<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will</p>

	<p>be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time
--	--

	<ul style="list-style-type: none"> • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Waste	<p>Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product.</p> <p>Within operations, categories of waste include:</p> <ul style="list-style-type: none"> • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items • activities which do not yield any benefit to the organisation or any benefit to the organisations customers
Necessary waste	<p>Necessary waste is:</p> <ul style="list-style-type: none"> • any activity or cost which does not contribute directly to customer benefit/feature in the product, and which cannot be avoided (e.g. regulatory compliance and fixed costs). Necessary waste cannot be eliminated but should be managed
Unnecessary waste	<p>Unnecessary waste is:</p> <ul style="list-style-type: none"> • any activity or cost which does not contribute directly to customer benefit/features in the product and can be avoided. Unnecessary waste should be eliminated as quickly as practical
Energy	<p>Energy includes:</p> <ul style="list-style-type: none"> • all sources of energy used by the process be it electricity, gas or mobile transport fuel

	<p>The uses of the energy will also be potentially wide and include:</p> <ul style="list-style-type: none"> • heating and cooling • moving materials (e.g. pumps and conveyors) • modifying materials (e.g. cutting, forming, weaving, knitting, reacting, moulding, extruding and mixing) • generating pressure/vacuum or providing motive power for equipment and transport
<p>Energy trading</p>	<p>Energy trading means both formal trading where the organisation investigates alternatives to:</p> <ul style="list-style-type: none"> • the buying of energy through alternative suppliers and tender processes • selling of excess energy produced by the organisation to energy companies or other producers <p>and</p> <ul style="list-style-type: none"> • internal trading of excess energy from one area to an energy consuming area elsewhere in the organisation

MSS405075A Facilitate the development of a new product

Modification History

New unit, superseding MSACMT675A Facilitate the development of a new product* - Equivalent

* New prerequisite *MSS404052A Apply statistics to operational processes* superseding MSACMT452A Apply statistics to processes in manufacturing

Unit Descriptor

This unit of competency covers the skills and knowledge required to facilitate the development of a new or evolutionary product within an existing range of products and encompasses design for manufacture, determining the process capability and the facilitation of its initial production.

Application of the Unit

This competency applies to an individual responsible for the development of a new product. The unit assumes an initial product design has been prepared by a designer and also assumes a working knowledge of all main processes and materials so that an informed choice can be made between them. The person will normally be a manager or technical expert and be required to work closely with a range of other management and operations personnel. The unit requires balancing the business and technical sides of the new product and would typically be done as part of a cross-functional team. This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Teamwork, problem solving, initiative and enterprise, and planning and organising are required to facilitate the development of a new product. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Confirm design brief of new product in consultation with relevant people	1.1	Review product design with customer and other key stakeholders and agree on technical specification, aesthetic requirements, timelines, cost and other market requirements
		1.2	Determine any regulatory, industry code/intellectual property requirements for product
		1.3	Identify any required tooling, process or equipment needs
		1.4	Confirm design brief, including relevant drawings, to meet needs
		1.5	Determine design brief conforms to organisation objectives and capability
		1.6	Obtain approval on total design brief from all relevant personnel

- | | | | |
|---|--|-----|---|
| 2 | Determine material requirements for product | 2.1 | Select appropriate materials or combination of materials/components in liaison with key stakeholders |
| | | 2.2 | Determine material/component testing and evaluation regime required to meet product end use requirements, including regulatory/industry code requirements |
| | | 2.3 | Arrange for testing and evaluation of trial materials/components |
| | | 2.4 | Guide material trial process and interpret material trial results |
| | | 2.5 | Determine final materials/components specifications and details of value chain |
| 3 | Determine process requirements for product | 3.1 | Select appropriate process to make product in liaison with key stakeholders and based on relevant factors |
| | | 3.2 | Determine any special process/equipment requirements for this product |
| | | 3.3 | Communicate with production personnel to determine any concerns and/or training or other needs |
| | | 3.4 | Adjust the design, as required, to satisfy customer and production needs |
| 4 | Ensure process needs for new product have been met | 4.1 | Liaise with equipment design/procurement personnel |
| | | 4.2 | Interpret hardware specifications and ensure they are appropriate for the job required |
| | | 4.3 | Liaise with process personnel to ensure appropriate draft procedures for new product have been developed |
| | | 4.4 | Validate product cost and design meets organisation requirements and capability |
| 5 | Trial new product through the process | 5.1 | Design trialing procedure to deliver required information |
| | | 5.2 | Liaise with relevant stakeholders |
| | | 5.3 | Ensure health safety and environment (HSE) |

- requirements are observed
- 5.4 Coordinate the trialling of the new product
 - 5.5 Interpret product trial results and guide product trial process
 - 5.6 Tune process to optimise production of new product
- 6 Determine process capability
- 6.1 Plot appropriate statistical process control charts
 - 6.2 Determine confidence limits
 - 6.3 Compare confidence limits with product specification
- 7 Coordinate product trials
- 7.1 Determine product testing and evaluation regime required to meet end use requirements, including regulatory/industry code requirements
 - 7.2 Arrange for testing and evaluation of trial product/prototype
 - 7.3 Interpret product trial results and guide product trial process
 - 7.4 Determine final product specification in liaison with key stakeholders
 - 7.5 Make required changes to materials, process and equipment
- 8 Implement standard procedures for new product
- 8.1 Monitor initial production and, in liaison with appropriate team members, adjust process, conditions and materials to ensure the product and process outcomes conform to customer, regulatory and organisation requirements
 - 8.2 Ensure process specifications are updated and reflect the optimised operation developed
 - 8.3 Ensure standard operating procedures are correct for the new product
 - 8.4 Ensure equipment and other hardware records are updated to reflect additions/changes

- 8.5 Ensure project records are complete and all required reports have been completed and submitted
- 8.6 Archive records according to company procedure

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- selecting and justifying the selection of:
 - type of material/material specification
 - appropriate process for a range of product/market applications
 - material and product testing procedures
- applying theoretical principles to predict:
 - properties of product based on materials selected
- identifying effects of processes and processing on the final properties of the product mathematically determine:
 - product cost estimates
 - process time
 - cost/benefit to organisation of new product
- communicating at all levels in the organisation and value stream and to audiences of different levels of literacy and numeracy
- interpreting and making recommendations based on:
 - field test results
 - market analysis data
 - trialling data
 - organisation objectives and business plan
 - equipment and operations capacity

Required knowledge

Required knowledge includes:

- materials, equipment and process sufficient to choose an appropriate combination of materials and process to achieve the end use function of the product
- enterprise procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards

Evidence Guide

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>Organisation objectives and requirements</p>	<p>Organisation objectives and requirements may include:</p> <ul style="list-style-type: none"> • Board or management guidelines on:

	<ul style="list-style-type: none"> • cost/profit requirements for new products (e.g. minimum return and capital expenditure limits) • encouragement/discouragement of different types of products (e.g. on sustainability, ethical or other non-individual customer related criteria) • potential or actual capacity conflicts with other customers or product/process activities • activities that require/may require community consultation (e.g. on noise or other environmental grounds)
Tools and equipment	<p>Tools and equipment may include:</p> <ul style="list-style-type: none"> • understanding of use of all standard processing equipment • relevant personal protective equipment
Typical regulatory requirements	<p>Typical regulatory requirements may include:</p> <ul style="list-style-type: none"> • occupational health and safety (OHS) • environmental regulations • structural codes • product/industry specific requirements
Typical problems	<p>Typical problems may include:</p> <ul style="list-style-type: none"> • defining product end-use requirements in terms meaningful to the product design and manufacture • matching suitable materials and processes to the product needs and company expertise and facilities • matching (and improving) process capability to product tolerances
Relevant factors	<p>Relevant factors may include:</p> <ul style="list-style-type: none"> • type of material • dimensional precision of product • length of run/number of products • required aesthetics • size and complexity of product • available capital funding • process equipment available • HSE factors

MSS405081A Develop a proactive maintenance strategy

Modification History

New unit, superseding MSACMT681A Develop a proactive maintenance strategy - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to develop and implement a proactive maintenance strategy for an organisation. The unit recognises that there are a number of predictive or proactive maintenance strategies, such as total productive maintenance (TPM) and reliability centred maintenance (RCM).

Application of the Unit

This unit applies to an individual responsible for developing a proactive maintenance strategy for an organisation. Typically the organisation will also be implementing other competitive systems and practices. The unit applies to the selection of appropriate strategies, initial development and implementation as well as application of the strategies to new areas and the improvement of operation in existing areas. This would typically be done in a team environment and in consultation with all key stakeholders.

This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Teamwork, problem solving, initiative and enterprise, and planning and organising are required to develop and implement a predictive maintenance strategy. Strategies will incorporate the maintenance requirements of relevant technologies. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into maintenance strategies.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Determine appropriate analytical techniques	1.1	Liaise with key stakeholders to determine objectives of maintenance strategy
		1.2	Examine current maintenance situation to determine major areas requiring improvement
		1.3	Compare possible strategies, techniques and tools against organisation needs
		1.4	Select possible strategies, techniques and tools
		1.5	Confirm selected strategies, techniques and tools with key stakeholders
2	Develop reliability strategies	2.1	Select preferred maintenance strategy
		2.2	Examine and adapt strategy to organisation needs and priorities
		2.3	Examine and adapt techniques and tools required to implement strategy
		2.4	Liaise with key stakeholders to develop an implementation plan
		2.5	Identify key information and performance indicators required
3	Implement strategy	3.1	Identify data collection required
		3.2	Identify hardware and other resources required
		3.3	Identify skill needs required in consultation with key

- stakeholders
- 3.4 Ensure all resources/training are available
- 3.5 Implement strategy
- 4 Monitor implementation of strategy
 - 4.1 Compare information/performance indicators with desired levels
 - 4.2 Liaise with key stakeholders regarding strategy issues
 - 4.3 Identify areas requiring adjustment
 - 4.4 Make required adjustments

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others using a variety of media and techniques
- adapting personal communication strategy to different levels of literacy and numeracy in target individuals and groups
- working in a team
- analysing quantitative and qualitative information to determine proactive maintenance strategy options
- solving problems to root cause
- applying basic arithmetic and statistical techniques
- planning complex strategies, including consideration of timelines, resources, benefit/cost, implementation requirements, and monitoring and adjustment considerations
- reading and interpreting engineering specifications, drawings and charts
- using information system terminals and computers
- prioritising options, including reasons and recommendations
- recording data

Required knowledge

Required knowledge includes:

- characteristics and strengths of different types of strategies, techniques and tools, such as:
 - TPM
 - RCM
 - mean time between failure (MTBF)
 - failure mode effects analysis (FMEA)
 - condition monitoring
 - root cause analysis (RCA)
- holistic costs of different strategies combining cost of maintenance with costs of lost production, sales, and so on, as relevant to the organisation
- business goals sufficient to match the strategy to the business needs
- strategic thinking and its application to proactive maintenance
- principles of process equipment and how to improve its reliability
- resources required and how to obtain them

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • consider a variety of proactive maintenance strategies for suitability to an organisation • consult operators, maintenance, management and other stakeholders in decisions on proactive maintenance strategies • implement selected strategies • monitor performance to selected indicators and make improvements to selected proactive maintenance strategies.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p> <p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning for appropriate portions

	<ul style="list-style-type: none"> • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen)
--	--

	<ul style="list-style-type: none"> • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
OEE	<p>OEE is the combination of the main factors causing loss of productive capacity from equipment/plant and is:</p> $OEE = availability \times performance \times quality\ rate$ <p>where:</p> <ul style="list-style-type: none"> • availability takes into account losses due to breakdown, set-up and adjustments • performance takes into account losses due to minor stoppages, reduced speed and idling • quality rate takes into account losses due to rejects, reworks and start-up waste
MTBF	<p>MTBF is one key measure of the effectiveness of a maintenance procedure, and is an indicator as to whether root causes are being found and resolved. If MTBF is reducing, then it is an indicator that the maintenance regime is failing.</p> <p>There are many possible causes of any problem. Eliminating some will have no impact, others will ameliorate the problem. However, elimination of the root cause will eliminate the problem. There should only be one root cause for any problem and so the analysis should continue until this one cause is found. Elimination of the root cause permanently eliminates the problem.</p> <p>Depending on the equipment, operations and procedures of the organisation, alternative statistical records of maintenance and maintenance-related events may be substituted for MTBF providing they relate strategies for</p>

	improving OEE.
FMEA	<p>FMEA is a systematic approach that identifies potential failure modes in a system, product, or operations/assembly operation caused by either design or operations/assembly process deficiencies. It also identifies critical or significant design or process characteristics that require special controls to prevent or detect failure modes. FMEA is a tool used to prevent problems from occurring.</p> <p>Some industry sectors have highly adapted forms of FMEA and may practice traditional FMEA in say their routine maintenance while using another technique, such as Hazard and Operability Studies (HAZOP) for design and modification.</p> <p>HAZOP is a form of FMEA which has been practiced by the process industries for over 30 years and examines the implications of changes in process conditions to process stability.</p>
Condition monitoring	<p>Condition monitoring is used to describe the process of analysing the implications of condition monitoring data for proactive maintenance whether it be obtained from non destructive testing (NDT) reports, visual assessment by experts, diagnostic reports obtained from SCADA or other enterprise or equipment software and product or process quality analyses. It does not require the actual undertaking of the NDT or condition monitoring assessment or test. If this is required appropriate units from other Training Packages will be required.</p>

MSS405082A Adapt a proactive maintenance strategy to the process operations sector

Modification History

New unit, superseding MSACMT682A Adapt a proactive maintenance strategy to the process manufacturing sector* - Equivalent

* New prerequisite *MSS405081A Develop a proactive maintenance strategy* superseding MSACMT681A Develop a proactive maintenance strategy

Unit Descriptor

This unit of competency covers the skills and knowledge required to develop and apply a proactive maintenance strategy for continuous manufacturing processes which may also be major hazard facilities or similar.

Application of the Unit

This unit applies to an individual in a continuous manufacturing sector, such as chemical, hydrocarbons and refining, smelting and cement, which is seeking to improve the efficiency and reliability of equipment. Typically such an organisation will also be engaged in implementing competitive systems and practices. As continuous manufacturers, such as the chemical, hydrocarbons and refining sectors, are often also major hazard facilities this will influence the proactive maintenance choices which need to be made.

The unit covers the selection of appropriate strategies, techniques and tools and the adapting of them to the organisations needs. It also covers the application of the strategies to new areas and the improvement of operation in existing areas. This would typically be done in a team environment and in consultation with all key stakeholders.

This unit requires the application of skills associated with problem solving, initiative, enterprise, planning and organising in order to adapt a proactive maintenance strategy to meet specific needs of the enterprise. This work is done in the context of using computer technology and also requires aspects of self-management and learning to ensure improvement of own performance.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Interpret proactive maintenance strategy	1.1	Analyse proactive maintenance strategy
		1.2	Identify areas which may conflict with hazard or operations requirements
		1.3	Analyse data arising from incident reports (and similar) for maintenance implications
		1.4	Compile hazard control implications for proactive maintenance strategy
2	Interpret hazard information	2.1	Analyse Hazard and Operability Studies (HAZOP) (or similar) data for maintenance implications
		2.2	Analyse safety case (or similar) data for maintenance implications
		2.3	Analyse data arising from incident reports (and similar) for maintenance implications
		2.4	Compile hazard control implications for proactive maintenance strategy

- | | | | |
|---|--|-----|--|
| 3 | Identify shutdown cycle requirements | 3.1 | Determine when the next shutdown is due and the expected time between shutdowns |
| | | 3.2 | Identify plant items/maintenance activities which can only be completed during a shutdown |
| | | 3.3 | Identify critical conditions which must not be breached in order to maintain plant reliability until shutdown |
| | | 3.4 | Compile shutdown cycle requirements for proactive maintenance strategy |
| | | | |
| 4 | Identify maintenance requirements of ancillary equipment | 4.1 | Identify proactive maintenance requirements of ancillary equipment |
| | | 4.2 | Identify maintenance which can only be done when the plant is shut down |
| | | 4.3 | Compile ancillary equipment requirements for proactive maintenance strategy |
| | | | |
| 5 | Adapt proactive maintenance strategy | 5.1 | Compare identified requirements to the proactive maintenance strategy |
| | | 5.2 | Negotiate a proactive maintenance strategy which meets these requirements |
| | | 5.3 | Involve team members in relating identified problems and opportunities for improvement to the maintenance strategy, and involve them in developing any required changes to ensure awareness, learning and commitment |
| | | 5.4 | Monitor the implementation of the strategy to ensure the identified requirements are met |
| | | 5.5 | Make required adjustments and arrange for strategy review |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others using a variety of media and techniques
- adapting personal communication strategy to different levels of literacy and numeracy in target individuals and groups
- working in a team
- analysing quantitative and qualitative information to determine proactive maintenance strategy options
- applying a structured approach to integrating hazard management considerations to the development of a proactive maintenance strategy
- solving problems to root cause
- applying basic mathematical and statistical techniques
- planning complex strategies, including consideration of timelines, resources, benefit/cost, implementation requirements, and monitoring and adjustment considerations
- reading and interpreting engineering specifications, drawings and charts
- using information system terminals and computers
- prioritising options, including reasons and recommendations
- recording data

Required knowledge

Required knowledge includes:

- continuous manufacturing equipment and products of the organisation
- start-up, shutdown and isolation considerations for the organisation
- skills required by operators and maintenance personnel to achieve effective proactive maintenance strategy implementation
- characteristics and strengths of different types of strategies, techniques and tools, such as:
 - total preventative maintenance/total productive maintenance (TPM)
 - reliability centred maintenance (RCM)
 - mean time between failure (MTBF)
 - failure mode and effects analysis (FMEA)
 - condition monitoring
 - root cause analysis (RCA)
- holistic costs of different strategies combining cost of maintenance with costs of lost

- production, sales, and so on, as relevant to the organisation
- business goals sufficient to match the strategy to the business needs
 - strategic thinking and its application to proactive maintenance
 - principles of process equipment and how to improve its reliability
 - resources required and how to obtain them

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

MSS405083A Adapt a proactive maintenance strategy for a seasonal or cyclical business

Modification History

New unit, superseding MSACMT683A Adapt a proactive maintenance strategy for a seasonal or cyclical manufacturing operation* - Equivalent

* New prerequisite *MSS405081A Develop a proactive maintenance strategy* superseding MSACMT681A Develop a proactive maintenance strategy

Unit Descriptor

This unit of competency covers the skills and knowledge required to develop a standard proactive maintenance strategy for a seasonal or cyclical operational processes or similar.

Application of the Unit

This unit applies to an individual responsible for developing a proactive maintenance strategy for an organisation that operates seasonal/cyclical plant and also adopts proactive maintenance strategies. The organisation will also usually be implementing other competitive systems and practices. Typical applications include many food processing enterprises, cotton ginning, sugar refineries, and so on. The unit covers changing the normal priority of some of the choices which need to be made in implementing a proactive maintenance strategy. The unit applies to the selection of appropriate strategies, initial development and implementation will need to be managed as well as application of the strategies to new areas and the improvement of operation in existing areas.

This would typically be done in a team environment and in consultation with all key stakeholders.

This unit requires the application of skills associated with problem solving, initiative, enterprise, planning and organising in order to adapt a proactive maintenance strategy to meet seasonal or cyclical needs of the enterprise. This work is done in the context of using computer technology and also requires aspects of self-management and learning to ensure improvement of own performance.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

MSS405081A Develop a proactive maintenance strategy

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Interpret proactive maintenance strategy	1.1	Analyse proactive maintenance strategy
		1.2	Identify areas which may conflict with cyclical requirements
		1.3	Identify critical conditions which must be met in order to maintain plant reliability until season end
		1.4	Compile cycle requirements for proactive maintenance strategy
2	Identify cyclical requirements of the process	2.1	Establish when the season finishes and the expected cycle duration
		2.2	Identify plant items and maintenance activities which production imperatives dictate can only be completed after season end
		2.3	Identify critical conditions which must be met in order to maintain plant reliability until season end
		2.4	Compile cycle requirements for proactive maintenance strategy

- | | | | |
|---|--|-----|--|
| 3 | Identify maintenance requirements of ancillary equipment | 3.1 | Identify proactive maintenance requirements of ancillary equipment |
| | | 3.2 | Identify maintenance which can only be done at season end |
| | | 3.3 | Compile ancillary equipment requirements for proactive maintenance strategy |
| 4 | Identify maintenance requirements during season | 4.1 | Identify critical maintenance activities which must be done during season |
| | | 4.2 | Negotiate conflicts with seasonal or cyclical processing requirements |
| | | 4.3 | Compile proactive maintenance strategy requirements during season |
| 5 | Adapt proactive maintenance strategy | 5.1 | Compare identified requirements to the proactive maintenance strategy |
| | | 5.2 | Negotiate a proactive maintenance strategy which meets these requirements |
| | | 5.3 | Involve team members in relating identified problems and opportunities for improvement to the maintenance strategy, and involve them in developing any required changes to ensure awareness, learning and commitment |
| | | 5.4 | Monitor the implementation of the strategy to ensure the identified requirements are met |
| | | 5.5 | Make required adjustments and arrange review schedule |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- considering the impact of seasonal and cyclical production requirements on equipment availability requirements
- prioritising maintenance activities critical to production
- communicating with others using a variety of media and techniques
- adapting personal communication strategy to different levels of literacy and numeracy in target individuals and groups
- working in a team
- analysing quantitative and qualitative information to determine proactive maintenance strategy options
- solving problems to root cause
- applying basic arithmetic and statistical techniques
- planning complex strategies, including consideration of timelines, resources, benefit/cost, implementation requirements, and monitoring and adjustment considerations
- reading and interpreting engineering specifications, drawings and charts
- using information system terminals and computers
- prioritising options, including reasons and recommendations
- recording data

Required knowledge

Required knowledge includes:

- processing equipment and products of the organisation
- start-up, shutdown and isolation considerations for the organisation
- skills required by operators and maintenance personnel to achieve effective proactive maintenance strategy implementation
- characteristics and strengths of different types of strategies, techniques and tools, such as:
 - total productive maintenance (TPM)
 - reliability centred maintenance (RCM)
 - mean time between failure (MTBF)
 - failure mode effects analysis (FMEA)
 - condition monitoring
 - root cause analysis (RCA)

- holistic costs of different strategies combining cost of maintenance with costs of lost production, sales, and so on, as relevant to the organisation
- business goals sufficient to match the strategy to the business needs
- strategic thinking and its application to proactive maintenance
- principles of process equipment and how to improve its reliability
- resources required and how to obtain them

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"> • analyse the equipment availability requirements of a seasonal or cyclical operation • consider a variety of proactive maintenance strategies for suitability to a seasonal or cyclical operation • consult operators, maintenance, management and other stakeholders in decisions on proactive maintenance strategies • monitor the implementation of selected proactive maintenance strategies and make required adjustments.
<p>Context of and specific resources for assessment</p>	<p>Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.</p> <p>Access may be required to:</p> <ul style="list-style-type: none"> • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
<p>Method of assessment</p>	<p>A holistic approach should be taken to the assessment.</p>

	<p>Competence in this unit may be assessed by using a combination of the following to generate evidence:</p> <ul style="list-style-type: none"> • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. <p>In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p>
<p>Guidance information for assessment</p>	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive systems and practices</p>	<p>Competitive systems and practices may include, but are not limited to:</p> <ul style="list-style-type: none"> • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems
---	--

	<ul style="list-style-type: none"> • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree <p>Competitive systems and practices should be interpreted so as to take into account:</p> <ul style="list-style-type: none"> • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
<p>Critical conditions</p>	<p>Critical conditions are those factors which must be undertaken or determined in order to maintain plant reliability during processing season. These may include:</p> <ul style="list-style-type: none"> • maximum load factors • lubrication schedules • correct operating temperatures • cleaning and waste removal schedules • equipment inspection and test schedules • development of standard operating procedures and training of operators
<p>Ancillary equipment</p>	<p>Ancillary equipment includes other plant, such as:</p> <ul style="list-style-type: none"> • boilers • utilities • plants • waste treatment and hazard control equipment (e.g. fire ring mains, fire monitors, steam curtains, gas (or other loss of containment) monitors, blast protection and flare stacks)

TPM	<p>TPM refers to:</p> <ul style="list-style-type: none"> • an application of total quality management to maintenance with the intention of increasing reliability, getting it right first time and increasing OEE
RCM	<p>RCM includes:</p> <ul style="list-style-type: none"> • moving maintenance from reactive, or even planned/programmed towards a focus on uptime and OEE
RCA	<p>RCA is a structured problem solving technique. Typically there are many possible causes of any problem. Eliminating some will have no impact, others will ameliorate the problem. However, elimination of the root cause will eliminate the problem. There should only be one root cause for any problem and so the analysis should continue until this one cause is found. Elimination of the root cause permanently eliminates the problem.</p>
MBTF	<p>MBTF is one key measure of the effectiveness of a maintenance procedure, and is an indicator as to whether root causes are being found and resolved. If MBTF is reducing, then it is an indicator that the maintenance regime is failing.</p>
FMEA	<p>FMEA is a systematic approach that identifies potential failure modes in a system, product, or operations/assembly operation caused by either design or operations/assembly process deficiencies. It also identifies critical or significant design or process characteristics that require special controls to prevent or detect failure modes. FMEA is a tool used to prevent problems from occurring. Some industry sectors have highly adapted forms of FMEA and may practice traditional FMEA in say their routine maintenance while using another technique, such as Hazard and Operability Studies (HAZOP) for design and modification.</p>
Uptime	<p>Uptime refers to:</p> <ul style="list-style-type: none"> • the overall availability of the plant (it is the inverse of downtime) or the unavailability of the plant. Ideal uptime is 100%
OEE	<p>OEE is the combination of the main factors causing loss of productive capacity from equipment/plant and is where:</p>

	<p><i>OEE = availability x performance x quality rate</i></p> <ul style="list-style-type: none"> • availability takes into account losses due to breakdown, set-up and adjustments • performance takes into account losses due to minor stoppages, reduced speed and idling • quality rate takes into account t losses due to rejects, reworks and start-up waste
Condition monitoring	<p>Condition monitoring involves often quite sophisticated monitoring of equipment, including such things as:</p> <ul style="list-style-type: none"> • vibration monitoring • instrumental analysis of lubricating oil, and so on, to determine the current state of the equipment, monitor the change in this condition and predict when it needs servicing/maintenance to maintain reliability
HAZOP	<p>HAZOP is a form of FMEA which has been practiced by the process industries for over 30 years and examines the implications of changes in process conditions to process stability.</p>

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
1. Clean own work area and equipment during operations	1.1. Worksite is hygienically cleaned during operations to <i>Occupational Health and Safety (OH&S), workplace and regulatory requirements</i> . 1.2. Equipment and surfaces are hygienically cleaned to regulatory and workplace requirements. 1.3. Cleanliness of work area is monitored according to workplace requirements.
2. Identify <i>sources of contamination</i> and spoilage	2.1. Contamination and cross-contamination risks are identified and <i>steps taken to reduce the risk</i> . 2.2. <i>Corrective action</i> is taken when contamination is identified in accordance with workplace and regulatory requirements.
3. Follow workplace <i>hygiene and sanitation requirements</i>	3.1. Personal hygiene practices are followed to workplace requirements. 3.2. Product is handled in accordance with workplace, and hygiene and sanitation requirements. 3.3. Individual's work is conducted hygienically in accordance with workplace requirements. 3.4. Products are processed in accordance with regulatory requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- consistently follow workplace, hygiene and sanitation procedures
- work effectively as an individual and as part of a team to keep work areas clean
- demonstrate basic hygiene and sanitation practices in all activities undertaken in the workplace
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use *communication* skills relevant to the task
- use and mix cleaning chemicals (if used) according to manufacturer specifications, regulatory and workplace requirements

REQUIRED SKILLS AND KNOWLEDGE**Required knowledge**

Knowledge of:

- hygiene and sanitation requirements for own area
- reporting procedures for contamination, as appropriate
- chemical contamination risks to product and how they are controlled
- consequences of contaminated or spoiled meat leaving the establishment
- consequences of failing to follow workplace requirements for hygienic handling and processing of meat
- time, temperature and moisture requirements for microbial growth
- causes of food spoilage and poisoning
- possible sources of contamination and cross-contamination in the worksite
- visual evidence of contamination
- microbes which may affect meat
- the scope and coverage of AS 4696:2007 Hygienic production and transportation of meat and meat products for human consumption
- sources of physical and microbiological contamination in meat establishments and how these hazards are controlled
- monitoring methods (e.g. visual, looks clean, smells clean and use of protein sticks)

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time during the normal operations of a meat establishment.

Context of and specific resources for assessment

Assessment must include a demonstration of on-the-job competency while performing a task in the workplace.

Method of assessment

Recommended methods of assessment are:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific procedures • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • Federal, state and territory regulations

RANGE STATEMENT	
	<p>regarding meat processing</p> <ul style="list-style-type: none"> • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • requirements set out in AS 4464:2007 Australian Standard for Hygienic Production of Wild Game Meat for Human Consumption.
<i>Sources of contamination</i> may include:	<ul style="list-style-type: none"> • chemical agents (e.g. insecticides and cleaning agents) • foreign bodies • microbiological and biological agents • physical agents (e.g. ingesta, excreta, dust and grease).
<i>Steps taken to reduce the risk</i> may include:	<ul style="list-style-type: none"> • good housekeeping practices • hand washing • maintaining clean clothes and PPE.
<i>Corrective action</i> may include:	<ul style="list-style-type: none"> • disposing of contaminated product • trimming product.
<i>Hygiene and sanitation requirements</i> may include:	<ul style="list-style-type: none"> • relevant government regulations • workplace requirements.
<i>Communication</i> may:	<ul style="list-style-type: none"> • be spoken, written, non-verbal and include signs and signals • be with people from a range of cultural, social and ethnic backgrounds or with colleagues, superiors, customers, clients and external parties.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret statutory and workplace requirements relating to hygiene and sanitation	<p>1.1. <i>Hygiene and sanitation, regulatory and workplace requirements</i> are explained to other workers to assist their workplace performance.</p> <p>1.2. Employer and employee rights, responsibilities and obligations are implemented in achieving hygiene and sanitation compliance.</p>
2. Monitor hygiene and sanitation performance	<p>2.1. Hygiene and sanitation are monitored to workplace and statutory requirements to verify compliance.</p> <p>2.2. Situations requiring action to improve hygiene and sanitation compliance are reported as part of the continuous improvement process.</p> <p>2.3. Results of process and product monitoring are evaluated for their impact on hygiene and sanitation.</p>
3. Respond to hygiene and sanitation problems	<p>3.1. Hygiene and sanitation issues are investigated according to established processes and procedures to achieve resolution of the problem under examination.</p> <p>3.2. Recommended action arising from the investigation is followed up and reported to ensure reinforcement and <i>documentation</i> of the outcomes.</p>
4. Evaluate results of microbiological testing	<p>4.1. Results of microbiological testing are analysed in terms of regulatory and workplace requirements.</p> <p>4.2. Corrective action is taken in response to microbiological results when required by workplace and regulatory requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> define the problem to be investigated demonstrate understanding and application of HACCP systems identify and apply <i>Occupational Health&Safety (OH&S) requirements</i> plan approach to the investigation

REQUIRED SKILLS AND KNOWLEDGE

- evaluate the problem
- explain and monitor workplace hygiene and sanitation policies, practices and procedures
- **report** outcomes of the investigation
- follow up post-investigation issues
- identify action required to strengthen hygiene and sanitation compliance
- implement the monitoring procedures
- report monitoring outcomes
- use techniques for individual and team resolution of the problem
- use relevant **communication skills**

Required knowledge

Knowledge of:

- purpose of hygiene and sanitation monitoring
- regulatory and commercial implications of inadequate control of hygiene and sanitation
- company processes and procedures to conduct a hygiene and sanitation investigation
- employer and employee rights, responsibilities and obligations regarding hygiene and sanitation
- statutory requirements related to the site at which the person is employed

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor carcass product	1.1. Samples are selected for assessment according to the approved <i>sampling plan</i> . 1.2. Assessment is conducted utilising appropriate facilities, lighting and time. 1.3. Products are monitored for defects according to the agreed criteria and classification. 1.4. Carcasses are scanned using the approved scanning lines. 1.5. Defects are recorded accurately using the correct forms or electronic system. 1.6. Immediate corrective action is implemented according to the MHA program's requirements. 1.7. Carcasses are monitored according to <i>workplace requirements</i> for hygiene and sanitation, and Occupational Health and Safety (OH&S).
2. Monitor offal (where applicable to a plant's operations)	2.1. Samples are selected for assessment according to the approved sampling plan. 2.2. Assessment is conducted utilising appropriate facilities, lighting and time. 2.3. Offal is monitored for defects according to the agreed criteria and classification. 2.4. Defects are recorded accurately using the correct forms or electronic system. 2.5. Levels for triggering corrective actions are identified. 2.6. Immediate corrective action is implemented according to the MHA program's requirements. 2.7. Offal is monitored according to the workplace requirements for hygiene and sanitation, and OH&S.
3. Assess carton meat (where applicable to a plant's operations)	3.1. Samples are selected for assessment according to the approved sampling plan. 3.2. Assessment is conducted utilising appropriate facilities, lighting and time. 3.3. Carton meat is monitored for defects according to the agreed criteria and classification. 3.4. Defects are recorded accurately using the correct forms or electronic system. 3.5. Levels for triggering corrective actions are identified. 3.6. Immediate corrective action is implemented

ELEMENT	PERFORMANCE CRITERIA
	<p>according to the MHA program's requirements.</p> <p>3.7. Carton meat is monitored according to the workplace requirements for hygiene and sanitation, and OH&S.</p>
4. Monitor process	<p>4.1. Process is monitored according to the enterprise monitoring plan.</p> <p>4.2. Results are recorded accurately on the appropriate process monitoring sheets.</p> <p>4.3. Process is rated according to the <i>established criteria</i>.</p> <p>4.4. Immediate corrective action is implemented according to the MHA program's requirements.</p> <p>4.5. A conformity index is calculated and recorded after each process monitoring exercise.</p> <p>4.6. Process is monitored according to the workplace requirements for hygiene and sanitation, and OH&S.</p> <p>4.7. Results of process monitoring are tracked over time and reconciled with product monitoring outcomes.</p>
5. Analyse data gathered	<p>5.1. Product and process monitoring results are <i>plotted on simple trend charts</i>.</p> <p>5.2. Product and process monitoring results are <i>plotted on control charts</i>.</p> <p>5.3. Trends are interpreted and remedial or corrective actions are taken where necessary.</p>
6. Implement MHA program	6.1. Work instructions for monitoring activities are prepared and implemented.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<p>Ability to:</p> <ul style="list-style-type: none"> • monitor product for defects according to the MHA program • identify and resolve data inconsistencies • monitor the process for conformity with the plant's HACCP-based QA system in accordance with the MHA program

REQUIRED SKILLS AND KNOWLEDGE

- observe hygiene and sanitation requirements when monitoring product and process
- graph and interpret trends in product and process monitoring results
- instigate corrective and preventative actions when appropriate
- apply relevant *communication* and *mathematical skills*
- comply with *OH&S requirements* when monitoring product and process
- maintain currency of knowledge and techniques through informal learning, regular professional development or personal research
- work efficiently as an individual and as a team member
- identify and apply relevant OH&S and *regulatory requirements*
- provide relevant information to work colleagues to facilitate understanding of, and compliance with, the applicable standards and regulations
- record the monitoring results accurately
- take action to improve own work practice as a result of self-evaluation, feedback from others, or changed work practices, regulations or technology

Required knowledge

Knowledge of:

- purpose of an MHA program
- classification of defects
- when and how corrective actions are to be taken in response to monitoring outcomes
- types and purpose of control charts
- purpose of trend charts
- what a trend is and why it is important when monitoring process and product
- how process compliance monitoring is to be undertaken
- how the approved sample plan is implemented for product monitoring
- purpose of the process conformity index
- types of defects to be identified in carcass, offal and carton product

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be undertaken against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated when implementing a real MHA program.

Context of and specific resources for assessment

Assessment must occur in an operating abattoir or boning room.

Method of assessment

Recommended methods of assessment include:

- assignment
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and

EVIDENCE GUIDE	
	literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Sampling plan</i> will include:	<ul style="list-style-type: none"> • frequency • sample size
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements • QA requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>Established criteria</i> for rating the process include:	<ul style="list-style-type: none"> • acceptable • marginal • unacceptable.
<i>Plotting on simple trend charts</i> must include showing specified zones as:	<ul style="list-style-type: none"> • acceptable • marginal • unacceptable.
<i>Plotting on control charts</i> must show:	<ul style="list-style-type: none"> • specified acceptable, marginal and unacceptable zones • upper and lower critical limits.
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • communicating with people from a range of cultural, social and ethnic backgrounds • reading and interpreting workplace

RANGE STATEMENT	
	<p>documentation</p> <ul style="list-style-type: none"> • speaking clearly and directly • listening and understanding • the preparation of documentation for a specified audience • the use of negotiation and persuasion skills, and being appropriately assertive • the sharing of information.
<i>Mathematical skills</i> may include:	<ul style="list-style-type: none"> • identifying acceptable limits, tolerances, out-of-specification performance, trends • calculation • estimation • measurements and interpretation that relate to time, temperature, moisture humidity, ratios, percentages, weight/mass/volume.
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • Export Control Act • Export Meat Orders (EMOs) • hygiene and sanitation requirements • relevant regulations and Australian Standards • requirements in the AS 4969:2007 Australian Standard for the Hygienic Production and

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Apply knowledge of muscle structure and biochemistry to meat quality and the factors that affect it	1.1. Biological mechanisms (both pre and post slaughter) that affect meat quality in beef are explained. 1.2. Pattern of tissue development in the body and the pattern of deposition within the muscle and fat depots within the body are identified including the composition of fat in depots and the extent it can be manipulated by production factors. 1.3. Structure of skeletal muscles in terms of the myofibre and connective tissue components and the effect that these structures have on eating quality is identified. 1.4. Biochemical events that occur in muscle early post-mortem and their significance in subsequent meat quality are identified.
2. Identify the <i>production and pre-slaughter factors that affect meat quality</i>	2.1. Impacts of production factors on meat quality are identified. 2.2. Pre-slaughter factors are explained.
3. Identify the <i>processing factors that impact on eating quality</i>	3.1. pH/temperature window and how it impacts on palatability is explained. 3.2. Role of electrical stimulation in controlling the rate of glycolysis in the carcass is described. 3.3. Impact of stretching the muscles pre-rigor on palatability is explained. 3.4. Process of ageing, its impact on tenderness and methods for extending the storage life of fresh meat including the application of packaging technologies is described. 3.5. Impact of cooking on the palatability of meat is described.
4. Describe quality attributes of meat	4.1. Factors that control the changes in colour in fresh meat are identified. 4.2. Development of marbling fat and its impact on palatability in the carcass is described. 4.3. Impact of drip on both the appearance and palatability of meat is explained.
5. Identify and evaluate the MSA cuts based grading scheme	5.1. Palatability Analysis Critical Control Points (PACCP) approach to meat grading is explained. 5.2. Principles behind the development of the MSA

ELEMENT	PERFORMANCE CRITERIA
	<p>carcase pathways system, including tasting protocols, are described.</p> <p>5.3. Impact of the various production, processing and value-adding inputs on the palatability of beef using the MSA model are established.</p> <p>5.4. Potential benefits of a cuts-based grading system to the various sectors of the industry are evaluated.</p> <p>5.5. Alternative grading schemes and their various grade attributes are analysed.</p>
6. Interpret and analyse data to predict probable impacts on meat eating quality	<p>6.1. Probable impacts of production and processing on meat quality are predicted.</p> <p>6.2. Potential solutions for eating quality problems are identified.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply relevant *communication skills*
- collate and analyse eating quality *data*
- maintain currency of knowledge through independent research or professional development
- identify and apply relevant *OH&S, regulatory* and *workplace requirements*
- identify and recommend improvements that could be made to improve meat eating quality to management
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- consumer taste testing protocols and how they have been used to set grade standards and develop the cuts-based grading system
- factors that control the changes in colour in fresh meat and other quality factors including drip and marbling which impact on both appearance and palatability
- factors that occur between the knocking box and chiller assessment and their

REQUIRED SKILLS AND KNOWLEDGE

- impact on meat palatability
- visual and palatability attributes of meat quality that are important to customers
- physical and chemical changes that occur in the cooking of meat
- anatomical and biochemical determinants of meat palatability
- factors in animal husbandry, transport, lairage, slaughter, carcass storage, packaging, further processing and cooking that will impact on tenderness and palatability
- *minimum standards of performance*

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment

Competency must be assessed in the workplace or under simulated conditions. Assessment is to occur under standard and authorised work practices, safety requirements and regulatory requirements.

Method of assessment

Recommended methods of assessment are:

- evidence log book
- observation of the applicant working
- workplace referee or third party report of performance over time
- written tests and/or questioning.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and explain <i>animal handling practices</i>	1.1. Work instructions and work practices for the welfare and handling of animals are identified. 1.2. The impact on the quality of meat of stressing and/or injuring animals is identified. 1.3. Defects in meat quality resulting from poor handling techniques of live animals are identified.
2. Identify and explain animal welfare requirements	2.1. <i>Workplace</i> and <i>regulatory requirements</i> for handling animals humanely are identified and explained. 2.2. Relevant sections of the applicable Animal Welfare Standard and relevant legislation are identified and explained.
3. Identify and explain <i>Occupational Health and Safety (OH&S) requirements</i> for handling animals safely	3.1. Risks associated with handling animals are identified. 3.2. OH&S requirements associated with handling animals are identified.
4. Identify and explain stock flow and lot identification procedures	4.1. Individual animals are identified, where appropriate, according to workplace, OH&S and regulatory requirements. 4.2. The purpose and identification of lots is explained. 4.3. Lots are identified according to workplace requirements. 4.4. The consequences of incorrect lot identification are explained. 4.5. Importance of maintaining the flow of stock for production is explained.
5. Identify and explain requirements for dealing with sick and injured stock	5.1. Workplace and regulatory requirements are explained. 5.2. Emergency kill arrangements are described.
6. Apply animal welfare and handling techniques	6.1. Animals are handled in a way that complies with workplace requirements and minimises stress. 6.2. Animals are handled safely in accordance with workplace and OH&S requirements. 6.3. Sick and injured stock are handled in accordance with workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify animals *suitable for slaughter*
- accurately complete *records* of *livestock movement*
- *communicate* effectively and appropriately with fellow workers (e.g. to exchange information with stockperson)
- comply with workplace procedures and requirements for handling livestock
- identify the relevant sections of the animal welfare standard and code
- identify relevant regulatory requirements

Required knowledge

Knowledge of:

- workplace procedures for receipt of animals
- workplace requirements for maintaining flow and order of animals
- impact of stress and injury on product quality, including hides and skins
- lot identification of stock and its importance with regard to trace back
- OH&S hazards of handling stock
- the relevant sections of the animal welfare standard and code
- relevant work instructions and Standard Operating Procedures (SOPs) associated with tasks undertaken

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated utilising the most current legislation and codes.

Context of, and specific resources for assessment

Assessment must involve some practical demonstration of competency in lairage situations.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Animal handling practices may include the use of goads such as:

- audio
- electrical
- dogs
- mechanical.

Workplace requirements may include:

- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance requirements
- SOPs
- the ability to perform the task to production requirements
- work instructions.

Regulatory requirements may include:

- Export Control Act
- hygiene and sanitation requirements
- relevant regulations and Australian Standards
- requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption
- Animal Welfare Standards.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:

MTMP2197C Clean after operations - boning room

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to clean and sanitise a boning room. It deals with the skills and knowledge required to operate, strip down and clean all the mechanical aids in the boning room (e.g. packing machinery, conveyors, elevators, scales, recording and labelling machines). It also involves the operation of high pressure cleaning equipment and the use of approved cleaning chemicals in the plant.
------------------------	---

Application of the Unit

Application of the unit	This unit is applicable to workers cleaning boning rooms after production has finished. The boning rooms may be attached to abattoirs or in smallgoods plants or part of food services, game processing or wholesaling operations.
--------------------------------	--

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Clean boning room	1.1. Boning room is cleaned in accordance with cleaning schedule and work instructions. 1.2. Cleaning procedures are undertaken to minimise condensation. 1.3. Cleaning chemicals are used in accordance with manufacturer's specifications and Occupational Health and Safety (<i>OH&S</i>) requirements . 1.4. Major areas of contamination are identified. 1.5. Cleaning procedures meet pre-operational hygiene requirements. 1.6. Surfaces are left free of excess moisture.
2. Clean boning room machinery	2.1. Machinery is isolated in accordance with workplace requirements . 2.2. Boning room packing machinery is cleaned in accordance with workplace requirements and manufacturer specifications. 2.3. Conveyers and elevators are isolated and cleaned. 2.4. Electronic scales, recording and labelling machines are cleaned in accordance with workplace requirements and manufacturer's specifications.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- clean boning room in accordance with workplace requirements
- clean boning room machinery in accordance with workplace requirements
- work effectively as an individual and as part of a team
- observe OH&S requirements for cleaning the boning room
- identify and apply relevant **regulatory requirements**
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant **communication skills**

REQUIRED SKILLS AND KNOWLEDGE

- monitor program for boning room hygiene and sanitation including surface swabbing and pre-operational checks

Required knowledge

Knowledge of:

- importance of drying, and of avoiding condensation in boning rooms
- cleaning schedule for the boning room
- major sources and locations of contamination in the boning room
- specific cleaning programs and OH&S requirements for boning room machinery and conveyor systems

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and explain <i>animal handling practices</i>	1.1. Work instructions and work practices for the welfare and handling of animals are identified. 1.2. The impact on the quality of meat of stressing and/or injuring animals is identified. 1.3. Defects in meat quality resulting from poor handling techniques of live animals are identified.
2. Identify and explain animal welfare requirements	2.1. <i>Workplace</i> and <i>regulatory requirements</i> for handling animals humanely are identified and explained. 2.2. Relevant sections of the applicable Animal Welfare Standard and relevant legislation are identified and explained.
3. Identify and explain <i>Occupational Health and Safety (OH&S) requirements</i> for handling animals safely	3.1. Risks associated with handling animals are identified. 3.2. OH&S requirements associated with handling animals are identified.
4. Identify and explain stock flow and lot identification procedures	4.1. Individual animals are identified, where appropriate, according to workplace, OH&S and regulatory requirements. 4.2. The purpose and identification of lots is explained. 4.3. Lots are identified according to workplace requirements. 4.4. The consequences of incorrect lot identification are explained. 4.5. Importance of maintaining the flow of stock for production is explained.
5. Identify and explain requirements for dealing with sick and injured stock	5.1. Workplace and regulatory requirements are explained. 5.2. Emergency kill arrangements are described.
6. Apply animal welfare and handling techniques	6.1. Animals are handled in a way that complies with workplace requirements and minimises stress. 6.2. Animals are handled safely in accordance with workplace and OH&S requirements. 6.3. Sick and injured stock are handled in accordance with workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify animals *suitable for slaughter*
- accurately complete *records* of *livestock movement*
- *communicate* effectively and appropriately with fellow workers (e.g. to exchange information with stockperson)
- comply with workplace procedures and requirements for handling livestock
- identify the relevant sections of the animal welfare standard and code
- identify relevant regulatory requirements

Required knowledge

Knowledge of:

- workplace procedures for receipt of animals
- workplace requirements for maintaining flow and order of animals
- impact of stress and injury on product quality, including hides and skins
- lot identification of stock and its importance with regard to trace back
- OH&S hazards of handling stock
- the relevant sections of the animal welfare standard and code
- relevant work instructions and Standard Operating Procedures (SOPs) associated with tasks undertaken

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated utilising the most current legislation and codes.

Context of, and specific resources for assessment

Assessment must involve some practical demonstration of competency in lairage situations.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Animal handling practices may include the use of goads such as:

- audio
- electrical
- dogs
- mechanical.

Workplace requirements may include:

- enterprise-specific requirements
- hygiene and sanitation requirements
- OH&S requirements
- Quality Assurance requirements
- SOPs
- the ability to perform the task to production requirements
- work instructions.

Regulatory requirements may include:

- Export Control Act
- hygiene and sanitation requirements
- relevant regulations and Australian Standards
- requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption
- Animal Welfare Standards.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • personal protective equipment (PPE): <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Suitability of animals for slaughter</i> may require consideration of:	<ul style="list-style-type: none"> • health status • length of lairage period • product specification.
<i>Records of livestock movement</i> may include:	<ul style="list-style-type: none"> • receivable documents • reconciliations of livestock-on-hand • slaughter data.
<i>Communication</i> skills may include:	<ul style="list-style-type: none"> • listening and understanding • reading and interpreting workplace documentation • speaking clearly and directly • working with diverse individuals and groups.

MTMP2197B Clean after operations - boning room

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to clean and sanitise a boning room. It deals with the skills and knowledge required to operate, strip down and clean all the mechanical aids in the boning room (e.g. packing machinery, conveyors, elevators, scales, recording and labelling machines). It also involves the operation of high pressure cleaning equipment and the use of approved cleaning chemicals in the plant.
------------------------	---

Application of the Unit

Application of the unit	This unit is applicable to workers cleaning boning rooms after production has finished. The boning rooms may be attached to abattoirs or in smallgoods plants or part of food services, game processing or wholesaling operations.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Clean boning room	1.1. Boning room is cleaned in accordance with cleaning schedule and work instructions. 1.2. Cleaning procedures are undertaken to minimise condensation. 1.3. Cleaning chemicals are used in accordance with manufacturer's specifications and Occupational Health and Safety (<i>OH&S</i>) <i>requirements</i> . 1.4. Major areas of contamination are identified. 1.5. Cleaning procedures meet pre-operational hygiene requirements. 1.6. Surfaces are left free of excess moisture.
2. Clean boning room machinery	2.1. <i>Machinery</i> is isolated in accordance with <i>workplace requirements</i> . 2.2. Boning room packing machinery is cleaned in accordance with workplace requirements and manufacturer specifications. 2.3. <i>Conveyers</i> and elevators are isolated and cleaned. 2.4. Electronic scales, recording and labelling machines are cleaned in accordance with workplace requirements and manufacturer's specifications.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- clean boning room in accordance with workplace requirements
- clean boning room machinery in accordance with workplace requirements
- work effectively as an individual and as part of a team
- observe OH&S requirements for cleaning the boning room
- identify and apply relevant *regulatory requirements*
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- use relevant *communication skills*

REQUIRED SKILLS AND KNOWLEDGE

- monitor program for boning room hygiene and sanitation including surface swabbing and pre-operational checks

Required knowledge

Knowledge of:

- importance of drying, and of avoiding condensation in boning rooms
- cleaning schedule for the boning room
- major sources and locations of contamination in the boning room
- specific cleaning programs and OH&S requirements for boning room machinery and conveyor systems

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated during normal cleaning operations.

Context of and specific resources for assessment

Assessment must be conducted in a registered operating meat processing plant.

Method of assessment

Recommended methods of assessment include:

- assignments
- debriefs
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to

Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Overview the meat preservation process	<p>1.1. Types of <i>preservation</i> processes used by the meat industry are identified and explained.</p> <p>1.2. Meat quality required for preservation processes are identified according to customer and <i>workplace requirements</i>.</p> <p>1.3. Ingredients and <i>equipment</i> required for the preservation process are prepared according to product specifications, <i>hygiene and sanitation</i>, and safety requirements.</p>
2. Monitor preservation process	<p>2.1. Product and process are inspected and monitored to ensure meat is preserved to specifications, health, hygiene and customer requirements.</p> <p>2.2. Equipment or processes involved in the preservation process are monitored regularly at critical control points.</p> <p>2.3. Procedures to ensure quality and hygiene of the product are monitored and followed at all times.</p> <p>2.4. Procedures for rejection, reprocessing and/or recall for products which do not meet specifications or hygiene requirements are implemented.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify critical control points in the meat preservation process
- apply relevant *communication* and *mathematical skills*
- maintain currency of knowledge through professional development and self-directed research
- work effectively as an individual and as a team member
- determine and implement corrective action
- identify and apply relevant Occupational Health and Safety (*OH&S*) *requirements*
- interpret monitoring data and identify out-of-specification performance or product
- monitor the preservation of meat to ensure compliance with workplace and

REQUIRED SKILLS AND KNOWLEDGE*regulatory requirements*

- *record* monitoring information accurately
- *report* non-conformances to appropriate personnel
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- criteria for rejected, reprocessed or recalled product
- process involved in preserving meat in own workplace
- critical aspects of meat safety and hygiene in the preservation process
- relevant procedures to ensure the preserved meat product is safe and fit for human consumption
- reject and recall procedures
- impact of the preserving process on product quality, including eating quality
- regulatory requirements relating to the preservation of meat and products
- reject and recall procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated while monitoring a commercial meat preservation operation.

Context of and specific resources for assessment

Assessment may involve a simulated monitoring role for the trainee.

Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Overview the production of further processed meats and smallgoods</p>	<p>1.1. Range of further processed meat products and smallgoods is identified and explained.</p> <p>1.2. Processing techniques involved in the production of these <i>products</i> are identified and explained.</p> <p>1.3. <i>Hygiene and sanitation</i> and quality hazards associated with the production of these products are identified and explained.</p> <p>1.4. <i>Regulatory requirements</i> associated with the production of these products are identified and explained.</p>
<p>2. Monitor the preparation of processing <i>equipment</i> and areas</p>	<p>2.1. Procedures for pre-operational equipment checks conducted are identified in accordance with workplace policies and procedures, and manufacturer's instructions.</p> <p>2.2. Pre-operational checks and procedures carried out in accordance with workplace and regulatory requirements are monitored.</p>
<p>3. Monitor the production of smallgoods and further processed meat products</p>	<p>3.1. Ingredients are identified by type and quality according to <i>product specifications</i> and their function in the process is explained.</p> <p>3.2. Types of meat, by-product, stock, additive, binder and spices selected are identified according to the formulation specifications and regulatory requirements.</p> <p>3.3. Handling requirements for ingredients to prevent contamination and to ensure product quality and safety are demonstrated.</p> <p>3.4. Relevant processing equipment is identified and operating procedures are explained according to manufacturer and work specifications.</p> <p>3.5. Relevant temperature, consistency, appearance and texture requirements are described and monitored in accordance with product specifications and regulatory requirements.</p> <p>3.6. Relevant processing area hygiene and sanitation requirements are monitored as specified in workplace procedures and regulatory requirements.</p> <p>3.7. Procedures for rejection, reprocessing and/or recall for products which do not meet specifications or hygiene and sanitation requirements are identified and assessed against regulatory requirements.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- monitor production of processed meats and smallgoods to ensure compliance with workplace and regulatory requirements
- apply relevant *communication* and *mathematical skills*
- work effectively as an individual and as a team member
- identify and apply relevant Occupational Health and Safety (*OH&S*), *workplace* and regulatory requirements
- propose and implement solutions to a range of production problems
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- hazards to the safe and hygienic manufacture of smallgoods
- *options for chilling product*
- process involved in manufacturing smallgoods
- procedures required to ensure the product is fit for human consumption and meets regulatory and quality requirements
- critical limits in the manufacture of smallgoods
- recall procedures, including notification of appropriate authorities

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment

Competency must be demonstrated while monitoring a commercial smallgoods or processed meats operation.

Resources may include:

- smoking equipment, machinery or production facility
- product specifications and ingredients
- equipment meeting safety requirements

Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Pre-Requisites

Prerequisite units		
	MTMCOR202A	Apply hygiene and sanitation practices
	MTMCOR404A	Facilitate hygiene and sanitation performance

Employability Skills Information

Employability skills	
	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify microbiological hazards for <i>UCFM products</i>	1.1. Types of <i>micro-organisms</i> are identified. 1.2. <i>Major threats</i> to UCFM products are identified. 1.3. Types of bacteria causing food poisoning and spoilage are identified. 1.4. Effects of bacterial contamination for food poisoning (i.e. impact on people) and food spoilage (i.e. shelf life) are identified. 1.5. Sources of bacterial contamination are identified. 1.6. Growth characteristics and requirements of bacteria are identified.
2. Identify chemical hazards for UCFM products	2.1. Chemical hazards which may affect UCFM products are identified. 2.2. <i>Common sources of chemical hazards/contamination</i> are identified. 2.3. Control methods which prevent chemical contamination locally and relevant national programs (e.g. residue testing) are explained. 2.4. Impact of chemical residues on meat (e.g. poisoning, tainting, rejections) is explained.
3. Identify physical hazards for UCFM products	3.1. Physical hazards which may affect meat are explained. 3.2. Common sources of physical hazards and/or contamination are identified. 3.3. Control methods to prevent contamination are explained. 3.4. Effects or impact of physical hazards on meat are explained.
4. Overview the production of UCFM products	4.1. Range of UCFM products is identified and explained. 4.2. Processing techniques involved in production of UCFM are identified and explained. 4.3. Hygiene and food safety hazards associated with the production of UCFM products are identified and explained. 4.4. <i>Regulatory requirements</i> associated with the production of UCFM products are identified and explained.
5. Monitor the preparation of	5.1. Procedures for pre-operational equipment checks are identified in accordance with workplace policies and

ELEMENT	PERFORMANCE CRITERIA
processing <i>equipment</i> and areas	<p>procedures, and manufacturer's instructions.</p> <p>5.2. Pre-operational checks and procedures carried out in accordance with workplace, food safety and regulatory requirements are monitored.</p>
6. Manage the production of UCFM and further processed products	<p>6.1. Ingredients are identified by type, quality and safety according to product specifications and their function in the process is explained (including starter culture).</p> <p>6.2. Types of meat, by-product, stock, additive, binder and spices selected are identified according to the formulation specifications and regulatory requirements.</p> <p>6.3. Handling requirements for ingredients (including starter culture) to prevent food safety hazards are demonstrated to ensure product quality and safety.</p> <p>6.4. Relevant processing equipment is identified and operating procedures are explained according to manufacturer and workplace specifications.</p> <p>6.5. Relevant time, temperature and humidity requirements for fermentation, maturation and monitoring are described in accordance with product specifications, regulatory requirements and industry guidelines.</p> <p>6.6. Relevant consistency, appearance, texture and monitoring requirements are described in accordance with product specifications and regulatory requirements.</p> <p>6.7. Procedures for rejection, reprocessing and/or recall for products which do not meet specifications or hygiene and sanitation requirements are identified and assessed against regulatory requirements and industry guidelines.</p> <p>6.8. Relevant processing area hygiene and sanitation requirements are identified and monitored as specified in workplace procedures and regulatory requirements.</p>
7. Overview the implementation of the Approved Hazard Analysis Critical Control Point (HACCP) plan for the production of UCFM products	<p>7.1. Critical Control Points (CCPs) and control points for prevention and control of bacterial contamination (e.g. process controls and systems) are identified.</p> <p>7.2. Control methods to prevent microbiological contamination are explained and implemented.</p> <p>7.3. Critical limits for CCPs are identified and monitoring processes are implemented.</p> <p>7.4. Validation requirements for critical limits of</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>HACCP programs are described.</p> <p>7.5. Documented procedures are implemented which ensure any CCPs which are out of control are brought back into control and affected product is suitably handled.</p> <p>7.6. Documented procedures are implemented to ensure the whole HACCP system is regularly audited and verified as working effectively.</p> <p>7.7. All documents and <i>records</i> required for the system are kept available, up-to-date and in use.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply relevant *communication* and *mathematical skills*
- maintain currency of knowledge and techniques through informal learning, regular professional development and personal research such as by using the web, industry journals, circulars from regulators and industry workshops
- work effectively as an individual and as a team member
- demonstrate initiative and creativity in proposing solutions and contributing to the development of appropriate actions to resolve problems
- identify and apply relevant Occupational Health and Safety (*OH&S*) and *workplace requirements*
- monitor production of UCFM to ensure compliance with workplace and regulatory requirements
- provide relevant information to work colleagues to facilitate understanding of, and compliance with the Australian Standards and associated regulations
- take action to improve own work practice as a result of self-evaluation, feedback from others, or changed work practices, regulations or technology
- use technology to access information, prepare reports, and to access and prepare relevant data

Required knowledge

Knowledge of:

REQUIRED SKILLS AND KNOWLEDGE

- process involved in manufacturing UCFM
- purpose of fermentation
- raw materials storage and selection
- fermentation control criteria for pH
- fermentation speed control
- purpose of maturation and drying
- maturation and drying speed control
- impact of the raw material on product quality and food safety
- water activity as a release criteria
- microbiological criteria in UCFM production and microbiological limits of UCFM, particularly the following significant microbial pathogens: enterohaemorrhagic Escherichia coli, Salmonella, enterotoxin of Staphylococcus aureus and Listeria monocytogenes
- physical hazards for UCFM products
- role of starter culture
- storage and handling requirements for starter culture
- product handling and release criteria
- impact of critical limits in a HACCP program for UCFM production
- procedures required to ensure the product is fit for human consumption and meets regulatory, food safety and quality requirements
- implementation of the HACCP plan for the production of UCFM products

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, with an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment

Resources may include

- relevant documentation such as:
 - manufacturer's instructions and operation manuals
 - regulatory requirements
 - workplace policy and procedures
- workplace environment.

Method of assessment

Recommended methods of assessment include:

- assignment focusing on understanding and application of principles and theory to workplace operations
- third-party referee report of sustained performance at appropriate level of authority and responsibility
- workplace project with a focus on enterprise

EVIDENCE GUIDE	
	<p>environment and conditions.</p> <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	<p>A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>UCFM products</i> may include	<ul style="list-style-type: none"> • caccitora • chorizo • csabai • landjaeger • Lebanon Bologne • mettwurst • polnische • salami • some cabanossi • summer sausage • Teewurst, and others.
<i>Micro-organisms</i> may include:	<ul style="list-style-type: none"> • bacteria • mould • virus • yeast.

RANGE STATEMENT	
Major threats may include:	<ul style="list-style-type: none"> • bacteria • relevant yeast or moulds.
Common sources of chemical hazards/contamination may include:	<ul style="list-style-type: none"> • agricultural residue • cleaning • veterinarian chemical residues.
Regulatory requirements may include:	<ul style="list-style-type: none"> • Export Control Act • Export Meat Orders (EMOs) • hygiene and sanitation requirements • importing country requirements where appropriate • relevant domestic requirements • relevant regulations and Australian Standards • AS 4696:2007 Australian Standard for the hygienic production and transportation of meat and meat products for human consumption • federal, state and territory regulations regarding meat processing.
Equipment may include:	<ul style="list-style-type: none"> • blenders • choppers • cooking utensils • dryers • fermentation environment • injectors • knives • machine or vat • mixers • pressure cookers • sausage machine • silent or bowl cutter • smokehouse • tables, conveyors, platforms • tumblers.
Ingredients may include:	<ul style="list-style-type: none"> • additives • binders • by-products and other relevant materials • fats • meats • Nitrate • Nitrite

RANGE STATEMENT	
	<ul style="list-style-type: none"> • spices • starter cultures • water.
Recording and monitoring systems may be:	<ul style="list-style-type: none"> • electronic • manual.
Communication skills may include:	<ul style="list-style-type: none"> • communicating with people from a range of cultural, social and ethnic backgrounds • preparing oral or written reports which include information from a range of sources • reading and interpreting workplace documentation, such as audit reports, monitoring data, specifications and status reports • speaking clearly and directly • listening and understanding • preparing documentation for a specified audience • using negotiation and persuasion skills, and being appropriately assertive • using technical workplace and mathematical language and data • sharing of information.
Mathematical skills may include:	<ul style="list-style-type: none"> • identifying acceptable limits, tolerances, out-of-specification performance, trends • collection, estimation, calculation and interpretation of deviations within cycle, internal temperature, humidity, ambient temperature, weights • measurement and interpretation in relation to time, temperature, moisture humidity, ratios, percentages, weight, mass, volume.
OH&S requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance

RANGE STATEMENT	
	<ul style="list-style-type: none"> • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<p><i>Workplace requirements</i> may include:</p>	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.

Co-requisite units	

Competency field

Competency field	
------------------	--

MTMPS5603C Develop, manage and maintain quality systems

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to establish, maintain and control an enterprise quality system. It also covers the skills and knowledge needed to lead people, manage systems and build quality into all enterprise systems and operations. The development and management of quality systems affects the ability of the enterprise to operate in specific markets and influences customer and consumer confidence in enterprise products.
------------------------	--

Application of the Unit

Application of the unit	This unit is of particular interest to Quality Assurance (QA) managers and personnel, production managers and supervisors operating in a meat industry context. At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish <i>requirements of the quality system</i>	1.1. Policies expressing the organisation's commitment to the quality system and processes are developed. 1.2. Legislative requirements for enterprise quality systems are identified. 1.3. Scope and objectives of the quality system are determined, including links with all enterprise operations, customers, suppliers and contractors. 1.4. Quality performance standards, including customer and supplier service standards, are established consistent with the direction and goals of the enterprise. 1.5. Resource requirements are identified and included in financial, human resource and operational plans.
2. Design and prepare for the quality system	2.1. <i>Quality systems</i> are selected and designed to meet enterprise, customer and regulatory requirements. 2.2. Quality principles underpin all enterprise operations to achieve business goals and performance standards. 2.3. Responsibilities for development, implementation and operation of the system are clearly defined and communicated. 2.4. Personnel from all levels and areas of the organisation are involved in the development and implementation of the quality system. 2.5. <i>System components, procedures</i> and supporting <i>documentation</i> are developed and validated. 2.6. Consultative and communication strategies are developed to link the quality system with all aspects of enterprise operations. 2.7. Supplier or contractor service standards and <i>audit</i> requirements are determined and negotiated. 2.8. <i>Performance measures</i> and indicators are developed to measure performance against policies, goals and performance standards.
3. Implement and <i>monitor</i> the quality system	3.1. Implementation plan is prepared and resourced. 3.2. Training plans to provide personnel at all levels with quality concepts and skills are prepared and resourced. 3.3. Quality system requirements and customer focus are addressed in the establishment, operation and

ELEMENT	PERFORMANCE CRITERIA
	<p>evaluation of all enterprise systems.</p> <p>3.4. Control and preventative action measures are identified and validated.</p> <p>3.5. Corrective action procedures are developed and monitored.</p> <p>3.6. Procedures for reporting, recording and responding to non-conformances and non-compliances are established.</p> <p>3.7. Customer and supplier service standards are monitored and documented.</p> <p>3.8. Quality data is collected and analysed, and implications reported.</p> <p>3.9. Quality costs and performance are monitored.</p> <p>3.10. Quality system is prepared for external review and approval by relevant authorities.</p>
4. Continuously improve the quality system	<p>4.1. Impacts of the quality system on enterprise operations are monitored and reviewed.</p> <p>4.2. Responses to customer complaints and requests are resolved and used to improve the system.</p> <p>4.3. Procedures for the ongoing identification and resolution of issues are established.</p> <p>4.4. Quality system is updated for changes in process, technical information, customer and regulatory requirements.</p> <p>4.5. <i>Stakeholders</i> are included in decision making and continuous improvement processes and strategies.</p> <p>4.6. Quality results, findings and conclusions are fed into improvement processes.</p> <p>4.7. Costs and benefits of the quality system are analysed.</p> <p>4.8. Quality goals and targets are continuously reviewed.</p>
5. <i>Communicate quality outcomes</i>	<p>5.1. <i>Certification</i> of product and processes consistent with quality outcomes is completed according to customer and regulatory requirements.</p> <p>5.2. Regulatory authorities and agencies are promptly notified of breaches and non-compliance incidents.</p> <p>5.3. Quality outcomes are used to promote public confidence in enterprise products and services.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- analyse complex *statistical data* and prepare corrective responses to non-conformances and variations identified in the data, relevant to enterprise quality systems and operations
- apply *quality* concepts and *tools* to problem solving and the development of quality data collection, *data management systems* and analysis strategies
- apply substantial product and process knowledge to the development of the quality system and the *interpretation* of quality data
- apply relevant *communication* and *mathematical skills*
- communicate quality goals, requirements and findings to stakeholders in formats and styles appropriate to the context and purpose
- develop quality policies for the enterprise in consultation with senior management and other stakeholders
- develop consultative and feedback procedures and opportunities for identification and resolution of quality issues and problems
- develop continuous improvement processes and team building using the 'plan, do, check, act cycle'
- consult, negotiate with and report to regulatory authorities openly and promptly, consistent with enterprise ethical standards, including the notification of breaches and the preparation of non-compliance reports
- develop workforce commitment, capability and responsibility for the quality system, including identifying, negotiating and scheduling training, inclusion of responsibilities and duties relating to quality system implementation and integration in all job descriptions and work instructions, clear communication of responsibilities and requirements, delegation of tasks and responsibilities and inclusion of the workforce in consultative and continuous improvement processes
- ensure the quality system meets legislative and *regulatory requirements*
- exercise judgement, pragmatism and quality knowledge in the management and resolution of quality issues and problems
- identify and apply relevant *Occupational Health and Safety (OH&S)* and *workplace requirements*
- identify appropriate *monitoring systems* and strategies to support the enterprise quality system
- identify, research and update sources of quality information and advice, including technical and regulatory information to support enterprise quality system
- lead personnel (e.g. Hazard Analysis Critical Control Point (HACCP) team, management, quality team, meat inspection team, laboratory, maintenance teams, processors and operators) in the implementation and improvement of the quality

REQUIRED SKILLS AND KNOWLEDGE

system

- monitor and analyse the *costs* of the quality system, including prevention costs, appraisal costs, total quality costs and failure costs
- monitor and certify processes and product to meet *third -party* requirements (e.g. importing country, public health requirements and customers)
- oversee *audit processes* (internal and external), act on audit findings and provide feedback to personnel for improvement of the system
- oversee the preparation for third party certification (where appropriate)
- plan and resource the enterprise training strategy, consistent with regulatory requirements, to assist personnel at all levels in the implementation of the quality system
- prepare and sign off quality policies, manuals and documentation for the enterprise, including the preparation and updating of preventative, corrective and responsive procedures and strategies, supplier criteria and specifications, supplier and contractor audit requirements
- prepare quality implementation plans, identifying goals, key personnel and areas, resources, strategies, timelines and milestones
- present reports according to legal and enterprise requirements
- resolve customer complaints promptly and provide corrective action responses
- use appropriate questioning, observation, listening and recording skills in the collection and monitoring of quality data
- where quality systems are based on HACCP principles or Good Manufacturing Practice (GMP), explain these principles and the implications for the enterprise quality system.

Required knowledge

Knowledge of:

- key concepts, philosophies and tools of quality management
- management and organisational structure of the enterprise and its impact on enterprise systems
- the role audits play in a quality system
- documentation requirements of the quality system, including levels, and their roles in the functioning of the system, including the requirement for effective and secure quality record keeping systems
- enterprise goals and directions and their implications for the quality system
- *process capability*
- applicable quality standards, regulations, codes, legislation and customer requirements for the quality system and explain the implications for the enterprise
- legal requirements for the establishment and maintenance of the enterprise QA system including responsibilities for reporting breaches to authorities and implementing audit findings
- principles and functions of hazard analysis and control, validation, including

REQUIRED SKILLS AND KNOWLEDGE

auditing, and verification in quality systems.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Requirements of the quality system</i> may include:</p>	<ul style="list-style-type: none"> • control of documents, data and quality records • coverage of contracts, purchasing, supply, processing, handling, storage, packaging, preservation, storage and delivery of meat and meat products • definition of management responsibilities • design and process controls • inspecting and testing, control of non-conforming product, preventative and corrective action, and auditing • management of links and impacts on all systems within the enterprise • production identification and traceability

RANGE STATEMENT	
	<ul style="list-style-type: none"> • training.
<i>Quality systems</i> may include:	<ul style="list-style-type: none"> • Australian, and Australian and New Zealand standards • food and meat safety • industry specific standards • international standards (e.g. ISO 9000 series) • Meat Safety Enhancement Program (MSEP) • Meat Safety Quality Assurance (MSQA) • Personal Qualities Assessment (PQA) • trade description and certification systems.
<i>Systems components and procedures</i> include:	<ul style="list-style-type: none"> • correction (e.g. disposition, corrective action, liability management and customer complaint resolution) • prevention (e.g. training, operator feedback, manuals, technology and equipment reliability and maintenance, statistical collection and information, supplier QA, Standard Operating Procedures (SOPs) and work instructions).
Where the quality system relates to food safety, relevant <i>documentation</i> may include:	<ul style="list-style-type: none"> • amendment registers • Critical Control Points (CCP) monitoring forms and additional monitoring requirements and supporting programs • critical control point work instructions • HACCP audit table • HACCP team register, product description and use • process flow charts, factory floor plan and hazard analysis table • schedules relating to hygiene, cleaning and sanitation procedures, work instructions, approved chemicals, calibration, pest control, training, and product identification and recall.
<i>Audits</i> of performance may include:	<ul style="list-style-type: none"> • compliance with regulatory requirements • external reviewers • human resource performance • QA, including meat and food safety • safety, energy and environment.
<i>Performance measures</i> for the total quality cost may include:	<ul style="list-style-type: none"> • quality cost per kg of product • quality cost per dollar of direct production costs.
<i>Monitoring</i> and analysis may be:	<ul style="list-style-type: none"> • periodic (e.g. hourly, daily and weekly)

RANGE STATEMENT	
	<ul style="list-style-type: none"> • in real time (electronically).
<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> • company owners, directors, shareholders and financiers • competitors • management and employees • suppliers, customers and consumers • unions and employer associations.
Systems for the <i>communication of quality outcomes</i> may include:	<ul style="list-style-type: none"> • development of quality teams • newsletters, bulletins and awards • problem-solving teams and sessions • quality meetings or circles • training.
<i>Certification</i> may include:	<ul style="list-style-type: none"> • AUS-MEAT certification • importing country requirements • Meat Standards Australia (MSA) certification • State, territory or public health requirements.
<i>Statistical data</i> analysis may include:	<ul style="list-style-type: none"> • correlation and regression analysis, bi-variate and multi-variate analysis • distribution • estimating and hypothesis testing • management • probability and statistical inference • process stability, capability and management • reliability planning • sampling • statistical process control requirements and charting applications • variations and variation monitoring.
<i>Quality tools</i> may include:	<ul style="list-style-type: none"> • cause and effect and fish bone diagrams • control charts • data points • flow charts • histograms • prioritisation matrices • process improvement models • process capability • pareto charts • team structures.
<i>Data management systems</i> may be manual or computerised, cover	<ul style="list-style-type: none"> • bar coding, identification, tagging and traceback systems

RANGE STATEMENT	
data collection, data monitoring and data analysis and interpretation, and may include:	<ul style="list-style-type: none"> • calculators • charting and graphing materials • computer software packages (e.g. spreadsheets and statistical analysis packages) • computerised equipment • manual measuring equipment (e.g. thermometers, pressure gauges and scales) • monitoring sheets and records.
Data analysis and <i>interpretation</i> may include:	<ul style="list-style-type: none"> • Acceptable Quality Level (AQLs) • Chemical Lean (CL) levels • microbiological analysis (e.g. Total Viable Counts (TVC) and e-coli counts) • process capability analysis • process variation analysis • product monitoring • statistical process control • temperature (e.g. cooling and chilling rates).
<i>Communication</i> may:	<ul style="list-style-type: none"> • be with culturally, ethnically and socially diverse individuals and groups • involve information and communications technology (e.g. databases, internet search and e-commerce services) • occur in a variety of sensitive, conflictive, collaborative and supportive environments • be formal or informal and involve face to face, technological and electronic methods • require analysis and presentation of complex concepts, technical information, mathematical information and other data in simple or complex formats • require preparation of reports which may be complex, contain information from a range of technical sources and include mathematical and graphic information and data.
<i>Mathematical skills</i> may relate to:	<ul style="list-style-type: none"> • complex actual and hypothetical technical and financial modelling • calculations and interpretation and analysis • mathematical information, such as: <ul style="list-style-type: none"> • product and product quality • financial operations • personnel

RANGE STATEMENT	
	<ul style="list-style-type: none"> • operations • sales and turnover • exports.
<i>Regulatory requirements</i> may include:	<ul style="list-style-type: none"> • animal welfare • commercial law, including fair trading and trade practices • consumer law • corporate law, including registration, licensing and financial reporting • environmental and waste management • Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment • Export Control Act • hygiene and sanitation requirements • industrial awards and agreements • relevant regulations • state and territory regulations regarding meat processing • taxation.
<i>OHS requirements</i> may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE): <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific requirements • OH&S requirements

RANGE STATEMENT	
	<ul style="list-style-type: none"> • QA requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
<i>Monitoring systems</i> and strategies may include:	<ul style="list-style-type: none"> • audits and reviews • feedback from stakeholders • inspection and testing procedures and regimes, including chemical and microbiological testing procedures, for validation and verification • statistical collection and analysis.
Quality <i>costs</i> include:	<ul style="list-style-type: none"> • appraisal (e.g. design appraisal, inspection, depreciation of quality equipment, process control and end product testing) • failure (e.g. scrap and waste, reinspection or retesting, disposal, down time, product downgrading, product liability, loss of custom, returned product and complaints) • prevention (e.g. training, auditing, process control engineering, testing, reporting and recall systems).
<i>Third-party</i> certification may include:	<ul style="list-style-type: none"> • Australian Quarantine Inspection Service (AQIS) accountabilities and inspection stamps/seals • customer requirements and specifications, including importing country requirements • licensing or registration requirements • national or international quality endorsement • product description and certification.
<i>Audit processes</i> include:	<ul style="list-style-type: none"> • planning • establishing controls • developing the team • conducting entry/exit meetings • controlling caucus meetings • issuing corrective action requests • preparing reports • giving feedback and input into the improvement of the system.
<i>Process capability</i> includes:	<ul style="list-style-type: none"> • operational capability (e.g. resources, risks, opportunities and commitments) • technical capability (e.g. personnel,

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select packaging	1.1. Product is bagged in appropriately sized bag. 1.2. Product is arranged in appropriate container.
2. Set machine requirements	2.1. Requirements in preparation for start-up of vacuum packing machine are completed to workplace requirements . 2.2. Machine requirements are set correctly. 2.3. Start-up procedures are followed to workplace requirements. 2.4. Packing materials are attached and changed to workplace requirements and product specification. 2.5. Bagged meat is placed on the vacuum packing machine or in the formed pockets as appropriate. 2.6. Open ends of bags are placed flat across the sealing bar or meat contained in pockets as appropriate. 2.7. Occupational Health and Safety (OH&S), hygiene and sanitation requirements are followed.
3. Operate machinery	3.1. Vacuum packaging machine is operated correctly in accordance with workplace requirements. 3.2. A variety of products is vacuum packed to customer specifications, hygiene and sanitation, OH&S and Quality Assurance (QA) requirements at a speed that is the same as production requirements. 3.3. Bags are shrunk using hot water baths where appropriate. 3.4. Bagged cuts are left to drain. 3.5. Shut-down procedures are performed to workplace requirements.
4. Perform routine maintenance	4.1. Dyes are changed according to workplace requirements. 4.2. Corrective action is taken when leaks and defects are identified, according to workplace requirements. 4.3. Plates are changed as required.
5. Ensure quality of packaging and product	5.1. Bagged cuts are inspected for leaks and other defects. 5.2. Bagged cuts are placed in cartons according to specifications.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- prepare for vacuum packaging according to OH&S and workplace requirements
- vacuum pack bagged cuts with no leaks or defects
- *explain* defects that can occur during packaging
- demonstrate hygienic cleaning of equipment
- work effectively as an individual and as a team member
- demonstrate hygienic work practices for vacuum packing
- apply relevant *communication* and *mathematical skills*
- apply relevant *regulatory requirements*
- manage time and priorities
- take action to improve own work practice as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- sub-standard or contaminated product and workplace procedures for dealing with sub-standard or contaminated product
- defects that can occur during packaging
- packaging requirements
- specific OH&S requirements for vacuum packing
- purpose of vacuum packaging
- relevant communication and mathematical skills
- relevant regulatory requirements
- general operating principles, including start-up and shut-down procedures
- manufacturer's and workplace requirements for vacuum packaging of product

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency should be demonstrated at the normal speed of production.

Context of, and specific resources for assessment

Assessment should take place in an operating meat processing plant or food service operation.

Method of assessment

Recommended methods of assessment include:

- assignments
- quiz of underpinning knowledge
- simulation
- workplace demonstration
- workplace project
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender, or language backgrounds other

EVIDENCE GUIDE	
	than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Workplace requirements</i> may include:</p>	<ul style="list-style-type: none"> • enterprise-specific procedures • OH&S requirements • QA requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements.
<p><i>OH&S</i> requirements may include:</p>	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms

RANGE STATEMENT	
	<ul style="list-style-type: none"> • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
Hygiene and sanitation requirements may include:	<ul style="list-style-type: none"> • relevant government regulations • workplace requirements.
Explanations may:	<ul style="list-style-type: none"> • be completed with the assistance of others • be directly related to own work and work area problem solving • be in everyday workplace language and include mathematical language and commonly used technical terms • include information from several sources • be presented in writing using standard formats or proformas, diagrams, symbols and charts • be presented orally.
Communication skills may include:	<ul style="list-style-type: none"> • listening and understanding • sharing information • speaking clearly and directly • working with diverse individuals and groups.
Mathematical skills may include:	<ul style="list-style-type: none"> • accurate recording of temperature, time, volume, weight and quantity in standard formats or proformas • interpreting and drawing conclusions from routine charts, bar graphs, pie charts, etc • operations involving percentages, comparisons and variations • reading and interpreting analogue and digital measures including clocks, scales, pressure gauges, thermometers, cash registers • routine estimations and calculations using a range of specified formula and procedures • use of calculators and computer software packages.
Regulatory requirements may include:	<ul style="list-style-type: none"> • Export Control Act • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in the AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products

RANGE STATEMENT

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish livestock production and transport requirements	1.1. Production techniques impacting meat quality are explained for the range of <i>species</i> involved. 1.2. Role and purpose of traceability requirements are explained. 1.3. Purchasing process and selling alternatives for livestock are explained. 1.4. Relationship between transport arrangements and meat quality are explained. 1.5. Potential product quality, animal welfare and food safety hazards from transporting livestock are identified.
2. Identify the sequence of operations for meat processing in an abattoir	2.1. Critical elements of the slaughtering process are identified. 2.2. Critical elements of the boning process are identified. 2.3. Role and purpose of rendering are explained. 2.4. Offal processing requirements are explained. 2.5. Differences between export and domestic requirements are identified.
3. Explain factors affecting food safety and meat quality during processing	3.1. Key meat safety issues are described. 3.2. Key legislation and regulations affecting meat processing are identified. 3.3. Impacts of seasonal and geographical factors on meat quality are explained. 3.4. The nature and purpose of the Meat Standards Australia (MSA) program are described. 3.5. Impacts of further processing on meat quality are explained. 3.6. Factors affecting shelf life and meat quality are explained. 3.7. The nature and purpose of a meat testing program are explained.
4. Identify processes and process controls for a range of meat smallgoods	4.1. Differences between product sources are identified. 4.2. Key smallgoods products and production processes are identified. 4.3. Food safety requirements impacting smallgoods production are explained.
5. Define the structure and nature of meat	5.1. Differences between supermarket, independent and wholesale butchers are identified.

ELEMENT	PERFORMANCE CRITERIA
retailing in Australia	<p>5.2. <i>Regulatory requirements</i> directly impacting meat retailing are explained.</p> <p>5.3. Key meat product lines and the role of value-adding are identified.</p> <p>5.4. The impact of <i>customer requirements and expectations</i> are explained.</p> <p>5.5. Food safety requirements impacting retail operations are explained.</p>
6. Identify key issues and bodies that impact the Australian meat industry	<p>6.1. Impacts of climatic factors on the meat industry are explained.</p> <p>6.2. <i>Key issues impacting meat industry employment</i> are explained.</p> <p>6.3. <i>Environmental impacts of a meat processing site</i> are reviewed.</p> <p>6.4. Impacts of <i>changing customer expectations</i> are explained.</p> <p>6.5. The role of <i>key industry bodies</i> is described.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- analyse and interpret work instructions, Standard Operating Procedures (SOPs), safety and hygiene procedures, and other workplace documentation
- identify livestock
- locate, and interpret industry information
- distinguish between meat products and the processes to produce them
- identify personal hygiene and operational sanitation procedures
- identify and Occupational Health and Safety (OH&S) risks
- apply sustainable work practices

Required knowledge

Knowledge of:

- factors which impact on meat safety and quality through the supply chain

REQUIRED SKILLS AND KNOWLEDGE

- the main animal welfare issues associated with the production and processing animals for human consumption
- main markets for meat
- common causes and impact of contamination
- relationship between food safety and market access
- nature and structure of the Australian meat processing industry
- principles of Quality Assurance (QA) and traceability from paddock to retailer
- slaughtering and boning processes
- nature and purpose of the AUS-MEAT and MSA programs
- customer requirements
- value-adding of meat products

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Critical aspects of assessment must include the following:

- describe the livestock production and marketing, and retailing systems for the meat industry
- document the sequence of operations for livestock slaughter and meat processing
- define processes for a range of meat smallgoods
- describe production factors influencing meat quality and safety
- comply with industry requirements for hygiene, OH&S and other work practices.

Context of and specific resources for assessment

Assessment of performance requirements in this unit should be undertaken within the context of food technology in the meat processing industry.

Assessment must occur in a real or simulated workplace where the candidate has access to:

- production process and related equipment,

EVIDENCE GUIDE	
	<p>manufacturers' advice and operating procedures</p> <ul style="list-style-type: none"> • equipment and facilities for carrying out slaughtering of livestock and processing of primary cuts of meat.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • written and/or oral questioning to assess knowledge and understanding • direct or third-party evidence of compliance with enterprise procedures for hygiene and OHS • a process chart developed and explanation of the sequence of operations for meat processing in an abattoir. <p>Evidence should be gathered over a period of time in a range of actual or simulated environments.</p> <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify anatomical features of a beef carcass	1.1. Directions on a carcass are described using the anatomical direction format. 1.2. Bones relevant to meat <i>specifications</i> in a beef skeleton are located and identified. 1.3. Major <i>muscles</i> relevant to meat specifications are identified. 1.4. Major glands and cartilage relevant to meat specifications are identified.
2. Identify and name meat products using the standard product description	2.1. Nature and format of product specifications are identified. 2.2. Standardised cut descriptions are used and correctly spelt to name meat products. 2.3. Major muscles that make up each meat cut are identified. 2.4. Correct cutting lines for each product are identified using the correct anatomical features to describe the cutting lines. 2.5. What must be altered from any given meat product for it to comply with the company product specification is identified.
3. Check <i>beef product</i> complies with written specifications	3.1. Beef product compliance with written specifications is checked and principles of Quality Assurance (QA) are described. 3.2. Sections of the workplace QA system related to ensuring beef product compliance are described to AUS-MEAT product description requirements. 3.3. Non-conforming product is defined and described in relation to workplace requirements. 3.4. Critical Control Points (CCPs) are identified and monitored in accordance with <i>workplace requirements</i> .
4. Assess product compliance	4.1. Product compliance with written specifications is assessed in accordance with workplace and AUS-MEAT product description requirements. 4.2. Product description given in written specifications is identified and explained. 4.3. Corrective action is taken in the event of non-conformance to beef product specifications.
5. <i>Measure and check</i> product compliance	5.1. Cutting lines and muscle content is checked in accordance with written specifications.

ELEMENT	PERFORMANCE CRITERIA
against written specifications	5.2. Non-conforming product that can be made to comply with the specification is identified.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply relevant *communication* and *problem-solving skills*
- work effectively as an individual and as a team member
- identify and apply relevant *Occupational Health and Safety OH&S requirements*
- identify and apply relevant workplace and *regulatory requirements*
- identify and explain AUS-MEAT language specifications on beef product label
- identify non-conforming product in accordance with specifications
- take action to improve own work practice as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- corrective action procedures for non-conforming product
- product specification points

<p>Method of assessment</p>	<p>Recommended methods of assessment include:</p> <ul style="list-style-type: none"> • completion of standard AUS-MEAT assessment • workplace demonstration • quiz of underpinning knowledge • workplace referee report of performance over time. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Specifications may include:

- approval system
- AUS-MEAT
- communication
- measurement
- technical accuracy.

Muscles may include cuts from:

- forequarter (major)
- hindquarter (major).

Beef product may include:

- muscle content
- points of specification
- product compliance
- product name.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)
- the ability to perform the task to production requirements
- work instructions.

Measurement and checking may include:

- data collection
- frequency
- interpreting data
- monitoring sheets
- non-conforming products
- sample size

RANGE STATEMENT	
	<ul style="list-style-type: none"> taking measurements.
<i>Communication</i> skills may include:	<ul style="list-style-type: none"> applying numeracy skills to workplace requirements interpreting the needs of internal or external customers listening and understanding reading and interpreting workplace documentation sharing information speaking clearly and directly writing to audience needs.
<i>Problem-solving skills</i> may involve:	<ul style="list-style-type: none"> applying a range of strategies in problem-solving developing practical and creative solutions to workplace problems solving problems individually or in teams testing assumptions and taking context into account using numeracy skills to solve problems.
<i>OH&S requirements</i> may include:	<ul style="list-style-type: none"> enterprise OH&S policies, procedures and programs OH&S legal requirements Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> coats and aprons ear plugs or muffs eye and facial protection head-wear lifting assistance mesh aprons protective boot covers protective hand and arm covering protective head and hair covering uniforms waterproof clothing work, safety or waterproof footwear requirements set out in standards and codes of practice.
<i>Regulatory requirements</i> may	<ul style="list-style-type: none"> Export Control Act hygiene and sanitation requirements

RANGE STATEMENT	
include:	<ul style="list-style-type: none"> • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • state and territory regulations regarding meat processing.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify anatomical features of a sheep carcase	1.1. Directions on a carcase are described using the anatomical direction format. 1.2. Bones relevant to meat <i>specifications</i> in a sheep skeleton are located and identified 1.3. Major <i>muscles</i> relevant to meat specifications are identified. 1.4. Major glands and cartilage relevant to meat specifications are identified.
2. Identify and name meat products using the standard product description	2.1. Nature and format of product specifications are identified. 2.2. Standardised cut descriptions are used and correctly spelt to name meat products 2.3. Major muscles that make up each meat cut are identified. 2.4. Correct cutting lines for each product are identified using the correct anatomical features to describe the cutting lines. 2.5. What must be altered from any given meat product for it to comply with the company product specification is identified.
3. Check <i>sheep product</i> complies with written specifications	3.1. Sheep product compliance with written specifications is checked and principles of Quality Assurance (QA) are described. 3.2. Sections of the workplace quality assurance system related to ensuring sheep product compliance are described to AUS-MEAT product description. 3.3. Non-conforming product is defined and described in relation to <i>workplace requirements</i> . 3.4. Critical Control Points (CCPs) are identified and monitored in accordance with workplace requirements.
4. Assess product compliance	4.1. Product compliance with written specifications is assessed in accordance with workplace and AUS-MEAT product description requirements. 4.2. Product description given in written specifications is identified and explained. 4.3. Corrective action is taken in the event of non-conformance to sheep product specifications.
5. <i>Measure and check</i> product compliance	5.1. Cutting lines and muscle content is checked in accordance with written specifications.

ELEMENT	PERFORMANCE CRITERIA
against written specifications	5.2. Non-conforming product that can be made to comply with the specification is identified.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- apply relevant *communication* and *problem-solving skills*
- work effectively as an individual and as a team member
- identify and apply relevant *Occupational Health and Safety (OH&S) requirements*
- identify and apply relevant workplace and *regulatory requirements*
- identify and explain AUS-MEAT language specifications on sheepmeat product label
- identify non-conforming product in accordance with specifications
- take action to improve own work practice as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

- corrective action procedures for non-conforming product
- product specification points

MTMPSR5601C Design and manage the food safety system

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to design and manage food safety programs for a meat industry enterprise including meat processing, smallgoods, retail and food services operations. The unit also covers skills and knowledge for working with customers and consumers on food safety issues.
------------------------	---

Application of the Unit

Application of the unit	<p>This unit is appropriate for all managers in a food safety and/or Quality Assurance (QA) role, and for those working in production roles with responsibility for food safety and QA within their job role.</p> <p>Food safety is a critical element of product quality and is a priority for all sectors of the meat processing industry. Food safety is also a community issue and public perceptions of the safety of meat and meat products impact on the viability of meat processing enterprises.</p>
--------------------------------	---

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish enterprise meat or food safety system requirements	<p>1.1. Goals, scope and requirements of <i>food safety system</i> are determined, consistent with customer, enterprise and <i>regulatory requirements</i>.</p> <p>1.2. Alternative food safety systems are evaluated against enterprise requirements and preferred system is identified.</p> <p>1.3. Development of the food safety system is carefully planned, using team and consultative approaches.</p> <p>1.4. Resource requirements, including staff training requirements, for effective systems operation and maintenance are identified and obtained.</p>
2. Develop food safety systems	<p>2.1. Food safety responsibilities, obligations and roles are identified and clearly explained to <i>stakeholders</i>.</p> <p>2.2. Processes covered by the food safety system are identified and described.</p> <p>2.3. Food safety hazards are identified for all processes within the scope of the food safety system.</p> <p>2.4. Hazard control measures are identified, developed and validated.</p> <p>2.5. Procedures for <i>preventative action</i> are developed.</p>
3. Establish monitoring procedures and corrective actions	<p>3.1. Monitoring procedures are developed and <i>monitoring</i> information is used to inform <i>corrective actions</i>.</p> <p>3.2. Corrective actions are developed and implemented to effectively control hazards.</p> <p>3.3. Recording and <i>documentation</i> procedures are developed, maintained and secured.</p> <p>3.4. <i>Strategies to support the workforce</i> in the routine and consistent application of food safety systems are developed, resourced and implemented.</p>
4. Evaluate food safety system	<p>4.1. <i>Audit procedures</i> are established and audits monitored.</p> <p>4.2. <i>Verification procedures and schedules</i> are established and verification information is used in the review of the food safety system.</p> <p>4.3. Food safety system is reviewed and updated for changes in Australian Standards, <i>technical information</i> (including verification data) and process information according to established procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>4.4. Food safety systems are prepared for external review and approval by relevant authorities.</p> <p>4.5. Performance information is used to measure performance against policies and goals.</p>
5. Communicate food safety outcomes	<p>5.1. Interactions with the public, regulatory authorities and agencies are conducted in a positive, cooperative and open manner.</p> <p>5.2. Food safety incidents and non-compliances are reported promptly to relevant authorities.</p> <p>5.3. Customer and consumer feedback is gathered, analysed and included in review of the food safety system.</p> <p>5.4. Food safety system outcomes are documented to promote public confidence in enterprise products and services.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- analyse performance information to determine progress and areas for review or improvement
- consult with stakeholders to determine the scope of the *food safety systems, procedures and controls* and identify food handling practices, processing techniques and support programs in use
- demonstrate detailed knowledge of Hazard Analysis Critical Control Point HACCP principles and techniques and where appropriate to the enterprise, Good Manufacturing Practices (GMP)
- demonstrate detailed knowledge of *validation* and verification (including audit) purposes and processes
- demonstrate substantial product and process knowledge and the microbiological, physical and chemical impacts on the safety of enterprise meat and meat products in the identification of hazards and the assessment and control of food safety risks
- determine measures for correcting processes or outcomes outside acceptable limits or support program requirements including procedure to be followed, when corrective action must be implemented, the person responsible for taking corrective

REQUIRED SKILLS AND KNOWLEDGE

action and the information to be recorded

- develop and validate control measures using objective data, industry guidelines and codes of practice
- develop performance standards and criteria for the food safety system
- develop strategies to support the workforce in the implementation of the food safety system
- establish internal audit processes and schedules, including developing and leading the audit team
- establish procedures to monitor, review and secure record-keeping systems consistent with regulatory requirements
- establish verification procedures and schedules and identify action required if the outcomes of verification indicate that the program requirements have not been met or that the original program was inadequate
- establish, monitor and continuously improve food safety support systems consistent with regulatory requirements
- evaluate alternative food and/or meat safety systems for suitability for enterprise goals and directions, enterprise operations, enterprise product, cost and customer and regulatory requirements
- identify and apply relevant *Occupational Health and Safety (OH&S)*, regulatory and *workplace requirements*
- identify *monitoring requirements* and develop monitoring procedures *for food safety hazards* identified in the enterprise
- identify workforce training needs and negotiate and schedule training to support system requirements and operation
- liaise with suppliers to establish and monitor enterprise food safety and quality requirements for products and processes
- maintain currency of knowledge through independent research or professional development
- monitor *public health requirements* and concerns and prepare reports for the enterprise, public health authorities, customers and consumers on progress and outcomes of the food safety system.
- monitor the implementation of preventative action measures, controls and actions to correct non-compliance or non-conformances
- prepare accurate reports for senior management detailing compliance breaches/incidents, actions and outcomes and the implications for the enterprise
- prepare action plans for the development and review of the food safety system, which include timelines, the establishment, leading and support of the HACCP team
- prepare and present food safety system information, procedures, documentation and reports in languages, formats and styles appropriate for the audience and purpose
- prepare *communication* strategies to inform internal and external stakeholders of progress and outcomes of the food safety system

REQUIRED SKILLS AND KNOWLEDGE

- prepare HACCP plans and support documentation including hazard analysis charts and tables, manuals, data analysis reports, corrective action reports and verifications reports, Standard Operating Procedures (SOPs) and work instructions where appropriate for the enterprise system
- provide feedback to the workforce or team on food safety performance
- take action to improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology.
- use appropriate communication skills and strategies for informing and confirming the roles, responsibilities and obligations of all participants in the operation of the enterprise
- use available technology and *data management systems* to gather, record, manipulate, interpret and report food safety data and information

Required knowledge

Knowledge of:

- enterprise's ethical standards and the implications for the food safety system
- roles, responsibilities and obligations of the enterprise and individuals in the food safety system
- regulatory requirements for food safety, including HACCP-based programs, support programs, record-keeping, verification and internal/external audits, and explain the implications for enterprise operations
- scope, auditor role and responsibility, and scheduling requirements for internal and external audit process
- legal responsibilities for reporting audit findings, including breaches and non-compliances to enforcement agencies, and for conflicts of interest, confidentiality, rights of appeal and giving evidence in court

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment

Resources may include:

- a real work environment
- relevant documentation such as:
 - workplace policies and procedures
 - manufacturer instructions and operations manuals
 - regulatory requirements
- relevant equipment and materials.

Method of assessment

Recommended methods of assessment include:

- a third-party referee report of sustained performance at appropriate level of authority and responsibility
- assignment focusing on understanding and application of principles and theory to workplace operations

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> workplace projects which focus on company environment and conditions. <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Food safety systems:</i>	<ul style="list-style-type: none"> are written documents required by legislation which specify how businesses will control all food safety hazards that are reasonably expected to occur within a food enterprise may be developed by personnel within the enterprise or by external consultants may be developed within an enterprise's QA system or as a discrete program must provide for the systematic monitoring of controls and actions to correct hazards not under control (records demonstrating action in relation to or in compliance with the food safety program must be kept) may be for export or domestic processing, smallgoods manufacturing, wholesaling, cold stores or retail enterprises may be ISO-based or non ISO-based.

RANGE STATEMENT	
Regulatory requirements may include:	<ul style="list-style-type: none"> • animal welfare • commercial law including fair trading, trade practices • consumer law • corporate law, including registration, licensing, financial reporting • environmental and waste management • Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment • Export Control Act • industrial awards, agreements • Australian Standards • relevant regulations • state and territory regulations regarding meat processing • taxation.
Stakeholders may include:	<ul style="list-style-type: none"> • company owners, directors, shareholders, financiers • competitors • management and employees • regulatory authorities • suppliers, customers, consumers • unions and employer associations.
Preventative action may involve:	<ul style="list-style-type: none"> • revision of materials, processes and/or food handling procedures • revision of workplace practices and documentation such as specifications, SOPs, approved supplier programs, and work instructions.
Product/process monitoring may be:	<ul style="list-style-type: none"> • microbiological or chemical testing • online testing • sensory.
A corrective action plan identifies:	<ul style="list-style-type: none"> • non-conformance • corrective actions • date by which action must be taken • other follow up requirements.
Food safety documentation includes:	<ul style="list-style-type: none"> • amendment registers • Critical Control Point (CCP) monitoring forms and additional monitoring requirements • CCP work instructions • factory/shop floor plan

RANGE STATEMENT	
	<ul style="list-style-type: none"> • HACCP audit table • HACCP team register • hazard analysis table • process flow charts • product description or use • supporting programs and schedules relating to hygiene, cleaning and sanitation procedures, work instructions, approved chemicals, calibration, pest control, training, product identification and recall.
Technical information includes:	<ul style="list-style-type: none"> • conditions for bacterial food poisoning, including: <ul style="list-style-type: none"> • product composition • temperature • time • aw • pH.
Strategies to support the workforce in the implementation of the food safety system may include:	<ul style="list-style-type: none"> • clear signage • coaching and mentoring • development and presentation of procedures in plain language and visuals • implementation of problem-solving by work teams to develop and monitor food safety procedures • initial and refresher structured training programs • provision of appropriate work areas and equipment.
Food safety systems, procedures and controls apply to:	<ul style="list-style-type: none"> • display, packaging and sale of food, including meat and meat products • equipment design, use and maintenance • handling and disposal of condemned or recalled food, including meat, products • location, construction and servicing of meat premises • processing, further processing and preparation of food including meat and meat products • receipt, storage and transportation of food including meat and meat products.
Validation is:	<ul style="list-style-type: none"> • the identification, collection and analysis of objective information to confirm that

RANGE STATEMENT	
	operations (e.g. equipment, processes, procedures) are able to provide the required food safety outcomes.
<i>Audit procedures</i> include:	<ul style="list-style-type: none"> • planning • establishing controls • developing the team • conducting entry and exit meetings • controlling caucus meetings • issuing corrective action requests • preparing reports • giving feedback and input into the improvement of the system.
<i>Verification procedures and schedules</i> may be defined in:	<ul style="list-style-type: none"> • legislation relevant to the sector (verification applies to all aspects of the food safety program including documentation, auditing and support programs).
<i>OH&S</i> requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • hygiene and sanitation requirements • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise ethical standards, values and obligations • enterprise-specific procedures, policies and plans

RANGE STATEMENT	
	<ul style="list-style-type: none"> • SOPs • work instructions.
<i>Monitoring requirements for food safety hazards</i> include:	<ul style="list-style-type: none"> • a description of the method or procedure to be followed • the frequency and timing • the information to be recorded (procedures to be followed would typically be specified in the form of a SOP or work instruction) • the person responsible.
<i>Public health requirements</i> include the impacts of pathogenic bacteria such as:	<ul style="list-style-type: none"> • Clostridium etc • E.coli • Listeria • Salmonella • Yersinia.
<i>Communication</i> may:	<ul style="list-style-type: none"> • be spoken, written, non-verbal and include the use of signs, signals, symbols and pictures • be with colleagues, team members, superiors, customers, clients, external parties from a range of cultural, social and ethnic backgrounds • involve reading and interpreting workplace documents • require the use of negotiation, persuasion and assertiveness skills.
<i>Data management systems</i> may be manual or computerised, cover data collection, data monitoring and data analysis and interpretation and include:	<ul style="list-style-type: none"> • calculators • charting and graphing materials • computer software packages including spreadsheets, statistical analysis packages • computerised equipment • inspection regimes • manual measuring equipment (e.g. thermometers, pressure gauges, scales) • monitoring sheets and records • product quality and safety.

MTMR308C Prepare and produce value-added products

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to prepare and produce more complex value added products, such as those employing pastries, dairy products or cooking. It includes preparing ingredients and following recipes. The operation of processing equipment to produce value-added products may also be required.
------------------------	--

Application of the Unit

Application of the unit	This unit is applicable to meat retailing and food services enterprises.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units	Nil	

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare and operate processing equipment used in producing <i>value-added products</i>	<p>1.1. Processing equipment is prepared and operated according to hygiene, and health and safety requirements.</p> <p>1.2. Faults are identified in line with manufacturer and <i>workplace requirements</i>.</p> <p>1.3. Equipment is used according to manufacturer, workplace and <i>Occupational Health and Safety (OH&S) requirements</i>.</p> <p>1.4. Start-up and shut-down procedures are performed according to manufacturer and workplace requirements.</p>
2. Clean processing equipment	2.1. Equipment is cleaned to manufacturer's, OH&S, hygiene and workplace requirements.
3. Follow recipe	3.1. Recipes are followed to prepare and produce value-added products to product specifications.
4. Select <i>ingredients</i> for formulation of value-added products	<p>4.1. Ingredients are selected in accordance with recipes, policy and practice, and <i>regulatory requirements</i>.</p> <p>4.2. Ingredients are weighed in accordance with recipe specifications and regulatory requirements.</p> <p>4.3. Ingredients are labelled according to workplace and regulatory requirements.</p>
5. Prepare meat, stuffings, seasonings and force meat for value-added products	<p>5.1. Meat is prepared according to recipes, policy and practice.</p> <p>5.2. Stuffings, seasonings and force meat are prepared in accordance with recipes, policy and practice.</p>
6. Prepare marinades, sauces, and glazes for value-added product	6.1. Marinades, sauces and glazes are prepared in accordance with recipes, policy and practice.
7. Mix ingredients	<p>7.1. Ingredients are weighed in accordance with recipe requirements.</p> <p>7.2. Ingredients are added to meat according to recipes, product specifications and regulatory requirements.</p> <p>7.3. Ingredients are blended to achieve product consistency according to recipes and product specifications.</p>
8. Produce value-added products	<p>8.1. Product is formulated according to product specifications.</p> <p>8.2. Product is presented according to product specifications and policy and procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
	8.3. Pastry types are used correctly to recipes and workplace requirements. 8.4. Meat is skewered according to recipes and workplace requirements.
9. Store products and ingredients	9.1. Product is stored according to workplace and regulatory requirements. 9.2. Ingredients are stored according to workplace and regulatory requirements. 9.3. Shelf life of products is identified and appropriate action taken. 9.4. Effects of ingredients on shelf life are identified and appropriate action taken.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- make adjustments to equipment when necessary according to manufacturer's, workplace and OH&S requirements
- *describe* shelf life of products, factors affecting shelf life and effects of different ingredients on shelf life
- *explain* the permissible use of additives and ingredients in value-added products
- identify suitable alternatives from existing stock where quantities of required ingredients are not available, as applicable
- work with team members to develop new value-added products
- identify sub-standard product and rectify appropriately
- label value-added products according to workplace and regulatory requirements
- provide advice to customers on ingredients in value-added products
- seek advice on new recipes and products from appropriate sources
- use *communication skills* appropriate to the task
- use *mathematical skills* as required for production of value-added products
- estimate measures to verify calculations

Required knowledge

REQUIRED SKILLS AND KNOWLEDGE

Knowledge of:

- regulatory requirements regarding use and storage of fruit and vegetables
- shelf life of products, factors affecting shelf life and effects of different ingredients on shelf life
- range of effects on the product and on consumer health of the use of incorrect and inadequate quantities of ingredients
- properties of correct blending
- purpose and use of processing equipment in the preparation of value-added products
- use and purpose of stuffings, seasoning and force meat in producing value-added products
- use and purposes of ingredients in producing value-added products
- quality requirements related to production of value-added products
- effect of various ingredients on product shelf life
- procedures for cleaning processing equipment
- workplace, OH&S and hygiene requirements related to producing value-added products

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

The candidate must be able to produce value-added meat products from a minimum of three species, using pastry, fresh produce, dried herbs and spices and marinades.

Where the candidate does not produce value-added products in their usual place of work they must complete the requirements of the unit in an alternative work placement or in a simulated environment.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal operating conditions or in a simulated environment.

Method of assessment

Recommended methods of assessment include:

- verified work log or diary
- workplace assignment
- workplace referee or third-party report of

EVIDENCE GUIDE	
	<p>performance over time.</p> <p>Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.</p>
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Value-added products</i> may include:	<ul style="list-style-type: none"> • beef wellington • fillet mignon • goldfield racks with camembert • pastry meat products • tornadoes (e.g. pork and apple) • veal cordon bleu.
<i>Workplace requirements</i> may include:	<ul style="list-style-type: none"> • enterprise-specific procedures and ethical standards • Standard Operating Procedures (SOPs) • work instructions.
<i>OH&S</i> requirements may include:	<ul style="list-style-type: none"> • enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: <ul style="list-style-type: none"> • coats and aprons

RANGE STATEMENT	
	<ul style="list-style-type: none"> • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
<p>Ingredients vary depending on the products and may include:</p>	<ul style="list-style-type: none"> • brines • fruit • glazes • marinades prepared from a recipe • meat • nuts • pastry (e.g. filo, shortcrust, puffed, flaky) • satays • sauces • skewers • sprinkles • stuffings prepared from a recipe • vegetables.
<p>Regulatory requirements may include:</p>	<ul style="list-style-type: none"> • Export Control Act • federal, state and territory regulations regarding meat processing and food handling • hygiene and sanitation requirements • relevant Australian Standards.
<p>Descriptions and explanations may:</p>	<ul style="list-style-type: none"> • be presented orally, in writing using standard formats or using a range of communications technology and media • include information from several sources • present information in diagrammatic, tabular, graphic or pictorial formats • require summaries of information for presentation to work colleagues • use workplace, mathematical and technical language.

RANGE STATEMENT	
<i>Communication skills</i> may include:	<ul style="list-style-type: none"> • interacting with people from a range of cultural, social and ethnic backgrounds and with colleagues, superiors, customers, clients and external parties • speaking clearly and directly • the use of communication technology • own work and the wider work area • reading and interpreting workplace documentation.
<i>Mathematical skills</i> may include:	<ul style="list-style-type: none"> • estimating and calculating • the use of calculators and computer software packages • the use of familiar and unfamiliar complex formula • product formulations and specifications • interpreting and drawing conclusions from a range of simple and complex mathematical tables, charts, bar graphs and pie charts • monitoring, adjusting and calibrating formula, specifications, outputs and equipment • synthesis and analysis of mathematical information from more than one source.

PMASUP420B Minimise environmental impact of process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This competency covers minimising waste and environmental threats from a plant and/or a process. It covers all resources used and products made by the plant, and is performed by more experienced operators who might be expected to develop and implement improvements to processes within the plant. This unit may be performed individually or as part of a team.</p> <p>This competency also applies to capital projects, as well as improvements brought about by changes in work practices and procedures</p>
------------------------	---

Application of the Unit

Application of the unit	<p>In this competency, an operator would develop practices or procedures for:</p> <ul style="list-style-type: none"> • conserving resources • minimising pollution • minimising waste. <p>This requires the operator to have a good understanding of the resources used by the plant, the nature and source of pollutants and the waste materials produced by the plant. It also requires the operator to understand the impact of using resources, and the effect pollutants and waste can have on the local environment.</p> <p>When developing a process or practice, the operator would identify which resource, pollutant or waste product that if reduced would give the most benefit. After developing procedures to conserve resources or minimise pollution/waste produced by the plant, the operator would then document the procedures to implement the changes.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop resource conservation practices and/or procedures.	1.1. Identify the nature of resources used in the plant/process 1.2. Determine the primary source of these resources 1.3. Describe the impact of the depletion of these resources on the environment and society 1.4. Determine which resource(s) will yield a greater benefit from their conservation 1.5. Develop methods to reduce the consumption of these resources 1.6. Complete required documentation to implement change
2. Develop pollution minimisation practices and/or procedures.	2.1. Identify the nature of pollutants produced by the plant/process 2.2. Determine the source(s) of these pollutants within the plant/process 2.3. Describe the impact of these pollutants on the environment and society 2.4. Determine which pollutant(s) will yield a greater benefit from their reduction 2.5. Develop methods to reduce the production of this pollutant 2.6. Complete required documentation to implement change.
3. Develop waste minimisation practices and/or procedures.	3.1. Identify the nature of wastes produced by the plant/process 3.2. Determine the source(s) of these wastes within the plant/process 3.3. Describe the impact of these wastes on the environment and society 3.4. Determine which waste(s) will yield a greater benefit from their reduction 3.5. Develop methods to reduce the production of this waste 3.6. Complete required documentation to implement change.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills

Competence to also include the ability to apply and explain:

- nature and severity of potential environmental hazards caused by the plant/process
- sensitivity of local environment to these environmental threats
- pathways of entry to the environment from the plant
- regulatory requirements such as environment protection regulations, OHS, HAZCHEM, duty of care, dangerous goods
- external licensing requirements such as EPA, water authorities, local councils
- enterprise procedures and practices.

Required knowledge

Knowledge and understanding of the control of environmental incident process and the importance of critical parameters enough to minimise waste and environmental threats from a plant and/or a process within an organisation.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which will include disruptions to normal, smooth operation.

Assessment of this unit may be best achieved with a suitable project. This will minimise possible impact on the environment caused by the process or some aspect of the process. Such a project may be regarded as adequate provided it meets all the Performance Criteria of at least one Element. It is not necessary to cover all elements.

This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk-throughs of abnormal operations) and off the plant.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action. The emphasis should be on the ability to stay out of trouble rather than on recovery from a disaster.

Consistent performance should be demonstrated. In particular look to see that:

- procedures are developed to reduce the consumption of resources, or to minimise pollution and/or waste products
- appropriate documentation is completed to implement changes
- the greatest yield is achieved by appropriate selection of type of resource usage, type of

EVIDENCE GUIDE	
	<p>pollutant or waste product.</p> <p>These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk-through forming part of the response. These assessment activities should include a range of problems, including new, unusual and improbable situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources.</p>
Context of and specific resources for assessment	<p>Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.</p>
Method of assessment	<p>In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units. Consider co-assessment with:</p> <ul style="list-style-type: none"> • Competency units relevant to the type of process equipment. <p>In a major hazard facility, it may be appropriate to assess this unit concurrently with OHS units.</p>
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.</p>

Range Statement

RANGE STATEMENT	
<p>The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.</p>	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	<p>This competency is performed by more experienced operators and may be performed individually or as part of a team. It includes the following indicative functions:</p> <ul style="list-style-type: none"> • examining plant records • examining operating procedures and practices • liaising with a range of internal people • modifying/updating standard operating procedures to 'lock in' any changes. <p>Typical objectives will include:</p> <ul style="list-style-type: none"> • minimisation of waste • maximisation of product yield from raw materials • reduction in volume of pollutants made • reduction in concentration/intensity of pollutants made • reduction in emissions. <p>All operations are performed in accordance with standard procedures and policies.</p>
Health, safety and environment (HSE)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

Competency field

Co-requisite units

Co-requisite units

PMBPROD211B Operate blow moulding equipment

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the operation of blow moulding equipment and the resolving of routine problems to procedure.

Application of the Unit

Application of this unit

This competency applies to operators who are required to undertake the routine operation of blow moulding equipment. This competency is typically performed by operators working either independently or as part of a work team.

The operator:

- takes product off the machine,
- checks product for quality and conformity to specifications
- checks raw material feed
- notices any problems and takes required action (e.g.reporting)
- deals with non-conforming products, waste and scrap
- completes logs and reports.

They may record key variables such as machine conditions and production rate and reasons for interruptions.

This unit does not include:

- packing of product - see *MSASUP204A Pack products or materials*
- finishing of product - see *PMBFIN201 Finish products and components*.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Check work requirements.	1.1 Identify work requirements from production plan or request. 1.2 Check product, materials and equipment meet requirements for job(s). 1.3 Recognise requirements which may not be in accordance with usual practice. 1.4 Ask questions of appropriate person to confirm unusual practice. 1.5 Ensure housekeeping is to requirements. 1.6 Identify hazards associated with the job and take appropriate action. 1.7 Perform other pre-operational checks in accordance with procedures.
2. Start up blow moulding equipment to procedures.	2.1 Conduct pre-start checks. 2.2 Start up equipment safely and 'dry run' to warm hydraulics and components to operating temperature before production, as required. 2.3 Check condition of equipment and introduce raw materials as required.
3. Operate blow moulding equipment to procedures.	3.1 Check process is operating within required limits. 3.2 Check product is in specification and to required quality standard. 3.3 Ensure product is consistently ready for next operation. 3.4 Maintain supply of material(s) as required. 3.5 Complete logs and records as required. 3.6 Collect and segregate scrap, trim and other materials as required. 3.7 Keep equipment and work area clean . 3.8 Pause machine cycle and perform emergency stop, as required.
4. Respond to routine problems to procedures.	4.1 Identify likely faults that occur during the operation. 4.2 Identify and take action on causes of routine faults in accordance with procedures. 4.3 Make sure appropriate records and log books of

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	equipment operations are maintained to meet procedures. 4.4 Identify non-routine problems and report to designated person.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Application of an operational knowledge of the materials, equipment and process sufficient to recognise out of specification products, process problems and materials faults. For example, the product may not be fully inflated, leading to undersized and malformed product. Blow pressure may be insufficient or the compressed air supply may be partially blocked.

Knowledge of organisation procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards. For example action must only be taken if the parison mass varies by more than 2 grams.

Application of the knowledge of managing risks using the hierarchy of controls applied to the blow moulding process. Application of approved hazard control, safety procedures and the use of PPE in relation to handling materials, equipment operation and cleanup.

Knowledge of and skills in the operation of blow moulding equipment and main components sufficient for consistent production of quality products including:

- production workflow sequences and materials demand
- the reasons for checking process control panels and reporting readings which are outside of normal range of process variability
- accurately monitoring equipment operation and product quality
- purpose and requirements of 'dry running' before starting production
- the potential effects of variations in raw materials and equipment operation in relation to quality of product
- processing behaviour of polymers and the role of additives
- waste management and knowing the importance of reusing non-conforming products wherever possible
- correct selection and use of equipment, materials, processes and procedures
- explain the effect of unauthorised or emergency shutdown in relation to safety and production requirements
- identify factors which may affect product quality or production output and appropriate remedies.

Competence also includes the ability to:

- plan own work, including predicting consequences and identifying improvements
- identify when the operator is able to rectify faults, when assistance is required and who is the appropriate source for assistance
- identify and describe own role and role of others involved directly in the blow moulding process.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical product specifications, job sheets, procedures, basic machine control panels, material labels and safety information as provided to operators.

Writing is required to the level of completing workplace forms.

Basic numeracy is required, (eg to determine that two 25 kg bags are needed for a requirement for 50 kg).

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- apply the required skills and knowledge to operate a blow moulding machine
- apply approved procedures.

Consistent performance should be demonstrated. For example, look to see that blow moulding production standards are met consistently.

Assessment method and context

Assessment will occur on an industrial blow moulding machine(s) equipment and will be undertaken in a work-like environment.

Competence in this unit may be assessed:

- by using an appropriate, industrial blow moulding machine requiring demonstration of operation and emergency stop procedures
- in a situation allowing for the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all blow moulding operations within the plastics and rubber sectors. It includes the operation of all relevant additional equipment where that equipment is integral to the blow moulding process.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

- bottom blow, top blow, needle blow, tail to tail blow, parison
- pre-blow and pre-squeeze, parison stretching and parison orientation type machines
- ancillary equipment (such as chillers/cooling towers, die heating equipment, hopper driers, mixing hoppers, dehumidifying driers, air compressors, dosing machines, colour blending equipment and conveyors)
- hand tools used in the blow moulding process
- material loading equipment used for loading of raw materials
- relevant personal protective equipment.

Hazards

Typical hazards include:

- spills
- dusts/vapours
- slip and fall (such as due to spilt granules)
- temperature (such as due to heated moulds)
- hazardous substances (including decomposing polymer during start up and shut down)
- moving equipment (such as moving moulds, robots and ancillary equipment)
- manual handling hazards.

Problems

'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'. Typical process and product problems may include:

- equipment malfunction
- variations in temperature, pressure, speed, inflation
- variations in materials or contamination of materials
- incorrect quantity of materials/additives
- die damage
- routine blow moulding faults (eg wall thinning, holes, poor surface finish, warping, poor colour dispersion, ejection damage, colour contamination, black spots and other defects)
- machine malfunction
- die/tooling problems.

Unit Descriptor

Unit descriptor

This competency covers the operation of injection blow moulding equipment and the resolving of routine problems to procedure.

This competency is typically performed by operators working either independently or as part of a work team.

Application of the Unit

Application of this unit

This competency applies to operators who are required to undertake the routine operation of injection blow moulding equipment. The key factors are the making of products to meet quality standards and workplace requirements.

It includes:

- checking job sheets for work requirements
- recognising hazards and taking appropriate action
- starting up and shutting down injection blow moulding equipment
- monitoring injection blow moulding equipment operation and reporting process variations
- checking product for quality and conformity to specifications
- discarding non-conforming products, ensuring re-use where possible
- identifying and taking action on routine process problems
- completing logs and reports.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Check work requirements.	1.1 Identify work requirements from procedures. 1.2 Identify product, materials and equipment requirements for job(s). 1.3 Recognise hazards and take appropriate action. 1.4 Check with supervisor/appropriate person if requirements are not in accordance with usual practice.
2. Conduct pre-start checks as required.	2.1 Check safety gates and guards are in position and working. 2.2 Check raw materials are correct. 2.3 Undertake other pre-start checks to procedures. 2.4 Start up equipment safely and 'dry run' to warm hydraulics and components to operating temperature before production, as required.
3. Operate equipment to procedures.	3.1 Check condition of equipment and introduce raw materials as required. 3.2 Check product/process is within required limits. 3.3 Collect products and store as required. 3.4 Check product is in specification/to required quality standard. 3.5 Maintain supply of material(s) as required. 3.6 Complete logs and records when required. 3.7 Collect and reprocess/discard scrap/trim and other materials. 3.8 Clean up equipment and work area. 3.9 Pause equipment, or stop equipment in an emergency, as required.
4. Respond to routine problems to procedures.	4.1 Recognise known faults that occur during the operation. 4.2 Identify and take action on causes of routine faults. 4.3 Log problems as required. 4.4 Identify non-routine process and quality problems and take appropriate action.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Application of knowledge of the materials, equipment and process sufficient to recognise out of specification products, process problems and materials faults.

Knowledge of organization procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards.

Application of the knowledge of managing risks using the hierarchy of controls applied to the injection blow moulding process. Application of approved hazard control, safety procedures and the use of PPE in relation to handling materials, equipment operation and cleanup.

Knowledge of and skills in the operation of injection blow moulding equipment and main components sufficient for consistent production of quality products including:

- production workflow sequences and materials demand
- the reasons for checking process control panels and reporting readings which are outside of normal range of process variability
- accurately monitoring equipment operation and product quality
- the potential effects of variations in raw materials and equipment operation in relation to quality of product
- processing behaviour of polymers and the role of additives
- waste management and knowing the importance of reusing non-conforming products wherever possible
- correct selection and use of equipment, materials, processes and procedures
- explain the effect of unauthorised or emergency shutdown in relation to safety and production requirements
- identify factors which may affect product quality or production output and appropriate remedies.

Competence also includes the ability to:

- plan own work, including predicting consequences and identifying improvements
- identify when the operator is able to rectify faults, when assistance is required and who is the appropriate source for assistance
- identify and describe own role and role of others involved directly in the injection moulding process.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical product specifications, job sheets, procedures, material labels and safety information as provided to operators.

Writing is required to the level of completing workplace forms.

Basic numeracy is required, eg to determine that two 25 kg bags are needed for a requirement for 50 kg.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- recognise the importance of material properties and qualities
- apply approved procedures
- take appropriate action to resolve faults or report faults to appropriate personnel
- explain and implement emergency shutdown procedures.

Consistent performance should be demonstrated. For example, look to see that:

- injection blow moulding production standards are met consistently upstream and downstream communication is timely and effective operating procedures and work instructions are read and interpreted correctly
- problems are identified and appropriate action is taken (ie the problem is fixed or reported)
- all safety procedures are followed.

Assessment method and context

Assessment will occur on industrial blow moulding equipment in a work-like environment.

Competence in this unit may be assessed:

- by using an appropriate, industrial injection blow moulding machine requiring demonstration of operation and emergency stop procedures
- in a situation allowing for the generation of evidence of the ability to respond to problems
 - by using a suitable simulation and/or a range of case studies/scenarios
 - through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required.

Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all injection blow moulding operations within the plastics and rubber sectors. It includes the operation of all relevant additional equipment where that equipment is integral to the injection blow moulding process.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

- electrical, pneumatic, mechanical, electromechanical and hydraulic injection blow moulding machines and components such as base, frame, feed hoppers and material supply mechanisms, barrel and screw plastification unit, injection blow units, die/ mould tool additional equipment, including chillers/cooling towers, die heating equipment, hopper driers, mixing hoppers, dehumidifying driers, air compressors, dosing machines, colour blending equipment and conveyors
- hand tools used in the injection blow moulding process
- material loading equipment used for loading of raw materials
- relevant personal protective equipment.

Hazards

Typical hazards include:

- spills
- dusts/vapours
- slip and fall, particularly due to spilt granules
- temperature
- hazardous substances
- moving equipment
- manual handling hazards.

Problems

'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'. Typical process and product problems may include:

- equipment malfunction
- variations in temperature, pressure, speed, inflation
- variations in materials or contamination of materials
- mould damage

- routine injection blow moulding faults - wall thinning, holes, poor surface finish, warping, poor colour dispersion, ejection damage, colour contamination, black spots and other defects
- mould/tooling problems.

Variables

Key variables to be monitored include:

- operating temperatures
- speed
- cycle time
- output rate
- concentration or dispersion of colour
- product weight
- product wall thickness
- product integrity and general conformance to specification/sample.
-

Unit Sector(s)

Not applicable.

PMBTECH406A Diagnose production equipment problems

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers diagnosing the causes of products faults and problems arising from the equipment/plant. These problems may be caused by inappropriate process conditions and/or equipment faults. The competency does not include the rectification of such faults or equipment diagnostic skills more appropriate to maintenance tradespersons, but does include diagnosis to a sufficient level so that identification of faults as equipment or process based can be made and appropriate directions can be given to rectify the problem.

Application of the Unit

Application of this unit

This competency applies to technicians who are required to examine products which have faults, even though they may not be rejects, and determine the likely causes of such faults. The technician might also be required to examine production faults such as where the process as a whole is not performing adequately. The technician would then further investigate the likely equipment, plant and/or process causes of the faults and isolate the most probable cause and recommend the solution. They may then monitor the implementation of the solution and check that the fault has been fixed.

It includes:

- examining products
- identifying faults
- identifying fault causes
- recommending solutions to faults
- checking the fault has been rectified.

While this unit does not require 'hands on competence' for the operation of process equipment, it does require an understanding of the principles of operation of the equipment and the impact of process conditions and equipment faults or changes on the product characteristics/properties. It also requires an understanding of the quality/ inspection/testing regime and the results of this regime and how process conditions and equipment faults or changes impact these results of this regime.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Identify faults in products/production.	1.1 Examine products/production process. 1.2 Identify faults. 1.3 Categorise faults according to type/likely cause. 1.4 Prioritise faults for action.
2. Determine most probable possible cause(s) of fault	2.1 Analyse fault to determine possible causes. 2.2 Investigate possible causes to eliminate less probable causes. 2.3 Shortlist probable causes. 2.4 Check hypothesis of cause(s) is supported by the data available. 2.5 Identify most probable cause.
3. Implement solution to fault	3.1 Develop recommended solution to fault. 3.2 Check HSE implications of solution and modify solution as appropriate. 3.3 Communicate this recommendation as appropriate. 3.4 Check recommendation has been understood and can be implemented. 3.5 Check all hazard controls are in place. 3.6 Monitor progress of implementation. 3.7 Modify recommended solution as required.
4. Check fault solution has worked.	4.1 Monitor product/process for fault. 4.2 Monitor HSE impacts of changes. 4.3 Repeat analysis and solution process if required. 4.4 Update records and procedures to reflect successful solution.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

This competency requires a detailed understanding of:

- how the process/equipment works
- how raw material changes into product through the process/equipment
- impacts of different process conditions on the product
- impacts of different equipment settings/components on the product
- impacts of equipment failure/change/variation on the product
- product faults and their categories according to causes
- causes of all possible product faults due to process/equipment problems.

Note this is not primarily about faults caused by things outside the process/equipment (eg unspecified changes in feed/raw materials), but the possibility of this cause for a fault should be included as required knowledge.

Language, literacy and numeracy requirements

This unit requires the ability to communicate to operators, tradespeople and other technical experts about technical issues.

Reading is required to the level of being able to interpret and apply procedures, technical manuals and manufacturer manuals. Writing is also required to be able to write maintenance and similar requests/orders, update procedures and write equipment/process condition specifications.

Numeracy is required to interpret test data, technical specifications, instrument readings and measurements. Some calculation may be involved in developing and implementing solutions.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

This competency requires the diagnosis of real product faults and the development and implementation of solutions to these faults. The diagnosis of a number of faults with different types of causes should be required.

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects

It is essential that competence is demonstrated in the knowledge and skills defined in this unit.

These may include the ability to:

- recognise defective product
- isolate one or two most likely causes, and justify the selection of those causes
- devise a permanent solution to the problem and justify that solution
- check that the solution works
- work with all the required people to make it happen.

Consistent performance should be demonstrated. For example, look to see that:

- defects with different root causes are analysed
- defects with both process condition and equipment problem causes are solved
- defects across the applicable range of products and processes are solved

Context of assessment

Competence in this unit may be assessed:

- on a processing plant as a routine part of the job
- as special projects on a processing plant
- using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

Method of assessment

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required.

Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice and/or Australian/international standards, the latest version must be used.

Context

This competency applies to technicians who have a role of problem solving product faults as it relates specifically to equipment/process problems. While the technician will take the lead role in this activity, they will need to liaise with a range of people at all levels in the organisation to obtain information and to implement the solution.

This diagnosis and improvement may take place as a result of a problem where the fault level is causing reject product, or it may occur as part of continuous improvement, or a kaizen blitz or other situation where the products are not faulty, but are being improved.

Fault

A fault is any defect in a product, whether it causes the product to be defective or not.

Typical faults may include:

- colour variation (non-uniform, not to standard hue/intensity/opacity)
- surface blemishes (specs, marks)
- surface finish (gloss level, uneven)
- size/shape (distorted, wrong, variable)
- within specification, but highly variable, forms patterns etc (ie has 'assignable cause')
- strength/stiffness/physical properties (too high/low, variable, uneven)
- chemical properties
- physical/mechanical properties
- biological/biochemical/microbiological properties.

Examine

Examination of products/process may include:

- visual examination
- examination of product quality or other records
- examination of inspection records (if used)
- examination of test results (routine or otherwise)
- specific examination testing undertaken as part of a product improvement activity.

Possible causes

Possible causes include all feasible causes of the problem, before checking to eliminate some.

Investigate

Investigating possible causes includes:

- talking with operators and others
- checking machine histories for prevailing process conditions
- checking current process/equipment conditions
- carrying out small tests to determine the likelihood of a causal link between a condition and a fault.

Health Safety and Environment (HSE)

All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Procedures

All operations are performed in accordance with procedures.

Procedures means all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

- laboratory test facilities for the product (although the conduct of tests is not part of this unit)
- equipment test instruments for checking the condition of plant (although the conduct of these tests may not be part of this unit).

Process/equipment conditions

Process/equipment conditions may include:

- settings such as temperature, pressure
- rates such as feed rate, flow rate
- setting and adjustment of equipment parts
- worn and broken equipment parts.
-

Unit Sector(s)

Not applicable.

RIICBM305A Install pre-cast concrete bridge decks

Modification History

Not applicable.

Unit Descriptor

This unit covers the installation of pre-cast concrete bridge decks in the civil construction industry. It includes planning and preparing, installing bearings, installing concrete bridge decks, fixing bridge fittings, and cleaning up. Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the unit.

Application of the Unit

This unit is appropriate for those working in an operational role at worksites within:

- Civil construction

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply compliance documentation relevant to the work activity 1.2. Obtain, confirm and apply work instructions, including plans, specifications, quality requirements and operational details to the allotted task 1.3. Obtain and confirm <i>safety requirements</i> from the <i>site</i> safety plan and organisational policies and procedures, and apply to the allotted task 1.4. Identify, obtain and implement <i>signage requirements</i> from the project <i>traffic</i> management plan 1.5. Select <i>plant, tools and equipment</i> to carry out tasks consistent with the requirements of the job, check for serviceability and rectify or report any faults 1.6. Identify <i>environmental protection requirements</i> from the project environmental management plan, and confirm and apply to the allotted task
2. Install bearings	2.1. Determine <i>bearing types</i> and position from project drawings and specifications 2.2. Check bearing dimensions and material for quality against specifications 2.3. Install bearings as required by project drawings 2.4. Identify locating brackets/bolts and install in preparation for placement of girders as required
3. Install concrete bridge deck	3.1. Prepare <i>deck</i> components for grouting prior to placement in accordance with deck design and specifications 3.2. Place deck components 3.3. Carry out and complete pre-fabricated concrete decking grouting 3.4. Insert and tension pre-fabricated concrete decking transverse stressing bar as specified 3.5. Grout transverse stressing bar to specifications

	<p>3.6. Grout anchor bolts</p> <p>3.7. Place and specify deck joints of pre-fabricated decking and scuppers</p>
4. Fix bridge fittings	<p>4.1. Fit posts and bridge rails as per project drawings and specifications</p> <p>4.2. Assemble pre-fabricated stairs and install to specifications where required</p>
5. Clean up	<p>5.1. Clear work area and dispose of or recycle <i>materials</i> in accordance with project environmental management plan</p> <p>5.2. Clean, check, maintain and store plant, tools and equipment</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes the ability to carry out the following, as required to install pre-cast concrete bridge decks:

- apply legislative, organisation and site requirements and procedures for the installation of pre-cast concrete bridge decks
- organise work activities
- select and use relevant tools and equipment safely
- identify and report on hazards related to the worksite and work activity
- communicate effectively to receive and clarify work instructions

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes knowledge of the following, as required to install pre-cast concrete bridge decks:

- site and equipment safety requirements
- bridge construction and sequencing
- pre-cast concrete bridge decks and installation
- bearing types and installation
- safe lifting techniques
- safe working procedures, working at heights and over water
- processes for interpreting engineering drawings
- equipment types, characteristics, technical capabilities and limitations
- site isolation and traffic control responsibilities and authorities
- materials safety data sheets and materials handling methods
- project quality requirements
- civil construction terminology
- JSAs/safe work method statements

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for installing pre-cast concrete bridge decks • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of pre-cast concrete bridge deck installation • working with others to undertake and complete the installation of pre-cast concrete bridge decks that meets all of the required outcomes • consistent timely completion of pre-cast concrete bridge deck installation that safely, effectively and efficiently meets the required outcomes • installation of pre-cast concrete deck units including installation of transverse stressing bars and bearings on a multi-span bridge with a minimum length of twenty metres to specifications
<p>Context of and specific resources for assessment</p>	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • Assessment of this competency requires typical resources normally used in a resources and infrastructure sector environment. Selection and use of resources for particular worksites

	<p>may differ due to the site circumstances.</p> <ul style="list-style-type: none"> • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Where applicable, physical resources should include equipment modified for people with disabilities. Access must be provided to appropriate learning and/or assessment support when required.
<p>Method of assessment</p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes • consistent achievement of required outcomes • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and complete the installation of pre-cast concrete bridge decks
<p>Guidance information for assessment</p>	<p>Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.</p>

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Relevant compliance documentation may include:</p>	<ul style="list-style-type: none"> • legislative, organisational and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
<p>Safety requirements may include:</p>	<ul style="list-style-type: none"> • OHS requirements in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan, including protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances • safe parking practices including ensuring access ways are clear, equipment/machinery is away from overhangs and refuelling sites, safe distance are kept from excavations, and areas secured from unauthorised access or movement • safe operating procedures including recognising and preventing hazards associated with uneven/unstable terrain, trees, pits, poles, trip hazards, dirt mounds, overhead service lines, bridges, surrounding buildings, obstructions, structures, facilities, dangerous materials, recently filled trenches, other machines, personnel, traffic control, working in proximity to others, worksite visitors and the public • recognising hazards and risks including uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials • emergency procedures related to equipment

	operation including emergency shutdown and stopping, extinguishing equipment fires, organisational First Aid requirements and evacuation
Site may include:	<ul style="list-style-type: none"> • bridges • piers • wharves • jetties
Signage requirements may include:	<ul style="list-style-type: none"> • site safety signage • temporary signage for the benefit of motorists and pedestrians • barricades • traffic conditions signage
Traffic may include:	<ul style="list-style-type: none"> • congested urban environments • low traffic rural areas • off-road un-trafficked areas • buildings • parking sites • pedestrian areas
Plant, tools and equipment may include:	<ul style="list-style-type: none"> • fall arrestors • tag lines • drifts • spanners • pneumatic wrenches and drills • compressors and hoses • tape measures • marking equipment • ladders • winches • lifting equipment • power saws • slings • cranes • scaffolding
Environmental protection requirements may include:	<ul style="list-style-type: none"> • organisational/project environmental management plans • waste management • water quality protection • noise • vibration • dust and clean up management

Bearing types may include:	<ul style="list-style-type: none"> • elastomeric • mortar pad
Deck may include:	<ul style="list-style-type: none"> • bridge rails • pre-cast kerbing • stairs • posts • hand rails • deck joints
Materials may include:	<ul style="list-style-type: none"> • pre-cast concrete bridge deck units • bearings • bridge rails • bridge joints • mortar • epoxy

Unit Sector(s)

Construction and Maintenance (General)

Competency field

Refer to Unit Sector(s).

Co-requisite units

Not applicable.

RIIHAN305A Operate a gantry or overhead crane

Modification History

Not applicable.

Unit Descriptor

This unit covers the operation of a gantry or overhead cranes in the resources and infrastructure industries. It includes planning and preparing, operating the crane and carrying out operator maintenance. The work described in this unit relates to the National Occupational Health and Safety Certificate Standards for Users and Operators of Industrial Equipment (NOHSC: 1006).

Application of the Unit

This unit is appropriate for those working in an operational role at worksites within:

- Civil construction
- Coal mining
- Drilling
- Extractive industries
- Metalliferous mining

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare for operations	1.1. Access, interpret and apply compliance documentation relevant to the work activity 1.2. Access, interpret and confirm work requirements prior to proceeding 1.3. Access and apply safety information and procedures throughout the work 1.4. Prepare site in accordance with AS2550, legislation and manufacturer/site requirements 1.5. Communicate with others to coordinate activities at the site prior to commencement of and throughout operations
2. Operate crane	2.1. Prepare load for lift in accordance with crane limitations and rigging requirements 2.2. Perform pre-start, start-up, park-up and shutdown procedures in accordance with relevant Australian standards, manufacturer's and/or site requirements 2.3. Confirm the work area hazards are removed or controlled prior to commencing the lift 2.4. Interpret signals in accordance with AS2550 2.5. Operate controls to lift, transfer and lower loads in accordance with manufacturer's instructions and site procedures 2.6. Monitor lift operations to ensure compliance with equipment limitations
3. Perform crane operator maintenance	3.1. Inspect crane for faults in accordance with manufacturer's instructions and site requirements 3.2. Perform routine operational servicing, lubrication and housekeeping tasks in accordance with manufacturer's instructions and site procedures 3.3. Process records in accordance with site requirements

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes the ability to carry out the following as required to operate a gantry or overhead crane:

- apply legislative, organisation and site requirements and procedures for the operation of a gantry or overhead crane
- calculate volume, weights
- access interpret and apply technical crane information
- maintain crane equipment records
- use hand tools
- apply fault finding techniques with cranes
- comply with environmental requirements
- dispose of environmentally sensitive fluids and materials

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes knowledge of the following as required to operate a gantry or overhead crane:

- Australian standards related to cranes/lifting
- site and equipment safety requirements
- crane equipment characteristics, technical capabilities and limitations
- crane operational procedures
- crane maintenance systems and procedures
- basic rigging and slinging requirements
- hand and whistle signals
- site environmental requirements and constraints related to cranes
- Hazchem relevant to overhead cranes

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for the operation of a gantry or overhead crane • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of the operation of a gantry or overhead crane • working with others to undertake and complete the operation of a gantry or overhead crane that meets all of the required outcomes • consistent timely completion of gantry or overhead crane operations that safely, effectively and efficiently meet the required outcomes
<p>Context of and specific resources for assessment</p>	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • Assessment of this competency requires typical resources normally used in a resources and infrastructure sector environment. Selection and use of resources for particular worksites may differ due to the site circumstances. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those

	<p>required on the job.</p> <ul style="list-style-type: none"> • Customisation of assessment and delivery environment should sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Where applicable, physical resources should include equipment modified for people with disabilities. Access must be provided to appropriate learning and/or assessment support when required.
Method of assessment	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes • consistent achievement of required outcomes • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and complete the operation of a gantry or overhead crane
Guidance information for assessment	<p>Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.</p>

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Compliance documentation may include:</p>	<ul style="list-style-type: none"> • legislative, organisation and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
<p>Work requirements may include:</p>	<ul style="list-style-type: none"> • shift briefings • handover details • work orders • crane equipment to be used • nature and scope of tasks • details of load chart/factors • achievement targets • working conditions • site lighting arrangements • defects on equipment • hazards and potential hazards • coordination requirements
<p>Safety information and procedures may include:</p>	<ul style="list-style-type: none"> • relevant legislation and regulations • relevant Australian standards • management plans • relevant OHS policy • relevant code of practice • manufacturer's instructions • safe working procedures • control and safety of travelling speed • selection and observance of safe working levels and angles • boarding and disembarking procedures • communications and signalling procedures
<p>Prepare site may include:</p>	<ul style="list-style-type: none"> • hazard identification and control • identification of load

	<ul style="list-style-type: none"> • identification and selection of lifting equipment • inspection and certification of lifting equipment • management of permits and tags
Australian standards may include:	<ul style="list-style-type: none"> • AS2550 for cranes, hoists and winches • cranes and state based legislation and regulations • any relevant legislation
Hazards may include:	<ul style="list-style-type: none"> • environment • people • other equipment • dangerous materials • facilities
Signals may include:	<ul style="list-style-type: none"> • verbal • hand signals to Australian standards • whistles/hooters to Australian standards • two-way radio/telephones • light signals to Australian standards
Records may include:	<ul style="list-style-type: none"> • maintenance records • handover records • records of breaks • log books

Unit Sector(s)

Load Handling

Competency field

Refer to Unit Sector(s).

Co-requisite units

Not applicable.

RIIMPO319A Conduct backhoe/loader operations

Modification History

Not applicable.

Unit Descriptor

This unit covers the conducting backhoe/loader operations in the civil construction industry. It includes: planning and preparing; conducting machine pre-operational checks; operating backhoe/ loaders; lifting, carrying and placing materials; selecting, removing and fitting attachments; relocating the backhoe/ loaders; carrying out machine operator maintenance; and cleaning up.

Application of the Unit

This unit is appropriate for those working in mobile plant operator roles, at worksites within:

- Civil construction

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply compliance documentation relevant to conduct backhoe/loader tasks 1.2. Obtain, confirm and apply work instructions to the allotted task 1.3. Obtain, confirm and apply safety requirements to the allotted task 1.4. Identify, obtain and implement signage requirements from the project traffic management plan 1.5. Select plant, tools and equipment to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults 1.6. Identify, confirm and apply environmental protection requirements from the project environmental management plan, to the allotted task
2. Conduct machine pre-operational checks	2.1. Carry out pre-start, start-up, park and shutdown procedures 2.2. Check machine controls and functions, including implements or other attachments, brakes and manoeuvrability for serviceability and rectify or report any faults
3. Operate backhoe/ loader	3.1. Identify site hazards associated with backhoe/loader operations and use safe operating techniques to minimise risk 3.2. Identify and apply operating techniques for backhoe/loader to achieve optimum output in accordance with design specifications while achieving specified tolerances 3.3. Operate machine to work instructions
4. Lift, carry and place materials	4.1. Conduct communication practices associated with transportation and lifting of materials 4.2. Select and attach slings and lifting gear in accordance with safe working load requirements 4.3. Establish weight of load

	<p>4.4. Position and locate machinery to ensure stability to effectively shift materials according to job specifications</p> <p>4.5. Shift load safely and effectively</p> <p>4.6. Move load in accordance with conventional hand and audible signals</p>
5. Select, remove and fit attachments	<p>5.1. Select attachment for the task</p> <p>5.2. Remove and fit attachment</p> <p>5.3. Test attachment to ensure correct fitting and operation</p> <p>5.4. Use attachment in accordance with recommendations and design limits</p> <p>5.5. Clean and store removed attachments in designated location</p>
6. Relocate the backhoe/ loader	<p>6.1. Move backhoe/loader safely between worksites, observing relevant codes and traffic management requirements</p> <p>6.2. Prepare backhoe/loader for relocation</p>
7. Carry out machine operator maintenance	<p>7.1. Park safely, shutdown and prepare machine for maintenance</p> <p>7.2. Conduct inspection and fault finding</p> <p>7.3. Remove, replace safely and effectively defective parts</p> <p>7.4. Carry out regular programmed maintenance tasks</p>
8. Clean up	<p>8.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan</p> <p>8.2. Clean, check, maintain and store plant, tools and equipment</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct backhoe/loader operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply techniques for calculating safe working loads
- apply backhoe/loader techniques related to essential tasks
- interpret drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- interpret materials safety data sheet and materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- carry out basic earthworks calculations
- apply levelling techniques
- interpret JSA's/Safe work method statement

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct backhoe/loader operations:

- backhoe/loader types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- techniques for calculating safe working loads
- backhoe/loader techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheet and materials handling methods
- project quality requirements
- civil construction terminology
- methods of changing machine attachments

- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- levelling techniques
- JSA's/Safe work method statement

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for conducting backhoe/loader operations • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of backhoe/ loader operations, including: <ul style="list-style-type: none"> • in a minimum of two different soil types and • to include the mandatory tasks: mixing materials, stripping/spreading topsoils and materials, trench excavation, backfilling, lifting and carrying materials, loading dump trucks, wagons, hoppers, chutes, and cutting/boxing • working with others to undertake and complete backhoe/ loader operations that meet all of the required outcomes • consistent timely completion of backhoe/loader operations that safely, effectively and efficiently meet the required outcomes
<p>Context of and specific resources for assessment</p>	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • The assessment environment should not

	<p>disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.</p> <ul style="list-style-type: none"> • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.

	<ul style="list-style-type: none">• first hand testimonial evidence of the candidate's:<ul style="list-style-type: none">• working with others to undertake and complete the backhoe/loader operations
Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Relevant compliance documentation may include:</p>	<ul style="list-style-type: none"> • legislative, organisation and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • codes of practice • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
<p>A backhoe/loader is:</p>	<ul style="list-style-type: none"> • a self-propelled wheeled machine with a main structural support designed to carry both a front-mounted bucket loading mechanism and a rear-mounted backhoe
<p>Backhoe/loader tasks are to include:</p>	<ul style="list-style-type: none"> • mixing materials, stripping/spreading topsoils and materials, trench excavation, backfilling, lifting and carrying materials, loading dump trucks, wagons, hoppers, chutes and cutting/boxing
<p>Backhoe/loader tasks may include:</p>	<ul style="list-style-type: none"> • scrub clearing, ripping, compacting, cutting, batters and benches, rock breaking, demolition and any activities associated with the attachments listed
<p>A skid steer loader is:</p>	<ul style="list-style-type: none"> • a self-propelled wheeled machine in which steering is accomplished by skidding or reversing the wheels or tracks on one side of the machine. It has an integral front-mounted bucket-supporting structure and linkage, which loads or excavates through forward motion of the machine, and lifts, transports and discharges material
<p>Skid steer loader may include:</p>	<ul style="list-style-type: none"> • compacting, truck excavation, lifting and carrying materials, cutting batters and benches, rock breaking and any activities associated with attachments listed
<p>Skid steer loader tasks are to include:</p>	<ul style="list-style-type: none"> • stripping/ spreading topsoil and materials, backfilling, lifting, loading vehicles, excavations, mixing materials and site clean

	up
Work instructions may include:	<ul style="list-style-type: none"> plans, specifications, quality requirements and operational details quality requirements may include but not be limited to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction
Safety requirements are to be:	<ul style="list-style-type: none"> in accordance with State or Territory legislation and regulations, organisational safety policies and procedures, and project safety plan
Safety requirements may include:	<ul style="list-style-type: none"> protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances personal protective equipment is to include that prescribed under legislation, regulation and workplace policies and practices safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement hazards and risks may include but not be limited to uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation
Tools and equipment are to	<ul style="list-style-type: none"> hand tools and maintenance equipment

include:	relevant to the particular loader and may include lifting equipment
Environmental requirements are to include:	<ul style="list-style-type: none"> organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management
Communications practices are to include:	<ul style="list-style-type: none"> verbal instructions and fault reporting and may include two way radio, hand signals, mobile phone, site specific instructions, written instructions or instructions related to job/task on site meeting processes may include notification/ scheduling (time, place, purpose), task discussions and local coordination of procedural and operational issues
Materials may include:	<ul style="list-style-type: none"> clays, silts, stone, gravel, mud, rock, sand, topsoil, blended materials, organic materials, typical construction site materials/waste and bituminous mixes rock types may include metamorphic, igneous and sedimentary
Attachments may include:	<ul style="list-style-type: none"> extending devices, tilt bucket, buckets, compaction wheel, ripper, plate compactor, rock breaker, auger, broom, mower/slasher, forklift, 4 in 1 bucket and free/rock grab
Operator maintenance is to include:	<ul style="list-style-type: none"> cleaning, authorised servicing and the monitoring, recording and reporting of faults. It may also include the conduct of authorised minor replacements and the provision of assistance to maintenance personnel during maintenance and repair activities

Unit Sector(s)

Mobile Plant Operations

Competency field

Refer to Unit Sector(s).

Co-requisite units

Not applicable.

RIIRIS201B Conduct local risk control

Modification History

Not applicable.

Unit Descriptor

This unit covers the conduct of local risk control in resources and infrastructure industries. It includes identifying hazards; assessing risk and identifying unacceptable risk; identifying, assessing and implementing risk treatments; and completing records and reports.

Application of the Unit

This unit is appropriate for those working in entry level operational roles, at worksites within:

- Civil construction
- Coal mining
- Drilling
- Extractive industries
- Metalliferous mining

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify hazards	1.1. Access, interpret and apply compliance documentation relevant to conducting local risk control 1.2. Inspect work area conditions to identify potential hazards in the workplace 1.3. Apply existing procedures to deal with recognised hazards 1.4. Recognise the type and scope of unresolved hazards and their likely impact
2. Assess risk and identify unacceptable risk	2.1. Assess and determine consequence if the event should occur 2.2. Consider and determine likelihood of the event 2.3. Identify criteria for the acceptability/unacceptability of the risk or source from the appropriate party 2.4. Assess risk against criteria to identify if it warrants ' unacceptable risk ' status and either action or refer to the appropriate party
3. Identify, assess and implement risk treatments	3.1. Identify and consider all possible risk treatment options 3.2. Identify options by preliminary analysis and consideration of possible options 3.3. Analyse options, including the identification of resource requirements 3.4. Select most appropriate action for dealing with the situation 3.5. Plan and prepare the course of action in detail and acquire/obtain required resources 3.6. Implement the risk treatment 3.7. Review risk management processes
4. Complete records and reports	4.1. Communicate information on the course of action and implementation 4.2. Complete records and reports for hazards and actions from personal risk assessment as specified by legislation and site requirements

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct local risk control:

- apply legislative, organisation and site requirements and procedures
- speak clearly and directly, listen carefully to instructions and information, respond to and clarify directions
- collect, analyse and organise information
- access, interpret and apply site information
- work with other team members
- apply teamwork to a range of situations
- apply problems solving skills
- apply decision making skills
- show initiative in adapting to changing work conditions or contexts
- apply time management
- take responsibility for self organisation of work priorities
- apply mathematical skills to perform a basic risk ranking of hazards
- interpret and apply material safety data sheets (MSDS)

Required knowledge

Specific knowledge is required to achieve the performance criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following as required to conduct local risk control:

- risk management processes and methods, including: identifying hazards, assessing risks, determining acceptability of risks, identifying controls
- AS/NZS 4360-2004 Risk Management
- specific worksite risk management procedures
- specific worksite safety systems information
- specific worksite communication, reporting and recording procedures

Evidence Guide

<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions to conduct local risk control • implementation of requirements, procedures and techniques for the safe, effective and efficient conduct of local risk control • working with others to undertake and conduct of local risk control that meets all of the required outcomes • consistent timely completion of conducting local risk control that safely, effectively and efficiently meets the required outcomes
<p>Context of and specific resources for assessment</p>	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues.

	<ul style="list-style-type: none"> • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
Method of assessment	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes • consistently achieving the required outcomes • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and conduct of local risk control
Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Relevant compliance documentation may include:</p>	<ul style="list-style-type: none"> • legislative, organisation and site requirements and procedures • Australian standards • code of practice • Employment and Workplace Relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
<p>Hazard is defined as:</p>	<ul style="list-style-type: none"> • a source of potential harm or a situation with a potential to cause loss
<p>Hazards may include:</p>	<ul style="list-style-type: none"> • equipment • stored energy • methods • plans • people • the work environment
<p>Risk is defined as:</p>	<ul style="list-style-type: none"> • The chance of something happening that will have an impact upon objectives. It is measured in terms of consequences and likelihood
<p>Risk treatment is defined as:</p>	<ul style="list-style-type: none"> • selection and implementation of appropriate options for dealing with risk
<p>Consequence is defined as:</p>	<ul style="list-style-type: none"> • the outcome of an event or situation expressed qualitatively or quantitatively, being a loss, injury, disadvantage or gain
<p>Frequency is defined as:</p>	<ul style="list-style-type: none"> • a measure of likelihood expressed as the number of occurrences of an event in a given time
<p>Likelihood is used as:</p>	<ul style="list-style-type: none"> • a qualitative description of probability and frequency
<p>Probability is defined as:</p>	<ul style="list-style-type: none"> • the measure of the chance of occurrence expressed as a number between 0 and 1
<p>Criteria for the acceptability/ unacceptability of the risk must be determined by:</p>	<ul style="list-style-type: none"> • the organisation's internal policy, goals and/ or objectives in reference to relevant legislation

<p>Risk treatment options may include:</p>	<ul style="list-style-type: none"> • eliminating the hazard • substitution • engineering controls • administrative controls (procedures, etc) • personal protective equipment.
<p>Records and reports may include:</p>	<ul style="list-style-type: none"> • hazard reporting forms • supervisor/deputy/OCE reports • incident reports • near miss reports • shift reports • JSAs • Take 5 • Step Back

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Gather evidence to determine advisability of <i>product recall</i>	1.1. Information and/or inputs from production, regulators or customers are monitored to ensure <i>conformance with specifications</i> . 1.2. Non-conformance is analysed and a risk assessment conducted to determine source of problem and potential outcome. 1.3. Non-conformance of a scale to warrant recall action is reported to appropriate personnel/agencies. 1.4. Decision to recall product is taken in a timely manner. 1.5. Protocol for <i>engaging the media</i> during the recall is developed and agreed between the <i>relevant parties</i> .
2. Manage recall process and associated record keeping	2.1. Protocol for acceptance of recalled product is developed and agreed between the relevant parties. 2.2. The need for, and level of, <i>isolation</i> of returned product is communicated to all personnel. 2.3. Accurate records of current stocks and returned product are maintained throughout recall period. 2.4. Records are stored according to third-party requirements.
3. Oversee re-introduction, disposal and/or destruction of recalled product	3.1. Returned product is isolated from current stocks, product or facilities in a manner consistent with the level of recall. 3.2. <i>Disposal or destruction processes</i> are implemented according to third-party procedures.
4. Conduct post-recall review	4.1. A review encompassing all aspects of recall is initiated. 4.2. A comprehensive report identifying source of problem is prepared. 4.3. Recommendations to prevent re-occurrence are developed and forwarded to appropriate personnel/agencies.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communicating food standards to staff
- communicating with management and other key stakeholders
- discriminating between the need to recall food product in the normal course of business and a recall based on a serious public health risk
- implementing recall measures in a timely manner
- maintaining relationships with clients and customers during the course of a product recall
- maintaining safe working practices in an emergency setting
- managing media contact
- managing own work and that of work teams while under close scrutiny
- sorting, collecting, treating, disposing and/or recycling of returned product or wastes.

Literacy skills used for:

- analysing reports to determine improvements
- preparing reports
- recording and reporting information
- reading and interpreting food standards and recall protocols
- writing media releases
- using records for traceability.

Numeracy skills used for:

- calculating volumes
- estimating time including use-by-dates and product shelf life
- reading and analysing production data.

Required knowledge

- causes and effects of contamination and cross-contamination and corrective actions required
- procedures for recall and/or return of product in the normal course of business
- quality assurance principles and practices
- procedures to handle food recalls required by Australian Food Standard 3.2.2 *Food Safety Practices and General Requirements*, or its successor standard
- roles and responsibilities of stakeholders in a product (emergency) recall
- state, territory or national health agency requirements for notification in the event of a food recall

REQUIRED SKILLS AND KNOWLEDGE

- work instructions relating to relevant processing tasks
- workplace hygiene and sanitisation policies and procedures
- work team dynamics and leadership.

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment evidence required to demonstrate competence in this unit	<p>Assessment must confirm the ability to:</p> <ul style="list-style-type: none"> design and manage a product recall which addresses both the day-to-day needs of the food business, and an emergency recall situation which will involve cooperation and communication with numerous external agencies. <p>Assessment must confirm knowledge of:</p> <ul style="list-style-type: none"> establishment and handling of media relationships during the course of a product recall legal and financial issues relevant to the recall of food product media involvement in emergency situations procedures to handle food recalls required by Australian Food Standard 3.2.2 <i>Food Safety Practices and General Requirements</i>, or its successor standard product recall documentation, recording and reporting requirements requirements of the enterprise food safety plan sampling and test schedules the Food Business Priority Classification System.
Context of and specific resources for assessment	<p>Procedures and documentation used in an assessment should be typical of those used in the workplace for recalls/returns undertaken in the normal course of business. In the case of emergency recalls a set of documents, which may be untested but which satisfy the relevant requirements, may be used.</p> <p>Resources may include:</p> <ul style="list-style-type: none"> access to supervisors and or peers documentation relating to past (recall) events enterprise food safety plan

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • enterprise policy and procedures for the return and/or recall of product • food recall protocols • relevant standards.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • project (work or scenario based) • workplace documentation • written or oral questions.
Guidance information for assessment	<p>This unit may be assessed holistically with other units within a qualification.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Relevant government regulations, licensing and other compliance requirements</i> may include:</p>	<ul style="list-style-type: none"> • ESD principles, environmental hazard identification, risk assessment and control • food safety, Hazard Analysis Critical Control Point (HACCP), hygiene and temperature control along chain of custody • imports quarantine and inspection, and importing approved arrangements for Australian Quarantine Inspection Service (AQIS), Australian Customs Service (ACS) and Biosecurity Australia (BA) • land, buildings and vehicles: <ul style="list-style-type: none"> • road laws for use of motor vehicles, bikes, trucks and other transport equipment • use of utilities, including water, natural gas, electricity and sewage • business or workplace operations, policies and practices: <ul style="list-style-type: none"> • commercial law, including fair trading and

RANGE STATEMENT	
	<p>trade practices</p> <ul style="list-style-type: none"> • consumer law • corporate law, including registration, licensing and financial reporting • disability policies and practices • equal opportunity, anti-discrimination and sexual harassment • industrial relations and awards, individual employment contracts and share of catch agreements • jurisdictional variations • superannuation • taxation • trade practices • warnings and dismissals • worker's compensation • OHS hazard identification, risk assessment and control • product quality assurance: <ul style="list-style-type: none"> • correct naming and labelling (e.g. country of origin, Australian Fish Names Standard and eco-labelling) • correct quantities, sizes and other customer requirements • third-party certification (e.g. Australian Grown and ISO 14001:2004 Environmental management systems).
<i>OHS guidelines</i> may include:	<ul style="list-style-type: none"> • appropriate workplace provision of first aid kits and fire extinguishers • clean, uncluttered, hygienic workplace • codes of practice, regulations and/or guidance notes which may apply in a jurisdiction or industry sector • enterprise-specific OHS procedures, policies or standards • hazard and risk assessment of workplace and maintenance activities and control measures • induction or training of staff, contractors and visitors in relevant OHS procedures and/or requirements to allow them to carry out their duties in a safe manner

RANGE STATEMENT	
	<ul style="list-style-type: none"> • OHS training register • safe lifting, carrying and handling technique, including manual handling, and the handling and storage of hazardous substances • safe systems and procedures for outdoor work, including protection from solar radiation, fall protection, confined space entry and the protection of people in the workplace • systems and procedures for the safe maintenance of property, machinery and equipment, including hydraulics and exposed moving parts • the appropriate use, maintenance and storage of PPE.
<p><i>Food safety and hygiene regulations and procedures</i> may include:</p>	<ul style="list-style-type: none"> • Australian Shellfish Sanitation program • display, packaging and sale of food, including seafood and aquatic products • equipment design, use, cleaning and maintenance • exporting requirements, including AQIS Export Control (Fish) orders • handling and disposal of condemned or recalled seafood products • HACCP, food safety program, and other risk minimisation and quality assurance systems • location, construction and servicing of seafood premises • people, product and place hygiene and sanitation requirements • Primary Products Standard and the Australian Seafood Standard (voluntary) • processing, further processing and preparation of food, including seafood and aquatic products • product labelling, tracing and recall • receipt, storage and transportation of food, including seafood and aquatic products • requirements set out in Australian and New Zealand Food Authority (ANZFA) Food Standards Code and state and territory food regulations • temperature and contamination control along chain of custody.

RANGE STATEMENT	
<i>ESD principles</i> may include:	<ul style="list-style-type: none"> • controlling the use and recycling of water, and managing water quality and quantity • increasing use of renewable, recyclable and recoverable resources • managing environmental hazard identification, risk assessment and control • managing imported products quarantine and inspection, facility biosecurity, translocation of livestock and genetic material, and health certification • managing, controlling and treating effluents, chemical residues, contaminants, wastes and pollution • minimising noise, dust, light or odour emissions • planning environmental and resource efficiency improvements • preventing genetically modified organisms and live cultured or held organisms from escaping into environment • reducing emissions of greenhouse gases • reducing use of non-renewable resources • reducing energy use and introducing alternative energy sources.
<i>Product recall</i> may:	<ul style="list-style-type: none"> • be from wholesalers retailers and/or consumers • impose special transport and/or storage requirements • include withdrawal due to product defect, pending further investigation • need to conform to the food standards code or be in response to the seafood emergency plan • include recall of product due to hazard to consumers.
<i>Conformance with specifications</i> may include:	<ul style="list-style-type: none"> • food product life cycles • food recall protocols • food standards code.
<i>Engaging the media</i> may include:	<ul style="list-style-type: none"> • authority for initiating contact or responding to approach by media • liability considerations to the enterprise • nature of recall (i.e. voluntary or compulsory).
<i>Relevant parties</i> may include:	<ul style="list-style-type: none"> • importer of raw materials used in the recalled product

RANGE STATEMENT	
	<ul style="list-style-type: none"> • insurers • legal advisers (own and others) • manufacturer of raw materials or end-product • police in the event of an extortion or an attempted extortion • recall sponsor which may include state or territory health authorities • suppliers relevant to the recall.
<i>Isolation</i> may:	<ul style="list-style-type: none"> • be undertaken with supervision by health authority • require a central collection site • include risk of contamination of manufacturing or storage facility.
<i>Disposal or destruction processes</i> may include:	<ul style="list-style-type: none"> • environmental requirements or obligations • food industry recall protocol.

SIRRFSA001A Apply retail food safety practices

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
Second Release	Editorial updates

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to implement safe food storage handling processes in a retail food environment according to a food safety program.

Application of the Unit

This unit applies to frontline service personnel involved in preparing, displaying and selling retail food. It requires the frontline service personnel to have knowledge and application of a store food safety program that complies with food safety regulations.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Apply personal hygiene and sanitation.	1.1. Identify and demonstrate good <i>personal hygiene practices</i> . 1.2. Identify, maintain and use <i>protective clothing and equipment</i> . 1.3. Ensure <i>personal movement</i> within and outside workplace complies with work area requirements. 1.4. Maintain personal presentation, according to store procedures and <i>legislative requirements</i> .
2. Identify food safety program.	2.1. Identify and interpret store food safety program. 2.2. Implement food safety program.
3. Store and handle food products hygienically.	3.1. Transport packaged <i>food supplies</i> to the appropriate storage area promptly, safely and without damage. 3.2. Identify and practise <i>food storage requirements</i> , according to <i>store procedures</i> and legislative requirements. 3.3. Identify and use <i>food handling implements</i> for handling products according to legislative requirements. 3.4. Avoid cross contamination by changing food handling implements between handling different products and appropriate hand washing.
4. Clean work area and equipment.	4.1. Identify and practise cleaning requirements for <i>work areas</i> , according to store procedure, the food safety program and legislative requirements. 4.2. Identify and practise external and internal cleaning requirements for <i>equipment</i> , according store procedures and the food safety program legislative requirements. 4.3. Identify and use appropriate and safe cleaning tools, consumables and equipment for a variety of applications. 4.4. Identify and practise appropriate and safe <i>routine maintenance</i> requirements for food storage and work areas and equipment, according to store procedures and the food safety program. 4.5. Report maintenance requirements and problems to relevant personnel without delay. 4.6. Identify and observe handling and storage requirements for cleaning chemicals, according to manufacturer safety data sheets

- and store procedures and the food safety program.
- 4.7. Identify and perform waste disposal and pest control procedures, according to store procedures, food safety program and legislative requirements.
5. Monitor food safety.
- 5.1. Monitor food safety hazards to control food safety risk.
- 5.2. Identify *potentially unsafe food safety processes or situations* and take *corrective action*.
- 5.3. Record food safety information, including equipment breakdowns, according to the food safety program.
6. Contribute to continuous improvement.
- 6.1. Promptly identify hygiene and sanitation problems or situations, including potential sources of food-contamination, and rectify or report to relevant personnel.
- 6.2. Promptly identify conditions that promote microbial growth and rectify or report to relevant personnel.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
 - report maintenance requirements
 - take corrective action in relation to food safety and contribute to continuous improvement through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- technical skills to:
 - handle chemicals
 - maintain work area
 - handle product
 - use personal protective equipment
 - avoid of cross-contamination
- self management skills to:
 - ensure personal hygiene
 - conduct cleaning requirements
- literacy and numeracy skills to:
 - interpret store procedures
 - record food safety information

Required knowledge

- store policy and procedures and legislative requirements, in regard to:
 - personal hygiene practices
 - correct protective clothing
 - safety requirements to protect self and others
- food handling and hygiene principles, including:
 - awareness of the store food safety program, its purpose and implications for own work
 - own roles and responsibilities and those of food safety personnel for food handling requirements from raw material to finished product
 - techniques for minimising contamination and spoilage
 - common sources and types of contamination and food safety hazards, including conditions conducive to microbial growth and known allergens associated with food handling and processing
 - common types of physical, chemical and microbiological agents that can contaminate food
 - conditions that can cause physical, chemical and microbiological contamination

- correct storage of food, including hot, cold, raw and cooked, and relevant critical control points
- causes of deterioration of food, contamination, cross-contamination
- store procedures for identifying and reporting potential or actual sources of contamination
- food handling implements, e.g. gloves and tongs
- need for change of implements between products
- need for frequent change of storage medium for serving implements
- shelf life of products
- Hazard Analysis and Critical Control Point (HACCP)
- load limits of storage, display units to maintain correct temperatures, including:
 - effects of breaking temperature curtain, effects of blocking coils and air vents
 - overloading
- procedures for recording failures in the food safety program, including equipment breakdowns, and immediate action to be taken
- principles of temperature control and the temperature danger zone
- hazardous foods
- cleaning of work area:
 - store cleaning procedures and schedules for work areas and equipment (internal and external)
 - purpose and importance of cleaning and sanitation procedures
 - safe use and storage of cleaning tools, equipment and chemicals, and insecticides and pesticides
 - routine maintenance for work areas and equipment
 - waste collection and disposal, recycling and handling procedures
 - pest control procedures used in the workplace
- relevant legislation and statutory requirements
- relevant Work Health and Safety (WHS) requirements
- food safety policy, plans and responsibilities, including an understanding of the relationship between the quality system, the food safety program and audit requirements
- characteristics of materials, products and processes used to carry out work responsibilities
- relevant industry codes of practice

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures, which comply with food safety regulations and relevant legislation
- consistently identifies, interprets, applies and implements the store food safety program according to health and hygiene requirements and store procedures
- consistently follows and applies store policy and procedures with regard to cleaning and maintaining equipment and safe handling and disposal of waste
- consistently follows store policy and procedures with regard to personal hygiene practices, including:
 - personal cleanliness, reporting of personal illness and infections
 - store personal presentation requirements for hair, clothes, footwear and jewellery
 - hand washing procedures
 - use and maintenance of clothing, footwear and related apparatus to meet hygiene requirements
- inspects own work area and identifies common food safety hazards and possible hazards
- consistently seeks instruction and applies store policy and procedures with regard to removal and isolation of suspect product or taking other corrective action
- consistently maintains personal conduct to minimise risk to food safety
- consistently monitors critical control points to identify food safety risks in own work area according to store procedures; this may include carrying out checks, inspections and tests
- investigates contamination and cross-contamination events and takes action to prevent contamination from occurring or recurring
- consistently records food safety information according to store policy and procedures
- consistently contributes to continuous improvement in own work area.

Context of and specific

Assessment must ensure access to:

resources for assessment

- a real or simulated work environment
- a food safety program
- protective clothing
- cleaning materials and chemicals
- pest control equipment and chemicals
- suitable food products
- relevant documentation, such as store policy and procedures on hygiene and sanitation practices
- food handling implements
- food storage and display equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Personal hygiene practices as may include:

- hand washing procedures
- personal presentation and cleanliness
- hair tied back, under net or under cap
- not touching hair or sneezing near food
- removal of jewellery as required by legislation
- reporting of personal illnesses and infections
- wounds, cuts and wearing of bandages or dressings
- changing gloves when handling different products.
- wearing of gloves, hairnets, hats, shoes, uniforms, outer garments and aprons when handling food as required

Protective clothing and equipment may include:

- clothing maintenance, laundering and storage requirements
- wearing gloves to protect hands from cleaning chemicals, heat or cold (insulation)
- wearing mesh gloves when using or cleaning sharp equipment
- wearing protective clothing and footwear.
- removing protective clothing prior to moving outside or from one area to another
- not moving into defined areas.

Personal movement may include:

Legislative requirements may include:

- food safety regulations
- WHS
- environmental protection legislation
- awards or agreements
- waste disposal
- hazardous substances and dangerous goods
- manual handling.

Food supplies may include:

- supplies received from both internal and external suppliers and maintained within a stock control system, including:
 - dry goods
 - hazardous foods
 - dairy goods
 - meat and seafood
 - poultry
 - fruit and vegetables

- Food storage requirements*** may include:
- frozen goods.
 - storage in:
 - refrigeration
 - freezers
 - coolrooms
 - dry stores
 - refrigerated display cabinets
 - food segregation
 - food packaging for storage
 - labelling of food
 - stock rotation
 - optimum maintenance of storage areas, including:
 - cleanliness
 - lighting
 - at required temperature
 - free from vermin or infestation
 - free from defects
 - optimum temperature management
 - ventilation of storage area
 - sanitation of storage area
 - disposal of damaged or spoiled supplies.
- Store procedures*** may include:
- compliance with food safety standards and the store food safety program
 - procedures such as:
 - personal hygiene
 - safe storage of food
 - safe storage and use of cleaning chemicals
 - cleaning regimes and timetables
 - protective clothing and equipment
 - safe handling and use of food preparation equipment
 - food handling procedures
 - control points
 - hazard analysis and critical control point (HACCP).
- Food handling implements*** may include:
- gloves
 - tongs
 - spoons
 - scoops.
- Work areas*** may include:
- floors
 - walls to required levels

Equipment may include:

- benches and working surfaces
- shelves
- store rooms and cupboards
- food service areas
- kitchen areas.
- crockery and glassware
- utensils
- pots, pans and dishes
- containers
- chopping boards
- garbage bins
- storage and display units
- coolrooms, refrigerators and freezers
- extraction fans
- thermometers, including infra red (for checking surface and air temperature)
- probe (for checking core temperature)
- ovens, bain-maries, rotisseries, grills, deep fryers and hotplates
- knives, slicers, drink machines, milkshake makers and coffee makers
- dishwashers.

Routine maintenance may include:

- calibration checks on relevant equipment
- detailed cleaning to ensure the elimination of crumbs food scraps or dirt build-up
- blade sharpening
- checking and reporting equipment faults
- checking pest control equipment and products, including:
 - fly screens
 - automatic doors
 - ultraviolet insect lights
 - vermin traps
- cleaning and sanitising waste bins and areas.

Potentially unsafe food safety processes or situations may include:

- spoiled or contaminated food
- out-of-date food
- customer complaints regarding food contamination
- situations that may indicate a need for food recall.

Corrective action must include:

- promptly report potentially unsafe food safety processes or situations to a supervisor
- acting on the advice of the supervisor.

SIRRMER004A Prepare and display bakery products

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to prepare, arrange and present bakery products within the store. It includes the setting up and maintenance of displays and labelling or pricing stock. It also includes the maintenance, handling and storage of bakery products.

Application of the Unit

Application of the unit

This unit requires the team member to demonstrate concise knowledge and application of store policy and food safety procedures, including legislative requirements, in all aspects of handling, preparing, displaying, ticketing and storing bakery products in a retail environment. Frontline staff and supervisors are responsible for this role.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

SIRRFSA001A Apply retail food safety practices

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare bakery products.	<p>1.1 Identify <i>preparation</i> and <i>handling requirements</i> for individual bakery products according to <i>legislative requirements</i> and <i>store policy and procedures</i>.</p> <p>1.2 Identify volume of product requiring preparation according to store procedures.</p> <p>1.3 Identify and prepare products according to product and legislative requirements.</p> <p>1.4 Use all <i>equipment</i> safely, switch off after use, and clean and store according to legislative requirements.</p> <p>1.5 Prepare items to comply with weight statements on labels according to legislative requirements.</p> <p>1.6 Select <i>packaging</i> and place items into or on packaging according to product requirements, legislative requirements and store procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
2 Place and arrange bakery products.	<p>2.1 Unpack bakery products according to legislative requirements and store procedures.</p> <p>2.2 Check bakery products for quality and freshness prior to placement on display.</p> <p>2.3 Identify damaged, deteriorated, spoiled or out-of-date stock and take <i>corrective action</i> as required according to legislative requirements and store procedures.</p> <p>2.4 Identify packaging requirements for bakery products, and package and <i>label</i> products, where required, according to legislative requirements and store procedures.</p> <p>2.5 Place bakery products in or on <i>storage and display units</i> in determined locations and place individual products in separate areas, containers or dividers, where required, to avoid spoilage and to enhance presentation.</p> <p>2.6 Display bakery products to achieve a balanced appearance and promote sales.</p> <p>2.7 Place bakery product range to conform to fixtures, ticketing, prices or bar codes.</p> <p>2.8 Rotate bakery products according to shelf life, use-by dates, legislative requirements and store procedures.</p> <p>2.9 Ensure presentation of bakery products complies with product handling requirements and techniques, and legislative requirements.</p>
3 Prepare display labels and tickets.	<p>3.1 Prepare labels and tickets for window, wall or floor displays, display units or products according to store policy.</p> <p>3.2 Date code stock where required.</p> <p>3.3 Identify soiled, damaged, illegible or incorrect labels and tickets and take corrective action.</p> <p>3.4 Identify and ticket late mark-downs and reductions as required according to store policy.</p> <p>3.5 Use and maintain electronic ticketing equipment according to design specifications and store procedures.</p> <p>3.6 Maintain and <i>store ticketing equipment</i> in a secure location.</p>

ELEMENT	PERFORMANCE CRITERIA
4 Place, arrange and display price tickets and labels.	<p>4.1 Ensure tickets and labels are visible and correctly placed or replaced to conform to legislative requirements and store policy.</p> <p>4.2 Maintain correct pricing and clear information on products according to store procedures and legislative requirements.</p>
5 Maintain bakery product displays.	<p>5.1 Select bakery products for display.</p> <p>5.2 Set and dismantle promotion areas according to store procedures.</p> <p>5.3 Ensure products are arranged and faced up as directed and according to <i>layout and equipment specifications</i>.</p> <p>5.4 Identify, reset or remove unsuitable or out-of-date displays as directed.</p> <p>5.5 Identify optimum stock levels and replenish stock according to store policy.</p> <p>5.6 Maintain display areas in a clean, safe and hygienic manner according to legislative requirements.</p> <p>5.7 Remove excess packaging from display areas and dispose of according to legislative requirements and store procedures.</p>
6 Protect bakery products.	<p>6.1 Identify and use correct handling, storage and display techniques according to bakery product characteristics and legislative requirements.</p> <p>6.2 Identify and use <i>personal protective clothing</i> and equipment and implements for handling products according to legislative requirements and store procedures.</p> <p>6.3 Identify fragile products and handle with extra care to prevent damage or <i>deterioration</i>.</p> <p>6.4 Identify correct temperatures for <i>product range</i> and regularly check and maintain storage and display units to ensure products are kept at recommended temperatures according to legislative requirements and store procedures.</p> <p>6.5 Maintain and clean storage and display units according to</p>

ELEMENT

PERFORMANCE CRITERIA

legislative requirements.

- 6.6 Report temperature irregularities or equipment faults to *appropriate personnel* without delay and record according to legislative requirements and store procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- interpersonal communication skills to:
 - report temperature irregularities to appropriate personnel through clear and direct communication
 - share information
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- use and maintenance of:
 - food preparation tools and equipment
 - electronic labelling and ticketing equipment
 - food storage and display units
- completing tasks in set timeframe
- literacy and numeracy skills in relation to:
 - reading and interpreting store procedures and guidelines
 - weighing and measuring of goods
 - machine or manual preparation of labels and tickets.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - the sale of food items
 - food safety requirements
 - merchandising, ticketing, labelling and pricing
 - correct storage of stock
 - store promotional themes, advertising, catalogues and special offers
 - location of display areas
 - availability and use of display materials
 - stock rotation
 - stock replenishment
 - scheduling for building and rotating displays
 - correct manual handling techniques for protection of self and merchandise
 - correct storage procedures for labelling and ticketing equipment and materials
- store bakery product range

REQUIRED SKILLS AND KNOWLEDGE

- preparation of bakery products for display
- placing and arranging bakery products and maintaining displays
- pricing requirements, including GST requirements
- relevant OHS legislation and codes of practice
- relevant legislation and statutory requirements, including food safety
- Trade Practices and Fair Trading Acts
- relevant industry codes of practice.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently follows, applies and implements food safety requirements and store policy and procedures in regard to preparation, arrangement, presentation, handling and storage of bakery products
- consistently applies store policy and procedures in regard to displaying, merchandising, ticketing, pricing and storage of stock
- consistently displays merchandise on fixtures, shelves and display areas in determined locations according to special manual handling techniques and other safety requirements
- prepares display labels and price tickets for merchandise with regard to legislative requirements and store policy and procedures
- operates, maintains and stores a range of electronic ticketing equipment according to:
 - store policy and procedures
 - industry codes of practice
 - manufacturer instructions and design specifications
- consistently arranges correct pricing and information on merchandise according to store procedures, industry codes of practice and legislative requirements
- consistently identifies damaged, contaminated or out-of-date stock and takes corrective action as required by food safety requirements and store procedures
- consistently maintains display areas and replenishes stock as required according to store procedures
- consistently performs correct manual handling, storage and display techniques, including at point-of-sale operation, according to:
 - stock characteristics
 - industry codes of practice
 - OHS regulations
 - food safety practices.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- ticketing equipment
- products for preparation and display
- display materials and props
- cleaning equipment and materials
- relevant documentation such as:
 - store policy and procedure manuals
 - OHS
 - food safety requirements
 - industry codes of practice and relevant legislation
 - manufacturer instructions and operation manuals for electronic ticketing equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRRFS001A Apply retail food safety practices.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Preparation of bakery products may include:

- baking
- de-panning
- decorating and finishing
- creaming and icing
- slicing
- packaging.

Handling requirements may vary according to stock characteristics, including:

- perishable items
- cooked and uncooked, and hot and cold items
- items requiring defrosting and freezing
- wet and dry items.
- soft or fragile items requiring careful handling, e.g. cream products
- separating items to enhance presentation and to prevent cross-contamination and spoiling
- items requiring chilling and heating.

Legislative requirements may include:

- OHS
- pricing procedures, including GST requirements
- manual handling
- food safety regulations
- consumer law
- waste disposal
- environmental protection
- industry codes of practice.

RANGE STATEMENT

Store policy and procedures in regard to:

- food safety practices and preparation, arrangement, presentation, handling and storage of bakery products
- maintenance and cleaning of equipment and working areas.

Equipment may include:

- tongs
- knives and slicers
- protective clothing
- food handling tissues
- paper towels
- scrapers and mixers
- ovens, proving cabinets and cold storage.

Packaging may include:

- cardboard trays, foil trays, polystyrene trays
- clear plastic containers
- plastic wrap
- plastic bags, foil bags and pre-heat bags
- paper bags and cloth bags
- cake trays and boxes.

Corrective action may include:

- return to supplier
- disposal
- report to supervisor and manager.

Labels may be provided or produced:

- electronically
- manually.

Label details may include:

- Australian Product Number (APN)
- name and address of vendor
- description of product
- price, ingredients, use-by-date or shelf life and nominal weight
- recommended storage procedures
- recommended intended use
- nutritional information.

RANGE STATEMENT

Storage and display units may include:

- window displays
- freezers, refrigerated units and coolrooms
- display fixtures, bins, cabinets, cases and self-serve units
- food warmers and bain-maries.

Store ticketing equipment may include:

- pricing gun
- shelf tickets and shelf talkers
- written or electronically produced labels
- bar coding
- price boards and header boards.

Layout and equipment specifications may include:

- load limits and load-bearing capacity of fixtures, storage and display units
- weight-bearing or volume capacity
- temperature maintenance.

Personal protective clothing may include:

- aprons
- gloves
- hair covering
- protective eyewear
- protective footwear.

Deterioration of product may include:

- contamination and adulteration
- product life, use-by date and staling
- crushing and damage
- drying out and sweating.

RANGE STATEMENT

Product range may include:

- bread lines
- sweet yeast products (buns, scrolls, donuts)
- pies and pizzas
- cakes, e.g. plain, cream, custard and fruit
- pastry lines, e.g. sweet, savoury, custard and fruit
- hot or cold items
- cooked or uncooked items
- par-baked or frozen
- iced and un-iced items.

Appropriate personnel may include:

- team leader
- supervisor
- manager.

SIRXCCS201 Apply point-of-sale handling procedures

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release Date	Comments
First Release:	This is a revised unit, based on and equivalent to SIRXCCS001A Apply point-of-sale handling procedures.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to operate point-of-sale equipment, apply store policy and procedures to a range of transactions, interact with customers, and package or wrap an item for transportation.

It covers demonstration of the ability to operate a range of point-of-sale equipment in order to complete sales, returns and exchange transactions, and process a number of methods of payment, according to store policies.

Application of the Unit

This unit applies to frontline service personnel.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Operate point-of-sale equipment.	<p>1.1. Open and close point-of-sale terminal according to <i>store policy and procedures</i>.</p> <p>1.2. Clear point-of-sale terminal and transfer tender according to store procedure.</p> <p>1.3. Handle cash according to store security procedures.</p> <p>1.4. Maintain supplies of change in point-of-sale terminal according to store policy.</p> <p>1.5. Attend active point-of-sale terminals according to store policy.</p> <p>1.6. Complete records for transaction errors according to store policy.</p> <p>1.7. Maintain adequate supplies of dockets, vouchers and <i>point-of-sale documents</i>.</p> <p>1.8. Inform <i>customers</i> of delays in the point-of-sale operation where required.</p>
2. Ensure accuracy of transactions.	<p>2.1. Identify and perform <i>numerical calculations</i> to ensure accurate pricing and collection of money.</p> <p>2.2. Collect numerical information from various sources and calculate accurately with or without the use of a calculator.</p>
3. Perform point-of-sale transactions.	<p>3.1. Complete <i>point-of-sale transactions</i> according to store policy.</p> <p>3.2. Identify and apply store procedures in respect of cash and non cash transactions.</p> <p>3.3. Identify and apply store procedures in regard to exchanges and returns.</p> <p>3.4. Move goods through point-of-sale area efficiently and with attention to fragility and packaging.</p> <p>3.5. Enter information into <i>point-of-sale equipment</i>.</p> <p>3.6. State price or total and amount of cash received verbally to customer.</p> <p>3.7. Tender correct change.</p>

4. Complete sales.
 - 4.1. Complete customer order forms, invoices and receipts and process any loyalty card transactions.
 - 4.2. Identify and process customer delivery requirements according to set timeframes.
 - 4.3. Process sales transactions or direct customers to point-of-sale terminals according to store policy without undue delay.
 - 4.4. Acknowledge and thank customer in line with store policy and procedures.

5. Wrap and pack goods.
 - 5.1. Maintain and request adequate supplies of ***wrapping and packaging materials***.
 - 5.2. Select appropriate wrapping or packaging material.
 - 5.3. Wrap merchandise neatly and effectively where required.
 - 5.4. Pack items safely to avoid damage in transit, and attach labels where required.
 - 5.5. Arrange transfer of merchandise for parcel pick up or other ***delivery methods*** if required.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
 - ask questions to identify and confirm requirements
 - inform customers of delays
 - listen actively
 - request adequate supplies of wrapping material or bags through clear and direct communication
 - share information
 - state price or total and amount of cash received
 - use and interpret non-verbal communication
 - use language and concepts appropriate to cultural differences
- self-management skills to:
 - deal with different types of transactions
 - follow set routines and procedures
- literacy and numeracy skills to:
 - document sales and delivery information
 - render change
 - undertake work functions, including addition, division, multiplication, percentages and subtraction

Required knowledge

- cash and non-cash handling procedures, including:
 - balancing point-of-sale equipment
 - calculating non-cash documents
 - change required, denominations of change and tendering change
 - clearance of terminal and transference of tender
 - counting cash
 - maintenance of cash float
 - opening and closing point-of-sale terminal
 - recording takings
 - security of cash and non-cash transactions
- functions and procedures for operating point-of-sale equipment, including:
 - calculators
 - electronic scales
 - numerical display board
 - registers
- merchandise handling techniques, including wrapping and packaging techniques

- range of services provided by the store
- relevant legislation and statutory requirements, including:
 - industry codes of practice
 - work health and safety (WHS)
 - Australian consumer law
 - scanners
- store policy and procedures in relation to:
 - allocated duties and responsibilities
 - bag checking
 - customer service
 - exchanges and returns
 - handling, packing and wrapping goods or merchandise
 - point-of-sale transactions
- stock availability
- key features of a calculator

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- operates point-of-sale equipment according to manufacturer instructions and store policy and procedures
- applies store policy and procedures in regard to cash handling and point-of-sale transactions
- interprets, calculates and records numerical information accurately
- processes sales transaction information responsibly and accurately according to store policy and procedures
- applies store policy and procedures in regard to the handling, packing, wrapping and delivery of goods or merchandise.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as:
 - stock, inventory and price lists
 - financial transaction dockets and slips
 - lay-by, credit and product return slips
 - store policy and procedures manuals
- a range of point-of-sale equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the work
- role play
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, work and job role is recommended, for example:

- SIRXCCS202 Interact with customers
- SIRXFIN201 Balance and secure point-of-sale terminal
- SIRXINV001A Perform stock control procedures
- SIRXRSK201 Minimise loss.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

- Store policy and procedures*** in regard to:
- cash handling
 - financial transactions
 - handling techniques of stock
 - operation of point-of-sale equipment
 - sales transactions
 - security.
- Point-of-sale documents*** may include:
- credit slips
 - lay-by slips
 - message pads
 - order forms
 - product return slips
 - promotional materials.
- Customers*** may include:
- customers with routine or special requests
 - internal and external contacts
 - new or repeat contacts
 - people from a range of social, cultural and ethnic backgrounds
 - people with varying physical and mental abilities.
- Numerical calculations*** may include:
- addition and subtraction
 - calculations of cash amounts and change
 - calculations of discount amounts
 - estimation of quantities
 - measurement
 - multiplication and division
 - percentages.
- Point-of-sale transactions*** may include:
- cheques
 - credit cards and store cards
 - EFTPOS
 - exchanges
 - gift vouchers
 - lay-by
 - returns
 - smart cards
 - travellers cheques.
- Point-of-sale equipment***
- cash drawer
 - cash register

may include:

- EFTPOS terminal
- electronic scales
- numerical display board
- scanner
- security tagging.

Wrapping and packaging materials
may include:

- adhesive tape
- bags
- boxes
- bubble wrap
- gift wrapping
- paper
- ribbon
- string.

Delivery methods may include:

- courier
- domestic or international delivery
- freight
- parcel pick-up
- post or express post.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Deliver service to customers.	<p>1.1. <i>Communicate</i> with <i>customers</i> in a professional, courteous manner according to store policy.</p> <p>1.2. Meet <i>customer needs</i> and reasonable requests or refer to supervisor, according to store policy and <i>legislative requirements</i>.</p> <p>1.3. Record customer details and information where necessary.</p> <p>1.4. Identify and anticipate possible problems and take action to minimise the effect on customer satisfaction.</p> <p>1.5. Recognise and act upon opportunities to deliver additional levels of <i>service</i> beyond the customer's immediate request.</p> <p>1.6. Maintain contact with customer until sale is completed according to store policy.</p> <p>1.7. Use verbal and non-verbal communication to develop rapport with customers during service delivery.</p> <p>1.8. Encourage repeat customers by promotion of appropriate services or products according to store policy.</p> <p>1.9. Farewell customer appropriately and courteously according to store policy.</p>
2. Respond to customer complaints.	<p>2.1. Convey a positive, helpful attitude to customers when handling <i>complaints</i>, according to store policy.</p> <p>2.2. Handle complaints sensitively, courteously and with discretion.</p> <p>2.3. Establish and confirm with customer nature of complaint by active listening and questioning.</p> <p>2.4. Take action to resolve complaint to customer's satisfaction wherever possible.</p> <p>2.5. Promptly refer unresolved customer dissatisfaction or complaints to supervisor.</p> <p>2.6. Take the opportunity to turn incidents of customer dissatisfaction into a demonstration of high-quality service to customer according to store policy.</p> <p>2.7. Complete documentation regarding customer dissatisfaction</p>

- or complaints accurately and legibly.
- 2.8. Take *follow-up action* as necessary to ensure customer satisfaction.
3. Receive and process sales orders.
- 3.1. Record customer details and information accurately.
- 3.2. Promptly refer customers to appropriate area as required.
- 3.3. Provide customers with information in clear, concise manner.
- 3.4. Process, record and act upon sales orders according to store policy.
- 3.5. Process customer returns or refunds according to store policy and procedures.
4. Identify special customer requirements.
- 4.1. Promptly identify customers with special needs or requirements by observation and questioning.
- 4.2. Verbally and non-verbally convey a willingness to assist.
- 4.3. Promptly service, refer or redirect customers' needs as required.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
 - build rapport and understanding
 - clarify and feed back information
 - deal with difficult customers
 - listen to customers' needs
 - negotiate with and persuade customers to buy
 - promote products and services
 - respond to complaints effectively and politely
- literacy and numeracy skills to:
 - calculate costs and discounts
 - document sales, stock and delivery information
 - follow procedures for recording customer orders that are placed in person, by telephone or by electronic means
 - handle legal tender
 - take messages in person or by telephone
 - write records of complaints
 - weigh and measure goods
- observation and analysis skills to anticipate customer behaviour
- self-management skills to follow set routines and procedures

Required knowledge

- add-on selling concepts
- conflict-resolution strategies
- functions and procedures for operating the store telephone system and other communication equipment, and the relevant numbers
- greeting and farewelling techniques
- location of store departments
- merchandise and service range of store departments
- non-verbal cues indicating customer behaviour
- questioning and active listening techniques
- relevant legislation and statutory requirements, including work health and safety (WHS)
- store policy and procedures in regard to:
 - customer service
 - dealing with customer complaints
 - allocated duties and responsibilities
 - customer returns and refunds

- lay-by, gift voucher and rain-check procedures
- strategies for handling difficult or abusive customers

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- accesses, records and processes sales orders accurately and responsibly, according to store policy and procedures
- identifies the nature of customer complaints, resolves complaints and provides service to customers according to store policies
- collaboratively works within a team to meet customers' needs
- applies store policy and procedures and industry codes of practice in regard to customer service
- provides a quality service environment by treating customers and team members in a courteous and professional manner through all stages of the service and sales procedure
- uses effective questioning, active listening and observation skills to identify special customer requirements.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as:
 - sales order forms
 - complaint and return forms
 - stock, inventory and price lists
 - store policy and procedures manuals
- a range of customers with different requirements
- point-of-sale equipment and materials
- a communication system or a range of communication equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information

Holistic assessment with other units relevant to the industry

for assessment

sector, workplace and job role is recommended, for example:

- SIRXCCS201 Apply point-of-sale handling procedures
- SIRXFIN201 Balance and secure point-of-sale terminal
- SIRXINV001A Perform stock control procedures
- SIRXRSK201 Minimise loss.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Communication

techniques may include:

- face-to-face or telephone contact with customers
- non-verbal communication
- speaking clearly and concisely
- using appropriate language
- using open and inclusive language.

Customers may include:

- customers with routine or special requests
- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

Store policy may relate to:

- cash handling
- customer service
- dealing with customer complaints
- processing sales orders.

Customer needs may include:

- information regarding store facilities and services
- location of specific items within the store
- product information
- returns or refunds.

Legislative requirements may include:

- liquor licensing regulations
- lottery legislation
- sale of second-hand goods
- sale of X and R-rated products
- tobacco laws
- Trade Practices Act
- trading hours
- transport, storage and handling of goods.

Service may include:

- all store activities
- internal and external customers
- follow-up in event of delays in service provision.

Complaints may relate to:

- prices
- products
- service.

Follow-up action may require:

- communication with:
 - customers

- staff
- supervisors and management
- suppliers
- recommendations to supervisor regarding policy and procedure development or alteration.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- self management skills to complete tasks within a set timeframe
- literacy skills to interpret documentation
- numeracy skills to:
 - process petty cash transactions
 - receive and process deliveries
 - perform sales transactions
 - balance cashbook entries and takings
 - generate invoices
- interpersonal skills to:
 - refer and report irregularities, discrepancies and errors in transactions to relevant personnel
 - resolve creditor enquiries or refer to relevant personnel through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication

Required knowledge

- store policy and procedures in regard to:
 - register or terminal balance
 - security of cash and non-cash transactions
 - petty cash
 - cash balances
 - banking procedures
 - purchase requisitions or orders
 - issuing of receipts
 - delivery dockets
 - credit notes
 - statements
 - remittance advices
 - cash register rolls
 - deposit books
 - change required and denomination of change
 - operation of equipment used at register or terminal
 - processing delivery and delivery document discrepancies
 - invoicing procedures for debtors and creditors

- payment and invoice procedures, including GST requirements
- cash and non-cash handling procedures, including:
 - opening and closing point-of-sale terminal
 - clearance of terminal and transference of tender
 - maintenance of cash balances
 - counting cash
 - calculating non-cash documents
 - customer credit ratings
 - balancing point-of-sale terminal
 - recording takings
 - change required and denominations of change
 - EFTPOS
 - credit cards
 - processing of cheques
 - gift vouchers
 - lay-by
 - cash on delivery (COD)
 - lay-by
 - credits and returns
 - customer refunds

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures in regard to petty cash and non-cash transactions, invoicing, banking processes and processing delivery and document discrepancies
- consistently applies skills related to the reconciliation and payments of invoices for creditors and debtors, according to store policy and procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - store policy and procedures manuals
 - financial transaction dockets, slips and invoices
 - banking deposit forms
- EFTPOS facilities and equipment
- registers and related equipment
- relevant financial management systems.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXADM001A Apply retail office procedures
- SIRXICT001A Operate retail technology.

Range Statement

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Store policy and procedures in regard to:

- store financial systems.

Relevant personnel may include:

- manager
- supervisor
- team leader
- specialist staff.

Non-cash transactions may include:

- EFTPOS and credit cards
- customer credit ratings
- cheques
- hire-purchase
- lay-by
- cash on delivery (COD)
- customer refunds.

Documentation may include:

- purchase requisitions
- purchase orders
- invoices
- receipts
- delivery dockets and receipts
- credit notes
- statements
- remittance advices
- cash register rolls
- deposit books.

Preparatory calculations may include:

- application of prior credit
- discounting
- quantity
- calculation of GST.

Methods used to ***file*** documents may include:

- manual
- electronic.

SIRXFIN201 Balance and secure point-of-sale terminal

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXFIN001A Balance point-of-sale terminal.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to balance and reconcile a register or terminal in a retail environment. It involves clearing the register, counting money, calculating non-cash transactions, and reconciling and recording takings. The unit requires the application of store policy and procedures in undertaking those tasks.

Application of the Unit

This unit applies to frontline retail staff working under some supervision.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element

Performance Criteria

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

- | | |
|--|---|
| 1. Balance and secure takings from register or terminal. | 1.1. Perform <i>register or terminal</i> balance at designated times according to <i>store policy and procedures</i> .
1.2. Separate cash float from takings prior to balancing procedure and secure according to store policy.
1.3. Supply change to register or terminal according to store policy.
1.4. Obtain and interpret register or terminal reading or print-out.
1.5. Secure cash and <i>non cash documents</i> according to store security policy and procedures. |
| 2. Reconcile takings. | 2.1. Count cash accurately.
2.2. Calculate non cash documents accurately.
2.3. Determine balance between register or terminal reading and sum of cash and non cash transactions.
2.4. Report discrepancies between register or terminal reading and sum of cash and non cash transactions to <i>relevant personnel</i> according to store policy.
2.5. Record store and individual department takings and file <i>records</i> according to store policy. |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy and numeracy skills to:
 - balance the register or terminal
 - count cash
 - calculate non-cash transactions
 - calculate discrepancies between reported and actual takings
 - complete documentation
 - interpret documentation
 - report on takings
- planning and organising skills to complete tasks in a set timeframe
- technology skills to operate register or terminal

Required knowledge

- cash and non-cash handling procedures, including:
 - balancing point-of-sale terminal
 - calculating non-cash documents
 - change required and denominations of change
 - clearance of terminal and transference of tender
 - counting cash
 - credit and returns
 - credit cards
 - EFTPOS
 - gift vouchers
 - lay-by
 - maintenance of cash float
 - opening and closing point-of-sale terminal
 - recording takings
 - security of cash and non-cash transactions
- store policy and procedures in regard to:
 - cash float
 - operation of equipment used at register or terminal
 - register or terminal balance
 - security of cash and non-cash transactions

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- operates register or terminal equipment according to manufacturer instructions and store policy
- applies store policy and procedures in regard to handling cash and removing takings from register or terminal
- applies store policy and procedures in regard to cash float
- applies store policy and procedures in regard to reading registers and recording information
- processes documentation and records responsibly and according to store policy and procedures
- reconciles takings according to store policy and procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as:
 - financial transaction dockets, slips and invoices
 - sample debit card and credit card vouchers
 - recording and tally sheets
 - store policy and procedure manuals in regard to register or terminal balance
- register or terminal and related equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS201 Apply point-of-sale handling procedures
- SIRXRSK201 Minimise loss.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Register or terminal may be:

- cleared at intervals during or at close of trading
- cleared by operator or specialist staff
- electronic
- manual.

Store policy and procedures in regard to:

- cash handling
- register or terminal balance
- security.

Non-cash documents may relate to:

- cash on delivery (COD)
- cheques
- credit cards
- customer credit ratings
- customer refunds
- gift vouchers
- hire-purchase
- lay-by.

Relevant personnel may include:

- manager
- supervisor
- team leader.

Records may be:

- electronic
- manual.

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Maintain retail equipment.	1.1. Identify purpose of <i>equipment</i> used in store or department. 1.2. Operate equipment, according to design specifications and <i>safety requirements</i> . 1.3. Identify equipment faults and report to <i>relevant personnel</i> . 1.4. Identify and apply maintenance program for retail equipment according to <i>store policy and procedures</i> .
2. Apply keyboard skills.	2.1. Operate keyboard using typing techniques within designated speed and accuracy requirements. 2.2. Enter and edit information accurately.
3. Operate data entry equipment.	3.1. Enter data using relevant equipment, according to store policy and procedures. 3.2. Operate price marking equipment, according to manufacturer instructions and store policy. 3.3. Enter data accurately and within designated time limits.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- planning and organising skills to complete tasks in set timeframe
- problem solving skills to deal with different types of transactions
- literacy and numeracy skills to:
 - read store procedures for operating equipment
 - enter data
 - perform point-of-sale transactions
 - follow common fault-finding procedures

Required knowledge

- store policy and procedures in regard to:
 - the operation and maintenance of store retail equipment
 - reporting problems and faults
- relevant legislation and statutory requirements in regard to operating retail technology, including Work Health and Safety (WHS) requirements
- relevant industry codes of practice
- purpose and impact of using electronic technology
- licensing requirements for carrying and moving merchandise (if applicable)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- operates a range of store retail equipment according to store policy and procedures and industry codes of practice
- operates and maintains a range of store retail equipment according to manufacturer instructions and design specifications
- applies store maintenance program and reports faults and problems
- consistently applies safe working practices in the operation and maintenance of store retail equipment according to OHS legislation and codes of practice
- reads and interprets operation manuals to solve routine faults and errors and maintains and uses equipment effectively
- uses keyboard skills to enter and edit data accurately
- completes tasks in set timeframe.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - store policy and procedure manuals
 - manufacturer instructions and operation manuals
- a range of store retail equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Equipment may include:

- point-of-sale terminals
- electronic bar coding equipment for price labelling and stocktaking
- portable data entry
- printers
- EFTPOS terminals
- electronic ordering equipment
- wrapping and packing equipment
- equipment for carrying or moving merchandise
- equipment for storage of merchandise, including refrigerators
- weighing machines
- thermometers
- security tag systems
- trolley return equipment
- computers
- scanners
- numerical keyboard equipment, including calculators.

Safety requirements may include:

- hazard identification (e.g. workplace inspections)
- emergency, fire and accident procedures
- personal safety procedures
- stress management
- procedures for the use of personal protective clothing and equipment
- reporting incidents and accidents in the workplace.

Relevant personnel may include:

- supervisor
- team leader
- manager.

Store policy and procedures in regard to:

- store administration
- clerical systems
- operating and maintaining retail equipment
- Work Health and Safety (WHS).

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Use store information technology system.	<p>1.1. Demonstrate operation of store <i>information technology system</i> to <i>staff members</i> according to <i>store policy and procedures</i>, as required.</p> <p>1.2. Identify and operate <i>hardware</i> and <i>software</i> according to manufacturer instructions and store policy and procedures.</p> <p>1.3. Interpret the <i>application and uses</i> of information technology systems available.</p> <p>1.4. Transmit data according to electronic data interchange (EDI) procedures as required.</p> <p>1.5. Use keyboard skills to enter <i>information</i> accurately and as required by store policy.</p> <p>1.6. Regularly perform <i>back-up procedures</i> according to store policy.</p>
2. Edit and update information.	<p>2.1. Identify information to be edited and updated according to store procedures.</p> <p>2.2. Edit and update information on system according to store policy and procedures.</p> <p>2.3. Identify and enter price changes into store system as required.</p> <p>2.4. Ensure shelf data price and computer records match according to store policy.</p>
3. Solve information technology system problems.	<p>3.1. Identify equipment, hardware and software <i>faults</i> and rectify where possible or seek expert assistance without delay.</p> <p>3.2. Monitor and implement maintenance program for hardware and software systems according to manufacturer specifications and store procedures.</p> <p>3.3. Handle routine problems using appropriate <i>problem-solving techniques</i> and refer to <i>relevant personnel</i> as required.</p> <p>3.4. Evaluate and resolve problems arising at point of sale according to store procedures and <i>relevant legislation</i>.</p> <p>3.5. Provide assistance positively and actively to staff as problems arise.</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
 - ask questions to identify and confirm requirements
 - convey knowledge of store technology system to other staff members
 - provide assistance to staff through clear and direct communication
 - refer problems to appropriate personnel
 - share information
 - use and interpret non-verbal communication
 - use language and concepts appropriate to cultural differences
- literacy and numeracy skills to process and record information
- technology skills to:
 - apply and use hardware and software
 - use store technology information systems

Required knowledge

- manufacturer specifications in regard to operation of hardware and software
- problem-solving techniques
- relevant industry codes of practice
- relevant legislation and statutory requirements, including:
 - consumer law
 - credit procedures
- software licensing specifications
- store policy and procedures in regard to use and operation of store information technology systems, including:
 - efficient and sustainable use of resources
 - work health and safety (WHS) and ergonomic requirements
 - operation of equipment
 - solutions to problems and breakdowns
 - use and maintenance of hardware and software systems
- store products and services range, including pricing structure

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies store policy and procedures in regard to information technology systems, including:
 - resolving system faults
 - using and applying store credit and EFTPOS
 - reviewing and entering information on store system
- follows requirements of relevant legislation and statutory requirements, including Australian consumer law and credit procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- hardware and software instruction manuals
- information technology system
- relevant documentation, such as:
 - store or sample policy and procedures on management of information technology systems
 - legislation and statutory requirements
 - WHS requirements
 - industry codes of practice.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

- Information technology system*** used may be:
- centrally based
 - store-based
 - networked.
- Staff members*** may be:
- full-time, part-time or casual
 - under contract
 - people with varying degrees of language and literacy
 - people from a range of cultural, social and ethnic backgrounds
 - people with a range of responsibilities and job descriptions.
- Store policy and procedures*** in regard to:
- efficient and sustainable use of resources
 - information technology systems
 - WHS
 - processing sales orders.
- Hardware*** may include:
- bar coding
 - hand-held pricing equipment
 - personal computers or terminals (stand-alone or networked)
 - point-of-sale terminals
 - scanning equipment.
- Software*** may include:
- databases
 - EDI
 - financial
 - spreadsheets
 - word processing.
- Application and uses*** may include:
- arrangement of credit for customer via a third party
 - credit checks for granting of credit or loans
 - customer records
 - electronic cataloguing
 - financial management
 - individual, department or item sales performance analysis
 - inventory control
 - point-of-sale operations, including:
 - credit cards
 - EFTPOS
 - loyalty cards

- online sales
 - smart cards
 - pricing and price changes
 - staff payroll, from staff log-in and log-out information
 - staff rosters
 - stock transfers and delivery
 - use of internet facilities
 - use of multimedia.
- Information** may include:
- customer details or records, including:
 - names
 - contact details
 - consumer information or profiles
 - orders
 - price changes
 - staffing information
 - stock records
 - stock transfers.
- Back-up procedures** may include:
- CD
 - digital tape
 - DVD
 - external hard drive
 - off-site data storage
 - zip disc.
- Faults** may include:
- hardware faults or breakdowns
 - point-of-sale functionality problems, such as:
 - cheque clearances
 - credit facilities
 - EFTPOS
 - pricing variations
 - software functionality problems
 - staff error or lack of training.
- Problem-solving techniques** may include:
- following routine procedures or manufacturer recommendations
 - lateral thinking
 - referral to:
 - operator
 - manager
 - specialist.
- Relevant personnel** may include:
- manager
 - supervisor
 - team leader

Relevant legislation
may include:

- technical specialist.
- consumer law
- credit procedures
- WHS.

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Receive and process incoming goods.	<p>1.1. Maintain cleanliness and orderliness in receiving bay according to <i>store policy and procedures</i>.</p> <p>1.2. Unpack goods using correct <i>handling techniques</i> and <i>equipment</i>, according to store policy.</p> <p>1.3. Remove and promptly dispose of packing materials, according to store policy and relevant <i>legislative requirements</i>.</p> <p>1.4. Check incoming stock and validate against purchase orders and delivery documentation, according to store policy and relevant legislative requirements.</p> <p>1.5. Inspect items received for damage, quality, use by dates, breakage or discrepancies and record, according to store policy.</p> <p>1.6. Record stock levels on store <i>stock systems</i>, according to store policy.</p> <p>1.7. Rotate and store stock, according to the first in first out (FIFO) principle.</p> <p>1.8. Dispatch stock to appropriate area or department.</p> <p>1.9. Apply stock price and code labels when required according to store policy.</p>
2. Rotate stock.	<p>2.1. Carry out stock rotation procedures, according to store routine and policy.</p> <p>2.2. Perform store code checking and reporting procedures, including recording of waste and markdowns.</p> <p>2.3. Place merchandise to achieve a balanced, fully stocked display appearance and promote sales.</p> <p>2.4. Place excess stock in storage or dispose of, according to store policy and legislative requirements.</p> <p>2.5. Maintain safe lifting, shifting and carrying techniques according to store Work Health and Safety (WHS) policy and legislative requirements.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- literacy and numeracy skills to:
 - follow set routines and procedures
 - use electronic labelling and ticketing equipment
 - stock records and delivery documentation
 - report problems

Required knowledge

- store policy and procedures in regard to:
 - stock control
 - store labelling policy
 - product quality standards
 - correct unpacking of goods
 - out-of-date, missing or damaged stock
 - equipment used
 - stock location
 - waste disposal
 - methods of storage
 - delivery documentation
 - stock record documentation
 - dispatch documentation
 - reporting faults and problems
- relevant legislation and statutory requirements in regard to stock control, including WHS
- relevant industry codes of practice

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures, industry codes of practice, relevant legislation and statutory requirements in regard to stock control
- consistently applies safe working practices in the manual handling and moving of stock according to WHS legislation and store policy
- interprets and applies manufacturer instructions with regard to handling stock and using relevant equipment
- receives and processes incoming goods and dispatches outgoing goods according to store policy and procedures
- rotates stock and performs out-of-code checking and reporting according to store policy and procedures
- interprets and processes information accurately and responsibly.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant equipment, including:
 - stock moving equipment
 - manual and electronic labelling and ticketing equipment
- computers and stock recording equipment
- relevant documentation, such as:
 - invoices, packing slips, dispatch documents and order forms
 - recording and tally sheets
 - store policy and procedures manuals
 - WHS regulations
 - relevant legislation and statutory requirements
 - industry codes of practice.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and

	<ul style="list-style-type: none"> • understanding • review of portfolios of evidence and third-party workplace reports of on-the-job performance.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • SIRXCCS001A Apply point-of-sale handling procedures • SIRXRSK001A Minimise theft • SIRXCCS002A Interact with customers • SIRXFIN001A Balance point-of-sale terminal.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store policy and procedures may relate to:

- stock control
- reception and dispatch
- WHS
- food safety.

Handling techniques may vary according to:

- stock characteristics
- industry codes of practice
- legislative requirements.

Equipment may include:

- electronic bar coding equipment
- weighing machines
- thermometers
- trolley return equipment
- portable data entry
- cutting equipment
- protective clothing.

Legislative requirements may include:

- WHS
- hazardous substances and dangerous goods
- labelling of workplace substances
- waste removal and environmental protection
- transport, storage and handling of goods.

Stock systems may be:

- manual
- electronic.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Monitor receipt and dispatch of goods.	<p>1.1. Delegate responsibility for receipt and dispatch of goods to <i>appropriate staff</i>.</p> <p>1.2. Implement store procedures in regard to receipt, dispatch and secure storage of goods.</p> <p>1.3. Observe <i>staff</i> functions to ensure store procedures are followed and documentation is completed correctly.</p> <p>1.4. Implement store procedures to ensure goods inspected for quantity and quality on receipt.</p> <p>1.5. Act upon variations to quantity and quality of delivered goods, according to <i>store policy and procedures</i>.</p> <p>1.6. Supervise safe <i>handling and storage of goods</i>, according to store policy.</p>
2. Maintain stock records.	<p>2.1. Monitor and maintain stock levels at required levels.</p> <p>2.2. Maintain, monitor and adjust stock reorder cycles as required.</p> <p>2.3. Inform team members of their individual responsibilities in regard to recording of stock.</p> <p>2.4. Maintain stock storage and movement <i>records</i>, according to store policy.</p> <p>2.5. Record stock discrepancies and follow procedures according to store policy.</p> <p>2.6. Monitor stock performance and identify and <i>report</i> fast and slow selling items according to store policy.</p>
3. Coordinate stocktake or cyclical count.	<p>3.1. Interpret policy and procedures in regard to <i>stocktaking</i> and cyclical counts and explain to team members.</p> <p>3.2. <i>Roster</i> staff, according to allocated budget and time constraints.</p> <p>3.3. Allocate stocktaking tasks to individual team members.</p> <p>3.4. Provide team members with clear directions for the performance of each task.</p> <p>3.5. Allocate team members to ensure effective use of staff resources to complete task.</p> <p>3.6. Produce accurate reports on stocktake data, including discrepancies, for management.</p>

- 4. Identify stock losses.
 - 4.1. Identify, record and assess losses against potential loss forecast on a regular basis.
 - 4.2. Identify avoidable losses and establish reasons.
 - 4.3. Recommend and implement possible solutions.
- 5. Process orders.
 - 5.1. Process and raise orders for stock as requested, according to store policy and procedures.
 - 5.2. Maintain ***ordering and recording system***.
 - 5.3. Ensure availability of sample range, according to buying plan.
 - 5.4. Order pricing materials as required.
 - 5.5. Record negotiated purchase and supply agreements and file for retrieval.
- 6. Follow up orders.
 - 6.1. Monitor delivery process to meet agreed deadlines.
 - 6.2. Handle routine supply problems or refer to management as required by store policy.
 - 6.3. Maintain ongoing liaison with buyers, store or departments, warehouse and ***suppliers*** to ensure continuity of supply.
 - 6.4. Distribute stock, according to store or department allocation.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- technical skills to:
 - use store stocktaking systems
 - use electronic recording equipment
- interpersonal skills to:
 - inform team members of their responsibilities and give instructions
 - explain policies and procedures to staff
 - allocate tasks and provide directions for performance of tasks
 - liaise with buyers, store and departments, warehouse and suppliers through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- management skills to coordinate stock takes
- negotiation skills to handle supply problems
- literacy and numeracy skills to:
 - prepare and present stock control reports and documentation
 - process orders
 - maintain delivery and supply records
 - maintain stock distribution records
 - maintain stock ordering and recording systems

Required knowledge

- store policy and procedures in regard to:
 - stock control
 - store merchandising system
 - current and future stock levels
 - bar codes, labels and price tags
 - store stock recording system
 - stock replenishment and reorder procedures
 - inter- and intra-store and department transfers
 - reporting of stock discrepancies and damage
 - identifying and recording stock losses
 - identifying and recording discrepancies
 - existing suppliers
 - quality control procedures and requirements
 - receipt and dispatch of goods, including inspection for quality and quantity

- relevant licensing requirements for moving stock mechanically
- relevant legislation and statutory requirements
- relevant industry codes of practice
- relevant Work Health and Safety (WHS) legislation and codes of practice

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently implements and monitors store policy and procedures regarding receipt, dispatch and secure storage of goods
- regularly monitors staff implementation of store procedures and documentation in regard to receipt, dispatch and secure storage of goods
- monitors stock levels, storage, movement and reorder cycles on a regular basis.
- organises and coordinates stocktake according to store policy and procedures
- consistently raises and processes stock orders and maintains record system according to store policy and procedures
- monitors delivery processes and distributes stock to ensure continuity of supply.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - store policy and procedures for receipt and dispatch of goods
 - store procedures for stocktake
 - WHS legislation and codes of practice
 - industry codes of practice
 - legislation and statutory requirements
 - store merchandising and marketing policy and procedures
 - inter- and intra-store and department transfer procedures
 - store quality control procedures and requirements.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding

**Guidance information for
assessment**

- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

- Appropriate staff*** may include:
- frontline staff
 - relevant managers
 - supervisor
 - team leader
 - specialist staff.
- Staff*** may include:
- full-time, part-time, casual or contract staff
 - people from a range of social, cultural and ethnic backgrounds
 - people with varying degrees of language and literacy levels.
- Store policy and procedures*** in regard to:
- stock control
 - stock control system
 - recording procedures
 - procedures for investigating discrepancies
 - store merchandise and marketing
 - pricing, labelling and packaging requirements
 - quality control policy and procedures.
- Handling and storage of goods*** may vary according to:
- stock characteristics
 - industry codes of practice.
- Records*** may be:
- manual
 - digital.
- Reports*** for management may include:
- financial reports
 - business documents
 - informal reports
 - stocktake reports.
- Stocktaking*** may be:
- cyclical
 - compliance driven.
- Roster*** may include:
- varying levels of staff training
 - staffing levels
 - routine or busy trading conditions
 - full-time, part-time or casual staff
 - range of staff responsibilities.
- Ordering and recording system*** may be:
- manual
 - digital.
- Suppliers*** may include:
- existing contacts
 - new contacts

- local suppliers
- overseas supplies.

SIRXMER201 Merchandise products

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXMER001A Merchandise products.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to merchandise products within a retail store. It involves the consistent application of store policies and procedures in regard to displaying, merchandising, ticketing, labelling, pricing and storing stock. It also includes the application of correct manual handling, storage and display techniques according to stock characteristics, industry codes of practice, and relevant legislation.

Application of the Unit

This unit applies to frontline retail personnel.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Place and arrange merchandise.	1.1.Unpack <i>merchandise</i> according to <i>store policy and procedures</i> and <i>legislative requirements</i> . 1.2.Place merchandise on floor, fixtures and shelves in determined locations according to work health and safety (WHS) legislative requirements. 1.3. <i>Display</i> merchandise to achieve a balanced, fully-stocked appearance and promote sales. 1.4.Identify damaged, soiled or out-of-date stock and take corrective action as required according to store procedures. 1.5.Place stock range in line with fixtures, ticketing, prices and bar codes. 1.6.Rotate stock according to stock requirements and store procedure. 1.7.Ensure stock presentation conforms to special <i>handling techniques</i> and other <i>safety requirements</i> .
2. Prepare and apply labels and tickets.	2.1.Prepare <i>labels and tickets</i> for window, wall or floor displays according to store policy. 2.2.Prepare tickets using electronic equipment or neatly by hand according to design specifications and store procedures. 2.3.Identify soiled, damaged, illegible or incorrect labels and tickets and take corrective action according to store procedures. 2.4.Use, maintain and store electronic ticketing and labelling equipment according to manufacturer's instructions and store procedures. 2.5.Place labels and tickets visibly and correctly on merchandise. 2.6.Replace labels and tickets according to store policy.
3. Maintain displays.	3.1.Reset or dismantle unsuitable or out-of-date displays and <i>special promotion areas</i> as directed. 3.2.Assist supervisor in selection of merchandise for display. 3.3.Arrange and face up merchandise as directed and according to layout specifications and load-bearing capacity of fixtures. 3.4.Maintain correct pricing and information on merchandise according to store procedures, industry codes of practice and

- legislative requirements.
- 3.5. Identify optimum stock levels and replenish stock according to store policy.
- 3.6. Remove excess packaging and maintain display areas in a clean and tidy condition.
- 4. Protect merchandise.
 - 4.1. Identify and apply correct handling, storage and display techniques according to stock characteristics and legislative requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy and numeracy skills to:
 - prepare machine or manual labels and tickets
 - read and interpret store procedures and guidelines
 - read and interpret manufacturer instructions
- self-management skills to complete tasks in a set timeframe
- technology skills to operate and maintain manual and electronic labelling and ticketing equipment

Required knowledge

- store policies and procedures in regard to:
 - availability and use of display materials
 - correct storage of stock
 - correct storage procedures for labelling and ticketing equipment and materials
 - location of display areas
 - merchandise range
 - merchandising, ticketing and pricing of stock
 - scheduling for building or rotating displays
 - stock replenishment
 - stock rotation
 - store promotional themes, including advertising, catalogues and special offers
- correct manual handling techniques for protection of self and merchandise
- principles of display
- elements and principles of design and trends in retail design
- relevant WHS regulations, including:
 - manual handling
 - hygiene and sanitation
 - hazardous substances
 - labelling of workplace substances
- relevant legislation and statutory requirements relating to merchandising product
- pricing procedures, including inclusion and exclusion of GST
- relevant industry codes of practice relating to merchandising product

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies store policies and procedures and legislative requirements in regard to displaying, merchandising, ticketing, pricing and storing stock
- displays merchandise on floor, fixtures, shelves and display areas, in determined locations, according to special manual handling techniques and other safety requirements
- prepares display labels and price tickets for merchandise with regard to store policies and procedures
- operates, maintains and stores a range of ticketing equipment according to:
 - store policy and procedures
 - industry codes of practice
 - manufacturer instructions and design specifications
- identifies damaged, soiled or out-of-date stock and takes corrective action as required by store procedures and legislative requirements
- maintains display areas and replenishes stock as required according to store procedures and legislative requirements
- performs correct manual handling, storage and display techniques.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- a range of ticketing and pricing equipment
- merchandise for display
- display materials and props
- cleaning materials
- relevant documentation, such as:
 - store policy and procedure manuals on housekeeping, merchandising and WHS
 - manufacturer instructions and operation manuals for electronic ticketing equipment
 - relevant legislation and industry codes of practice.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXSLS201 Sell products and services
- SIRXSLS002A Advise on products and services.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Merchandise may be characterised by:

- type
- brand
- size
- customer needs
- colour
- price.

Store policy and procedures in regard to:

- merchandising of stock
- preparing and displaying labels and tickets
- maintaining displays.

Legislative requirements may include:

- pricing requirements, including GST requirements
- industry codes of practice
- discounted items
- Australian Consumer law.

Display may include:

- setting new displays
- maintaining existing displays.

Handling techniques may vary according to:

- stock characteristics
- store policy
- legislative requirements
- industry codes of practice.

Safety requirements may relate to:

- transport, storage and handling of goods
- hazardous substances
- labelling of workplace substances.

Preparation of ***labels and tickets*** may involve:

- pricing gun
- shelf tickets
- shelf talkers
- written labels
- swing ticketing
- bar coding
- price boards
- header boards.

Special promotion areas may be:

- permanent or temporary
- interior or exterior
- publicly accessible
- windows

- shelves
- wall fixtures
- on floor.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Manage promotional program objectives and content.	1.1. Manage <i>promotional programs</i> to achieve consistent <i>business outcomes</i> . 1.2. Ensure promotional programs support price strategies. 1.3. Resolve timing <i>conflicts and problems</i> across promotional programs and advertising campaigns.
2. Coordinate promotional activities.	2.1. Achieve input from <i>relevant personnel</i> in preparation of promotional program. 2.2. Correctly establish required promotional program <i>outcomes</i> . 2.3. Establish processes for collecting and reporting <i>information</i> on promotional programs cooperatively with relevant personnel and <i>customers</i> .
3. Monitor promotional programs.	3.1. Configure specific business <i>systems</i> to record promotional program outcomes. 3.2. Systematically analyse and compare information on progress of promotional programs. 3.3. Configure business systems to record and report promotional program data to agreed level of detail and format.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- Planning and management skills to:
 - manages, coordinates and monitors promotional activities
 - resolves timing conflicts
 - sets promotional plan review mechanisms
 - adheres to and achieves planned outcomes
 - establishes accurate reporting and recording systems
 - sets outcomes and targets covering:
 - sales and service standards
 - volume
 - revenue and profit
 - promotional budget (promotional costs and expenditure)
 - customer satisfaction
 - distribution arrangements
 - market mix
- interpersonal skills to:
 - achieve input from relevant personnel through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- literacy skills to:
 - research, analyse and interpret a broad range of written material
 - prepare reports
 - documenting results
- numeracy skills to:
 - interpret and maintain data
 - estimate volume
 - calculate costs and pricing arrangements

Required knowledge

- processes for collecting and reporting information
- planned targets in:
 - strategy
 - business
 - sales
 - marketing or merchandise

- business technology and systems management using for marketing activities
- use and maintenance of electronic equipment
- planning and organising
- relevant commercial law and legislation in regarding to marketing and promotion

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently manages promotional plans to agreed targets over time across a specified geographic, market, product or service
- sets promotional planning and review benchmarks
- establishes procedures and mechanisms to collect, analyse and report promotional program data
- coordinates promotional activities to achieve agreed targets.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - business policy and procedures manuals
 - sales and service delivery targets and plans
 - records of sales
 - legislation and statutory requirements
 - industry codes of practice
- a market.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- third-party reports from a supervisor
- customer feedback
- a detailed case study
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Promotional programs may vary to accommodate territory variations in:

- demographics
- economics
- competition
- social and cultural factors
- political influences
- legal factors
- natural factors
- technology.

Business outcomes must include:

- sales revenue
- price
- trade expenditure
- distribution
- promotion frequency
- category or market share
- account profit
- brand recognition.

Promotional ***conflicts and problems*** may relate to:

- timing of promotion
- promotion type (event, seasonal, new lines, new store)
- supplying volume requirements
- business customer planning times and cycles.

Relevant personnel may include:

- managers
- staff
- members of own or other work teams.

Details of required ***outcomes*** must include:

- sales and service standards
- volume
- revenue and profit
- promotional budget (promotional costs and expenditure)
- customer satisfaction
- distribution arrangements
- marketing mix
- market share.

Sources of information may

- contacts with others inside or outside the business

include:

- customers
- staff
- financial and inventory reports
- statistics
- observation
- market research.

Customers may include:

- new or repeat contacts
- external and internal contacts
- business customers or individuals
- customers with routine or special requests
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Systems to record and report promotional program data may include:

- contact history
- purchase requests and orders
- tender submissions and proposals
- invoices and payment requests
- statements and petty cash vouchers
- offer and contract documents
- evaluation process documentation
- records of supplier performance
- financial statements.

SIRXRSK001A Minimise theft

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit describes the performance outcomes, skills and knowledge required to minimise theft in a retail environment. It involves applying routine store security, taking appropriate action to minimise theft and maintaining security of cash, registers or terminals and keys.

Application of the Unit

Application of the unit This unit applies to frontline service personnel. It requires the team member to apply store policy and procedures and industry codes of practice in regard to store security and theft prevention, reporting theft or suspicious behaviour to relevant personnel and monitoring stock, work areas, customers and staff to minimise opportunities for theft.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Apply routine store security.	1.1 Apply store <i>security systems and procedures</i> according to store policy. 1.2 Handle and secure cash according to <i>store policy and procedures</i> . 1.3 Observe and deal with suspect behaviour by <i>customers</i> according to store policy and <i>legislative requirements</i> . 1.4 Deal with internal and external theft according to store policy and legislative requirements. 1.5 Store products and equipment in a secure manner.
2 Minimise theft.	2.1 Take appropriate action to minimise theft by applying store procedures and legislative requirements. 2.2 Match merchandise to correct price tags. 2.3 Maintain surveillance of merchandise according to store policy and <i>legislative requirements</i> .

ELEMENT

PERFORMANCE CRITERIA

- 2.4 Check customers' bags as required at point of sale according to store policy and legislative requirements.
- 2.5 Maintain security of cash, cash register and keys according to store policy.
- 2.6 Maintain security of stock, cash and equipment in regard to customers, *staff* and outside contractors according to store policy and legislative requirements.
- 2.7 Deal with suspected or potential thieves according to store policy and procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- literacy and numeracy skills in:
 - recording of stolen items
 - reporting of theft.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - security
 - checking customers' bags and purchases
 - reporting problems and faults
- relevant legislation and statutory requirements, particularly in regard to checking customers' bags and purchases
- Trade Practices and Fair Trading Acts
- store merchandising system
- security procedures relating to cash and non-cash transactions
- location and operation of store security equipment
- reporting procedures for internal and external theft or suspicious circumstances.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures and legislative requirements, including industry codes of practice in regard to store security and theft prevention in a range of contexts and situations
- consistently applies store policy and procedures in regard to following security procedures and for reporting theft or suspicious behaviour to relevant personnel
- monitors stock, work area, customers and staff to minimise opportunities for theft.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - store policy and procedures manuals
 - legislation and statutory regulations
 - industry codes of practice
 - Trade Practices and Fair Trading Acts
- relevant security equipment
- point-of-sale equipment.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a simulated work environment
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS001A Apply point-of-sale handling procedures
- SIRXCCS002A Interact with customers
- SIRXINV001A Perform stock control procedures
- SIRXFIN001A Balance point-of-sale terminal.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

RANGE STATEMENT

Security systems and procedures may deal with:

- customers
- staff
- keys
- visitors, sales representatives, contractors and vendors
- stock
- records
- cash, credit cards
- equipment, including:
 - alarm systems
 - video surveillance
 - mirrors
 - security tags
- locked and secure areas
- premises
- armed hold-up.

Store policy and procedures may relate to:

- security
- surveillance of merchandise
- reporting problems and faults.

Customers may include:

- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Legislative requirements may include:

- privacy and confidentiality laws
- Trade Practices and Fair Trading Acts
- consumer law
- awards and agreements
- property offences
- credit laws
- reporting procedures
- criminal law.

RANGE STATEMENT

Staff may include:

- management
- other staff members
- full-time, part-time and casual staff
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
 - provide information, feedback and training to staff
 - report relevant matters through clear and direct communication
 - ask questions to identify and confirm requirements
 - share information
 - give instructions
 - use and interpret non-verbal communication
 - provide team leadership
- literacy skills to:
 - interpreting and applying Work Health and Safety (WHS) documents
 - reporting procedures
 - analytical skills to evaluate performance analysis

Required knowledge

- store policy and procedures in regard to:
 - security
 - cash and non-cash transactions
 - external or internal theft
 - suspicious circumstances
 - armed robbery
 - staff security training
 - procedures for opening and closing premises
- relevant legislation and statutory regulations, particularly in relation to checking of customers' bags and purchases
- types of store alarm and security systems used in the retail industry

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures, industry codes of practice, relevant legislation and statutory requirements in regard to store security
- accurately applies relevant legislation and statutory regulations particularly in regard to checking of customers' bags and purchases
- interprets, applies and monitors security procedures in regard to:
 - cash handling, and cash and non-cash transactions
 - internal or external theft or suspicious circumstances
 - armed robbery
 - opening and closing premises
- implements store policy and procedures in regard to:
 - reporting on matters related to store security
 - staff security supervision and training.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - store policy and procedures in regard to security
 - legislation and statutory requirements
 - WHS legislation
- relevant equipment such as:
 - alarm systems
 - point-of-sale equipment
 - communication equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- third-party reports from a supervisor
- observation of performance in the workplace
- a role play

- customer feedback
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXOHS002A Maintain store safety.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store policy and procedures in regard to:

- security
- checking bags
- cash and non-cash transactions
- surveillance of merchandise
- reporting problems and faults.

Security procedures may deal with:

- customers
- staff or staff property
- visitors, sales representatives, contractors and vendors
- stock
- records
- cash and cash movement
- equipment
- premises
- opening and closing of premises
- theft
- armed robbery
- events likely to endanger customers or staff.

Legislative requirements may include:

- privacy or confidentiality laws
- Trade Practices and Fair Trading Acts
- consumer law
- awards or agreements
- property offences
- credit laws
- reporting procedures
- criminal law.

Transactions may include:

- cash
- EFTPOS
- cheques
- credit cards or store cards
- smart cards
- lay-by
- returns
- exchanges

- Team members** may include:
- gift vouchers.
 - small work teams
 - store team
 - corporate team
 - full-time, part-time, casual or contract staff
 - people with varying degrees of language and literacy
 - people from a range of cultural, social and ethnic backgrounds
 - people with a range of responsibilities and job descriptions.
- Feedback** may be given:
- verbally
 - in writing
 - in groups
 - individually.
- Training** may include:
- mentoring or coaching
 - off-the-job training
 - on-the-job training.
- Report** may be:
- verbal
 - written
 - formal
 - informal.

This unit describes the performance outcomes, skills and knowledge required to apply a depth of specialist or general product knowledge and a need for experience and skill in offering advice to customers.

Application of the Unit

This unit applies to team member who develop, maintain and convey detailed and specialised product knowledge to customers and other staff in accordance with store policy and relevant legislation. Specialist sales personnel undertake this function.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Elements

Elements describe the essential outcomes of a unit of competency.

1. Develop product and service knowledge.
2. Recommend specialised products or services.

Performance Criteria

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

- 1.1. Develop and maintain ***product knowledge*** according to ***store policy*** and ***legislative requirements***.
- 1.2. Convey product knowledge to other ***staff*** as required.
- 1.3. Research and apply comparisons between products and services.
- 1.4. Demonstrate knowledge of competitors' product and service range and ***pricing structure***.
- 2.1. Evaluate merchandise according to ***customer requirements***.
- 2.2. Demonstrate features and benefits of products and services to ***customer*** to create a buying environment.
- 2.3. Apply detailed specialised knowledge of product to provide accurate advice to customers.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
 - convey product knowledge to staff
 - apply knowledge to provide advice to customers
 - handle difficult customers through clear and direct communication
 - ask questions to identify and confirm requirements
 - share information
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- literacy skills in regard to:
 - use a range of communication and electronic equipment
 - access relevant product and service information
 - interpret product information
 - interpret store policies and procedures
 - record information
- numeracy skills to:
 - estimate and calculate costs relevant to pricing products

Required knowledge

- specialised product knowledge, including:
 - warranties
 - benefits and features
 - shelf life and use-by date
 - storage requirements
 - ingredients or materials contained in product
 - product and ingredient origins
 - care and handling of products
 - corresponding or complementary products and services
 - stock availability
- store and industry manuals and documentation
- stock and merchandise range
- service range
- store policies and procedures including:
 - procedures for taking orders
 - pricing procedures, including GST requirements
- relevant legislation and statutory requirements and industry code of practice relating to the retail industry

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policies and procedures and industry codes of practice in regard to customer service and selling products and services
- develops, maintains and conveys product knowledge to customers and other staff
- applies detailed and specialised product knowledge to provide accurate advice according to the needs of the customer.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- a range of stock and merchandise
- relevant documentation, such as:
 - price lists
 - policy and procedures manuals
- a range of customers with different requirements
- a range of communication equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Product knowledge may include:

- brand options
- product features and benefits
- warranties
- safety features
- use-by dates
- handling and storage requirements
- stock availability
- price.

Product knowledge may be developed and maintained by:

- accessing the internet
- attending product launches
- attending product seminars
- discussions with staff
- accessing product information booklets and pamphlets.

Store policy and procedures in regard to:

- interaction with customers
- selling products and services.

Legislative requirements may include:

- Trade Practices and Fair Trading Acts
- tobacco laws
- liquor laws
- lottery legislation
- industry codes of practice
- WHS
- sale of second-hand goods
- sale of X and R rated products
- trading hours
- transport, storage and handling of goods.

Staff may include:

- full-time, part-time or casual
- under contract
- people with varying degrees of language and literacy
- people from a range of cultural, social and ethnic backgrounds
- people with a range of responsibilities and job descriptions.

Customer requirements may include:

- specific brand
- sizing
- quality
- quantity
- price range
- usage.

Customers may include:

- new or repeat contacts
- external and internal contacts
- customers with routine or special requests
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Pricing structure may include:

- sales reductions
- pricing procedures, including GST requirements
- mark-downs.

Sales

SIRXSLS201 Sell products and services

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXSLS001A Sell products and services.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to sell products and services in a retail environment.

It involves the use of sales techniques and encompasses key selling skills, from approaching the customer to closing the sale.

It requires a basic level of product knowledge and the recognition and demonstration of verbal and non-verbal communication skills to determine customer requirements, sell the benefits of products and services, overcome objections and close sales.

Personal evaluation is used to maximise sales, according to industry codes of practice, relevant legislation and store policy.

Application of the Unit

This unit applies to frontline sales personnel.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Develop and apply product knowledge.	<p>1.1. Develop <i>product knowledge</i> by accessing <i>relevant sources of information</i> and confirm with relevant staff.</p> <p>1.2. Apply knowledge of the use and application of relevant products and services in interactions with customers according to store policy and <i>legislative requirements</i>.</p> <p>1.3. Identify gaps in product knowledge and resolve by accessing relevant sources of information.</p>
2. Approach customer.	<p>2.1. Identify <i>customers</i> by name where possible.</p> <p>2.2. Develop knowledge of customer buying behaviour by accessing relevant sources of information.</p> <p>2.3. Determine and apply appropriate timing of customer approach according to store policy and customer behaviour.</p> <p>2.4. Initiate customer contact according to store policy.</p> <p>2.5. Convey a positive impression to encourage customer interest according to store policy.</p>
3. Gather and respond to information.	<p>3.1. Apply questioning techniques and listening skills to determine customer buying motives and requirements.</p> <p>3.2. Interpret and clarify non verbal communication cues.</p> <p>3.3. Direct customer to specific merchandise according to customer requirements and store policy.</p>
4. Sell benefits.	<p>4.1. Match customer needs to appropriate products and services.</p> <p>4.2. Communicate knowledge of product features and benefits clearly to customers.</p> <p>4.3. Describe product use and safety requirements to customers.</p> <p>4.4. Refer customers to appropriate product specialist as required.</p> <p>4.5. Answer <i>routine customer questions</i> about merchandise accurately and honestly or refer to senior sales staff.</p>
5. Overcome objections.	<p>5.1. Identify and acknowledge customer objections according to store policy.</p> <p>5.2. Categorise objections into price, time and merchandise characteristics and consider solutions.</p>

- 5.3. Offer solutions to customer objections according to store policy.
- 5.4. Apply *problem solving* within personal scope of responsibilities to overcome customer objections or refer to senior staff.
- 6. Close sale.
 - 6.1. Monitor, identify and respond appropriately to customer buying signals.
 - 6.2. Encourage customer to make purchase decisions.
 - 6.3. Select and apply appropriate method of closing sale.
- 7. Maximise sales opportunities.
 - 7.1. Recognise and apply opportunities for making additional *sales* according to store policy.
 - 7.2. Advise customer of complementary products or services according to customer's identified need.
 - 7.3. Review personal sales outcomes and consider strategies to maximise future sales in consultation with relevant staff.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
 - handle difficult customers
 - verbal and non-verbal communication skills to:
 - question, listen and observe
 - overcome objections and close sale
- literacy and numeracy skills to:
 - handle payments for goods
 - read product information
 - read store policies and procedures
 - record information
 - weigh and measure goods
- selling skills to use a range of selling techniques

Required knowledge

- customer types and needs, including:
 - customer behaviour and cues
 - customer buying motives
 - demographics, lifestyle and income
 - individual and cultural differences
 - types of customer needs, such as:
 - functional
 - psychological
- relevant industry codes of practice, legislation and statutory requirements relating to the sale of products and services
- selling techniques, including:
 - add-ons and complementary sales
 - closing techniques
 - opening techniques
 - overcoming customer objections
 - recognising buying signals
 - using strategies to focus customer on specific merchandise
- specific product knowledge for area or section
- store merchandise and service range
- store policies and procedures in regard to:
 - allocated duties and responsibilities
 - selling products and services and sales performance

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies product knowledge and uses appropriate sales approach to sell the benefits of products and services, overcome objections and close sales
- uses questioning, listening and observation skills to determine customer requirements
- applies store policies and procedures in regard to selling products and services
- maximises sales opportunities according to store policies and procedures
- applies industry codes of practice, relevant legislation and statutory requirements in regard to selling products and services
- evaluates personal sales performance to maximise future sales.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as policy and procedures manuals
- a range of customers with different requirements
- a range of merchandise and products appropriate to the retail workplace
- product labels and sources of product information.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Product knowledge may include:

- features and benefits
- handling and storage requirements
- price
- safety features
- stock availability
- use-by dates
- warranties.

Relevant sources of information may include:

- demonstrations
- internet
- labels
- product profiles
- staff members
- store or supplier product manuals
- store tours
- videos.

Legislative requirements may include:

- industry codes of practice
- liquor laws
- lottery legislation
- work health and safety (WHS)
- sale of second-hand goods
- sale of X and R-rated products
- tobacco laws
- Australian consumer law and fair trading Acts
- trading hours
- transport, storage and handling of goods.

Customers may include:

- customers with routine or special requests
- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

Routine customer questions may relate to:

- availability
- features and benefits
- price and price reductions

- Problem solving* may be affected by:
- quality.
 - resource implications
 - store policies and procedures.
- Sales transactions* may be completed:
- face-to-face
 - online
 - over the telephone.

Competency Field

Sales

SITHCCC001B Organise and prepare food

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to organise and prepare a variety of foods within the kitchen of a hospitality or catering operation. It requires the ability to use general food preparation techniques, contribute to the organisation's profitability through effective resource use and to minimise negative environmental impacts by reusing resources, recycling and using safe methods for disposing of kitchen waste.

The term 'organising and preparing food' is also referred to as 'mise en place' and includes basic preparation prior to serving food, which may involve cooking components of a dish but does not include the actual presentation.

This unit underpins effective performance in commercial cookery.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit This unit applies to hospitality and catering operations where food is prepared and served and may include the preparation of any food type, ingredients, style or cuisine inclusive of Asian cuisine and patisserie products.

This unit describes a key function for cooks and chefs working at any level. Their role may be operational, supervisory or managerial. Job roles include breakfast cook, short order cook, fast food cook, cook, chef, chef de partie, sous chef, executive chef, caterer, patissier and chef patissier.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units This unit must be assessed after the following prerequisite unit: SITXOHS002A Follow workplace hygiene procedures.

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Select, prepare and use equipment.	1.1 Select <i>knives and equipment</i> of the correct type and size for the job, and ensure that it is clean, safely assembled and ready before use. 1.2 Use equipment correctly, safely and hygienically.
2 Assemble ingredients for menu items.	2.1 Identify and obtain ingredients according to standard recipes, recipe cards or enterprise requirements. 2.2 Assemble ingredients according to the correct quantity, type and quality required.
3 Prepare food items	3.1 Prepare <i>food items</i> required for menus according to correct weight, amount and number of portions. 3.2 Clean, peel and prepare vegetables and fruit as required for menu items. 3.3 Prepare dairy products required for menu items, ensuring they are correctly handled. 3.4 Measure, sift where appropriate, and use dry goods as required for menu items. 3.5 Correctly handle all food items according to food safety procedures and the handling requirements for particular types of food. 3.6 Prepare food items in the required form and timeframe.

ELEMENT	PERFORMANCE CRITERIA
4 Portion food ingredients.	<p>4.1 Select and use suitable knives and equipment for food portioning.</p> <p>4.2 Portion <i>food ingredients</i> accurately, according to size, weight and required menu items.</p> <p>4.3 Store prepared and portioned foodstuffs according to food safety procedures and the storage requirements for particular types of food.</p>
5 Contribute to profitability.	<p>5.1 Use the designated quantity, weight and portions of ingredients to minimise wastage and maximise profitability of meals prepared.</p> <p>5.2 Prepare the correct amount of food items according to expected numbers of customers to minimise wastage and maximise profitability of meals prepared.</p>
6 Reduce food preparation costs and negative environmental impacts.	<p>6.1 Use energy and water resources efficiently when cleaning equipment and organising and preparing food to reduce costs and negative environmental impacts.</p> <p>6.2 Save <i>reusable by-products</i> of food preparation for future cooking activities.</p> <p>6.3 Use <i>recyclable products</i> during food preparation and dispose of them in designated recycling bins.</p> <p>6.4 Safely dispose of all <i>kitchen waste and hazardous substances</i> to minimise negative environmental impacts.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- logical and time-efficient work flow
- knife handling techniques
- cutting techniques for foods as required for menu items
- hygienic handling of food and equipment according to local, state or territory and national regulatory requirements
- safe work practices according to OHS principles and procedures, particularly with regard to using knives
- cleaning techniques for kitchen equipment
- problem-solving skills to deal with minor problems, such as shortages of ingredients
- literacy skills to read recipes, menus, instructions and orders
- numeracy skills to calculate portions, and weigh and measure quantities of ingredients.

The following knowledge must be assessed as part of this unit:

- the key characteristics and uses of the main categories of food items and those that are particularly used in the organisation
- menu and recipe requirements for the particular style, products and cuisine being served
- expected numbers of customers to be served
- full details of food safety procedures used in kitchen operations and the particular food safety regime for the organisation
- correct handling and storage requirements for different types of food
- applications of different types of cleaning products
- the essential features of and safe practices for using common hazardous substances used within kitchens and in particular substances used by the organisation e.g. cleaning products
- the environmental impacts of cleaning equipment and preparing food and minimal impact practices to reduce these especially those that relate to reusable resources, water and energy use
- correct and environmentally sound disposal methods for kitchen waste and hazardous substances.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to organise efficient, resource effective preparation of a variety of foods according to expected numbers of customers and to maximise profitability and minimise negative environmental impacts
- ability to use a range of cookery and preparation methods appropriate to the cuisine
- ability to undertake duties according to organisational hygiene, health and safety practices
- knowledge of food safety procedures and correct handling and storage requirements for different types of food
- knowledge of correct and environmentally sound disposal methods for kitchen waste and in particular for hazardous substances
- ability to organise and prepare a wide variety of general food items within the timeframe required by a commercial kitchen..

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within normal operating conditions of a fully equipped commercial kitchen including industry-current equipment
- industry-realistic ratios of kitchen staff to customers.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate preparing food
- inspection of food items prepared by the candidate
- written or oral questions to assess knowledge of preparation techniques, handling and storage requirements for various food types, hazardous substances and efficient resource use
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- any Asian Cookery unit
- any Commercial Cookery and Catering unit
- any Patisserie unit.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

RANGE STATEMENT

Knives and equipment may be mechanical or power driven and:

- must include the use of:
 - knives, cleavers and utensils such as butcher and boning knives, filleting knives, butter spreading knives, vegetable peeler or knives, slicers
 - knife sharpening equipment
 - graters
 - commercial mixers food processors, blenders and attachments
 - scales
 - measures
 - whisks
 - thermometers
- may include the use of:
 - saws and meat cleavers
 - meat bats
 - meat hooks
 - larding needles
 - mincers
 - bowl choppers
 - slicing machines
 - grills or salamanders

Knives and equipment may be mechanical or power driven and:

- fryers
- large fixed equipment, such as bains marie and fridges
- patisserie cutting implements
- cutting implements for nuts and fruits
- beaters
- spatulas
- wooden spoons
- piping bags and attachments
- moulds, shapes and cutters
- cake tins.

RANGE STATEMENT

Food items to be prepared:

- must include the use of:
 - dairy products, including milk, yoghurt, cheeses and alternatives, e.g. soy products
 - dry goods, such as flours, sugars, pastas and rice
 - standard fruit and vegetables
- general food items such as sauces, condiments and flavourings, garnishes, coatings and batters may include the use of:
 - meat, seafood and poultry that may be fresh, frozen, preserved or pre-prepared
 - meat products such as standard cuts, sausages, hams and salami.

Food ingredients to be portioned may include:

- meat
- seafood
- poultry
- pastry
- dough
- fruit
- vegetables.

RANGE STATEMENT

Reusable by-products may include:

- meat and fish offcuts
- bones and trimmings
- fruit peelings and offcuts
- vegetable peelings and offcuts
- unused portions of:
 - fruits
 - vegetables
 - seafood, meat and poultry
 - flowers
 - garnishes
 - accompaniments
 - batter
 - dough
 - pastry
 - fillings
 - sauces and dips
 - eggs
 - coconut cream and flesh.
 - combined spices
 - pastes.

RANGE STATEMENT

Recyclable products may include:

- glass bottles and jars
- plastics
- paper and cardboard
- tin or aluminium containers
- fruit and vegetable matter.

Kitchen waste and hazardous substances may include:

- Any used or out of date ingredient or food item such as:
 - cooking oils
 - animal fat
 - ghee
 - dairy products, including milk, yoghurt, cheeses and soy products
 - dry goods, such as flours, sugars, pastas and rice
 - fruit and vegetables
 - general food items such as sauces, condiments and flavourings, garnishes, coatings and batters
 - meat, seafood and poultry
 - meat products such as standard cuts, sausages, hams and salami.
- Any cleaning agent or chemicals.

Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare food for service.	<p>1.1 Identify <i>foods</i> for menu items.</p> <p>1.2 Arrange sauces and garnishes to enterprise requirements for specific dishes.</p>
2 Portion and plate food.	<p>2.1 Ensure that sufficient supplies of clean, undamaged crockery are available at temperatures appropriate to food being served.</p> <p>2.2 Portion food according to enterprise policies and standard recipes.</p> <p>2.3 Plate food and present neatly and attractively, without drips or spills, to the enterprise requirements for the specified dish, taking into consideration eye appeal, colour and contrast, temperature of food, <i>service</i></p>

ELEMENT

PERFORMANCE CRITERIA

equipment, and classical and innovative arrangement styles.

2.4 Serve food to be displayed in public areas in appropriate serviceware at the correct temperature, in an attractive manner, without drips or spills and giving attention to colour.

3 Work in a team.

3.1 Demonstrate good teamwork with all kitchen and food service staff to ensure timely, quality service of food.

3.2 Organise and follow a kitchen routine for food service to maximise food quality and minimise delays.

3.3 Maintain a high standard of personal and work-related hygiene practices.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- logical and time-efficient work flow
- safe work practices according to OHS principles and procedures
- hygienic handling of food and equipment according to regulatory requirements
- waste minimisation techniques and environmental considerations in relation to food presentation
- problem-solving skills to deal with minor problems such as shortages of ingredients, spillages and mistakes
- literacy skills to read menus and orders
- numeracy skills to calculate portions and plate menu items uniformly.

The following knowledge must be assessed as part of this unit:

- use and characteristics of basic food products and types of menus as required
- classical and innovative styles of food presentation for major food groups.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- application of hygiene and safety principles and procedures
- ability to plate, present and serve a general range of foods efficiently and within realistic workplace time constraints
- ability to work as part of a team in a positive and courteous manner.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within a fully equipped operational commercial kitchen, including industry-current equipment, as defined in the Assessment Guidelines
- access to a range of equipment for presenting food, including:
 - appropriate crockery and utensils for service
 - food and beverage trays
 - buffet table or unit (if displaying as buffet)
 - buffet display items, such as platters
 - display boards
- use of authentic menu items.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate working as a member of a team and plating and presenting food
- written or oral questions to assess knowledge of presentation techniques for different food items
- review of portfolios of evidence, such as photographs, and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITHCCC001B Organise and prepare food.

| | | 1.2 | Use equipment hygienically, safely and according to manufacturer instructions. |

ELEMENT	PERFORMANCE CRITERIA
2 Prepare and cook food using basic methods of cookery.	<ul style="list-style-type: none">2.1 Use various <i>cookery methods</i> to prepare dishes to enterprise standard.2.2 Calculate correct quantities and ratios of <i>commodities</i> for specific cookery methods.2.3 Complete cooking process in a logical and safe manner.2.4 Identify problems with the cooking process promptly and take corrective action.2.5 Prepare dishes using a range of methods and current technology within acceptable enterprise and customer timeframes.2.6 Work cooperatively with kitchen and front-of-house colleagues to ensure timely preparation of dishes.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- logical and time-efficient work flow
- use and characteristics of a range of equipment used for the required methods of cookery
- safe work practices, particularly in relation to bending and lifting, and using cutting implements, appliances, heated surfaces and other equipment that carries a risk of burns
- waste minimisation techniques and environmental considerations in relation to different cookery methods
- problem-solving skills to deal with problems such as shortages of food items, mistakes or problems in commodities or meals produced, and equipment failure
- literacy skills to read menus, orders and instructions
- numeracy skills to calculate quantities and portions against orders.

The following knowledge must be assessed as part of this unit:

- food classification for the major food groups
- characteristics of different foods and appropriate cookery methods
- underlying principles of all basic methods of cookery
- culinary terms commonly used in association with the required methods of cookery
- effects of different cookery methods on the nutritional value of food
- principles and practices of personal and professional hygiene related to working in a kitchen, including appropriate uniform and personal protective equipment.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to prepare dishes on more than one occasion within realistic workplace time constraints using a range of cookery methods
- knowledge of major food groups, culinary terminology and equipment as they relate to the required methods of cookery
- application of hygiene and safety principles and procedures during the cooking process.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within a fully equipped operational commercial kitchen, including industry-current equipment, as defined in the Assessment Guidelines
- demonstration of cookery methods with commodities from the major food groups, including different menus and food items
- access to appropriate utensils, cutlery and equipment to undertake the full range of basic cookery methods, including poaching, stewing, braising, roasting, deep and shallow frying, boiling, atmospheric and pressure steaming, grilling and baking
- use of authentic ingredients.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate using the required cookery methods
- sampling of dishes prepared by the candidate
- written or oral questions to test knowledge on suitable cookery methods for particular food items, safety issues and food quality indicators
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate, such as menus and photographs.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITXFSA001A Implement food safety procedures.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised wording** in the performance criteria is detailed below.

RANGE STATEMENT

Equipment and technology may include:

- electric, gas or induction ranges
- ovens, including combi ovens
- microwaves
- grills and griddles
- deep-fryers
- salamanders
- food processors
- blenders
- mixers
- slicers
- tilting frypan and bratt pan
- steamers
- utensils
- cutlery.

Cookery methods may include any used within an enterprise but must include the following:

- boiling
- poaching
- steaming
- stewing
- braising
- roasting
- baking
- grilling
- shallow frying
- deep-frying
- stir-frying
- pan-frying.

RANGE STATEMENT

Dishes to be prepared must use a range of commonly-found *commodities* including:

- dairy products, such as milk, butter, yoghurt, cheeses and alternatives
- dry goods, such as flours, sugars, pastas and rice
- standard fruit and vegetables
- eggs
- meat, seafood and poultry, which may be fresh, frozen, preserved or pre-prepared, and may also include meat products such as standard cuts, sausages, hams, salami and other meat products
- general food items, such as oils, sauces, condiments and flavourings, garnishes, coatings and batters.

Commercial Cookery and Catering

SITHCCC014A Prepare pastries, cakes and yeast goods

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to produce a range of pastries, cakes and yeast-based foods in a commercial kitchen or catering operation.

Pastries, cakes and yeast-based goods may include foods from varying cultural origins and may be derived from classical or contemporary recipes.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit applies to all hospitality and catering enterprises where pastry, cakes and yeast goods are prepared and served such as restaurants, hotels, cafes and other catering operations. It applies to cooks who usually work as part of a team and under supervision.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	This unit must be assessed after the following prerequisite units: SITHCCC001B Organise and prepare food SITHCCC002A Present food SITHCCC005A Use basic methods of cookery SITXOHS002A Follow workplace hygiene procedures.
---------------------------	---

Employability Skills Information

Employability skills	The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where <i>bold italicised</i> text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare, decorate and present pastries.	1.1 Produce a variety of pastries and pastry products according to enterprise standards, including short, puff and choux-based pastries and products. 1.2 Prepare basic <i>pastes</i> according to standard recipes or

ELEMENT

PERFORMANCE CRITERIA

industry standards, using appropriate techniques, methods and *equipment*.

- | | | | |
|---|--|-----|--|
| 2 | Prepare and produce cakes and yeast goods. | 2.1 | Prepare a variety of <i>cakes</i> and <i>yeast-based products</i> according to standard recipes and enterprise practice. |
| | | 2.2 | Prepare a range of <i>yeast-based doughs</i> to standard recipes. |
| | | 2.3 | Select and use suitable equipment safely and efficiently. |
| 3 | Decorate pastries, pastry products, cakes and yeast goods. | 3.1 | Decorate pastries and pastry products, cakes and yeast goods to enhance appearance, using suitable fillings, icings, <i>sauces</i> and decorations, to standards recipes and enterprise standards. |
| 4 | Portion and store pastries, cakes and yeast goods. | 4.1 | Apply portion control to minimise wastage. |
| | | 4.2 | Store cakes and pastry products to minimise spoilage and wastage. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- logical and time-efficient work flow
- organisational skills and teamwork
- safe work practices, in particular in relation to use of machinery and hot ovens and surfaces
- waste minimisation techniques and environmental considerations in relation to pastry, cakes and yeast goods
- problem-solving skills to deal with problems such as failure of cakes to rise, batter too moist and overcooking
- literacy skills to read menus, recipes and task sheets
- numeracy skills to calculate portions, and weigh and measure quantities of ingredients.

The following knowledge must be assessed as part of this unit:

- varieties and characteristics of pastries, cakes and yeast-based products, both classical and contemporary
- past and current trends in pastries, cakes and yeast-based goods
- underlying principles of making pastry and yeast-based products, including basic food science in relation to yeast
- nutrition related to pastries, cakes and yeast-based goods
- culinary terms related to pastries, cakes and yeast-based goods commonly used in the industry
- principles and practices of hygiene, particularly in relation to handling pastes and dough
- storage of cakes and pastries to maintain freshness and quality
- costing, yield testing and portion control for pastries, cakes and yeast-based goods.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- preparation of a variety of different types of pastries, cakes and yeast-based goods, with at least one from each category of pastes
- preparation of dishes for customers within typical workplace time constraints
- detailed understanding of the different nature and handling requirements of each type of pastry.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within a fully equipped operational commercial kitchen or pastry kitchen, including industry-current equipment, as defined in the Assessment Guidelines
- access to specific equipment for the preparation of pastries, cakes and yeast goods, including templates and cutting guides, dough mixers and rolling pins, cake tins, moulds and forms, piping bags, nozzles and decorating accessories
- use of authentic ingredients
- industry-realistic ratios of kitchen staff to customers.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate handling and preparing pastries, cakes and yeast-based goods
- sampling of pastries, cakes and yeast-based goods made by candidate
- written or oral questions to test knowledge of underlying principles of making pastry and yeast-based products
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITHCCC013A Prepare hot and cold desserts.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

RANGE STATEMENT

Pastes must include:

- short and sweet paste, e.g. flans, tarts and pies
- choux paste, e.g. profiteroles and éclairs
- puff paste, e.g. mille feuille
- filo or strudel.

Equipment for making pastry, cakes and yeast-based goods may include:

- mixers
- blenders
- bowl cutters
- dough sheets
- ovens and proovers
- scales and measures
- mixing and baking utensils.

Cakes, both large and small, may include:

- sponge cakes
- genoise sponge
- fruit cake
- madeira
- Swiss roll
- meringues
- petits fours
- ganache
- pastry garnishes, tuilles, sugar and piping
- cold set cakes and mousse cakes
- friands
- muffins.

Yeast-based products may include:

- Danish pastries
- sweet buns and hot cross buns
- croissants
- coffee scrolls
- brioches
- savarins and rum babas.

RANGE STATEMENT

Yeast-based doughs to be produced must include:

- basic bread dough
- savarin dough
- croissant or Danish dough
- yeast bun dough.

Sauces may include:

- coulis
- Anglaise
- sugar syrup
- sabayon.

Commercial Cookery and Catering

SITHCCC022A Prepare chocolate and chocolate confectionery

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to handle chocolate, prepare individual chocolates and make chocolate-based confectionery.

Chocolate includes couverture (pure coating chocolate) in dark, milk and white, and various compounds.

Tempering is the technique to control formation of seed crystals and to achieve the desired characteristics in solidified chocolate, including setting properties, snap and sheen.

Chocolate confectionery may be moulded, cut or dressed, with hard or soft centres, hand coated, machine enrobed or made using prepared hollow shells.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit applies to those working in hospitality and catering enterprises where chocolate and chocolate confectionery are prepared and served, such as restaurants, hotels and other catering operations. It usually applies to cooks and patissiers in senior positions who work with significant autonomy and who may be responsible for the work of others.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units This unit must be assessed after the following prerequisite unit:
SITXOHS002A Follow workplace hygiene procedures.

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Temper couverture.	<p>1.1 Melt and temper couverture using correct <i>technique</i> and temperatures.</p> <p>1.2 Manipulate couverture to the correct viscosity and desired flow properties so that it possesses appropriate colour,</p>

ELEMENT	PERFORMANCE CRITERIA
	gloss and snap characteristics on solidification.
	1.3 Control the temperature to retain workable consistency.
2 Prepare centres and fillings.	2.1 Choose and manipulate ingredients correctly demonstrating high standards of hygiene.
	2.2 Prepare a range of <i>centres and fillings</i> according to standard recipes or enterprise specifications.
	2.3 Select and make <i>fillings</i> that are full-flavoured, interesting and natural.
	2.4 Bring fillings to the correct temperature, viscosity and consistency before being used.
	2.5 Ensure that shapes and sizes of centres are precise and uniform.
3 Handle moulds.	3.1 Ensure that moulds to be used are clean, polished and free of dust or residue.
	3.2 Keep moulds constantly at the correct temperature when being used and ensure that they are untouched by bare fingers.
	3.3 Ensure that the polished surface is never touched by objects that may dull, scratch or damage it.
4 Make moulded chocolates.	4.1 Select couverture or coatings appropriate to the filling and use.
	4.2 Temper couverture correctly and set in moulds ensuring it is of even and correct thickness and free from marks or air bubbles.
	4.3 Apply a range of fillings ensuring a level surface and allowing sufficient space for sealing with a layer of chocolate of appropriate thickness.
	4.4 Handle and store de-moulded chocolates so that they retain their glossy surface.
5 Coat chocolate confectionery.	5.1 Temper and manipulate couverture to the correct viscosity.
	5.2 Bring items to be coated to the correct temperature.

ELEMENT	PERFORMANCE CRITERIA
	5.3 Coat prepared centres using techniques ensuring an even and correct thickness of chocolate and a uniform quality finish.
	5.4 Execute hand dipping in a logical and accurate manner.
	5.5 Decorate and present chocolate confectionery attractively.
6 Store chocolate and chocolate confectionery.	6.1 Store chocolate and chocolate confectionery at the correct temperature and level of humidity.
	6.2 Protect chocolate and chocolate confectionery from light and incompatible odours.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- artistic skills and creative techniques for chocolate and chocolate confectionery
- logical and time-efficient work flow
- safe work practices, in particular in relation to bending, lifting and handling heated surfaces
- problem-solving skills to deal with breakdowns in systems or equipment
- literacy skills to research chocolate types, history and trends
- numeracy skills to cost yields and portion control.

The following knowledge must be assessed as part of this unit:

- specific requirements for the handling of chocolate
- culinary terms commonly used in the industry in relation to chocolate making
- principles and practices of hygiene related to handling chocolate
- past and current trends in chocolate and chocolate products.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- detailed understanding of the different classifications of chocolate
- ability to produce a quantity of chocolates which are consistent, neat, and even in size, shape and appearance
- flair, innovation, creativity and artistic skills in creating, decorating and presenting chocolates.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within a suitably equipped commercial kitchen or pastry kitchen, including industry-current equipment, as defined in the Assessment Guidelines
- access to industry-current equipment for the preparation of chocolate, including couverture, chocolate moulds, sponges, scourers, brushes and specialty scrapers, marble slab and warming area or double bain marie
- use of a variety of suitable authentic ingredients
- preparation of chocolates within typical workplace time constraints.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate making a variety of chocolates and chocolate items
- sampling of chocolates produced by the candidate
- written or oral questions to test knowledge on technical aspects of chocolate making
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate, such as photographs of chocolates.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITHPAT007A Prepare and display petits fours

SITHPAT008A Prepare and model marzipan.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

RANGE STATEMENT

Tempering *techniques* must include:

- vaccination or addition method
- tabling method
- heated water jackets
- microwave.

Centres and fillings may include:

- nougat
- ganache
- marzipan
- flavoured fondant
- croquant
- caramel
- jellies
- liqueurs
- nuts and fruits.

Commercial Cookery and Catering

SITHFAB003A Serve food and beverage to customers

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to serve food and beverage to customers in a range of hospitality industry enterprises.

The unit does not focus on the full range of product knowledge and service techniques required in a restaurant dining situation, which is addressed in SITHFAB004A Provide food and beverage service.

Some States and Territories have legislative requirements in relation to service of alcohol.

Application of the Unit

Application of the unit

This unit reflects the role of a food and beverage attendant in hospitality settings such as restaurants, clubs, pubs, cafes, coffee shops, cafeterias and catering operations. Persons undertaking this role usually work as part of a team under supervision.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units This unit must be assessed after the following prerequisite unit:
SITXOHS002A Follow workplace hygiene procedures.

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare for service.	<p>1.1 Check <i>furniture</i> and fittings for cleanliness and condition prior to <i>service</i> according to enterprise procedures, and take corrective action where required.</p> <p>1.2 Prepare and adjust the <i>environment</i> to ensure comfort and ambience for customers, as appropriate.</p> <p>1.3 Set up any furniture according to enterprise requirements, customer requests and customer and staff convenience and safety.</p>

ELEMENT	PERFORMANCE CRITERIA
	1.4 Check any furniture for stability and customer and service personnel access according to legislative requirements.
	1.5 Check and prepare <i>equipment</i> for service and remove, clean or replace items not meeting enterprise standards.
	1.6 Display food and beverage items according to enterprise and <i>legislative requirements</i> .
2 Welcome customers.	2.1 Greet customers on arrival, according to enterprise customer service standards.
	2.2 Provide <i>information</i> to customers, giving clear explanations and descriptions.
	2.3 Make recommendations and suggestions to customers to assist them with drink and meal selection.
	2.4 Answer customer questions on menu items correctly and courteously.
3 Take and process orders.	3.1 Take and record orders accurately and legibly using the format required by the enterprise, and convey them promptly to the kitchen or bar, where appropriate.
	3.2 Operate the ordering system according to enterprise procedures.
	3.3 Relay information about any special requests or dietary or cultural requirements to relevant person where appropriate.
	3.4 Provide glassware, serveware and cutlery suitable for menu choice, according to enterprise procedures.
	3.5 <i>Process accounts</i> and receive payment at appropriate time and according to enterprise procedures.
4 Serve and clear food and drinks.	4.1 Collect food and beverage selections promptly from kitchen or bar, check for accuracy and presentation, and convey them to customers safely.
	4.2 Serve food and beverage courteously and to the correct person, according to enterprise standards and hygiene requirements.
	4.3 Promptly recognise and follow up any delays or deficiencies in service.

ELEMENT	PERFORMANCE CRITERIA
	4.4 Advise and reassure customers about any delays or problems.
	4.5 Check customer satisfaction at the appropriate time.
	4.6 Remove used items in a timely manner and safely transfer them to the appropriate location for cleaning.
	4.7 Dispose of leftover food and disposables, according to hygiene regulations and enterprise practice.
	4.8 Dispose of recyclable items according to local regulations and enterprise practice.
	4.9 Thank and farewell customers courteously.
5 Close down after service.	5.1 Clear, clean, dismantle and store furniture and equipment according to enterprise procedures and safety requirements.
	5.2 Prepare and <i>set up for next service</i> according to enterprise procedures and requirements.
	5.3 Review and evaluate services with colleagues where appropriate and identify possible improvements.
	5.4 Provide handover to incoming colleagues and share relevant information.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- food and beverage service techniques appropriate to the enterprise, including plate carrying
- safe and hygienic work practices in relation to food and beverage service
- problem-solving skills to deal with menu changes, lack of availability of items and difficult customer situations
- communication skills to liaise with customers and other team members, clarify requirements, provide information and listen to and interpret information and non-verbal communication
- technical skills to use enterprise ordering systems and equipment
- literacy skills to read menus and orders
- numeracy skills to calculate customer accounts.

The following knowledge must be assessed as part of this unit:

- typical work flow structure for food and beverage service appropriate to the enterprise
- ordering and service procedures
- range and use of standard food and beverage equipment
- menus and drink lists appropriate to the enterprise
- waste minimisation techniques and environmental considerations in relation to food and beverage service.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency Evidence of the following is essential:

- demonstrated ability to serve food and beverage according to established systems and procedures
- ability to meet, greet and interact positively with

EVIDENCE GUIDE

customers

- ability to work with speed and efficiency, and within typical workplace time constraints
- knowledge of hygiene and OHS requirements and demonstrated safe practices.

Context of and specific resources for assessment

Assessment must ensure:

- access to authentic food and drink items
- demonstration of skills within normal operating conditions of a commercial food and beverage operation, including industry-current equipment as follows:
 - tables and chairs
 - condiments
 - counter or waiter's station
 - tea and coffee-making facilities
 - selected linen
 - assorted cutlery
 - menus and drink lists
 - crockery, including cups, plates and jugs
 - serviettes
 - glassware
 - docket books or computerised ordering system
 - sugar bowls or dispensers
 - POS system
- industry-realistic ratios of staff to customers
- time pressures typical of a commercial operation.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate preparing for service, providing service to customers and closing down after service
- direct observation of the candidate undertaking specific tasks, such as taking and processing orders, serving food and drink items or clearing tables
- written or oral questions to test knowledge of sequence of service, typical problems, menu items and drink selections
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITHFAB010C Prepare and serve non-alcoholic beverages
- SITHFAB011A Develop and update food and beverage knowledge
- SITXFIN001A Process financial transactions.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work

RANGE STATEMENT

environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Styles of *service* may include:

- counter
- bistro
- table
- à la carte.

Environment may include:

- lighting
- room temperature
- music
- decorations and displays
- privacy
- background noise.

Equipment may include:

- glassware
- crockery
- overlays and napkins
- placemats
- floral arrangements
- cutlery
- condiments
- tea and coffee-making facilities
- menus and wine lists
- display materials
- computerised ordering systems
- point-of-sale (POS) equipment.

Legislative requirements may be related to:

- liquor, including responsible service of alcohol
- OHS
- hygiene
- consumer protection and trade practices
- duty of care.

RANGE STATEMENT

Information provided to customers may include:

- menu choices, options and availability
- information about food and beverages
- specials
- information about the location or area
- location of customer facilities.

Processing accounts will vary according to enterprise procedures and may include:

- depositing money in cash register, processing and giving change
- processing credit cards or electronic funds transfer at point of sale (EFTPOS)
- handing account to another person to process.

Set up for next service may include:

- polishing glassware
- placing equipment in allocated storage areas
- resetting tables
- cleaning equipment, such as coffee machines and bains marie
- general cleaning of surfaces
- restocking.

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Organise tasks and plan work flow.	1.1 Access <i>relevant information</i> and plan and organise work; prioritising, sequencing and monitoring tasks and processes.
	1.2 Clarify job roles with other team members and delegate tasks to others as appropriate.
	1.3 Develop and follow a work schedule or plan to maximise efficiency, taking into consideration roles

ELEMENT	PERFORMANCE CRITERIA
	and responsibilities of other team members.
	1.4 Plan and monitor work flow during service, including own tasks and those of other team members and make adjustments where appropriate.
2 Manage the service cycle.	2.1 Complete <i>set up and mise en place</i> of restaurant, dining area, function or catering outlet and check and adjust <i>dining environment</i> to ensure comfort and ambience for customers according to <i>service</i> requirements and enterprise procedures.
	2.2 Welcome customers and offer available <i>pre-meal services</i> according to enterprise procedures.
	2.3 Escort and seat customers according to table allocation, assisting with seating and providing napkin service according to enterprise procedures.
	2.4 Present menus and drinks lists to customers and provide <i>information</i> , giving clear explanations and descriptions and answering questions correctly and courteously.
	2.5 Make recommendations and suggestions to customers to assist them with drink and meal selection, and promote or up-sell products as appropriate.
	2.6 Take orders and relay to kitchen and bar, providing additional information about any special requests or dietary or cultural requirements where appropriate.
	2.7 Provide and adjust glassware, serveware and cutlery suitable for menu choices and according to enterprise procedures.
	2.8 Monitor flow of service and meal delivery, serving and clearing food, drinks and plates at the appropriate time during service with minimal disruption to customers.
	2.9 Identify any delays or deficiencies in service or products and address promptly to customer satisfaction and according to enterprise policy and procedures.
	2.10 Organise and present accounts to customers on request, and <i>process</i> them according to enterprise procedures.
	2.11 Farewell customers courteously in a manner that will encourage them to return.
	2.12 Perform <i>close-down procedures</i> after service according

ELEMENT	PERFORMANCE CRITERIA
	to enterprise procedures.
	2.13 Undertake tasks according to <i>environmental considerations</i> .
3 Manage relationships with colleagues and customers.	3.1 Liaise with kitchen, bar and other waiting staff before, during and after service to maximise communication and flow of information.
	3.2 Identify clearly any problems and address them promptly and courteously using appropriate communication techniques.
	3.3 Provide a hospitality experience, according to established protocols and service techniques, enterprise policies and customer expectations.
	3.4 Provide handover to incoming restaurant colleagues and share relevant information.
	3.5 Review and evaluate services with colleagues where appropriate, identifying possible improvements and innovations and informing relevant others as appropriate.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- table dressing and setting techniques for different settings, styles and occasions, including restaurants, functions and catering
- napkin folding for different settings, styles and occasions, including restaurants, functions and catering
- plate clearing and carrying techniques
- use of enterprise computerised ordering systems
- safe work practices and hygiene issues of specific relevance to food and beverage service
- problem-solving skills to deal with under or over-booking situation
- communication skills to liaise with customers and other team members, clarify requirements, provide information and listen to and interpret information and non-verbal communication
- literacy skills to read menu items and specials and explain them to customers
- numeracy skills to calculate and estimate accuracy of customer accounts.

The following knowledge must be assessed as part of this unit:

- ordering and service procedures
- ways of dressing and setting tables for a range of different functions, service styles and service periods, including restaurants, functions and catering
- typical work flow structure for service within a food and beverage service environment
- range and use of standard restaurant equipment
- typical food and beverage service styles and types of menus used in different hospitality contexts, including buffet, tray, plate and silver service
- typical table and room set-ups for different types of restaurants, functions and catering venues, including furniture, seating and decoration
- menus appropriate to the enterprise
- legislative and regulatory requirements, including OHS, food safety and responsible service of alcohol
- the environmental impacts of food and beverage service and minimal impact practices to reduce these especially those that relate to reusable resources, water and energy use
- correct and environmentally sound disposal methods for food and beverage waste including recyclable glass and plastic bottles and containers.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to provide integrated food and beverage service within a restaurant or dining area according to established systems and procedures
- ability to deal with typical issues such as workplace time constraints, late bookings, no-shows, walk-ins and menu changes
- ability to meet, greet and interact positively with customers throughout their dining experience
- ability to maintain the cleanliness and tidiness of service areas, including dealing with disposables and recyclables
- ability to monitor and adjust the service process and work flow to meet customer requirements, appropriate timing and enterprise policies and procedures
- compliance with regulatory and legislative requirements
- demonstrated health and safety practices.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within a fully equipped operational restaurant or dining area, including industry-current equipment as defined in the Assessment Guidelines, and actual food items and meals
- presence of industry-realistic conditions, such as commercial ratios of customers to staff.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate preparing the restaurant for service, providing service to customers and closing down the restaurant or dining room
- direct observation of the candidate undertaking specific tasks, such as dressing or setting tables
- written or oral questions to test knowledge of sequence of service, typical problems, menu items and beverage selection
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITHFAB005A Provide table service of alcoholic beverages
- SITHFAB010C Prepare and serve non-alcoholic beverages
- SITHFAB011A Develop and update food and beverage knowledge
- SITHFAB018A Provide silver service
- SITXCOM006A Address protocol requirements
- SITXFIN001A Process financial transactions.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Relevant information may include:

- bookings and reservations
- table and seating requirements
- customer requests and special requirements
- menus, wine lists and specials
- staffing availability
- job role
- station and table allocation.

RANGE STATEMENT

Set up and mise en place includes:

- checking dining environment and customer facilities for cleanliness, and preparing and adjusting as appropriate
- setting up furniture according to legislative and enterprise requirements, bookings, customer requests, and customer and staff convenience and safety
- checking tables and table settings for stability and customer and service personnel access
- checking and preparing equipment and materials for service, including:
 - glassware
 - crockery
 - cutlery
 - linen
 - condiments
 - tea and coffee-making facilities
 - tables and chairs
 - menus and wine lists
 - display materials
 - manual and electronic cash registers
 - computerised ordering systems
 - point-of-sale equipment and stationery
- table dressing, including:
 - linen presentation, such as tablecloths, overlays and napkins
 - paper overlays and napkins
 - placemats
 - glassware
 - serviceware
 - flatware
 - floral arrangements.

RANGE STATEMENT

Dining environment may include:

- lighting
- room temperature
- music
- floral and other decorations
- privacy
- background noise.

Styles of ***service*** may include:

- set menu (table d'hôte)
- à la carte
- buffet
- function
- breakfast.

Pre-meal services available to customers may include:

- bar service
- lounge and waiting areas
- valet services, including cloakroom facilities.

Information provided to customers may include:

- menu choices and options
- information about food and beverages
- specials
- information about the location or area
- location of customer facilities.

Process accounts will vary according to enterprise procedures and includes the following:

- depositing money in cash register, processing and giving change
- processing credit cards or electronic funds transfer at point of sale (EFTPOS)
- handing account to other person to process.

RANGE STATEMENT

Close-down procedures may include:

- removing used items from service areas and transferring them to the appropriate location for cleaning
- disposing of leftover food, disposables and recyclables
- storing and preparing equipment for the next service
- clearing, cleaning or dismantling work area, furniture and equipment such as coffee machines
- setting up for next service, including:
 - polishing flatware and glassware
 - storing serviceware, flatware and glassware in allocated storage areas
 - resetting and dressing tables
 - general cleaning of restaurant and customer facilities.

Environmental considerations may include:

- correct disposal of leftover food, disposables and recyclables such as paper products, toothpicks, bottles, plastics and linen
- minimising waste
- minimising usage of power and water.

Unit Sector(s)

Sector Hospitality

Competency field

Competency field Food and Beverage

SITHFAB005A Provide table service of alcoholic beverages

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to advise on and serve a range of bottled and pre-poured alcoholic beverages within a hospitality setting. It covers general knowledge of and service of all alcoholic beverages, including wines. The unit is related to SITHFAB011A Develop and update food and beverage knowledge, which also covers general information on beverages. Specialist knowledge and service of wines is found in SITHFAB325A Provide specialised advice on Australian wines and SITHFAB326A Provide specialised advice on imported wines.

The essential knowledge base for this unit will vary according to local industry needs, and it is vital that any training take account of these.

Some States and Territories will have legislative requirements in relation to service of alcohol.

Application of the Unit

Application of the unit

This unit applies to beverage attendants in all establishments where alcoholic beverages are served at the table, such as restaurants, catering venues and hotels. Persons undertaking this function usually work as part of a team and have considerable autonomy with responsibility for their own work outputs.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units This unit must be assessed after the following prerequisite units:
SITHFAB009A Provide responsible service of alcohol
SITXOHS002A Follow workplace hygiene procedures.

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
---------	----------------------

ELEMENT	PERFORMANCE CRITERIA
1 Advise customers on alcoholic beverages and take orders.	<p>1.1 Provide general information on alcoholic beverages served by the enterprise.</p> <p>1.2 Offer drinks and wine list to customers, using correct terminology and pronunciation to describe beverages.</p> <p>1.3 Offer advice and recommendations on beverage choices to customers courteously and when appropriate.</p> <p>1.4 Promote products and drinks to customers according to preferences and enterprise requirements.</p> <p>1.5 Assist customers in selection of food and wine combinations, when appropriate.</p> <p>1.6 Take customer orders and verify selection with the customer.</p>
2 Serve alcoholic beverages.	<p>2.1 Store alcoholic beverages appropriately according to enterprise practices.</p> <p>2.2 Select beverages and check both temperature and presentation of bottle prior to serving.</p> <p>2.3 Select appropriate glassware and other equipment for beverage service, according to enterprise requirements.</p> <p>2.4 Prepare glassware and place according to enterprise and industry standards.</p> <p>2.5 Load, carry and unload trays where required, safely and avoiding spillage.</p> <p>2.6 Present beverages selected by customers to verify, where appropriate.</p> <p>2.7 Open and serve beverages correctly, safely and without spillage.</p> <p>2.8 Pour beverages as required according to enterprise and industry protocol.</p> <p>2.9 Verify customer complaints about quality of beverages and respond according to enterprise procedures.</p> <p>2.10 Refill glasses where appropriate during service, with minimal disruption to customers.</p> <p>2.11 Remove used and unused glassware from tables at the appropriate time and in the correct manner.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- preparation of glassware, including:
 - checking for chips and cracks
 - polishing
 - arranging placement on table
 - placing in storage
- beverage serving techniques for appropriate range, including:
 - bottled beer
 - bottled wine
 - spirits
 - liqueurs
- safety work practices and hygiene issues of specific relevance to table service of beverages
- problem-solving skills to correct a situation where a bottle of wine has not had cork removed correctly
- communication skills to liaise with customers and other team members, clarify requirements, provide information and listen to and interpret information and non-verbal communication
- literacy skills to read wine and other beverage labels
- numeracy skills to calculate customer accounts.

The following knowledge must be assessed as part of this unit:

- general knowledge of wines in relation to:
 - major Australian and international wine types
 - compatibility of major Australian and international wine styles with different types of food
 - general features of wine from the major Australian wine producing areas
- major international wines commonly sold in Australia, such as chianti and champagne
- main grape varieties and wine types, including:
 - red, including cabernet sauvignon, shiraz, pinot noir and merlot
 - white, including semillon, sauvignon blanc, gewürztraminer, riesling and chardonnay
 - blended wines, including cabernet sauvignon, merlot, semillon and sauvignon blanc
 - sparkling wines

REQUIRED SKILLS AND KNOWLEDGE

- popular fortified wines, including sherry, port, muscat, vermouth, tokay and marsala
- dessert wines
- content of beverage labels, including wine, beer and spirits
- general knowledge of beers and spirits in relation to:
 - flavour and characteristics
 - differences between Australian and imported products
 - glassware required for different types of beverage
- flow of service within a food and beverage service environment according to enterprise practices
- requirements of the relevant state or territory Liquor Act in relation to service of alcohol (Please note that this should be covered by completion of SITHFAB009A Provide responsible service of alcohol).

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to serve a range of alcoholic drinks at the table within enterprise acceptable timeframes
- opening and serving beverages that require the application of different techniques, such as sparkling and still wines
- provision of professional and courteous advice on beverage selection
- provision of beverage service during a complete service period.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within a fully equipped operational restaurant or dining area, as defined in the Assessment Guidelines, with access to a bar or service outlet
- industry-realistic conditions, such as typical customer to beverage attendant ratios.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate providing table service of a variety of alcoholic beverages
- written or oral questions to test knowledge of wine styles, wine service techniques and food and beverage combinations
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITHFAB004A Provide food and beverage service
- SITHFAB010C Prepare and serve non-alcoholic beverages
- SITHFAB011A Develop and update food and beverage knowledge
- SITXFIN001A Process financial transactions.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

General information on alcoholic beverages to be provided to customers includes:

- suitable drinks before and after a meal
- suggested basic wine and food combinations
- typical wines and growing areas
- grape varieties and characteristics
- typical beers, place of origin and characteristics
- characteristics of spirits, liqueurs and aperitifs, and appropriate mixers
- range of cocktails.

Alcoholic beverages include:

- wines - still, sparkling and fortified
- beers - local, imported, bulk and packaged
- spirits
- liqueurs
- aperitifs
- cocktails.

Enterprise practices for storage relate to:

- refrigeration
- shelving and cellaring
- vertical or horizontal storage.

Equipment for beverage service at the table includes:

- ice buckets or stands
- openers and wine knives
- napkins
- glassware appropriate to beverage and style
- wine lists.

RANGE STATEMENT

- Prepare glassware* includes:
- checking for cracks and chips
 - polishing
 - table placement
 - placing in storage.

- Verifying customer complaints*
about quality of beverages
involves assessing:
- visual appeal
 - smell
 - taste.

Unit Sector(s)

Sector Hospitality

Competency field

Competency field Food and Beverage

SITHFAB009A Provide responsible service of alcohol

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to responsibly sell or serve alcohol and to satisfy the requirements for responsible sale and service of alcohol (RSA) under state or territory legislation.

A harm minimisation approach is central to compliance with liquor licensing legislation which, across all Australian States and Territories, imposes obligations on all licensed venues to participate in the management of public safety through the responsible sale and service of alcohol.

Those developing training to support this unit must consult the relevant state or territory liquor licensing authority to determine any accreditation arrangements for courses, trainers and assessors.

This unit covers the RSA skill and knowledge requirements common to all States and Territories. Some legislative requirements and knowledge will differ across borders. In some cases after completion of this unit, state and territory liquor authorities may require candidates to complete a bridging course to address these specific differences.

All persons undertaking training as part of a national qualification that includes the sale and service of alcohol must complete this unit. Under differing state and territory legislation it is a required unit only for certain nominated personnel operating in licensed premises.

Application of the Unit

Application of the unit Responsible practices must be undertaken wherever alcohol is served and sold, including where alcohol samples are served during on-site product tastings. This unit, therefore, applies to any workplace situation where alcohol is served and sold, including all types of hospitality venues, retail liquor outlets and tourism venues such as wineries, breweries and distilleries. Training and assessment must be contextualised so that the requirements of specific industry sectors and workplaces are met.

This unit applies to all levels of sales personnel involved in the sale or service and promotional service of alcohol in licensed premises, including the licensee when involved in sales. Those selling and serving alcohol may include food and beverage attendants; retail liquor sales persons; winery, brewery and distillery cellar door staff; supplier sales representatives and the licensee.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | | |
|---|--|---|
| 1 | Sell or serve alcohol responsibly. | <p>1.1 Sell or serve alcohol according to provisions of relevant state or territory legislation, licensing requirements and responsible service of alcohol principles.</p> <p>1.2 Provide <i>accurate information</i> to customers on alcoholic beverages according to enterprise or house policy and government legislation, including types, strengths, standard drinks and the alcoholic percentages of a range of frequently sold alcoholic beverages.</p> <p>1.3 Assist customers with information on the range of non-alcoholic beverages available for purchase.</p> <p>1.4 Identify <i>issues related to the sale and service of alcohol to different types of customers, especially those at risk</i>, and incorporate them into sales or service.</p> |
| 2 | Assist customers to drink within appropriate limits. | <p>2.1 Prepare and serve <i>standard drinks or samples</i> according to industry requirements.</p> <p>2.2 Encourage customers courteously and diplomatically to drink within appropriate limits.</p> <p>2.3 Recognise <i>erratic drinking patterns</i> as an early sign of possible intoxication and take appropriate action.</p> <p>2.4 Monitor emotional and physical state of patrons for signs of intoxication and ill effects of illicit or other drug usage.</p> <p>2.5 Where appropriate, offer food and non-alcoholic beverages.</p> <p>2.6 Politely decline requests for alcohol to be dispensed in a manner that is <i>irresponsible, or which encourages the</i></p> |

ELEMENT	PERFORMANCE CRITERIA
	<i>rapid or excessive consumption of alcohol</i> , and advise customers of the reasons for the refusal.
3 Assess alcohol-affected customers and identify customers to whom sale or service must be refused.	<p>3.1 Assess intoxication levels of customers using a number of methods, including observing <i>changes in behaviour</i>, observing emotional and physical state of customers, monitoring noise levels and monitoring drink purchases.</p> <p>3.2 When assessing intoxication, take into account <i>factors that may affect individual responses to alcohol</i>.</p> <p>3.3 Identify customers to whom sale or service must be refused according to state and territory legislation, including minors, those purchasing on behalf of minors, intoxicated persons, and persons affected by the consumption of illicit and other drugs.</p> <p>3.4 Where appropriate, request and obtain acceptable <i>proof of age</i> prior to sale or service.</p>
4 Refuse to provide alcohol.	<p>4.1 Refuse service in a polite manner and state reasons for the refusal.</p> <p>4.2 Speak to <i>intoxicated</i> customers in a suitable and consistent manner, minimising confrontation and arguments and pointing out <i>signage</i> where relevant.</p> <p>4.3 Provide <i>appropriate assistance</i> to customers when refusing service.</p> <p>4.4 Where appropriate, give patrons a verbal warning and ask them to leave the premises according to enterprise or house requirements, the specific situation and provisions of state or territory legislation and regulations.</p> <p>4.5 Use <i>appropriate communication and conflict resolution skills</i> in handling difficult situations.</p> <p>4.6 Refer difficult situations beyond the scope of individual responsibility to the appropriate person.</p> <p>4.7 Promptly identify situations that pose a threat to the safety or security of colleagues, customers or property, and seek assistance from appropriate colleagues according to enterprise policy.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

appropriate communication and conflict resolution skills for dealing with intoxicated patrons

- literacy skills to read and comprehend documents such as ID cards, proof of age cards, driver's licences, statutory signage, warning signs and wording within advertising or promotional material, in-house policies and procedures and any general plain English regulatory and advisory information issued by local, or state and territory liquor licensing authorities
- numeracy skills to measure and calculate standard drinks or samples and calculate blood alcohol levels as they relate to alcohol consumption.

The following knowledge must be assessed as part of this unit:

- public interest reasons for implementation of responsible service of alcohol practices, including:
 - government and community concern with alcohol misuse and abuse
 - crime, violence and anti-social behaviour associated with alcohol abuse
- impact of excessive drinking on:
 - local neighbourhood and community
 - premises and staff
 - customers
 - particular types of customers who may be at heightened risk such as young people, pregnant women and minors
 - government agencies such as the local police, health facilities and road authority
- key agencies and how to source relevant information on laws, regulations and codes of practice or conduct
- current promotional and strategic community education campaigns developed and conducted by agencies and industry groups
- effects of alcohol on:
 - emotional state
 - health
 - physical alertness
- factors that affect individual responses to alcohol, including:
 - gender
 - weight
 - general health

REQUIRED SKILLS AND KNOWLEDGE

- rate of consumption
- food intake
- other substances taken
- time for effects of alcohol to be registered
- standard drinks and acceptable measures of alcohol
- indicators of intoxication, including ways of assessing intoxication of customers
- ways of assessing customers affected by the consumption of illicit and other drugs
- principles of harm minimisation
- strategies laid down in legislation and codes of conduct developed by government agencies or industry groups and in-house policies that are designed to reduce the harm associated with liquor abuse
- understanding that these requirements are strategies to minimise the harm associated with liquor abuse

- knowledge and understanding of liquor laws and regulations at a depth relevant to the scope of job responsibility within licensed premises, including the following list that expresses general statements about requirements of liquor legislation and information that must be customised for each State or Territory:
 - legislative definition of intoxication
 - role of individual staff members and supervisors or managers in providing responsible service of alcohol, including seller or server duty of care and liability
 - requirement to adopt and use statutory signage on the premises for the entire range of circumstances applicable to the enterprise
 - requirements for mandatory content of any warning signs and wording within advertising or promotional material of any form, such as print advertising or internet sales
 - requirements for the remote sale and delivery of alcohol sales generated via the telephone, fax, email or mail
 - requirements for proof of age and obligations to minors under local legislation
 - provisions for retaining and reporting falsified proof of age documents
 - provisions for requiring someone to leave the premises
 - transportation options
 - barring procedures, where applicable
 - opening and closing hour provisions
 - requirements for monitoring noise and disturbances in and around licensed premises
 - requirements laid down in codes of practice or conduct developed by government agencies or industry groups
 - requirements described by an in-house policy, standard or code of practice or conduct
 - training and record keeping requirements
 - banned or undesirable products

REQUIRED SKILLS AND KNOWLEDGE

- personal and business implications of breaching any laws, regulations, government or industry-driven codes of practice or conduct
- offences and penalties relating to offences
- legal restrictions on alcohol use customised to state or territory legislation, including intoxication provisions of liquor licensing laws
- legal drink and drive limits.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- working knowledge and understanding of the relevant state or territory liquor legislation and industry codes and the ramifications of non-compliance for the enterprise and individual staff members
- knowledge of underpinning reasons for and benefits of responsible service of alcohol
- knowledge of principles of responsible service of alcohol and harm minimisation
- ability to apply knowledge of responsible service of alcohol and harm minimisation to alcohol sales or service situations, according to the level of responsibility of the candidate's current job role or the role they are seeking.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure:

- activities that allow the candidate to demonstrate the application of knowledge to specific responsible service of alcohol situations, which might include interaction with others to demonstrate appropriate communication skills
- use of relevant and current publications, signage, information and fact sheets distributed by key government agencies and industry bodies
- use of organisations or individual trainers and assessors approved or accredited by the liquor licensing authority, where required by certain states or territories.

Methods of assessment

A range of assessment methods that comply with assessment requirements set by the relevant state or territory liquor licensing authority should be used to assess the practical skills and knowledge required to sell or serve alcohol responsibly.

Because of the nature of this unit, i.e. intoxication provisions, it may be inappropriate in a training or assessment situation to demonstrate the practical aspects of this competence in the workplace or in a realistic simulation, therefore role-plays or case studies are recommended.

The following examples are appropriate for this unit:

- written and oral questioning or interview to test knowledge of legislation and all other knowledge components of this competency
- role-play by candidate to demonstrate ability to deal with intoxicated persons or refuse sales or service
- case studies and problem-solving activities
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

For holistic purposes, combined training and assessment is appropriate, but determination of competency for this unit must focus on the understanding and implementation of responsible service of alcohol practices that meet the

EVIDENCE GUIDE

requirements of state or territory legislation.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Accurate information may be provided to customers:

- verbally
- by use of mandatory signage
- by use of fact sheets and advertising material that comply with legislative requirements.

Issues related to the sale and service of alcohol may include:

- familiarity with specific customers
- physical stature
- demeanour and mood
- social context
- perceived health status
- perceived effects of illicit and other drug usage.

RANGE STATEMENT

Different types of customers, especially those at risk may include:

- young customers
- women
- minors
- Aboriginal and Torres Strait Islanders
- people from non-English speaking backgrounds
- people affected by the consumption of illicit and other drugs.

Standard drinks or samples should be measured using:

- appropriate nip measures
- electronic dispensing and measuring devices
- appropriately sized sample glasses.

Samples may include tastings of any item for sale in a:

- retail liquor outlet
- winery
- brewery
- distillery
- hospitality venue.

Erratic drinking patterns may include:

- mixing a wide range of drink types
- drinking quickly and asking for more immediately
- ordering more than one drink for self-consumption
- mixing alcohol consumption with consumption of prescription or illicit drugs
- consistently returning to the tasting site to request more samples
- ordering multiple samples
- ordering large samples
- ordering 'triple shots' or extra large drinks.

RANGE STATEMENT

Examples of requests for drinks to be dispensed in a manner that is *irresponsible, or which encourages the rapid or excessive consumption of liquor* may include:

- test tubes
- yard glasses
- laybacks
- jugs of spirits and mixers
- shooters
- rocket fuel
- large samples
- multiple samples for self-consumption.

Changes in behaviour may involve the customer becoming:

- quarrelsome
- disorderly
- aggressive
- violent.

Factors that may affect individual responses to alcohol include:

- gender
- weight
- general health
- rate of consumption
- food intake
- other substances taken, especially illicit and other drugs.

Proof of age according to state or territory liquor legislation includes:

- current driving licence
- proof of age card
- passport.

Intoxicated:

- denotes those to whom service may be refused due to excessive consumption of alcohol
- 'unduly intoxicated' may also be used in some state or territory legislation.

RANGE STATEMENT

Signage may include:

- standard promotional signs issued by the relevant state or territory licensing authority
- signs produced in-house that comply with wording required by legislation
- warning notices within any form of advertising.

Appropriate assistance to customers when refusing sale or service may include:

- organising transport for customers wishing to leave
- providing information on taxis
- assisting the customer to connect with their designated driver
- offering to sell or serve non-alcoholic drinks
- offering alternatives to alcohol, including food.

Appropriate communication and conflict resolution skills may include:

- using open and non-aggressive body language
- using a number of strategies to diffuse a situation, such as taking the person away from an audience or blaming the refusal on the 'law'
- monitoring the reactions of other customers
- picking early warning signs and intervening before the person is intoxicated
- not using physical touch or body language
- remaining calm and using tactful language.

Unit Sector(s)

Sector Hospitality

Competency field

Competency field Food and Beverage

SITHFAB011A Develop and update food and beverage knowledge

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to develop and maintain the general product knowledge required in food and beverage attending, bar service and catering.

The unit brings together much of the product knowledge that underpins effective work performance in a range of food service roles. It addresses food knowledge and the relationship between different foods and beverages. It focuses on the need for ongoing updating of knowledge by all food and beverage staff. Types of food for which knowledge may be required include traditional or contemporary items and may be of varying ethnic origins.

The specific product knowledge that applies to those mainly involved in beverage service is found in other units such as SITHFAB005A Provide table service of alcoholic beverages and SITHFAB002C Operate a bar. Care should be taken to avoid repetition in training and assessment.

There are also three other higher level units that deal with specialised food and beverage knowledge. They are SITHFAB013A Provide specialist advice on food, SITHFAB025A Provide specialised advice on Australian wines and SITHFAB326A Provide specialised advice on imported wines.

Some States or Territories have legislative requirements in relation to service of alcohol.

Application of the Unit

Application of the unit This unit applies to all food and beverage operations where knowledge of food and beverage is required. It applies to individuals working in a range of enterprises, including restaurants, cafes, hotels, clubs and at cellar doors. Persons requiring this knowledge may work as part of a team with some autonomy and responsibility for own work outputs.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | | |
|---|---|--|
| 1 | Research general information on food and beverages. | <ul style="list-style-type: none"> 1.1 Identify information required to fulfil daily activities associated with the job role. 1.2 Identify suitable <i>sources of required information on food and beverages</i>. 1.3 Develop and maintain <i>current knowledge of food and beverages</i> as required for the job role. |
| 2 | Share information with customers. | <ul style="list-style-type: none"> 2.1 Provide assistance to customers on selection of food and beverage items. 2.2 Offer advice on suitable <i>combinations</i> of food and beverages where appropriate. 2.3 Respond courteously and correctly to customer questions on menus and drinks lists. 2.4 Provide advice on menu items in response to special <i>dietary or cultural requirements</i> of customers. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

- The following skills must be assessed as part of this unit:
- safe work practices and specific food safety issues for different types of food
- service styles for different types of food
- communication skills to identify information, provide advice to customers and answer questions
- literacy skills to research information on food and beverages.

The following knowledge must be assessed as part of this unit:

- characteristics of food and beverage items commonly served in hospitality enterprises
- features of commonly prepared dishes appropriate to the industry sector
- traditional accompaniments for different types of food
- compatibility of common food and beverage items
- common cultural and dietary issues and options
- general overview of special dietary requirements, including food exclusions for allergies and food intolerance.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to update and maintain current and relevant knowledge and apply this to the workplace
- project or work activities that allow the candidate to demonstrate the application of knowledge to specific industry contexts and situations.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure:

- interaction with and involvement of customers with varying requirements or requests
- access to a range of sources for researching information.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- projects to research information on food and beverages
- written or oral test on food and beverage knowledge
- evaluation of presentation by candidate on food and beverage knowledge
- workplace activity or role-play to demonstrate provision of food and beverage advice to customers
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITHFAB004A Provide food and beverage service.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Sources of required information on food and beverages may include:

- chefs, cooks and other food service personnel
- product suppliers
- general and trade media, including print and electronic
- food and beverage reference books
- recipes and menus
- internet
- trade shows and exhibitions
- food and cooking demonstrations.

Types of ***food*** for which knowledge is required may include:

- appetisers
- soups
- meat, fish and seafood
- vegetables
- desserts and sweets
- snacks
- cheeses
- fruit
- salads
- pre-packaged food items
- specialist cuisine items.

Types of ***beverages*** for which knowledge is required may include:

- wines
- spirits
- liqueurs
- beers
- non-alcoholic drinks.

RANGE STATEMENT

Current knowledge of food and beverages must include:

- current market trends
- typical foods and wines of the local area
- seasonal produce
- enterprise menus and specials
- enterprise trends
- current food and beverage festivals
- promotional activities.

Appropriate *combinations* of food and beverages are based on the following factors:

- customer preferences
- traditional combinations of foods and food and beverages
- achieving balance of textures, colour and nutrition.

Dietary or cultural requirements may include:

- kosher
- halal
- food exclusions for allergies and food intolerance
- vegetarian.

Competency field

Competency field Food and Beverage

SITHFAB012B Prepare and serve espresso coffee

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to extract and serve espresso coffee using a commercial espresso machine, including storage of coffee and cleaning, and care and preventative maintenance of machinery. Care and maintenance procedures may vary according to the machine manufacturer recommendations and warranty conditions. Dosage measuring may be mechanical or electronic. Dosing also refers to selecting the correct amount of ground coffee, appropriate particle grind size and prevailing conditions such as ambient humidity. An espresso coffee is the basis of most coffee-based beverages.

The unit does not cover general preparation of coffee using methods of coffee extraction other than espresso machines, which is covered in SITHFAB010C Prepare and serve non-alcoholic beverages.

The terms barista, senior barista and master barista may have different meanings to diverse individuals and groups. Some prefer to make no designation and refer to a barista as someone who is a trained and expert operator.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit This unit applies to hospitality and catering operations where espresso coffee is extracted and served. It reflects the role of an espresso machine operator (barista) and others who make coffee using a commercial espresso machine in a variety of hospitality settings.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Organise and prepare work areas.	1.1 Organise coffee workstation according to workplace safety and hygiene practices, to enable efficient work flow and easy access to <i>equipment</i> and commodities. 1.2 Develop preparation and work routines according to <i>enterprise requirements</i> . 1.3 Complete <i>mise en place</i> and preparation for coffee service according to enterprise procedures. 1.4 Store coffee and commodities in appropriate airtight containers and conditions to maintain quality and freshness, according to workplace hygiene procedures and food safety regulations.
2 Provide customer service and advise customers on espresso coffee.	2.1 Provide advice to customers about coffee types and characteristics where appropriate. 2.2 Determine customer coffee preferences and requirements, and offer <i>coffee style</i> choices and accompaniments accordingly.
3 Select and grind coffee.	3.1 Select coffee and <i>grind</i> to correct particle size, according to enterprise requirements and customer preferences. 3.2 Take into consideration any environmental and equipment factors affecting dosage, and adjust grind and dose accordingly.
4 Extract coffee.	4.1 Select appropriate cups or glassware and ensure they are warm before preparation. 4.2 Measure or dispense required dosage and place into clean filter basket, tamping coffee evenly using correct pressure. 4.3 Ensure group head is clean prior to inserting group handle. 4.4 Monitor water and pump pressure, and moderate between cycles, according to enterprise procedures. 4.5 Analyse extraction rate and adjust where appropriate.

ELEMENT	PERFORMANCE CRITERIA
	<p>4.6 Assess quality of extraction visually and where appropriate by verifying flavour.</p> <p>4.7 Check spent grounds (puck or cake) to identify any required adjustments to dosage and technique.</p> <p>4.8 Release or purge water for two seconds from the group head before placement of group handle to extract coffee.</p>
5 Texture milk.	<p>5.1 Select correct cold milk and appropriate clean, cold jug according to espresso requirements and quantity on order.</p> <p>5.2 Expel excess water from steam wand before and after texturising milk and wipe clean after use.</p> <p>5.3 Texture milk according to milk type and specific order requirements.</p> <p>5.4 Combine foam and milk through rolling, ensuring even consistency.</p> <p>5.5 Pour milk promptly, evenly and consistently, according to coffee style and customer preferences.</p>
6 Serve and present espresso coffee.	<p>6.1 Present coffee attractively using clean ceramic or glass cups and avoiding drips and spills.</p> <p>6.2 Serve coffee at the required temperature, according to customer requirements and style, with appropriate crema, milk froth and accompaniments.</p>
7 Clean and maintain espresso machine.	<p>7.1 Follow required OHS and enterprise requirements throughout all cleaning and maintenance procedures.</p> <p>7.2 Clean all machine and parts thoroughly and safely according to manufacturer specifications and enterprise policies and procedures, using appropriate cleaning methods and recommended cleaning products and materials.</p> <p>7.3 Carry out allied end of service activities.</p> <p>7.4 Monitor and assess the operation and efficiency of the espresso machine and grinder during usage and take appropriate action where required in relation to defects and faults according to enterprise policies and</p>

ELEMENT

PERFORMANCE CRITERIA

procedures, *OHS and warranty requirements*.

- 7.5 Identify situations requiring the attendance of a trained service technician, licensed electrician or a designated senior person within the enterprise.
- 7.6 Use energy and water resources efficiently when preparing coffee and cleaning equipment to reduce negative environmental impacts.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- hygiene and food safety practices related to making, serving and storing coffee, coffee products and service equipment
- techniques for dosing, tamping and purging group head
- extraction and presentation of quality coffee
- milk texturing skills
- safe work practices when using coffee machines and other equipment, including posture at workstation
- numeracy skills to calculate and measure doses of coffee.

The following knowledge must be assessed as part of this unit:

- major coffee styles and their characteristics
- types of bean, blends and roasts with a particular emphasis on espresso roast
- key principles of coffee making
- appropriate pour rate for espresso coffee (industry recommended rate is 30 ml in 27-32 seconds depending on type of espresso coffee ordered, customer preferences and the coffee blend)
- factors that affect quality of coffee
- types of grind and grinding equipment
- types of machines and equipment and their main features and differences
- sizes and types of filter baskets, tampers and other equipment
- different milk types and their characteristics, including requirements for handling and storing milk
- storage conditions and requirements for coffee and commodities
- cleaning and maintenance procedures
- symptoms of potential faults in espresso machines and grinders
- sequencing and production of orders.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the

EVIDENCE GUIDE

performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to recognise quality in espresso coffee, meet customer requirements and expectations, and identify factors affecting quality and required outcomes
- ability to address problems during preparation and service of espresso coffee
- ability to extract and present quality coffee within realistic timelines
- compliance with all workplace hygiene and food safety regulations
- safe work practices in making espresso coffee.

Context of and specific resources for assessment

Assessment must ensure:

- access to a workstation with industry-current commercial espresso machine and appropriate equipment, including:
 - thermometer
 - coffee grinders or mills
 - serviceware, including cups, saucers, glasses, mugs and flatware
 - weighing and measuring equipment
 - storage bins in appropriate sizes and materials
 - blind or blank filters
 - tampers
 - espresso cleaning detergent
 - bins for discarded pucks or grind tubes
- access to a range of coffee types and commodities
- preparation of quantities of coffee items within industry-realistic timeframes for multiple customers simultaneously
- preparation and service of varieties of coffee types to meet various customer requirements.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate:

- direct observation of practical demonstration of extracting and serving coffee over an entire service period
- tasting of coffee prepared by the candidate
- use of video or peer observation
- written or oral questions to assess required knowledge relating to preparing and serving espresso coffee
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITXOHS002A Follow workplace hygiene procedures

SITHACS006B Clean premises and equipment

SITHFAB010C Prepare and serve non-alcoholic beverages.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Italicised wording** in the

RANGE STATEMENT

performance criteria is detailed below.

Equipment may include:

- types and brands of coffee grinders or mills and coffee machines
- serviceware, including cups, saucers, mugs and glasses of various sizes
- flatware
- weighing equipment
- measuring equipment
- tampers
- blind or blank filter and espresso cleaning detergent
- thermometer
- storage bins in appropriate sizes and materials
- bins for discarded pucks.

Enterprise requirements may include:

- policies and procedures related to persons authorised and trained to carry out particular activities related to machine operation, adjustment, cleaning and maintenance
- circumstances requiring the services of an authorised and trained technician
- specific requirements for routine and non-routine cleaning and maintenance
- requirements for checking and replacing parts and equipment
- specific requirements for decoration of coffee prior to presentation, such as stencils, logos, sprinkled toppings and coffee art
- policies and procedures for stock control, ordering and rotation.

RANGE STATEMENT

Mise en place and preparation for coffee service include:

- turning on machines to achieve correct pressure and temperature
- setting out cups, mugs, saucers, plates, jugs, glasses and other required serveware
- ensuring adequate supplies of coffee, milk varieties and sugars, including specialised sugars and substitutes
- assembling flavourings and toppings
- laying out flatware, serviettes and wipes.

Coffee styles to be prepared must include:

- short black (espresso)
- long black
- cappuccino
- flat white
- caffe latte
- short and long macchiato
- mocha.

Factors to consider in *grinding* coffee include:

- pre-setting grinder
- sensory analysis of grind, including:
 - visual
 - tactile
 - olfactory
 - tasting of finished product.

RANGE STATEMENT

Cleaning procedures include:

- wiping down entire machine to ensure cleanliness
- purging reservoir of hot water, releasing steam and backwashing the machine with an appropriate cleaning solution
- pouring boiling water to clean drainage pipes
- backflushing the machine at the end of a service cycle, using clean water to ensure no chemical and other residues are left
- cleaning the bean hopper using wet method, and drying thoroughly before refilling and storing
- brushing out dispensers
- cleaning all remaining parts using dry cleaning method
- backflushing group heads according to recommended industry methods, using a blank filter and appropriate machine detergent
- using colour-coded cloths, such as using blue for general cleaning and yellow for cleaning and wrapping steam wands
- wiping steamer wands after each use, using a damp cloth
- where there is build-up or caked-on product, wrapping steamer wands in a clean cloth, opening the valve and allowing hot water, with steam venting, to soften caked-on milk and then wiping with a damp cloth
- washing drip trays
- removing shower screens and diffusers if appropriate, cleaning using wet method and reassembling
- cleaning around the inside of the group head using an appropriate brush or cloth
- cleaning group handle and filter basket and steam arm spout after removing, using the wet method
- using correct and environmentally sound disposal methods for coffee making waste including recyclable glass and plastic bottles and containers.

Cleaning methods must include using a range of techniques, including:

- wet techniques: using warm water with recommended detergent for soaking various parts and cleaning with sponge, damp cloth or scourer (only for group handle)
- dry techniques: using a damp cloth followed by a dry cloth.

RANGE STATEMENT

- End of service activities* include:
- removing beans from hoppers at the end of service day or shift
 - storing according to enterprise requirements.
 -
- Monitor and assess* the espresso machine and grinder may include:
- ensuring the dosing chamber delivers the correct dosage of coffee
 - checking steam and pump pressure
 - stripping the grinder of external working parts, observing required safety procedures according to enterprise requirements.

SITHFAB016A Plan and monitor espresso coffee service

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and monitor espresso coffee service, including ordering coffee, equipment and commodities; appropriate storage; and supervising coffee service.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit applies to master and senior baristas and requires substantial specialist knowledge of coffee, its history and presentation in a variety of hospitality settings. The unit applies to hospitality and catering operations where espresso coffee is extracted and served.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

This unit must be assessed after the following prerequisite unit:
SITHFAB012B Prepare and serve espresso coffee.

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Plan coffee service.	1.1 Develop coffee menus and select menu items taking into consideration profit requirements, market focus and demographics, customer preferences and enterprise policies.
	1.2 Select suppliers and roasters, and make purchases according to enterprise requirements, budget and quality.
	1.3 Liaise with suppliers and roasters to ensure coffee meets enterprise requirements.
2 Provide specialist advice on coffee and coffee service.	2.1 Develop and update appropriate <i>information on coffee</i> .
	2.2 Respond to customer questions related to coffee and espresso coffee service.

ELEMENT	PERFORMANCE CRITERIA
	<p>2.3 Provide accurate information to colleagues and staff on coffee and coffee service.</p> <p>2.4 Promote coffee and coffee appreciation at appropriate opportunities.</p> <p>2.5 Display <i>accurate information</i> on coffee and coffee styles for customers where suitable.</p>
3 Monitor quality and service of coffee.	<p>3.1 Identify desirable <i>characteristics</i> of superior espresso coffee.</p> <p>3.2 Evaluate coffee beans to ensure freshness and appropriate oil content.</p> <p>3.3 Monitor grind to ensure correct particle size according to enterprise requirements and customer preferences.</p> <p>3.4 Monitor environmental variations affecting dosage, and adjust grind and dose accordingly.</p> <p>3.5 <i>Evaluate espresso coffee quality</i> through visual and other sensory means and by applying <i>indicators of quality</i>.</p> <p>3.6 Monitor coffee extractions and service according to enterprise practices, ensuring quality and consistency.</p> <p>3.7 Diagnose <i>faults and problems</i> in quality of coffee.</p> <p>3.8 Seek and follow up feedback on coffee quality from customers and staff.</p> <p>3.9 Deal with problems according to nature of problem and enterprise practices.</p> <p>3.10 Ensure coffee and commodities are stored appropriately in suitable containers and conditions.</p> <p>3.11 Ensure coffee items are presented correctly and attractively with suitable accompaniments.</p> <p>3.12 Assess quality and temperature of milk served and ensure it is texturised correctly.</p>
4 Monitor machinery and equipment.	<p>4.1 <i>Monitor espresso coffee machine and other equipment</i> for efficiency and reliability of operation.</p> <p>4.2 Monitor temperature and water pressure according to enterprise requirements.</p>

ELEMENT

PERFORMANCE CRITERIA

- 4.3 Ensure that environmentally sound cleaning, maintenance and waste disposal and recycling regimes and practices are in place.
- 4.4 Identify need for new equipment or parts taking into account relevant *considerations* and evaluate options.
- 4.5 Ensure that self and others follow safe practices and procedures in using machinery and equipment.
- 4.6 Identify situations requiring the attendance of a trained service technician or licensed electrician or actions that might invalidate warranties.
- 4.7 Schedule service calls and replacement of worn parts at appropriate times.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- hygienic and safe work practices related to making, serving and storing coffee and coffee products and service equipment
- work practices for the management of large coffee orders
- diagnosis of problems and faults in coffee
- methods to ensure efficient use of product and to minimise wastage
- customer service and communication skills to liaise with other team members, clarify requirements, provide information and listen to and interpret information and non-verbal communication
- numeracy skills to calculate and measure doses of coffee, and to calculate quantities for ordering supplies and costs.

The following knowledge must be assessed as part of this unit:

- cost and profit issues associated with the provision of espresso coffee service, including product, equipment and pricing of menu items
- flavour characteristics of varieties, types, blends and styles of coffee
- physical and chemical properties of coffee, and the effects of roasting and grinding
- special qualities of coffee arising from country and area of origin, roasting techniques, flavour enhancers and essences, type of grind and freshness
- physical properties of varieties of milk
- history and culture of coffee
- presentation aspects of coffee
- technical operation of machine
- diagnosis and rectification of problems and faults in coffee machines and equipment
- types of grinders and how they work
- impacts on flavour of coffee of machines, cleanliness of machines, temperature and pressure
- regulatory and legislative requirements impacting on coffee and coffee service.

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- in-depth knowledge and understanding of coffee and coffee service
- mastery of skills in extracting coffee
- management of coffee service.

Context of and specific resources for assessment

Assessment must ensure:

- access to a coffee station with a range of industry-current equipment, including:
 - at least three different types and makes of coffee machine
 - thermometer
 - coffee grinders or mills
 - serviceware, including cups, saucers, glasses, mugs and flatware
 - weighing and measuring equipment
 - storage bins in appropriate sizes and materials
 - blind or blank filters
 - tampers
 - espresso cleaning detergent
 - bins for discarded pucks or grind tubes
- demonstration of skills using at least three different types and makes of coffee machine
- access to a range of coffee types and commodities
- work activities that allow the candidate to develop and maintain systems for the service of coffee over a period of time.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- case studies to assess abilities to evaluate coffee, and diagnose and rectify a range of faults
- written or oral questions to test knowledge required to plan and monitor espresso coffee service
- review of workplace documents developed by the candidate, including operational procedures and maintenance schedules for espresso machines and equipment
- testing of candidate's ability to analyse and solve typical problems in coffee service or coffee quality
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITXOHS002A Follow workplace hygiene procedures
- SITXINV002A Control and order stock
- SITXMGT001A Monitor work operations
- SITHPAT012A Plan patisserie operations.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work

RANGE STATEMENT

environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Sources of ***information on coffee*** include:

- talking to product suppliers, roasters and other baristas
- memberships of associations and industry bodies
- reading general and trade media, and supplier information
- attending trade shows
- attending coffee tastings
- reading coffee reference books
- internet.

Accurate information for customers may include:

- coffee items, varieties and available accompaniments
- prices
- brochures about coffee types and grinds
- coffee education programs.

Characteristics of coffee include:

- colour
- appearance, including opacity or transparency
- aroma
- flavour
- taste
- freshness
- presentation.

Evaluate espresso coffee quality includes:

- use of visual and other sensory means, such as smelling and tasting coffee
- customer feedback
- consistency of product.

Indicators of quality include:

- industry and enterprise standards and requirements
- customer feedback
- repeat business
- sales of particular items, coffee types and styles.

RANGE STATEMENT

Faults and problems include:

- equipment breakdown or malfunction
- incorrect or inappropriate use of equipment
- poor quality control or maintenance
- breaches of OHS requirements.

Monitoring espresso coffee machine and other equipment may include:

- removing shower screens and diffusers if appropriate, cleaning using wet method and reassembling
- fine tuning or arranging fine tuning of machines according to manufacturer recommendations and warranty requirements.

Equipment considerations include:

- characteristics and advantages of size and capacity
- cost
- reliability
- service availability
- training in operation
- reputation of supplier.

Competency field Food and Beverage

SITHFAB222A Conduct a product tasting for alcoholic beverages

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to set up and conduct product tastings of alcoholic beverages.

The focus of this unit is on the practical skills to set up and conduct a tasting, underpinned by a broad general knowledge of alcoholic beverage products and a specific knowledge of products being tasted. The scope and depth of general knowledge will vary according to the work context but is broadly similar to that found in the food and beverage service unit SITHFAB005A Provide table service of alcoholic beverages.

Some states and territories have legislative requirements in relation to service of alcohol that impact on the work activities described in this unit.

Application of the Unit

Application of the unit This unit applies to those conducting product tastings of wines, beers, spirits or liqueurs. It is applicable to people working in a range of environments, such as wineries, restaurants or retail liquor outlets. It may also apply to liquor wholesalers who conduct tastings for retailers.

For those working in roles where a deeper, specialised knowledge of wines and other alcoholic beverages is required, this unit should be combined with all or some of the following units:

- SITHFAB323A Provide advice on beers, spirits and liqueurs
- SITHFAB325A Provide specialised advice on Australian wines
- SITHFAB326A Provide specialised advice on imported wines

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

- SITHFAB009A Provide responsible service of alcohol

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1	Taste and evaluate alcoholic beverages.	1.1 Identify basic characteristics of <i>alcoholic beverages</i> using <i>sensory evaluation techniques</i> .
		1.2 Use information from evaluations in preparation for tastings.
2	Set up and serve tasting samples.	2.1 Set up <i>tasting area, equipment and supplies</i> according to hygiene and other safety requirements.
		2.2 Make tasting environment conducive to effective tasting.
		2.3 Prepare and open products using techniques appropriate to particular product characteristics.
		2.4 Pour and present product to the customer in accordance with legal requirements and workplace policies.
		2.5 Serve tasting samples in order that allows the customer to experience different product characteristics most effectively.
		2.6 Collect and dispose of tasting waste according to safety, hygiene and other enterprise requirements.
3	Interact with customers during tasting.	3.1 Proactively provide relevant and correct information on alcoholic beverage products to customers.
		3.2 Encourage customers to ask questions or provide opinions on products being served.
		3.3 Correctly answer <i>common customer questions about alcoholic beverage</i> products and provide appropriate assistance with selections.

ELEMENT

PERFORMANCE CRITERIA

- 3.4 Encourage and facilitate responsible tasting by customers in accordance with Responsible Service of Alcohol provisions.
- 4 Handle and store alcoholic beverage products.
- 4.1 Handle alcoholic beverage products in a manner that ensures quality is maintained.
- 4.2 Maintain opened products as required by product characteristics.
- 4.3 Store and rotate products to ensure optimum quality and in accordance with workplace procedures.
- 4.4 Identify *common beverage product faults* and apply knowledge to work activities.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- customer service and communication skills to liaise with other team members, clarify requirements, provide information and listen to and interpret information and non-verbal communication
- literacy skills to read and interpret labels and other general information about alcoholic beverages
- literacy skills to read workplace policies and procedures relating to hygiene, safety, legal and enterprise requirements and RSA provisions
- organisational skills to co-ordinate the set up and conduct of a tasting
- problem-solving skills to respond to common wine product faults and routine customer service issues.

The following knowledge must be assessed as part of this unit:

- safety considerations for product tastings, including those around potential set-up hazards and use of glassware
- correct and safe opening procedures for different types of bottled beverages
- ways of ensuring conducive environment for tasting:

maintaining appropriate temperature

neutralising odours

eradicating or reducing noise

optimising light conditions

- hygiene requirements in relation to product tastings, including for handling and use of:

glassware

spittoons

opened products

other tableware

- requirements of the relevant state or territory Liquor Act in relation to service of alcohol (please note that this may be covered by completion of SITHFAB009A Provide responsible service of alcohol).
- general knowledge of wines in relation to:

Australian and international wine types

general features of wine from main Australian wine producing areas

REQUIRED SKILLS AND KNOWLEDGE

compatibility of major Australian and international wine styles to different types of food (general knowledge only)

main grape varieties and wine types, including:

- red, including cabernet sauvignon, shiraz, pinot noir and merlot
- white, including semillon, sauvignon blanc, riesling and chardonnay
- blended wines, including cabernet sauvignon, merlot, semillon and sauvignon blanc
- sparkling wines
- popular fortified wines, including sherry, port, muscat, vermouth, tokay and marsala
- dessert wines
- general knowledge of beers, spirits and liqueurs (including ready to drink products) in relation to:

flavour and characteristics

differences between Australian and imported products

glassware required for different types of beverage

- general knowledge of non-alcoholic beverages
- specific knowledge of products appropriate to the workplace
- general knowledge of storage and handling requirements for different alcoholic beverages
- content of beverage labels and how to interpret them.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- ability to set up and conduct a product tasting in accordance with relevant safety, hygiene and other workplace requirements
- effective interaction with customers
- ability to provide accurate advice about products being tasted
- knowledge of alcoholic beverages as specified under required knowledge.

Context of and specific resources for assessment

Assessment must ensure:

- interaction with and involvement of customers or colleagues with varying requirements or requests about alcoholic beverages
- access to information on alcoholic beverage products.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of candidate interacting with customers during a product tasting
- oral or written questions to assess knowledge of safety and hygiene issues around product tastings
- observation of a presentation on specific beverage products
- review of portfolio of evidence and third-party workplace reports of on-the-job performance by the candidate.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Alcoholic beverages may include:

- still wines
- fortified wines
- sparkling wines
- beer
- spirits
- liqueurs.

Sensory evaluation techniques may include:

- sight, to check for clarity, brightness, and intensity and shade of colour
- smell or nose, aroma and bouquet
- taste components, including bitter, acid, salt, sweet and umami.

Tasting area, equipment and supplies may include:

- glassware
- spittoons or spit buckets
- napkins
- chilling equipment
- ice
- wine lists
- light food
- tasting notes
- evaluation sheets
- promotional and pricing literature
- opening devices
- tables and tableware.

RANGE STATEMENT

Common customer questions about alcoholic beverages may include questions about:

- food and beverage matching
- cellaring requirements
- optimum time to drink
- comparisons between products
- value for money.

Common beverage product faults may include:

- cork problems (drying, shrinking, expansion, oxidation, bleeding and ageing)
- haze
- excessive hydrogen sulphide
- tartrates
- oxidation.

SITHFAB325A Provide specialised advice on Australian wines

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to provide specialised advice on Australian wines. It also includes some limited underpinning knowledge about imported wine types in the context of placing Australian wines in a world marketplace.

Some states and territories have legislative requirements in relation to service of alcohol that may apply to work activities described in this unit.

Application of the Unit

Application of the unit

This unit applies to all individuals who provide specialised advice to others about Australian wine. It may apply to a specialist wine attendant, sommelier, restaurant supervisor or to a range of other personnel in wineries, retail wine outlets or wine wholesalers.

Skills and knowledge for imported wines are found in the unit SITHFAB326A Provide specialised advice on imported wines.

The provision of wine advice could be undertaken in various contexts and will depend on the job role. This may include serving wine, contributing to the development of wine lists, selling or promoting wine or conducting a tour of a winery.

The unit also underpins effective achievement of competence in the unit SITHFAB428A Manage the sale or service of wine.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

- SITHFAB009A Provide responsible service of alcohol
- SITHFAB005A Provide table service of alcoholic beverages
- SITHFAB222A Conduct a product tasting for alcoholic beverages

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|------------------------------|--|
| 1 Evaluate Australian wines. | 1.1 Identify and explore the characteristics of a range of <i>Australian wines</i> using the full range of <i>sensory evaluation techniques</i> . |
| | 1.2 Review <i>other information</i> about viticulture and specific wine styles, regions and production methods to complement the sensory evaluation process |

ELEMENT	PERFORMANCE CRITERIA
	1.3 Develop informed opinions about Australian wines that support <i>work as a specialist in wine</i> .
2 Handle, store and monitor Australian wine products.	2.1 Store and cellar Australian wine according to <i>particular requirements</i> of different wines. 2.2 Monitor wine quality and recognise <i>impaired quality</i> based on in depth knowledge of Australian wines. 2.3 Where required, serve wine appropriately and at the correct temperature according to type and style of wine and customer preference. 2.4 Decant wines using techniques appropriate to the variety, style and vintage of wine.
3 Advise customers on Australian wines.	3.1 Provide accurate information and assistance on different Australian wine options. 3.2 Discuss and debate wine characteristics, origins and production methods with customers, taking account of the customers' level of wine knowledge. 3.3 Take account of <i>appropriate and ethical business considerations</i> when providing advice and make adjustments accordingly. 3.4 Assist customers with wine selections according to taste, price preferences and other specific needs. 3.5 Resolve issues with wine quality through accurate identification of faults and appropriate corrective action.
4 Extend and update own knowledge of Australian wines.	4.1 Conduct <i>formal and informal research</i> to access current, accurate and relevant information about wines. 4.2 Identify trends in customer tastes based on direct contact and workplace experience. 4.3 Identify general trends in the wine market and apply to the workplace as appropriate. 4.4 Provide assistance in the design, content and pricing of wine list as required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- communication skills to articulate advice on wines, and to discuss and debate different ideas and opinions about wines
- critical thinking skills to evaluate wide ranging information about wines and apply and adapt information to wine specialist activities
- literacy skills to research and interpret detailed information about wines from a variety of sources
- problem-solving skills to identify product faults and make judgments about appropriate remedial action.

The following knowledge must be assessed as part of this unit:

- the full range of sensory evaluation techniques and their relevance to different types of wines
- structure, history, trends and philosophies of the Australian wine industry
- general understanding of the operation of wine shows and wine medal systems in an Australian context
- characteristics of major Australian wines, including:

different wine types and their styles

different production methods

label terminology and interpretation

major regional variations

principal grape varieties used in wine types

the place of Australian wines in the international marketplace

how Australian wines compare with imported wines in terms of general types and styles

- general knowledge of Australian geography in relation to its impact on wine growing
- climatic classification of Australian grape-growing regions registered by the Geographical Indications Committee, including factors that influence the character of wine
- impact of the vineyard and viticultural techniques affecting the taste and style of wine
- annual cycle of a general vineyard and regional specific cycles
- wine production methods and variations for white, red, sparkling and fortified wines, including:

basic wine production steps and variations for different wines (harvesting, crushing, pressing,

REQUIRED SKILLS AND KNOWLEDGE

fermentation, clarification, maturing, bottling)

- new world approaches to wine making
- specific production techniques for white wine (additional clarification process - before and after fermentation, pressing, malolactic fermentation and oak usage)
- specific production techniques for red wine (fermentation on the skins, maceration techniques such as pumping over, plunging down, heading down and rotary fermenters)
- specific production techniques for sparkling wines such as *traditionelle*, the transfer process, tank fermentation and carbonation
- specific techniques for fortified wines
- factors that affect the style and quality of wine, including:

climate

soil

grape variety

viticultural techniques

storage

vinification techniques

- key structural components in wine and their impact on taste , including alcohol, tannin, sugar, fruit flavour
- indicators of quality in wines and analysis and diagnosis of wine faults or impairments, including:

oxidation

tartrates

cloudiness

cork faults

presence of hydrogen sulphide

- wine service techniques, including serving aged wines and processes for the decanting of wine
- storage and cellaring requirements for a range of wines and reasons for these
- contributing factors of a successful wine list
- overview of the types of foods that match successfully with different wines (more detailed food matching skills are found in the unit SITHFAB324A Provide specialised advice on food and beverage matching)
- requirements of the relevant state or territory Liquor Act in relation to service of alcohol (please note that this may be covered by completion of SITHFAB009A Provide responsible service of alcohol).

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- identification of different characteristics of Australian wines using sensory evaluation techniques
- knowledge of Australian wines, as detailed under required knowledge
- ability to maintain and extend current and relevant knowledge of Australian wines and to apply that knowledge to different workplace activities.

Context of and specific resources for assessment

Assessment must ensure:

- interaction with and involvement of other people to discuss Australian wine characteristics and options and to answer varied questions about wines
- access to a wide range of Australian wines and to information on wines.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of candidate providing advice to customers or colleagues on wine
- oral or written questions to assess knowledge of wine
- observation of a presentation on wine
- observation of candidate evaluating wines and providing opinions
- research project to develop information about wines for use in particular workplace context
- review of wine lists written by the candidate for particular contexts and purposes
- review of portfolio of evidence and third-party workplace reports of on-the-job performance by the candidate.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Australian wines must include wines from:

- all major and emerging Australian wine regions.

RANGE STATEMENT

Sensory evaluation techniques must include:

- visual appraisal:
 - wine swirling and glass handling
 - use of light and background
 - intensity and type of colour
 - clarity
 - identifying 'legs' or 'tears' to assess alcohol or glycerol content
- smell or nose appraisal:
 - techniques for releasing aroma and bouquet
 - recognising 'off' odours
 - assessing intensity of aromas
 - describing smell characteristics (eg fruity, vegetal, spicy)
 - assessing age
- taste appraisal:
 - techniques for releasing wine flavours (sucking in air, swirling wine over taste buds)
 - spitting techniques
 - recognising acidity, sweetness, weight or body, length, note, wine faults
- assessing balance of wine features on the palate.

Other information may include:

- promotional information
- details of production methods
- reference texts on wines
- product reviews
- presentation sessions from growers, wholesalers, distributors
- information on wines currently listed in the Australian Wine and Brandy Corporation (AWBA) Register of Protected Names.

RANGE STATEMENT

Work as a specialist in wine may involve:

- making presentations on wine
- selling wine to corporations
- selling wine to individuals
- conducting specialised wine tastings
- developing wine list suggestions
- providing winery tours.

Particular requirements may relate to:

- temperature
- humidity
- stock rotation
- shelf life
- amount of UV light
- vibrations.

Impaired quality might relate to:

- oxidation
- tartrates
- cloudiness
- cork faults
- presence of hydrogen sulphide.

Appropriate and ethical business considerations may include:

- profitability requirements
- current stock
- supplier arrangements
- stock availability
- range being promoted.

Formal and informal research may include:

- talking to product suppliers, winemakers and vineyard managers
- memberships of associations and industry bodies
- reading general and trade media and supplier information
- attending trade shows
- attending wine tastings
- reading wine reference books
- using the internet.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment

EVIDENCE GUIDE

Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- identification of wine characteristics, style, country and region of origin, vintage and production method using sensory evaluation techniques
- detailed knowledge of imported wines as specified under required knowledge
- effective communication of wine advice to customers
- ability to maintain and extend current and relevant knowledge of wines and to apply that knowledge to different workplace activities.

Context of and specific resources for assessment

Assessment must ensure:

- interaction with and involvement of other people to discuss wine characteristics and options and to answer varied questions about wines
- access to a wide range of wines and to information on wines.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of candidate providing advice to customers or colleagues on wine
- oral or written questions to assess knowledge of wine
- observation of a presentation on wine
- observation of candidate evaluating wines and providing opinions
- research project to develop information about wines for use in particular workplace context
- review of wine lists written by the candidate for particular contexts and purposes
- review of portfolio of evidence and third-party workplace reports of on-the-job performance by the candidate.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Imported wines must include wines from:

- Europe - France, Italy, Germany, Greece, Spain, Portugal, Central and South Western Europe
- North and South America
- New Zealand
- South Africa
- emerging wine growing countries.

Sensory evaluation techniques must include:

- visual appraisal:
 - wine swirling and glass handling
 - use of light and background
 - intensity and type of colour
 - clarity
 - identifying 'legs' or 'tears' to assess alcohol / glycerol content
- smell or nose appraisal:
 - techniques for releasing aroma and bouquet
 - recognising 'off' odours
 - assessing intensity of aromas
 - describing smell characteristics (eg fruity, vegetal, spicy)
 - assessing age
- taste appraisal:
 - techniques for releasing wine flavours (sucking in air, swirling wine over taste buds)
 - spitting techniques
 - recognising acidity, sweetness, weight or body, length, wine faults
 - assessing balance of wine features on the palate.

RANGE STATEMENT

Other information may include:

- promotional information
- details of production methods
- reference texts on wines
- product reviews
- presentation sessions from growers, wholesalers, distributors, visiting winemakers.

Work as a specialist in wine might involve:

- making presentations on wine
- selling wine to corporations
- selling wine to individuals
- conducting specialised wine tastings
- developing wine list suggestions
- providing winery tours.

Particular requirements may relate to:

- temperature
- humidity
- stock rotation
- shelf life
- amount of UV light
- vibrations.

Impaired quality might relate to:

- oxidation
- tartrates
- cloudiness
- cork faults
- presence of hydrogen sulphide.

Appropriate and ethical business considerations may include:

- profitability requirements
- current stock
- supplier arrangements
- stock availability
- range being promoted.

RANGE STATEMENT

Formal and informal research may include:

- talking to product suppliers, winemakers and vineyard managers
- memberships of associations and industry bodies
- reading general and trade media and supplier information
- attending trade shows
- attending wine tastings

SITHPAT001A Prepare and produce pastries

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to prepare and produce a variety of high-quality pastries and pastry products.

Pastries and pastry products to be produced and decorated may be of varied cultural origins and derived from classical or contemporary recipes.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit applies to patissiers working in various hospitality enterprises such as patisseries, restaurants, hotels and coffee shops.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

This unit must be assessed after the following prerequisite unit:
SITHOHS002A Follow workplace hygiene procedures.

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare pastries and pastry products.	<p>1.1 Prepare a variety of <i>pastries and pastry products</i> according to standard recipes and desired <i>product characteristics</i>.</p> <p>1.2 Select suitable ingredients according to recipe requirements, quality, freshness and desired product characteristics.</p> <p>1.3 Make paste and pastry products using correct <i>techniques</i> and ensuring appropriate <i>conditions</i> to optimise quality.</p> <p>1.4 Apply portion control to minimise wastage.</p> <p>1.5 Use <i>appropriate equipment</i> to produce required pastries and pastry products.</p> <p>1.6 Select required oven temperature and bake to ensure the</p>

ELEMENT	PERFORMANCE CRITERIA
	desired characteristics, including colour, shape and crust structure.
2 Decorate and present pastry products.	2.1 Decorate pastry products, to enhance appearance, using suitable <i>fillings</i> , icings and decorations, according to standard recipes, enterprise standards and customer preferences. 2.2 Present pastries attractively using suitable serveware and <i>decorations</i> .
3 Store pastries.	3.1 Store pastes and ingredients for pastry products, optimising quality and shelf life through appropriate storage methods. 3.2 Store pastry products to minimise spoilage and wastage, identifying <i>storage conditions</i> and using methods appropriate to specific products for short and medium-term preservation.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- principles and practices of hygiene, particularly in relation to handling pastes and dough
- safe work practices, particularly in relation to using cutting implements, appliances, heated surfaces, ovens and mixing equipment
- hygiene and safe handling and storage requirements related to pastry ingredients, commodities and products
- problem-solving skills to control quality
- literacy skills to read recipes, menus and instructions
- numeracy skills to calculate portions, and weigh and measure quantities of ingredients.

The following knowledge must be assessed as part of this unit:

- varieties and characteristics of pastes and pastry products, both classical and contemporary
- historical and cultural aspects of pastry and pastry products
- underlying principles of making pastry and pastry products
- commodity knowledge, including quality indicators of pastry ingredients
- culinary terms commonly used in the industry related to pastries and pastry products
- portion control and yield
- storage conditions for pastries and pastry products and optimising shelf life.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to produce a wide variety of pastries and pastry products from all categories
- ability to produce a quantity of pastries and pastry products, consistent in quality, size, shape and appearance, under typical workplace conditions and time constraints
- application of hygiene and safety principles throughout the preparation process
- decoration and presentation of a range of pastries and pastry products within typical workplace conditions.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within a pastry kitchen, as defined in the Assessment Guidelines
- access to industry-current equipment for making pastries and pastry products, including a deck oven
- use of authentic ingredients.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of practical demonstration by the candidate of preparing, decorating and presenting pastries and pastry products
- questions about hygiene procedures, commodities, production techniques and storage requirements
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITHPAT002A Prepare and produce cakes
- SITHPAT003A Prepare and produce yeast goods
- SITHPAT004A Prepare bakery products for patisseries.

EVIDENCE GUIDE

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

RANGE STATEMENT

Pastries and pastry products must include a basic selection from each of the following categories:

- short and sweet paste, including:
 - flans
 - tarts
 - fruit tartlets
- Scotch shortbread, including:
 - Viennese wafers
 - Linzer and other slices
 - savoury and sweet pies
- choux paste, including:
 - profiteroles
 - éclairs
 - croquembouche
 - Saint Honoré
- puff paste, including:
 - milles feuilles
 - palmiers
 - quiches
 - croissants
 - gateaux pithiviers
 - bouchées
 - cream horns
- filo or strudel
- Danish pastries.

Product characteristics must include:

- colour
- consistency and texture
- crust stability
- moisture content
- mouth feel and eating properties
- appearance.

RANGE STATEMENT

Techniques and conditions for producing pastry and pastry products may include:

- chilling ingredients and work surfaces where required
- kneading and handling
- rolling
- cutting and moulding
- resting
- preparing and using appropriate fillings and pre-bake and post-bake finishes and decorations.

Appropriate equipment may include:

- commercial mixers and attachments
- cutting implements
- scales
- measures
- bowl cutters
- ovens
- moulds, shapes and cutters
- piping bags and attachments.
-

Fillings may include:

- fresh or crystallised fruit and fruit purées
- whole or crushed nuts
- cream
- custard
- meringue.

Decorations may include:

- glazes
- jellies
- fruit purées
- icings
- fresh, preserved or crystallised fruits
- nuts
- fillings, including cream, mousse and fruit purées.

Storage conditions and methods appropriate to specific pastry products may include:

- consideration of temperature, light and air exposure
- use of airtight containers
- display cabinets, including temperature-controlled cabinets
- refrigeration, chilling and freezing.

	1.4 Use <i>appropriate equipment</i> to produce required cakes.
	1.5 Select required oven temperature and bake cakes to ensure the desired characteristics, including colour and shape.
2 Decorate and present cakes.	2.1 Decorate cakes to enhance appearance, using suitable <i>fillings</i> , icings and <i>decorations</i> , according to standard recipes, enterprise standards and customer preferences.
	2.2 Present cakes attractively using suitable serveware and decorations.
3 Store cakes.	3.1 Store cakes and ingredients for cake products, optimising quality and shelf life through appropriate storage methods.
	3.2 Store cakes to minimise spoilage and wastage, identifying <i>storage conditions</i> and using methods appropriate to specific products for short and medium-term preservation.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- safe work practices, particularly in relation to using cutting implements, appliances, heated surfaces, ovens and mixing equipment
- problem-solving skills to control quality
- literacy skills to read recipes, menus and instructions
- numeracy skills to calculate portions, and weigh and measure quantities of ingredients.

The following knowledge must be assessed as part of this unit:

- varieties and characteristics of basic cakes, both classical and contemporary
- historical and cultural aspects of cakes
- underlying principles of making cakes
- commodity knowledge, including quality indicators of cake ingredients
- principles and practices of hygiene particularly in relation to preparing cake batter and decorating finished cake products
- culinary terms commonly used in the industry related to cakes
- hygiene and safe handling and storage requirements related to cake ingredients, commodities and products
- portion control and yield
- storage conditions for cakes and optimising shelf life.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to produce a range of basic cakes
- ability to produce cakes that are consistent in quality, size, shape and appearance under typical workplace conditions and time constraints

EVIDENCE GUIDE

- application of hygiene and safety principles throughout the preparation process
- preparation, decoration and presentation of a range of basic cakes within typical workplace conditions.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within a pastry kitchen as defined in the Assessment Guidelines, using industry-current equipment for making cakes
- use of authentic ingredients.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of practical demonstration by the candidate of preparing, decorating and presenting cakes
- questions about hygiene procedures, commodities, production techniques and storage requirements
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITHPAT001A Prepare and produce pastries
- SITHPAT003A Prepare and produce yeast goods.
- SITHPAT004A Prepare bakery products for patisseries.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Basic cakes refer to a small range of cakes and sponges and must include:

- Madeira cake
- Genoise sponge
- basic aerated sponge
- Swiss roll
- fruit cake.

Product characteristics must include:

- colour
- consistency and texture
- moisture content
- mouth feel and eating properties
- appearance.

Techniques and conditions for producing cakes may include:

- weighing or measuring and sifting dry ingredients
- adding fats and liquids to dry ingredients
- stirring and aerating to achieve required consistency and texture
- selecting and preparing appropriate cake tins and moulds
- using required amount of batter according to desired characteristics of finished products
- preparing and using appropriate pre-bake finishes and decorations
- selecting baking conditions and temperatures.

RANGE STATEMENT

Appropriate equipment may include:

- commercial mixers and attachments
- whisks
- beaters
- spatulas
- wooden spoons
- cutting implements for nuts and fruits
- graters
- scales
- measures
- bowl cutters
- piping bags and attachments
- ovens
- cake tins and moulds.

Fillings may include:

- fresh and crystallised fruit
- fruit purées
- jams
- nuts
- creams
- mousse
- custard.

Decorations may include:

- glazes and jellies
- icings
- chocolate
- sprinkled icing sugar
- fresh, preserved or crystallised fruits
- fruit purées
- whole or crushed nuts
- coloured and flavoured sugar.

Storage conditions and methods appropriate for cakes may include:

- consideration of temperature, light and air exposure
- use of airtight containers
- display cabinets, including temperature-controlled cabinets
- refrigeration, chilling and freezing.

SITHPAT003A Prepare and produce yeast goods

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to prepare and produce a variety of high-quality yeast goods.

Yeast goods to be produced and decorated may be of varied cultural origins and derived from classical or contemporary recipes.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit applies to hospitality enterprises where yeast goods are prepared and served, such as patisseries, restaurants, hotels and coffee shops.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units This unit must be assessed after the following prerequisite unit:
SITHOHS002A Follow workplace hygiene procedures

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare and produce yeast goods.	<p>1.1 Prepare a variety of basic <i>yeast goods</i> according to standard recipes and desired <i>product characteristics</i>.</p> <p>1.2 Select suitable ingredients according to recipe requirements, quality and freshness and desired product characteristics.</p> <p>1.3 Make basic yeast goods, using correct <i>techniques</i> and</p>

ELEMENT	PERFORMANCE CRITERIA
	ensuring appropriate <i>conditions</i> to optimise quality.
	1.4 Use <i>appropriate equipment</i> to produce required yeast goods.
	1.5 Select required oven temperature and bake yeast goods to ensure the desired characteristics, including colour and shape.
2 Decorate and present yeast goods.	2.1 Decorate yeast goods, where required and appropriate, to enhance appearance, using suitable <i>fillings</i> , icings and <i>decorations</i> , according to standard recipes, enterprise standards and customer preferences.
	2.2 Present yeast goods attractively using suitable serviceware and decorations.
3 Store yeast goods.	3.1 Store yeast goods and ingredients for yeast good products, optimising quality and shelf life through appropriate storage methods.
	3.2 Store yeast goods to minimise spoilage and wastage, identifying <i>storage conditions</i> and using methods appropriate to specific products for short and medium-term preservation.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- safe work practices, particularly in relation to using cutting implements, appliances, heated surfaces, ovens and mixing and kneading equipment
- problem-solving skills to control quality
- literacy skills to read recipes, menus, instructions and orders
- numeracy skills to calculate portions, and weigh and measure quantities of ingredients.

The following knowledge must be assessed as part of this unit:

- varieties and characteristics of basic yeast goods, both classical and contemporary
- historical and cultural aspects of yeast goods
- underlying principles of making yeast goods
- commodity knowledge, including quality indicators of ingredients for yeast goods
- principles and practices of hygiene particularly in relation to handling dough
- culinary terms commonly used in the industry related to yeast goods
- hygiene and safe handling and storage requirements related to yeast goods, commodities and products
- portion control and yield
- storage conditions for yeast goods and optimising shelf life.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to produce a range of sweet and savoury yeast goods
- ability to produce a quantity of yeast goods that are consistent in quality, size, shape and appearance, under typical workplace conditions and time constraints
- application of hygiene and safety principles throughout the preparation process
- preparation, decoration and presentation of a range of yeast goods, within typical workplace conditions.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within a pastry kitchen as defined in the Assessment Guidelines, using industry-current equipment for making yeast goods, including a proofer and marble bench
- use of authentic ingredients.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of practical demonstration by the candidate of preparing, decorating and presenting yeast goods
- questions about hygiene procedures, commodities, production techniques and storage requirements
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITHPAT001A Prepare and produce pastries

SITHPAT002A Prepare and produce cakes.

SITHPAT004A Prepare bakery products for patisseries.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Yeast goods refer to a range of sweet and savoury breads, rolls and buns, and must include:

- basic breads and buns, such as:
 - Bath buns
 - bread rolls
- yeast-raised pastries, such as:
 - Danish pastries
 - croissants
 - brioche
 - küchen
 - babas
 - savarins.

Product characteristics must include:

- colour
- consistency and texture
- moisture content
- mouth feel and eating properties
- appearance.

RANGE STATEMENT

Techniques and conditions for producing yeast goods may include:

- chilling ingredients and work surfaces
- kneading and handling
- incorporating fat
- rolling
- preparing and using types of yeast
- cutting, shaping and moulding
- preparing and using appropriate fillings and pre-bake finishes and decorations.

Appropriate equipment may include:

- commercial mixers and attachments
- cutting implements
- scales
- measures
- bowl cutters
- piping bags and attachments
- ovens
- moulds, shapes and cutters
- baking sheets.

Fillings may include:

- fresh or crystallised fruit and fruit purées
- whole or crushed nuts
- spices
- cream
- frangipane
- custard
- chocolate
- jam
- savoury fillings such as ham and cheese.

RANGE STATEMENT

Decorations may include:

- glazes
- jellies
- fruit purées
- icings
- sprinkled icing sugar
- flavoured and coloured sugars
- fresh, preserved or crystallised fruits
- nuts
- fillings, including cream, mousse and fruit purées.

Storage conditions and methods appropriate to yeast goods may include:

- consideration of temperature, light and air exposure
- use of airtight containers
- display cabinets, including temperature-controlled cabinets to cool or warm
- refrigeration, chilling and freezing.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare bakery products.	<p>1.1 Prepare a variety of <i>bakery products</i> according to standard recipes and desired <i>product characteristics</i>.</p> <p>1.2 Select, measure and weigh suitable ingredients according to recipe requirements, quality, freshness and desired product characteristics.</p> <p>1.3 Use <i>appropriate equipment</i> to produce required bakery</p>

ELEMENT	PERFORMANCE CRITERIA
	products.
	1.4 Prepare dough to correct consistency and shape.
	1.5 Prove products according to specified temperature and other conditions.
	1.6 Make bakery products, using correct <i>techniques</i> and ensuring appropriate <i>conditions</i> to optimise quality.
	1.7 Select required oven temperature and bake goods to ensure the desired characteristics, according to standard recipe specifications and enterprise practice.
2 Decorate and present bakery products.	2.1 Finish bakery items according to desired product characteristics.
	2.2 Decorate yeast goods where required and appropriate to enhance appearance, using suitable <i>fillings</i> , icings and <i>decorations</i> , according to standard recipes, enterprise standards and customer preferences.
	2.3 Present yeast goods attractively using suitable serviceware and decorations.
3 Store bakery products.	3.1 Store bakery products in <i>storage conditions</i> required to maintain quality and extend shelf life.
	3.2 Select packaging options appropriate for the preservation of product freshness and eating characteristics.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- safe work practices, particularly in relation to using cutting implements, appliances, heated surfaces, ovens, manual handling, and mixing and kneading equipment
- problem-solving skills to control quality
- literacy skills to read recipes, menus and instructions
- numeracy skills to calculate portions and weigh and measure quantities of ingredients.

The following knowledge must be assessed as part of this unit:

- varieties and characteristics of bakery products, including:
 - classical
 - contemporary
 - from various ethnic and cultural backgrounds
- historical and cultural aspects of bakery products
- underlying principles of making bakery products
- culinary and technical terms commonly used in the industry related to bakery products
- commodity knowledge, including quality indicators of ingredients for bakery products, properties of ingredients used, and their interaction and changes during processing to produce required characteristics
- properties and requirements of yeast and control of yeast action
- processes of fermentation and dough development
- principles and practices of hygiene, particularly in relation to handling dough, commodities and products
- safe work practices, particularly in relation to using cutting implements, appliances, heated surfaces, ovens, manual handling and mixing or kneading equipment
- function and routine maintenance of equipment used
- storage conditions for bakery products and optimising shelf life
- ratio of ingredients required to produce a balanced formula
- defining and applying corrective steps to ensure quality control
- influence of correct portion control, yields, weights and sizes on the profitability of an establishment
- portion control and yield
- expected taste, texture and crumb structure appropriate for particular bakery products.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to produce a range of specialist bakery products, both sweet and savoury
- ability to produce a quantity of bakery products that are consistent in quality, size, shape and appearance, under typical workplace conditions and time constraints
- application of hygiene and safety principles throughout the preparation process
- preparation, decoration and presentation of a range of specialist bakery products, within typical workplace conditions.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within a pastry kitchen as defined in the Assessment Guidelines, using industry-current equipment for making a variety of specialist bakery products, including specialty bread moulds
- use of authentic ingredients.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of practical demonstration by the candidate of preparing, decorating and presenting specialist bakery products
- questions about hygiene procedures, commodities, production techniques and storage requirements
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITHPAT001A Prepare and produce pastries
- SITHPAT002A Prepare and produce cakes
- SITHPAT003A Prepare and produce yeast goods.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised wording** in the performance criteria is detailed below.

RANGE STATEMENT

Bakery products must include a selection of each of the following:

- breakfast and savoury items
- breakfast and speciality breads
- lunch and dinner rolls
- festive baking from a variety of ethnic and cultural backgrounds.

Product characteristics must include:

- colour
- consistency and texture
- moisture content
- mouth feel and eating properties
- appearance.

Appropriate equipment may include:

- commercial mixers and attachments
- cutting implements
- scales
- measures
- bowl cutters
- ovens
- moulds, shapes and cutters
- baking sheets and containers.

Techniques and conditions for producing yeast goods may include:

- chilling ingredients and work surfaces
- preparing and using types of yeast
- kneading and handling
- incorporating fat
- rolling
- cutting, shaping and moulding
- preparing and using appropriate fillings and pre-bake finishes and decorations.

RANGE STATEMENT

Fillings may include:

- fresh or crystallised fruit-based
- whole or crushed nuts
- fresh cream
- butter cream
- wine cream
- cheese cream
- chocolate
- jam
- custard
- ganache
- savoury fillings such as bacon, ham and cheese
- ready-made and pre-mixed.

Decorations may include:

- glazes
- jellies
- icings
- sprinkled icing sugar
- flavoured and coloured sugars
- fresh, preserved or crystallised fruits
- seeds and nuts.

Storage conditions and methods appropriate to bakery products may include:

- consideration of temperature, light and air exposure
- use of airtight containers
- display cabinets, including temperature-controlled cabinets to cool or warm
- refrigeration, chilling and freezing.

Competency field

Competency field Patisserie

SITHPAT007A Prepare and display petits fours

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to produce, display and service a wide range of petits fours, including petits fours glacés, marzipan-based petits fours and caramelised fruits and nuts served as petits fours, to a high and consistent quality.

Petits fours glacés may include sponge bases assembled with appropriately flavoured fillings cut into a variety of shapes, iced and decorated.

Marzipan-based petits fours may be modelled by hand or shaped with the aid of moulds and may be appropriately flavoured and coloured and sealed with cocoa butter or food lacquer.

Caramelised petits fours include fresh or dried fruits and nuts, filled or unfilled, coated with a pale amber-coloured caramel.

Fresh petits fours include bases prepared from choux or sweet paste with an appropriate filling, topping and decoration.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit applies to patissiers in hospitality enterprises where petits fours are prepared and served, such as patisseries, hotels, restaurants and coffee shops.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

This unit must be assessed after the following prerequisite units:

SITHOHS002A Follow workplace hygiene procedures
SITHPAT001A Prepare and produce pastries

SITHPAT002A Prepare and produce cakes

SITHPAT003A Prepare and produce yeast goods

or

SITHCCC014A Prepare pastries, cakes and yeast goods.

Employability Skills Information

Employability skills

The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare iced petits fours.	<p>1.1 Prepare, cut and assemble sponges and bases according to standard recipes and enterprise requirements and practice.</p> <p>1.2 Prepare <i>fillings</i> with the required flavours and consistency.</p> <p>1.3 Bring fondant icing to the correct temperature and consistency to achieve required coating thickness and surface gloss.</p> <p>1.4 Design and use <i>decorations</i> that enhance customer eye appeal.</p>
2 Prepare fresh petits fours.	<p>2.1 Pipe, bake, fill and <i>decorate</i> a selection of small choux paste shapes.</p> <p>2.2 Prepare and blind bake sweet paste in small moulds or tins in a variety of shapes.</p> <p>2.3 Prepare and use fillings with the required flavours and consistency.</p> <p>2.4 Use appropriate garnishes, glazes and finishes to enhance flavour and eye appeal.</p>
3 Prepare marzipan petits fours.	<p>3.1 Flavour and shape quality marzipan appropriately, producing mini-size fruits.</p> <p>3.2 Coat marzipan fruits to preserve desired eating characteristics and where required, soften with egg whites, pipe into shapes and seal or brown with applied heat, according to enterprise practice.</p>
4 Prepare caramelised petits fours.	<p>4.1 Select and coat fresh fruits or fruit segments with pale amber-coloured caramel.</p> <p>4.2 Sandwich dried fruits or nuts or fill with flavoured marzipan and coat with pale amber-coloured caramel, according to specifications and enterprise standards.</p>

ELEMENT	PERFORMANCE CRITERIA
5 Display petits fours.	5.1 Select and prepare appropriate <i>receptacles</i> for petits fours. 5.2 Display petits fours creatively to enhance customer appeal.
6 Store petits fours.	6.1 Store petits fours at correct temperature and conditions to maintain maximum eating characteristics, appearance and freshness.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- creative skills in decoration and presentation
- safe work practices, particularly in relation to using cutting implements, appliances, heated surfaces, ovens and mixing equipment
- working methods used in production and display of petits fours
- defining and applying corrective steps to ensure quality control
- problem-solving skills to control quality
- literacy skills to read recipes, menus, instructions and orders
- numeracy skills to calculate portions and weigh and measure quantities of ingredients.

The following knowledge must be assessed as part of this unit:

- varieties and characteristics of petits fours, both classical and contemporary, including taste, texture, structure, shape and size appropriate for petits fours and in line with industry and enterprise standards
- historical and cultural aspects of petits fours
- underlying principles of making petits fours
- commodity knowledge, including quality indicators of petits fours ingredients
- principles and practices of hygiene, particularly in relation to ingredients and commodities and preparing and decorating petits fours
- culinary terms commonly used in the industry related to petits fours
- portion control and yield
- storage conditions for petits fours and optimising shelf life
- properties of the ingredients used and their interaction and changes during production.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to prepare, present and display a diverse range of petits fours with consistency in size, shape, quality and presentation
- application of food hygiene and safety principles throughout the preparation, decoration and presentation process
- knowledge of the characteristics of petits fours, suitable decorations or garnishes, and the conditions required for optimum quality and presentation
- preparation, decoration and presentation of a range of petits fours within typical workplace conditions.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within a commercial pastry kitchen as defined in the Assessment Guidelines
- access to a range of industry-current equipment for making petits fours, including:
 - petit four moulds
 - marble slab and silicon mats
 - chocolate thermometer and saccharometer
 - range of icing and decorating equipment, including variety of decorative combs, fine icing sugar sieves, crimpers of various sizes and designs, matfer type stencils for cigarette paste decoration techniques and fine piping tubes size 3 to 000, chocolate spray gun, fine paint brushes size 3 to 000 and silk screens for cocoa mass screen techniques
 - dipping forks, petit four cutters and petit four dipping racks
- access to a range of presentation equipment, including:
 - cake boxes of various sizes
 - cake stands, including with clear cover and multi-tier, platters and mirrors, and cake boards
 - refrigerated cake display cases or towers
 - use of authentic ingredients.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of practical demonstration by the candidate of preparing, decorating and presenting petits fours
- questions about hygiene procedures, commodities, presentation and decoration techniques, and storage requirements to ensure optimum quality and food safety
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITHCCC013A Prepare hot and cold desserts.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

RANGE STATEMENT

Fillings may include appropriately flavoured:

- custard
- cream
- ganache.

Toppings and decorations may include:

- fresh fruits
- glazes
- fondant icing
- chocolate.

Receptacles may include those made from edible and non-edible materials, including:

- chocolate
- tulip paste
- sugar lace
- croquant
- glass
- crystal
- ceramic
- metallic platters and trays.

SITHPAT008A Prepare and model marzipan

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to prepare, handle and model marzipan and to decorate, colour and present modelled items.

Preparing marzipan refers to combining manufactured marzipan paste, pure icing sugar and glucose syrup to a smooth paste of a consistency best suited for its intended purpose.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit applies to patissiers in hospitality enterprises where marzipan is prepared and served, such as patisseries, hotels, restaurants and coffee shops.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

This unit must be assessed after the following prerequisite unit:
SITHOHS002A Follow workplace hygiene procedures

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare modelling marzipan.	<p>1.1 Select, weigh and combine ingredients to achieve desired composition and characteristics of quality modelling marzipan.</p> <p>1.2 Identify potential problems and take appropriate preventative measures to maintain desired characteristics.</p> <p>1.3 Observe food hygiene principles and requirements.</p>
2 Prepare moulded and modelled shapes.	<p>2.1 Mould or model <i>marzipan</i> in a variety of figures, shapes and flowers.</p> <p>2.2 Apply appropriate colourings, decorations and coating agents to enhance appearance and presentation.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.3 Seal finished shapes to preserve freshness and eating characteristics and appearance.
3 Store marzipan products.	3.1 Store marzipan products at the correct temperature and in conditions to avoid excessive crust formation, drying out and hardening and to maintain maximum eating characteristics and appearance.
4 Use marzipan to cover cakes, gateaux, torten and petits fours.	4.1 Ensure surface of items to be covered is level and smooth. 4.2 Roll out marzipan to specified size and thickness. 4.3 Apply marzipan ensuring a smooth and seamless finish.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- creative skills in decoration and presentation
- handling and storing marzipan and marzipan products and recognising factors affecting their quality
- working methods used in production and display of marzipan, including the use of equipment for preparation and moulding
- defining and applying corrective steps to ensure quality control
- problem-solving skills to control quality
- literacy skills to read recipes, menus, instructions and orders
- numeracy skills to calculate portions and weigh and measure quantities of ingredients.

The following knowledge must be assessed as part of this unit:

- characteristics of marzipan, both classical and contemporary, including taste, texture, structure, shape and size appropriate for industry and enterprise standard marzipan products
- hygiene and food safety requirements relating to preparing, decorating, handling and storing marzipan
- historical and cultural aspects of marzipan
- underlying principles of making marzipan
- commodity knowledge, including quality indicators of marzipan ingredients
- culinary terms commonly used in the industry related to marzipan
- portion control and yield
- storage conditions for marzipan and optimising shelf life
- properties of the ingredients used and their interaction and changes during production.

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to present and display a diverse range of modelled and moulded marzipan products with consistency in size, shape, quality and presentation
- application of food hygiene and safety principles throughout the preparation, decoration and presentation process
- knowledge of the characteristics of marzipan and suitable decorations or garnishes and the conditions required for optimum quality and presentation
- preparation, decoration and presentation of a range of marzipan shapes within typical workplace conditions and timeframes.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within a commercial pastry kitchen as defined in the Assessment Guidelines
- access to industry-current equipment for preparation and modelling of marzipan, including:
 - marzipan modelling tools and moulds, such as leaf, flower petal cutters, novelty moulds, crimpers of various sizes and designs, textured rolling pins and boards, piping tubes, dipping forks, fine piping tubes size 3 to 000, and fine icing sugar sieves
 - marzipan refiner or high powered food processor, such as robot coupe
 - chocolate thermometer and saccharometer
 - marble slab and silicon mats
 - chocolate spray gun kit, or brown cocoa butter aerosol and airbrush
- access to presentation equipment, including:
 - cake stands, including multi-tier and clear cover, platters and mirrors, and cake boards
 - doilies in a range of shapes and sizes
 - presentation containers or boxes of various sizes
 - use of authentic ingredients.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of practical demonstration by the candidate of preparing, decorating and presenting modelled and moulded marzipan
- questions about hygiene procedures, commodities, presentation and decoration techniques and storage requirements to ensure optimum quality and food safety
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITHCCC013A Prepare hot and cold desserts
- SITHPAT001A Prepare and produce pastries
- SITHPAT002A Prepare and produce cakes.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

RANGE STATEMENT

Handling of marzipan must include:

- modelling into shapes, figures or flowers
- colouring, decorating, glazing and sealing
- covering cakes, gateaux, torten and petits fours with marzipan.

SITHPAT010A Prepare and display sugar work

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to prepare sugar for sugar work and to plan and produce sugar-based display pieces.

The preparation of sugar includes boiling to various predetermined temperature stages suitable for pulling, casting or blowing.

Pulling refers to manipulating boiled sugar after initial cooling, to incorporate air and to achieve elasticity and sheen.

Casting refers to pouring boiled sugar into prepared framework or moulds or into free-flowing shapes. The preparation of sugar casts also includes casting of individual segments, assembling, decorating and preparing for display and storage.

Blowing refers to creating shapes by blowing air through a blowpipe into boiled sugar of the correct temperature.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit applies to patissiers in hospitality enterprises where sugar-based display items are prepared for display, such as patisseries, pastry shops, hotels, restaurants and catering enterprises.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units This unit must be assessed after the following prerequisite unit:
SITHOHS002A Follow workplace hygiene procedures

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Boil sugar.	1.1 Identify and assemble required ingredients according to standard recipes and enterprise requirements. 1.2 Combine sugar and water and boil to required temperature, using <i>specialised equipment</i> for boiling

ELEMENT	PERFORMANCE CRITERIA
	sugar correctly and safely.
	1.3 Follow preparation methods specified in standard recipes.
	1.4 Use colouring and flavourings appropriately, according to sugar products required.
	1.5 Handle boiled sugar solution safely according to safety requirements, standard recipes and enterprise practice.
2 Pull boiled sugar.	2.1 Manipulate boiled sugar to avoid crust forming.
	2.2 Turn out and pull sugar, using a suitable work surface and according to standard industry practice and safety requirements.
3 Store pulled sugar.	3.1 Portion pulled sugar according to intended use.
	3.2 Use correct packaging methods and vacuum-seal pulled sugar pieces.
	3.3 Use appropriate storage procedures to ensure extended shelf life.
4 Plan decorative sugar work.	4.1 Plan sugar work appropriate for the occasion, allowing adequate time for, or working within time available for, preparation.
	4.2 Produce sketches or outlines of required forms and shapes and identify colours, decorations and supports.
	4.3 Prepare formwork or moulds and working surface appropriately.
	4.4 Calculate required quantities of differently coloured sugar.
	4.5 Select and use appropriate equipment and materials.
5 Prepare sugar work.	5.1 Boil sugar, adding required colouring and arrest the temperature at the correct point for casting or blowing as required.
	5.2 Cast boiled sugar, shaping into desired forms or moulds, using appropriate techniques and skills and achieving correct and even thickness.
	5.3 Remove formwork from sugar at the correct stage of

ELEMENT	PERFORMANCE CRITERIA
	hardening and move sugar items to cool areas, where required, to accelerate cooling.
	5.4 Create sugar pieces using appropriate blowing techniques and suitable materials and equipment.
	5.5 Assemble sugar centrepieces to achieve balance, proportion and optimum strength.
	5.6 Decorate sugar work creatively, ensuring appropriateness for the occasion and creating customer appeal.
6 Display sugar work.	6.1 Display <i>sugar work</i> attractively to enhance food displays.
	6.2 Use sugar work to complement, harmonise and balance the displayed food.
7 Store sugar work.	7.1 Store sugar work according to establishment procedures, ensuring it is protected from humidity, dust and heat.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- handling and storing sugar work and recognising factors affecting quality and optimising shelf life
- safe boiling and handling of sugar and underlying principles of preparing sugar
- basic first aid for treatment of burns in case of accidents
- ability to pull, cast and blow sugar
- working methods used in production and display of sugar work, including the use of equipment
- creative skills in decoration and presentation
- defining and applying corrective steps to ensure quality control
- literacy skills to read recipes, menus, instructions and orders
- numeracy skills to calculate portions and weigh and measure quantities of ingredients.

The following knowledge must be assessed as part of this unit:

- safety requirements relating to possible dangers when handling boiled sugar at high temperatures
- historical and cultural aspects of sugar work
- commodity knowledge, including quality indicators of ingredients used in sugar work
- culinary terms commonly used in the industry related to sugar work
- portion control and yield
- causes of premature crystallisation of boiled sugar and methods to avoid it
- properties of the ingredients used and their interaction and changes during production
- influence of cleanliness of materials used on the boiling process and quality outcome
- hygiene and food safety requirements relating to sugar work.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to produce a wide range of sugar work using pulling, casting and blowing
- application of safety and food hygiene principles throughout preparation, decoration, presentation and storage processes
- ability to produce sugar work of optimum quality and creativity
- preparation, decoration and presentation of a range of sugar work within typical workplace conditions.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of skills within a commercial kitchen or pastry kitchen, as defined in the Assessment Guidelines
- access to industry-current equipment for producing sugar work, including:
 - air conditioned room
 - heating lamp with red or white light and hair drier with cold air setting or small cooling fan
 - blow torch
 - silicon paper and mats
 - heat resistant plasticine
 - saccharometer
 - marble slab
 - hand pump for blowing sugar
 - modelling tools, such as marzipan tools
 - airtight sugar display cases
 - assorted rings, moulds, metal bars and similar equipment usable for poured and moulded sugar work
 - cake wheels
 - scissors
 - suitable presentation bases, such as mirrors, tiles and platters
 - basket weave boards (round and oval shaped) complete with metal rods
 - disposable gloves for pulling and shaping sugar
- use of authentic ingredients.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of practical demonstration by the candidate of preparing, decorating and presenting sugar work
- questions about the preparation of and characteristics of quality sugar work, safe handling and hygiene procedures, commodities, presentation and decoration techniques, and storage requirements to ensure optimum quality and food safety
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITHCCC013A Prepare hot and cold desserts
- SITHPAT001A Prepare and produce pastries
- SITHPAT002A Prepare and produce cakes.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

RANGE STATEMENT

Specialised equipment for sugar work may include:

- sugar boilers
- sugar thermometers
- rubber mats
- metal strapping
- moulds
- patterns
- blowpipes
- foil
- plasticine
- display stands and bases
- spatulas
- shears.

Safe handling of boiled sugar solution may include:

- using protective gloves and mitts where appropriate
- covering exposed skin
- ensuring all equipment has secure handles
- avoiding drips and dribbles
- using insulated pot rests.

Sugar work may be used for:

- centrepieces
- desserts
- decorations for cakes and desserts
- sweets.

SITTIND001B Develop and update tourism industry knowledge

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to develop and update current and emerging information on the tourism industry, including industry structure, current technology and key environmental, community, legal and ethical issues that must be considered and applied by tourism industry personnel in their day-to-day work. The unit focuses on the ability to source and comprehend general tourism industry information and covers the initial and ongoing development of a person's required knowledge base. This information underpins effective performance in the tourism industry. More specialised and advanced tourism research and management knowledge is found in other units.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit describes a key function for all people working in the tourism industry who require an essential and broad knowledge of the tourism industry to support all work activities. This unit applies to individuals working within any tourism industry sector, in any location and for any tourism organisation type.

It is relevant to those individuals working in any tourism operational and management role.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Source and apply general information on the structure and operation of the tourism industry.	<p>1.1 Identify <i>sources of information</i> to understand the structure and operation of <i>the tourism industry</i>.</p> <p>1.2 Access and comprehend specific <i>information</i> of relevance to the tourism industry.</p> <p>1.3 Access and use knowledge of the tourism industry to</p>

ELEMENT	PERFORMANCE CRITERIA
	<i>enhance the quality of work performance.</i>
2 Source and apply information on legal and ethical issues that impact on the tourism industry.	2.1 Obtain information on legal issues to assist effective work performance. 2.2 Conduct day-to-day tourism organisation activities according to legal obligations and ethical industry practices .
3 Source and apply information on tourism industry technology.	3.1 Source and access information on current and emerging technologies that impact on the tourism organisation process . 3.2 Identify the potential effects of different technologies on the tourism organisation process. 3.3 Apply knowledge of current and emerging technology in day-to-day work activities.
4 Update personal and organisational knowledge of the tourism industry.	4.1 Identify and use a range of opportunities to update knowledge of the tourism industry. 4.2 Monitor current issues of concern to the industry. 4.3 Share updated information with colleagues, according to organisational procedures, and incorporate into day-to-day work activities.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- research skills to identify, interpret and sort relevant information
- communication skills including active listening and questioning to obtain information and to provide a verbal summary of information
- literacy skills to read and comprehend the content of plain English information documents about legal issues, industry accreditation schemes and codes of conduct
- writing skills to note take, summarise and record information in basic documents such as information sheets, portfolios and files.

The following knowledge must be assessed as part of this unit:

- sources of general information on the tourism industry
- structure of the tourism industry; the functions, key characteristics and business interrelationships of the different sectors of the tourism industry including the distribution roles of the following sectors:
 - accommodation
 - attractions and theme parks
 - tour operators
 - inbound and outbound tour wholesalers
 - retail travel agents
- the general nature of allied and crossover industries including hospitality, meetings, incentives, conferences and events
- the existence and primary functions of the major cross-industry and sector-specific industry associations especially those with which the business has a relationship
- the existence and primary functions of trade unions in the industry
- the existence and primary functions of local, regional, state and national tourism information service and marketing organisations
- the existence and primary functions of tourism research bodies
- the existence and key characteristics of occupational licensing, codes of conduct or ethics and industry accreditation schemes in the tourism industry, the impacts of compliance and non-compliance and the roles and responsibilities of individual staff members in these quality assurance processes
- the existence and basic aspects of state, territory and local council laws that impact on tourism operations and actions that must be adhered to by tourism businesses, in particular laws that cover:
 - equal employment opportunity (EEO)

REQUIRED SKILLS AND KNOWLEDGE

- anti-discrimination
- occupational health and safety and workers' compensation
- workplace relations
- child sex tourism
- the delivery of tourism products in Queensland under the Queensland Tourism Services Act (2003)
- legal liability and duty of care of customers
- environmental protection (This would include requirements that must be met by tourism operators when delivering services.)
- local community protection (This would include land ownership, management and access requirements that must be met by tourism operators when delivering services.)
- consumer protection (This would include refund requirements that must be met by tourism businesses, terms and conditions of quotations and cancellation fees.)
- responsible service of alcohol
- food safety
- current and emerging technology used in the tourism industry, including e-business.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- ability to source initial and updated tourism industry information and apply this to day-to-day activities to maximise effective performance in specific tourism sector contexts
- general knowledge of the tourism industry, including main roles, functions and interrelationships of different sectors, with a more detailed knowledge of issues that relate to a specific sector or workplace
- general knowledge of the key environmental, community, legal and ethical issues for the tourism industry.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure:

- access to a fully equipped office environment using appropriate computers, printers, communication technology, information programs and publications to facilitate the processes involved in sourcing industry information
- access to information sources in order to conduct research and collect sufficient information
- access to industry association membership information, codes of conduct and accreditation information
- access to plain English documents that describe key tourism and general workplace legislation.

Methods of assessment

A range of assessment methods should be used to assess the practical skills and knowledge required to develop and update tourism industry knowledge. The following examples are appropriate for this unit:

- projects to research differing aspects of the tourism industry and delivery of the sourced information in a brief written or oral presentation
- holistic tourism planning project activities that allow the candidate to demonstrate the application of knowledge to specific tourism industry contexts and situations
- case studies and problem-solving exercises to assess application of knowledge to different situations and contexts
- written and oral questioning or interview to test knowledge of different sectors of the tourism industry and their interrelationships, the key content of legislation and industry codes of conduct
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended for example:

- SITXADM002A Source and present information
- SITXCOM004A Communicate on the telephone.

EVIDENCE GUIDE

Guidance information for assessment

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Sources of information on and *opportunities to update knowledge* may include:

- formal and informal research
- media
- reference books
- legislation or plain English publications describing the law and responsibilities to comply
- libraries
- unions
- industry associations and organisations
- industry journals
- computer data, including internet
- personal observations and experience
- informal discussions and networking with colleagues
- industry seminars
- training courses
- familiarisation tours of tourism destinations and facilities
- participation or membership in professional industry associations
- participation in industry accreditation schemes
- use of industry codes of conduct or ethics.

RANGE STATEMENT

The *tourism industry* involves a range of sectors and businesses including:

- accommodation
- attractions
- transport
- retail travel
- tour wholesaling
 - inbound tour operators
 - outbound wholesalers
- tour operations
- meetings, incentives, conventions and events
- tour guiding
- information services and promotion:
 - visitor information centres, regional, state and national tourism offices.
- coordination
 - industry associations, councils, taskforces, research bodies.

RANGE STATEMENT

Information of relevance to the ***the tourism industry must include:***

- different tourism markets and their relevance to industry sectors
- relationships between tourism and other industries, including:
 - events
 - hospitality
 - entertainment
 - arts
 - sports
 - agriculture
 - conservation
 - science and research
 - retail
- different sectors and businesses within the industry, their interrelationships and the services available in each sector
- major tourism industry bodies and associations
- economic and social significance of the tourism industry, which may relate to:
 - employment
 - effect on local amenities and facilities
 - population change due to tourism development
 - community role in tourism
- role of and impacts on local communities
- environmental issues for tourism, including:
 - protection of natural and cultural integrity
 - minimal impact operations
 - environmental sustainability
 - waste management
 - energy-efficient operations
 - land ownership
 - land access and usage
- industrial relations
- specific features of the local and regional industry
- career opportunities within the industry
- roles and responsibilities of individual staff members in a successful tourism business, including ethical practices and quality assurance.

RANGE STATEMENT

Enhancing the quality of work performance may involve:

- making contacts with networks for obtaining key information to develop, deliver and improve improve tourism operations
- suggesting new and improved ways of doing things
- performing work duties within legal, ethical and social guidelines to ensure smooth tourism operations
- improving skills, knowledge and productivity to improve tourism operations by accessing and attending industry professional development courses or activities.

Legal issues may include:

- consumer protection
- EEO
- anti-discrimination
- workplace relations
- public liability and duty of care
- licensing
- land ownership, management and access
- environmental management
- risk management
- OHS
- child sex tourism
- Queensland Tourism Services Act (2003).

RANGE STATEMENT

Ethical industry practices may relate to:

- maintaining the rights and lifestyle conditions of local community residents
- agreed compliance with codes of conduct, practice or ethics
- truth and honesty regarding all information given to customers
- product recommendations
- declaration of commissions, fees and other charges
- subcontracting and provision of services as promoted
- pricing
- procedures for payment of commissions
- bookings at venues
- overbooking
- confidentiality of customer information
- tipping
- familiarisations
- gifts and services free of charge
- preferred product arrangements.

Technologies that impact on the tourism organisation process may relate to:

- current and emerging industry technology, including e-business
- internal and industry wide reservation, operations and financial and tracking systems
- project management systems
- computer-aided design (CAD) systems.

Issues of concern to the industry may relate to:

- maintaining organisational and industry profitability by productivity and pricing flexibility
- industry initiatives
- government initiatives
- emerging markets
- environmental and social issues
- labour issues
- industry expansion or retraction.

SITXCCS001B Provide visitor information

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to provide visitors with general information about a local area.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit applies to frontline service personnel working in a range of tourism, hospitality, entertainment and cultural sectors who routinely respond to requests for general visitor information.

The unit reflects a context where information provision is fairly general in nature or where it is not the primary job role. For example, this unit might apply to individuals working in restaurants, hotels, wineries, attractions and entertainment venues, or to a volunteer in a visitor information centre who may not be expected to respond to requests for more complex or detailed Australian destination information. It might also include information on the venue in which the person works, e.g. products and services within a large theme park, attraction, cultural venue, winery or resort complex. The unit SITTTSL004A Source and provide Australian destination information and advice, is more relevant to people working in jobs where the provision of destination information is a primary focus, e.g. travel consultants and visitor information officers.

A person undertaking this role works under supervision and guidance from others.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Access and update visitor information.	1.1 Identify and access appropriate <i>sources of visitor information.</i> 1.2 Incorporate information into day-to-day working activities to support quality of service and standards within the organisation. 1.3 Share information with colleagues to support the

ELEMENT	PERFORMANCE CRITERIA
	efficiency and quality of service.
	1.4 Identify and use opportunities to update and maintain local knowledge.
2 Provide information.	2.1 Proactively identify information and assistance needs of different customers, including those with special needs.
	2.2 Provide accurate and unbiased information in a clear, concise, courteous and <i>culturally appropriate manner</i> .
	2.3 Where appropriate, assist or instruct visitors in the use of equipment and facilities or refer to relevant colleagues.
	2.4 Consider health and safety requirements when providing information and assistance.
	2.5 Promote <i>internal products and services</i> using appropriate customer service skills.
3 Seek feedback on services.	3.1 Proactively seek feedback on services from visitors.
	3.2 Observe visitor behaviour to inform future service developments and correctly follow procedures for any formal customer evaluation.
	3.3 Provide information on visitor feedback to relevant colleagues.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- communication and interpersonal skills to interact in a friendly and courteous way with customers
- basic research skills to source information on a predictable range of customer requests
- literacy skills to understand, interpret and orally communicate local information and promotional material.

The following knowledge must be assessed as part of this unit:

- sources of information for organisation and local area knowledge
- general knowledge of organisation, local attractions and events, transport options and general visitor facilities, including shopping, currency exchanges, post offices, banks and emergency services (the focus of this knowledge will vary according to organisational needs)
- understanding of the need to provide advice in an unbiased and ethical manner
- available sources of advice and referral for more complex requests
- safety and emergency procedures for visitors, colleagues and self
- sources of customers in the relevant industry context.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- ability to source accurate and current information on the local area
- general knowledge of the local area sufficient to answer commonly asked customer questions relevant to job role
- demonstration of skills on multiple occasions or in response to multiple requests reflecting breadth of knowledge and ability to respond to different situations.

Context of and specific resources for assessment

Assessment must ensure:

- interaction with others in the provision of information to demonstrate appropriate interpersonal skills
- use of current local area information.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- project to research visitor information for the organisation or local area
- direct observation of the candidate using local knowledge to answer customer questions
- oral or written questions to assess knowledge of local information and information sources
- role-play to provide information for variety of different customers
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Sources of visitor information may include:

- brochures
- timetables
- local visitor guides
- library and local council
- local people including local identities with specialised knowledge
- winemakers and other wine experts
- organisation information
- room directories
- maps
- internet.

Visitor information must include:

- organisation-specific information
- local transport options
- local attractions and events
- general visitor facilities, including shopping locations, currency exchanges, post offices, banks and emergency services
- specific shopping details, including local markets
- accommodation options
- restaurants, cafes and other dining venues
- other facilities and services such as hairdressers, dentists and travel agencies
- theatres and entertainment venues
- sporting facilities
- tours, local outings and trips
- travelling routes
- weather conditions.

RANGE STATEMENT

Opportunities to update and maintain local knowledge may include:

- talking and listening to colleagues and customers
- participating in local familiarisation tours
- visiting the local information centre
- personal observation or exploration
- watching television, videos and films
- listening to radio
- reading local newspapers, staff noticeboards, leaflets, brochures and internal newsletters
- attending team meetings.

Culturally appropriate manner may involve:

- using gestures
- using simple words in English or other person's language
- providing written material
- avoiding eye contact
- providing information in different formats to suit the individual.

Internal products and services may include:

- restaurant products
- accommodation
- products made by the organisation (e.g. wine, food)
- tours
- general retail products (e.g. souvenirs).

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Communicate with customers.	<p>1.1 Conduct <i>communication</i> with <i>customers and colleagues</i> in a polite, professional and friendly manner.</p> <p>1.2 Use language and tone appropriate to a given situation in both written and spoken communication.</p> <p>1.3 Source relevant information about products and services and provide information clearly to customers.</p> <p>1.4 Use appropriate <i>non-verbal communication</i> in all situations.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>1.5 Observe and take into consideration non-verbal communication of colleagues and customers.</p> <p>1.6 Show sensitivity to <i>cultural and social differences</i>.</p> <p>1.7 Use active listening and questioning to facilitate effective two-way communication.</p> <p>1.8 Select an appropriate <i>medium of communication</i> for the particular audience, purpose and situation, taking into consideration the characteristics of each medium and the relevant <i>factors</i> involved.</p> <p>1.9 Use communication medium correctly and according to standard <i>protocols and organisation procedures</i>.</p>
2 Maintain personal presentation standards.	2.1 Practise high standards of <i>personal presentation</i> according to organisation requirements, work location, impacts on different types of customers and specific requirements for particular work functions.
3 Provide service to colleagues and customers.	<p>3.1 Identify colleague and customer needs and expectations correctly, including <i>customers with special needs</i>, and provide appropriate products, services or information.</p> <p>3.2 Meet all reasonable colleague and customer needs and requests within acceptable organisation timeframes.</p> <p>3.3 Identify and take all opportunities to enhance service quality.</p>
4 Respond to conflicts and customer complaints.	<p>4.1 Identify potential and existing conflicts and seek solutions in conjunction with parties involved.</p> <p>4.2 Recognise customer dissatisfaction promptly and take action to resolve the situation according to individual level of responsibility and organisation procedures.</p> <p>4.3 Respond to <i>customer complaints</i> positively, sensitively and politely and in consultation with the customer.</p> <p>4.4 Refer escalated complaints to the appropriate person according to individual level of responsibility and organisation policy and procedures.</p> <p>4.5 Maintain a positive and cooperative manner at all times.</p>

ELEMENT	PERFORMANCE CRITERIA
5 Work in a team.	<ul style="list-style-type: none">5.1 Demonstrate trust, support and respect towards team members in day-to-day work activities.5.2 Recognise and accommodate cultural differences within the team.5.3 Identify work-team goals jointly with colleagues and relevant others.5.4 Identify, prioritise and complete individual tasks within designated timeframes.5.5 Seek assistance from other team members, supervisors and managers when required.5.6 Offer assistance to colleagues when required to ensure designated work goals are met.5.7 Acknowledge and respond to feedback and information from other team members.5.8 Negotiate changes to individual responsibilities to meet reviewed work goals.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- communication skills in relation to listening, questioning and non-verbal communication
- basic written communication skills, including writing clear and concise messages, notes, emails and faxes
- basic literacy skills to read messages, notes, emails and faxes
- basic telephone skills
- identifying and responding to different cultural, language and special needs and expectations
- meeting personal presentation standards according to organisation requirements
- identifying and dealing with conflict situations, complaints and misunderstandings within scope of responsibility
- customer service skills, including meeting customer requirements, handling customer complaints and requests, developing rapport and promoting suitable products and services.

The following knowledge must be assessed as part of this unit:

- protocol and service rituals of the industry, sector and organisation
- ethics of professional hospitality and tourism behaviour
- characteristics, uses and conventions of different types of communication mediums
- teamwork principles.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- ability to communicate effectively with customers and colleagues (including those with special needs) within a range of situations required for the relevant job role
- ability to work effectively in a team
- ability to respond effectively to a range of customer service situations
- understanding of communication and customer service and its importance in a tourism or hospitality context.

Context of and specific resources for assessment

Assessment must ensure:

- demonstration of communication skills through interaction with others
- project or work activities that allow the candidate to respond to multiple and varying customer service and communication situations relevant to the job role; for those undertaking generic pre-employment training, project activities must cover a range of industry contexts to allow for a broad range of vocational outcomes.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate carrying out work tasks involving dealing with customers and colleagues
- role-plays about communication situations and dealing with complaints and misunderstandings
- review of simple messages written by the candidate for various situations
- questions about effective communication and personal presentation
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITXCOM002A Work in a socially diverse environment
- SITXCOM003A Deal with conflict situations.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the

RANGE STATEMENT

performance criteria is detailed below.

Communication may be:

- verbal
- written format, such as electronic (e.g. email) or hard copy (e.g. letter)
- by telephone
- in languages other than English, including Australian Indigenous languages
- visual, such as sign language
- via an interpreter.

Customers and colleagues may be:

- workmates and colleagues
- external customers and clients
- members of other tourism and hospitality industry sectors
- individuals or groups, such as consultants and committees
- government or other organisations
- visitors
- media.

Non-verbal communication may include:

- body language
- dress and accessories
- gestures and mannerisms
- voice tonality and volume
- use of space
- culturally specific communication customs and practices.

Cultural and social differences may include:

- modes of greeting, farewelling and conversation
- body language, including use of body gestures
- formality of language.

RANGE STATEMENT

- Medium of communication*** may include:
- fax
 - email or other electronic communication
 - simple written messages, such as restaurant bookings or phone messages
 - face-to-face
 - telephone
 - two-way communication systems
 - standard forms and pro formas
 - assistive technology, e.g. telephone typewriter (TTY)
 - through interpreters.

- Factors*** affecting the selection of appropriate medium may include:
- technical and operational features
 - access of the sender and receiver to necessary equipment
 - technical skills required to use the medium
 - required format
 - degree of formality required
 - urgency and timeframes.

- Protocols and organisation procedures*** may include:
- modes of greeting and farewelling
 - addressing the person by name
 - timeframe for required response
 - style manual requirements
 - standard letters and pro formas.

- Personal presentation*** may include:
- dress
 - hair and grooming
 - hands and nails
 - jewellery.

- Customers with special needs*** may include:
- those with a disability
 - those with special cultural or language needs
 - unaccompanied children
 - parents with young children
 - pregnant women
 - aged people.

RANGE STATEMENT

- Customer complaints* may relate to:
- problems with the service, such as delays or wrong orders
 - problems with the product
 - communication barriers or misunderstandings.

SITXFIN001A Process financial transactions

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit describes the performance outcomes, skills and knowledge required to process simple financial transactions in a range of workplace contexts. Cash and other types of transactions are included in the unit.

Application of the Unit

Application of the unit This unit applies to individuals working in a frontline service role whose job role includes accepting and processing payments for services and reconciling takings at the end of a given service period.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Process receipts and payments.	<p>1.1 Receive and check cash float accurately where appropriate using correct documentation.</p> <p>1.2 Check payments received from the customer and give correct change where appropriate.</p> <p>1.3 Prepare and issue accurate receipts including all relevant tax details.</p> <p>1.4 Process and record <i>transactions</i> according to organisation and financial institution procedures.</p> <p>1.5 When cash payments are required, check documents and issue cash according to organisation procedures.</p> <p>1.6 Conduct transactions using appropriate software applications.</p> <p>1.7 Conduct transactions to meet organisation speed and customer service standards.</p>

ELEMENT	PERFORMANCE CRITERIA
2 Reconcile takings.	<ul style="list-style-type: none">2.1 Perform <i>balancing procedures</i> at the designated times according to organisation policy and in consultation with colleagues.2.2 Where appropriate, separate any cash floats from takings prior to balancing procedure and secure according to organisation procedures.2.3 Determine register or terminal reading or printout where appropriate.2.4 Remove payments received and transport according to organisation <i>security procedures</i>.2.5 Count and calculate payments accurately.2.6 Determine balance between register or terminal reading and sum of payments accurately.2.7 Investigate or report discrepancies in the reconciliation within scope of individual responsibility.2.8 Record takings according to organisation procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- problem-solving skills to identify and investigate a range of routine reconciliation discrepancies
- literacy skills to read and interpret documentation, such as credit card details, receipts or cash float documentation
- numeracy skills to tender correct change and undertake simple financial reconciliations.

The following knowledge must be assessed as part of this unit:

- procedures for processing different types of transactions in the relevant industry context
- underpinning principles of the reconciliation and balancing process
- relevant software, such as point of sale
- role and importance of the reconciliation and balancing process in a broader financial management context
- security procedures for cash and other financial documentation
- how GST affects financial transactions in a given industry context.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- ability to conduct accurate and secure financial transactions
- ability to balance transactions within acceptable organisation timeframes
- knowledge of security principles and procedures in relation to tender and other financial documentation
- ability to work within time constraints typical of the industry environment, such as several people waiting to pay their bill
- processing of multiple and varied transactions to address different situations and contexts.

Context of and specific resources for assessment

Assessment must ensure:

- use of legal tender and industry-current processing equipment, such as credit card machines and tills
- completion of transactions with a number of customers with varying requirements.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate processing financial transactions and balancing takings
- review of reconciliation documentation prepared by the candidate
- written or oral questions to assess knowledge of procedures for cash or non-cash transactions
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

EVIDENCE GUIDE

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Transactions may include:

- cash
- credit cards
- cheques
- EFTPOS
- deposits
- advance payments
- vouchers
- company charges
- refunds
- travellers cheques
- foreign currency.

Balancing procedures may be:

- manual
- electronic.

RANGE STATEMENT

Security procedures may relate to:

- process for taking cash from customers
- managing floats, such as when to reduce cash held
- maintaining low levels of cash in tills
- rules for when and how cash should be counted
- handling customer claims of short change
- transporting takings to the bank
- procedures in the event of a hold-up.

Competency field Finance

SITXOHS002A Follow workplace hygiene procedures

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to apply good hygiene practices within a range of service industry operations. It requires the ability to follow predetermined procedures, identify and control simple hazards and take particular hygiene measures to ensure the non-contamination of food and other items that might put customers, colleagues and self at a health risk.

This unit is one of three hierarchical units describing varying levels of participation in food safety processes:

- SITXOHS002A Follow workplace hygiene procedures
- SITXFSA001A Implement food safety procedures
- SITXFSA002A Develop and implement a food safety program.

Food safety is nationally legislated by the Food Standards Australia New Zealand Act 1991 which provides for the operation of a statutory authority known as Food Standards Australia New Zealand. The Australia New Zealand Food Standards Code (the Code) developed by this authority contains an individual standard for food safety practices. A large component of that standard deals with the health and hygiene of food handlers. This unit of competency complies with the legislative requirements for food safety and hygiene practices as outlined in the Code.

The legislative requirement for a business to comply with the national standard for food safety practices, along with training and certification requirements, differs between state and territory governments.

In some cases food handlers, especially designated food safety supervisors, may be required to formally achieve competence in hygiene practices through a registered training organisation that may use this unit as the basis for their training.

Application of the Unit

Application of the unit Personal hygiene practices underpin a range of service industry activities. They are particularly important within a food safety regime, but can also apply to housekeeping activities and anywhere where poor hygiene could provide a contamination risk. Poor hygiene practices can risk the health of customers, colleagues and self.

For the purposes of food safety, this unit only has application to hospitality, commercial catering and retail venues where food is stored, prepared, displayed and served. It will apply to any venue that operates a permanent or temporary kitchen or smaller food preparation area, such as restaurants, cafes, clubs, hotels, attractions, events and conference venues, fast food restaurants, retail food outlets such as sandwich shops and food court outlets. It would apply to tour operators involved in the preparation and service of food at temporary sites.

Other industries will need to access industry-specific food safety units of competency.

This unit applies to frontline operational personnel who work under close supervision and guidance from others during the normal course of their daily activities. They would be required to apply little discretion and judgement because they operate within predefined organisational hygiene procedures. Personal hygiene practices apply to all personnel operating at all levels within the service industries, such as kitchen hands, cooks, chefs, catering staff, food and beverage attendants, housekeeping and, laundry staff, sandwich hands, cafe and fast food outlet cooking crew and sales people and owner-operators of small business catering operations or retail food outlets.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Follow hygiene procedures and identify hygiene hazards.	<p>1.1 Access and follow <i>hygiene procedures and policies</i> correctly and consistently according to organisation and legal requirements to ensure health and safety of customers and colleagues.</p> <p>1.2 Identify and report <i>poor organisation practices</i> that are inconsistent with hygiene procedures.</p> <p>1.3 Identify <i>hygiene hazards</i> that may affect the health and safety of customers, colleagues and self.</p> <p>1.4 Take action to remove or minimise the hazards within</p>

ELEMENT	PERFORMANCE CRITERIA
	scope of individual responsibility and according to organisation and legal requirements.
	1.5 Promptly report hygiene hazards to appropriate person for follow up where control of hazard is beyond the scope of individual responsibility.
2 Report any personal health issues.	2.1 Report any personal <i>health issues</i> that are likely to cause a hygiene risk.
	2.2 Report incidents of food contamination that have resulted from the personal health issue.
	2.3 Do not participate in food handling activities where there is a risk of food contamination as a result of the health issue.
3 Prevent food and <i>other item</i> contamination.	3.1 Maintain clean clothes, wear required personal protective clothing and only use organisation-approved bandages and dressings to prevent contamination to food.
	3.2 Ensure that no clothing or <i>other items worn</i> contaminate food.
	3.3 Prevent unnecessary direct contact with ready to eat food.
	3.4 Do not allow food to become contaminated with any body fluids or tobacco product from sneezing, coughing, blowing nose, spitting, smoking or eating over food or food preparation surfaces.
	3.5 Maintain the use of clean materials and clothes and safe and hygienic practices to ensure that no <i>cross-contamination of other items in the workplace occurs</i> .
4 Prevent cross-contamination by washing hands.	4.1 <i>Wash hands at appropriate times</i> and follow hand washing procedures correctly and consistently according to organisation and legal requirements.
	4.2 Wash hands using <i>appropriate facilities</i> .

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- communication skills to verbally report hygiene hazards and poor organisation practice
- literacy skills to read and interpret relevant organisation policies, procedures and diagrams that identify good hygiene practices.

The following knowledge must be assessed as part of this unit:

- very basic understanding of federal, and state or territory food safety legislative compliance requirements, contents of national codes and standards that underpin regulatory requirements, and local government food safety regulations
- working knowledge of organisation personal hygiene policies and procedures
- ramifications of failure to observe hygiene policies and procedures
- broad understanding of the general hazards in handling food, linen, laundry and garbage, including major causes of contamination and cross-infection
- sources and effects of microbiological contamination of food and other items that would require protection in the industry sector and business
- basic understanding of the choice and application of cleaning and sanitising equipment and materials.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- ability to access and interpret hygiene procedures and consistently apply these during day-to-day activities
- understanding of the importance of following hygiene procedures and of the potential implications of disregarding those procedures
- project or work activities that show the candidate's ability to apply good hygiene practices on multiple occasions in a range of different operational circumstances to ensure consistency in the application of hygiene procedures.

Context of and specific resources for assessment

Assessment must ensure:

- access to current regulatory documents distributed by key federal, state or territory, and local government agencies such as plain English legislative publications, codes and standards outlining food safety requirements
- access to hygiene policies and procedures
- project or work activities that show candidates' ability to apply good hygiene practices within the context of the particular industry sector in which they are working or seeking work; for those undertaking generic pre-employment training, assessment must cover a range of industry contexts to allow for a broad range of vocational outcomes
- use of real products, materials and equipment.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate carrying out work tasks that involve following hygiene procedures
- oral and written questions about hygiene principles and practices, policies and procedures
- oral or written questions to assess knowledge of food hygiene legislative requirements
- case studies to assess ability to react to a range of incidents where hygiene hazards exist
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITHACS005A Prepare rooms for guests
- SITHACS007A Launder linen and guest clothes
- SITXFSA001A Implement food safety procedures.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

RANGE STATEMENT

Hygiene procedures may relate to:

- personal hygiene
- safe and hygienic handling of food and beverages
- regular hand washing
- correct food storage
- suitable dress and personal protective equipment and clothing
- avoidance of cross-contamination
- hygienic cleaning practices to avoid cross-contamination
- use of cleaning equipment, clothes and materials to avoid cross-contamination
- safe handling and disposal of linen and laundry
- appropriate handling and disposal of garbage
- cleaning and sanitising
- procedures documented in the organisation food safety program
- procedures covered by staff training programs
- procedures required by the national food safety code.

Poor organisation practices may include:

- poor personal hygiene practices
- poor food handling practices that may result in the contamination of food
- poor cleaning practices that may result in cross-contamination of food and other items
- practices inconsistent with the organisation's food safety program
- outdated practices not in keeping with current organisation activities.

RANGE STATEMENT

- Hygiene hazards*** may include:
- contaminated food
 - vermin
 - airborne dust
 - items such as linen, tea towels and towels that may be contaminated with human waste, such as blood and body secretions
 - dirty equipment and utensils
 - contaminated garbage
 - use of practices not in keeping with current organisation activities
 - colleagues without appropriate training or understanding of good hygiene practices, policies and procedures
 - equipment not working correctly, such as fridge and temperature probes.
- Health issues*** may relate to:
- food-borne diseases
 - airborne diseases
 - infectious diseases.
- Other items worn*** may include:
- hair accessories
 - jewellery
 - watches
 - bandages.
- Cross-contamination of other items in the workplace*** may involve:
- infected linen
 - items such as linen, tea towels and towels that may be contaminated with human waste, such as blood and body secretions
 - dirty equipment and utensils
 - spreading bacteria from bathroom or bedroom areas to kitchen areas in an accommodation facility.

RANGE STATEMENT

Washing hands at appropriate times might include:

- immediately before working with food
- immediately after handling raw food
- before commencing or recommencing work with food
- immediately after using the toilet
- immediately after smoking, coughing, sneezing, blowing the nose, eating, drinking, and touching the hair, scalp or any wound.

Appropriate facilities for hand washing may include:

- warm running water
- soap
- single use towels
- designated hand washing sink.

TAEASS401B Plan assessment activities and processes

Modification History

Version	Comments
----------------	-----------------

TAEASS301B	Released with <i>TAE10 Training and Education Training Package version 2.0</i>
------------	--

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and organise the assessment process, including recognition of prior learning (RPL), in a competency-based assessment system. It also includes the development of simple assessment instruments.

Application of the Unit

This unit typically applies to assessors and workplace supervisors with assessment planning responsibilities; and trainers or other assessors responsible for planning assessment, including RPL.

The unit is suitable for those with an existing assessment strategy which documents the overall framework for assessment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT

Elements describe the essential outcomes of a unit of competency.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Determine assessment approach	<p>1.1 Identify candidate and confirm <i>purposes and context of assessment/RPL</i> with relevant people according to <i>legal, organisational and ethical requirements</i></p> <p>1.2 Identify and access <i>benchmarks for assessment/RPL</i> and any specific assessment guidelines</p>
2. Prepare the assessment plan	<p>2.1 Determine evidence and <i>types of evidence</i> needed to demonstrate competence, according to the <i>rules of evidence</i></p> <p>2.2 Select <i>assessment methods</i> which will support the collection of defined evidence, taking into account the context in which the assessment will take place</p> <p>2.3 Document all aspects of the <i>assessment plan</i> and confirm with relevant personnel</p>
3. Develop assessment instruments	<p>3.1 Develop <i>simple assessment instruments</i> to meet target group needs</p> <p>3.2 Analyse <i>available assessment instruments</i> for their suitability for use and modify as required</p> <p>3.3 <i>Map assessment</i> instruments against unit or course requirements</p> <p>3.4 Write clear instructions for candidate about the use of the instruments</p> <p>3.5 Trial draft assessment instruments to validate content and applicability, and record outcomes</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- cognitive interpretation skills to:
 - interpret competency standards and other assessment documentation, including material relating to reasonable adjustment
 - identify opportunities for integrated competency assessment
 - contextualise competency standards to the operating assessment environment, including RPL
 - consider access and equity needs of diverse candidates
- technology skills to use appropriate equipment and software to communicate effectively with others
- research and evaluation skills to:
 - obtain competency standards, assessment tools and other relevant assessment resources
 - research candidate characteristics and any reasonable adjustment needs
 - evaluate feedback, and determine and implement improvements to processes
- literacy skills to read and interpret relevant information to design and facilitate assessment and recognition processes
- communication skills to discuss assessment, including RPL processes with clients and other assessors
- interpersonal skills to:
 - demonstrate sensitivity to access and equity considerations and candidate diversity
 - promote and implement equity, fairness, validity, reliability and flexibility in planning an assessment processes.
- **Required knowledge**
- ethical and legal requirements of an assessor
- competency-based assessment, including:
 - work focused
 - criterion referenced
 - standards based
 - evidence based
- different purposes of assessment and different assessment contexts, including RPL
- how to read and interpret the identified competency standards as the benchmarks for assessment
- how to contextualise competency standards within relevant guidelines
- four principles of assessment and how they guide the assessment process
- purpose and features of evidence, and different types of evidence used in competency-based assessments, including RPL
- rules of evidence and how they guide evidence collection
- different types of assessment methods, including suitability for collecting various types of evidence

- assessment instruments and their purpose; different types of instruments; relevance of different instruments for specific evidence-gathering opportunities.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<ul style="list-style-type: none"> • Evidence of the ability to: • plan and organise the assessment process on a minimum of two occasions • collect evidence that demonstrates: <ul style="list-style-type: none"> • documented assessment plans • having covered a range of assessment events • catering for a number of candidates • different competency standards or accredited curricula • an RPL assessment • contextualisation of competency standards and the selected assessment tools, where required • incorporation of reasonable adjustment strategies • development of simple assessment instruments for use in the process • organisational arrangements.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p> <p>Assessment must ensure access to training products, such as training packages and accredited course documentation.</p>
Method of assessment	
Guidance information for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Purposes of assessment/ RPL</i> may include:</p>	<ul style="list-style-type: none"> • recognising current existing competence of candidates • determining if competence has been achieved following learning • establishing candidate progress towards achievement of competence • determining language, literacy and numeracy needs of candidates • certifying competence through a qualification or Statement of Attainment • licensing or regulatory requirements.
<p><i>Context of assessment/ RPL</i> may include:</p>	<ul style="list-style-type: none"> • environment in which the assessment/RPL will be carried out, including real or simulated workplace • opportunities for collecting evidence in a number of situations • relationships between competency standards and: <ul style="list-style-type: none"> • evidence to support RPL • work activities in the candidate's workplace • learning activities • who carries out the assessment/RPL.
<p><i>Organisational, legal and ethical requirements</i> may include:</p>	<ul style="list-style-type: none"> • assessment system policies and procedures • assessment strategy requirements • reporting, recording and retrieval systems for assessment, including RPL • quality assurance systems • business and performance plans • access and equity policies and procedures • collaborative and partnership arrangements • defined resource parameters • mutual recognition arrangements • industrial relations systems and processes, awards, and enterprise agreements • Australian Quality Training Framework • registration scope • human resources policies and procedures • legal requirements, including:

	<ul style="list-style-type: none"> • anti-discrimination • equal employment opportunity • job role, responsibilities and conditions • relevant industry codes of practice • confidentiality and privacy requirements • OHS considerations, including: <ul style="list-style-type: none"> • ensuring OHS requirements are adhered to during the assessment process • identifying and reporting OHS hazards and concerns to relevant personnel.
Benchmarks for assessment/RPL may include:	<ul style="list-style-type: none"> • criterion against which the candidate is assessed or prior learning recognised, which may be: <ul style="list-style-type: none"> • competency standard/unit of competency • assessment criteria of course curricula • performance specifications of an enterprise or industry • product specifications.
Types of evidence may include:	<ul style="list-style-type: none"> • direct • indirect • supplementary.
Rules of evidence ensure that evidence collected is:	<ul style="list-style-type: none"> • valid • sufficient • authentic • current.
Assessment methods are the particular techniques used to gather evidence and may include:	<ul style="list-style-type: none"> • direct observation, for example: <ul style="list-style-type: none"> • real work/real time activities at the workplace • work activities in a simulated workplace environment • structured activities, for example: <ul style="list-style-type: none"> • simulation exercises and role-plays • projects • presentations • activity sheets • questioning, for example: <ul style="list-style-type: none"> • written questions, e.g. on a computer • interviews • self-assessment • verbal questioning • questionnaires • oral or written examinations (applicable at higher AQF levels) • portfolios of evidence, for example:

	<ul style="list-style-type: none"> • collection of work samples compiled by candidate • product with supporting documentation • historical evidence • journal or log book • information about life experience • review of products, for example: <ul style="list-style-type: none"> • testimonials and reports from employers and supervisors • evidence of training • authenticated prior achievements • interview with employer, supervisor, or peer.
Assessment plan may include:	<ul style="list-style-type: none"> • overall planning document describing: <ul style="list-style-type: none"> • what is to be assessed • when assessment is to take place • where assessment is to take place • how assessment is to take place.
Simple assessment instruments may include:	<ul style="list-style-type: none"> • instruments developed by an assessor as part of formative or summative assessment activities, including: <ul style="list-style-type: none"> • profiles of acceptable performance measures • templates and proformas • specific questions or activities • evidence and observation checklists • checklists for the evaluation of work samples • recognition portfolios • candidate self-assessment materials • instruments developed elsewhere that have been modified by the assessor for use with a particular client group.
Available assessment instruments may include:	<ul style="list-style-type: none"> • commercially available instruments • those created by others inside the registered training organisation.
Map assessment means:	<ul style="list-style-type: none"> • showing a clear relationship between the evidence and the requirements of the unit.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to assess the competence of a candidate.

Application of the Unit

This unit typically applies to assessors.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT

Elements describe the essential outcomes of a unit of competency.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Prepare for assessment	<p>1.1 Interpret <i>assessment plan</i> and confirm organisational, legal and ethical requirements for conducting assessment with relevant people</p> <p>1.2 Access and interpret relevant <i>benchmarks for assessment</i> and nominated <i>assessment tools</i> to confirm the requirements for evidence to be collected</p> <p>1.3 Arrange identified material and physical resource requirements according to assessment system policies and procedures</p> <p>1.4 Organise <i>specialist support</i> required for assessment</p> <p>1.5 Explain, discuss and agree details of the assessment plan with candidate</p>
2. Gather quality evidence	<p>2.1 Use agreed <i>assessment methods</i> and instruments to gather, organise and document evidence in a format suitable for determining competence</p> <p>2.2 Apply the principles of assessment and rules of evidence in gathering quality evidence</p> <p>2.3 Determine opportunities for evidence gathering in actual or simulated activities through consultation with the candidate and relevant personnel</p> <p>2.4 Determine opportunities for integrated assessment activities and document any changes to assessment instruments where required</p>
3. Support the candidate	<p>3.1 Guide candidates in gathering their own evidence to support recognition of prior learning (RPL)</p> <p>3.2 Use appropriate communication and interpersonal skills to develop a professional relationship with the candidate that reflects sensitivity to <i>individual differences</i> and enables two-way <i>feedback</i></p> <p>3.3 Make decisions on reasonable adjustments with the candidate, based on candidate's needs and characteristics</p> <p>3.4 Access required specialist support in accordance with the assessment plan</p> <p>3.5 Address any OHS risk to person or equipment immediately</p>
4. Make the assessment decision	<p>4.1 Examine collected evidence and evaluate it to ensure that it reflects the evidence required to demonstrate competence</p> <p>4.2 Use judgement to infer whether competence has been demonstrated, based on the available evidence</p> <p>4.3 Make assessment decision in line with agreed assessment procedures and according to agreed assessment plan</p> <p>4.4 Provide clear and constructive feedback to candidate regarding</p>

	the assessment decision and develop any follow-up action plan required
5. Record and report the assessment decision	5.1 Record assessment outcomes promptly and accurately 5.2 Complete and process an assessment report according to agreed assessment procedures 5.3 Inform other relevant parties of the assessment decision according to confidentiality conventions
6. Review the assessment process	6.1 Review the assessment process in <i>consultation</i> with relevant people to improve own future practice 6.2 Document and record the review according to relevant assessment system policies and procedures

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analysis and interpretation skills to:
 - break down competency standards
 - interpret assessment tools and other assessment information, including those used in RPL
 - identify candidate needs
 - make judgements based on assessment of available evidence
- observation skills to:
 - recognise candidate's prior learning
 - determine candidate's performance
 - identify when candidate may need assistance during the assessment processes
- research and evaluation skills to:
 - access required human and material resources for assessment
 - access assessment system policies and procedures
 - access RPL policies and procedures
 - evaluate evidence
 - evaluate assessment process
- cognitive skills to:
 - weigh up the evidence and make a judgement
 - consider and recommend reasonable adjustments
- decision-making skills to:
 - recognise a candidate's prior learning
 - make a decision on a candidate's competence
- literacy skills to:
 - read and interpret relevant information to conduct assessment
 - prepare required documentation and records or reports of assessment outcomes in required format
- communication and interpersonal skills to:
 - explain the assessment, including RPL process
 - give clear and precise instructions
 - ask effective questions
 - provide clarification
 - discuss process with other relevant people
 - give appropriate feedback
 - discuss assessment outcome
 - use language appropriate to candidate and assessment environment
 - establish a working relationship with candidate.

Required knowledge

- competency-based assessment, including:
 - vocational education and training as a competency-based system
 - criterion-referenced assessment as distinct from norm-referenced assessment
 - competency standards as the basis of qualifications
 - structure and application of competency standards
 - principles of assessment and how they are applied
 - rules of evidence and how they are applied
 - range of assessment purposes and assessment contexts, including RPL
 - different assessment methods, including suitability for gathering various types of evidence, suitability for content of units, and resource requirements and associated costs
 - reasonable adjustments and when they are applicable
 - types and forms of evidence, including assessment instruments that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
 - potential barriers and processes relating to assessment tools and methods
 - assessment system, including policies and procedures established by the industry, organisation or training authority
- RPL policies and procedures established by the organisation
- cultural sensitivity and equity considerations
- relevant policy, legislation, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector, such as:
 - copyright and privacy laws in terms of electronic technology
 - security of information
 - plagiarism
 - training packages and competency standards
 - licensing requirements
 - industry and workplace requirements
 - duty of care under common law
 - recording information and confidentiality requirements
 - anti-discrimination, including equal employment opportunity, racial vilification and disability discrimination
 - workplace relations
 - industrial awards and enterprise agreements
- OHS responsibilities associated with assessing competence, such as:
 - requirements for reporting hazards and incidents
 - emergency procedures
 - procedures for use of relevant personal protective equipment
 - safe use and maintenance of relevant equipment

- sources of OHS information.

-

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • assess competence of a number of candidates within the vocational education and training context against different units of competency or accredited curricula, following the relevant assessment plan • assess at least one candidate for RPL • consider reasonable adjustment and the reasons for decisions in at least one assessment • cover an entire unit of competency and show: <ul style="list-style-type: none"> • the application of different assessment methods and instruments involving a range of assessment activities and events • two-way communication and feedback • how judgement was exercised in making the assessment decision • how and when assessment outcomes were recorded and reported • assessment records and reports completed in accordance with assessment system and organisational, legal and ethical requirements • how the assessment process was reviewed.
Context of and specific resources for assessment	Evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Assessment plan</i> may include:</p>	<ul style="list-style-type: none"> • overall planning, describing: <ul style="list-style-type: none"> • what is to be assessed • when assessment is to take place • where assessment is to take place • how assessment is to take place.
<p><i>Benchmarks for assessment:</i></p>	<ul style="list-style-type: none"> • refer to a criterion against which the candidate is assessed • may be a competency standard/unit of competency, assessment criteria of course curricula, performance specifications, or product specifications.
<p><i>Assessment tools</i> include:</p>	<ul style="list-style-type: none"> • the learning or competency unit(s) to be assessed • the target group, context and conditions for the assessment • the tasks to be administered to the candidate • an outline of the evidence to be gathered from the candidate • the evidence criteria used to judge the quality of performance (i.e. the assessment decision-making rules) • the administration, recording and reporting requirements • the evidence of how validity and reliability have been tested and built into the design and use of the tool.
<p><i>Specialist support</i> may include:</p>	<ul style="list-style-type: none"> • assistance by third party, such as carer or interpreter • support from specialist educator • provision of developed online assessment activities • support for remote or isolated candidates and assessors • support from subject matter or safety experts • advice from regulatory authorities • assessment teams and panels • support from lead assessors • advice from policy development experts.
<p><i>Assessment methods</i> include:</p>	<ul style="list-style-type: none"> • particular techniques used to gather different types of evidence, such as: <ul style="list-style-type: none"> • direct observation

	<ul style="list-style-type: none"> • structured activities • oral or written questioning • portfolios of evidence • review of products • third-party feedback.
Individual differences may include:	<ul style="list-style-type: none"> • English language, literacy and numeracy barriers • physical impairment or disability • intellectual impairment or disability • medical condition that may impact on assessment, such as arthritis, epilepsy, diabetes and asthma • learning difficulties • mental or psychological disability • religious and spiritual observances • cultural images and perceptions • age • gender.
Feedback may include:	<ul style="list-style-type: none"> • ensuring assessment/RPL process is understood • ensuring candidate concerns are addressed • enabling questions and answers • confirming outcomes • identifying further evidence to be provided • discussing action plans • confirming gap training needed • providing information regarding available appeal processes • suggesting improvements in evidence gathering and presentation.
Consultation may involve:	<ul style="list-style-type: none"> • moderation with other assessors, or training and assessment coordinators • discussions with client, team leaders, managers, RPL coordinators, supervisors, coaches and mentors • technical and subject experts • English language, literacy and numeracy experts.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to participate in an assessment validation process.

Application of the Unit

This unit typically applies to those participating in assessment validation. It does not address leading the validation process.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
---------	----------------------

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Prepare for validation	<p>1.1 Discuss and confirm the approach to validation according to defined purposes, context, and relevant <i>assessment system policies and procedures</i></p> <p>1.2 Analyse relevant <i>benchmarks for assessment</i> and agree on the evidence needed to demonstrate competence</p> <p>1.3 Arrange <i>materials</i> for <i>validation activities</i></p>
2. Contribute to validation process	<p>2.1 Demonstrate active <i>participation</i> in validation sessions and activities using appropriate communication skills</p> <p>2.2 Participate in validation sessions and activities by applying the principles of assessment and rules of evidence</p> <p>2.3 Check all documents used in the validation process for accuracy and version control</p>
3. Contribute to validation outcomes	<p>3.1 Collectively discuss validation findings to support improvements in the quality of assessment</p> <p>3.2 Discuss, agree and record recommendations to improve assessment practice</p> <p>3.3 Implement changes to own assessment practice, arising from validation</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- planning skills to participate in validation activities within agreed timeframes
- problem-solving skills to identify information that is inconsistent, ambiguous or contradictory
- evaluation skills to:
 - determine evidence requirements from competency standards
 - review assessment process, tools and methods
 - review collected evidence
- communication skills to share information in validation meetings.

Required knowledge

- how to interpret competency standards and other related assessment information to determine the evidence needed to demonstrate competence, including:
 - criterion-referenced assessment as distinct from norm-referenced assessment
 - various reasons for carrying out validation and the different approaches to validation that may be appropriate before, during and after assessment
 - critical aspects of validation, including validation of assessment processes, methods and products
 - relevant OHS legislation, codes of practice, standards and guidelines, impacting on assessment
 - legal and ethical requirements of assessors, particularly in relation to validation activities
- principles of assessment
- rules of evidence.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • actively participate in a minimum of two validation sessions or meetings which, in combination, address the critical aspects of validation using different validation approaches and activities • clearly explain purposes of validation and the legal and ethical responsibilities of assessors • collate documentation relating to validation process in a logical manner • demonstrate communication and liaison with relevant people • provide feedback and interpret documentation in validation sessions • record contribution to validation findings.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p> <p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • assessment reports and records • other documentation relevant to validation.
Method of assessment	
Guidance information for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Assessment system policies and procedures</i> may include:</p>	<ul style="list-style-type: none"> • candidate selection • rationale and purpose of competency-based assessment • assessment records, and data and information management • recognition of current competency, recognition of prior learning and credit arrangements • assessment reporting procedures • assessment appeals • candidate grievances and complaints • validation • evaluation and internal audit • costs and resourcing • access and equity, and reasonable adjustment • partnership arrangements • links with human resource or industrial relations system • links with overall quality management system.
<p><i>Benchmarks for assessment:</i></p>	<ul style="list-style-type: none"> • refers to criterion against which the candidate is assessed • may be one or more units of competency or assessment criteria of course curricula.
<p><i>Materials</i> may include:</p>	<ul style="list-style-type: none"> • assessment tools • samples of collected evidence • documentation outlining the basis of assessment decisions • reports and records of assessment decisions • samples of benchmarks of appropriate evidence • Assessment Guidelines of the relevant training packages • information from the evidence guide of the relevant units of competency.
<p><i>Validation activities</i> may include:</p>	<ul style="list-style-type: none"> • analysing and reviewing: <ul style="list-style-type: none"> • assessment tools • collected evidence • assessment decisions and records of assessment outcomes • other aspects of assessment policies, processes and outcomes • recording evidence of validation processes and outcomes.
<p><i>Participation</i> may include comparison and</p>	<ul style="list-style-type: none"> • assessment practices • assessment plans

evaluation of:	<ul style="list-style-type: none">• interpretation of units of competency• assessment methods and instruments• assessment decisions• collected evidence.

TAEASS502B Design and develop assessment tools

Modification History

Version	Comments
----------------	-----------------

TAEASS502B	Released with <i>TAE10 Training and Education Training Package version 2.0</i>
------------	--

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design and develop assessment tools, including tools used in formative, summative and recognition of prior learning (RPL) assessment.

Application of the Unit

An assessment tool is used to guide the collection of quality evidence in the assessment process. It includes the specific instruments for collecting evidence, as well as information about assessment methods and the procedures to be followed in conducting the assessment. This unit typically applies to those involved in training and assessment or in the development of learning resources or products, assessors, learning resource or product developers, and training and assessment consultants.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT

Elements describe the essential outcomes of a unit of competency.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Determine focus of the assessment tool	<p>1.1 Identify target group of candidates, purposes of <i>assessment tool</i>, and <i>contexts</i> in which the tool will be used</p> <p>1.2 Access relevant <i>benchmarks for assessment</i> and interpret them to establish evidence required to demonstrate competence</p> <p>1.3 Identify, access and interpret <i>organisational, legal and ethical requirements</i> and relevant <i>contextualisation guidelines</i></p> <p>1.4 Identify other <i>related documentation</i> to inform assessment tool development</p>
2. Design assessment tool	<p>2.1 Select assessment methods that support the collection of defined evidence, taking into account the context in which the assessment will take place and meeting the principles of assessment</p> <p>2.2 Enable candidates to show or support their claim for recognition of current competency through selected assessment methods</p> <p>2.3 Consider different <i>assessment instruments</i> for the selected assessment methods to generate options for collection of evidence</p> <p>2.4 Consider how the assessment instruments will be administered</p>
3. Develop assessment tool	<p>3.1 Develop specific assessment instruments that address the evidence to be collected</p> <p>3.2 Define and document clear and specific <i>procedures</i> instructing assessor and candidate on the administration and use of the instruments</p> <p>3.3 Consider requirements of <i>assessment system policies and procedures</i> and address storage and retrieval needs, and review, evaluation and version control procedures as part of this process</p>
4. Review and trial assessment tool	<p>4.1 Check draft assessment tools against <i>evaluation criteria</i> and amend as required</p> <p>4.2 Trial assessment tools to validate content and applicability</p> <p>4.3 Collect and document feedback from relevant people involved in trialling</p> <p>4.4 Make amendments to final tool based on analysis of feedback</p> <p>4.5 Appropriately format and file finalised assessment tool according to assessment system policies and procedures and organisational, legal and ethical requirements</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analysis and interpretation skills to review and evaluate assessment tools
- critical thinking skills to translate the interpreted competency standards and other relevant assessment information into meaningful assessment instruments
- design skills to develop different assessment tool designs
- research and evaluation skills to evaluate assessment tools on the basis of trials and feedback.

Required knowledge

- principles of assessment and how they are applied when developing assessment tools
- different types and rules of evidence
- different assessment contexts and relationship to developing assessment tools
- components of competency and dimensions of competency
- contextualisation of competency standards and contextualisation guidelines
- Assessment Guidelines of training packages as relevant to developing assessment tools
- different assessment methods, their purposes and uses
- evaluation methodologies appropriate to the trial and review of assessment tools
- principles of reasonable adjustment
- relevant workplace information, including:
 - organisational policies and procedures
 - workplace tasks and activities
 - standard operating procedures
 - procedures for use of relevant personal protective equipment.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • develop assessment tools that support different assessment methods and address at least three units of competency packaged at different Australian Qualifications Framework (AQF) levels • develop assessment tools that: <ul style="list-style-type: none"> • include the instruments for collecting evidence, reflecting the principles of assessment and the rules of evidence, and the related instructions to assessor/s and candidates • show how the contextual needs of different environments are addressed • report on the trial and review of the assessment tools, including proposed changes.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p> <p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • training products, such as training packages and accredited course documentation.
Method of assessment	
Guidance information for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Assessment tool includes:</p>	<ul style="list-style-type: none"> • the learning or competency unit(s) to be assessed • the target group, context and conditions for the assessment • the tasks to be administered to the candidate • an outline of the evidence to be gathered from the candidate • the evidence criteria used to judge the quality of performance (i.e. the assessment decision-making rules) • the administration, recording and reporting requirements • the evidence of how validity and reliability have been tested and built into the design and use of the tool.
<p>Contexts of assessment/RPL may include:</p>	<ul style="list-style-type: none"> • environment in which the assessment/RPL will be carried out, including real or simulated workplace • opportunities for collecting evidence in a number of situations • relationships between competency standards and evidence to support RPL • who carries out the assessment/RPL • relationships between competency standards and work activities in the candidate's workplace • relationships between competency standards and learning activities.
<p>Benchmarks for assessment:</p>	<ul style="list-style-type: none"> • refer to criteria against which the candidate is assessed which may be a unit of competency, assessment criteria of course curricula, performance specifications, or product specifications • where the benchmark is one or more units of competency the standards may be contextualised to reflect the immediate operating environment.
<p>Organisational, legal and ethical requirements may include:</p>	<ul style="list-style-type: none"> • assessment system policies and procedures • industrial relations systems and processes, awards and enterprise agreements • licensing and legal ramifications of assessing competence • reporting, recording and retrieval systems for assessment • requirements of training, assessment and validation, including the AQTF Standards for Registered Training Organisations • human resource policies, procedures and legal requirements,

	<p>including:</p> <ul style="list-style-type: none"> • anti-discrimination • equal employment opportunity • job role, responsibilities and conditions • relevant industry codes of practice • confidentiality and privacy requirements of information relating to completed assessments • OHS considerations, including: <ul style="list-style-type: none"> • ensuring assessment methods and tools incorporate appropriate measures to maintain the health, safety and welfare of candidates • ensuring OHS requirements and specified benchmarks are accounted for within evidence requirements and assessment materials • identifying hazards and relevant risk control procedures associated with the assessment environment.
<i>Contextualisation guidelines</i> relate to:	<ul style="list-style-type: none"> • relevant training package or accredited course contextualisation guidelines.
<i>Related documentation</i> may include:	<ul style="list-style-type: none"> • requirements set out in the Assessment Guidelines of the relevant training packages • information from the competency standards about: <ul style="list-style-type: none"> • resources required for assessment • assessment context • appropriate assessment methods • assessment activities identified in accredited modules derived from the relevant competency standards • assessment activities in support materials related to the relevant competency standards • any requirements of OHS, legislation, codes of practice, standards and guidelines • indicators and levels of competence of the Australian Core Skills Framework • organisational requirements for demonstration of work performance • product specifications.
<i>Assessment instrument</i> may be:	<ul style="list-style-type: none"> • profiles of acceptable performance measures • templates and proformas • specific questions or activities • evidence and observation checklists • checklists for the evaluation of work samples • recognition portfolios • candidate self-assessment materials.

<i>Procedures</i> may include:	<ul style="list-style-type: none"> • those that guide the application of the instruments, such as: <ul style="list-style-type: none"> • instructions for the candidates • instructions for administering the assessment tool, including resources needed to conduct assessment and the context for the use of tools • guidance for development or review of decision-making process • guidance on reasonable adjustments • specified variations or restrictions on the tools • rules for verifying assessment decisions • OHS requirements, for example, identified hazards in the assessment environment and appropriate controls and reporting mechanisms • information on access and equity considerations.
<i>Assessment system policies and procedures</i> may include:	<ul style="list-style-type: none"> • assessment records, and data and information management • recognition of current competency, RPL and credit arrangements • assessor needs, qualifications and maintenance of currency • assessment reporting procedures • assessment appeals • candidate grievances and complaints • validation • evaluation and internal audit • costs and resourcing • access and equity, and reasonable adjustment • partnership arrangements • links with human resource or industrial relations systems • links with overall quality management system.
<i>Evaluation criteria</i> may include:	<ul style="list-style-type: none"> • effectiveness and relevance to the competency standards • whether assessment tool is appropriate to selected assessment methods • whether assessment tool is appropriate to target group and assessment context • appropriateness of language and literacy for intended audience.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to conduct individual and group instruction and demonstrate work skills, using existing learning resources in a safe and comfortable learning environment. The unit covers the skills and knowledge required to determine the success of both the training provided and one's own personal training performance. It emphasises the training as being driven by the work process and context.
------------------------	--

Application of the Unit

Application of the unit	This unit supports a wide range of applications across any workplace setting and so can be used by any organisation. Its use is not restricted to training organisations.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise instruction and demonstration	1.1. Gather information about <i>learner characteristics</i> and learning needs 1.2. Confirm a <i>safe learning environment</i> 1.3. Gather and check <i>instruction and demonstration objectives</i> and seek assistance if required 1.4. Access and review relevant <i>learning resources</i> and <i>learning materials</i> for suitability and relevance, and seek assistance to interpret the contextual application 1.5. Organise access to necessary equipment or physical resources required for instruction and demonstration 1.6. Notify learners of <i>details</i> regarding the implementation of the learning program and/or delivery plan
2. Conduct instruction and demonstration	2.1. Use interpersonal skills with learners to establish a safe and comfortable learning environment 2.2. Follow the learning program and/or delivery plan to cover all learning objectives 2.3. Brief learners on any <i>OHS procedures</i> and requirements prior to and during training 2.4. Use <i>delivery techniques</i> to structure, pace and enhance learning 2.5. Apply <i>coaching</i> techniques to assist learning 2.6. Use communication skills to provide information, instruct learners and demonstrate relevant work skills 2.7. Provide opportunities for practice during instruction and through work activities 2.8. Provide and discuss feedback on learner performance to support learning
3. Check training performance	3.1. Use <i>measures</i> to ensure learners are acquiring and can use new technical and generic skills and knowledge 3.2. Monitor learner progress and outcomes in consultation with learner 3.3. Review relationship between the trainer/coach and the learner and adjust to suit learner needs
4. Review personal training performance and finalise documentation	4.1. Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement 4.2. Maintain, store and secure learner records according

ELEMENT	PERFORMANCE CRITERIA
	to organisational and legal requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- verbal and non-verbal communication techniques, such as:
 - asking relevant and appropriate questions
 - providing explanations
 - demonstrating
 - using listening skills
 - providing information clearly
- safety skills to implement OHS requirements, by acting and responding safely in order to:
 - identify hazards
 - conduct prestart-up checks if required
 - observe and interpret learner behaviour that may put people at risk
- time-management, skills to:
 - ensure all learning objectives are covered
 - pace learning
- reflection skills in order to:
 - identify areas for improvement
 - maintain personal skill development
- literacy skills to:
 - complete and maintain documentation
 - read and follow learning programs and plans
 - read and analyse learner information
- technology skills to operate audio-visual and technical equipment
- interpersonal skills to:
 - engage, motivate and connect with learners
 - provide constructive feedback
 - maintain appropriate relationships
 - establish trust
 - use appropriate body language
 - maintain humour
 - demonstrate tolerance
 - manage a group
 - recognise and be sensitive to individual difference and diversity
- observation skills to:
 - monitor learner acquisition of new skills, knowledge and competency

REQUIRED SKILLS AND KNOWLEDGE

requirements

- assess learner communication and skills in interacting with others
- identify learner concerns
- recognise learner readiness to take on new skills and tasks

Required knowledge

- learner characteristics and needs
- content and requirements of the relevant learning program and/or delivery plan
- sources and availability of relevant learning resources and learning materials
- content of learning resources and learning materials
- training techniques that enhance learning and when to use them
- introductory knowledge of learning principles and learning styles
- key OHS issues in the learning environment, including:
 - roles and responsibilities of key personnel
 - responsibilities of learners
 - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
 - risk controls for the specific learning environment

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • carry out a minimum of three training sessions, involving demonstrating and instructing particular work skills for different groups; with each session addressing: <ul style="list-style-type: none"> • different learning objectives • a range of techniques and effective communication skills appropriate to the audience.
<p>Context of and specific resources for assessment</p>	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p>
<p>Method of assessment</p>	
<p>Guidance information for assessment</p>	<p>For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Learner characteristics</i> may include:</p>	<ul style="list-style-type: none"> • language, literacy and numeracy levels • learning styles • past learning and work experiences • specific needs • workplace culture.
<p><i>Safe learning environment</i> may include:</p>	<ul style="list-style-type: none"> • exit requirements • personal protective equipment • safe access • safe use of equipment.
<p><i>Instruction and demonstration objectives</i> may include:</p>	<ul style="list-style-type: none"> • competencies to be achieved • generic and technical skills, which may be: <ul style="list-style-type: none"> • provided by the organisation • developed by a colleague • individual or group objectives • learning outcomes.
<p><i>Learning resources</i> may include:</p>	<ul style="list-style-type: none"> • any material used to support learning, such as: <ul style="list-style-type: none"> • learner and user guides • trainer and facilitator guides • example training programs • specific case studies • professional development materials • assessment materials • a variety of formats • those produced locally • those acquired from other sources.
<p><i>Learning materials</i> may include:</p>	<ul style="list-style-type: none"> • handouts for learners • materials sourced from the workplace, e.g. workplace documentation, operating procedures, and specifications.
<p><i>Details</i> may include:</p>	<ul style="list-style-type: none"> • location and time • outcomes of instruction or demonstration

RANGE STATEMENT	
	<ul style="list-style-type: none"> • reason for instruction or demonstration • who will be attending instruction session.
<i>OHS procedures</i> may include:	<ul style="list-style-type: none"> • emergency procedures • hazards and their means of control • incident reporting • use of personal protective equipment • safe work practices • safety briefings • site-specific safety rules.
<i>Delivery techniques</i> may include:	<ul style="list-style-type: none"> • coaching • demonstration • explanation • group or pair work • providing opportunities to practise skills and solve problems • questions and answers.
<i>Coaching</i> may include:	<ul style="list-style-type: none"> • learning arrangements requiring immediate interaction and feedback • on-the-job instruction and 'buddy' systems • relationships targeting enhanced performance • short-term learning arrangements • working on a one-to-one basis.
<i>Measures</i> may include:	<ul style="list-style-type: none"> • informal review or discussion • learner survey • on-the-job observation • review of peer coaching arrangements.

TAEDEL404A Mentor in the workplace

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to establish and develop a professional mentoring relationship with a learner, in particular an apprentice or trainee employed by, or undertaking work placement in, a workplace. It includes establishing the need for mentoring, developing a mentoring plan/framework, facilitating and monitoring the mentoring relationship, and evaluating the effectiveness of mentoring.
------------------------	--

Application of the Unit

Application of the unit	This unit typically applies to workplace supervisors or other work colleague with responsibility for mentoring in the workplace.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop a mentoring plan	1.1. Identify scope and boundaries of the <i>mentoring</i> relationship according to organisational procedures 1.2. Establish <i>ground rules</i> and negotiate realistic expectations 1.3. Establish and maintain confidentiality of the relationship in accordance with <i>legislation, policy and procedures</i>
2. Facilitate mentoring relationship	2.1. Develop learner's confidence, self-esteem, respect and trust in the mentoring relationship 2.2. Share personal experiences and knowledge with the person being mentored according to agreed objectives 2.3. Support the person being mentored to develop and use skills in problem solving and decision making 2.4. Use personal and professional networks to assist the person being mentored 2.5. Provide information, guidance and constructive guidance to enhance engagement in the workplace 2.6. Use <i>techniques for resolving differences</i> without damaging the relationship, and obtain assistance according to organisational policy and procedures
3. Monitor mentoring relationship	3.1. Provide planning assistance and guidance as requested by the person being mentored in a form and style to suit their requirements 3.2. Provide feedback to the person being mentored on progress towards achieving the expectations and goals of the mentoring process 3.3. Recognise and discuss changes in the <i>mentoring relationship</i> with appropriate <i>stakeholders</i> 3.4. Negotiate and manage closure of the mentoring arrangement once objectives have been met
4. Evaluate effectiveness of mentoring	4.1. Establish and discuss <i>benefits</i> gained from the mentoring process 4.2. Reflect on and articulate the personal benefits gained from providing mentoring 4.3. Identify and report the outcomes of the mentoring arrangement and the <i>benefits to the organisation</i> according to organisational policy and procedures to improve the mentoring system or program

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- planning and time-management skills to mentor in a workplace
- oral communication and language skills to motivate learners
- organisational skills to provide guidance and feedback to individuals
- interpersonal skills to:
 - engage in relationship building, including building trust and maintaining confidentiality
 - respond to diversity, including gender and disability
- communication skills to use a range of communication strategies, including listening, questioning, and giving and receiving feedback
- initiative and enterprise skills to apply procedures relating to OHS and environmental legislation in the context of workplace mentoring

Required knowledge

- relevant policy, legislation, codes of practice and national standards likely to impact on the provision of workplace mentoring
- training contracts and responsibilities of employer, registered training organisation (RTO) and funding body
- training plans and responsibilities
- training products and strategies for learning
- mentoring methodologies and strategies
- acceptable behaviour in the mentoring relationship
- equal employment opportunity, equity and diversity principles
- OHS relating to the work role, including:
 - hazards relating to the industry and specific workplace
 - reporting requirements for hazards and incidents
 - specific procedures for work tasks
 - safe use and maintenance of relevant equipment
 - emergency procedures
 - sources of OHS information

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. Arrange of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none"> • prepare a mentoring plan between the mentor and learner that reflects the scope and substance expected within a plan prepared for a learner undertaking a contracted apprenticeship or traineeship • facilitate at least three mentoring sessions • provide information on sessions, including comments and notes from both mentor and learner.
Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Mentoring</i> may include:</p>	<ul style="list-style-type: none"> • long-term focus on personal growth and learning • wide range of learning oriented to: <ul style="list-style-type: none"> • support • guidance in personal or career growth • relationship, not just a procedure or activity • one person professionally assisting the career development of another.
<p><i>Ground rules</i> may include:</p>	<ul style="list-style-type: none"> • training for mentoring partners • mentoring agreement • active involvement of both partners in the mentoring process.
<p><i>Legislation, policy and procedures</i> may include:</p>	<ul style="list-style-type: none"> • commonwealth and state or territory legislation and regulations, such as: <ul style="list-style-type: none"> • privacy legislation • equal employment opportunity, anti-discrimination and harassment legislation • OHS legislation • user choice • organisational policy, procedures and protocols.
<p><i>Techniques for resolving differences</i> may include:</p>	<ul style="list-style-type: none"> • finding a mutually beneficial solution • self-disclosure • inviting discussion • providing explanations • accessing assistance.
<p><i>Mentoring relationship</i> may include:</p>	<ul style="list-style-type: none"> • informal workplace development program • formal mentoring process associated with a contracted apprenticeship or traineeship, involving a formal training plan.
<p><i>Stakeholders</i> may include:</p>	<ul style="list-style-type: none"> • trainee or apprentice • manager or supervisor • RTO • learning support services, including assistive technology

RANGE STATEMENT	
	and diagnostic testing <ul style="list-style-type: none"> • funding organisation • supplier of learning resources.
<i>Benefits</i> may include:	<ul style="list-style-type: none"> • insights into organisational culture, attitudes and expected behaviours • supportive environment in which successes and failures can be evaluated • networking opportunities • development of workplace competence and self-confidence • recognition and job satisfaction • mutual respect.
<i>Benefits to the organisation</i> may include:	<ul style="list-style-type: none"> • increased productivity • new competencies in the person being mentored • staff motivation • more committed, involved and responsible learners.

TAEDES401A Design and develop learning programs

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to conceptualise, design, develop and review learning programs to meet an identified need for a group of learners. The unit addresses the skills and knowledge needed to identify the parameters of a learning program, determine the design, outline the content and review its effectiveness.
------------------------	---

Application of the Unit

Application of the unit	This unit typically applies to a trainer or facilitator who designs or develops learning programs. A learning program can be discrete, providing a planned learning approach that relates to specific learning and training needs, or it may form part of the learning design for a qualification.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define parameters of the learning program	1.1. Clarify <i>purpose</i> and type of learning program with key stakeholders 1.2. Access and confirm the competency standards and <i>other training specifications</i> on which to base the learning program 1.3. Identify language, literacy and numeracy requirements of the program 1.4. Identify and consider characteristics of the target learner group
2. Work within the vocational education and training (VET) policy framework	2.1. Access relevant <i>VET policies</i> and frameworks, and apply to work practices 2.2. Identify changes to training packages and accredited courses and apply these to program development 2.3. Conduct work according to organisational quality assurance policies and procedures
3. Develop program content	3.1. Research, develop and document specific subject matter content according to agreed design options 3.2. Evaluate existing learning resources for content relevance and quality 3.3. Specify assessment requirements of the learning program
4. Design structure of the learning program	4.1. Break the learning content into manageable segments and document timeframe for each segment 4.2. Determine and confirm <i>delivery strategies</i> and required assessment methods and tools 4.3. Document complete learning program in line with organisational requirements 4.4. Review complete program with key stakeholders and adjust as required 4.5. Ensure a safe learning progression by analysing risks in the learning environment and including a risk control plan

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- organisational skills to ensure resources are available and suitable
- evaluation skills to determine the time required for each learning segment and the overall timelines of the learning program
- cognitive skills to develop the learning program content and design its structure
- language and literacy skills to read and interpret a range of documentation, including technical and subject matter documents, references and texts

Required knowledge

- information about training package developers and course accreditation agencies responsible for specific learning program parameters
- training packages and relevant competency standards to be used as the basis of the learning program
- other performance standards and criteria to be used as the basis of the learning program, where relevant
- distinction and relationship between a training package/accredited course, learning strategy and learning program, where linked
- different purposes and focus of learning programs
- sound knowledge of learning principles
- instructional design principles relating to different design options for learning program design and structure
- availability and types of different relevant learning resources, learning materials and pre-developed learning activities
- methodology relating to developing and documenting new learning activities and related learning materials
- different delivery modes and methods
- relevant policies, legal requirements, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the VET sector
- relevant OHS knowledge relating to the work role, and OHS considerations that need to be included in the learning program

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. Arrange of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none"> • design, develop and review learning programs within the VET context • prepare and develop a minimum of two learning programs: <ul style="list-style-type: none"> • that contain differentiated learning program designs to reflect particular needs, contexts and timelines • at least one of which must be based on competency standards or accredited courses and must cover at least one entire unit of competency or accredited course module.
Context of and specific resources for assessment	Evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Purpose</i> may include:</p>	<ul style="list-style-type: none"> • developing vocational competency or vocational skills • developing language, literacy and numeracy skills • developing general education • meeting legislative, licensing and registration requirements, such as OHS requirements.
<p><i>Other training specifications</i> may include:</p>	<ul style="list-style-type: none"> • curriculum specifications • product specifications • organisational work requirements and training needs • induction needs • language, literacy and numeracy development needs • regulatory and licensing requirements.
<p><i>Vocational education and training policies</i> may include:</p>	<ul style="list-style-type: none"> • policies and procedures set by national organisations, such as the National Quality Council • Australian Quality Training Framework • other relevant policies.
<p><i>Delivery strategies</i> may include:</p>	<ul style="list-style-type: none"> • focus of delivery in terms of size and type of group • context of delivery, for example: <ul style="list-style-type: none"> • in the workplace • in a training room • in a community setting • mode of delivery, for example: <ul style="list-style-type: none"> • face-to-face • online • blended delivery mode • delivery methods, for example: <ul style="list-style-type: none"> • lock-step, learner-paced and mixed • interactive, participative and collaborative • blended delivery methods.

TLIA2009A Complete and check import/export documentation

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to complete and or evaluate import and export documentation, and check documentation in accordance with the requirements of Customs and related legislation and workplace procedures. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant Customs and related legislation and workplace requirements concerning the completion and checking of import/export documentation.

Work is performed under some supervision generally within a team environment. Work is undertaken in a range of environments including small to large worksites in the customs broking and freight forwarding industries.

This unit is normally packaged at AQF II or above.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify procedures required for documentation for import/export of goods	1.1 Documents required for import/export of goods are identified 1.2 Required documents are sourced 1.3 Content requirements for each section of the documentation are applied 1.4 Timelines for completion of documents are identified and noted 1.5 Requirements for permits and other documentation (e.g. Quarantine) are identified and implications noted 1.6 Procedures for obtaining clearances including AUTHORITY TO DEAL, Delivered into Home Consumption authorisation and Export Declaration Numbers (EDN) are identified and followed in accordance with the requirements of Customs and related legislation and workplace procedures 1.7 Letters of credit are identified and implications of each noted 1.8 Assistance is sought as required in identifying required documents and to commence process of assessing or completing these documents 1.9 Lodge all documentation if required by legislation (e.g. CITES)
2 Complete documentation to meet legislative and workplace requirements	2.1 Content requirements for each section of the documentation are identified and applied in accordance with the requirements of Customs and related legislation and workplace procedures 2.2 Workplace procedures for authorisations are followed 2.3 Data entry for documents are completed 2.4 Problems arising in completing required documents are identified and assistance sought to resolve these in accordance with the requirements of Customs and related legislation and workplace procedures 2.5 Actions are taken to meet deadlines 2.6 Assistance is sought as required in completing required documents
3 Check documentation to ensure it meets legislative requirements	3.1 Documents are collated and checked before forwarding to supervisor, manager or more senior personnel for checking within designated timelines in accordance with the requirements of Customs and related legislation and workplace procedures 3.2 Declarations are checked to ensure they meet the requirements of Customs and related legislation and workplace procedures 3.3 Letters of credit are checked to ensure they meet commercial, transport and overseas requirements 3.4 Dangerous goods documentation is checked in accordance with the requirements of Customs and related legislation and workplace procedures

ELEMENT	PERFORMANCE CRITERIA
	3.5 Any revisions to documents are finalised and rechecked by self and supervisor, manager or more senior personnel prior to lodgement
4 Lodge documentation for processing	4.1 Documents are forwarded to relevant personnel in accordance with the requirements of Customs and related legislation and workplace procedures
	4.2 Documents are filed, stored and retained in accordance with the requirements of Customs and related legislation and workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international standards, codes and regulations relevant to the import and export of cargo and freight
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the completion of import and export documentation
- Focus of operation of work systems, equipment, management and site operating systems for completing import/export cargo and freight documentation
- Problems that may occur when completing import and export documentation and appropriate action that can be taken to resolve the problems
- The Customs Act 1901 and related legislation
- Documentation requirements for the import and export of cargo and freight

Required skills:

- Communicate effectively with others when completing import and export documentation
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the import and export of cargo and freight
- Complete and/or assess accuracy of import and export documentation
- Work collaboratively with others when completing import and export documentation
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems when completing and/or assessing

Required skills:

- import and export documentation in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
 - Modify activities depending on differing operational contingencies, risk situations and environments
 - Operate and adapt to differences in equipment in accordance with standard operating procedures
 - Select and use relevant communications, computing and office equipment when completing import and export documentation

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - identifying procedures required for documentation for import/export of goods
 - completing and checking documentation and records to meet relevant Customs legislation and related legislation and workplace requirements
 - providing customer/client service and work effectively with others
 - selecting and using appropriate workplace colloquial and technical language and communication technologies in the workplace context

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is

EVIDENCE GUIDE

- required to:
- relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted in:
- a range of work environments
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- limited or restricted spaces
 - exposed conditions
 - controlled or open environments
- Cargo may include:
- goods with specialist requirements, including temperature controlled goods and dangerous goods
 - personal effects
 - consignments imported/exported by parcels post
 - consignments imported/exported by air freight
 - consignments imported/exported by sea freight
 - wildlife or wildlife products (living or non-living)
 - goods with specialist requirements, including temperature controlled goods and dangerous goods

RANGE STATEMENT

Hazards in the work area may include exposure to:

- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials

Consultative processes may involve:

- other employees and supervisors
- suppliers, customers and clients
- relevant authorities and institutions
- management and union representatives
- industrial relations and OH&S specialists
- other maintenance, professional or technical staff

Communication in the work area may include:

- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- radio
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:

- goods identification numbers and codes
- manifests, barcodes, and container identification/serial number
- relevant Customs legislation, related legislation including quarantine legislation, environment and conservation legislation and Australian and international codes of practice and regulations relevant to import/export of cargo
- Australian and international standards, regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- dangerous goods declarations and material safety data sheets (MSDSs) (where applicable)
- packing declaration
- timber treatment certificates
- cleanliness certificate
- handling instructions for cargo (especially for dangerous goods or temperature controlled goods)
- commercial invoices
- packing lists
- air waybill (AWB)
- certificates of origin

RANGE STATEMENT

Applicable regulations and legislation may include:

- bills of lading (B/L) or sea waybills
- certificates of marine insurance, other insurance certificates
- quarantine treatment certificate
- transportation and warehousing instructions
- permits from regulatory bodies (Australian and international)
- financial documentation
- other documents specific to goods, country of origin/destination
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian Standards and certification requirements
- quality assurance procedures
- emergency procedures
- relevant Customs and related legislation, including taxation legislation
- relevant standards and codes for the import/export of cargo
- quarantine legislation
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian Marine Orders and the International Maritime Dangerous Goods Code
 - IATA Dangerous Goods by Air regulations
 - Australian and International Explosives Codes
- workplace relations regulations
- equal opportunity legislation
- equal employment opportunity and affirmative action legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to package goods in accordance with regulatory and workplace requirements including selecting materials, packing and unwrapping products, and labelling packaged products/loads to the required labelling standards. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the packaging of goods.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the packaging of goods as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Select materials and pack and unwrap products	1.1 Packaging specifications and order packaging documentation are correctly interpreted 1.2 Appropriate packaging technology suitable for the goods to be packed is selected 1.3 Packaging materials are identified and matched to specifications 1.4 Work plan ensures materials are used economically and that appropriate packaging is used that minimises loss and damage in transit or storage 1.5 Work is planned in accordance with OH&S requirements 1.6 Completed packed goods are stacked to minimise damage from within and outside
2 Label packaged products/loads	2.1 Workplace labelling standards are identified 2.2 Appropriate goods handling, labelling and other identification symbols are utilised 2.3 Invoices and picking slips are attached (where required) 2.4 Workplace documentation is completed

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to the packaging of goods including the Australian Dangerous Goods Code (ADG Code)
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the packaging of goods
- Focus of operation of work systems, equipment, management and site operating systems for the packaging of goods
- Problems that may occur when packaging goods and appropriate action that can be taken to resolve the problems
- Documentation requirements for the packaging of goods
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when packaging goods
- Read and interpret instructions, procedures and labels relevant to the packaging of goods
- Complete documentation related to work activities when packaging goods
- Work collaboratively with others when packaging goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when packaging goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events that may occur when packaging goods
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of equipment when packaging goods
- Check operation of packaging equipment in terms of service schedule and standard operating procedures
- Select and use relevant communications, computing equipment and materials when packaging goods
- Estimate the size, shape and special requirements of goods and loads

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

EVIDENCE GUIDE

unit

- the underpinning knowledge and skills
- relevant legislation and workplace procedures
- other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:

- in a range of work environments
- by day or night

Customers may be:

- internal or external

Workplaces may comprise:

- large, medium or small worksites

RANGE STATEMENT

- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Goods may involve:
- special handling, storage and/or packaging requirements, including temperature controlled goods and dangerous goods
- Hazards in the work area may include exposure to:
- chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
 - oil or water on floor
 - a fire or explosion
 - damaged packaging or pallets
 - debris on floor
 - faulty racking
 - poorly stacked pallets
 - faulty equipment
- Consultative processes may involve:
- other employees and supervisors
 - suppliers, customers and clients
 - relevant authorities and institutions
 - management and union representatives
 - industrial relations and OH&S specialists
 - other maintenance, professional or technical staff
- Communication in the work area may include:
- phone
 - electronic data interchange (EDI)
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Information/documents may
- goods identification numbers and codes
 - manifests, picking slips, merchandise transfers, stock

RANGE STATEMENT

include:

requisitions and bar codes

- codes of practice and regulations relevant to the packaging of goods
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions
- dangerous goods declarations and material safety data sheets (where applicable)
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- relevant codes and regulations for the packaging of goods
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian and International Explosives Codes
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- marine orders
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to pick and process orders in accordance with workplace requirements including identifying workplace order picking processes, policies and procedures; picking and despatching orders, and recording stock levels. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in accordance with relevant codes/regulations and workplace requirements for the picking and processing of orders.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures to the picking and processing of orders in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify workplace order picking processes, policies and procedures	1.1 Workplace procedures for order picking and related workplace documentation are interpreted 1.2 Stock allocation and location systems are identified and located 1.3 Appropriate manual handling equipment is selected in accordance with OH&S regulations and workplace procedures
2 Pick and despatch an order	2.1 Work requirements are planned with appropriate equipment and documentation assembled 2.2 Zones of the warehouse which store required products are identified and located 2.3 Pick path is established 2.4 Where required, appropriate pallet(s) for orders are selected and stacked to minimise stock damage and maximise stability 2.5 Products are selected and consolidated 2.6 Products/pallets are located in despatch areas 2.7 Products are assembled to meet workplace schedules 2.8 Orders are consolidated, secured, arranged and placed in storage zones in accordance with the schedule
3 Record stock levels	3.1 Storage areas are checked and stocks are noted for replenishment in accordance with workplace procedures 3.2 Workplace records are completed in accordance with workplace requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to the picking and processing of orders, including relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the picking and processing of orders
- Focus of operation of work systems, equipment, management and site operating systems for the picking and processing of orders
- Problems that may occur when picking and processing an order and appropriate action that can be taken to resolve the problems

REQUIRED KNOWLEDGE AND SKILLS

- Documentation and record requirements when picking and processing an order
- Equipment used during picking and processing operations and the precautions and procedures that should be followed in its use
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when picking and processing orders
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures, signs and labels relevant to the picking and processing of orders
- Complete documentation related to picking and processing orders
- Identify relevant stock and goods coding and labelling, including ADG and IMDG markings
- Work collaboratively with others when picking and processing orders
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions when picking and processing orders in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when picking and processing orders
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when picking and processing orders
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use relevant equipment and communications technology when picking and processing orders
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Estimate the size, shape and special requirements of goods/loads

TLIA2014A Use product knowledge to complete work operations

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to use product knowledge to complete work operations in accordance with workplace requirements including identifying products in a subsection of a warehouse or other storage area, examining quality and reporting on products, and using inventory and labelling systems to identify and locate products. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the identification, handling and storage of various categories of products/stock.

Work is performed under some supervision generally within a team environment. It involves the application of product knowledge and an understanding of relevant regulatory requirements to the handling and storage of various types of products/stock as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify products in a subsection of a warehouse or other storage area	1.1 Products are identified against specified criteria in accordance with workplace procedures 1.2 Storage and handling characteristics are identified and applied consistently 1.3 Products are described to internal customers identifying features which may affect location, safety or storage requirements
2 Examine quality and report on products	2.1 Products are inspected in accordance with workplace quality assurance procedures 2.2 Workplace procedures are followed to replace, return or dispose of stock/products which are not useable 2.3 Non-conforming products are recorded/reported in accordance with workplace procedures
3 Use inventory and labelling systems to identify and locate products	3.1 Inventory and labelling systems are used to locate products within the workplace 3.2 Goods are physically located and identified

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian codes and regulations relevant to the products being identified, handled, transported, stacked and/or stored as part of work operations
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the identification, handling, stacking and storage of particular categories of products
- Focus of operation of work systems, equipment, management and site operating systems for the packaging of goods
- Categories or groups of products and the special handling, stacking and storage requirements for each
- Purpose and use of cataloguing and labelling systems
- Strategies to seek out sources of knowledge of products and use this information to inform work
- Types of equipment and storage areas appropriate for different types of goods including perishable, fragile, dangerous, composition/state goods

REQUIRED KNOWLEDGE AND SKILLS

- Documentation requirements including reports and records concerning damaged or contaminated goods
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when handling, transporting and storing products and providing information on products and services
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures, information and signs relevant to the handling, transporting and storing of products and the provision of information on products and services
- Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels
- Complete documentation related to work activities
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Adapt to differences in products and services in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Select and use relevant communications, computing and load handling equipment
- Estimate the size, shape and special requirements of goods and loads

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

EVIDENCE GUIDE

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse order to identify work requirements	1.1 Order request and consignment note documentation is interpreted 1.2 Required schedules for despatch are identified 1.3 Product(s) in order are identified 1.4 Workplace and product knowledge is used to plan sequence of work 1.5 Appropriate materials handling equipment is selected within required OH&S regulations and timeframe for the despatch
2 Follow workplace order picking processes to prepare goods for despatch	2.1 Goods for despatch are selected, checking against product knowledge, labels and other identification systems 2.2 Products are sorted, assembled and consolidated 2.3 Orders are secured and placed in storage/despatch zones, in accordance with schedule 2.4 Order is checked against despatch schedule and order form
3 Complete despatch following workplace procedures and schedules	3.1 Workplace records are completed, and labels and appropriate documentation attached 3.2 Load labels and documentation are checked and loading is organised in accordance with workplace procedures and ADG Code (where applicable) 3.3 Final check of load labels and documentation is completed in accordance with requirements 3.4 Transportation requirements are described to driver where appropriate

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to despatch operations, including the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the organising of despatch operations
- Focus of operation of work systems, equipment, management and site operating systems for despatching goods
- Problems that may occur when despatching goods and appropriate action that can be taken to

REQUIRED KNOWLEDGE AND SKILLS

resolve the problems

- Documentation and record requirements for despatch operations
- Equipment used during despatch operations and the precautions and procedures that should be followed in its use
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when organising despatch operations
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the organising of despatch operations
- Complete documentation related to the organising of despatch operations
- Work collaboratively with others when organising despatch operations
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when organising despatch operations in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in goods and equipment in accordance with standard operating procedures
- Select and use relevant equipment and communications technology when organising despatch operations
- Select and use required personal protective equipment conforming to industry and OH&S standards

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare for stocktake	1.1 Goods to be counted and appropriate inventory systems are identified 1.2 Required resources including equipment and record keeping systems are identified 1.3 Allocated tasks, zones and work requirements are identified 1.4 Sequence work role is planned in a time effective manner
2 Stocktake and count stock	2.1 Stocktaking and cyclical counts are undertaken in accordance with enterprise policies and procedures 2.2 Inventory data is interpreted 2.3 Inventory data is confirmed to match stock 2.4 Stock levels are accurately counted and documented
3 Identify stock discrepancies	3.1 Discrepancies in type, number and quality of stock are accurately recorded and documented 3.2 Products stored in inappropriate storage locations are relocated and stock records adjusted
4 Complete documentation	4.1 Inventory data is reconciled to match warehouse stock in accordance with company procedures 4.2 Workplace documentation is completed

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian codes and regulations relevant to the conduct of stocktakes
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the conduct of stocktakes
- Focus of operation of work systems, equipment, management and site operating systems for the conduct of stocktakes
- Workplace processes for records management and the production of stocktake reports
- Principles of operation and functions of stocktake systems
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when conducting stocktakes
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the conduct of stocktakes
- Complete documentation related to the conduct of stocktakes
- Work collaboratively with others when conducting stocktakes
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when conducting stocktakes in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use relevant communication, computing and office equipment when conducting stocktakes
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources

- Performance is demonstrated consistently over a period

EVIDENCE GUIDE

for assessment

of time and in a suitable range of contexts

- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:

- in a range of work environments
- by day or night

Customers may be:

- internal or external

Workplaces may comprise:

- large, medium or small worksites

Work may be conducted in:

- restricted spaces
- exposed conditions
- controlled or open environments

RANGE STATEMENT

- Goods may involve:
- special handling, location, storage and/or packaging requirements, including temperature controlled goods and dangerous goods
- Inventory systems may be:
- automated
 - manual
 - paper based
 - computerised
 - microfiche
- Categories or groups of products/stock may include:
- small parts
 - perishable goods
 - overseas export
 - dangerous goods
 - refrigerated products
 - temperature controlled stock
 - fragile goods
- The characteristics of products/stock may include:
- small parts
 - toxicity
 - flammability
 - form
 - weight
 - size
 - state
 - perishability
 - fragility
 - security risk
- Labelling systems may include:
- batch code
 - bar code
 - identification numbering systems
 - serial numbers
 - symbols for safe handling
 - ADG and HAZCHEM Codes
- Hazards in the work area may include:
- chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
 - oil or water on floor
 - a fire or explosion
 - damaged packaging or pallets
 - debris on floor
 - faulty racking
 - poorly stacked pallets

RANGE STATEMENT

- Communication in the work area may include:
- faulty equipment
 - phone
 - electronic data interchange (EDI)
 - fax
 - email
 - internet
 - RF systems
 - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Consultative processes may involve:
- other employees and supervisors
 - suppliers, customers and clients
 - relevant authorities and institutions
 - management and union representatives
 - industrial relations and OH&S specialists
 - other maintenance, professional or technical staff
- Information/documents may include:
- goods identification numbers and codes
 - manifests, picking slips, merchandise transfers, stock requisitions and bar codes
 - codes of practice and regulations relevant to the identification, handling and stacking of goods
 - Australian and international regulations and codes of practice for the handling, stacking and transport of dangerous goods and hazardous substances
 - operations manuals, job specifications and induction documentation
 - manufacturers specifications for equipment
 - workplace procedures and policies
 - supplier and/or client instructions
 - dangerous goods declarations and material safety data sheets (where applicable)
 - award, enterprise bargaining agreement, other industrial arrangements
 - relevant Australian standards and certification

RANGE STATEMENT

Applicable regulations and legislation may include:

- requirements
- quality assurance procedures
- emergency procedures
- relevant codes and regulations for the packaging of goods
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian and International Explosives Codes
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to coordinate goods to bond premises in accordance with regulatory and workplace requirements including identifying and listing goods for bonding, arranging transfer of goods to bond store, and preparing and issuing bond lists. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning coordination of goods to bond premises.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the coordination of goods to bond premises as part of work activities in the warehousing, distribution and/or storage industries.

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify and list goods for bonding	<p>1.1 Goods are listed for bonding when not delivered or collected on completion of agreed storage period</p> <p>1.2 Prior to listing for bonding, inspection is arranged with the Australian Customs Service for goods identified as surplus</p> <p>1.3 Goods left after time advertised for collection are listed for bonding in accordance with workplace policy and Australian Customs Service requirements</p>
2 Arrange transfer of goods to bond store	<p>2.1 Arrangements for the transfer of goods to bond store are made in accordance with regulatory requirements and workplace procedures</p> <p>2.2 Carrier is notified of storage or yard location, marks and quantity</p>
3 Prepare and issue bond list	<p>3.1 Bond list is prepared in accordance with workplace requirements and Australian Customs Service regulations</p> <p>3.2 Bond list, endorsed with the relevant information, is issued to carrier</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to the coordination of goods to bond premises
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the coordination of goods to bond premises
- Focus of operation of work systems, equipment, management and site operating systems for coordination of goods to bond premises
- Problems that may occur when coordinating goods to bond premises and appropriate action that can be taken to resolve the problems

Required skills:

- Communicate effectively with others when coordinating the delivery of goods to bond premises
- Read and comprehend simple statements in English

Required skills:

- Read and interpret instructions, procedures and labels relevant to the coordination of goods to bond premises
- Complete documentation when coordinating the delivery of goods to bond premises
- Work collaboratively with others when coordinating the delivery of goods to bond premises
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems when coordinating the delivery of goods to bond premises in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when coordinating the delivery of goods to bond premises
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use relevant communications, computing and office equipment when coordinating goods to bond premises
- Select and use required personal protective equipment conforming to industry and OH&S standards

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse order to identify work requirements to fill order	1.1 Order request documentation is interpreted 1.2 Product(s) in order are noted and workplace location(s) are identified 1.3 Workplace and product knowledge is used to organise documentation 1.4 Required schedules for order movement are identified and noted where required 1.5 Special aspects of the order such as dangerous/hazardous goods or temperature controlled goods are identified and information on required documentation procedures and relevant regulatory requirements is identified, accessed and interpreted
2 Follow workplace order documentation processes	2.1 Workplace procedures for documentation of an order are identified 2.2 Workplace documentation is completed in accordance with workplace procedures and any relevant regulatory requirements
3 Finalise documentation	3.1 Order is checked against schedule and order form 3.2 Workplace records are completed, and labels and appropriate documentation are attached in accordance with workplace procedures and any relevant regulatory requirements 3.3 Special transportation requirements are identified and conveyed to appropriate personnel 3.4 Where applicable, all required documentation requirements for dangerous goods and hazardous materials are completed in accordance with the relevant regulations and codes

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to the completion of receival/despatch documentation, including the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the completion of receival/despatch documentation
- Focus of operation of work systems, equipment, management and site operating systems for

REQUIRED KNOWLEDGE AND SKILLS

the receiving and despatch of goods

- Problems that may occur when completing receipt and despatch documentation and appropriate action that can be taken to resolve the problems
- Specifications and standards for the checking and inspection of received and despatched goods
- Documentation requirements for the receipt and despatch of goods
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when completing receipt and despatch documentation
- Read and interpret instructions, procedures and labels relevant to the completion of receipt and despatch documentation
- Complete receipt and despatch documentation
- Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels
- Work collaboratively with others when completing receipt and despatch documentation
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems when completing receipt and despatch documentation in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use relevant computer, communication and office equipment when completing receipt and despatch documentation
- Estimate the size, shape and special requirements of goods and loads

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify inventory and stock control systems in use in the workplace	1.1 Workplace inventory and stock control equipment, software and systems are identified 1.2 Reasons for common database approach to inventory records and documentation in the warehouse are explained 1.3 Procedures for identification and reporting of discrepancies or variances are identified
2 Use re-order procedures to maintain stock levels	2.1 Stock level maintenance checking is conducted 2.2 Stock is re-ordered to meet stock level maintenance requirements in accordance with workplace policies and procedures 2.3 Data is accurately entered and extracted from the inventory/records system using appropriate workplace procedures
3 Organise cyclical stock counts and report discrepancies or variances	3.1 Process for cyclical stock count is planned and work allocated to team members 3.2 Clear directions on tasks to be performed are given 3.3 Stocktake activities are conducted in accordance with workplace procedures 3.4 Types and causes of records discrepancies are identified 3.5 Procedures for noting and correcting minor discrepancies are used 3.6 Major discrepancies are reported in accordance with workplace procedures 3.7 Workplace documentation is completed
4 Produce reports on record keeping and inventory functions	4.1 Types of reports to be produced from inventory records systems are identified 4.2 Reports are produced in accordance with workplace procedures and relevant regulatory requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian codes and regulations relevant to the organisation of stock control
- Relevant OH&S and environmental protection procedures and guidelines

REQUIRED KNOWLEDGE AND SKILLS

- Workplace procedures and policies for the use of inventory systems to organise stock control
- Focus of operation of inventory systems, equipment, management and site operating systems for the control of stock
- Principles of operation and functions of inventory systems
- Applications of different types of inventory systems and stock management approaches
- Workplace processes for records management and the production of inventory reports
- Principles of operation and functions of inventory systems
- Computer records and documentation requirements for stock control, including forms, checklists and inventory reports
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when using inventory systems to organise stock control
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the use of inventory systems for the organisation of stock control
- Complete documentation related to the use of inventory systems to organise stock control
- Work collaboratively with others when using inventory systems to organise stock control
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems when using inventory systems to organise stock control in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Select and use relevant communications, computing and office equipment when using inventory systems to organise stock control

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify and categorise products	1.1 Products are identified and categorised in terms of specified criteria in accordance with workplace procedures
2 Match products to locations based on specified criteria	2.1 Locations for products are determined based on specified criteria 2.2 Labels, inventory systems and other information sources are used to assist in the identification of products, handling and storage requirements
3 Assist individuals to solve stock identification and location problems	3.1 New stock items are identified and particular product information is brought to the attention of relevant personnel 3.2 Stock queries are predicted and team members are assisted to locate and assimilate information relevant to these products 3.3 Personnel are assisted with routine and non-routine stock enquiries with actions taken to update information of products for relevant personnel 3.4 Personnel are encouraged to maintain and build product knowledge through accessing product information and the application of problem solving and information analysis skills
4 Identify appropriate transfer and handling requirements	4.1 Resources used to transfer different products through the storage zones are identified and evaluated 4.2 Work in receival and despatch areas is supported by identification and reporting of variances 4.3 Stock re-ordering is informed by knowledge of product source, frequency of pick destination (or seasonality) of products and potential for supply problems 4.4 Relevant documentation is completed in accordance with workplace procedures
5 Contribute to continuous improvement	5.1 Knowledge of customer requirements is used to determine work design 5.2 Potential problems are predicted and notified to appropriate personnel 5.3 Opportunities for improvements to own work organisation are identified

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

REQUIRED KNOWLEDGE AND SKILLS

Required knowledge:

- Australian codes and regulations relevant to the workplace activities
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies relevant to the application of product knowledge to the organisation of workplace operations
- Focus of operation of work systems, equipment, management and site operating systems
- Information on various categories or groups of products including their key characteristics and hazards and the special handling, stacking and storage requirements for each
- Product sources, destinations and potential problems
- Re-ordering procedures and just-in-time planning principles
- Requirements for workplace documentation, inventory systems and records
- Sources of product information
- Strategies to seek out sources of knowledge of products and use this information to inform work
- Types of equipment and storage areas appropriate for different types of goods including perishable, fragile, dangerous, composition/state goods
- Documentation requirements including reports and records concerning damaged or contaminated goods
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when organising workplace activities
- Access, read and interpret product information, policies and regulatory requirements relevant to workplace operations
- Complete documentation related to the organisation of work activities
- Work collaboratively with others when organising workplace activities
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when organising workplace activities in accordance with regulatory requirements and workplace procedures
- Use information on products/stock to determine, plan and organise processes used for receipt, storage, goods movement, despatch, stock levels, re-ordering processes
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Required skills:

- Operate and adapt to differences in products and services in accordance with standard operating procedures
- Organise and monitor the use of personal protective equipment conforming to industry and OH&S standards
- Select and use relevant communication, computing and office equipment when organising workplace activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- As a minimum, assessment of knowledge must be conducted through appropriate assessments using written/practical/oral assessments
- Practical assessment must occur:
 - through activities in an appropriately simulated

EVIDENCE GUIDE

- environment , and/or
- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted:
- in a range of work environments
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Workplace activities being organised may include but are not limited to:
- receipt
 - storage
 - goods/stock movement
 - despatch
 - stock levels
 - re-ordering processes
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Goods may involve:
- special handling, location, storage and/or packaging requirements, including temperature controlled goods and dangerous goods
- Modes of transfer may be:
- manual or motorised
- Storage types may include but are not limited to:
- bin/binning systems
 - rack refrigeration/freezers/cold rooms
 - marked floor space
 - containers
 - racks and racking systems
 - block/stacks
 - pallets
- Inventory systems may be:
- automated
 - manual
 - paper-based

RANGE STATEMENT

- Categories or groups of products/stock may include:
- computerised
 - microfiche
 - small parts
 - perishable goods
 - overseas export
 - dangerous goods
 - refrigerated products
 - temperature controlled stock
 - fragile goods
- The characteristics of products/stock may include:
- small parts
 - toxicity
 - flammability
 - form
 - weight
 - size
 - state
 - perishability
 - fragility
 - security risk
- Labelling systems may include but are not limited to:
- batch code
 - bar code
 - identification numbering systems
 - serial numbers
 - symbols for safe handling
 - ADG and HAZCHEM Codes
- Hazards in the work area may include:
- chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
 - oil or water on floor
 - a fire or explosion
 - damaged packaging or pallets
 - debris on floor
 - faulty racking
 - poorly stacked pallets
 - faulty equipment
- Communication in the work area may include:
- phone
 - electronic data interchange (EDI)
 - fax
 - email
 - internet

RANGE STATEMENT

- RF systems
 - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Consultative processes may involve:
- other employees and supervisors
 - suppliers, customers and clients
 - relevant authorities and institutions
 - management and union representatives
 - industrial relations and OH&S specialists
 - other maintenance, professional or technical staff
- Information/documents may include:
- goods identification numbers and codes
 - manifests, picking slips, merchandise transfers, stock requisitions and bar codes, and container identification/serial number
 - codes of practice and regulations relevant to workplace operations
 - Australian and international regulations and codes of practice for the handling, stacking and transport of dangerous goods and hazardous substances
 - operations manuals, job specifications and induction documentation
 - manufacturers specifications for equipment
 - workplace procedures and policies
 - supplier and/or client instructions
 - dangerous goods declarations and material safety data sheets (where applicable)
 - award, enterprise bargaining agreement, other industrial arrangements
 - relevant Australian standards and certification requirements
 - quality assurance procedures
 - emergency procedures
- Applicable regulations and
- relevant codes and regulations for the packaging of goods
 - Australian and international regulations and codes of

RANGE STATEMENT

legislation may include:

practice for the handling and transport of dangerous goods and hazardous substances, including:

- Australian and International Dangerous Goods Codes
- Australian and International Explosives Codes
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- marine orders
- relevant state/territory OH&S and environmental protection legislation
- workplace relations regulations
- workers compensation regulations

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to organise despatch operations in accordance with workplace requirements including planning and organising despatch operations, organising the storage and despatch of stock, and completing all required documentation and records. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in accordance with codes/regulations and workplace requirements relevant to the organisation of despatch operations.

Work is performed under some supervision generally within a team environment. It involves the application of regulatory requirements and workplace procedures to the organisation of despatch operations in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Plan and organise despatch operations	1.1 Knowledge of product characteristics and workplace procedures are applied to the analysis of the stock 1.2 Resources including manual handling equipment, employee competencies, storage areas and goods management equipment are identified to match stock characteristics 1.3 Deadlines are scheduled to meet order requirements 1.4 Work processes are planned to meet deadlines
2 Organise the storage and despatch of stock	2.1 Employees, equipment and storage areas are allocated and supervised 2.2 Individuals are informed of work requirements and deadlines 2.3 Work processes are monitored to ensure that resources, both human and equipment, are maintained at productive levels and in accordance with workplace procedures and OH&S requirements 2.4 Discrepancies in stocks are noted and reported in accordance with company procedures
3 Complete documentation	3.1 Required despatch documentation and records are completed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to the organising of despatch operations, including the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the organising of despatch operations
- Focus of operation of work systems, equipment, management and site operating systems for the organising of despatch operations
- Problems that may occur when organising despatch operations and appropriate action that can be taken to resolve the problems
- Documentation and record requirements for despatch operations
- Equipment used during the organisation of despatch operations and the precautions and procedures that should be followed in its use

REQUIRED KNOWLEDGE AND SKILLS

- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when organising despatch operations
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the organising of despatch operations
- Complete documentation related to the organising of despatch operations
- Identify relevant stock and goods coding and labelling, including ADG and IMDG markings
- Work collaboratively with others when organising despatch operations
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when organising despatch operations in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Select and use relevant equipment and communications technology when organising despatch operations
- Estimate the size, shape and special requirements of goods and loads

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the

EVIDENCE GUIDE

demonstrate competency in this unit

requirements of the elements and performance criteria of this unit and include demonstration of applying:

- the underpinning knowledge and skills
- relevant legislation and workplace procedures
- other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:

- in a range of work environments
- by day or night

RANGE STATEMENT

- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- limited or restricted spaces
 - exposed conditions
 - controlled or open environments
- Goods to be despatched may involve:
- special handling, location, storage and/or packaging requirements, including temperature controlled goods, dangerous goods or hazardous substances
- Problems that may occur when despatching an order include:
- wrong stock is despatched
 - wrong carton for order
 - incorrect location
 - damaged stock
 - no stock at location
 - incorrect quantity
 - failing to meet a special order requirement
 - failing to meet customers delivery requirements
- Special order requirements may include:
- pricing
 - special packing
 - specific size of carton
 - special categories of stock
- Hazards in the work area may include exposure to:
- chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
 - oil or water on floor
 - a fire or explosion
 - damaged packaging or pallets
 - debris on floor
 - faulty racking
 - poorly stacked pallets
 - faulty equipment
- Communication in the work area may include:
- phone
 - electronic data interchange (EDI)
 - fax
 - email
 - internet
 - RF communications
 - barcode readers
 - oral, aural or signed communications

RANGE STATEMENT

- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Consultative processes may involve:

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify record management databases, storage types and technologies	1.1 Requirements for records operations are identified and defined 1.2 Types of record systems which might meet workplace requirements are identified and reviewed 1.3 Advantages and disadvantages of identified systems are evaluated and noted 1.4 Record management systems are selected in accordance with workplace requirements 1.5 Appropriate action is taken to establish the selected record system in accordance with workplace procedures and operational requirements
2 Store warehouse records	2.1 Warehouse records are collected and consolidated in accordance with workplace procedures 2.2 Records are stored manually and/or electronically as required in accordance with system developers instructions and workplace procedures 2.3 Records are maintained in accordance with workplace procedures
3 Use record management systems to retrieve information	3.1 Responses to requests for information are processed promptly 3.2 Required records are accessed and retrieved in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian codes and regulations relevant to the organisation of warehouse records operations
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the organisation of warehouse records operations
- Focus of operation of record systems, equipment, management and site operating systems for the organisation of warehouse records
- Principles of operation and functions of warehouse records systems
- Principles of operation, functions and applications of different types of records systems
- Requirements for accessibility, security and confidentiality of records
- Computer records and documentation requirements for the organisation of warehouse records

REQUIRED KNOWLEDGE AND SKILLS

operations

- Problems that may occur when organising warehouse records operations and appropriate action that can be taken
- Housekeeping standards procedures required in the workplace

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to monitor storage facilities in accordance with workplace requirements including determining site functions and operations; monitoring storage operations in accordance with workplace procedures; and taking appropriate action in response to identified discrepancies, changes to storage requirements, or breaches in operational procedures. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the monitoring of storage facilities.

Work is performed under general supervision. It involves the application of product knowledge and an understanding of relevant regulatory requirements to the monitoring of storage facilities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Determine site functions and operations	1.1 Layout of storage facilities, work flow and activities undertaken in each zone are identified 1.2 Type of storage facilities, their purpose and (any) associated risk factors are identified 1.3 Inventory lists are accessed through record management system 1.4 Storage separations and co-storage applications are identified
2 Monitor storage operations	2.1 Inventory data is confirmed to match goods/freight and applicable storage requirements 2.2 Storage areas are supervised to ensure movement of personnel and goods/freight are in accordance with workplace procedures 2.3 Storage facilities are checked to ensure appropriate operational capacity 2.4 Integrity of goods/materials are monitored to ensure appropriate quality is maintained 2.5 Discrepancies/changes to storage requirements and/or inventory lists are noted and action undertaken in accordance with workplace procedures 2.6 Appropriate action(s) are initiated in response to breaches of operational procedures or to an emergency/incident 2.7 Operational actions and investigative outcomes are documented in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian codes and regulations, permit and licence requirements relevant to the workplace activities
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies relevant to the monitoring of storage facilities
- Focus of operation of work systems, equipment, management and site operating systems
- Information on various categories or groups of products including their key characteristics and hazards and the special handling, stacking and storage requirements for each
- Types of storage areas and related equipment appropriate for different types of goods including perishable, fragile, dangerous, composition/state goods

REQUIRED KNOWLEDGE AND SKILLS

- Equipment applications, capacities, configurations, safety hazards and control mechanisms
- Requirements for workplace documentation reports and records
- Problems that may occur when monitoring storage facilities and appropriate action that can be taken
- Site layout
- Housekeeping standards and procedures required in the workplace

Required skills:

- Communicate effectively with others when monitoring storage facilities
- Read and interpret instructions, procedures, information and signs relevant to the monitoring of storage facilities
- Complete documentation related to the monitoring of storage facilities
- Work collaboratively with others when monitoring storage facilities
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions when monitoring storage facilities in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events related to the monitoring of storage facilities
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Use information on products and stock to determine, plan and organise processes used for the monitoring of storage facilities
- Select and use relevant communications, computing and office equipment when monitoring storage facilities
- Monitor performance of equipment
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted:
- in a range of work environments
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Requirements for work may include:
- restricted spaces
 - site restrictions and procedures
 - use of safety and personal protective equipment
 - communications equipment
 - specialised lifting and/or handling equipment
 - incident/accident breakdown procedures
 - additional gear and equipment
 - noise restrictions
 - hours of operations
 - authorities and permits
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
 - environments involving the movement of equipment, goods, materials and/or vehicular traffic
- Goods may involve:
- special handling, location, storage and/or packaging requirements, including temperature controlled goods and dangerous goods
- Modes of transfer may be:
- manual or motorised
- Storage types may include but are not limited to:
- bin/binning systems
 - rack refrigeration/freezers/cold rooms
 - marked floor space
 - containers
 - racks and racking systems
 - block/stacks
 - pallets
- Inventory systems may be:
- automated
 - manual
 - paper-based
 - computerised
 - microfiche

RANGE STATEMENT

Categories or groups of products/stock may include:

- small parts
- perishable goods
- overseas export
- dangerous goods
- refrigerated products
- temperature controlled stock
- fragile goods

The characteristics of products/stock may include:

- small parts
- toxicity
- flammability
- form
- weight
- size
- state
- perishability
- fragility
- security risk

Labelling systems may include but are not limited to:

- batch code
- bar code
- identification numbering systems
- serial numbers
- symbols for safe handling
- ADG and HAZCHEM Codes

Hazards in the work area may include:

- hazardous or dangerous materials
- contamination of, or from, materials being handled
- noise, light, energy sources
- stationary and moving machinery, parts or components
- service lines
- skills, leakages, ruptures
- dust/vapours
- oil or water on floor
- a fire or explosion
- damaged packaging or pallets
- debris on floor
- faulty racking
- poorly stacked pallets
- faulty equipment

Communication in the work area may include:

- phone
- electronic data interchange (EDI)
- fax

RANGE STATEMENT

- email
 - internet
 - RF systems
 - oral, aural or signed communications
 - company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Consultative processes may involve:
- other employees and supervisors
 - suppliers, customers and clients
 - relevant authorities and institutions
 - management and union representatives
 - industrial relations and OH&S specialists
 - other maintenance, professional or technical staff
- Information/documents may include:
- goods identification numbers and codes
 - manifests, picking slips, merchandise transfers, stock requisitions and bar codes
 - codes of practice and regulations relevant to workplace operations
 - Australian and international regulations and codes of practice for the handling, stacking and transport of dangerous goods and hazardous substances
 - operations manuals, job specifications and induction documentation
 - manufacturers specifications for equipment
 - workplace procedures and policies
 - supplier and/or client instructions
 - dangerous goods declarations and material safety data sheets (where applicable)
 - award, enterprise bargaining agreement, other industrial arrangements
 - relevant Australian standards and certification requirements
 - quality assurance procedures
 - emergency procedures
- Applicable regulations and
- codes and regulations relevant to the monitoring of storage

RANGE STATEMENT

legislation may include:

- facilities
- Australian and international regulations and codes of practice for the storage of dangerous goods and hazardous substances, including:
 - Australian Dangerous Goods Code
 - Australian Explosives Code
 - licence, patent or copyright arrangements
 - water and road use and licence arrangements
 - export/import/quarantine/bond requirements
 - marine orders
 - relevant state/territory OH&S and environmental protection legislation
 - workplace relations regulations
 - workers compensation regulations

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to control and order stock for a workplace store in an enterprise/organisation in a transport, distribution, production, hospitality, retail or other relevant industry sector. It specifically covers maintaining stock levels and records, organising and administering stocktakes, identifying stock losses, processing stock orders, and following up orders. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant codes of practice, regulations and workplace procedures for the control and ordering of stock in a workplace store.

Work is performed under general supervision, with some accountability and responsibility for self and others in achieving the prescribed outcomes. It involves the application of routine principles and procedures to efficiently control and order stock in a workplace store.

Licensing/Regulatory Information

Refer to Unit Descriptor

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Maintain stock levels and records	1.1 Stock levels are monitored and maintained at levels prescribed by workplace specifications 1.2 Stock security systems are monitored and adjusted as required 1.3 Stock re-order cycles are maintained, monitored and adjusted as required 1.4 Colleagues are informed of their individual responsibilities in regard to recording of stock 1.5 Stock storage and movement records are maintained in accordance with workplace procedures 1.6 Stock performance is monitored and fast/slow moving items are identified and reported in accordance with workplace procedures
2 Organise and administer stocktakes	2.1 Stocktakes are organised at the appropriate time and responsibilities allocated to staff 2.2 Accurate reports on stocktake data are produced within designated timelines
3 Identify stock losses	3.1 Losses are accurately identified, recorded and assessed against potential loss as forecast on a regular basis 3.2 Identified losses are reported in accordance with workplace procedures 3.3 Avoidable losses are identified and reasons are established, and appropriate solutions are recommended and implemented to prevent future avoidable losses
4 Process stock orders	4.1 Orders for stock are accurately processed in accordance with workplace procedures 4.2 Stock ordering and recording systems are accurately maintained 4.3 Purchase and supply agreements are correctly used and appropriate details recorded 4.4 Negotiated purchase and supply agreements are recorded accurately and filed for retrieval
5 Follow up orders	5.1 Delivery process is monitored to meet agreed deadlines 5.2 Appropriate liaison is undertaken with colleagues and suppliers to ensure continuity of supply 5.3 Routine supply problems are followed up or referred to the appropriate person in accordance with workplace policy 5.4 Stock is distributed in accordance with agreed allocations
6 Complete documentation	6.1 All required records and documentation are completed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant codes of practice and legislative requirements (for example dangerous goods regulations, health and hygiene regulations, etc.)
- Relevant OH&S and environmental procedures and regulations
- Principles of stock control
- Procedures for the ordering of stock
- Stock control documentation and systems used in workplace stores
- Interpretation of workplace specifications and orders for supplies
- Stock security systems
- Protocols and procedures for liaising with supplier representatives, drivers and colleagues using appropriate technology
- Systems for the completion of relevant records and documentation
- Problems that may occur when controlling and ordering stock and appropriate action that can be taken to resolve the problems
- Contacts and sources of information and documentation needed when controlling and ordering stock
- Site layout
- The purpose and procedures for the use of relevant personal protective equipment
- Customer service policies and procedures

Required skills:

- Communicate effectively with others when controlling and ordering stock
- Read and interpret instructions, procedures and labels relevant to the controlling and ordering of stock
- Complete documentation related to the controlling and ordering of stock
- Work collaboratively with others when controlling and ordering stock
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when controlling and ordering stock in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and

Required skills:

environments

- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Adapt to differences in stock and systems in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Select and use relevant communication and computing equipment when controlling and ordering stock

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

EVIDENCE GUIDE

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

This unit may apply to:

- any workplace store in an enterprise/organisation in a transport, distribution, production, hospitality, retail or other relevant industry sector (excluding work areas and organisations involving major and/or dedicated warehousing)

Suppliers may be:

- internal or external

Requirements for work may include:

- workplace protocols and procedures
- communications equipment
- workplace operations manuals
- relevant regulations, authorities and permits
- hours of operation
- relevant record keeping requirements
- workplace quality and customer service standards

Stock control and record systems may be:

- manual
- computerised

Stock may include but is not limited to:

- production materials
- packaging materials
- equipment and tools
- office and stationery supplies
- forms, brochures and documents
- vouchers and tickets
- merchandise for sale

RANGE STATEMENT

- Consultative processes may involve:
- linen
 - food and beverage supplies
 - suppliers, representatives and drivers
 - relevant authorities
 - other employees and supervisors
 - management
 - other professional or technical staff
- Communications systems may involve:
- telephone
 - fax
 - email
 - electronic data transfer of information
 - mail
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protective equipment may include but is not limited to:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Documentation/records may include:
- workplace protocols and procedures
 - workplace specifications for the stock concerned
 - relevant regulations
 - supplier instructions
 - operations manuals
 - documentation including order forms, standard letters, etc.
 - induction documentation
 - delivery options
 - relevant Australian and international standards, criteria and certification requirements
 - communications technology equipment, oral, aural or signed communications
 - quality assurance procedures
 - emergency procedures
 - relevant competency standards and training materials
- Applicable procedures and codes may include:
- relevant regulations and codes of practice for receipt and storage of stock concerned
 - Australian and international regulations and codes of practice for the handling and transport of dangerous goods

RANGE STATEMENT

and hazardous substances, including:

- Australian and International Dangerous Goods Codes
- Australian and International Explosives Codes
- Australian and international standards and certification requirements
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to regulate temperature controlled stock in accordance with workplace requirements including identifying goods requiring temperature control, monitoring temperature of goods, and identifying and rectifying any identified problems in accordance with workplace procedures. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the regulation of temperature controlled stock.

Work is performed under some supervision generally within a team environment. It involves the application of product knowledge and an understanding of relevant regulatory requirements to the regulation of temperature controlled stock in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify goods requiring temperature control	1.1 Goods requiring temperature control are identified 1.2 Temperature for short- term and long-term storage is selected to match product type 1.3 Upper and lower limits for temperature control are identified 1.4 Storage separations and co-storage applications are identified for products
2 Monitor temperature	2.1 Appropriate methods for determining temperature of goods are identified 2.2 Storage areas are monitored for temperatures within range for products 2.3 Products are monitored to ensure compliance with temperature storage requirements 2.4 Short-term storage times are identified for transit goods
3 Identify and rectify problems	3.1 Implications of incorrect temperature are identified 3.2 Damaged goods are identified and appropriate action is undertaken in accordance with enterprise procedures 3.3 Causes of out-of-temperature range are identified 3.4 Appropriate personnel are notified for problem rectification 3.5 Goods handling procedures for maintenance of temperature control are identified and implemented

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian codes and regulations relevant to the regulation of temperature controlled stock
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the regulation of temperature controlled stock
- Focus of operation of work systems, equipment, management and site operating systems for the regulation of temperature controlled stock
- Special handling, stacking and storage requirements for temperature controlled stock
- Procedures for pre-cooling and snap freezing
- Problems that can occur when regulating temperature controlled stock and appropriate action that can be taken

REQUIRED KNOWLEDGE AND SKILLS

- Hazards when regulating and working with temperature controlled stock and appropriate action to control the risks involved
- Documentation requirements including reports and records concerning damaged or contaminated goods
- Housekeeping standards procedures required in the workplace
- Site layout

Required skills:

- Communicate effectively with others when regulating temperature controlled stock
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the regulation of temperature controlled stock
- Complete documentation related to the regulation of temperature controlled stock
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when regulating temperature controlled stock
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions when regulating temperature controlled stock in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when regulating temperature controlled stock
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in stock and equipment in accordance with standard operating procedures
- Select and use relevant equipment, processes and procedures
- Check refrigeration equipment operation in terms of maintenance schedule and standard operating procedures
- Select and implement corrective actions to maintain temperature levels
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

- Critical aspects for assessment and evidence required to demonstrate competency in this unit**
- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement
- Context of and specific resources for assessment**
- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
 - Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted:
- in a range of work environments
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
 - short -term and/or long-term temperature controlled areas
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Procedures for pre-cooling and snap freezing may include:
- automated
 - spraying with liquid nitrogen
 - immersion in a very cold refrigerant
 - freezing in moving air at less than -30oC
 - plate freezer with very low refrigerant temperatures
- Hazards in the work area may include:
- contamination of, or from, materials being handled
 - noise, light, energy sources
 - service lines
 - spills, leakages, ruptures
 - cold pipes and chilling equipment
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
 - dust/vapours
 - oil, water or ice on floor
 - a fire or explosion
 - damaged packaging or pallets
 - debris on floor
 - faulty racking
 - poorly stacked pallets
 - faulty equipment
- Hazard management is consistent with:
- the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
- Requirements for work may include:
- site restrictions and procedures
 - use of safety and personal protective equipment
 - communications equipment
 - specialised lifting and/or handling equipment
 - incident/accident breakdown procedures

RANGE STATEMENT

- additional gear and equipment
 - noise restrictions
 - hours of operations
 - authorities and permits
- Communication in the work area may include:
- phone
 - electronic data interchange (EDI)
 - fax
 - email
 - internet
 - radio
 - RF systems
 - oral, aural or signed communications
- Consultative processes may involve:
- other employees and supervisors
 - suppliers, customers and clients
 - relevant authorities and institutions
 - management and union representatives
 - industrial relations and OH&S specialists
 - other maintenance, professional or technical staff
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protective equipment may include:
- gloves and protective clothing
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Information/documents may include:
- goods identification numbers and codes
 - manifests, picking slips, merchandise transfers, stock requisitions and bar codes
 - codes of practice and regulations relevant to the identification, handling and stacking of goods
 - operations manuals, job specifications and induction documentation
 - manufacturers specifications for equipment
 - workplace procedures and policies
 - supplier and/or client instructions
 - award, enterprise bargaining agreement, other industrial arrangements
 - relevant Australian standards and certification

RANGE STATEMENT

- Applicable regulations and legislation may include:
- requirements
 - quality assurance procedures
 - emergency procedures
 - relevant codes and regulations for the regulation of temperature controlled goods
 - relevant state/territory OH&S and environmental protection legislation
 - water and road use and licence arrangements
 - export/import/quarantine/bond requirements
 - workplace relations regulations
 - workers compensation regulations

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to check conveyor operational status in accordance with workplace requirements, including inspecting conveyor system and work area, checking equipment operational capability, and identifying and assessing faults and reporting results of inspection and testing in accordance with workplace procedures and relevant regulatory requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in accordance with codes/regulations and workplace requirements relevant to the checking and assessment of the operational capability of equipment.

Safety checks and equipment tests are performed under limited supervision.

Work involves the application of regulatory requirements and workplace procedures to the checking and assessment of the operational capability of equipment in the stevedoring, transport, warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Inspect conveyor system and work area	<p>1.1 The conveyor equipment is checked prior to start-up in accordance with workplace procedures, manufacturers safety checks and specifications to ensure it is free from damage and obstructions that may limit operational capability</p> <p>1.2 Work area is checked to ensure that it is safe and appropriate for the required task</p>
2 Check equipment operational capability	<p>2.1 Conveyors are inspected after start-up in accordance with manufacturers specifications and workplace inspection specifications and procedures</p> <p>2.2 Warning systems are checked for operational effectiveness</p> <p>2.3 Records are checked to determine maintenance history and requirements and goods carried</p>
3 Identify, assess faults and report results of inspection and testing	<p>3.1 Faults are identified and assessments made of the potential effect on the operation of the equipment for the required work, and details forwarded to relevant personnel in accordance with workplace procedures</p> <p>3.2 Accurate reporting of the results of the inspection and testing is kept in accordance with regulatory requirements, workplace policy and industry guidelines</p> <p>3.3 Clear reference is made to any items which may affect the future safety/operation of the equipment</p> <p>3.4 Conveyor system is continually monitored for safe and efficient operation</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to the checking and assessing of the operational capability of conveyor, including, where relevant, the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the checking and assessing of the operational capability of conveyor
- Focus of operation of work systems, equipment, management and site operating systems for the checking and assessing of the operational capability of conveyor

REQUIRED KNOWLEDGE AND SKILLS

- The purpose, characteristics, capabilities, requirements and limitations of the conveyor
- Conveyed materials' potential for toxicity, reactivity, material grade, type and purpose including information from relevant material data safety sheets and ADG Code documentation (where applicable)
- Function and principles of operation of belt cleaning systems
- Tools and equipment used during the checking and assessing of the operational capability of conveyor and the precautions and procedures that should be followed in their use
- Problems that may occur when checking and assessing the operational capability of conveyor and appropriate action that can be taken to resolve the problems
- Operational safety requirements for the conveyor concerned
- Documentation and record requirements
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when checking and assessing the operational capability of a conveyor
- Read and interpret instructions, procedures, information and labels relevant to the checking and assessment of the operational status of a conveyor
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the checking and assessment of the operational status of a conveyor
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when checking and assessing the operational capability of a conveyor
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may be identified when checking and assessing the operational capability of a conveyor in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures

Required skills:

- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of conveyor equipment
- Service conveyor equipment in terms of maintenance schedule and standard operating procedures

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

EVIDENCE GUIDE

- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|---|---|
| Work may be conducted: | <ul style="list-style-type: none"> • in a range of work environments • by day or night |
| Customers may be: | <ul style="list-style-type: none"> • internal or external |
| Workplaces may comprise: | <ul style="list-style-type: none"> • large, medium or small worksites |
| Work may be conducted in: | <ul style="list-style-type: none"> • limited or restricted spaces • exposed conditions • controlled or open environments |
| Purposes of conveyor checks/inspections are: | <ul style="list-style-type: none"> • to ensure that the conveyor and its safety devices and warning systems are operational, are in accordance with specifications, and are free from faults that may prejudice safety or limit operational capability |
| Conveyor may be enclosed or exposed, above or underground. Conveyor belt construction and materials may vary. Types of conveyors may include: | <ul style="list-style-type: none"> • buckets • rollers • air slides • drag chains • gravity systems |
| Aspects of conveyor equipment covered by workplace inspection specifications and procedures may include but is not limited to: | <ul style="list-style-type: none"> • belt surface and edges • frame • idlers • motive power source • tensions • tracking • speed • guides |
| Checks may include but are not | <ul style="list-style-type: none"> • visual checks in accordance with manufacturers |

RANGE STATEMENT

limited to:

instructions

- monitoring of operational performance
- service checks in accordance with manufacturers instructions
- tests and checks of safety devices and warning indicators in accordance with workplace and regulatory requirements
- checks on adjustments against specifications
- checks of readings on gauges and monitors against specifications

Records/results of checks may include:

- details of out-of-performance indications
- details of faulty equipment or specific components
- details of action taken
- results of checks/tests
- details of repair and maintenance work to be undertaken

Requirements for work may include:

- site restrictions and procedures
- use of safety and personal protective equipment
- communications equipment
- specialised lifting and/or handling equipment
- incident breakdown procedures
- additional gear and equipment
- noise restrictions
- hours of operations
- authorities and permits

Hazards in the work area may include exposure to:

- chemicals and fumes
- dangerous or hazardous substances
- stationary and moving machinery, goods, materials and vehicular traffic
- contamination of, or from, materials being handled
- a fire or explosion
- service lines
- spills, leakages and ruptures
- dust/vapours
- faulty equipment/tools

Consultative processes may involve:

- workplace personnel
- supervisors and managers
- equipment manufacturers
- site visitors
- contractors
- official representatives

Dependent of the type of

- company procedures

RANGE STATEMENT

organisation concerned and the local terminology used, workplace procedures may include:

- enterprise procedures
- organisational procedures

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- respirators and fume masks
- protective clothing
- high visibility clothing

Communication in the work area may include:

- phone
- fax
- email
- internet
- RF communications
- barcode readers
- oral, aural or signed communications

Information/documents may include:

- workplace procedures and policies for the checking and assessment of the equipment concerned
- manufacturers specifications for equipment/tools
- equipment identification labels, barcodes and serial numbers
- supplier and/or client instructions
- relevant OH&S requirements and policies
- relevant Australian standards and certification requirements
- material safety data sheets where applicable
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- relevant legislation, regulations and related documentation including the ADG Code
- award, enterprise bargaining agreement and other industrial arrangements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- relevant codes and regulations pertaining to the checking and operation of the conveyor system concerned including the ADG Code where applicable
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- relevant Australian standards and certification

RANGE STATEMENT

requirements

- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements

Competency Field

B - Equipment Checking and Maintenance

TLIC2041A Operate self-propelled equipment on track

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate self-propelled equipment on track in accordance with safeworking and regulatory requirements and workplace procedures. It includes performing pre-operational and post-operational checks, operation of the equipment, and the completion of required documentation. It encompasses the operation of all self-propelled equipment, on track including road/rail equipment operated in rail mode. Licensing or certification requirements may be applicable to this unit.

Application of the Unit

Application of the Unit

Persons achieving competence in this unit will need to fulfil the applicable legislated rail safety requirements including acts and regulations from each state and territory together with any nationally approved compliance codes and/or guidelines.

Work is performed with some supervision, generally within a team environment. It involves the application of routine operational principles and procedures to operate self-propelled equipment on track as part of workplace activities across a variety of operational contexts within the Australian rail system.

Operators of self-propelled equipment on track may need to have fulfilled licence or certification requirements for the type of equipment being used.

Licensing/Regulatory Information

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Perform pre-operational equipment checks	1.1 Basic pre-operational equipment checks are conducted as per manufacturers specifications or local maintenance schedules 1.2 Service books are checked and completed accurately as required 1.3 Deficiencies with equipment are identified and rectified in accordance with workplace procedures 1.4 Relevant persons are notified of problems and/or documentation completed
2 Operate equipment	2.1 Equipment is placed on track and removed from track where applicable 2.2 Equipment is driven on track 2.3 Equipment is set up for work and prepared for travel after work 2.4 Equipment is operated in a safe and efficient manner in accordance with manufacturers instructions and workplace procedures 2.5 Equipment is operated with due regard for prevailing operating conditions to ensure safe working conditions and minimise potential accidents 2.6 Equipment is operated to achieve the outcome and quality of work in accordance with the workplace standards and procedures 2.7 Warning systems are monitored and responded to appropriately during operation to maintain correct functionality of equipment 2.8 Equipment is left stored in appropriate manner and location to ensure security and protection of equipment
3 Perform post-operational equipment procedures	3.1 Post-operational equipment checks are conducted as per manufacturers specifications or local maintenance schedules to identify defects and maintenance requirements 3.2 Deficiencies with equipment are identified and rectified in an appropriate manner to maintain correct functionality of equipment 3.3 Relevant persons are notified of problems and/or documentation is completed in accordance with instructions and the relevant codes of practice
4 Complete documentation	4.1 Service books are checked and completed accurately 4.2 Required documentation is completed in a timely, accurate and complete manner in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant safety, OH&S and environmental procedures and regulations
- Servicing schedules and procedures for pre- and post-operational checks of self-propelled equipment
- Equipment and materials for use when conducting pre- and post-operational checks of self-propelled equipment
- Components of self-propelled equipment and their applications
- Workplace procedures for the operation of self-propelled equipment
- Problems that may occur during the operation of self-propelled equipment, and action that can be taken to report or resolve the problems
- Setting up requirements in preparation for work
- Hazards that may exist when setting up and operating self-propelled equipment on track, and ways of controlling the risks involved
- Types of self-propelled equipment and their applications
- Technical specifications and manuals
- Impact of machine operation on track condition and geometry
- Defects that can occur in self-propelled equipment, and related action that should be taken
- Emergency procedures
- Local authority procedures

Required skills:

- Communicate effectively with others when operating self-propelled equipment on track
- Read and interpret instructions, procedures, information and signs relevant to the operation of self-propelled equipment on track
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating self-propelled equipment on track
- Promptly report and/or rectify any identified problems, faults or malfunctions when operating self-propelled equipment on track in accordance with regulatory requirements and workplace procedures
- Plan and organise work
- Implement contingency plans for unexpected events when operating self-propelled equipment on track
- Apply precautions and required action to minimise, control or eliminate hazards that may exist

Required skills:

during work activities

- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment
- Identify, select and use tools and equipment
- Drive self-propelled equipment on track (for which certificated and/or licensed)

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement
- Assessment must include exercises which demonstrate competent performance of the following in a range of situations:
 - performing pre- and post-operational equipment checks
 - operating self-propelled equipment on track in travel and work mode

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or

EVIDENCE GUIDE

- access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Operations may be conducted:
- by day or night
 - in all weather conditions
- Work may be conducted in:
- exposed conditions
 - controlled or open environments
- Work may involve:
- exposure to chemicals, and dangerous or hazardous substances
 - movements of equipment, materials and vehicles
- Equipment may include:
- basic mechanical/hydraulic self-propelled equipment, including:
 - jacks
 - borers
 - pullers
 - (rail-mounted) lubricators
 - winches

RANGE STATEMENT

- tampers
 - rail adjusters
 - ballast scarifiers
 - equipment with multiple functions, including: ballast regulators, cranes, sleeper renewer, gantry, sleeper laying frame, disposal and distribution wagons
 - complex self-propelled equipment, including:
 - tamper liners
 - track laying machines
 - rail-mounted lubrication vehicles
 - rail planers
 - rail grinders
 - undercutters
 - ballast cleaning machines
 - ballast screening and collection units
 - track geometry recording and detection cars
 - internal or external personnel from other work areas
- Liaison may include:
- two-way radios
- Communication equipment/systems may include:
- radio headsets
 - telephones/mobile phones
 - agreed audible or hand signal
- Information may be provided:
- electronically
 - in writing, via forms/documents
 - orally, via face-to-face communications
- Safety and personal protective equipment may include:
- high visibility clothing
 - hearing protection
 - gloves
 - sunscreen
 - sunglasses
 - safety glasses
 - insect repellent
 - safety headwear
 - safety footwear
 - portable radios/mobile phones
 - hand lamps
 - flags
 - safety devices
- Depending on the type of organisation concerned and the
- company procedures
 - enterprise procedures

RANGE STATEMENT

local terminology used, workplace procedures may include:

- organisational procedures
- established procedures

Information/documents may include:

- operational instructions, policies and workplace procedures
- relevant log or record book
- maintenance notices, records and requests
- local authority regulations and procedures
- technical instructions
- manufacturers or workplace equipment operation manuals
- emergency procedure manuals
- two-way radio/mobile phone operation procedures
- information provided by other workplace personnel
- work orders
- QA plans, data and document control
- conditions of service, legislation and industrial agreements including workplace agreements and awards
- legislated rail safety requirements including acts and regulations from each applicable state and territory together with any nationally approved compliance codes and/or guidelines
- relevant Australian Standards and related requirements
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation

Applicable procedures and codes may include:

TLID1001A Shift materials safely using manual handling methods

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to shift loads using manual handling methods, including assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the manual handling and movement of loads.

Work is performed under some supervision generally within a team environment.

Work involves the application of the basic principles for the safe manual handling techniques and movement of loads when shifting materials using manual handling methods as part of day-to-day work.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Assess risks associated with the relocation of the load	<ul style="list-style-type: none">1.1 Products, goods or materials to be relocated are identified and assessed for the appropriate method of relocation1.2 Locations for storage are determined and potential routes to be followed are identified1.3 Effect of load relocation on original load base is predicted1.4 Points of balance are estimated1.5 Required clearances are compared to available space and adjustments are made1.6 Effects of moving contents which may be loose, liquid, dangerous or hazardous are considered1.7 Potential risks in route(s) which may be followed are considered1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified1.10 Team lifting processes are considered for application1.11 Appropriate personal protective equipment is worn1.12 Size to weight ratio of items to be manually handled are identified
2 Plan load relocation	<ul style="list-style-type: none">2.1 Relocation of the load is planned consistent with the code of practice for manual handling2.2 Process for relocating load is proposed including predicting and planning for potential difficulties2.3 Proposed process is checked against code of practice and workplace procedures for compliance
3 Relocate load	<ul style="list-style-type: none">3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and OH&S requirements3.2 Applications appropriate for team relocation of load are identified3.3 Team lifting tasks are coordinated3.4 Planned process and route are followed3.5 Relocated materials are set down without damage to goods, personnel or equipment and checked for stability3.6 Relocation is checked to see that it meets work requirements, with any variance(s) reported

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant OH&S procedures and guidelines concerning the manual lifting and movement of loads
- Risks when manually lifting and handling materials and goods and related precautions to control the risk, including: the load on the spine during lifting; controlled actions on a movement during lifting; rotation and side movement of the spine during lifting; postures and positions during lifting; work layout; the type, weight and position of the load; frequency of shifting operations; distance over which load is to be shifted; and time allowed for the shifting of the load
- Workplace procedures and policies for manual handling
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when manually lifting and handling materials and goods
- Read and interpret instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- Interpret and follow operational instructions and prioritise work
- Work collaboratively with others when manually lifting and handling materials and goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when manually lifting and handling materials and goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected situations that may occur when manually lifting and handling materials and goods
- Apply precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in loads and materials in accordance with standard operating

Required skills:

procedures

- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - applying the underpinning knowledge and skills
 - interpreting manual handling risks
 - using correct manual handling practices
 - applying relevant legislation and workplace procedures

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- As a minimum, assessment of knowledge must be conducted through appropriate assessments using written/practical/oral assessments
- Practical assessment must occur:
 - through activities in an appropriately simulated

EVIDENCE GUIDE

- environment, and/or
- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

ELEMENT	PERFORMANCE CRITERIA
1 Assess risks associated with the relocation of the load	<ul style="list-style-type: none">1.1 Products, goods or materials to be relocated are identified and assessed for the appropriate method of relocation1.2 Location for storage is determined1.3 Routes to be followed are identified1.4 Points of balance are estimated1.5 Effect of moving contents which may be loose, liquid, dangerous or hazardous are considered1.6 Potential risks in route(s) which may be followed are considered1.7 Lifting equipment to minimise potential risks is identified1.8 Appropriate personal protective equipment is worn1.9 Tools, load shifting equipment and other materials are selected, checked for serviceability and any defects are reported to the supervisor
2 Plan load relocation	<ul style="list-style-type: none">2.1 Load is examined to determine condition, length, bulk, weight2.2 Load shifting equipment is selected in accordance with workplace procedures2.3 Safe procedures for using lifting equipment are identified, including the calculation of Safe Working Load (SWL) and/or Working Load Limit (WLL) for weight of goods to be moved2.4 Process for relocating load is proposed including predicting and planning for potential difficulties2.5 Proposed process is checked against relevant code of practice and workplace procedures for compliance2.6 Lifting equipment and accessories are checked for safe operation in accordance with manufacturers instructions and workplace procedures2.7 Personal protective equipment is selected and worn in accordance with OH&S requirements
3 Relocate load	<ul style="list-style-type: none">3.1 Any unsafe equipment is reported to appropriate personnel in accordance with workplace procedures3.2 Load is broken down, where applicable, to allow handling and moving a number of single items to ensure the maximum weight of 500 kg is not exceeded3.3 Mechanical aids and field machines are constructed, when required, by the approved shifting method, so that the load can be shifted in accordance with job instructions3.4 Safe working limits for lifting equipment are identified and maintained3.5 Planned process and route are followed using equipment within necessary range of limitations

ELEMENT	PERFORMANCE CRITERIA
	3.6 Relocated materials are set down without damage to goods, personnel or equipment and checked for stability
	3.7 Relocation is checked to see that it meets work requirements, and any variances are reported
4 Refurbish equipment and worksite	4.1 Site is cleaned and cleared of debris and unwanted material
	4.2 Field machines, tools and equipment are cleaned, inspected, serviced, maintained and stored in accordance with standard procedures
	4.3 Documentation is completed in accordance with standard procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant OH&S procedures and guidelines concerning the use of manually-operated equipment to shift loads
- Risks when using manually-operated equipment to shift loads, and related precautions to control the risk
- Workplace procedures and policies for the shifting of goods and materials using manually-operated equipment
- Problems that may arise when using manually-operated equipment to shift loads, and actions that should be taken to prevent or solve them
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles
- Relevant knots and lashings to use
- Method for splicing and maintaining cordage and SWR
- Relevant slings and securing devices to use

Required skills:

- Communicate effectively with others when using manually-operated equipment to shift loads
- Read and interpret instructions, procedures, information and signs relevant to the shifting of loads using manually-operated equipment
- Interpret and follow operational instructions and prioritise work

Required skills:

- Complete documentation related to work activities
- Work collaboratively with others when using manually-operated equipment to shift loads
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when using manually-operated equipment to shift loads in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the shifting of loads using manually-operated equipment
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - applying the underpinning knowledge and skills
 - identifying load limits for lifting
 - relocating a load safely
 - identifying manual operating equipment and their capabilities
 - identifying faults and deficiencies and taking action to rectify problems

Context of and specific resources

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts

EVIDENCE GUIDE

for assessment

- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- As a minimum, assessment of knowledge must be conducted through appropriate assessments using written/practical/oral assessments
- Practical assessment must occur:
 - through activities in an appropriately simulated environment, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The shifting operations may be conducted:

- in a range of work environments
- by day or night
- under all weather conditions
- in a range of terrain, soil, vegetation
- internal or external

Customers may be:

- large, medium or small worksites

Workplaces may comprise:

- restricted spaces
- exposed conditions
- controlled or open environments

Work may be conducted in:

- goods
- equipment and tools

Materials to be shifted may

RANGE STATEMENT

include:

- cleaning materials
- components and parts of vehicles and equipment such as tyres, batteries, lifting gear, etc.
- materials used in the course of work such as drums of fuel, raw materials, packaging, etc.

Loads to be shifted may be:

- irregularly shaped
- packaged or unpackaged
- labelled or unlabelled
- palleted or unpalleted

Hazards in the work area may include exposure to:

- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials

Personnel in the work area may include:

- workplace personnel
- site visitors
- contractors
- official representatives

Manually-operated equipment may include:

- pallet jack
- hand trolley
- electric manual handling equipment
- straps
- slings
- chain blocks
- gins
- derricks
- incline planes
- chain blocks
- sheers

Communication in the work area may include:

- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- radio
- oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment

- gloves
- safety headwear and footwear

RANGE STATEMENT

may include:

- safety glasses
- two-way radios
- high visibility clothing

Measuring aids and field machines may include:

- mechanical strapping equipment
- gins, sheers, and derricks
- block and tackle, pulleys
- hand operated winches
- jacks
- improvised methods such as Spanish windlass and par buckles
- use of expedient materials such as materials obtained on the job from resources available in the local environment

Information/documents may include:

- goods identification numbers and codes
- manifests, bar codes, goods and container identification
- manufacturers instructions concerning the use and servicing of manually-operated load shifting equipment
- workplace procedures and policies
- supplier and/or client instructions
- material safety data sheets
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- relevant legislation, regulations and related documentation
- award, enterprise bargaining agreement, other industrial arrangements
- standards and certification requirements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- workplace relations regulations
- workers compensation regulations
- licence, patent or copyright arrangements
- dangerous goods and air freight regulations
- export/import/quarantine/bond requirements
- marine orders

Competency Field

Competency Field D - Load Handling

TLID2003A Handle dangerous goods/hazardous substances

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to handle dangerous goods and hazardous substances, including identifying requirements for working with dangerous goods and/or hazardous substances; confirming site incident procedures; and selecting handling techniques. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

This unit covers anyone working in the transport, warehousing, distribution and storage industries who may handle dangerous goods and/or hazardous substances.

Work must be carried out in compliance with the relevant OH&S regulations concerning the safe handling of dangerous goods and hazardous substances.

Work is performed under general supervision. It involves the application of the codes of practice and established procedures for the safe handling of dangerous goods and hazardous substances.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify requirements for working with dangerous goods and/or hazardous substances	<p>1.1 Dangerous goods and/or hazardous substances are identified from information including class labels, manifests and other documentation</p> <p>1.2 Storage requirements for hazardous substances and/or dangerous goods are identified and applied</p> <p>1.3 Legislative requirements for hazardous substances and/or dangerous goods are known and used to plan work activities</p> <p>1.4 Handling procedures for different classes and characteristics of goods are observed</p> <p>1.5 Confirmation is sought from relevant personnel where dangerous goods or hazardous materials do not appear to be appropriately marked</p>
2 Confirm site incident procedures	<p>2.1 Incident reporting processes are identified</p> <p>2.2 Emergency equipment is located and checked according to workplace procedures and statutory regulations</p> <p>2.3 Emergency procedures are identified and confirmed</p>
3 Select handling techniques	<p>3.1 Load handling and shifting procedures are selected in accordance with identified requirements for particular goods</p> <p>3.2 Handling equipment is checked for conformity with workplace requirements and manufacturers guidelines</p> <p>3.3 Where relevant, suitable signage is checked for compliance with workplace procedures</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- All relevant regulations and codes concerning the handling of dangerous goods and hazardous substances
- Application of relevant aspects of current Australian Dangerous Goods Code and relevant Australian Standards
- Permit and licence requirements
- Workplace procedures for handling and storing dangerous goods/hazardous substances
- Problems that may arise during the handling of dangerous goods and hazardous substances and actions that should be taken to prevent or solve them

REQUIRED KNOWLEDGE AND SKILLS

- Risks when handling dangerous goods and hazardous substances and related precautions to control the risk
- Equipment applications, capacities, configurations, safety hazards and control mechanisms
- Housekeeping standards procedures required in the workplace

Required skills:

- Communicate effectively with others when handling dangerous goods and hazardous substances
- Read and interpret instructions, procedures, regulations, information and signs relevant to the handling of dangerous goods and hazardous substances
- Identify containers and goods coding, markings and, where applicable, emergency information panels for the mode of transport storage selected
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when handling dangerous goods and hazardous substances
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when handling dangerous goods and hazardous substances in accordance with regulatory requirements and workplace procedures
- Plan own work including predicting consequences and identifying improvements
- Implement contingency plans for unanticipated situations that may arise when handling dangerous goods and hazardous substances
- Recognise hazards and apply precautions and required action to minimise, control or eliminate hazards that may exist during the handling of dangerous goods and hazardous substances
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of :
 - identifying dangerous goods/hazardous substances (from labels, IMDG markings, HAZCHEM signs and other relevant identification criteria)
 - identifying and selecting the safely requirements for handling dangerous goods/hazardous substances
 - maintaining workplace records and documentation
 - determining (any) required permits
 - identifying job and site hazards and planning work to minimise risks
 - selecting appropriate equipment and work systems including personal protection equipment
 - estimating weight and dimensions of load and any special requirements
 - identifying and assessing handling and storage precautions and requirements for dangerous goods/hazardous substances

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation

EVIDENCE GUIDE

- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The dangerous goods may be handled in a range of work environments by day or night and may be:

- for short-term storage
- for long-term storage
- in transit

Customers may be:

- internal or external

Workplace environment may include:

- movement of equipment
- movement of goods
- materials and vehicular traffic
- site restrictions and procedures
- use of safety and personal protective equipment
- communications equipment
- specialised lifting and/or handling equipment
- incident breakdown procedures
- authorities and permits
- hours of operations
- noise restrictions
- additional gear and equipment
- segmentation procedures
- emergency procedures, including response to spillage/leaks, evacuation and firefighting

Hazards may include:

- hazardous or dangerous materials
- contamination of, or from, materials being handled
- noise, light, energy sources
- stationary and moving machinery, parts or components

RANGE STATEMENT

- service lines
 - spills, leakages, ruptures
 - fire or ignition
 - dust/vapours
- Hazard management is:
- consistent with the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
- Consultative processes may involve:
- other employees and supervisors
 - suppliers, potential customers and existing clients
 - representatives of regulatory authorities with jurisdiction over OH&S, dangerous goods and hazardous substances
 - management and union representatives
 - industrial relations and OH&S specialists
 - other maintenance, professional or technical staff
- Personnel in the work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Identification of goods may be from:
- material safety data sheets
 - packaging labels
 - manifests
 - stock lists
 - HAZCHEM interpretative advice
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - mask and respirator
 - protective clothing
 - breathing apparatus
- Information/documents may include:
- goods identification numbers and codes
 - manifests, stock lists, packaging labels, bar codes, stock lists
 - goods and container identification
 - workplace procedures and policies concerning the handling of dangerous goods and hazardous substances

RANGE STATEMENT

Applicable regulations and legislation may include:

- supplier and/or client instructions
- material safety data sheets (MSDS)
- current Australian Dangerous Goods Code
- HAZCHEM interpretative advice
- relevant legislation, codes, regulations and related documentation concerning the handling of dangerous goods and hazardous substances
- award, enterprise bargaining agreement, other industrial arrangements
- standards and certification requirements
- quality assurance procedures
- emergency procedures pertaining to dangerous goods and hazardous substances
- relevant Australian and state/territory regulations relating to the handling of dangerous goods and hazardous substances
- current Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian Marine Orders and the International Maritime Dangerous Goods Code
 - IATA Dangerous Goods by Air regulations
 - Australian and International Explosives Codes
- all relevant Australian Standards
- relevant state/territory OH&S legislation
- workplace relations regulations
- equal employment opportunity and affirmative action legislation
- equal opportunity legislation
- relevant state/territory environmental protection legislation

D - Load Handling

TLID2004A Load and unload goods/cargo

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to load and unload goods and cargo, including loading and unloading goods, securing and protecting the load and completing all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations/permit requirements including those of the relevant state/territory roads and traffic authority concerning the loading of goods/cargo.

Work is performed under some supervision generally within a team environment. It involves the application of the basic principles, routine procedures and regulatory/permit requirements to the loading and unloading of goods/cargo.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Load and unload goods/cargo	<p>1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading procedures</p> <p>1.2 Dangerous or hazardous goods are identified and handled in accordance with the Australian Dangerous Goods (ADG) Code and other relevant regulations/permit requirements</p> <p>1.3 Load is packed/unpacked to make safe and effective use of available spaces</p> <p>1.4 Goods/cargo are loaded in accordance with relevant mass and loading regulations and workplace procedures</p> <p>1.5 Lifting aids and appliances are selected and used to aid loading procedures in compliance with workplace procedures and safety legislation</p> <p>1.6 Unloading activities are conducted in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and the balance of the remaining load</p> <p>1.7 Goods requiring special handling and/or documentation are identified and appropriate procedures followed</p> <p>1.8 Relocated material is restacked appropriate for the transport method, safe height, weight loading, size and crushability of the goods</p>
2 Secure and protect load	<p>2.1 The distribution of the load is checked to ensure that it is even, legal and within safe working capacity</p> <p>2.2 Load is checked to ensure that dangerous goods and hazardous substances are appropriately segregated in accordance with the ADG Code</p> <p>2.3 Load is secured using the correct load restraint and protection equipment for different loads, carrying and storage conditions</p> <p>2.4 The load is protected in accordance with legal and workplace safety requirements</p>
3 Complete documentation	<p>3.1 The load is inspected and checked for security to travel in accordance with relevant regulations/permit requirements and the ADG Code where applicable</p> <p>3.2 All required documentation for the goods is completed in accordance with workplace requirements including the ADG Code where applicable</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant Australian standards and regulations including state/territory mass and loading regulations
- National Load Restraint Guide
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- OH&S procedures and guidelines concerning the lifting and movement of loads
- Risks when loading and unloading goods/cargo and related precautions to control the risk
- Security awareness requirements when loading and unloading vehicles and in particular the recognition, isolation and reporting of suspicious cargo and goods
- Workplace procedures and policies for the loading and unloading of goods/cargo
- Housekeeping standards procedures required in the workplace
- Methods of securing a load
- Site layout and obstacles
- Problems that may arise when loading and unloading goods and cargo and actions that should be taken to prevent or solve them

Required skills:

- Communicate effectively with others when loading and unloading goods and cargo
- Read and interpret instructions, procedures, information, signs and labels relevant to the loading and unloading of goods and cargo
- Identify containers and goods coding, ADG and IMDG markings and, where applicable, emergency information panels and take appropriate action
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the loading and unloading of goods and cargo
- Operate electronic communication equipment to required protocol
- Estimate the size, shape and special requirements of loads and take appropriate action
- Work collaboratively with others when loading and unloading goods and cargo
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when loading and unloading goods and cargo in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected situations that may occur when loading and unloading goods and cargo
- Apply precautions and required action to minimise, control or eliminate hazards that may exist

Required skills:

- during the loading and unloading of goods and cargo
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in cargo and equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and

EVIDENCE GUIDE

- operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Operations may be conducted:
- in a range of work environments
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Goods/cargo to be loaded or unloaded may:
- require special precautions
- Loads to be shifted may be:
- irregularly shaped
 - packaged or unpackaged
 - labelled or unlabelled
 - palletted or unpalletted
- Hazards in the work area may include exposure to:
- chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
- Personnel in the work area may include:
- workplace personnel
 - site visitors
 - contractors

RANGE STATEMENT

- Communication in the work area may include:
- official representatives
 - phone
 - electronic data interchange
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Loading operations may be carried out:
- manually
 - with the aid of lifting equipment and/or appliances
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Information/documents may include:
- goods identification numbers and codes, including ADG and IMDG markings and HAZCHEM signs
 - manifests, bar codes, goods and container identification
 - manufacturers specifications for equipment/tools
 - workplace procedures and policies for the loading and unloading of goods/cargo
 - ADG Code and associated regulations
 - supplier and/or client instructions
 - material safety data sheets
 - EPGs and Initial Response Guide (HB76:1998 or equivalent)
 - codes of practice including the National Standards for Manual Handling and the Industry Safety Code
 - award, enterprise bargaining agreement, other industrial arrangements
 - relevant Australian standards and certification requirements
 - quality assurance procedures
 - emergency procedures
 - Load Restraint Guide
- Applicable regulations and
- relevant Australian standards and regulations including

RANGE STATEMENT

legislation may include

- state/territory mass and loading regulations
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian Marine Orders and the International Maritime Dangerous Goods Code
 - IATA Dangerous Goods by Air regulations
 - Australian and International Explosives Codes
 - relevant state/territory environmental protection legislation
 - relevant state/territory OH&S legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate a forklift, including checking forklift condition, driving the forklift to fulfil operational requirements, monitoring site conditions, and monitoring and maintaining forklift performance. Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory OH&S authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Operation of a forklift must be carried out in compliance with the licence requirements and regulations of the relevant state/territory authority.

Operation of a forklift is performed under some supervision, generally within a team environment. It involves the application of routine equipment operation principles and procedures to maintain the safety and operation of a forklift in a variety of operational contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Check forklift condition	1.1 Condition of forklift is checked for compliance with OH&S and workplace requirements for warning devices, manufacturers specifications and the nature of the load shifting task 1.2 Attachments are checked to ensure appropriate adjustment and operation 1.3 Mirrors and seats are adjusted for safe operation by the driver 1.4 Log books are checked and appropriate workplace documentation is completed in accordance with workplace requirements
2 Drive the forklift	2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturers instructions 2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage 2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques 2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning 2.5 The forklift is parked, shut down and secured in accordance with manufacturers specifications, regulations and workplace procedures
3 Operate a forklift to handle loads	3.1 The lifting task to be undertaken is appropriately planned and the correct lifting truck and attachments are selected 3.2 The load is lifted, carried, lowered and set down in accordance with OH&S legislation, manufacturers specifications and company procedures
4 Monitor site conditions	4.1 When selecting the most efficient route, hazards and traffic flow are identified and appropriate adjustments are made 4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs
5 Monitor and maintain forklift performance	5.1 Performance and efficiency of vehicle operation is monitored during use 5.2 Defective/irregular performance and malfunctions reported to relevant personnel 5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant duty of care requirements pertaining to the operation of a forklift
- Relevant OH&S and environmental procedures and regulations
- Workplace operating procedures
- Forklift controls, instruments and indicators and their use
- Forklift handling procedures
- Procedures to be followed in the event of an operational emergency
- Engine power management and safe operating strategies
- Efficient driving techniques
- Operating hazards and related defensive driving and hazard control techniques
- Pre-operational checks carried out on forklift and related action
- Principles of stress management when driving a forklift
- Site layout and obstacles

Required skills:

- Communicate effectively with others when operating a forklift
- Read and interpret instructions, procedures, information and signs relevant to the operation of a forklift
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the operation of a forklift
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating a forklift
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when operating a forklift
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of a forklift
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques

Required skills:

- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Identify points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- Monitor performance of forklift and its equipment and take appropriate action where required
- Ensure that a forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and

EVIDENCE GUIDE

- Method of assessment**
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
 - Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Types of forklift may include:
- counterbalance trucks
 - reach trucks
 - pallet trucks
- Operations may be carried out in typical forklift operational situations, including:
- operations conducted at day or night
 - typical weather conditions
 - on the open road
 - on a private road or worksite
 - while at a workplace
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Loads to be shifted may require:
- special precautions
- Loads to be shifted may be:
- irregularly shaped
 - packaged or unpackaged
 - labelled or unlabelled
 - palletted or unpalletted

RANGE STATEMENT

Hazards in the work area may include exposure to:

- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials

Personnel in the work area may include:

- workplace personnel
- site visitors
- contractors
- official representatives

Forklift handling procedures may include:

- starting a forklift
- steering and manoeuvring a forklift
- accelerating and braking
- positioning and stopping a forklift
- reversing a forklift
- operating forklift controls, instruments and indicators
- using defensive driving techniques
- managing engine performance

Pre-operational checks may include:

- visual check of forklift
- checking and topping up of fluid levels
- checks of tyres
- checks of operation of forklift lights and indicators
- checks of brakes

Hazards may include (examples only):

- wet and iced operating surfaces
- oil on operating surface
- faulty brakes
- workplace obstacles and other operational equipment and vehicles
- damaged loads and pallets
- other personnel in work area

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protection equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Information/documents may include:

- goods identification numbers and codes, including IMDG markings and HAZCHEM signs
- manifests, bar codes, picking slips, merchandise transfers, stock requisitions, goods and container identification

RANGE STATEMENT

- Australian Standard 2359 - Industrial Truck Code
 - manufacturers specifications for forklift and associated equipment
 - operations and service record book or log
 - workplace procedures and policies for the operation of forklifts
 - supplier and/or client instructions
 - ADG Code and material safety data sheets
 - regulatory requirements concerning the use of forklifts
 - award, enterprise bargaining agreement, other industrial arrangements
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
 - relevant state/territory regulations pertaining to the operation of forklifts
 - relevant codes and standards, including Australian Standard 2359 - Industrial Truck Code
 - relevant state/territory OH&S legislation
 - relevant state/territory fatigue management regulations
 - relevant state/territory environmental protection legislation
- Applicable procedures and codes may include:

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to conduct weighbridge operations in accordance with regulatory requirements and workplace procedures, including setting up for weighbridge operations, weighing loaded vehicles, weighing unloaded vehicles, finalising weighbridge operations, and completing required records and documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in accordance with regulations and workplace requirements relevant to weighbridge operations.

Work is performed under some supervision, generally within a team environment.

Work involves the application of regulatory requirements and workplace procedures when conducting weighbridge operations in the transport, warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Set up for weighbridge operations	1.1 Weighbridge systems, including equipment, computer and recording arrangements are checked for operational status 1.2 Tests to confirm accuracy of weighbridge operation and related functions are conducted in accordance with workplace procedures, manufacturers instructions and relevant legislation 1.3 Accurate reporting of the results of the inspection and testing is kept in accordance with statutory requirements, workplace policy and industry guidelines 1.4 Faults/discrepancies in weighbridge operation are identified and action is undertaken in accordance with workplace procedures
2 Weigh loaded vehicles	2.1 Vehicles likely to exceed weighbridge weight limit are turned away 2.2 Vehicles are directed onto platform to obtain accurate weight 2.3 Weight of loaded stationary vehicle is registered against vehicle and load identification 2.4 Vehicle and load information is entered into workplace recording system and driver is issued with receipt and/or statement 2.5 Areas of dispute are resolved or forwarded for further action undertaken in accordance with workplace procedures
3 Weigh unloaded vehicles	3.1 Vehicles are directed onto platform to obtain accurate weight 3.2 Weight of unloaded stationary vehicle is registered against vehicle 3.3 Proposed load weight is assessed for conformance to statutory requirements 3.4 Where appropriate, loading operations are commenced in accordance with legal loading weight, customer requirements and workplace procedures with vehicle re-weighed to establish final load weight 3.5 Vehicle and load information is entered into workplace recording system and invoice is issued to driver where appropriate 3.6 Driver signatures on weighbridge documents, invoices or receipts are obtained in accordance with statutory and workplace requirements 3.7 Areas of dispute are resolved or forwarded for further action to be undertaken in accordance with workplace procedures
4 Complete weighbridge operations	4.1 Weighbridge systems, including equipment, computer and recording arrangements are secured or made ready for next shift 4.2 Record of operations is maintained and filed in accordance with

ELEMENT**PERFORMANCE CRITERIA**

workplace procedures and statutory requirements

Required Skills and Knowledge**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to the conduct of weighbridge operations including Australian Dangerous Goods Code where applicable
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the conduct of weighbridge operations
- Problems that may occur when conducting weighbridge operations and appropriate action that can be taken to resolve the problems
- Equipment applications, capacities, configurations, safety hazards and control mechanisms
- Records and documentation requirements for weighbridge operations
- Classification procedures
- Despatch procedures
- Calculation method and approaches for both metric and imperial systems
- Correct weighing procedures including statutory and workplace requirements
- Emergency response procedures
- Site layout

Required skills:

- Communicate effectively with others when conducting weighbridge operations
- Read and interpret instructions, procedures and information relevant to the conduct of weighbridge operations
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the conduct of weighbridge operations
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when conducting weighbridge operations
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, errors or malfunctions that may occur when conducting weighbridge operations in accordance with regulatory requirements and workplace procedures

Required skills:

- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the conduct of weighbridge operations
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Set up and maintain weighbridge equipment
- Identify, select and efficiently and effectively use weighbridge equipment
- Monitor performance of weighbridge equipment

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:

EVIDENCE GUIDE

- relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted:
- in a range of work environments
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Workplace environment may include:
- movement of equipment, goods, products, materials and vehicular traffic
- Weighbridge operations may be:
- inclusive of a single operation involving the loading of vehicles and despatch functions
- Weighbridge operation may be:
- electro/mechanical
 - electronic
 - computerised
- Vehicles may include
- trucks
 - articulated road vehicles
 - trailers
 - wagons
- Calibration and/or testing of
- required prior to and during operations

RANGE STATEMENT

equipment may be:

Hazards in the work area may include exposure to:

- chemicals and pesticides
- dangerous or hazardous substances
- stationary and moving equipment, parts and materials
- noise, light, energy sources
- electrical equipment
- humidity, air temperature, radiant heat
- faulty equipment

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- protective clothing
- respirators and fume/dust masks
- high visibility clothing

Requirements for work may include:

- site restrictions and procedures
- use of safety and personal protective equipment
- communications/recording equipment
- authorities and permits
- breakdown procedures
- emergency procedures

Communication in the work area may include:

- phone
- fax
- email/internet
- electronic data interchange (EDI)
- RF systems
- oral, aural or signed communications

Consultative processes may involve:

- workplace personnel
- supervisors and managers
- existing and potential customers/clients
- drivers
- suppliers and contractors
- union representatives
- industrial relations and OH&S specialists
- maintenance, professional or technical staff

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- workplace procedures
- organisational procedures
- established or standard procedures

RANGE STATEMENT

Information/documents may include:

- operations manuals, job specifications and procedures
- induction documentation
- competency standards and training materials
- manufacturers specifications and instructions for the operation of weighbridge equipment
- material safety data sheets
- workplace operating procedures and policies
- supplier and/or client instructions
- Australian and international standards, criteria and certification requirements
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- relevant regulations including the ADG Code
- award, workplace bargaining agreement, other industrial arrangements
- OH&S procedures
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- relevant codes and regulations pertaining to weighbridge operations
- traffic acts and road transport mass and loading regulations
- ADG Code and regulations pertaining to the storage and handling of dangerous and hazardous goods
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- relevant Australian and international standards and certification requirements
- workplace relations regulations including equal opportunity, equal employment opportunity and affirmative action legislation
- workers compensation regulations

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate a forklift with specialised attachments or all-terrain equipment, including checking attachments and worksite for suitability, selecting the type of forklift and accessories for required load shifting tasks, and shifting load and completing work in accordance with operational requirements. Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory OH&S authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Specialised operation of a forklift must be carried out in compliance with the licence requirements and regulations of the relevant state/territory authority.

Specialised operation of a forklift is performed under some supervision, generally within a team environment. It involves the application of equipment operation principles and procedures to maintain the safety and specialised operation of a forklift in a wide variety of operational contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Check attachments and worksite for suitability	1.1 Suitable work site is selected for operations 1.2 Work area is checked for overhead obstructions and proximity to service delivery lines 1.3 Barriers or warning signs are erected in areas subject to passing traffic 1.4 Attachments and platforms are securely fixed to carriage or tines 1.5 Personnel support platforms are inspected to ensure compliance with the relevant Australian Standard
2 Select type of forklift and accessories for the required workplace task	2.1 Special equipment, accessories or attachments are identified to match load characteristics and work requirements 2.2 Appropriate specialised equipment is selected 2.3 Existing attachments are removed and stored according to workplace procedures 2.4 Specialised equipment is fitted according to manufacturers instructions and workplace procedures 2.5 Designated staff are notified regarding specialist operations
3 Shift load and complete work	3.1 Equipment is operated within safe working limits and to maximise efficiency of operations 3.2 Load is lifted, carried and set down in accordance with workplace and manufacturers procedures and regulatory requirements 3.3 Documentation is completed reporting any damage or faults to goods or equipment 3.4 Specialist equipment and forklift are returned to appropriate storage/parking area

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant duty of care requirements pertaining to the specialised operation of a forklift
- Relevant OH&S and environmental procedures and regulations
- Workplace operating procedures

REQUIRED KNOWLEDGE AND SKILLS

- Forklift controls, instruments and indicators and their use
- Types of forklift accessories and ancillary equipment, their purposes and procedures for their use
- Handling procedures for forklifts involved in specialised operations
- Procedures to be followed in the event of an operational emergency
- Operating hazards and related defensive driving and hazard control techniques
- Engine power management and safe operating strategies
- Efficient driving techniques
- Pre-operational checks carried out on forklift and accessories and related action
- Site layout and obstacles
- Principles of stress management when driving a forklift

Required skills:

- Communicate effectively with others when conducting specialised forklift operations
- Read and interpret instructions, procedures, information and signs relevant to specialised forklift operations
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to specialised forklift operations
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when conducting specialised forklift operations
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when conducting specialised forklift operations in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may occur when conducting specialised forklift operations
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during specialised forklift operations
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S

Required skills:

standards

- Identify points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- Monitor performance of equipment
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be

EVIDENCE GUIDE

conducted through appropriate written/oral tests

- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Types of forklift may include:

- counterbalance trucks
- reach trucks
- pallet trucks
- container-handling heavy forklifts
- vacuum
- top frame

Specialised forklift operations may be carried out in typical forklift operational situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road or worksite
- while at a workplace

Customers may be:

- internal or external

Workplaces may comprise:

- large, medium or small worksites

Specialised forklift may be used to assist in a range of workplace tasks, including:

- stock/goods/container handling
- loading and unloading vehicles
- stacking stock and goods
- lifting and moving equipment
- transporting materials and goods in a workplace

Work may be conducted in:

- restricted spaces
- exposed conditions
- controlled or open environments

Loads to be shifted may require:

- special precautions

Specialised forklift operations

- spikes

RANGE STATEMENT

may involve the use of a range of attachments and accessories, including:

- drum carriers
- bale carriers
- tines
- personnel carriers
- high reaching
- pantograph
- jibs
- paper clamps
- hooks
- side lifters

Loads to be shifted may be:

- irregularly shaped
- packaged or unpackaged
- labelled or unlabelled
- palleted or unpalleted
- containerised

Personnel in the work area may include:

- workplace personnel
- site visitors
- contractors
- official representatives

Forklift operational procedures may include:

- starting a forklift (including pre-start checks)
- steering and manoeuvring a forklift
- accelerating and braking
- positioning and stopping a forklift
- reversing a forklift
- operating forklift controls, instruments and indicators
- using defensive driving techniques
- managing engine performance

Pre-operational checks may include but are not limited to:

- visual checking of forklift and its associated accessories and equipment
- checking and topping up of fluid levels
- checks of tyres
- checks of operation of forklift lights and indicators
- checks of brakes

Post-operational checks may include but are not limited to:

- parking in a safe place
- shutting down forklift
- lowering all equipment
- visually checking for faults or damage

Hazards may include (examples only):

- wet and iced operating surfaces
- oil on operating surface
- faulty brakes

RANGE STATEMENT

- workplace obstacles and other operational equipment and vehicles
 - damaged loads and pallets
 - other personnel in work area
 - company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Information/documents may include:
- goods identification numbers and codes, including IMDG markings and HAZCHEM signs
 - manifests, bar codes, picking slips, merchandise transfers, stock requisitions, goods and container identification
 - Australian Standard 2359 - Industrial Truck Code
 - manufacturers specifications for forklift and associated accessories and equipment
 - operations and service record book or log
 - workplace procedures and policies for the operation of forklifts
 - supplier and/or client instructions
 - material safety data sheets
 - regulatory requirements concerning the use of forklifts
 - award, enterprise bargaining agreement, other industrial arrangements
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
- Applicable procedures and codes may include:
- relevant state/territory regulations pertaining to the operation of forklifts
 - relevant codes and standards, including Australian Standard 2359 - Industrial Truck Code
 - relevant state/territory OH&S legislation
 - relevant state/territory fatigue management regulations
 - relevant state/territory environmental protection legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate a boom type elevating work platform, including inspecting and testing the elevating work platform, assessing job requirements and work, planning work and setting up for lift, carrying out the elevation, implementing planned hazard control and strategies, and packing up the work platform after operations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the licence/permit requirements and regulations of the relevant state/territory authorities pertaining to boom type elevating work platform operations.

Work is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes. It involves the application of routine principles and procedures to the operation of a boom type elevating work platform in a variety of operational contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Inspect and test elevating work platform	<p>1.1 Work platform is visually inspected prior to operation for any evidence of damage, structural weakness or interference according to pre-operational safety check procedures</p> <p>1.2 Routine pre-operational equipment checks are carried out in accordance with available checklists</p> <p>1.3 Work platform log book is checked, service requirements are noted and maintenance personnel advised of any requirements</p> <p>1.4 Elevating work platform is started in accordance with manufacturers guidelines and start-up procedures for operations and any abnormal noise or movement reported to an authorised person for corrective action</p> <p>1.5 Start-up checks are conducted according to manufacturers specifications and company procedures to ensure work platform and equipment are operating correctly</p> <p>1.6 Faults are corrected or are reported to an authorised person for corrective action according to company procedures</p> <p>1.7 The operating and emergency controls are checked for correct operation in accordance with manufacturers specifications including use of the emergency decent device</p> <p>1.8 Boom is lowered under simulated emergency conditions to check for operational effectiveness</p> <p>1.9 Gear and accessories are checked and damaged or worn gear is segregated and reported to an authorised person for testing/repair/destruction</p> <p>1.10 Results of inspections are recorded and reported according to company procedures</p>
2 Assess job requirements and work	<p>2.1 Briefing, hand-over details, authorisations and clearances are received, interpreted and clarified in accordance with company and site procedures and legislative requirements</p> <p>2.2 Work area is inspected and potential hazards are identified and appropriate elimination or control measures selected</p> <p>2.3 Weight of load including personnel and equipment is correctly estimated to ensure job is within limits of work platform capacity</p>
3 Plan work and set up for lift	<p>3.1 A work plan is developed and agreed with relevant workplace personnel to include hazard prevention/control measures and safety and emergency procedures in line with applicable Australian standards</p> <p>3.2 A suitable firm and level standing is chosen and prepared for the location of the elevating work platform</p> <p>3.3 Outriggers and stabilisers are correctly deployed and positioned</p>

ELEMENT**PERFORMANCE CRITERIA**

- in accordance with manufacturers instructions and appropriate Australian standards
- 3.4 Appropriate plates or packing are correctly used under the footplates as required to adequately distribute the loading
- 3.5 Ground is checked before and after packing is installed to ensure it is firm enough to bear the load
- 3.6 The job plan is developed to include hazard prevention/control measures and safety procedures in line with applicable Australian standards and to equipment manufacturers specifications
- 3.7 Work platform load chart is located and information on permissible loads, radii and heights taken into account in planning the job
- 3.8 The job plan takes into account job requirements and workplace rules and procedures
- 3.9 Job plan is discussed and confirmed with relevant personnel
- 3.10 Work gear and tools are properly stowed in the elevating work platform in accordance with Australian standards, company procedures and guides
- 4 Carry out elevation**
- 4.1 Configuration and operation of elevating work platform are checked as necessary to ensure safe lift
- 4.2 Operation of work platform is carried out in accordance with the job plan, the appropriate Australian standard and manufacturers specifications
- 5 Planned hazard control and strategies are implemented**
- 5.1 Load is constantly monitored to ensure safety of personnel, load and structural stability
- 5.2 Unplanned situations are responded to in line with company procedures in a manner that minimises risk to personnel and equipment
- 5.3 Required signals are correctly given, interpreted and followed in accordance with appropriate Australian standards
- 6 Pack up work platform**
- 6.1 The elevating work platform is shut down using the correct sequence of procedures in accordance with manufacturers instructions
- 6.2 Routine post-operational equipment checks are carried out in accordance with manufacturers instructions and available checklists and defects recorded and reported in line with company procedures
- 6.3 The elevating work platform is dismantled in accordance with the job plan, manufacturers instructions and relevant statutory regulations
- 6.4 The outriggers and stabilisers are secured and stowed in

ELEMENT**PERFORMANCE CRITERIA**

accordance with manufacturers instructions

6.5 The elevating work platform is correctly stowed and secured in accordance with manufacturers instructions and company procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements pertaining to boom type elevating work platform operation
- Relevant OH&S and environmental procedures and regulations
- Boom type elevating work platform applications, capacities, configurations, safety hazards and control mechanisms
- Workplace procedures concerning the operation of a boom type elevating work platform at a worksite
- Problems that may arise when operating a boom type elevating work platform and actions that should be taken to prevent or solve them
- Risks and hazards involved in the operation of a boom type elevating work platform and the associated action that can be taken to eliminate or minimise the risk/hazards concerned
- Focus of operation of work systems and equipment

Required skills:

- Communicate effectively with others when operating a boom type elevating work platform
- Read and interpret instructions, procedures, regulations, codes of practice and manuals relevant to the operation of a boom type elevating work platform
- Interpret and follow operational instructions
- Complete documentation related to the operation of a boom type elevating work platform
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating a boom type elevating work platform
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when operating a boom type elevating work platform in accordance with regulatory requirements and workplace procedures

Required skills:

- Plan own work including predicting consequences and identifying improvements
- Prioritise and multi-task work
- Implement contingency plans for unanticipated situations that may arise when operating a boom type elevating work platform
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of a boom type elevating work platform
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Identify and correctly use equipment, processes and procedures
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of equipment
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:

EVIDENCE GUIDE

- a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|--|--|
| Operations may be conducted: | <ul style="list-style-type: none"> • by day or night • in a variety of weather conditions |
| Environment may include movement of: | <ul style="list-style-type: none"> • equipment • goods • materials • vehicular traffic |
| Customers may be: | <ul style="list-style-type: none"> • internal or external |
| Boom type elevating work platform may be involved in work in a range of industry sectors | <ul style="list-style-type: none"> • construction and demolition • manufacturing • waterfront |

RANGE STATEMENT

including:

- mining
- primary industry
- utilities (electricity, gas, water)
- arboricultural
- swimming pool
- quarrying

Hazards may include:

- power lines
- noise, light, energy sources
- overhead service lines
- surrounding buildings, structures, facilities
- underground services
- obstructions
- uneven or unstable ground and recently filled trenches
- stationary and moving machinery and equipment
- hazardous or dangerous materials
- traffic hazards and congestion

Hazard management is consistent with:

- the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment

Consultative processes may involve:

- other employees and supervisors
- management
- union representatives
- clients
- industrial relations and OH&S specialists
- other professional or technical staff

Requirements for access and/or lift may include:

- site restrictions and procedures
- authorities and permits
- hours of operation
- induction
- slings, chains, nets, brackets and other specialised lifting equipment
- noise restrictions
- personal protective equipment
- support trucks
- additional gear and equipment
- communications equipment

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- sunscreen, sunglasses and safety glasses

RANGE STATEMENT

- Elevating platforms may include:
- two-way radios
 - high visibility clothing
 - mechanically operated equipment
 - hydraulically operated equipment
 - electrically operated equipment
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
 - site procedures
- Documentation/records may include:
- operations manuals
 - Safe Working Load (SWL) and Working Load Limit (WLL)
 - site plans
 - induction documentation
 - competency standards and training materials
 - job specifications and procedures
 - manufacturers specifications
 - workplace operating procedures and policies
 - supplier and/or client instructions
 - communications technology equipment, oral, aural or signed communications
 - personal and work area work procedures and practices
 - conditions of service, legislation and industrial agreements including:
 - workplace agreements and awards
 - occupational health and safety procedures
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
- Applicable procedures and codes may include:
- relevant state/territory regulations and licence/permit requirements pertaining to the operation of boom type elevating work platforms
 - relevant state/territory road rules
 - relevant state/territory OH&S legislation
 - relevant state/territory fatigue management regulations
 - relevant state/territory environmental protection legislation

Competency Field D - Load Handling

TLID3036A Lift and move load using a mobile crane

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to lift and move a load using a non-slewing mobile crane or a slewing mobile crane. It includes operating the mobile crane to complete job requirements, monitoring lift conditions, implementing shut-down procedures, packing up crane after operations, and completing all required job records. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the licence/permit requirements and regulations of the relevant state/territory authorities pertaining to operations of mobile cranes.

Work is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes. It involves the application of routine principles, procedures and regulations to lift and move loads using slewing and non-slewing mobile cranes in a variety of operational contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Operate mobile crane	<ul style="list-style-type: none">1.1 In ascent and descent to/from crane correct use is made of the means provided in accordance with codes of practice and workplace procedures1.2 Planned hazard control strategies are implemented1.3 Required signals are correctly given, interpreted and followed in accordance with appropriate workplace procedures1.4 Boom is positioned to ensure load to be lifted is plumbed under hook1.5 Load is hoisted and lowered into position using crane movements in accordance with the appropriate workplace procedures1.6 Crane controls are operated smoothly1.7 Crane is shut down and secured during periods of non-operation according to manufacturers specifications and workplace procedures
2 Monitor lift conditions	<ul style="list-style-type: none">2.1 Load is constantly monitored to ensure load and structural stability2.2 Conditions which may affect the continuing stability of the crane are identified and monitored2.3 Unplanned situations are responded to in line with workplace procedures in a manner that minimises risk to personnel and equipment2.4 Dogger is advised of any new information which affects the lift2.5 Any necessary changes to job plan are discussed and confirmed with rest of crew2.6 Advice is sought from supervisor where there is doubt about correct response to unanticipated conditions, or conflict with customer request2.7 Supervisor/allocator is advised of any concern about completing the job within timeframe
3 Implement shut-down procedures	<ul style="list-style-type: none">3.1 The relevant motion locks and brakes are applied3.2 Crane is shut down using the correct sequence of procedures in accordance with manufacturers specifications and workplace procedures3.3 Routine post-operational equipment checks are carried out in accordance with manufacturers specifications
4 Pack up crane	<ul style="list-style-type: none">4.1 Crane is de-rigged with other crane personnel in accordance with manufacturers instructions4.2 All lifting equipment and crane components are checked in consultation with crane personnel for any signs of deterioration

ELEMENT	PERFORMANCE CRITERIA
	or damage in accordance with the appropriate Australian Standard
	4.3 Damaged or worn equipment is segregated and reported to an authorised person for testing/repair/destruction
	4.4 Crane and equipment are correctly stowed and secured in accordance with manufacturers instructions and the appropriate Australian Standard
5 Complete job records	5.1 Customer feedback is sought regarding satisfaction with the completed job, and any areas of concern are reported according to workplace procedures
	5.2 Customer's signature on job completion documentation is obtained
	5.3 Required workplace records are updated accurately and promptly and processed according to workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements pertaining to mobile crane operation
- Relevant OH&S and environmental procedures and regulations
- Mobile crane applications, capacities, configurations, safety hazards and control mechanisms
- Risks and hazards involved in mobile crane operation, and associated action that can be taken to eliminate or minimise the risk
- Workplace procedures concerning the operation of a mobile crane at a worksite
- Problems that may occur during a lift, and associated action that can be taken to address the problems concerned
- Communication systems used during a lift
- Focus of operation of work systems and equipment

Required skills:

- Communicate effectively with others when lifting and moving a load using a mobile crane
- Read and interpret instructions, procedures, information and signs relevant to the lifting and moving of a load using a mobile crane

Required skills:

- Complete documentation related to the lifting and moving of a load using a mobile crane
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when lifting and moving a load using a mobile crane
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when lifting and moving a load using a mobile crane in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unanticipated situations that may arise when lifting and moving a load using a mobile crane
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the lifting and moving of a load using a mobile crane
- Plan own work including predicting consequences and identifying improvements
- Prioritise and multi-task work
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of equipment
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of

EVIDENCE GUIDE

unit

this unit and include demonstration of:

- applying the underpinning knowledge and skills
- applying relevant legislation and workplace procedures
- complying with OH&S licensing legislation
- applying risk assessment and management procedures for mobile crane operations
- effectively completing the pre-operational checks, positioning, stabilising, set-up, post-operational checks of a mobile crane
- using mathematical procedures to determine the weight of a load and the lifting equipment required for the lift
- using load charts to determine the limitations of the crane and/or crane set-up required
- operating the crane including all functions to their maximum extension in the lifting and moving of a load

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through appropriately simulated activities at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Operations may be conducted:
- by day or night
 - in a variety of weather conditions
- Environment may include movement of:
- equipment
 - goods
 - materials and vehicular traffic
- Customers may be:
- internal or external
- Mobile crane may be any slewing and non-slewing crane and may be involved in work in a range of industry sectors including:
- construction and demolition
 - manufacturing
 - waterfront
 - mining
 - primary industry
 - utilities (electricity, gas, water)
 - arboricultural
 - swimming pool
 - quarrying
- Hazards may include:
- power lines
 - noise, light, energy sources
 - overhead service lines
 - surrounding buildings, structures, facilities
 - underground services
 - obstructions
 - uneven or unstable ground and recently filled trenches
 - stationary and moving machinery and equipment
 - hazardous or dangerous materials
 - traffic hazards and congestion
- Hazard management is consistent with:
- the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - sunscreen, sunglasses and safety glasses
 - two-way radios
 - high visibility clothing
- Consultative processes may
- other employees and supervisors

RANGE STATEMENT

involve:

- management
- union representatives
- clients
- industrial relations and OH&S specialists
- other professional or technical staff

Requirements for access and/or lift may include:

- site restrictions and procedures
- authorities and permits
- hours of operation
- induction
- slings, chains, nets, brackets and other specialised lifting equipment
- noise restrictions
- personal protective equipment
- support trucks
- additional gear and equipment
- communications equipment

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures
- site procedures

Documentation/records may include:

- site plans
- Safe Working Load (SWL) and Working Load Limit (WLL)
- operations manuals including load charts and crane and rigging manuals
- induction documentation
- competency standards and training materials
- job specifications and procedures
- manufacturers specifications
- workplace operating procedures and policies
- supplier and/or client instructions
- communications technology equipment, oral, aural or signed communications
- personal and work area work procedures and practices
- conditions of service, legislation and industrial agreements including:
 - workplace agreements and awards
 - occupational health and safety procedures
 - standards and certification requirements

RANGE STATEMENT

Applicable procedures and codes may include:

- quality assurance procedures
- emergency procedures
- relevant state/territory regulations and licence/permit requirements pertaining to mobile cranes
- relevant Australian Standards and certification requirements
- relevant state/territory road rules
- relevant state/territory OH&S legislation
- relevant state/territory fatigue management regulations
- relevant state/territory environmental protection legislation

Unit Sector(s)

Not Applicable

Competency Field

Competency Field D - Load Handling

TLIJ2003A Apply grain protection measures

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to apply grain protection procedures within grain storage facilities in accordance with workplace procedures including identifying required pest control measures, preparing for application of pest control measures, monitoring application of pest control measures, ventilating fumigated storages, and maintaining records in accordance with workplace requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in accordance with regulations and workplace requirements relevant to grain storage operations.

Work is performed under some supervision, generally within a team/group environment. It involves the application of regulatory requirements and workplace procedures when applying grain protection measures as part of grain storage operations in the transport, warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare for application of pest control measures	<p>1.1 Legal and workplace requirements for fumigation are followed in accordance with work order</p> <p>1.2 Fumigation/spray application requirements are followed using silo and grain storage information in accordance with manufacturers instructions</p> <p>1.3 Written records are confirmed by site measurements and observations</p> <p>1.4 Access and site specific safety requirements to meet legislation and workplace instructions are determined</p> <p>1.5 Equipment is checked for conformance to workplace requirements and manufacturers specifications</p> <p>1.6 Where applicable, storage is checked for gas-proofing in accordance with manufacturers and workplace instructions prior to fumigation</p>
2 Apply pest control measures	<p>2.1 Personal protective equipment and engineering controls are used as instructed</p> <p>2.2 Fumigant and spray applications are applied in accordance with manufacturers and workplace instructions</p> <p>2.3 Warning signs are placed in accordance with legislative and workplace requirements</p> <p>2.4 Application is monitored to ensure effectiveness of operation</p> <p>2.5 Empty fumigant containers are returned to the manufacturer, retailer or disposed of in accordance with legislative and workplace requirements</p> <p>2.6 Baits are prepared in accordance with legislation and manufacturers instructions</p> <p>2.7 Baits are placed in accordance with site requirements and manufacturers instructions</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to the application of grain protection measures in grain storage facilities
- Relevant OH&S and environmental protection procedures and guidelines

REQUIRED KNOWLEDGE AND SKILLS

- Workplace procedures and policies for the application of grain protection measures
- Problems that may occur when applying grain protection measures and appropriate action that can be taken to resolve the problems
- Equipment applications, capacities, configurations, safety hazards and control mechanisms
- Characteristics of commodity types, varieties and grades, and their identification
- Emergency response procedures
- Storage and safe handling procedures for fumigants, chemicals and other grain protection materials
- Procedures for environmental control and disposal activities
- Site layout and obstacles

Required skills:

- Communicate effectively with others when applying grain protection measures
- Read and interpret instructions, procedures information and labels relevant to the application of grain protection measures
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the application of grain protection measures
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when applying grain protection measures
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when applying grain protection measures in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unanticipated situations that may arise when applying grain protection measures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the application of grain protection measures
- Plan own work including predicting consequences and identifying improvements
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Set up and maintain grain protection equipment
- Identify, select and efficiently and effectively use equipment needed when applying grain

Required skills:

protection measures

- Identify pests that infest grain in grain storage facilities
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:

EVIDENCE GUIDE

- through activities in an appropriately simulated environment at the registered training organisation, and/or
- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Install grain quality control equipment	<p>1.1 Procedures for maintaining the quality of stored grain are identified from work plans and considering climatic conditions, types of storage and general environment</p> <p>1.2 Aeration equipment (where required) is installed to workplace and site requirements to maintain appropriate grain temperature and moisture content</p> <p>1.3 Inspection/sampling equipment and procedures are confirmed and implemented in accordance with workplace procedures</p> <p>1.4 Equipment is checked to ensure correct set-up and operation</p> <p>1.5 Equipment is maintained in accordance with workplace requirements and manufacturers instructions</p> <p>1.6 Rectification of faults in equipment is undertaken in accordance with workplace procedures</p>
2 Monitor the quality of stored commodities	<p>2.1 Stored commodities and associated facilities are inspected for signs of damage or potential for damage</p> <p>2.2 Required repairs to facilities are reported to appropriate personnel for action</p> <p>2.3 Monitoring for pest infestations and climatic contamination/damage to grain is regularly completed in accordance with workplace sampling/inspection procedures</p> <p>2.4 Results of sampling/inspections are recorded and reported in accordance with workplace procedures</p> <p>2.5 Follow-up action to protect grain quality is undertaken in accordance with workplace procedures</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to the implementation of grain monitoring measures in grain storage facilities
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the implementation of grain monitoring measures
- Problems that may occur when implementing grain monitoring measures and appropriate action that can be taken to resolve the problems

REQUIRED KNOWLEDGE AND SKILLS

- Equipment applications, capacities, configurations, safety hazards and control mechanisms
- Classification procedures
- Emergency response procedures
- Storage and safe handling procedures
- Procedures for environmental control and disposal activities
- Site layout and obstacles

Required skills:

- Communicate effectively with others when implementing grain monitoring measures
- Read and interpret instructions, procedures, information and labels relevant to the implementation of grain monitoring measures
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the implementation of grain monitoring measures
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when implementing grain monitoring measures
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when implementing grain monitoring measures in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unanticipated situations that may arise when implementing grain monitoring measures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the implementation of grain monitoring measures
- Plan own work including predicting consequences and identifying improvements
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Set up and maintain grain protection equipment
- Identify, select and efficiently and effectively use equipment needed when implementing grain monitoring measures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted:
- in a range of work environments
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Workplace environment may include movement of:
- equipment
 - goods
 - products
 - materials
 - vehicular traffic
- Inspection/sampling processes may include:
- turning
 - visual inspection
 - hand sampling
 - grain sieves
 - robes and spears
 - trapping
- Problems identified in commodities and facilities may include:
- presence of water or water damage
 - presence and activity of pests
 - dead vertebrate pests in stored grain
 - damage or deterioration of storage facility
 - storm damage
 - inappropriate grain temperature and moisture levels
- Types of storage and environment may include:
- permanent and/or temporary storage
 - fixed and/or portable commodity handling equipment
 - site buildings
 - haulage vehicles
 - rail loops
 - walkways and access points in buildings and facilities
 - site surroundings
- Grain aeration involves:
- set-up, maintenance, operational control and dismantling of equipment
- Hazards in the work area may include exposure to:
- chemicals and pesticides
 - dangerous or hazardous substances
 - stationary and moving equipment, parts and materials
 - noise, light, energy sources

RANGE STATEMENT

- electrical equipment
 - humidity, air temperature, radiant heat
 - debris on floor
 - faulty equipment
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - protective clothing
 - respirators and fume/dust masks
 - high visibility clothing
- Requirements for work may include:
- site restrictions and procedures
 - licensing requirements
 - use of safety and personal protective equipment
 - communications/recording equipment
 - authorities and permits
 - emergency procedures
- Communication in the work area may include:
- phone
 - fax
 - email/internet
 - electronic data interchange (EDI)
 - RF systems
 - oral, aural or signed communications
- Consultative processes may involve:
- workplace personnel
 - supervisors and managers
 - existing and potential customers/clients
 - manufacturers of pesticides
 - suppliers and contractors
 - union representatives
 - industrial relations and OH&S specialists
 - maintenance, professional or technical staff
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - workplace procedures
 - organisational procedures
 - established or standard procedures
- Information/documents may include:
- operations manuals, job specifications and procedures
 - induction documentation
 - competency standards and training materials
 - manufacturers specifications and instructions

RANGE STATEMENT

Applicable regulations and legislation may include:

- material safety data sheets
- workplace operating procedures and policies
- supplier and/or client instructions
- Australian and international standards, criteria and certification requirements
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- relevant regulations including the ADG Code
- award, workplace bargaining agreement, other industrial arrangements
- OH&S procedures
- quality assurance procedures
- emergency procedures
- relevant codes and regulations pertaining to grain storage
- legislation regarding the use of fumigants/poisons
- ADG Code and regulations pertaining to the storage and handling of dangerous and hazardous goods
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- relevant Australian and international standards and certification requirements
- workplace relations regulations including equal opportunity, equal employment opportunity and affirmative action legislation
- workers compensation regulations

TLIK2010A Use infotechnology devices in the workplace

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to use infotechnology devices in the workplace including identifying infotechnology equipment and systems; setting up and shutting down equipment for use; and inputting, retrieving and presenting files/data in accordance with work requirements. Licensing, legislative, regulatory or certification requirements are not applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in accordance with the relevant OH&S regulations and workplace procedures concerning the use of infotechnology equipment in the workplace.

Work is performed under some supervision, generally within a team environment. It involves the application of routine procedures for the use of computers for information management in the transport and logistics industry.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify infotechnology systems	1.1 Types of infotechnology equipment used in the work area are identified 1.2 Functions of equipment, component parts and accessories are identified 1.3 Applications for workplace activities of the different infotechnology equipment and systems are interpreted 1.4 Routine faults in operating systems, software applications and operator errors are identified 1.5 Sources of information on rectifying/reporting faults with operating equipment, systems and application are identified
2 Access and operate computer-based equipment and systems	2.1 Work environments and equipment are adjusted to meet ergonomic requirements and workplace policy and procedures 2.2 Systems are accessed and checked where required for viruses 2.3 Equipment is set up for work requirements in accordance with workplace procedures and manufacturers guidelines 2.4 Operating manuals and/or help screens for infotechnology equipment and software are used to inform work practices 2.5 Software packages and accessories for required application are selected and accessed 2.6 Required file and/or data to be accessed is identified 2.7 Files/data are filed according to workplace 2.8 Shut-down procedures for files, applications and equipment are followed
3 Input, store and present files/data	3.1 Data is entered using appropriate equipment, keyboard/mouse, bar code reader, touch screen or other system 3.2 Accurate input is confirmed 3.3 Files are accessed in accordance with workplace procedures 3.4 Data is manipulated to suit work requirements and checked for accuracy 3.5 Saved files are accessed through relevant directories 3.6 Information and disk(s) are stored where appropriate 3.7 Information is presented using computerised projection facilities where required
4 Implement workplace procedures for management and security of data	4.1 Security procedures are followed in accordance with workplace procedures 4.2 Precautions against the loss or corruption of data are followed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant OH&S procedures and guidelines concerning the use of computer equipment in the workplace
- OH&S risks and hazards when using computer equipment for work tasks, and ways of controlling the risks/hazards
- Workplace procedures for the use of computer equipment and application software appropriate for work role
- Typical problems that can occur when using infotechnology devices, and computer applications in the workplace and related appropriate action that can be taken to prevent or solve them
- Housekeeping standards and procedures required in the workplace
- Workplace or site layout

Required skills:

- Communicate effectively with others when using infotechnology devices in the workplace
- Read and interpret instructions, procedures, information and manuals relevant to the use of infotechnology devices in the workplace
- Interpret and follow operational instructions and prioritise work
- Access and/or complete electronic documentation through the use of infotechnology devices in the workplace
- Identify and use computer equipment, software, processes and procedures required within the context of the job
- Work collaboratively with others when using infotechnology devices in the workplace
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when using infotechnology devices in the workplace in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unanticipated situations that may arise when using infotechnology devices in the workplace including the use of security and backup software and procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when using infotechnology devices in the workplace
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or

Required skills:

- damage to goods or equipment
- Adapt to differences in software and equipment in accordance with standard operating procedures
- Maintain eye-hand coordination

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement
- Assessment must include exercises which demonstrate competent performance of the following in a range of situations:
 - correctly operating all infotechnology devices used within the workplace in accordance with operational requirements
 - correctly identifying fault finding procedures

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and

EVIDENCE GUIDE

- Method of assessment**
- operation manuals
 - Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- The operations may be conducted:
- in a range of work environments
 - by day or night
 - in a range of typical weather conditions
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted:
- in a range of work contexts
- Infotechnology equipment may include:
- keyboards
 - monitors
 - bar code readers
 - printers
 - central processors
 - CD-ROM drives
 - floppy disk drives
 - zip drives
 - USB drives
 - touch screens
 - Personal Digital Assistant (PDA)
 - visual display units
 - desktop computers
 - laptop computers

RANGE STATEMENT

- Computer applications may include:
- radio frequency devices
 - computer driven projectors
 - word processing software
 - inventory control and stock management systems
 - electronic data interchange (EDI) systems
 - information databases and storage systems
 - invoicing and payment systems
 - manifests control systems
 - work organisation systems
 - networks including intranet/internet browsers
 - computerised presentation software
 - computerised control/monitoring systems
- Personnel in the work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Communication in the work area may include:
- phone/mobile phones
 - electronic data interchange (EDI)
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Information/documents may include:
- goods identification numbers and codes
 - manifests, bar codes, goods and container identification/serial number
 - manufacturers instructions concerning the use computing equipment
 - workplace procedures and policies for the use of computer equipment
 - supplier and/or client instructions
 - material safety data sheets
 - relevant codes of practice
 - safeworking or other notices
 - relevant legislation, regulations and related documentation
 - award, enterprise bargaining agreement, other industrial

RANGE STATEMENT

Applicable regulations and legislation may include:

- arrangements
- standards and certification requirements
- quality assurance procedures
- emergency procedures
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- workplace relations regulations
- workers compensation regulations
- Dangerous Goods Code and regulations

Elements and Performance Criteria

ELEMENT <i>Elements describe the essential outcomes of a unit of competency.</i>	PERFORMANCE CRITERIA <i>Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.</i>
1. Plan work	1.1 Potential workplace <i>hazards</i> are identified 1.2 <i>Hazard control measures</i> are identified consistent with <i>appropriate standards</i> to ensure the safety of personnel and equipment 1.3 Appropriate <i>forklift</i> truck is selected according to the load and workplace conditions 1.4 Working area is inspected to determine appropriate path of movement for loads and forklift truck 1.5 <i>Communication methods</i> are identified according to <i>procedures</i>
2. Conduct routine checks	2.1 Forklift is visually checked for any damage or defects 2.2 All <i>signage and labels</i> are visible and legible according to the <i>appropriate standard</i> 2.3 All controls are located and identified 2.4 <i>Pre-start operational checks</i> are carried out according to <i>procedures</i> 2.5 <i>Forklift</i> is started according to <i>procedures</i> and checked for any abnormal noise 2.6 <i>Post-start operational checks</i> are carried out according to <i>procedures</i> 2.7 All forklift functions and safety devices are tested to their maximum according to <i>procedures</i> 2.8 Defects and damage are reported and recorded according to <i>procedures</i> , and appropriate action is taken
3. Shift load	3.1 The weight of load is assessed to ensure compliance with <i>forklift</i> truck data plate specifications 3.2 Appropriate <i>hazard prevention/control measures</i> are implemented and communicated with personnel in the work area 3.3 <i>Forklift</i> is operated at a safe speed and according to <i>procedures</i> 3.4 Loads are moved and placed to ensure stability of material and avoidance of hazards

	<p>3.5 Load movement is monitored constantly ensuring safety to personnel and load, and structural stability</p> <p>3.6 <i>Unplanned and/or unsafe situations</i> are responded to in line with <i>procedures</i></p>
4. Shut down and secure forklift truck	<p>4.1 <i>Forklift</i> truck is parked to avoid hazards</p> <p>4.2 Forklift is <i>shut down</i> according to <i>procedures</i></p> <p>4.3 Routine post-operational forklift checks are carried out according to <i>procedures</i></p> <p>4.4 Forklift is secured to prevent unauthorised access/use</p> <p>4.5 All defects and damage are reported and recorded according to <i>procedures</i>, and appropriate action is taken</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Required skills:

- Accurately interpret information relating to conducting forklift truck operations (e.g. procedures)
- Safely conduct forklift truck operations including all functions to the maximum height and load capacity
- Identify hazards associated with the operation of the forklift truck, assess risks and put into place effective hazard prevention/control measures for those hazards identified
- Use communication skills at a level sufficient to communicate with other site personnel (e.g. receive and interpret work instructions, safety information, emergency procedures)
- Drive forklift with load in forward and reverse, maintaining visibility
- Verify problems and equipment faults and demonstrate appropriate response procedures

Required knowledge:

- Methodology of determining the weight of a load
- Commonwealth, state or territory OH&S legislation, standards relevant to the safe operation for the forklift trucks
- Understanding of forklift characteristics and capabilities (including use of load data plates)
- Understanding of the hierarchy of hazard identification and control
- Organisational and workplace standards, requirements, policies and procedures for

REQUIRED SKILLS AND KNOWLEDGE

- conducting operations for the crane class
- Procedures for the recording, reporting and maintenance of workplace records and information
- Forklift truck operations and safe operating techniques
- Typical routine problems encountered in the operation of the crane and equipment and adjustments required for correction

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for the Training Package.

Overview of assessment	<ul style="list-style-type: none"> • Successful assessment of this unit meets the competency requirement of the National Standard for Licensing Persons Performing High Risk Work. • State/territory OH&S regulators have mandated the use of Assessment Instruments and Instructions for Assessment for this unit which have been endorsed by the national body responsible for OH&S matters.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<ul style="list-style-type: none"> • Compliance with OH&S licensing legislation. • Communicate and work safely with others in the work area. • Identify hazards associated with the operation of the forklift truck and put in place effective hazard controls for those hazards identified. • Conduct pre-start-up, operational, moving loads and shut down and secure checks of the forklift truck according to procedures. • Operate the forklift truck and move loads safely, including driving and manoeuvring, picking up and placing of loads at various stack heights. • Drive forklift truck with load in forward and reverse, maintaining visibility.
Context of and specific resources for assessment	<ul style="list-style-type: none"> • Assessment of the safe application of knowledge and skills to workplace tasks (performance) must be undertaken using the endorsed Assessment Instrument.

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace setting. • Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints. • Applicants must have access to: <ul style="list-style-type: none"> • Personal Protective Equipment (PPE) for the purpose of the Performance Assessment • associated equipment appropriate to forklift truck operations • suitable loads as described by the endorsed Assessment Instrument • manufacturers specifications • appropriate forklift truck in a safe condition.
Method of assessment	<ul style="list-style-type: none"> • Assessment must be conducted using the endorsed Assessment Instrument. These Instruments provide instruction on their application. • The use of 'simulators' in the assessment of this unit of competency is not acceptable. • Assessment may be in conjunction with the assessment of other units of competency. • Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. • Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
Guidance information for assessment	<ul style="list-style-type: none"> • Further information about endorsed Assessment Instruments may be obtained from state/territory OH&S regulators.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below.

RANGE STATEMENT	
Hazards	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • ground conditions (e.g. condition of pavement, slopes) • overhead hazards (e.g. powerlines, service pipes) • insufficient lighting • traffic (e.g. pedestrians, vehicles, other plant) • weather (e.g. wind, lightning, rain) • forklift instability (e.g. overloading, poor load placement, irregular loads) • other hazards (e.g. dangerous materials)
Hazard control measures	<p>Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls</p> <p>It includes the application of the hierarchy of control, the six-step preference of control measures to manage and control risk:</p> <ol style="list-style-type: none"> 1 elimination 2 substitution 3 isolation 4 engineering control measures 5 using safe work practices 6 personal protective equipment
Appropriate standards	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • legislation • Australian standards • manufacturer's specifications • industry standards (where applicable)
Forklift truck	<p>May include but not be limited to:</p> <ul style="list-style-type: none"> • counterbalanced • reach trucks • rough terrain • internal combustion petrol, diesel, gas • electric
Communications methods	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • verbal and non-verbal language • written instructions • signage

RANGE STATEMENT	
	<ul style="list-style-type: none"> • hand signals • listening • questioning to confirm understanding • appropriate worksite protocol
Procedures	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • manufacturer's guidelines (instructions, specifications or checklists) • industry operating procedures • workplace procedures (work instructions, operating procedures, checklists)
Pre-start operational checks	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • safety devices fitted where appropriate • forklift data plate fitted and interpreted • logbook, handbook or operating manuals available • external visual check including, evidence of damage, leaks, visual evidence of structural weaknesses (including paint separation or stressed welds) is carried out • forklift attachment is checked for security • approved modifications and/or attachments fitted to manufacturer's specifications (e.g. as per forklift or attachment data plate) are identified • checks for adaptations or modifications outside manufacturer's specifications (e.g. not listed on the forklift or attachment data plate) are carried out • maintenance logbook/records checked
Post-start operational checks	<p>May include checks of the forklift truck and equipment after start-up to ensure:</p> <ul style="list-style-type: none"> • hazard warning systems (for example lights and horns), are functional • attachment movements and control functions are smooth and comply with operating requirements • steering, transmission and brake functions comply with operating requirements
Hazard prevention/control measures	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • barricades and traffic control • safety tags on electrical switches/isolators

RANGE STATEMENT	
	<ul style="list-style-type: none"> • insulated powerlines • safety observer used inside exclusion zone • disconnected power • pedestrian control (barricades, signs, etc.) • excavation safeguards • movement of obstructions • personal protective equipment • adequate illumination
Unplanned and/or unsafe situations	<p>May include but not limited:</p> <ul style="list-style-type: none"> • failure/loss of control (e.g. brakes and steering) • failure of equipment (e.g. hydraulic system) • environmental condition
Shut down	<p>May include, but is not limited to:</p> <ul style="list-style-type: none"> • parking in a suitable location away from dangerous areas • fork arms are correctly positioned (tips down, tilted forward, lowered to ground) • appropriate transmission/gear is selected for parking (relevant to transmission type) • hand/parking brake is applied • engine power is turned off • ignition key is removed (if applicable) • LPG gas cylinder valve is shut off (where fitted) • securing equipment against unauthorised operation • securing the site • ensuring access ways are clear • identifying and segregating defective equipment and reporting to authorised personnel • batteries are connected to the charger (if applicable)

Unit Sector(s)

TLILIC2014A Licence to drive light rigid vehicle

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to obtain a licence to drive a light rigid vehicle. It includes systematic and efficient control of all vehicle functions, monitoring of traffic and road conditions, management of vehicle condition and performance and effective management of hazardous situations. Assessment of this unit will be undertaken within a licensing examination conducted by, or under the authority of, the relevant Heavy Vehicle Driver Licensing Authority.

Application of the Unit

Application of the Unit

Driving must be carried out in compliance with the licence requirements and regulations of the relevant state/territory roads and traffic authority pertaining to light rigid vehicles.

Driving is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a light rigid vehicle across a variety of driving contexts.

Licensing/Legislative Requirements

The primary legislative requirements applicable to this unit of competency are State/Territory legislation in relation to road use and driver licensing.

This unit addresses the underlying knowledge and skills necessary for the granting of a Light Rigid Driver Licence. Drivers may require additional training to drive particular vehicles of the class or in particular contexts.

Obtaining this competency is a necessary requirement for obtaining a Light Rigid Driver Licence. However, it is only one of several criteria for obtaining the licence. Prospective licence applicants should check with the State/Territory driver licensing authority for other criteria (for example: licence tenure and medical fitness) to confirm compliance with other eligibility requirements before undertaking training and/or assessment

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Drive the light rigid vehicle	<p>1.1 The light rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions</p> <p>1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage</p> <p>1.3 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving</p> <p>1.4 The light rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning</p> <p>1.5 The light rigid vehicle is parked, shut down and secured in accordance with traffic regulations, safe&secure.</p> <p>1.6 Appropriate procedures are followed in the event of a driving emergency</p>
2 Monitor traffic and road conditions	<p>2.1 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and ensure no injury to people or damage to property, equipment, loads and facilities</p> <p>2.2 Interaction with other road users is conducted courteously and in accordance with road rules to ensure safe and efficient traffic flow</p>
3 Monitor and maintain vehicle performance	<p>3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle</p> <p>3.2 Appropriate signage, lights and the like are checked for operational effectiveness and for conformity to prescribed traffic regulations</p> <p>3.3 Performance and efficiency of vehicle operation is monitored during use</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Light rigid vehicle controls, instruments and indicators and their use

REQUIRED KNOWLEDGE AND SKILLS

- Light rigid vehicle handling procedures
- Driving hazards and related defensive driving techniques
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques
- Pre-operational checks carried out on vehicle and related action
- Differences between transmission types
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Principles of stress management when driving a vehicle
- Causes and effects of fatigue on drivers
- Fatigue management strategies including on-road techniques

Required skills:

- Communicate effectively with others when driving a light rigid vehicle
- Read and interpret instructions, procedures, information and signs relevant to the driving of a light rigid vehicle
- Complete documentation related to the driving of a light rigid vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when driving a light rigid vehicle
- Apply fatigue management knowledge and techniques
- Monitor and anticipate traffic hazards and take appropriate action
- Carry out pre-operational checks on the vehicle

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills

EVIDENCE GUIDE

- relevant legislation
 - other relevant aspects of the range statement
 - Assessment of competency for this unit must be subject to the successful completion of the Mandatory Assessment Instrument as approved by the Licensing Authority.
 - Performance is demonstrated consistently over a period of time and in a suitable range of contexts
 - Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations on road or in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
 - Practical driving aspects must be assessed in a vehicle typical of the class as approved by the Licensing Authority. The use of simulators for driver testing is not permitted.
 - The mandatory assessment tool provided by the Licensing Authority must be used to conduct the final assessment.
 - The Licensing Authority may prescribe approved routes which must be used for the conduct of the final assessment.
- Context of and specific resources for assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations on road or in the workplace
 - Practical driving aspects must be assessed in a vehicle typical of the class as approved by the Licensing
- Method of assessment**

EVIDENCE GUIDE

Authority. The use of simulators for driver testing is not permitted.

- The assessor must use the mandatory assessment tool provided by the Licensing Authority to conduct the assessment for this unit in accordance with Licensing Authority requirements

EXCEPTION

- Where the candidate is already the holder of a valid Australian driver licence of the Light Rigid class, the Licensing Authority has already deemed the candidate to be competent against this standard for the purposes of issuing a driver licence. In this case the requirement to conduct the assessment using the Mandatory Assessment Instrument provided by the Licensing Authority is waived and the assessor may use any suitable process and materials for conducting the assessment.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:

- all light rigid vehicles including trucks and buses greater than 4.5 tonnes or seating more than 12 adults including the driver

Driving may be carried out in typical road transport situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road
- while at a depot, base or warehouse
- while at a client's workplace or work site

Driving must be carried out in typical road transport situations, including:

- negotiating hills
- negotiating a range of more complex traffic infrastructure (for example; roundabouts, traffic lights, stalemate intersections, level crossings of railways)

Vehicle handling procedures may include:

- starting a vehicle
- steering and manoeuvring a vehicle
- accelerating and braking
- positioning and stopping a vehicle

RANGE STATEMENT

- Pre-operational checks may include:
- reversing a vehicle
 - operating vehicle controls, instruments and indicators
 - using defensive driving techniques
 - managing engine performance
 - visual check of vehicle
 - checking and topping up of fluid levels
 - checks of tyre pressures
 - checks of operation of vehicle lights and indicators
 - checks of brakes
- Driving hazards may include (examples only):
- wet and iced roads
 - oil on road
 - animals and objects on road
 - fire in vehicle
 - leaking fuel
 - faulty brakes
 - parked vehicles on the road
 - faulty steering mechanism on vehicle
 - pedestrians crossing the road
 - flooded sections of road
 - windy sections of road
 - foggy conditions
- Factors that can cause traffic delays and diversions may include (examples only):
- traffic accidents
 - flooded sections of road
 - road damage
 - bridge/tunnel damage
 - road works
 - building construction
 - emergency situations such as bushfires, building fires, etc.
 - road closures for special events such as marches, parades, etc.
 - holiday traffic
 - road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.
- Documentation/records may include:
- state/territory light rigid vehicle driving licence requirements
 - vehicle log book or record book (where required)
- Applicable procedures and codes may include:
- relevant state/territory roads and traffic authority driving regulations and licence requirements pertaining to light rigid vehicles
 - relevant state/territory road rules

RANGE STATEMENT

- relevant state/territory permit regulations and requirements
- relevant state/territory OH&S legislation
- relevant state/territory fatigue management regulations
- relevant state/territory environmental protection legislation

Competency Field LIC - Licensing Units

TLILIC2015A Licence to drive medium rigid vehicle

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to obtain a licence to drive a medium rigid vehicle. It includes systematic and efficient control of all vehicle functions, monitoring of traffic and road conditions, management of vehicle condition and performance and effective management of hazardous situations. Assessment of this unit will be undertaken within a licensing examination conducted by, or under the authority of, the relevant Heavy Vehicle Driver Licensing Authority.

Application of the Unit

Application of the Unit

Driving must be carried out in compliance with the licence requirements and regulations of the relevant state/territory roads and traffic authority pertaining to medium rigid vehicles.

Driving is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a medium rigid vehicle across a variety of driving contexts.

Licensing/Legislative Requirements

The primary legislative requirements applicable to this unit of competency are State/Territory legislation in relation to road use and driver licensing.

This unit addresses the underlying knowledge and skills necessary for the granting of a Medium Rigid Driver Licence. Drivers may require additional training to drive particular vehicles of the class or in particular contexts.

Obtaining this competency is a necessary pre-requisite for obtaining a Medium Rigid Driver Licence. However, it is only one of several criteria for obtaining the licence. Prospective licence applicants should check with the State/Territory driver licensing authority for other criteria (for example: licence tenure and medical fitness) to confirm compliance with other eligibility requirements before undertaking training and/or assessment.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Drive the medium rigid vehicle	<p>1.1 The medium rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions</p> <p>1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage</p> <p>1.3 Braking system of medium rigid vehicle is managed and operated to ensure effective control of the vehicle under all conditions</p> <p>1.4 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving</p> <p>1.5 The medium rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning</p> <p>1.6 The medium rigid vehicle is parked, shut down and secured in accordance with traffic regulations, safe&secure.</p> <p>1.7 Load is safely and effectively restrained</p> <p>1.8 Where required, overwidth and overweight permit applications are undertaken in accordance with relevant regulatory requirements</p> <p>1.9 Appropriate procedures are followed in the event of a driving emergency</p>
2 Monitor traffic and road conditions	<p>2.1 An appropriate route of travel is observed taking into account prescribed routes.</p> <p>2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities</p> <p>2.3 Interaction with other road users is conducted courteously and in accordance with road rules to ensure safe and efficient traffic flow</p>
3 Monitor and maintain vehicle performance	<p>3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle</p> <p>3.2 Appropriate signage, lights and the like are checked for operational effectiveness and for conformity to prescribed traffic regulations</p> <p>3.3 Performance and efficiency of vehicle operation is monitored during use</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Medium rigid vehicle controls, instruments and indicators and their use
- Medium rigid vehicle handling procedures
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques
- Driving hazards and related defensive driving techniques
- Pre-operational checks carried out on vehicle and related action
- Differences between transmission types
- Principles of operation of air brakes and procedures for their use
- Principles of stress management when driving a vehicle
- Map reading and navigation of the vehicle and related action (including prescribed routes)
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Causes and effects of fatigue on drivers
- Fatigue management strategies including on-road techniques

Required skills:

- Communicate effectively with others when driving a medium rigid vehicle
- Read and interpret instructions, procedures, information and signs relevant to the driving of a medium rigid vehicle
- Complete documentation related to the driving of a medium rigid vehicle
- Apply fatigue management knowledge and techniques
- Monitor performance of equipment
- Monitor and anticipate traffic hazards and take appropriate action
- Carry out pre-operational checks on a medium rigid vehicle

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation
 - other relevant aspects of the range statement
- Assessment of competency for this unit must be subject to the successful completion of the Mandatory Assessment Instrument as approved by the Licensing Authority.

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations on road or in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including regulations, codes of practice and operation manuals
- The mandatory assessment tool provided by the Licensing Authority must be used to conduct the final assessment.
- The Licensing Authority may prescribe approved routes which must be used for the conduct of the final assessment.
- Practical driving aspects must be assessed in a vehicle typical of the class as approved by the Licensing Authority. The use of simulators for driver testing is not permitted.

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

EVIDENCE GUIDE

- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations on road or in the workplace
- The assessor must use the mandatory assessment tool provided by the Licensing Authority to conduct the assessment for this unit in accordance with Licensing Authority requirements
- Practical driving aspects must be assessed in a vehicle typical of the class as approved by the Licensing Authority. The use of simulators for driver testing is not permitted.

EXCEPTION

Where the candidate is already the holder of a valid Australian driver licence of the Medium Rigid class, the Licensing Authority has already deemed the candidate to be competent against this standard for the purposes of issuing a driver licence. In this case the requirement to conduct the assessment using the Mandatory Assessment Instrument provided by the Licensing Authority is waived and the assessor may use any suitable process and materials for conducting the assessment.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:

- all medium rigid vehicles, for example any 2-axle rigid vehicle, including truck and bus greater than 8 tonnes GVM

Driving may be carried out in typical road transport situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road
- while at a depot, base or warehouse
- while at a client's workplace or work site

RANGE STATEMENT

Driving must be carried out in typical road transport situations, including:

- negotiating hills
- negotiating a range of more complex traffic infrastructure (for example; roundabouts, traffic lights, stalemate intersections, level crossings of railways)

Vehicle handling procedures may include:

- starting a vehicle
- steering and manoeuvring a vehicle
- accelerating and braking
- positioning and stopping a vehicle
- reversing a vehicle
- operating vehicle controls, instruments and indicators
- using air brakes
- using defensive driving techniques
- managing engine performance

Pre-operational checks may include:

- visual check of vehicle
- checking and topping up of fluid levels
- checks of tyre pressures
- checks of operation of vehicle lights and indicators
- checks of brakes

Driving hazards may include (examples only):

- wet and iced roads
- oil on road
- animals and objects on road
- fire in vehicle
- leaking fuel
- faulty brakes
- parked vehicles on the road
- faulty steering mechanism on vehicle
- pedestrians crossing the road
- flooded sections of road
- windy sections of road
- foggy conditions

Factors that can cause traffic delays and diversions may include:

- traffic accidents
- flooded sections of road
- road damage
- bridge/tunnel damage
- road works
- building construction
- emergency situations such as bushfires, building fires, etc.
- road closures for special events such as marches, parades, etc.
- holiday traffic

RANGE STATEMENT

Documentation/records may include:

Applicable procedures and codes may include:

- road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.
- state/territory medium rigid vehicle driving licence requirements
- vehicle log book or record book (where required)
- relevant state/territory roads and traffic authority driving regulations and licence requirements pertaining to medium rigid vehicles
- relevant state/territory road rules
- relevant state/territory permit regulations and requirements
- relevant state/territory OH&S legislation
- relevant state/territory fatigue management regulations
- relevant state/territory environmental protection legislation

LIC - Licensing Units

TLILIC2016A Licence to drive heavy rigid vehicle

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to obtain a licence to drive a heavy rigid vehicle. It includes systematic and efficient control of all vehicle functions, monitoring of traffic and road conditions, management of vehicle condition and performance and effective management of hazardous situations. Assessment of this unit will be undertaken within a licensing examination conducted by, or under the authority of, the relevant Heavy Vehicle Driver Licensing Authority.

Application of the Unit

Application of the Unit

Driving must be carried out in compliance with the licence requirements and regulations of the relevant state/territory roads and traffic authority pertaining to heavy rigid vehicles.

Driving is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a heavy rigid vehicle across a variety of driving contexts.

Licensing/Legislative Requirements

The primary legislative requirements applicable to this unit of competency are State/Territory legislation in relation to road use and driver licensing.

This unit addresses the underlying knowledge and skills necessary for the granting of a Heavy Rigid Driver Licence. Drivers may require additional training to drive particular vehicles of the class or in particular contexts.

Obtaining this competency is a necessary pre-requisite for obtaining a Heavy Rigid Driver Licence. However, it is only one of several criteria for obtaining the licence. Prospective licence applicants should check with the State/Territory driver licensing authority for other criteria (for example: licence tenure and medical fitness) to confirm compliance with other eligibility requirements before undertaking training and/or assessment.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Drive the heavy rigid vehicle	<p>1.1 The heavy rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions</p> <p>1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage</p> <p>1.3 Braking system of heavy rigid vehicle is managed and operated to ensure effective control of the vehicle under all conditions</p> <p>1.4 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving</p> <p>1.5 The heavy rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning.</p> <p>1.6 The heavy rigid vehicle is parked, shut down and secured in accordance with traffic regulations, safe and secure</p> <p>1.7 Load is safely and effectively restrained</p> <p>1.8 Where required, overwidth and overweight permit applications are undertaken in accordance with relevant regulatory requirements</p> <p>1.9 Appropriate procedures are followed in the event of a driving emergency</p>
2 Monitor traffic and road conditions	<p>2.1 An appropriate route of travel is observed taking into account prescribed routes.</p> <p>2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and ensure no injury to people or damage to property, equipment loads and facilities</p> <p>2.3 Interaction with other road users is conducted courteously and in accordance with road rules to ensure safe and efficient traffic flow</p>
3 Monitor and maintain vehicle performance	<p>3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle</p> <p>3.2 Appropriate signage, lights and the like are checked for operational effectiveness and for conformity to prescribed traffic regulations</p> <p>3.3 Performance and efficiency of vehicle operation is monitored during use</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Heavy rigid vehicle controls, instruments and indicators and their use
- Heavy rigid vehicle handling procedures
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques
- Pre-operational checks carried out on heavy rigid vehicle and related action
- Differences between transmission types
- Principles of operation of air brakes and procedures for their use
- Map reading and navigation of the vehicle and related action (including prescribed routes)
- Driving hazards and related defensive driving techniques
- Principles of stress management when driving a vehicle
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Causes and effects of fatigue on drivers
- Fatigue management strategies and on-road techniques

Required skills:

- Communicate effectively with others when driving a heavy rigid vehicle
- Read and interpret instructions, procedures, information and signs relevant to when the driving of a heavy rigid vehicle
- Complete documentation related to the driving of a heavy rigid vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when driving a heavy rigid vehicle
- Monitor and anticipate traffic hazards and take appropriate action
- Apply fatigue management knowledge and techniques
- Monitor performance of the vehicle and its equipment and take appropriate action where required
- Carry out pre-operational checks

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation
 - other relevant aspects of the range statement
- Assessment of competency for this unit must be subject to the successful completion of the Mandatory Assessment Instrument as approved by the Licensing Authority

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations on road or in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including regulations, codes of practice and operation manuals
- The mandatory assessment tool provided by the Licensing Authority must be used to conduct the final assessment.
- The Licensing Authority may prescribe approved routes which must be used for the conduct of the final assessment
- Practical driving aspects must be assessed in a vehicle typical of the class as approved by the Licensing Authority. The use of simulators for driver testing is not permitted.

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation

EVIDENCE GUIDE

- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations on road or in the workplace
- The assessor must use the mandatory assessment tool provided by the Licensing Authority to conduct the assessment for this unit in accordance with Licensing Authority requirements
- Practical driving aspects must be assessed in a vehicle typical of the class as approved by the Licensing Authority. The use of simulators for driver testing is not permitted.

EXCEPTION

Where the candidate is already the holder of a valid Australian driver licence of the Heavy Rigid class, the Licensing Authority has already deemed the candidate to be competent against this standard for the purposes of issuing a driver licence. In this case the requirement to conduct the assessment using the Mandatory Assessment Instrument provided by the Licensing Authority is waived and the assessor may use any suitable process and materials for conducting the assessment.

--	--

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- Accurately record and maintain information relating to crane operations
- Use communication techniques in the workplace including whistles, hand signals and use of two-way radios
- Use communication skills at a level sufficient to communicate with other site personnel
- Assessment of ground conditions to confirm that the site is suitable (e.g. firm, level and safe) to operate crane
- Operate crane including all functions to their maximum extension in the lifting and moving of loads to the safe working rated capacity in conjunction with other associated personnel
- Mobile loads using best mobile practice
- Apply risk assessment and hazard control strategies, including hierarchy of control as applied to the positioning and safe operation of the crane (particular awareness of the risks associated with overhead powerlines/electrical cables, ground conditions, crane tipping and demolition sites)
- Use and interpret crane manufacturer's specifications and data, including load charts to enable the crane to be configured for the load
- Verify problems and equipment faults and demonstrate appropriate response procedures

Required knowledge:

- Appropriate mathematical procedures for estimation and measurement of loads
- Commonwealth, state or territory OH&S legislation, standards and codes of practice relevant to the full range of processes for the crane class
- Ability to read and comprehend manufacturer's instructions, procedures and safety signs
- Understanding of crane characteristics and capabilities (including use of load charts) to allow the configuration of the crane to suit the range of loads

REQUIRED SKILLS AND KNOWLEDGE

- Understanding of the hierarchy of hazard identification and control
- Organisational and workplace standards, requirements, policies and procedures for conducting operations for the crane class
- Procedures for the recording, reporting and maintenance of workplace records and information
- Typical routine problems encountered in the operation of the crane and equipment and adjustments required for correction

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for the Training Package.

Overview of assessment

Successful assessment of this unit meets the competency requirement of the National Standard for Licensing Persons Performing High Risk Work.

State/territory OH&S regulators have mandated the use of Assessment Instruments and Instructions for Assessment for this unit which have been endorsed by the national body responsible for OH&S matters.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Compliance with OH&S licensing legislation.
- Communicate and work safely with others in the work area.
- Risk assessment and management procedures (particular awareness of the risks associated with overhead powerlines/electrical cables, ground conditions, crane tipping, other vehicles and personnel).
- Operation of a non-slewing mobile crane including all functions to their maximum extension in the lifting and moving of loads to the safe working rated capacity of non-slewing mobile cranes (over 3t capacity) in conjunction with other associated personnel.
- Appropriate mathematical procedures for estimation of loads.

Context of and specific

- Assessment of the safe and effective application of knowledge and skill to workplace tasks

EVIDENCE GUIDE	
resources for assessment	<p>(performance) must be undertaken using the endorsed Assessment Instrument.</p> <ul style="list-style-type: none"> • Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace setting. • Assessors must ensure that the assessment in the workplace is organised to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace. • Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints. • Assessment is to comply with relevant appropriate standard requirements. • Applicants must have access to: <ul style="list-style-type: none"> • Personal Protective Equipment (PPE) for the purpose of the Performance Assessment • appropriate non-slewing crane (greater than 3 tonnes) and associated equipment in safe condition • suitable loads as specified by endorsed assessment instrument • communication equipment (e.g. two-way radios, whistles, etc.) • other associated personnel to sling and direct the loads.
Method of assessment	<ul style="list-style-type: none"> • Assessment must be conducted using the endorsed Assessment Instruments. These Instruments provide advice on their application. • The use of 'simulators' in the assessment of this unit of competency is not acceptable. • Assessment may be in conjunction with the assessment of other units of competency. • Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. • Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstances, but is able to be transferred to other circumstances.
Guidance information for	<ul style="list-style-type: none"> • Further information about endorsed Assessment Instruments may be obtained from state/territory

EVIDENCE GUIDE	
assessment	OH&S regulators.

Range Statement

RANGE STATEMENT	
<i>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below.</i>	
Hazards	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • ground stability (e.g. ground condition, recently filled trenches, slopes) • overhead hazards (e.g. powerlines, service pipes) • insufficient lighting • traffic (e.g. pedestrians, vehicles, other plant) • environmental conditions (e.g. wind, lightning, storms, etc.) • other specific hazards (e.g. dangerous materials)
Hazard control measures	<p>Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls</p> <p>It includes the application of the hierarchy of control, the six-step preference of control measures to manage and control risk:</p> <ol style="list-style-type: none"> 1 elimination 2 substitution 3 isolation 4 engineering control measures 5 using safe work practices 6 personal protective equipment
Appropriate standards	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • codes of practice • legislation • Australian standards • manufacturer's specifications • industry standards (where applicable)

RANGE STATEMENT	
Associated personnel	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • doggers • riggers
Appropriate	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • crane capabilities • environmental conditions (e.g. wind, lightning, storms, etc.)
Crane	<p>May include:</p> <ul style="list-style-type: none"> • a crane (greater than 3 tonnes capacity) which meets the requirements of AS1418 • articulated type mobile cranes • locomotive cranes <p>Does not include vehicle tow truck operations</p>
Communication method	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • verbal and non-verbal language • written instructions • signage • hand signals • listening • questioning to confirm understanding • appropriate worksite protocol
Signage and labels	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • crane data plates/labels • load charts • crane decals • control labels
Procedures	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • manufacturer's guidelines (instructions, specifications, operators manual or checklists) • industry operating procedures • workplace procedures (work instructions, operating procedures, checklists)
Controls	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • luffing levers • hoisting and lowering levers • slewing levers including brake

RANGE STATEMENT	
	<ul style="list-style-type: none"> boom extension levers (where fitted)
Service logbook	<p>May include but not limited to:</p> <ul style="list-style-type: none"> any logbook service book history record system where the service and maintenance history is kept
Crane safety devices	<p>May include but not limited to:</p> <ul style="list-style-type: none"> horns/sirens audible and visual reversing devices operator restraint devices lights
Communication equipment	<p>May include but not limited to:</p> <ul style="list-style-type: none"> fixed channel two-way radios whistles bells buzzers <p>NB: where radio communication equipment is used the transmitting frequencies of the equipment must be selected to prevent interference to or from other radio equipment being used in the vicinity of the crane</p>
Ground suitability	<p>May include but not limited to:</p> <ul style="list-style-type: none"> rough uneven ground backfilled ground soft soils hard compacted soil rock bitumen concrete
Stability	<p>May include but not limited to:</p> <ul style="list-style-type: none"> deploying outriggers establishing correct size plates or packing correctly positioning plates or packing
Crane configuration	<p>May include but not be limited to:</p> <ul style="list-style-type: none"> boom/jib fly-jib counterweights

RANGE STATEMENT	
Hazard prevention/control measures	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • safety tags on electrical switches/isolators • insulated powerlines • safety observer used inside exclusion zone • disconnected power • traffic barricades and control/s • pedestrian controls • trench covers • movement of obstructions • personal protective equipment • adequate illumination
Test lift	<p>The load is lifted just clear of the lifting plane to allow for checks to be safely made in consultation with associated personnel to ensure that:</p> <ul style="list-style-type: none"> • near capacity loads do not overload the crane • loads of unusual shape or weight distribution are correctly slung • load measuring equipment can be used to verify the calculated weight of the load • all crane equipment is functioning properly • adjustments to the slinging can be made in a safe manner
Relevant crane movements	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • telescope in and out • boom/jib up and down • articulating (as applicable) • raise and lower hoist (as applicable)
Communication signals	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • stop - hand • stop - whistle • hoist up - hand • hoist up - whistle • hoist down - hand • hoist down - whistle • luff boom down - hand • luff boom down - whistle • luff boom up - hand • luff boom up - whistle

RANGE STATEMENT	
	<ul style="list-style-type: none"> • telescope out - hand • telescope out - whistle • telescope in - hand • telescope in - whistle • slew/articulate right - hand • slew/articulate right - whistle • slew/articulate left - hand • slew/articulate left - whistle
Unplanned and/or unsafe situations	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • failure/loss of control (e.g. brakes and steering) • failure of equipment (e.g. hydraulic system) • environmental conditions (e.g. wind, lightning, storms, etc.)
Planned route	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • unusual or difficult terrains • obstacles or obstruction
Best mobile practice	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • minimum speed • gentle acceleration and braking (to minimise load swing) • minimum boom/jib length • carrying the load near to the ground surface • use of handheld taglines
Shut down	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • retracting boom/jib/fly (where applicable) • retracting hoist rope and hook block • idling engine to stabilise temperature • retracting outriggers/stabilisers (where applicable) • turning off engine

Unit Descriptor

This unit involves the skills and knowledge required to obtain a licence to drive a heavy combination vehicle. It includes systematic and efficient control of all vehicle functions, monitoring of traffic and road conditions, management of vehicle condition and performance, coupling and uncoupling of trailer, and effective management of hazardous situations. Assessment of this unit will be undertaken within a licensing examination conducted by, or under the authority of, the relevant Heavy Vehicle Driver Licensing Authority.

Application of the Unit

Application of the Unit

Driving must be carried out in compliance with the licence requirements and regulations of the relevant state/territory roads and traffic authority pertaining to heavy combination vehicles.

Driving is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a heavy combination vehicle across a variety of driving contexts.

Licensing/Legislative Requirements

The primary legislative requirements applicable to this unit of competency are State/Territory legislation in relation to road use and driver licensing.

This unit addresses the underlying knowledge and skills necessary for the granting of a Heavy Combination Driver Licence. Drivers may require additional training to drive particular vehicles of the class or in particular contexts.

Obtaining this competency is a necessary pre-requisite for obtaining a Heavy Combination Driver Licence. However, it is only one of several criteria for obtaining the licence. Prospective licence applicants should check with the State/Territory driver licensing authority for other criteria (for example: licence tenure and medical fitness) to confirm compliance with other eligibility requirements before undertaking training and/or assessment.

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Drive the heavy combination vehicle

- 1.1 The heavy combination vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions
- 1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
- 1.3 Braking system of heavy combination vehicle is managed and operated to ensure effective control of the vehicle under all conditions
- 1.4 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.5 The heavy combination vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
- 1.6 The heavy combination vehicle is parked, uncoupled, shut down and secured in accordance with traffic regulations, safe and secure
- 1.7 Load is safely and effectively restrained
- 1.8 Where required, overwidth and overweight permit applications are undertaken in accordance with relevant regulatory requirements
- 1.9 Appropriate procedures are followed in the event of a driving emergency

2 Monitor traffic and road conditions

- 2.1 An appropriate route of travel is observed taking into account prescribed routes.
- 2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and ensure no injury to people or damage to property, equipment loads and facilities
- 2.3 Interaction with other road users is conducted courteously and in accordance with road rules to ensure safe and efficient traffic flow

3 Monitor and maintain vehicle performance

- 3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle
- 3.2 Appropriate signage, lights and the like are checked for operational effectiveness and for conformity to prescribed traffic regulations
- 3.3 Prime mover and trailer are correctly aligned and coupled
- 3.4 Coupled vehicle is checked and tested to ensure it is correctly secured and to confirm that it is fully operational
- 3.5 Performance and efficiency of vehicle operation is monitored during use

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Heavy combination vehicle controls, instruments and indicators and their use
- Heavy combination vehicle handling procedures
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques
- Pre-operational checks carried out on heavy combination vehicle and related action
- Differences between transmission types
- Principles of operation of air brakes and procedures for their use
- Driving hazards and related defensive driving techniques
- Map reading and navigation of the vehicle and related action (including prescribed routes)
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Principles of stress management when driving a vehicle
- Causes and effects of fatigue on drivers
- Fatigue management strategies including on-road techniques

Required skills:

- Communicate effectively with others when driving a heavy combination vehicle
- Read and interpret instructions, procedures, information and signs relevant to the driving of a heavy combination vehicle
- Complete documentation related to the driving of a heavy combination vehicle
- Monitor and anticipate traffic hazards and take appropriate action
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Apply map reading and road navigation techniques to the operation of a heavy combination vehicle
- Monitor performance of vehicle, its trailers and its equipment and take appropriate action

Required skills:

where required

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation
 - other relevant aspects of the range statement
- Assessment of competency for this unit must be subject to the successful completion of the Mandatory Assessment Instrument as approved by the Licensing Authority.

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations on road or in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including regulations, codes of practice and operation manuals
- The mandatory assessment tool provided by the Licensing Authority must be used to conduct the final assessment.
- The Licensing Authority may prescribe approved routes which must be used for the conduct of the final assessment.

EVIDENCE GUIDE

Method of assessment

- Practical driving aspects must be assessed in a vehicle typical of the class as approved by the Licensing Authority. The use of simulators for driver testing is not permitted.
- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations on road or in the workplace
- Practical driving aspects must be assessed in a vehicle typical of the class as approved by the Licensing Authority. The use of simulators for driver testing is not permitted.

EXCEPTION

Where the candidate is already the holder of a valid Australian driver licence of the Heavy Combination class, the Licensing Authority has already deemed the candidate to be competent against this standard for the purposes of issuing a driver licence. In this case the requirement to conduct the assessment using the Mandatory Assessment Instrument provided by the Licensing Authority is waived and the assessor may use any suitable process and materials for conducting the assessment.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:

- all heavy combination vehicles that may be driven on public and private roads and work sites

Driving may be carried out in typical road transport situations,

- operations conducted at day or night
- typical weather conditions

RANGE STATEMENT

including:

- on the open road
- on a private road
- while at a depot, base or warehouse
- while at a client's workplace or work site

Driving must be carried out in typical road transport situations, including:

- negotiating hills
- negotiating a range of more complex traffic infrastructure (for example; roundabouts, traffic lights, stalemate intersections, level crossings of railways)

Vehicle handling procedures may include:

- starting a vehicle
- steering and manoeuvring a vehicle
- accelerating and braking
- positioning and stopping a vehicle
- reversing a vehicle
- operating vehicle controls, instruments and indicators
- using air brakes
- using defensive driving techniques
- managing engine performance

Pre-operational checks may include:

- visual check of vehicle
- checking and topping up of fluid levels
- checks of tyre pressures
- checks of operation of vehicle lights and indicators
- checks of brakes
- checks of coupling equipment

Driving hazards may include (examples only):

- wet and iced roads
- oil on road
- animals and objects on road
- fire in vehicle
- leaking fuel
- faulty brakes
- parked vehicles on the road
- faulty steering mechanism on vehicle
- pedestrians crossing the road
- flooded sections of road
- windy sections of road
- foggy conditions

Factors that can cause traffic delays and diversions may include (examples only):

- traffic accidents
- flooded sections of road
- road damage
- bridge/tunnel damage
- road works

RANGE STATEMENT

- Documentation/records may include:
- Applicable procedures and codes may include:
- building construction
 - emergency situations such as bushfires, building fires, etc.
 - road closures for special events such as marches, parades, sporting events, etc.
 - holiday traffic
 - road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.
 - state/territory heavy combination vehicle driving licence/permit requirements
 - vehicle log book or record book (where required)
 - relevant state/territory roads and traffic authority driving regulations and licence requirements pertaining to heavy combination vehicles
 - relevant state/territory road rules
 - relevant state/territory permit regulations and requirements
 - relevant state/territory OH&S legislation
 - relevant state/territory fatigue management regulations
 - relevant state/territory environmental protection legislation

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Record and balance petty cash transactions	1.1 Petty cash vouchers are prepared in accordance with workplace procedures 1.2 Petty cash claims and vouchers are checked for accuracy and authenticity before processing 1.3 Petty cash transactions are recorded 1.4 Irregularities are noted and referred to nominated person/section in accordance with workplace procedures
2 Balance all transactions	2.1 Transactions are presented to nominated person/section for checking in accordance with workplace procedures 2.2 Invoices for payment to creditors are reconciled in accordance with workplace procedures 2.3 Discrepancies between invoices and delivery notes/service agreements are identified and reported for resolution in accordance with workplace procedures 2.4 Errors in invoice charges are identified and corrective action is undertaken within scope of authority in accordance with workplace procedures
3 Rectify discrepancies as directed	3.1 Correct and authorised invoices are processed for payment and, where required, entered into financial records 3.2 Creditor enquiries are resolved within scope of authority or referred to other personnel in accordance with workplace procedures
4 Prepare invoices for debtors	4.1 Preparatory calculations are performed to produce accurate invoices 4.2 Relevant documentation is completed to ensure accuracy of contents 4.3 Invoices are distributed to nominated personnel for verification prior to despatch 4.4 Verified invoices are despatched within designated timelines 4.5 Verified figures are entered into financial journals 4.6 Documents are filed for auditing purposes and, if required, follow-up action
5 Prepare and process banking documents	5.1 Financial transactions are listed on deposit forms in accordance with financial institution's requirements 5.2 Pay-in documentation is balanced with all financial calculations 5.3 Financial institution deposit totals are balanced with internal records 5.4 Deposits are lodged with the financial institution

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant financial regulations, codes and procedures including pertinent taxation documentation requirements
- Relevant OH&S and environmental procedures and regulations
- Workplace procedures for the preparing and processing of financial documents
- Contacts and sources of information/documentation needed for the preparation and processing of financial documents
- Customer service policies and procedures
- Documentation requirements of banking institutions, governments and other relevant agencies
- Typical problems that can occur when preparing and processing financial documents and appropriate action that can be taken to prevent or solve them

Required skills:

- Communicate effectively with others when preparing and processing financial documents
- Read and interpret instructions, procedure and information relevant to the preparation and processing of financial documents
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the preparation and processing of financial documents
- Operate electronic communication equipment to required protocol
- Perform required calculations both manually and with the aid of relevant equipment and calculators
- Work collaboratively with others when preparing and processing financial documents
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when preparing and processing financial documents in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unanticipated situations that may occur when preparing and processing financial documents
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail

Required skills:

- Select and use relevant equipment when preparing and processing financial documents, including the use of an appropriate range of office equipment, computer systems and financial software packages
- Adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:

EVIDENCE GUIDE

- through activities in an appropriately simulated environment at the registered training organisation, and/or
- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted in:

- a range of organisations in the transport, warehousing, distribution and/or storage industries and may be conducted by day or night

Customers may be:

- internal or external

Requirements for work may include:

- site restrictions and procedures
- use of safety and personal protective equipment
- specified loading operations
- communications equipment
- hours of operation
- authorities and permits
- financial regulations and processes
- privacy and security procedures

Processing of financial documents may include:

- recording and balancing petty cash transactions
- balancing all transactions
- rectifying discrepancies as directed
- preparing invoices for debtors
- preparing and processing banking documents

Lodgement of transactions with financial institutions may include:

- electronic banking
- manual processes including the use of third parties

Preparation of documentation is undertaken:

- within scope of authority

Business source documents may include:

- electronic banking
- requisitions
- orders
- service statements
- invoices and receipts

RANGE STATEMENT

- despatch and receipt notes
 - credit notes
 - statements
 - sales tax statements
 - consignment notes
- Communications systems may involve:
- telephone
 - fax
 - email
 - electronic data transfer of information (EDI)
 - mail
- Consultative processes may involve:
- other employees and supervisors
 - suppliers, potential customers and existing clients
 - relevant authorities
 - banking institutions
 - other agencies
 - management and union representatives
 - OH&S specialists
 - other maintenance, professional or technical staff
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - workplace procedures
 - organisational procedures
 - established procedures
- Documentation/records may include:
- operations manuals, job specifications and procedures and induction documentation
 - guidelines concerning relevant financial regulations, codes and procedures including relevant taxation requirements
 - competency standards and training materials
 - manufacturers/client specifications, instructions and labelling advice including material safety data sheets
 - workplace operating procedures and policies
 - supplier and/or client instructions
 - Australian and international standards, criteria and certification requirements
 - communications technology equipment, oral, aural or signed communications
 - OH&S procedures
 - quality assurance procedures
 - security procedures
- Applicable regulations and legislation may include:
- relevant financial regulations, codes and procedures including relevant taxation requirements
 - Australian and international standards and certification

RANGE STATEMENT

requirements

- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
