

FPIWPP4202B Perform laboratory testing

Release: 1

FPIWPP4202B Perform laboratory testing

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit describes the outcomes required to test blends, glues, additives, materials, products and any other entities produced by the enterprise, to ascertain causes of a problem or to improve techniques

General workplace legislative and regulatory requirements apply to this unit; however there are no specific licensing or certification requirements at the time of publication

This unit replaces FPIWPP4202A Perform laboratory

testing

Application of the Unit

Application of the unit

The unit involves performing laboratory testing in a forest

products factory setting

The skills and knowledge required for competent

workplace performance are to be used within the scope of

the person's job and authority

Licensing/Regulatory Information

Refer to Unit Descriptor

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Approved Page 3 of 11

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- 1. Prepare for testing
- 1.1. Applicable *Occupational Health and Safety* (OHS), *environmental*, *legislative* and *organisational requirements* relevant to performing laboratory testing are identified and followed
- 1.2. Work order is reviewed and checked with appropriate personnel
- 1.3. Type and quantity of entities for *testing* is obtained
- 1.4. **Equipment** is selected and **calibrated** appropriate to work requirements and checked for operational effectiveness in line with manufacturer's recommendations
- 1.5. Testing process is selected and planned in line with site procedures
- 1.6. *Communication* with others is established and maintained in line with OHS requirements
- 2. Test samples
- 2.1. Problem or improvement requirement is interpreted and analysed
- 2.2. Samples are prepared and manufacturing dates, times and batches identified from production records
- 2.3. Test data is established, reviewed and interpreted
- 2.4. Test is conducted in line with industry standards
- 2.5. Results are checked by further sampling and testing
- 3. Evaluate and report test outcomes
- 3.1. Results of tests are evaluated for implication and impact on production process
- 3.2. Action is taken to rectify or improve upon the test results achieved
- 3.3. Test results are communicated to production personnel to facilitate process control or changes
- 3.4. Results are provided to *external authorities* in line with registration systems
- 3.5. Testing process and equipment faults are *recorded* and *reported* to the appropriate personnel

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Approved Page 4 of 11

REQUIRED SKILLS AND KNOWLEDGE

Required skills

- Technical skills sufficient to use and maintain relevant tools, machinery and equipment; efficiently and safely perform laboratory testing
- Communication skills and interpersonal techniques sufficient to interact appropriately with colleagues and others in the workplace
- Literacy skills sufficient to accurately record and report workplace information, and maintain documentation
- Numeracy skills sufficient to estimate, measure and calculate time required to complete a task
- Problem solving skills sufficient to identify problems and equipment faults and demonstrate appropriate response procedures

Required knowledge

- Applicable Commonwealth, State or Territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes for performing laboratory testing
- Environmental protection requirements, including the safe disposal of waste material, the safe use and storage of chemicals, minimising carbon emissions and the cleaning of plant, tools and equipment
- Organisational and site standards, requirements, policies and procedures for performing laboratory testing
- Environmental risks and hazards
- Sampling and testing techniques
- Characteristics of ingredients, additives and other entities
- Laboratory testing conditions and facilities
- Storage systems and labelling
- Established communication channels and protocols
- Problem identification and resolution strategies and common fault finding techniques
- Types of tools and equipment and procedures for their use, operation and maintenance
- Appropriate mathematical procedures for estimating and measuring, including calculating time to complete tasks
- Procedures for recording and reporting workplace information

Approved Page 5 of 11

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to provide evidence that they can safely and efficiently perform laboratory testing within organisational requirements

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements of this unit and include demonstration of:

- following applicable Commonwealth, State or Territory legislative and regulatory requirements and codes of practice relevant to performing laboratory testing
- following organisational policies and procedures relevant to performing laboratory testing
- performing laboratory testing in line with the work order and within prescribed organisational requirements
- constructing testing procedures for given entities

Context of and specific resources for assessment

- Competency is to be assessed in the workplace or realistically simulated workplace
- Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints
- Assessment of required knowledge, other than confirmatory questions, will usually be conducted in an off-site context
- Assessment is to follow relevant regulatory or Australian Standards requirements
- The following resources should be made available:
 - workplace location or simulated workplace
 - materials and equipment relevant to undertaking work applicable to this unit
 - specifications and work instructions

Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the FPI11 Training Package
- Assessment methods must confirm consistency and accuracy of performance (over time and in a range of

Approved Page 6 of 11

EVIDENCE GUIDE

- workplace relevant contexts) together with application of required knowledge
- Assessment must be by direct observation of tasks, with questioning on required knowledge and it must also reinforce the integration of employability skills
- Assessment methods must confirm the ability to access and correctly interpret and apply the required knowledge
- Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
- Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances
- Assessment may be in conjunction with assessment of other units of competency
- The assessment environment should not disadvantage the candidate
- Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English
- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OHS requirements:

are to be in line with applicable Commonwealth, State or Territory legislation and regulations, and organisational safety policies and procedures, and

Approved Page 7 of 11

RANGE STATEMENT

may include:

- personal protective equipment and clothing
- safety equipment
- first aid equipment
- fire fighting equipment
- hazard and risk control
- fatigue management
- elimination of hazardous materials and substances
- safe forest practices including required actions relating to forest fire
- manual handling including shifting, lifting and carrying

ıts

- legislation
- organisational policies and procedures
- workplace practices

Legislative requirements:

are to be in line with applicable Commonwealth, State or Territory legislation, regulations, certification requirements and codes of practice and may include:

- award and enterprise agreements
- industrial relations
- Australian Standards
- confidentiality and privacy
- OHS
- the environment
- equal opportunity
- anti-discrimination
- relevant industry codes of practice
- duty of care
- legal
- · logu
- organisational and site guidelines
- policies and procedures relating to own role and responsibility
- quality assurance
- procedural manuals
- quality and continuous improvement processes and standards
- OHS, emergency and evacuation procedures
- ethical standards

Environmental requirements may include:

Organisational requirements

may include:

Approved

Page 8 of 11

RANGE STATEMENT

- recording and reporting requirements
- equipment use and maintenance and storage requirements
- environmental management requirements (waste minimisation and disposal, recycling and re-use guidelines)

Work order is to include:

 instructions for the sampling and testing of stated entities including expected reporting intervals

and may also include:

- instructions for the environmental monitoring of work and procedures
- environmental care requirements relevant to the work

Appropriate personnel may include:

- external agencies
- supervisors
- suppliers
- clients
- colleagues
- managers

Testing is to include:

Equipment may include:

 the most appropriate approach taken to ascertain the cause of a problem or to improve a current methodology

and may include:

- designing the testing process
- a range of laboratory testing equipment
- tools
- gauges

Calibration

is the setting of testing equipment to follow the convention, which in turn checks their accuracy and ensures accurate test results

Communication may include:

- · verbal and non-verbal language
- constructive feedback
- active listening
- questioning to clarify and confirm understanding
- use of positive, confident and cooperative language
- use of language and concepts appropriate to individual social and cultural differences

Approved Page 9 of 11

RANGE STATEMENT

- control of tone of voice
- body language

External authorities may include:

- environmental agencies
- local authorities
- State/Territory or Federal governments

Records and reports may include:

- testing results
- quantities produced
- condition changes
- production difficulties
- storage locations
- quality outcomes
- hazards
- incidents
- equipment malfunctions

and may be:

- manual
- using a computer-based system or other appropriate organisational communication system
