<p>2. Confirm that appropriate evidence supports validation of the cook chill process</p>	<p>2.1. Validation evidence and records are reviewed to confirm that appropriate level of validation has occurred</p> <p>2.2. Evidence used by the business to validate the process is identified and assessed to confirm that it is credible and adequate to achieve the food safety objective</p>
<p>3. Verify the food safety program for a cook chill process</p>	<p>3.1. System records required to support verification are identified, collected and reviewed</p> <p>3.2. Business documentation is reviewed and inspections are conducted to confirm that facilities and equipment design and components comply with regulatory and business standards</p> <p>3.3. Business documentation is reviewed and inspections are conducted to confirm that operational monitoring and testing procedures and frequency meet regulatory requirements, and industry and business standards</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- interpret and apply relevant legislation, standards, codes of practice and technical specifications relating to heat treatment of foods in a cook chill process
- identify target micro-organisms to be controlled by a cook chill process according to food type and cold chain capacity
- inspect extended and short shelf-life cook chill plant and equipment to confirm that regulatory, industry and business standards are met
- apply principles of heat treatment and chilling to assess suitability of extended and short shelf-life cook chill processes to ensure food safety objectives are achieved
- review workplace records, including results of process monitoring and documentation of corrective actions to verify that the food safety program relating to cook chill processes is being implemented according to the prescribed process
- review evidence used to validate the food safety control process
- confirm methods and evidence used to test the reliability of cook chill processes

Required knowledge

Knowledge of:

- regulations, codes of practice, guidelines, technical standards and Australian standards relating to all forms of cook chill processing of foods
- target organisms that can occur in extended and short shelf-life cook chill foods, their survival and growth characteristics and related control methods
- principles of heat treatment and chilling as they apply to extended and short shelf-life cook chill processing methods and product types
- criteria used to specify heat treatment, cooling, storage and shelf-life parameters for extended and short shelf-life cook chill products
- factors that impact on heat and chilling processes meeting food safety objective
- prerequisite programs required to support effectiveness of cook chill processes
- operational principles of commercial extended and short shelf-life cook chill equipment, including equipment features required to meet regulatory requirements and critical factors to be controlled to ensure delivery of heating and chilling processes that meet food safety objective
- features of the environment in which cook chill foods are distributed, including risk factors
- foods and preparation methods that present a particular risk to vulnerable populations, including cross-contamination risks associated with multi-tasking and cold chain maintaining temperatures during storage, transport and distribution
- principles of packaging to form a suitable seal and impact of processing parameters

REQUIRED SKILLS AND KNOWLEDGE

- and conditions on packaging integrity
- effect of characteristics and pre-processing of raw materials and post-process packaging on the stability and safety of the product
- labelling requirements for extended and short shelf-life cook chill products
- food safety risks and controls to avoid post-process contamination of heat-treated product
- principles of test methods and frequency to confirm the effectiveness of cook chill processes and meet regulatory, industry and business standards

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competence in this unit must be able to provide evidence that they can verify cook chill processes for a range of foods to meet regulatory, industry and business standards. They must also demonstrate capacity to confirm that appropriate validation has occurred.</p> <p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • identify target organisms for a range of foods • determine capacity of distribution chain to control temperature parameters • determine requirements of specific extended and short shelf-life cook chill methods for a range of products • participate in audits of HACCP-based food safety programs to demonstrate ability and knowledge of technical aspects of extended and short shelf-life cook chill processes - audit scenarios must include: <ul style="list-style-type: none"> • a five-day cook chill process • a kettle or cook tank cook chill process • a sous vide cook chill process. <p>For given scenarios where prescribed cook chill processing requirements are not met, assess adequacy of evidence used to determine response procedures.</p>
<p>Context of and specific resources for assessment</p>	<p>Competency may be assessed in an actual workplace or simulated environment that provides access to the required resources.</p> <p>Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints.</p> <p>The following resources should be made available:</p>

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • food safety programs covering extended and short shelf-life cook chill processes • food safety-related documentation typical of commercial businesses producing extended and short shelf-life cook chill products and used for the purpose of verification • evidence or documentation relevant to extended and short shelf-life cook chill processes that would typically be used by commercial businesses producing extended and short shelf-life cook chill products to support validation processes • plant and equipment that would typically be used by commercial businesses producing extended and short shelf-life cook chill products.
Method of assessment	<p>This unit only covers the technical skills and knowledge related to the specific area of risk. Generic food safety auditing skills and knowledge are covered in prerequisite units. While participation in audit processes should follow good auditing practice as specified by prerequisite units, formal assessment of generic food safety auditing competence does not need to be repeated when assessing this unit.</p> <p>The following assessment methods should be considered to gather sufficient and valid evidence of competency:</p> <ul style="list-style-type: none"> • observation and a report covering the audits specified in this • oral and written questioning to test the level and application of knowledge relevant to identifying target organisms for a range of foods, determining capacity of distribution chain to control temperature parameters and determining requirements of specific extended and short shelf-life cook chill methods for a range of products • workplace example or scenario to allow verification of records for food safety to be demonstrated. <p>Audits conducted for the purpose of assessment must be witnessed by an auditor competent to audit extended and short shelf-life cook chill processes.</p>
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where</p>

EVIDENCE GUIDE

possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Cook chill products

Cook chill products may include:

- long shelf-life refrigerated foods
- short shelf-life refrigerated foods
- heat-treated refrigerated foods (HTRF) packed for extended shelf-life
- refrigerated processed foods of extended durability (REPFED)
- sous vide foods

Physical food safety hazards

Physical food safety hazards include an understanding of physical standards that may present particular risks to vulnerable populations either due to the nature of the food, the preparation method and/or the preparation environment

Validation

Validation refers to obtaining evidence to confirm that a HACCP-based food safety program is complete and effective and will deliver the expected food safety outcomes

Validation evidence

Validation evidence confirms that control measures are capable of being consistently effective and may include the application of:

- existing Australian legislative requirements
- challenge tests
- peer reviewed scientific papers
- targeted scientific reports
- validation already carried out in other jurisdictions and recognised by the responsible authority
- mathematical modelling (e.g. predictive microbiology models)
- industry codes of practice (where implementation by food business is verified)

RANGE STATEMENT	
	during audits)
Verification	Verification refers to methods and procedures used to carry out monitoring, including sampling and testing to provide evidence that the specifications set by relevant legislation and codes of practice continue to be met
Equipment	Equipment includes: <ul style="list-style-type: none"> • cook tanks • self-stirring kettles • combi ovens • re-thermalisation cabinets • brat pans • blast chillers • water baths • pump-fill station
Business standards	Business standards refer to standards or technical specifications set by the system owner based on and in addition to regulatory requirements that relate specifically to food safety
Test methods	Test methods include: <ul style="list-style-type: none"> • conducting studies of process evaluation • conducting studies of equipment performance
Relevant legislation, standards, codes of practice and technical specifications	Relevant legislation, standards, codes of practice and technical specifications relating to retort requirements may include: <ul style="list-style-type: none"> • relevant sections of the Australia New Zealand Food Standards Code • Australia Cook Chill Council, Guidelines for Chilled Food Production Systems Including Food Safety Programs, 2000 • Validation and Verification of Heat Treatment Equipment and Processes (ANZDAC - draft) • international protocols such as those of CODEX Alimentarius Commission • AQIS Code of Hygienic Practice for Heat-treated Refrigerated Foods Packaged for Extended Shelf Life, 1992 • state and territory regulations, codes of practice and guidelines

RANGE STATEMENT	
Target organisms	<p>Target organisms are dependent on the food and cold chain capacity and include:</p> <ul style="list-style-type: none"> • <i>Listeria monocytogenes</i> • <i>Clostridium botulinum</i> • <i>Bacillus cereus</i> • <i>Salmonella</i> • <i>Yersinia enterocolitica</i>
Prerequisite programs	<p>Prerequisite programs are also referred to as support programs, such as Good Manufacturing Practice (GMP), Good Agricultural Practice (GAP) and Good Hygienic Practice (GHP).</p> <p>Prerequisite programs can be divided into two categories:</p> <p>Infrastructure and maintenance programs. These may include:</p> <ul style="list-style-type: none"> • layout, design, construction and amenities of buildings and facilities • supplies of air, water, energy and other utilities • equipment, including sanitary design, preventative maintenance, calibration and cleaning and sanitation • support services, including waste and sewage disposal • pest control <p>Operational prerequisite programs. These may include:</p> <ul style="list-style-type: none"> • personal hygiene • measures for the prevention of cross-contamination • packaging and labelling procedures • supplier assurance • chemical storage • employee training • document control • internal audit programs • traceability programs • product integrity and security • cold chain management • inspecting and testing regimes, including analytical and microbiological testing

RANGE STATEMENT	
	<ul style="list-style-type: none"> control of non-conforming product, including product recall programs
Vulnerable populations	<p>Vulnerable populations are defined by the sensitivity of a population. Examples of sectors serving food to vulnerable populations include:</p> <ul style="list-style-type: none"> hospitals aged care facilities childcare centres organisations delivering to housebound people
Packaging methods	<p>Packaging methods include:</p> <ul style="list-style-type: none"> controlled atmosphere (CA) packaging modified atmosphere (MA) packaging vacuum packing
Additional reference material	<p>Additional reference material includes:</p> <ul style="list-style-type: none"> Food Standards Australia New Zealand, Safe Food Australia - A Guide to the Food Safety Standards, Australian Government Printing Service, Canberra Campden & Chorleywood Food Research Association Publications

Co-requisite units		

FDFAU4007B Audit a heat treatment process

Modification History

This unit supersedes and is equivalent to FDFAU4007A Audit a heat treatment process. November 2011: update to Evidence Guide.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to support a food safety audit that includes heat treatment processes designed to bring about a defined logarithmic reduction of the target organism to ensure safe food. This may include pasteurised product with a nominated refrigerated shelf life and commercially sterile, shelf-stable product.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies to the role of a food safety auditor responsible for auditing heat treatment processes. Audit processes would typically occur within the context of auditing a HACCP-based food safety program that defines related prerequisite program requirements. This unit applies to auditing aspects of the process that directly relate to delivering the prescribed heat treatment. It covers related factors, such as raw materials receipt, pre- and post-process storage and packaging methods and materials only to the extent that impact on or are controlled by the heat treatment process.</p> <p>It supports relevant legislation such as food standards contained in the Food Standards Code and industry codes of practice relating to the validation and verification of a HACCP-based food safety program, and should be read in conjunction with these documents.</p> <p>Both regulatory and commercial audit system owners may specify additional certification requirements of auditors eligible to audit food safety programs within their system.</p> <p>Where an auditor is responsible for auditing heat treatment as part of a cook chill process, they will also need to achieve competence in FDFAU4006A Audit a cook chill process.</p>
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Identify and assess food safety hazards and related control options for heat treatment processes</p>	<p>1.1. Microbiological food safety hazards that could present a risk in the food at the point of consumption are identified by type, origin and food association level and assessed to determine the significance of the hazard</p> <p>1.2. Heat treatment processes, control requirements and methods are identified to ensure that finished, heat-treated products meet food safety objectives</p>
<p>2. Confirm that appropriate evidence supports validation of the heat treatment process</p>	<p>2.1. Validation evidence and records are reviewed to confirm that an appropriate level of validation has been applied</p> <p>2.2. Evidence used by the business to validate the process is identified and assessed to confirm that it is credible and adequate to achieve the food safety objective</p>
<p>3. Confirm verification of the food safety program for a heat treatment process</p>	<p>3.1. System records required to support verification are identified, collected and reviewed</p> <p>3.2. Business documentation is reviewed and inspections are conducted to confirm that facilities and equipment design and components comply with regulatory and business standards</p> <p>3.3. Business documentation is reviewed and inspections are conducted to confirm that operational monitoring and testing procedures and frequency meet regulatory requirements, and industry and business standards</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- interpret and apply relevant legislation, standards, codes of practice and technical specifications relating to heat treatment of foods
- identify microbiological food safety hazards that can occur in heat-treated food products
- inspect heat treatment plant and equipment to confirm that regulatory, industry and business standards are met
- apply principles of heat treatment to assess the suitability of thermal processes and related packaging and storage to achieve the food safety objective and minimise the risk of post-processing contamination
- review workplace records and other documentation to verify that the food safety program relating to heat treatment and related processes is being implemented according to the prescribed process
- review evidence used by the business to validate the food safety control process
- confirm methods and evidence used to evaluate the capacity of equipment, processing method and packaging form to deliver heat distribution and heat penetration requirements

Required knowledge

Knowledge of:

- regulations, codes of practice, guidelines, technical specifications and where appropriate, specific product heat treatment requirements and Australian standards relating to heat treatment of foods
- target organisms that can occur in heat-treated foods and related survival and growth characteristics
- principles of heat treatment and application of heat-processing methods to product types
- criteria used to specify and evaluate heat treatment for each heat processing method
- factors that impact on heat distribution and heat penetration according to heat-processing method
- principles of operation of commercial heat-processing equipment, including equipment features required to meet regulatory requirements and critical factors to be controlled to ensure delivery of prescribed heat treatment and related processes
- procedural safeguards used to track processing of product
- principles of packaging to form a suitable seal and impact of packaging system and heat treatment methods and equipment on process effectiveness and packaging integrity

REQUIRED SKILLS AND KNOWLEDGE

- characteristics of raw materials and pre-processing requirements that impact on the microbiological profile and need to be considered in determining the thermal process
- post-processing packaging and handling that impact on the ability to maintain the food safety objective following thermal processing, and related prerequisite programs required to support effectiveness of heat treatment processes
- food safety risks and controls to avoid post-process contamination of heat-treated product
- principles of sampling requirements and test methods to confirm equipment integrity, effectiveness of heat treatment, packaging system and seal integrity and post-processing conditions to meet regulatory, industry and business standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence that they can verify food safety programs involving heat treatment processes to meet regulatory, industry and business standards. They must also demonstrate capacity to confirm that appropriate validation has occurred.</p> <p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed.</p> <p>Competency in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Assessment must confirm that the candidate can:</p> <ul style="list-style-type: none"> • identify product-specific risks and typical processing methods for a range of products, including sources of information on heat treatment requirements • participate in audits of HACCP-based food safety programs to demonstrate ability and knowledge of technical aspects of heat treatment processes. <p>Assessment must include the demonstration of appropriate methods, including the use of time temperature indicators (TTIs) to measure the effectiveness of a range of heat treatment. Related processes, such as evaluation of raw materials, sterilisation of packaging and equipment (relevant to aseptic systems) and post-process handling, will be considered where they directly impact on the effectiveness of heat treatment.</p> <p>Assessment requires participation in at least two audits of different heat treatment processes. For given scenarios where prescribed processing requirements are not met, assess adequacy of evidence used to determine response procedures.</p>
<p>Context of and specific resources for assessment</p>	<p>Competency may be assessed in an actual workplace or simulated environment that provides access to the required resources. At least one of the audit scenarios should be assessed in an actual workplace context.</p> <p>Assessment is to occur under standard and authorised work practices, safety requirements and environmental</p>

EVIDENCE GUIDE	
	<p>constraints.</p> <p>The following resources must be available:</p> <ul style="list-style-type: none"> • food safety plans covering heat treatment processes • food safety-related documentation typical of commercial manufacturing businesses and used for the purpose of verification • evidence and documentation relevant to heat treatment processes that would typically be used by commercial manufacturing businesses to support validation processes • plant and equipment that would typically be used in a commercial manufacturing business.
Method of assessment	<p>This unit only covers the technical skills and knowledge related to the specific area of risk. Generic food safety auditing skills and knowledge are covered in prerequisite units. While participation in audit processes should follow good auditing practice as specified by prerequisite units, formal assessment of generic food safety auditing competence does not need to be repeated when assessing this unit.</p> <p>The following assessment methods should be considered to gather sufficient and valid evidence of competency:</p> <ul style="list-style-type: none"> • observation and a report covering the audits specified in this Evidence Guide • oral and written questioning to test the level and application of underpinning knowledge • demonstration of appropriate methods, including the use of time temperature indicators (TTIs) to measure the effectiveness of a range of heat treatment. <p>The audits conducted for the purpose of assessment must be witnessed by an auditor competent to audit a heat treatment process.</p> <p>Assessment methods must satisfy the endorsed Assessment Guidelines of FDF10 Food Processing Industry Training Package.</p>
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Heat treatment processes	<p>Heat treatment processes may include:</p> <ul style="list-style-type: none"> • retorting systems • pasteurisation systems • aseptic processing and packaging systems • hot fill systems
Validation	<p>Validation refers to obtaining evidence to confirm that a HACCP-based food safety program is complete and effective and will deliver the expected food safety outcomes</p>
Validation evidence	<p>Validation evidence confirms that control measures are capable of being consistently effective and may include the application of:</p> <ul style="list-style-type: none"> • existing Australian legislative requirements • challenge tests • peer reviewed scientific papers • targeted scientific reports • validation already carried out in other jurisdictions and recognised by the responsible authority • mathematical modelling (e.g. predictive microbiology models) • industry codes of practice (where implementation by food business is verified during audits)
Verification	<p>Verification refers to methods and procedures used to carry out monitoring, including sampling and testing to provide evidence that the specifications set by relevant legislation and codes of practice continue to be met</p>
Business standards	<p>Business standards refer to standards or technical specifications set by the system owner based on</p>

RANGE STATEMENT	
	and in addition to regulatory requirements that relate specifically to food safety
Relevant legislation, standards, codes of practice and technical specifications	<p>Relevant legislation, standards, codes of practice and technical specifications relating to heat treatment requirements may include:</p> <ul style="list-style-type: none"> • relevant sections of the Australia New Zealand Food Standards Code • Validation and Verification of Heat Treatment Equipment and Processes (ANZDAC - draft) • international protocols, such as Codex Alimentarius Vol 1B - 1995 Section 2, Recommended International Code of Hygienic Practice for Low-acid and Acidified Low-acid Canned Foods, CAC/RCP, 23-1979, Rev 2 1993, App III • Australian Standard for Equipment for the Pasteurization of Milk and Other Liquid Dairy Products - Continuous-flow systems (AS 3993:2003) • AQIS Export Control (Milk and Milk Products) Orders, 2005 • code of practice for the manufacture of egg products • state and territory regulations, codes of practice and guidelines
Factors that affect heat distribution and heat penetration	<p>Factors that affect heat distribution and heat penetration may include:</p> <ul style="list-style-type: none"> • raw material characteristics, such as: <ul style="list-style-type: none"> • rheology and density • particulates and position within container • pH • heat treatment method and related equipment (process holding times and temperatures) • heating systems • packaging design
Commercial heat processing equipment	<p>Commercial heat processing equipment may include:</p> <ul style="list-style-type: none"> • pre-processing equipment • methods to achieve sterilisation of plant and packaging material (for aseptic systems)

RANGE STATEMENT	
	<ul style="list-style-type: none"> • filling equipment • heat treatment systems using both direct and indirect heating methods • packaging systems
Packaging	<p>Packaging may include:</p> <ul style="list-style-type: none"> • cans • glass containers • aluminium and plastic semi-rigid and flexible containers • bags • composite packaging • bulk packaging
Product sealing processes	<p>Product sealing processes may include hermetic sealing in processes, such as canning, or sealing pasteurised products in cartons and other sealed containers</p>
Prerequisite programs	<p>Prerequisite programs are also referred to as support programs, such as Good Manufacturing Practice (GMP), Good Agricultural Practice (GAP) and Good Hygienic Practice (GHP).</p> <p>Pre-requisite programs can be divided into two categories:</p> <p>Infrastructure and maintenance programs. These may include:</p> <ul style="list-style-type: none"> • layout, design, construction and amenities of buildings and facilities • supplies of air, water, energy and other utilities • equipment, including sanitary design, preventative maintenance, calibration and cleaning and sanitation • support services, including waste and sewage disposal • pest control <p>Operational prerequisite programs. 	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Identify and assess food safety hazards and control options for ready-to-eat meat manufacturing and related handling processes</p>	<p>1.1. Microbiological food safety hazards that could present a risk in ready-to-eat meat products at the point of consumption are identified by type, origin and food association and assessed to determine risk level and control requirements</p> <p>1.2. Chemical food safety hazards that could present a risk in ready-to-eat meat products at the point of consumption, including toxin presence, are identified by type, origin and food association and assessed to determine risk level and control requirements</p> <p>1.3. Physical food safety hazards that present a risk in food are identified and assessed to determine control requirements</p> <p>1.4. Control requirements and methods are identified to ensure that finished, ready-to-eat meat products meet food safety objectives</p>
<p>2. Confirm that appropriate evidence supports validation of the ready-to-eat meat manufacturing process</p>	<p>2.1. Validation evidence and records are reviewed to confirm that an appropriate level of validation has been applied</p> <p>2.2. Evidence used by the business to validate the process is identified and assessed to confirm that it is credible and adequate to meet the food safety objective</p>
<p>3. Verify the food safety program for a ready-to-eat meat manufacturing process</p>	<p>3.1. System records required to support verification are identified, collected and reviewed</p> <p>3.2. Business documentation is reviewed and inspections are conducted to confirm that facilities and equipment design and components comply with regulatory and business standards</p> <p>3.3. Business documentation is reviewed and inspections are conducted to confirm that operational monitoring and testing procedures and frequency meet regulatory requirements, and industry and business standards</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- interpret and apply relevant legislation, standards, codes of practice and technical specifications relating to the manufacture of ready-to-eat meat products
- identify microbiological, chemical and physical food safety hazards associated with the manufacture of ready-to-eat meat products
- inspect plant and equipment to confirm that regulatory, industry and business standards are met
- apply principles of ready-to-eat meat manufacturing to assess the suitability of processes to ensure a safe finished product
- review workplace records and other documentation to verify that the HACCP-based food safety program relating to the meat product being manufactured is being implemented effectively
- review evidence used to validate the food safety control process

Required knowledge

Knowledge of:

- regulations, codes of practice, guidelines, technical specifications and Australian standards relating to the formulation and manufacture of ready-to-eat meat products
- sources of information on acceptable processing and related storage and handling methods and parameters for given products and target micro-organisms
- pathogens that can occur in meat products and related control methods required in manufacturing, post-processing and storage
- survival and growth characteristics of pathogens and ability of processed product to support pathogen growth
- chemicals that pose a food safety risk in meat products and related control methods
- physical sources of contamination and related control methods
- effect of raw material characteristics, such as bacterial load and temperature, and pre-processing conditions on the growth of pathogens
- prerequisite programs required to support safe manufacture of ready-to-eat meat products
- purpose, role and storage requirements of ingredients
- principles of manufacturing methods and factors that affect processing requirements
- use and effectiveness of hurdle technologies
- principles of packaging to form a suitable seal and requirements of post-processing

REQUIRED SKILLS AND KNOWLEDGE

handling and conditions to ensure safe product
--

- | |
|--|
| <ul style="list-style-type: none">• principles of operation of ready-to-eat meat product manufacturing equipment, including equipment features required to meet regulatory requirements and critical factors to be controlled to ensure safe food outcomes• indications of unacceptable product and related test requirements• principles of test methods and frequency in monitoring condition of raw materials and processing, and in confirming that final product is fit for human consumption |
|--|

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competence in this unit must be able to audit manufacturing of ready-to-eat meat products.</p> <p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence that they can verify manufacturing processes for a range of ready-to-eat meat products to meet regulatory, industry and business standards. They must also demonstrate capacity to confirm that appropriate validation has occurred.</p> <p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • identify product-specific risks and typical processing methods, including sources of information on processing parameters, for a range of products • participate in audits of HACCP-based food safety programs to demonstrate ability and knowledge of technical aspects of the manufacture, storage and transport of safe ready-to-eat meat products - audit scenarios must include at least one product in each of the following product categories: <ul style="list-style-type: none"> • uncooked fermented meat products, such as salami • smoked or cooked meat products, such as ham • slowly cured meat, such as prosciutto • pâté. <p>Cold ready-to-eat meat products may also have undergone further processing stages including slicing, shaving and packaging.</p> <p>Audits of product type may be conducted concurrently or separately, according to production environment.</p>
<p>Context of and specific resources for</p>	<p>Competency may be assessed in an actual workplace or</p>

EVIDENCE GUIDE	
assessment	<p>simulated environment that provides access to the required resources.</p> <p>Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints.</p> <p>The following resources must be available:</p> <ul style="list-style-type: none"> • relevant plant and equipment that would typically be used in the commercial manufacture of ready-to-eat meat products • food safety programs and related documentation • records for the purpose of verification • evidence to support validation.
Method of assessment	<p>This unit only covers the technical skills and knowledge related to the specific area of risk. Generic food safety auditing skills and knowledge are covered in prerequisite units. While participation in audit processes should follow good auditing practice as specified by prerequisite units, formal assessment of generic food safety auditing competence does not need to be repeated when assessing this unit.</p> <p>The following assessment methods should be considered to gather sufficient and valid evidence of competency:</p> <ul style="list-style-type: none"> • observation and a report covering the audits specified in this • observation by an auditor competent to audit the manufacture of ready-to-eat meat • oral and written questioning to test the level and application of underpinning knowledge • workplace example or scenario to allow verification of records for food safety to be demonstrated. <p>The audits conducted for the purpose of assessment must be witnessed by an auditor competent to audit the manufacture of ready-to-eat meat.</p> <p>Assessment methods must satisfy the endorsed Assessment Guidelines of FDF10 Food Processing Industry Training Package.</p>
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where</p>

EVIDENCE GUIDE

possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Prerequisite programs

Prerequisite programs are also referred to as support programs, such as Good Manufacturing Practice (GMP), Good Agricultural Practice (GAP) and Good Hygienic Practice (GHP).

Prerequisite programs can be divided into two categories:

Infrastructure and maintenance programs.

These may include:

- layout, design and construction of buildings and facilities
- supplies of air, water, energy and other utilities
- equipment, including sanitary design, preventative maintenance, calibration and cleaning and sanitation
- support services, including waste and sewage disposal
- pest control

Operational prerequisite programs. These may include:

- personal hygiene
- measures for the prevention of cross-contamination
- packaging and labelling procedures
- supplier assurance
- chemical storage
- employee training
- document control
- internal audit programs
- traceability and recall programs
- product integrity and security
- cold chain management
- preparation, maintenance and use of starter cultures (for fermented meat products)

RANGE STATEMENT	
	<ul style="list-style-type: none"> • inspecting and testing regimes, including analytical and microbiological testing • control of non-conforming product, processes and facilities • animal welfare
Manufacturing and related handling and storage processes	<p>Manufacturing and related handling and storage processes to control food safety include:</p> <ul style="list-style-type: none"> • heat treatment • fermentation and maturation • use of starter cultures • drying • cold storage • salting and other water activity related controls (e.g. hot smoking) • chemical additives to control water activity, pH and/or preservation (e.g. glucono-delta-lactone (GdL) and liquid smoke)
Microbiological food safety hazards	<p>Microbiological food safety hazards that commonly occur in ready-to-eat meats include:</p> <ul style="list-style-type: none"> • bacteria: <ul style="list-style-type: none"> • <i>Campylobacter jejuni</i> (poultry) • pathogenic <i>Escherichia coli</i>, including enterohaemorrhagic <i>Escherichia coli</i> • <i>Clostridium perfringens</i> and <i>C. botulinum</i> • <i>Listeria monocytogenes</i> • <i>Salmonella</i> spp • <i>Staphylococcus aureus</i> • <i>Yersinia enterocolitica</i> • viruses • moulds and fungi • parasites • algae
Ready-to-eat meat products	<p>Ready-to-eat meat products refer to meat products intended to be consumed without further heating or cooking and include:</p> <ul style="list-style-type: none"> • cooked, heat-treated or uncooked fermented meat, including cooked fermented meats (CFM), uncooked comminuted fermented meat (UCFM) and other salami-type products

RANGE STATEMENT	
	<ul style="list-style-type: none"> • pÃ¢tÃ© • dried meat • slow cured meat • luncheon sausage meat, including processed and manufactured • cooked muscle meat, including ham and roast beef • other ready-to-eat meat that is susceptible to the growth of pathogens or the production of toxins
Chemical food safety hazards	<p>Chemical food safety hazards include:</p> <ul style="list-style-type: none"> • cleaning chemicals • pesticides • veterinary residues • chemical additives and levels • allergenic substances • toxic metals • nitrites, nitrates and N-nitroso compounds and levels • polychlorinated biphenyls (PCBs) • plasticisers and packaging migration
Physical food safety hazards	<p>Physical food safety hazards refer to objects not normally found in food that may cause illness or injury to the consumer, such as fragments of:</p> <ul style="list-style-type: none"> • bone • glass • metal • plastic • wood
Validation	<p>Validation refers to obtaining evidence to confirm that a HACCP-based food safety program is complete and effective and will deliver the expected food safety outcomes</p>
Validation evidence	<p>Validation evidence confirms that control measures are capable of being consistently effective and may include:</p> <p>the application of:</p> <ul style="list-style-type: none"> • existing Australian legislative requirements • challenge tests

RANGE STATEMENT	
	<ul style="list-style-type: none"> • peer-reviewed scientific papers • targeted scientific reports • validation already carried out in other jurisdictions and recognised by the responsible authority • mathematical modelling (e.g. predictive microbiology models) • industry codes of practice (where implementation by food business is verified during audits)
Verification	Verification refers to methods and procedures used to carry out monitoring, including sampling and testing to provide evidence that the specifications set by relevant legislation and codes of practice continue to be met
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • fermentation rooms • filling machines • drying and maturation rooms • mixers and blenders • tumblers • cookers • injectors • mincing machines and slicers or dice machines • conveyors • packaging machines • cooking utensils and knives • equipment used for the purpose of conducting analytical tests
Business standards	Business standards refer to standards or technical specifications set by the system owner based on and in addition to regulatory requirements that relate specifically to food safety
Relevant legislation, standards, codes of practice and technical specifications	<p>Relevant legislation, standards, codes of practice and technical specifications relating to requirements of ready-to-eat meat manufacture may include:</p> <ul style="list-style-type: none"> • relevant sections of the Australia New Zealand Food Standards Code • relevant Australian standards, including the

RANGE STATEMENT	
	<p>Australian Standard for the Hygienic Production and Transportation of Meat and Meat Products for Human Consumption (AS 4696:2002)</p> <ul style="list-style-type: none"> • Australia Export Control Act, 1982 • AQIS Export Control (Meat and Meat Products) Orders, 2005 • international protocols, such as those of the Codex Alimentarius Commission • customer food safety requirements, including intended use • state or territory regulations, codes of practice and guidelines
Hurdle technologies	Hurdle technologies refer to the application of a combination of different processing methods or techniques or treatments to achieve safe food outcomes
Test methods	<p>Test methods include methods used to measure:</p> <ul style="list-style-type: none"> • <i>E. coli</i>, <i>Salmonella</i>, coagulase positive staphylococci, <i>Listeria monocytogenes</i> in raw materials and final product • pH • time and temperature of: <ul style="list-style-type: none"> • fermentation • maturation or drying • smoking • cooking or heating • weight loss or water activity
Packaging	<p>Packaging refers to:</p> <ul style="list-style-type: none"> • controlled atmosphere (CA) packaging • modified atmosphere (MA) packaging
Ingredients	<p>Ingredients must comply with the requirements described in the Food Standards Code and may include:</p> <ul style="list-style-type: none"> • raw materials (meat) • starter cultures • preservatives (e.g. sodium chloride and sulphites) • water

RANGE STATEMENT	
	<ul style="list-style-type: none"> • sodium and potassium nitrate and/or nitrite • nitrate • spices • binders • water and ice • phosphates and other additives

Co-requisite units

Co-requisite units	

FDFBK2001A Operate a cooling and slicing process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to set up, operate, adjust and shut down a process to cool and slice cake. This unit applies to the cutting of cake following baking on a band or belt. It is not relevant for manual cutting of cake baked in a tin or pan.
------------------------	---

Application of the Unit

Application of the unit	<p>This unit has application in a cake production environment. It typically targets the production worker responsible for applying basic operating principles to the operation and monitoring of machines and equipment used to cool and slice cake.</p> <p>When batch or product changeover procedures are part of this work process, the procedures should be used to customise the application of this unit. Where more detailed changeovers are carried out, FDFOP2011A Conduct routine maintenance, should be considered.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Prepare the cooling and cutting equipment and process for operation</p>	<p>1.1. Baked cake is confirmed and available to meet production requirements</p> <p>1.2. Cleaning and maintenance requirements and status is identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Processing/operating parameters are selected as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
<p>2. Operate and monitor the cooling and cutting process</p>	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that cake temperature and cut pieces meet specifications</p> <p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
<p>3. Shut down the process</p>	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify cooling and cutting requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting knife condition to identify any signs of wear, selecting appropriate settings to meet cake dimension requirements, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- confirm settings, including:
 - conveyor speed
 - cooling tunnel settings
 - guides
 - knife position
- start, operate, monitor and adjust process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - cake temperature - temperature gauges
 - throughput
 - cut cake appearance, dimensions and weight
 - knife position and condition
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- demonstrate batch/product changeovers
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as

REQUIRED SKILLS AND KNOWLEDGE

specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor

- work cooperatively within a culturally diverse workforce

Required knowledge***Knowledge of:***

- purpose and basic principles of the process
- basic operating principles of equipment, including main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- procedures to replace rotary knives
- the flow of the cooling and slicing process and the effect of outputs on downstream processes
- outcomes to be achieved by the cooling and cutting process, including the required temperature range for cake types and the scope to adjust product length to achieve a given weight
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters, such as the effect of ambient temperature on the cooling process, the possible cause of condensation formation on product from the cooling tunnel, and corrective action required
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the production process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls, including risks associated with working with refrigerant and action required in the event of a leak
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- product/process changeover procedures and responsibilities
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control where relevant, including the

REQUIRED SKILLS AND KNOWLEDGE

- | |
|---|
| <p>relationship between control panels and systems and the physical equipment</p> <ul style="list-style-type: none">• routine maintenance procedures where relevant• cleaning and sanitation procedures where relevant |

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for cooling and slicing cake
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- safely shut down equipment
- apply food safety procedures to work practices.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment
- work procedures, including advice on safe work practices, food safety, quality and environmental requirements
- information on equipment capacity and operating parameters
- production schedule/batch instructions
- specifications, control points and processing parameters
- cooling tunnels, cutting equipment and related equipment and services
- baked cake on a belt or band
- documentation and recording requirements and procedures
- cleaning procedures, materials and equipment as required.

EVIDENCE GUIDE	
Method of assessment	<p>This unit should be assessed together with other core units or other units of competency relevant to the work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2030A Operate a process control interface.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> the Food Standards Code, including labelling, weights and measures legislation legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> standard operating procedures (SOPs) specifications production schedules and instructions manufacturers' advice standard forms and reports
Equipment	<p>Equipment typically includes:</p> <ul style="list-style-type: none"> conveyors cooling tunnels rotary and guillotine knives
Operation of equipment and processes	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> the use of process control panels and systems
Shutdown procedures	<p>Shutdown procedures may include:</p> <ul style="list-style-type: none"> cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	Services may need to be confirmed. These depend on the nature of the process. Typical examples

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Prepare the pastry forming and filling equipment and process for operation</p>	<p>1.1. Materials are confirmed and available to meet operating requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Processing/operating parameters are entered as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
<p>2. Operate and monitor the pastry forming and filling process</p>	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that specifications are met</p> <p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. work is conducted according to workplace environmental standards</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
<p>3. Shut down the pastry forming and filling process</p>	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify pastry forming and filling processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services, including the transfer of fillings and pastry to the production line to meet production requirements
- confirm condition of materials, including confirming that pastry types and fillings match product specifications; and that tin spray, water and egg yolk spray are available as required
- determine if rework pastry is suitable for use
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for pastry forming and filling processing requirements, positioning sensors and controls correctly, confirming any scheduled maintenance has been carried out, ensuring that all safety guards are in place and operational, and trays are available and positioned
- start, operate, monitor and adjust pastry forming and filling process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - pastry thickness
 - alignment of deposited filling in relation to pastry sheet or shell
 - amount and/or rate of filling deposited
 - product weight
 - enclosure of pastry product by forming, rolling or covering with a pastry top
 - application of toppings/finishes as required
 - appearance (size and shape)
- monitor supply and flow of materials to and from the pastry forming and filling process and equipment operation to confirm process remains within specification
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take pastry forming and filling process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- demonstrate batch/product changeovers

REQUIRED SKILLS AND KNOWLEDGE

- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the pastry forming and filling process
- basic operating principles of equipment, including main equipment components and attachments, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- how to select and fit appropriate filler heads and/or finishing attachments
- services required and action to take if services are not available
- the flow of the pastry forming and filling process and the effect of outputs on customer satisfaction and downstream processes, such as freezing or baking
- quality requirements of materials/ingredients and effect of variation on pastry forming and filling process performance
- quality standards required of the filled product
- pastry forming and filling process specifications, procedures and operating parameters, including procedures for preparing fillings, operating the depositing process, and operating closing (lidding) and finishing as required by product specifications
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including recognition of signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the pastry forming and filling production process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the pastry forming and filling process and corrective action required
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls, including an awareness of the limitations of protective clothing and equipment relevant to the pastry

REQUIRED SKILLS AND KNOWLEDGE

forming and filling process

- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- pastry forming and filling process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for pastry forming and filling • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures to work practices.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • specifications, control points and processing parameters • production schedule and recipe/batch instructions • pastry forming and filling process and related equipment and services • filling ingredients and pastry to be filled and/or formed • sampling schedules and test procedures and equipment as required • cleaning procedures, materials and equipment as required.

EVIDENCE GUIDE	
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • filling, depositing, forming and weighing equipment • various sized and shaped trays and tins • rework bins in line hoppers <p>Specific conveyor line attachments depend on product types and may include:</p> <ul style="list-style-type: none"> • spike rollers and cutters <p>Weighing and measuring equipment may include:</p> <ul style="list-style-type: none"> • both manual and automated systems <p>Finishing attachments may be used, such as:</p> <ul style="list-style-type: none"> • shakers and topping equipment

RANGE STATEMENT	
Fillings	Fillings may be: <ul style="list-style-type: none"> • sweet or savoury • hot or cold
Shutdown procedures	Shutdown procedures may include: <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Operation of equipment and processes	Operation of equipment and processes may require: <ul style="list-style-type: none"> • the use of process control panels and systems
Services	Services may need to be confirmed. These depend on the nature of the process. Typical examples include: <ul style="list-style-type: none"> • power • steam • water • vacuum • compressed and instrumentation air

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Prepare the rye crisp breads manufacturing equipment and process for operation</p>	<p>1.1. Materials are confirmed and available to meet operating requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Processing/operating parameters are entered as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
<p>2. Operate and monitor the rye crisp breads manufacturing process</p>	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that rye crisp breads specifications are met</p> <p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
<p>3. Shut down the rye crisp breads manufacturing process</p>	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify rye crisp breads manufacturing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services, including confirming slurry quality, quantity, temperature and degree of aeration
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that related equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- confirm settings, including:
 - ovens and cutter settings for product type
 - web speed settings
 - depositing rate settings
 - flour (dusting) process settings
 - docking roller adjusted for product type
- start, operate, monitor and adjust rye crisp breads manufacturing equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification and ensuring that system has reached specified temperature, such as:
 - slurry volume, weight and density
 - biscuit size (width, length and thickness)
 - biscuit texture, colour and weight
 - biscuit moisture level
 - clean, even break/cut
- monitor supply and flow of materials to and from the rye crisp breads manufacturing process
- take corrective action in response to out-of-specification results
- conduct batch/product changeovers
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take the rye crisp breads manufacturing process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility

REQUIRED SKILLS AND KNOWLEDGE

- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- take samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of each stage of the rye crisp breads manufacturing process
- basic operating principles of equipment, including main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the rye crisp breads manufacturing process and the effect of outputs on downstream processes
- quality characteristics to be achieved by the rye crisp breads manufacturing process
- quality requirements of materials and effect of variation on process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- effect of slurry temperature on its ability to hold air
- effect of docking roller on baking process
- changes which occur in product during processing
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the rye crisp breads manufacturing process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the rye crisp breads manufacturing process and related control measures
- product/process changeover procedures and responsibilities
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the rye crisp breads manufacturing process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power

REQUIRED SKILLS AND KNOWLEDGE

- outage
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the rye crisp breads manufacturing process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the wafer process for operation	1.1. Materials are confirmed and available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements 1.4. Processing/operating parameters are entered as required to meet safety and production requirements 1.5. Equipment performance is checked and adjusted as required 1.6. Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the wafer process	2.1. The process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The process is monitored to confirm that wafer products meet specifications 2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the wafer process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify wafer production requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services, including confirming quality, quantity and temperature of batter
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that related equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- ensure correct batter is supplied and confirm settings, including:
 - wafer plates are selected for product type
 - oven settings for product type
 - web/chain speed settings
 - depositing rate settings
- start, operate, monitor and adjust process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - wafer size (width, length and thickness)
 - wafer texture, colour and weight
 - wafer moisture level
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- conduct batch/product changeovers
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- shut down equipment in response to an emergency situation
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- take samples and conduct tests according to enterprise procedures

REQUIRED SKILLS AND KNOWLEDGE

- conduct routine maintenance according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking

advice from supervisor

- work cooperatively within a culturally diverse workforce

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the doughnut manufacturing equipment and process for operation	1.1. Materials are confirmed and available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements 1.4. Processing/operating parameters are entered as required to meet safety and production requirements 1.5. Equipment performance is checked and adjusted as required 1.6. Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the doughnut manufacturing process	2.1. The process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The process is monitored to confirm that specifications are met 2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted according to workplace environmental standards 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the doughnut manufacturing process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify doughnut manufacturing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- confirm condition of materials, including confirming flour and water temperature, flour type and oil type
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- conduct pre-start checks for equipment, including:
 - doughnut mixing and forming equipment
 - deep frying equipment
 - cooling tunnels/spirals
- start, operate, monitor and adjust process equipment to achieve required outcomes, including monitoring:
 - materials transfer prior to commencing mixing
 - mixing parameters, such as water and flour temperature, sequence of ingredient addition and mixing times
 - forming parameters, including air pressure to maintain weight of doughnut
 - proving parameters, such as humidity/temperature within prover and time
 - frying parameters, such as oil temperature, appearance of cooked doughnuts and time
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- demonstrate batch/product changeovers
- complete workplace records as required
- maintain work area to meet housekeeping standards
- operating finishing/filling equipment according to enterprise procedures, including preparing decorating ingredients, such as mixing and heating, crushing, cutting or

REQUIRED SKILLS AND KNOWLEDGE

sieving toppings

- monitor temperature of toppings, spread/application of toppings and glazes, jam/filling placement and quantity and appearance of finished product
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the doughnut manufacturing process, including the stages in doughnut manufacture (e.g. mixing, proving, frying and finishing) and the requirements of each processing stage (e.g. the relationship between temperature, time and humidity in the proving process)
- the role of main ingredients, such as yeast
- basic operating principles of equipment, including main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the doughnut manufacturing process and the effect of outputs on customer satisfaction and downstream processes, such as packaging
- quality requirements of materials and effect of variation on doughnut manufacturing process performance
- quality characteristics to be achieved by the finished doughnut
- process specifications, procedures and operating parameters, including procedures for adjusting water temperature to compensate for atmospheric conditions
- operating requirements and parameters and corrective action required where results are out-of-specification operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the doughnut manufacturing process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the doughnut manufacturing process and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls, including limitations of

REQUIRED SKILLS AND KNOWLEDGE

- protective clothing and equipment relevant to the doughnut manufacturing process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the doughnut manufacturing process, including waste/rework collection and handling procedures related to the process
- finishing requirements, where relevant, including preparation methods, monitoring of parameters, such as icing temperature, operating procedures for application of finishings and quality requirements, such as even coverage
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for making doughnuts
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- safely shut down equipment
- apply food safety procedures to work practices.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment
- work procedures, including advice on safe work practices, food safety, quality and environmental requirements
- information on equipment capacity and operating parameters
- production schedule and recipe/batch instructions
- specifications, control points and processing parameters
- doughnut mixing, forming, proving, injecting and frying equipment, and related equipment as required, such as glazing and topping application equipment
- doughnut ingredients and related materials, such as frying oil and glazing/toppings and fillings as required
- sampling schedules and test procedures and equipment as required

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes: <ul style="list-style-type: none"> the Food Standards Code, including labelling, weights and measures legislation legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	Workplace information may include: <ul style="list-style-type: none"> standard operating procedures (SOPs) specifications production schedules and instructions manufacturers' advice standard forms and reports
Doughnuts	Doughnut types may include: <ul style="list-style-type: none"> hole doughnuts and jam injected doughnuts Doughnut may be: <ul style="list-style-type: none"> glazed or covered with topping
Materials	Materials typically include: <ul style="list-style-type: none"> flour yeast water ice oil glazes toppings

RANGE STATEMENT	
	<ul style="list-style-type: none"> • pre-mixes
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • scales • mixers • hoppers • forming equipment • cutters or injectors • gas or electric frying equipment • provers • enrobers and other glazing and equipment, such as cooling tunnels or spirals <p>Specific conveyor line attachments depend on product types</p>
Weighing and measuring	Weighing and measuring may be automated or done manually
Shutdown procedures	<p>Shutdown procedures may include:</p> <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Operation of equipment and processes	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> • the use of process control panels and systems
Services	<p>Services may need to be confirmed. These depend on the nature of the process. Typical examples include:</p> <ul style="list-style-type: none"> • power • steam • water • vacuum • compressed and instrumentation air

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Prepare the griddle product manufacturing equipment and process for operation</p>	<p>1.1. Materials are confirmed and available to meet operating requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Processing/operating parameters are entered as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
<p>2. Operate and monitor the griddle product manufacturing process</p>	<p>2.1. The griddle product manufacturing process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that the mix is prepared, formed and cooked to specification</p> <p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted according to environmental standards</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
<p>3. Shut down the griddle product manufacturing process</p>	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- confirm condition and quantities of ingredients required, including weighing or confirming ingredient weights
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, confirming that all safety guards are in place and operational, and determining accuracy of scales
- start, operate, monitor and adjust process equipment to achieve required outcomes, including monitoring:
 - materials transfer prior to commencing mixing
 - mixing parameters, water temperature, sequence of ingredient addition, mixing times and mix consistency
 - depositing parameters to achieve product size and weight, such as monitoring levels of mixture in hopper and alignment/position of deposited mixture
 - griddle line equipment, such as monitoring temperature of cooking surface; size, shape and colour of product; and moisture content of product
 - cooling equipment and time
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- demonstrate batch/product changeovers
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as

REQUIRED SKILLS AND KNOWLEDGE

specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor

- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of griddle product manufacturing
- basic operating principles of equipment, including main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the griddle production process and the effect of outputs on customer satisfaction and downstream processes
- quality requirements of materials and effect of variation on process performance
- quality characteristics to be achieved by griddle products
- griddle product manufacturing process specifications, procedures and operating parameters
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the production process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls, including the limitations of protective clothing and equipment relevant to the griddle product manufacturing process
- requirements of different shutdowns as appropriate to the griddle product manufacturing process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the pastry manufacturing equipment and process for operation	1.1. Materials are confirmed and available to meet operating requirements 1.2. Materials are weighed/loaded to meet production requirements 1.3. Cleaning and maintenance requirements and status are identified and confirmed 1.4. Services are confirmed as available and ready for operation 1.5. Equipment performance is checked and adjusted as required 1.6. The process is set to meet production requirements
2. Operate and monitor the pastry manufacturing process	2.1. The pastry manufacturing process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The process is monitored to confirm that dough mixing, rolling and laminating specifications are met 2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted according to environmental standards 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the pastry manufacturing process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify pastry manufacturing processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services, such as flour and fat
- select ingredients in accordance with recipe specifications
- confirm condition and quality of ingredients
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for pastry manufacturing processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, confirming that all safety guards are in place and operational, and positioning rework bins
- start, operate, monitor and adjust pastry manufacturing process equipment to achieve required outcomes, such as setting up and starting up mixers, rollers and laminating processes to meet production requirements
- monitor control points and conduct inspections as required to confirm process remains within specification
- monitor supply and flow of materials to and from the dough preparation process and equipment operation to confirm process remains within specification, such as:
 - flour temperature and type
 - water temperature
 - fat type, distribution and percentage as required for specific pastry types
 - rework pastry addition
 - dough characteristics
 - mixing time
- roll and laminate dough to specification, including ensuring in-line hoppers are filled with flour to prevent pastry sticking to rollers, roller settings are within specification, and checking pastry thickness, fat percentage and the number of pastry layers
- monitor supply and flow of materials to and from the laminating process and equipment operation to confirm process remains within specification
- cut and stack or roll pastry according to production requirements
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility

REQUIRED SKILLS AND KNOWLEDGE

- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take pastry manufacturing process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- demonstrate batch/product changeovers according to enterprise procedures (may not apply to some continuous operations)
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the pastry manufacturing process
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the pastry manufacturing process and the effect of outputs on customer satisfaction and downstream processes such as filling, forming and baking
- quality requirements of materials/ingredients and effect of variation on pastry manufacturing process performance
- quality standards required of the finished pastry
- pastry manufacturing process specifications, procedures and operating parameters, including preparing dough, laminating, rolling, and cutting and stacking of pastry
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the pastry manufacturing production process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the pastry manufacturing process and related control measures
- common causes of variation and corrective action required, including the

REQUIRED SKILLS AND KNOWLEDGE

- relationships between time and temperature and humidity in the pastry manufacturing process
- occupational health and safety (OHS) hazards and controls, including the limitations of protective clothing and equipment relevant to the pastry manufacturing process
- requirements of different shutdowns as appropriate to the pastry manufacturing process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the pastry manufacturing process
- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment
- pastry manufacturing process changeover procedures and responsibilities where relevant
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Co-requisite units		

FDFBP2001A Operate the bottle supply process

Modification History

This unit supersedes and is equivalent to FDFBPBSUA Operate the bottle supply process.
April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to set up, operate and shut down a range of semi-automated and automated bottling and packaging equipment involved in the bottle supply process.
------------------------	---

Application of the Unit

Application of the unit	This unit has application in a wine operations bottling and packing environment. It typically targets the worker responsible for applying basic operating principles to the operation and monitoring of a bottle supply process and associated equipment.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills
-----------------------------	---

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to operate bottle supply equipment	1.1 Product and materials are confirmed and available to meet bottle supply requirements 1.2 Product and materials are prepared to meet bottle supply requirements 1.3 Services are confirmed as available and ready for operation 1.4 Bottle supply equipment is prepared and checked to confirm readiness for use 1.5 Equipment is set to meet bottle supply requirements
2. Operate and monitor the bottle supply process	2.1 Bottle supply equipment is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Bottles are supplied according to specification 2.4 Bottle supply equipment is monitored to confirm operating condition 2.5 Out-of-specification end product, process and equipment performance is identified, rectified and/or reported
3. Shut down the bottle supply process	3.1 Bottle supply equipment is shut down according to workplace procedures 3.2 Bottle supply equipment is prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify bottle supply requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- confirm supply of necessary materials and services. This may include:
 - confirming gas, compressed air, filtered water and power are available to equipment
 - checking bottles meet size and type specification and quality and hygiene standards
- liaise with other work areas, which may include:
 - maintenance personnel
 - quality assurance personnel
 - materials supply
 - cellar
 - bottle filling operators
 - bottle sealing operators
 - bottle capsuling operators
 - labelling operators
- confirm equipment status and condition. This may include completing a test run, making minor adjustments as required and confirming that:
 - cleaning and sanitation processes are completed
 - stripping plates, rubber (pickup) cups and guides are clean and operational
 - any adjacent coding equipment is set up and operational
 - line controls (conveyors) are operational
 - line lube is operational and being correctly applied
 - electronic bottle inspector is set up and operational
 - all equipment is set for correct bottle height
 - water filters and ultraviolet (UV) sterilising system are operational
 - bottle feeds are filled with correct screws and stars and accurately aligned
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This can involve monitoring:
 - gas and compressed air pressures
 - ongoing quality of bottles during depalletising process
 - for efficiency of all rinser cycles
 - ongoing quality and appearance of bottles after rinsing
 - for excessive pressure (blockage) at water filtration
 - to ensure UV lamps do not fail or exceed prescribed usage limits
 - levels and faults of bottles ejected by the electronic bottle inspector
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as instructed
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation

- shut down equipment in response to routine shutdown requirements. This may include removing product or consumables from the line
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- record workplace information
- maintain work area to meet housekeeping standards
- clean and sanitise equipment according to enterprise procedures
- take samples according to enterprise procedures
- conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- handle spirits according to enterprise procedures
- identify, rectify and/or report environmental non-compliance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of bottle supply equipment
- key features of bottle supply equipment and components
- links to related processes
- stages and changes which occur during the process
- effect of process stages on end product
- quality characteristics and uses of end product
- effect of product and materials on process outcomes
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services required
- significance and methods of monitoring control points
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- routine maintenance requirements
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls

- shutdown sequence
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- collection, treatment and handling requirements for waste generated by process and cleaning operation
- recording requirements and procedures
- cleaning and sanitation procedures where relevant
- sampling procedures where relevant
- testing procedures where relevant
- routine maintenance procedures where relevant
- spirit handling requirements and procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for bottle supply • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • personal protective clothing and equipment as required

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules or instructions

RANGE STATEMENT	
	<ul style="list-style-type: none"> • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • depalletisers • rinsers • water filters • UV sterilising systems • electronic bottle inspection (EBI)
Products and materials	<p>Products and materials may include:</p> <ul style="list-style-type: none"> • bottles (any size) for still wine, sparkling wine, fortified wine, spirits and related drink products
Equipment status	<p>Confirming equipment status involves:</p> <ul style="list-style-type: none"> • checking that hygiene and sanitation standards, safety standards and pre-start requirements are met and that equipment is operational • checking operation or calibration of measuring instrumentation
Services	<p>Services may include:</p> <ul style="list-style-type: none"> • power • compressed air • water • inert gas • steam • vacuum
Monitoring	<p>Monitoring the process may involve:</p> <ul style="list-style-type: none"> • the use of production data, such as performance control charts
Process operation and monitoring functions	<p>Process operation and monitoring functions may be:</p> <ul style="list-style-type: none"> • manual or involve the use of a process control system
Control points	<p>Control points refer to those key points in a work process that must be monitored and controlled. These include:</p> <ul style="list-style-type: none"> • food safety (critical) • quality and regulatory control points

RANGE STATEMENT	
	<ul style="list-style-type: none">inspection points
Information systems	Information systems may be: <ul style="list-style-type: none">print or screen based

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to operate carton erection equipment	1.1 Product and materials are confirmed and available to meet carton erection requirements 1.2 Product and materials are prepared to meet carton erection requirements 1.3 Services are confirmed as available and ready for operation 1.4 Carton erection equipment is prepared and checked to confirm readiness for use 1.5 Equipment is set to meet carton erection requirements
2. Operate and monitor the carton erection process	2.1 Carton erection equipment is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Cartons are erected according to specification 2.4 Carton erection equipment is monitored to confirm operating condition 2.5 Out-of-specification end product, process and equipment performance is identified, rectified and/or reported
3. Shut down the carton erection process	3.1 Carton erection equipment is shut down according to workplace procedures 3.2 Carton erection equipment is prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify carton erection requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- confirm supply of necessary materials and services. This may include:
 - confirming compressed air, power and vacuum are available to equipment
 - checking cartons and inserts meet size and type specification and quality and hygiene standards
- liaise with other work areas which may include:
 - maintenance personnel
 - quality assurance personnel
 - materials supply
 - cellar
 - bottle filling operators
 - labelling operators
- confirm equipment status and condition. This may include completing a test run, making minor adjustments as required and confirming that:
 - cleaning and sanitation processes are completed
 - carton magazines and guides are operational
 - insert magazines and guides are operational
 - any adjacent coding equipment is set up and operational
 - line controls (conveyors) are operational
 - line lube is operational and being correctly applied
 - all hotmelt guns or jets are operational
 - equipment is set for correct carton dimensions
 - vacuum pump is operational
 - carton feeds are set up and accurately aligned for 6 or 12 pack cartons
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This can involve monitoring:
 - compressed air pressure
 - vacuum pressure
 - hotmelt units are maintained at correct wax level
 - supply and quality of cartons to be erected
 - supply and quality of inserts being used
 - vacuum cups are picking up properly
 - hot glue strokes are correct length and producing a firm seal
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as instructed
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements. This may include

- removing product or consumables from the line
- prepare equipment for cleaning. This may involve dismantling equipment and removing waste manually
- record workplace information
- maintain work area to meet housekeeping standards
- clean equipment according to enterprise procedures
- take samples according to enterprise procedures
- conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- handle spirits according to enterprise procedures
- identify, rectify and/or report environmental non-compliance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of the carton erection equipment
- key features of carton erection equipment and components
- links to related processes
- stages and changes which occur during the process
- effect of process stages on end product
- quality characteristics and uses of end product
- effect of product and materials on process outcomes
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services required
- significance and methods of monitoring control points
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- routine maintenance requirements
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown sequence

- shutdown and cleaning requirements associated with changeovers and types of shutdown
- collection, treatment and handling requirements for waste generated by process and cleaning operation
- recording requirements and procedures
- cleaning and sanitation procedures where relevant
- sampling procedures where relevant
- testing procedures where relevant
- routine maintenance procedures where relevant
- spirit handling requirements and procedures where relevant

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify carton packing requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- confirm supply of necessary materials and services, including:
 - checking product to be packed meets specification
 - checking bottles and cartons used meet size and type specification and quality and hygiene standards
 - confirming compressed air, power and vacuum, if required, are available to equipment
- liaise with other work areas, which may include:
 - maintenance personnel
 - quality assurance personnel
 - materials supply
 - cellar
 - bottle or softpack filling operators
 - labelling operators
- confirm equipment status and condition. This may include completing a test run, making minor adjustments as required and confirming that:
 - multi-lane bottle diverters on infeed conveyors are operational
 - vacuum is operational
 - any adjacent coding equipment is set up and operational
 - line controls (conveyors) are operational
 - line lube is operational and being correctly applied
 - all hotmelt guns or jets are operational
 - equipment is set for correct carton, cask and bottle dimensions
 - check weigher is operational
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This can involve monitoring:
 - compressed air pressure
 - vacuum pressure
 - hotmelt units are maintained at correct adhesive level
 - the ongoing supply and quality of product to be packed
 - the ongoing quality and appearance of product once packed and sealed
 - vacuum cups are picking up properly
 - hot glue strokes are correct length and producing a firm seal
 - check weigher is rejecting underweight (short supplied) cartons
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as instructed
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements. This may include

- removing product or consumables from the line
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- record workplace information
- maintain work area to meet housekeeping standards
- clean and sanitise equipment according to enterprise procedures
- take samples according to enterprise procedures
- conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to operate bottle sealing equipment	1.1 Product and materials are confirmed and available to meet bottle sealing requirements 1.2 Product and materials are prepared to meet bottle sealing requirements 1.3 Services are confirmed as available and ready for operation 1.4 Bottle sealing equipment is prepared and checked to confirm readiness for use 1.5 Equipment is set to meet bottle sealing requirements
2. Operate and monitor the bottle sealing process	2.1 Bottle sealing equipment is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Bottles are sealed according to specification 2.4 Bottle sealing equipment is monitored to confirm operating condition 2.5 Out-of-specification end product, process and equipment performance is identified, rectified and/or reported
3. Shut down the bottle sealing process	3.1 Bottle sealing equipment is shut down according to workplace procedures 3.2 Bottle sealing equipment is prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify bottle sealing requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- confirm supply of necessary materials and services. This may include:
 - checking sealing materials meet workplace specifications
 - confirming gas, compressed air, water and power are available to equipment
- liaise with other work areas, which may include:
 - maintenance personnel
 - materials supply
 - cellar
 - bottle supply operators
 - bottle filling operators
 - bottle capsuling operators
 - labelling operators
 - quality assurance personnel
- confirm equipment status and condition. This may include completing a test run, making minor adjustments as required and confirming that:
 - cleaning and sanitation processes are completed
 - magazine, hoppers, chutes and guides are operational
 - any adjacent coding equipment is set up and operational
 - line controls (conveyors) are operational
 - line lube is operational and being correctly applied
 - torque testers are correctly calibrated
 - equipment is set for correct bottle height
 - vacuum pump is operational
 - vacuum block and corker jaws are correctly lubricated
 - bottle feeds are filled with correct screws and stars and accurately aligned
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This can involve monitoring:
 - compressed air pressure
 - torque on Roll On Tamper Evident (ROTE) seals
 - cork depths as established by the workplace
 - effective seal on crown seals
 - correct vacuum is being applied to head space in bottle
 - consistent application of wire muselet
 - clarity of wine in bottles being sealed
 - the ongoing quality and appearance of sealing application
 - the ongoing quality of materials used in the sealing process
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance

- report and/or record corrective action as instructed
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements. This may include removing product or consumables from the line
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- record workplace information
- maintain work area to meet housekeeping standards
- clean and sanitise equipment externally according to enterprise procedures
- take samples according to enterprise procedures
- conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- handle spirits according to enterprise procedures
- identify, rectify and/or report environmental non-compliance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of bottle sealing equipment
- key features of bottle sealing equipment and components
- links to related processes
- stages and changes which occur during the process
- effect of process stages on end product
- quality characteristics and uses of end product
- effect of product and materials on process outcomes
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services required
- significance and methods of monitoring control points
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- routine maintenance requirements

- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown sequence
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- collection, treatment and handling requirement for waste generated by process and cleaning operation
- recording requirements and procedures
- cleaning and sanitation procedures where relevant
- sampling procedures where relevant
- testing procedures where relevant
- routine maintenance procedures where relevant
- spirit handling requirements and procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for bottle sealing • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • personal protective clothing and equipment as

EVIDENCE GUIDE	
	<p>required</p> <ul style="list-style-type: none"> • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications

RANGE STATEMENT	
	<ul style="list-style-type: none"> • production schedules or instructions • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Equipment	<p>Equipment may seal the product by ROTE seals, such as:</p> <ul style="list-style-type: none"> • Stelvin • corks (natural or synthetic) • cork stoppers • cork and wire muselet to maintain sterile integrity and longevity of product • crown seals for bottle primary fermentation
Products and materials	<p>Products and materials may include:</p> <ul style="list-style-type: none"> • bottles (any size) for still wine, sparkling wine, fortified wine, spirits and related drink products • ROTE seals • corks (natural or synthetic) • cork stoppers • wire muselet • crown seals
Equipment status	<p>Confirming equipment status involves:</p> <ul style="list-style-type: none"> • checking that hygiene and sanitation standards, safety standards and pre-start requirements are met and that equipment is operational • checking operation or calibration of measuring instrumentation
Services	<p>Services may include:</p> <ul style="list-style-type: none"> • power • compressed air • water • inert gas • steam • vacuum
Monitoring the process	<p>Monitoring the process may involve:</p> <ul style="list-style-type: none"> • the use of production data, such as performance control charts

RANGE STATEMENT	
Process operation and monitoring functions	Process operation and monitoring functions may be: <ul style="list-style-type: none"> • manual or involve the use of a process control system
Control points	Control points refer to those key points in a work process that must be monitored and controlled. These include: <ul style="list-style-type: none"> • food safety (critical) • quality and regulatory control points • inspection points
Information systems	Information systems may be: <ul style="list-style-type: none"> • print or screen based

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to operate electronic coding equipment	1.1 Product and materials are confirmed and available to meet electronic coding requirements 1.2 Product and materials are prepared to meet electronic coding requirements 1.3 Services are confirmed as available and ready for operation 1.4 Electronic coding equipment is prepared and checked to confirm readiness for use 1.5 Equipment is set to meet coding requirements
2. Input, store and retrieve data	2.1 Data is accessed as required 2.2 Data is entered to meet coding requirements 2.3 Data is filed and/or retrieved to meet coding requirements 2.4 Security procedures are followed as required
3. Operate and monitor the electronic coding process	3.1 Electronic coding equipment is started up according to workplace procedures 3.2 Control points are monitored to confirm performance is maintained within specification 3.3 Product is coded according to specification 3.4 Electronic coding equipment is monitored to confirm operating condition 3.5 Out-of-specification end product, process and equipment performance is identified, rectified and/or reported
4. Shut down the electronic coding process	4.1 Electronic coding equipment is shut down according to workplace procedures 4.2 Electronic coding equipment is prepared for cleaning 4.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 4.4 Work is conducted in accordance with workplace environmental guidelines
5. Record information	5.1 Workplace information is recorded in appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify electronic coding requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- confirm supply of necessary materials and services. This may include:
 - checking product to be coded meets specification
 - checking coding materials (labels and ink) meet specifications
 - confirming compressed air, power and vacuum are available to equipment
- liaise with other work areas, which may include:
 - maintenance personnel
 - quality assurance personnel
 - materials supply
 - filling operators
 - labelling operators
 - depalletiser operators
 - carton erector operators
 - carton packer operators
- confirm equipment status and condition. This may include completing a test run, making minor adjustments as required and confirming that:
 - cleaning and sanitation processes are completed
 - all inkjet heads have been purged and are operational
 - equipment is set up for correct date and specified application
 - all related touch screens and computers are operational
 - line controls and conveyors are operational
 - vacuum pumps are operational
 - printers have been tested and are operational
 - pressure sensitive applicators are operational
 - bottle feeds are filled with correct screws and stars and accurately aligned
- set up and start up the process
- select, enter or retrieve data as required by work procedures, consistent with equipment operating advice
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This can involve monitoring:
 - compressed air pressure

- vacuum
- appearance, quality and legibility of coding
- all coding is correct as specified
- application of bar code pressure sensitive labels is as specified
- sensors are detecting missed labels
- fill height and volume
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as instructed
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements. This may include removing product or consumables from the line
- prepare equipment for cleaning. This may involve dismantling equipment and removing waste manually for cleaning
- record workplace information
- maintain database according to system and workplace requirements
- maintain work area to meet housekeeping standards
- clean and sanitise equipment according to enterprise procedures
- take samples according to enterprise procedures
- conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- handle spirits according to enterprise procedures
- identify, rectify and/or report environmental non-compliance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of electronic coding equipment
- key features of electronic coding equipment and components. These can include the mouse, keyboard, screen and control panel
- basic principles of data entry, storage and retrieval using information technology
- software functions, including codes, prompts and menus, as required, to perform coding tasks
- security and data management procedures

- links to related processes
- stages and changes which occur during the electronic coding process
- effect of process stages on end product
- quality characteristics and uses of end product
- effect of product and materials on process outcomes
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services required
- significance and methods of monitoring control points
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- routine maintenance requirements
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown sequence
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- collection, treatment and handling requirement for waste generated by process and cleaning operation
- recording requirements and procedures
- cleaning and sanitation procedures where relevant
- sampling procedures where relevant
- testing procedures where relevant
- routine maintenance procedures where relevant
- spirit handling requirements and procedures where relevant

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to operate traditional sparkling wine equipment	1.1 Product and materials are confirmed and available to meet the requirements of traditional sparkling wine processes 1.2 Product and materials are prepared to meet the requirements of traditional sparkling wine processes 1.3 Services are confirmed as available and ready for operation 1.4 Traditional sparkling wine equipment is prepared and checked to confirm readiness for use 1.5 Equipment is set to meet the requirements of traditional sparkling wine processes
2. Operate and monitor traditional sparkling wine processes	2.1 Traditional sparkling wine equipment is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Traditional sparkling wine output meets specification 2.4 Traditional sparkling wine equipment is monitored to confirm operating condition 2.5 Out-of-specification end product, process and equipment performance is identified, rectified and/or reported
3. Shut down traditional sparkling wine processes	3.1 Traditional sparkling wine equipment is shut down according to workplace procedures 3.2 Traditional sparkling wine equipment is prepared for cleaning 3.3 Waste generated by both the processes and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify the requirements of traditional sparkling wine processes
- select, fit and use appropriate personal protective clothing and/or equipment, particularly in relation to handling refrigerants and wine stored under pressure
- confirm supply of necessary materials and services. This may include checking:
 - product to be shaken down and/or disgorged meets specification
 - liqueur meets specification
 - wine for topping up meets specification
 - power, compressed air, water, inert gas, refrigerants, steam and vacuum are available to equipment
- liaise with other work areas, which may include:
 - maintenance personnel
 - materials supply
 - cellar
 - quality assurance or control personnel
 - de-binning personnel
- confirm equipment status and condition. This may include completing a test run, making minor adjustments as required and confirming that:
 - cleaning and sanitation processes are completed
 - automatic shaker is programmed and operational
 - bottles are correctly binned and lids secured for shaking
 - manual shaking tables are set up
 - manual or automatic de-binning is set up for operation
 - neck freezer is set up and operational
 - bottle feeds are filled with correct screws and stars and accurately aligned
 - manual or automatic de-crowner is operational
 - manual or automatic dosing equipment is set up and operational
 - manual or automatic topping-up equipment is set up and operational
 - vacuum is operational
 - refrigerant is operational
 - line controls and conveyors are operational
 - all equipment is adjusted to suit bottle height

- set up and start up the processes
- monitor the processes and equipment operation to identify out-of-specification results or non-compliance. This can involve monitoring:
 - gas and compressed air pressures
 - vacuum
 - wine to be shaken is binned and secured correctly
 - automatic bin shaker is operating to program
 - smooth flow of automatic or manual de-binning
 - all identifying markings are removed from bins once wine is transferred
 - continued supply of refrigerants
 - temperature of neck freezer
 - smooth flow of bottles through neck freezer
 - de-crowner is removing all crown seals
 - temperature of top-up wine and liqueur
 - lees plug is disgorging correctly
 - liqueur doser is delivering correct amount
 - top-up procedure meets wine level or volume requirements
- monitor supply and flow of product and materials to and from the processes
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as instructed
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements. This may include removing product or consumables from the line
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation.
- record workplace information
- maintain work area to meet housekeeping standards
- clean and sanitise equipment according to enterprise procedures
- take samples according to enterprise procedures
- conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- identify, rectify and/or report environmental non-compliance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of traditional sparkling wine equipment
- key features of traditional sparkling wine equipment and components
- links to related processes
- stages and changes which occur during the processes
- effect of process stages on end product
- quality characteristics and uses of end product
- effect of product and materials on process outcomes
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services required
- significance and methods of monitoring control points
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls, particularly in relation to handling refrigerants and wine stored under pressure
- routine maintenance requirements
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown sequence
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- collection, treatment and handling requirement for waste generated by processes and cleaning operation
- recording requirements and procedures
- cleaning and sanitation procedures where relevant
- sampling procedures where relevant
- testing procedures where relevant
- routine maintenance procedures where relevant

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to operate tirage and transfer equipment	1.1 Product and materials are confirmed and available to meet the tirage and transfer requirements 1.2 Product and materials are prepared to meet the tirage and transfer requirements 1.3 Services are confirmed as available and ready for operation 1.4 Tirage and transfer equipment is prepared and checked to confirm readiness for use 1.5 Equipment is set to meet tirage and transfer requirements
2. Operate and monitor the tirage and transfer process	2.1 Tirage and transfer equipment is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Tirage and transfer output meets specification 2.4 Tirage and transfer equipment is monitored to confirm operating condition 2.5 Out-of-specification end product, process and equipment performance is identified, rectified and/or reported
3. Shut down the tirage and transfer process	3.1 Tirage and transfer equipment is shut down according to workplace procedures 3.2 Tirage and transfer equipment is prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify tirage requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- confirm supply of necessary materials and services. This may include checking:
 - product to be transferred (disgorged) meets specification
 - product to be filled to tirage meets specification
 - power, compressed air, water, inert gas, steam and vacuum are available to equipment
 - bottles and crown seals meet specifications
 - bins to be used meet specification
- liaise with other work areas which may include:
 - maintenance personnel
 - materials supply
 - cellar
 - quality assurance personnel
 - personnel binning and de-binning
- confirm equipment status and condition. This may include completing a test run, making minor adjustments as required and confirming that:
 - cleaning and sanitation processes are completed
 - filling tubes meet specification
 - bottle feeds are filled with correct screws and stars and accurately aligned
 - crown seal hopper, chutes and guides are operational
 - crown sealer is operational
 - vacuum is operational
 - rinser is operational
 - inert gas is operational
 - disgorger bottle piercing tips are straight and correctly aligned to receive bottles
 - de-crowner is operational
 - line controls and conveyors are operational
 - automatic binning and de-binning is set up for operation
 - filler, crown sealer, rinser, disgorger and de-crowner are adjusted to suit bottle height
 - lines and equipment are flushed with product to be bottled
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This can involve monitoring:
 - gas and compressed air pressures
 - vacuum
 - product or wine base temperature
 - fill height and volume
 - ongoing appearance and quality of wine filled to tirage
 - effectiveness of crown seals in sealing wine in bottle
 - disgorger bottle piercing tips are not bent or incorrectly aligned

- ongoing disgorging is draining wine efficiently
- de-crowner is removing all crown seals
- bottles are rinsed efficiently and are suitable for filling
- vacuum and gas are being applied
- bins being filled to tirage are clearly marked as specified
- all identifying markings are removed from bins once wine is transferred
- smooth flow of automatic binning and de-binning
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as instructed
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements. This may include removing product or consumables from the line
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- record workplace information
- maintain work area to meet housekeeping standards
- take samples according to enterprise procedures
- conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- identify, rectify and/or report environmental non-compliance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of tirage and transfer equipment
- key features of tirage and transfer equipment and components
- links to related processes
- stages and changes which occur during the process
- effect of process stages on end product
- quality characteristics and uses of end product
- effect of product and materials on process outcomes
- emergency and troubleshooting procedures

- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services required
- significance and methods of monitoring control points
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- routine maintenance requirements
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown sequence
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- collection, treatment and handling requirement for waste generated by process and cleaning operation
- recording requirements and procedures
- sampling procedures where relevant
- testing procedures where relevant
- routine maintenance procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for tirage and transfer • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and

EVIDENCE GUIDE	
	<p>inconsistencies</p> <ul style="list-style-type: none"> • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of</p>

RANGE STATEMENT	
the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	Workplace information can include: <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules or instructions • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Equipment	Equipment may include: <ul style="list-style-type: none"> • automatic de-binning and binning • de-crowners • disgorgers • vacuum pumps • rinsers • vacuum fillers • line controls • crown sealers
Products and materials	Products and materials may include: <ul style="list-style-type: none"> • bottles • crown seals • corks • base wine • wooden, metal or plastic bins
Equipment status	Confirming equipment status involves: <ul style="list-style-type: none"> • checking that hygiene and sanitation standards, safety standards and pre-start requirements are met and that equipment is operational • checking operation or calibration of measuring instrumentation
Services	Services may include: <ul style="list-style-type: none"> • power • compressed air

RANGE STATEMENT	
	<ul style="list-style-type: none"> • water • inert gas • steam • vacuum
Monitoring the process	Monitoring the process may involve: <ul style="list-style-type: none"> • the use of production data, such as performance control charts
Process operation and monitoring functions	Process operation and monitoring functions may be: <ul style="list-style-type: none"> • manual or involve the use of a process control system
Control points	Control points refer to those key points in a work process that must be monitored and controlled. These include: <ul style="list-style-type: none"> • food safety (critical) • quality and regulatory control points • inspection points
Information systems	Information systems may be: <ul style="list-style-type: none"> • print or screen based

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to set multi-stage continuous packaging line	1.1 Components are confirmed and available to meet requirements 1.2 Appropriate hand tools are selected and used 1.3 Equipment is safe to set
2. Assemble, set and adjust multi-stage continuous packaging line	2.1 Equipment is assembled in correct sequence 2.2 Equipment components are replaced and set to meet production specifications 2.3 Services are changed as required 2.4 Packaging line is tested to meet specifications and operational requirements 2.5 Packaging line settings are adjusted to meet specifications and operational requirements
3. Complete packaging line changeover	3.1 Waste generated by the process is monitored and cleared according to workplace procedures 3.2 Unused components are stored according to workplace procedures 3.3 Work is conducted in accordance with workplace environmental guidelines 3.4 Operators are instructed as required
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information
- select, fit and use appropriate personal protective clothing and/or equipment
- confirm supply of necessary components
- liaise with other work areas, which may include:
 - maintenance personnel
 - operators
- render the equipment safe to set
- change equipment or process components in response to product change and specification. This may include:
 - label size, positioning, shape and type
 - bottle size and shape
 - carton size, type and format
 - capsule size and type
 - product type and style (e.g. still to sparkling wine)
 - closure type or size (e.g. cork to screw top)
 - pallet pattern
- select and use appropriate hand tools
- assemble equipment in correct sequence and replace, insert and/or adjust components to meet new specifications. This may include:
 - conveyor speed
 - direction and orientation of cartons or bottles
 - adding or removing carton inserters
 - glue type or change to tape
 - speed or timing of operation
 - desired temperature for glue or capsule shrinkers and bottle dryers
 - machine heights (e.g. bottle fill and label height)
 - depth of closure (cork)
 - filling pressure
 - product code changes
 - program selection
 - width or positioning of bottle guides
- change services as required. This may include:

- type of inert gas used to flush bags or bottles of cover product
- bottle rinsing method (e.g. water, alcohol or gas)
- flushing lines
- checking pressures, flow rates or quantities used per item
- test the process and equipment operation to identify out-of-specification results or non-compliance. This can involve testing:
 - label height, orientation and adhesion
 - conveyor noise and product spacing
 - carton erection, orientation and seal
 - production capacity (e.g. bottles per hour)
 - fill pressure
- make adjustments to the equipment or process in response to out-of-specification results or non-compliance. This may include adjusting:
 - stars, scrolls and bows
 - mandrels
 - filling head heights
 - label applicators
 - sighting guides
 - operational speeds
- record workplace information
- sort, collect, treat, recycle or dispose of waste according to workplace procedures
- store unused components
- instruct operators as required
- use appropriate cleaning techniques
- maintain work area to meet housekeeping standards
- carry out routine maintenance according to enterprise procedures
- operate the bottle supply, bottle filling, softpack filling, bottle sealing, bottle capsuling, labelling, carton erection, carton packing, tirage and transfer, traditional sparkling wine, electronic coding and/or palletising process according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- lock-out and tag-out procedures
- principles of quick changeover

- equipment purpose and operation, including an understanding of process control systems, where used
- process specification, procedures and operating parameters across the system
- equipment components purpose and operation
- component changes and adjustments required
- test run procedures
- control points and monitoring methods
- services required
- isolation procedures
- material specification and preparation requirements
- Occupational Health and Safety (OHS) hazards and controls
- procedures and responsibility for reporting problems
- environmental issues and control
- routine maintenance procedures where relevant
- operating procedures for bottle supply, bottle filling, softpack filling, bottle sealing, bottle capsuling, labelling, carton erection, carton packing, tirage and transfer, traditional sparkling wine, electronic coding, palletising or other related equipment where relevant

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for packaging • start, operate, test and adjust packaging equipment • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • complete product changeover.

EVIDENCE GUIDE	
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to operate bottle capsuling equipment	1.1 Product and materials are confirmed and available to meet bottle capsuling requirements 1.2 Product and materials are prepared to meet bottle capsuling requirements 1.3 Services are confirmed as available and ready for operation 1.4 Bottle capsuling equipment is prepared and checked to confirm readiness for use 1.5 Equipment is set to meet bottle capsuling requirements
2. Operate and monitor the bottle capsuling process	2.1 Bottle capsuling equipment is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Bottles are capsuled according to specification 2.4 Bottle capsuling equipment is monitored to confirm operating condition 2.5 Out-of-specification end product, process and equipment performance is identified, rectified and/or reported
3. Shut down the bottle capsuling process	3.1 Bottle capsuling equipment is shut down according to workplace procedures 3.2 Bottle capsuling equipment is prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify bottle capsuling requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- confirm supply of necessary materials and services. This may include:
 - checking capsuling materials meet workplace specifications
 - checking bottles meet size and type specification and quality and hygiene standards
 - confirming compressed air, water and power are available to equipment
- liaise with other work areas, which may include:
 - maintenance personnel
 - materials supply
 - cellar
 - bottle supply operators
 - bottle filling operators
 - bottle sealing operators
 - labelling operators
 - quality assurance personnel
- confirm equipment status and condition. This may include completing a test run, making minor adjustments as required and confirming that:
 - cleaning and sanitation processes are completed
 - capsule magazines, wax disc hoppers and wax pots are operational
 - any adjacent coding equipment is set up and operational
 - line controls (conveyors) are operational
 - line lube is operational and being correctly applied
 - heat shrink settings are adjusted to suit capsule type
 - metal-spinner tension is correct for capsule type
 - equipment is set for correct bottle height
 - hotmelt for wax disc application is operational
 - bottle feeds are filled with correct screws and stars and accurately aligned
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This can involve monitoring:
 - compressed air pressure
 - supply and quality of bottles to be capsuled

- fill heights and cork depths of bottles to be capsuled
- clarity of wine in bottles being capsuled
- ongoing quality and appearance (shrinkage and fit) of capsule application
- ongoing quality of materials used in the process
- glue application and supply to wax disc process
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as instructed
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements. This may include removing product or consumables from the line
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation.
- record workplace information
- maintain work area to meet housekeeping standards
- clean and sanitise equipment externally according to enterprise procedures
- take samples according to enterprise procedures
- conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- handle spirits according to enterprise procedures
- identify, rectify and/or report environmental non-compliance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of bottle capsuling equipment
- key features of bottle capsuling equipment and components
- links to related processes
- stages and changes which occur during the process
- effect of process stages on end product
- quality characteristics and uses of end product
- effect of product and materials on process outcomes
- emergency and troubleshooting procedures

- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services required
- significance and methods of monitoring control points
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- routine maintenance requirements
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown sequence
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- collection, treatment and handling requirement for waste generated by process and cleaning operation
- recording requirements and procedures
- cleaning and sanitation procedures where relevant
- sampling procedures where relevant
- testing procedures where relevant
- routine maintenance procedures where relevant
- spirit handling requirements and procedures where relevant

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to operate manual or basic bottling and packaging equipment	1.1 Product and materials are confirmed and available to meet production requirements 1.2 Product and materials are prepared to meet production requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is prepared and checked to confirm readiness for use 1.5 Equipment is set to meet production requirement
2. Operate and monitor manual or basic bottling and packaging processes	2.1 The equipment is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Bottling and packaging output meets specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification product, process and equipment performance is identified, rectified and/or reported
3. Shut down manual or basic bottling and packaging processes	3.1 Equipment is shut down according to workplace procedures 3.2 Equipment is prepared for cleaning 3.3 Waste generated by both the process and the cleaning is collected, treated, and disposed of, or recycled according to workplace procedures
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify bottling and packaging requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- liaise with other work areas, which may include:
 - maintenance

- materials supply
- bottling and packaging personnel
- prepare materials as required. This may include loading materials and confirming that:
 - capsules meet specifications (e.g. colour, type and size)
 - glue, hotmelt or wax meets specifications (e.g. type and batch number)
 - hotmelt or wax is heated to required temperature
 - bottles meet specifications (e.g. type, colour and size)
 - bottles to be de-crowned meet specifications
 - bottles to be decanted meet specifications
 - cartons to be packed and sealed meet specifications
 - cartons to be stencilled meet specifications
 - bottles to be waxed meet specifications
 - materials to be loaded into magazines meet specifications
 - bottles to be binned or de-binned meet specifications
 - bottles to be labelled meet specifications
 - bottles to be tissue wrapped meet specifications
 - boxes to be nailed meet specifications
 - pallets to be stacked meet specifications
- confirm equipment status and condition. This may include:
 - confirming hygiene and sanitation standards have been met
 - adjusting air pressure
 - checking conveyor speed
 - adjusting height and width to accommodate specific product and material specifications
 - completing a test run
 - confirming flow of line lube and water
 - realigning diverters and turners to ensure flow is as instructed
- set up and start up the equipment
- monitor the equipment operation to identify out-of-specification results or non-compliance. This can involve monitoring:
 - conveyor speed
 - movement, spacing and direction of bottles or cartons on conveyor
 - bottle cleanliness and draining effectiveness
 - dryness of bottles
 - glue length
 - strength of carton seals
 - shrinkage or fit of capsules
 - stacking and stacking patterns meet specifications
 - bottle counters are re-set at the start of each product
 - bottles are waxed to correct level
 - stencils applied are clear and legible

- wine levels meet specification
- ongoing quality of materials used
- ongoing appearance of applications
- monitor supply and flow of materials to and from the equipment
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as instructed
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements. This may include removing product or consumables from the line
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing. in preparation for cleaning and sanitation.
- maintain work area to meet housekeeping standards
- identify, rectify and/or report environmental non-compliance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- links to related equipment
- stages and changes which occur during the equipment operation
- effect of equipment operation stages on end product and output
- quality characteristics and uses of end product and output
- materials preparation requirements and effect of variation on the equipment operation
- emergency and troubleshooting procedures, including failure of services
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- services required
- significance and method of monitoring control points within the equipment operation
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls, including manual handling
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- shutdown sequence
- shutdown and cleaning requirements associated with changeovers and types of shutdown

- routine maintenance requirements
- waste handling requirements and procedures
- recording requirements and procedures

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for manual bottling and packaging • start, operate, monitor and adjust equipment to achieve required quality outcomes • take corrective action in response to faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • equipment, services and corresponding information as required • products and materials as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules or instructions • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Manual or basic bottling and	Equipment will vary according to the bottling and

RANGE STATEMENT	
packaging equipment	<p>packaging scope of the enterprise and includes equipment that requires full manual operation, including manual loading and unloading and all or some manual operations bottling and packaging operations. The unit can also apply to basic bottling and packaging equipment that includes some automatic operations. Examples include equipment that:</p> <ul style="list-style-type: none"> • needs manual loading and unloading • can process a limited number of bottles, cartons or pallets at a time • can perform some but not all of the bottling function (e.g. bottles but does not affix labels) <p>The range of equipment can include equipment associated with:</p> <ul style="list-style-type: none"> • decanting • loading capsule, cork and carton magazines • depalletising • binning and de-binning • sealing • capsuling • labelling • inserting cork stoppers • tissue wrapping • gift boxing • nail gun operation • wax dipping bottles • stencilling • carton coding • carton erection • operating conveyors • carton turners and bottle counters • carton packing • pallet stacking
Products and materials	<p>Products and materials may include:</p> <ul style="list-style-type: none"> • capsules • cartons • corks • glue • hotmelt

RANGE STATEMENT	
	<ul style="list-style-type: none"> • bottles (full or empty) • labels • hot wax • ink • nails
Equipment status	<p>Confirming equipment status involves:</p> <ul style="list-style-type: none"> • checking that hygiene and sanitation standards, safety standards and pre-start requirements are met and that equipment is operational • checking operation or calibration of measuring instrumentation
Services	<p>Services may include:</p> <ul style="list-style-type: none"> • power • compressed air • water • steam • inert gas • lubrication • vacuum
Control points	<p>Control points refer to those key points in a work process that must be monitored and controlled. These include:</p> <ul style="list-style-type: none"> • food safety (critical) • quality and regulatory control points • inspection points
Information systems	<p>Information systems may be:</p> <ul style="list-style-type: none"> • print or screen based

Unit Sector(s)

Custom Content Section

Not applicable.

FDFBP2011A Operate the palletising process

Modification History

This unit supersedes and is equivalent to FDFBPPALA Operate the palletising process.
April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to set up, operate and shut down a range of semi-automated and automated bottling and packaging equipment involved in the palletising process
------------------------	--

Application of the Unit

Application of the unit	This unit has application in a wine operations bottling and packing environment. It typically targets the worker responsible for applying basic operating principles to the operation and monitoring of a palletising process and associated equipment.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to operate palletising equipment	1.1 Product and materials are confirmed and available to meet palletising requirements 1.2 Product and materials are prepared to meet palletising requirements 1.3 Services are confirmed as available and ready for operation 1.4 Palletising equipment is prepared and checked to confirm readiness for use 1.5 Equipment is set to meet palletising requirements
2. Operate and monitor the palletising process	2.1 Palletising equipment is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Product is palletised according to specification 2.4 Palletising equipment is monitored to confirm operating condition 2.5 Out-of-specification end product, process and equipment performance is identified, rectified and/or reported
3. Shut down the palletising process	3.1 Palletising equipment is shut down according to workplace procedures 3.2 Palletising equipment is prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify palletising requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- confirm supply of necessary materials and services. This may include:
 - checking cartons meet specifications
 - confirming compressed air, power and vacuum are available to equipment
- liaise with other work areas which may include:
 - maintenance personnel
 - quality assurance personnel
 - materials supply
 - cellar
 - bottle supply operators
 - filling operators
 - bottle sealing operators
 - bottle capsuling operators
 - labelling operators
- confirm equipment status and condition. This may include completing a test run, making minor adjustments as required and confirming that:
 - cleaning and sanitation processes are completed
 - vacuum is operational
 - pallet pattern is set to specifications
 - slip sheets for export are available
 - plastic shrink wrapper is loaded and operational
 - pallet identification equipment is operational
 - sufficient and correct pallets are available
 - carton turning equipment is operational
 - pallet tacking hot glue is operational
 - infeed guides and gates are operational
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This can involve monitoring:
 - compressed air pressure
 - vacuum
 - the ongoing quality and appearance of stacked pallets
 - cartons are going onto stripping plate according to set pattern
 - the ongoing quality and appearance of shrink wrapping
 - the ongoing quality and appearance of pallet identification
 - the ongoing quality and appearance of pallets and slip sheets
 - stacks are square on pallets
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance

- report and/or record corrective action as instructed
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements. This may include removing product or consumables from the line.
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- record workplace information
- maintain work area to meet housekeeping standards
- clean and sanitise equipment according to enterprise procedures
- take samples according to enterprise procedures
- conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- handle spirits according to enterprise procedures
- identify, rectify and/or report environmental non-compliance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of palletising equipment
- key features of palletising equipment and components
- links to related processes
- stages and changes which occur during the process
- effect of process stages on end product
- quality characteristics and uses of end product
- effect of product and materials on process outcomes
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services required
- significance and methods of monitoring control points
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- routine maintenance requirements

- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown sequence
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- collection, treatment and handling requirement for waste generated by process and cleaning operation
- recording requirements and procedures
- cleaning and sanitation procedures where relevant
- sampling procedures where relevant
- testing procedures where relevant
- routine maintenance procedures where relevant
- spirit handling requirements and procedures where relevant

Evidence Guide

EVIDENCE GUIDE

3. Shut down the bottle filling process	3.1 Bottle filling equipment is shut down according to workplace procedures 3.2 Bottle filling equipment is prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	3.5 Workplace information is recorded in appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify bottle filling requirements

- select, fit and use appropriate personal protective clothing and/or equipment
- confirm supply of necessary materials and services. This may include:
 - confirming gas, compressed air, water, power and vacuum are available to equipment
 - checking product to be bottled meets specification
 - checking bottles meet size and type specification and quality and hygiene standards
- liaise with other work areas, which may include:
 - maintenance personnel
 - quality assurance personnel
 - materials supply
 - cellar
 - bottle supply operators
 - bottle sealing operators
 - bottle capsuling operators
 - labelling operators
- confirm equipment status and condition. This may include completing a test run, making minor adjustments as required and confirming that:
 - cleaning and sanitation processes are completed
 - filling tubes meet specification
 - doser is set up and is operational
 - bottle feeds are filled with correct screws and stars and accurately aligned
 - height of filler is adjusted to suit bottle height
 - lines and equipment are flushed with product to be bottled
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This can involve monitoring:
 - gas pressure
 - vacuum
 - product or wine temperature
 - fill height and volume
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as instructed
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements. This may include removing product or consumables from the line
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- record workplace information
- maintain work area to meet housekeeping standards
- operate the fine filtration process according to enterprise procedures

- take samples according to enterprise procedures
- conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- handle spirits according to enterprise procedures
- identify, rectify and/or report environmental non-compliance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of bottle filling equipment
- key features of bottle filling equipment and components
- links to related processes
- stages and changes which occur during the process
- effect of process stages on end product
- quality characteristics and uses of end product
- effect of product and materials on process outcomes
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to operate labelling equipment	1.1 Product and materials are confirmed and available to meet labelling requirements 1.2 Product and materials are prepared to meet labelling requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is prepared and checked to confirm readiness for use 1.5 Equipment is set to meet labelling requirements
2. Operate and monitor the labelling process	2.1 Labelling equipment is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Bottles are labelled according to specification 2.4 Labelling equipment is monitored to confirm operating condition 2.5 Out-of-specification products, process and equipment performance is identified, rectified and/or reported
3. Shut down the labelling process	3.1 Labelling equipment is shut down according to workplace procedures 3.2 Labelling equipment is prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in appropriate format

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify labelling requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- confirm supply of necessary materials and services. This may include:
 - checking labelling materials meet workplace specifications
 - checking bottles meet size and type specification and quality and hygiene standards
 - confirming compressed air, water and power are available to equipment
- liaise with other work areas, which may include:
 - maintenance personnel
 - quality assurance personnel
 - materials supply
 - bottle supply operators
 - bottle filling operators
 - bottle sealing operators
 - bottle capsuling operators
 - administration or marketing
- prepare product and materials. This may include:
 - heating glue to correct temperature
 - checking glue meets specification according to label type
 - confirming dryness of bottles in readiness for labels
 - check labels meet specification of product eg alcohol content
 - inserting labels, correctly orientated in magazine
 - feeding label web through application mechanism
- confirm equipment status and condition. This may include completing a test run and checking:
 - alignment of bottle feed screws and stars
 - alignment of label pick up and application components
 - out-feed components are aligned correctly and will not damage label
 - label alignment, orientation and height meet specifications
 - timing and alignment of web feed and bottle feed
 - any related coders are correctly set up and operational

REQUIRED SKILLS AND KNOWLEDGE

- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This can involve monitoring:
 - label adhesion
 - label orientation
 - label damage
 - label positioning
 - smooth versus bubbled labels
 - misprinted labels
 - any label or bottle coding applied as part of the process
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as instructed
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements. This may include removing product or consumables from the line
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- record workplace information
- maintain work area to meet housekeeping standards
- clean and sanitise equipment according to enterprise procedures
- take samples according to enterprise procedures
- conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- identify, rectify and/or report environmental non-compliance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of labelling equipment
- key features of labelling equipment and components
- links to related processes

REQUIRED SKILLS AND KNOWLEDGE

- stages and changes which occur during the process
- effect of process stages on end product
- quality characteristics of end product
- product and materials preparation requirements and effect of variation on the process. This may include effect on end results of:
 - glue temperature
 - glue type
 - wet bottles
 - faulty label feed
 - incorrect or inaccurate labels
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services required
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- routine maintenance requirements
- Occupational Health and Safety (OHS) hazards and controls
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown sequence
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- waste handling requirements and procedures
- recording requirements and procedures
- cleaning and sanitation procedures where relevant
- sampling procedures where relevant
- testing procedures where relevant
- routine maintenance procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for labelling • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of

EVIDENCE GUIDE

circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Italicised wording**, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	Workplace information can include: <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules or instructions • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Equipment	Equipment may include: <ul style="list-style-type: none"> • wet gum labellers • pressure sensitive labellers • neck taggers
Product and materials	Product and materials include: <ul style="list-style-type: none"> • filled bottles • labels • glue • neck ties • additional promotional dress
Equipment status	Confirming equipment status involves: <ul style="list-style-type: none"> • checking that hygiene and sanitation standards, safety

RANGE STATEMENT	
	standards and pre-start requirements are met and that equipment is operational <ul style="list-style-type: none"> checking operation or calibration of measuring instrumentation
Services	Services may include: <ul style="list-style-type: none"> power compressed air water
Monitoring the process	Monitoring the process may involve: <ul style="list-style-type: none"> the use of production data, such as performance control charts
Process operation and monitoring functions	Process operation and monitoring functions may be: <ul style="list-style-type: none"> manual or involve the use of a process control system
Control points	Control points refer to those key points in a work process that must be monitored and controlled. These include: <ul style="list-style-type: none"> food safety (critical) quality and regulatory control points inspection points
Information systems	Information systems may be: <ul style="list-style-type: none"> print or screen based

FDFBP3003A Operate the softpack filling process

Modification History

This unit supersedes and is equivalent to FDFBPCSPFB Operate the softpack filling process.
April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to set up, operate and shut down a range of semi-automated and automated equipment involved in the softpack filling process.
------------------------	---

Application of the Unit

Application of the unit	This unit has application in a wine operations bottling and packing environment. It typically targets the worker responsible for applying basic operating principles to the operation and monitoring of a softpack filling process and associated equipment.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to operate softpack filling equipment	1.1 Products and materials are confirmed and available to meet filling requirements 1.2 Products and materials are prepared to meet filling requirements 1.3 Services are confirmed as available and ready for operation 1.4 Softpack filling equipment is prepared and checked to confirm readiness for use 1.5 Equipment is set to meet filling requirements
2. Operate and monitor the softpack filling process	2.1 Softpack filling equipment is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Softpacks are filled according to specification 2.4 Softpack filling equipment is monitored to confirm operating condition 2.5 Out-of-specification product, processes and equipment are identified, rectified and/or reported
3. Shut down the softpack filling process	3.1 Softpack filling equipment is shut down according to workplace procedures 3.2 Softpack filling equipment is prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify softpack filling equipment
- select, fit and use appropriate personal protective clothing and/or equipment
- confirm supply of necessary product, materials and services
- liaise with other work areas, which may include:
 - maintenance
 - quality assurance personnel
 - materials supply
 - cellar
 - laboratory
- prepare product and materials as required. This may include:
 - loading continuous feed softpacks (foil) through infeed and into filler
 - checking softpacks meet specifications (e.g. size and integrity)
 - checking product to be packaged meets specifications (e.g. vintage, temperature and grape variety)
- confirm equipment status and condition. This may include:
 - checking head alignment and operation
 - testing bag weights and volumes
 - completing a test run
 - flushing lines and equipment with product to be packaged
 - making minor adjustments as required
 - confirming cleaning and sanitation processes are completed
 - checking evacuation of air from softpack via vacuum
 - ensuring inert gas release at end of filling cycle
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may include monitoring:
 - continuity of supply of softpacks to filler
 - bag weight and volumes
 - bag quality and integrity (leaks)
 - inert gas release
 - vacuum prior to fill
- monitor supply and flow of product materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as instructed
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements. This may include removing product or consumables from the line.
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation.
- record workplace information

- maintain work area to meet housekeeping standards
- operate the fine filtration process according to enterprise procedures
- take samples according to enterprise procedures
- conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- identify, rectify and/or report environmental non-compliance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of softpack filling equipment
- key features of softpack filling equipment and components
- links to related processes
- stages and changes which occur during the process
- effect of process changes on end product
- quality characteristics of end product
- product and materials preparation requirements and effect of variation on process
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services required
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- lock-out and tag-out procedures
- routine maintenance requirements
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown sequence
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- waste handling requirements and procedures
- recording requirements and procedures
- fine filtration procedures where relevant

- testing procedures where relevant
- routine maintenance procedures where relevant

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the equipment and process for operation	1.1. Materials are confirmed and available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements 1.4. Processing or operating parameters are entered as required to meet safety and production requirements 1.5. Equipment performance is checked and adjusted as required 1.6. Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the process	2.1. The process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The process is monitored to confirm that specifications are met at each stage 2.5. Out-of-specification product or process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, confirming operation of the vacuum pump on the deaerator, setting orifice plate and vernier to deliver syrup and water in the required proportions to the mixer, checking supply of refrigerant and carbon dioxide, setting required temperature and pressure settings, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust process equipment to achieve required outcomes, such as monitoring control points and conducting inspections as required to confirm process remains within specification
- on the deaerator, monitor:
 - water supply
 - vacuum pump operation
 - water level/vacuum level
- at the mixing state, monitor:
 - correct blend ratio for product type
 - brix of the mix
- at the carbonation state, monitor:
 - volume of carbon dioxide injected
 - temperature
 - speed of injection
 - testing carbonation of liquid
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- for a given syrup:water ratio, determine required operating settings to achieve a given brix result
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within

REQUIRED SKILLS AND KNOWLEDGE

level of responsibility

- demonstrate batch/product changeovers
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of each stage of the process, including the relationships between variables, such as pressure, temperature and volume on processing outcomes
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the deaeration, mixing and carbonation process and the effect of outputs on downstream processes, including how each stage of the process affects related stages and how the outputs of this process affect the filling stage
- quality characteristics to be achieved by each stage of the process, including the amount of dissolved air to be removed at deaeration, the typical water:syrup ratios for product types and the volume of carbon dioxide to be dissolved in the aerated product
- quality and condition requirements of inputs and effect of variation on process performance, such as the characteristics of different ingredients and how they behave when processed, e.g. the difference between processing products containing fruit juice compared with those that do not
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the production process, including inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements, including test procedures for brix and carbonation and other tests as required by the process
- contamination/food safety risks associated with the process and related control

REQUIRED SKILLS AND KNOWLEDGE

measures

- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for deaeration, mixing and carbonation
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- safely shut down equipment
- apply food safety procedures to work practices.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment
- work procedures, including advice on safe work practices, food safety, quality and environmental requirements
- information on equipment capacity and operating parameters
- production schedule/batch instructions
- specifications, control points and processing parameters
- process and related equipment and services, including refrigerant and carbon dioxide
- syrup, water and other ingredients as required
- sampling schedules and test procedures and equipment as required
- documentation and recording requirements and procedures
- cleaning procedures, materials and equipment as

EVIDENCE GUIDE	
	required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures	Work must be carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes: <ul style="list-style-type: none"> the Food Standards Code, including labelling, weights and measures legislation legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	Workplace information may include: <ul style="list-style-type: none"> standard operating procedures (SOPs) specifications production schedules and instructions manufacturers' advice standard forms and reports
Equipment	Equipment typically includes: <ul style="list-style-type: none"> a deaerator a continuous flow mixing process a carbonator <p>Carbonation may include both direct injection through pipework and/or gas absorption under refrigerated and pressurised conditions in a carbonator</p>
Shutdown procedures	Shutdown procedures may include: <ul style="list-style-type: none"> cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	Services may need to be confirmed. These depend

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust the roasting process and equipment to achieve required outcomes, such as monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - temperatures
 - throughput/roasting times
 - product levels
 - water quench quantity
 - visually inspecting product, including bean colour
- start, operate, monitor and adjust the grinding process and equipment to achieve required outcomes, such as monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - weight
 - density
 - product levels
 - particle size distribution
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- conduct product/batch changeovers according to enterprise procedures

REQUIRED SKILLS AND KNOWLEDGE

- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- steps and purpose of each stage in the roasting and grinding process
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, basic principles and operation of roasting and grinding system, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- the flow of roasting and grinding process and the effect of product output on downstream processes
- quality characteristics to be achieved by the roasting and grinding process
- varieties of green beans and effect of bean characteristics on roasting and grinding processes
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the production process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste collection and handling procedures related to the process
- basic operating principles of process control where relevant, including the

<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for blending, roasting and grinding • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures to work practices.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • production schedule and batch instructions • specifications, control points and processing parameters • information on equipment capacity and operating parameters • roasting and grinding process and related equipment and services • green beans • sampling schedules and test procedures and equipment as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and

EVIDENCE GUIDE	
	procedures.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2014A Participate in sensory analyses • FDFOP2030A Operate a process control interface • PMSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> the Food Standards Code, including labelling, weights and measures legislation legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> standard operating procedures (SOPs) specifications production schedules and instructions manufacturers' advice standard forms and reports
Materials	<p>Materials include:</p> <ul style="list-style-type: none"> varieties of green coffee beans process and packaging consumables
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> roasters grinding/milling system blenders transfer and storage systems colour meters and destoners
Operation of equipment and processes	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> the use of process control panels and systems

RANGE STATEMENT	
Shutdown procedures	Shutdown procedures may include: <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	Services are appropriate to the process to be operated. Typical examples include: <ul style="list-style-type: none"> • power, steam, water, vacuum, and compressed and instrumentation air

FDFBV2003A Operate an ice manufacturing process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to set up, monitor, and adjust a process to manufacture ice.
------------------------	---

Application of the Unit

Application of the unit	<p>This unit has application in a production environment. It typically targets the production worker responsible for applying basic operating principles to the operation and monitoring of an ice manufacturing process and equipment.</p> <p>This unit is appropriate where the process requires operator monitoring and adjustment. Where the process is highly or fully automated, this unit may not apply.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the ice making equipment and process for operation	1.1. Water suitable for ice manufacture is available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements 1.4. Processing/operating parameters are entered as required to meet safety and production requirements 1.5. Equipment performance is checked and adjusted as required 1.6. Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the ice making process	2.1. The process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The process is monitored to confirm that specifications are met 2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted according to environmental standards 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the ice making process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify ice production requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, checking refrigerant levels, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust process equipment to achieve required outcomes, such as:
 - temperature range
 - ice thickness
 - cycle time
 - head pressures
- monitor ambient temperature and adjust the process as required
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and

REQUIRED SKILLS AND KNOWLEDGE

- the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the stages in the ice making cycle (depending on process, this includes a make and defrost stage)
- water treatment prior to use
- operating requirements, parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- adjustments required to take account of ambient temperature
- contamination/food safety risks and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- storage requirements for packed ice
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for ice manufacture • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures to work practices.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule/batch instructions • specifications, control points and processing parameters • process and related equipment and services • water to be used for ice manufacture • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
<p>Method of assessment</p>	<p>This unit should be assessed together with core units and</p>

Co-requisite units		

FDFCD2001A Conduct winery and or site tours

Modification History

This unit supersedes and is equivalent to FDFCDSWSTB Conduct winery and/or site tours.

September 2012: clarified pre-requisite information.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the cellar door sales stream of the wine sector. It covers the skills and knowledge required to conduct winery and/or site tours for a variety of domestic and overseas visitors.
------------------------	---

Application of the Unit

Application of the unit	This unit applies to cellar door staff of winemaking enterprises that conduct tours of their operations. The unit can apply to wineries of different sizes, locations and product ranges as well as to distilleries. The unit covers the preparation, conduct and evaluation of tours including presentations and monitoring of tour members for occupational health and safety (OHS) and compliance with regulations and procedures to minimise the distribution of pests and diseases.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for tour	1.1 Size, composition and specialised requirements for touring party are established 1.2 Background research is carried out to ensure the tour presentation includes up-to-date and appropriate information 1.3 Tour and materials are planned and prepared to meet customer and enterprise objectives
2. Conduct tour	2.1 Tour group is welcomed and briefed according to workplace procedures 2.2 Members of tour are informed of, and comply with, enterprise OHS regulations and precautions before and during tour 2.3 Presentations given to tour members contain the level of specialised and technical information appropriate to the group's requirements 2.4 Special facilities, services and hospitality arrangements are provided as required 2.5 Presentations are given in a place where tour members can hear easily (where practical) 2.6 Tour members are invited to ask questions and seek further explanation 2.7 The welfare and comfort of tour members is maintained at all times according to workplace procedures
3. Evaluate and assess performance	3.1 Tour members and/or accompanying staff are asked to participate in a review procedure, as required by the enterprise 3.2 Self-assessment of performance is carried out in accordance with workplace procedures 3.3 Positive and negative aspects of the way the tour was conducted are recognised and addressed 3.4 Feedback from tour members is dealt with according to workplace policy

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify tour requirements
- liaise with other work areas. These may include tasting area, public relations, winemaker, cellar, vineyard manager and hospitality coordinator
- apply a high standard of personal presentation. This may include personal hygiene, dress or uniform
- identify requirements of touring party. These may include:
 - date
 - times of arrival and departure
 - other activities either side of the tour
 - members
 - objectives of tour
 - special needs and requests (e.g. wheelchair access)
- conduct effective background research, including up-to-date and accurate information relevant to customer and enterprise objectives
- plan and prepare tour and supporting materials. This may include:
 - mapping out route based on OHS requirements, site activities, weather, customer and enterprise tour objectives
 - checking availability of OHS equipment, such as hard hats, first aid kits and mobile phones
 - confirming availability and operation of microphones and other presentation equipment
 - liaising with site staff and confirming availability of relevant expertise
 - organising and briefing support staff as required
 - preparing handouts and overhead projector slides
 - preparing presentation content, location and timing
 - preparing for special requests
 - coordinating handovers of group to tasting or hospitality areas
- welcome and brief tour group. This may include:
 - identifying group leader and confirming procedures and activities
 - explaining itinerary, route and timing
 - pointing out toilets
 - indicating drink facilities
- inform tour members of enterprise OHS requirements and precautions before the tour. These may involve:

- forklift and other vehicle movements
- hard hats, safety glasses and ear plugs
- operating machinery
- wet floors
- uneven surfaces, steps, pipes and hoses
- liquid, solid and gaseous chemical hazards
- footwear (e.g. flat, practical shoes)
- fire and other emergency procedures
- precautions against sunstroke
- signing in and staying in a group
- children
- monitor tour group activities with regard to:
 - enterprise OHS requirements and precautions
- observe any phylloxera quarantine requirements and processes. These may include:
 - keeping tour groups off vineyards
 - keeping to concrete surfaces, roads and paths
 - providing overshoes
 - providing disinfectant kits
 - drawing tour groups attention to signs
- identify non-compliance and rectify and/or report corrective action as required. This may include:
 - liaising with tour group leader
 - firmly and politely correcting visitor non-compliance
 - refusing to include one or more individuals in a tour, where appropriate
 - arranging alternative activity for individuals left behind
- deliver presentations to tour group. This may include:
 - including technical and specialised information appropriate to group
 - using terminology and examples appropriate to the group
 - storytelling techniques
 - stopping to talk in safe, quiet, shaded locations
 - inviting questions and clarification
 - answering questions accurately and seeking relevant expertise as required
 - utilising visual aids and production equipment
 - including production expertise as required
 - conveying positive body language
 - projecting voice effectively
 - including all of the group by means of eye contact and body language
 - effective use of timing
 - relating information to surroundings
 - effective microphone techniques

- recognise key equipment on site and explain its features and purpose in the production process. Key equipment may include:
 - receival hoppers
 - crushers
 - presses
 - fermenters
 - filters
 - centrifuge
 - casks
 - bottling and softpack filling equipment
 - labeller
 - distillers
 - provide special facilities as requested. These may include:
 - meeting the winemaker
 - seeing specific machinery in operation
 - conducting a tasting of product during the production process
 - accessing private parts of the winery
 - monitor and maintain the welfare and comfort of tour members at all times. This may include monitoring for signs of:
 - heat stress
 - tiredness
 - boredom
 - sickness or injury
- and may include:
- providing water
 - making more or less frequent stops
 - stopping where seats are available
 - changing the route and tour content
 - providing non-emergency first aid (e.g. bandaids)
 - deliver effective customer service
 - deliver tour according to designated time scales
 - maintain the safety and welfare of the group in an emergency situation. This may include:
 - following evacuation procedures
 - using emergency equipment (e.g. fire extinguishers)
 - contacting first aiders and emergency services
 - calling for backup
 - splitting and managing the group
 - remaining calm and controlled
 - using problem-solving techniques
 - identifying contingency plans

- evaluate the success of the tour and personal performance. This may include:
 - actively seeking feedback from tour group and staff
 - receiving negative and positive feedback
 - handling criticism positively and professionally
 - self-evaluation and review
 - identifying areas for improvement and potential solutions
- record workplace information
- maintain work area to meet housekeeping standards
- work cooperatively within a culturally diverse workforce

Required knowledge

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of conducting winery and/or site tours
- link to related work areas and activities
- workplace policies and procedures with regard to:
 - OHS of site visitors
 - emergency procedures
 - customer service
 - public relations and information transfer
 - personal presentation
 - winery and/or site tours
 - customer complaints
- workplace policies and procedures with regard to phylloxera, including:
 - the aphid and its effect on the vine
 - the threat to Australian vineyards and wine industry
 - resistant root stock
 - quarantine areas
 - method of infection (e.g. vine cuttings, soil, machinery, grape products and people)
 - procedures to reduce the risk of spread
 - keeping visitors off vineyard and soil
 - cleaning vehicles
 - overshoes or disinfection of footwear
 - signs and fencing
- principles and techniques in:
 - problem solving
 - planning and organising
 - researching, collating and summarising information
 - verbal presentation of information, including visual aids and microphones as required

- communication and body language
- group facilitation
- time management
- conflict resolution
- monitoring
- evaluation and review
- signs of customer discomfort and corrective action required
- brand and enterprise objectives
- product range and services provided by the enterprise
- information about enterprise operations including:
 - brief history of Australian wine making
 - history of enterprise
 - unique or memorable information specific to the enterprise or site
- wine (and non-wine if applicable) production methods and processes of the enterprise, including:
 - key vineyard techniques and purposes (e.g. night harvesting)
 - soil and climate characteristics (e.g. terra rossa)
 - the features and purpose of key processing equipment, such as press, fillers and fermenters
 - key vinification techniques and purposes (e.g. barrel fermentation, cool fermentation and oak treatment)
 - key facts and figures (e.g. litres per tank and number of bottles per year)
- procedures and responsibility for reporting problems
- recording requirements and procedures
- housekeeping requirements and procedures.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and	Evidence of ability to:

EVIDENCE GUIDE	
evidence required to demonstrate competency in this unit	<ul style="list-style-type: none"> • establish composition and requirements of tour group prior to the tour • plan tour in advance, including liaising with staff in areas to be visited, preparation of handouts, and ensuring availability of any required protective equipment for tour members • conduct welcome and pre-tour briefing, including giving information on OHS and any other special procedures • conduct tour according to planned route and timing, including answering questions and making presentations • monitor tour members during tour for OHS and security compliance • demonstrate knowledge and skill in emergency procedures, including fire, evacuation and situations requiring first aid. This includes knowledge of and contact procedures for appropriate emergency resource personnel in the enterprise • seek feedback from tour members at the end of the tour and evaluate tour.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.

EVIDENCE GUIDE	
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • workplace policy and procedures in regard to conducting winery and/or site tours • specifications • work notes • instructions or verbal direction from manager, supervisor or senior staff
Tour site	<p>The tour site may be all or part of a winery or distillery and may include:</p> <ul style="list-style-type: none"> • vineyards • cellar operations • warehouse • laboratory. <p>The size, type and location of winery or production site may vary.</p>
Tour clientele	<p>Tour clientele may include:</p> <ul style="list-style-type: none"> • people from a range of social, cultural or ethnic

RANGE STATEMENT	
	<p>backgrounds, age and physical and mental abilities. English may not be their first language</p> <ul style="list-style-type: none"> • VIPs • wine industry personnel • consumers
Products	<p>Products may include:</p> <ul style="list-style-type: none"> • wines and spirits • associated merchandise (e.g. corkscrews and glasses) • enterprise promotional merchandise (e.g. clothing and souvenirs)
Team members	<p>Team members may include:</p> <ul style="list-style-type: none"> • people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
Staff	<p>Staff may:</p> <ul style="list-style-type: none"> • be full-time, part-time or casual • work in other areas of the enterprise
Working conditions	<p>Working conditions may be:</p> <ul style="list-style-type: none"> • routine, busy or quiet
Information systems	<p>Information systems may be:</p> <ul style="list-style-type: none"> • print or screen based
Equipment	<p>Equipment may vary, but should include that which is required to conduct winery and/or site tours according to workplace policies and procedures, and may include:</p> <ul style="list-style-type: none"> • hard hats • microphone • visual aids • specific technical equipment required to illustrate a point • mobile phone • water bottle
Presentations	<p>Presentations may include:</p> <ul style="list-style-type: none"> • history of the enterprise • history of production in Australia • grape varieties • viticultural year • production methods

RANGE STATEMENT	
	<ul style="list-style-type: none"> • production equipment • bottling and packaging methods
Special arrangements	<p>Special arrangements may include:</p> <ul style="list-style-type: none"> • a specialised product tasting • provision of food • presentation of detailed information from the winemaker • arranging special privileges
Emergency situations	<p>Emergency situations may include:</p> <ul style="list-style-type: none"> • accidents or sickness • evacuations due to fire, gas leaks, chemical spill and bomb threats

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Provide general overview of the Australian wine industry	1.1 A brief history of Australian viticulture and wine production is explained to customers on request 1.2 The main wine growing regions of Australia are identified and their general distinguishing features are explained in response to general customer queries 1.3 The position of Australian wines in the world market is explained 1.4 Procedures to minimise the risk of cellar door sales visitors bringing phylloxera into quarantine areas are explained
2. Provide general regional information	2.1 Grape varieties commonly grown in the region are identified 2.2 Location of local tourist bureau and other common tourist attractions, including special events, are explained to customers 2.3 A brief outline of local history is explained to customers 2.4 Details of local facilities are kept current and provided to customers on request 2.5 Contact names and locations of other local wineries are provided to customers on request 2.6 Local tourist information brochures are kept current and are displayed in the customer sales area 2.7 Customer needs are anticipated and information offered as required
3. Provide general information about the enterprise and its products	3.1 A brief history of the enterprise is explained to customers 3.2 The role of the cellar door sales department within the overall operation of the enterprise is identified 3.3 The countries to which enterprise products are exported are identified and general information regarding exported products is provided to customers 3.4 The common Australian wine awards are distinguished and those that apply to the enterprise product range are explained to customers 3.5 Key wine industry bodies, events and their functions are identified

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify wine industry tourism promotion requirements
- liaise with other work areas. This may include:
 - other wineries
 - tourist information bureaux
 - local attractions and facilities
- provide tourism information to winery visitors. This may include:
 - regular research and revision to ensure facts are accurate and up to date
 - accessing workplace information to find answers
 - drawing customers' attention to support materials (e.g. maps, pamphlets and books)
 - answering questions
 - anticipating customer needs and requirements
 - using terminology, pitch and levels appropriate to customer needs
 - using discretion and sensitivity
 - accurately identifying specific customer needs using listening, questioning and observation techniques (e.g. special dietary requirements)
 - selecting specific information or summary facts to meet customer needs succinctly
 - converting figures into a meaningful format (e.g. imperial or metric, and currency)
 - sketching maps and diagrams
 - writing information down accurately and legibly (e.g. addresses and telephone numbers)
 - balancing attention between several customers and groups)
- communicate to different customers. This may include:
 - verbal skills, public speaking and articulation
 - body language (e.g. eye contact)
 - listening skills
 - observation techniques
- provide information on phylloxera as required. This should include:
 - what phylloxera is and how it affects the vines
 - potential risk to Australian wine production
 - quarantine areas
 - procedures cellar door sales visitors can follow to reduce the risk of carrying the insect
 - it may include anticipating customer requirements and/or maintaining supplies of information leaflets

- interpret Australian wine labels in terms of the label integrity program. This will include identifying:
 - region of production
 - vintage
 - grape variety or varieties
 - additives
- maintain cellar door information resources. This may include:
 - identifying information that it likely to date quickly (e.g. menus and prices)
 - dating information sources in line with workplace procedures
 - removing, replacing and correcting damaged, inaccurate and out-of-date materials as required
 - sourcing replacement, new material in response to customer request and/or workplace requirements
 - researching and identifying up-coming events (e.g. festivals and new restaurant openings)
 - cleaning and tidying display areas
 - displaying information in an accessible and understandable format
 - creating information lists and documents
 - identify the role of the cellar door sales function within the overall operation of the enterprise
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- brief history of Australian wine production, including:
 - who first planted vines in Australia, where and when
 - how the wine industry developed
 - structure of the industry
 - key successes and challenges (e.g. phylloxera)
 - first exports
 - trends in styles produced
 - affect of immigrant tastes on wine styles
- location and key distinguishing features of Australia's main wine growing regions. Features may include:
 - climate
 - soil
 - grape varieties
 - wine styles
 - specific viticultural and vinification techniques

- key brands
- Key features of local wine growing region. Features may include:
 - climate
 - soil
 - grape varieties
 - wine styles
 - specific viticultural and vinification techniques
 - key brands
- position of Australian wine in the world market. This may include:
 - quantity and value of Australian exports
 - major importers of Australian wine
 - key brands exported
 - label interpretation and Australian wine label integrity program
- the threat of phylloxera to the Australian wine industry, including:
 - quarantine areas
 - effect of phylloxera on vine and wine
 - steps winery and vineyard visitors can take to minimise risk of transferring infection, including:
 - planning visits to phylloxera free areas before infected vineyards
 - avoiding the vineyard where possible
 - wearing disposable shoes
 - keeping to sealed roads and paths
- regional and local history. This may include:
 - Aboriginal sites
 - settlement dates and nationalities
 - populations
 - wine production and vineyards
- local events. This may include:
 - dates and times
 - features and expectations
 - booking procedures
 - information sources
 - locations
- local attractions, facilities and essential services. This may include:
 - telephone numbers
 - location and travel time
 - features
 - opening and running times
 - provision for special needs
- key Australian and international wine industry events and awards and their purpose. This

may include:

- basic understanding of judging process
- enterprise objectives and involvement
- key Australian wine industry bodies, their purpose and contact details
- key wine industry media, including:
 - title
 - target audience
 - issue frequency
 - availability
- enterprise features. These may include:
 - history
 - parent company and/or owners
 - size (e.g. hectares and production capacity)
 - key brands
 - product and service range
 - exports, overseas distributors
- enterprise's and competitors' product range and features, including:
 - styles
 - flagship brands
 - price
- workplace policy and procedures with regard to:
 - customer service and interaction
 - providing information
 - providing advice
 - OHS hazards and controls
 - procedures and responsibility for reporting problems
 - recording requirements and procedures.

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • access and identify information on the history and range of enterprise, regional and Australian wines • provide tourism information appropriate to the needs of visitors to the cellar door • explain phylloxera threats and prevention measures • maintain cellar door information resources and display areas • liaise with internal and external contacts, including: • other departments in the enterprise • other wineries • tourist information bureaux • local attractions and facilities.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and

EVIDENCE GUIDE	
	procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • workplace policy and procedures in regard to providing tourism information • specifications • work notes • instructions or verbal direction from manager, supervisor or senior staff
Customers	<p>Customers may include:</p> <ul style="list-style-type: none"> • people from a range of social, cultural or ethnic backgrounds and physical and mental abilities. English may not be their first language • regular, new, external or enterprise personnel
Team members	<p>Team members may include:</p> <ul style="list-style-type: none"> • people from a range of social, cultural and ethnic

RANGE STATEMENT	
	backgrounds and physical and mental abilities
Staff	<p>Staff may:</p> <ul style="list-style-type: none"> • be full time, part time or casual • work in other areas of the enterprise
Trading and other working conditions	<p>Trading and other working conditions may be:</p> <ul style="list-style-type: none"> • routine, busy or quiet
Information systems	<p>Information systems may be:</p> <ul style="list-style-type: none"> • print or screen based
Information sources	<p>Information sources may be:</p> <ul style="list-style-type: none"> • available to the public • for enterprise personnel reference only
Australian wine regions	<p>Australian wine regions may include, but are not limited to:</p> <ul style="list-style-type: none"> • Barossa • Coonawarra • Riverland • Rutherglen • Yarra Valley • Hunter Valley • Margaret River • Launceston (alternatively the following could be put in brackets next to the relevant region) • Clare • McLaren Vale • Langhorne Creek • Padthaway • Pyrenees • Mudgee • Swan Valley • Cowra • MIA • Sunraysia • Gippsland • Granite Belt
Local events	<p>Local events may include:</p> <ul style="list-style-type: none"> • festivals

RANGE STATEMENT	
	<ul style="list-style-type: none"> • races • shows
Attractions and facilities	<p>Attractions and facilities may include:</p> <ul style="list-style-type: none"> • hotels • accommodation • train, bus and taxi services • restaurants and cafes • shops (e.g. grocery, police, hospitals, doctors, cinemas, theatres, petrol stations and ATMs) • other wineries
Key wine industry events and awards	<p>Key wine industry events and awards may include:</p> <ul style="list-style-type: none"> • Wine Australia • Tasting Australia and relevant regional events • International Wine Challenge • Jimmy Watson Trophy • regional and capital city shows and awards
Wine industry bodies	<p>Wine industry bodies include:</p> <ul style="list-style-type: none"> • Winemakers Federation of Australia (WFA) • Australian Wine & Brandy Corporation (AWBC) • Wine Grape Growers Council of Australia (WGCA) • Wine Industry National Education and Training Advisory Council (WINETAC) • Cooperative Research Centre for Viticulture (CRCV) • Phylloxera and Grape Industry Boards
Wine industry media	<p>Wine industry media may include:</p> <ul style="list-style-type: none"> • the Wine Industry Journal • Wine Spectator • Grapegrower and Winemaker • Decanter • Wine and Spirit International • Wine Magazine • Wine State Magazine
Distinguishing features	<p>Distinguishing features include:</p> <ul style="list-style-type: none"> • Climate • varieties of grape grown • styles of wine produced • size and characteristics of wine region

RANGE STATEMENT	
History	History may include: <ul style="list-style-type: none"> • founders • ownership • significant dates
Materials	Materials may include: <ul style="list-style-type: none"> • leaflets • maps • magazines • books

Unit Sector(s)

Unit sector	Wine operations
--------------------	-----------------

FDFCD2003A Evaluate wines (standard)

Modification History

This unit supersedes but is not equivalent to FDFCDSEWB Evaluate wines (standard).
April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the cellar door sales stream of the wine sector. It covers the skills and knowledge required to complete a standard sensory evaluation of wine.
------------------------	---

Application of the Unit

Application of the unit	This unit applies to a cellar door sales operation in the wine industry. The covers knowledge of grape varieties and wine styles, the provision of correct tasting arrangements for wines, identification of wine styles, grape varieties and wine faults, and the ability to communicate basic information about wine styles.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement appropriate tasting conditions	1.1 Each wine style is tasted under the most favourable conditions for that style 1.2 Tasting area and equipment are prepared to facilitate tasting 1.3 Appropriate precautions regarding personal preparation are completed 1.4 Wines are tasted in the most favourable order to show characters of each wine
2. Identify key styles and grape varieties using sensory evaluation techniques	2.1 Correct tasting procedures using sight, smell and taste are followed 2.2 The four key taste sensations of the tongue are identified 2.3 Characteristics of the key wine styles and grape varieties with regards to sight, smell and taste are explained 2.4 Wine is identified according to style and grape variety 2.5 The quality and characteristics of the wine style are evaluated and described 2.6 Evaluation conditions are as favourable as possible to minimise impact on outcomes
3. Identify basic wine faults	3.1 Basic wine faults are recognised and reported 3.2 The cork is inspected and faults identified
4. Communicate basic information about wine styles	3.3 Characteristics of a range of basic wine styles are verbally outlined 3.4 Distinctions between similar wine styles are verbally outlined 3.5 Questions are dealt with appropriately 3.6 Key factors contributing to the style and flavour of wine are stated and explained

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to determine wine evaluation requirements
- confirm supply of necessary products and materials
- prepare product and materials as required
- confirm equipment status and condition as required
- implement and maintain appropriate tasting conditions. This will include consideration of:
 - environment:
 - eradication of odours
 - natural light
 - white surfaces
 - room temperature
 - ventilation
 - noise and distraction eradication
 - taster:
 - nil perfume
 - clean palate
 - refreshed and alert
 - glasses:
 - appropriate shape and style
 - clean and polished
 - neutral odours
 - undamaged
 - equipment:
 - spittoons
 - water
 - wine:
 - optimum temperature
 - opening and breathing
 - decanting
- tasting wines in the most appropriate order. This may include consideration of:
 - colour
 - age
 - sweetness

- weight and body
- still or sparkling
- alcohol content
- flavour
- open bottles safely. This may include:
 - clean cutting and removal of foil
 - ensuring lip of bottle is free from dirt or debris
 - operating a corkscrew
 - removing cork cleanly
 - taking necessary precautions to avoid cork disintegration
 - techniques specific to sparkling wine
- pour tasting samples. This should be completed cleanly and without drips and ensure quantities poured are appropriate to the wine style tasted
- complete a visual appraisal of wine. This may include:
 - wine swirling and glass handling techniques
 - use of light and background
 - assessing clarity and recognising faults
 - describing intensity and type of colour
 - identifying ‘legs’ or ‘tears’ to assess alcohol content
- complete a smell or nose appraisal of the wine, including:
 - implementing techniques to release the wine aromas
 - recognising ‘off’ odours
 - assessing intensity of aromas
 - describing smell characteristics (e.g. fruity, vegetal and spicy)
 - assessing age of wine
- complete a taste appraisal of the wine. This may include:
 - implementing techniques to release wine flavours, such as sucking in air and swirling wine over all the taste buds in the mouth and tongue
 - spitting technique
 - recognising acidity
 - recognising sweetness
 - recognising weight or body
 - recognising length
 - describing intensity and types of flavour
 - recognising common wine faults
 - assessing the balance of wine features on the palate
- evaluate the quality of wines tasted. This may include consideration of:
 - wine faults
 - length
 - balance

- describe how wine is made and identify the key factors affecting the resulting wine style
- verbally describe a wine style
- answer questions about wines tasted
- taste wines 'blind' and accurately identify:
 - key wine styles
 - key grape varieties
- consistently identify key wine styles and grape varieties using sensory evaluation techniques and 'trigger' characteristics, for example:
 - fruit characteristics:
 - black currants (Cabernet)
 - petrol (Riesling)
 - balance:
 - higher acidity (cooler climate)
 - higher alcohol (warmer climate)
- record workplace information
- maintain work area to meet housekeeping requirements
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of standard sensory evaluation of wines
- links to related work areas and activities
- quality characteristics of equipment and materials
- trigger characteristics of key wine styles and grape varieties
- factors affecting the outcomes of a tasting and optimum conditions required, including:
 - environment
 - taster
 - glasses
 - equipment
 - wine preparation
- factors contributing to the order in which various wine styles should be tasted. This may include:
 - still versus sparkling
 - aged versus young
 - dry versus sweet
 - non-oak versus oak

- light in body versus full-bodied
- white versus rosé versus red
- lower alcohol versus higher alcohol
- wine sensory evaluation techniques and procedures, with reasoning, including:
 - handling of glass and swirling techniques
 - use of light and white background
 - visual appraisal
 - sniffing and nosing
 - tasting and spitting
 - pey taste sensations
 - cleansing palate between tastings
- key wine features, how they vary and how they can be identified using tasting techniques. These may include:
 - wine health and quality (e.g. taints and deposits)
 - sweetness
 - acidity
 - alcohol
 - flavour and aroma
 - tannin
 - body and weight
 - balance
 - length
- factors which affect the style and quality of wine, including:
 - climate
 - soil
 - grape variety
 - viticultural techniques
 - storage
 - vinification techniques
- preparation and serving conditions
- basic wine faults, features and causes, including:
 - oxidation
 - tartrates
 - cloudiness
 - cork faults
 - excessive sulphur dioxide
- appropriate terminology for describing wine to customers and wine industry personnel
- information sources on wine tasted
- interpretation of labels
- occupational health and safety (OHS) hazards and controls

- procedures and responsibility for reporting problems
- housekeeping requirements and procedures
- recording requirements and procedures.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • consistently establish appropriate conditions for tasting wines • evaluate wines in an appropriate manner for sight, smell and taste, and explain results • correctly identify wines for style, grape variety and quality, and evaluate and explain characteristics • identify basic wine faults • communicate basic information about wine styles.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.

EVIDENCE GUIDE	
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>

Wine operations

FDFCD2004A Perform cellar door stock control procedure

Modification History

This unit supersedes and is equivalent to FDFCDSSCPB Perform cellar door stock control procedures.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been customised for the cellar door sales stream of the wine sector. It covers the skills and knowledge required to receive, unpack and dispatch goods and to participate in stocktaking.
------------------------	--

Application of the Unit

Application of the unit	This competency applies to cellar door operations in the wine industry. The unit covers receiving, dispatching, ordering, storing and monitoring of wine and other products sold through the cellar door operation.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	FDFCD2003A	Evaluate wines (standard)
---------------------------	------------	---------------------------

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive and process incoming goods	1.1 Cleanliness and orderliness in receiving bay is maintained according to workplace policy 1.2 Work is conducted in accordance with workplace environmental guidelines 1.3 Goods are unpacked using correct techniques and equipment in line with workplace policy 1.4 Packing materials are removed and disposed of promptly according to workplace policy 1.5 Incoming stock is accurately checked and validated against purchase orders and delivery documentation according to workplace policy 1.6 Items received are inspected for damage, quality, use-by dates, breakage or discrepancies and recorded according to workplace policy 1.7 Stock levels are accurately recorded on workplace stock systems, according to workplace policy 1.8 Secure storage of stock is arranged according to workplace policy and government legislation 1.9 Stock is dispatched to appropriate area as required 1.10 Stock price and code labels are applied when required according to workplace policy
2. Rotate stock	2.1 Stock rotation procedures for merchandise and wrapping and packing materials are carried out routinely and accurately according to workplace policy 2.2 Excess stock is placed in storage or disposed of according to workplace policy 2.3 Safe lifting and carrying techniques are maintained in line with workplace occupational health and safety (OHS) policy and government legislation
3. Participate in stocktake	3.1 Stocktaking and cyclical counts are assisted with according to workplace policy and procedures 3.2 Stock records documentation is completed accurately according to workplace stock control system 3.3 Discrepancies in stock are recorded and reported 3.4 Electronic recording equipment, where required, is operated and maintained according to manufacturer specifications
4. Reorder stock	4.1 Minimum stock levels are identified according to workplace policy 4.2 Stock requisition forms or electronic orders are completed accurately

ELEMENT**PERFORMANCE CRITERIA**

	4.3 Undelivered stock orders are identified on stock system and followed up without undue delay
5. Dispatch goods	5.1 Stock to be returned to supplier, warehouse is identified and labelled with date, supplier and reason for return, or referred to management if required
	5.2 Credit request documentation is completed according to workplace procedure, as required
	5.3 Stock is stored securely while awaiting dispatch
	5.4 Delivery documentation is completed according to workplace procedures
	5.5 Special delivery instructions are noted
	5.6 Items are packed safely and securely to avoid damage in transit

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify stock control requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product, equipment and materials
- liaise with other work areas (e.g. warehouse)
- confirm equipment status and condition, as required
- consistently apply workplace policies and procedures, industry codes of practice, relevant legislation and statutory requirements in regard to stock control
- consistently apply safe work practices in the manual handling and moving of stock, according to OHS legislation, regulations and codes of practice
- interpret and apply manufacturer instructions with regard to handling stock and using relevant equipment
- receive incoming goods according to workplace policies and procedures. This may include:
 - keeping goods separate from storeroom stock
 - ensuring stock does not block paths or fire exits
 - correctly identifying stock using labels and packaging
 - interpreting delivery notes
 - checking goods against delivery note
 - identifying discrepancies
 - confirming discrepancies with delivery person
 - implementing theft minimisation procedures
- process incoming goods according to workplace procedures. This may include:
 - unpacking goods
 - storing in correct location
 - rotating stock
 - inputting, updating stock records
 - disposing of packaging
- dispatch outgoing goods according to workplace procedures. This may include:
 - interpreting dispatch documentation
 - selecting and picking goods
 - checking product quality and specification
 - packaging, wrapping and labelling for safe transit
 - completing paperwork
 - updating stock records

- storing safely ready for pick up
- rotate stock and reorder and maintain stock levels according to workplace policies and procedures. This may include:
 - checking sell-by dates, vintages and product quality and packaging and label design
 - checking and coordinating shelf, fridge and storeroom stock
 - identifying and removing faulty products
 - interpreting stock and order schedules
 - calculating stock requirements
 - completing stock ordering documentation (manual or electronic)
 - liaising with suppliers
 - correctly identifying product specifications
- accurately and effectively assist with stocktaking and cyclical counts according to workplace policies and procedures. This may include:
 - isolating storage areas
 - correctly identifying and recording product specifications
 - identifying correct quantities
 - completing accurate calculations
 - monitoring stock movement and sales
 - including all stock (e.g. displays, fridge, storeroom and shelves)
- interpret and process information accurately and responsibly
- apply skills and techniques in following set routines and procedures
- correctly and effectively use electronic labelling, ticketing and stocktaking equipment as required
- apply communication and numeracy skills associated with:
 - stock records and delivery and dispatch documentation
 - stock counts and units
- shut down equipment as required
- record workplace information
- maintain work area to meet housekeeping standards
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of stock control
- links to related work areas and activities
- quality characteristics of products and packaging materials

- OHS hazards and controls
- operational aspects of workplace policies and procedures in regard to:
 - stock control
 - stock levels and excess stock
 - stock rotation
 - ordering stock
 - product quality
 - packaging standards
 - correct unpacking of goods
 - out-of-date, missing or damaged stock
 - equipment use and maintenance
 - stock location
 - stock price and code labelling
 - correct handling and storage of goods
 - delivery documentation
 - stock record documentation
- dispatch documentation
- suppliers (external and warehouse)
- stocktaking and cyclical counts
- manual handling and lifting techniques
- basic legislation and statutory requirements, including:
 - serving and selling liquor (cellar door sales only)
 - industry codes of practice
 - consumer law (cellar door sales only)
 - visitor and customer OHS as they apply in the workplace
- likely causes of inaccuracies and preventive or corrective action required
- procedures and responsibility for reporting problems
- housekeeping requirements and procedures
- recording requirements and procedures.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • ensure incoming goods are received, unpacked, checked and stored correctly • correctly undertake pricing, coding and tagging, if required • follow correct stocktaking procedures • monitor, rotate and re-order stock as required • ensure stock returns to suppliers are dispatched correctly and required documentation completed.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures. including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.

EVIDENCE GUIDE	
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. FDLCD2005A Sell cellar door products and services

Modification History

This unit supersedes and is equivalent to FDLCDSSPSA Sell cellar door products and services.

September 2012: updated equivalent imported pre-requisite Unit.

April 2012: Minor typographical corrections.

Unit Descriptor

<p>Unit descriptor</p>	<p>This specialist unit has been developed for the cellar door sales stream of the wine sector. It covers the skills and knowledge required to sell. It encompasses the key selling skills of approaching the customer, advising on products and services, and conducting and closing a sale.</p> <p>This unit is based on the national cross-sector sales units of competency SIRXSL001A Sell products and services, and SIRXSL002A Advise on products and services.</p>
-------------------------------	---

Application of the Unit

<p>Application of the unit</p>	<p>This unit applies to cellar door sales personnel who are required to sell wine and other products and services to cellar door visitors. Products sold may include wine and other produce grown at the cellar door site, from other company sites, and from external suppliers.</p> <p>The unit covers the skills to sell cellar door products and services through evaluation of customer needs and requirements using communication skills and detailed and specialised product knowledge of wines and other cellar door products and services, including winery tours, private tastings and facilities available to visitors.</p>
---------------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	FDFCD2003A	Evaluate wines (standard)
	SIRXCCS202	Interact with customers
	SITHFAB009A	Provide responsible service of alcohol

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<ul style="list-style-type: none"> • 1. Develop product and service knowledge 	<ul style="list-style-type: none"> • 1.1 Knowledge of the use, purpose and application of products and services is developed and maintained • 1.2 Knowledge of products and services is conveyed to other team members as required • 1.3 Comparisons between available products and services are researched and applied, including brand options, features and price • 1.4 Knowledge is developed of competitors' product and service range and pricing structure • 1.5 Experienced sales staff are consulted or product information researched to increase product and service knowledge
<ul style="list-style-type: none"> • 2. Approach customer 	<ul style="list-style-type: none"> • 2.1 Timing of customer approach is determined and applied • 2.2 Effective sales approach is identified and applied • 2.3 Positive impression is conveyed to arouse customer interest • 2.4 Knowledge of customer buying behaviour is demonstrated
<ul style="list-style-type: none"> • 3. Gather information 	<ul style="list-style-type: none"> • 3.1 Questioning techniques are applied to determine customer buying motives • 3.2 Listening skills are used to determine customer requirements • 3.3 Non-verbal communication cues are interpreted and clarified • 3.4 Customers are guided to a product range that matches their identified buying motives and requirements • 3.5 Customers are identified by name where possible
<ul style="list-style-type: none"> • 4. Sell benefits 	<ul style="list-style-type: none"> • 4.1 Customer needs are matched to appropriate products and services • 4.2 Knowledge of product or service features and benefits are communicated clearly to customers • 4.3 Specific requirements relating to products or services are described to customers • 4.5 Routine customer questions about products are answered accurately and honestly • 4.6 Customers are referred to more experienced, senior sales staff or to appropriate product specialists as required
<ul style="list-style-type: none"> • 5. Overcome objections 	<ul style="list-style-type: none"> • 5.1 Customer objections are identified and accepted • 5.2 Objections are categorised into price, time and product or service characteristics • 5.3 Solutions or alternatives are offered to customers according to workplace policy • 5.4 Problem solving is applied to overcome customer objections
<ul style="list-style-type: none"> • 6. Close sale 	<ul style="list-style-type: none"> • 6.1 Customer buying signals are monitored, identified and responded to appropriately

ELEMENT	PERFORMANCE CRITERIA
<ul style="list-style-type: none">7. Maximise sales opportunities	<ul style="list-style-type: none">6.2 tomers are encouraged to make purchase decisions6.3 opriate method of closing sale is selected and applied7.1 ortunities for making additional sales are recognised and applied7.2 tomers are advised of complementary products or services according to identified customer needs7.3 sonal sales outcomes are reviewed to maximise future sales

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify products and services, selling requirements and develop product and service knowledge
- confirm supply of necessary products and services
- liaise with other work areas
- prepare products and services as required
- identify out-of-specification products and services or non-compliance with workplace or legal requirements
- take corrective action in response to out-of-specification products or services or non-compliance with workplace or legal requirements
- report and/or record corrective action
- consistently apply appropriate and effective sales approaches. This should take into account workplace policy and procedures, customer behaviour or buying signals and other cellar door activity. The approach should include appropriate and effective:
 - timing
 - comments and questions
 - style, image and interest
 - listening techniques
 - starting point for product focus
- accurately determine customer needs and buying motives. This may include:
 - questioning techniques
 - active listening skills
 - product tasting strategy
 - observation of customer behaviour or details
- identify appropriate product or service features and match associated benefits to customer's needs
- consistently apply detailed and specialised product knowledge to provide accurate advice according to the needs of the customer. This should demonstrate consideration of the amount of detail required and appropriate terminology
- seek information from product or service resources as appropriate (e.g. specialist or experienced colleagues, other enterprise departments, product manufacturer or service provider)
- overcome customer objections. This will include:
 - accurately identifying objections (e.g. taste, style, price and delivery)
 - applying problem-solving techniques and product or services knowledge to identify

- possible solutions or alternatives
- offering solutions or alternatives for customer consideration
- close sale effectively and appropriately. This should include:
 - recognising and responding to customer buying signals
 - providing advice and encouragement to facilitate the customer’s decision to buy
 - recognising when a sale is inappropriate and using alternative techniques to ensure customer leaves with a positive image of the brand or enterprise
- maximise sales opportunities. The sales opportunities should be of the brand or enterprise products in this or other retail outlets. Activity may include:
 - recognising opportunities for additional sales through effective listening, questioning and observation techniques
 - identifying relevant complementary products or services and informing the customers when appropriate
 - conveying the appropriate brand or enterprise image at all times through presentation and behaviour
 - evaluating and proactively improving customer service and sales techniques
- handle difficult customers
- consistently apply workplace policy and procedures and industry codes of practice in regard to customer service and selling products and services
- develop, maintain and convey product and service knowledge to customers and other staff members as required
- research and make comparisons between products and services. This should include:
 - own products and services
 - products and services of appropriate competitors
 - local and regional variations
 - price
 - characteristics or style (e.g. vintage variation)
 - comparisons with key international products, if required
- record workplace information
- maintain work area to meet housekeeping standards
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- range of products and services available from the sales outlet or enterprise
- wine product features. These may include:

- product style and taste characteristics
- product awards
- vintage features or variations
- ready to drink or cellaring requirements
- appropriate food and/or occasions
- optimum serving requirements
- appropriate alternatives at varying price points
- stock availability
- comparable product of competitors
- workplace customer service features. These may include:
 - hospitality or private tastings
 - winery tours
 - facilities
 - ordering process
 - payment method and processes
 - delivery and freight options or procedures and price, including international services
 - opening times
- promotional and brand objectives of the enterprise's cellar door
- allocated duties and responsibilities
- information sources (e.g. product lists, colleagues' expertise and promotional documents)
- customer types and needs, including:
 - customer buying motives (e.g. functional and psychological)
 - buying occasions (e.g. dinner party, barbeque and/or celebration)
 - buying behaviour and clues
 - individual and cultural differences
 - demographics, lifestyle and/or income
- selling techniques, including:
 - questioning and active listening techniques
 - sales approaches
 - identifying customer needs
 - features and benefits
 - identify and overcoming objections
 - closing sales
 - maximising sales and add-on products and services
 - communication (e.g. body language, questioning and listening)
 - problem solving
- legislation and statutory requirements as they apply in the workplace, including:
 - serving or selling liquor
 - industry codes of practice
 - consumer law

- customer occupational health and safety (OHS)
- procedures and responsibility for reporting problems
- housekeeping requirements and procedures
- recording requirements and procedures
- OHS hazards and controls.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • demonstrate knowledge of range of wine, other products and services sold through cellar door • demonstrate sufficient knowledge of competitors' products and services to allow effective and positive comparison to a customer of own products and services • gather information on customer requirements • match customer requirements to appropriate type and price range of wine, other product or service • correct identification of support personnel and product specialists • close sales.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.

EVIDENCE GUIDE	
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • workplace policy and procedures in regard to selling products and services • specifications • work notes • instructions or verbal direction from manager, supervisor or senior staff
Products	<p>Products may include:</p> <ul style="list-style-type: none"> • wines and spirits and associated merchandise (e.g. corkscrews and glasses) • a range of enterprise promotional merchandise (e.g. clothing and souvenirs) • a range of regional tourism merchandise (e.g. maps, postcards, art and craft objects)
Product knowledge	Product knowledge may include:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • product style and characteristics • optimum serving condition • cellaring potential • storage requirements • stock availability • food and occasion matches • vintage characteristics • production techniques • price • discounts • special offers • sizes
Services knowledge	<p>Services knowledge may include:</p> <ul style="list-style-type: none"> • winery tours • opening hours • delivery or freight services • payment methods • winery newsletter and mail order facility • functions • hospitality and conference facilities
Specific requirements relating to products or services	<p>Specific requirements relating to products or services may include:</p> <ul style="list-style-type: none"> • serving • storage • safety • tour schedules • delivery costs
Team members	<p>Team members may include:</p> <ul style="list-style-type: none"> • people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
Customers	<p>Customers may include:</p> <ul style="list-style-type: none"> • random visitors • regular clients, • organised groups • enterprise personnel • people from a range of social, cultural or ethnic backgrounds and physical and mental abilities. English may not be their first language. Buying or

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<ul style="list-style-type: none"> • 1. Store and handle products 	<ul style="list-style-type: none"> • 1.1 Products are cellared and stock is rotated according to product knowledge and workplace policy • 1.2 Sediments and cork characters associated with ageing products are managed according to individual product and workplace requirements
<ul style="list-style-type: none"> • 2. Set up product tasting area 	<ul style="list-style-type: none"> • 2.1 Products are prepared for tasting using techniques according to product knowledge and workplace procedures • 2.2 Tasting equipment suitable to product and tasting requirements is prepared and placed ready for use by customers • 2.3 Adequate supplies of suitable support materials are prepared and placed ready for use
<ul style="list-style-type: none"> • 3. Conduct product tastings 	<ul style="list-style-type: none"> • 3.1 Customer preferences are established using communication techniques and support materials • 3.2 Customers are encouraged to sample preferred product range in the most beneficial order to experience product characters effectively • 3.3 Customers are given time and privacy to sample each product and make a decision • 3.4 Customers are encouraged to ask questions and/or pass opinions on products • 3.5 Customer queries are answered accurately and comprehensively, or referred to another information resource • 3.6 Common product faults are identified and any associated customer dissatisfaction is handled in a positive manner according to workplace policy and procedures
<ul style="list-style-type: none"> • 4. Serve tasting samples 	<ul style="list-style-type: none"> • 4.1 Product is opened using techniques and procedures suitable to product characteristics • 4.2 Product faults are identified and rectified and/or reported according to workplace procedures • 4.3 Product is poured and presented to the customer for tasting according to legal regulations and workplace policy • 4.4 Waste is collected and disposed of according to workplace procedures • 4.5 Work is conducted in accordance with workplace environmental guidelines
<ul style="list-style-type: none"> • 5. Maintain product in optimum condition 	<ul style="list-style-type: none"> • 5.1 Open product is maintained according to workplace procedures • 5.2 Sealed product is stored according to workplace procedures

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify standard wine tasting and preparation requirements
- confirm supply of necessary products, equipment and materials, their status and condition as required
- liaise with other work areas
- cellar wines appropriately in readiness for tasting, according to wine style and workplace policy. This will include consideration of:
 - ultraviolet (UV) light and sunlight
 - temperature
 - humidity
 - position and cork condition
 - vibration
 - ease of access
 - pest control
 - stock rotation procedures
- prepare glasses for tasting. This should include:
 - selecting appropriate glass for product
 - cleaning appropriately (i.e. no detergent residues)
 - rejecting chipped or damaged glasses
 - polishing hygienically
 - ensuring sufficient quantity for customer requirements
 - positioning for easy access and use and to maintain cleanliness
- prepare support materials. These may include:
 - tasting notes and evaluation sheets
 - wine and spirit lists
 - background or promotional documentation
 - pens and paper
 - napkins or towels
 - corkscrews
 - white table cloth and paper
 - appropriate food and water to accompany tasting
- prepare spittoons or spit buckets. This may include:
 - cleaning and sanitising

- filling with sawdust
- prepare chilling equipment. This may include:
 - cleaning and sanitising
 - checking adequacy of supplies of ice
- complete a standard sensory evaluation of products prior to tasting
- identify out-of-specification products and materials or non-compliance with workplace standards and industry codes of practice.
- take corrective action in response to out-of-specification products or materials or non-compliance
- report and/or record corrective action as required
- apply a high standard of personal presentation. This may include:
 - personal hygiene
 - appropriate and clean clothes or uniform
- handle wines appropriately to maintain optimum wine condition. This may include consideration of:
 - age of wine
 - deposits
 - disintegrating cork
 - tartrates
- identify a wine that requires decanting
- decant a wine discreetly, taking customer perceptions into account
- identify customer's tasting preferences. This may include:
 - questioning techniques
 - active listening
 - observation techniques
 - referral to wine list
 - demonstrating an open, friendly and interested attitude
- interpret product labels and select correct wine and spirits according to requirements and/or specifications
- open product for customer tastings. This may include:
 - selecting correct product according to product list (e.g. vintage)
 - removing top section of capsule cleanly and completely
 - extracting cork cleanly and completely
 - selecting appropriate opening mechanism
 - dating the bottle
 - opening sparkling wines
- serve the product for customer tasting. This may include:
 - checking date of opening
 - assessing soundness and quality
 - decanting prior to serving
 - correct pouring technique to avoid drips

- pouring correct tasting volume
- encourage and facilitate responsible tasting by customers. This may include:
 - identifying customer tasting preferences as soon as possible and offering an appropriate selection of products to taste
 - providing a spittoon
 - providing water and/or soft drinks
 - providing food
 - pouring tasting samples according to workplace policy and procedures
- maximise the pleasure of the product tasting for the customer. This may include particular attention to:
 - serving product in optimum condition
 - selecting clean, polished glassware of appropriate style
 - providing complementary drinks or food to cleanse the palate
 - providing clean spittoons and napkins
 - providing accurate and relevant information on the products tasted appropriate to customers' needs
 - allowing the customer time and privacy to taste
 - encouraging the customer to ask questions and/or pass opinion on the product
 - identification of product faults before presenting to the customer and removal of the product from tasting
 - steering the order of tasting to allow products to be tasted in the most beneficial order
 - displaying the product label to the customer
- resolve customer complaints effectively, promptly and courteously
- maintain open product between tastings. This may include:
 - stock rotation
 - removing air from bottle and resealing
 - refrigeration
 - labelling
- shut down equipment as required
- prepare equipment for cleaning
- record workplace information
- maintain work area to meet housekeeping standards
- manually clean and sanitise equipment according to enterprise procedures
- advise on products and services according to enterprise procedures
- sell products and services according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- product range and quality characteristics
- common product faults, features, causes and the corrective action necessary
- product sensory evaluation techniques (standard)
- operating procedures for equipment and services used
- optimum cellaring conditions for a range of products (e.g. wines of varying maturity, fortified and liqueur wines, and spirits)
- preparation requirements and procedures for glasses, spittoons, chilling equipment and support materials
- product handling procedures and techniques (e.g. opening, decanting, pouring and displaying the label)
- procedures to maintain product quality between tastings
- product knowledge. This may include:
 - product style and taste characteristics
 - optimum serving requirements
 - preparation requirements
 - stock availability
 - label interpretation
- purpose and principles of standard wine tasting
- relationship of sales area to other enterprise work areas and activities
- promotional and brand objectives of the enterprise
- workplace policies and procedures on:
 - customer service
 - customer complaints
 - responsible service of alcohol
 - safe food handling
 - product storage
 - product tastings
 - personal presentation
 - stock rotation
- communication techniques, including:
 - body language
 - questioning
 - active listening
 - providing information
- available information resources (e.g. wine lists, price lists, background documentation, winemaker, brand manager, senior staff and staff with special expertise)
- occupational health and safety (OHS) hazards and controls

- procedures and responsibility for reporting problems
- housekeeping requirements and procedures
- recording requirements and procedures
- techniques for manually cleaning and sanitising equipment where relevant
- techniques for advising on products and services where relevant
- techniques for selling products and services where relevant.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the cellar door sales stream of the wine sector. It covers the skills and knowledge required to reach an advanced standard of wine evaluation.
------------------------	--

Application of the Unit

Application of the unit	This unit applies to a cellar door sales operation in the wine industry. It covers in-depth knowledge of grape varieties and wine styles to a level sufficient to identify wine by grape variety, region and vintage, and the identification of specialised wine faults. The unit also covers in-depth knowledge of enterprise wine sufficient for selection of wines to match food choices, for suggestions as alternatives to overseas styles, and for provision of advice on serving and ageing.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	
	FDFCD2003A Evaluate wines (standard)

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<ul style="list-style-type: none"> • 1. Identify specific wine characteristics using sensory evaluation techniques • 2. Identify specialised wine faults • 3. Compare Australian styles with key world wines • 4. Enhance consumer enjoyment of wine 	<ul style="list-style-type: none"> • 1.1 Correct tasting procedures using sight, smell and taste are followed • 1.2 Australian wine is identified by grape varieties, region and vintage • 1.3 Specific winemaking techniques are identified and discussed • 1.4 Quality evaluation is completed • 2.1 Wine is inspected and faults are identified correctly and reported • 3.1 Well known world wines are identified in terms of style and quality • 3.2 Appropriate enterprise wines are recommended as alternatives • 4.1 Appropriate enterprise wines are selected to match food choices • 4.2 Optimum ageing and serving requirements are specified

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to determine advanced wine sensory evaluation requirements
- confirm supply of necessary products, materials and equipment
- follow correct tasting procedures. This may include:
 - preparation of environment and self
 - preparation and service of wines
 - order of tasting
 - sensory evaluation techniques
 - recording and documentation techniques
- effectively carry out wine sensory evaluation to determine:
 - wine style
 - country of origin
 - region of production
 - vintage
 - winemaking techniques
 - quality
 - value for money
 - wine faults
- identify and describe evidence of specific winemaking techniques and explain their effect on wine characteristics. These may include their effect on:
 - balance of acidity on the palate
 - complexity
 - weight and mouth feel
 - alcohol
 - aromas and flavours
 - colour
 - tannin
 - fault eradication
 - length
- recommend appropriate enterprise alternatives to key Australian and world wines. These may consider:
 - price
 - style

- quality
- occasion
- select appropriate enterprise products to complement food types. This should include consideration of:
 - wine factors (primarily acidity, sweetness, intensity of flavour, alcohol, tannin and weight)
 - food factors
 - occasion
 - price
- advise on optimum serving and cellaring requirements of key enterprise, Australian and world wines. This will include consideration of specific consumer tastes and recommending:
 - cellaring time and conditions
 - decanting techniques
 - serving temperature
 - breathing and opening time
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- features and purpose of wine sensory evaluation techniques
- wine faults (features, causes and prevention or corrective action required)
- wine tasting policy, procedures and techniques
- optimum conditions for tasting wine, including:
 - environment
 - self and other people
 - equipment and glasses
 - wine preparation
- factors influencing the order in which wine should be tasted
- label terminology and meanings
- ‘trigger’ characteristics of wine that can be assessed to identify key features, including:
 - country of origin
 - region of production
 - vintage
 - winemaking and grape growing techniques
 - quality
 - value for money

- how wine is made
- common winemaking, grape growing techniques and how they can be utilised to manipulate wine style and characteristics
- key Australian and world wines and enterprise products, including their:
 - Style and taste characteristics
 - price
 - quality
- key food and wine factors that will react together and which combinations create harmony and discord
- serving and cellaring requirements of key world and Australian wines and all enterprise products
- wine factors that will determine cellaring and serving requirements, including balance of alcohol, tannin, acidity and fruit flavours
- factors that will detrimentally affect the quality of wine during cellaring, including:
 - temperature
 - humidity
 - ultraviolet (UV) light
 - vibrations
- occupational health and safety (OHS) hazards and controls
- procedures and responsibility for reporting problems
- housekeeping requirements and procedures
- recording requirements and procedures.

Evidence Guide

<p>▶ EVIDENCE GUIDE</p>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • consistently establish appropriate conditions for tasting wines, including optimum conditions for sight, smell and taste • correctly explain specific winemaking techniques and their effect on wine characteristics • identify wines for style, grape variety, vintage, region and quality, and evaluate and explain characteristics • identify specialised wine faults • explain optimum ageing, cellaring and serving conditions for wine styles.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
<p>Method of assessment</p>	<p>This unit should be assessed together with other units of competency relevant to the function or work role.</p>

▶ EVIDENCE GUIDE	
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • workplace policy and procedures in regard to evaluating wine • specifications • work notes • instructions or verbal direction from manager, supervisor or senior staff
Staff	<p>Staff may:</p> <ul style="list-style-type: none"> • be full time, part time or casual • work in other areas of the enterprise
Information systems	<p>Information systems may be:</p> <ul style="list-style-type: none"> • print or screen based
Equipment	<p>Equipment may vary and should include that which is required to evaluate wine according to workplace policies and procedures, and may include:</p> <ul style="list-style-type: none"> • spittoons • glasses • corkscrews

RANGE STATEMENT	
Materials	<p>Materials may vary and should include that which is required to evaluate wine according to workplace policies and procedures, and may include:</p> <ul style="list-style-type: none"> • product information sheets • tasting notes
Wine faults	<p>Wine faults may include:</p> <ul style="list-style-type: none"> • evidence of excessive sulphur dioxide • cork taint and other faults • volatile acidity • tartrate crystals • oxidation • haze • brettanomyces
Wine factors	<p>Wine factors include:</p> <ul style="list-style-type: none"> • clarity • colour type and intensity • rims versus core differentiation • alcohol (degrees or %) intensity and character of aroma and flavour • oak characteristics • complexity • residual sugar • acidity, including malolactic treatment • body • weight • mouth feel • astringency • tannin • balance • length
Winemaking and grape growing techniques	<p>Winemaking and grape growing techniques may include:</p> <ul style="list-style-type: none"> • canopy management • harvesting management • maceration • cold fermentation • barrel fermentation • oak treatment • ageing

RANGE STATEMENT	
	<ul style="list-style-type: none"> malolactic fermentation sparkling wine production methods (e.g. tank, transfer and méthode champenoise)
World wines	<p>World wines include:</p> <ul style="list-style-type: none"> France (Bordeaux, Burgundy, Champagne and Rhône) Spain (Rioja, Sherry) Germany (Liebfraumilch) Italy (Lambrusco and Chianti) Portugal (Port) New Zealand Chile South Africa California
Food factors	<p>Food factors should include:</p> <ul style="list-style-type: none"> Acidity oil or cream content ‘weight’ free proteins or rare meat hot spices sweetness alcohol content

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<ul style="list-style-type: none"> • 1. Prepare for specialised product tastings 	<ul style="list-style-type: none"> • 1.1 Specialised customer requirements are accurately established • 1.2 Tasting event is planned and organised • 1.3 Appropriate background research is carried out for presentation and facilities • 1.4 Support materials are prepared
<ul style="list-style-type: none"> • 2. Conduct specialised product tasting 	<ul style="list-style-type: none"> • 2.1 Information is presented according to customer requirements and workplace policy • 2.2 Products are tasted according to workplace policy and procedures and customer requirements
<ul style="list-style-type: none"> • 3. Evaluate and assess performance 	<ul style="list-style-type: none"> • 3.1 Customers are asked to participate in a review procedure, as required by workplace policy • 3.2 Self-assessment of performance is carried out in accordance with workplace procedures • 3.3 Positive and negative aspects of the way the tasting was conducted are recognised and addressed • 3.4 Feedback from customers is dealt with in accordance with workplace procedures

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify specialised wine tasting requirements
- confirm supply of necessary products and materials
- liaise with other work areas and customers. This may include:
 - winery hospitality coordinator
 - marketing and public relations (PR)
 - winemaker
- prepare product and materials as required
- confirm equipment status and condition as required
- identify out-of-specification products and materials or non-compliance
- take corrective action in response to out-of-specification products and materials or non-compliance
- report and/or record corrective action
- apply a high standard of personal presentation. This may include:
 - personal hygiene
 - appropriate and clean clothes or uniform
- accurately identify specific customer requirements. These may include:
 - reason for tasting (e.g. commercial and hobby)
 - numbers expected
 - time of arrival and departure
 - other activity and commitments before and after
 - specific products required for tasting
 - specific information sought (e.g. production techniques and vintage characteristics)
 - common interests of group (e.g. club members)
- identify personal and enterprise objectives of tasting (e.g. product sale overseas)
- plan and organise tasting event. This may include consideration of:
 - equipment
 - materials
 - personnel skills and availability
 - product availability
 - information to research
 - expertise availability (e.g. winemakers)
 - space and seating

- facilities
- research background information to meet customer requirements. This may include a variety of information resources, including:
 - libraries
 - industry bodies (e.g. Winemakers Federation of Australia and Wine Export Council)
 - enterprise personnel (e.g. winemakers and vineyard managers)
- conduct a specialised product tasting according to workplace policy and procedures and customer requirements. This may include:
 - articulating an accurate sensory evaluation of product tasted
 - serving products in appropriate condition for specific tasting
 - identifying and removing faulty products prior to tasting
 - maintaining optimum tasting environment
 - providing customer service
 - ensuring comfort of tasters
- provide accurate and relevant information in line with customer requirements. This may include:
 - preparation and distribution of information sheets
 - delivering a presentation
 - operating visual aids effectively and professionally
 - leading and/or facilitating the product tasting
- evaluate and assess performance against customer, personal and workplace objectives. This may include:
 - seeking feedback from customers and colleagues
 - receiving negative and positive criticism
 - logging sales
 - collating results
 - writing and presenting reports
- communicate effectively and professionally. This may include:
 - verbal (e.g. face to face, telephone, individual and group communication)
 - written (e.g. leaflets, overhead projector and reports)
 - body language
 - relaying and summarising complex and technical information
- deal with customer complaints according to workplace policy and procedures
- respond sensitively to the information needs of customers from a range of cultural and social backgrounds
- respond appropriately to VIP or expert groups
- provide hospitality or other facilities in accordance with instructions
- prepare equipment for cleaning as required
- record workplace information
- maintain work area to meet housekeeping standards
- facilitate teams according to enterprise procedures

- evaluate wines (advanced) according to enterprise procedures
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of specialised wine tasting
- link to related work areas and activities
- quality characteristics of products and materials
- promotional and brand objectives of the enterprise and tasting events
- domestic and international distributors of enterprise products
- basic judging procedures for Australian Wine Awards
- international, national, regional and enterprise-specific knowledge of wine industry
- workplace policy and procedures with regard to:
 - responsible service of alcohol
 - specialised and standard product tastings
 - customer service
 - customer complaints
 - information provision and presentation
 - international and VIP guests
 - hospitality services
 - activity performance review and evaluation
- product sensory evaluation techniques and procedures
- presentation principles and techniques, including:
 - overhead projector and slide presentation
 - hand-out preparation
 - using visual aids
 - body language
 - voice projection
 - talk structure and terminology
 - questioning
 - active listening
 - summarising
- evaluation techniques and procedures
- reporting techniques and procedures
- procedures and responsibility for reporting problems
- Occupational health and safety (OHS) hazards and controls
- recording requirements and procedures
- housekeeping requirements and procedures

- team facilitation techniques where relevant
- advanced wine sensory evaluation techniques where relevant.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<ul style="list-style-type: none"> • 1. Identify required hospitality activities 	<ul style="list-style-type: none"> • 1.1 Enterprise promotional schedule is accurately interpreted and applied to hospitality activities • 1.2 Response to ad-hoc customer requests and bookings is undertaken according to workplace policy and procedures
<ul style="list-style-type: none"> • 2. Plan and organise hospitality activities 	<ul style="list-style-type: none"> • 2.1 Resources required to implement activities are identified, according to customer and workplace standards and objectives and legislative requirements • 2.2 Prices and services are negotiated with suppliers and customers • 2.3 Supply of necessary resources, services and prices are confirmed
<ul style="list-style-type: none"> • 3. Prepare for winery hospitality activities 	<ul style="list-style-type: none"> • 3.1 Schedule of events is prepared to ensure timely and effective implementation of activities • 3.2 Support materials are prepared or produced as required • 3.3 Team and suppliers are briefed on their roles and responsibilities
<ul style="list-style-type: none"> • 4. Implement hospitality activities 	<ul style="list-style-type: none"> • 4.1 Resources are coordinated effectively and efficiently to meet customer and workplace objectives • 4.2 Hospitality facilities are monitored and maintained according to workplace policy and procedures • 4.3 Problems and anomalies are recognised, rectified and/or reported according to workplace procedures
<ul style="list-style-type: none"> • 5. Evaluate winery hospitality activities 	<ul style="list-style-type: none"> • 5.1 Team performance is evaluated according to workplace policy • 5.2 Customer feedback is encouraged and reviewed • 5.3 Suppliers are assessed and feedback given as required • 5.4 Information is collated for the financial and promotional viability assessment • 5.5 Areas for improvement are identified and recommendations made to appropriate personnel

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify winery hospitality activity coordination requirements
- liaise with other work areas. These may include:
 - tasting area
 - restaurant
 - tour leaders
- apply a high standard of personal presentation. This may include:
 - personal hygiene
 - dress or uniform
- interpret enterprise promotional schedules. This may include identifying:
 - promotional objectives
 - dates and times
 - relevant products
- apply workplace policy, standards and procedures with regard to:
 - hospitality activities
 - customer service
 - customer complaints
 - special requests
 - supplier contracts
 - inter-departmental contracts
 - occupational health and safety (OHS) of employees and visitors
 - responsible service of alcohol
 - performance management
 - activities required
 - co-presenters
 - standards required
- respond to ad-hoc customer requests and bookings. This will include accurately identifying customer needs with regard to date, time, numbers and hospitality activities and facilities required
- apply effective communication principles and techniques, including:
 - active listening
 - questioning

- conflict and complaint resolution
- summarising
- recording details and information
- observation
- body language
- briefing and instructions
- presenting information
- plan and organise hospitality activities. This may include:
 - anticipating problems, customer needs and delays
 - problem solving
 - time management
 - negotiating and liaising with external and internal suppliers
 - interpreting legislative requirements
 - calculating and estimating required quantities and space
 - comparing and choosing quotes based on enterprise and customer objectives
 - creating flow diagrams
 - scheduling activities
 - confirming agreed contracts, provision of service with suppliers and customers
 - rostering staff
 - theft minimisation controls
- prepare support materials as required. This may include consideration of:
 - brand objectives
 - customer objectives
 - target audience
 - cost
 - time scales, and may include:
 - researching information required
 - briefing designers and printers
 - editing and proofreading
 - liaising with public relations and marketing departments
- brief team and suppliers on roles and responsibilities. This may include:
 - handover arrangements
 - workplace policy and procedures with regard to:
 - customer service
 - OHS
 - responsible service of alcohol
 - personal presentation and behaviour
 - emergency situations
- implement hospitality activities effectively to meet enterprise and customer objectives
- monitor hospitality facilities and service provision. This may include monitoring:

- cleanliness of toilets
- seating and food availability
- housekeeping and table clearing standards
- litter and waste
- OHS compliance
- staff and supplier presentation and performance
- customer behaviour
- timing
- theft opportunities
- liquor licensing compliance
- signs of antisocial behaviour and intoxication
- take corrective action in response to out-of-specification standards or non-compliance
- report and/or record corrective action as required
- solve problems and ‘think on your feet’
- identify and implement effective contingency plans
- deals with difficult customers
- evaluate winery hospitality activities. This may include:
 - seeking feedback from customers and staff
 - comparing results against objectives
 - collating costs and sales
 - reviewing own performance
- make recommendations for improvement. This may include:
 - writing reports
 - providing feedback to management, suppliers and staff
 - utilising team improvement processes
- record workplace information
- maintain work area to meet housekeeping standards
- facilitate teams according to enterprise procedures
- use improvement processes in team activities according to enterprise procedures
- conduct winery and/or site tours according to enterprise procedures
- conduct a specialised tasting according to enterprise procedures
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of winery hospitality activities
- links to related work areas and activities (e.g. cellar door, public relations (PR) and marketing)

- procedures and responsibility for reporting problems
- recording requirements and procedures
- enterprise product and service range
- enterprise and brand promotional objectives
- format and interpretation of promotional schedules
- roles and responsibilities of supporting functions
- principles and techniques for:
 - telephone, face-to-face and written communication
 - questioning
 - active listening
 - observation
 - negotiation
 - influencing and persuading
 - time management
 - scheduling
 - material preparation
 - evaluation
 - monitoring
 - receiving and providing feedback
 - performance appraisal
 - information collation
 - problem solving
 - process improvement
 - conflict resolution
 - planning and organising
 - prioritising
- basic legislative and statutory requirements as they apply in the workplace, including:
 - serving and selling liquor
 - industry codes of practice
 - consumer law
 - customer OHS
- team facilitation techniques where relevant
- improvement processes where relevant
- techniques in conducting winery and/or site tours where relevant
- techniques in conducting specialised tastings where relevant.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- correctly interpret promotional schedules to establish schedule of hospitality events
- establish resources required for hospitality event
- establish supply of services and resources appropriate to each hospitality event, including pricing
- correctly handle customer requests, bookings and ad-hoc requests
- prepare schedules, briefing notes and other support materials for staff, suppliers and guests
- conduct efficient and appropriate coordination of services, products and activities for hospitality events
- deal effectively with problems and special requests during activities
- establish evaluation procedures for customers, suppliers and staff
- use results of evaluations to improve future activities.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment as required
- work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements
- instructions, information, specifications and schedules as required
- equipment, services and corresponding information as required
- products and materials as required
- internal and external customers and suppliers as required

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • workplace policy and procedures in regard to coordinating winery hospitality activities • specifications • work notes • instructions or verbal direction from manager, supervisor or senior staff
Cellar door	<p>Cellar door may vary according to:</p> <ul style="list-style-type: none"> • size • type • location

RANGE STATEMENT	
Customers	<p>Customers may include:</p> <ul style="list-style-type: none"> • regular, new, external or enterprise personnel • people from a range of social, cultural or ethnic backgrounds and physical and mental abilities. English may not be their first language. Buying and ordering experience and expertise may vary. Customer needs and requests may vary
Products	<p>Products may include:</p> <ul style="list-style-type: none"> • wines and spirits and associated merchandise (e.g. corkscrews and glasses) • a range of enterprise promotional merchandise (e.g. clothing and souvenirs) • associated regional and tourism products (e.g. postcards, art and craft objects)
Team members	<p>Team members may include:</p> <ul style="list-style-type: none"> • people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
Staff	<p>Staff may:</p> <ul style="list-style-type: none"> • be full time, part time or casual • work in other areas of the enterprise
Trading and working conditions	<p>Trading and other working conditions may be:</p> <ul style="list-style-type: none"> • routine, busy or quiet
Information systems	<p>Information systems may be:</p> <ul style="list-style-type: none"> • print or screen based
Hospitality activities	<p>Hospitality activities may include:</p> <ul style="list-style-type: none"> • specialist tastings • winery and/or site tours • functions • dinners • festivals • races • promotions outside the winery
Suppliers	<p>Suppliers may include:</p> <ul style="list-style-type: none"> • suppliers of food and catering equipment (e.g. marquees, portable toilets, music, other entertainment, promotional material and specialist

RANGE STATEMENT	
	skills, such as first aid) <ul style="list-style-type: none"> • internal enterprise functions, such as departments or individual staff providing products, specialist knowledge, specialist tastings, winery and/or site tours
Services	Services may include: <ul style="list-style-type: none"> • power • gas • water • sewerage
Support materials	Support materials may include: <ul style="list-style-type: none"> • promotional leaflets • menus • programs • napkins
Facilities	Hospitality facilities may include: <ul style="list-style-type: none"> • toilets and washrooms • drinks • seating • refreshments and meals
Special requests	Special requests may include: <ul style="list-style-type: none"> • presentations • winemaker or senior staff member to host • particular wine and food requests • live entertainment • additional facilities • liaison with other companies

--------------------	-----------------

FDFCEL2001A Perform oak handling activities

Modification History

This unit supersedes and is equivalent to FDFCELOAKB Perform oak handling activities.
April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	<p>This specialist unit has been developed for the cellar stream of the wine sector. It covers the skills and knowledge required to use, treat and store oak barrels and casks, stack barrels and perform minor repairs.</p> <p>Depending on the type of activities, training in confined space entry may be required to complete this unit of competency.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies to cellar operations staff required to handle oak barrels in the production and storage of wine or spirits. The unit covers managing the equipment and process, monitoring and keeping of records.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use oak knowledge to complete production requirements	1.1 Oak is located and identified using workplace system 1.2 Appropriate filling, emptying and topping procedures are selected 1.3 Transfer operations are used to complete production requirements
2. Treat, store and repair oak	2.1 Treatment, storage and/or repair requirements are identified 2.2 Equipment and materials are checked to ensure availability and readiness for use 2.3 Equipment is set up to meet requirements, as required 2.4 Treated oak meets specification 2.5 Stored oak meets specification 2.6 Repaired oak meets specification 2.7 Equipment is monitored to confirm operating condition as required 2.8 Out-of-specification product, process and equipment performance is identified, rectified and/or reported 2.9 Waste generated by the process is collected, treated and disposed of or recycled according to workplace procedures
3. Stack oak barrels and casks	3.1 Stacking requirements are identified and planned 3.2 Appropriate stacking method is selected 3.3 Equipment and materials are checked to ensure availability and readiness for use 3.4 Equipment is set up to meet requirements, as required 3.5 Stacked oak barrels and casks meet specification 3.6 Out-of-specification stacking is identified, rectified and/or reported 3.7 Waste generated by the process is collected, treated and disposed of or recycled according to workplace procedures 3.8 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify oak handling requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- liaise with other work areas
- prepare materials as required
- select, set up and operate equipment as required, according to instructions
- select appropriate oak handling activities and methods. This may depend on product characteristics and may include:
 - gassing barrels prior to filling
 - sparging line during emptying
 - performing oak handling activities according to instructions
 - using hand tools
- monitor oak handling activities and equipment to identify out-of-specification results or non-compliance. This may involve monitoring:
 - positioning of stack
 - securing of stack
 - condition of oak vessels
 - sequence of filling, emptying and topping of barrels
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- record workplace information
- maintain work area to meet housekeeping standards
- identify, rectify and/or report environmental non-compliance
- apply Occupational Health and Safety (OHS) principles, policies and procedures associated with confined space entry, as required
- perform routine maintenance
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of oak use in winemaking and/or spirit production
- use of oak alternatives
- link to related processes
- effect of oak storage on end product including:
 - flavour
 - body
 - complexity
 - alcohol content
- types of oak used for storage
- common faults in oak barrels and casks, which may include:
 - leaks
 - possible sources of oak contamination and effect on end product
- minor repair methods and procedures
- faults on end product
- main methods used in oak barrel and cask stacking
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- OHS hazards and controls
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- waste handling requirements and procedures
- recording requirements and procedures
- OHS hazards and controls associated with confined space entry as required
- manual cleaning and sanitising requirements and procedures

Evidence Guide**EVIDENCE GUIDE**

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • use personal protective clothing and equipment as required • identify use of oak product in wine making process • carry out oak treatment according to instructions • follow OHS procedures and MSDS or other instructions for use of chemicals in oak treatment • carry out minor repairs • stack and secure oak vessels according to instructions • maintain records according to requirements.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.

EVIDENCE GUIDE	
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules or instructions • routine maintenance schedules • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • specific transfer equipment • hand tools (e.g. hoop driver, hammer and level) • barrel shaver • sulphur burners • sulphitometers • purpose-designed barrel handling equipment
Oak	Oak may include:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • various barrel sizes (e.g. hogshead, puncheon, vat, barrique and quarter cask) • vats • casks and planks made of various oak types (e.g. French, German, American and Yugoslavian) • new and old oak
Stacking methods	<p>Stacking methods may include:</p> <ul style="list-style-type: none"> • pyramid style • cradle • chock • stillage
Materials	<p>Materials may include:</p> <ul style="list-style-type: none"> • stillaging • chocks • cradles • sulphur dioxide • sulphuric acid • sodium hydroxide • sodium carbonate • sodium chloride • spirit and materials for repairing oak (e.g. hoops, nails, wood and cotton)
Service	<p>Services may include:</p> <ul style="list-style-type: none"> • power • water • steam • compressed air • inert gas
Information systems	<p>Information systems may be:</p> <ul style="list-style-type: none"> • print or screen based
Work hazards	<p>Work may involve exposure to:</p> <ul style="list-style-type: none"> • chemical, dangerous or hazardous substances
Product to be stored in cask	<p>Product to be stored in cask may include:</p> <ul style="list-style-type: none"> • red, white or fortified wines • spirits of various ages and stages of maturity

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for fermentation operations	1.1 Product and materials are confirmed and available to meet production requirements 1.2 Product and materials are prepared to meet production requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is checked to confirm readiness for use 1.5 The process is set to meet production requirements
2. Operate and monitor fermentation operations	2.1 The fermentation process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Ferment meets specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification product, process and equipment performance is identified, rectified and/or reported
3. Complete fermentation operations	3.1 The process is completed according to workplace procedures 3.2 Equipment is prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify must processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product and materials and services
- liaise with other work areas
- prepare product and materials as required. This may include:
 - chilling or warming must
 - making additions of finings or enzymes
 - re-yeasting
 - adding juice
- confirm equipment status and condition. This may include checking:
 - cleaning and/or sanitising requirements have been met
 - position and alignment of valves
 - integrity of door seal
- start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - fill volumes
 - programmed rotation (rotary fermenters)
 - number of pump-overs or drainer returns
 - vessel pressure
 - product loss
 - dilution
 - oxidation
 - relevant product characteristics (e.g. temperature, skin contact, moisture, fermentation activity and baumé)
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product and batch changeovers
- follow confined space entry policies and procedures when required
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements

- record workplace information
- maintain work area to meet housekeeping standards
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for sanitation
- identify, rectify and/or report environmental non-compliance
- perform transfer operations according to enterprise procedures
- perform sampling procedures according to enterprise procedures
- clean and sanitise according to enterprise procedures
- conduct tests according to enterprise procedures
- perform heat exchange operations according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of fermentation
- link to related processes
- stages and changes which occur during fermentation
- effect of process stages on end product
- quality characteristics and uses of fermentation product and materials
- product and materials preparation requirements and effect of variation on the process
- main methods used in fermentation operations
- techniques that may be used to manipulate the fermentation process and wine characteristics, including:
 - pressure
 - temperature
 - yeast variety or strain
 - CO₂
 - skin contact
 - type of fermentation vessel
 - additions
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services used

- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls, specifically confined space entry
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- waste handling requirements and procedures
- recording requirements and procedures
- transfer operations where relevant
- sampling procedures where relevant
- cleaning and sanitation procedures
- heat exchange procedures where relevant
- testing procedures where relevant
- routine maintenance procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • use personal protective equipment and follow other specified OHS procedures • prepare products including checks for temperature and alcoholic strength • prepare and confirm status of equipment before commencing fermentation process • monitor fermentation process control points and equipment, including taking of samples and conducting of tests

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • take corrective action in response to out-of-specification results or non-compliance • demonstrate knowledge of OHS hazards, controls and emergency procedures • record information appropriately.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the ion exchange process for operation	1.1 Product and materials are confirmed and available to meet ion exchange requirements 1.2 Materials are prepared to meet ion exchange requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is checked to confirm readiness for use 1.5 The process is set to meet ion exchange requirements
2. Operate and monitor the ion exchange process	2.1 The ion exchange process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Ion exchanged product meets specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification product, process and equipment performance is identified, rectified and/or reported
3. Shut down the ion exchange process	3.1 The process is shut down according to workplace procedures 3.2 Equipment is dismantled and prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify ion exchange requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product, materials and services
- liaise with other work areas
- prepare materials as required
- confirm equipment status and condition
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - flow rates
 - pH levels
 - potassium levels
 - pressures
 - run times
 - resin storage
 - product loss
 - dilution
 - oxidation
 - relevant product characteristics (type)
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product or batch changeovers
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- record workplace information
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- maintain work area to meet housekeeping standards
- identify, rectify and/or report environmental non-compliance
- handle inert gas according to enterprise procedures
- conduct tests according to enterprise procedures

- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of ion exchange
- link to related processes
- stages and changes which occur during ion exchange
- effect of process stages on end product
- quality characteristics and uses of ion exchange product and materials
- product and materials preparation requirements and effect of variation on the process
- main methods used in ion exchange
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- waste handling requirements and procedures
- recording requirements and procedures
- inert gas handling procedures where relevant
- testing procedures where relevant

Evidence Guide

FDFCEL2004A Perform single column lees stripping (continuous still brandy) operations

Modification History

This unit supersedes and is equivalent to FDFCELLSA Perform single column lees stripping (continuous still brandy) operations.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the cellar stream of the wine sector. It covers the skills and knowledge required to start up, operate and shut down a single column to strip alcohol from lees.
------------------------	--

Application of the Unit

Application of the unit	This unit applies to lees stripping using a single column to strip alcohol from lees prior to rectification or as the first stage of alcohol recovery for brandy production from a continuous or pot still. Lees stripping must be undertaken in accordance with Customs and Excise regulations. Product and materials used may include a range of wine, low wine, wine lees or marc. Equipment may be manual or computer controlled.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		
	FDFOP2004A	Clean and sanitise equipment
	FDFOP2013A	Apply sampling procedures
	MSL973001A	Perform basic tests

Employability Skills Information

Employability skills	This unit contains employability skills
-----------------------------	---

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the lees stripping process for operation	1.1 Product and materials are confirmed and available to meet production requirements 1.2 Product and materials are prepared to meet production requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is checked to confirm readiness for use 1.5 The process is set to meet production requirements
2. Operate and monitor the lees stripping process	2.1 The lees stripping process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Low wine product meets specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification low wine product, process and equipment performance is identified, rectified and/or reported
3. Shut down the lees stripping process	3.1 The process is shut down according to workplace procedures 3.2 Equipment is dismantled and prepared for cleaning 3.3 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify distillation requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product, materials and services. This may include checking temperature and alcoholic strength
- liaise with other work areas
- prepare product and materials as required. This may include heating the incoming product
- confirm equipment status and condition. This may include checking:
 - monitoring equipment
 - air pressure from compressor
 - fuel intake
 - water flow to condensers
 - receiver vessel
 - integrity of lines and fittings
- set up and start up the process. This will include any tests or procedures required to meet Customs and Excise regulations
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - wine feed
 - alcohol content of the feed
 - cooling water flow rates to condensers
 - steam input flow rates
 - volume of charge
 - temperature of low wine distillate
 - alcoholic strength of low wine distillate
 - heat source
 - reflux temperatures
 - temperature of incoming wine
 - temperatures throughout still and/or column
 - temperature and strength at take-off point
 - evaporation rates
 - charge characteristics
 - pressure of still and/or column

- condensate rate or flow
- monitor supply and flow of product, materials and services to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product or batch changeovers
- take samples and conduct tests
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- record workplace information. This will include meeting the requirements of Customs and Excise regulations
- maintain work area to meet housekeeping standards
- ensure that all Customs and Excise regulations are adhered to
- sort, collect, treat, recycle or dispose of waste according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- perform transfer operations according to enterprise procedures
- perform heat exchange operations according to enterprise procedures
- identify, rectify and/or report environmental non-compliance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of distillation, including definition of the following terms:
 - liquid
 - vapour
 - vapour pressure
 - boiling point
 - dew point
 - bubble-point
- operating principles of stripping (analyser) columns
- link to related processes. This will include the source of the product to be distilled and any further processing requirements of the low wine distillate

- stages and changes which occur during stripping operations. This will include critical temperatures and specific components affected
- effect of process stages on low wine production
- quality characteristics and uses of low wine
- product and materials preparation requirements and effect of variation on the process
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- sampling and testing procedures
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls. This will include:
 - emergency flooding procedures
 - emergency evacuation procedures
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- recording requirements and procedures
- operation of Customs and Excise regulations
- waste handling requirements and procedures where relevant
- cleaning and sanitation procedures where relevant
- routine maintenance procedures where relevant
- transfer procedures where relevant
- heat exchange procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance

EVIDENCE GUIDE	
	with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • use personal protective equipment and follow other specified OHS procedures • check product before commencing lees stripping operations. This may include checking temperature and alcoholic strength • prepare and confirm status of equipment before commencing lees stripping process • monitor process control points and equipment during lees stripping process • monitor feed and distillate for conformance to specifications • take corrective action in response to out-of-specification results or non-compliance • demonstrate knowledge of OHS hazards, controls and emergency procedures • undertake routine and emergency shutdowns • record information appropriately.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence

EVIDENCE GUIDE

should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures

Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements

Workplace information

Workplace information can include:

- Standard Operating Procedures (SOPs)
- specifications
- production schedules and instructions
- work notes
- Material Safety Data Sheets (MSDS)
- manufacturer instructions
- verbal direction from manager, supervisor or senior operator

Lees stripping equipment

Lees stripping equipment may include:

- analyser column
- pumps, lines and fittings
- valves
- flow meters
- heat exchangers
- pressure vessels
- compressors
- condensers
- receival vessels
- test equipment (e.g. hydrometers and thermometers)

RANGE STATEMENT	
	<ul style="list-style-type: none"> • monitoring equipment
Product and materials	<p>Product and materials may include:</p> <ul style="list-style-type: none"> • a range of wine • low wine • wine lees • marc
Services	<p>Services may include:</p> <ul style="list-style-type: none"> • power • water (hot and cold) • steam • fuel
Confirming equipment status	<p>Confirming equipment status involves:</p> <ul style="list-style-type: none"> • checking that hygiene and sanitation standards, safety standards and pre-start requirements are met and that equipment is operational • checking the calibration status of measuring instrumentation
Monitoring the process	<p>Monitoring the process may involve:</p> <ul style="list-style-type: none"> • the use of production data, such as performance control charts (manual or computerised) • sampling • sensory evaluation • analytical tests
Process set up, operation and monitoring functions	<p>Process set up, operation and monitoring functions may be:</p> <ul style="list-style-type: none"> • manual or involve the use of a process control system
Control points	<p>Control points refer to those key points in a work process that must be monitored and controlled. This includes:</p> <ul style="list-style-type: none"> • food safety (critical) • quality and regulatory control points • inspection points
Information	<p>Information systems may be:</p> <ul style="list-style-type: none"> • print or screen based
Work hazards	<p>Work may involve exposure to:</p> <ul style="list-style-type: none"> • chemical, dangerous or hazardous substances

FDFCEL2005A Operate the pressing process

Modification History

This unit supersedes and is equivalent to FDFCELPPB Operate the pressing process.
April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the cellar stream of the wine sector. It covers the skills and knowledge required to prepare for and operate the pressing process.
------------------------	--

Application of the Unit

Application of the unit	This unit applies to cellar staff who operate pressing equipment in winemaking enterprises. Product may include a range of crushed grape varieties (must) and whole fruit bunches, and materials. The pressing process may include making additions and finings. Presses may include basket press, horizontal hydraulic press, horizontal screw press, continuous screw press and pneumatic press. The unit can apply to both manual and computer-controlled leaf filter and lees filter equipment.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the pressing process for operation	1.1 Product and materials are confirmed and available to meet pressing requirements 1.2 Product and materials are prepared to meet pressing requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is checked to confirm readiness for use 1.5 The process is set to meet pressing requirements
2. Operate and monitor the pressing process	2.1 The pressing process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Pressed product meets specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification product, process and equipment performance is identified, rectified and/or reported
3. Shut down the pressing process	3.1 The process is shut down according to workplace procedures 3.2 Equipment is dismantled and prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify pressing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product and materials and services
- liaise with other work areas
- confirm equipment status and condition. This may include checking for:
 - exposed or reactive metal parts
 - lubricating or hydraulic fluid leaks
 - screen fit and condition
 - bag and/or screw fit and condition
 - receival vessels and must processing operations (availability and schedule)
 - setting speed of screw
 - attaching hoses and/or opening valves
 - setting pumps and lines from collection trays into receival tanks
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - press program
 - press pressure
 - pressing effectiveness
 - dosage of additions
 - product loss
 - dilution
 - oxidation
 - speed of screw
 - free run quality and/or flow
 - inclines quality and/or flow
 - pressings quality and/or flow
 - relevant product characteristics (marc moisture, solids content and press fractions)
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product or batch changeovers

- follow confined space entry policies and procedures when required
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- record workplace information
- maintain work area to meet housekeeping standards
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- identify, rectify and/or report environmental non-compliance
- take samples according to enterprise procedures
- prepare and make additions and finings according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- handle inert gas according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of pressing
- link to related processes
- stages and changes which occur during pressing
- effect of process stages on end product
- quality characteristics and uses of pressing product and materials (e.g. grape variety)
- product and materials preparation requirements and effect of variation on the process
- main methods used in pressing
- pressing techniques that may be used to manipulate the characteristics of the wine. These may include:
 - degree of pressing and/or pressure
 - blending and/or separating free run juice from first and later pressings
 - press type (e.g. bladder versus screw)
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls, specifically confined space entry
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- waste handling requirements and procedures
- recording requirements and procedures
- sampling techniques where relevant
- preparing and making additions and finings where relevant
- cleaning and sanitising procedures where relevant
- inert gas handling procedures where relevant
- routine maintenance procedures where relevant

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the clarification by separation (centrifugation) process for operation	1.1 Product is confirmed and available to meet clarification requirements 1.2 Product is prepared to meet clarification requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is checked to confirm readiness for use 1.5 The process is set to meet clarification requirements
2. Operate and monitor the clarification by separation (centrifugation) process	2.1 The clarification by separation (centrifugation) process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Clarified product meets specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification product, process and equipment performance is identified, rectified and/or reported
3. Shut down the clarification by separation (centrifugation) process	3.1 The process is shut down according to workplace procedures 3.2 Equipment is dismantled and prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify clarification requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product and services
- liaise with other work areas
- prepare product as required
- confirm equipment status and condition. This may include:
 - checking integrity of pumps and lines
 - checking hygiene and sanitation standards are met
 - gassing receival tank
 - checking product to be clarified against specification
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - flow rate
 - desludge settings (frequency, duration, type, ratios and displacement)
 - pressures
 - motor load (amperage)
 - process control devices (self-thinker, electronically programmed emission (EPTE), photocell and monitek)
 - product loss
 - dilution
 - oxidation
 - relevant product characteristics (turbidity, solids content and type)
- monitor supply and flow of product to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product and batch changeovers
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- record workplace information
- maintain work area to meet housekeeping standards
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment,

and removing waste either manually or by rinsing, in preparation for cleaning and sanitation

- identify, rectify and/or report environmental non-compliance
- conduct tests according to enterprise procedures
- take samples according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of clarification by separation (centrifugation)
- link to related processes
- stages and changes which occur during clarification by separation (centrifugation)
- effect of process stages on end product
- quality characteristics and uses of clarified product
- product preparation requirements and effect of variation on the process
- main methods used in clarification by separation (centrifugation)
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- waste handling requirements and procedures
- recording requirements and procedures

FDFCEL2007A Prepare and monitor wine cultures

Modification History

This unit supersedes but is not equivalent to FDFCELCULA Propagate and maintain wine cultures.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the cellar stream of the wine sector. It covers the skills and knowledge required to prepare and monitor yeast and bacterial cultures used in wine production.
------------------------	--

Application of the Unit

Application of the unit	This unit applies to staff of wine enterprises who propagate and maintain yeast and/or bacterial cultures used in wine production. The unit also applies to the use of the cultures to inoculate product according to set specifications.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	FDFCEL2019A	Carry out transfer operations
---------------------------	-------------	-------------------------------

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for inoculation	1.1 Propagation requirements are identified and confirmed 1.2 Yeast and bacteria cultures are prepared for use 1.3 Product and materials are confirmed and available to meet propagation requirements 1.4 Product is prepared to meet specified propagation requirements 1.5 Services are confirmed as available and ready for operation
2. Prepare equipment for culture preparation	2.1 Cleaning and sterilising equipment is checked to confirm readiness for use 2.2 Propagation equipment is selected, cleaned and sterilised according to workplace procedures 2.3 Transfer equipment is selected, cleaned and sterilised as required
3. Maintain and monitor the propagation process	3.1 Transfer operations are conducted to meet propagation requirements 3.2 The culture propagation process is conducted according to workplace procedures 3.3 Ferments are inoculated according to workplace procedures 3.4 Control points are monitored to confirm performance is maintained within specification 3.5 Equipment is monitored to confirm operating condition 3.6 Out-of-specification product, process and equipment performance is identified, rectified and/or reported
4. Complete propagation activities	4.1 The propagation process is completed according to workplace procedures 4.2 Equipment is dismantled and prepared for cleaning 4.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 4.4 Work is conducted in accordance with workplace environmental guidelines
5. Record information	5.1 Workplace information recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify culture propagation requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product, materials and services
- liaise with other work areas
- prepare product and materials as required. This may include:
 - racking clear juice
 - centrifuging juice
 - filtering juice
 - heating and cooling juice
 - preparing and making additions
 - preparing yeast
 - inoculating ferment
 - air sparging
- confirm equipment status and condition. This may include checking:
 - cleaning and/or sterilisation requirements have been met
 - position and alignment of valves
 - integrity of door seal
- start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve sampling and checking:
 - baumé
 - temperature
 - dips
 - contamination
 - product loss
 - dilution
 - relevant juice or wine characteristics
 - culture characteristics
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product and batch changeovers

- follow confined space entry policies and procedures when required
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- record workplace information
- maintain work area to meet housekeeping standards
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for sanitation
- identify, rectify and/or report environmental non-compliance
- carry out routine maintenance
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of propagating wine yeast and bacterial cultures
- relationship of propagation to alcoholic and malolactic fermentation
- stages and changes which occur during culture propagation
- effect of process stages on end product
- quality characteristics and uses of wine yeast and bacterial cultures
- product and materials preparation requirements and effect of variation on the process
- main methods used in culturing yeast and bacteria for wine production
- the fermentation reaction for yeast and bacterial cultures
- techniques that may be used to manipulate the propagation process and wine characteristics, including:
 - temperature
 - yeast variety or strain
 - baumé
 - additions
 - pH
 - oxygen
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls, specifically confined space

entry

- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- waste handling requirements and procedures
- recording requirements and procedures
- routine maintenance procedures
- aseptic techniques

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • use personal protective equipment and follow other specified OHS procedures • check and prepare product and any additions, including check of quality of wine yeast and bacterial cultures before use • check and confirm readiness of equipment before operation • start inoculation process correctly • monitor inoculation process control points for performance against specifications • take appropriate corrective action for out-of-specification process and equipment performance • collect waste and store, treat or dispose of appropriately • record information appropriately.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules and instructions • routine maintenance schedules • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • propagation vessels • storage vessels

RANGE STATEMENT	
	<ul style="list-style-type: none"> • sparging unit • sterile filtration equipment • pasteurisers • hoses and fittings • pumps • dosing equipment • mixers • testing equipment (e.g. baumé hydrometer, cylinder and thermometer)
Product and materials	<p>Product and materials may include:</p> <ul style="list-style-type: none"> • grape juice • wine • tirage • additions, including sulphur dioxide, acids, hydrogen peroxide, diammonium phosphate, active dry wine yeast, starter cultures, malolactic cultures, vitamins, and liquid or granulated sugar
Services	<p>Services may include:</p> <ul style="list-style-type: none"> • power • water • steam • compressed air • inert gas
Confirming equipment status	<p>Confirming equipment status involves:</p> <ul style="list-style-type: none"> • checking that hygiene and sanitation standards, safety standards and pre-start requirements are met and that equipment is operational • checking the calibration status of measuring instrumentation
Monitoring the process	<p>Monitoring the process may involve:</p> <ul style="list-style-type: none"> • the use of production data • sampling • checking baumé and temperature • visual inspection
Process set up, operation and monitoring functions	<p>Process set up, operation and monitoring functions may be:</p> <ul style="list-style-type: none"> • manual or involve the use of a process control system

RANGE STATEMENT	
Control points	Control points refer to those key points in a work process that must be monitored and controlled. This includes: <ul style="list-style-type: none"> • food safety (critical) • quality and regulatory control points • inspection points
Information systems	Information systems may be: <ul style="list-style-type: none"> • print or screen based
Work hazards	Work may involve exposure to: <ul style="list-style-type: none"> • chemical, dangerous or hazardous substances

FDFCEL2008A Perform dual column distillation (continuous still brandy) operations

Modification History

This unit supersedes and is equivalent to FDFCELDCDA Perform dual column distillation (continuous still brandy) operations.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the cellar stream of the wine sector. It covers the skills and knowledge required to start up, operate and shut down the dual column distillation process for the purpose of brandy production.
------------------------	---

Application of the Unit

Application of the unit	This unit applies to cellar operations staff engaged in the production of brandy using dual column distillation equipment. It covers managing the equipment and process, taking samples and tests, routine and emergency shutdowns, and keeping of records. A working knowledge of Customs and Excise regulations is also required. The unit can apply to both manual and computer-controlled distillation processes.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		
	FDFCEL2004A	Perform single column lees stripping (continuous still brandy) operations
	FDFCEL2012A	Handle spirits

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the dual column distillation process for operation	1.1 Product and materials are confirmed and available to meet production requirements 1.2 Product and materials are prepared to meet production requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is checked to confirm readiness for use 1.5 The process is set to meet production requirements
2. Operate and monitor the dual column distillation process	2.1 The dual column distillation process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Distillate meets specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification distillate, process and equipment performance is identified, rectified and/or reported
3. Shut down the distillation process	3.1 The process is shut down according to workplace procedures 3.2 Equipment is dismantled and prepared for cleaning 3.3 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify distillation requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product, materials and services. This may include checking temperature and alcoholic strength
- liaise with other work areas
- prepare product and materials as required. This may include heating the incoming product
- confirm equipment status and condition. This may include checking:
 - monitoring equipment
 - air pressure from compressor
 - fuel intake
 - water flow to condensers
 - receiver vessel
 - integrity of lines and fittings
- set up and start up the process. This will include any tests or procedures required to meet Customs and Excise regulations
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - alcohol in the feed
 - cooling water flow rates to condensers
 - volume of charge
 - temperature of distillate
 - alcoholic strength of distillate
 - heat source
 - reflux temperatures
 - temperature of incoming wine
 - temperature throughout still and/or column
 - temperatures and strengths at take-off points
 - containers for heads, hearts and tails
 - evaporation rates
 - change characteristics
 - pressure of still and/or column
 - condensation rate and/or condensation flow

- monitor supply and flow of product, materials and services to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product or batch changeovers
- take samples and conduct tests
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- record workplace information. This will include meeting the requirements of Customs and Excise regulations
- maintain work area to meet housekeeping standards
- ensure that all Customs and Excise regulations are adhered to
- sort, collect, treat, recycle or dispose of waste according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- carry out transfer operations according to enterprise procedures
- perform heat exchange operations according to enterprise procedures
- identify, rectify and/or report environmental non-compliance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of dual column distillation
- types and operation of distillation systems used for brandy production, including pot stills and continuous stills and the critical differences between them. This should include:
 - structure and operation
 - affect on characteristics of end product, including flavour, aromas, alcohol content, complexity and smoothness
- link to related processes. This will include the fermentation and preparation of the product to be distilled, oak maturation, storage and any further processing requirements of the distillate
- stages and changes that occur during brandy distillation. This will include critical temperatures and specific components affected
- effect of process stages on distillate
- quality characteristics and uses of brandy and brandy spirit
- product and materials preparation requirements and effect of variation on the process

- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- sampling and testing procedures
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls. This will include:
 - the dangerous properties of ethyl alcohol
 - emergency flooding procedures
 - emergency evacuation procedures
 - handling procedures of spirits
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- recording requirements and procedures
- operational knowledge of Customs and Excise regulations
- waste handling requirements and procedures where relevant
- cleaning and sanitation procedures where relevant
- routine maintenance procedures where relevant
- transfer procedures where relevant
- heat exchange procedures where relevant

FDFCEL2009A Perform first distillation (pot still brandy) operations

Modification History

This unit supersedes and is equivalent to FDFCELFDA Perform first distillation (pot still brandy) operations.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the cellar stream of the wine sector. It covers the skills and knowledge required to start up, operate and shut down a pot still for low wine production.
------------------------	---

Application of the Unit

Application of the unit	This unit applies to cellar operations staff required to operate a pot still for the first distillation of the input wine product. The distillate or low wine must meet pre-set specifications. The unit covers managing the distillation equipment and process, taking samples and tests, routine and emergency shutdowns, and keeping of records. A working knowledge of Customs and Excise regulations is also required. The unit can apply to both manual and computer-controlled pot still distillation processes.
--------------------------------	---

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify distillation requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product, materials and services. This may include checking temperature and alcoholic strength
- liaise with other work areas
- prepare product and materials as required. This may include:
 - heating the incoming product
 - surveying vessel to be distilled
 - taking dips of distillation product
 - testing distillation product
- confirm equipment status and condition. This may include checking:
 - pot is empty
 - discharge valve is shut
 - water flow to condensers
 - receiver vessels for low wine
 - pump operation
 - integrity of lines and fittings
- set up and start up the process. This will include any tests or procedures required to meet Customs and Excise regulations
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - cooling water flow rates to condensers
 - volume of charge
 - temperature of distillate
 - alcoholic strength of distillate
 - heat source
 - receiver for low wine
 - pressure of still
 - condensate rate or flow
- monitor supply and flow of product, materials and services to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product or batch changeovers

- take samples and conduct tests
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- record workplace information. This will include meeting the requirements of Customs and Excise regulations
- maintain work area to meet housekeeping standards
- ensure that all Customs and Excise regulations are adhered to
- sort, collect, treat, recycle or dispose of waste according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- perform transfer operations according to enterprise procedures
- identify, rectify and/or report environmental non-compliance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of batch distillation, including definition of the following terms:
 - pot still
 - charge
 - first distillation
 - low wine
 - feints
 - volatile wine components
- types and operation of distillation systems for brandy production, including pot stills and continuous stills and the critical differences between them. This should include:
 - structure and operation
 - effect on characteristics of end product, including flavour, aromas, alcohol content, complexity and smoothness
- link to related processes. This will include the yeasts and fermentation techniques used to make distillation wines, storage and handling of low wine, and distillation of low wine to brandy
- stages and changes which occur during first distillation. This will include changes in alcoholic strength and speed of distillation
- effect of process stages on different fractions of the distillate
- quality characteristics (specifications) for low wine product

- product and materials preparation requirements and effect of variation on the process
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- sampling and testing procedures
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls. This will include:
 - emergency flooding procedures
 - emergency evacuation procedures
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- recording requirements and procedures
- the operation of Customs and Excise regulations
- waste handling requirements and procedures where relevant
- routine maintenance procedures where relevant
- transfer procedures where relevant

FDFCEL2010A Operate the fine filtration process

Modification History

This unit supersedes and is equivalent to FDFCELFFPB Operate the fine filtration process.
April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the cellar stream of the wine sector. It covers the skills and knowledge required to prepare for and operate the fine filtration process.
------------------------	---

Application of the Unit

Application of the unit	This unit applies to cellar operations staff operating fine filtration equipment. Preparation and checking of the product to be filtered is covered including, where required, pre-filtering. The unit also covers checking and monitoring of equipment, including filter membranes and cartridges, and ensuring appropriate levels of sanitisation or sterilisation. The unit requires operating the fine filtration process to achieve pre-set specifications, taking samples and tests, routine and emergency shutdowns, and keeping of records. The unit can apply to both manual and computer-controlled fine filtration processes.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the fine filtration process for operation	1.1 Product is confirmed and available to meet filtration requirements 1.2 Product is prepared to meet filtration requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is checked to confirm readiness for use 1.5 The process is set to meet filtration requirements
2. Operate and monitor the fine filtration process	2.1 The fine filtration process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Filtered product meets specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification product, process and equipment performance is identified, rectified and/or reported
3. Shut down the fine filtration process	3.1 The process is shut down according to workplace procedures 3.2 Equipment is dismantled and prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify filtration requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product and services
- liaise with other work areas
- prepare product as required. This may include pre-filtering product to meet turbidity parameters of membrane
- confirm equipment status and condition. This may include:
 - conditioning membrane and/or cartridges prior to use
 - confirming operation of housing vents
 - checking integrity of 'o' ring seals on filter and/or membrane housing and/or plates
 - ensuring sanitation or sterilisation requirements have been met
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - type and grade of filter media
 - taints in filter media
 - level of dilution and product loss
 - product integrity
 - filter integrity
 - blockages in air filter
 - product displacement from filter
 - pressure differential
 - filter pressure
 - relevant product characteristics
- monitor supply and flow of product to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product or batch changeovers
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- record workplace information
- maintain work area to meet housekeeping standards

- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- identify, rectify and/or report environmental non-compliance
- conduct tests according to enterprise procedures
- perform transfer operations according to enterprise procedures
- handle inert gas according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of fine filtration
- link to related processes
- stages and changes which occur during fine filtration
- effect of process stages on end product
- quality characteristics and uses of fine filtration product
- product preparation requirements and effect of variation on the process
- main methods used in fine filtration
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- waste handling requirements and procedures
- recording requirements and procedures
- testing procedures where relevant
- routine maintenance procedures where relevant
- transfer procedures where relevant
- inert gas handling procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • use personal protective equipment and follow other specified OHS procedures • prepare product for fine filtering, including any pre-filtering • prepare and confirm status of membranes, filters and other equipment before commencing fine filtration process • monitor fine filtration process control points and equipment, including checking for blockages, filter integrity and taints • take corrective action in response to out-of-specification results or non-compliance • demonstrate knowledge of OHS hazards, controls and emergency procedures • identify, rectify and/or report environmental non-compliance • handle and/or remove waste in accordance with specified procedures • record information appropriately.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality

EVIDENCE GUIDE	
	and environmental requirements <ul style="list-style-type: none"> • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	Workplace information can include: <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules and instructions • routine maintenance schedules

RANGE STATEMENT	
	<ul style="list-style-type: none"> • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • various filters using pad and membrane (sheet or cartridge) filter media • cross-flow micro filtration • sparging units • pumps • lines and fittings
Product	<p>Product may include:</p> <ul style="list-style-type: none"> • product to complete fine filtration, including a range of juice and/or wine products
Services	<p>Services may include:</p> <ul style="list-style-type: none"> • power • gas • compressed and instrumentation air • steam and water
Confirming equipment status	<p>Confirming equipment status involve:</p> <ul style="list-style-type: none"> • checking that hygiene and sanitation standards, safety standards and pre-start requirements are met and that equipment is operational • checking the operation and calibration status of measuring instrumentation
Monitoring the process	<p>Monitoring the process may involve:</p> <ul style="list-style-type: none"> • the use of production data • checking turbidity and dissolved oxygen • filter integrity • bubble point tests • pressures
Process set up, operation and monitoring functions	<p>Process set up, operation and monitoring functions may be:</p> <ul style="list-style-type: none"> • manual or involve the use of a process control system
Control points	<p>Control points refer to those key points in a work process that must be monitored and controlled. This includes:</p>

RANGE STATEMENT	
	<ul style="list-style-type: none">• food safety (critical)• quality and regulatory control points• inspection points
Information systems	Information systems may be: <ul style="list-style-type: none">• print or screen based

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the heat exchange process for operation	1.1 Product and materials are confirmed and available to meet production requirements 1.2 Services are confirmed as available and ready for operation 1.3 Equipment is checked to confirm readiness for use 1.4 The process is set to meet production requirements
2. Operate and monitor the heat exchange process	2.1 The heat exchange process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Heat exchanged product meets specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification product, process and equipment performance is identified, rectified and/or reported
3. Shut down the heat exchange process	3.1 The process is shut down according to workplace procedures 3.2 Equipment is prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify heat exchange requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product, materials and services
- liaise with other work areas
- confirm equipment status and condition. This may include:
 - cleaning lines and receival tanks
 - checking receival vessel (in transfer operation)
 - checking product against processing specification
 - checking integrity of hoses and fittings
 - checking for leaks of chiller medium
 - setting temperature and tank number
 - setting pump speed
- start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - flow rate
 - inlet and outlet temperatures
 - heat exchange temperature settings
 - product loss
 - dilution
 - oxidation
 - relevant product characteristics (e.g. type and temperature)
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- conduct product or batch changeovers
- report and/or record corrective action as required
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- record workplace information
- maintain work area to meet housekeeping standards
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation

- identify, rectify and/or report environmental non-compliance
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of heat exchange operations
- types and operation of refrigerant systems
- link to related processes
- stages and changes which occur during heat exchange
- effect of process stages on end product
- quality characteristics and uses of heat exchanged product
- product and materials preparation requirements and effect of variation on the process
- main methods used to heat exchange product
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use spirit knowledge to complete production requirements	1.1 Spirit is located and identified using workplace system 1.2 Spirit handling and storage requirements are identified 1.3 Equipment is checked to ensure availability and readiness for use 1.4 Equipment is set up to meet requirements, as required 1.5 Equipment is monitored to confirm operating condition as required 1.6 Out-of-specification product, process and equipment performance is identified, rectified and/or reported 1.7 Drainings are collected, treated, disposed of or recycled according to workplace procedures and ATO requirements 1.8 Work is conducted in accordance with workplace environmental guidelines
2. Record information	2.1 Workplace information is recorded in the appropriate format to meet ATO requirements

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify spirit handling requirements
- select, fit and use personal protective clothing and/or equipment
- identify and promptly respond to hazardous situations and emergencies
- confirm supply of necessary services
- liaise with other work areas
- identify and select appropriate spirit handling procedures consistent with workplace procedures and ATO requirements
- select, set up and operate equipment as required
- monitor spirit handling activities and equipment to identify out-of-specification results or non-compliance. This may involve monitoring:
 - product loss and dilution
 - relevant product characteristics (e.g. classification, temperature, strength and volume)
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- sort, collect, treat, recycle or dispose of drainings
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- record workplace information
- maintain work area to meet housekeeping standards
- identify, rectify and/or report environmental non-compliance
- take samples according to enterprise procedures
- carry out routine tests according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of spirit use in winemaking

- fortified wine styles and their production
- properties of different types of spirit
- spirit classifications
- link to related processes
- role and requirements of ATO in the control of spirit
- sampling and testing procedures
- methods used in spirit maturation
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls, in particular, requirements for handling of flammable liquids
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns as required
- drainings handling requirements and procedures
- recording requirements and procedures
- sampling procedures where relevant
- testing procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • use personal protective equipment • follow other specified OHS procedures for handling flammable liquids

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • locate and select spirit appropriate for purpose • select correct equipment for spirit and purpose • identify out of specification product, process or equipment and take action according to procedures • collect drainings and take action according to enterprise procedures and ATO requirements • demonstrate knowledge of ATO role and requirements.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the pressure leaf filtration process for operation	1.1 Product and materials are confirmed and available to meet filtration requirements 1.2 Product and materials are prepared to meet filtration requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is checked to confirm readiness for use 1.5 The process is set to meet filtration requirements
2. Operate and monitor the pressure leaf filtration process	2.1 The pressure leaf filtration process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Filtered product meets specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification product, process and equipment performance is identified, rectified and/or reported
3. Shut down the pressure leaf filtration process	3.1 The process is shut down according to workplace procedures 3.2 Equipment is dismantled and prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify filtration requirements
- select, fit and use personal protective clothing and/or equipment

- confirm supply of necessary product, materials and services
- liaise with other work areas
- prepare product and materials as required. This may include:
 - pre-mixing filter media according to instructions
 - loading filter media into dosing or earth tub
- confirm equipment status and condition. This may involve checking:
 - screen fit and condition
 - receipt vessel capacity and readiness
 - product to be filtered against specifications
 - operation of dosage pump
 - pre-coating filter with product or water
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - filter pressures
 - flow rate
 - media type or grade
 - dosage of bodyfeed
 - product loss
 - dilution
 - oxidation
 - screen integrity
 - relevant product characteristics (e.g. turbidity, solids content and type)
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product and batch changeovers
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- record workplace information
- maintain work area to meet housekeeping standards
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- identify, rectify and/or report environmental non-compliance
- conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- prepare and make additions and finings according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor

- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of pressure leaf filtration
- link to related processes
- stages and changes which occur during pressure leaf filtration
- effect of process stages on end product
- quality characteristics and uses of filtered product
- product and materials preparation requirements and effect of variation on the process
- main methods used in pressure leaf filtration
- effects of setting or manipulating filtration process on end product characteristics
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- waste handling requirements and procedures
- recording requirements and procedures
- testing procedures where relevant
- routine maintenance procedures where relevant
- procedures for preparing and making additions and finings where relevant

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • use personal protective equipment and follow other specified OHS procedures • check supply and status of product and filter media before operating filter • check filter equipment status and condition before commencing operation • monitor filter process control points and equipment during filtration process • take corrective action in response to out-of-specification results or non-compliance • demonstrate knowledge of OHS hazards, controls and emergency procedures • record information appropriately.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.

EVIDENCE GUIDE	
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules or instructions • routine maintenance schedules • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • a range of pressure leaf filters and pressure lees filters
Product and materials	<p>Product and materials may include:</p> <ul style="list-style-type: none"> • a range of wine and/or juice product and water • a range of filter media, including diatomite, perlite, cellulose and polyethylene
Services	<p>Services may include:</p> <ul style="list-style-type: none"> • power

RANGE STATEMENT	
	<ul style="list-style-type: none"> • water • compressed air • inert gas
Confirming equipment status	<p>Confirming equipment status involves:</p> <ul style="list-style-type: none"> • checking that hygiene and sanitation standards, safety standards and pre-start requirements are met and that equipment is operational • checking the operation and calibration of measuring instrumentation
Monitoring the process	<p>Monitoring the process may involve:</p> <ul style="list-style-type: none"> • the use of production data • checking turbidity and dissolved oxygen
Process set up, operation and monitoring functions	<p>Process set up, operation and monitoring functions may be:</p> <ul style="list-style-type: none"> • manual or involve the use of a process control system
Control points	<p>Control points refer to those key points in a work process that must be monitored and controlled. This includes:</p> <ul style="list-style-type: none"> • food safety (critical) • quality and regulatory control points • inspection points
Information systems	<p>Information systems may be:</p> <ul style="list-style-type: none"> • print or screen based
Work hazards	<p>Work may involve exposure to:</p> <ul style="list-style-type: none"> • chemical, dangerous or hazardous substances

FDFCEL2014A Operate the rotary vacuum filtration process

Modification History

This unit supersedes and is equivalent to FDFCELRVFB Operate the rotary vacuum filtration process.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the cellar stream of the wine sector. It covers the skills and knowledge required to prepare for and operate the rotary vacuum filtration process.
------------------------	--

Application of the Unit

Application of the unit	This unit applies to cellar staff in winemaking enterprises who use a rotary vacuum filtration process to filter juice product or wine using a range of filter media, including diatomite, perlite, cellulose and polyethylene. The unit can apply to both manual and computer-controlled rotary vacuum filter equipment.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		
	FDFCEL2018A	Carry out inert gas handling operations
	FDFCEL2019A	Carry out transfer operations

Employability Skills Information

Employability skills	This unit contains employability skills
-----------------------------	---

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the rotary vacuum filtration process for operation	1.1 Product and materials are confirmed and available to meet filtration requirements 1.2 Product and materials are prepared to meet filtration requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is checked to confirm readiness for use 1.5 The process is set to meet filtration requirements
2. Operate and monitor the rotary vacuum filtration process	2.1 The rotary vacuum filtration process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Filtered product meets specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification product, process and equipment performance is identified, rectified and/or reported
3. Shut down the rotary vacuum filtration process	3.1 The process is shut down according to workplace procedures 3.2 Equipment is dismantled and prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify filtration requirements

- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product, materials and services
- liaise with other work areas
- prepare product and materials as required. This may include:
 - pre-mixing product tank to distribute solids evenly
 - pre-coating filter drum surface
- confirm equipment status and condition. This may involve checking the screen or cloth condition and receipt vessels
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - filter vacuum
 - flow rate
 - media type or grade
 - precoat slurry
 - precoat discharge
 - product loss
 - dilution
 - oxidation
 - relevant product characteristics (e.g. turbidity, solids content and type)
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product and batch changeovers
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- record workplace information
- maintain work area to meet housekeeping standards
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- identify, rectify and/or report environmental non-compliance
- clean and sanitise equipment according to enterprise procedures
- take samples according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of rotary vacuum filtration
- link to related processes
- stages and changes which occur during rotary vacuum filtration
- effect of process stages on end product
- quality characteristics and uses of rotary vacuum filtration product
- product and materials preparation requirements and effect of variation on the process
- main methods used in rotary vacuum filtration
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- waste handling requirements and procedures
- recording requirements and procedures
- cleaning and sanitation procedures where relevant
- sampling procedures where relevant
- routine maintenance procedures where relevant

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for must draining operations	1.1 Product and materials are confirmed and available to meet production requirements 1.2 Product and materials are prepared to meet production requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is checked to confirm readiness for use 1.5 The process is set to meet production requirements
2. Operate and monitor must draining operations	2.1 The must draining process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3. Must meets specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification product, process and equipment performance is identified, rectified and/or reported
3. Complete must processing operations	3.1 The process is shut down according to workplace procedures 3.2 Equipment prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.4 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify draining requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product, materials and services
- liaise with other work areas
- prepare product and materials as required. This may include:
 - checking receival vessels
 - maintaining gas cover for skin separation
 - gassing empty drainer prior to product entry
- confirm equipment status and condition. This may include checking:
 - screen fit and condition
 - press and crushing operations
 - cleaning and/or sanitisation requirements have been met
 - position or alignment of valves
 - integrity of door seal
- start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - draining effectiveness
 - product loss
 - dilution
 - oxidation
 - relevant product characteristics (e.g. skin contact and moisture)
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product and batch changeovers
- follow confined space entry policies and procedures when required
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- record workplace information
- maintain work area to meet housekeeping standards
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment,

- and removing waste either manually or by rinsing, in preparation for sanitation
- identify, rectify and/or report environmental non-compliance
- clean and sanitise equipment according to enterprise procedures
- take samples according to enterprise procedures
- make additions according to enterprise procedures
- carry out inert gas handling operations according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of must draining operations
- link to related processes
- stages and changes which occur during draining
- effect of process stages on end product
- quality characteristics and uses of product and materials
- product and materials preparation requirements and effect of variation on the process
- main methods used in must draining
- techniques that may be used to manipulate must draining operations and wine characteristics, including:
 - pressure
 - temperature
 - carbon dioxide
 - skin contact
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls, specifically confined space entry
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- waste handling requirements and procedures

- recording requirements and procedures
- cleaning and sanitation procedures where relevant
- sampling procedures where relevant
- preparing and making additions where relevant
- inert gas handling procedures where relevant
- routine maintenance procedures where relevant

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the crushing process for operation	1.1 Product and materials are confirmed and available to meet crushing requirements 1.2 Product and materials are prepared to meet crushing requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is checked to confirm readiness for use 1.5 The process is set to meet crushing requirements
2. Operate and monitor the crushing process	2.1 The crushing process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Crushed product meets specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification crushed product, process and equipment performance is identified, rectified and/or reported
3. Shut down the crushing process	3.1 The process is shut down according to workplace procedures 3.2 Equipment is dismantled and prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify crushing requirements
- select, fit and use personal protective clothing and/or equipment

- confirm supply of necessary product, materials and services
- liaise with other work areas
- prepare product and materials as required. This may include:
 - positioning and aligning the tipper vessels
 - releasing free run juice before opening tailgate
 - preparing pre-mix additives and loading into hoppers
- confirm equipment status and condition. This may include:
 - checking for exposed or reactive metal parts
 - checking for lubricating or hydraulic fluid leaks
 - checking capacity of receival vessels
 - checking must pump operation
 - removing matter other than grape (MOG)
 - checking magnet operation
 - flushing with water and/or caustic
 - confirming operation of fruit unloading system
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - hopper screw speed
 - roller settings
 - destemmer speed
 - must pump speed
 - dosage of additions
 - dilution and oxidation
 - additions
 - product loss
 - relevant product characteristics (e.g. harvest method, berry size, slip skin, variety, quality, stem removal and berry maceration)
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- conduct product and batch changeovers
- report and/or record corrective action as required
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- record workplace information
- maintain work area to meet housekeeping standards
- follow confined space entry policies and procedures
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- identify, rectify and/or report environmental non-compliance

- carry out routine maintenance according to enterprise procedures
- prepare and make additions and finings according to enterprise procedures
- handle inert gas according to enterprise procedures
- take samples according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of crushing
- link to related processes
- stages and changes which occur during crushing
- effect of crushing stages on end product
- quality characteristics and uses of crushed product and materials
- product and materials preparation requirements and effect of variation on the process
- main methods used in crushing
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls, specifically confined space entry
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- waste handling requirements and procedures
- recording requirements and procedures
- routine maintenance procedures where relevant
- preparing and making additions and finings where relevant
- inert gas handling procedures where relevant
- sampling techniques where relevant

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • use personal protective equipment and follow other specified OHS procedures • check crushing equipment status and condition before commencing operation • monitor crushing process control points and equipment during crushing • take corrective action in response to out-of-specification results or non-compliance • demonstrate knowledge of OHS hazards, controls and emergency procedures • sort, collect, treat, recycle or dispose of waste • record information appropriately.
<p>Method of assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.

EVIDENCE GUIDE	
Context of and specific resources for assessment	This unit should be assessed together with units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules and instructions • routine maintenance schedules • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • roller crusher, roller crusher-destemmer, destemmer-roller crusher, and beater-destemmer
Product and materials	<p>Product and materials may include:</p> <ul style="list-style-type: none"> • a range of grape varieties • additions, including enzymes, sulphur dioxide (in

RANGE STATEMENT	
	various forms), acids, diammonium phosphate and yeast
Services	<p>Services may include:</p> <ul style="list-style-type: none"> • power • water • compressed air • inert gas
Confirming equipment status	<p>Confirming equipment status involves:</p> <ul style="list-style-type: none"> • checking that hygiene and sanitation standards, safety standards and pre-start requirements are met and that equipment is operational • checking the operation and calibration status of measuring instrumentation
Monitoring the process	<p>Monitoring the process may involve:</p> <ul style="list-style-type: none"> • the use of production data
Process set up, operation and monitoring functions	<p>Process set up, operation and monitoring functions may be:</p> <ul style="list-style-type: none"> • manual or involve the use of a process control system
Control points	<p>Control points refer to those key points in a work process that must be monitored and controlled. This includes:</p> <ul style="list-style-type: none"> • food safety (critical) • quality and regulatory control points • inspection points
Information systems	<p>Information systems may be:</p> <ul style="list-style-type: none"> • print or screen based
Work hazards	<p>Work may involve exposure to:</p> <ul style="list-style-type: none"> • chemical, dangerous or hazardous substances

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare additions and finings	1.1 Product and materials are confirmed and available to meet production requirements 1.2 Product and materials are weighed or measured to meet requirements 1.3 Product and materials handling, mixing and blending equipment is checked to confirm readiness for use 1.4 Services are confirmed as available and ready for use 1.5 The process is set to meet production requirements
2. Make additions and finings	2.1 Product and materials are added in quantities and sequence specified by batch instructions 2.2 The process is operated to meet addition requirements 2.3 Control points are monitored to confirm performance is maintained within specification 2.4 Additions and finings meet specification 2.5 Equipment is monitored to confirm operating condition 2.6 Out-of-specification product, process and equipment performance is identified, rectified and/or reported
3. Complete additions and finings	3.1 The process is completed according to workplace procedures 3.2 Equipment is dismantled and prepared for cleaning 3.3 Unused materials are stored in designated area 3.4 Waste is collected, treated and disposed of, or recycled according to workplace procedures 3.5 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify batch requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product, materials and services
- liaise with other work areas
- confirm equipment status and condition. This may include:
 - checking receival vessel (in transfer operations)
 - checking pump operation and integrity
 - checking for leaks
 - checking seals of hoses and fittings
 - introducing inert gas cover on tank
 - ensuring that all equipment is clean and/or sanitised
- set up and start up equipment to meet addition and fining requirements
- prepare product and materials in correct quantities and sequence
- monitor the preparation and mixing process. This may include monitoring:
 - mixing effectiveness
 - dosing rate
 - product loss
 - dilution
 - oxidation
 - speed of additions
 - relevant product characteristics (type)
- monitor flow of product and materials to and from the process
- transfer addition or fining to designated location
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirement
- maintain workplace records
- maintain work area to meet housekeeping standards
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- use oral communication skills language to fulfil the job role as specified by the organisation,

including questioning, active listening, asking for clarification and seeking advice from supervisor

- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and properties of addition and fining agents
- purpose and principles of preparing and making additions and finings
- link to related processes
- quality characteristics of product and materials used and effect on process outcome
- effect of mixing on the end product
- main methods of mixing, including:
 - pumping over
 - gas mixing
 - rummaging
 - stirring
 - venturi mixing
 - submersible mixers
 - in-place mixers
 - dosing
- cleaning and sanitation requirements of handling equipment
- cross-contamination risks and consequences
- batch specifications, procedures and operating parameters
- equipment and instrumentation components purpose and operation
- basic operating principles of process control systems where relevant
- services used
- significance and methods of monitoring control points within the process
- common causes of variation and corrective action required
- consequences of over addition eg stripping, wasting materials
- Occupational Health and Safety (OHS) hazards and controls
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- waste handling requirements and procedures
- recording requirements and procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- prepare products and materials, including weighing and measuring as required
- set up and operate equipment
- additions and finings are added according to specification
- ensure control points are monitored and appropriate corrective action is taken for out-of-specification product, process and equipment performance
- collect unused materials and waste, and store, treat or dispose of appropriately
- use personal protective equipment and follow other OHS procedures
- record information appropriately.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment as required
- work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements
- instructions, information, specifications and schedules as required
- equipment, services and corresponding information as required
- products and materials as required
- internal and external customers and suppliers as required

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> cleaning procedures, materials and equipment as required.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> Standard Operating Procedures (SOPs) specifications production schedules and instructions routine maintenance schedules work notes Material Safety Data Sheets (MSDS) manufacturer instructions verbal direction from manager, supervisor or senior operator

FDFCEL2018A Carry out inert gas handling operations

Modification History

This unit supersedes and is equivalent to FDFCELGASB Carry out inert gas handling operations.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the cellar stream of the wine sector. It covers the skills and knowledge required to use and handle inert gases safely.
------------------------	---

Application of the Unit

Application of the unit	This unit applies to the use of inert gases in winemaking operations. Individual or blends of inert gases may be used. Gases may be used in a solid or gaseous state. The unit covers the making of carbon dioxide bricks or snow. Winery operations requiring the use of inert gases may include air-freeing tanks, lines and ullage space, and sparging. Gases covered include carbon dioxide, nitrogen and argon (gas).

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select gases appropriate to the task	1.1 Purpose of gas usage is identified 1.2 Appropriate gas or gases are selected to meet requirements
2. Prepare and use gases in winery operations	2.1 Characteristics of gas to be handled are identified to determine risk factors 2.2 Appropriate equipment is selected and prepared or set up to meet requirements 2.3 Gas handling equipment is operated according to workplace procedures 2.4 Gas is handled according to specific risk factors and workplace procedures 2.5 Carbon dioxide bricks or snow are manufactured according to workplace procedures, if required 2.6 Gas type and quantity delivered meets specification
3. Complete gas handling operations	3.1 Equipment is shut down according to workplace procedures 3.2 Equipment is prepared for cleaning 3.3 Waste generated by the process is collected, treated and disposed of or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify gas handling requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary services, equipment and materials
- liaise with other work areas
- identify the purpose of gas usage in a variety of winery operations
- select appropriate gases to meet requirements, including:
 - single or blend of gases
 - gaseous or solid form
 - dosage
 - interpreting cylinder and/or service line information
- identify risk factors associated with gas to be handled
- select equipment appropriate to the task and gas to be handled
- set up and prepare equipment ready for operations. This may include:
 - checking gas levels in cylinder
 - setting timers or filling time
 - positioning receival slide
 - checking integrity of sparging (sinter) stone
 - ensuring hygiene and sanitation standards are met
 - checking machine sequence
 - checking gas pressures
- operate equipment according to workplace procedures or manufacturers' instructions
- manufacture carbon dioxide bricks or snow, if required
- deliver gas according to specifications
- monitor gas handling process. This may include monitoring:
 - gas pressure
 - gas flow
 - integrity of seals
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements

- record workplace information
- maintain work area to meet housekeeping standards
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- identify, rectify and/or report environmental non-compliance
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of using inert gases in winery operations
- properties and functions of gases
- hazards associated with different forms or types of gas
- gas handling policy and procedures
- factors affecting choice of gas or gas blends, including:
 - wine type and style
 - winemaker preference
- equipment set up, preparation and operation procedures and requirements, including settings and key variables
- purpose of personal protective clothing and equipment
- regulatory requirements as they affect immediate gas handling responsibilities
- requirements to liaise and/or advise related work areas
- routine maintenance requirements
- cleaning and sanitising requirements
- procedures and responsibility for reporting problems
- shutdown and routine shutdown sequence
- waste handling requirements and procedures
- Occupational Health and Safety (OHS) requirements
- recording requirements and procedures
- manufacturing process for dry ice bricks or snow

Evidence Guide

FDFCEL2019A Carry out transfer operations

Modification History

This unit supersedes and is equivalent to FDFCELTRFB Carry out transfer operations.
April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the cellar stream of the wine sector. It covers the skills and knowledge required to prepare for and carry out transfer operations.
------------------------	---

Application of the Unit

This unit applies to cellar staff in wine making and distilled products enterprises who transfer various types of input and finished products between tankers and storage facilities, between storage facilities and from storage facilities to and from processing equipment. The unit covers operating and monitoring of pumps, hoses, valves, fixed lines and fittings. Product and materials transferred may include a range of wine and/or juice product and water. Equipment control and monitoring may be through manual, or process controls.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the transfer process for operation	1.1 Product and materials are confirmed and available to meet transfer requirements 1.2 Product and materials are prepared to meet transfer requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is checked to confirm readiness for use 1.5 The process is set to meet transfer requirements
2. Operate and monitor the transfer process	2.1 The transfer process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Product is transferred according to specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification product, process and equipment performance is identified, rectified and/or reported
3. Shut down the transfer process	3.1 The process is shut down according to workplace procedures 3.2 Equipment is dismantled and prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify transfer requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product, materials and services
- liaise with other work areas
- prepare product and materials as required
- confirm equipment status and condition. This may include:
 - confirming availability of destination receival vessels
 - confirming quantity of product in storage vessels
 - cleaning lines and equipment that the product will flow through
 - cleaning and gassing receival tanks
 - checking integrity of pipes, connections and transfer set up
 - selecting appropriate size of pipes or hoses
 - positioning valves
 - checking operation and setting speed of pumps
 - flushing line prior to transfer
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - flow rate
 - finish times
 - ullages
 - balances
 - product loss
 - dilution
 - oxidation
 - relevant product characteristics (e.g. type and faults)
- monitor supply and flow of product and materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product and batch changeovers
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation

- shut down equipment in response to routine shutdown requirements
- record workplace information
- maintain work area to meet housekeeping standards
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation.
- identify, rectify and/or report environmental non-compliance
- take samples according to enterprise procedures
- conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of transfer
- link to related processes
- stages and changes that occur during transfer
- effect of process stages on end product
- quality characteristics and uses of transferred product
- product and materials preparation requirements and effect of variation on the process
- main methods used in transfer
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- waste handling requirements and procedures
- recording requirements and procedures
- sampling procedures where relevant
- testing procedures where relevant

- routine maintenance procedures where relevant

FDFCEL2020A Prepare and wax tanks

Modification History

This unit supersedes and is equivalent to FDFCELWAXB Prepare and wax tanks.
April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the cellar stream of the wine sector. It covers the skills and knowledge required to prepare and wax tanks.
------------------------	---

Application of the Unit

Application of the unit	This unit applies to the waxing of tanks used in winemaking. The unit covers selecting and using equipment appropriate to the tank to be waxed and selection of the appropriate wax. This unit covers entering and removing top layer of wax on tank surfaces and removal of tartrates and waste from tanks. Training in confined space entry will be required for this unit. A Hot Work permit may be required. Special tank entry and breathing equipment may also be required. Application of wax may include spraying and melting of wax onto tank surface.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare materials and tank for waxing	1.1 Tank is prepared and confirmed as ready to wax 1.2 Equipment is checked to confirm readiness for use 1.3 Services are confirmed and available, as required 1.4 Wax is prepared according to instructions
2. Wax tanks	2.1 Top layer of wax is removed according to workplace procedures 2.2 Wax is applied according to workplace procedures 2.3 Equipment is operated according to workplace procedures 2.4 Waxing process is monitored and out-of-specification process and equipment performance is identified, rectified and/or reported 2.5 Occupational health and safety (OHS) procedures are adhered to at all times 2.6 Waxed tank meets specification
3. Complete tank waxing activities	3.1 Waxing equipment is shut down according to workplace procedures 3.2 Equipment is cleaned according to workplace procedures 3.3 Waste generated by both the waxing process and cleaning process is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Tank is returned to operating order 3.5 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify waxing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary equipment, materials, services and personnel
- liaise with other work areas
- apply confined space entry policy and procedures
- prepare tank for waxing. This may include:
 - dismantling
 - positioning valves and components
 - removing tartrates
 - drying tank surface
 - removing waste from tank
 - cleaning tank
 - pre-entry checks on tank and atmosphere
- prepare wax for use. This may include:
 - selecting appropriate wax
 - melting wax
 - blending wax to meet specification
 - following appropriate handling procedures
- confirm equipment status and condition
- remove top layer of wax on tank surfaces. This may include:
 - manual scraping
 - using a gas torch
 - utilising cold scrape methods
- apply wax to tank surfaces. This may include:
 - spraying hot melt wax onto surface
 - melting wax into tank surface using a blowtorch
- operate equipment according to workplace procedures and manufacturer instructions
- monitor waxing process. This may include monitoring:
 - wax temperature
 - surface coverage (area and depth)
 - burn on effectiveness
 - integrity of seal of tank surface

- atmosphere in tank
- equipment operation
- apply OHS principles, policies and procedures, including those associated with:
 - confined space entry
 - working on ladders or scaffolding
 - working with hazardous substances
- return tank to operating order. This may include:
 - positioning valves or door
 - carrying out checks and inspections to confirm effectiveness of waxing
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- record workplace information
- maintain work area to meet housekeeping standards
- clean waxing equipment
- identify, rectify and/or report environmental non-compliance
- apply OHS principles, policies and procedures associated with a Hot Work permit according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of waxing tanks
- safe handling and storage of waxes used
- functions of waxes and related equipment and materials
- waxing requirements for specific tanks. This includes tanks with damage, and different wax mix preparation requirements
- purpose of personal protective clothing and equipment
- methods used to render tanks safe to wax, including lock-out, tag-out and isolation procedures
- equipment settings required for operating waxing equipment
- inspection points for waxing
- regulatory requirements as they affect immediate responsibilities for waxing
- types of waste generated by both the waxing and the cleaning process and related collection, treatment and disposal requirements

- requirements to liaise or advise related work areas
- reporting and recording systems
- tank waxing procedures and specifications
- OHS hazards and controls, including:
 - confined space entry
 - using hazardous substances
 - working on ladders and scaffolding
- procedures for returning tanks to operation
- OHS hazards and controls associated with a Hot Work permit where relevant

Evidence Guide

Not applicable.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules or instructions • routine maintenance schedules • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Preparation and waxing materials	<p>Preparation and waxing materials may include:</p> <ul style="list-style-type: none"> • cleaning and sanitising chemicals, paraffin, micro wax and beeswax
Equipment	<p>Equipment used to prepare and wax tanks depends on specific requirements and would normally include:</p> <ul style="list-style-type: none"> • hoses • spraying unit • burning on equipment • scaffolding • ventilation unit • scrapers • air blowers • air driers
Tank entry equipment	<p>Tank entry equipment may include:</p> <ul style="list-style-type: none"> • harness • rope • breathing apparatus • medical air supply

RANGE STATEMENT	
	<ul style="list-style-type: none"> • buddy bottle • ladder • fire extinguisher • oxygen monitor
Services	<p>Services depend on specific requirements. Examples include:</p> <ul style="list-style-type: none"> • high-pressure water or steam, and gas
Preparing equipment for cleaning	<p>Preparing equipment for cleaning includes:</p> <ul style="list-style-type: none"> • confirming that all waste materials have been cleared and equipment is correctly locked out, tagged out or isolated as required by operating procedures
Work	<p>Work may be:</p> <ul style="list-style-type: none"> • carried out in confined spaces
Work hazards	<p>Work may involve exposure to:</p> <ul style="list-style-type: none"> • chemical, dangerous or hazardous substances
Workplace information	<p>Workplace information may be:</p> <ul style="list-style-type: none"> • print or screen based

FDFCEL3001A Perform second distillation (pot still brandy) operations

Modification History

This unit supersedes and is equivalent to FDFCELSDA Perform second distillation (pot still brandy) operations.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the cellar stream of the wine sector. It covers the skills and knowledge required to start up, operate and shut down a pot still for second distillation operations.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit applies to cellar operations staff required to operate a pot still for the second distillation of low wine. The distillation product may be fortifying spirit, commercial and premium brandy.</p> <p>The unit covers managing the distillation equipment and process, taking samples and tests, routine and emergency shutdowns, and keeping of records. A working knowledge of Customs and Excise regulations is also required. The unit can apply to both manual and computer-controlled pot still distillation processes.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		
	FDFOP2013A	Apply sampling procedures
	MSL973001A	Perform basic tests

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the second distillation process for operation	1.1 Product and materials are confirmed and available to meet production requirements 1.2 Product and materials are prepared to meet production requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is checked to confirm readiness for use 1.5 The process is set to meet production requirements
2. Operate and monitor the second distillation process	2.1 The distillation process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Distillate meets specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification distillate, process and equipment performance is identified, rectified and/or reported
3. Shut down the second distillation process	3.1 The process is shut down according to workplace procedures 3.2 Equipment is dismantled and prepared for cleaning 3.3 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify distillation requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product, materials and services. This may include checking temperature and alcoholic strength
- liaise with other work areas

- prepare product and materials as required. This may include:
 - heating the incoming product
 - surveying vessel to be distilled
 - taking dips of low wine product
 - testing low wine product
- confirm equipment status and condition. This may include checking:
 - water flow to condensers
 - receiver vessels for heads, heart and tails
 - pot is empty
 - discharge valve is shut
 - pump operation
 - integrity of lines and fittings
- set up and start up the process. This will include any tests or procedures required to meet Customs and Excise regulations
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - valves
 - cooling water flow rates to condensers
 - volume of charge
 - temperature of distillate
 - alcoholic strength of distillate
 - heat source
 - receivers for distillation products
 - pressure of still
 - condensate rate or flow (speed)
 - condenser and/or brandy ball temperature
 - safety and vacuum valves
- monitor supply and flow of product, materials and services to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product or batch changeovers
- take samples and conduct tests
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements. This may include:
 - shutting off steam
 - shutting off water to condenser and brandy ball
 - checking for presence of vapour in pot
 - discharging waste to effluent system
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, removing waste either manually or by rinsing in preparation for cleaning and sanitation.
- record workplace information. This will include meeting the requirements of Customs and

Excise regulations

- maintain work area to meet housekeeping standards
- ensure that all Customs and Excise regulations are adhered to
- sort, collect, treat, recycle or dispose of waste according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- perform transfer operations according to enterprise procedures
- identify, rectify and/or report environmental non-compliance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of second distillation operations, including definition of the following terms:
 - second distillation
 - heads or feints
 - heart
 - tails or oils (higher alcohols)
 - brandy spirit (Customs definition)
- alcoholic content of distillation product and final product and legislative requirements
- range of products produced by distillation process, including fortifying spirit, commercial and premium brandy
- link to related processes. This will include the preparation of the product to be distilled and any further processing requirements of the distillate
- stages and changes which occur during distillation. This will include critical temperatures, alcoholic strength and specific components affected
- effect of process stages on distillate and by-products
- quality characteristics and uses of a range of distillation products including fortifying spirit, commercial and premium brandy
- product and materials preparation requirements and effect of variation on the process
- process specifications, procedures and operating parameters. This may include:
 - individual still capacities
 - boiler pressure
 - alcoholic strength
 - temperatures
 - winemakers specifications
- equipment and instrumentation components, purpose and operation

- basic operating principles of process control systems where relevant
- sampling and testing procedures
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls. This will include:
 - the dangerous properties of ethyl alcohol
 - emergency flooding procedures
 - emergency evacuation procedures
 - handling procedures of spirits
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- recording requirements and procedures
- operational knowledge of Customs and Excise regulations
- waste handling requirements and procedures where relevant
- routine maintenance procedures where relevant
- transfer procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • use personal protective equipment and follow other specified OHS procedures • prepare low wine for distillation, including checks for temperature and alcoholic strength and undertaking any required heating of low wine • prepare and confirm status of equipment before commencing second distillation • monitor distillation process control points and equipment, including taking of samples and conducting of tests • take corrective action in response to out-of-specification results or non-compliance • perform routine and emergency shutdowns • demonstrate knowledge of OHS hazards, controls and emergency procedures • adhere to Customs and Excise regulations • record information appropriately.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as

EVIDENCE GUIDE	
	<p>required</p> <ul style="list-style-type: none"> • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules and instructions • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Distillation equipment	<p>Distillation equipment may include:</p> <ul style="list-style-type: none"> • pot still • pumps

RANGE STATEMENT	
	<ul style="list-style-type: none"> • lines and fittings • valves • heat exchangers • condensers • brandy ball • receival vessels • temperature controls • test equipment (e.g. hydrometers and thermometers)
Product and materials	Product and materials may include: <ul style="list-style-type: none"> • low wines
Services	Services may include: <ul style="list-style-type: none"> • power • water (hot and cold) • steam • fuel
Confirming equipment status	Confirming equipment status involves: <ul style="list-style-type: none"> • checking that hygiene and sanitation standards, safety standards and pre-start requirements are met and that equipment is operational • checking the operation and calibration of measuring instrumentation
Monitoring the process	Monitoring the process may involve: <ul style="list-style-type: none"> • the use of production data, such as speed control sheets • sampling • analytical tests
Process set up, operation and monitoring functions	Process set up, operation and monitoring functions may be: <ul style="list-style-type: none"> • manual or involve the use of a process control system
Control points	Control points refer to those key points in a work process that must be monitored and controlled. This includes: <ul style="list-style-type: none"> • food safety (critical) • quality and regulatory control points • inspection points
Information systems	Information systems may be: <ul style="list-style-type: none"> • print or screen based

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the continuous clarification by separation (flotation) process for operation	1.1 Product and materials are confirmed and available to meet clarification requirements 1.2 Product and materials are prepared to meet clarification requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is checked to confirm readiness for use 1.5 The process is set to meet clarification requirements
2. Operate and monitor the continuous clarification by separation (flotation) process	2.1 The continuous clarification by separation (flotation) process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Clarified product meets specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification product, process and equipment performance is identified, rectified and/or reported
3. Shut down the continuous clarification by separation (flotation) process	3.1 The process is shut down according to workplace procedures 3.2 Equipment is dismantled and prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify clarification requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product and services
- liaise with other work areas
- prepare product as required. This may include:
 - checking that it is pectin negative
 - adding sulphur
 - cooling product
 - adding pectin enzymes
- confirm equipment status and condition. This may include:
 - loading fining agents
 - positioning valves correctly
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - flow rates
 - flotation effectiveness
 - test flotation results
 - dosage rates
 - dosage ratios
 - gas rates
 - pressure
 - weir level
 - product loss
 - dilution
 - oxidation
 - relevant product characteristics (e.g. variety, turbidity and solids content)
- monitor supply and flow of product to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product and batch changeovers
- sort, collect, treat, recycle or dispose of waste

- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- record workplace information
- maintain work area to meet housekeeping standards
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- identify, rectify and/or report environmental non-compliance
- carry out routine maintenance according to enterprise procedures
- conduct routine tests according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of continuous clarification by separation (flotation)
- link to related processes
- stages and changes which occur during continuous clarification by separation (flotation)
- effect of process stages on end product
- quality characteristics and uses of continuous clarification by separation (flotation) product
- product preparation requirements and effect of variation on the process
- main methods used in continuous clarification by separation (flotation)
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- waste handling requirements and procedures
- recording requirements and procedures
- testing procedures where relevant
- routine maintenance procedures where relevant

Application of the Unit

Application of the unit	This unit applies to cellar operations staff required to operate a continuous clarification process. The product may include a range of juice products. The unit covers managing the equipment and process, monitoring, routine and emergency shutdowns, and keeping of records.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		
	FDFCEL2019A	Carry out transfer operations

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the concentration process for operation	1.1 Product is confirmed and available to meet concentration requirements 1.2 Services are confirmed as available and ready for operation 1.3 Equipment is checked to confirm readiness for use 1.4 The process is set to meet concentration requirements
2. Operate and monitor the concentration process	2.1 The concentration process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Concentrated product meets specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification product, process and equipment performance is identified, rectified and/or reported
3. Shut down the concentration process	3.1 The process is shut down according to workplace procedures 3.2 Equipment is dismantled and prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify concentration requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product and services
- liaise with other work areas
- confirm equipment status and condition. This may include:
 - confirming availability of receival vessels
 - setting machine and process variables (e.g. flow rate, vacuum and temperature)
 - positioning valves
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - flow rates
 - operating vacuum
 - operating temperatures
 - cone rpm
 - dilution and product loss
 - relevant product characteristics (brix level)
- monitor supply and flow of product to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product and batch changeovers
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- record workplace information
- maintain work area to meet housekeeping standards
- identify, rectify and/or report environmental non-compliance
- take samples according to enterprise procedures
- conduct tests according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from

supervisor

- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of concentration operation
- link to related processes
- stages and changes which occur during concentration operation
- effect of process stages on end product
- quality characteristics and uses of concentrated product
- product preparation requirements and effect of variation on the process
- main methods used in concentration process
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- waste handling requirements and procedures
- recording requirements and procedures
- sampling procedures where relevant
- testing procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

EVIDENCE GUIDE	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • use personal protective equipment and follow other specified OHS procedures • prepare and confirm status of equipment before commencing clarification • monitor concentration process control points and equipment • take corrective action in response to out-of-specification results or non-compliance • perform routine and emergency shutdowns • demonstrate knowledge of OHS hazards, controls and emergency procedures • record information appropriately.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.

EVIDENCE GUIDE	
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules and instructions • routine maintenance schedules • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • various capacity and configurations of centrifugal juice concentrators and associated in-line equipment, such as heat exchangers and vacuum pumps
Product	<p>Product may include:</p> <ul style="list-style-type: none"> • a range of juice products
Services	<p>Services may include:</p> <ul style="list-style-type: none"> • power

RANGE STATEMENT	
	<ul style="list-style-type: none"> • steam • water • brine
Confirming equipment status	Confirming equipment status involves: <ul style="list-style-type: none"> • checking that hygiene and sanitation standards, safety standards and pre-start requirements are met and the equipment is operational • checking the operation and calibration status of measuring equipment
Monitoring the process	Monitoring the process may involve: <ul style="list-style-type: none"> • the use of production data
Process set up, operation and monitoring functions	Process set up, operation and monitoring functions may be: <ul style="list-style-type: none"> • manual or involve the use of a process control system
Control points	Control points refer to those key points in a work process that must be monitored and controlled. This includes: <ul style="list-style-type: none"> • food safety (critical) • quality and regulatory control points • inspection points
Information systems	Information systems may be: <ul style="list-style-type: none"> • print or screen based
Work hazards	Work may involve exposure to: <ul style="list-style-type: none"> • chemical, dangerous or hazardous substances

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the de-aromatising, de-alcoholising or de-sulphuring process for operation	1.1 Materials are confirmed and available to meet production requirements 1.2 Materials are prepared to meet production requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is checked to confirm readiness for use 1.5 The process is set to meet production requirements
2. Operate and monitor the de-aromatising, de-alcoholising or de-sulphuring process	2.1 The process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 De-aromatised, de-alcoholised or de-sulphured product meets specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification product, process and equipment performance is identified, rectified and/or reported
3. Shut down the de-aromatising, de-alcoholising or de-sulphuring process	3.1 The process is shut down according to workplace procedures 3.2 Equipment is dismantled and prepared for cleaning 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of, or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify production requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- liaise with other work areas
- dose materials as required
- confirm equipment status and condition. This may include:
 - confirming availability of receival vessels
 - positioning valves
 - setting temperature gauges
 - setting machine variables (e.g. pressure, temperature, vacuum and flow rate)
- set up and start up the process
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - flow rates
 - operating pressure or vacuum
 - operating temperatures
 - cone rpm
 - dosing rates
 - strip rate
 - neutralising solutions
 - relevant product characteristics (e.g. type, alcohol content and sulphur dioxide level)
- perform transfers
- handle spirits
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product or batch changeovers
- sort, collect, treat, recycle or dispose of waste
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation.
- record workplace information

- maintain work area to meet housekeeping standards
- identify, rectify and/or report environmental non-compliance
- take samples according to enterprise procedures
- conduct tests according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of de-aromatising, de-alcoholising or de-sulphuring operation
- link to related processes
- stages and changes which occur during de-aromatising, de-alcoholising or de-sulphuring operation
- effect of process stages on end product
- quality characteristics and uses of de-aromatised, de-alcoholised or de-sulphured product
- transfer procedures
- spirit handling requirements and procedures
- materials preparation requirements and effect of variation on the process
- main methods used in de-aromatising, de-alcoholising or de-sulphuring
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- waste handling requirements and procedures
- recording requirements and procedures
- sampling procedures where relevant
- testing procedures where relevant

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the rectification process for operation	1.1. Product and materials are confirmed and available to meet production requirements 1.2 Product and materials are prepared to meet production requirements 1.3 Services are confirmed as available and ready for operation 1.4 Equipment is checked to confirm readiness for use 1.5 The process is set to meet production requirements
2. Operate and monitor the rectification process	2.1 The rectification process is started up according to workplace procedures 2.2 Control points are monitored to confirm performance is maintained within specification 2.3 Product and process meet specification 2.4 Equipment is monitored to confirm operating condition 2.5 Out-of-specification product, process and equipment performance is identified, remedied and/or reported
3. Shut down the rectification process	3.1 The process is shut down according to workplace procedures 3.2 Equipment is dismantled and/or prepared for cleaning 3.3 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify distillation requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary product, materials and services. This may include checking temperature and alcoholic strength
- liaise with other work areas
- prepare product and materials as required. This may include heating the incoming product
- confirm equipment status and condition. This may include checking:
 - computer operation
 - air pressure from compressor
 - fuel intake
 - water flow to condensers
 - receiver vessels for product and by-products
- set up and start up the process. This will include any tests or procedures required to meet Customs and Excise regulations
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may involve monitoring:
 - wine feed
 - alcohol content of the feed
 - steam input
 - cooling water flow rates to condensers
 - volume of charge
 - temperature of distillate
 - alcoholic strength of distillate
 - heat source
 - reflux temperatures
 - temperature of incoming wine
 - temperatures throughout still and/or column
 - temperatures and strengths at take-off points
 - receivers for heads, hearts and tails
 - evaporation rates
 - charge characteristics
 - pressure of still and/or column

- condensate rate or flow
- monitor supply and flow of product, materials and services to and from the process
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- conduct product and batch changeovers
- take samples and conduct tests
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- prepare equipment for cleaning. This may involve draining and/or dismantling equipment, and removing waste either manually or by rinsing, in preparation for cleaning and sanitation
- record workplace information. This will include meeting the requirements of Customs and Excise regulations
- maintain work area to meet housekeeping standards
- ensure that all Customs and Excise regulations are adhered to
- sort, collect, treat, recycle or dispose of waste according to enterprise procedures
- manually clean and sanitise equipment according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- carry out transfer operations according to enterprise procedures
- perform heat exchange operations according to enterprise procedures
- identify, rectify and/or report environmental non-compliance according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose and principles of rectification, including definition of the following terms:
 - distillation
 - continuous columns
 - fractionation
 - bubble tower
 - bubble caps or plates
 - sieve trays or plates
 - packed column
- types and operation of different columns used for rectification. This should include:

- structure and operation
- purpose of each column
- effect of each column on characteristics of end product
- factors affecting distillation column operation. This may include:
 - feed conditions
 - reflux conditions
 - vapour flow conditions
 - foaming
 - entrainment
 - weeping or dumping
 - flooding
 - column diameter
 - state of trays and packings
 - weather conditions
- process requirements for cuts taken from each column. This may include:
 - heads (or feints)
 - tails or fusel oils
 - oil of wine
 - methanol
 - highly rectified spirit (SVR)
- link to related processes. This will include the fermentation or preparation of the product to be distilled and any further processing requirements of the distillate
- stages and changes which occur during distillation. This will include critical temperatures and specific components affected
- effect of process stages on distillate and by-products
- quality characteristics and uses of distillate and by-products
- product and materials preparation requirements and effect of variation on the process
- process specifications, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- sampling and testing procedures
- services used
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- Occupational Health and Safety (OHS) hazards and controls. This will include:
 - the dangerous properties of ethyl alcohol
 - emergency flooding procedures
 - emergency evacuation procedures
 - handling procedures of spirits
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems

- environmental issues and controls
- shutdown and cleaning requirements associated with changeovers and types of shutdowns
- recording requirements and procedures
- operation of Customs and Excise regulations
- waste handling requirements and procedures where relevant
- cleaning and sanitation procedures where relevant
- routine maintenance procedures where relevant
- transfer procedures where relevant
- heat exchange procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none"> • use personal protective equipment and follow other specified OHS procedures • prepare and confirm status of equipment before commencing rectification • monitor rectification process control points and equipment • take corrective action in response to out-of-specification results or non-compliance • perform routine and emergency shutdowns • demonstrate knowledge of OHS hazards, controls and emergency procedures • record information appropriately.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company

EVIDENCE GUIDE	
	<p>practices, safe work practices, food safety, quality and environmental requirements</p> <ul style="list-style-type: none"> • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules and instructions

RANGE STATEMENT	
	<ul style="list-style-type: none"> • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator

FDFCH3001A Coordinate cheese making operations

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit of competency covers the skills and knowledge required to carry out cheese making through the operation of an integrated industrial process under the direction of the cheese manufacturing manager.

Application of the Unit

This unit applies to advanced operators in industrial cheese enterprises. It typically applies to staff with responsibility for implementing operational procedures for a multi-stage cheese manufacturing process, carrying out basic tests, keeping records and complying with personal safety, food safety and quality standards. The supervision of operator level staff may be involved. This unit includes testing and recording of data at critical control points and making a limited range of adjustments to the production process, based on variances established by testing. The unit doesn't include milk preparation processes, and covers cheese production only to bulk packaging, excluding the subsequent curing, portioning and retail packaging processes.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor milk supply and quality	1.1 Milk supply is confirmed for the batch 1.2 Sample data on milk is checked for composition, homogeneity, somatic cell count and disk assay, as required 1.3 Milk is maintained at required temperature for inoculation with the required culture
2. Prepare cheese making equipment and add ingredients	2.1 Safe work practices are applied and reviewed based on risk assessment 2.2 Ingredients are confirmed and available to meet product requirements 2.3 Ingredients are added at pre-determined levels to meet recipe requirements 2.4 Starter and optional adjuncts are handled safely and according to procedures to maintain purity and viability 2.5 Equipment is checked to confirm readiness for use 2.6 Cheese making equipment is set and operated to meet requirements 2.7 Ingredients are loaded into the plant at the required stage 2.8 Final mix is checked against specifications
3. Carry out process control and make adjustments according to operating procedures	3.1 Correct start-up and shutdown procedures are followed 3.2 Equipment faults are identified and reported 3.3 Cheese making processes are monitored and required samples are taken according to operating procedures 3.4 Routine testing is carried out and records maintained 3.5 Timings are monitored as cheese moves through processing stages 3.6 Salt and moisture levels and pH levels are monitored and adjusted by varying the addition rate of ingredients, adjusting moisture control parameters, or changing time spent in processing stages as per operating procedures 3.7 Cheese is checked for food safety and quality requirements 3.8 Unacceptable cheese is identified, rectified and/or reported 3.9 Cheese is packaged for curing and distribution with correct batch number attached 3.10 Equipment is cleaned to meet production and hygiene requirements after each batch 3.11 Safety procedures are implemented and reviewed as part of the enterprise occupational health and safety (OHS) plan
4. Record and review cheese making	4.1 Cheese yields are monitored and compared to standards 4.2 Environmental practices and safety standards are reviewed in

ELEMENT	PERFORMANCE CRITERIA
process	accordance with legislation and workplace requirements 4.3 Workplace records are maintained according to requirements

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- confirm condition, type, quality and quantity of ingredients
- measure ingredients, as required
- confirm equipment status and condition
- set cheese making equipment to meet production requirements
- transfer ingredients and check that all meet specifications
- take corrective action according to operating procedures
- use equipment correctly and identify basic equipment faults
- maintain work area to meet housekeeping standards
- carry out sampling for chemical and microbiological testing of cheese
- conduct tests for ph, moisture, fat and salt levels in cheese
- implement safe work practices
- comply with environmental requirements for a cheese processing operation.

Required knowledge includes:

Knowledge of:

- the main components of milk and cheese (both curds and whey)
- purpose and basic principles of cheese making
- equipment start-up, shutdown and emergency procedures
- quality characteristics to be achieved by a cheese making process
- milk characteristics and components important in cheese making
- milk preparation for cheese making (fat and protein standardisation, and pasteurisation)
- types of starters used and their role in the fermentation process
- effect of milk characteristics on cheese processing performance
- use of coagulating enzymes to initiate the syneresis process
- use of adjunct cultures
- moisture control in cheese making
- effects of pH and temperature on cheese processing performance and product quality
- types and impact of inhibitory substances in milk
- microbial contaminants of cheese (lipolytic bacteria, yeasts, moulds, bacillus, listeria, E. coli, salmonella, coliforms and staphylococci) and their impact on cheese quality
- impact of bacteriophage on the fermentation process
- sampling and testing procedures for contaminant microbes
- operation and routine maintenance requirements of cheese making and packing plant and equipment
- operational procedures for operating the cheese making process, including adding ingredients, testing, measuring and recording, and making limited adjustments to ingredient recipes or the operation of equipment according to procedures
- common causes of variation and corrective action required for each stage of the cheese making operation
- contamination risk of inoculants and contaminants
- food safety risks associated with the process and related control measures
- organoleptic properties of cheese and their relationship to processes and ingredients in cheese making
- sampling procedures
- packaging procedures
- product/batch changeover procedures
- staff supervision
- line responsibility for reporting production and performance information
- food safety and quality assurance standards and procedures
- hygiene, cleaning and sanitation procedures in line with best manufacturing practice
- Food Standards Code
- routine maintenance procedures
- OHS hazards and controls
- environmental issues and controls relevant to the process, including waste collection and handling procedures related to the process.

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to carry out cheese making through the operation of an integrated industrial process under the direction of the cheese manufacturing manager.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Critical aspects of assessment must include evidence of the ability to coordinate an integrated industrial cheese making operation, including:</p> <ul style="list-style-type: none"> • mixing and adding ingredients • sampling and making adjustments to ingredients or timings as specified in procedures • supervising work flow and the packaging of cheese.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance requirements in this unit should be undertaken within the context of food cheese production. Competency is demonstrated by performance of all stated criteria, including the critical aspects and knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statements applicable to the workplace environment.</p> <p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • production process and related equipment, manufacturers' advice and operating procedures, including advice on relevant product requirements, safe work practices, food safety, quality and environmental requirements • sampling and testing equipment and procedures • recording systems to meet food safety and quality assurance requirements • recipe instructions • specifications, control points and processing settings • milk preparation, cheese making and packaging equipment • PPE and material safety data sheets (MSDS), as required • cleaning procedures, materials and equipment, as required.
<p>Method of assessment</p>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of candidate operating cheese

	<p>manufacturing equipment</p> <ul style="list-style-type: none"> • written and/or oral questioning to assess knowledge and understanding • third-party supporting statement.
<p>Guidance information for assessment</p>	<p>Evidence should be gathered over a period of time in an industrial cheese making environment. Part of the evidence for assessment must be based on work performance in an industrial cheese plant.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Legislation	Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes: <ul style="list-style-type: none"> the Food Standards Code, including labelling, weights and measures legislation legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity.
Policies and procedures	Work is carried out according to: <ul style="list-style-type: none"> company procedures regulatory and licensing requirements legislative requirements industrial awards and agreements.
Safe work practices	Safe work practices are determined by risk assessment on site and may cover: <ul style="list-style-type: none"> use of personal protective equipment (PPE) manual handling procedures exposure to hazardous substances hazards in the processing environment, such as noise, moving equipment, scalds, and trips and falls.
Cheese types	Cheese types may be: <ul style="list-style-type: none"> of any type but must be produced using an integrated industrial process.
Cheese inoculants	Cheese inoculants include: <ul style="list-style-type: none"> the lactic acid bacteria which are added to the milk as a culture in inoculation fungi.
Cheese additives	Cheese additives are added to the milk after inoculation and include: <ul style="list-style-type: none"> calcium chloride nitrates colour flavourings, fruit or nuts lipases.
Cheese adjuncts	Cheese adjuncts are microbial populations added to

	<p>cheese in addition to the normal inoculants to:</p> <ul style="list-style-type: none"> • provide consistency to flavour and texture • accelerate flavour development • produce specific attributes to meet market targets.
Milk standardisation requirements	<p>Milk standardisation requirements may:</p> <ul style="list-style-type: none"> • include standardisation of fat and protein • require the addition of skim milk or skim milk solids, or the separation of cream.
Cheese tests	<p>Cheese tests may include:</p> <ul style="list-style-type: none"> • testing for pH levels • moisture levels • fat levels • salt levels • physical testing of cheese throughout production.
Adjustments to process	<p>Adjustments to process may require:</p> <ul style="list-style-type: none"> • taking action to alter pH or moisture or adjust fat and protein levels in milk or add additional quantities of ingredients, such as salt
Multi-phase cleaning systems	<p>Multi-phase cleaning systems may include:</p> <ul style="list-style-type: none"> • cleaning multi-phase systems, such as chlorinated alkaline detergent with a chelator, followed by water and acid rinses.
Food safety related information	<p>Food safety related information may include:</p> <ul style="list-style-type: none"> • milk counts • cheese bacterial counts • manufacture and storage details.
Cleaning standards	<p>Cleaning standards include:</p> <ul style="list-style-type: none"> • AS 4709 - 2001 Guide to cleaning and sanitising of plant and equipment in the food industry • AS 1162 - 2000 Cleaning and sanitising dairy factory equipment • AS 2541 - 1998 Guide to the cleaning-in-place of dairy factory equipment.

Unit Sector(s)

Cheese.

FDFCH3002A Carry out processes for a range of artisan cheeses

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit of competency covers the skills and knowledge required to carry out artisan cheese making processes under the direction and supervision of the operations manager.

Application of the Unit

This unit applies to workers in artisan cheese enterprises, which use small scale methods to produce cheeses. The unit typically applies to staff with responsibility for implementing operational procedures, keeping basic records and complying with personal, and food safety and quality standards. This unit includes handling ingredients and cheese throughout production, using cheese making equipment, implementing operational procedures, and reporting variances and issues in production.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Apply sanitation procedures	1.1 The storage area for starter cultures is kept clean to reduce the risk of infection 1.2 All surfaces are kept clean and sanitised, except for curing boards 1.3 Stringent personal hygiene procedures are applied 1.4 Raw milk area is maintained separate from pasteurised milk operations 1.5 Multi-phase cleaning systems are applied to ensure sanitised surfaces and equipment 1.6 Food safety related information is recorded, as required, including milk counts and cheese bacterial counts
2. Implement procedures to prepare milk for cheese making	2.1 Clarification procedures for raw milk are carried out, if required 2.2 Standardisation procedures for milk are implemented to be processed into cheese 2.3 Pasteurisation procedures are carried out for milk 2.4 Homogenisation procedures are carried out for milk, where required
3. Carry out procedures to inoculate milk and cut the curd	3.1 Inoculants and adjuncts are added to milk and it is allow to ripen to specification 3.2 Rennet is measured accurately and diluted before adding to milk 3.3 Temperature is maintained at specified level evenly throughout the vat 3.4 Curd samples are taken and tests carried out for acidity (either pH or titratable acidity) and temperature
4. Implement procedures to separate, cook and wash the curd	4.1 Curd cutting is carried out using the correct technique and equipment to minimise loss of protein and fat as fines 4.2 Whey fat levels are assessed to monitor curd cutting efficiency 4.3 The cooking schedule is followed and curd is stirred to ensure optimal syneresis 4.4 Draining and optional washing procedures are carried out to ensure curd is at required moisture, pH level and consistency
5. Carry out fermentation, salting and optional pressing treatments	5.1 Curd is transferred to moulds to form the shape of cheeses for brine salted cheeses and then held at a constant temperature for completion of fermentation 5.2 Acidification of curd is continued after draining, then dry salt is added to milled curd before pressing 5.3 Salting treatments are applied to ensure uniform salt levels in the finished product 5.4 Dry salted cheese is pressed in the required moulds

ELEMENT	PERFORMANCE CRITERIA
6. Implement cheese curing and packaging procedures	6.1 Curing requirements (duration, temperature and humidity, where applicable) for a range of cheeses are applied 6.2 The curing environment is monitored 6.3 Ripening agents are added to cheese, if required 6.4 Packaging and labelling procedures are carried out, either before or after curing, as required
7. Assess the organoleptic properties of cheese and relate to specifications	7.1 Desirable and undesirable flavours in cheese are identified 7.2 Different textures of cheeses are recognised 7.3 Cheese is assessed for evenness of colour and finish 7.4 Possible causal factors are identified and changes made to procedures to address cheese quality issues
8. Meet workplace requirements for food safety, quality and environmental management	8.1 Records of cheese manufacture are kept, including required measurements for timing of operations, temperature, milk and curd acidity, curd weight, hooped yield and curing data 8.2 Health and safety and environmental protection procedures are implemented for the cheese making working environment 8.3 Waste is disposed of and contribution made to the review of environmental impacts of the cheese making operation

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- carry out cleaning and sanitation procedures
- follow a process flow chart for cheese making showing inputs, processes and outputs
- prepare milk for cheese making
- carry out homogenisation and standardisation procedures, where required
- apply heat treatment to milk and monitor temperature
- add starter to initiate fermentation process and optional adjunct cultures for desirable attributes in different cheese types
- measure and mix rennet to promote coagulation
- carry out curd cutting
- carry out cooking and drainage operations
- apply procedures to promote syneresis
- separate whey from curd and press and salt curd
- monitor storage and ripening, if applicable, conditions for cheese
- carry out sampling for chemical and microbiological testing of cheese
- assess cheese for organoleptic qualities
- conduct tests for pH, moisture and salt levels in cheese
- carry out packaging of cheese
- implement safe work practices
- comply with environmental requirements for a processing operation.

Required knowledge includes:

Knowledge of:

- the main cheese types and the common processes for making different types of cheeses
- the main components of milk and cheese (both curds and whey)
- purpose and basic principles of cheese making
- quality characteristics to be achieved by each cheese making process
- milk characteristics and components important in cheese making
- milk preparation for cheese making (standardisation, pasteurisation and homogenisation)
- types of starters used and their role in the fermentation process
- effect of milk characteristics on cheese processing performance
- moisture control in cheese making
- processes of coagulation and syneresis and their role in cheese making
- effects of acidity (either pH or titratable acidity) and temperature on cheese processing performance and product quality
- types and impact of inhibitory substances in milk
- microbial contaminants of cheese (lipolytic bacteria, yeasts, moulds, bacillus, listeria, E.

- coli, salmonella, coliforms and staphylococci) and their impact on cheese quality
- the impact of bacteriophage in fermentation and ripening
 - sampling and testing procedures for microbes
 - role of yeasts, moulds and adjunct cultures in cheese making
 - temperature and humidity of curing
 - ripening agents for different cheese types
 - contamination/food safety risks associated with the process and related control measures
 - techniques used to monitor the cheese making process, including inspecting, measuring and testing, as required by the process
 - common causes of variation and corrective action required for each cheese making process
 - organoleptic properties and their relationship to processes and ingredients in cheese making
 - sampling procedures
 - food safety and quality assurance standards and procedures
 - hygiene, cleaning and sanitation procedures in line with best manufacturing practice
 - routine maintenance procedures
 - product/batch changeover procedures
 - occupational health and safety (OHS) hazards and controls
 - contamination risk of inoculants and contaminants
 - food safety principles and procedures
 - Food Standards Code
 - procedures and responsibility for reporting production and performance information
 - environmental issues and controls, including waste collection and handling procedures

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to carry out artisan cheese making processes under the direction and supervision of the operations manager.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Critical aspects of assessment must include evidence of the ability to carry out processes in artisan cheese making, including:</p> <ul style="list-style-type: none"> • following procedures for sanitation, food safety, quality assurance and environmental management in artisan cheese production • carrying out operations to: <ul style="list-style-type: none"> • prepare milk for cheese making • coagulate milk through inoculation and ripening • separate and wash curd • carry out cooking and curing processes • package and label artisan cheeses according to procedures.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance requirements in this unit should be undertaken within the context of food cheese production. Competency is demonstrated by performance of all stated criteria, including the critical aspects and knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statements applicable to the workplace environment.</p> <p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • production process and related equipment, manufacturers' advice and operating procedures • sampling and testing equipment and procedures • methods and related software systems, as required, for collecting data and calculating yields, efficiencies and material variances appropriate to the type of cheese and the production environment.
<p>Method of assessment</p>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of candidate conducting cheese making processes as per operational procedures, including the appropriate sampling and testing

	<ul style="list-style-type: none">• written and/or oral questioning to assess knowledge and understanding• third-party supporting statement.
Guidance information for assessment	Evidence should be gathered over a period of time, should cover all stages of cheese making, and should be assessed for a range of cheese types. Cheese can be produced in a real or simulated environment.

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Legislation</p>	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity.
<p>Policies and procedures</p>	<p>Work is carried out according to:</p> <ul style="list-style-type: none"> • company procedures • regulatory and licensing requirements • legislative requirements • industrial awards and agreements.
<p>Safe work practices</p>	<p>Safe work practices are determined by risk assessment on site and may cover:</p> <ul style="list-style-type: none"> • use of personal protective equipment (PPE) • manual handling procedures • exposure to hazardous substances • hazards in the processing environment, such as noise, moving equipment, scalds, and trips and falls.
<p>Artisan production systems</p>	<p>Artisan production involves the making of cheese by traditional (non-industrial) methods. Emphasis is placed on observing and handling the cheese during processing. Artisan producers typically employ less than 30 people and do comparatively small production runs of specialty type cheeses.</p> <p>Industrial production relies on mechanised equipment to perform a number of processing stages in the one machine. Production runs and output are of higher volume than artisan production. Industrial production can also include specialty cheeses if mechanised equipment is available.</p>
<p>Cheese types</p>	<p>Cheese types include any type of fermented cheese product, including</p>

	<ul style="list-style-type: none"> acid-coagulated (e.g. Cottage and cream cheese) acid/heat-coagulated (e.g. Ricotta) rennet-coagulated (e.g. Cheddar, Parmesan, Gouda, Swiss and Camembert).
Cheese inoculants	<p>Cheese inoculants include:</p> <ul style="list-style-type: none"> the lactic acid bacteria which are added to the milk as a culture in inoculation fungi.
Cheese additives	<p>Cheese additives may be added to the milk after inoculation and include</p> <ul style="list-style-type: none"> calcium chloride nitrates colour lipases.
Cheese adjuncts	<p>Cheese adjuncts are microbial populations added to cheese in addition to the normal inoculants to:</p> <ul style="list-style-type: none"> provide consistency to flavour and texture accelerate flavour development produce specific attributes to meet market targets.
Cheese tests	<p>Cheese tests may include:</p> <ul style="list-style-type: none"> testing for pH levels, moisture levels and salt levels physical testing of cheese throughout production testing for organoleptic properties.
Homogenising equipment	<p>Homogenising equipment typically includes:</p> <ul style="list-style-type: none"> a supply pump homogeniser block homogenising valve pressure gauge back-pressure valve pressure relief valve pressure, micro-gap, centrifugal and ultrasonic homogenisers related equipment, such as: a deaeration unit.
Pasteurisation methods	<p>Pasteurisation methods may be:</p> <ul style="list-style-type: none"> batch or continuous. For hard cheeses matured more than three months at no less than 2°C, heat treatment of milk (lower temperature for the same time) may be used.

Pasteurisation equipment	<p>Pasteurisation equipment includes:</p> <ul style="list-style-type: none"> • thermometers • recorder/controllers • flow diversion devices • pumps • heat exchangers • holding and cooling stages • filters and clarifiers • vacuum breakers • direct steam injection equipment.
Curd cutting	<p>Curd cutting may be:</p> <ul style="list-style-type: none"> • manual with cutting harps • automated with mechanical knives.
Cheese pressing	<p>Cheese pressing may include:</p> <ul style="list-style-type: none"> • pressing the cheeses to the required pressure to form the shape.
Salting methods	<p>Salting methods may be by:</p> <ul style="list-style-type: none"> • either brine salting or vat salting methods and may be carried out before or after pressing, depending on the type of cheese.
Packaging methods	<p>Packaging methods may include:</p> <ul style="list-style-type: none"> • vacuum packaging in plastic, laminated foil, wax surfacing or wrapping in cloth.
Multi-phase cleaning systems	<p>Multi-phase cleaning systems may include:</p> <ul style="list-style-type: none"> • cleaning with a chlorinated alkaline detergent with a chelator, followed by water and acid rinses.
Food safety related information	<p>Food safety related information may include:</p> <ul style="list-style-type: none"> • milk counts • cheese bacterial counts • manufacture and storage details.
Cleaning standards	<p>Cleaning standards include:</p> <ul style="list-style-type: none"> • AS 4709 - 2001 Guide to cleaning and sanitising of plant and equipment in the food industry • AS 1162 - 2000 Cleaning and sanitising dairy factory equipment • AS 2541 - 1998 Guide to the cleaning-in-place of dairy factory equipment.

Unit Sector(s)

Cheese.

FDFCH4001A Carry out sampling and interpret tests for cheese production

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit of competency covers the skills and knowledge required to carry out sampling and basic testing, and to interpret the results, for artisan cheese production.

Application of the Unit

This unit applies to production managers for artisan cheese enterprises which use small scale methods to produce specialty cheeses. The unit typically applies to staff with responsibility for developing and implementing procedures, preparing ingredients and maintaining product safety and quality throughout production. This unit includes setting and implementing sampling requirements, applying knowledge of microbiological and chemical processes in cheese making, and analysing test results and production processes to achieve the required characteristics for the cheese.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

MSL973001A Perform basic tests

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Implement sampling procedures in cheese making</p>	<p>1.1 Sampling points for physical, chemical and microbial properties are identified and documented 1.2 An appropriate sampling size is determined 1.3 Sampling equipment is selected and sterilised 1.4 The sampling plan is documented and implemented</p>
<p>2. Monitor chemistry in cheese making</p>	<p>2.1 An acidity (either pH or titratable acidity) profile is recorded for each stage in the production process 2.2 Tests are carried out at stages for indicators, including salt levels, moisture levels and fat levels 2.3 Whey content is analysed for fat to gauge efficiency of curd cutting and yield potential 2.4 Safe work procedures for processes requiring handling of chemicals and/or involving chemical reactions in cheese making are reviewed and/or established</p>
<p>3. Monitor microbiological changes through the cheese making process</p>	<p>3.1 Samples are prepared for testing 3.2 Serial dilutions are accurately and aseptically carried out 3.3 Stained specimens are compared to reference samples to identify bacterial composition 3.4 Tests are performed on cultures to ensure they have adequate activity before inoculating the vat 3.5 Observations are made and data recorded for yeasts and moulds, total coliforms and staphylococci 3.6 Sampling and testing is carried out for inhibitory substances in milk 3.7 Whey is sampled for bacteriophage levels and the results interpreted</p>
<p>4. Carry out testing and interpret results to make adjustments to cheese making processes</p>	<p>4.1 Tactile and visual senses are used to detect physical and chemical changes during cheese making 4.2 Organoleptic properties of final cheese product are evaluated using sensory testing 4.3 Test results and reporting formats for information on composition, properties and reactions are recorded and interpreted 4.4 Recommended specifications for physical, chemical and microbial properties are documented 4.5 Yield efficiency is evaluated by comparing to established process control parameters 4.6 Specifications are referenced against test data 4.7 Changes to cheese making process are implemented based on</p>

ELEMENT	PERFORMANCE CRITERIA
	test results

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- apply sampling procedures in relation to the process chart for a cheese product
- sample hard cheeses using a cheese trier or sample shaft
- prepare a liquid cheese homogenate and a sample from the homogenate for microbiological analysis
- interpret measurements at stages in a cheese making process covering:
 - salt to moisture ratio (S/M)
 - moisture in the non fat substance (MNFS)
 - fat in the dry matter (FDM)
- safely perform tasks for the isolation, identification and cultivation of microorganisms
- set up and use microscope slides and a microscope
- apply the use of the Gram reaction in the identification of common types of bacteria
- interpret test results for yeasts and moulds, coliforms and staphylococci
- correctly and safely perform tests to assist in the identification of microorganisms
- apply methods for the control of growth of microorganisms
- identify safety hazards and control methods required when handling chemicals and working with processes that involve chemical reactions
- review and/or develop workplace procedures to include advice on hazards and related instructions on control methods, including advice on action required in the event of an incident, such as a chemical spill or an emergency
- read and interpret technical information to describe food properties and/or reactions, including recognising and applying appropriate units of measurement and terms
- interpret a sampling plan.

Required knowledge includes:

Knowledge of:

- use of technical terms used to communicate information on properties of food and materials commonly used in the food industry
- physical characteristics or phenomena that occur through cheese processing, including:
 - chemistry (e.g. acidity, calcium phosphate and salt levels)
 - microbiological counts
 - handle and feel of the product
 - total solids (or moisture)
 - heat and temperature
 - taste, smell and appearance of the final cheese product
- the processes where characteristics and phenomena can be observed
- processes for the making of different types of cheese

- the processing stages designed to affect the structure of these compounds (e.g. the use of fermentation to coagulate the casein micelles for acid coagulated cheeses compared to the use of rennet for rennet coagulated cheeses)
- common chemical reactions that occur, factors required to cause a reaction, and the effect of reactions are identified for cheese making, including both spontaneous and controlled reactions, such as:
 - oxidation
 - enzymic
 - Maillard
 - acid-based reactions
 - other reactions relevant to a given cheese type and production process
- physical changes that occur to ingredients and product through cheese making
- reactions and properties of carbohydrates, proteins and fats through the cheese making process
- behaviour of each type of matter and its relationship to the production process
- changes in acidity through the cheese making process and its influence on spoilage, moisture and mineral content, texture and flavour
- temperature control and its impact throughout a cheese making process
- acidity ranges for the different types of cheeses
- the significance of fermentation for the control of spoilage and pathogens in cheese, and its influence on moisture levels, mineral content, texture and flavour
- the basic molecular structures of carbohydrates, proteins and fats
- the role of enzymes in generating biological reactions (e.g. the use of rennet as a coagulating agent)
- coagulation time and setting time for rennet
- factors that influence syneresis and its importance in cheese making
- types of microbial cells and their components and functions
- the main types of microorganisms and their activity in cheese making, both those that enhance the process and those that impact negatively on cheese characteristics
- types of pathogenic bacteria that can be present in milk and cheese products
- sampling requirements for cheese making
- pH, moisture and salt gradients in brine salted cheese (need for homogeneity in sampling)
- buffering in milk and the role of casein and phosphate levels
- basic molecular structures of carbohydrates, proteins and fats
- disinfection and sterilisation as applied to practical aspects of microbiological diversity and growth
- microorganisms of significance in the production and spoilage of cheese
- testing methods and interpretation of results for salmonella, staphylococcus, listeria and E. coli in raw milk cheese
- testing methods and interpretation for bacteriophage in whey
- chemical and physical methods available for controlling microbial growth
- safety hazards and control methods
- technical information resources.

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to carry out sampling and basic testing, and to interpret the results for cheese production.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Critical aspects of assessment must include evidence of the ability to sample and interpret the results of testing, including sensory testing, and relate the results of testing to the properties of the cheese being produced.</p>
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance requirements in this unit should be undertaken within the context of food cheese production. Competency is demonstrated by performance of all stated criteria, including the critical aspects and knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statements applicable to the workplace environment.</p> <p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • production process and related equipment, manufacturers' advice and operating procedures • sampling and testing equipment and results • methods and related software systems, as required, for collecting data and calculating yields, efficiencies and material variances appropriate to the type of cheese and the production environment.
<p>Method of assessment</p>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of candidate conducting a range of processes and tests • interpretation of milk and cheese analysis • simulation for sampling and interpreting tests using milk and cheese samples • written and/or oral questioning to assess knowledge and understanding • a report on a review of the sampling, testing and possible modifications to process for the manufacture of a type of cheese.
<p>Guidance information for assessment</p>	<p>Evidence should be gathered over a period of time against a range of cheese types.</p>

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Legislation	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> the Food Standards Code, including labelling, weights and measures legislation legislation covering food safety, environmental management, occupational health and safety (OHS), anti-discrimination and equal opportunity.
Policies and procedures	<p>Work is carried out according to:</p> <ul style="list-style-type: none"> company procedures regulatory and licensing requirements legislative requirements industrial awards and agreements.
Cheese types	<p>Cheese types may include any type of fermented cheese product, including:</p> <ul style="list-style-type: none"> acid-coagulated (e.g. Cottage and cream cheese) acid/heat-coagulated (e.g. Ricotta) rennet-coagulated (e.g. Cheddar, Parmesan, Gouda, Swiss and Camembert).
Cheese classification criteria	<p>Cheese classification criteria may include:</p> <ul style="list-style-type: none"> species of animal milk standardisation process coagulation moisture level pH control method acidity salting procedures ripening procedures type of rind texture melting properties.
Sampling requirements	<p>Sampling requirements may include:</p> <ul style="list-style-type: none"> a range of sampling plans which apply to fresh milks, processing milk and production stages for the range of cheeses.

<p>Sampling tools and equipment</p>	<p>Sampling tools and equipment may include:</p> <ul style="list-style-type: none"> • personal protective equipment (PPE) • sampling frames • sampling tubes • weighted sample bottles • variety of sterile containers • milk samplers • cheese triers.
<p>Raw milk quality tests</p>	<p>Raw milk quality tests may include:</p> <ul style="list-style-type: none"> • organoleptic • total plate counts • coliforms • psychrotrophes • somatic cell counts • rapid test for inhibitors • disk assay • composition (fat and protein, casein, whey protein and non-protein nitrogen, minerals and salts) • pH.
<p>Cheese tests</p>	<p>Sampling and interpretation of tests may be required for:</p> <ul style="list-style-type: none"> • pH • milk fat • cheese salt • culture activity test • bacteriophage detection • inhibitory substances (growth inhibition, enzymatic colorimetric, microbial receptor assays and immunoassays) <p>rennet activity and microbiological analysis (yeasts and moulds, total coliforms and staphylococci).</p>
<p>Principles of optimising yield</p>	<p>Principles of optimising yield include</p> <ul style="list-style-type: none"> • obtain highest moisture in non-fat substance (MNFS) with good quality • standardise milk protein to fat ratio (P/F) to obtain maximum value for milk components • minimise fat and protein losses in the whey.

Unit Sector(s)

Cheese.

FDFCH4002A Produce acid-coagulated soft cheese

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit of competency covers the skills and knowledge required to produce acid-coagulated soft cheeses to a commercial standard.

Application of the Unit

This unit applies to production managers in cheese enterprises. The unit typically applies to managers with responsibility for developing operational procedures, controlling the cheese making process, and complying with occupational health and safety (OHS), food safety, record keeping and quality assurance requirements for soft cheeses. This unit includes all aspects of acid-coagulated soft cheese production and cheese making equipment and ingredients. Examples of acid coagulated cheeses include smooth cottage cheese, particulate cottage cheese with a cream dressing (generally known as American style cottage cheese), and cream cheese.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain sanitation in acid-coagulated soft cheese making	1.1 A high level of sanitation is maintained when transferring starter cultures to the fermentation tanks or cheese vats to prevent contamination with undesirable microorganisms and bacteriophages 1.2 All surfaces are kept clean and sanitised, except for curing boards 1.3 Stringent personal hygiene and quarantine procedures are applied 1.4 Multi-phase cleaning systems are applied to ensure sanitised surfaces and equipment 1.5 Food safety related information is recorded, as required, including milk counts and cheese bacterial counts
2. Implement procedures to prepare milk for acid-coagulated soft cheese making	2.1 Raw milk is sampled and composition and counts are measured/analysed 2.2 Clarification and standardisation procedures for raw milk are carried out 2.3 Pasteurisation procedures for milk are carried out 2.4 Raw milk area is maintained separate from pasteurised milk operations
3. Inoculate the milk to promote coagulation	3.1 Lactic culture is added to the milk and mixed evenly 3.2 Coagulating enzymes are added to the milk, if required 3.3 Even temperature is maintained at specified level throughout the tank or vat 3.4 A log of pH and temperature is maintained to control ripening and yield
4. Develop procedures to process curds	4.1 Curd breaking or cutting is carried out using correct technique and equipment to minimise loss of protein and fat as fines 4.2 Whey fat content is measured and recorded to assess curd breaking or cutting efficiency when making cheese from milk containing fat 4.3 The cooking schedule is planned to ensure optimal syneresis 4.4 Draining procedures are developed to ensure curd is at required moisture, pH level and consistency 4.5 The curd is washed, if required
5. Manage packaging procedures for acid-coagulated soft cheeses	5.1 Ripening agents are added to acid-coagulated soft cheeses, if required 5.2 Curing is optimised by planning for and adjusting the key composition ratios of acid-coagulated soft cheeses 5.3 Surface treatments are used, as required 5.4 Packaging is applied as appropriate for acid-coagulated soft

ELEMENT	PERFORMANCE CRITERIA
	cheeses 5.5 The product is labelled with complete and accurate information as specified by legislation
6. Monitor and adjust process control to produce cheese with consistent taste and quality	6.1 The process objectives of acid-coagulated soft cheese making are established 6.2 The amount of moisture in acid-coagulated soft cheese is controlled by regulating syneresis 6.3 The rate and amount of acid development in the curd is controlled by cooking and washing the curd before salting, if required 6.4 Calcium phosphate levels are adjusted to influence basic cheese structure, if required. 6.5 Texture of the cheese is controlled by regulating pH, ripening agents, salt, moisture and fat 6.6 Cheese flavour is controlled through choice of ingredients (milks, cultures, coagulating agents and salt) and pH levels 6.7 Yield is optimised by establishing process control parameters
7. Carry out sensory analysis and grading of soft cheeses	7.1 A range of flavours in cheese is identified 7.2 Different textures of cheeses are recognised 7.3 Cheese is assessed for evenness of colour and finish 7.4 Organoleptic properties of acid-coagulated soft cheese are analysed to identify possible changes to process control
8. Meet workplace requirements for food safety, quality and environmental management	8.1 Food safety related information is recorded 8.2 Records of cheese manufacture are maintained 8.3 Health and safety and environmental protection procedures are developed through a risk management approach 8.4 Waste is disposed of and environmental impacts of the cheese making operation reviewed

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- measure and mix acid coagulants and additives
- inoculate milk and control ripening in the vat
- promote syneresis to the required firmness and composition of curd
- separate whey from curd and press, if applicable, and salt curd
- monitor storage and ripening, if applicable, conditions for acid-coagulated soft cheese
- add ripening agents (lipases) and surface treatments to acid-coagulated soft cheeses
- maintain records for cheese making
- carry out packaging of cheese
- maintain hygiene and sanitation procedures in line with best manufacturing practice
- use multi-phase cleaning systems
- develop safe work practices and personal hygiene and sanitation procedures
- maintain the viability and integrity of coagulating agents
- calculate cheese yields
- develop packaging and labelling for acid-coagulated soft cheeses
- comply with environmental requirements for a processing operation.

Required knowledge includes:

Knowledge of:

- the main cheese types and the common processes for making different types of cheeses
- the main components of milk and cheese (both curds and whey)
- types and impact of inhibitory substances in milk, including bacteriophage
- purpose and basic principles of cheese making
- specifications of product at each stage of cheese making
- milk characteristics and components important in cheese making
- milk preparation for cheese making (standardisation, pasteurisation and homogenisation, if required)
- types of starters and adjuncts used and their role in the fermentation process
- effect of milk characteristics on cheese processing performance
- moisture control in cheese making
- processes of coagulation and syneresis and their role in cheese making
- curd size and its impact on moisture
- effects of pH and temperature on cheese processing performance and product quality
- microbial contaminants of cheese (lipolytic bacteria, yeasts, moulds, bacillus, listeria, E. Coli, salmonella, coliforms and staphylococci) and their impact on cheese quality
- sampling and testing procedures for microbes
- yeasts and moulds and other microorganisms of significance in cheese making

- temperature and humidity of curing
- ripening agents for different cheese types
- contamination/food safety risks associated with the process and related control measures
- techniques used to monitor the cheese making process, such as inspecting, measuring and testing, as required by the process.
- common causes of variation and corrective action required for each cheese making process
- organoleptic properties and their relationship to processes and ingredients in cheese making
- sampling procedures for cheese making
- contamination risk of inoculants and contaminants
- food safety and quality assurance standards and procedures
- cleaning and sanitation procedures in line with Australian standards for cleaning in the dairy industry
- routine maintenance procedures
- product/batch changeover procedures
- OHS hazards and controls
- procedures for recording production and performance information
- environmental issues and controls relevant to the process, including waste collection and handling procedures related to the process.

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to produce a range of acid-coagulated soft cheeses to a commercial standard. Assessment cannot take place on fully integrated industrial equipment.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Critical aspects of assessment must include evidence of the ability to produce acid-coagulated soft cheese to a commercial standard, including:</p> <ul style="list-style-type: none"> • developing quality procedures for: <ul style="list-style-type: none"> • sanitation, food safety, quality assurance and environmental management in acid-coagulated soft cheese production • developing work instructions for: <ul style="list-style-type: none"> • preparing milk for cheese making • coagulating milk through inoculation • controlling ripening of soft cheeses in the vat • managing acid-coagulated soft cheese making processes • packaging and labelling acid-coagulated soft cheeses • carrying out sensory analysis of acid-coagulated soft cheeses • reviewing process control based on sensory analysis and results of testing.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance requirements in this unit should be undertaken within the context of cheese production. Competency is demonstrated by performance of all stated criteria, including the critical aspects and knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statements applicable to the workplace environment.</p> <p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • production process and related equipment, manufacturers' advice and product specifications • sampling and testing equipment and procedures • methods and related software systems, as required, for collecting data and calculating yields, efficiencies and material variances appropriate to the type of

	cheese and the production environment.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of candidate making soft cheeses • written and/or oral questioning to assess knowledge and understanding • workplace samples of acid-coagulated soft cheeses with a documented history of process and a completed self-evaluation • composition analysis of milk and cheese for the samples presented • third-party supporting statement.
Guidance information for assessment	<p>Evidence should be gathered over a period of time against a number of batches of acid-coagulated soft cheese. Part of the evidence requirements for this unit requires that samples of at least three batches of acid-coagulated soft cheeses be produced to a commercial standard, in a real or simulated environment. Students must be assessed on their ability to control all aspects of cheese making, including sanitation and materials storage and handling.</p>

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Legislation</p>	<p>Legislative requirements are typically reflected in procedures and specifications. Cleaning standards	Cleaning standards include: <ul style="list-style-type: none"> • AS 4709 - 2001 Guide to cleaning and sanitising of plant and equipment in the food industry • AS 1162 - 2000 Cleaning and sanitising dairy factory equipment • AS 2541 - 1998 Guide to the cleaning-in-place of dairy factory equipment.

Unit Sector(s)

Cheese.

FDFCH4003A Produce a range of rennet-coagulated cheeses

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit of competency covers the skills and knowledge required to produce a range of rennet-coagulated cheeses to a commercial standard.

Application of the Unit

This unit applies to production managers with responsibility for developing operational procedures, controlling the cheese making process, and complying with occupational health and safety (OHS), food safety, record keeping and quality assurance requirements for rennet-coagulated cheeses. This unit includes all aspects of rennet-coagulated cheese production and cheese making equipment and ingredients.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Manage sanitation in artisan cheese making	1.1 Container of starter culture is sanitised or pre-ripened under aseptic conditions before tipping the contents into the vat to reduce the risk of infection or contamination 1.2 All surfaces are kept clean and sanitised, except for curing boards 1.3 Stringent personal hygiene and quarantine procedures are applied as part of best manufacturing practice 1.4 Multi-phase cleaning systems are applied to ensure sanitised surfaces and equipment 1.5 Food safety related information is recorded, as required, including milk counts and cheese bacterial counts
2. Develop and implement procedures to prepare milk for artisan cheese making	2.1 Raw milk is sampled and composition and counts measured/analysed 2.2 Clarification and standardisation procedures for raw milk are implemented 2.3 Pasteurisation procedures for milk are carried out 2.4 Raw milk area is maintained separate from pasteurised milk operations
3. Mix ingredients in the vat for rennet-coagulated cheeses	3.1 Colour is added to the milk to change the colour of the cheese, if required 3.2 Mould spores are added for mould ripened cheeses, if required 3.3 Adjunct cultures are added to influence the texture and flavour of the ripened cheese, if required 3.4 Enzymes are added to alter the flavour profile of the ripened cheese, if required 3.5 The milk is acidified with organic or inorganic acids before renneting, if required (e.g. direct acidified Mozzarella or Bocconcini) 3.6 The milk is partly acidified with acid prior to adding culture to control the calcium phosphate level in the curd during cheese making, if required 3.7 Cultures and rennet are added to milk and held at required temperature 3.8 A log of pH and temperature is maintained
4. Cut and handle the curd for rennet-coagulated cheeses	4.1 Curd cutting is supervised to achieve optimal yield and the required moisture level in the cheese 4.2 Agitation and temperature of the curd and whey is monitored 4.3 The curd and whey is heated, if required, and checked for uneven or overheating, if heated

ELEMENT	PERFORMANCE CRITERIA
	<p>4.4 The heating schedule is planned to ensure optimal syneresis</p> <p>4.5 Part of the whey is removed and replaced with water to wash lactose and lactic acid from the curd, if required</p> <p>4.6 For large and small eye cheeses (e.g. large eye type-Swiss and small eye type-Gouda) the curd is matted under the whey before the whey is removed to ensure proper eye development</p> <p>4.7 All or part of the whey is removed from the curds by draining it out of the vat</p>
<p>5. Develop and implement salting, curing and packaging procedures</p>	<p>5.1 Procedures are implemented to prepare the curd for salting</p> <p>5.2 Salting treatments are applied to ensure salt profile effects are minimised in the finished product</p> <p>5.3 Dry salted stirred or milled curd particles are placed into moulds for pressing, if required</p> <p>5.4 Ripening procedures are carried out and the process is monitored</p> <p>5.5 Packaging is developed and applied for each cheese type</p>
<p>6. Monitor and adjust process control to produce cheese with consistent taste and quality</p>	<p>6.1 The process objectives of rennet-coagulated cheese making are established</p> <p>6.2 Moisture control is achieved in the cheeses by the use of processing factors</p> <p>6.3 The rate and the amount of acid development is controlled</p> <p>6.4 Calcium phosphate levels are controlled to influence basic cheese structure</p> <p>6.5 Texture of the cheese is controlled by regulating pH, ripening agents, salt, moisture and fat</p> <p>6.6 Cheese flavour is controlled through choice of ingredients (milks, cultures, coagulating agents and salt) and pH levels</p> <p>6.7 Process control parameters are used to achieve optimal yield</p> <p>6.8 Aging of rennet-coagulated cheeses is applied to develop optimal flavour and texture</p>
<p>7. Carry out sensory analysis and grading of artisan rennet-coagulated cheeses</p>	<p>7.1 A range of flavours in cheese are identified</p> <p>7.2 Different textures of cheeses are recognised</p> <p>7.3 Cheese is assessed for evenness of colour and finish</p> <p>7.4 Organoleptic properties of rennet-coagulated cheeses are analysed to identify possible changes to process controls</p>
<p>8. Meet workplace requirements for food safety, quality and environmental management</p>	<p>8.1 Food safety related information is recorded</p> <p>8.2 Records of cheese manufacture are maintained</p> <p>8.3 Health and safety and environmental protection procedures are developed through a risk management approach</p> <p>8.4 Waste is disposed of and environmental impacts reviewed for the cheese making operation</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- sample fresh milk and analyse results
- prepare milk for cheese making
- carry out standardisation and pasteurisation procedures
- adjust milk to renneting temperature and monitor temperature
- add optional additives to influence flavour, colour and texture during ripening
- add starter for acidification by lactic acid or acid for direct or part acidified milk for cheese making
- add rennet to promote coagulation
- test readiness of curd for cutting
- use stainless steel wire or nylon line knives to cut the curd into small particles
- carry out agitation and optional cooking procedure
- carry out cheese washing procedures
- carry out drainage operation
- carry out further curd treatment, depending on the cheese type
- carry out salting process
- manage process control for moisture, pH, calcium phosphate levels, microbiology, texture and flavour in rennet-coagulated cheese making
- carry out sampling for chemical and microbiological testing of cheese
- manage ripening process for rind cheeses, mould ripened cheeses and bacterial surface ripened cheeses for optimum quality
- assess rennet-coagulated cheeses for organoleptic qualities
- conduct tests for pH, moisture and salt levels in cheese
- maintain records for cheese making
- carry out packaging of cheese
- use multi-phase cleaning systems
- develop safe work practices and personal hygiene and sanitation procedures
- maintain the viability and integrity of coagulating agents and microbial additives
- calculate cheese yields
- develop packaging and labelling for rennet-coagulated cheeses
- comply with environmental requirements for a processing operation.

Required knowledge includes:

Knowledge of:

- the main cheese types and the common processes for making different types of rennet-coagulated cheeses
- the main components of milk and cheese (both curds and whey)

- types and impact of inhibitory substances in milk, including bacteriophage
- purpose and basic principles of cheese making
- specifications of product at each stage of rennet-coagulated cheese making
- milk characteristics and components important in cheese making
- milk preparation for cheese making (standardisation and pasteurisation)
- types of starters used and their role in the fermentation process
- types of adjunct cultures and their role in the flavour and texture characteristics of the ripened cheese
- use of additives to the milk for modifying the flavour, texture and colour of the ripened cheese
- effect of milk characteristics on cheese processing performance
- use of bacterial cultures and coagulating enzymes
- moisture control in cheese making
- processes of coagulation and syneresis and their role in rennet-coagulated cheese making
- critical control points in the manufacture of each cheese type
- principles of brine salting and maintenance of brine salting systems for brine salted cheeses
- principles of dry salting for dry salted cheeses
- effects of pH and temperature on cheese processing performance and product quality
- lactic acid bacteria and their role in cheese making
- microbial contaminants of cheese (lipolytic bacteria, yeasts, moulds, bacillus, listeria, E. coli, salmonella, coliforms and staphylococci) and their impact on cheese quality
- sampling and testing procedures for microbes
- yeasts and moulds and other microorganisms of significance in cheese making
- contamination/food safety risks associated with the process and related control measures
- techniques used to monitor the cheese making process, such as inspecting, measuring and testing
- common causes of variation and corrective action required for each cheese making process
- organoleptic properties and their relationship to process control and ingredients in cheese making
- sampling procedures
- contamination risk of inoculants and contaminants
- food safety and quality assurance standards and procedures
- yield efficiency
- cleaning and sanitation procedures in line with Australian standards for cleaning in the dairy industry
- routine maintenance procedures
- product/batch changeover procedures
- OHS hazards and controls
- procedures for recording production and performance information
- environmental issues and controls relevant to the process, including waste collection and handling procedures.

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to produce artisan rennet-coagulated cheeses to a commercial standard. Assessment cannot take place on fully integrated industrial equipment.</p>

<p>Cheese types</p>	<p>Cheese types may include the range of rennet-coagulated cheeses including:</p> <ul style="list-style-type: none"> • low heating temperature (<40°C) hard cheeses (e.g. Cheddar) • high temperature (>40°C) hard cheeses (e.g. Parmesan and Romano) • eye cheeses • mould ripened cheeses (e.g. Camembert and Blue) • bacterial surface ripened cheeses (e.g. Swiss Tilsit) • feta • past filata cheeses (e.g. Mozzarella).
<p>Clarification procedures for raw milk</p>	<p>Clarification procedures for raw milk may include:</p> <ul style="list-style-type: none"> • cloth filters • centrifugal clarifiers and separators

RANGE STATEMENT	
	<ul style="list-style-type: none"> • bactofugation • membrane (micro) filtration.
Milk standardisation requirements	<p>Milk standardisation requirements may:</p> <ul style="list-style-type: none"> • include standardisation of microflora, fat and protein, and casein/fat rations • require the addition of skim milk or skim milk solids, or the separation of cream.
Pasteurisation methods	<p>Pasteurisation methods may be:</p> <ul style="list-style-type: none"> • batch or continuous.
Cheese inoculants	<p>Cheese inoculants include:</p> <ul style="list-style-type: none"> • the lactic acid bacteria which are added to the milk as a culture in inoculation.
Cheese additives	<p>Cheese additives may be added to the milk after inoculation and include:</p> <ul style="list-style-type: none"> • calcium chloride • nitrates • colour (e.g. Annatto is added to Cheddar style cheeses to make a more orange colour) • lipases • adjunct cultures (e.g. Propionibacteria added to milk for Swiss type cheeses results in the large eyes and characteristic flavour of these cheeses) • enzymes (e.g. the use of lipase in some Parmesan and Romano style cheeses).
Cheese adjuncts	<p>Cheese adjuncts are microbial populations added to cheese in addition to the normal inoculants to:</p> <ul style="list-style-type: none"> • provide consistency to flavour and texture • accelerate flavour development • produce specific attributes to meet market targets <p>Adjunct cultures are essential for the correct ripening of the cheese.</p>
Rennets	<p>Rennets may include:</p> <ul style="list-style-type: none"> • enzymes (mostly chymosin) from animal stomachs • chymosin fermented by genetically modified organisms • enzymes from microbial or plant sources.
Key composition ratios of cheese	<p>Key composition ratios of cheese include:</p> <ul style="list-style-type: none"> • salt to moisture ratio (S/M) • moisture in the non fat substance (MNFS)

RANGE STATEMENT	
	<ul style="list-style-type: none"> fat in the dry matter (FDM) pH (acidity).
Process control parameters to optimise yield	<p>Process control parameters to optimise yield include:</p> <ul style="list-style-type: none"> curd cutting and subsequent agitation heating and cooking high temperatures during pressing.
Principles of optimising yield	<p>Principles of optimising yield include:</p> <ul style="list-style-type: none"> obtain highest MNFS with good quality standardise milk (P/F) to obtain maximum value for milk components minimise fat and protein losses in the whey.
Processing factors to achieve moisture control	<p>Processing factors to achieve moisture control include:</p> <ul style="list-style-type: none"> cheese making time curd particle size cooking temperature.
Preparation of the curd	<ul style="list-style-type: none"> For Cheddar and pasta filata cheeses, the curd particles may be allowed to matt before cutting and stacking as loaves, or stirred to prevent the particles from matting before the addition of dry salt. The loaves of matted curd are milled into small pieces before salting. The milled or stirred curd particles may be washed before salting For pasta filata cheeses, salted, part salted or unsalted curd is heated to ~60°C to plasticise the curd (typically by stretching in hot water or brine). The plasticised cheese is then moulded into its desired shape and the part salted or unsalted cheeses salted further in a brine solution For opened textured cheeses (e.g. Feta, Parmesan, Havarti, and most blue mould ripened cheeses) well drained curd is generally transferred from the vat into moulds before optional pressing Eye and open textured cheese types are generally pressed before salting For surface ripened soft cheeses (mould and/or bacteria), curd and part of the whey is transferred into moulds to form the shape of the cheese before salting.
Ripening procedures	<p>Ripening procedures include:</p> <ul style="list-style-type: none"> for most hard cheeses: <ul style="list-style-type: none"> the cheese may be sealed and allowed to ripen

RANGE STATEMENT	
	<p>under either temperature controlled conditions (for rindless cheeses) or allowed to ripen under temperature and humidity controlled conditions before the cheese is sealed (for rinded cheeses)</p> <ul style="list-style-type: none"> • for white or blue mould ripened cheeses, soft bacterial surface ripened cheeses (e.g. Limburger) and hard bacterial surface ripened cheeses(e.g. Swiss Tilsit): <ul style="list-style-type: none"> • the cheeses are allowed to ripen under temperature and humidity controlled conditions before the cheese is generally packaged in aerobic packaging. Some blue mould cheese and bacterial surface ripened cheese styles may be sealed at some stage during ripening • feta cheeses: <ul style="list-style-type: none"> • are generally ripened in a salt brine.
Aging of hard cheeses	<p>Aging of hard cheeses may be:</p> <ul style="list-style-type: none"> • from one to two months to several years <p>Temperature must be monitored for rindless cheeses and temperature and humidity for rind, mould ripened and bacterial surface ripened cheeses.</p>
Packaging	<p>Packaging may include:</p> <ul style="list-style-type: none"> • vacuum and/or gas flush in gas and moisture proof film • surface drying as a protective rind followed by waxing • oxygen permeable packaging for most mould and bacterial surface ripened cheese types.
Multi-phase cleaning systems	<p>Multi-phase cleaning systems require:</p> <ul style="list-style-type: none"> • cleaning with a chlorinated alkaline detergent with a chelator, followed by water and acid rinses.
Records of cheese manufacture	<p>Records of cheese manufacture may include:</p> <ul style="list-style-type: none"> • timing of operations • temperature logging • milk and curd pH profile • curd weight • milk composition • cheese microbial counts • hooped yield • curing and grading data.

RANGE STATEMENT	
Food safety related information	Food safety related information may include: <ul style="list-style-type: none">• milk counts• cheese bacterial counts• manufacture and storage details.
Cleaning standards	Cleaning standards include: <ul style="list-style-type: none">• AS 4709 - 2001 Guide to cleaning and sanitising of plant and equipment in the food industry• AS 1162 - 2000 Cleaning and sanitising dairy factory equipment• AS 2541 - 1998 Guide to the cleaning-in-place of dairy factory equipment.

Unit Sector(s)

Cheese.

FDFCH4004A Produce acid - heat coagulated cheese

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit of competency covers the skills and knowledge required to produce a range of acid/heat-coagulated cheeses to a commercial standard.

Application of the Unit

This unit applies to production managers in cheese enterprises. The unit typically applies to managers with responsibility for developing operational procedures, controlling the cheese making process, and complying with occupational health and safety (OHS), food safety, record keeping and quality assurance requirements for acid/heat-coagulated cooked cheeses. This unit includes all aspects of acid/heat-coagulated cooked cheese production and cheese making equipment and ingredients.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Maintain sanitation in making acid/heat-coagulated cheese</p>	<p>1.1 All surfaces are kept clean and sanitised, except for curing boards</p> <p>1.2 Stringent personal hygiene and quarantine procedures are applied</p> <p>1.3 Multi-phase cleaning systems are applied to ensure sanitised surfaces and equipment</p> <p>1.4 Food safety related information is recorded, as required, including milk counts and cheese bacterial counts</p>
<p>2. Implement procedures to prepare whey, milk/whey blends or cream for artisan acid/heat-coagulated cheese making</p>	<p>2.1 Raw milk or cream is sampled and composition and counts are measured/ analysed</p> <p>2.2 Clarification and standardisation procedures are carried out for raw milk or cream</p> <p>2.3 Fresh whey is heated to prevent further acidification if required</p> <p>2.4 Raw milk or cream area is maintained separate from other operational areas</p>
<p>3. Promote coagulation of both curds and whey</p>	<p>3.1 The temperature of dairy liquid is raised to that required</p> <p>3.2 The hot liquid is acidified to coagulate both casein and whey proteins</p> <p>3.3 The curd is held in the curd/whey mixture after coagulation</p> <p>3.4 A log of pH and temperature is maintained to monitor yield</p> <p>3.5 Draining is carried out</p>
<p>4. Manage cooking and packaging procedures for acid/heat-coagulated cheeses</p>	<p>4.1 The cooking schedule is planned to ensure optimal coagulation of proteins</p> <p>4.2 Draining procedures are developed to ensure cheese is at required consistency</p> <p>4.3 Salting treatments are applied to ensure salt profile effects are minimised in the finished product</p> <p>4.4 Cheeses are cooled before packing, if required</p> <p>4.5 Aseptic conditions are maintained during cooling to minimise contamination with microbial contaminants</p> <p>4.6 Packaging appropriate for acid/heat-coagulated cooked cheeses is applied</p> <p>4.7 The product is labelled with complete and accurate information as specified by legislation</p>
<p>5. Monitor and adjust process control to produce cheese with consistent taste and quality</p>	<p>5.1 The process objectives of acid/heat-coagulated cooked cheese making are established</p> <p>5.2 Texture of the cheese is controlled by regulating pH and fat</p> <p>5.3 Cheese flavour is controlled through choice of ingredients (whey, milk, cream, acidulant and salt)</p>

ELEMENT	PERFORMANCE CRITERIA
	5.4 Yield is optimised through establishing process control parameters
6. Carry out sensory analysis and grading of acid/heat-coagulated cheeses	6.1 The characteristic flavours and flavour defects in cheese are identified 6.2 Different textures of cheeses are recognised 6.3 Cheese is assessed for evenness of colour and finish 6.4 Organoleptic properties of acid/heat-coagulated cooked cheese are analysed to identify possible changes to process controls
7. Meet workplace requirements for food safety, quality and environmental management	7.1 Food safety related information is recorded 7.2 Records of cheese manufacture are maintained 7.3 Health and safety and environmental protection procedures are developed through a risk management approach 7.4 Waste is disposed of and environmental impacts of the cheese making operation are reviewed

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- acidify a heated milk mixture to promote coagulation
- carry out drainage operations
- recover curd in the cheese
- monitor storage and ripening, if applicable, conditions for acid/heat-coagulated cheese
- conduct tests for pH, moisture, fat and salt levels in cheese
- maintain records for cheese making
- use multi-phase cleaning systems
- develop safe work practices and personal hygiene and sanitation procedures
- maintain the integrity of acidifying agents
- maintain hygiene in line with Australian standards for cleaning dairy equipment
- calculate cheese yields
- develop packaging and labelling for acid/heat-coagulated cooked cheeses
- comply with environmental requirements for a processing operation.

Required knowledge includes:

Knowledge of:

- the main components of milk, whey and cream for making acid/heat-coagulated cheese
- specifications of product at each stage of cheese making
- standardisation of dairy liquids for acid/heat-coagulated cheese
- types of acid used for coagulation
- microbial contaminants of cheese (lipolytic bacteria, yeasts, moulds, bacillus, listeria, E. coli, salmonella, coliforms and staphylococci) and their impact on cheese quality
- sampling and testing procedures for microbes
- yeasts and moulds and other microorganisms of significance in cheese making
- contamination/food safety risks associated with the process and related control measures
- techniques used to monitor the cheese making process, such as inspecting, measuring and testing, as required by the process
- common causes of variation and corrective action required for each cheese making process
- organoleptic properties and their relationship to processes and ingredients in cheese making
- sampling procedures
- contamination risk of inoculants and contaminants
- food safety and quality assurance standards and procedures
- cleaning and sanitation procedures and Australian standards
- routine maintenance procedures
- product/batch changeover procedures
- OHS hazards and controls

- hygiene procedures including washing and decontamination
- Food Standards Code
- procedures for recording production and performance information
- environmental issues and controls relevant to the process, including waste collection and handling procedures related to the process.

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to produce acid/heat-coagulated cheeses to a commercial standard. Assessment cannot take place on fully integrated industrial equipment.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Critical aspects of assessment must include evidence of the ability to produce acid/heat-coagulated cheeses to a commercial standard, including:</p> <ul style="list-style-type: none"> • establishing procedures for: <ul style="list-style-type: none"> • sanitation, food safety, quality assurance and environmental management in acid/heat-coagulated cheese production • developing and implementing work instructions to: <ul style="list-style-type: none"> • prepare dairy liquids for cheese making • coagulate dairy liquid through adding acid to heated milk • carry out cooking processes • package and label acid/heat-coagulated cheeses • carry out sensory analysis of acid/heat-coagulated cheeses • review process control based on sensory analysis.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance requirements in this unit should be undertaken within the context of cheese production. Competency is demonstrated by performance of all stated criteria, including the critical aspects and knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statements applicable to the workplace environment.</p> <p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • production process and related equipment, manufacturers' advice and product specifications • sampling and testing equipment and procedures • methods and related software systems, as required, for collecting data and calculating yields, efficiencies and material variances appropriate to the type of cheese and the production environment.

Method of assessment	The following assessment methods are suggested: <ul style="list-style-type: none">• observation of candidate making acid/heat-coagulated cheeses• written and/or oral questioning to assess knowledge and understanding• workplace samples of acid/heat-coagulated cheeses with documented procedures• composition analyses of milk and cheese samples• third-party supporting statement.
Guidance information for assessment	Evidence should be gathered over a period of time against a number of batches of acid/heat-coagulated cooked cheeses. Part of the evidence requirements for this unit requires that samples of at least three batches of acid/heat-coagulated cheeses be produced to a commercial standard, in a real or simulated environment. Students must be assessed on their ability to control all aspects of cheese making including sanitation and materials storage and handling.

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Legislation	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> the Food Standards Code, including labelling, weights and measures legislation legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity.
Policies and procedures	<p>Work is carried out according to:</p> <ul style="list-style-type: none"> company procedures regulatory and licensing requirements legislative requirements industrial awards and agreements
Cheese tests	<p>Cheese tests may include:</p> <ul style="list-style-type: none"> testing for pH levels, moisture levels, salt levels, fat and protein levels microbiological testing chemical testing physical testing of cheese throughout production testing for organoleptic properties.
Cheese types	<p>Cheese types may include:</p> <ul style="list-style-type: none"> any type of heat/acid precipitated (acid/heat-coagulated) cheeses (e.g. Ricotta (Italy) and Channa (India)).
Clarification procedures for raw milk	<p>Clarification procedures for raw milk may include:</p> <ul style="list-style-type: none"> cloth filters centrifugal clarifiers and separators bactofugation membrane (micro) filtration.
Milk standardisation requirements	<p>Milk standardisation requirements may:</p> <ul style="list-style-type: none"> include standardisation of fat and protein, and casein/fat rations require the addition of whey, skim milk or skim milk solids, or the separation of cream.
Key composition of cheese	<p>Key composition of cheese includes:</p>

	<ul style="list-style-type: none"> • salt • moisture • fat • pH (acidity).
Process control parameters to optimise yield	<p>Process control parameters to optimise yield include:</p> <ul style="list-style-type: none"> • milk temperature • pH of hot curd-whey mixture • recovery of protein • draining.
Principles of optimising yield	<p>Principles of optimising yield include:</p> <ul style="list-style-type: none"> • standardise milk (P/F) to obtain maximum value for milk components • minimise fat and protein losses in the whey.
Packaging	<p>Packaging may include:</p> <ul style="list-style-type: none"> • vacuum and/or gas flush in gas and moisture proof film • plastic rigid containers • oxygen permeable wrap (e.g. greaseproof paper).
Multi-phase cleaning systems	<p>Multi-phase cleaning systems require:</p> <ul style="list-style-type: none"> • cleaning with a chlorinated alkaline detergent with a chelator, followed by water and acid rinses.
Records of cheese manufacture	<p>Records of cheese manufacture may include:</p> <ul style="list-style-type: none"> • timing of operations • temperature logging • milk and curd pH profile • recovery of curd-whey • milk composition • cheese microbial counts • hooped yield • curing and grading data.
Food safety related information	<p>Food safety related information may include:</p> <ul style="list-style-type: none"> • milk counts • cheese bacterial counts • manufacture and storage details.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define raw ingredients used in confectionery production	1.1. Key confectionery groups are identified and features described 1.2. Commonly used raw ingredients and their origins are identified 1.3. Types of carbohydrates used in confectionery are identified 1.4. Types of sweeteners used in confectionery are identified 1.5. Grades and properties of sugar are described 1.6. Types of starches and glucose syrups are identified 1.7. Types of fats used in confectionery are identified
2. Identify the effects of raw materials in confectionery production	2.1. Effects of using different types of commonly used raw ingredients in confectionery are identified 2.2. Effects of using different types of carbohydrates and fats in confectionery are identified 2.3. Effects of using different types of sugars in confectionery are identified 2.4. Effects of using types of starches and glucose syrups in confectionery are identified 2.5. Effects of temperature and water on raw ingredients are identified 2.6. Effects of production processes on raw ingredients are examined and described
3. Identify processing requirements for raw materials	3.1. Specifications for production are identified 3.2. Implications for processing of raw materials are identified 3.3. Common problems associated with raw materials are identified 3.4. Actions required to address common problems are identified 3.5. Storage and handling requirements for raw ingredients are identified 3.6. Work is conducted in accordance with workplace environmental guidelines

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access and interpret workplace information on raw materials
- examine production specifications
- identify raw materials, uses and characteristics
- identify sources of raw materials and key features
- assess consequences of different uses of raw materials
- identify requirements for achieving quality standards
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- raw materials used in confectionery
- origins of raw materials
- confectionery product types
- characteristics of raw materials
- effects and uses of raw materials
- common problems and action required
- types of carbohydrates and uses
- types of sweeteners and uses
- types of starches and glucose syrups and uses
- storage and handling requirements for raw materials

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • identify the key confectionery groups and the main raw materials used • describe the effects of raw materials in confectionery • describe the effects of temperature and water on raw materials • describe the effects of the production process on raw materials • identify common problems with raw materials in the production process and determine required action • access and interpret workplace information on raw materials.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • recipe/batch instructions • specifications, control points and processing parameters • process and related equipment and services, including mixing equipment, cookers and coolers. It may also include further processing equipment as required • ingredients used in the preparation of high/low boil product as required • sampling schedules and test procedures and equipment as required

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, occupational health and safety (OHS), anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Key confectionery groups	<p>Key confectionery groups include:</p> <ul style="list-style-type: none"> • high boils, cream pastes, toffees caramels and fudge • fondants • jellies, gums and pastilles • liquorice • honeycomb, meringues, marshmallows and nougats • panned products • chewing gum • chocolate • sugar free products

RANGE STATEMENT	
Common raw materials	<p>Commonly used raw materials include:</p> <ul style="list-style-type: none"> • sugar and other sweeteners • milk products • cocoa • fat/oil • fruits and nuts • gelling agents, such as starch, gelatine, pectins and gums • additives, such as flavourings, colouring, lecithin and other emulsifiers, acids and preservatives
Types of carbohydrates	<p>Types of carbohydrates covered by this unit must include:</p> <ul style="list-style-type: none"> • Monosaccharides, such as glucose (dextrose), galactose, fructose, mannose, arabinose and xylose • Disaccharides, such as sucrose, lactose and maltose • Oligosaccharides, such as polydextrose, polyols, maltodextrins, hydrogenated starch hydrolysates, fructooligosaccharide and galctooligosaccharide • Polysaccharides, such as starch, dextrans, cellulose, vegetable gums and glycogen
Types of sweeteners	<p>Types of sweeteners include:</p> <ul style="list-style-type: none"> • sugar (raw, refined) • sucrose • molasses • brown sugar • honey • golden syrup • treacle • malt extract • licorice block
Grade of sugar	<p>Grade of sugar includes:</p> <ul style="list-style-type: none"> • caster sugar • icing sugar • liquid sugar

RANGE STATEMENT	
Characteristics of sugar	Characteristics of sugar include: <ul style="list-style-type: none"> • sweetness • solubility • crystallisation • inversion
Types of starches and glucose syrups	Types of starches and glucose syrups include: <ul style="list-style-type: none"> • wheat • maize (corn) • rice • potato • grain • modified
Characteristics of starch	Characteristics of starch include: <ul style="list-style-type: none"> • birefringence • viscosity
Uses of glucose	Uses of glucose include: <ul style="list-style-type: none"> • anti-graining • resistance to activity by microorganisms • increasing product viscosity

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the high/low boil equipment and process for operation	1.1. Materials are confirmed and available to meet operating requirements 1.2. Ingredients for syrup are selected and combined in the sequence specified by batch/recipe instructions 1.3. Cleaning and maintenance requirements and status of high/low boil process equipment are identified and confirmed 1.4. Processing/operating parameters are entered as required to meet safety and production requirements 1.5. Equipment performance is checked and adjusted as required 1.6. Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the high/low boil process	2.1. Ingredients and additives are delivered in the required quantities and sequence to meet recipe specifications 2.2. The process is started and operated according to workplace procedures 2.3. Equipment is monitored to identify variation in operating conditions 2.4. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.5. Product is heated, cooked and cooled according to specification 2.6. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.7. The work area is maintained according to housekeeping standards 2.8. Work is conducted in accordance with workplace environmental guidelines 2.9. Workplace records are maintained according to workplace recording requirements
3. Shut down the high/low boil process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify high/low boil process requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust high/low boil process equipment to achieve required outcomes, including combining ingredients in correct sequence according to recipe instructions, setting dosing/metering and related addition systems, loading or controlling loading of bulk ingredients, setting temperatures and operating vacuum
- monitor control points and conduct inspections as required to confirm process remains within specification, such as:
 - mixing tank temperature
 - cooking temperatures
 - vacuum settings (where relevant)
 - moisture content
 - ingredient addition as required
 - product weight
 - appearance and organoleptic characteristics
- monitor supply and flow of materials to and from the high/low boil process
- demonstrate changeover procedures
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take high/low boil process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures

REQUIRED SKILLS AND KNOWLEDGE

- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the high/low boil process relating to the range of products to be produced, such as:
 - ingredients used and their purpose
 - syrup making (super saturated solutions)
 - relationship between temperature and moisture content
 - the effect of vacuum on processing
 - reactions such as crystallisation
 - process stages
 - maturation and further processing requirements
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, the effect of vacuum on the cooking process and further processing, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the high/low boil process and the effect of outputs on downstream processes
- quality requirements of materials used in low/high boil manufacture and effect of variation on process performance and outputs
- quality characteristics required of process outputs
- methods used to further process high and low boils, such as basic forming or extruding and stamping, cooling, pulling and aerating as required by product range
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the high/low boil process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the high/low boil process and related control measures
- common causes of variation and corrective action required

REQUIRED SKILLS AND KNOWLEDGE

- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the high/low boil process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the high/low boil process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for confectionery boiling • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures to work practices.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • recipe/batch instructions • specifications, control points and processing parameters • process and related equipment and services, including mixing equipment, cookers and coolers. It may also include further processing equipment as required • ingredients used in the preparation of high/low boil product as required • sampling schedules and test procedures and equipment as required

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> the Food Standards Code, including labelling, weights and measures legislation legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> standard operating procedures (SOPs) specifications production schedules and instructions manufacturers' advice standard forms and reports
High boil products	<p>Examples of high boil products include:</p> <ul style="list-style-type: none"> solid striped filled confectionery
Low boil products	<p>Examples of low boil products may include:</p> <ul style="list-style-type: none"> caramels, nougats, creams, fudge, fondant, toffee, marshmallows, gums, jellies, liquorice, paste, lozenges and fruit bars
Product ingredients	<p>Product ingredients may include:</p> <ul style="list-style-type: none"> sugar substitutes
Typical equipment	Typical equipment includes:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • pan or vacuum cookers • cold or marble tables and further processing equipment depending on use, such as forming, filling, pulling, beating, stamping, cooling equipment and crystallising/beating equipment
Operation of equipment and processes	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> • the use of process control panels and systems
Shutdown procedures	<p>Shutdown procedures may include:</p> <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	<p>Services may need to be confirmed. These depend on the nature of the process. Typical examples include:</p> <ul style="list-style-type: none"> • power • steam • water • vacuum • compressed and instrumentation air

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the conching equipment and process for operation	1.1. Refined mass is available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements 1.4. Processing/operating parameters are entered as required to meet safety and production requirements 1.5. Equipment performance is checked and adjusted as required 1.6. Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the conching process	2.1. The conching process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The process is monitored to confirm that specifications are met 2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the conching process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify conching process requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary refined mass and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings to achieve required particle size, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- load materials in required sequence and work flake to specification
- sequence ingredient addition to meet recipe specifications
- monitor and adjust process equipment to achieve required outcomes, including testing and adjusting viscosity and monitoring other control points as required to confirm process is within specification, such as:
 - ingredient addition sequence
 - mix times
 - temperature
 - amperage/work input
- monitor supply and flow of materials to and from the conche
- demonstrate changeover procedures (unless continuous process)
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take conching process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor

REQUIRED SKILLS AND KNOWLEDGE

- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of conching chocolate, including:
 - processing stages in chocolate making and the role of conching
 - ingredients used in chocolate and those added during conching, such as ingredients in different types of chocolate as appropriate to production requirements and an understanding of the quality requirements and role of each main ingredient
 - changes that occur in ingredients during conching
 - significance of viscosity and methods of adjustment
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the conching process and the effect of outputs on downstream processes
- quality requirements of mass and ingredients used, and effect of variation on process performance and outputs
- quality characteristics required of the conching stage
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the conching process, including an understanding of viscosity testing procedures and other inspections and tests as required
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the conching process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the conching process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control where relevant, including the

---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the depositing equipment and process for operation	1.1. Materials are confirmed and available to meet operating requirements 1.2. Equipment and ingredients are conditioned to meet production requirements 1.3. Cleaning and maintenance requirements and status are identified and confirmed 1.4. Machine components and related attachments are fitted and adjusted to meet operating requirements 1.5. Processing/operating parameters are entered as required to meet safety and production requirements 1.6. Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the depositing/moulding process	2.1. The process is started and operated according to workplace procedures 2.2. Chocolate is deposited to achieve required coverage 2.3. Equipment is monitored to identify variation in operating conditions 2.4. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.5. The process is monitored to confirm that specifications are met 2.6. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.7. The work area is maintained according to housekeeping standards 2.8. Work is conducted in accordance with workplace environmental guidelines 2.9. Workplace records are maintained according to workplace recording requirements
3. Shut down the depositing/moulding process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify chocolate depositing process requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate depositing head or settings, cancelling isolation or lockouts as required, confirming that equipment is clean, conditioning moulds/equipment and ingredients to specified temperature, confirming that depositing head is correctly aligned, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust chocolate depositing process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - the supply of chocolate and centres to process as required
 - temperatures of chocolate, moulds, depositor head, injection plate and conveyor as required
 - pump stroke settings
 - temperature profile of cooling tunnel
 - deposited chocolate position/coverage
 - shrinkage/demoulding process as required
 - shell to filling weight ratio as required
 - appearance of deposited product
- monitor supply and flow of materials to and from the chocolate depositing process and equipment operation to confirm process remains within specification
- demonstrate product/batch changeovers
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures

REQUIRED SKILLS AND KNOWLEDGE

- collect samples and conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the chocolate depositing process, including ingredients used, handling and conditioning requirements and process stages
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the chocolate depositing process and the effect of outputs on downstream processes
- quality characteristics and types of chocolate used for depositing,
- quality requirements of centres as appropriate to product and the effect of variation on process outputs
- quality characteristics to be achieved by the deposited product
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the chocolate depositing process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the chocolate depositing process and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the chocolate depositing process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the chocolate depositing process,

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for depositing chocolate
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- safely shut down equipment
- apply food safety procedures to work practices.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment
- work procedures, including advice on safe work practices, food safety, quality and environmental requirements
- information on equipment capacity and operating parameters
- recipe/batch instructions
- specifications, control points and processing parameters
- process and related equipment and services
- chocolate and related ingredients, such as fillings and centres
- sampling schedules and test procedures and equipment as required
- documentation and recording requirements and procedures
- cleaning procedures, materials and equipment as

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the depositing equipment and process for operation	1.1. Materials are confirmed and available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements 1.4. Processing/operating parameters are entered as required to meet safety and production requirements 1.5. Equipment performance is checked and adjusted as required 1.6. Pre-start checks are carried out as required by workplace requirements 1.7. Syrup is transferred to depositing equipment
2. Operate and monitor the depositing process	2.1. The depositing process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The depositing process is monitored to confirm that specifications are met 2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the depositing process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify depositing processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, setting up depositor controls, cooling parameters and demoulding process to meet production requirements, cancelling isolation or lock outs as required, confirming that related equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust depositing process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - the supply of syrup to hopper
 - controlling weight of liquid deposited in mould
 - visual inspections to identify faults, such as tailings and placement of liquid in mould
 - pump stroke settings
 - cooling tunnel temperature profile
 - shrinkage/demoulding process
- monitor supply and flow of materials to and from the depositing process to confirm process remains within specification
- set up and operate finishing equipment as required
- demonstrate product changeover procedures
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take depositing process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures

REQUIRED SKILLS AND KNOWLEDGE

- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the depositing process, such as product preparation and conditioning requirements and product depositing
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the depositing process and the effect of outputs on downstream processes
- quality requirements of materials for depositing and effect of variation on depositing process performance and outputs
- quality characteristics required of process outputs
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the depositing process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the depositing process and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the depositing process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the depositing process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment

REQUIRED SKILLS AND KNOWLEDGE

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the granulation equipment and process for operation	1.1. Ingredients and additives are confirmed and available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. The granulation process is set to production specifications 1.4. Equipment performance is checked and adjusted as required 1.5. Pre-start checks are carried out as required by workplace requirements
2. Prepare the compression process for operation	2.1. Granulated materials are confirmed and available to meet operating requirements 2.2. The compression process is set to production specifications 2.3. Equipment performance is checked and adjusted as required 2.4. Pre-start checks are carried out as required by workplace requirements
3. Operate and monitor the granulation and compression process	3.1. The process is started and operated according to workplace procedures 3.2. Ingredients are combined in specified sequence 3.3. The granulation process is monitored to confirm granules of the required particle size are produced 3.4. The compression process produces compressed product to specification 3.5. Equipment is monitored to identify variation in operating conditions 3.6. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 3.7. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 3.8. The work area is maintained according to housekeeping standards 3.9. Work is conducted in accordance with workplace environmental guidelines 3.10. Workplace records are maintained according to workplace recording requirements

ELEMENT	PERFORMANCE CRITERIA
4. Shut down the compression process	4.1. The appropriate shutdown procedure is identified 4.2. The process is shut down according to workplace procedures 4.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify granulation and compression process requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust granulation process equipment to achieve required outcomes, including preparing granulated mix according to recipe instructions, monitoring control points and conducting inspections as required to confirm process remains within specification
- monitor process, including:
 - granule size
 - moisture content
 - fines
 - supply of materials
 - product appearance
 - product weight, thickness and hardness, friability (this may require demonstration of related test procedures)
- monitor supply and flow of materials to and from the granulation process and equipment operation to confirm process remains within specification
- start, operate, monitor and adjust compression process equipment to achieve required outcomes, including installing/setting punches and dies
- monitor supply and flow of materials to and from the compression process to confirm process remains within specification
- demonstrate product/batch changeovers
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility

REQUIRED SKILLS AND KNOWLEDGE

- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the granulation and compression process
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the granulation and compression process and the effect of outputs on downstream processes
- quality requirements of ingredients for granulating and effect of variation on the granulation process
- quality requirements of granulated mass and effect of variation on compression process
- operating requirements of both granulation and compression, related parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the granulation and compression process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the granulation and compression process and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the granulation and compression process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities

REQUIRED SKILLS AND KNOWLEDGE

- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the granulation and compression process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for confectionery granulation and compression
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- safely shut down equipment
- apply food safety procedures to work practices.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment
- work procedures, including advice on safe work practices, food safety, quality and environmental requirements
- information on equipment capacity and operating parameters
- recipe/batch instructions
- specifications, control points and processing parameters
- process and related equipment and services, including granulation and compression equipment
- materials to be processed
- sampling schedules and test procedures and equipment as required
- documentation and recording requirements and procedures
- cleaning procedures, materials and equipment as

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the panning equipment and process for operation	1.1. Materials are confirmed and available to meet operating requirements 1.2. Centres and coating are selected and prepared according to batch/recipe instructions 1.3. Cleaning and maintenance requirements and status are identified and confirmed 1.4. The panning process is prepared to meet safety and production requirements 1.5. Equipment performance is checked and adjusted as required 1.6. Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the panning process	2.1. The process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The process is monitored to confirm that specifications are met 2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the panning process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify panning processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services, including necessary centres and coating material (syrup, film or chocolate)
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust panning process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - pan preparation/coating
 - coating addition rate
 - sieving
 - colour addition
 - drying air temperature and flow
 - addition of polishing agent/gum
- monitor supply and flow of materials to and from the panning process to confirm process remains within specification
- take corrective action in response to out-of-specification results
- follow workplace procedures for reworking scrap or out-of-specification product
- demonstrate product/batch changeovers
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures

REQUIRED SKILLS AND KNOWLEDGE

- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the panning process, such as centre preparation/conditioning procedures and requirements, coating preparation and the stages in the panning process
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the panning process and the effect of outputs on downstream processes
- conditioning requirements for centres and coatings
- quality characteristics of centres and coatings for use in the panning process and the effect of variation on panning process performance and outputs
- quality characteristics to be achieved by the process
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the panning process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- food safety/contamination risks associated with the process and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the panning process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare and mix ingredients	1.1. Ingredients are confirmed and available to meet operating requirements 1.2. Mixing processing/operating parameters are entered as required to meet safety and production requirements 1.3. Ingredients and additives are delivered to the mixer in the required quantities and sequence to meet recipe specifications 1.4. The mixing process is started and operated according to workplace procedures 1.5. Equipment is monitored to identify variation in operating conditions 1.6. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 1.7. The mixing process is monitored to confirm that specifications are met 1.8. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification
2. Prepare the refining equipment and process for operation	2.1. Mix is available to meet operating requirements 2.2. Cleaning and maintenance requirements and status are identified and confirmed 2.3. Machine components and related attachments are fitted and adjusted to meet operating requirements 2.4. Processing/operating parameters are entered as required to meet production requirements 2.5. Equipment performance is checked and adjusted as required 2.6. Pre-start checks are carried out as required by workplace requirements
3. Operate and monitor the refining process	3.1. The refining process is started and operated according to workplace procedures 3.2. Equipment is monitored to identify variation in operating conditions 3.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 3.4. The process is monitored to confirm that specifications are met

ELEMENT	PERFORMANCE CRITERIA
	<p>3.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>3.6. The work area is maintained according to housekeeping standards</p> <p>3.7. Work is conducted in accordance with workplace environmental guidelines</p> <p>3.8. Workplace records are maintained according to workplace recording requirements</p>
4. Shut down the refining process	<p>4.1. The appropriate shutdown procedure is identified</p> <p>4.2. The process is shut down according to workplace procedures</p> <p>4.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify mixing and refining process requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary ingredients and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings to achieve required particle size, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- sequence ingredient addition to the mixer to meet recipe specifications
- start, operate, monitor and adjust process equipment to achieve required outcomes, including setting dosing/metering and related addition systems, loading or controlling loading of bulk ingredients, monitoring control points and conducting inspections as required to confirm process remains within specification
- monitor process, including:
 - ingredient addition sequence
 - mix times
 - throughput to refiner
 - roller gap/particle size
- monitor supply and flow of materials to and from the mixing and refining
- demonstrate changeover procedures
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take refining process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for

REQUIRED SKILLS AND KNOWLEDGE

clarification and seeking advice from supervisor

- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of mixing and refining chocolate, including:
 - processing stages in chocolate making and the role of mixing, refining and pre-refining as appropriate
 - ingredients used in chocolate and those introduced during refining, such as ingredients in different types of chocolate as appropriate to production requirements and an understanding of the quality requirements and role of each main ingredient
 - changes that occur in ingredients during mixing and refining
 - significance of particle size for product characteristics
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the mixing and refining process and the effect of outputs on downstream processes
- quality requirements of ingredients used and effect of variation on process performance and outputs
- quality characteristics required of the refined mass
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the mixing and refining process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the mixing and refining process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the mixing and refining process,

REQUIRED SKILLS AND KNOWLEDGE

- | |
|--|
| <p>including waste/rework collection and handling procedures related to the process</p> <ul style="list-style-type: none">• basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment• sampling and testing associated with process monitoring and control where relevant• routine maintenance procedures where relevant• cleaning and sanitation procedures where relevant |
|--|

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for refining chocolate
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- safely shut down equipment
- apply food safety procedures to work practices.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment
- work procedures, including advice on safe work practices, food safety, quality and environmental requirements
- information on equipment capacity and operating parameters
- recipe/batch instructions
- specifications, control points and processing parameters
- process and related equipment and services, including mixing equipment and refiner. It may also include pre-refining equipment as required
- ingredients for inclusion in the mixing/refining stage
- sampling schedules and test procedures and equipment as required
- documentation and recording requirements and procedures

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competence relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Refining and related equipment	<p>Refining and related equipment may include:</p> <ul style="list-style-type: none"> • bulk materials handling equipment • continuous or batch mixers/kneaders • pre-refiners and refiners • conveyor systems
Operation of equipment and processes	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> • the use of process control panels and systems
Shutdown procedures	<p>Shutdown procedures may include:</p> <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)

RANGE STATEMENT**Services**

Services may need to be confirmed. These depend on the nature of the process. Typical examples include:

- power
- steam
- water
- compressed and instrumentation air

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Prepare the starch moulding equipment and process for operation</p>	<p>1.1. Materials are confirmed and available to meet operating requirements</p> <p>1.2. Starch is correctly conditioned for moulding</p> <p>1.3. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.4. Starch mould is prepared to meet production requirements</p> <p>1.5. Processing/operating parameters are selected for the depositor, starch moulding and starch removal equipment to meet safety and production requirements</p> <p>1.6. Ingredients/mix is transferred to depositing equipment</p> <p>1.7. Equipment performance is checked and adjusted as required</p> <p>1.8. Pre-start checks are carried out as required by workplace requirements</p>
<p>2. Operate and monitor the starch moulding and removal process</p>	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that specifications are met</p> <p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
<p>3. Shut down the starch moulding process</p>	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify starch moulding processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services, including confirming starch condition and mould type
- prepare product for depositing, such as ingredient addition, mixing and cooking to specification
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- deposit and stamp starch moulds
- set up destarching and finishing equipment, such as blowing, oiling or sugaring clean starch and drying starch for re-use
- start, operate, monitor and adjust starch moulding process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - the supply of liquid mass to hopper
 - controlling weight of liquid deposited in mould
 - monitoring pump stroke settings
 - conducting visual inspections to identify faults, such as tailings and placement of liquid in mould
- monitor supply and flow of materials to and from the starch moulding process and equipment operation to confirm process remains within specification
- demonstrate depositor head changeovers
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures

REQUIRED SKILLS AND KNOWLEDGE

- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the starch moulding process, including an understanding of each stage:
 - starch mould preparation
 - product preparation and conditioning
 - product depositing
 - starch use and recovery cycle
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of the starch moulding and depositing process and the effect of outputs on downstream processes
- quality requirements of starch moulds and materials for depositing and effect of variation on starch moulding process performance and outputs, including the moisture absorption characteristics of starch and impact on the process
- quality characteristics required of process outputs
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the starch moulding process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the starch moulding process and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the starch moulding process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage

REQUIRED SKILLS AND KNOWLEDGE

- isolation, lock out and tag out procedures and responsibilities
- product/process changeover procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the starch moulding process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the butter churning equipment and process for operation	1.1. Materials are confirmed and available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements 1.4. Processing/operating parameters are entered as required to meet safety and production requirements 1.5. Equipment performance is checked and adjusted as required 1.6. Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the butter churning process	2.1. The process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The process is monitored to confirm that specifications are met 2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the butter churning process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify requirements for the butter churning process
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust butter churning process equipment to achieve required outcomes, such as monitoring control points and conducting inspections as required to confirm process remains within specification
- monitor process, including:
 - agitation speeds
 - flow rates
 - time/temperature
 - ingredient addition systems
 - equipment performance
- monitor supply and flow of materials to and from the butter churning process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take butter churning process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- clean equipment according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- carry out product/batch changeovers according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for

REQUIRED SKILLS AND KNOWLEDGE

clarification and seeking advice from supervisor

- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the butter churning process, including product preservation and the types of additives/ingredients used in the process
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- the flow of the butter churning process and the effect of product output on downstream processes
- quality characteristics to be achieved by the butter churning process
- contamination/food safety risks associated with the process and related control measures
- the effect of raw material characteristics on the butter churning process
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the butter churning process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- cleaning and sanitation procedures where relevant
- routine maintenance procedures where relevant
- product/batch changeover procedures where relevant

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the butter oil equipment and process for operation	1.1. Materials are confirmed and available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. Processing/operating parameters are entered as required to meet safety and production requirements 1.4. Equipment performance is checked and adjusted as required 1.5. Pre-start checks are carried out as required by workplace requirements
2. Monitor the butter oil process operation	2.1. The process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. Each stage of the process is monitored to confirm that specifications are met 2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with environmental standards 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the butter oil process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services, such as confirming that characteristics of in-feed (cream or butter) meet quality requirements
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust process equipment to achieve required outcomes, such as monitoring control points and conducting inspections as required to confirm process remains within specification:
 - for the phase inversion stage, this typically includes monitoring colour
 - for the oil concentration stage, this typically includes monitoring oil transparency:
 - in a direct from cream process, it may involve checking homogeniser and centrifuge pressures, centrifuge operation and desludging
 - for a butter process, the centrifugal separator pressures, and desludging and heat exchanger temperatures are also monitored
 - for the neutralisation stage, this typically includes monitoring water flow and temperatures, ph and caustic concentration
 - for the polishing stage, this typically includes monitoring water temperatures and product appearance (e.g. clarity)
 - for the dehydration stage, this typically includes monitoring operation of the centrifuge to flash off remaining moisture in oil
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards

REQUIRED SKILLS AND KNOWLEDGE

- use process control systems according to enterprise procedures
- demonstrate batch/product changeovers according to enterprise procedures (may not apply to some continuous operations)
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of each stage in the process, including an understanding of the stages, process flow and phases produced
- basic operating principles of equipment, including the principles of centrifuges and principles of evaporation, main equipment components, status and purpose of guards, equipment operating capacities and applications and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the effect of outputs on downstream processes
- quality characteristics (fat content) to be achieved by the process
- quality requirements of in-feed materials (cream or butter) and the effect of variation in material quality on process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the production process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures
- common causes of variation and corrective action required, such as how earlier stages in the process could contribute to cloudy product
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance

REQUIRED SKILLS AND KNOWLEDGE

information

- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- product/process changeover procedures and responsibilities where relevant
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on equipment used for butter oil process
- start, operate, monitor and adjust process to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- safely shut down process
- apply food safety procedures to work practices.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment
- work procedures, including advice on safe work practices, food safety, quality and environmental requirements
- information on equipment capacity and operating parameters
- production schedule/batch instructions
- specifications, control points and processing parameters
- butter oil and related equipment and services
- cream or butter to be processed
- sampling schedules and test procedures and equipment as required
- documentation and recording requirements and procedures
- cleaning procedures, materials and equipment as

EVIDENCE GUIDE	
	required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry include:</p> <ul style="list-style-type: none"> the Food Standards Code, including labelling, weights and measures legislation legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> standard operating procedures (SOPs) specifications production schedules and instructions manufacturers' advice standard forms and reports
Products	<p>Products produced using this process include:</p> <ul style="list-style-type: none"> anhydrous milk fat (AMF) anhydrous butteroil butteroil <p>Phase inversion produces butter milk which is typically evaporated and dried (this unit does not cover this activity)</p>
Equipment	<p>When producing butteroil from cream, typical equipment used for phase inversion includes:</p> <ul style="list-style-type: none"> heat exchangers centrifugal separators homogenisers

RANGE STATEMENT	
	<p>Phase inversion when using butter requires:</p> <ul style="list-style-type: none"> • a butter maker/churn <p>Post-phase inversion equipment may include:</p> <ul style="list-style-type: none"> • separators • dehydrators (vacuum vessel) • holding and balance tanks • heat exchangers
Production stages	<p>Typical production stages include:</p> <ul style="list-style-type: none"> • concentration • phase inversion (using an homogeniser when working direct from cream and a melting and holding stage if using butter) • final concentration • neutralisation • polishing • dehydration <p>Fractionation and decholesterolisation may also be carried out</p>
Shutdown procedures	<p>Shutdown procedures may include:</p> <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Operation of equipment and processes	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> • the use of process control panels and systems
Services	<p>Services may need to be confirmed. These depend on the nature of the process. Typical examples include:</p> <ul style="list-style-type: none"> • power • steam • water • vacuum • compressed and instrumentation air

Application of the Unit

Application of the unit	<p>This unit has application in a cheese production environment. It typically targets the production worker responsible for applying basic operating principles to the operation and monitoring of a pressing and moulding equipment and processes</p> <p>When batch or product changeover procedures are part of this work process, the procedures should be used to customise the application of this unit. Where more detailed changeovers are carried out, FDFOP2011A Conduct routine maintenance, should be considered.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the pressing and moulding equipment and process for operation	1.1. Materials are confirmed and available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements 1.4. Processing/operating parameters are entered as required to meet safety and production requirements 1.5. Equipment performance is checked and adjusted as required 1.6. Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the pressing and moulding process	2.1. The process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The process is monitored to confirm that specifications are met 2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the pressing and moulding process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify pressing and moulding processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for pressing and moulding processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust pressing and moulding process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - equipment speeds
 - flow rates
 - time/temperature
 - equipment performance
- monitor supply and flow of materials to and from the pressing and moulding process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take pressing and moulding process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct product/batch changeovers according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor

REQUIRED SKILLS AND KNOWLEDGE

- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the pressing and moulding process
- basic operating principles of equipment, such as main equipment components, equipment status and purpose of guards, operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- the flow of the pressing and moulding process and the effect of product output on downstream processes
- quality characteristics to be achieved by the pressing and moulding process
- effect of raw material characteristics on pressing and moulding process performance
- contamination/food safety risks associated with the process and related control measures
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the pressing and moulding process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- sampling and testing associated with process monitoring and control where relevant
- product/batch changeover procedures where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for pressing and moulding cheese • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures to work practices.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules and batch/recipe instructions • information on equipment capacity and operating parameters • production schedules and batch instructions • pressing and moulding process and related equipment and services • specifications, control points and processing parameters • materials required for a pressing and moulding process • sampling schedules and test procedures and equipment as required • routine preventative maintenance schedule as

EVIDENCE GUIDE	
	<p>required</p> <ul style="list-style-type: none"> • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Cheese pressing and moulding equipment	<p>Cheese pressing and moulding equipment may include:</p> <ul style="list-style-type: none"> • block forming towers • trolley table • tunnel press • pneumatic press • hydraulic press • screw press • moulds
Materials	<p>Materials used in cheese pressing and moulding may include:</p> <ul style="list-style-type: none"> • curd • salt

RANGE STATEMENT	
Shutdown procedures	Shutdown procedures may include: <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Operation of equipment and processes	Operation of equipment and processes may require: <ul style="list-style-type: none"> • the use of process control panels and systems
Services	Services are appropriate to the process to be operated. Typical examples include: <ul style="list-style-type: none"> • power • steam • water • vacuum • compressed and instrumentation air

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the fermentation equipment and process for operation	1.1. Materials are confirmed and available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements 1.4. Processing/operating parameters are entered as required to meet safety and production requirements 1.5. Equipment performance is checked and adjusted as required 1.6. Pre-start checks are carried out as required by workplace requirements
2. Monitor the fermentation process operation	2.1. The process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The process is monitored to confirm that specifications are met 2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the fermentation process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust fermentation equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
 - time/temperature
 - flow rates
 - fermenter speeds
 - equipment condition and performance
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- demonstrate batch/product changeovers according to enterprise procedures (may not apply to some continuous operations)
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

REQUIRED SKILLS AND KNOWLEDGE

Required knowledge

Knowledge of:

- purpose and basic principles of the fermentation process, including the stages and reactions that occur during fermentation
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of this process and the effect of outputs on downstream processes
- quality characteristics to be achieved by the fermentation process
- types of starters used and their role in the fermentation process
- quality requirements of materials and effect of variation on process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the fermentation process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- product/process changeover procedures and responsibilities where relevant
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning procedures where relevant

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Handle food safely	1.1. Food handling requirements are identified 1.2. Food handling is carried out according to the food safety program 1.3. The workplace is maintained in a clean and tidy order to meet workplace standards 1.4. Work is conducted in accordance with workplace environmental guidelines
2. Identify, control and report food safety hazards	2.1. Work area, materials, equipment and product are routinely monitored to ensure compliance with food safety requirements 2.2. Processes, practices or conditions which are not consistent with the food safety program are identified and corrective action is taken within the level of responsibility
3. Comply with personal hygiene standards	3.1. Personal hygiene meets the requirements of the food safety program 3.2. Health conditions and/or illness are reported as required by the food safety program 3.3. Clothing and footwear worn is appropriate for the food handling task and meets the requirements of the food safety program 3.4. Movement around the workplace complies with the food safety program

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- locate and follow workplace information relating to food safety responsibilities
- monitor own work and implement any controls as required by the food safety program, such as visual inspection and checks
- follow workplace procedures to maintain food safety as required by the food safety program relating to own work
- identify and correct or report situations that do not meet the requirements of the food safety program and/or could result in unsafe food
- handle, clean and store equipment, utensils, packaging materials and similar items according to the requirements of the food safety program as required by work role
- maintain personal hygiene consistent with the food safety program
- take necessary precautions when moving around the workplace and/or from one task to another to maintain food safety
- wear and maintain appropriate clothing/footwear as required by work tasks and consistent with the requirements of the food safety program
- report health conditions and illness as appropriate according to the food safety program
- handle and/or dispose of out-of-specification or contaminated materials, ingredients and product, waste and recyclable material according to food safety program as required by work responsibilities
- maintain the work area in a clean and tidy state
- identify and report signs of pest infestation
- clean and sanitise equipment according to enterprise procedures
- record food safety information according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- food safety requirements related to work responsibilities, including personal hygiene, requirements and procedures to report illness and safe food handling practices for own work, as well as an awareness of the possible consequences of not following these procedures
- common types and sources of contamination that occur in the work area, such as

REQUIRED SKILLS AND KNOWLEDGE

- cross contamination
- control methods and procedures used in the , such as reporting non-compliance and following instructions
- storage and handling requirements for ingredients, materials and product used related to work role
- housekeeping requirements and responsibilities relating to own work, and use and storage of housekeeping/cleaning equipment where required
- purpose and importance of cleaning and sanitation procedures
- suitable standard for materials, equipment and utensils used in the work area
- waste collection, recycling and handling procedures relevant to own work responsibilities
- procedures to follow in the event of pest sighting or discovery of infestation
- clothing and footwear requirements for working in and/or moving between food handling areas
- personal clothing maintenance, laundering and storage requirements
- appropriate bandages and dressings to be used when undertaking food handling
- cleaning procedures where relevant
- recording requirements and responsibilities where relevant

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • identify food safety handling requirements in the workplace • apply and monitor own compliance with food safety standards • maintain required standards of personal hygiene • maintain clean and tidy work area • report non-compliances • apply safe work practices and identify OHS hazards and controls.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • food safety information relating to the workplace, including a food safety program outlining food safety hazards and control methods. It may also include company policies, procedures and codes of practice, such as Good Manufacturing Practice (GMP) • related work instructions and procedures • work tasks and responsibilities • cleaning and sanitation policies and procedures • appropriate clothing and related apparatus • reporting and monitoring systems.
<p>Method of assessment</p>	<p>This unit should be assessed together with core and other units of competency relevant to the work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment <p>Where the company operates a combined quality/food safety system, assessment of this unit should be combined with assessment of:</p>

EVIDENCE GUIDE	
	<ul style="list-style-type: none">• FDFOP1009A Follow work procedures to maintain quality.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Food safety program</p>	<p>A food safety program is a written document that specifies how a business will control all food safety hazards that may be reasonably expected to occur in all food handling operations of the food business. The food safety program and related procedures must comply with legal requirements of the food safety standards and must be communicated to all food handlers. Where no food safety program is in place, food safety requirements may be specified in general operating procedures</p>
<p>Food safety information</p>	<p>Food safety information may be provided in:</p> <ul style="list-style-type: none"> • food safety program • standard operating procedures (SOPs) • specifications • log sheets • written or verbal instruction
<p>Food handling</p>	<p>Food handling refers to:</p> <ul style="list-style-type: none"> • food receipt and storage • food preparation, cooking, holding, cooling, chilling and reheating • packaging • disposal
<p>Products/materials handled and stored</p>	<p>Products/materials handled and stored can include:</p> <ul style="list-style-type: none"> • raw materials • ingredients • consumables • part-processed product • finished product • cleaning materials

RANGE STATEMENT	
Breach of food safety procedures	<p>Examples of a breach of food safety procedures could include:</p> <ul style="list-style-type: none"> • failure to check delivery temperatures of potentially hazardous chilled food • failure to place temperature-sensitive food in temperature controlled storage conditions promptly • failure to wash hands when required • use of cloths for unsuitable purposes
Responsibility for monitoring food safety	<p>Responsibility for monitoring food safety, identifying breaches in food safety procedures and taking corrective action relates to own tasks and responsibilities and occurs in the context of the food safety program in the workplace</p>
Food safety hazard	<p>A food safety hazard is a biological, chemical or physical agent in, or condition of, food that has the potential to cause an adverse health effect</p>
Personal hygiene requirements	<p>Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state or territory legislation/regulations</p>
Reporting of health conditions and illness requirements	<p>Reporting of health conditions and illness requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state or territory legislation/regulations</p>
Appropriate clothing and footwear	<p>Appropriate clothing and footwear depends on work requirements. It should be designed to ensure that the body and clothing itself does not contaminate food or surfaces likely to come into contact with food. Examples of clothing designed to prevent contamination by the body include:</p> <ul style="list-style-type: none"> • purpose designed overalls or uniforms • hair-nets • beard snoods • gloves

RANGE STATEMENT	
	• overshoes

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement the food safety program	1.1. Food handling requirements are identified 1.2. Food handling is carried out according to the food safety program 1.3. Food safety hazards are controlled as required by the food safety program 1.4. Where food safety control requirements are not met, the incident is promptly reported and corrective action is taken 1.5. Food safety information is recorded to meet requirements of the food safety program 1.6. The workplace is maintained in a clean and tidy order to meet workplace standards 1.7. Work is conducted in accordance with workplace environmental guidelines
2. Participate in maintaining and improving food safety	2.1. Work area, materials, equipment and product are routinely monitored to ensure compliance with food safety requirements 2.2. Processes, practices or conditions which could result in a food safety breach are identified and reported according to workplace reporting requirements 2.3. Corrective action is taken in accordance with the food safety program 2.4. Food safety issues are raised with designated personnel
3. Comply with personal hygiene standards	3.1. Personal hygiene meets the requirements of the food safety program 3.2. Health conditions and/or illness are reported as required by the food safety program 3.3. Clothing and footwear worn is appropriate for the food handling task and meets the requirements of the food safety program 3.4. Movement around the workplace complies with the food safety program

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- locate and follow workplace information relating to food safety responsibilities
- follow workplace procedures to maintain food safety as required by the food safety program relating to own work
- monitor food safety hazards as required by the food safety program, including methods such as visual inspection, sampling and testing
- record results of monitoring, and maintain records as required by the food safety program
- identify and report situations that do not meet the requirements of the food safety program and/or could result in unsafe food
- take corrective action as required by food safety program within level of responsibility
- handle, clean and store equipment, utensils, packaging materials and similar items according to the requirements of the food safety program as required by work role
- maintain personal hygiene consistent with the food safety program
- take necessary precautions when moving around the workplace and/or from one task to another to maintain food safety
- wear and maintain appropriate clothing/footwear as required by work tasks and consistent with the requirements of the food safety program
- report health conditions and illness as appropriate according to the food safety program
- handle and dispose of out-of-specification or contaminated food, waste and recyclable material according to food safety program as this requirement relates to own work responsibility
- maintain the work area in a clean and tidy state
- identify and report signs of pest infestation
- record food safety information in appropriate format
- clean and sanitise equipment according to enterprise procedures
- collect samples and conduct tests according to the food safety program according to enterprise procedures
- participate in investigating food safety breaches according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- sources of information and expertise on procedures and responsibilities for food safety relating to own work
- basic concepts of HACCP-based food safety, including identification of hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- food safety management arrangements in the workplace, including awareness of food safety legislation, workplace policies and procedures to implement responsibilities, understanding the relationship between the quality system and food safety program, personnel responsible for developing and implementing the food safety program, the role of internal and external auditors as appropriate, procedures followed to investigate contamination events, and performance improvement processes
- awareness of common microbiological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences and control methods to prevent occurrence
- basic understanding of the properties, handling and storage requirements of ingredients, materials and products handled and used
- suitable standard for materials, measuring devices, equipment and utensils used in the work area
- food safety requirements related to work responsibilities, including personal hygiene, requirements and procedures to report illness and safe food handling practices for own work
- methods used to monitor that food safety is under control, including the purpose of sampling and taking measurements, such as temperature and pH, and conducting inspections and tests
- action required in the event of non-compliance (corrective action is typically described in the food safety program and/or related workplace information)
- purpose of keeping records and the recording requirements of the food safety program
- methods used in the workplace to isolate or quarantine food which may be unsafe
- product and ingredient traceability procedures, such as product recall where required by work responsibilities
- clothing and footwear requirements for working in and/or moving between food handling areas
- personal clothing maintenance, laundering and storage requirements
- appropriate bandages and dressings to be used when undertaking food handling
- housekeeping requirements and responsibilities relating to own work, and use and storage of housekeeping/cleaning equipment where relevant
- procedures to follow in the event of pest sighting or discovery of infestation
- purpose and importance of cleaning and sanitation procedures
- waste collection, recycling and handling procedures relevant to own work responsibilities

- cleaning and sanitation procedures where relevant
- impact of rework handling/addition on food safety where relevant
- sampling and test methods where relevant

-

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- identify own responsibilities with regard to food safety
- identify food safety risks in the workplace and the control measures used to manage them
- apply control measures in own work
- monitor compliance with food safety standards
- identify and act on non-compliances and participate in improving safety
- maintain required standards of personal hygiene
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- apply food safety procedures.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- food safety information relating to the workplace, including a food safety program outlining food safety hazards and control methods. It may also include company policies, procedures and codes of practice, such as:
 - Good Manufacturing Practice (GMP)
 - related work instructions and procedures
 - work tasks and responsibilities
 - appropriate clothing and related apparatus
 - reporting and monitoring systems
 - cleaning and sanitation policies and procedures as required
 - sampling and test procedures and related equipment as required.

EVIDENCE GUIDE	
Method of assessment	<p>This unit should be assessed together with other units of competence relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment • FDFOP2013A Apply sampling procedures • FDFOP2063A Apply quality systems and procedures • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

A food safety program

A food safety program is a written document that specifies how a business will control all food safety hazards that may be reasonably expected to occur in all food handling operations of the food business. The food safety program and related procedures must comply with legal requirements of the food safety standards and must be communicated to all food handlers. Where no food safety program is in place, food safety requirements may be specified in general operating procedures

Workplace information

Workplace information may be provided in:

- food safety program
- standard operating procedures (SOPs)
- specifications
- log sheets
- written or verbal instruction

Food handling

Food handling refers to:

- food receipt and storage
- food preparation
- cooking, holding, cooling, chilling and reheating
- packaging, disposal

Products/materials handled and stored

Products/materials handled and stored can include:

- raw materials
- ingredients
- consumables
- part-processed product
- finished product
- cleaning materials

RANGE STATEMENT	
Examples of a breach of food safety procedures	<p>Examples of a breach of food safety procedures could include:</p> <ul style="list-style-type: none"> • failure to check delivery temperatures of potentially hazardous chilled food • failure to place temperature-sensitive food in temperature controlled storage conditions promptly • failure to wash hands when required • use of cloths for unsuitable purposes
Responsibility for monitoring food safety	<p>Responsibility for monitoring food safety, identifying breaches in food safety procedures and taking corrective action relates to own tasks and responsibilities and occurs in the context of the food safety program in the workplace</p>
Monitoring	<p>Monitoring describes the methods used to confirm that a food safety hazard is in control, such as:</p> <ul style="list-style-type: none"> • taking temperatures • collecting samples • conducting visual inspections • conducting other tests as required
Food safety hazard	<p>A food safety hazard is a biological, chemical or physical agent in, or condition of, food that has the potential to cause an adverse health effect</p>
Hygiene requirements	<p>Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state or territory legislation/regulations</p>
Reporting of health conditions and illnesses requirements	<p>Reporting of health conditions and illnesses requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state or territory legislation/regulations</p>
Appropriate clothing and footwear	<p>Appropriate clothing and footwear depends on work requirements. It should be designed to ensure that the body and clothing itself does not contaminate food or surfaces likely to come into</p>

RANGE STATEMENT

	<p>contact with food. Examples of clothing designed to prevent contamination by the body include:</p> <ul style="list-style-type: none"> • purpose designed overalls or uniforms • hair-nets • beard snoods • gloves • overshoes

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Ensure others in the work area are able to meet quality and food safety requirements	1.1. Hazard control and clothing and equipment appropriate to work requirements are available, functional and correctly fitted 1.2. Information on food safety/quality responsibilities and procedures is current, accessible and communicated to others in the work area 1.3. Information about identified hazards and the outcomes of risk assessment and risk control procedures is accessible and communicated to others in the work area 1.4. Food safety/quality hazards and control measures used in the work area can be identified by those in the work area 1.5. Mentoring and coaching support is available to support individuals/groups to implement quality and safe food handling procedures 1.6. Training needs are identified and addressed within level of responsibility
2. Monitor observance of quality standards and food safety programs in the work area	2.1. Work procedures in the work area are clearly defined, documented and followed 2.2. Deviation from identified procedures is identified, reported and addressed within level of responsibility 2.3. Personal behaviour is consistent with workplace policies and procedures that support food safety and quality 2.4. Food safety and/or quality hazards are identified and reported according to workplace procedures 2.5. Food safety and quality information is recorded to meet workplace reporting requirements 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines
3. Take corrective action in response to quality and food safety non-compliance	3.1. Workplace procedures for responding to quality and food safety non-compliance are promptly implemented 3.2. Hazardous events are investigated to identify cause 3.3. Control measures to prevent recurrence and minimise risks of hazardous events are implemented
4. Maintain and	4.1. Processes or conditions which could result in a

ELEMENT	PERFORMANCE CRITERIA
improve quality and food safety in the work area	<p>breach of food safety procedures or quality specifications are identified, assessed, removed or and/reported within level of responsibility and according to workplace procedure</p> <p>4.2.Risk assessments are conducted and appropriate control measures are identified and implemented in the work area</p> <p>4.3.Recommendations arising from risk assessments are implemented within level of responsibility</p> <p>4.4.Inadequacies in control measures are identified and reported according to company reporting requirements</p> <p>4.5.Matters raised relating to quality/food safety are promptly resolved and/or referred to appropriate personnel</p> <p>4.6.The work group is consulted and advised of quality/food safety matters relevant to work role</p> <p>4.7.Opportunities for improving food safety and quality are identified and raised with relevant personnel</p> <p>4.8.Procedures are developed or revised to support effective control of quality and food safety hazards</p> <p>4.9.Quality/food safety records are reviewed to ensure they are complete and meet the quality system, food safety program and legal requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access, interpret and communicate information about the food safety program, quality requirements and related procedures to others in the work area
- demonstrate two-way communication, including active listening and responding constructively to feedback
- provide access to and maintain current food safety/quality documentation
- model safe food handling and quality practices and procedures to achieve required outcomes, including demonstrating:
 - work procedures that meet the requirements of quality and food safety
 - cleaning and sanitising equipment
 - sampling and testing as appropriate according to quality and food safety requirements
 - maintaining personal hygiene
 - wearing appropriate clothing and footwear as required by the work task
 - following procedures when moving within and between work areas
 - reporting health conditions and illnesses according to workplace procedures
 - handling, cleaning and storing equipment, utensils and packaging materials as appropriate
- identify control points in the work area and demonstrate monitoring techniques used (control points include critical, quality and regulatory control points)
- support others to meet quality standards and follow food safety procedures by ensuring that all personnel in the work area receive the information required and have the necessary skills and equipment to carry out their responsibilities
- identify, report and/or address food safety/quality non-compliance in an appropriate and timely manner within level of responsibility
- determine when and how to make adjustments to maintain output within level of responsibility
- identify, report and/or address food safety/quality training and development needs of others in the work area
- ensure that appropriate and timely action is taken in response to non-compliance
- handle and dispose of out-of-specification or contaminated food, waste and recyclable material according to food safety program as this requirement relates to own work responsibility
- participate in investigations of non-compliance and risk assessment processes
- participate in consultation processes to improve quality and food safety outcomes in the workplace

REQUIRED SKILLS AND KNOWLEDGE

- review practice and procedures to implement recommendations arising from risk assessments and/or improvement proposals within level of responsibility, such as collecting and analysing food safety/quality records, reviewing operating procedures and communicating changes to others in the work area
- ensure that housekeeping standards are maintained and that equipment is in operational order, such as participating in the management of equipment calibration
- monitor the recording of quality and food safety information to confirm that records accurately reflect performance and meet the requirements of the food safety and quality programs
- participate in food recall procedures as required, within level of responsibility
- facilitate consultation processes according to enterprise procedures
- lead investigations of quality and food safety incidents according to enterprise procedures
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- sources of information and expertise on procedures and responsibilities for food safety relevant to the workplace
- principles of a HACCP-based approach to managing food safety, including identifying hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- basic concepts of quality assurance including hazards, risk assessment and control methods
- company programs and systems in place to manage and support quality and food safety in the workplace, which may involve separate or integrated programs, including systems for maintaining and updating documents, such as operating procedures and specifications
- clothing and footwear requirements for working in and/or moving between food handling areas, including personal clothing maintenance, laundering and storage requirements
- appropriate bandages and dressings to be used when undertaking food handling
- housekeeping requirements and responsibilities relating to own work, where relevant this includes use and storage of housekeeping/cleaning equipment
- procedures to follow in the event of pest sighting or discovery of infestation
- purpose and importance of cleaning and sanitation procedures
- legal obligations for food safety and quality, including an awareness of government legislation and customer requirements
- food safety and quality responsibilities and requirements relating to the work area
- awareness of common micro biological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences and control methods

REQUIRED SKILLS AND KNOWLEDGE

- to prevent occurrence
- suitable standard for materials, measuring devices, equipment and utensils used in the work area
- properties of food and ingredients used that affect food safety, including an understanding of related storage, processing and handling requirements
- current technical and process knowledge required to participate in investigations of food safety/quality hazards, risks and incidents within level of responsibility, including an understanding of common micro biological, physical and chemical hazards, related control methods and the way changes in equipment and/or processing methods can affect food safety and quality outcomes
- procedures for identifying unsafe and/or non-conforming product, including control points and evidence of out-of-specification product or materials
- sampling procedures, test methods and inspections
- options for responding to non-compliance, including legal responsibility, risk management and cost/implications of different responses and level of responsibility for decision making
- methods used in the workplace to isolate or quarantine food which may be unsafe
- waste collection, recycling, handling and disposal, including handling/disposal requirements for different types of waste, such as hazardous waste where relevant
- traceability and recall procedures within level of responsibility
- documentation system and procedures, including record keeping to meet both company and legal requirements, procedures for developing and/or reviewing workplace procedures, and document control systems used in the workplace
- auditing arrangements, roles and responsibilities as they relate to own work responsibilities, such as internal and external audit processes
- appropriate communication skills and techniques to convey information on quality and food safety requirements to others in the workplace
- cleaning and sanitation procedures where relevant
- impact of rework handling/addition on food safety where relevant
- sampling and test methods where relevant
- facilitation and consultation techniques where relevant

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>

<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • food safety program for the work area which identifies critical control points, control measures and corrective action • quality policy, system and procedures • work area or system in which quality and food safety practices and procedures are to be monitored • personal protective clothing and equipment as required • review/audit arrangements • reporting and monitoring systems.
<p>Method of assessment</p>	<p>This unit should be assessed together with other units of competence relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFPPL3001A Participate in improvement processes • FDFPPL3004A Lead work teams and groups • BSBRES401A Analyse and present research

EVIDENCE GUIDE	
	information.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Work responsibilities	Work responsibilities may include formal or informal responsibility for modelling appropriate quality/food safety policies and procedures and providing a support role to others in the work area
Food safety program	A food safety program is a written document that specifies how a business will control all food safety hazards that may be reasonably expected to occur in all food handling operations of the food business. The food safety program and related procedures must comply with legal requirements of the food safety standards and must be communicated to all food handlers. Where no food safety program is in place, food safety requirements may be specified in general operating procedures
Quality systems	Quality systems may be externally accredited, such as an ISO system, or internally designed and managed
Workplace information	<p>Workplace information may be provided in:</p> <ul style="list-style-type: none"> • food safety and quality policies and programs • standard operating procedures (SOPs) • specifications • log sheets • written or verbal instruction incorporating food safety and quality requirements
Incidents	<p>A food safety incident is:</p> <ul style="list-style-type: none"> • a situation where the safe limits or parameters identified by the food safety program are not met <p>A quality incident is:</p> <ul style="list-style-type: none"> • a situation where the quality limits or parameters identified in specifications or

RANGE STATEMENT	
	processing instructions are not met
Monitoring	<p>Monitoring describes the methods used to confirm that a food safety or quality hazard is in control, such as:</p> <ul style="list-style-type: none"> • taking temperatures • collecting samples • conducting visual inspections • additional testing as required
Responsibility for identifying breaches of food safety procedures	Responsibility for identifying breaches of food safety procedures and taking corrective action occurs in the context of the food safety program and within scope of responsibility
Responsibility for identifying non-compliance against quality standards	Responsibility for identifying non-compliance against quality standards occurs within the context of defined standards or specifications and relates to work area
Personal hygiene requirements	Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state or territory legislation/regulations
Reporting of health conditions and illnesses	Reporting of health conditions and illnesses requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state or territory legislation/regulations
Operator responsibilities	<p>The operator at this level may not have direct responsibility for overseeing the training/development of team members. At a minimum they must be able to identify development needs of others in the work area and refer this information to the relevant personnel.</p> <p>The operator at this level may not have responsibility for independently assessing risks and determining the effectiveness of control measures. However, they would be expected to observe day-to-day effectiveness and participate in assessment and review processes. Responsibilities</p>

RANGE STATEMENT	
	at this level may include facilitating consultation processes within level of responsibility
Record keeping	Record keeping complies with customer, legal and food safety program requirements

Co-requisite units

Co-requisite units		

FDFFS4001A Supervise and maintain a food safety plan

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit of competency covers the skills and knowledge required to maintain and implement a hazard analysis critical control point (HACCP)-based food safety plan. It includes the ability to monitor the implementation of a food safety plan, to revise, verify and validate the system, and to respond to audit findings for the system.

Application of the Unit

Food safety is critical to public health and safety and the successful operation of food processing businesses. This unit is suitable for managers, supervisors and team leaders in food processing establishments who are responsible for maintaining the food safety plan or system in a designated work area.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Review the existing food safety plan	1.1 Data and results from HACCP records are collected to verify the food safety system 1.2 Major and minor non-conformances to the HACCP plan are identified 1.3 Critical control points are monitored to confirm performance 1.4 Problem areas are analysed using appropriate quality improvement tools and techniques 1.5 Corrective actions and strategies are suggested to prevent recurrence of the problem 1.6 Required amendments to the HACCP plan are documented 1.7 Recommendations are reported and presented to appropriate personnel
2. Communicate the requirements of the food safety plan	2.1 Food safety principles, food safety procedures and requirements, including regulatory requirements, are explained to the team 2.2 Commitment to, and responsibility for, food safety is developed through work team communication 2.3 Procedures to support the food safety plan are defined, documented and put in place 2.4 Training and mentoring is provided to the team to assist implementation
3. Monitor the implementation of the food safety plan	3.1 Team implementation of the food safety plan is monitored 3.2 Personal behaviour, including hygiene, housekeeping and use of clothing and equipment, is monitored and corrected, where necessary 3.3 Records and reports are completed accurately and on schedule 3.4 Prompt action is taken to correct non-conformance according to enterprise and regulatory requirements 3.5 Causes of non-conformance are identified and analysed 3.6 Control measures are implemented to prevent future non-conformance 3.7 Non-conformance is reported according to enterprise requirements
4. Maintain the food safety plan	4.1 Feedback is sought from all personnel to identify potential hazards, corrective actions and controls 4.2 Processes or conditions which could result in breaches of food safety procedures are identified and preventive or corrective action is taken 4.3 Corrective action and control procedures are updated to improve food safety

ELEMENT	PERFORMANCE CRITERIA
	4.4 Documentation is completed according to enterprise and regulatory requirements

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- collect, monitor and interpret data to identify trends and non-conformance
- communicate with a range of stakeholders, including customers, to convey food safety requirements and programs
- demonstrate current technical and process knowledge for the control of hazards and improvement of the food safety system
- demonstrate enterprise monitoring procedures, including sampling, testing and required records and documents, and explain their purpose
- determine and take corrective action where food safety is potentially compromised
- communicate food safety requirements to the team
- facilitate food safety risk assessment procedures
- apply HACCP principles in leading the process for developing a food safety plan
- communicate the regulatory requirements that apply to the enterprise's food safety plan
- develop enterprise standard operating procedures (SOPs) and communicate their role in the food safety system
- review operations and practices for food safety improvement
- lead personnel/team in investigation of food safety incidents and potential incidents
- maintain currency of knowledge through independent research or professional development
- monitor records and documentation for accuracy and conformance
- respond to food safety incidents and implement food recall procedures, as required
- review communication systems (spoken and written) to minimise the potential for misreporting and misunderstanding of food safety requirements, procedures and plans
- take action to improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology
- use a range of communication and team building strategies to gain team commitment to food safety
- use detailed product knowledge, including product characteristics and the requirements for safe preparation, processing, storage, handling and display, to monitor food safety
- utilise problem-solving strategies required in investigating non-conformance and reviewing the food safety system
- model safe food handling and quality practices and procedures to demonstrate required work practices and provide leadership, including demonstrating:
 - work procedures that meet the requirements of quality and food safety
 - cleaning and sanitising equipment
 - sampling and testing, as appropriate, according to quality and food safety requirements
 - maintaining personal hygiene
 - wearing appropriate clothing and footwear as required by the work task
 - following procedures when moving within and between work areas

- reporting health conditions and illnesses according to workplace procedures
- handling, cleaning and storing equipment, utensils and packaging materials, as appropriate.

Required knowledge includes:

Knowledge of:

- current technical and process knowledge required to participate in investigations of food safety/quality hazards, risks and incidents
- common microbiological, physical and chemical hazards to food safety, and related control methods
- the way changes in equipment and/or processing methods can affect food safety hazards and level of risk
- the objectives of a HACCP-based food safety system
- the steps in the development of a HACCP-based food safety system
- the steps in the systematic introduction of a HACCP-based food safety system
- enterprise recall and traceability procedures
- purpose of the HACCP development and review process
- the document controls associated with a procedure change
- the purpose of SOPs and work instructions
- the process of auditing and verifying a HACCP-based food safety system.

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to maintain and implement a HACCP-based food safety plan.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Critical aspects of assessment must include the following:</p> <ul style="list-style-type: none"> • review a food safety plan for a food processing operation • communicate the requirements of a food safety plan to workers • demonstrate safe food handling work practices • complete records and reports related to the implementation of food safety • respond to non-compliances and take corrective action.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance requirements in this unit should be undertaken within the context of food technology. Competency is demonstrated by performance of all stated criteria, including the critical aspects and knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statements applicable to the workplace environment.</p> <p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • production process and related equipment, manufacturers’ advice and operating procedures • a HACCP-based food safety plan for the food processing enterprise • methods and related software systems, as required, for collecting data, analysing data and compiling into a report.
<p>Method of assessment</p>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • written and/or oral questioning to assess knowledge and understanding • a report on the review of a HACCP-based food safety system • workplace evidence and third-party verification of participation in the maintenance and implementation of a HACCP-based food safety system

	<ul style="list-style-type: none">• observation of candidate demonstrating work practices and workplace standards to maintain food safety• case studies• field reports.
Guidance information for assessment	Evidence should be gathered over a period of time in a range of actual or simulated environments.

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Food safety program</p>	<p>A food safety program is a written document that specifies ‘...the systematic identification of hazard points, in the production, processing and sale of food and the implementation of risk avoidance, risk minimisation and risk management strategies in respect of these identified hazards.’</p> <p>(National Food Authority 1994, p17).</p> <p>The food safety program and related procedures must comply with legal requirements of the Food Safety Standards and must be communicated to all food handlers. Where no food safety program is in place, food safety requirements may be specified in general operating procedures</p>
<p>Control points</p>	<p>Control points include:</p> <ul style="list-style-type: none"> critical, quality and regulatory control points
<p>Workplace information</p>	<p>Workplace information may be provided in:</p> <ul style="list-style-type: none"> food safety and quality policies and programs standard operating procedures (SOPs) specifications log sheets written or verbal instruction incorporating food safety and quality requirements
<p>Incidents</p>	<p>A food safety incident:</p> <ul style="list-style-type: none"> is a situation where the safe limits or parameters identified by the food safety program are not met <p>A quality incident:</p> <ul style="list-style-type: none"> is a situation where the quality limits or parameters identified in specifications or processing instructions are not met
<p>Monitoring</p>	<p>Monitoring describes the methods used to confirm that a food safety or quality hazard is in control. Examples of monitoring procedures include:</p> <ul style="list-style-type: none"> taking temperatures collecting samples conducting visual inspections testing, as required

<p>Responsibility for identifying breaches of food safety procedures</p>	<p>Responsibility for identifying breaches of food safety procedures and taking corrective action:</p> <ul style="list-style-type: none"> occurs in the context of the food safety program and within scope of responsibility
<p>Responsibility for identifying non-compliance against quality standards</p>	<p>Responsibility for identifying non-compliance against quality standards:</p> <ul style="list-style-type: none"> occurs within the context of defined standards or specifications and relates to work area
<p>Personal hygiene requirements</p>	<p>Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state/territory legislation/regulations</p>
<p>Reporting of health conditions and illnesses</p>	<p>Reporting of health conditions and illnesses requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state/territory legislation/regulations</p>
<p>Operator responsibilities</p>	<p>The operator at this level may have direct responsibility for overseeing the training/development of team members.</p> <p>The operator at this level may have some responsibility for independently assessing risks and determining the effectiveness of control measures. They would be expected to observe day-to-day effectiveness of the food safety plan and participate in assessment and review processes. Responsibilities at this level may include facilitating consultation processes</p>
<p>Record keeping</p>	<p>Record keeping complies with customer, legal and food safety program requirements</p>
<p>Verification of a food safety system</p>	<p>Verification refers to methods and procedures used to carry out monitoring, including:</p> <ul style="list-style-type: none"> sampling and testing to provide evidence that the specifications set by food safety legislation and enterprise requirements continue to be met

Unit Sector(s)

Food safety.

FDFFS4002A Supervise and verify supporting programs for food safety

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit of competency involves the skills and knowledge required to control hazards that are common across processes in a hazard analysis critical control point (HACCP)-based food safety plan by supervising and verifying support programs. It includes the ability to identify food safety hazards and the need for support programs, supervise the implementation of support programs, and verify that support programs are being complied with.

Application of the Unit

Food safety is critical to public health and safety and the successful operation of food processing businesses. This unit is suitable for managers, supervisors and team leaders in food processing establishments who are responsible for maintaining the food safety plan, including support programs, in a designated work area.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Establish the role of food safety support programs in the food safety plan</p>	<p>1.1 A full description of the product is drawn up 1.2 The intended use and client group for the product is identified 1.3 All steps in the operation are included from primary production, processing, manufacture and distribution to the consumer 1.4 Hazards are identified that can reasonably be expected to occur at each step 1.5 Hazard areas that are common to multiple steps in the operation are identified 1.6 The need for support programs to control identified hazard areas is defined</p>
<p>2. Support programs are developed or sourced and procedures developed</p>	<p>2.1 The scope of the health and hygiene program is defined 2.2 Microbiological, physical and chemical hazards associated with supplied unprocessed foods and packaging materials are identified and risk controls and work procedures developed 2.3 Microbiological, physical and chemical hazards associated with staff handling unpackaged food are identified and risk controls and work procedures developed 2.4 Microbiological and physical hazards arising from pest infestations are identified and risk controls and work procedures developed 2.5 Microbiological, physical and chemical hazards associated with using the premises and the equipment in them are identified and risk controls and work procedures developed 2.6 Chemical hazards associated with the use of cleaning chemicals are identified and risk controls and work procedures developed</p>
<p>3. Document and communicate the requirements of support programs as part of the food safety plan</p>	<p>3.1 Work performance is defined and critical limits established, where appropriate, for support programs 3.2 Food safety support program requirements, including regulatory requirements, are explained to the team 3.3 Team commitment to, and responsibility for, food safety support programs is developed 3.4 Induction, training and mentoring is provided to the team to assist implementation of food safety support programs 3.5 Support program requirements and procedures are communicated to management and staff through documented procedures, directions and signage</p>
<p>4. Monitor the implementation of support programs within the food safety</p>	<p>4.1 Personal behaviour, including hygiene, housekeeping and use of clothing and equipment, is monitored and corrected, where necessary</p>

ELEMENT	PERFORMANCE CRITERIA
plan	4.2 Critical control points are monitored to confirm performance 4.3 Records are checked for completion and accuracy 4.4 Problem areas are analysed using appropriate quality improvement tools and techniques 4.5 Processes or conditions which could result in breaches of food safety procedures are identified and preventive or corrective action is taken
5. Verify compliance with support programs in a food safety plan and address non-compliances	5.1 Compliance of the food processing operation for support programs is verified by workplace observation and analysis of records, supported by product testing, if required 5.2 Causes of non-conformance are identified and analysed 5.3 Non-conformance is reported according to enterprise requirements 5.4 Corrective action and control procedures are updated to improve food safety 5.5 Required amendments to the HACCP plan are documented

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- collect, monitor and interpret data to identify trends and non-conformance
- communicate with a range of stakeholders, including customers, to convey food safety requirements and programs
- demonstrate current technical and process knowledge for the control of hazards and improvement of the food safety system
- demonstrate enterprise monitoring procedures (including sampling, testing and required records and documents) and explain their purpose
- determine and take corrective action where food safety is potentially compromised
- communicate food safety and support program requirements to the team
- lead the food safety risk assessment process
- apply HACCP principles to the process of developing a food safety plan
- communicate the regulatory requirements that apply to the enterprise's food safety plan to the work team
- integrate support programs into the enterprise's food safety plan
- review operations and practices for food safety improvement
- develop enterprise standard operating procedures (SOPs) and communicate their role in the food safety system
- lead personnel/team in investigation of food safety incidents and potential incidents
- maintain currency of knowledge through independent research or professional development
- monitor records and documentation for accuracy and conformance
- respond to food safety incidents and implement food recall procedures, as required
- review communication systems (spoken and written) to minimise the potential for misreporting and misunderstanding of food safety requirements, procedures and plans
- take action to improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology
- use a range of communication and team building strategies to gain team commitment to food safety
- implement and monitor procedures from approved supplier, staff health and hygiene, pest control, cleaning and sanitation and chemical use programs
- utilise problem-solving strategies required in investigating non-conformance and reviewing the food safety system, including support programs
- model safe food handling and quality practices and procedures to demonstrate required work practices and provide leadership, including demonstrating:
 - work procedures that meet the requirements of quality and food safety
 - cleaning and sanitising equipment
 - sampling and testing as appropriate according to quality and food safety requirements
 - maintaining personal hygiene

- wearing appropriate clothing and footwear as required by the work task
- following procedure when moving within and between work areas
- reporting health conditions and illnesses according to workplace procedures
- handling, cleaning and storing equipment, utensils and packaging materials, as appropriate.

Required knowledge includes:

Knowledge of:

- current technical and process knowledge required to participate in investigations of food safety/quality hazards, risks and incidents
- common microbiological, physical and chemical hazards to food safety, and related control methods
- the way changes in equipment and/or processing methods can affect food safety hazards and level of risk
- regulatory requirements relating to approved supplier, staff health and hygiene, pest control, cleaning and sanitation and chemical use programs
- objectives of a HACCP-based food safety system
- steps in the development of a HACCP-based food safety system
- steps in the systematic introduction of a HACCP-based food safety system
- enterprise recall and traceability procedures
- purpose of the HACCP development and review process
- purpose, scope and development of procedures for approved supplier support programs
- purpose, scope and development of procedures for staff health and hygiene support programs
- purpose, scope and development of procedures for pest control support programs
- purpose, scope and development of procedures for cleaning and sanitation support programs
- purpose, scope and development of procedures for chemical use and storage support programs
- document controls associated with a procedure change
- purpose of SOPs and work instructions
- process of auditing and verifying support programs in a HACCP-based food safety system
- occupational health and safety (OHS), regulatory and workplace requirements.

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to maintain and implement a HACCP-based food safety plan.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Critical aspects of assessment must include the following:</p> <ul style="list-style-type: none"> • implement procedures for food safety support programs • communicate the requirements of food safety support programs to workers • demonstrate and provide leadership in safe food handling and hygienic work practices • monitor compliance with food safety support program requirements • complete records and reports related to the implementation of food safety support programs • respond to non-compliances in support programs and take corrective action.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance requirements in this unit should be undertaken within the context of food technology. Competency is demonstrated by performance of all stated criteria, including the critical aspects and knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statements applicable to the workplace environment.</p> <p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • production process and related equipment, manufacturers' advice and operating procedures • a HACCP-based food safety plan for the food processing enterprise • methods and related software systems, as required, for collecting data, analysing data and compiling into a report.
<p>Method of assessment</p>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • written and/or oral questioning to assess knowledge and understanding • a report on the review of support programs for a HACCP-based food safety system

	<ul style="list-style-type: none"> • workplace evidence and third-party verification of participation in the maintenance and implementation of support programs for a HACCP-based food safety system • observation of candidate demonstrating work practices and workplace standards to maintain food safety • case studies • field reports.
Guidance information for assessment	Evidence should be gathered over a period of time in a range of actual or simulated environments.

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Food safety program</p>	<p>A food safety program is a written document that specifies ‘...the systematic identification of hazard points, in the production, processing and sale of food and the implementation of risk avoidance, risk minimisation and risk management strategies in respect of these identified hazards.’</p> <p>(National Food Authority 1994, p17).</p> <p>The food safety program and related procedures must comply with legal requirements of the Food Safety Standards and must be communicated to all food handlers. Where no food safety program is in place, food safety requirements may be specified in general operating procedures</p>
<p>Control Points</p>	<p>Control points include:</p> <ul style="list-style-type: none"> • critical, quality and regulatory control points
<p>Food safety support programs</p>	<p>These programs are designed to control hazards that are common across food handling steps and include:</p> <ul style="list-style-type: none"> • approved supplier • staff health and hygiene • pest control • cleaning and sanitation • storage and use of chemicals
<p>Workplace information</p>	<p>Workplace information may be provided in:</p> <ul style="list-style-type: none"> • food safety and quality policies and programs • SOPs • Specifications • log sheets • written or verbal instruction incorporating food safety and quality requirements
<p>Incidents</p>	<p>A food safety incident:</p> <ul style="list-style-type: none"> • is a situation where the safe limits or parameters identified by the food safety program are not met <p>A quality incident:</p> <ul style="list-style-type: none"> • is a situation where the quality limits or parameters identified in specifications or processing instructions are not met

<p>Monitoring</p>	<p>Monitoring describes the methods used to confirm that a food safety or quality hazard is in control. Examples of monitoring procedures include:</p> <ul style="list-style-type: none"> • taking temperatures • collecting samples • conducting visual inspections • testing, as required
<p>Responsibility for identifying breaches of food safety procedures</p>	<p>Responsibility for identifying breaches of food safety procedures and taking corrective action:</p> <ul style="list-style-type: none"> • occurs in the context of the food safety program and within scope of responsibility
<p>Responsibility for identifying non-compliance against quality standards</p>	<p>Responsibility for identifying non-compliance against quality standards:</p> <ul style="list-style-type: none"> • occurs within the context of defined standards or specifications and relates to work area
<p>Personal hygiene requirements</p>	<p>Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state/territory legislation/regulations</p>
<p>Reporting of health conditions and illnesses</p>	<p>Reporting of health conditions and illnesses requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state/territory legislation/regulations</p>
<p>Operator responsibilities</p>	<p>The operator at this level may have direct responsibility for overseeing the training/development of team members.</p> <p>The operator at this level may have some responsibility for independently assessing risks and determining the effectiveness of control measures. They would be expected to observe day-to-day effectiveness of the food safety plan and participate in assessment and review processes. Responsibilities at this level may include facilitating consultation processes</p>
<p>Record keeping</p>	<p>Record keeping complies with customer, legal and food safety program requirements</p>
<p>Verification</p>	<p>Verification refers to reviewing all aspects of the food safety program and related records to determine compliance with and adequacy of the food safety program. At a minimum, food safety programs must be verified annually</p>

Unit Sector(s)

Food safety.

FDFFS5001A Develop a HACCP-based food safety plan

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit of competency covers the skills and knowledge required to develop a hazard analysis critical control point (HACCP)-based food safety plan and to oversee its implementation and monitoring. This unit has regulatory coverage under the Australian New Zealand Food Standards Code Standard 3.2.1 Food Safety Programs.

Application of the Unit

This unit is appropriate where the operator takes a lead role in facilitating the development of the food safety program. It requires application of the steps and techniques used to develop and review a HACCP-based food safety plan

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

FDFFS4001A Supervise and maintain a food safety plan

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Describe the product, and scope the food safety plan	1.1 Appropriate product-specific knowledge and expertise is available or obtained 1.2 The segment of the food chain and processes involved are specified 1.3 The scope of the HACCP plan is identified and class of hazards specified 1.4 A full description of the product is drawn up 1.5 The intended use and client group for the product is identified
2. Construct a flow diagram of production and confirm its applicability	2.1 All steps in the operation are included from primary production, processing, manufacture and distribution to the consumer 2.2 Standard symbols and nomenclature are used to describe the processes and steps in the operation as a flow diagram 2.3 The steps preceding and following a new operation are specified 2.4 The flow diagram is validated against the operation at all stages of production
3. Analyse all potential hazards for each step and consider control measures	3.1 Hazards are identified that can reasonably be expected to occur at each step 3.2 A hazard analysis is conducted to identify hazards that can impact on the production of safe food covering 3.3 Control measures are considered for each hazard
4. Determine critical control points and the critical limits for each	4.1 A process of decision making is followed to determine critical control points 4.2 Hazards at each critical control point are checked to ensure a control measure can be put in place 4.3 Where control measures aren't available the product or process is modified to allow a control measure at another stage 4.4 Critical limits are specified for each critical control point that are either measured or sensory
5. Establish a monitoring system for each critical control point	5.1 Appropriate monitoring methods are established for each critical control point 5.2 Monitoring methods are designed to indicate the critical limit has been reached or is trending towards it 5.3 Monitoring frequency ensures that the critical control point is in control 5.4 Adjustments are made on the basis of the monitoring of critical limits to prevent deviation and hazards occurring

ELEMENT	PERFORMANCE CRITERIA
6. Establish and record corrective actions and verification procedures	6.1 Specific corrective actions are designed to deal with deviations in the critical control point as they occur 6.2 Procedures for treating or disposing of product are documented for when critical limits are exceeded 6.3 Verification procedures are developed 6.4 Verification is carried out to ensure the HACCP system is working effectively
7. Establish documentation and record keeping requirements	7.1 All HACCP procedures are documented 7.2 Records are maintained including the collection of continuous monitoring data if required 7.3 Records are accessed to determine that procedures in place are maintaining critical limits at each critical control point 7.4 HACCP procedures are accessed and reviewed as part of continuous improvement 7.5 Food safety systems and documentation are designed to meet the requirements of auditing standards

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- specify personal roles and responsibilities for the development or review of a food safety program
- develop a full description of a product
- document the intended end use of a product
- document processes and steps to be covered in production
- develop a flow chart for a food processing operation
- establish critical control points for a process
- identify food safety hazards at all stages of production
- apply decision making tools
- establish critical limits for critical control points and methods of monitoring and recording
- establish procedures for implementing preventative action
- develop monitoring plans for person responsible for each critical control point, and the information to be recorded
- communicate corrective action requirements in the event that acceptable limits or requirements of support programs are not met
- develop or review documentation relating to the design and maintenance of the food safety program, including process flow diagrams, hazard analysis charts and tables, support program requirements, data analysis reports, corrective action reports and verification reports
- develop or review documentation to communicate food safety responsibilities, such as standard operating procedures (SOPs), processing parameters and recording devices (e.g. log sheets)
- communicate food safety responsibilities within level of responsibility using techniques and presentation styles appropriate to the audience.

Required knowledge includes:

Knowledge of:

- the purpose and intent of food safety legislation
- purpose and responsibilities for maintaining records as required by legislation and workplace procedures
- roles and responsibilities for development and maintenance of the food safety program, including internal and external auditors, and authorised officers
- HACCP-based principles and their application to food safety, including techniques for identifying hazards, assessing the likelihood of occurrence, determining acceptable methods of control, monitoring and recording requirements for each control point, identifying corrective action if controls are not met, and developing system review

procedures

- procedures for establishing the critical limits and monitoring data or processes
- techniques used to map operations and analyse food safety requirements, such as the preparation of flow charts, hazard analysis charts and tables, and data analysis reports
- raw materials, ingredients and finished product composition and characteristics, and related handling and storage requirements
- food processing methods used in the workplace or work area and their effect on food safety
- sources of technical expertise on food safety requirements
- the role of consultation in the development, implementation and ongoing maintenance of the food safety program
- documentation and recording requirements to support communication and monitoring of the food safety program, including procedures for maintaining and updating relevant documents, such as operating procedures
- main types of food safety hazards/contamination likely to occur given the type of product and processing methods used
- conditions required for bacterial food poisoning to occur, such as aw (water activity), pH, composition, time and temperature, as relevant to food handled
- acceptable control methods for the hazards identified and required corrective action when control requirements are not met
- typical support programs, such as cleaning schedules, pest control, stock rotation, product traceability and personal hygiene, and how they can be used as part of a food safety program
- acceptable control methods for the hazards identified and required corrective action when control requirements are not met
- validation and verification processes and techniques and responsibilities.

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to develop a HACCP-based food safety program, and develop procedures for its implementation and monitoring.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>All elements, performance criteria, and required skills and knowledge should be captured in a holistic assessment plan. Critical aspects of assessment must include the following:</p> <ul style="list-style-type: none"> • conduct a hazard analysis • determine the critical control points • establish critical limits • develop a system to monitor control of the critical control points • nominate the corrective action to be taken when monitoring indicates a critical control point is not under control • develop verification procedures to confirm the HACCP system is working effectively • maintain documentation concerning all procedures and records.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the candidate has access to:</p> <ul style="list-style-type: none"> • workplace food safety program documentation • organisational policies on food safety and risk management • procedures for developing or modifying specifications and other advice on food safety requirements • a food processing operation with a defined product and consumer • resources and equipment to set and monitor critical limits • procedures for developing or modifying documentation, such as work instructions and procedures, log sheets and other recording requirements • communication systems • training system

	<ul style="list-style-type: none"> • reporting/recording system.
Method of assessment	<p>Assessment methods must satisfy the endorsed Assessment Guidelines of FDF10 Food Processing Industry Training Package. The following assessment methods should be considered to gather sufficient and valid evidence of competency:</p> <ul style="list-style-type: none"> • records-based evidence and supporting statements for developing a HACCP-based food safety plan • questioning to ensure a detailed understanding of the steps and techniques used to develop and review a HACCP-based food safety program. <p>This unit should be assessed together with core units and other units of competency relevant to the function or work role.</p>
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Food safety programs</p>	<p>A food safety program is a written document that specifies ‘...<i>the systematic identification of hazard points, in the production, processing and sale of food and the implementation of risk avoidance, risk minimisation and risk management strategies in respect of these identified hazards.</i>’</p> <p>(National Food Authority 1994, p17).</p> <p>The food safety program must provide for the systematic monitoring of the controls as well as appropriate corrective action if a hazard is found not to be under control. Records must be kept to demonstrate action in relation to, or in compliance with, the food safety program. A food safety program may be developed as a stand-alone program or may be integrated with the quality program in a workplace</p>
<p>Hazard analysis</p>	<p>Hazard analysis may cover</p> <ul style="list-style-type: none"> • the likelihood of occurrence and severity of consequence • the qualitative and/or quantitative evaluation of the presence of hazards • the survival or multiplication of microorganisms of concern • the production or persistence of toxins, chemical residues or physical agents in food
<p>Methods used to control hazards</p>	<p>Methods used to control hazards include both support programs and specific hazard control limits or requirements. Typical examples of support programs include:</p> <ul style="list-style-type: none"> • product recall • cleaning schedules • pest control programs • personal hygiene practices • calibration procedures • related operating procedures
<p>Description of the product</p>	<p>A full description of the product may include:</p>

	<ul style="list-style-type: none"> • relevant safety information, such as composition, physical/ chemical structure, microcidal/ static treatments (e.g. heat-treatment, freezing, brining or smoking) • packaging durability • storage conditions • methods of distribution
Operating principles for a HACCP system	A HACCP system should be operated on a food chain where the Codex General Principles of Food Hygiene have been applied, and the appropriate Codex Codes of Practice and legislation is in place
Food safety hazards	Food safety hazards include: <ul style="list-style-type: none"> • microbiological • chemical • physical
Critical limits	Critical limits may include measured data such as: <ul style="list-style-type: none"> • temperature • time • moisture level • pH • a_w • available chlorine • sensory parameters, such as visual appearance and texture
Validation	Validation refers to: <ul style="list-style-type: none"> • the use of objective evidence in order to prove that materials, processes, procedures or equipment used are capable of delivering the intended result
Verification	Verification refers to: <ul style="list-style-type: none"> • reviewing all aspects of the food safety program and related records to determine compliance with and adequacy of the food safety program. At a minimum, food safety programs must be verified annually
Scope of the HACCP based plans	The scope of the HACCP-based plan depends on workplace requirements and may extend outside the direct area of responsibility of the team participants
Auditing standards	Auditing standards may include any of the recognised standards applying to the food industry, including:

	<ul style="list-style-type: none"> • BRC Global Food Standard • Codex Alimentarius • ISO 22000:2005 Food safety management systems - Requirements for any organization in the food chain

Unit Sector(s)

Food safety

FDFST4001A Apply food processing technologies

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit covers the skills and knowledge required to apply food processing technologies and to review their effectiveness and efficiency based on an understanding of food science and technology.

Application of the Unit

This unit applies to quality assurance and technical staff who have responsibility for maintaining product safety, quality and the production environment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Carry out fermentation as part of food or beverage production	1.1 Materials and equipment for a fermentation process are prepared 1.2 A fermentation process is applied and monitored 1.3 The fermented product is tested and evaluated
2. Review a fermentation process for a commercial food product	2.1 The critical control points (CCPs) and critical limits for product safety are reviewed 2.2 Operating procedures are reviewed for food safety and quality in fermentation 2.3 The food safety and production plans are reviewed for the fermentation process 2.4 Environmental impacts and associated costs are reviewed for fermentation in commercial food production
3. Carry out concentration and drying as part of food or beverage production	3.1 Materials and equipment for a concentration and drying process are prepared 3.2 A concentration and drying process is applied and monitored 3.3 The concentrated and dried food product is tested and evaluated
4. Review a concentration and drying process for a commercial food product	4.1 The CCPs and critical limits for product safety are reviewed 4.2 Operating procedures are reviewed for food safety and quality in fermentation 4.3 The food safety and production plan is reviewed for the fermentation process 4.4 Environmental impacts and associated costs are reviewed for fermentation in commercial food production
5. Carry out cooking or steaming as part of food or beverage production	5.1 Materials and equipment for a cooking or steaming process are prepared 5.2 A cooking or steaming process is applied and monitored 5.3 The cooked or steamed food product is tested and evaluated
6. Review a cooking or steaming operation for a commercial food product	6.1 The CCPs and critical limits for product safety are reviewed 6.2 Operating procedures are reviewed for food safety and quality in fermentation 6.3 The food safety and production plan is reviewed for the cooking or steaming process 6.4 Environmental impacts and associated costs are reviewed for fermentation in commercial food production

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills includes:

Ability to:

Fermentation

- recognise the biochemical principles of fermentation in production
- establish the role of micro-organisms in the fermentation process
- identify materials used in the fermentation process, including raw materials/pre-processed materials and starter cultures
- recognise the equipment used in the production of fermented food products
- apply appropriate quality control processes and procedures to assess fermented food products
- ferment samples of food successfully

Concentration and drying

- recognise the principles of concentration in production, including:
 - the aim of concentration in food processing
 - the need for concentration in food processing
 - heat transfer mechanism
- recognise the principles of drying in food production, including:
 - the aim of drying in food processing
 - the need for drying in food processing
 - heat transfer mechanism
- concentrate samples of food successfully
- dry samples of food successfully
- apply appropriate quality control processes and procedures to assess food products

Cooking or steaming

- sequence ingredient addition to meet recipe specifications
- start, monitor and adjust processing equipment to achieve required outcomes. Typical parameters monitored include:
 - time and temperature
 - agitation settings
 - weights
 - flow rates
 - flow diversion
 - characteristics of the mix such as colour, viscosity, density, and consistency
- take corrective action in response to out-of-specification results.

Required knowledge includes:

Knowledge of:**Fermentation**

- biochemical principles of fermentation, including - lactic acid fermentation and alcohol fermentation.
- the major micro-organism groups used in fermentation, including Lactococcus, Streptococcus, Leuconostoc, Pediococcus, Lactobacillus bacterial species, yeasts and moulds
- the microbial growth phases - Lag phase, Log phase, Stationary phase and Death phase
- materials used in the fermentation process, including raw materials/ pre-processed materials and starter cultures (single strain starters, multiple strain cultures, mixed strains)
- quality control processes and procedures used to assess fermented food products.

Concentration and drying

- the principles of heat transfer in the concentration of food
- the principles of heat transfer in the drying of food
- the various methods of concentration of foods, including evaporation, filtration, reverse osmosis and freeze concentration
- the various methods of dehydrating foods, including cabinet, spray, drying and freeze dehydration
- quality control process and procedures used to assess concentrated and dried food products.

Cooking or steaming

- purpose and basic principles of heat sterilisation and effect on physical, chemical, micro-biological and organoleptic characteristics of the cooked product
- basic operating principles of equipment including safe operating procedures
- quality characteristics and conditioning required of ingredients used and their role in the product. Conditioning may include reconstituting dry ingredients and bringing ingredients to a required temperature
- effect of ingredient quality/condition on the process. This may include variables such as temperature, viscosity/texture, microbial load and acidity quality
- heat treatment requirements for low and/or high acid foods as appropriate to production requirements
- stages and changes which occur during the blending and heat treatment stages
- quality requirements of the cooked product.relationship between time and temperature in the cooking process.

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to apply fermentation, concentration and drying or cooking or steaming processes and to review their effectiveness and efficiency based on an understanding of food science and technology.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Critical aspects of assessment must include evidence of : applying methods for fermentation or concentration and drying or cooking or steaming; determining processes and critical limits for processing a food product; documenting physical, biochemical and biological changes to food products and testing criteria; and analysing process controls for a food processing operation, based on product testing.</p>
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance requirements in this unit should be undertaken within the context of food technology. Competency is demonstrated by performance of at least one of the food processes specified, including the critical aspects and knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statements applicable to the workplace environment.</p> <p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • production process and related equipment, manufacturers' advice and operating procedures • methods and related software systems as required for collecting data and calculating yields, efficiencies and material variances appropriate to production environment • tests used to report relevant product/process information and recorded results.
<p>Method of assessment</p>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • written and/or oral questioning to assess knowledge and understanding • observation of candidate conducting a range of processes and tests • a report on review of the production system.

Guidance information for assessment	Evidence should be gathered over a period of time in a range of actual or simulated environments.
-------------------------------------	---

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Occupational health and safety requirements</p>	<ul style="list-style-type: none"> • Codes of practice • Material Safety Data Sheet • Enterprise specific requirements.
<p>Regulations</p>	<ul style="list-style-type: none"> • Australian and international standards including: • industry guidelines and codes of practice • industry regulations • Australia New Zealand Food Standards Code • ISO Standards • codex alimentarius • State food regulators.
<p>Methods of fermentation</p>	<ul style="list-style-type: none"> • Fermentation processes in industry may include lactic acid fermentation and alcohol fermentation.
<p>Materials and equipment for fermentation</p>	<ul style="list-style-type: none"> • Fermentation equipment may include water baths, cabinets, tunnels, multipurpose tanks, and fermentation tanks. • Materials used in fermentation may include raw materials/pre-processed materials to be fermented, starters such as single strain starters, and multiple strain cultures, mixed strains.
<p>Methods of concentration and drying</p>	<ul style="list-style-type: none"> • Methods used to concentrate foods include evaporation, filtration, reverse osmosis and freeze concentration. • Methods used to dry foods include sun drying, cabinet, spray, drum drying and freeze dehydration.
<p>Materials and equipment for concentration and drying</p>	<p>Heating and cooling systems, hygiene and sanitation equipment, drying, dehydration and systems, concentration systems and other relevant food processing equipment.</p>
<p>Materials and equipment for cooking or steaming</p>	<p>Equipment typically includes weighing and measuring equipment; sieves; blending and mixing equipment; cooking equipment or shell and tube heat exchangers/cookers (continuous processing).</p>

Unit Sector(s)

Technical.

FDFST4002A Monitor the development and implementation of a food QA system

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit covers the skills and knowledge required to develop and manage a HACCP-based Quality Assurance (QA) Program.

Application of the Unit

This unit applies to quality assurance and technical staff who have responsibility for developing and/or implementing a HACCP-based QA system in a food processing environment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish the scope of the QA system	1.1 Enterprise needs and expectations in product quality are clearly defined 1.2 Existing systems and requirements are detailed for incorporation into the QA system 1.3 Scope of the HACCP-based quality system is defined to encompass production system and product requirements 1.4 System is directed to prevent and control identified hazards
2. Conduct hazard analysis and assessment	2.1 Every step in the production process is assessed for potential food safety hazards 2.2 Critical Control Points (CCPs) are established to identify where each significant hazard can be prevented or controlled 2.3 A measurable or recognisable standard is assigned for each CCP to define the critical limits 2.4 Critical limits are technically and scientifically validated
3. Ensure all documents, work procedures and processes required for the system are developed, available and in use	3.1 All products and processes covered by the QA system are described in a standardised format defining product characteristics relevant to food safety 3.2 Work instructions and Standard Operating Procedures (SOPs) are reviewed for accuracy, relevance and sufficiency to prevent hazards 3.3 Documented procedures for monitoring CCPs are implemented 3.4 Documented procedures which ensure any CCPs which are outside critical limits are brought back within limits, and affected product is suitably handled, are implemented 3.5 Documented procedures are implemented to ensure the QA system is regularly verified and audited as working effectively 3.6 Availability and data storage of all records and documents for the system is maintained
4. Respond to non-conforming product or processes	4.1 Procedures for taking corrective action are identified 4.2 Corrective and preventative measures are implemented to prevent recurrence. 4.3 Procedures are devised or revised to support control measures 4.3 Processes or conditions which could result in a breach of procedures are identified and corrective action is taken 4.4 Process changes are introduced and controlled so that quality assurance requirements are accomplished
5. Review product sampling and test results	5.1 Product sampling procedures are identified 5.2 Post collection procedures are identified according to SOPs 5.3 Test results are reviewed and responded to in accordance with

ELEMENT	PERFORMANCE CRITERIA
	workplace requirements
6. Audit, verify and validate the system	<p>6.1 HACCP plans are routinely revised, verified and validated to reassess hazards, CCPs, critical limits, testing methods and all related procedures of the QA system to ensure they are appropriate to the enterprise requirements</p> <p>6.2 Internal or external audit findings are followed up and acted upon</p> <p>6.3 Reported quality hazards and non conformances are investigated and acted upon</p> <p>6.4 The HACCP-based QA system is reviewed to take account of any process changes or product specifications</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- define the scope of the quality system and food safety system to ensure requirements are met
- apply the HACCP principles and the process for developing a quality assurance or food safety program
- conduct monitoring of a CCP
- determine and take corrective and preventative action
- apply workplace, regulatory and customer requirements critical to the workplace's operation and success
- identify critical limits for enterprise product or processes
- identify the actual and potential risks associated with uncontrolled changes in procedures
- interpret the resulting trends of product monitoring and testing
- interpret the results and trends of process monitoring
- monitor records and documentation for accuracy and compliance
- monitor the accurate and timely recording of quality data
- outline legal obligations of the enterprise and individuals for maintenance of the Quality Assurance system
- identify and apply relevant OH&S, regulatory and workplace requirements
- identify the documentation required to support a HACCP-based QA system
- record and analyse monitoring and verification data
- validate CCPs and critical limits
- identify and describe implementation of a change in the process
- identify causes of variation and non-conformance and explain appropriate course(s) of action to rectify problems
- outline team requirements and team management processes or strategies
- prepare process and product status reports recommending changes to improve processes and procedures
- prepare reports using primary and summary data, and appropriate language
- review communication systems (spoken and written) to minimise the potential for misreporting and misunderstanding of food safety requirements, procedures and plans
- use relevant communication skills
- Utilise available technology to record, manipulate, analyse and present or report data
- apply appropriate mathematical concepts and measures
- assemble product and process inspection, test and other quality data in prescribed format.

Required knowledge includes:

Knowledge of:

- the steps in the development of a HACCP-based QA system

- the steps in the systematic introduction of a HACCP-based QA system
- enterprise recall and traceability procedures
- post collection procedures for handling samples
- purpose of the HACCP development and review process
- risks associated with samples and how they may be minimised
- the types of data the enterprise uses to record performance
- the document controls associated with a procedure change
- the purpose of calibrating equipment
- the purpose of SOPs and work instructions
- sampling procedures
- the process of auditing and verifying a HACCP-based QA system
- the objectives of a HACCP-based QA system
- the process for validating critical limits and CCPs
- the role of pre-requisite programs and Good Manufacturing Processes (GMPs) in a HACCP-based program.

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to develop and manage a HACCP-based Quality Assurance (QA) Program.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Critical aspects of evidence that the candidate can monitor the development and implementation of a food QA system must include the following:</p> <ul style="list-style-type: none"> • scoping the requirements for a QA system • analysing a production process to identify CCPs and establish critical limits • developing procedures for implementing and monitoring a QA system • maintaining data and documentation for a QA system • contributing to a review of a QA system, including verification and validation.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance requirements in this unit should be undertaken within the context of food technology. Competency is demonstrated by performance of the processes specified, including the critical aspects and knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statements applicable to the workplace environment.</p> <p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • production process and related equipment, manufacturers' advice and operating procedures • methods and related software systems as required for collecting data and calculating yields, efficiencies and material variances appropriate to production environment • tests used to report relevant product/process information and recorded results.
<p>Method of assessment</p>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • written and/or oral questioning to assess knowledge and understanding • the development of a HACCP-based quality system for a food product

	<ul style="list-style-type: none">• a report on review of a HACCP-based quality production system• workplace evidence and third party verification of participation in the development and implementation of a HACCP-based QA system• Case studies• Field Reports.
Guidance information for assessment	Evidence should be gathered over a period of time in a range of actual or simulated environments.

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Occupational health and safety requirements</p>	<ul style="list-style-type: none"> • Codes of practice • Material Safety Data Sheets • Enterprise OHS policies, procedures and programs.
<p>Regulations</p>	<ul style="list-style-type: none"> • Australian and international standards including: • Australia New Zealand Food Standards Code • ISO Standards • codex alimentarius • industry guidelines and codes of practice • industry regulations • State food regulations.
<p>Workplace requirements</p>	<ul style="list-style-type: none"> • Enterprise QA policy, practices and procedures • Enterprise-specific procedures • SOPs <p>Enterprise task requirements and work instructions.</p>
<p>Production system and product requirements</p>	<ul style="list-style-type: none"> • These may include food safety, product quality, regulatory compliance, animal welfare (if required) and preventative maintenance.
<p>Verification of a QA system</p>	<ul style="list-style-type: none"> • Verification refers to methods and procedures used to carry out monitoring, including sampling and testing to provide evidence that the specifications set by relevant legislation and codes of practice continue to be met.
<p>Validation of a QA system</p>	<ul style="list-style-type: none"> • Validation refers to obtaining evidence to confirm that a HACCP-based QA program is complete and effective and will deliver the expected outcomes.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- define the scope of the quality system and food safety system to ensure requirements are met
- apply the HACCP principles and the process for developing a quality assurance or food safety program
- conduct monitoring of a CCP
- determine and take corrective and preventative action
- apply workplace, regulatory and customer requirements critical to the workplace's operation and success
- identify critical limits for enterprise product or processes
- identify the actual and potential risks associated with uncontrolled changes in procedures
- interpret the resulting trends of product monitoring and testing
- interpret the results and trends of process monitoring
- monitor records and documentation for accuracy and compliance
- monitor the accurate and timely recording of quality data
- outline legal obligations of the enterprise and individuals for maintenance of the Quality Assurance system
- identify and apply relevant OH&S, regulatory and workplace requirements
- identify the documentation required to support a HACCP-based QA system
- record and analyse monitoring and verification data
- validate CCPs and critical limits
- identify and describe implementation of a change in the process
- identify causes of variation and non-conformance and explain appropriate course(s) of action to rectify problems
- outline team requirements and team management processes or strategies
- prepare process and product status reports recommending changes to improve processes and procedures
- prepare reports using primary and summary data, and appropriate language
- review communication systems (spoken and written) to minimise the potential for misreporting and misunderstanding of food safety requirements, procedures and plans
- use relevant communication skills
- Utilise available technology to record, manipulate, analyse and present or report data
- apply appropriate mathematical concepts and measures
- assemble product and process inspection, test and other quality data in prescribed formal.

Required knowledge includes:

Knowledge of:

- the steps in the development of a HACCP-based QA system

- the steps in the systematic introduction of a HACCP-based QA system
- enterprise recall and traceability procedures
- post collection procedures for handling samples
- purpose of the HACCP development and review process
- risks associated with samples and how they may be minimised
- the types of data the enterprise uses to record performance
- the document controls associated with a procedure change
- the purpose of calibrating equipment
- the purpose of SOPs and work instructions
- sampling procedures
- the process of auditing and verifying a HACCP-based QA system
- the objectives of a HACCP-based QA system
- the process for validating critical limits and CCPs
- the role of pre-requisite programs and Good Manufacturing Processes (GMPs) in a HACCP-based program.

Unit Sector(s)

Technical.

FDFST4004A Perform microbiological procedures in the food industry

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit provides an introduction to food microbiology. It covers the skills and knowledge required to perform on-site microbiological laboratory techniques and to interpret the results.

Application of the Unit

This unit applies to laboratory and senior technical staff, and production managers, who are required to monitor the microbiology of food and food processing operations. This unit does not require the performance of microbiological procedures in a NATA certified facility. However it does require the ability to perform on site tests required in a food processing enterprise, to interpret the results of testing as part of monitoring production processes, and to identify the need for certified laboratory testing.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for safe microbiological work using aseptic techniques	1.1 Work area and equipment are selected for the safe handling of materials that may contain micro-organisms 1.2 Protective apparel is worn 1.3 Relevant emergency equipment is selected, for timely response to microbiological accidents 1.4 Correct disinfection procedures are applied to work areas before, and after use 1.5 Standard precautions, when handling biological materials, are applied 1.6 Relevant emergency equipment is selected, for timely response to microbiological accidents 1.7 Correct disinfection procedures are applied to work areas before, and after use
2. Process microbiological samples and undertake microscopy	2.1 Thin smears of samples for subsequent staining are prepared and stained 2.2 Liquid films of specimens, for direct observation, are prepared 2.3 Relevant samples are concentrated to facilitate microscopy 2.4 Stereo and compound microscopes are set up correctly, and causes of variations in image quality are identified 2.5 Microscopes are cleaned and stored according to procedures 2.6 Dry, wet and stained microbiological specimens are correctly examined
3. Apply aseptic techniques correctly to cultivate and isolate micro-organisms	3.1 Broths, slopes, and plates of typical media are prepared 3.2 Aseptic transfers of micro-organisms to prepared liquid and solid media are performed 3.3 Bacteria are streaked onto agar plates to isolate single colonies using aseptic technique 3.4 Temperature conditions and gaseous environments are selected which are suitable for the growth of a range of common micro-organisms
4. Estimate the number of micro-organisms in food and water samples	4.1 Samples are prepared for testing 4.2 Serial dilutions are accurately and aseptically carried out 4.3 Bacterial growth in the sample is estimated and recorded 4.4 The bacterial load of the sample is calculated and the results reported
5. Perform and interpret tests to assist in the identification of common bacterial	5.1 Tests are performed on pure cultures to assist in the identification of major bacterial groups 5.2 Pure cultures selected from common bacterial genera are

ELEMENT	PERFORMANCE CRITERIA
genera	<p>prepared</p> <p>5.3 Stained specimens are selected and prepared to demonstrate features and cellular characteristics of major bacterial groups</p>
6. Apply quality assurance procedures commonly used in a food testing laboratory	<p>6.1 The controls used to monitor accuracy and precision of results in a microbiological laboratory are applied</p> <p>6.2 All tests are performed in accordance with enterprise quality procedures</p> <p>6.3 All test data is recorded and reported in accordance with enterprise quality procedures</p>
7. Interpret the results of laboratory testing and relate to the production plan	<p>7.1 Laboratory test results are accessed</p> <p>7.2 Laboratory tests are compared to allowable variances and critical limits in production</p> <p>7.3 Adjustments are made to recipes or operating procedures to ensure critical limits are complied with</p> <p>7.4 The need for further certified testing is established</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- identify types of animal, plant and microbial cells and their components and functions
- safely perform tasks for the isolation, identification and cultivation of microorganisms
- set up and use microscope slides and a microscope
- avoid contamination of self, other people, the work area, equipment or the samples under test
- avoid contamination of media or reagents during manipulations involving transfer of cultures
- identify artefact or image aberration attributable to misalignment or obstruction of light paths or condensers used in bright field, dark ground, or with other steps in microscopic examinations
- recognise the use of the Gram reaction in the identification of common types of bacteria
- accurately describe forms of bacterial colonies on common media used in bacteriological investigations in the food industry
- correctly and safely perform tests to assist in the identification of bacteria
- identify and correctly use methods for the control of growth of micro-organisms
- report all incidents or accidents
- disinfect any spillage and safely dispose of all contaminated materials
- decontaminate the work area upon completion of work
- ensure that quality assurance procedures, commonly used in a food testing laboratories, are used.

Required knowledge includes:

Knowledge of:

- physiological characteristics of animal, plant and microbial cells
- microbiological terminology
- use of protective clothing and biological safety cabinets
- disinfection and sterilisation as applied to practical aspects of microbiology
- microbial diversity and growth
- micro-organisms of significance in the production and spoilage of foods
- chemical and physical methods available for controlling microbial growth
- methods for sterilisation or control of a given micro-organism
- the Gram reaction in the identification of common types of bacteria
- advantages and disadvantages of the identified methods are established
- rationale for sample dilution when preparing materials for enumerating organisms and other pure culture work
- relevant health, safety and environment requirements.
- chemical and physical methods available for controlling microbial growth

- quality assurance procedures commonly used in a food testing laboratories.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to perform microbiological laboratory techniques that are relevant to food processing, with the use of appropriate equipment.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Critical aspects of assessment must include evidence of the ability to perform on site tests required in a food processing enterprise, to interpret the results of testing as part of monitoring production processes, and to identify the need for certified laboratory testing.
Context of and specific resources for assessment	<p>Assessment of performance requirements in this unit should be undertaken within the context of food technology. Competency is demonstrated by performance of all stated criteria, including the critical aspects and knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statements applicable to the workplace environment.</p> <p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • suitable laboratory equipment and a sufficient range of samples to allow microbiological procedures to be demonstrated • procedures and templates used to report relevant product/process information and recorded results.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of candidate conducting a range of tests and procedures • written and/or oral questioning to assess knowledge of microbiology related to food processing • report including interpreting test results and making recommendations for production • completing workplace documentation • third party reports from experienced practitioner • field reports.
Guidance information for assessment	Evidence should be gathered over a period of time in a

EVIDENCE GUIDE	
	range of actual or simulated environments.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	<ul style="list-style-type: none"> • Codes of practice, regulations, Material Safety Data Sheets (MSDSs) • AS/NZS 2243.3 - Safety in laboratories, Part 3: Microbiology • Enterprise specific: Standard Operating Procedures(SOPs): <ul style="list-style-type: none"> • safety requirements for equipment, materials or products • cleaning, hygiene, personal hygiene requirements • incident and accident/injury reports • Australian and international standards, including: Food Standards Code 2002 Australia New Zealand and amendments: <ul style="list-style-type: none"> • AS 2830 Good laboratory practice • AS/NZS 2243 Safety in Laboratories • AS/766 Food microbiology • Enterprise Standard Operating Procedures(SOPs) • Acts of Parliament
Occupational health and safety requirements	<ul style="list-style-type: none"> • Codes of practice • Material Safety Data Sheet • Enterprise specific.
Regulations	<ul style="list-style-type: none"> • Australian and international standards including: <ul style="list-style-type: none"> • professional association regulations • industry guidelines and codes of practice • industry regulations • Food Standards Code • ISO Standards

RANGE STATEMENT	
	<ul style="list-style-type: none">• codex alimentarius• Federal and state food regulations• International, Australian and State EPA protocols and regulations regarding waste.

Unit Sector(s)

Technical.

FDFST4005A Document processes and procedures for a food product

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit covers the skills and knowledge required to document the operational steps and procedures in producing a processed food product.

Application of the Unit

This unit applies to quality assurance and technical staff who are required to document processes and procedures for a food product, and who have responsibility for monitoring and maintaining product safety and quality and the production environment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify the stages and operations required in the processing of a food product	1.1 Inputs, production processes and outputs are identified 1.2 Each step in processing is examined and impacts, feedback and process adjustment in the production system is assessed 1.3 Hazards to food safety and product quality at each stage of production are identified
2. Identify the facilities, equipment, workflow and process controls for a processed food product	2.1 Functions of the major production stages are classified and analysed 2.2 Equipment used to perform each operation stage is identified 2.3 The facilities, workflow and layout of the workplaces, or technical work area, together with their core activities and links with other parts of the organisation are identified 2.4 Process controls are documented for a processed food product 2.5 The workforce structure and the roles and responsibilities of workplace personnel are established for a given food product 2.6 Information management processes are investigated for a food processing operation
3. Produce flow diagrams for nominated unit operations	3.1 Correct nomenclature and symbols are used to show processes, inputs and outputs 3.2 The completed flow diagram is reviewed and suggestions for improvements for product quality and operational efficiency are documented 3.3 Energy and resource usage, and environmental impacts, of production processes are quantified 3.4 Procedures for testing for yields and/or variances are identified at each stage 3.5 Areas for process improvement are identified for further analysis

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- identify major stages and operations, including: material transfer, separation, size reduction, combination, heat exchange, biochemical transformation, shaping and extrusion
- analyse the functions of the major operations, including purpose and application of each operation
- identify the range of equipment used to perform each major unit operation
- establish the function of each piece of equipment used to perform major operations
- review the resultant products of the major production operations on food, in accordance with quality control processes and procedures
- ascertain the affects of physical conditions e.g. temperature, pressure on the function of these unit operations
- prepare a process flow chart for each unit operations
- identify the process controls in place and how they ensure required production rate and consistent quality.

Required knowledge includes:

Knowledge of:

- the basic theory behind each major operation e.g. material transfer, separation, size reduction, combining, heat exchange, biochemical transformation and shaping
- selection criteria regarding the equipment used to perform each major operation
- the basic operating principles for the equipment used to perform each major operation
- process flow charts and process control.

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to document processes in a production system as part of system monitoring and continuous improvement.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Critical aspects of assessment must include evidence of the ability to document procedures for a food product, including identifying unit operations and representing a food processing operation in a diagrammatic form. Documented procedures must be able to be interpreted to review mechanisms for calculating variances and outputs that are outside of specification, and to identify areas for further refining and development under continuous improvement for a food product.</p>
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance requirements in this unit should be undertaken within the context of food technology. Competency is demonstrated by performance of all stated criteria, including the critical aspects and knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statements applicable to the workplace environment.</p> <p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • production process and related equipment, manufacturers’ advice and operating procedures • methods and related software systems as required for collecting data and calculating yields, efficiencies and material variances appropriate to production environment • tests used to report relevant product/process information and recorded results.
<p>Method of assessment</p>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • written and/or oral questioning to assess knowledge and understanding • completing workplace documentation • third party reports from experienced practitioner • case studies

	<ul style="list-style-type: none"> • field reports.
Guidance information for assessment	Evidence should be gathered over a period of time in a range of actual or simulated environments.

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Occupational health and safety requirements</p>	<ul style="list-style-type: none"> • Codes of practice, regulations, Material Safety Data Sheets (MSDSs) • Enterprise specific requirements • Relevant State/Territory/Commonwealth Occupational Health and Safety acts, regulations, national standards, codes of practice and guidance notes which may apply in jurisdiction • Examples of specific task related procedures may include: <ul style="list-style-type: none"> • handling of chemicals • use of personal protective equipment (PPEs).
<p>Regulations</p>	<ul style="list-style-type: none"> • Australian New Zealand Food Standards Code • AQIS • Local Authority standards • Symbols for process flow charts may be based on ISO 9000 Documentation, Quality Manual and 32 Operational Procedures (AQA ISO 9000 Series) • Acts of Parliament, regulations and statutes.
<p>Materials, equipment and systems</p>	<ul style="list-style-type: none"> • Heating and cooling equipment, size reduction systems, materials transfer equipment, heat exchangers, forming and shaping equipment • Major operations may include: material transfer, separation, size reduction, combining, heat exchange, biochemical transformation, shaping and extrusion operations. • Each operations may include preventative maintenance procedures.

Unit Sector(s)

Technical.

FDFST4006A Apply food preservation technologies

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit covers the skills and knowledge required to apply food preservation technologies and to review their effectiveness and efficiency based on an understanding of food science and technology.

Application of the Unit

This unit applies to quality assurance and technical staff who must oversight the preservation of food. It covers low and high temperature preservation as well as the evaluation of alternative preservation methods such as irradiation and high pressure processing.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Apply high temperature preservation methods for food	1.1 The need for heat treatment of foods is established 1.2 Preparatory procedures for heat treatment processes are implemented 1.3 Heat treatment processes are applied and monitored 1.4 The physical, biochemical and microbiological changes to a food product after heat treatment are assessed
2. Apply low temperature preservation methods for food	2.1 The need for chilling or freezing treatments of foods is established 2.2 Preparatory procedures for chilling or freezing treatment processes are implemented 2.3 Chilling or freezing processes for food preservation are applied and monitored 2.4 The physical, biochemical and microbiological changes to a food product after chilling or freezing treatment processes is assessed
3. Evaluate alternative existing technologies for food preservation	3.1 Effectiveness and consumer acceptance of irradiation is reviewed 3.2 The effect of irradiation on food products is evaluated 3.3 The application of a high pressure preservation process is reviewed 3.4 The effect of high pressure preservation on food products is evaluated 3.5 A process chart for the implementation of alternative food preservation processes is developed

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

Heat treatment processes

- identify the different techniques used in industry to apply heat on food as a preservation method
- identify the most suitable heat application techniques for specific food products
- evaluate physical changes caused by high temperature on food
- assess the relationship between high temperature and deactivation and destruction of micro-organisms
- identify the enzymatic and other chemical changes caused by high temperature
- identify quality defects that arise as a result of heat application of food
- enter processing/operating parameters to heat treatment equipment as required to meet safety and production requirements
- operate, check and adjust heat treatment equipment performance as required

Low temperature processes

- differentiate between chilling and freezing of foods
- identify the effects of slow and quick freezing on the quality and properties of food
- identify the different techniques used in industry to chill and freeze food stuffs
- identify the most appropriate chilling and freezing techniques for specific food products
- review the efficiency, cost effectiveness and environmental impact of refrigerants used in chillers and freezers
- identify critical quality defects associated with long-term chilling and freezing of foods
- enter processing/operating parameters to chilling or freezing treatment equipment as required to meet safety and production requirements
- operate, check and adjust low temperature treatment equipment performance as required

Irradiation processes

- identify foods suitable for irradiation
- analyse surveys and other feedback indicating consumer acceptance of irradiation
- identify the most suitable irradiation techniques for specific food products
- evaluate physical changes caused by irradiation of food
- assess the extent of destruction of micro-organisms
- identify any enzymatic and other chemical changes caused by irradiation
- identify quality defects that arise as a result of irradiation of food
- identify processing/operating parameters of irradiation equipment as required to meet safety and production requirements
- operate, check and adjust irradiation equipment performance as required
- identify labelling and other regulatory requirements of irradiation of food

High pressure processes

- identify foods suitable for high pressure processing
- identify the most suitable high pressure techniques for specific food products
- evaluate physical changes caused by high pressure processing of food
- assess the extent of destruction of micro-organisms
- identify any enzymatic and other chemical changes caused by high pressure processing
- identify the potential for quality defects that arise as a result of high pressure processing of food
- identify processing/operating parameters of high pressure processing equipment as required to meet safety and production requirements
- operate, check and adjust high pressure equipment performance as required.

Required knowledge includes:

Knowledge of:

Heat treatment processes

- the difference between blanching, steaming, canning and other methods of heat application to food
- the effects of application of heat on qualities and properties of food stuffs
- biochemical, microbiological and physical changes to food as a result of heat application
- critical quality defects which can occur as a result of heat treatment
- how operating conditions, such as temperature fluctuations or water /steam contacts with food affects the nutritional/chemical composition of food
- how product parameters, such as type, size, shape and chemical and biological composition affect the effectiveness of heat treatment on food
- the calculation and interpretation of F_0 , Lethality and F_h values

Low temperature processes

- the different techniques adopted in industry for freezing food products
- appropriate freezing techniques, including freeze drying, for specific food products
- industrial refrigerants currently used today to maintain low temperatures in chillers and freezers
- the efficiency, cost and environmental impact of such refrigerants
- biochemical, microbiological and physical changes to food as a result of slow or quick freezing
- critical quality defects which can occur as a result of long term and freezing, of foods
- how operating conditions, such as temperature fluctuations, humidity and air velocity, affect the effective chilling and freezing and refrigeration of food
- how product parameters, such as type, size, shape and chemical and biological composition affect the effective chilling and freezing of foods
- the appropriate freezing techniques for the major types of foods that can be frozen without loss of quality: fruits, vegetables, seafood, meats, baked goods and ready to eat food (eg. pizzas)
- refrigerants used in past eg. CFCs & HCFCs, and the ones currently used including HCFC –

123 and various blends

- why certain refrigerants are a problem for the environment eg. depletion of the ozone layer and 'Greenhouse' effect

Irradiation equipment

- types of foods suitable for irradiation
- consumer acceptance and issues with irradiation
- the most suitable irradiation techniques for specific food products
- physical changes caused by irradiation of food
- impact of irradiation on different species of micro-organisms
- enzymatic and other chemical changes caused by irradiation
- potential quality defects that arise as a result of irradiation of food
- processing/operating parameters of irradiation equipment as required to meet safety and production requirements
- irradiation equipment safety and operating
- labelling and other regulatory requirements of irradiation of food

High pressure equipment

- types of foods suitable for high pressure processing
- the most suitable high pressure techniques for specific food products
- possible physical changes caused by high pressure processing of food
- the impact of high pressure preservation technology on different species of micro-organisms
- enzymatic and other chemical changes caused by high pressure processing
- potential quality defects that arise as a result of high pressure processing of food
- operating procedures of high pressure processing equipment as required to meet safety and production requirements
- labelling and other regulatory requirements of high pressure preservation of food.

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to undertake and review processes for high or low temperature preservation techniques used in food processing.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Critical aspects of assessment must include evidence of the ability to apply food preservation technologies including applying low or high temperature preservation techniques, and documenting physical, biochemical and biological changes to treated food products.</p>
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance requirements in this unit should be undertaken within the context of food technology. Competency is demonstrated by performance of all stated criteria, including the critical aspects and knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statements applicable to the workplace environment.</p> <p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • Food preservation equipment, manufacturers' advice and operating procedures • Methods and related software systems as required for carrying out food testing and preservation and collecting data • Tests used to report relevant product/process information and recorded results.
<p>Method of assessment</p>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • Written and/or oral questioning to assess knowledge and understanding • Completing workplace documentation • Third party reports from experienced practitioner • Case studies and practical activities • Field Reports.
<p>Guidance information for assessment</p>	<p>Evidence should be gathered over a period of time in a range of actual or simulated environments.</p>

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Occupational health and safety requirements</p>	<ul style="list-style-type: none"> • Codes of practice, regulations, MSDSs • Enterprise specific • Relevant state/territory/commonwealth Occupational Health and Safety acts, regulations, national standards, codes of practice and guidance notes which may apply in jurisdiction • Examples of specific task related procedures may include: <ul style="list-style-type: none"> • Handling of chemicals • Use of PPEs.
<p>Regulations</p>	<ul style="list-style-type: none"> • Australia New Zealand Food Standards Code • Enterprise specific procedures • Industry regulations • State food regulations • Australian and international standards including: <ul style="list-style-type: none"> • professional association regulations • industry guidelines • codes of practice • ISO standards • codex alimentarius • relevant Acts of Parliament • EPA protocols and regulations regarding refrigerants.
<p>High temperature preservation methods</p>	<ul style="list-style-type: none"> • hot fill • aseptic processing • pasteurisation • ultra-high temperature (UHT) • high temperature short time (HTST) processing.
<p>Heating systems</p>	<ul style="list-style-type: none"> • retort, steam jackets • blanching vessels and pressure cookers • microwave and ohmic and inductive heating equipment • pasteurisation and sterilisation equipment.
<p>Materials, equipment and systems</p>	<ul style="list-style-type: none"> • refrigeration systems for chilling of food stuffs • freezing systems

for low temperature treatment	<ul style="list-style-type: none">• freeze drying systems for heat sensitive products• temperature measuring and recording devices.
--------------------------------------	--

Unit Sector(s)

Technical.

FDFST4007A Establish operational requirements for a food processing enterprise

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit covers the skills and knowledge required to review and report on operational requirements and issues in a food processing enterprise.

Application of the Unit

This unit applies to food technologists, quality and food safety supervisors, technical specialists, and to middle management personnel who are new to the industry. It includes gaining an understanding of the economic and political structure of the industry, production stages and methods and the key factors affecting food safety and quality, and reporting procedures. The person who undertakes this unit must be aware of the intent and detail of legislation and be able to review compliance procedures.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify key issues and organisations that impact the Australian food processing industry	1.1 The range of job roles and responsibilities for a food processing operation are described 1.2 The environmental impacts of a food processing operation are determined 1.3 Impacts of customer expectations for product integrity, quality, safety and nutritional value on food processing operations are explained 1.4 The roles of key regulatory and industry bodies for a food processing sector are described
2. Identify the sequence of operations for processing a range of products in a sector	2.1 Procedures for the assembling and preparation of ingredients are implemented 2.2 The storage and handling requirements of ingredients for a food product are defined 2.3 A flow chart for the processing operations for a food product is constructed 2.4 Specifications for a food product are described and the methods used to ensure critical limits are complied with
3. Explain factors affecting food safety and product quality during processing	3.1 Key food safety issues in food processing are described 3.2 Food safety procedures are implemented and reviewed 3.3 Hygiene procedures for a food processing operation are applied 3.4 Factors affecting shelf life and spoilage in food products are explained 3.5 The nature and purpose of a product testing program is defined
4. Write and/or review standard operating procedures to comply with legislation relating to product and processing	4.1 Relevant legislation and regulations that apply to food production, packaging and labelling are identified 4.2 The purpose and scope of relevant legislation is defined 4.3 The roles and responsibilities of authorities responsible for administering legislation are identified 4.4 Operational and product requirements to comply with legislation are defined 4.5 A standard operating procedure is documented based on an organisation's templates and systems
5. Define organisational requirements to comply with legislation relating to food premises, equipment design and storage facilities	5.1 Legislation and regulations that apply to food premises, storage facilities and equipment are reviewed 5.2 The purpose and intent of relevant legislation is identified 5.3 The roles and responsibilities of authorities responsible for administering legislation are identified 5.4 Procedures to support compliance with legal requirements are established and/or reviewed

ELEMENT	PERFORMANCE CRITERIA
6. Provide written reports and presentations on food processing issues	6.1 Areas of noncompliance or with potential for process improvement are identified 6.2 Information is collected and problem solving strategies are used to review procedures 6.3 Data, discussion and recommendations are presented in a formatted report 6.4 Presentations which incorporate technical data and information are delivered

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- describe industry organisations and their role
- define job roles and responsibilities for the food processing industry
- define the ingredients, operations and product specifications for a food processing operation
- define the inputs and outputs of a food processing operation, including the use of non renewable resources and impacts on air, soil, water and atmospheric CO₂ levels
- identify the legal responsibilities of a food processing company. This includes responsibilities relating to:
 - product content (Food Standards Code)
 - product packaging and labelling, including use of nutritional information panels (Food Standards Code)
 - design requirements of food premises and equipment
 - requirements of storage facilities used for materials, ingredients and final product
 - other requirements as appropriate to the product and/or market (e.g. import and/or export legislation)
- identify and/or develop specifications and procedures to ensure that legal responsibilities related to product content and packaging are achieved
- inspect plant design to identify potential hazards that could be introduced as a result of equipment design and configuration. For example, overhead pipes or equipment where dust could collect and fall into food. Where hazards are identified, apply the hierarchy of control to identify opportunities to remove or control the risk
- identify storage facilities across a production site. Identify the dangerous goods stored on site and confirm that storage of these goods (type and quantity) meets legal requirements
- confirm that employees required to handle chemicals and dangerous goods are advised of the associated risks, that this information is available in a form appropriate to the audience and that Material Safety Data Sheets are available
- develop and/or review recording systems to confirm compliance with legislative requirements and ensure that employees responsible for recording information are informed of these responsibilities
- establish internal review/audit procedures to confirm that legislative responsibilities are met
- within each area of legislation applying to the activities of a food processing facility, identify the relevant authority responsible for administering the legislation. Identify the rights and responsibilities of related officers to access the production site
- present technical information in a written format and as a presentation.

Required knowledge includes:

Knowledge of:

- industry organisations and representative bodies in food processing

- the environmental impacts of a food processing operation
- customer expectations and community perceptions of the food processing industry
- emerging technologies in food processing
- food testing methods
- procedures for QA and food safety
- legal responsibilities of a food processing company relating to product content and packaging
- the purpose and intent of relevant legislation
- potential hazards that could be introduced as a result of equipment design and configuration
- associated risks in handling chemicals and dangerous goods
- recording requirements to comply with legislative requirements
- recording procedures
- report templates and protocols
- oral and written communication strategies and protocols
- relevant authorities responsible for administering legislation and their roles

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competency in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Candidates must be able to demonstrate the ability to establish and/or review procedures to support compliance and report on process improvement issues. Assessment must also include evidence of an understanding of: the role of industry organisations and job roles within the industry; systems, roles and procedures in place for food safety and QA; and legal requirements for the packing, production and labelling operations of a food production enterprise.</p>
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • workplace processes and procedures • workplace documentation including specifications and procedures • relevant legislation • communication systems • workplace information recording systems, requirements and procedures.
<p>Method of assessment</p>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • written and/or oral questioning to assess knowledge and understanding • completing workplace documentation • third party reports for the implementation of enterprise requirements for product safety and quality • case studies • field reports.
<p>Guidance information for assessment</p>	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Legislation</p>	<p>Legislation to be covered by this unit includes:</p> <ul style="list-style-type: none"> • Acts of Parliament, regulations and statutes • Australian New Zealand Food Standards Code • Food Safety legislation (including provisions covering the design of food premises and equipment) • Local Authority regulations • Customs and excise legislation (for alcohol-based ingredients/materials) • AQIS requirements • Dangerous goods legislation • Import and export legislation • Additional legislation as appropriate to product, process and market.
<p>Industry and regulatory organisations</p>	<p>These may include industry funded marketing co-operatives, research and development organisations (RDOs), certification bodies, federal and state regulatory agencies for OHS, environment and food safety, the Australian Quarantine Inspection Service, export and third party auditors, and organisations sponsoring QA schemes.</p>
<p>Occupational health and safety requirements</p>	<ul style="list-style-type: none"> • Codes of practice, regulations, Material Safety Data Sheets (MSDSs) • Enterprise specific requirements • Relevant State/Territory/Commonwealth Occupational Health and Safety acts, regulations, national standards, codes of practice and guidance notes which may apply in jurisdiction • Examples of specific task related procedures may include: <ul style="list-style-type: none"> • handling of chemicals • use of personal protective equipment (PPEs).
<p>Materials, equipment and systems</p>	<ul style="list-style-type: none"> • Heating and cooling equipment, size reduction systems, materials transfer equipment, heat exchangers, forming and shaping equipment • Major operations may include: material transfer, separation, size reduction, combining, heat exchange,

	<p>biochemical transformation, shaping and extrusion operations</p> <ul style="list-style-type: none">• Operations includes all food processing and preventative maintenance.

Unit Sector(s)

Technical.

FDFST4008A Preserve food in cans or sealed containers

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit covers the skills and knowledge required to process low acid foods and preserve food in hermitically sealed containers or hermetically sealed packaging.

Application of the Unit

This unit applies to quality assurance and other technical staff who have responsibility for maintaining product safety, quality and the production environment in processing and sealing food into airtight containers. The unit applies to two and three piece cans used in food and beverage production and other sealed containers.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Oversight the preparation of the packaging materials for thermal processing	1.1 Suitable containers for canning are identified 1.2 Container's properties, function, and integrity is assessed 1.3 The parts of a can and end (top) are identified 1.4 A can closing machine (seamer) is set up and trial operation undertaken 1.5 The characteristics of the seamed cans are measured and calculated
2. Oversight food preparation and filling of cans	2.1 The quality requirements of raw materials for processing are identified 2.2 The correct procedures for dicing and slicing are performed 2.3 The blanching process is correctly implemented using either steam, water, microwaves or hot gas 2.4 The correct filling procedures for syrups and brines are applied to produce the specified head space 2.5 Cans are weighed with headspaces, drained and net weights recorded 2.6 Exhausting is carried out to remove all gases from the headspace and oxygen from the can 2.7 Closing of the can is monitored
3. Ensure hermetic sealing of processed food product	3.1 The quality requirements of raw materials for processing are accessed and applied 3.2 Raw materials are cooked and prepared in an aseptic environment 3.3 Materials are placed into containers and hermetically sealed
4. Eliminate harmful micro-organisms in the hermetic sealing or canning of low acid foods	4.1 Micro-organisms relevant to the canning of low acid foods are identified 4.2 The D Value of micro-organisms is interpreted 4.3 The types of microbial spoilage important in food canning are assessed 4.4 The process for eliminating the risk of microbial spoilage in a food product is documented
5. Assess the impact of acidification in relation to hermetic sealing or canning of low acid foods	5.1 The acidity of a range of foods is measured 5.2 The relationship between acidity and growth of micro-organisms is identified 5.3 Critical Control Points (CCPs) are established for acidified foods
6. Monitor retort operation	6.1 Containers are loaded onto baskets 6.2 The retort is sealed

ELEMENT	PERFORMANCE CRITERIA
	6.3 Air trapped inside the retort is removed prior to processing
	6.4 Pressure is built up in the retort and sterilisation temperature is maintained
	6.5 The can is cooled using chlorinated water
7. Review a canning operation	7.1 Critical Control Points (CCPs) for a canning operation are reviewed
	7.2 Data is reviewed to ensure adherence within critical limits for each CCP
	7.3 Operating procedures are reviewed to ensure a quality and safe canned product

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- define commercial sterility
- identify who can establish a thermal process
- identify the components in establishing a thermal process
- establish heat treatment procedures
- assess the factors affecting heat treatment
- identify the role of chlorination in canning low acid foods
- acidify food as part of processing
- establish and assess the requirements for canning low acid food
- establish and assess the requirements for canning high acid foods
- set up and operate a retort to specification for a scheduled process
- calculate the lethality value for a product
- calculate the Fo Value from available data by using the:
 - graphical integration method
 - Gillespie method
- calculate the Sterilising Value of process by using the:
 - trapezoidal method
 - micro-organism population method
- calculate the Fh value for different container sizes
- calculate the time it would take to reach a given temperature at the slowest heating point in a can
- identify factors that impact the thermal process
- construct confidence intervals for mean and standard deviation
- compute 't-test'
- read and interpret 't-table'
- determine significance of results using 't-test'
- calculate X^2
- test X^2 significance at 95 and 99 percent
- recognise a process deviation.

Required knowledge includes:

Knowledge of:

- types of thermal processing systems
- the principles and purposes for blanching
- the function and use of each system
- the parts of a retort/cooker

- relevant legislation and regulations that apply to the canning process of low acid foods
- roles and responsibilities of authorities responsible for administering legislation
- the chemical properties and application of chlorine in canning
- principles of thermal processing, including use of a retort
- aseptic techniques for packaging food under aseptic conditions
- characteristics of two piece and three piece (seamed) cans
- dicing, slicing, blanching and brining processes
- the types micro-organisms relevant to the canning of low acid foods, including their basic structure and growth patterns
- d value of micro-organisms
- low acid foods, acidification and their relationship to the growth of organisms
- critical control points
- chemical properties of chlorine, and how it effects micro-organisms
- methodology for the measurement of Chlorine in cooling water
- D,Z,J, Fo and Fh Values
- Thermal Death Rate, Lethality Value and Sterilisation Value
- Confidence intervals and tests of significance
- Approximation
- Principles of variability
- Principles of variance.

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to preserve food products in hermetically sealed containers, and review a commercial canning operation based on test data and documented procedures.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Critical aspects of assessment must include evidence of the following:</p> <ul style="list-style-type: none"> • overlooking the food preparation for food canning or other hermetically sealed packaging • supervising the set up and operation of hermetically sealed packaging or canning equipment including the production of trial canning • establishing the CCPs and critical limits for a canning process or other hermetically sealed packaging • calculating pressures, temperatures and cooking times to eliminate the risk of microbial spoilage for a canning or hermetic sealing operation.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance requirements in this unit should be undertaken within the context of food technology. Competency is demonstrated by performance of all stated criteria, including the critical aspects and knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statements applicable to the workplace environment.</p> <ul style="list-style-type: none"> • Assessment must occur in a real or simulated workplace where the assessee has access to: • production process and related equipment, manufacturers' advice and operating procedures • equipment and facilities for carrying out canning processes and testing of canned products.
<p>Method of assessment</p>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • written and/or oral questioning to assess knowledge and understanding • observation of candidate conducting a range of canning or hermetic sealing operations • a report on review of a canning or hermetic sealing operation.

Guidance information for assessment	Evidence should be gathered over a period of time in a range of actual or simulated environments.
-------------------------------------	---

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Occupational health and safety requirements	<ul style="list-style-type: none"> • Codes of practice • Material Safety Data Sheet • Enterprise specific.
Regulations	<ul style="list-style-type: none"> • Australian and international standards including: <ul style="list-style-type: none"> • professional association regulations • industry guidelines and codes of practice • industry regulations • Food Standards Code • ISO Standards • codex alimentarius • State food regulations
Cans	Cans may be two or three piece and steel or aluminium. Closures may be ring pull or require an opener.
Sealed containers	Sealed containers are vacuum-sealed and may include cryovac, bottling or any other airtight container for food products.
Types of canning equipment	Canning may be carried out using still and agitating retorts that may operate as a batch or continuous process. Continuous agitating types include hydrostatic retorts.
Exhausting systems for retort	These may include heat exhaust, steam injection or mechanical exhaust
Food irradiation methods	Methods to deliver ionising radiation to disrupt RNA including radurization, radicidation and radappertization.
Alternative food preservation methods	These may include the range of chemical preservatives, modified atmosphere packaging, lactic fermentation, sugar or ethanol preservation, emulsification, pressure inactivation, water activity through dehydration or

	adding solutes, and pulsed electric field processing.
--	---

Unit Sector(s)

Technical.

FDFST4009A Label foods according to legislative requirements

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit covers the skills and knowledge required to label foods according to legislation.

Application of the Unit

This unit applies to quality assurance and technical staff who have responsibility for maintaining the product safety, quality and legislative requirements for labelling.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify specific criteria required for a food label	1.1 Components of food labels are identified 1.2 The relationship between food label and consumer information is identified 1.3 Ingredients in a food product are accurately described 1.4 Date marking is completed and linked to information on batch number and date of processing 1.5 Directions for use and storage information is provided 1.6 Country of origin information is completed to comply with requirements for food source and place of processing 1.7 Additional general information requirements are published 1.8 Commodity specific labelling requirements are sourced and complied with
2. Document information from the food processing operation required on the product label	2.1 Exemptions for nutrition information panel are identified 2.2 Information on energy, protein, fat, saturated fat, carbohydrate, sugars and sodium content is provided 2.3 The number of servings, the average quantity of food in a serving and the unit quantity of the food is provided 2.4 Declaration of weights and measures is made 2.5 Legislative requirements for specifying allergens and irradiated foods, percentage labelling and mandatory warning and advisory statements and declarations (including GM ingredients) are included on the label
3. Produce a label for a specified food product	3.1 Label data and format is collated 3.2 Software packages are used to produce a nutritional panel for a food label 3.3 Food labels are assessed to determine compliance and modified if necessary 3.4 The operation of labelling equipment is monitored

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- identify legislation specific to food labelling
- collate data for use on product labels
- specify ingredients in required units of measurement
- classify food additives
- assess nutrition claims for compliance with the Food Standards Code
- assess the product label for compliance with the Food Standards Code.

Required knowledge includes:

Knowledge of:

- Acts, regulations and standards relating to food labelling
- legal and enterprise requirements of a food label
- data to be accessed to populate a product label
- legal implications of incorrect food labelling
- the relationship between the consumer and information required on a label.

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>A person who demonstrates competency in this unit must be able to produce a legally compliant food product label that provides clear information to consumers.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Critical aspects of assessment must include evidence of the ability to supervise labelling procedures for a food product including compiling nutritional information for a product, establishing elements required for a food label and developing a compliant food label.</p>
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance requirements in this unit should be undertaken within the context of food technology. Competency is demonstrated by performance of all stated criteria, including the critical aspects and knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statements applicable to the workplace environment.</p> <p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • Production process and related equipment, manufacturers’ advice and operating procedures • Methods and related software systems as required for collecting data and calculating yields, efficiencies and material variances appropriate to production environment • Tests used to report relevant product/process information and recorded results.
<p>Method of assessment</p>	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • written and/or oral questioning to assess knowledge and understanding • observation of candidate conducting a range of processes and tests • a report on review of the production system.
<p>Guidance information for assessment</p>	<p>Evidence should be gathered over a period of time in a range of actual or simulated environments.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Occupational health and safety requirements	<ul style="list-style-type: none"> • Codes of practice • Material Safety Data Sheet.
Regulations	<p>Australian and international standards including:</p> <ul style="list-style-type: none"> • professional association regulations • industry guidelines and codes of practice • industry regulations • Australian and New Zealand Food Standards Code • ISO Standards • Codex Alimentarius • Australian Competition and Consumer Commission requirements for truth in labelling (including product naming and country of origin) • State food legislation and regulatory requirements • Australian Government Trade Measurement Laws based on the Average Quantity System.

Unit Sector(s)

Technical.

FDFST4010A Apply sensory analysis in food processing

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

This unit covers the skills and knowledge required to identify sensory evaluation techniques and to use appropriate terminology when describing the organoleptic properties of food.

Application of the Unit

This unit applies to quality managers, production supervisors and testing staff working for food and beverage processing companies.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify the organoleptic properties of food	<ul style="list-style-type: none">1.1 The five basic tastes (sweet, salty, bitter, sour and umami) are recognised1.2 The textual properties of food are identified1.3 Aromas and flavours are identified1.4 The effect of colour on the visual properties of food is recognised
2. Confirm the procedures to be used in the sensory evaluation of a food product	<ul style="list-style-type: none">2.1 The purpose and procedures for various sensory evaluation tests are outlined2.2 The methodology of the sensory evaluation tests are reviewed2.3 The factors influencing sensory evaluation tests are identified
3. Coordinate a taste panel	<ul style="list-style-type: none">3.1 Panellists are instructed on the procedure3.2 Samples are prepared according to sensory testing protocols3.3 Appropriate recording documentation is devised or accessed for the sensory evaluation test3.4 Taste panel is organized and run to appropriate standards.3.5 Results of the taste panel are recorded for analysis

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- identify the organoleptic properties of food
- outline the various sensory evaluation tests used in the food processing industry
- select an appropriate sensory evaluation test method for a given product
- prepare samples for sensory testing
- record results in required format
- review results for evidence of discrepancies or bias
- communicate with and supervise panellists.

Required knowledge includes:

Knowledge of:

- organoleptic properties of food
- sensory evaluation of foods
- interactions and associated characteristics of sensory abilities
- quality requirements for conducting a taste panel
- descriptive, discriminative and affective sensory methods
- organisational quality procedures for sensory testing.

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>
