Assessment Requirements for BSBTEC201 Use business software applications

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- select and use at least three business software applications on two occasions each.

In the course of the above, the candidate must:

- select and use technology safely and according to organisational requirements
- identify and address faults according to requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key features of:
 - organisation's work health and safety requirements relevant to own role
 - organisation's requirements for file naming and storage
 - applications used for organising electronic information and data.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace equipment and resources
- electronic files, information and data
- workplace documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC203 Research using the internet

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to plan, conduct and present research using the internet within an organisational context.

The unit applies to individuals who perform a range of routine tasks in the workplace, using a limited range of practical skills and fundamental knowledge of research in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan research	1.1 Confirm task requirements 1.2 Identify research objectives in consultation with relevant stakeholders 1.3 Identify potential sources for research information according to organisational policies and procedures 1.4 Select application and search engine according to organisational policies and procedures 1.5 Plan key search terms to be used in research
2. Conduct research	2.1 Power up digital device and access internet using selected application

ELEMENT	PERFORMANCE CRITERIA
	2.2 Open search engine according to research plan 2.3 Enter search terms according to research plan 2.4 Collect information according to research plan and organisational policies and procedures 2.5 Use relevant help functions to overcome simple issues, where required
3. Present research	3.1 Document information collected according to task requirements 3.2 Deliver document to relevant stakeholders according to organisational policies and procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Recognises textual information within organisational and task requirements to determine work requirements
Writing	<ul style="list-style-type: none"> Records numerical and textual information in accordance with requirements of task
Oral Communication	<ul style="list-style-type: none"> Participates in a variety of spoken exchanges with relevant stakeholders in an effort to clarify research purpose, audience and presentation requirements
Self-management	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Technology	<ul style="list-style-type: none"> Understands functions and features of specific digital applications and uses these to perform work tasks

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and prepare resources	1.1 Select and use technology and software applications to produce required business documents 1.2 Select layout and style of publication according to information and organisational requirements 1.3 Use basic design principles and ensure document design is consistent with organisational requirements 1.4 Discuss and clarify format and style with required stakeholder
2. Design document	2.1 Identify, open and create files according to task and organisational requirements 2.2 Design document and ensure efficient entry of information

ELEMENT	PERFORMANCE CRITERIA
	2.3 Use a range of functions to ensure consistency of design and layout
3. Produce document	3.1 Complete document production according to organisational policies, procedures and requirements 3.2 Check document produced to ensure it meets task requirements for style and layout 3.3 Store document appropriately and save document 3.4 Use help function to overcome basic difficulties with document design and production, where required
4. Finalise document	4.1 Proofread document for readability, accuracy and consistency of language, style and layout prior to final output 4.2 Modify document according to task requirements 4.3 Name and store document in accordance with organisational requirements and exit application 4.4 Present document according to task requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- design, produce and finalise four different types of business documents, using at least two different software applications.

In the course of the above, the candidate must:

- comply with organisational policies and procedures for producing business documents
- adhere to task requirements when producing documents including:
 - applying basic design principles
 - applying consistent formatting
 - using appropriate styles
 - using correct layouts
 - proofreading
- use required data storage options.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- technology required to produce document
- key functions and features of contemporary computer applications
- organisational policies and procedures
- organisational requirements for document design, including style guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare and plan to develop spreadsheet	1.1 Organise personal work environment in accordance with ergonomic requirements 1.2 Analyse task and determine specifications for spreadsheets 1.3 Identify requirements of data entry, storage, output, reporting and presentation requirements 1.4 Apply work organisation strategies and energy and resource conservation techniques
2. Develop a linked spreadsheet solution	2.1 Use spreadsheet design software functions and formulae to meet identified requirements 2.2 Link spreadsheets according to software procedures

ELEMENT	PERFORMANCE CRITERIA
	2.3 Format cells and use data attributes assigned with cell references, according to task requirements 2.4 Test formulae to confirm output meets task requirements
3. Automate and standardise spreadsheet operation	3.1 Evaluate and identify tasks requiring automation 3.2 Create, use and edit macros to fulfil requirements of task and automate spreadsheet operation 3.3 Develop, edit and use templates and ensure consistency of design and layout according to task requirements
4. Use spreadsheets	4.1 Enter, check and amend data according to organisational and task requirements 4.2 Import and export data between compatible spreadsheets and adjust documents, according to software and organisational procedures 4.3 Use help function to overcome problems with spreadsheet design and production 4.4 Preview, adjust and prepare spreadsheet in accordance with organisational and task requirements
5. Represent numerical data in graphic form and store spreadsheet	5.1 Determine style of graph to meet specified requirements and manipulate spreadsheet data, where required 5.2 Create graphs with labels and titles from numerical data contained in a spreadsheet file 5.3 Name and store spreadsheet in accordance with organisational requirements and exit application

BSBWHS211 Contribute to the health and safety of self and others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to work in a manner that is healthy and safe in relation to self and others, and to assist in responding to incidents. It covers following work health and safety (WHS) policies, procedures, instructions and requirements; and participating in WHS consultative processes.

The unit applies to those who require a basic knowledge of WHS to carry out own work in a defined context, under direct supervision or with some individual responsibility, in a range of industry and workplace contexts.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBWHS308 Participate in WHS hazard identification, risk assessment and risk control processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit and, on at least two occasions, to:

- participate in selecting and using required methods to identify, report and record hazards
- assess and record risks for identified hazards
- promote and support worker consultation and participation in hazard identification and risk assessment
- participate in developing, selecting and implementing risk control options and plans for identified hazards.
-

Knowledge Evidence

The candidate must demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- work health and safety (WHS) legislative requirements, regulations, codes of practice and standards relating to:
 - WHS hazard identification, risk assessment and risk control
 - WHS hazard communication, consultation and participation
 - identifying duty holders
 - recordkeeping
 - specific hazard identification, risk assessment and control methods
- internal and external sources of WHS information and data, and procedures for accessing them
- concept of hazards, risks and risk factors
- basic principles of incident causation and injury processes
- WHS organisational policies and procedures relating to identifying hazards, and assessing and controlling risks:

- WHS hazards that may be present in the workplace, the harm they can cause and how this harm occurs
- types of hazard and risk registers
- responding to WHS issues, including risk control options for different hazards and work situations, and suitable risk assessment methods
- workplace communication processes for reporting and recording, and plans for sharing information about hazard identification, risk assessment and risk control.
-

Assessment Conditions

Assessment must comply with WHS laws, and WHS legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- organisational policies, standard operating procedures and plans required for the performance evidence
- WHS laws relevant to hazard identification, risk assessment and risk control
- relevant WHS data files
- opportunities for interaction with others
- workplace equipment and resources required to demonstrate the performance evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS414 Contribute to WHS risk management

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to contribute to WHS risk management, which includes the processes for identifying work health and safety (WHS) hazards and assessing and controlling the risk relating to those identified hazards.

It involves contributing to the development, implementation and evaluation of risk controls according to legislative and organisational requirements.

The unit applies to those working in a broad range of roles across all industries. WHS hazard identification and risk control processes are those defined in written workplace procedures.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to contribute to:

- identifying at least two different (WHS) hazards and controlling the risks associated with those hazards
- evaluating the effectiveness of the above risk controls.

During each of the above occasions, the candidate must:

- identify and interpret information and data about WHS requirements and apply them to the selection and application of techniques, tools and processes for hazard identification, risk assessment and risk control
- contribute to documenting processes
- communicate with required people about WHS requirements and compliance
- comply with WHS requirements for hazard identification, risk assessment, and risk control activities
- identify WHS duty holders and their duties.
-

Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- internal and external sources of WHS information and data relating to the performance evidence, and procedures for accessing them
- WHS hazard identification, risk assessment and risk control processes specified in:
 - required WHS laws
 - organisational WHS policies, procedures, processes, and systems
- risk management requirements, including:
 - identifying duty holders and their roles and responsibilities

- selecting and using hazard identification tools and techniques
- undertaking, documenting and communicating risk assessments
- evaluating risk controls
- documenting and communicating risk control plan
- differences between hazards and risks in the workplace
- range of common workplace hazards, and the nature, severity and likelihood of those hazards
- risk assessment and controls that can eliminate or minimise risks.
-

Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- workplace equipment, technology, software and consumables required to access information on WHS laws
- WHS laws, and organisational policies, procedures, processes and systems required to demonstrate the performance evidence
- case studies and, where possible, real situations
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS513 Lead WHS risk management

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to lead the management of work health and safety (WHS) risks in an organisation. The unit includes facilitating the identification of hazards and potential hazards, leading the assessment of associated risks, selecting and implementing suitable risk controls, and evaluating the overall effectiveness of the organisational WHS risk management process. It involves communicating with stakeholders throughout the process.

The unit applies to those in an organisation who provide specialised knowledge and guidance to a range of personnel when leading the management of WHS risks.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

BSBWHS517 Contribute to managing a WHS information system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to contribute to managing a work health and safety information system (WHSIS) that supports the effective management of WHS. It involves accessing, collecting and analysing WHS information and data; evaluating the effectiveness of the WHSIS and contributing to improving the management of WHS; and communicating the change.

The unit applies to those who contribute to managing a WHSIS. These people work in a range of WHS roles across all industries, and apply a substantial knowledge base and well-developed skills in a wide variety of WHS contexts. Individuals will apply skills and knowledge to enable them to manage information and data management processes, including analysis of the data. They are not required to design the actual information system or process.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

BSBWHS520 Manage implementation of emergency procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to implement initial response procedures for emergencies. Its focus is on the implementation of procedures already developed for short-term emergency responses. It assumes that expert advice will be available in identifying potential emergencies and in formulating response plans.

The unit applies to those with supervisory responsibilities for managing work health and safety (WHS) in the workplace who contribute to the implementation of procedures for responding to emergencies. These people work in a range of WHS roles across all industries, and apply a substantial knowledge base and well-developed skills in a wide variety of WHS contexts.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

CHCDIS004 Communicate using augmentative and alternative communication strategies

Modification History

Release	Comments
Release 1	<p>This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Minimal change to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements. Significant changes to knowledge evidence.</p>

Application

This unit describes the skills and knowledge required to communicate with people who have complex communication needs through effective use of Augmentative and Alternative Communication (AAC) strategies and systems.

AAC refers to methods that replace or supplement speech to address the needs of people whose oral speech skills limit their ability to meet their participation and communication needs.

AAC systems comprise communication aids, symbols, strategies, and techniques and methods that may be aided or unaided.

This unit applies to disability support work in a variety of contexts. Work performed requires a range of well developed, person-centred skills where some discretion and judgement is required and workers will take responsibility for their own outputs.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.2 Use appropriate supports to aid the person's current communication capacity

1.3 Document the outcomes of this process in line with organisation procedures

1.4 Consult with additional people including family and/or carers and/or relevant others as required

1.5 Make appropriate referrals to professionals and other service providers as required in consultation with supervisor

2. Develop effective AAC strategies

2.1 Provide information to relevant professional/s about the person with disability in relation to their likes/dislikes, daily activities and current communication needs

2.2 Develop communication strategies to meet individual needs and level of communication, considering the person's history and preferences and in consultation with relevant senior staff/professionals

2.3 Adjust available tools and programs to address individual needs and preferences

2.4 Seek advice from other staff and relevant others as required and work within scope of practice

3. Implement AAC strategy

3.1 Use different strategies and devices in AAC

3.2 Document communication support strategies in the person's individualised plan

3.3 Organise the environment to optimise communication opportunities

3.4 Reinforce communication by timely and appropriate response

3.5 Identify difficulties experienced by the person when communicating and respond to difficulties within own work role and responsibilities

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

4. Monitor, report and review communication strategies

3.6 Refer difficulties outside own role and responsibilities to appropriate person

3.7 Provide practice opportunities and information to the person to maintain consistency in their use of communication strategies and encourage contact with other users or support persons

4.1 Set up and maintain reporting and recording system to assist with monitoring and review

4.2 Review reporting and recordings to monitor success of communication strategies and make changes as required in consultation with senior staff/professionals

4.3 Identify barriers to the effective use of AAC strategies and devices

4.4 Work with other relevant people to overcome the barriers

4.5 Implement any modifications to communication strategies and devices

4.6 Identify opportunities to increase communication vocabulary

4.7 Maintain accurate written records according to established directions and within organisation protocols

Assessment Requirements for FNSACC603 Implement tax plans and evaluate tax obligations

Modification History

Release	Comments
Release 3	This version first released with FNS Financial Services Training Package Release 8.1. Pre-requisite unit updated.
Release 2	This version first released with FNS Financial Services Training Package Version 3.1 Update to pre-requisite unit code

Performance Evidence

Evidence of the ability to:

- research and critically evaluate new or changed legislative requirements and apply where relevant to the preparation of the client's tax documentation
- identify legal entity's tax data required to calculate taxable income
- provide taxation advice to clients in line with individual requirements
- prepare tax documentation and tax plans for legal entities that comply with:
 - Australian taxation law and Australian Taxation Office (ATO) rulings and lodgement schedules
 - accounting principles and practices
 - tax entity's organisational policy and procedures
- evaluate tax plan for compliance with legislative requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and explain ethical considerations and legislative requirements relevant to the preparation of tax documentation for legal entities, including:
 - conflict of interest

- responsibilities of tax agents including Code of Professional Conduct obligations under the Tax Agent Services Act (TASA) and Tax Agent Services Regulations (TASR)
- government tax policy documents issued by Reviews, Treasury and Board of Taxation
- explanatory materials in relation to legislation
- statutes
- court and Administrative Appeals Tribunal decisions
- Commissioner of Taxation's interpretive guidance in Rulings and Determinations
- explain critical and key elements of Australian taxation law as it relates to tax documentation for legal entities such as companies, trusts, partnerships and sole traders including:
 - the rules and principles of Australian tax law, with an understanding of the legal environment in which these principles operate, basics of the legal system, constitutional considerations and separation of powers
 - the key aspects of income tax law covering concepts of residence and source, related elements of international tax, assessable income, deductions, tax rebates and offsets, and tax accounting
 - the key aspects of taxes that extend the ordinary income tax base, including relevant principles and application of the capital gains tax (CGT) and fringe benefits tax (FBT) rules
 - goods and services tax (GST)
 - taxation aspects of superannuation law
 - administrative aspects of the taxes identified above including documentation, tax collection and withholding mechanisms, assessments, obligations, rulings, penalties and audits
 - specific and general anti-avoidance tax rules
- describe the key sources of information and taxable transactions data required to calculate taxable income, including:
 - allowable deductions
 - capital gains
 - financial adjustments such as write-offs and revaluations
 - income
 - payments
 - purchases
 - superannuation payments
- describe the key features of organisational policy and procedures relating to the preparation of tax documentation for legal entities
- outline the key accounting principles and practices relevant to preparation of tax documentation for the different types of legal entities
- discuss ethical considerations for the preparation of returns, including the Code of Professional Conduct's disclosure and confidentiality requirements
- outline financial management strategies used to optimise tax position.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the accounting field of work and include access to:

- common office equipment, technology, software and consumables
- an integrated financial software system and data.

Assessors must satisfy NVR/AQTF assessor requirements.

Note: The identification of the unit FNSACC502 Prepare tax documentation for individuals as a prerequisite does not require that it be certificated prior to this unit. This unit and its prerequisite may be delivered and assessed together.

This unit is designed to meet regulatory requirements of the Tax Practitioner Board (TPB). Where registration with the TPB is sought, assessment must reflect the conditions described by the regulator, which stipulate that a significant amount (at least 40%) must be completed under some form of independent supervision. Where recognition of prior learning (RPL) is used, it must also meet the requirements of the Board's policy on RPL.

Details of requirements can be accessed on the TPB website at: <http://www.tpb.gov.au>

BSBWHS504 Manage WHS risks

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conduct work health and safety (WHS) risk management processes.

It applies to individuals who manage WHS risks, based on the organisation's WHS management system (WHSMS), WHS information system (WHSIS) and risk-management approach (as covered in BSBWHS503 Contribute to the systematic management of WHS risk). These individuals will work in a range of WHS roles across all industries and apply a substantial knowledge base and well-developed skills in a wide variety of WHS contexts.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBWHS504 Manage WHS risks

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- access information and data on hazards and how to manage associated risks
- identify duty holders and legislative requirements for work health and safety (WHS) risk management
- use the organisation's WHS management system (WHSMS) and WHS information system (WHSIS) to conduct the following risk management processes:
 - identify hazards and potential hazards
 - assess the associated risks
 - identify control options
 - select suitable options
 - develop and implement a risk control plan
 - evaluate risk controls
- carry out hazard identification and risk management.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the basic principles of workplace incident, injury and disease causation
- explain the meanings of 'hazard' and 'risk' and how they differ
- identify formal and informal communication and consultation processes and key personnel related to communication
- describe how the characteristics and composition of the workforce impact on WHS risk and the management of WHS, including:
 - communication skills
 - cultural background and diversity

- gender
- labour market changes
- language, literacy and numeracy levels of the workforce
- structure and organisation of the workforce, including part-time, casual and contract workers; shift rosters and geographical location
- workers with specific needs and limitations
- workplace culture in relation to alcohol and other drug use
- identify internal and external sources of WHS information and data and how to access them
- explain the limitations of generic hazard identification and risk assessment checklists and risk ranking processes
- outline methods for providing evidence of compliance with WHS legislation
- describe the nature of workplace processes (work flow, planning and control) and hazards relevant to the workplace
- describe organisational culture as it impacts on the work team
- summarise organisational WHS policies, procedures, processes and systems
- list other functional areas that impact on the management of WHS
- outline the principles and practices of a systematic approach to managing WHS
- outline Commonwealth and state or territory WHS Acts, regulations, codes of practice, standards and guidance material and other publications relevant to the organisation
- outline risk management as a duty of persons conducting businesses or undertakings or officers under WHS legislation
- describe the roles and responsibilities of individuals and parties under WHS legislation
- outline standard industry controls for a range of hazards
- identify techniques, tools and processes for identifying health and safety hazards and assessing and controlling the associated risks, including:
 - hazard and risk checklists
 - hazard hunts
 - job safety analyses
 - manifests and registers, including for dangerous goods, hazardous chemicals and plant
 - safe work method statements
 - surveys using questionnaires, interviews and other survey techniques
 - workplace inspections and walk-throughs.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- workplace policies and procedures
- office equipment and resources

- relevant Acts, regulations, codes of practice, standards and guidelines relating to risks found in the workplace
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS603 Implement WHS risk management

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0

Application

This unit describes the skills and knowledge required to implement work health and safety (WHS) risk management. It addresses the establishment, implementation, review and improvement of WHS risk management frameworks and processes.

It applies to people who apply advanced practical knowledge to coordinate, facilitate and maintain the WHS program within an organisation.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBWHS603 Implement WHS risk management

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- manage effective work health and safety (WHS) risk management consultation and participation processes including:
 - identifying those who need to be involved
 - reviewing and improving existing processes
 - ensuring processes are appropriate to the organisation and WHS risks
- arrange for necessary resources during WHS risk management, including:
 - identifying and budgeting for requirements
 - procuring resources and ensuring availability
- review and improve existing WHS risk management processes, including:
 - using workplace information and data
 - consulting with individuals and parties
 - considering effectiveness, current risk controls, lessons learnt from events, changes in the internal and external contexts, emerging risks and performance against indicators
- develop a WHS risk management framework including:
 - using suitable sources of information and data to determine the purposes, objectives, principles and structure
- establish the context for WHS risk management including:
 - identifying duty holders, legislative requirements, impacting individuals, parties and factors
 - defining risk criteria
- assess risks including:
 - identifying hazards
 - undertaking risk analysis and evaluation
 - addressing requirements of WHS legislation, WHS risk assessment and workplace WHS information and data
- control risks including:

- selecting from control options according to outcomes of risk assessment, WHS hazards and risk controls, and WHS legislation
- preparing and implementing risk control measures
- monitor and review the WHS risk management process according to the organisation's WHS management system (WHSMS) requirements
- record the WHS risk management process according to the organisation's WHS information system (WHSIS) requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain different definitions of hazard and risk and how they are used by different individuals and parties
- outline internal and external sources of WHS information and data and how to access them
- identify organisational WHS policies, procedures, processes and systems
- identify other functional areas that impact on the management of WHS
- describe the principles and practices of a systematic approach to managing WHS
- describe the principles of duty of care, including concepts of causation, foreseeability and preventability
- describe the principles of incident causation and injury processes
- list a range of risk analysis and assessment techniques and tools and their application and limitations
- outline relevant and applicable Australian legislation, standards and publications
- define risk as the effect of uncertainty on objectives
- define risk management as a duty of persons conducting businesses or undertakings (PCBUs) or officers under WHS legislation
- give examples of standard industry risk controls for a range of hazards
- outline techniques, tools and processes for identifying health and safety hazards and controlling risks:
 - hazard and risk checklists
 - hazard hunts
 - job safety analyses
 - manifests and registers, including for dangerous goods, hazardous chemicals and plant
 - safe work method statements
 - surveys using questionnaires, interviews and other survey techniques
 - workplace inspections and walk-throughs
- describe toxicology of hazardous chemicals and potential health effects in the workplace.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- office equipment and resources
- relevant WHS legislation, standards and guidelines
- workplace policies and procedures
- reports from other parties consulted during the approach to WHS risk management
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

MSMSUP390 Use structured problem-solving tools

Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed.

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem-solving tools.

Application

This unit describes the skills and knowledge required to use structured process improvement tools to solve process and other problems. It describes the broad application of in-depth and rigorous structured problem-solving techniques to identify opportunities for improvement.

This unit applies to experienced operators, team leaders, supervisors or people in similar roles who are required to identify improvements and/or solve problems beyond those associated directly with the process unit and/or equipment.

This unit applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all work environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem-solving tools.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified at least 1 problem
- analysed problem using at least 1 analysis tool drawn from each of 2 different groups of tools (basic, visual, process, business and organisation specific)
- selected the preferred solution
- developed and used an implementation plan, that includes:
 - specific, measurable, achievable, relevant, timed (SMART) objectives
 - resource requirements
 - methods for reaching objectives
 - timelines
 - methods of checking and adjusting adherence to plan
- communicated effectively with other personnel.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- relevant organisation procedures
- risks, risk assessment and controls relevant to problem being analysed
- targets and measures for output and quality
- types and application of problem-solving tools and analytical techniques
- relevant equipment and operational processes.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Application

This unit describes the skills required to provide on the job coaching to colleagues. This unit has no parity with National Workplace Trainer standards, but reflects the situation in many workplaces where formal and informal on the job coaching is extremely common. It includes preparation for coaching, and provision of and follow-up of coaching.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently, performing complex tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.
