4. Apply safe work practices.	4.1. Tasks are performed in a manner that is safe for operators, other personnel and the general community in accordance with legislative requirements, and enterprise policies and procedures. 4.2. Plant and equipment guards are used in accordance with manufacturer specifications, work site regulations and Australian standards where applicable. 4.3. Procedures and relevant authorities for reporting hazards, incidents and injuries are used. 4.4. Prohibited tools and equipment in areas with identified asbestos are recognised and not used. 4.5. Work site safety signs and symbols are identified and followed. 4.6. Work site area is cleared and maintained to prevent and protect self and others from incidents and accidents and to meet environmental requirements .
5. Follow emergency procedures.	5.1. Designated personnel are identified in the event of an emergency for communication purposes. 5.2. Safe workplace procedures for dealing with accidents,

ELEMENT

PERFORMANCE CRITERIA

various *types of fire* and other emergencies are followed, including identification or use, if appropriate, of *fire equipment* within scope of responsibilities.

5.3. *Emergency response and evacuation procedures* are known, practised and carried out effectively when required.

5.4. Emergency first aid treatment of minor injuries is carried out correctly and details of any treatment administered are reported accurately to designated personnel as soon as possible.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to accurately recognise OHS hazards, including asbestos and take all opportunities to alleviate safety problems in a variety of construction work sites and environments
- capacity to deal calmly and effectively with any potential safety problems and work closely with other team members and supervisors to ensure safe working conditions are maintained
- communication skills to:
 - determine and report hazards and risks
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - follow instructions
 - read and interpret:
 - MSDS, JSA and safe work method statements
 - other relevant documentation
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
 - written skills to contribute to reports
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials

REQUIRED SKILLS AND KNOWLEDGE

- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
 - use a range of mobile technology, such as two-way radio and mobile phones
 - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- asbestos management code prevention of exposure
- basic first aid procedures
- common construction industry terminology
- common workplace safety hazards and risks and procedures for reporting these to designated personnel
- construction industry communications equipment and use
- construction industry health and safety signage
- emergency response and evacuation procedures
- JSA and safe work method statements
- MSDS
- OHS hierarchy of control and role of OHS committees and representatives
- relevant legislation, regulations and workplace requirements relating to OHS, including hazard reduction and personal safety, including duty of care responsibilities, workers' compensation and injury management requirements
- safe manual handling techniques
- safe work practices in normal working environment
- safety equipment, policies and requirements for working in confined spaces and at height, including on rooves
- tools and equipment prohibited for use near identified asbestos-containing materials (ACM)
- types of fires and basic firefighting equipment
- types, possible location and risks of ACM, including serpentine and amphibole groups, and their use in common building materials
- types, purpose and use of construction industry personal protective equipment and clothing
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- correctly locate, interpret and apply relevant information, standards and specifications
- comply with a site safety plan, organisational policies, OHS regulations and state and territory legislation applicable to workplace operations, including quality requirements
- correctly identify ACM and policies and procedures for reporting this to designated personnel
- effectively communicate and work safely with others
- apply general procedures for responding to incidents and reporting hazards and injuries
- select and use firefighting equipment to extinguish a simulated mechanical fire
- evacuate a site through simulated response to an emergency, complying with workplace procedures.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements

EVIDENCE GUIDE

- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct,

EVIDENCE GUIDE

indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazards include:

- chemical spills
- electrical safety work in confined spaces
- excavations, including trenches
- falling objects
- fires
- gases
- hazardous materials
- high or very low temperatures
- HIV and other infectious diseases
- liquids under pressure
- manual handling
- moving machinery and equipment
- noise, dust and vapours
- overhanging beams
- protrusions
- sharp equipment
- traffic
- ultraviolet (UV) radiation
- unplanned collapse

RANGE STATEMENT

Designated personnel to be contacted in case of an emergency, accident, fire or to report a risk such as identification of ACM are:

- working at heights.
- designated safety officers, determined by the enterprise, who have undertaken specific safety response training
- managers or other senior personnel
- personnel competent and/or licensed in the safe handling of asbestos
- supervisors.

Safe work practices:

- include:
 - day to day observation of OHS policies and procedures
 - emergency procedures
 - risk assessment
 - use of basic firefighting equipment
- relate to:
 - access to site amenities, such as drinking water and toilets
 - general requirements for safe use of plant and equipment
 - general requirements for use of personal protective equipment and clothing
 - housekeeping to ensure a clean, tidy and safer work area
 - no drugs and alcohol at work
 - preventing bullying and harassment
 - smoking in designated areas
 - storage and removal of debris.

Duty of care requirements:

- relate to:
 - legal responsibility under duty of care to do everything reasonably practicable to protect others from harm
 - relevant state and territory OHS requirements and include employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors
- may relate to:
 - own responsibilities to comply with safe work practices, including activities that

RANGE STATEMENT

require licences, tickets or certificates of competency.

Incidents include:

- accidents resulting in personal injury or damage to property
- near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example:
 - breathing apparatus malfunctioning to the extent that the user's health is in danger
 - collapse of the floor, wall or ceiling of a building being used as a workplace
 - collapse or failure of an excavation more than 1.5 metres deep (including any shoring)
 - collapse or partial collapse of a building or structure
 - collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment
 - damage to or malfunction of any other major plant
 - electric shock
 - electrical short circuit, malfunction or explosion
 - uncontrolled explosion, fire or escape of gas, hazardous substance or steam
 - any other unintended or uncontrolled incident or event arising from operations carried on at a workplace.

Australian government and state or territory OHS legislative requirements include:

- Australian standards
- construction industry OHS standards and guidelines
- duty of care
- health and safety representatives, committees and supervisors
- JSA and safe work method statements
- licences, tickets or certificates of competency
- National Code of Practice for Induction Training for Construction Work
- national safety standards

RANGE STATEMENT

Information includes:

- OHS and welfare Acts and regulations
- safety codes of practice.
- diagrams or sketches
- emergency situation contacts
- evacuation plans
- instructions issued by authorised organisational or external personnel
- labels
- manufacturer specifications and instructions
- memos
- MSDS
- organisation work specifications and requirements
- plans and specifications
- regulatory and legislative requirements, such as Acts, regulations and codes of practice
- relevant Australian standards
- reports of near misses or accidents
- safe work procedures or equivalent documentation
- safety meeting minutes
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules.

Hazardous materials include:

- ACM
- cleaning chemicals, including those in pressurised containers
- glues
- insulation materials
- solvents
- treated timber products.

Measures for controlling risk or minimising hazards in accordance with the hierarchy of control include:

- elimination
- substitution
- isolation
- engineering control
- administrative control
- personal protective equipment.

Signs and symbols include:

- emergency information signs (exits, equipment, first aid)
- fire signs (location of fire alarms and

RANGE STATEMENT

	<ul style="list-style-type: none">firefighting equipment)hazard identification, facility or location signsregulatory signs (e.g. prohibition, mandatory and limitation or restriction), such as hazard signs (danger and warning)safety tags and lockout (danger tags, out of service tags)site safety, directional, traffic and warning signs and symbols.
<i>Asbestos-containing materials are identified:</i>	<ul style="list-style-type: none">includes recognising common types of ACM that may be found in construction materials and buildingscovers asbestos rope/fabrics, asbestos cement sheeting, asbestos cement piping and lagging on pipes, bituminous waterproof membrane, fire doors, electrical switchboards, millboard, and sheeting under ceramic or vinyl floor tiles in wet areas.
Asbestos-containing materials are <i>reported</i> to:	<ul style="list-style-type: none">person in control of the workplace as set out in the relevant Asbestos Management Code.
<i>Personal protective equipment</i> is to include:	<ul style="list-style-type: none">apronsarm guardscapsdust mask/respiratorsear muffs/plugsgloveshard hatshigh visibility retro reflective vestsjacketsoverallssafety glasses/gogglessteel capped bootsUV protective clothing and sunscreen.

<i>Materials</i> include:	<ul style="list-style-type: none">first aid materials suitable for emergency first aid treatment of minor injuries.
<i>Prohibited tools and equipment</i> that cannot be used near identified	<ul style="list-style-type: none">high-speed abrasive power and pneumatic tools, high pressure water cleaners, compressed

RANGE STATEMENT

ACM include:

air or abrasive blasting

- any vacuum cleaning equipment not specifically designed for safe work with asbestos.

Environmental requirements are to cover workplace quality management and include:

- clean-up protection
- stormwater protection
- waste management.

Types of fire includes:

- electrical, chemical, gas, mechanical, paper, wood or natural fire.

Fire equipment includes:

- breathing apparatus
- fire extinguishers
- fire hydrant and hoses
- fire reel
- fire truck
- manual firefighting instruments, such as fire blankets.

Emergency response and evacuation procedures include:

- emergencies, such as fire, toxic and/or flammable vapours emission, vehicle/mobile plant accident, structural collapse, chemical spill and injury to personnel
- extinguishing fires, organisational first aid requirements and evacuation.

Prerequisite units Nil

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Devise interaction strategies.	1.1. Interested and affected individuals and parties are identified. 1.2. Range of <i>interaction strategies</i> is identified, assessed for suitability and selected. 1.3. Resources required to conduct interaction are determined. 1.4. Regulations are reviewed to ensure strategies meet all criteria.
2. Assess demographic, cultural, social and psychological considerations.	2.1. Needs of disadvantaged individuals and groups are identified and incorporated from <i>relevant information and social theory</i> . 2.2. Cultural, social and psychological factors are considered and incorporated. 2.3. Urban, <i>demographic</i> , technological, political and economic effects are considered and incorporated. 2.4. Collective community behaviour is assessed.
3. Communicate legislative requirements to	3.1. Information is prepared that is clear, accurate and <i>appropriate to the needs of the parties involved</i> . 3.2. All parties involved are informed of the applicable

ELEMENT	PERFORMANCE CRITERIA
individuals and groups.	<p>legislation through <i>presentation of information</i>.</p> <p>3.3.Information is provided to affected parties at an appropriate time and place and in <i>an appropriate way</i>.</p> <p>3.4.Interaction is undertaken in an orderly manner to ensure all viewpoints are canvassed.</p>
4. Record, analyse and report results.	<p>4.1.Responses are assessed and checked against the project brief.</p> <p>4.2.Appropriate suggestions for improvement are incorporated into the project brief.</p> <p>4.3.Accurate report is prepared, including recommendations for approval.</p> <p>4.4.Overall effectiveness of the interaction is reviewed and evaluated, with action taken where required.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to prepare information in alternative formats and to provide access to consultations for diverse groups through interpreters, etc.
- ability to respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- communication skills to:
 - consult with the community, including provision of information about legislation
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - read and interpret:
 - regulations
 - legislation
 - other relevant documentation
 - use and interpret non-verbal communication

REQUIRED SKILLS AND KNOWLEDGE

- use language and concepts appropriate to cultural differences
- written skills to:
 - record and report results of interaction with the community
 - prepare information
- innovation skills to identify and implement appropriate and diverse strategies for interacting with diverse communities
- organisational and time management skills to prepare information for meetings and to arrange and conduct meetings to timelines
- problem solving skills to review feedback and select appropriate suggestions for improvement for inclusion in report
- technological skills to:
 - complete documentation, including information materials and reports
 - enable information gathering and analysis.

Required knowledge

Required knowledge for this unit is:

- effects and psychological theories relevant to working with clients in a regulated environment, such as:
 - social stratification
 - social change
 - technological change
- local factors affecting communities and individuals
- relevant federal, state or territory legislation and local government policy and procedures
- research methods
- strategies for consultation
- urbanisation.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- comply with OHS regulations applicable to workplace operations
- apply organisational management policies and procedures, including quality assurance requirements where applicable
- perform a management role in the identification and implementation of at least one client negotiation and consultation process or equivalent
- provide reports to appropriate body/individual as determined by the project brief.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes

EVIDENCE GUIDE

where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated

EVIDENCE GUIDE

documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Interested and affected individuals and parties include:

- existing community groups
- government agencies
- individuals and special interest groups
- private sector businesses
- social groups and emergency services.

Interaction strategies include:

- client meetings
- home and site visits
- meetings of relevant stakeholders
- surveys.

Relevant information and social theory include:

- awareness of diverse cultures
- collective behaviour
- deviance
- economic order
- inequality
- political order social change and interaction
- stratification
- technology and the environment
- the family
- urbanisation.

Demographics include:

- age
- ethnicity
- gender
- individual and group profiles
- social stratification.

RANGE STATEMENT

- Appropriate to the needs of the parties involved* involves:
- providing material in alternative formats, such as:
 - large print
 - other languages.
- Presentation of information* includes:
- computer simulations
 - display plans
 - graphics
 - handouts
 - models
 - software presentations
 - videos.
- An appropriate way* includes:
- taking into account access issues, such as parking or building access and cultural requirements or protocols
 - using assistive technology, for example telecommunication device for the deaf (such as TTY) or video captioning
 - using interpreters, including sign language interpreters.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse the purpose and basic intent of the BCA.	<p>1.1.Objectives of the BCA and the purpose of its respective components in relation to <i>construction in residential buildings</i> and <i>building categories</i> are evaluated and documented.</p> <p>1.2.Deemed-to-satisfy (DTS) concept for construction to meet BCA requirements is evaluated and documented.</p>
2. Locate and interpret code and standard requirements applicable to particular projects.	<p>2.1.Clauses from the BCA that apply to particular <i>residential building projects requiring review of compliance issues</i> are identified and documented.</p> <p>2.2.Prescriptive requirements of relevant BCA clauses and <i>standard specifications</i> are determined.</p> <p>2.3.Requirements of Australian standards referenced in the BCA are identified and documented.</p> <p>2.4.Special requirements that may be applicable to specific areas of <i>building surveying procedures</i> are identified and documented.</p>
3. Classify buildings.	<p>3.1.Nature of a building is determined in regard to its proposed use and site arrangement.</p> <p>3.2.BCA criteria are applied to determine the defined classification.</p>

ELEMENT	PERFORMANCE CRITERIA
4. Apply solutions to construction problems for compliance with the BCA.	<p>3.3. BCA requirements are interpreted for multiple classifications.</p> <p>4.1. Criteria to ensure construction methods comply with the intent of the BCA are determined.</p> <p>4.2. Alternative approaches to construction problems that comply with the requirements of the BCA are reported.</p> <p>4.3. Assessment methods used to determine whether a building solution complies with performance requirements or DTS provisions of BCA are analysed and applied.</p> <p>4.4. Assessment methods are confirmed and identified as appropriate to meet the DTS provisions of BCA.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- communication skills to:
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - read and interpret:
 - Australian standards
 - BCA
 - other relevant documentation
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
 - written skills to:
 - document building requirements
 - report alternative approaches to construction problem
- innovation skills to develop compliant alternative solutions to construction

REQUIRED SKILLS AND KNOWLEDGE

problems

- planning and organisational skills to collect, organise and analyse information
- technological skills to:
 - complete documentation and calculations
 - enable information gathering and analysis.

Required knowledge

Required knowledge for this unit is:

- authorities and powers of a building surveyor
- behaviour of structural members undergoing stress, strain, compression, bending or combined actions
- BCA and primary referenced Australian standards
- criteria for Class 1 and 10 buildings
- design, construction and structural principles of buildings
- DTS provisions
- processes for the administration and preparation of documentation
- processes for the interpretation of reports, working drawings and specifications
- relevant federal, state or territory legislation and local government policy and procedures
- research methods.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

EVIDENCE GUIDE

unit

- comply with OHS regulations applicable to workplace operations
- apply organisational management policies and procedures, including quality assurance requirements where appropriate
- classify construction in residential buildings through the evaluation and interpretation of compliance with the BCA and associated reporting of data, findings, recommendations and strategies for at least one residential building project or equivalent in compliance with relevant legislation
- provide reports to appropriate body/individual as determined by the project brief.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

EVIDENCE GUIDE

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Construction in residential buildings includes:

- compliance with relevant legislation
- design specifications
- evaluation, interpretation and adherence to legislative requirements for BCA Class 1 and 10 buildings
- maintenance specifications
- relevant Australian standards.

Building categories include:

- low-rise residential buildings
- single storey buildings.

Residential building projects requiring review of compliance issues include:

- calculation and processing of application or inspection fees
- project milestones
- provision of site access/facilities
- work schedules.

Standard specifications include:

- developed or detailed specifications addressing specific components, such as structural or other requirements
- industry standard specifications
- preliminary and outline specifications.

Building surveying procedures include:

- mechanical, structural, electrical and other services.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess plans and specifications for size, span and spacing of structural members required in ceiling and roof framing.	<p>1.1. Access is obtained to relevant plans, specifications and documentation related to <i>structural members required in ceiling and roof framing</i> for required <i>building categories</i>.</p> <p>1.2. Specified timber species and stress grading are identified.</p> <p>1.3. True length of common rafter and overhand and economical size of common rafter are determined to support specified roof structure and covering.</p> <p>1.4. Maximum span of common rafter is determined.</p> <p>1.5. Position, location and direction of struts and strutting beams to support roof and ceiling loads are determined and documented.</p> <p>1.6. Method of support at hip and valley rafters is determined and documented.</p> <p>1.7. Location, direction and span of ceiling joists and hanging beams to support specified roof design are determined and documented.</p> <p>1.8. Nominated member sizes, spans, spacings and locations are listed, documented and checked for accuracy against plans and specifications.</p>

ELEMENT	PERFORMANCE CRITERIA
2. Assess plans and specifications for permanent wind bracing requirements for nominated design gust wind speeds.	2.1. Access is obtained to relevant plans, specifications and documentation for <i>assessment of timber-framed designs</i> . 2.2. Location and category of building site is identified against design gust wind speed calculations. 2.3. Wind directions are selected and noted on plans. 2.4. Type and number of bracing units for each wind direction are selected. 2.5. Bracing details and description are documented, based upon calculations.
3. Assess plans and specifications for size, span and spacings of structural members for timber wall frames.	3.1. Access is obtained to relevant plans, specifications and documentation. 3.2. Specified timber species and stress grading are identified. 3.3. Roof load width for walls supporting ceiling and roof structures for a specified roof covering is determined. 3.4. Economical size for common wall studs is determined. 3.5. Size of top and bottom wall plates is determined according to load bearing conditions. 3.6. Size of studs at side window and door opening is determined. 3.7. Size of lintels to nominated openings is determined. 3.8. Size of timber posts and beams supporting overhands is determined. 3.9. Nominated member sizes, spans, spacings and locations are identified, listed, documented and checked against plans and specifications for accuracy.
4. Assess plans and specifications for size, span and spacing of structural members for timber stumps, floor bearers and joists.	4.1. Access is obtained to relevant plans, specifications and documentation. 4.2. Specified timber species and stress grading are identified. 4.3. Economical size for floor bearer and joist to suit maximum spans and spacings is determined. 4.4. Size of timber stumps and footing type and size required to support structural members are determined. 4.5. Size for timber trimmers, working and trimming joists for stair opening to suit maximum spans and

ELEMENT**PERFORMANCE CRITERIA**

spacings is determined.

4.6. Location, direction and span of bearers and joists to support specified structure are determined.

4.7. Nominated member sizes, spans, spacings, direction and bracings are identified, listed, documented and checked for accuracy against plans and specifications.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- communication skills to:
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - read and interpret:
 - plans and specifications
 - other relevant documentation
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
 - written skills to record mathematical information
- numeracy skills to apply measurements and calculations
- planning and organisational skills to collect, organise and analyse information
- technological skills to:
 - complete documentation and calculations
 - enable information gathering and analysis.

Required knowledge

Required knowledge for this unit is:

- authorities and powers of a building surveyor
- behaviour of structural members undergoing stress, strain, compression, bending or

REQUIRED SKILLS AND KNOWLEDGE

combined actions

- grading processes and grade markings used to categorise timber and timber products
- manufactured timber framing systems
- nature of timber and effect of physiology and timber pests on its performance
- processes for the administration and preparation of documentation
- processes for the application of wind force, raking forces, and bracing and tie down systems
- processes for the interpretation of reports, working drawings and specifications
- relevant federal, state or territory legislation and local government policy and procedures
- research methods
- structural, design and construction principles of buildings, including the application of timber in buildings.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- comply with OHS regulations applicable to workplace operations
- apply organisational management policies and procedures, including quality assurance requirements where appropriate
- assess timber-framed designs, evaluate plans and specifications, and identify faults; select structural members for roofs, ceilings, walls,

EVIDENCE GUIDE

Context of and specific resources for assessment

floors and stumps relating to performance and the associated reporting of data, findings, recommendations and rectification strategies for at least one building project of up to two storeys or equivalent in compliance with relevant legislation

- provide reports to appropriate body/individual as determined by the project brief.

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to

EVIDENCE GUIDE

confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application

- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Guidance information for assessment

This unit could be assessed on its own or in combination with other units relevant to the job function, for example:

- CPCCSV5001A Assess the construction of domestic scale buildings
- CPCCSV5006A Assess construction faults in residential buildings.

EVIDENCE GUIDE

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Assessment processes and techniques should, as far as is practical, take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

- Structural members required in ceiling and roof framing:***
- includes evaluation and identification of structural members used in:
 - ceiling and roof framing
 - floor bearer and joist installing
 - timber stumping
 - timber wall framing
 - suitable for the building design in compliance with:
 - BCA
 - design specifications
 - legislative requirements
 - maintenance specifications
 - relevant legislation.
- Building categories*** include:
- all timber-framed domestic scale buildings up to and including two storeys.
- Assessment of timber-framed designs:***
- includes the identification and recording and reporting of faults, in accordance with workplace providers, in verbal or written

RANGE STATEMENT

format

- timber-framed designs include:
 - floor framing, such as loose set single storey timber structures and two storey suspended upper floor level construction
 - overhang framing with soffits and eaves, attached carport, attached veranda and attached patio
 - roof framing, such as skillion, gable, hip and valley and cathedral
 - wall framing of various sizes, bracing locations and tie downs.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Identify structural requirements and loads commonly used in structural design.</p>	<p>1.1. <i>Structural requirements</i> relating to equilibrium, stability, strength, functionality, economy and aesthetics are determined in <i>adherence to legislative requirements</i>.</p> <p>1.2. Different types of loading and loading methods and the effect on structures are identified and documented in accordance with BCA, relevant Australian standards, suppliers' technical data and empirical methods.</p>
<p>2. Analyse the effects of force and moments on structural elements.</p>	<p>2.1. Force, moments and equilibrium of force and the effects on structures are identified and <i>analysis</i> is conducted and recorded.</p> <p>2.2. Equilibrium of forces for co-planar systems in consideration of stability is identified and compared for performance.</p>
<p>3. Analyse properties and behaviour of structural materials.</p>	<p>3.1. Effect of force on materials in tension, compression, stress, strain and elasticity is identified and recorded.</p> <p>3.2. Structural properties and performances are differentiated for common materials and recorded.</p>

ELEMENT	PERFORMANCE CRITERIA
4. Identify section properties of structural elements and their effect on structural performance.	<p>4.1. Cross-sectional geometry and common structural shapes are identified.</p> <p>4.2. Section properties and the relationship between first and second area moments, section modulus and gyration and deflection of beams are identified and compared for performance.</p> <p>4.3. Section properties' values for I (moment of inertia), Z (section modulus) and R (radius) for common sections are determined using tables or standard formulas and compared for performance.</p>
5. Compare the performance and properties of spanning elements.	<p>5.1. Structural considerations of loaded spanning elements for bending moments, shear forces, deflection and torsion are determined and compared for performance.</p> <p>5.2. Bending behaviour and performance of loaded support beams of various types, shapes, spans and loads are determined and compared for performance.</p> <p>5.3. Effect that connections have upon the structural performance of beams is identified and compared for performance.</p> <p>5.4. Principles of slab behaviour in relation to spans and stress distribution are identified and compared for performance.</p>
6. Determine performance criteria for columns.	<p>6.1. Effect of slenderness ratio that changes in length, cross-sections, connections and materials will have on the strength of a column are determined and compared for performance.</p> <p>6.2. Eccentric and axial load effect on the strength of column section and materials are determined and compared for performance.</p>
7. Identify factors affecting design of connections between structural elements.	<p>7.1. Transmission of forces between structural elements are determined and compared for performance.</p> <p>7.2. Methods of distributing stresses in connections between structural elements are determined and compared for performance.</p>
8. Outline how loads of various types occur and impinge on a building structure.	<p>8.1. Differences between types of loading, including dead load, live load, wind load, earthquake load and other load, causing actions are determined and compared for performance.</p> <p>8.2. Dead and live loads using BCA and relevant Australian standards are determined.</p> <p>8.3. Indication of direction of wind pressures on the</p>

ELEMENT**PERFORMANCE CRITERIA**

various surfaces of buildings specified in BCA and relevant Australian standards are determined.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to respond to change and contribute to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- communication skills to:
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - read and interpret:
 - BCA
 - relevant Australian standards
 - other relevant documentation
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
 - written skills to report findings and provide reports
- numeracy skills to analyse and apply complex mathematical information
- planning and organisational skills to collect, organise and analyse information
- technological skills to:
 - complete documentation and calculations
 - enable information gathering and analysis.

Required knowledge

Required knowledge for this unit is:

- behaviour of structural members undergoing stress, strain, compression, bending or combined actions
- nature of materials and effect on performance
- processes for the interpretation of working drawings and specifications
- processes for the preparation of documentation

REQUIRED SKILLS AND KNOWLEDGE

- relevant federal, state or territory legislation and local government policy and procedures
- research methods
- structural and design principles for buildings.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- comply with OHS regulations applicable to workplace operations
- apply organisational management policies and procedures, including quality assurance requirements where applicable
- assess, identify and report on findings for the design, positioning and sizing of structural members of at least one domestic scale building project or equivalent
- provide reports to appropriate body/individual as determined by the project brief.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

EVIDENCE GUIDE

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace

EVIDENCE GUIDE

- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Assessment of *structural requirements*:

- includes:
 - analysis of engineering drawings
 - evaluation of site physicality
 - identification of safe structural practices
- may require actual site visits.
- domestic scale buildings (similar in characteristics to those of residential dwellings)

Adherence to legislative

RANGE STATEMENT

requirements is limited to:

in terms of loading, construction and size and may include small industrial, commercial and public buildings).

Analysis includes:

- 'I' (moment of inertia) values
- base unit mass, density, velocity, acceleration, force and stress
- column changes in length, cross-sectional, restraints, material and eccentricity
- cross-sectional geometry and common structural shapes
- deflections for symmetrically loaded, simply supported timber beams of various shapes, spans and loads
- directions of wind pressure loads
- force on materials in tension, compression, stress, strain and elasticity
- forces associated with levers identified by direction and value
- forces for co-planar non-current force systems
- load differences, including:
 - dead load
 - live load
 - wind load
 - earthquake load
- minimum bracing requirements
- removal of trusses
- restraints for use with beams
- second area moments and deflection of beams
- simple roof truss transmission force
- structural properties differentiated for common materials
- symmetrically loaded simply supported situations for:
 - bending moments
 - deflection
 - shear forces
 - torsion
- tension and compression stresses of roof members
- wind forces and wind velocity for bracing.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Investigate current practices in relation to resource usage.	<p>1.1.Environmental regulations applying to the organisation are identified.</p> <p>1.2.Procedures for ensuring <i>compliance</i> with environmental regulations are assessed.</p> <p>1.3.Information on <i>environmental and resource efficiency</i> systems and procedures are collected, and where appropriate, provided to <i>stakeholders, key personnel and specialists</i>.</p> <p>1.4.Current resource usage is measured and documented by members of the work group.</p> <p>1.5.Current <i>purchasing strategies</i> are analysed and documented.</p> <p>1.6.Current work processes and products are analysed to access information and data and to assist in identifying areas for improvement.</p>
2. Set targets for improvement.	<p>2.1.Input is sought from stakeholders, key personnel and specialists and shared with them as appropriate.</p> <p>2.2.External sources of information and data are accessed as required.</p> <p>2.3.Alternative solutions to work site environmental issues are evaluated.</p>

ELEMENT	PERFORMANCE CRITERIA
3. Implement performance improvement strategies.	<p>2.4. Efficiency targets are set.</p> <p>3.1. <i>Techniques and tools</i> are sourced to assist in achieving targets.</p> <p>3.2. Continuous improvement strategies are applied to work site, including ideas and possible solutions to communicate to stakeholders, key personnel and specialists.</p> <p>3.3. Environmental and resource efficiency improvement plans for work site and clients are integrated with other operational activities and implemented.</p> <p>3.4. <i>Suggestions</i> and ideas about environmental and resource efficiency management are sought from stakeholders, key personnel and specialists and shared with them to act on as appropriate.</p> <p>3.5. Costing strategies are implemented to fully value environmental assets and are shared with stakeholders, key personnel and specialists as necessary.</p>
4. Monitor performance.	<p>4.1. Outcomes are documented and reports on targets are communicated to key personnel and stakeholders.</p> <p>4.2. Strategies are evaluated.</p> <p>4.3. New targets are set and new tools and strategies investigated and applied.</p> <p>4.4. Successful strategies are promoted and, where possible, participants rewarded.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to source/identify the latest industry environmental sustainability concepts and technologies
- applying learning to future opportunities
- change management skills
- communication skills to:

REQUIRED SKILLS AND KNOWLEDGE

- answer questions
- clarify and acknowledge suggestions relating to work requirements and environmental efficiency with stakeholders
- enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
- read and interpret:
 - documentation
 - environmental and resource efficiency requirements
- support information flow between various internal and external stakeholders to resolve and report on environmental and resource efficiency issues
- use and interpret non-verbal communication
- use language and concepts appropriate to cultural differences
- creating tools to measure and monitor improvements and report on outcomes to stakeholders
- innovation skills to identify improvements, apply knowledge about resource use to organisational activities and customer service, and develop resource efficiency tools
- numeracy skills to analyse data on company and stakeholder resource consumption and waste product volumes
- problem solving skills to recognise and analyse problems, including:
 - devising approaches
 - implementing and reflecting on environmental and water, energy or resource efficiency management policies and procedures relevant to work site to improve environmental sustainability
 - share alternative approaches as required
- skills to relate to different genders and people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities
- technology skills, including the ability to:
 - operate and shut down equipment
 - where relevant, use software systems for recording and filing documentation for measurement and improvement of resource usage and consumption.

Required knowledge

Required knowledge for this unit is:

- how tradespersons can contribute to environmental sustainability
- knowledge of compliance requirements for all relevant environmental and sustainability legislation, regulations and codes of practice including resource hazards and risks associated with work site:
 - supervision
 - job specifications
 - strategies and procedures to maximise opportunities and minimise impacts

REQUIRED SKILLS AND KNOWLEDGE

- relevant to stakeholders and personal area of responsibility
- relevant knowledge of environmental, resource and energy/water efficiency issues, systems and procedures specific to industry practice
- knowledge of best practice approaches and quality assurance systems relevant to area of responsibility and industry
- ability to identify and advise on water/energy efficiency opportunities for stakeholders and key personnel
- supply chain procedures
- OHS issues and requirements
- organisational structure and reporting channels and procedures
- terms and conditions of employment, including policies and procedures, such as:
 - daily tasks
 - equal opportunity
 - work area responsibilities
 - worker, supervisor and employer rights.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed by analysing and monitoring effective sustainable work practices on a construction project work site.

This unit of competency can be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- implement and monitor integrated environmental and resource efficiency management policies and procedures within a work site, including:

EVIDENCE GUIDE

- access, collect, analyse and organise information from a number of sources to provide information, advice and tools or resources for improvement opportunities to stakeholders and key personnel
- identify possible areas for improved practices and resource efficiency for stakeholders
- communicate benefits of changing practices to work team and customers
- implement new approaches and improvement plans, including planning and organising activities for staff and stakeholders in relation to:
 - measurement of current use
 - devising strategies to improve environmental and resource efficiency issues
 - reporting as required ensuring appropriate action is taken within work site in relation to environmental and sustainability compliance and potential hazards
- monitor and evaluate improvement plans and efficiency targets, using evaluation and monitoring tools and technology to potentially revise and adjust approaches and strategies to ensure continuous improvement.

Evidence that could be used, reflecting the requirements of the unit of competency and work being performed as evidence, include:

- reports of activities of work group in relation to:
 - measurement of resources and efficiency
 - development of improvement strategies
- work plans outlining approaches to improved practices, with documented benchmarks
- invoices from stakeholders specifying materials recommended for improved efficiency and those actually used
- quotes and tenders
- lists of environmental hazards, risks and inefficiencies, and opportunities for

EVIDENCE GUIDE

improvements identified in the work site

- work samples, tools, techniques or simulated activities and the outcomes.

Processes may include:

- relevant authenticated correspondence
- way in which advice is sought and suggestions made about improvements from stakeholders and key personnel
- evidence of implementation of programs, such as:
 - green building program
 - supply chain program for purchasing sustainable products
 - environmental site management framework or product recommendations
- notes on understanding external benchmarks and support for particular benchmarks to be used, with expected outcomes and including approaches to recommend products and practices to stakeholders for improving their resource use.

Resource implications for assessment must include:

- observation by the assessor over a period of time and in a range of situations and/or evidence provided to the assessor in written or verbal form, including:
 - implementing tools and techniques
 - review of work site and stakeholders/key personnel to assess and measure resource use, hazards and compliance
 - application of learning to future activities
 - recommended products and practices to stakeholders
- access to a range of information and resources for assessment as listed in the range statement, such as:
 - environmental and sustainability legislation
 - compliance documentation
 - organisational and procedural requirements or organisation plans
 - work supervision and work site documentation, including personnel and

EVIDENCE GUIDE

EVIDENCE GUIDE

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Compliance includes:

- meeting relevant Acts, laws, by-laws and regulations, codes of practice or best practice to support compliance in environmental performance and sustainability at each level as required (such as Environmental Protection,

RANGE STATEMENT

	<p>Biodiversity Conservation Act and Building Code of Australia)</p> <ul style="list-style-type: none"> • levels include: <ul style="list-style-type: none"> • federal • industry • international • local government • organisation • reporting breaches • state and territory.
<p><i>Environmental and resource efficiency</i> includes:</p>	<ul style="list-style-type: none"> • approaches of industry associations, such as: <ul style="list-style-type: none"> • Australian Building Greenhouse Rating • green plumbers • green purchasing • Housing Industry Association (HIA) GreenSmart • ISO 14001 Environmental Management Systems • lifecycle thinking • Master Builders Association of Victoria Green Living, Leadership in Energy and Environmental Design (LEED), or Green Building Council of Australia (GBCA) Green Star environmental rating system • National Australian Building Environmental Rating Scheme (NABERS) • product stewardship • supply chain management • Victoria Stormwater Management Guidelines of the Environment Protection Authority (EPA) • implementing and using alternative practices, procedures or materials to reduce or eliminate resource consumption on work site • recommendations to stakeholders, including: <ul style="list-style-type: none"> • addressing environmental and resource sustainability initiatives, such as an environmental framework, action plan, recommendations, surveys and audits with stakeholders and key personnel • efficient water use (e.g. rainwater tanks,

RANGE STATEMENT

grey water sprinkler systems or timers)

- energy use (e.g. equipment/appliances installed; equipment, appliance and tool maintenance; transporting materials; heating and cooling; and building efficiency)
- environmental site management
- evaluating and implementing most appropriate waste treatment, including waste to landfill, recycling, re-use, recoverable resources and wastewater treatment through site management
- improving resource, energy and water efficiency
- including environmental performance in tender and quote specifications
- initiating and maintaining appropriate work site procedures for operational energy consumption, including stationary and non-stationary (transport) energy
- preventing and minimising risks and maximising opportunities on work site and for stakeholders
- reducing emissions of greenhouse gases
- reducing material usage
- reducing stormwater pollution
- reducing use of non-renewable resources
- types of products and materials used
- reference to standards, guidelines, industry association standards, codes of practice and best practice approaches such as:
 - federal government standards, including five-star rating for all new homes.

Stakeholders, key personnel and specialists (individuals and groups) both within and external to the organisation who have direct or indirect interest in the organisation's conduct, actions, products and services, include:

- clients
- employees at all levels of the organisation
- government
- investors
- key personnel within the organisation
- local community
- specialists outside the organisation who may have particular technical expertise
- suppliers

RANGE STATEMENT

- Purchasing strategies* include:
- other organisations.
 - influencing stakeholders to take up environmental sustainability approaches and products
 - researching and participating in programs, such as a supply chain program to purchase sustainable products (such as radial timber, sustainable timber, and low flow fittings and appliances).
- Techniques and tools* include:
- accessing the skills of others as appropriate to the specific industry context
 - environmental site management plans
 - examination of invoices from suppliers
 - examination of relevant information and data
 - integration of environmental and sustainability specifications in quotes and tenders
 - measurements made under different conditions
 - recommendation of sustainable products and practices to stakeholders.
- Suggestions* include:
- eliminating the use of hazardous and toxic materials
 - expressing green purchasing power through using and recommending a selection of suppliers with improved environmental performance (e.g. green power, lifecycle thinking, product stewardship, energy or water efficiency)
 - ideas that help to improve energy and water efficiency
 - making more efficient use of resources, materials, energy and water
 - maximising opportunities to use renewable, recyclable, reusable and recoverable resources (energy, water, materials, products and waste)
 - preventing and minimising risks and maximising opportunities, such as use of renewable energy such as solar or grey water, and other alternative forms of water, energy and resources
 - recommending and using alternative sustainable products, materials, procedures, practices and installation techniques
 - reducing emissions of greenhouse gases by

RANGE STATEMENT

- reducing waste and transport
- reducing the consumption of non-renewable resources, such as water, fuel, and materials
 - seeking alternative sources of water and energy or encouraging conservation.

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to maintain the safety and security of premises. It requires the ability to communicate effectively, maintain operational safety and respond appropriately to security risk situations.

This unit may form part of the licensing requirements for persons engaged in security operations in those states and territories where these are regulated activities.

Application of the Unit

Application of the unit This unit of competency has wide application in the security industry in those roles involving operational activities. Competency requires legal and operational knowledge applicable to relevant sectors of the security industry. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Maintain effective relations.	<p>1.1 Applicable provisions of <i>legislative</i> and <i>organisational requirements</i> relevant to <i>assignment instructions</i> are identified and complied with.</p> <p>1.2 Effective <i>interpersonal techniques</i> are used to develop, support and promote confidence with <i>relevant persons</i>.</p> <p>1.3 Communication is courteous, professional and sensitive to individual <i>social and cultural differences</i>.</p> <p>1.4 Personal presentation is maintained in accordance with organisational requirements.</p>
2 Maintain operational safety.	<p>2.1 <i>Environmental factors</i> are continually monitored, assessed and reviewed to identify distinctive features and any change in characteristics that might indicate unusual or suspicious behaviour.</p> <p>2.2 Personal safety checks are made on a systematic and routine basis in accordance with organisational procedures.</p> <p>2.3 Communication is maintained continually throughout security operations using appropriate <i>communication channels and processes</i>.</p> <p>2.4 <i>Resources and equipment</i> are maintained and used appropriate to the security operation.</p> <p>2.5 <i>Security risk situations</i> are accurately identified and assessed for degree of risk to self, others, property and premises.</p>
3 Respond to security risks.	<p>3.1 <i>Response</i> is formulated and carried out within scope of own role, competence and authority.</p> <p>3.2 Changing circumstances are monitored and responses are</p>

ELEMENT**PERFORMANCE CRITERIA**

- adjusted as required to maintain security.
- 3.3 Response initiative maximises the safety and security of self, others, property and premises.
- 3.4 Requirements for specialist assistance or advice is identified and promptly sought in accordance with organisational procedures.
- 3.5 Relevant *documentation* is completed and securely maintained with due regard to confidentiality in accordance with organisational procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

Required skills

- communicate effectively with people from different social, cultural and ethnic backgrounds and of varying physical and mental abilities
- communicate using appropriate channels and communication codes and signals
- determine response appropriate to security risk situation
- facilitate commonsense solutions within operating parameters
- identify and comply with applicable legal and procedural requirements including licensing requirements
- identify and comply with security incident response procedures
- identify security risk factors and conduct risk assessment
- minimise hazards and risks to the health and safety of self and others
- operate security and communications equipment
- present a professional image to members of the public and colleagues
- read, analyse and interpret information
- recognise support and assistance requirements
- record and report information
- select and use equipment appropriate to the security operation.

Required knowledge

- applicable legislative provisions relevant to 'use of force' guidelines and licensing requirements
- bomb threat and counter-terrorism procedures
- communication channels, codes and signals
- documentation procedures and processes

REQUIRED SKILLS AND KNOWLEDGE

- emergency and evacuation procedures and instructions
- first aid principles and procedures
- limits of own responsibility and authority
- methods of restraint and associated effects (eg, restraint related injury or death)
- observation and monitoring techniques
- operational principles of security, communication and protective equipment
- premises layout and access points
- principles of effective communication including interpersonal techniques
- reporting structure and processes
- structure and responsibilities of the emergency services agencies
- types of security situations which may be encountered during guarding operations and appropriate responses.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

- identifying and assessing all factors which might impact on the safety and security of persons and property
- formulating and implementing appropriate responses or contingency measures to maintain security
- systematically monitoring security activities and varying operational plans as required to meet changing circumstances
- maximising the safety and protection of people involved in incidents while carrying out response activities
- communicating effectively on a one-to-one and group basis with people from a range of diverse backgrounds and of varying abilities
- providing accurate and constructive operational observations and completing documentation in an appropriate style and format.

Context of and specific resources for assessment

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements,

performance criteria and range statement.

Resource implications for assessment include:

- access to a registered provider of assessment services
- access to a suitable venue and equipment
- access to plain English version of relevant statutes and procedures
- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment This unit of competency could be assessed using the following methods of assessment:

- observation of processes and procedures
- questioning of underpinning knowledge and skills.

Guidance information for assessment Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.

Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the candidate is offered a choice between oral questioning and written assessment, questions are to be identical.

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and

regional contexts) may also be included.

Legislative requirements may relate to:

- apprehension and powers of arrest
- Australian standards and quality assurance requirements
- counter-terrorism
- crowd control and control of persons under the influence of intoxicating substances
- force continuum, use of force guidelines
- general 'duty of care' responsibilities
- inspection of people and property, and search and seizure of goods
- licensing or certification requirements
- privacy and confidentiality
- relevant commonwealth, state and territory legislation, codes and national standards for:
 - anti-discrimination
 - cultural and ethnic diversity
 - environmental issues
 - equal employment opportunity
 - industrial relations
 - Occupational Health and Safety (OHS)
- relevant industry codes of practice
- telecommunications
- trespass and the removal of persons
- use of restraints and weapons:
 - batons
 - firearms
 - handcuffs
 - spray.

Organisational requirements may relate to:

- access and equity policies, principles and practices
- business and performance plans
- client service standards
- code of conduct, code of ethics
- communication and reporting procedures
- complaint and dispute resolution procedures
- emergency and evacuation procedures
- employer and employee rights and responsibilities
- OHS policies, procedures and programs
- own role, responsibility and authority
- personal and professional development
- privacy and confidentiality of information
- quality assurance and continuous improvement processes

Assignment instructions may include:

- and standards
- resource parameters and procedures
- roles, functions and responsibilities of security personnel
- storage and disposal of information.
- assignment purpose and objective
- assignment tasks and procedures
- assignment timeframe
- client identification information
- incident and security risk response procedures
- monitoring objectives
- personal presentation requirements
- personal protection equipment
- premises location and layout
- reporting and documentation requirements
- resource and equipment requirements.

Interpersonal techniques may involve:

- active listening
- being non-judgemental
- being respectful and non-discriminatory
- constructive feedback
- control of tone of voice and body language
- culturally aware and sensitive use of language and concepts
- demonstrating flexibility and willingness to negotiate
- effective verbal and non-verbal communication
- maintaining professionalism
- providing sufficient time for questions and responses
- reflection and summarising
- two-way interaction
- use of plain English
- use of positive, confident and cooperative language.

Relevant persons may include:

- clients
- colleagues
- emergency services personnel
- members of the public
- supervisor.

Social and cultural differences may relate to:

- dress and personal presentation
- food
- language
- religion
- social conventions
- traditional practices
- values and beliefs.

- Environmental factors*** may relate to:
- access to assistance and resources
 - availability of exits and opportunities for escape
 - crowds
 - different degrees of light including low light and darkness
 - presence of several sources of threat
 - time of day
 - weather.
- Communication channels and processes may relate to:***
- direct line supervision paths
 - established communication protocols
 - formal communication pathways
 - lateral supervision paths
 - organisational communication networks
 - verbal and non-verbal communication procedures eg pro-words, phonetic alphabet, call signs, coded messages, use of abbreviations, hand signals.
- Resources and equipment may include:***
- access to emergency services and specialist personnel
 - back-up personnel
 - business equipment eg computers and computer applications
 - communication equipment eg two-way radio, pager, mobile telephone
 - defensive equipment eg batons, firearm, and the relevant licenses, permits and storage facilities
 - fire fighting equipment
 - first aid kit
 - personal protection equipment
 - security equipment eg electronic screening equipment, video cameras and monitors, alarms and signals.
- Security risks*** may relate to:
- breaches of law eg criminal damage, offences against people, public order, misuse of drugs and alcohol
 - emergencies eg fire, scenes of crime, accidents
 - hazards eg physical, chemical, electrical, psychological, biological
 - threats eg bombs, sabotage, assassination.
- Response may involve:***
- checking identification
 - defusing the situation
 - evacuating the premises
 - isolating area of potential risk
 - isolating risk
 - issuing verbal warnings
 - notifying relevant emergency services agencies
 - offering assistance

- provision of first aid
- request for support and assistance
- restraint of person
- tactical withdrawal
- use of basic defensive techniques
- use of negotiation techniques.
- activity logs
- incident reports
- records of conversation
- request for assistance forms
- running sheets
- vehicle and personnel movements
- written and electronic reports.

Documentation may include:

Competency field

Competency field Operations

CUVDSP15B Research and apply techniques for application to spatial design

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit describes the skills and knowledge required to research and apply techniques for application to spatial design. As this unit is introductory in nature, the outcome is most likely to be a model or maquette for a spatial design or the construction of an aspect of the overall design. It may be the design and realisation of the complete design for a small scale project. This is a specialisation unit and refers to a specific design form. This work requires some guidance.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not Applicable

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Prerequisite units

It is highly recommended that this unit be assessed with or after the following units:

- CUVDES05B Interpret and respond to a brief
- CUVCRS03B Produce computer-aided drawings
- At least one of the drawing units relating to the representation of the concept
- Core Design.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|--|
| <p>1 Interpret the brief for the spatial design.</p> | <p>1.1 Correctly interpret the specifications of <i>the brief</i>.</p> <p>1.2 Determine the user or client for the proposed <i>design</i> to inform design decisions.</p> <p>1.3 Clarify <i>specifications, parameters or constraints</i> of the brief in consultation with relevant colleagues.</p> <p>1.4 Source and evaluate <i>information pertinent</i> to the brief.</p> |
| <p>2 Organise resources for spatial design.</p> | <p>2.1 Correctly identify the resources required for the design, including <i>work space, tools and equipment</i>.</p> <p>2.2 Prepare and care for resources in accordance with <i>safety requirements</i> and organisational requirements.</p> <p>2.3 Follow storage and inventory procedures in accordance with organisational procedures.</p> |

ELEMENT	PERFORMANCE CRITERIA
3 Test design approaches for spatial design.	<p>3.1 Produce a preliminary visual representation of the brief.</p> <p>3.2 <i>Identify possible approaches</i> to the design and establish <i>criteria</i> for the selection of the final <i>approach</i>.</p> <p>3.3 Select appropriate tools and equipment for the testing of approaches and <i>techniques</i>.</p> <p>3.4 Test and experiment with a range of techniques and <i>materials</i> which might meet the requirements of the brief.</p> <p>3.5 Evaluate <i>testing processes</i> against selection criteria and select the preferred approach based on the requirements of the brief.</p> <p>3.6 <i>Refine</i> and accurately <i>document</i> the design approach based on testing processes.</p>
4 Fabricate a model or aspect of the design.	<p>4.1 Evaluate the need for fabrication and the scope of work required.</p> <p>4.2 Select and organise materials, tools and techniques for fabrication in accordance with the design approach.</p> <p>4.3 Safely make the model or maquette ensuring consistency with the selected approach and the brief.</p> <p>4.4 Present the work in accordance with the brief specifications.</p>

Required Skills and Knowledge

Required Skills and knowledge

This section describes the skills and knowledge required for this unit.

Required skills:

- literacy skills sufficient to interpret a brief and to communicate design ideas
- numeracy skills sufficient to calculate quantities, costs, proportions.

Required Skills and knowledge

Required knowledge:

- formal elements and principles of design in relation to spatial design
- techniques, materials, tools and equipment and their application to different areas of spatial design
- common formats and features of spatial design briefs
- general knowledge about other designers, their ideas, techniques and work
- history and theory of design in relation to spatial design
- copyright, moral rights and intellectual property issues and legislation and their relevance to spatial design.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The following evidence is critical to the judgement of competence in this unit:

- testing and use of a range of approaches and techniques for spatial design which are suited to the requirements of the brief
- knowledge of the processes and techniques used for spatial design in different contexts.

Context of and specific resources for assessment

The assessment context must provide for:

- practical demonstration of skills through the development of a spatial design to meet the requirements of a brief.

Method of assessment

Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:

- evaluation of visual documentation of the spatial design

EVIDENCE GUIDE

- evaluation of plans/ models produced by the candidate
- questioning and discussion
- review of portfolios of evidence
- third party workplace reports of performance by the candidate.

Assessment methods should closely reflect workplace demands (e.g. literacy) and the needs of particular groups (e.g. people with disabilities, and people who may have literacy or numeracy difficulties such as speakers of languages other than English, remote communities and those with interrupted schooling).

Assessment of this unit requires access to the materials, resources and equipment needed to safely produce a spatial design or representation of a spatial design.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

The brief:

- describes and specifies the work to be completed
- is usually prepared by commissioning body or organisation, e.g. supervisor, client, community organisation
- may be written, diagrammatic, visual, verbal.

The spatial ***design*** work may include:

- exhibition design
- fit-outs for exterior spaces or environments
- foyer design
- installation for specific event

RANGE STATEMENT

- office fit-outs
 - set design.
- Specifications* would be articulated in the brief and may refer to:
- client needs
 - dimensions
 - purpose
 - style.
- Parameters or constraints* may refer to:
- cost
 - legal, contractual, ethical and copyright considerations
 - material characteristics
 - technology
 - timeframe.
- Information pertinent* to the brief may be about:
- client's organisational background
 - health and safety considerations
 - legal, contractual, ethical and copyright considerations
 - style considerations
 - subject matter.
- Work space* needs may include:
- drafting table
 - electronic equipment
 - lighting and power requirements
 - process-specific space needs.
- Tools and equipment* may include:
- brushes, containers
 - camera, scanner
 - computer
 - hand tools
 - ladders
 - lighting equipment
 - power tools
 - printer
 - relevant software.
- Safety requirements* are in
- Federal, State and Territory legislation, regulation

RANGE STATEMENT

accordance with: and standards.

Preliminary visual representation may include:

- CADD
- colour boards
- photography/digital imaging
- plan drawing
- sample boards
- sketching.

Identifying possible approaches includes:

- identifying possible design solutions
- identifying possible realisation options, e.g. by means of a model, maquette, or by fabricating an aspect of the design.

Criteria may include:

- access to materials, tools and equipment required to realise the design
- consistency with the brief for the spatial design
- ease of manufacture
- personal affinity with medium and materials.

The *approach* to the brief encompasses:

- aesthetic considerations
- choice fabrication options
- design solutions
- the parameters of the brief.

Techniques would depend on design solutions and realisation options selected and may include:

- carpentry
- digital work
- glass work
- lighting
- modelling
- painting and decoration
- photography
- projection
- surface decoration
- textile/fibre work.

Materials may include:

- cardboards, paper

RANGE STATEMENT

- clays, modelling pastes
- fibres
- glass
- manufactured materials, e.g. tiles, panels, carpeting, textiles
- metals
- natural elements, e.g. water, light, wind, plants
- paints, glazes, stains
- plastics
- wood and/or wood products.

Testing processes may involve:

- exploring techniques by making practice pieces, test pieces, mock-ups or samples
- testing materials by applying stress tests, colour tests etc.

Refining the approach may include:

- adjustment to consideration of elements and principles of design
- adjustment to design solution
- adjustment to utilise the capabilities of the techniques
- no change.

Documenting the approach may involve:

- final drawings, plans, elevations
- illustrations, photographs
- models
- specifications for fabrication.

Unit Sector(s)

Not Applicable

HLTFA301C Apply first aid

Modification History

Not Applicable

Unit Descriptor

Descriptor

This unit of competency describes the skills and knowledge required to provide first aid response, life support, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance

Application of the Unit

Application

These skills and knowledge may be applied in a range of situations, including community and workplace settings

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

A current Senior First Aid, Workplace Level 2 or Level 2 qualification may provide evidence of skills and knowledge required by this competency unit. However, as with all evidence of competence, evidence must be assessed against the requirements specified in the competency unit

Licensing/Regulatory Information

Employability Skills Information

Employability Skills This unit contains Employability Skills

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Assess the situation

1.1 Identify assess and minimise *hazards* in the situation that may pose a risk of injury or illness to self and others

1.2 Minimise immediate *risk* to self and casualty's health and safety by controlling any hazard in accordance with occupational health and safety requirements

1.3 Assess casualty and identify injuries, illnesses and conditions

2. Apply first aid procedures

2.1 Calmly provide information to reassure casualty, adopting a communication style to match the casualty's level of consciousness

2.2 Use available *resources and equipment* to make the casualty as comfortable as possible

ELEMENT**PERFORMANCE CRITERIA**

- 2.3 Respond to the casualty in a culturally aware, sensitive and respectful manner
- 2.4 Determine and explain the nature of casualty's injury/condition and relevant first aid procedures to provide comfort
- 2.5 Seek consent from casualty prior to applying first aid management
- 2.6 Provide *first aid management* in accordance with *established first aid principles* and Australian Resuscitation Council (ARC) Guidelines and/or State/Territory regulations, legislation and policies and industry requirements
- 2.7 Seek first aid assistance from others in a timely manner and as appropriate
- 2.8 Correctly operate first aid equipment as required for first aid management according to manufacturer/supplier's instructions and local policies and/or procedures
- 2.9 Use safe manual handling techniques as required
- 2.10 Monitor *casualty's condition* and respond in accordance with effective first aid principles and procedures
- 2.11 Finalise casualty management according to casualty's needs and first aid principles
3. Communicate details of the incident
- 3.1 Request ambulance support and/or appropriate medical assistance according to relevant circumstances using relevant *communication media and equipment*
- 3.2 Accurately convey assessment of casualty's condition and management activities to ambulance services /other emergency services/relieving personnel
- 3.3 Prepare reports as appropriate in a timely manner, presenting all relevant facts according to established procedures
- 3.4 Accurately record details of casualty's physical condition, changes in conditions, management and response to management in line with established procedures
- 3.5 Maintain confidentiality of records and

ELEMENT**PERFORMANCE CRITERIA**

information in line with privacy principles and statutory and/or organisation policies

4. Evaluate own performance

4.1 Seek feedback from *appropriate clinical expert*

4.2 Recognise the possible psychological impacts on rescuers of involvement in critical incidents

4.3 Participate in debriefing/evaluation as appropriate to improve future response and address individual needs

Required Skills and Knowledge**REQUIRED SKILLS AND KNOWLEDGE**

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes knowledge of:

- ARC Guidelines relating to provision of first aid as outlined
- Awareness of stress management techniques and available support
- First aid management of:
 - abdominal injuries
 - allergic reactions
 - altered and loss of consciousness
 - bleeding
 - burns - thermal, chemical, friction, electrical
 - cardiac arrest
 - casualty with no signs of life
 - chest pain
 - choking/airway obstruction
 - injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries;

REQUIRED SKILLS AND KNOWLEDGE

- minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations
- envenomation - snake, spider, insect and marine bites
- environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke
- fractures
- medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
- near drowning
- poisoning and toxic substances (including chemical contamination)
- respiratory distress
- seizures
- shock
- stroke
- substance misuse - common drugs and alcohol, including illicit drugs
- Social/legal issues:
 - duty of care
 - need to be culturally aware, sensitive and respectful
 - importance of debriefing
 - confidentiality
 - own skills and limitations
- Understanding of the use of an Automated External Defibrillator (AED), including when to use and when not to

continued ...

Essential knowledge (contd):

- Working knowledge of:
 - basic occupational health and safety requirements in the provision of first aid
 - basic principles and concepts underlying the practice of first aid
 - chain of survival
 - first aiders' skills and limitations
 - infection control principles and procedures, including use of standard precautions
 - priorities of management in first aid when dealing with life threatening conditions
 - procedures for dealing with major and minor injury and illness

Essential skills:

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

REQUIRED SKILLS AND KNOWLEDGE

This includes the ability to:

- Administer medication in line with state/territory regulations, legislation and policies
- Apply first aid principles
- Call an ambulance and/or medical assistance according to relevant circumstances and report casualty's condition
- Communicate effectively and assertively in an incident
- Conduct an initial casualty assessment
- Demonstrate correct procedures for performing CPR using a manikin, including standard precautions (i.e. as per unit *HLTCPR201A Perform CPR*)
- Demonstrate:
 - ability to call an ambulance
 - consideration of the welfare of the casualty
 - safe manual handling
 - site management to prevent further injury
- Evaluate own response and identify appropriate improvements where required
- Follow OH&S guidelines
- Infection control, including use of standard precautions
- Make prompt and appropriate decisions relating to managing an incident in the workplace
- Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or State/Territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own skills
- Prepare a written incident report or provide information to enable preparation of an incident report
- Provide assistance with self-medication as per subject's own medication regime and in line with State/Territory legislation, regulations and policies and any available medical/pharmaceutical instructions
- Use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package. The evidence guide supplements assessment requirements that apply to all units in this Training Package. Users of this

EVIDENCE GUIDE

evidence guide should first read the package's assessment guidelines.

Critical aspects of assessment:

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- Competence should be demonstrated working individually and, where appropriate, as part of a first aid team
- Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting
- Currency of first aid knowledge and skills is to be demonstrated in line with State/Territory regulations, legislation and policies, ARC and industry guidelines

Context and resources required for assessment:

- Skills in performing first aid procedures are to be assessed through demonstration, with questioning to confirm essential knowledge
- For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with Australian Resuscitation Council Guidelines

Access and equity considerations:

- All workers in the health industry should be aware of access and equity issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Related units:

This unit incorporates the content of units:

- HLTCPR201B Perform CPR
- HLTFA201B Provide basic emergency life support

EVIDENCE GUIDE

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Contextualisation to address specific requirements may include:

- Focus on first aid management of specific types of injury
- First aid provision under specific constraints or circumstances (e.g. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)

Established first aid principles include:

- Preserve life
- Prevent illness, injury and condition(s) becoming worse
- Promote recovery
- Protect the unconscious casualty

Vital signs include:

- Consciousness
- Breathing
- Circulation

A hazard is:

- A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these

RANGE STATEMENT

Hazards may include:

- Physical hazards
- Biological hazards
- Chemical hazards
- Hazards associated with manual handling

Risks may include:

- Risks from equipment, machinery and substances
- Risks from first aid equipment
- Environmental risks
- Exposure to blood and other body substances
- Risk of further injury to the casualty
- Risks associated with the proximity of other workers and bystanders
- Risks from vehicles

Casualty's condition is managed for:

- Abdominal injuries
- Airway obstruction
- Allergic reactions
- Altered and loss of consciousness
- Bleeding
- Burns - thermal, chemical, friction, electrical
- Chest pain/cardiac arrest
- Injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations
- Near drowning
- Envenomation - snake, spider, insect and marine bites
- Environmental conditions such as hypothermia, hyperthermia, dehydration, heat stroke
- Fractures
- Medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
- No signs of life
- Poisoning and toxic substances (including chemical contamination)
- Respiratory distress/arrest
- Seizures
- Shock
- Stroke

RANGE STATEMENT

- Substance misuse - common drugs and alcohol, including illicit drugs.
- First aid management must take into account applicable aspects of:*
- The setting in which first aid is provided, including:
 - workplace policies and procedures
 - industry/site specific regulations, codes etc.
 - OHS requirements
 - state and territory workplace health and safety legislative requirements
 - location and nature of the incident
 - situational risks associated with, for example, electrical and biological hazards, weather, motor vehicle accidents
 - location of emergency services personnel.
 - The use and availability of first aid equipment and resources
 - Infection control
 - Legal and social responsibilities of first aider
- Resources and equipment are used appropriate to the risk to be met and may include:*
- AED
 - First aid kit
 - Auto-injector
 - Puffer/inhaler
 - Resuscitation mask or barrier
 - Spacer device
- Communication media and equipment may include but are not limited to:*
- Telephones, including landline, mobile and satellite phones
 - HF/VHF radio
 - Flags
 - Flares
 - Two way radio
 - Email
 - Electronic equipment
 - Hand signals
- Appropriate clinical expert may*
- Supervisor/manager
 - Ambulance officer/paramedic

RANGE STATEMENT

include:

- Other medical/health worker

Documentation may include:

- Injury report forms
- Workplace documents as per organisation requirements

Documentation may include recording:

- Time
- Location
- Description of injury
- First aid management
- Fluid intake/output, including fluid loss via:
 - blood
 - vomit
 - faeces
 - urine
- Administration of medication including:
 - time
 - date
 - person administering
 - dose
- Vital signs

Unit Sector(s)

Not Applicable

HLTFA302A Provide first aid in remote situation

Modification History

Unit Descriptor

This unit of competency describes the skills and knowledge required to provide first aid to a casualty in a remote and/or isolated situation

Application of the Unit

This unit is appropriate for those undertaking first aid work in remote or isolated workplace situations

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

Licensing/Regulatory Information

Pre-Requisites

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills

The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

Elements and Performance Criteria

Element

Performance Criteria

1 Prepare to respond to

1.1 **Prepare for isolated travel** or work, accounting

- emergency in a remote situation
- for expected contingencies
- 1.2 Assess casualty's condition and determine appropriate response in order to minimise hazards and determine need for medical assistance
 - 1.3 Evaluate options for transporting casualty or waiting for medical assistance in relation to environmental issues, transport availability and casualty's condition
- 2 Provide first aid in a remote situation
- 2.1 Determine and explain the nature of casualty's injury/condition and relevant first aid procedures to provide comfort
 - 2.2 Seek consent from casualty prior to applying first aid management
 - 2.3 Provide first aid response to address casualty's condition and in accordance with effective first aid principles
 - 2.4 Respond to the casualty in a culturally aware, sensitive and respectful manner
 - 2.5 Monitor casualty's condition and undertake ongoing first aid procedures as required
 - 2.6 Calmly provide information to reassure casualty during the wait for medical assistance, adopting a communication style to match the casualty's level of consciousness
 - 2.7 Provide shelter from elements in accordance with environmental conditions
 - 2.8 Document condition of casualty over time to assist in on-going management
- 3 Work in conjunction with medical and emergency services support
- 3.1 Establish communication links to medical services, using relevant communication equipment to ensure prompt control action is undertaken
 - 3.2 Request ambulance support or appropriate medical assistance according to relevant circumstances
 - 3.3 Administer medication under direct instruction from an **authorised health worker** as required
 - 3.4 Assist in the evacuation of the casualty by

following directions given by emergency services as required

- 4 Evaluate the incident
 - 4.1 Evaluate management of the incident and where required develop an action plan in consultation with relevant parties
 - 4.2 Participate in debriefing/evaluation in order to improve future operations and address individual's needs
 - 4.3 Formulate and review contingency planning to identify and select improved or alternative management principles and procedures as required

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

Working knowledge of communication systems, equipment and methods as available in the remote situation

Understanding of OHS principles

Infection control principles and procedures, including use of standard precautions

Principles of identifying and preparing area for safe evacuation (including aero-medical evacuation)

Principles for evaluating management options relating to transporting casualty and/or waiting for assistance

Principles of preparing for providing first aid in an area remote from ready assistance, including identifying and preparing supplies to address contingencies specific to different types of situation

Awareness of stress management techniques and available support

Essential skills:

Ability to:

Conduct an initial casualty assessment in a remote situation

Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or state/territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own level of skills and knowledge

Use available communication methods and equipment to access medical assistance

Evaluate available options for transporting or maintaining condition of casualty

Transport casualty safely using available methods

Use available resources effectively to manage pain

Administer medication under direct instruction from an authorised health worker and in accordance with State/Territory regulations, legislation and policies

Demonstrate:

safe manual handling

adequate infection control procedures, including standard precautions

identification and preparation of area for safe evacuation (including aero-medical evacuation)

Prepare a written incident report or provide information to enable preparation of an incident report

Improvise treatment and associated resources

Undertake contingency planning in relation to providing a first aid response in a remote situation

Interpret and use listed documents

Communicate effectively and assertively and show leadership in an incident

Accurately listen to, clarify and apply medical instructions

Use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

Make prompt and appropriate decisions relating to managing an incident in a remote situation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects of assessment:

Assessment must include demonstrated evidence of specified Essential Knowledge and Essential Skills identified in this competency unit

Competence should be demonstrated working individually and, where appropriate, as part of a first aid team

Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting

Currency of first aid knowledge and skills is to be demonstrated in line with State/Territory regulations, legislation and policies, Australian Resuscitation Council and industry guidelines

Assessment should utilise aspects of actual or simulated remote situation relevant to work or community context

Method of assessment may include:

Skills in performing first aid procedures are to be assessed through demonstration, with questioning to confirm essential knowledge

Skills may be assessed through simulations, using anatomical models, manikins or in a high fidelity simulation centre

Access and equity considerations:

All workers in the health industry should be aware of access and equity issues in relation to their own area of work

All workers should develop their ability to work in a culturally diverse environment

In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people

Assessors and trainers must take into account

relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Contextualisation to address specific requirements may include:

Focus on first aid management of specific types of injury

First aid provision under specific constraints or circumstances (e.g. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)

Preparation for isolated/remote travel may include:

Selection of relevant communication equipment

Accessing relevant first aid supplies and resources to cater for environmental conditions

Considering access/egress opportunities

Notifying relevant authorities of travel plans

In remote/isolated situations consideration to travel or wait would depend upon:

Severity of injury

Time required for medical assistance to arrive

Whether movement might hinder rescue
Advice given by authorised health worker
Whether contact with medical and/or
emergency services has been achieved

**Documentation, especially in
remote/isolated situations may include
recording:**

Time
Location
Description of injury
First aid management
Fluid/oral intake/output, including fluid loss
via:
blood
vomit
faeces
urine

Administration of medication including time,
date, person administering, dose
Vital signs

Authorised health worker may include:

Paramedic/ambulance officer
General practitioner
Nurse practitioner

Unit Sector(s)

HLTFA402C Apply advanced first aid

Modification History

Not Applicable

Unit Descriptor

Descriptor

This unit deals with the provision of advanced first aid response, life support, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance, and provision of support to other providers

This unit builds on HLTFA301B: Apply first aid to include additional skills and use of a range of equipment

Application of the Unit

Application

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

This unit includes coverage of skills and knowledge in advanced resuscitation techniques
Competency outcomes in advanced resuscitation are to be equivalent to unit:

- HLTFA404B Apply advanced resuscitation techniques

To achieve equivalence of outcome, providers assessing HLTFA402C may refer to specific detail included in unit HLTFA404B and may choose to award both units

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Pre-requisite units

This unit must be assessed after successful achievement of pre-requisite:

- HLTFA301B Apply first aid

Employability Skills Information

Employability Skills

This unit contains Employability Skills

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT

1. Assess the situation

PERFORMANCE CRITERIA

1.1 Identify, assess and minimise *hazards* that may pose a risk of injury or illness to self and others

1.2 Assess *risks* to first aider and others and determine appropriate response to ensure prompt control of situation

1.3 Ascertain and prioritise need(s) for emergency services/medical assistance and undertake triage where required

ELEMENT**PERFORMANCE CRITERIA**

- 1.4 Deploy *resources* to appropriate locations as required in line with workplace procedures
2. Manage the casualty(s)
- 2.1 Determine and explain the nature of *casualty's injury/condition* and relevant first aid procedures to provide comfort
- 2.2 Respond to the casualty in a culturally aware, sensitive and respectful manner
- 2.3 Seek consent for *management* of the casualty's injury/illness from person(s) where relevant
- 2.4 Determine and implement welfare procedure according to casualty(s) needs
- 2.5 Control effects of injury and determine and apply appropriate *first aid management* to meet the needs of the casualty and situation
- 2.6 Assist with *self-medication* in accordance with State/Territory regulations, legislation and policies and manufacturer's/supplier's instructions and subject to casualty's regime
- 2.7 Monitor *casualty's condition* and respond in a timely manner in accordance with effective first aid principles
- 2.8 Correctly operate basic life support *equipment* where appropriate according to relevant legislation and manufacturer's/supplier's instructions
- 2.9 Apply safety procedures for operation of pressurised gases
- 2.10 Use safe manual handling techniques
- 2.11 Finalise *management* according to casualty's needs and first aid principles
3. Coordinate first aid activities until arrival of medical assistance
- 3.1 Identify available *resources* required and establish communication links with appropriate personnel, emergency management services and medical assistance as appropriate
- 3.2 Deploy correct amount of *resources* to appropriate locations in an effective manner to ensure timely arrival of required resources

ELEMENT**PERFORMANCE CRITERIA**

- 3.3 Document the provision of resources and recommend modifications as required
 - 3.4 Monitor the condition of casualties in accordance with first aid principles and workplace procedures
 - 3.5 Coordinate evacuation of casualties according to relevant evacuation procedures
 - 3.6 Arrange support services for personnel involved in the incident in accordance with relevant principles and procedures
-
- 4. Communicate essential incident details
 - 4.1 Maintain communication with relevant personnel using appropriate media and equipment
 - 4.2 Communicate first aid information with other providers/carers as appropriate to meet their needs and in accordance with workplace procedures
 - 4.3 Calmly provide information to reassure casualty, adopting a communication style to match the casualty's level of consciousness
 - 4.4 Prepare an incident report in line with organisation requirements
 - 4.5 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies
-
- 5. Evaluate the incident
 - 5.1 Evaluate management of the incident and where required develop an action plan in consultation with relevant parties
 - 5.2 Participate in debriefing/evaluation in order to improve future operations and address individual's needs
 - 5.3 Formulate and review contingency planning to identify and select alternative management principles and procedures as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes knowledge of:

- Working knowledge of:
 - legal responsibilities and duty of care, including confidentiality
 - basic anatomy (skeleton, muscles, joints, bones), physiology and toxicology
 - ARC Guidelines and/or State/Territory regulations, legislation and policies relating to provision of first aid
 - procedures for dealing with major and minor accidents in the workplace
 - infection control principles and procedures, including using standard precautions
 - how to gain access to and interpret material safety data sheets (MSDSs)
 - company/organisation standard operating procedures (SOPs)
 - priorities of management in first aid
 - occupational health and safety requirements in the provision of first aid.
 - capabilities of emergency management services
 - first aiders' skills and limitations
 - safe storage and handling procedures for pressurised gases
 - advanced resuscitation techniques as per *HLTFA404A Apply advanced resuscitation techniques*
- First aid management procedures in accordance with ARC Guidelines, state/territory regulations, legislation and policies and organisation requirements for conditions identified in the Range Statement and including:
 - use of AED, oxygen, bronchodilator
 - spinal care
 - management of anaphylactic shock reaction
 - use of analgesic gases
- Incident management procedures:
 - manual handling, hazardous substances, dangerous goods or chemicals
 - basic triage for a multiple casualty incident
 - safe access to the casualty

REQUIRED SKILLS AND KNOWLEDGE

- awareness of confined spaces and dangerous places
- removal of casualty to safe area, if appropriate
- coordinate activities of other first aiders, if applicable
- First aid management procedures may also relate to emergency childbirth
- Complications and associated methods of management for conditions identified in the Range Statement
- State and territory regulatory requirements relating to currency of skill and knowledge

continued ...

Essential knowledge (contd):

- Social issues, especially in particular workplace or community context(s) in which first aid is to be applied, including:
 - importance of debriefing
 - need to be culturally aware, sensitive and respectful
 - confidentiality
 - own skills and limitations
- Awareness of stress management techniques and available support
- Safety procedures for the operation of pressurised gases

Essential skills:

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes the ability to:

- Administer medication in line with State/Territory regulations, legislation and policies and any available medical/pharmaceutical instructions
- Apply advanced resuscitation techniques as per *HLTFA404A Apply advanced resuscitation techniques*
- Call an ambulance and/or medical assistance according to relevant circumstances and report casualty's condition
- Communicate effectively and assertively and show leadership in an incident
- Comply with OHS legislation
- Conduct an initial casualty assessment
- Demonstrate the application of first aid principles
- Demonstrate:
 - adequate infection control procedures
 - consideration of the welfare of the casualty
 - safe manual handling
 - safe storage and handling procedures for pressurised gases

REQUIRED SKILLS AND KNOWLEDGE

- Interpret and use listed documents
- Make prompt and appropriate decisions relating to managing an incident in the workplace
- Manage specific injuries/illnesses and conditions as identified in the Range Statement for this competency unit
- Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or State/Territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own skills
- Prepare a written incident report or provide information to enable preparation of an incident report
- Provide assistance with self-medication as per subject's own medication regime and in line with State/Territory legislation, regulations and policies and any available medical/pharmaceutical instructions
- Use a range of first aid equipment as outlined in the Range Statement
- Use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects of assessment:

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- Competence should be demonstrated working individually and, where appropriate, as part of a first aid team
- Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting
- Currency of first aid knowledge and skills is to be demonstrated in line with state/territory regulations, legislation and policies, ARC and industry guidelines

Method of assessment may

- Skills in performing first aid procedures are to be

EVIDENCE GUIDE

include:

assessed through demonstration, with questioning to confirm essential knowledge

- Skills may be assessed through simulations, using anatomical models, manikins or in a high fidelity simulation centre
- For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with ARC Guidelines

Access and equity considerations:

- All workers in the health industry should be aware of access and equity issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Contextualisation to address

- Focus on first aid management of specific types of

RANGE STATEMENT

specific requirements may include:

- injury
- First aid provision under specific constraints or circumstances (eg. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)

First aid management must take into account:

- Workplace policies and procedures
- Industry/site specific regulations, codes etc.
- OHS requirements
- State and territory workplace health and safety requirements

A hazard is:

- A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these

Hazards may include:

- Physical hazards
- Biological hazards
- Chemical hazards
- Hazards associated with manual handling

Risks may include:

- Risks from worksite equipment, machinery and substances
- Risks from first aid equipment (oxygen cylinders, AED)
- Environmental risks
- Exposure to blood and other body substances
- Risk of further injury to the casualty
- Risks associated with the proximity of other workers and bystanders
- Risks from vehicles
- Fallen power lines, step and touch potential

Casualty's condition is managed for:

- Abdominal injuries
- Airway obstruction
- Allergic reactions
- Altered and loss of consciousness
- Bleeding

RANGE STATEMENT

- Burns - thermal, chemical, friction, electrical
- Chest pain
- Injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations
- Near drowning
- Envenomation - snake, spider, insect and marine bites
- Environmental conditions such as hypothermia, hyperthermia, dehydration, heat stroke
- Fractures
- Medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
- No signs of life
- Pain relief
- Poisoning and toxic substances (including chemical contamination)
- Respiratory distress
- Shock
- Seizures
- Stroke
- Substance misuse - all drugs and alcohol, including illicit drugs

First Aid management skills must include in accordance with ARC Guidelines, State/Territory regulations, legislation and policies and industry requirements:

- Administration of analgesia
- CPR
- Infection control
- AED
- Identification and management of anaphylactic shock reaction in accordance with ARC Guidelines, State/Territory regulations, legislation and policies and industry requirements
- Oxygen administration

First aid management must account for:

- Location and nature of the workplace
- Environmental conditions eg electricity (high or low voltage), biological risks, weather, motor vehicle accidents
- Location of emergency services personnel
- Number of casualties and potential casualties

RANGE STATEMENT

- Use and availability of first aid equipment, resources and pharmaceuticals
- Types of dangers/risks to the casualty and any others in the vicinity of the situation
- Confined spaces, subject to industry need

Medications may include in accordance with ARC Guidelines, State/Territory regulations, legislation and policies and industry requirements:

- Oxygen
- Analgesics
- Bronchodilators
- Casualty's own medications
- Auto-injectors

Resources and equipment are used appropriate to the risk to be met and may include:

- Oxygen resuscitation/cylinders
- AED
- Thermometers
- Auto-injectors
- Back boards
- Stretchers
- Soft bag resuscitator
- First aid kit
- Casualty's medication
- Analgesic inhalers
- Analgesic gas equipment
- Resuscitation mask or barrier
- Spacer device
- Cervical collars

Information to be documented may include:

- Time
- Location
- Description of injury
- First aid management
- Fluid intake/output, including fluid loss via:
 - blood
 - vomit
 - faeces
 - urine
- Administration of medication including:
 - time

RANGE STATEMENT

- date
- person administering
- dose
- Vital signs

Established first aid principles include:

- Checking the site for danger to self, the casualty and others and minimising the danger
- Checking and maintaining the casualty's airway, breathing and circulation

Unit Sector(s)

Not Applicable

HLTFA403A Manage first aid in the workplace

Modification History

Unit Descriptor

This unit addresses the establishment and maintenance of facilities to enable or facilitate the provision of appropriate first aid in the workplace

Application of the Unit

The skills and knowledge described in this competency unit are suitable for those in nominated workplace first aider roles

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to OHS and provision of first aid

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

Licensing/Regulatory Information

Pre-Requisites

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills

The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in *italics* are elaborated in the Range Statement.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Establish a workplace first aid facility	<ul style="list-style-type: none">1.1 Plan a first aid facility in the workplace to address workplace and legislative requirements1.2 Identify potential workplace hazards and assess associated risks as a basis for determining first aid resource requirements1.3 Identify and prepare first aid equipment and resources required to address identified workplace requirements1.4 Identify personnel requirements in line with legislative and workplace requirements1.5 Establish and maintain links with relevant first aid bodies and professional organisations to maintain currency in the field and for referral purposes1.6 Access and provide information in the workplace to encourage risk minimisation and facilitate access to first aid facilities as appropriate
2 Manage a workplace first aid facility	<ul style="list-style-type: none">2.1 Monitor and maintain availability of adequate resources to support workplace first aid response2.2 Conduct regular inspections of stock and equipment to ensure currency and operational readiness in line with workplace requirements2.3 Ensure equipment is recovered and reprocessed and that waste is disposed of safely according to legislative and workplace procedures2.4 Ensure equipment and resources are stored and maintained in line with relevant legislation and manufacturer's/supplier's instructions2.5 Contribute to the review of risks in the workplace and validation of organisation policies and procedures relating to the provision of first aid2.6 Contribute to planning for response to major workplace incidents2.7 Deploy appropriate equipment, resources and personnel to ensure timely and effective first aid

- response in line with workplace requirements
- 2.8 Use safe manual handling techniques
- 3 Manage workplace first aid records
- 3.1 Ensure **documentation** is completed as required according to legislation and workplace procedures
- 3.2 Maintain first aid records in line with legislative requirements and workplace security practices
- 3.3 Send relevant documents to appropriate bodies in line with workplace and legislative requirements
- 3.4 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies
- 4 Evaluate the provision of first aid in the workplace
- 4.1 Evaluate management of workplace incidents and develop an action plan in consultation with relevant parties to improve first aid response in the workplace if required
- 4.2 Participate in debriefing/evaluation in order to improve future operations and address individual needs
- 4.3 Ensure first aid response is provided in a culturally aware, sensitive and respectful manner
- 4.4 Implement and evaluate workplace management procedures in accordance with risk assessment
- 4.5 Formulate and review contingency planning to identify and select alternative management principles and procedures as required

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

Working knowledge of:

Legal responsibilities and duty of care

Australian Resuscitation Council (ARC) Guidelines relating to provision of first aid

Procedures for dealing with major and minor accidents in the workplace

How to gain access to and interpret material safety data sheets (MSDSs)

Company/organisation standard operating procedures (SOPS)

Priorities of management in first aid

Occupational health and safety requirements in the provision of first aid

First aiders' skills and limitations in relation to first aid response in the workplace

First aid risk assessment practices and procedures

Safe storage and handling of medication in the workplace

First aid equipment and resources to manage injuries and illnesses addressed in
HLTFA301B: Apply first aid and HLTFA402B: Apply advanced first aid

First aid management procedures for conditions identified in the Range Statement

Infection control principles and procedures, including using standard precautions

State/territory regulations, legislation and policies relating to:

workplace first aid provision

occupational health and safety requirements in the provision of first aid

first aid training

currency of first aid skills and knowledge

Stress management techniques and available support

Social issues, with particular reference to workplace culture, issues and resources and
associated organisation requirements:

importance of first aid response to be culturally aware, sensitive and respectful

debriefing counselling procedures

consent and confidentiality

own skills and limitations

Essential skills:

Ability to:

Manage a first aid response in an identified workplace context

Assess workplace first aid requirements

Maintain first aid equipment and resources in operational condition

Conduct an initial casualty assessment and prioritisation

Conduct/review first aid risk assessment

Plan an appropriate first aid response in line with established first aid principles, ARC Guidelines and/or State/Territory regulations, legislation and policies and respond appropriately to contingencies in line with own level of skills and knowledge

Apply first aid principles in the workplace

Implement OHS guidelines

Demonstrate:

safe manual handling

adequate infection control procedures - use of standard precautions

consideration of the welfare of casualties and first aiders

incident management skills

safe storage and handling procedures for pressurised gases

safe storage and handling of medication in the workplace

Interpret, use and maintain records of the range of documentation required by the workplace and regulatory authorities

Communicate effectively and assertively and show leadership in an incident

Use high level literacy and numeracy skills as required to read, interpret, address and communicate guidelines, protocols and reporting requirements

Make prompt and appropriate decisions relating to managing an incident in the workplace

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects of assessment:

Assessment must include demonstrated evidence of specified Essential Knowledge and Essential Skills identified in this competency unit

Consistency of performance should be demonstrated over the required range of situations relevant to the workplace

Currency of first aid knowledge and skills is to be demonstrated in line with state/territory regulations, legislation and policies, ARC and industry guidelines

Interdependence of units:

Competence in this unit may be assessed individually or with other related competency units, such as:

Occupational health and safety

Risk assessment

Emergency procedures

Access and equity considerations:

All workers in the health industry should be aware of access and equity issues in relation to their own area of work

All workers should develop their ability to work in a culturally diverse environment

In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people

Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Workplace first aid facility may involve:	<ul style="list-style-type: none"> First aid room/clinic First aid kits suited to specific workplace needs First aid equipment and resources Availability of personnel trained to provide first aid
Workplace first aid management must take into account:	<ul style="list-style-type: none"> Workplace policies and procedures Industry/site specific regulations, codes Workplace OHS requirements State and territory workplace health and safety legislative requirements
Workplace and legislative requirements for a first aid facility include:	<ul style="list-style-type: none"> State/territory regulations, legislation and policies Specific industry requirements, regulations and/or OHS issues Specific hazards present in the workplace Number of employees in the workplace Number of different workplace sites/locations Proximity to local services, including doctors, hospital, ambulance and other emergency services
First aid resources may include but are not limited to:	<p>Non-consumables:</p> <ul style="list-style-type: none"> Equipment, such as: oxygen resuscitation/cylinders

AED
thermometers
auto-injectors
back boards
stretchers
soft bag resuscitator
first aid kit
casualty's medication
analgesic inhalers
analgesic gas equipment
resuscitation mask or barrier

Communication systems and equipment

First aid resources may include but are not limited to:

Consumables:

First aid kits, including bandages, tape, scissors, splinter removers, antiseptic, eye management, disinfectants, resuscitation masks, emergency numbers and contacts, etc
Dressings
Ointments
Cold packs

Analgesics
Splints
Sharps disposal
Bio-hazardous waste bags/bins
Medical grade oxygen
Bandages
Medication
Personal protective equipment
Eye wash
Disinfectants
Bronchodilators

Workplace hazards and risks may include:

Hazards associated with workplace equipment, machinery, substances and processes

Environmental risks

Risks associated with first aid response involving:

first aid equipment (oxygen cylinders, AED)

exposure to blood and other body substances

risk of further injury to the casualty

risks associated with the proximity of other workers and bystanders

First aid bodies and professional organisations may include:

Australian Resuscitation Council (ARC)

Support Groups

Registered Providers/Authorities

Emergency services

First aid management skills must include:

Administration of analgesic gases in accordance with ARC Guidelines, state/territory regulations, legislation and policies and industry requirements

CPR

Infection control

AED (where available)

First aid management must account for:

Location and nature of the workplace

Environmental conditions e.g. electricity, biological risks, weather, motor vehicle accidents

Location of emergency services personnel

Number of casualties and potential casualties

Use and availability of first aid equipment, resources and pharmaceuticals

Types of dangers/risks to the casualty and any others in the vicinity of the situation

Confined spaces, subject to industry need

Documentation may include:

Incident/injury reports

Casualty history forms

Disease notification

Workcover forms

Medication registers

Workers' compensation

Day book

Pre-participation records (sport)

Medical histories

Management records

Stock records

Infection control records

Training records

First aid risk assessment

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Manipulate data	1.1. Employ advanced features of <i>applications</i> in the preparation and presentation of data 1.2. Efficiently transfer data between <i>applications</i> , linking and embedding related data files as required 1.3. Create and employ <i>objects</i> , macros and templates for routine activities 1.4. Use shortcuts and features to increase personal productivity
2. Access and use support resources	2.1. Solve routine problems using support resources 2.2. Use on-line help to overcome difficulties with <i>applications</i> 2.3. Solve problems with manuals and training booklets 2.4. Access and apply technical support for <i>system</i> problems, utilising troubleshooting results and alert messages

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- Basic analysis skills in relation to normal routine work processes
- Detailed skills in using applications features
- Basic skills in interpreting technical information
- Problem solving skills in known areas during normal routine work processes
- Plain English literacy and communication skills in relation to dealing with clients and team members

Required knowledge

- Basic understanding of operating systems software and system tools
- Broad knowledge of vendor product directions
- Broad knowledge of vendor applications and their features

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- Assessment must confirm the ability to use at least three computer applications to their full capacity employing all advanced features and import/export capacities for efficiency and productivity purposes, using at least two industry-recognised application packages.

To demonstrate competency in this unit the person will require access to:

- Personal computer
- Documents or information containing data suitable

EVIDENCE GUIDE	
	for use with multiple computing packages
Context of and specific resources for assessment	<p>The use of advanced features of computer applications is increasing as workplaces recognise the full potential and functionality of contemporary commercial applications. Individuals demonstrating this competency would be considered user experts or advanced users and would be capable of tutoring colleagues in the use of commercial applications.</p> <p>The breadth, depth and complexity of knowledge and skills in this competency would cover selecting, adapting and transferring skills and knowledge to new environments and providing technical advice and some leadership in resolution of specified problems. This would be applied across a range of roles in a variety of contexts with some complexity in the extent and choice of options available.</p> <p>Assessment must ensure:</p> <ul style="list-style-type: none"> • Performance of a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency measures and within known time constraints would be characteristic. • Applications may involve some responsibility for others. Participation in teams including group or team coordination may be involved.
Method of assessment	<p>The purpose of this unit is to define the standard of performance to be achieved in the workplace. In undertaking training and assessment activities related to this unit, consideration should be given to the implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs. Additional guidance on these and related matters is provided in ICA05 Section 1.</p> <ul style="list-style-type: none"> • Competency in this unit should be assessed using summative assessment to ensure consistency of

EVIDENCE GUIDE

	<p>performance in a range of contexts. This unit can be assessed either in the workplace or in a simulated environment. However, simulated activities must closely reflect the workplace to enable full demonstration of competency.</p> <ul style="list-style-type: none"> • Assessment will usually include observation of real or simulated work processes and procedures and/or performance in a project context as well as questioning on underpinning knowledge and skills. The questioning of team members, supervisors, subordinates, peers and clients where appropriate may provide valuable input to the assessment process. The interdependence of units for assessment purposes may vary with the particular project or scenario.
<p>Guidance information for assessment</p>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • ICAB3018B Develop macros and templates for clients using standard products <p>An individual demonstrating this competency would be able to:</p> <ul style="list-style-type: none"> • Demonstrate some relevant theoretical knowledge • Apply a range of well-developed skills • Apply known solutions to a variety of predictable problems • Perform processes that require a range of well-developed skills where some discretion and judgement is required • Interpret available information, using discretion and judgement • Take responsibility for own outputs in work and learning • Take limited responsibility for the output of others • Maintain knowledge of industry products and services

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Applications</i>	<ul style="list-style-type: none"> • May include but are not limited to commercial software applications; organisation-specific software; word processing, spreadsheet, database, graphic, communication packages and presentation functionalities. • May include presentation applications contained in: Microsoft Office, Lotus Suite, Claris Works, Star Office or other similar applications.
<i>Objects</i> may include:	<ul style="list-style-type: none"> • buttons • checkboxes • option buttons • text boxes • drop down lists
<i>System</i> may include but is not limited to:	<ul style="list-style-type: none"> • network • application • software • business • computers • financial system • management system • information system

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Design and manage a sustainability audit	<p>1.1. Use an audit tool reflects criteria of benchmark, nature of risks, relevant information and data types, evaluation of performance and legislative requirement</p> <p>1.2. Define the scope, objectives and benchmarks for the audit in consultation with relevant stakeholders</p> <p>1.3. Use an <i>audit tool</i> to reflect criteria of benchmark, nature of risks, relevant information and data types, evaluation of performance and legislative requirement</p> <p>1.4. Document requirements for audit resources, timing, schedule and responsibilities consistent with industry</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>best practice and relevant standards</p> <p>1.5.Ensure collection strategies are objective, systematic and that information and data is valid and reliable</p> <p>1.6.Report outcomes clearly and concisely, including benefits to be achieved by adoption of audit report recommendations</p>
<p>2. Monitor energy consumption and emissions</p>	<p>2.1.Analyse requirements of the National Greenhouse and Energy Reporting System (NGERS) and other relevant legislation and industry standards in relation to a range of industries and the needs of specific organisations</p> <p>2.2.Identify links with functional areas and environmental management systems to ensure comprehensive information and data collection</p> <p>2.3.Determine hardware and software required for collecting, collating, analysing and reporting emissions related information and data</p> <p>2.4.Factor requirement for an external audit into the monitoring proposal</p> <p>2.5.Critically evaluate energy consumption and emissions data</p> <p>2.6.Develop improvement strategies based on the review of data</p> <p>2.7.Use industry best practice as a quality benchmark</p>
<p>3. Develop ICT solutions to improve sustainability outcomes</p>	<p>3.1.Research and analyse mitigation and adaptation strategies appropriate for a range of industries</p> <p>3.2.Benchmark and document performance expectations in consultation with relevant stakeholders</p> <p>3.3.Develop and document technical specifications including hardware, software, networking, interface and security requirements</p> <p>3.4.Determine timelines, resources and costs for implementation and ongoing monitoring and maintenance</p> <p>3.5.Analyse the impact of ICT solution in relation to performance benchmarks</p> <p>3.6.Analyse opportunities and develop recommendations to improve sustainability of enterprise products, services and processes</p> <p>3.7.Present report for client sign off</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to read and evaluate complex and formal documents such as legislation and technical reports
- communication skills to consult with stakeholders and liaise with clients
- literacy skills to prepare written reports and other documentation requiring precision of expression and language and structures suited to the intended audience
- research skills to analyse and present information
- technical skills to:
 - conduct an ICT sustainability audit
 - quantify sustainability objectives, targets, achievements and measures
 - use relevant systems and procedures to aid in the achievement of emissions reduction

Required knowledge

- auditing sustainability processes and practices
- corporate social responsibility
- development processes and practices
- hazard identification and control
- industry standards
- legislation framework underpinning sustainability
- principles, practices and available tools and techniques of sustainability management relevant to a range of industries
- relevant ISO standards
- sustainability from a local, national and international perspective
- sustainability including ecological, economic and social issues
- technical performance measurement

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the

EVIDENCE GUIDE	
performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • audit and analyse patterns of energy use • develop monitoring and reporting systems that comply with regulatory requirements • develop a workable implementation strategy • formulate solutions using ICT to reduce emissions • develop benchmarks for reviewing and improving performance.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • relevant reports: <ul style="list-style-type: none"> • government • Intergovernmental Panel on Climate Change (IPCC) • scientific • conference papers • vendor white papers • resources, tools and networking equipment • suitable hardware and software • suitable bandwidth for internet connections • relevant legislation and regulations • manufacturers' technical specifications • relevant ISO standards.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct observation of the candidate managing organisation sustainability • review of analyses, plans and reports completed by the candidate • oral or written questioning to assess required knowledge.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • ICTSUS7236A Manage improvements in ICT

EVIDENCE GUIDE

	<p>sustainability.</p> <p>Aboriginal people and other people from a non-English speaking background may have second language issues.</p> <p>Access must be provided to appropriate learning and assessment support when required.</p> <p>Assessment processes and techniques must be culturally appropriate, and appropriate to the oral communication skill level, and language and literacy capacity of the candidate and the work being performed.</p> <p>In all cases where practical assessment is used it will be combined with targeted questioning to assess required knowledge. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. **Establish administration procedures**

- 1.1 Administrative processes for contracts are implemented according to council quality improvement
- 1.2 Contract requirements are confirmed with relevant contract personnel.
- 1.3 Complaint system is established according to council policy and procedures.
- 1.4 Consistent and accurate records of contract progress are maintained.

2. **Monitor contract time frame and specifications**

- 2.1 Regular inspections of contract services are undertaken to ensure compliance with specifications and program for completion.
- 2.2 Regular planned progress meetings are held and documented between all contract personnel to ensure problems are identified and resolved early.
- 2.3 Variations between the specified scope of services and the contract are identified and documented, and relevant personnel are notified without delay.
- 2.4 Testing of services in progress is carried out as required by the contract and in accordance with legislation, regulations and council policy.

3. **Monitor costs**

- 3.1 Contract costs are monitored on a regular basis to ensure that the service is carried out in accordance with financial and contractual requirements.
- 3.2 Payments for contract services are authorised in accordance with the conditions of contract and delegation of officer.
- 3.3 Transaction costs are monitored through an established system.

4. **Resolve contractual disputes**

- 4.1 Disagreements are investigated to identify cause and validity.

ELEMENT**PERFORMANCE CRITERIA****5 Implement contract transition**

- 4.2 Terms of resolution are negotiated and agreed.
- 4.3 Contract provisions for dispute resolution are followed.
- 4.4 Legal and management advice is sought at an early stage of any dispute to ensure that the contractor has a clear understanding of the council's legal position and that the council is not exposed to undue legal risk.
- 4.5 Appropriate legal advice is sought at any stage in order to clarify any technical aspects of a dispute.
- 5.1 Contract conditions and responsibilities are reviewed with relevant personnel to ensure satisfactory completion of contract.
- 5.2 Contract completion is authorised in writing to confirm completed services have been undertaken according to contract objectives and specifications.
- 5.3 Final statement is reconciled.
- 5.4 Contractor performance and level of service are evaluated against agreed benchmark.
- 5.5 End-of-service or renewed contracts are coordinated to meet council requirements.
- 5.6 Quality of contract documentation is assessed.

Evidence Guide

EVIDENCE GUIDE

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

Maintenance of files relating to records of meetings, payments, progress reports, file notes and discussions.
 Effective communication with the contractor.
 Monitoring of industry changes.
 Making recommendations covering a range of contracts.
 Maintenance of WorkCover, OHS and audit processes and up-to-date insurance files.
 Monitoring relevant laws, by laws and regulations or best practice on environmental performance and sustainability

Context of assessment

On the job or in a simulated work environment.

Relationship to other units (prerequisite or co-requisite units)

Prerequisite units: nil.
 Co-requisite units: nil.

Method of assessment

The following assessment methods are suggested:

EVIDENCE GUIDE

	<p>observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies</p> <p>written and/or oral questioning to assess knowledge and understanding</p> <p>completion of workplace documentation</p> <p>third-party reports from experienced practitioners</p> <p>completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.</p>
<p>Evidence required for demonstration of consistent performance</p>	<p>Evidence will need to be gathered over time across a range of variables.</p>
<p>Resource implications</p>	<p>Access to a workplace or simulated case study that provides such resources as:</p> <p>a range of council contract documentation and records</p> <p>relevant commercial law texts on contracts</p> <p>relevant council policies and procedures documents.</p>

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. **Identify the extent and nature of services to be contracted**

- 1.1. Scope of the services is confirmed and reviewed to ensure parameters meet current requirements.
- 1.2. Statutory and council requirements are identified to determine available options.
- 1.3. Detailed parameters are specified to enable a complete brief to be prepared.
- 1.4. The extent of the contract package is determined.

2. **Select appropriate method for tender**

- 2.1. Area to be contracted is examined.
- 2.2. Contract options are identified and analysed.
- 2.3. Benefits, costs and opportunities of each option are identified.
- 2.4. Appropriate contract option is selected.

3. **Prepare tender specifications according to council and Australian standards**

- 3.1. Complete and detailed service specifications are prepared consistent with council policy and Australian standards and based on service profile and review.
- 3.2. Legislative, environmental, sustainability practices, occupational health and safety and risk management requirements are applied.
- 3.3. Quality assurance methods are applied to the preparation of service specifications.
- 3.4. Service specifications are prepared in consultation with relevant staff that complement required outcomes.
- 3.5. Details on methods, standards, materials, products, contractors and performance period are provided by quality service specifications, as applicable.

4. **Prepare evaluation criteria**

- 4.1. A tender review panel or team is selected from appropriate personnel.
- 4.2. Criteria are established based on the specifications, product and service required.

ELEMENT	PERFORMANCE CRITERIA
5. Prepare tender document	4.3.Criteria are written clearly to enable bids to be compared. 4.4.Criteria are ranked against council procedures. 5.1.Tender documents are prepared clearly and concisely. 5.2.Tender documents are prepared that enable competitive pricing of products. 5.3.Tender documents are designed to enable valid comparisons between tenders received.
6. Invite tenders	6.1.Invitations are prepared based on the type of tendering method used. 6.2.Source list is prepared according to council procedures. 6.3.Advertisement is prepared and placed according to the tender method.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Devise consultation strategies

- 1.1. A range of consultation strategies is identified and assessed for suitability.
- 1.2. Interested and affected parties are identified.
- 1.3. Resources required to conduct consultation are assessed.
- 1.4. Consultation strategies are chosen that enable and encourage relevant groups or individuals to be involved.
- 1.5. Legislative and council requirements are reviewed to ensure strategies meet all criteria.

2. Conduct consultations

- 2.1. Information is prepared that is clear, accurate and appropriate to the needs of all parties.
- 2.2. All people involved in conducting the consultations are briefed on the process of consultation and the parties involved.
- 2.3. Information is presented to affected parties at an appropriate time and place.
- 2.4. Access and equity requirements are implemented in the consultations.
- 2.5. Measures to expedite community consultation are taken to ensure consultation occurs within an identified time frame.
- 2.6. Consultation is undertaken in an orderly manner to ensure all viewpoints are canvassed.

3. Record, analyse and report on results

- 3.1. Public consultation responses and processes are formatted to enable informed decision making to proceed.
- 3.2. Appropriate suggestions for improvement are

ELEMENT

PERFORMANCE CRITERIA

incorporated into design parameters.

3.3. Summaries of responses and adopted amendments are provided to interested parties to ensure public consultation is recognised.

3.4. Other issues raised during consultation are directed to relevant department or person to respond to community concern.

3.5. An accurate report on community consultation that includes recommendations is prepared to enable informed decision making to occur.

3.6. The overall effectiveness of the consultation process is reviewed and evaluated and action is taken where necessary.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- consultation, presentation, negotiation and report writing
- research
- planning and organising
- information gathering and analysis.

Required Knowledge

- relevant council policies and procedures
- relevant legislation, including planning and anti-discrimination
- relevant sections of local government act
- access and equity issues
- strategies for consultation
- codes of conduct and ethics.

Evidence Guide

EVIDENCE GUIDE

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	<p>The demonstrated ability to devise and conduct community consultations where:</p> <ul style="list-style-type: none"> • consultation ensures council's image or reputation is maintained or enhanced • community consultation produces valid and useful information.
Context of assessment	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.
Relationship to other units(prerequisite or co-requisite units)	<p>Prerequisite units: nil.</p> <p>Co-requisite units: nil.</p>
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.
Evidence required for demonstration of consistent performance	Evidence should be gathered over a period of time in a range of actual or simulated management environments.
Resource implications	Access to a range of real or simulated consultation processes including:

EVIDENCE GUIDE

- public and community meetings and forums
- surveys and door knocks
- appropriate communications equipment and aids such as overhead projectors and computer-based presentations.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Access and equity may include:

- subject matter
- manner in which consultations are conducted
- physical accessibility
- community profile.

Enabling and encouraging relevant groups to be involved may include:

- physical accessibility
- diverse language needs
- culture, including Indigenous, youth and non-English speaking background
- physical environment
- number of people.

Information may include:

- written and oral records
- anecdotes
- reports
- instructions
- directions from supervisor or management
- interviews
- formal and informal team meetings.

Interested and affected parties may include:

- community groups
- other authorities
- individuals
- emergency authorities (police, fire and ambulance)
- private sector business interests
- special interest groups
- experts.

Resources may include:

- human
- financial
- locations.

RANGE STATEMENT

Consultation strategies may include:

- public meetings
- phone-ins
- questionnaires
- informal gatherings
- door knocks
- council meetings.

Legislation may include:

- local government
- anti-discrimination
- planning.

Presentation of information may include:

- graphics
- models
- computer animations
- video displays
- overhead transparencies
- handouts
- display plans
- interpreter service.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. **Develop environmental health education, promotion and awareness strategies**

1.1.Goals and objectives for health education, promotion and awareness are established in accordance with council requirements.

1.2.Information to assist in needs analysis is identified, researched and collated.

1.3.Health surveys that identify community health needs are developed.

1.4.Existing services and strategies are reviewed and evaluated to ensure relevance.

1.5.Community networks are established and maintained to ensure broad exposure to local development needs.

2. **Implement environmental health education, promotion and awareness strategies**

2.1.Appropriate health education, promotion and awareness programs are developed and implemented based on community development needs and in accordance with council policy.

2.2.Programs are implemented using appropriate educational, promotional and awareness activities and responding to state legislative requirements.

2.3.Health education, promotional and awareness programs are monitored and evaluated in conjunction with the community to assess performance in relation to program goals and objectives.

3. **Undertake marketing programs**

3.1.Opportunity for a marketing program is identified from the market place.

ELEMENT

PERFORMANCE CRITERIA

- 3.2. Viability of a program is assessed by internal and external consultation.
- 3.3. Reports are prepared for management and council with recommendations and supporting information.
- 3.4. Marketing program is implemented and monitored to ensure objectives are met within budget, resource and time limitations.
- 3.5. Program is reviewed and assessed using consumer response and internal audits.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- information gathering and research
- survey design
- cooperative and professional communication and interaction with a wide range of stakeholders
- problem solving and conflict management
- well developed and effective written communication
- implementation of promotional strategies
- program planning
- networking
- implementation of public consultation strategies
- implementation of program evaluation strategies
- participation in public presentations
- budget management
- monitoring own work and adjusting to meet agreed standards and expectations
- engaging in activities that promote own ongoing learning requirements, which may include maintaining current knowledge of legislation and common law
- using technology relevant to the job/role, which may include the use of computers and other relevant office technology.

Required Knowledge

- council structure and services
- relevant council procedures

REQUIRED SKILLS AND KNOWLEDGE

- relevant legislation and standards
- principles of positive interaction with diverse groups within the community
- community consultation and information strategies
- local health services and relevant professionals
- council's health education policy
- current and potential health issues affecting the community.

EVIDENCE GUIDE

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the elements to the required performance level detailed in the performance criteria. The unit's skill and knowledge requirements must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to:

- establish and maintain community networks
- establish appropriate goals for health education, promotion and awareness in accordance with council requirements
- develop, implement and evaluate appropriate health education, promotion and awareness programs
- market, implement and monitor programs to ensure objectives are met
- report, review and assess programs.

Context of assessment

On the job or in a simulated work environment.

Method of assessment

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials, including

EVIDENCE GUIDE

	personal reflection and feedback from trainer, coach or supervisor.
Evidence required for demonstration of consistent performance	Competency must be demonstrated in all elements across a range of variables relevant to council's size, location and strategic plan.
Resource implications	<p>Access to a workplace or simulated case studies that provide relevant equipment and materials, such as:</p> <ul style="list-style-type: none"> • videotapes • pamphlets • health legislation • council policies and procedures.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Council requirements may include:	<ul style="list-style-type: none"> • council policies, procedures and guidelines • strategic, business and management plans • local ordinances, laws and by-laws • state legislation.
Community health needs may include special requirements of:	<ul style="list-style-type: none"> • ethnic or minority groups • demographic groups.
Health education, promotion and awareness programs may include:	<ul style="list-style-type: none"> • immunisation • nutrition • smoking • sun smart • health effects of climate change, such as heat stress • mosquito control • sexually transmitted diseases • council • public health plan • public health policy • media releases • personal skill development

RANGE STATEMENT

Legislative requirements may include:

- community action strengthening
- supportive environments
- reorienting services
- behavioural and environmental adaptation
- community development.
- federal
- state or territory
- local government.

Marketing may include:

- preparation and use of materials, such as:
- audiovisual materials
- pamphlets and books
- software
- badges
- ties
- stickers
- professional consultancy
- online support.

Viability may include:

- profit or loss
- break-even
- community value.

Internal and external consultation may include:

- staff
- councillors
- schools
- police
- experts
- community
- parents
- funding organisations
- regional groups
- relevant agencies, including welfare agencies
- hospitals
- medical institutes
- church groups
- industry and professional expertise
- government departments
- marketing departments and consultants
- media developers.

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. **Prepare inventory of heritage and cultural assets**

- 1.1. Heritage and cultural assets within the community, and council expectations and requirements relating to them, are identified.
- 1.2. The significance of each heritage and cultural asset is assessed according to established criteria and community expectations.
- 1.3. An adequate information base of significant places is obtained through comprehensive field investigation and research.
- 1.4. Data is collected accurately and objectively on heritage and cultural assets.
- 1.5. A comprehensive inventory of heritage and cultural assets is prepared with full and detailed descriptions of history and significance.

2. **Assess threats and opportunities for the protection of heritage and cultural assets**

- 2.1. Threats and opportunities are identified to ensure all factors are fully assessed.
- 2.2. Based on input from council and the community, criteria are established to enable threats and opportunities to be prioritised.

3. **Identify and develop strategies for the protection of heritage and cultural assets**

- 3.1. Criteria are established to identify priorities.
- 3.2. Consultation with the community and property owners is undertaken to seek views on the conservation action required to protect the significant attributes of the area.
- 3.3. A framework for the legal protection of heritage and cultural assets is established through existing legislation.
- 3.4. Practical and appropriate strategies to conserve heritage and cultural assets are determined.
- 3.5. The effectiveness of strategies is assessed through a comparison with methods used elsewhere.

ELEMENT**PERFORMANCE CRITERIA**

4. Implement strategies for the protection of heritage and cultural assets

- 3.6. The policy elements of the proposed heritage program are determined.
- 3.7. Innovative approaches are developed to protect heritage and cultural assets in response to the local community need.
- 4.1. The study and program are adopted by the local authority.
- 4.2. Consultation is undertaken with the community and property owners about the study and proposed heritage program.
- 4.3. Financial resources are identified and procured within budget cycles to support the achievement of required outcomes.
- 4.4. Personnel are identified, trained and assigned to tasks so that requirements for skills and knowledge are met.
- 4.5. Physical facilities and equipment are identified and procured within budget cycles to support the achievement of required outcomes.
- 4.6. Community education and information materials are prepared and distributed to ensure ongoing support for the strategy.
- 4.7. The strategy is incorporated into council policies and procedures and relevant legislation.
- 4.8. A timetable for implementation is established and priorities are set.

5. Monitor and review the effectiveness of strategies to protect heritage and cultural assets

- 5.1. Further research is undertaken on places listed as being of local significance in the study.
- 5.2. Additional plans of significance are identified and reviewed.
- 5.3. An annual heritage report is prepared if required.
- 5.4. Information received from monitoring and review is used to develop new strategies that are based on accumulated knowledge and experience.

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|---|
| <p>1. Establish site facilities for road maintenance and construction</p> | <p>1.1. Work is planned and programmed to be undertaken in accordance with drawings, specifications and other documentation.</p> <p>1.2. Work site is prepared and maintained in a safe condition in accordance with OHS requirements and regulations of other accredited authorities.</p> <p>1.3. Traffic control is planned at job site and signed in accordance with relevant Australian Standards.</p> <p>1.4. Underground and overhead obstructions and other utility services are identified.</p> <p>1.5. Appropriate signage is selected, established and maintained at work site.</p> |
| <p>2. Construct appropriate pits and manholes</p> | <p>2.1. Plant, equipment, tools and materials to construct manholes and pits are selected.</p> <p>2.2. Pits and manholes are constructed according to council requirements.</p> |
| <p>3. Construct roads and pavements</p> | <p>3.1. Site is set out, cleared and prepared</p> <p>3.2. Earthworks are undertaken and the sub-grade prepared.</p> <p>3.3. Construction materials are spread and compacted using appropriate plant, equipment, materials and construction.</p> <p>3.4. Pavement surface for construction of wearing surface using either a bitumen seal or asphalt surface.</p> |

ELEMENT**PERFORMANCE CRITERIA****4. Maintain roads and pavements**

- 3.5. Pavement markings are applied and signs, safety rails and markers are erected as specified.
- 4.1. Surface is set out and prepared for resealing/patching or other maintenance activities.
- 4.2. Levelling tasks are carried out where necessary using appropriate plant and equipment.
- 4.3. Materials used to maintain the pavement are prepared correctly using appropriate tools and equipment.
- 4.4. Repairs on road pavement, kerb and channel, potholes, sealing and asphalt overlays are made using appropriate tools, plant and equipment.
- 4.5. Subsurface and surface open drains are maintained, repaired and cleared where necessary.
- 4.6. Trees and shrubs are trimmed or removed and weeds are controlled according to council requirements.
- 4.7. Verges are mown by tractor signs in relation to their meaning, positioning and material.

5. Maintain records for road construction and maintenance

- 5.1. Information is recorded in accordance with council and legislative requirements.
- 5.2. Details are recorded clearly, accurately and legibly.
- 5.3. Records are secured, accessible and up-to-date.

Evidence Guide

EVIDENCE GUIDE

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, the knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

Demonstrated ability to use appropriate materials, construction methods and processes for the construction and maintenance of roads.

Demonstrated ability to adhere to plans and specifications.

Demonstrated ability to adhere to relevant occupational health and safety practices on site.

Demonstrated ability to adhere to Australian standards, codes of practice and advisory standards.

Context of assessment

Competency is demonstrated by performance of all stated criteria, including paying particular attention to the critical aspects and the knowledge and skills elaborated in the Evidence Guide, and within the scope as defined in the Range Statement.

Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package.

Assessment of the performance requirements in this unit should be undertaken in an actual workplace or simulated environment.

EVIDENCE GUIDE

	Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the Key Competency levels at the end of this unit.
Relationship to other units(prerequisite or co-requisite units)	To enable holistic assessment this unit may be assessed with other units that form part of the job role.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate his/her handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completing workplace documentation • third party reports from experienced practitioner • completion of self-paced learning materials including personal reflection and feedback from trainer/coach/supervisor.
Evidence required for demonstration of consistent performance	Evidence should be collected over a set period of time which is sufficient to include dealings with an appropriate range and variety of situations.
Resource implications	The learner and the trainer should have access to appropriate documentation and resources normally used in the workplace.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Signage includes:

- statutory
- directional and information
- road lines/road markings
- reflectors
- centrelines
- directional lines
- shoulder lines.
- clearing

Earthworks may

RANGE STATEMENT

include:

- grading
- levelling
- excavating
- trenching.

**Plant and equipment
may include:**

- bulldozers
- excavators
- trucks
- graders
- compactors
- loaders
- skid steers
- pumps.

**Types of construction
materials may include:**

- soils (clay, sand, gravel, silt)
- crushed rock
- soil aggregates
- concrete aggregates
- filter sands and aggregates
- bitumen
- cutback bitumen
- bitumen emulsion.

**Types of surfaces may
include:**

- bitumen and emulsion seal
- unsealed
- gravel
- concrete
- segmental pavers
- asphalt
- pre-mix
- primer seal.

**Types of records may
include:**

- test reports
- job diaries
- instructions
- correspondence
- time-sheets
- accident reports
- costing sheets.

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify work requirements	<p>1.1. Work requirements in the form of type of glass and the method of fixing are identified from work instructions</p> <p>1.2. Workplace health and safety requirements for glazing/reglazing of windows and doors, including personal protection needs, are observed throughout the work</p> <p>1.3. The process for fitting glass to window and door frames is identified</p>
2. Prepare for work	<p>2.1. Work sequence is planned in a logical order to suit the job</p> <p>2.2. Tools, equipment and materials (less glass and frames) are selected and checked prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition</p> <p>2.3. Type of glass to be fitted and frames are selected to match:</p> <p>2.3.1. customer order</p> <p>2.3.2. existing glass type</p> <p>2.3.3. requirements for security, noise or light control</p> <p>2.3.4. Australian Standards</p> <p>2.4. Glass is checked for type, size and imperfections</p> <p>2.5. Glass fixing method is selected according to:</p> <p>2.5.1. specification</p> <p>2.5.2. type of glass and frame</p> <p>2.5.3. security requirements</p> <p>2.5.4. sealing methods</p> <p>2.5.5. Australian Standards</p> <p>2.6. Frame condition is assessed to ensure suitability for glazing in accordance with customer order and Australian Standards. Defective frames are reported</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>for repair or replacement in accordance with workplace procedures</p> <p>2.7. Fixing and sealing materials are prepared by mixing or cutting to length as appropriate</p>
<p>3. Identify site conditions and restraints</p>	<p>3.1. On-site difficulties are recognised and action taken to resolve in accordance with regulations and workplace requirements</p> <p>3.2. Covering material is applied where necessary to protect existing fixtures and fittings</p> <p>3.3. Special characteristics of the window or door which may affect the finished job are identified and corrective action taken</p>
<p>4. Perform glazing</p>	<p>4.1. Frame is prepared to receive glass by:</p> <p>4.1.1. checking size against specification</p> <p>4.1.2. removing remains of glass and any sealants</p> <p>4.1.3. cleaning</p> <p>4.1.4. surface preparation (if required)</p> <p>4.2. Glass is fixed to the frame using the selected method and in accordance with recognised industry procedures and Australian Standards</p> <p>4.3. Solvents and sealants are used in accordance with manufacturer recommendations and Australian Standards</p> <p>4.4. Excess sealing material is removed</p> <p>4.5. Glass and frame are cleaned after fixing</p>
<p>5. Complete work</p>	<p>5.1. Completed installation is checked to ensure compliance with customer requirements and specifications</p> <p>5.2. Tools, equipment and materials are cleaned and stored following workplace procedures</p> <p>5.3. Work area is cleaned and left in a safe condition and rubbish disposed of as appropriate</p> <p>5.4. Waste and scrap materials are removed for disposal or recycling as required</p> <p>5.5. Workplace documentation is completed in accordance with workplace requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- collect, organise and understand information related to work orders, basic plans, and safety procedures
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with work supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities including the preparation and layout of the work area and the obtaining of equipment and materials to avoid any back tracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to correctly complete measurements, calculate work requirements, optimise glass sizes for economical cutting and assemble required materials
- use pre-checking and inspection techniques to plan work, avoiding re-working and wastage
- use the limited workplace technology related to the glazing of simple window and door frames

Required knowledge

- the qualities and characteristics of glass, including the hazards and handling requirements
- the techniques, methods, materials and process of glazing simple/complex window and door frames
- workplace safety system requirements related to the glazing simple/complex window and door frames
- relevant Australian Standards
- workflow in relation to fitting glass
- characteristics, purpose and operation of tools and equipment used in glazing simple/complex window and door frames
- identification of equipment, processes and procedures

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the

EVIDENCE GUIDE

performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects of evidence

- Interpret work order/job instruction and locate and apply relevant information to glaze/reglaze simple/complex windows and doors
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Follow work instructions, operating procedures and inspection practices to:
 - minimise the risk of injury to self and others
 - prevent damage to goods, equipment and products
 - maintain required production output and product quality
- Glaze the following:
 - timber putty faced and beaded window sashes, including fixed, sliding, double hung, casement and awning sashes
 - metal channel and beaded window sashes, including fixed, sliding, double hung, casement and awning sashes
 - timber putty faced and beaded doors, including fixed, sliding, hinged, pivot and bi-fold doors
 - metal channel and beaded doors, including fixed, sliding, hinged, pivot and bi-fold doors
- Include the following for each:
 - select glass thickness and type in accordance with AS1288
 - calculate glazing clearance and cutting size
 - cut glass to AS4667 Quality requirements for cut to size and processed glass
 - select glazing tools, equipment, glazing sealants, vinyls and tapes
 - prepare working area
 - prepare glazing rebates and channels prior to installation
 - clean glass, tools, equipment and work area
 - calculate the cost of glass, glazing materials and labour
- Re-glaze timber and metal windows and doors, including:

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • prepare work area and drop sheets • select reglazing tools and equipment • hack out/remove beads and glass safely from timber windows and doors • remove and disassemble metal window sashes and doors and remove glass safely • select glass thickness and type in accordance with AS1288 • calculate glazing clearance and cutting size • cut glass to industry standards AS4667 • select glazing tools, equipment, glazing sealants, vinyls and tapes • glaze timber and metal windows and doors • install sash cords, unique and spring balances on timber and metal double hung windows • clean glass, tools, equipment and work area • Work effectively with others • Modify activities to cater for variations in workplace contexts and environment
Resource implications	Frames, glass, fixing material, sealants, workplace operating procedures and work orders, personal protective equipment and an appropriate work area/site.
Method of assessment	<p>Assessment methods must confirm consistency of performance over time and in a range of workplace relevant contexts.</p> <p>Assessment should be by direct observation of tasks and questioning on underpinning knowledge.</p> <p>Assessment may be in conjunction with assessment of other relevant units of competency.</p>
Context of assessment	Assessment may occur on the job or in a workplace simulated facility with relevant glazing equipment, materials, work instructions and deadlines.

Range Statement

RANGE STATEMENT

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Unit context</p>	<ul style="list-style-type: none"> • Work is carried out in accordance with statutory requirements, environment legislation, manual handling procedures and relevant regulations and organisation insurance requirements • OHS requirements may include legislation, standards, building codes, material safety management systems and local safe operating procedures • Work requires individuals to demonstrate discretion, judgement and problem solving skills in the handling and installation of glass products • Work may be performed in workplaces which are involved in on-site and off-site fabrication, installation and/or replacement of glass to commercial or residential windows, doors and other openings or to other frames
<p>Glaze/re-glaze</p>	<ul style="list-style-type: none"> • Involves the installation of glass to metal and/or timber doors, windows and other frames and reglazing of existing windows and doors • Residential glazing/re-glazing is confined to simple doors and windows and may include: <ul style="list-style-type: none"> • residential windows, such as fixed, sliding, casement, awning and double hung and louveres • residential doors, such as sliding, hinged, pivot and bi-fold • Glazing or reglazing for non-residential situations is addressed in commercial and architectural/engineering AQF III units
<p>Types of glass may include but are not limited to:</p>	<ul style="list-style-type: none"> • annealed glass • toughened glass • laminated glass • wired glass • tinted and heat reflective glass

RANGE STATEMENT	
	<ul style="list-style-type: none"> • coated glass and insulated glass units.
Tools and equipment are to include:	<ul style="list-style-type: none"> • tungsten wheel glass cutters • speed cutters • cutting lubricants • running pliers • straight edges and squares • tape measures • glass handling and lifting equipment • hack-out knives • chisels • putty knives • sprig/diamond guns • vinyl cutters and rollers • pry bars • sealant guns • blade and phillips head screwdrivers • pop rivet guns • electric and pneumatic drills • rubber mallets • claw hammers • nail punches and PPE equipment
Materials are to include but are not limited to:	<ul style="list-style-type: none"> • all forms of flat glass and acrylic glazing products • plastic • aluminium • steel • solid timber • gaskets • sealants • adhesives • glazing tapes and setting blocks
Methods of glazing may include:	<ul style="list-style-type: none"> • channel glazing • beaded glazing and double glazing
Personal protective equipment	<p>Personal protective equipment is to include that prescribed under legislation, regulation and Australian Standard policies and practices. It may include:</p> <ul style="list-style-type: none"> • gloves • safety glasses

RANGE STATEMENT	
	<ul style="list-style-type: none"> • gauntlets • safety footwear • hard hats • aprons and overalls
Information and procedures	<ul style="list-style-type: none"> • Workplace procedures relating to the glazing of simple windows and doorframes • Australian Standards AS1288, 2208, 4667, 2047, 4666 • Equipment and material manufacturers' specifications and operational procedures • On-site procedures and regulations relating to the handling and movement of glass • Work instructions, including job sheets, plans, drawings and designs • Safety standards include personal protective equipment, OHS regulations and enterprise requirements

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify weld requirements	1.1. Weld requirements are identified from job instructions. 1.2. Location of welds is identified in accordance with standard operating procedures and job specifications.
2. Prepare materials for welding	2.1. Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1. Welding equipment is set up correctly. 3.2. Settings and consumables are selected.
4. Perform routine welding using <i>oxy acetylene</i>	4.1. Safe welding practices are applied. 4.2. Materials are welded to job requirements. 4.3. Welds are cleaned in accordance with standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- preparing materials
- setting up welding equipment
- welding with oxy acetylene fuel gas
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instructions
- using measurement skills for joint preparation and routine oxy acetylene welding

Required knowledge

Look for evidence that confirms knowledge of:

- preparatory requirements
- materials and consumables properties and characteristics
- equipment and equipment settings
- fuel gas properties and applications
- post welding treatments
- weld characteristics
- any applicable industry standards, NOHSC guides, State/Territory regulatory codes of practice/standards
- safe work practices and procedures
- safe welding practices
- use and application of personal protective equipment for routine oxy acetylene welding

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to prepare materials and carry out routine oxy acetylene welding.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing routine oxy acetylene welding or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Materials	Mild and low carbon steel and cast iron
Prepared	Preheating, setting up jigs, fixtures, clamps, joint preparation
Equipment	Hoses, blowpipes, regulators
Consumables	Filler rods, fluxes
Oxy acetylene	The term 'oxy-acetylene' is used here to describe a range of fuel gases, including acetylene, LPG, hydrogen etc.
Cleaned	Fluxes

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare materials and equipment	<p>1.1. Job requirements are determined from specifications and/ or instructions.</p> <p>1.2. Materials are correctly prepared using appropriate tools and techniques.</p> <p>1.3. Materials are correctly assembled/aligned to meet specifications as required.</p> <p>1.4. Distortion prevention measures are identified and appropriate action is taken as required.</p> <p>1.5. Heating equipment is assembled and set up safely and correctly in accordance with standard operating procedures.</p> <p>1.6. Correct and appropriate consumables are selected and prepared.</p> <p>1.7. Test run is undertaken and verified as required.</p>
2. Braze and/or silver	2.1. The correct process is selected to meet specifications.

ELEMENT	PERFORMANCE CRITERIA
solder	2.2. Materials are preheated as required. 2.3. Consumables are applied using correct techniques. 2.4. Jointing material is applied correctly and in appropriate quantities to meet job/specifications. 2.5. Material temperature is annealed using correct and appropriate techniques.
3. Inspect joints	3.1. Excess jointing materials are removed using correct and appropriate techniques. 3.2. Inspection of joints is undertaken to standard operating procedures. 3.3. Inspection results are reported/recorded using standard operating procedures as required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- preparing materials
- performing brazing/silver soldering
- undertaking visual inspection
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instructions

Required knowledge

Look for evidence that confirms knowledge of:

- the reasons for selecting specific methods of assembly/alignment
- the procedures for minimising distortion of the materials being brazed/silver soldered
- the procedures for assembling and setting up the specific heating equipment
- the reasons for selecting specific heating equipment
- the reasons for selecting specific consumables
- conducting test runs

REQUIRED SKILLS AND KNOWLEDGE

- typical applications of brazing and silver soldering processes
- the procedures and precautions for preheating the materials to be joined
- the effects of the use of inappropriate techniques on the performance of the jointed materials
- the effect of inappropriate quantities of jointing material on the performance of the jointed materials
- the procedures for normalising the temperature of jointed materials
- the consequences of using inappropriate techniques to normalise the temperature of the joint
- the procedures for removing excess jointing material
- the procedures for inspecting brazed/silver soldered joints
- use and application of personal protective equipment for silver soldering and brazing
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to perform brazing and silver soldering.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both. Where assessment occurs off the job, i.e. the candidate is not in productive work, then appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

EVIDENCE GUIDE	
	This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with brazing and/or silver soldering or other units requiring the exercise of the skills and knowledge covered by this unit.
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Materials	Ferrous and non-ferrous
Heating	Oxy acetylene and fuel gas, cylinders, connections, hoses, tips and nozzles
Consumables	Fluxes (resin or powder), all types of silver solder and brazing grades, etc.

- welding with GMAW
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instruction
- using measurement skills relating to joint preparation and routine GMAW

Required knowledge

Look for evidence that confirms knowledge of:

- different current and voltage settings, gas flow rates wire diameters, wire feed speed and other variables to suit typical situations.
- material and equipment preparation
- properties and characteristics of materials and consumables
- equipment and equipment settings
- fuel gas properties and applications
- post-welding treatments
- weld characteristics
- safe welding practices
- use and application of personal protective equipment for routine GMAW

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must

EVIDENCE GUIDE	
	be able to perform routine gas metal arc welding (GMAW).
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with preparing the materials and carrying out routine gas metal arc welding or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Materials	Mild and low carbon steel
Prepared	Preheating, setting up jigs, fixtures, clamps, joint preparation
Equipment	Hoses, welding leads, gas shrouds, gas regulators, liners, contact tips
Consumables	Filler wire, shielding gas
Cleaned	Slag and spatter

MSACMC410A Lead change in a manufacturing environment

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit covers the knowledge and skills needed by people who are given the responsibility of leading change processes in a manufacturing organisation. The change may be occurring in manufacturing or in the support functions of maintenance, office, warehousing etc.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario, change from continuous improvement is a constant in a <i>competitive manufacturing</i> organisation. Change can however be more significant, for example, when the move to competitive manufacturing improvement processes are made, or at other times when significant changes such as the introduction of new products, processes or equipment are made. In these circumstances one or more individuals may have a particular role of leading the change and facilitating its implementation.</p> <p>This unit assumes that consultation between management and workers and other relevant personnel has already occurred and the nature and extent of the change has been agreed. This unit does not cover the negotiation of change in a formal industrial relations sense but does cover the skill needed to identify real or potential change implementation issues including those that may need to be referred to formal consultation and/or dispute settlement procedures.</p> <p>This unit requires the application of skills associated with communication, teamwork, problem solving, initiative, enterprise, planning, organising and self management in order to provide leadership in a change</p>
--------------------------------	---

	environment. This unit has a strong emphasis on planning and change management, but also requires an ability to learn from experience and feed new information back into strategies to improve performance.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define nature and impact of change	1.1. Identify enterprise aims and objectives of the change 1.2. Identify opportunities for implementation of change within team and production environment 1.3. Determine impacts of change within team and

ELEMENT	PERFORMANCE CRITERIA
	<p>production environment</p> <p>1.4. Develop a description of the change, including its potential benefits and impacts on own work and work of team members</p> <p>1.5.</p>
<p>2. Identify Key Performance Indicators (KPIs)</p>	<p>2.1. Undertake liaison with managers, engineers and other staff responsible for designing and/or implementing change</p> <p>2.2. Identify Key Performance Indicators (KPIs) for own and team's area of responsibility</p> <p>2.3. Communicate Key Performance Indicators (KPIs) to all relevant stakeholders</p> <p>2.4. Check that data collection and processing are appropriate for Key Performance Indicators (KPIs)</p> <p>2.5. Raise and resolve issues related to Key Performance Indicators (KPIs) with relevant personnel</p> <p>2.6.</p>
<p>3. Liaise with key stakeholders</p>	<p>3.1. Identify key stakeholders impacted by the change</p> <p>3.2. Communicate with key stakeholders within scope of authority</p> <p>3.3. Identify and address <i>issues and concerns</i> of each stakeholder if within scope of authority</p> <p>3.4. Develop and/or locate information required to address key concerns</p> <p>3.5. Refer issues and concerns outside of scope of authority to appropriate personnel</p> <p>3.6.</p>
<p>4. Develop a strategy to help work teams implement change</p>	<p>4.1. Develop a <i>work plan</i> including timetable, key performance indicators, training needs, occupational health and safety (OHS) implications, contingency plans, and responsibilities with team members and senior managers, engineers and other staff responsible for designing and/or implementing change</p> <p>4.2. Make information required to support change available to team members</p> <p>4.3. Communicate/circulate draft work plan to team members, supervisors, technical experts and other appropriate personnel for comment</p>

ELEMENT	PERFORMANCE CRITERIA
5. Implement change	4.4. Assess suggested changes and incorporated into work plan where appropriate 4.5. 5.1. Obtain authorisation to commence change implementation in accordance with enterprise procedures 5.2. Implement change in accordance with work plan and enterprise OHS and consultation procedures 5.3.
6. Monitor implementation of change	6.1. Maintain open communication channels with all stakeholders during implementation 6.2. Monitor Key Performance Indicators (KPIs) during implementation 6.3. Encourage and facilitate improvement suggestions of team members 6.4. Identify areas requiring improvement in change implementation 6.5. Make improvements to implementation according to enterprise procedures 6.6.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills:

- communication techniques
- negotiation skills
- information finding and analysing/using skills
- teamwork.

Required knowledge:

- sufficient understanding of the process to contextualise the communication and understand the data requirements to produce the Key Performance Indicators (KPIs)
- project management
- motivational techniques.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.

<p>Overview of assessment requirements</p>	<p>The competent person would be able to facilitate the implementation of change by effective communication with all relevant people and by facilitating improvements to the change.</p>
<p>What critical aspects of evidence are required to demonstrate competency in this unit?</p>	<p>Evidence of changes facilitated would be required.</p>
<p>In what context should assessment occur?</p>	<p>Assessment needs to occur in an organisation implementing a significant change either to, or in a competitive manufacturing environment or by a project.</p>
<p>Are there any other units which could or should be assessed with this unit or which relate directly to this unit?</p>	<p>This unit could be assessed concurrently with other team leader units dealing with change/improvement in the organisation.</p>
<p>What method of assessment should apply?</p>	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and</p>

EVIDENCE GUIDE	
	agreed with the assessee prior to the commencement of the assessment.
What evidence is required for demonstration of consistent performance?	Evidence from one significant change may be sufficient. For less significant changes, a range of changes will be needed to generate sufficient evidence.
What are the specific resource requirements for this unit?	Access to an organisation implementing a significant change to or in competitive manufacturing.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Competitive manufacturing	<p>Competitive manufacturing is used to describe the range of systemic manufacturing practice concepts and approaches. It covers but is not limited to:</p> <ul style="list-style-type: none"> • lean manufacturing • agile manufacturing • preventative and predictive maintenance approaches • monitoring and data gathering systems such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Manufacturing Resource Planning (MRP), and proprietary systems such as SAP etc. • statistical process control systems including six sigma and three sigma • Just in Time (JIT), kanban and other pull related manufacturing control systems • supply, value, and demand chain monitoring and analysis • other continuous improvement systems. <p>Competitive manufacturing should be interpreted so as to take into account the stage of implementation of</p>

RANGE STATEMENT	
	competitive manufacturing approaches, the enterprise's size and work organisation, culture, regulatory environment and manufacturing sector.
Team	Team may include work teams from all sections of the organisation including production, maintenance, technical, administration/finance, sales/marketing.
Change	<p>The philosophy of continual improvement is that every process can and should be continually evaluated and improved in terms of time required, resources used, resultant quality, and other aspects relevant to the process.</p> <p>Superimposed on this is the concept of breakthrough change when a large change/improvement is made which can shift the direction or operation of the organisation. Once such breakthrough change is the introduction of competitive manufacturing.</p>
Issues and concerns	Issues and concerns may be communicated formally and informally and can include individual and group concerns as well as those expressed by and through industrial processes.
Work plan	A work plan can be written or informal but must include consideration of timetable, key performance indicators, training needs, OHS implications, contingency plans and responsibilities. The work plan must be capable of being coherently communicated to others.

Unit Descriptor

Unit descriptor	<p>This unit covers the skills needed to implement basic improvement practices within a competitive manufacturing organisation. The unit focuses on bringing together the basic concepts and the holistic application of these basic concepts and processes to manufacturing. It would typically be carried out working as part of a team.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>In a typical scenario, an organisation has embarked on the competitive manufacturing path. This requires certain critical skills and principles to be practised in order for competitive manufacturing to succeed. These skills are to be used within the scope of the individual's job and authority.</p> <p>This unit requires the application of skills associated with planning and organising own role within a competitive manufacturing framework. Initiative and enterprise and problem solving is also required to identify the contributions of self and others in the value chain and identify opportunities for improvement.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Focus on the basic competitive manufacturing concepts	1.1. Identify <i>customers</i> and their needs/requirements 1.2. Identify <i>suppliers</i> 1.3. Identify value contributions along the chain 1.4. Identify and recommend methods of increasing own contribution to the value chain
2. Improve the product/process value	2.1. Identify customer features/benefits in the product 2.2. Identify items which contribute to those features/benefits 2.3. Identify things which do not contribute to customer benefits/features 2.4. Recommend methods of increasing features/benefits
3. Use competitive manufacturing tools	3.1. Select appropriate tools for the job/process 3.2. Apply the tool to the job/process 3.3. Monitor the job/process and make adjustments to improve it in accordance with <i>procedures</i>

ELEMENT	PERFORMANCE CRITERIA
	3.4. Identify own skill requirements and seek skill development if required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
<ul style="list-style-type: none"> • analysis • communication • planning • teamwork • problem solving
Required knowledge
<ul style="list-style-type: none"> • the customers and the benefits they derive from the products • the suppliers and their capabilities • product waste • relevant tools for their job and how to apply them • factors impacting on the product, process and waste, particularly those wholly or partially under their control (and how to control them)

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.	
Overview of assessment requirements	The person will work effectively in a competitive manufacturing environment, making continual positive contributions to the improvement of the business within the scope of their job.
What are the specific resource requirements for	Access is required to an organisation implementing competitive manufacturing.

EVIDENCE GUIDE	
this unit?	
What critical aspects of evidence are required to demonstrate competency in this unit?	There should be evidence of the individual's contribution to the value chain and willing application of competitive manufacturing to their job.
In what context should assessment occur?	Assessment should occur in an organisation implementing competitive manufacturing.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<p>This unit is related to all other units at this level in that it is the general implementation of competitive manufacturing. It could be assessed concurrently with any unit dealing with the <i>tools</i> of competitive manufacturing.</p> <p>This unit is related to:</p> <ul style="list-style-type: none"> • <i>MSACMS400A Implement a competitive manufacturing system</i> which covers the intermediate skill levels in CM.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	This should be a routine part of the operator's job and there should be evidence that these skills are practised routinely.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Competitive manufacturing</p>	<p>Competitive manufacturing is used to describe the range of systemic manufacturing practice concepts and approaches. It covers but is not limited to:</p> <ul style="list-style-type: none"> • lean manufacturing • agile manufacturing • preventative and predictive maintenance approaches • monitoring and data gathering systems such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Manufacturing Resource Planning (MRP), and proprietary systems such as SAP • statistical process control systems including six sigma and three sigma • Just In Time (JIT), kanban and other pull related manufacturing control systems • supply, value, and demand chain monitoring and analysis • other continuous improvement systems. <p>Competitive manufacturing should be interpreted so as to take into account the stage of implementation of competitive manufacturing approaches, the size of the enterprise, the work organisation, culture, regulatory environment and manufacturing sector.</p>
<p>Customer</p>	<p>Customer may be interpreted to be an internal customer, but typically the benefits to the final customer should be used as the basis for the identification of waste. The operator does not need to interface directly with the external customer, but should be provided with sufficient information to enable them to identify customer benefits and features.</p> <p>Supplier may be interpreted to be an internal supplier, but typically the external supplier and their abilities should be known. The operator does not need to interface directly with the external supplier, but should</p>

RANGE STATEMENT	
	be provided with sufficient information to enable them to identify supplier abilities.
Tools	Tools are used in this unit to mean the tools of competitive manufacturing such as 5S, 6 s , continuous improvement, cause effect diagrams
Procedures	<p>Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>

MSACMS400A Implement a competitive manufacturing system

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit covers the knowledge and skills needed to implement competitive manufacturing practices. Generally, five areas drive competitive manufacturing: cost, quality, delivery, safety/environment, and morale. In a competitive manufacturing company systems will need to be implemented which drive continuous improvement in all these areas, without one area competing unduly with another.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario, team performance is continually reviewed against the five key areas and in liaison with other relevant people, and with the support of technical support staff, improvements in these five key areas are developed and implemented. Whereas other units may emphasise the competence to use one or more <i>tools</i>, this unit emphasises the ability to advance on all five key areas over a moderate time period.</p> <p>This unit requires the application of skills associated with problem solving and initiative and enterprise in order to identify opportunities to make improvements and maximise performance. Communication, teamwork and planning and organising skills will be required to implement improvements and address any conflicts that arise. This unit also requires an ability to identify appropriate technology, and to consider and integrate feedback on how personal performance can be improved. This requires self management and learning.</p>

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Optimise the manufacturing system	1.1. Apply competitive manufacturing practices to maximise health, safety and environment performance 1.2. Apply competitive manufacturing practices to maximise quality consistency 1.3. Apply competitive manufacturing practices to maximise performance by team members 1.4. Apply competitive manufacturing practices to maximise <i>customer</i> benefit/cost ratio 1.5. Apply competitive manufacturing practices to reduce lead time to delivery within the scope of the team's authority and responsibility 1.6. Negotiate with relevant stakeholders to resolve

ELEMENT	PERFORMANCE CRITERIA
2. Implement improvements	<p>conflicts which arise</p> <p>1.7. Select improvements which will deliver the greatest overall benefit for the resources required/available without reducing current performance on individual factors</p> <p>2.1. Implement the chosen improvement/s</p> <p>2.2. Check the selected improvements improve the <i>system</i> as a whole and do not result in unintended consequences</p> <p>2.3. Monitor implementation and make adjustments as required.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills:

- communication
- communication
- interpersonal relationships
- prioritising
- mathematics
- statistics
- analysing
- conducting root cause analysis
- problem solving.
- solving.

Required knowledge:

- the customers and the benefits they derive from the products
- cost components and their relationship to customer benefits/features
- the suppliers and their capabilities
- product waste
- factors causing variability in a product and how to control them
- relevant tools for their job and how to apply them
- factors impacting on the product, process and waste, particularly those wholly or partially under their control (and how to control them)
- good health safety and environment (HSE) practice and factors impacting on HSE

REQUIRED SKILLS AND KNOWLEDGE

performance

- morale and how to improve it
- optimisation techniques appropriate to the organisation and the job
- application of quality standards and processes.

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.

Overview of assessment requirements	The person should be able to continuously make improvements to all key aspects of their team/process and any change made should be of benefit to the system as a whole.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of the implementation of the competitive manufacturing system and the improvements made to product, process and team.
In what context should assessment occur?	Assessment needs to occur in an organisation implementing competitive manufacturing or using a suitable project.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed concurrently with a unit on continuous improvement and or units on the use of competitive manufacturing tools. This unit is related to: <ul style="list-style-type: none"> • <i>MSACMS200A Apply competitive manufacturing practices</i> which covers the lower skill level aspects of this competency.
What method of assessment should apply?	Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment. Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and

EVIDENCE GUIDE	
	<p>colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	Evidence will generally come from the routine implementation of competitive manufacturing and the routine continuous improvements which flow from this. As such evidence from a range of improvements is necessary.
What are the specific resource requirements for this unit?	Access to an organisation implementing competitive manufacturing.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Competitive manufacturing	<p>Competitive manufacturing is used to describe the range of systemic manufacturing practice concepts and approaches. It covers but is not limited to:</p> <ul style="list-style-type: none"> • lean manufacturing • agile manufacturing • preventative and predictive maintenance approaches • monitoring and data gathering systems such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Manufacturing Resource Planning (MRP), and proprietary systems such as SAP etc.

RANGE STATEMENT	
	<ul style="list-style-type: none"> • statistical process control systems including six sigma and three sigma • Just in Time (JIT), kanban and other pull related manufacturing control systems • supply, value, and demand chain monitoring and analysis • other continuous improvement systems. <p>Competitive manufacturing should be interpreted so as to take into account the stage of implementation of competitive manufacturing approaches, the enterprise's size and work organisation, culture, regulatory environment and manufacturing sector.</p>
Tools	Tools is used in this unit to mean the tools of competitive manufacturing such as 5S, 6 sigma, continuous improvement, cause effect diagrams, etc.
Customer	<p>Competitive manufacturing organisations encompass the entire production system, beginning with the <i>customer</i>, and includes the product sales outlet, the final assembler, product design, raw material mining and processing and all tiers of the <i>value chain</i> (sometimes called the supply chain). Any truly 'competitive' system is highly dependent on the demands of its customers and the reliability of its suppliers. No implementation of competitive manufacturing can reach its full potential without including the entire 'enterprise' in its planning.</p> <p><i>Customer</i> may be interpreted to be an internal customer, but typically the benefits to the final customer should be used as the basis for the identification of waste. The operator does not need to interface directly with the external customer, but should be provided with sufficient information to enable them to identify customer benefits and features.</p> <p><i>Supplier</i> may be interpreted to be an internal supplier, but typically the external supplier and their abilities should be known. The operator does not need to interface directly with the external supplier, but should be provided with sufficient information to enable them to identify supplier abilities.</p>
System	A competitive manufacturing system is that holistic combination of the process, plant and equipment, procedures and practices including the skills and work organisation of the workforce which make up the

ELEMENT	PERFORMANCE CRITERIA
1. Determine appropriate analytical techniques	1.1.Liaise with key stakeholders to determine objectives of manufacturing <i>strategy</i> 1.2.Examine current manufacturing situation to determine major areas requiring improvement 1.3.Compare possible strategies, <i>techniques</i> and <i>tools</i> against organisation needs 1.4.Select possible strategies, techniques and tools 1.5.Consult with key stakeholders to confirm selected strategies, techniques and tools
2. Develop competitive manufacturing strategies	2.1.Estimate benefit/cost ratio for major stakeholders and the <i>value chain</i> overall 2.2.Select preferred manufacturing strategy 2.3.Examine and adapt strategy to organisation needs and priorities 2.4.Examine and adapt techniques and tools required to implement strategy 2.5.Negotiate with key stakeholders to develop an

ELEMENT	PERFORMANCE CRITERIA
	implementation plan 2.6. Identify key information and performance indicators required
3. Implement strategy	3.1. Identify data collection required 3.2. Identify methods of collecting and processing required data 3.3. Identify hardware and other resources required 3.4. Identify skill needs required 3.5. Ensure all resources/training are available and completed 3.6. Implement strategy
4. Monitor implementation of strategy	4.1. Compare information/performance indicators with desired levels 4.2. Liaise with key stakeholders regarding strategy issues 4.3. Identify areas requiring adjustment 4.4. Make required adjustments

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication
- teamwork
- analysis
- problem solving
- mathematics
- planning
- computer use
- prioritising
- recording data

Required knowledge

- overview of competitive manufacturing principles and the decision rules for selecting the appropriate tools to use and place to start

REQUIRED SKILLS AND KNOWLEDGE

- methods of estimating costs/benefits
- acceptable benefit/cost ratios
- continuous improvement principles
- principles of motivation and leadership
- systems thinking
- characteristics and strengths of different types of strategies, techniques and tools such as 5S, JIT, 6 sigma, lean manufacturing, agile manufacturing
- business goals sufficient to match the strategy to the business needs
- strategic thinking
- principles of process equipment and how to improve its reliability
- resources required and how to obtain them

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment requirements	The person will be able to conceptualise scenarios, determine which ones are of sufficient benefit to proceed with, and take their team with them.
What are the specific resource requirements for this unit?	Access to an organisation using competitive manufacturing.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of scenarios developed and implemented (and/or rejected for valid reasons) which have had a positive impact on the entire value chain should be available.
In what context should assessment occur?	Assessment needs to occur in an organisation following competitive manufacturing.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit could be assessed concurrently with other relevant units to do with change in the competitive manufacturing environment. This unit is related to: <i>MSACMC210A Manage the impact of change on own work</i> which covers individual impact aspects in CM.

EVIDENCE GUIDE	
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	Generally evidence will come from a range of scenarios and the improvements which flow.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Competitive manufacturing	<p>Competitive manufacturing is used to describe the range of systemic manufacturing practice concepts and approaches. It covers but is not limited to:</p> <ul style="list-style-type: none"> • lean manufacturing • agile manufacturing • preventative and predictive maintenance approaches • monitoring and data gathering systems such as Systems Control and Data Acquisition (SCADA)

RANGE STATEMENT	
	<p>software, Enterprise Resource Planning (ERP) systems, Manufacturing Resource Planning (MRP), and proprietary systems such as SAP</p> <ul style="list-style-type: none"> • statistical process control systems including six sigma and three sigma • Just in Time (JIT), kanban and other pull related manufacturing control systems • supply, value, and demand chain monitoring and analysis • other continuous improvement systems. <p>Competitive manufacturing should be interpreted so as to take into account the stage of implementation of competitive manufacturing approaches, the enterprise's size and work organisation, culture, regulatory environment and manufacturing sector.</p>
Strategy	There are many approaches used to embarking on competitive manufacturing. Successful organisations select an appropriate array of techniques and tools and formulate a strategy for their implementation.
Techniques and tools	There are many techniques and tools used to implement a competitive manufacturing strategy such as 5S, six sigma, root cause analysis
Value chain	Competitive manufacturing organisations encompass the entire production system, beginning with the <i>customer</i> , and includes the product sales outlet, the final assembler, product design, raw material mining and processing and all tiers of the value chain (sometimes called the supply chain). Any truly 'competitive' system is highly dependent on the demands of its customers and the reliability of its suppliers. No implementation of competitive manufacturing can reach its full potential without including the entire 'enterprise' in its planning.
System	A competitive manufacturing system is that holistic combination of the process, plant and equipment, procedures and practices including the skills and work organisation of the workforce which make up the productive organisation.

MSACMS603A Develop manufacturing related business plans

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills needed to develop business plans in a competitive manufacturing environment.
------------------------	--

Application of the Unit

Application of the unit	<p>In a typical scenario, the person (who may be a production/plant manager, purchasing/technical officer or similar) is required to develop a section business plan to meet the requirements of the overall strategic plan of the organisation. The plan includes the impact on the value chain and other critical competitive manufacturing factors. Due competitive pressures in manufacturing, this may be a reasonably frequent activity and can occur at any time over the business cycle. The plan may be in response to a specific change, or it may be a plan for the next period.</p> <p>This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Problem solving, initiative and enterprise, and planning and organising are required to develop effective and measurable business plan. This unit also requires aspects of self management and learning to ensure feedback and new learning is integrated into competitive manufacturing strategies.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine purpose of plan	1.1. Confirm reason for developing plan and expected outcomes from plan 1.2. Confirm purpose of plan with all relevant stakeholders 1.3. Check expected outcomes from plan with overall strategic plan for organisation 1.4. Identify any potential areas for conflict between proposed plan and strategic directions 1.5. Negotiate with relevant stakeholders to resolve issues
2. Develop objectives and strategies	2.1. Draft <i>objectives</i> for business plan 2.2. Draft strategies to achieve these objectives 2.3. Determine implications for value chain 2.4. Determine capital or workplace layout/organisation implications for <i>objectives and strategies</i>
3. Develop plans to meet	3.1. Negotiate with <i>relevant stakeholders</i> over

ELEMENT	PERFORMANCE CRITERIA
objectives and strategies	implications for objectives and strategies 3.2. In liaison with relevant stakeholders, develop plans to meet objectives 3.3. Determine relevant Key Performance Indicators (KPIs) for plan 3.4. Check Key Performance Indicators (KPIs) are appropriate for purpose of plan 3.5. Check plan will deliver planned purpose 3.6. Map plan to changed value chain 3.7. Adjust plan to optimise value chain 3.8. Validate plan with relevant stakeholders
4. Monitor the implementation of the plan	4.1. Release plan for implementation 4.2. Check the key progress points against the key stages of the plan 4.3. Note any discrepancies 4.4. Take appropriate action to ensure correct implementation of plan

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- planning
- communication
- negotiating
- prioritising
- numeracy/calculation
- problem solving
- organising information

Required knowledge

- knowledge of organisation strategic directions
- planning methods and types of plans
- contingency planning and other risk mitigating planning tools
- the organisation's value chain
- analysis of value chain

REQUIRED SKILLS AND KNOWLEDGE

- competitive manufacturing practices
- application of quality principles
- human resources and Industrial Relations
- OHS

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.

Overview of assessment requirements	The person will be able to develop a plan which successfully delivers plan objectives.
What are the specific resource requirements for this unit?	Access to a workplace implementing competitive manufacturing strategies is required. No other specific resources are required.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of having developed a plan which meets its objectives.
In what context should assessment occur?	Assessment will need to occur in a competitive manufacturing organisation and where the individual is undertaking business planning or by project or case study.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed concurrently with appropriate units.
What method of assessment should apply?	Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment. Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work,

MSACMT230A Apply cost factors to work practices

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills needed for an individual to identify cost components and to be able to determine in general terms the cost impacts of alternative actions.
------------------------	--

Application of the Unit

Application of the unit	<p>In a typical scenario, a person is required to contribute to and be involved in the assessment of cost factors in their work. This may be done individually or in a team environment.</p> <p>The person is able to assess the relative costs of the alternatives and use this as one of the key factors in making decisions. Decisions are made within the scope of the employee's authority and according to procedures. Typical decisions include those that contribute to the efficient organisation of own work and the improvement of production time and cycle times.</p> <p>This unit requires the application of skills associated with problem solving to identify cost factors and cost implications of own work and self management to apply cost effective practices.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify in own work area major cost components of product or process	1.1. Identify <i>cost components</i> in the product or <i>process</i> in own work area 1.2. Recognise the impact of current or alternative actions on costs
2. Identify constraints to cost efficiency	2.1. Identify required production/process rate and major costs 2.2. Identify costs factors under the control of the individual or team 2.3. Relate identified costs factors to impact on <i>overall cost</i> of production/process 2.4. Identify cost factors that are a constraint to cost efficiency in own work area
3. Apply cost efficient work practices	3.1. Express the implications of possible actions/changes to improve cost efficiency in simple financial terms 3.2. Identify non-financial implications of proposed changes in discussion with relevant people

ELEMENT	PERFORMANCE CRITERIA
	3.3. Select actions which minimise overall costs 3.4. Monitor actions to ensure cost efficiency in own work area is maintained

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- basic numeracy
- problem solving
- communication

Required knowledge

- cost components of products made
- costs concepts such as expense and income
- major cost contributors to product (eg energy)
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.

Overview of assessment requirements	The person will as part of their routine decision making aim to minimise costs. There should be evidence of their doing so.
What are the specific resource requirements for this unit?	Access to a workplace implementing competitive manufacturing strategies. No other specific resources are required.
What critical aspects of evidence are required to demonstrate competency	Evidence of being able to identify costs factors

EVIDENCE GUIDE	
in this unit?	relevant to an individual's job. Evidence of having made appropriate decisions to minimise overall costs.
In what context should assessment occur?	Assessment will need to occur in a workplace or by use of a work based case study.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed concurrently with appropriate units on continuous improvement.
What method of assessment should apply?	Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment. Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit. The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace. The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.
What evidence is required for demonstration of consistent performance?	Evidence should be available over a period of time or from more than one process or product.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold**

RANGE STATEMENT

italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Cost components	Cost components include fixed and variable costs such as power/energy, materials, plant and equipment, production or process time including impact on salary and wages, office expenses such as telephone and government taxes and charges.
Process	Process may include a production, maintenance, logistics or office process in a manufacturing environment.
Overall cost	Overall cost may include the assessment of negative and positive financial implications. It also includes negative long term issues, such as Occupational Health and Safety (OHS), environmental and regulatory issues.

MSACMT250A Monitor process capability

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit covers the knowledge and skills required for gathering of data and the interpretation of simple information to determine the compliance of the process and the taking of action as defined by the procedures where the information reveals the process is out of control parameters.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario an organisation has adopted either <i>six sigma</i> or statistical process control/ <i>three sigma</i> as a means of determining and improving the capability of their process. The team member is involved in this in collecting specified data and performing specified manipulations to the data (typically by plotting on a chart or by entering into a specified computer program). The information is typically presented to the team member in terms of graphs/charts which they are expected to interpret at a basic level and then take action in accordance with procedures to restore the process to being under control parameters.</p> <p>This unit requires the application of skills associated with entering and monitoring production information and requires initiative, enterprise and problem solving in identifying production variations and making improvement recommendations.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collect and process data	1.1. Take specified measurements/readings as required 1.2. Enter data onto log/into computer or other record 1.3. Manipulate and/or chart data as required by <i>procedures</i> 1.4.
2. Identify variations that are not random and take action	2.1. Examine chart and/or reliability information 2.2. Distinguish between <i>random variations</i> and those with an identifiable cause 2.3. Take action specified in <i>procedures</i> when a variation with an <i>identifiable cause</i> occurs
3. Assist in process improvement	3.1. Collect data for process capability improvement trials as directed 3.2. Make recommendations for improvement as required 3.3. Implement revised capability monitoring

ELEMENT	PERFORMANCE CRITERIA
	<i>procedures</i> as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- problem solving
- statistical control
- planning
- communication

Required knowledge

- data collection methods
- data processing techniques required
- basic variability and normal distribution
- recognition of identifiable causes in accordance with procedures
- causes of different types of identifiable causes as defined by procedures
- actions to be taken for the different causes

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.

Overview of assessment requirements

The person performing this unit would be expected to collect the correct data at the required frequency, perform the required manipulations on the data and then recognise assignable causes and take the required action (which may just be reporting).

What are the specific resource requirements for this unit?

Access to a work place utilising either 6 sigma or 3 sigma is required. Where it is necessary to use synthetic information for assessment purposes, then a

EVIDENCE GUIDE	
	bank of such information should be created.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence should be available of data collected and processed. There may also be evidence of assignable causes recognised and action taken. There should not be evidence of assignable causes ignored.
In what context should assessment occur?	Assessment will need to occur in a workplace implementing either 3 sigma or 6 sigma.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<p>This unit may be assessed concurrently with a continuous improvement or a quality unit.</p> <p>This unit is related to:</p> <ul style="list-style-type: none"> • <i>MSACMT450A Undertake process capability improvements, and</i> • <i>MSACMT650A Determine and improve process capability</i> <p>which apply to the intermediate and highest skill levels in CM respectively.</p> <p>It may also be appropriate to relate this unit to <i>MEM15001B Perform basic statistical quality control</i> and possibly also <i>MEM15008B Perform advanced statistical quality control</i> where the person is required to perform statistical manipulations (i.e. where these are not done automatically for the person eg by a computer system).</p>
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p>

EVIDENCE GUIDE	
	The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.
What evidence is required for demonstration of consistent performance?	Evidence of the routine collection and processing of data should be available from the workplace. Consistent interpretation of information should also be available from the workplace, although this may need to be supplemented with synthetic data as above. The interpretation of multiple assignable causes is more important than the consistent interpretation of one type of assignable cause.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Six sigma	Six sigma is a process improvement methodology based on statistical process control with six sigma limits which equates to 3.4 defects per million opportunities for each product or service transaction. Six sigma is also often used as a general term covering a competitive manufacturing approach. Six sigma training typically covers several units of competency in this Training Package.
Three sigma	Three sigma includes statistical process control with three sigma limits which equates to 3 defects per thousand opportunities for each product or service transaction.
Procedures	Procedures includes all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form.

RANGE STATEMENT	
	For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.
Random variation	Random variation is the term used in statistical control to refer to those variations for which no cause can be found.
Identifiable cause	Also referred to as an 'assignable cause' or a 'special cause' are those variations for which a cause can be found and so the cause of the variation eliminated.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess own work	<p>1.1. Continuously check completed work against workplace standards relevant to the operation being undertaken</p> <p>1.2. Demonstrate an understanding of how the work activities and completed work relate to the next production process or processes and to the final products concerned</p> <p>1.3. Identify and isolate faulty pieces/components or final products/batches</p> <p>1.4. Record and/or report the faults and any identified causes to the supervisor concerned where required in accordance with workplace <i>procedures</i></p>
2. Assess quality of received component parts/materials	<p>2.1. Continuously check received materials, component parts or final products against workplace standards and specifications for conformance</p> <p>2.2. Demonstrate an understanding of how the received materials or component parts relate to the current operation and how they contribute to the final quality of the product</p> <p>2.3. Identify and isolate faulty material or component parts related to the operator's work</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.4. Record and/or report the faults and any identified causes to the supervisor concerned where required, in accordance with workplace procedures</p> <p>2.5. Identify causes of any identified faults and take corrective action specified in the workplace procedures</p>
3. Measure parts/materials	3.1. Measure materials, component parts or products, as required, using the appropriate measuring instruments in accordance with workplace procedures
4. Record information on production indicator	4.1. Record basic information on the quality and other indicators of production performance in accordance with workplace procedures
5. Investigate causes of quality deviations	<p>5.1. Investigate and report causes of deviations from specified quality standards for materials, component parts or final products, as required, using the appropriate measuring techniques in accordance with workplace procedures</p> <p>5.2. Recommend suitable preventative action based on workplace quality standards and the identified causes of deviations from specified quality standards of materials, component parts or final products</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- interpret work instructions, specifications, standards and patterns appropriate to the assessee's work
- carry out relevant visual inspections of materials, component parts and final products
- carry out relevant physical/chemical measurements or tests
- maintain accurate work records in accordance with procedures
- carry out work in accordance with OHS policies and procedures
- meet work specifications

REQUIRED SKILLS AND KNOWLEDGE

- communicate effectively within defined workplace procedures
- interpret and apply defined procedures

Required knowledge

- relevant quality standards, policies and procedures
- relevant production processes, materials and products
- basic characteristics of materials used in the relevant production processes
- safety and environmental aspects of relevant production processes
- relevant measurement techniques and quality checking procedures
- workplace procedures
- reporting procedures

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.

Overview of assessment requirements	Competence should be demonstrated in the appropriate work context dependent on the level of responsibility being exercised. Work is assessed in accordance with enterprise quality standards, relevant statutory requirements, organisation insurance requirements, OHS legislation, manual handling procedures and relevant health regulations.
What are the specific resource requirements for this unit?	Access to real or appropriately simulated production situations including areas, materials, equipment, and information on work specifications/patterns, relevant safety procedures and regulations, quality standards, organisation procedures and customer requirements.
What critical aspects of evidence are required to demonstrate competency in this unit?	Assessment must confirm appropriate knowledge and skills to: <ul style="list-style-type: none"> • interpret, relevant work instructions, standards and specifications appropriate to the assessee's work • check and measure the relevant quality parameters • interpret the results of quality checks in terms of

EVIDENCE GUIDE	
	<p>specifications, patterns and work standards</p> <ul style="list-style-type: none"> • take required action where standards of materials, component parts, final product or work processes are found to be unacceptable • maintain accurate records.
In what context should assessment occur?	Assessment may occur on the job or in an appropriately simulated environment.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<p>This unit may be assessed in conjunction with the other relevant units.</p> <p>In some contexts it may be necessary to use specific measuring equipment to check the quality and this may require competence in using that equipment. Where that is the case, it is appropriate to assess this unit in conjunction with that other relevant unit.</p>
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	<p>Applies underpinning knowledge and skills when:</p> <ul style="list-style-type: none"> • interpreting work instructions, specifications, standards and patterns appropriate to the assessee's work • describing consequences • completing tasks • identifying improvements within defined procedures

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • applying safety precautions relevant to the task • assessing operational capability of specified equipment used and work processes. <p>Shows evidence of application of relevant workplace procedures including:</p> <ul style="list-style-type: none"> • quality procedures • hazard policies and procedures including codes of practice relevant to their job within defined procedures • job procedures and work instructions • waste, pollution and recycling management processes within defined procedures • action taken promptly, accidents and incidents reported in accordance with statutory requirements and enterprise procedures • recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions among staff and others in accordance with workplace procedures • work completed systematically with attention to detail without damage to goods, equipment or personnel.
<p>What evidence is required for demonstration of consistent performance?</p>	<p>Applies underpinning knowledge and skills when:</p> <ul style="list-style-type: none"> • interpreting work instructions, specifications, standards and patterns appropriate to the assessee's work • describing consequences • completing tasks • identifying improvements within defined procedures • applying safety precautions relevant to the task • assessing operational capability of specified equipment used and work processes. <p>Shows evidence of application of relevant workplace procedures including:</p> <ul style="list-style-type: none"> • quality procedures • hazard policies and procedures including codes of practice relevant to their job within defined procedures • job procedures and work instructions • waste, pollution and recycling management

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Work site environment	Work may be conducted in a large scale production or small business situation.
Quality parameters	<p>Quality parameters may include:</p> <ul style="list-style-type: none"> • finish • size • durability • product variations • materials • alignment • colour • damage and imperfections.
Quality checks	<p>Quality checks may include:</p> <ul style="list-style-type: none"> • visual inspection • physical measurements • chemical tests • checks against patterns, templates and guides.

RANGE STATEMENT	
Measure	Measure includes those measurements which may be taken by the employee in the work place/at their work station.
Procedures	<p>Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the operation of the plant. They may be written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>
Indicators of production performance	Indicators of production performance include things like number of items/production rate, delays and causes of delays (where known) and other information as specified in the procedures.
Data entry/recording	<p>Data entry/recording may include:</p> <ul style="list-style-type: none"> • keyboard • written (including ticks or signs) • verbal.
Sources of information/documents	<p>Sources of information/documents may include:</p> <ul style="list-style-type: none"> • quality and Australian standards and procedures • work instructions, patterns, designs and recipes • organisation work procedures • manufacturer instructions for materials and equipment • organisational or external personnel • customer requirements.
Investigate and report	<p>Investigate and report in this unit is used to mean following set procedures defined for such investigations.</p> <p>These procedures could include verbal instructions, documented procedures or other quality procedures as implemented within an enterprise or work environment.</p>
Workplace context	<p>Work organisation procedures and practices relating to the manufacture and quality outcomes for products.</p> <p>Conditions of service, legislation and industrial</p>

RANGE STATEMENT	
	<p>agreements including:</p> <ul style="list-style-type: none"> • workplace agreements and awards • Federal or State/Territory legislation • standard work practice.
Reporting/communication	<p>Reporting/communication may include verbal and written communication in accordance with organisational policies and procedures.</p> <p>Communication may be oral, written or visual and can include simple data.</p>
Being responsible for the maintenance of own work quality	<p>Being responsible for the maintenance of own work quality may include being required to contribute to the quality improvement of team or section output, where necessary, in accordance with workplace procedures.</p> <p>Safety, environmental, housekeeping and quality are as specified by materials/machine/equipment manufacturers, regulatory authorities and the enterprise.</p>
Applicable regulations and legislation	<p>Applicable regulations and legislation may include:</p> <ul style="list-style-type: none"> • Occupational Health and Safety (OHS) legislation relevant to workplace activities • workers' compensation legislation.

Functional area

Functional Area	
------------------------	--

MSACMT260A Use planning software systems in manufacturing

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit covers the knowledge and skills needed to access planning software (often known as ERP, MRP, MRPII, and often by its brand name, such as SAP) to make routine business decisions required of the person as a regular part of their job.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>In a typical scenario, an organisation has introduced a planning software system which the employees now must interface with. At its simplest level this is just an information system. However when fully implemented the <i>planning software</i> system can be used as a tool for decision making.</p> <p>This unit requires the application of communication, planning, and problem solving associated with using planning software in own work.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use interface	1.1. Use keyboards, track ball/mouse and monitor and/or other peripherals to access system 1.2. Navigate through the system and the screens 1.3. Acknowledge messages 1.4. Input and output information in the required format
2. Access information	2.1. Obtain relevant data and information from the system 2.2. Identify the status of items in the <i>value chain</i> 2.3. Access historical data and information 2.4. Interpret information and prioritise actions
3. Take appropriate actions in accordance with procedures	3.1. Take actions in response to information 3.2. Follow up as appropriate to ensure anticipated results have occurred 3.3. Record adjustments and variations according to procedures 3.4. Identify any learning needs to use planning software and seek appropriate support

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- keyboarding/mousing
- communication
- teamwork
- problem solving

Required knowledge

- technical knowledge and skills needed to operate process
- hierarchy of planning software system and operation
- information available from and business activities exercised by/through the planning software system

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.

Overview of assessment requirements	The employee will routinely use the relevant parts of the planning software system for their job.
What are the specific resource requirements for this unit?	Access to an organisation using a planning software system.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of routine use of planning software as part of their job is required.
In what context should assessment occur?	Assessment needs to occur in a workplace using a planning software system or a simulation system.
Are there any other units which could or should be assessed with this unit or which relate directly to this	This unit should be assessed concurrently with relevant technical units for the process. This unit covers the lower skill levels of using planning

EVIDENCE GUIDE	
unit?	software. <i>MSACMT460A Use planning software systems in manufacturing</i> and <i>MSACMT660A Develop the application of enterprise systems in manufacturing</i> cover the intermediate and highest skill levels in the CM respectively.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	Evidence of routine use over an extended period should be available. Planning software systems will typically log all interactions with it. Interrogation of the planning software system will therefore provide evidence of the operator's use of it. Actions taken may also be accessible from the planning software system itself, or may need other evidence available from the process.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

RANGE STATEMENT	
Planning software	Planning software is a general term applied to a number of software systems which integrate a range of business information such as finance, logistics maintenance and production. It is frequently referred to by names such as ERP, SAP, MRP/MRP II.
Value chain	Competitive manufacturing organisations encompass the entire production system, beginning with the customer, and includes the product sales outlet, the final assembler, product design, raw material mining and processing and all tiers of the <i>value chain</i> (sometimes called the supply chain). Any truly 'competitive' system is highly dependent on the demands of its customers and the reliability of its suppliers. No implementation of competitive manufacturing can reach its full potential without including the entire 'enterprise' in its planning.
Procedures	Procedures includes all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form. For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.

MSACMT432A Analyse manual handling processes

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills to analyse manual handling in terms of its efficiency and safety.
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario a team leader or team member examines the manual handling component of a job and improves it in terms of safety, effort required and efficiency. This may be conducted for a job performed by others in the team, or it may be for the person's own job.</p> <p>This unit primarily requires the application of skills associated with problem solving and initiative and enterprise to identify safe and efficient manual handling and planning and organisation to ensure processes are implemented. This unit also requires communication with and involvement of team members to ensure they understand the approach and to facilitate training.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess manual handling risks	1.1. Identify <i>manual handling hazards</i> in work area 1.2. Assess risks arising from those hazards
2. Analyse physical effort requirements of job	2.1. Determine basic manual handling requirements of job 2.2. Analyse requirements in terms of components such as lift, move, place, hold 2.3. Analyse items to be handled in terms such as weight, size, shape or other hazards
3. Determine time/effort components of physical effort	3.1. Break required movement pattern down into movement components 3.2. Determine time and effort requirements for movements 3.3. Develop alternative movement patterns 3.4. Determine time and effort requirements for alternative movements 3.5. Determine handling aids required to assist movement 3.6. Determine preferred movement pattern/s
4. Analyse the ergonomics of physical effort	4.1. Analyse the ergonomics of the preferred movement pattern 4.2. Develop substitute movements for any movement which is not ergonomically sound

ELEMENT	PERFORMANCE CRITERIA
5. Optimise application of physical effort	<p>4.3.Determine handling aids required to improve ergonomics of required movements</p> <p>5.1.Select movement patterns which are ergonomically sound and time and effort efficient</p> <p>5.2.Train all relevant people to use these methods</p> <p>5.3.Ensure <i>procedures</i> and practices reflect the optimum methods</p> <p>5.4.Communicate with team members and involve them in development of alternatives to ensure awareness and facilitate learning</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills:

- communication
- analysis
- teamwork
- basic mathematics
- problem solving.

Required knowledge:

- relevant OHS acts and regulations as applied to manual handling
- principles of efficient movement
- principles of efficient job and work method design
- principles of work analysis
- principles of ergonomics/safe movement.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training

EVIDENCE GUIDE	
Package.	
Overview of assessment requirements	<ul style="list-style-type: none"> The person will be able to examine a job for its physical components and then determine a better way of doing it. As a side benefit they will become more aware of poor manual handling practice and raise an alert to it.
What critical aspects of evidence are required to demonstrate competency in this unit?	<ul style="list-style-type: none"> Evidence should be available of the analysis and improvements of the physical/manual handling aspects of jobs in the workplace.
In what context should assessment occur?	<ul style="list-style-type: none"> Assessment should use evidence from the analysis of real jobs or an appropriate simulation.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<ul style="list-style-type: none"> There are no related units. Concurrent assessment may be undertaken with appropriate units.
What method of assessment should apply?	<ul style="list-style-type: none"> Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment. Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit. The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace. The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.
What evidence is required for demonstration of consistent performance?	<ul style="list-style-type: none"> Where evidence is from continuous improvement activities, then a range of such improvements needs to be considered to provide sufficient evidence. Where evidence is coming from one, complex improvement activity then it

EVIDENCE GUIDE	
	may provide sufficient evidence.
What are the specific resource requirements for this unit?	<ul style="list-style-type: none"> Access to a workplace which will allow the improvement of physical actions.

Range Statement

RANGE STATEMENT	
<p>The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.</p>	
Procedures	<p>Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (e.g. Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>
Manual handling hazards	<p>Manual handling hazards include all requirements as defined by the relevant occupational health and safety (OHS) acts and regulations, industry standards and best practice.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Obtain required data	1.1. Identify process for study 1.2. Obtain/organise to obtain required data/information
2. Analyse information	2.1. Analyse past data and determine assignable causes 2.2. Develop possible improvements to eliminate assignable causes 2.3. Incorporate own experience and learning into proposed process improvements
3. Improve process capability	3.1. Liaise with relevant people to implement improvements 3.2. Obtain required authorities to implement improvements 3.3. Obtain/organise to obtain required data for improved process 3.4. Recalculate process capability 3.5. Implement revised data collection/processing and new capability information

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills:

- mathematical
- statistical methods
- communication
- negotiation
- planning
- analysis
- problem solving
- teamwork
- computer operation.

Required knowledge:

- data collection methods
- data processing techniques required
- variability and normal distribution
- three sigma or six sigma processes as relevant
- random and non-random results - recognition of assignable causes
- causes of different types of non-random results
- causes of random variation
- process understanding sufficient to translate the data into variations in the process and determine methods of controlling them.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment requirements

The person should be able to analyse a process and recalculate process capability/trial limits after changes have been made.

What critical aspects of evidence are required to demonstrate

Evidence should be available of the analysis of process information and the recalculation of process

EVIDENCE GUIDE	
competency in this unit?	capability/trial limits. The improvements made may be as a result of continuous improvement with the process capability being recalculated periodically, or the improvement may be as a result of an improvement project with the process capability recalculated as part of that project.
In what context should assessment occur?	Assessment may occur in an organisation which uses process capability to monitor its process and as a tool for improving its process or may occur using a specific project/projects to improve process capability.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<p>This unit may be assessed concurrently with a continuous improvement unit.</p> <p>This unit is related to:</p> <ul style="list-style-type: none"> • <i>MSACMT250A Monitor process capability</i>, and • <i>MSACMT650A Determine and improve process capability</i> which apply to the lower and higher skill levels in CM respectively. <p>It may also be appropriate to relate this unit to <i>MEM15008B Perform advanced statistical quality control</i> where the person is required to perform statistical manipulations (i.e. where these are not done automatically for the operator e.g. by a computer system).</p>
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and</p>

EVIDENCE GUIDE	
	agreed with the assessee prior to the commencement of the assessment.
What evidence is required for demonstration of consistent performance?	This should normally be a routine part of the team leader's job. Where improvements result from a continuous improvement/kaizen process, then a few rounds of improvement and capability recalculation should be required as evidence of competence. Where the improvements results from an improvement project, and this is a complex project and includes the recalculation and implementation of the revised process capability, then one project may be provide sufficient evidence.
What are the specific resource requirements for this unit?	Access to an organisation using process capability to control and improve its process.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Six sigma (6s)	Six sigma is a statistical tool for recording defects and determining capability. Six sigma limits equate to 3.4 defects per million opportunities for each product or service transaction. Six sigma is also used as a general term covering a competitive manufacturing approach. Six sigma training typically covers several units of competency in this Training Package.
Three sigma (3s)	Traditional statistical process control uses three sigma limits which equates to 3 defects per thousand opportunities for each product or service transaction.
Procedures	Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be

RANGE STATEMENT

	<p>written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (e.g. Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>

MSACMT451A Mistake proof a production process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills needed to make changes which prevent errors and/or backsliding to a pre-improvement level of practice. In the CM environment, this unit would typically be done by a team leader, technical expert of similar person.
------------------------	---

Application of the Unit

Application of the unit	<p>In a typical scenario a person needs to analyse the process that a team is responsible for and determine methods of <i>mistake proofing</i> it (i.e. ensuring it only produces product within an acceptable range). After improvement activities have been undertaken these improvements need to be sustained.</p> <p>This unit requires the application of skills associated information gathering and analysis. Initiative, enterprise and problem solving are also required to identify mistakes and determine strategies for eliminating them. This unit also requires communication and team building skills to ensure mistake proofing strategies are implemented, and self management and learning skills to continually reflect on and integrate feedback about the effectiveness of strategies.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse process	1.1. Identify sources of variability/non-conformance in the process 1.2. Identify critical control points in process 1.3. Analyse causes of variability/non-conformance
2. Develop preventative techniques/systems	2.1. Liaise with team members and other people to develop mistake proof method of performing operation 2.2. Test and validate mistake proofing
3. Implement permanent fix	3.1. Liaise with relevant people to have systems/procedures changed to implement solution 3.2. Liaise with relevant people to implement the solution 3.3. Liaise with relevant people to ensure the workforce has an appropriate skills set 3.4. Follow through to ensure implementation occurs

ELEMENT	PERFORMANCE CRITERIA
4. Monitor implementation	4.1. Critically observe the implementation 4.2. Compare the results of the implementation against the expected outcomes 4.3. Modify solution to improve outcomes 4.4. Ensure procedures reflect change 4.5. Ensure training/assessment reflects change 4.6. Audit change at agreed period/cycle 4.7. Take action on any observed deviation
5. Seek improvements	5.1. Observe changes 5.2. Analyse process again if required to ensure improvements are sustained

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills:

- communication ability to discuss items with both operators and technical support personnel
- problem solving
- analysis
- team work
- design conceptualisation.

Required knowledge:

- understanding of their process
- factors in the process which may cause variability
- methods of controlling the variability in the process
- mistake proofing methods relevant to the process/product.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in

EVIDENCE GUIDE	
conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.	
Overview of assessment requirements	The person will be able to analyse their process and implement systems to ensure the process is mistake proof and the operators, work in a predictable way with little or no chance of mistake.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of actions taken to mistake proof the process should be available.
In what context should assessment occur?	Assessment needs to occur in a workplace implementing competitive manufacturing or by using a suitable project.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be used as a stand alone unit or it may be assessed concurrently with any of: <ul style="list-style-type: none"> • <i>MSACMT250A Monitor process capability</i> • <i>MSACMT450A Undertake process capability improvements</i> • <i>MSACMT650A Determine and improve process capability.</i>
What method of assessment should apply?	Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment. Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit. The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace. The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.
What evidence is required for	Where evidence is from the application of <i>baka-yoke</i> to

EVIDENCE GUIDE	
demonstration of consistent performance?	continuous improvement, then there should be evidence that it is practiced routinely and from a number of standardisation activities. Where the evidence is from an initial standardisation of a process, or a single, large and complex standardisation/change process the may provide sufficient evidence.
What are the specific resource requirements for this unit?	Access to an organisation using a competitive manufacturing approach.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Mistake proofing	<p>Sometimes known as baka-yoke/poka-yoke, a manufacturing technique of preventing mistakes by designing the manufacturing process, equipment, tools and components/subassemblies etc so that an operation literally cannot be performed incorrectly. An attempt to perform incorrectly, as well as being prevented, is usually met with a warning signal of some sort.</p>
Procedures	<p>Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the operation of the plant. They may be written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (e.g. Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>

MSACMT452A Apply statistics to processes in manufacturing

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills required to apply statistical theory and principles to the analysis and control of processes in manufacturing.
------------------------	--

Application of the Unit

Application of the unit	<p>In a typical scenario, statistical process control is being used on a process in a manufacturing organisation. Usually this will be to monitor the process and determine when action needs to be taken. The appropriate action will then be taken in accordance with standard procedures.</p> <p>To do this the person will apply their knowledge of frequency distribution and variation to the data/chart to distinguish between random and non-random variation and their understanding of the process and/or equipment to help interpret those results.</p> <p>This unit primarily requires the application of skills associated with gathering and analysing data and communicating statistical information to others. This unit also has a strong emphasis on problem solving, initiative and enterprise, planning and organising, and self management to solve problems and manage processes.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collect process data.	1.1. Interpret sampling scheme 1.2. Obtain measurements in accordance with standard procedures 1.3. Handle data as required.
2. Interpret data	2.1. Plot data on appropriate control chart 2.2. Distinguish between random and non-random patterns of results 2.3. Identify results outside the control limits 2.4. Recognise situations requiring action 2.5. Take appropriate action in accordance with standard procedures 2.6. Determine cost of non-conformance
3. Calculate control limits.	3.1. Consult relevant stakeholders to determine appropriate limits 3.2. Use relevant methods to calculate/revise control limits

ELEMENT	PERFORMANCE CRITERIA
	3.3. Plot limits on control chart 3.4. Explain impact of limit to relevant stakeholders

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills:

- analysis
- problem solving
- communication
- documenting
- calculations
- use of statistics

Required knowledge:

- sampling techniques
- purpose of sampling and measurement
- random, systematic, stratified sampling
- relevance, reliability and representativeness of samples/data collected
- purpose of replication of data for statistical control
- samples, populations, finite and infinite populations and the differences
- methods of calculating means, standard deviations and the like and their purpose in statistical control
- the causes of variation in a process
- the meaning of broad/ narrow frequency distributions/ range/standard deviations and skewed distributions in process terms
- types of control charts and their applications to different types of process/product and for different purposes
- process causes of variation and typical cause types of non-random variation
- non-process (eg measurement) causes of variation
- recognition of stable and unstable processes
- causes of stability/instability in the process
- calculation of control limits/process capability and the applications of different control limits
- the standard distribution curve and confidence limits.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide describes the underpinning knowledge and skills that must be demonstrated to prove competence. It is essential for assessment and must be read conjunction with the performance criteria, the range statement and the assessment guidelines of the relevant Training Package

Overview of assessment requirements	The competent person will be able to apply statistical theory to a process to interpret and reduce its variation.
What critical aspects of evidence is required to demonstrate competency in this unit?	Evidence of the application of statistical theory to a process should be available
In what context should assessment occur?	Assessment will need to occur in an organisation implementing statistical process control or by project.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit could be assessed concurrently with other units dealing with process capability and/or change management.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of</p>

EVIDENCE GUIDE	
What evidence is required for demonstration of consistent performance?	Generally the application of statistics over a period of time would be required to generate sufficient evidence
What are the specific resource requirements for this unit?	Access to an organisation using statistical control.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Sampling scheme	<p>Sampling scheme may include:</p> <ul style="list-style-type: none"> • sampling for attributes or sampling for variables • batch, continuous or custom made products • number of items/samples • size of sample • timing of sampling • location of sampling points • type of sample • number/type of measurements to be done on each sample • sampling equipment • measurement/testing equipment/methods
Procedures	<p>Procedures includes all work instructions, standard operating procedures, formulas/ recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>

RANGE STATEMENT	
Handle data	<p>Handle data may include:</p> <ul style="list-style-type: none"> • calculating means, ranges, mean of means, standard deviation (using appropriate calculation aids) • entering data into a software package • recording data either in writing or electronically • other required manipulations of the data.
Control chart	<p>Control charts may include:</p> <ul style="list-style-type: none"> • run • tally • mean/range • attributes • other relevant charts
Random	<p>Random variation is the term used in statistical control to refer to those variations for which no cause can be found.</p>
Non-random	<p>Non-random, also called identifiable cause, or assignable cause or special cause are those variations for which a cause can be found and so the cause of the variation eliminated. Non-random variation may also be used to predict possible breaches of the control limits.</p>
Control limits	<p>Control limits, also referred to as process capability are those limits within which the process will operate if it is 'under control'.</p>
Cost of non-conformance	<p>Cost of non-conformance includes:</p> <ul style="list-style-type: none"> • reprocessing/rework • expediting • unplanned service • excess inventory • complaint handline • downtime • returns • scrap • labour costs • material costs • infrastructure costs/overhead • utility costs
Appropriate limits	<p>Appropriate limits may include:</p>

RANGE STATEMENT

	<ul style="list-style-type: none">• 1 sigma warning limits• 2 sigma warning limits• 3 sigma control limits• 6 sigma limits

MSACMT460A Facilitate the use of planning software systems in manufacturing

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills required by a team leader or technical expert to use and facilitate the use of planning software systems (known by various names such as ERP, SAP and MRP). This unit also covers the interactions of the person with a planning software system as they both use it for their own work and support their team members use it.
------------------------	--

Application of the Unit

Application of the unit	In a typical scenario, an organisation will be using planning software. The person will access the planning software system for their own work, but will also need to provide support and organise skill development programs for their team members. The planning software system will be a routine part of their work life. This unit primarily requires the application of skills associated with using communication technology and supporting team use of planning software. Problem solving, initiative and enterprise, and planning and organisational skills are required to ensure that planning software is used efficiently. This requires aspects of learning and self management to ensure own performance and that of the team.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	<i>MSACMT260A</i>	<i>Use planning software systems in manufacturing</i>
---------------------------	-------------------	---

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Communicate using the planning software system	1.1. Send and receive information using planning software 1.2. Send and receive messages using planning software
2. Make decisions using planning software	2.1. Interrogate the planning software system to find required current, historical or predicted information 2.2. Take actions appropriate to the information in accordance with procedures
3. Monitor the use of planning software	3.1. Routinely monitor planning software information and use along the <i>value chain</i> 3.2. Review performance and use of planning software with team
4. Support team use planning software	4.1. Regularly communicate with team, both using planning software and face to face 4.2. Identify improvements required

ELEMENT	PERFORMANCE CRITERIA
	4.3. Take appropriate actions to implement improvements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills:
<ul style="list-style-type: none"> • keyboarding/mousing • communication • teamwork • problem solving. • planning and organising
Required knowledge:
<ul style="list-style-type: none"> • hierarchy of planning software system and operation • information available from/through the planning software system • facilities and information offered by planning software • support/training/skill development mechanisms available for access by team members.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.	
Overview of assessment requirements	The person will need to be able to demonstrate an ability to understand and apply planning software to a work location or area and send, receive and interpret process and production data for that area. They should also be able to assist others in the use of the planning software system. Software editing is not required for this unit but the ability to recognise and suggest application improvements is required

EVIDENCE GUIDE	
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of competent use of planning software and also of assisting their team to use it effectively and efficiently.
In what context should assessment occur?	Assessment will need to occur on an organisation using planning software or simulation software.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<p>This unit may be assessed concurrently with other relevant units.</p> <p>This unit covers the intermediate skill levels in CM for planning software. <i>MSACMT260A Use planning software systems in manufacturing</i> and <i>MSACMT660A Develop the application of enterprise systems in manufacturing</i> cover the lowest and highest skill levels respectively.</p> <p><i>MSACMT260A Use planning software systems in manufacturing</i> is specified as a prerequisite, and should be applied to the person's own job.</p>
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	Evidence of routine use over an extended period should be available. Planning software systems will typically log all interactions with it. Interrogation of the planning software system will therefore provide evidence of the operator's use of it. Actions taken

EVIDENCE GUIDE	
	may also be accessible from the planning software system itself, or may need other evidence available from the process.
What are the specific resource requirements for this unit?	Access to an organisation using planning software.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Planning software	<p>Planning software is a general term applied to a number of software systems which integrate a range of business information such as finance, logistics maintenance and production. It is frequently referred to by names such as ERP, SAP or MRP/MRP II. In some cases it can be integrated with engineering applications such as Systems Control and Data Acquisition (SCADA) systems. In such cases <i>MSACMT261A Use SCADA systems in manufacturing</i> may also be required.</p> <p>Competitive manufacturing organisations encompass the entire production system, beginning with the customer, and includes the product sales outlet, the final assembler, product design, raw material mining and processing and all tiers of the value chain (sometimes called the supply chain). Any truly 'competitive' system is highly dependent on the demands of its customers and the reliability of its suppliers. No implementation of competitive manufacturing can reach its full potential without including the entire 'enterprise' in its planning.</p>
Value chain	<p>Competitive manufacturing organisations encompass the entire production system, beginning with the customer, and includes the product sales outlet, the final assembler, product design, raw material mining and processing and all tiers of the value chain (sometimes</p>

RANGE STATEMENT

	called the supply chain). Any truly 'competitive' system is highly dependent on the demands of its customers and the reliability of its suppliers. No implementation of competitive manufacturing can reach its full potential without including the entire 'enterprise' in its planning .

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop components of reliability strategy for a work/plant area	1.1. Determine manufacturer's recommended <i>inspection, servicing</i> and related schedules for relevant plant 1.2. Consult with relevant people with regard to appropriate inspections, services and schedules 1.3. Discuss any conflicts with relevant people and seek resolution of conflicts 1.4. Develop schedules in liaison with relevant people 1.5. Identify inspections and servicing which may be done by operations personnel in liaison with relevant stakeholders
2. Assess current practice for maintenance implications	2.1. Evaluate <i>procedures</i> for plant/equipment reliability implications 2.2. Discuss current practices with relevant people to determine any plant/equipment reliability

ELEMENT	PERFORMANCE CRITERIA
3. Assist in implementing the reliability strategy	<p>implications</p> <p>2.3.Recommend changes to improve plant/equipment reliability in accordance with procedures</p> <p>3.1.Arrange for schedules to be incorporated in relevant work plans</p> <p>3.2.Identify training needs in discussion with relevant personnel</p> <p>3.3.Assist personnel to develop required skills for inspections/servicing within scope of authority</p> <p>3.4.Collect data/information as required by own work plan</p> <p>3.5.Compare data/information with performance indicators</p> <p>3.6.Recommend improvements to reliability strategy in accordance with procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills:

- communication
- planning
- organising
- prioritising
- reading and interpretation
- recording
- problem solving.

Required knowledge:

- requirements of the proactive maintenance strategy being implemented
- principles of operation of the equipment/plant
- likely abilities of operations personnel with regard to inspections and servicing
- procedures relevant to job
- methods of making/recommending improvements.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

<p>Overview of assessment requirements</p>	<p>There should be evidence that the maintenance person is routinely applying proactive maintenance strategies in their routine work and that they are aware of why they are important. In a TPM environment, the operator needs to move to taking ownership of their equipment/plant and maintenance personnel have a role to play in helping this happen and in developing the competence of operating personnel to do so</p>
<p>What critical aspects of evidence are required to demonstrate competency in this unit?</p>	<p>Evidence of schedules developed and implemented and improvements recommended.</p>
<p>In what context should assessment occur?</p>	<p>This unit needs to be assessed in a workplace practising, or beginning to implement proactive maintenance.</p>
<p>Are there any other units which could or should be assessed with this unit or which relate directly to this unit?</p>	<p>This unit could be assessed in conjunction with a technical unit related to maintenance.</p> <p>This unit is related to:</p> <ul style="list-style-type: none"> • <i>MSACMT481A Undertake proactive maintenance analyses</i> which covers the analysis skills associated with proactive maintenance. <p>These units are complimentary and in some organisations it may be appropriate for the one person to hold both competencies.</p> <p>This unit is related to:</p> <ul style="list-style-type: none"> • <i>MSACMT681A Develop a proactive maintenance strategy</i> which is the highest level unit dealing with proactive maintenance in CM.
<p>What method of assessment should apply?</p>	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable,</p>

EVIDENCE GUIDE	
	<p>authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	There needs to be evidence that schedules related to proactive maintenance have been developed either in an initial implementation of a proactive maintenance strategy, or have been developed as part of continuous improvement to the proactive maintenance strategy.
What are the specific resource requirements for this unit?	Access to a plant implementing/practising proactive maintenance. No other specific resources are required.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Total Preventative Maintenance/Total Productive Maintenance (TPM)	Total Preventative Maintenance/Total Productive Maintenance (TPM) is an application of total quality management to maintenance with the intention of increasing reliability, getting it right first time and increasing <i>Overall Equipment Efficiency (OEE)</i> .
Reliability Centred Maintenance (RCM)	Reliability Centred Maintenance (RCM) moves maintenance from reactive, or even planned/programmed, towards a focus on <i>uptime</i> and

RANGE STATEMENT	
	OEE.
Similar strategies	<p>Mean Time Between Failure (MTBF) is one key measure of the effectiveness of a maintenance procedure, and is an indicator as to whether root causes are being found and resolved. If MTBF is reducing, then it is an indicator that the maintenance regime is failing.</p> <p>Failure Mode and Effects Analysis (FMEA) is a systematic approach that identifies potential failure modes in a system, product, or manufacturing/assembly operation caused by either design or manufacturing/assembly process deficiencies. It also identifies critical or significant design or process characteristics that require special controls to prevent or detect failure modes. FMEA is a tool used to prevent problems from occurring.</p> <p>Some industry sectors have highly adapted forms of FMEA and may practice traditional FMEA in say their routine maintenance while using another technique (such as HAZOP) for design and modification.</p> <p>Hazard and Operability Studies (HAZOP) is a form of FMEA which has been practiced by the process industries for over 30 years and examines the implications of changes in process conditions to process stability.</p> <p>Condition monitoring involves often quite sophisticated monitoring of equipment including such things as vibration monitoring, instrumental analysis of lubricating oil etc to determine the current state of the equipment, monitor the change in this condition and predict when it needs servicing/maintenance to maintain reliability.</p>
Overall Equipment Efficiency (OEE)	<p>Overall Equipment Efficiency (OEE) is the combination of the main factors causing loss of productive capacity from equipment/plant and is:</p> $OEE = \text{availability} \times \text{performance} \times \text{quality rate}$ <p>where:</p> <ul style="list-style-type: none"> • availability takes into account losses due to breakdown, set up and adjustments • performance takes into account losses due to minor stoppages, reduced speed and idling • quality rate takes into account the losses due to

RANGE STATEMENT	
	rejects, reworks and start up waste.
Uptime	Uptime refers to the overall availability of the plant - it is the inverse of downtime - or the unavailability of the plant. Ideal uptime is 100%.
Inspection	<p>Inspection may include:</p> <ul style="list-style-type: none"> • reading dials, gauges, meters • observations including those using sight, hearing, smell, feel • observations of product quality/faults/rejects.
Servicing	<p>Servicing may include:</p> <ul style="list-style-type: none"> • cleaning • lubricating • topping up • adjusting.
Procedures	<p>Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form.</p> <p>For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (e.g. Good Manufacturing Practice (GMP), Responsible Care) and government regulations.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse total cost components of product	1.1. Identify all cost components of product 1.2. Allocate cost components to major categories such as overhead, depreciation, energy, consumables and labour 1.3. Distinguish between costs which directly deliver customer features/benefits and <i>waste</i>
2. Optimise costs	2.1. Analyse causes of costs which lead to customer features/benefit 2.2. Determine methods of increasing the customer benefit/cost ratio 2.3. Analyse causes of waste costs 2.4. Determine methods of reducing/eliminating waste costs 2.5. Analyse interactions between cost components 2.6. Check that one method of reducing costs does

ELEMENT	PERFORMANCE CRITERIA
	<p>not cause an increase in another cost/reduction in consumer benefit</p> <p>2.7. Check that cost reduction plans do not reduce required levels of regulatory compliance or Occupational Health and Safety (OHS)</p>
3. Implement cost optimisation	<p>3.1. Develop cost optimisation plans</p> <p>3.2. Negotiate with relevant people to agree on implementation plans</p> <p>3.3. Take actions to implement the cost optimisation</p> <p>3.4. Monitor the implementation of the cost optimisation</p> <p>3.5. Make adjustments to the plan as required</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- calculation
- analysis
- problem solving
- planning

Required knowledge

- cost components of product
- major costs which are controllable (and how to control them)
- types of waste
- interrelationship of cost components and costs and benefits

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.

EVIDENCE GUIDE	
Overview of assessment requirements	The person will select a product to analyse and determine cost components. Costs will be identified as waste or otherwise as an aid to determining their treatment. The cost reduction plans will optimise the cost of the product overall in terms of benefit delivered.
What are the specific resource requirements for this unit?	Access to a workplace implementing competitive manufacturing strategies. No other specific resources are required.
In what context should assessment occur?	Assessment will need to occur in a workplace.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed concurrently with appropriate units on continuous improvement/kaizen.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	Evidence from a single optimisation may be adequate, although generally analyses of a few products with different cost structures or customer benefit structures would be required.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Waste

Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product. Within manufacturing, categories of waste include:

- excess production and early production
- delays
- movement and transport
- poor process design
- inventory
- inefficient performance of a process
- making defective items.

Waste for this unit may include activities which do not yield any benefit to the organisation or any benefit to the organisations customers.

MSACMT631A Undertake value analysis of product costs in terms of customer requirements

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit covers the knowledge and skills required by an employee who is required to analyse products and processes to determine the factors that most impact on meeting customer requirements. The analysis is in terms of cost factors and include options for improving cost efficiency. The unit also includes implementing identified changes that increase cost efficiency. The unit may be applied individually or in a team environment.</p> <p>In this unit an employee uses an analysis of the benefits/features which a customer perceives to be in a product/products as a basis for determining waste and so reducing waste.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>In a typical scenario, an employee will choose a product, analyse the features/benefits obtained by customers from this product and the cost components relating to those benefits. From this waste will be determined and actions taken to reduce waste.</p> <p>This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information. Problem solving, initiative and enterprise, and planning and organising are required to determine cost efficiencies. This unit also requires aspects of self management and learning to ensure feedback and new learning is integrated into costing methods.</p>

----------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse customer benefits and determine waste	1.1. Determine features/benefits perceived by customer in product 1.2. Analyse cost components and determine those which deliver customer features/benefits and those which don't 1.3. Analyse waste cost components 1.4. Determine alternative ways of reducing waste costs 1.5. Select actions which maximise customer benefits and minimise costs
2. Analyse production performance variance	2.1. Analyse required performance to meet customer <i>pull</i>

ELEMENT	PERFORMANCE CRITERIA
	2.2. Determine actual <i>cycle time</i> /s and variability of cycle time 2.3. Analyse cause of waste in throughput 2.4. Analyse costs and determine methods of reducing costs/waste 2.5. Take actions required to achieve cost/waste reduction/s

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- calculation
- communication
- problem solving
- analysis
- numeracy
- literacy
- planning and organising

Required knowledge

- customer benefits from products
- performance and cycle times for products made
- major costs which are controllable (and how to control them)
- types of waste (muda)
- methods of reducing waste (muda)
- methods of reducing cycle time
- desirability of improving performance and methods of reducing cycle time

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge,

EVIDENCE GUIDE

the range statement and the assessment guidelines for this training package.

Overview of assessment requirements	The employee will select a product/range of products to analyse and determine waste in terms of any cost which does not contribute directly to an identified customer benefit/feature and then proceed to determine and implement methods of reducing this waste.
What are the specific resource requirements for this unit?	Access to a workplace implementing competitive manufacturing strategies. No other specific resources are required.
In what context should assessment occur?	Assessment will need to occur in a workplace.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed concurrently with appropriate units on continuous improvement/kaizen.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	Evidence should be available from a number of minor changes or from a single large change which had multiple facets and which was implemented over a period of months.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Waste	<p>Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product.</p> <p>Within manufacturing, categories of waste include:</p> <ul style="list-style-type: none"> • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items. <p>Waste for this unit may include activities which do not yield any benefit to the organisation or any benefit to the organisations customers.</p>
Performance	Performance may be thought of as the rate of output of the plant compared to the rate required to meet demand.
Cycle time	Cycle time is the normal time to complete an operation on a product.
Pull	Pull is the concept of producing to demand, rather than for stock or some forecast.

MSACMT662A Develop a documentation control strategy for a manufacturing enterprise

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills needed to develop and implement a documentation control strategy for a manufacturing enterprise such as might be needed to comply with ISO9000 or other reasons.
------------------------	--

Application of the Unit

Application of the unit	<p>In a typical scenario, a person (who may be a manager, technical specialist or other person) implementing a competitive manufacturing strategy is required to develop and/or improve a system to ensure manufacturing and related supporting documents are controlled in a manner which is appropriate for their use in the organisation.</p> <p>This unit primarily requires the application of problem solving, initiative and enterprise, and planning and organising skills associated with developing effective documentation strategies. This work is done in the context of using computer technology and also requires aspects of self management and learning to ensure improvement of own performance.</p>

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and obtain agreement to document management standards	1.1. Establish an appropriate working group of stakeholders 1.2. Agree on purpose and scope of document management standards including interaction with production, maintenance, logistics, sales and marketing systems 1.3. Identify any relevant external standards and conventions 1.4. Agree on document control, tracking and updating processes 1.5. Document the document management standards and circulate to relevant stakeholders 1.6. Negotiate any variations
2. Determine document style and establish standards and conventions	2.1. Consider potential document style/s 2.2. Agree on document conventions and layout 2.3. Agree on standard symbols, abbreviations and similar 2.4. Produce a style sheet, document model or template as appropriate 2.5. Check document style conforms to document

ELEMENT	PERFORMANCE CRITERIA
	<p>management standards</p> <p>2.6. Circulate to relevant stakeholders and negotiate any variations</p>
3. Implement document control strategy	<p>3.1. Develop a document control strategy and procedures including arrangements ongoing review of strategy</p> <p>3.2. Establish mechanisms to check documents conform to the control strategy</p> <p>3.3. Arrange for appropriate staff development</p> <p>3.4. Monitor implementation of document control strategy</p> <p>3.5. Make improvements to the documentation control strategy as appropriate</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- negotiating
- communication
- team work
- problem solving
- planning and organising
- relevant computer applications which may include:
 - word processing
 - spreadsheets
 - database
 - drawing/CAD/CAM

Required knowledge

- knowledge of documents and documentation control
- needs of the organisation and its individuals

Evidence Guide

<p>EVIDENCE GUIDE</p> <p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
<p>Overview of assessment requirements</p>	<p>The person will be able to develop a document control strategy which will meet the needs of the organisation and its people.</p>
<p>What are the specific resource requirements for this unit?</p>	<p>Access to a workplace using or implementing document control strategies is required. No other specific resources are required.</p>
<p>In what context should assessment occur?</p>	<p>Assessment will need to occur in a competitive manufacturing organisation and where the individual is responsible for the document control strategy or by case study.</p>
<p>Are there any other units which could or should be assessed with this unit or which relate directly to this unit?</p>	<p>This unit may be assessed concurrently with appropriate units.</p>
<p>What method of assessment should apply?</p>	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. MSACMT670A Develop and manage sustainable energy practices

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit covers the skills needed to identify opportunities for and make improvements in sustainable energy practices in production, maintenance and logistics. Areas covered include efficient use of raw materials, management of waste, electricity conservation, heat conservation and management, water management, environment protection and environment obligations of enterprises.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>This is the highest level sustainable energy unit in the CM. In a typical scenario, there is a need to reduce <i>waste</i> in the <i>value chain</i>. Part of this is the cost of energy to the process. Some of this is <i>necessary waste</i> but typically a large part of energy use in <i>unnecessary waste</i> and so should be totally eliminated. In order to make these savings, there is a need to analyse energy use and cost in all its forms and then develop and implement plans for the more efficient use of energy.</p> <p>This unit primarily requires the application of communication and problem solving skills associated with collecting and analysing information. An ability to analyse energy use of technology or processes will be applied. Initiative and enterprise, and planning and organising are also required to develop plans for efficient energy use. This unit also requires aspects of self management and learning to ensure feedback and new learning is integrated into the development of processes.</p>

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Analyse energy use	1.1. Identify all energy consuming processes 1.2. Determine quantity and nature of energy consumed 1.3. Analyse energy consumed and generated in different parts of the process 1.4. Determine source of energy consumed in process 1.5.
2. Develop energy conservation plans	2.1. Determine the efficiency of use of energy by all energy consuming processes 2.2. Determine causes of low efficiency of use 2.3. Develop plans for increasing the efficiency of

ELEMENT	PERFORMANCE CRITERIA
	energy use 2.4.Determine benefit/cost of plans
3. Develop energy trading plans	3.1.Compare energy generating activities with energy consuming activities 3.2.Determine feasibility of energy consuming activities using energy generated by other activities 3.3.Develop plans for energy trading 3.4.Determine benefit/cost of plans
4. Investigate alternative sources of energy	4.1.Develop a specification for energy required 4.2.Identify a range of sources for that energy 4.3.Determine benefit/cost for alternative energy sources
5. Develop plans for more efficient energy use	5.1.Compare benefit/costs for different alternatives developed 5.2.Rank proposals based on benefit/cost compare to limited resources 5.3.Check proposals meet regulatory requirements 5.4.Recommend proposals for improving energy efficiency
6. Implement selected plans	6.1.Liaise with relevant people to implement energy efficiency plans 6.2.Follow through to ensure implementation occurs 6.3.Monitor implementation and make adjustments as required 6.4.Check new energy usage to ensure improvements have occurred

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analysis
- mathematics
- communication

REQUIRED SKILLS AND KNOWLEDGE
<ul style="list-style-type: none"> • problem solving • data gathering • planning and organising
Required knowledge
<ul style="list-style-type: none"> • types and sources of energy • methods of analysing energy efficiency for different types of energy • methods of converting energy values from one form to another • alternative sources of energy • principles of energy efficiency • relevant regulatory/legislative requirements • energy trading schemes and procedures • process needs for energy

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
Overview of assessment requirements	The person will be able to analyse the energy use of any/all part/s of the process and determine if there are more efficient/cheaper ways of achieving the same result.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of analyses of energy consumed and improvements made should be available.
In what context should assessment occur?	Assessment needs to be conducted in an organisation where energy is a significant cost component or by project, simulation or case study.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	<p>This unit is related to:</p> <ul style="list-style-type: none"> • <i>MSACMT270A Use sustainable energy practices</i> - which covers the individual application level, and • <i>MSACMT671A Develop and manage sustainable environmental practices</i> - which covers general environmental practices.

EVIDENCE GUIDE	
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	<p>If evidence is from a major project to improve energy efficiency, then it may provide sufficient evidence. If evidence is from a number of minor improvements to energy then a range of such improvements will be needed to provide sufficient evidence.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Waste	<p>Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product.</p> <p>Within manufacturing, categories of waste include:</p> <ul style="list-style-type: none"> • excess production and early production

RANGE STATEMENT	
	<ul style="list-style-type: none"> • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items. <p>Waste for this unit may include activities which do not yield any benefit to the organisation or any benefit to the organisations customers.</p>
Necessary waste	Necessary waste is any activity or cost which does not contribute directly to customer benefit/feature in the product, and which cannot be avoided (eg regulatory compliance and fixed costs). Necessary waste cannot be eliminated but should be managed.
Unnecessary waste	Unnecessary waste is any activity or cost which does not contribute directly to customer benefit/features in the product and can be avoided. Unnecessary waste should be eliminated as quickly as practical.
Energy	Energy is used to mean all sources of energy used by the process be it electricity, gas or mobile transport fuel. The uses of the energy will also be potentially wide and include heating and cooling, moving materials (including pumps and conveyors), modifying materials (including cutting, forming, weaving, knitting, reacting, moulding, extruding, mixing), generating pressure/vacuum or providing motive power for equipment and transport.

MSACMT675A Facilitate the development of a new product

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This competency covers the knowledge and skills required to develop a new/evolutionary product within an existing range of products and encompasses design for manufacture and the facilitation of its initial production.</p> <p>This unit is based on <i>PMBTECH601A Develop a new product</i></p>
------------------------	---

Application of the Unit

Application of the unit	<p>This competency applies to people who develop new products to meet a specified end use. This will involve working closely with a range of management and operations personnel and requires balancing the business and technical sides of the new product and would typically be done as part of a cross functional team. This unit of competency applies to the technical expert. Critical aspects for success include:</p> <ul style="list-style-type: none"> • ensuring the technical performance meets the customer's needs • making sure the market needs of cost, timeliness and quality are appropriately balanced • designing a product and process which can be efficiently made by the company • liaising with the required people to ensure tooling design and manufacture and equipment modification is correct • optimising the process for the new product at the completion of the development phase. <p>This competency is typically performed by high level staff, working as part of a product design, development</p>
--------------------------------	---

	<p>and implementation team and taking a lead technical role.</p> <p>This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Team work, problem solving, initiative and enterprise, and planning and organising are required to facilitate the development of a new product. This unit also requires aspects of self management and learning to ensure feedback and new learning is integrated into competitive manufacturing strategies.</p> <p>This unit of competency assumes the knowledge component included in the following unit of competency. Evidence must be available that the specified knowledge has been acquired and is able to be applied: <i>MSACMT452 Apply statistics to processes in manufacturing</i></p>

consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Confirm design brief of new product in consultation with relevant people	<p>1.1. Communicate with customer and other key stakeholders and agree on technical specification, aesthetic requirements, timelines, cost and other market requirements</p> <p>1.2. Determine regulatory/industry code/intellectual property requirements for product</p> <p>1.3. Identify possible <i>tooling/process/equipment</i> needs</p> <p>1.4. Develop design brief, including relevant drawings, to meet needs</p> <p>1.5. Obtain 'sign off' on total design brief from all relevant persons</p>
2. Determine material requirements for product	<p>2.1. Select appropriate materials/combination of materials/ components in liaison with key stakeholders</p> <p>2.2. Determine material/component testing and evaluation regime required to meet product end use requirements, including <i>regulatory</i>/industry code requirements</p> <p>2.3. Arrange for, testing and evaluation of trial materials/ components</p> <p>2.4. Guide material trial process and interpret material trial results</p> <p>2.5. Determine final materials/components specifications and details of value chain</p>
3. Determine process requirements for product	<p>3.1. Select appropriate process to make product in liaison with key stakeholders and based on <i>relevant factors</i></p> <p>3.2. Determine any special process/equipment requirements for this product</p> <p>3.3. Communicate with production personnel to determine their concerns and/or training or other needs</p> <p>3.4. Adjust the design as required to satisfy customer and production needs</p>
4. Ensure process needs for	4.1. Liaise with equipment design/procurement

ELEMENT	PERFORMANCE CRITERIA
new product have been met	<p>personnel</p> <p>4.2. Interpret hardware specifications and ensure they are appropriate for the job required</p> <p>4.3. Liaise with process personnel to ensure appropriate draft procedures for new product have been developed</p> <p>4.4. Validate product cost and design meets objectives</p>
5. Trial new product through the process	<p>5.1. Design trialing procedure to deliver required information</p> <p>5.2. Liaise with relevant stakeholders</p> <p>5.3. Ensure health safety and environment (HSE) requirements are stringently observed</p> <p>5.4. Coordinate the trialing of the new product</p> <p>5.5. Interpret product trial results and guide product trial process</p> <p>5.6. Tune process to optimise production of new product</p>
6. Determine process capability	<p>6.1. Plot appropriate statistical process control charts</p> <p>6.2. Determine confidence limits</p> <p>6.3. Compare confidence limits with product specification</p>
7. Coordinate product trials	<p>7.1. Determine product testing and evaluation regime required to meet end use requirements, including regulatory/industry code requirements</p> <p>7.2. Arrange for testing and evaluation of trial product/prototype</p> <p>7.3. Interpret product trial results and guide product trial process</p> <p>7.4. Determine final product specification in liaison with key stakeholders</p> <p>7.5. Make required changes to materials, process and equipment</p>
8. Implement standard procedures for new product	<p>8.1. Monitor initial production and, in liaison with appropriate team members, adjust process, conditions and materials to ensure the product and process outcomes conform to requirements</p> <p>8.2. Ensure process specifications are updated and reflect the optimised operation developed</p> <p>8.3. Ensure standard operating procedures are correct</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>for the new product</p> <p>8.4.Ensure equipment and other hardware records are updated to reflect additions/changes</p> <p>8.5.Ensure project records are complete and all required reports have been completed and submitted</p> <p>8.6.Archive records according to company procedure</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Competence includes the ability for the practical completion of the job to:

- select and justify the selection of:
 - type of material/material specification
 - appropriate process for a range of product/market applications
 - material and product testing procedures
- apply theoretical principles to predict:
 - properties of product based on materials selected
 - effects of processes and processing on the final properties of the product
- mathematically determine:
 - product cost estimates
- interpret and make recommendations based on:
 - field test results
 - market analysis data
 - trailing data.

Required knowledge

- Knowledge and understanding of the materials, equipment and process sufficient to choose an appropriate combination of materials and process to achieve the end use function of the product.
- Knowledge of the enterprise's procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards.

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.</p>	
Overview of assessment requirements	There should be evidence of successfully designed products.
What are the specific resource requirements for this unit?	<p>Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of questions will also be required to the extent that they form part of the assessment method.</p> <p>Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.</p>
What critical aspects of evidence are required to demonstrate competency in this unit?	<p>The critical aspect for this unit of competency is the ability to apply a thorough understanding of materials and components, their grades and properties and the effects of processing to a new situation and use this understanding to predict likely solutions to the new product design specification challenge. This understanding of material/component and process interactions should also be able to be applied in interpreting data and making adjustments to materials/components and process to achieve the desired outcomes.</p>
Language, literacy and numeracy requirements:	This unit requires high levels of numeracy and literacy with the ability to write and interpret technical specifications and reports. Advanced numeracy allowing the calculation and interpretation of statistics, product formulae and process conditions is also required.
In what context should assessment occur?	<p>Competence in this unit may be assessed:</p> <ul style="list-style-type: none"> • by observation of an actual product development project where the assessee takes a lead technical role • by use of a suitable product development project where arrangements are made to also assess the implementation aspects. <p>The development must be of a product which is new to the organisation and not just a modification of an existing product. It is possible that a major redesign of an existing product may encompass all the aspects of a new product design to an</p>

EVIDENCE GUIDE	
	<p>appropriate breadth and depth. Where the only available product design projects are the major redesign of an existing project, normally several such projects will be required to match the breadth and depth of skills which can be demonstrated by the development of a totally new product.</p> <p>In all cases it is expected that practical assessment will be supported by targeted questioning to assess the underpinning knowledge and theoretical assessment will be supported by appropriate practical/simulation or similar assessment.</p>
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed with other relevant units.
What method of assessment should apply?	<p>Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment.</p> <p>Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit.</p> <p>The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace.</p> <p>The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.</p>
What evidence is required for demonstration of consistent performance?	Evidence from one major product design or a number of product improvements should be available.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for

RANGE STATEMENT

different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Processes and policies	<p>This competency unit is for the design of a new product 'from scratch'. It assumes an understanding of the operation of all relevant equipment and processes but does not necessarily require them to be used personally.</p> <p>The competency assumes a working knowledge of all main processes and materials so that an informed choice can be made between them.</p> <p>All operations are performed in accordance with standard procedures and policies.</p>
Tools and equipment include	<ul style="list-style-type: none"> • understanding of use of all standard processing equipment • relevant personal protective equipment.
Typical regulatory requirements include:	<ul style="list-style-type: none"> • Occupational Health and Safety (OHS) • environmental regulations • structural codes • product/industry specific requirements.
Typical problems include:	<ul style="list-style-type: none"> • defining product end use requirements in terms meaningful to the product design and manufacture • matching suitable materials and processes to the product needs and company expertise and facilities • matching (and improving) process capability to product tolerances.
Relevant factors may include:	<ul style="list-style-type: none"> • type of material • dimensional precision of product • length of run/number of products • required aesthetics • size and complexity of product • available capital funding • process equipment available • HSE.

Functional area

Functional Area	
-----------------	--

MSAPMOPS404A Co-ordinate maintenance

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit applies to employees who coordinate maintenance of a manufacturing facility. It applies to all sectors of the industry.

This competency is typically performed by experienced technicians, supervisors, maintenance coordinators or team leaders, working either independently or as part of a team.

Application of the Unit

Application of this unit

This competency applies to supervisors and technicians who are required to apply knowledge of equipment operating principles, service requirements and workplace production operations to the coordination of maintenance activities. The key factors are the coordination of maintenance activities to meet the objectives of restoring the plant/equipment condition, consistent with production requirements.

The technician will:

- identify and plan maintenance work consistent with production requirements
- interpret data and information on equipment
- develop and monitor workplans for the maintenance activities
- organise materials, consumables and personnel to meet the maintenance objectives
- check tools, equipment, materials and output for conformity to job requirements
- complete logs and reports.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the evidence guide.
1. Plan maintenance.	1.1 Develop work plans for scheduled routine maintenance activities. 1.2 Develop maintenance plans for unscheduled maintenance activities. 1.3 Source maintenance providers (internal/external). 1.4 Develop costings for maintenance work. 1.5 Implement measures to control identified hazards in line with procedures and duty of care. 1.6 Document and record required production interruptions, processes and procedures. 1.7 Obtain clearances for the maintenance work.
2. Organise maintenance.	2.1 Schedule maintenance activities, with reference to production requirements and availability of resources. 2.2 Review available maintenance expertise and arrange appropriate training and assessment where necessary.

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the evidence guide.
	2.3 Obtain approvals for maintenance schedule as necessary to coordinate with production requirements.
3. Assemble maintenance requirements.	3.1 Determine resources required (equipment, personnel and consumables) to meet maintenance schedule. 3.2 Locate and coordinate supply of consumables, equipment and expertise to meet maintenance schedule. 3.3 Purchase equipment, consumables and expertise as required.
4. Complete maintenance.	4.1 Complete maintenance schedule. 4.2 Make appropriate readings, measurements and recordings and compare to equipment, product and other relevant specifications. 4.3 Identify areas requiring further testing and recommend appropriate procedures to supervisory staff. 4.4 Make appropriate adjustments to the maintenance schedule. 4.5 Complete records as required, noting areas where changes to equipment operation or routine maintenance are required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Application of knowledge and understanding of equipment operation, planning and maintenance practices sufficient to plan for maintenance requirements in standard and non-standard situations and then determine appropriate action which is consistent with operation guidelines is required.

Knowledge of the enterprise's procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards.

Application of the knowledge of managing risks using the hierarchy of controls applied to the process. Application of approved hazard control, safety procedures and the use of PPE in relation to handling materials, equipment operation and clean up.

Knowledge as a basis for solving processing and material problems, including:

- characteristics and capabilities of equipment, materials and processes used
- functions and troubleshooting of internal components and their problems
- routine and non-routine causes of equipment failures and the service conditions which may increase maintenance
- urgency and timeliness factors in planning maintenance activities in relation to production requirements
- proactive, predictive, preventative and reactive maintenance principles
- implications of maintenance for production and work activities
- source requirements for maintenance
- safety procedures and the use of PPE in relation to handling materials, equipment operation and cleanup
- the hierarchy of control including engineering controls.

Competence also includes the ability to:

- identify factors in production schedules, time and resource requirements (including external sources) in scheduling maintenance activities
- schedule maintenance functions in the most timely and cost effective manner
- apply relevant agreements, codes of practice or other legislative requirements
- ensure workplace is safe for maintenance activities.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical manufacturer specifications, equipment procedures, production schedules and material labels as provided to coordinators.

Writing is required to the level of completing workplace reports and proposals.

Numeracy is also required, eg analysing statistical information/historical data in the form of tables and graphs

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the ability to:

- recognise potential situations requiring action
- implement appropriate action.

Consistent performance should be demonstrated. For example, look to see that:

- early warning signs of equipment in need of attention/with potential problems are recognised
- planned work sequences are logical and conform with production schedules and work rosters
- maintenance schedules for reactive, planned and proactive maintenance are coordinated based upon the most appropriate and cost effective method to ensure equipment reliability and optimum performance
- plans are initiated and monitored, with activities modified for variations in workplace contexts and the environment, until final resolution has occurred.

Assessment method and context

It is preferred that assessment takes place in an industrial work environment.

Competence in this unit may be assessed:

- on a processing plant allowing for operation under all normal and a range of abnormal conditions
- in a situation allowing the generation of evidence of the ability to recognise, anticipate and solve problems
- using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all work environments and sectors within the manufacturing industry. It does not include maintenance which would require trade level skills. It is not intended that this competency would cover performing maintenance which is carried on in a workshop.

This may include:

- predictive and preventative operational maintenance
- proactive maintenance
- reactive maintenance.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

- hand tools specific for the task
- testing equipment
- measuring and aligning equipment
- computer equipment
- relevant personal protective equipment.

Hazards

Typical hazards to be considered, include:

- isolations of energy sources, motive power and process materials
- manual handling of machinery components and the need for lifting devices
- hot, cold or components containing dangerous materials
- external hazards (eg traffic into a maintenance area)

Problems

Respond to/rectify 'non-routine problems' means 'apply known solutions to a variety of predictable problems'.

Typical process and product problems which may require maintenance, include:

- equipment performance outside of specification or requirements
- equipment breakdown
- equipment wear and tear.

Variables

Key variables to be monitored include:

- relationship of maintenance plan to production requirements
- costs of maintenance
- availability of materials and services
- documentation and record keeping.

Data and Records

Typical information sources, observed data and plant records may include:

- plant data
- log sheets
- production schedules
- operational and performance reports
- physical aspects such as noise, smell, feel and pressure
- condition monitoring information
- planned maintenance schedules
- standard operating procedures
- manufacturer instructions, specifications and service manuals
- machine circuit diagrams for hydraulic/pneumatic and electrical/electronic circuits
- plant description manuals.

Unit Sector(s)

Not applicable.

MSAPMSUP390A Use structured problem solving tools

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the solving of process and other problems, beyond those associated directly with the process unit/equipment, using structured process improvement tools to identify improvements and/or solve problems.

Application of the Unit

Application of this unit

The competency is typically performed by an experienced operator, team leader or supervisor.

Generally the person would be part of a team during the solving of complex or systemic problems and would be expected to perform all parts of this unit and at all times would be liaising and cooperating with other members of the team. This includes:

- using a range of formal problem solving techniques
- identifying and clarifying the nature of the problem
- devising the best solution
- evaluating the solution
- developing an implementation plan to rectify the problem.

This unit does not cover the solving of problems undertaken as part of the operator's normal role which is covered in the relevant operation competency unit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify the problem.	1.1 Identify variances from normal operating parameters and product quality. 1.2 Define the extent, cause and nature of the problem by observation and investigation. 1.3 State and specify the problem clearly.
2. Determine fundamental cause of problem.	2.1 Identify possible causes based on experience and the use of problem solving tools/analytical techniques. 2.2 Develop possible cause statements. 2.3 Identify fundamental cause.
3. Determine corrective action.	3.1 Consider all possible options for resolution of the problem. 3.2 Consider strengths and weaknesses of possible options. 3.3 Determine corrective action to remove the problem and possible future causes. 3.4 Develop implementation plans identifying measurable objectives, resource needs and timelines in accordance with safety and operating procedures. 3.5 Develop recommendations for ongoing monitoring

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	and testing.
4. Communicate recommendations.	4.1 Prepare report on recommendations. 4.2 Present recommendations to appropriate personnel. 4.3 Follow up recommendations if required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Competence includes a thorough knowledge and understanding of the process, normal operating parameters, and product quality to recognise non-standard situations.

This unit of competency includes use of analytical techniques in problem solving such as:

- brainstorming
- fishbone diagrams/cause and effect diagrams
- process logic/process requirements
- logic tree
- similarity/difference analysis
- Pareto analysis
- force field/SWOT analysis
- flow charts
- control charts, runcharts and graphs
- scattergrams.

Action plans to solve problems are prepared including:

- priority requirements
- measurable objectives
- resource requirements
- methods for reaching objectives
- timelines
- coordination and feedback requirements
- safety requirements
- risk assessment
- environmental requirements.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical product specifications, job sheets and material labels as provided to operators.

Writing is required to the level of report writing and completing workplace forms.

Basic numeracy is also required, eg to interpret quality data and graphs.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to apply and explain:

- relevant equipment and operational processes
- enterprise policies and procedures
- enterprise goals, targets and measures
- enterprise quality, OHS and environmental requirements
- principles of decision-making strategies and techniques
- enterprise information systems and data collation
- industry codes and standards.

Consistent performance should be demonstrated. For example, look to see that:

- problems are recognised and clarified
- possible causes are identified, based on experience and use of analytical techniques in solving the problem, including:
 - identifying variations
 - identifying cause and effect
 - separating single problems from multiple problems
 - recognising recurring problems.
- fundamental cause of process or equipment faults is determined
- corrective/preventative implementation plans are developed to avoid recurrence of the problem
- implementation plan is presented to relevant personnel.

Assessment method and context

Assessment will occur on the job or in a simulated workplace.

Competence in this unit may be assessed:

- in a situation allowing the generation of evidence of the ability to recognise and respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

The competency unit applies to a wide range of processes and equipment. The process manufacturing technical units of competency include a problem solving element where problems specific to that competency unit are to be resolved. This competency unit is where structured problem solving techniques are to be applied more broadly, or with greater depth/rigour than is implied by the problem solving element of the technical units.

In large plants or manufacturing organisations with multiple processes, it may apply to more than one process if those processes interact with each other. It applies to all operators across all functions.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Hazards

Typical hazards include leaks, spillages and equipment hazards that can occur during the walk-through of a plant.

Problems

'Anticipate and solve problems' means resolve a wide range of routine and non-routine problems, using product and process knowledge to develop solutions to problems which do not have a known solution/a solution recorded in the procedures.

Typical process and product problems may include:

- non-routine process and quality problems
- equipment selection, availability and failure
- teamwork and work allocation problems
- safety and emergency situations and incidents.
-

Unit Sector(s)

Not applicable.

PSPGOV521A Collect statistical data

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the process of developing a data collection plan and then collecting new data. It includes preparing for data collection, defining data requirements, preparing data collection tools for direct collection, conducting data collection using direct collection, conducting data collection from existing source/s and collating and organising information/data.

In practice, collecting statistical data may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, providing client service, working safely, managing a project, undertaking research and analysis, etc.

This is one of 5 units of competency in the *Working in Government Competency Field* that deal with statistics. Related units are:

PSPGOV520A Scope statistical data collection

PSPGOV522A Process statistical data

PSPGOV523A Interrogate and analyse statistical data

PSPGOV524A Interpret data and related statistics

This is a new unit of competency, added to the *Working in Government Competency Field* of the Training Package in 2004

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Prepare for data collection

- 1.1 The project/survey question is studied and where necessary clarified
- 1.2 *Expected data outputs* are defined in accordance with the project scope
- 1.3 Proposed technology is familiarised and customised where necessary
- 1.4 The population for the source of data is confirmed
- 1.5 The survey design (if necessary) is assessed for suitability

2. Define data requirements

- 2.1 The accuracy requirements (precision) of the data to be collected are determined
- 2.2 The requirements of proposed information management system with regard to storage and processing of data are defined
- 2.3 Information requirements are defined and communicated to all staff involved in data collection
- 2.4 *Data sources* are identified and assessed for accessibility and reliability
- 2.5 The type and extent of data required is defined
- 2.6 *Classification standards* are applied to the proposed data

ELEMENT**PERFORMANCE CRITERIA****3. Prepare data collection tools for direct collection**

- 3.1 Data collection methods and techniques are clearly defined relative to data requirements
- 3.2 The optimum method for gathering the proposed data is identified after research of alternatives has occurred
- 3.3 The *survey vehicle*/questionnaire is designed in conjunction with a suitably qualified person
- 3.4 The survey vehicle is tested and evaluated

4. Conduct data collection using direct collection

- 4.1 The proposed *sampling* frame is identified and/or constructed
- 4.2 A sample is selected and a pilot study implemented
- 4.3 Re-evaluation of the proposed survey design is undertaken based on the results of the pilot study
- 4.4 The main survey is conducted according to accepted professional and/or organisational standards
- 4.5 Opportunities are taken to establish and maintain contacts with those who may provide useful information, with due consideration of respondent burden

5. Conduct data collection from existing source/s

- 5.1 Data for the project is sourced
- 5.2 A range of statistics necessary for the project is identified in conjunction with a suitably qualified person
- 5.3 Sources of information are regularly reviewed for usefulness, reliability and cost
- 5.4 Channels and sources of information are used effectively in accordance with organisational standards

6. Collate and organise information/data

- 6.1 Statistics are identified to support the project question
- 6.2 Data is researched and/or collated from sources in accordance with *legislation, policy and guidelines*
- 6.3 Data is collated electronically
- 6.4 The accuracy and appropriateness of data are evaluated
- 6.5 Data is recorded in the desired format in accordance with professional, organisational and project requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to statistical data collection
- deciding which survey method to use
- designing questionnaires
- using a range of communication methods including consultation, establishing and maintaining contacts
- reading information and data requirements
- writing survey questions that are unambiguous and reflect intended meaning
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of statistical data collection

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to statistical data collection
- legislation and policies governing privacy and confidentiality
- the advantages and disadvantages of different data sources
- the differences between census and survey data
- the importance of identifying a good frame
- the quality of the statistics and for what purpose the data can be used
- the limitations of the statistics used
- different data collection methodologies and how they affect results
- data collection and sampling methodologies
- the effects of non-response on survey estimates
- the impact of types of errors
- national and international classification standards
- information management systems
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of statistical data collection

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV503B Coordinate resource allocation and usage

PSPGOV504B Undertake research and analysis

PSPGOV520A Scope statistical data collection

PSPGOV522A Process statistical data

PSPGOV523A Interrogate and analyse statistical data

PSPGOV524A Interpret data and related statistics

PSPLEGN501B Promote compliance with legislation in the public sector

PSPPM502B Manage complex projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- collection of statistical data in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the collection of statistical data
- case studies and workplace scenarios to capture the range of situations likely to be encountered when collecting statistical data

EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when collecting statistical data, including coping with difficulties, irregularities and breakdowns in routine
- collection of statistical data in a range of (3 or more) contexts (or occasions, over time) where contexts may include data collection via both primary and secondary sources.

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Expected data outputs may include

- variable names
- attributes

Data sources may include

- Australian Bureau of Statistics data
- government agency sources

Classification standards may include

- national and international definitions for collating and coding information

Survey vehicle may include

- opinion polls
- mail-out questionnaires
- computer-aided telephone interviewing (CATI)
- face-to-face interviews

Sampling methods may include

- simple random sampling
- systematic sampling
- multi stage sampling

Legislation, policy and guidelines may include

- State/Territory and Commonwealth legislation and regulations such as:
 - public sector management acts
 - financial management acts
 - privacy legislation
 - equal employment opportunity and anti-discrimination legislation
 - occupational health and safety legislation
 - ethics and accountability standards
 - public sector standards
 - risk management standards
 - fraud control standards

RANGE STATEMENT

- government security standards
- knowledge management standards
- organisational policy, procedures and protocols

Unit Sector(s)

Competency field

Competency field Working in Government

PSPGOV602B Establish and maintain strategic networks

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers establishing, expanding and utilising strategic networks. It includes identifying features of required strategic networks, identifying or establishing network links with key stakeholders and building strategic relationships.

In practice, establishing and maintaining strategic networks may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government systems, managing change, managing diversity, etc.

This unit is one of 3 units of competency in the Working in Government Competency Field that deal with networks. Related units are:

PSPGOV303B Build and maintain internal networks

PSPGOV418A Develop internal and external networks

This unit replaces and is equivalent to PSPGOV602A Establish and maintain external networks

Application of the Unit

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify features of required strategic networks	1.1 The strategic value and likely outcomes of participating in <i>networks</i> are identified at an individual and organisational level 1.2 The benefits of existing networks are researched and assessed 1.3 <i>Key stakeholders</i> and their needs, expectations and roles are identified
2. Identify or establish network links with key stakeholders	2.1 Existing network links between key stakeholders are identified, and strategies to maintain or expand them are identified and initiated 2.2 New network links between self and key internal and external stakeholders are established and used effectively 2.3 Strong working relationships are developed and maintained among network members
3. Build strategic relationships	3.1 Effective communication channels are established to exchange strategic information for the mutual benefit of network members 3.2 Interaction and consultation with key stakeholders are used to anticipate developments that may impact on the organisation and require a strategic approach to dealing with them 3.3 Misunderstandings and conflict situations are identified and constructively addressed in accordance with principles of conflict resolution 3.4 Opportunities are sought and acted upon to improve

ELEMENT

PERFORMANCE CRITERIA

communication processes and achieve mutually beneficial outcomes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to public sector environment
- using a range of communication methods with diverse strategic networks including consultation, liaison, negotiation, building influence and reputation, transparency
- using formal and informal industry communication channels
- responding to diversity, including gender and disability
- resolving conflict in a strategic networking context
- applying procedures relating to occupational health and safety and environment in the context of strategic networking

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to work in a public sector environment
- local/national/international public sector structures/protocols
- industry/professional communication channels and networks
- principles of interpersonal, group and inter-agency communication
- principles of conflict resolution in a strategic context
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of strategic networking

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

PSPGOV601B Apply government systems

PSPGOV605A Persuade and influence opinion

PSPLEGN601B Manage compliance with legislation in the public sector

PSPMNGT604B Manage change

PSPMNGT605B Manage diversity

PSPMNGT609B Formulate business strategies

PSPMNGT613A Develop partnering arrangements

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- strategic networks established/maintained in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the public sector environment
- organisational charts
- case studies and workplace scenarios to capture the range of situations likely to be encountered when establishing and maintaining strategic networks

EVIDENCE GUIDE

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when establishing and maintaining strategic networks, including coping with difficulties, irregularities and breakdowns in routine
- strategic networks established/maintained in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the

RANGE STATEMENT

Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

- Networks may include***
- formal or informal networks
 - circulation lists
 - e-networks
 - bulletin boards
 - virtual communities
 - mailing lists
- Key stakeholders may include***
- officers from other government organisations
 - Ministerial advisers
 - community members
 - council members
 - industry representatives
 - professional associations
 - international public sector staff
 - international associations

PSPMNGT604B Manage change

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers the management of planned change (rather than emergent change) that may be caused by restructuring or Machinery of Government changes, change imposed by others, or business unit initiated change. It includes confirming that change is required, determining the likely impact of change, developing a change management strategy, fostering commitment to workplace change, and implementing the change management strategy.

In practice, managing change occurs in the context of other generalist or specialist public sector workplace activities such as managing client service delivery, managing policy implementation, applying government systems, networking etc.

This unit is one of 6 units of competency in the *Working in Government* and *Management Competency* fields that deal with change. Related units are:

PSPGOV205B Participate in workplace change

PSPGOV306B Implement change

PSPGOV405B Provide input to change processes

PSPGOV514A Facilitate change

PSPMNGT703A Lead and influence change

This unit replaces and, for qualification purposes, is equivalent to *PSPMNGT604A Manage change*. The unit no longer includes evaluation of change management strategies. Evaluation is addressed in *PSPMNGT611A Manage evaluations* in the *Management Competency* field of the Training Package.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. **Confirm that change is required**

- 1.1 The requirement for *change* is confirmed through consideration of factors impacting upon the *business unit*, the organisation or within the political environment
- 1.2 Key *stakeholders* are consulted in establishing that change is required/imminent and the nature of the change
- 1.3 Benchmarking is conducted with other similar organisations/functions/best practice standards to confirm the need for change
- 1.4 Specialists and experts are consulted as required to assist in the identification of major change requirements or opportunities
- 1.5 The need for management support, expertise and advice is identified and addressed to maximise the advantages of change management strategies

2. **Determine the likely impact of change**

- 2.1 The proposed change is analysed in relation to organisational structure and function, and business unit strategic objectives
- 2.2 The individuals, groups and others likely to be affected by change are identified and their expectations and concerns are identified

ELEMENT**PERFORMANCE CRITERIA**

- 2.3 The eventual impact of the proposed change on employees and employee relations within the business unit is identified and explained in line with individuals' specific needs and their differing responses to change
- 2.4 Options and specific proposals for change and the consequences are discussed with staff and feedback is invited to ensure that people are involved in the decisions that affect them
- 2.5 Potential risks associated with change are identified and planned for in accordance with the organisation's risk management procedures
- 2.6 The requirements and planned outcomes for change are communicated in accordance with government requirements
- 3. Develop a change management strategy**
- 3.1 Change management strategy and related communication strategies are prepared participatively with key stakeholders
- 3.2 The *strategy* is structured to address the transition from present to future arrangements and identifies tactics for dealing with ambiguity in roles, functions, organisational priorities or structures
- 3.3 Future trends and organisational needs are discussed and considered in the process of developing strategies for dealing with change
- 3.4 Change management activities are designed to comply with the framework provided by relevant *legislation and organisational policy*
- 3.5 Time schedules, performance standards and *interim checkpoints* are devised for change management strategies
- 3.6 Approval to implement the chosen change management strategy is obtained from senior management
- 4. Foster commitment to workplace change**
- 4.1 A range of *strategies* is used to foster a positive attitude to change, especially from the individuals on whom the organisational change will have the most effect
- 4.2 Advice is provided to key stakeholders on strategies for effective change management and sensitivity is shown to people's individual responses to change
- 4.3 Resources required to implement change within the business unit are obtained and used
- 4.4 *Leadership* and communication *strategies* are used to assist others to deal with ambiguity and adapt to change
- 5. Implement a change management strategy**
- 5.1 Policies, practices and procedures are altered and implemented as required to support the change management strategy
- 5.2 *Barriers to change* are identified and addressed in accordance with the organisation's risk management plan

ELEMENT

PERFORMANCE CRITERIA

- 5.3 Priorities are identified, reviewed and renegotiated with key stakeholders in light of changing circumstances
- 5.4 Strategies for embedding the change are activated in accordance with the change management strategy
- 5.5 A system/process and performance indicators are developed to monitor the impact of change
- 5.6 Adjustments to the change management strategy are implemented if necessary as a result of performance monitoring, to ensure change is managed effectively for sustained positive outcomes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- influencing and counselling in the context of change management
- engaging in negotiation and conflict resolution in a change management environment
- monitoring change management strategies
- consulting with stakeholders using a variety of words and language structures to explain complex ideas to different audiences
- interpreting and explaining complex, formal documents and assisting others to apply them in the workplace
- preparing written advice and reports requiring reasoning and precision of expression
- responding to diversity, including gender, disability
- applying public sector legislation such as occupational health and safety and environmental and sustainability requirements in the context of change management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- change management strategies
- effects of change
- industrial relations issues as applicable to change processes
- negotiation processes

REQUIRED SKILLS AND KNOWLEDGE

key factors in the internal and external operating environment
 equal employment opportunity, equity and diversity principles
 understanding of organisational goals, policies and procedures
 jurisdictional legislation applicable to management and human resource management
 functions

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

PSPGOV601B Apply government systems

PSPGOV602B Establish and maintain strategic networks

PSPLEGN601B Manage compliance with legislation in the public sector

PSPPOL603A Manage policy implementation

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

the knowledge requirements of this unit

the skill requirements of this unit

application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)

- change management in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

legislation, procedures and protocols

workplace scenarios and case studies to capture the range of

EVIDENCE GUIDE

situations likely to be encountered when managing change in the public sector

change management strategies applicable to the public sector

tactics for dealing with ambiguity

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing change, including coping with difficulties, irregularities and breakdowns in routine
- management of change in a range of (2 or more) contexts (or occasions, over time)
- a variety of contexts that reflect the continuum of change management, from dealing with concrete change requirements to managing ambiguity and uncertainty

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

people with disabilities

people from culturally and linguistically diverse backgrounds

Aboriginal and Torres Strait Islander people

women

young people

older people

people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

case studies

portfolios

projects

questioning

scenarios

authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Change may occur

- in response to government policy or Ministerial direction
- in response to Machinery of Government changes
- through organisational development or design strategies created by senior management
- through business unit level initiatives
- in response to technology changes

Business unit may refer to

- a program
- sub-program
- cost centre
- area
- division
- branch
- production unit or section located within the organisation

Stakeholders may include

- all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's behaviour, actions, products and services such as:
- employees at all levels of the organisation
- community
- clients
- other public sector organisations
- union and association representatives
- boards of management
- government
- Ministers
- human resources specialists

<i>Change management strategy may include</i>	risk management plan communication strategy timeframes milestones performance indicators
<i>Legislation and organisational policy may include</i>	Commonwealth and State/Territory legislation including equal employment opportunity and anti-discrimination law national and international codes of practice and standards environmental/sustainability practices the organisation's policies and practices government policy codes of conduct Machinery of Government changes
<i>Interim checkpoints are</i>	points throughout the change implementation where the success of change management is assessed and change management plans are altered in response
<i>Strategies to foster commitment to change may include</i>	nurturing mutually beneficial and trusting relationships with stakeholders team building process consultation action learning/research staff development and training guiding coalition using specialist expertise to support/facilitate an environment supportive of change organisational communication processes/mechanisms
<i>Leadership strategies may include</i>	offering guidance and direction mentoring coaching positive role modelling provision of training and support

Change management strategy may include

risk management plan
communication strategy
timeframes
milestones
performance indicators

Barriers to change may include

- individual misunderstanding the purpose of the changes
- failure to see the need
- fear of the unknown
- fear of loss of status, security, power, friends
- lack of identification with the change
- lack of involvement in the change
- vested interests
- challenge to group norms/established roles
- conflict between personal/organisational objectives
- existing reward systems may support status quo
- interdepartmental rivalry/conflict
- threat to balance of power
- tired of change
- existing organisational culture
- change strategies poorly chosen
- history of failed change projects
- inappropriate organisational structure

Competency field

Competency field Management

PSPMNGT703A Lead and influence change

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers organisational leadership in change management through influencing and shaping an organisational culture that is receptive to and embraces the opportunities from change. This requires flexible organisational structures and processes in place to support clients and staff to maximise the strategic advantages of a change for the organisation. The unit includes influencing organisational culture, anticipating change and providing strategic leadership in change management.

In practice, leading change occurs in the context of other strategic activities such as providing strategic direction, influencing diversity, providing leadership in human resources management, etc.

The unit is one of 6 units of competency in the *Working in Government* and *Management* Competency fields that deal with change. Related units of competency are:

PSPGOV205B Participate in workplace change

PSPGOV306B Implement change

PSPGOV405B Provide input to change processes

PSPGOV514A Facilitate change

PSPMNGT604B Manage change

This is a new unit of competency, added to the *Management* Competency field of the Training Package in 2004.

Application of the Unit

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Influence organisational culture

- 1.1 A strategic review of organisational culture is undertaken to establish existing attitudes to change and identify key issues for action
- 1.2 The *strategic advantages* of ongoing change for individuals, groups and the organisation are identified, supported and actively promoted to *foster commitment* to workplace change
- 1.3 The acceptance of new ideas and management methods, and challenges to existing practices and structures are embedded in managerial practice and decision making to develop an organisational culture that seeks and thrives on change for continuous improvement and business flexibility
- 1.4 Change management activities and related performance indicators for managers are embedded in organisational strategies, policies and plans as an ongoing requirement rather than added/transitory elements
- 1.5 Staff with a range of attributes that are reflective of a *diverse workforce* are recruited, developed and deployed to maximise

ELEMENT**PERFORMANCE CRITERIA**

- the organisation's strategic advantage in dealing with change
- 1.6 Learning and development opportunities for managing change are embedded in induction and professional development for staff to support the development of a culture that embraces change
- 2. Anticipate change**
- 2.1 The likelihood of significant *change* for the organisation is identified through strategic networking and ongoing consideration of factors impacting upon the community, the public sector, the organisation or within the political environment
- 2.2 Key *stakeholders* are consulted in identifying external drivers for change, and likely change is analysed in relation to its potential effect on organisational purpose, functions, structure, strategic objectives and the people in the organisation
- 2.3 Early planning is undertaken with managers, human resource personnel and staff to ensure maximum lead time, support for those likely to be affected by change and to allow thoughtful, proactive responses to be generated to optimise outcomes for the organisation
- 2.4 *Resourcing* challenges of both implementing and sustaining change are anticipated and planned for in accordance with organisational *policies*, procedures guidelines and *legislative requirements*
- 3. Provide strategic leadership in change management**
- 3.1 Strategic priorities are formulated in consultation with key stakeholders in the organisation and the community, and set out a vision for the future that provides challenging but realistic objectives to address change and maximise outcomes
- 3.2 Current best practice information on change management is accessed and used to ensure change is managed effectively for sustained positive outcomes for the organisation and its people
- 3.3 *Leadership strategies* are used to assist others to deal with ambiguity and to be creative and innovative in their approaches to dealing with change
- 3.4 Strategies are designed to address the transition from present to future arrangements and provide guidance for dealing with ambiguity in roles, functions, organisational priorities or structures
- 3.5 Organisational culture, business outcomes and client feedback are monitored and positive achievements identified and celebrated in accordance with organisational policy

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

influencing and leading in the context of change management

consulting with stakeholders using a variety of words and language structures to explain complex ideas to different audiences

interpreting and explaining complex, formal documents and assisting others to apply them in the workplace

responding to diversity, including gender and disability

applying public sector legislation such as occupational health and safety and environment and sustainability in the context of change management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

change management models

change management leadership strategies

effects of change and ways to ensure strategic advantage

the importance of organisational culture and influencing down

key factors in the internal and external operating environment

equal employment opportunity, equity and diversity principles

organisational goals, policies, procedures and guidelines

jurisdictional legislation applicable to management and human resource management functions

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to

EVIDENCE GUIDE

increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC701A Lead and influence ethical practice in the public sector

PSPHR703A Provide leadership in strategic human resource management

PSPMNGT701B Provide strategic direction

PSPMNGT702A Influence and shape diversity management

PSPMNGT704A Undertake enterprise risk management

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

the knowledge requirements of this unit

the skill requirements of this unit

application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)

- leadership in and influence on change management in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

legislation, procedures and protocols

workplace scenarios and case studies to capture the range of situations likely to be encountered when leading and influencing change

strategies to influence organisational culture

change management strategies applicable to the public sector

leadership strategies for dealing with ambiguity

reporting tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when leading and influencing change, including coping with difficulties, irregularities and breakdowns in routine
- leadership in and influence on change management in a range of (2 or more) contexts (or occasions, over time)
- leadership in a variety of contexts that reflect the continuum of change management requirements from dealing with concrete change requirements to managing ambiguity and uncertainty

EVIDENCE GUIDE

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

people with disabilities

people from culturally and linguistically diverse backgrounds

Aboriginal and Torres Strait Islander people

women

young people

older people

people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

case studies

demonstration

observation

portfolios

projects

questioning

scenarios

simulation or role plays

authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

RANGE STATEMENT

<i>Strategic advantages of change may include</i>	more responsive and valued client service flexible, innovative, creative staff greater capacity for flexibility and responsiveness economic benefits social benefits improved relationship with the community increased organisational capability organisational sustainability improved sustainability improved performance motivation reduced cost of outputs
<i>Strategies to foster commitment to change may include</i>	team building process consultation action learning/research staff learning and development leadership and direction
<i>Diverse workforce refers to employees with differences in</i>	age cultural background educational level ethnicity expertise family responsibilities gender interests interpersonal approach language life experience marital status not fitting the dominant paradigm of the organisation personality

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Interpret and communicate requirements of policy

- 1.1 The expected outcomes of policy implementation are identified and explained to staff in a manner suited to their levels of understanding, experience and *specific needs*
- 1.2 *Policy* is interpreted relative to workplace responsibilities and accountabilities
- 1.3 The impact on *work activities* of policy implementation is communicated to staff
- 1.4 Staff are assisted with the interpretation of policy and its application to their work
- 1.5 Policy and its implications are explained to other stakeholders using language and materials to suit their current level of knowledge, experience and specific needs

2. Implement policy

- 2.1 Potential or impending policy changes are identified and strategies are prepared to accommodate and communicate those changes
- 2.2 Work plans are prepared in consultation with staff and management to ensure that policy is implemented as intended
- 2.3 Staff performance is monitored to ensure that it complies with policy and corrective action is taken as necessary
- 2.4 Staff are assisted in adjusting to changes in accordance with their needs and experience

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

REQUIRED SKILLS AND KNOWLEDGE

Look for evidence that confirms skills in:

interpreting complex and formal documents such as policy and legislation, and assisting others to apply them in the workplace
 using communication to suit different audiences
 responding to diversity, including gender and disability
 accessing legislation and codes of ethics electronically or in hard copy
 preparing work plans requiring attention to detail and the interpretation and application of complex language and/or concepts
 providing leadership to the workgroup in the interpretation and implementation of policy
 identifying and addressing the environmental and occupational health and safety implications of the policy/s to be implemented

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

range and type of policies relating to the public sector
 public sector code/s of ethics and code/s of conduct
 organisation and government procedures
 equal employment opportunity, equity and diversity principles
 environmental and occupational health and safety implications of policy/s being implemented

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre -requisite* units that must be achieved prior to this unit: *Nil*
- *Co -requisite* units that must be assessed with this unit: *Nil*
- *Co -assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPMNGT604B Manage change

PSPMNGT605B Manage diversity

PSPMNGT606B Manage quality client service

EVIDENCE GUIDE

PSPMNGT608B Manage risk

PSPOHS602A Manage workplace safety

PSPPROC602B Direct the management of contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of policy implementation in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- relevant policy and legislation
- public sector standards, procedures and protocols
- policy guidelines

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing the implementation of policy, including coping with difficulties, irregularities and breakdowns in routine
- management of policy implementation in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects

EVIDENCE GUIDE

- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Specific needs may include

- educational level
- preferred language
- literacy or numeracy
- cultural background
- ethnicity
- gender
- preferred interpersonal approach
- physical ability
- thinking/learning styles
- work experience
- working styles

Policy may include

- government policy
- organisation policy

Work activities may include

- processes
- outcomes
- priorities
- client services
- core business
- service delivery mode/s
- organisational structure

Unit Descriptor

Unit descriptor

This unit covers the requirements to manage and lead inspection and monitoring activities in accordance with relevant Acts and regulations.

Typically work is at an experienced, self-directed level with responsibility for outputs and quality improvement. It includes determining inspection and monitoring program requirements, managing and leading inspection and monitoring programs, and managing reporting systems, information and training.

In practice, managing and leading inspection and monitoring programs may overlap with other generalist or specialist public sector workplace activities such as managing compliance with legislation, managing diversity, managing risk, networking, implementing policy, managing client service, managing resources, etc.

This unit is one of five units in the *Regulatory Competency* field that deal with inspection and monitoring. Related units are:

PSPREG201A Carry out inspections and monitoring under guidance

PSPREG301A Undertake routine inspections and monitoring

PSPREG413A Undertake inspections and monitoring

PSPREG503A Supervise and carry out complex inspection

This is a new unit of competency, added to the *Regulatory Competency* field of the Training Package in 2004.

Application of the Unit

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Determine inspection and monitoring program requirements

- 1.1 Outputs and performance indicators for programs, and *inspection and monitoring* responsibilities are determined in accordance with organisational requirements
- 1.2 Strategic, operational, technical, financial and administrative requirements are determined in accordance with organisational and task requirements
- 1.3 Operational and procedural assessments are undertaken in accordance with organisational policy and procedures and recommendations are made for quality improvement
- 1.4 *Legislation* and regulations are interpreted and recommendations are made on related policies and procedures
- 1.5 Risk management practices, occupational health and safety and environmental requirements are interpreted and explained to staff in accordance with their needs

2. Manage and lead inspection and monitoring programs

- 2.1 Leadership is provided and *individuals* are assisted to deliver agreed outputs in accordance with the organisation's business requirements
- 2.2 *Inspection and monitoring* programs are managed and program

ELEMENT**PERFORMANCE CRITERIA**

3. Manage reporting systems, information and training	<p>performance, resources and expenditure are supervised in accordance with organisational requirements</p> <p>2.3 Policy and procedures are developed for dealing with non-compliance through information, development/extension activities and prosecution in accordance with organisational requirements</p> <p>2.4 <i>Compliance programs</i> are managed as required in accordance with set procedures and timelines</p> <p>2.5 Implementation of the performance management system for inspection/monitoring staff is managed in accordance with organisational policies and procedures</p> <p>2.6 Legislative requirements, risk management practices, occupational health and safety and environmental procedures are enforced in accordance with organisational requirements</p> <p>3.1 <i>Records</i> management and reporting systems are managed in accordance with organisational policy and performance indicators</p> <p>3.2 <i>High-level correspondence and advice</i>, submissions and reports are prepared in accordance with organisational requirements</p> <p>3.3 Evidence is prepared in accordance with organisational policy and procedures for legal action under relevant legislation</p> <p>3.4 Inspection/monitoring training is monitored and initiatives to improve staff performance are developed and implemented in accordance with organisational requirements</p>
---	---

Required Skills and Knowledge**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- demonstrating leadership and performance management in the context of inspection and monitoring
- undertaking risk management and problem solving
- communicating with a diverse range of clients and staff
- responding to diversity, including gender and disability
- writing reports, submissions and Ministerial correspondence, requiring discretion and judgment to determine content and style audience approach

REQUIRED SKILLS AND KNOWLEDGE

- dealing with referrals from other staff on matters that are more difficult, or of potential interest to external parties such as the media, public, political parties etc
- using computers for word processing and records management
- applying public sector legislation such as occupational health and safety and environment in the context of inspection and monitoring

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- interpretation, application, evaluation and review of enabling legislation and regulations
- performance and procedural assessment strategies
- performance indicators
- organisational policy and procedures
- inspection procedures
- monitoring procedures
- responses to complex/serious non-compliance
- elements of an offence
- rules of evidence
- equity and diversity principles
- workplace and industry environment
- public sector legislation including occupational health and safety, environment, privacy etc

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

PSPLEGN601B Manage compliance with legislation in the public sector

EVIDENCE GUIDE

PSPGOV602B Establish and maintain strategic networks

PSPMNGT602B Manage resources

PSPMNGT605B Manage diversity

PSPMNGT606B Manage quality client service

PSPMNGT608B Manage risk

PSPPOL603A Manage policy implementation

PSPREG601B Manage regulatory compliance

PSPREG602B Evaluate regulatory compliance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- performance at an experienced, self-directed level in managing and leading inspection and monitoring programs undertaken in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to inspection and monitoring
- case studies and workplace scenarios to capture the range of situations likely to be encountered when managing and leading inspection and monitoring programs

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing and leading inspection and monitoring programs, including coping with difficulties, irregularities and breakdowns in routine
- performance at an experienced, self-directed level in managing and leading inspection and monitoring programs undertaken in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women

EVIDENCE GUIDE

- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

RANGE STATEMENT

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

Inspection and monitoring may include

- inspections/examinations
- monitoring
- surveillance
- audits
- remote monitoring
- other compliance assurance activities

Legislation may include

- Commonwealth legislation and regulations, for example:
- Commonwealth Quarantine Act 1908, proclamations and regulations
- Crimes Act 1914 and Criminal Code Act 1995
- Customs Act 1901 and regulations
- Wildlife Protection Act 1982
- Export Control Act 1982

RANGE STATEMENT

- Imported Foods Act 1996
- Occupational Health and Safety Act 1988
- State, Territory and Local Government legislation and regulations, such as those relating to:
 - agriculture
 - horticulture
 - conservation and land management
 - fisheries
 - environmental protection
 - building
 - water
 - emergencies
 - international legislation/codes of behaviour

Individuals may include

- inspection/monitoring staff
- other supervised staff
- contract workers
- consultants
- service providers
- super-ordinates
- clients
- members of the industry
- members of the public
- personnel from other government departments

Inspection and monitoring activities may relate to

- aircraft
- airfreight
- animal products
- animals
- cargo
- cereals
- collection of biological specimens
- disposal of organic waste
- fresh produce
- goods
- land condition, such as:
 - topography
 - salinity
 - erosion
 - weed infestation
 - vermin infestation
- fire hazard

RANGE STATEMENT

- over grazing
 - land improvements, such as:
 - fences
 - buildings
 - sporting or playground equipment
 - irrigation infrastructure
 - sewerage infrastructure
 - waterfront occupations
 - community structures
 - land usage
 - leases and other tenures, to ensure compliance with conditions
 - licence/permit compliance (eg vegetation clearing)
 - live fish
 - livestock
 - mail
 - mineral samples
 - passenger baggage
 - people
 - pests
 - plant products
 - plants
 - premises
 - properties
 - reserves and their use/s
 - survey activities to maintain readiness for district emergency plans
 - vector monitoring
 - vessels
- Compliance programs may include*
- audit
 - monitoring
 - treatment
 - containment
 - control
 - eradication
 - destruction
- Records may include*
- notes
 - case files
 - statistics
 - forms (application forms, disease notification forms)
 - notices (seizure notice, infringement notice)

RANGE STATEMENT

*High-level
correspondence and
advice may include*

- invoices
- receipts
- input to policy reviews
- input to legislation/regulations
- support to senior management
- Ministerials

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Determine media requirements

- 1.1 ***Organisational protocols*** are followed when ***liaising with the media***
- 1.2 The media's potential interest is assessed and arrangements are made to meet needs where appropriate
- 1.3 ***Operational responsibilities*** are balanced against the provision of information to the ***media***

2. Provide information to the media

- 2.1 A positive image of the ***organisation*** is maintained when liaising with the media
- 2.2 Every opportunity is used to promote the organisation, its services and personnel
- 2.3 ***Relevant and succinct information*** is supplied to media when operational responsibilities are under control and when organisational representative is available to talk to the media

3. Publicise an event

- 3.1 Relationship is established with media contacts
- 3.2 ***Event*** details and support materials are gathered and presented in a logical, relevant and concise manner to the media
- 3.3 Information provided to media is recorded and maintained

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- attention to detail
- communicating facts in a fluent, clear and interesting manner
- empathy with victims and operational personnel
- liaison with media and other organisation personnel
- media presentation
- prioritisation between operational responsibilities and provision of information to media
- public speaking
- retaining professionalism under duress

Required Knowledge

- organisational protocols relating to media liaison (for example legal and organisation requirements relating to:
 - confidentiality
 - libel
 - accuracy
 - discrimination)
- role of media in disseminating information
- requirements of media to present information in a newsworthy/informative manner
- requirements of different media:
 - newspapers
 - magazines
 - radio
 - television (local, regional, national media)
- communication skills
- establishing media relationship

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in providing information to media whilst managing operational responsibilities

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment

Specific resources for assessment

No special requirements

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisation may include

Fire
Police
State Emergency Service
Emergency Management

Organisational protocols may include

organisational policies and procedures
personal presentation being as neat as possible considering the operational circumstances
ensuring media liaison person is fully briefed and prepared
acknowledge support of other organisations

RANGE STATEMENT

	<ul style="list-style-type: none"> seeking advice from headquarters where appropriate limiting comments on role of own service relevant Federal and State legislation and regulations
Liaising with the media may include	<ul style="list-style-type: none"> print (local, community, daily newspapers, magazines) television (live or pre-recorded) radio (live or pre-recorded)
Operational responsibilities may include	<ul style="list-style-type: none"> preservation of life and property, which is the principal concern to all public safety personnel presenting information relevant to the public
Event may include	<ul style="list-style-type: none"> long service to organisation medal presentation awarding of certificates donations/sponsorships/fundraising recruiting new equipment VIP visit open day training unusual rescues self help information
Media's potential interest may include	<ul style="list-style-type: none"> enormous media event standard report human interest in the public's interest
Media's requirements may include	<ul style="list-style-type: none"> deadlines capabilities visual and verbal requirements types of medium variation journalists amenities

RANGE STATEMENT

	briefing area
	access to media liaison person
	bilingual personnel and bilingual information
Media may include	representatives from mainstream, community and ethnic television
	print and broadcast media
Organisational positive image may include	promote the relevance and efficiency of the service
	report the facts
	heroism of personnel
	organisational personnel are co-operative and responsive
	organisational personnel well presented
	handling media in most positive manner in even the most adverse conditions/circumstances
Media opportunity may include	opportunity to promote the services
	provide educational information to the public
	airplay
Relevant and succinct information may include	information that according to protocol is available for public release
	report facts and avoid speculation
	do not supply classified information
	use language that can be readily understood by all to avoid misinterpretation

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. **Identify workplace hazards and risks and advise others**

- 1.1 Procedures and practices are followed to identify workplace *hazards* and risks
- 1.2 Appropriate procedures for dealing with hazards in the workplace are followed in accordance with Occupational Health and Safety (OH&S) guidelines and the organisation's procedures
- 1.3 *Contact* is maintained at all times with other crew members and supervisor
- 1.4 Hazards in the work area and warnings of hazardous situations are recognised and reported to designated personnel
- 1.5 Stressful situations are recognised and support is sought or given to minimise effect

2. **Implement hazard control procedures**

- 2.1 *Personal protective clothing and equipment* is selected and donned in accordance with the organisation's procedures and within its limitations
- 2.2 Appropriate procedures and work instructions for controlling risks and hazards are followed
- 2.3 Personal health is protected in accordance with legislative and organisation's procedures
- 2.4 Equipment appropriate to dealing with a hazard is used in accordance with standard operating procedures

ELEMENT	PERFORMANCE CRITERIA
3. Review effectiveness of hazard control procedures	<p>2.5 Controls are implemented to minimise damage to the environment</p> <p>2.6 Fluid and food intake and rest breaks are maintained in accordance with environmental and working conditions and the organisation's policy</p> <p>2.7 Assistance is given to crew members in danger while maintaining personal safety in accordance with the organisation's procedures</p> <p>3.1 Hazard controls are monitored to ensure continued effectiveness</p> <p>3.2 Changes in incident behaviour and conditions are reported immediately to supervisor</p> <p>3.3 Factors which may create or increase <i>risk</i> to life, property or the environment are identified, reported and controlled in so far as possible</p>
4. Participate in the implementation of OH&S in the workplace	<p>4.1 OH&S issues are raised with designated personnel in accordance with procedures and OH&S legislation</p> <p>4.2 Contributions to OH&S implementation in the workplace are made within organisation's procedures and scope of responsibilities and competencies</p> <p>4.3 Activities/debriefings are undertaken which <i>alleviate occupational stress</i></p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

identification of typical hazards in the workplace

use of protective clothing and equipment

Required Knowledge

Health and fitness requirements such as diet and nutrition, exercise, impact of smoking, alcohol and drugs on the body

REQUIRED SKILLS AND KNOWLEDGE

Occupational hazards encountered in the workplace such as structural collapse, electricity, chemicals, dust, wildfires, extreme temperatures, biological, radiation, hazardous atmospheres, flammable and combustible liquids and gases and manual handling

Personal protection such as clothing and equipment requirements, survival in life threatening situations and health hazards

Signs of occupational stress, limiting stress, dealing with stress and seeking assistance

Signs of fatigue and dealing with fatigue

Methods of hazard control and reporting in accordance with the organisation's procedures

Procedures for participating in OH&S arrangements

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in:

correct identification of hazards in the workplace
 application of the organisation's procedures including the correct selection and use of PPE
 advising and reporting of workplace hazards in accordance with the organisation's requirements
 notification of risk to the team and supervisor in a timely manner

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

A combination of oral or written presentations, observations, on the job and/or in a range of simulated environments

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

<p>Workplaces may include</p>	<p>locations where activities and operations may occur such as structures, open spaces, water, public and private property, (including crown land), mobile property, confined spaces</p>
<p>Activities to alleviate occupational stress include</p>	<p>avoidance</p> <p>limiting exposure</p> <p>withdrawal</p> <p>defusion/debriefing</p> <p>counselling services</p> <p>referral to medical services or relevant government agencies</p>
<p>Hazards must include those associated with</p>	<p>urban, rural and aircraft fires</p> <p>training and simulation activities</p> <p>hazardous materials</p> <p>electricity</p>
<p>and may also include</p>	<p>prescribed burning activities</p> <p>vehicle and industrial rescue/extrication</p> <p>flood, storm and tempest rescues</p> <p>travelling in vehicles and</p>

RANGE STATEMENT**The nature of the hazard must include**

travelling in aircraft

Incident

chemical spills such as those involving dangerous goods; vapours/poisonous gases/smoke; contaminated fire water; explosions/flammability; radioactivity; environmental

contamination of air/land/water, appliances and equipment

Biological

biological such as infections, bites, stings, radiation

Personal

heat stress; dehydration

psychological such as critical incident stress; shock, drownings

Environmental

fire and explosions; falling objects (trees, masonry, rocks etc.); subsidence; water load; structural collapse, radiant heat

entrapment by fire in a vehicle or on foot

chemical types

heavy machinery

confined space/structure

and may also include

aerial retardant drops

broken terrain

Risk control measures must include

use of clothing and equipment to provide protection

eye, sight, hearing protection

appropriate training

barriers

vehicle protection hoses and devices

survival techniques

life support equipment/features

and may also include

spill clean up kits

electrically insulated tools and equipment

RANGE STATEMENT

	<p>fire blankets/roll over protection</p> <p>goggles, face shield, hearing protection and chainsaw chaps</p> <p>adequate food, fluid and other welfare needs during extended operations</p>
Personal protective clothing and equipment must include	<p>Turnout uniform and gloves</p> <p>respiratory protection</p> <p>eye protection</p>
and may also include	<p>face shield</p> <p>chemical protective clothing</p> <p>personal lines</p> <p>personal distress units</p> <p>personal accessories kit</p> <p>chainsaw chaps</p>
Life support equipment/features may include	<p>radiation shielding</p> <p>vehicle cabins with/without sprays</p> <p>low water level indicators</p> <p>protective vests</p> <p>fire blankets</p> <p>first aid kit</p>
Factors which must require evaluation and review include	<p>available resources</p> <p>traffic and spectators</p> <p>wind strength/direction</p> <p>temperature and relative humidity</p> <p>fire development/behaviour</p> <p>structural and equipment integrity</p> <p>water supply/pressure</p> <p>vegetation type</p> <p>topographical features including slope, terrain and aspect</p>
Contact with crew members and supervisors must	<p>visual</p> <p>touch</p>

RANGE STATEMENT

include	radio verbal
and may also may include	electronic and written
Designated personnel must include	other crew members/supervisors/OH&S representatives

PERFORMANCE CRITERIA

1. **Prepare to respond to fire**

1.1 The location of fire and the most effective route to the fire are obtained taking into account local conditions

1.2 ***Protective clothing*** and ***equipment***, food and fluid requirements are identified and relevant preparations undertaken prior to departure

2. **Proceed to fire**

2.1 The location of the fire is confirmed on approach

2.2 Access to the area is gained with minimum injury to personnel or damage to vehicles, equipment or the environment

2.3 Evidence of fire cause is noted and brought to the attention of the supervisor

3. **Obtain and use extinguishing media and equipment**

3.1 Nominated media and equipment are located and obtained

3.2 Equipment is used to deliver the nominated media in accordance with the organisation's and manufacturer's procedures

4. **Combat wildfire**

4.1 Instructions are received, confirmed and implemented in accordance with the organisation's safe work practices and procedures

4.2 Equipment and ***extinguishing media*** used are appropriate to wildfire conditions

4.3 Control lines are prepared in accordance with the

ELEMENT**PERFORMANCE CRITERIA**

<p>5. Observe and react to wildfire and weather conditions</p>	<p>organisation's procedures</p> <p>4.4 Equipment is positioned, made ready for use and protected from damage in accordance with the organisation's procedures</p> <p>4.5 Fire is attacked taking into account <i>wildfire hazards</i> as directed and in accordance with the organisation's procedures</p> <p>4.6 Evidence of fire cause and area of fire origin are protected</p> <p>4.7 Communication is maintained at all times in accordance with the organisation's procedures</p> <p>5.1 Conditions at the fire are observed and their effect on fire behaviour and development are noted and reported to supervisor</p> <p>5.2 <i>Weather</i> conditions and changes to fire behaviour are observed and reported to the supervisor</p> <p>5.3 Variations in terrain, <i>fuel</i> types and fuel arrangements are observed and the effect on fire behaviour is reported to the supervisor as required</p> <p>5.4 A safe escape route or refuge is identified and maintained at all times</p> <p>5.5 Communication is maintained with other <i>firefighting</i> personnel and the supervisor throughout operational activities</p>
<p>6. Participate in mop-up and patrol activities</p>	<p>6.1 Mopping-up activities are carried out under direction in accordance with the organisation's procedures</p> <p>6.2 Patrol of the perimeter or sector of the fire is maintained in accordance with the organisation's procedures</p>
<p>7. Assist in ancillary operations</p>	<p>7.1 Activities to complement firefighting operations are carried out as directed and according to the organisation's procedure</p>
<p>8. Recover and store equipment</p>	<p>8.1 Equipment and consumables are recovered as directed</p> <p>8.2 Equipment is stored in accordance with the organisation's procedures</p> <p>8.3 Cleaning and maintenance are carried out in accordance with the organisation's procedures</p>

ELEMENT

PERFORMANCE CRITERIA

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

use of wildfire control tools and equipment
undertaking dry and wet wildfire attack
detection of hot spots, stags, unsecured wildfire perimeter

Required Knowledge

fire behaviour
extinguishing media, water, foam, suppressants
knapsack
operating firefighting equipment
responding to wildfire
wildfire control tactics and techniques
wildfire hazards, safety techniques
fuel load, moisture content of fuel, topography, fireground signals
organisation's operating procedures
effects of wildfire on structures
awareness of health and fitness requirements

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

For this unit it is essential that competence be demonstrated by:

- reacting to changing wildfire behaviour due to changes in weather, topography and fuel conditions
- participating in dry wildfire control
- use of extinguishing media in wildfire control
- maintaining health and safety of self, other workers and people in the immediate work area
- participating in mop-up and patrol
- undertaking operational activities safely

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

A combination of oral or written presentation, observation on the job or in a simulated wildfire (grass, crop, scrub, forest) environment

Specific resources for assessment

- access to controlled or contained fires
- availability of wildfire control equipment

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Types of wildfire must include

ground, surface, crown

RANGE STATEMENT**Types of fuel may include**

grass
 crop
 forest
 heath plantation
 scrub

Fuel features must include

type
 size
 arrangement/distribution
 quantity
 moisture content
 topography
 local fire conditions

Weather factors must include

variations to wind speed and direction
 relative humidity
 temperature
 atmospheric stability

Wildfire extinguishing media must include

water

and may also include

wetting agent
 Class A foam
 fire suppressants (short and long term)
 earth
 retardants

Wildfire extinguishing equipment must include

tanker
 hand tools
 hose and small gear
 pump

and may also include

aircraft
 ropes and lines
 knap sack

RANGE STATEMENT**Types of firefighting strategies must include**

chainsaw
 offensive strategy
 defensive strategy
 flank attack
 combined strategy
 direct attack
 parallel attack
 indirect attack
 combination attack

Wildfire hazards must include

heat related illness
 fatigue
 smoke inhalation
 burns
 sprain or fracture
 snake or insect bite
 falling branches/trees
 manual handling
 trips/falls
 disorientation
 environmental
 lack of visibility
 water bombing operations

Variations in topography must include

elevation
 slope
 aspect
 landscape features

Access may be gained by

vehicle
 aircraft
 boat
 foot

Information about access

radio/phone

RANGE STATEMENT

must be received by	personal contact
and may also include	map reference
Personal protective clothing and equipment must include	turnout uniform and gloves eye protection hearing protection respiratory protection
and may also include	protective hoods accessories as per organisational standards
Ancillary activities may include	provision/transportation of food, water and equipment for an incident working with earth moving equipment such as bulldozer, grader, tractor with blade

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Work safely in the vicinity of aircraft

- 1.1 *Suitable, visible clothing and protective equipment* are used
- 1.2 Appropriate *precautions* and clearances are followed when operating on or near aircraft movement areas
- 1.3 Any approach to an operating *aircraft* is made according to the organisation's procedures, from an angle visible to the pilot or flight crew and with approval of the pilot or flight crew
- 1.4 Adequate clearance is maintained from propellers, rotors and/or turbine engines, exhaust gases and engine intakes
- 1.5 Activities anticipate the typical *manoeuvring patterns* of aircraft
- 1.6 Any instructions or signals from pilots or staff controlling aircraft are complied with
- 1.7 *Site hazards* are identified

2. Facilitate safe ground support

- 2.1 *Appropriate precautions* are observed when positioning vehicles or equipment close to aircraft
- 2.2 Aircraft design features are respected while boarding, loading or handling aircraft
- 2.3 Instructions from pilots, the organisation's staff coordinating aircraft operations, organisation's

ELEMENT**PERFORMANCE CRITERIA**

procedures and placards are followed during ground support operations

- 2.4 Aircraft loading is supervised by the pilot or flight crew member and complies with the appropriate weight, balance and loading system
- 2.5 Areas are designated and separated according to site features and the specific operations being conducted
- 2.6 Fitting of equipment to an aircraft is conducted under the pilot's supervision and with the appropriate regulatory approvals
- 2.7 Aircraft fuels, oils, and supplies are stored and handled according to regulatory requirements and the organisation's procedures
- 2.8 Any suspected defects or hazards to aircraft or equipment are reported to the pilot or other appropriate supervisor
- 2.9 Appropriate aerodrome regulations are complied with

Required Skills and Knowledge**REQUIRED SKILLS AND KNOWLEDGE**

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

Use of specialist aviation support equipment

Required Knowledge

aircraft familiarisation

aerodrome familiarisation

aerodrome working and lighting

aircraft movement characteristics

overview of aircraft performance, operation, loading and refuelling precautions

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in:

compliance with regulatory requirements and the organisation's procedures; identification of hazards, and precautions effected on a consistent, conscious and continuing basis; detailed knowledge of procedures for unusual events

Actions are driven by an overriding concern for safety and quality rather than minimal observance of requirements

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment

Specific resources for assessment

Access to actual or simulated aircraft and aerodrome facilities

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Aircraft may include

aeroplanes

RANGE STATEMENT

	helicopters
	unmanned aerial vehicles
	other airborne vehicles
Suitable visible clothing and protective equipment may include	high visibility overalls/vests
	use of lighting or beacons
	hand, eye, ear and foot protection
Appropriate precautions while manoeuvring may include	fixed wing and helicopter marshalling
	observing aerodrome limits
	ground markings/lighting
	avoidance of obstructions/hazards and navigation aids
	clearances (radio)
	advisory instructions
	light signals
Safety equipment may include	first aid
	fire extinguisher
	ear muffs
	eye goggles
	protective overalls
	protective boots
	respiratory protection
	signalling devices
	head protection
Site hazards may include	wires/powerlines/fences
	live stock
	native fauna
	masts/aerials
	terrain
	weather conditions
	level of visibility
	public
	trees

RANGE STATEMENT

Anticipation of manoeuvring patterns may include	dust circuit procedures take-off, approach and landing characteristics ground manoeuvring capabilities special procedures (eg. at night or in poor weather conditions)
Protection against hazards may include	hand, eye, ears and foot protection
Operational procedures for approaching aircraft may include	maintaining visibility with pilot or flight crew compliance with pilot or flight crew instructions compliance with operational placards
Aircraft controllers may include	pilot flight crew ground support supervisor aircraft coordinating personnel

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. **Receive and report details of wildfire**

- 1.1 Details of the fire's location and development of the fire are received and recorded
- 1.2 Fire details are reported in accordance with the organisation's procedures

2. **Prepare to respond to fire**

- 2.1 The location of and access to the *wildfire* are confirmed and the most effective route is ascertained
- 2.2 Required organisational *equipment*, protective clothing, apparel, food and water required are assessed and procured before departure
- 2.3 The most appropriate method of transport to the wildfire is selected and used

3. **Proceed to fire**

- 3.1 The location of the wildfire is confirmed from observation or by direction while on approach
- 3.2 Access to area is determined and achieved with minimum injury to personnel or damage to vehicles, equipment or environmentally sensitive areas
- 3.3 The safety of people in the wildfire area is assessed and monitored
- 3.4 Evidence of the wildfire cause is noted and brought to the attention of the appropriate authority
- 3.5 *Navigational* tools are used for planning and

ELEMENT**PERFORMANCE CRITERIA****4. Protect people**

operational purposes

- 4.1 As far as conditions allow, the number and location of people in the threatened area is determined
- 4.2 Appropriate evacuation or non-evacuation protocols are identified and applied or advised to persons in the path of a wildfire
- 4.3 **Access** to hazardous locations is controlled
- 4.4 The safe defensibility of property is evaluated and assistance is provided to help occupiers
- 4.5 Advice and support is provided to occupiers in helping them safely defend their property
- 4.6 The safety of people in the threatened area is monitored during the course of the fire
- 4.7 The safety of people in the area is checked and confirmed after the passing of the fire

5. Combat wildfire

- 5.1 **Media** and equipment are selected and used to allow wildfire control operations to be conducted effectively and safely in accordance with the organisation's procedures and OH&S procedures
- 5.2 The most suitable location from which to use equipment to commence wildfire control operations is selected
- 5.3 Access to the selected area of operations is gained in the safest and most effective manner
- 5.4 Fire **hazards** are identified and action taken to minimise the risk of injury to the public, personnel and self
- 5.5 Fire control strategies and tactics are employed to achieve the objectives in accordance with the organisation's procedures
- 5.6 Fire control activities undertaken minimise overall damage and impact on the environment
- 5.7 Potential **fire behaviour** is considered and acted upon to ensure safety and achievement of objective
- 5.8 Fuel, **weather** and **topographical factors** are observed and potential fire behaviour anticipated
- 5.9 The effectiveness of tactics employed is reported to the supervisor
- 5.10 Area of origin and evidence of fire cause is protected and brought to attention of

ELEMENT	PERFORMANCE CRITERIA
6. Conduct mop-up and patrol activities	<p>supervisor or relevant authority</p> <p>5.11 Safe egress and/or refuge from the fire is identified and communicated to personnel</p> <p>6.1 Mop-up and patrol activities are carried out effectively and safely to the distance determined by the Incident Controller</p> <p>6.2 Patrol of the perimeter or sector of the fire is maintained in accordance with the organisation's procedures and guidelines</p>
7. Recover and maintain equipment	<p>7.1 Equipment is made up and made ready for operational use in accordance with the organisation's procedures</p> <p>7.2 Damaged or missing equipment is replaced, recorded and/or reported in accordance with the organisation's procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

wildfire control and suppression; back burning; use of wildfire control tools and equipment

map reading and interpretation

detection of hot spots, stags,

unsecured wildfire perimeter,

mop-up activities

Required Knowledge

Firefighting Protocols

organisation policy; direct, indirect, parallel attack; wet, dry firefighting; backburning (ground, aerial); control lines and firebreaks; defensive firefighting tactics

Fire attack procedures

standard operating procedures; reporting; patrol; mop-up; briefings/instructions;

REQUIRED SKILLS AND KNOWLEDGE

identification of cause

Safety

organisation first-aid requirements; fireground hazards; procedures for dealing with injury; safety near vehicles and machines; briefings; team work

Fuel and its impact on fire behaviour

moisture content, quantity, type, arrangement and distribution, size, drought effects, curing

Fire behaviour

rate of spread, flame height and intensity, spotting, fire development, junction zones

Topography and its impact on fire behaviour

slope, aspect, physical features, turbulence

Weather factors which impact on fire behaviour

wind direction and speed

wind changes

temperature

relative humidity

atmospheric stability

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

For this unit it is essential that competence be demonstrated by:

anticipating and reacting to changing wildfire behaviour

observing and reacting to weather behaviour

undertaking dry wildfire control activity

use of extinguishing media

maintaining health and safety of self, other workers and people in the wildfire area

completing mop-up and patrol

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Types of wildfire must include	ground surface and crown fire
Fuel types may include	grass crop forest plantation heath
Fuel features which will impact on fire development must include	type size arrangement/distribution

RANGE STATEMENT

	quantity
	seasonal effects
	effects of drought
	moisture content
Wildfire extinguishing media must include	water
and may also include	wetting agents
	Class A foam
	fire suppressants (short and long term)/earth retardants
Wildfire extinguishing equipment must include	tanker
	hand tool
	hose and small gear
	pump
and may also include	aircraft
	ropes and lines
	knap sack
	chainsaw
Types of firefighting strategies must include	offensive strategy
	defensive strategy
	combined strategy
	direct attack
	parallel attack
	indirect attack
	flank attack
	combination attack
	reconnaissance
	mop-up
	patrol
Access methods may include by	vehicle
	aircraft

RANGE STATEMENT

	boat
	foot
Topographic factors which may impact on fire development must include	elevation
	slope
	wind turbulence
	local wind effects
	botanical effects
	aspect
Weather factors which may impact on fire development must include	wind direction and speed
	wind changes
	temperature
	relative humidity
	atmospheric stability
	cold fronts
	local effects
	adiabatic winds
	katabatic winds
	sea breezes
	land breezes
Personal protective clothing and equipment must include	turnout uniform and gloves
	eye protection
	hearing protection
	respiratory protection
and may also include	protective hoods
	accessories as per organisational standards
Ancillary activities may include	provision and transport of food, water, fuel and equipment of an incident
	aircraft operations
	working with earthmoving equipment
Navigational aids must include	maps
	compass

RANGE STATEMENT**and may also include**

geographical information systems
 global positioning satellites
 aerial photographs

Wildfire hazards must include

heat-related illness (heat exhaustion and dehydration)
 fatigue
 smoke inhalation
 burns
 sprain or fracture
 trips/falls
 snake or insect bite
 lack of visibility
 falling branches and trees
 rolling objects
 falling objects
 manual handling
 disorientation
 water bombing operation
 environmental

Fire behaviour is evidenced by

rate of spread
 flame height and intensity
 spotting
 fire development
 terrain, topography
 fuel load and arrangement
 weather conditions - winds, fire whirls

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare pump to deliver water	<p>1.1 Type of <i>pump</i> selected is appropriate to the operation/incident</p> <p>1.2 Suitability of <i>water supply</i> is determined</p> <p>1.3 Pump is sited and positioned to receive and deliver water supply in accordance with the organisation's requirements</p> <p>1.4 Pump is engaged in accordance with the manufacturer's guidelines and the organisation's procedures</p> <p>1.5 Appropriate agents are prepared for the production of <i>foam</i> at an incident, where required</p>

ELEMENT**PERFORMANCE CRITERIA****2. Operate pump**

- 2.1 Pump components, *ancillary equipment* and principles of operation are utilised to draught water from a static supply, to boost water from a *reticulated* supply or to deliver water from the appliance tank
- 2.2 Pump operation is in accordance with manufacturer's specifications, organisation's procedures and OH&S guidelines
- 2.3 Hydraulic requirements of hose lines and branches are calculated
- 2.4 Pumps are operated to ensure that pressure and flow meet operational requirements and safety to personnel is maintained
- 2.5 Pump performance is monitored and maintained to ensure maximum efficiency of operation, to detect and correct pumping and safety problems and to take appropriate action in accordance with the organisation's procedures
- 2.6 Pump operations are to be carried out avoiding injury to personnel and damage to equipment and facilities
- 2.7 Mechanical malfunctions are reported to supervisor according to the organisation's procedures

3. Conclude pump operations

- 3.1 Pump operations are concluded in accordance with the organisation's procedures
- 3.2 Ancillary equipment is collected and stowed in accordance with the organisation's requirements
- 3.3 Maintenance procedures and checks are undertaken to ensure pump and ancillary equipment is serviceable in accordance with the organisation's requirements

Required Skills and Knowledge**REQUIRED SKILLS AND KNOWLEDGE**

This describes the essential skills and knowledge and their level, required for this unit.

REQUIRED SKILLS AND KNOWLEDGE

Required Skills

prime and operate a pump
operate a pump using gauges and controls
position a pump
supply water to a location using a relay pump

Required Knowledge

principles of hydraulics (flow and pressure)
calculations of water supply capacity
hydraulic calculations including friction loss
velocity
discharge and flow rates
jet reaction
theoretical and effective height of a jet
types of pumps and primers
pump components and their principles of operation
pump gauges and controls
power train
positioning pumps
principles of operating pumps
relay pumping
types of foam concentrate

Evidence Guide

EVIDENCE GUIDE

**Critical aspects for
assessment and evidence
required to demonstrate**

It is essential for this unit that competence be demonstrated in:
maintenance of water supply to branch operators

EVIDENCE GUIDE**competency in this unit**

maintenance of appropriate levels of pressure
 responding appropriately to changing circumstances
 when using foam, the correct proportion of foam and water is supplied/delivered and supply of foam concentrate is maintained
 when pumping from an appliance tank, monitoring levels of water remaining in appliance tank to ensure minimum levels for crew protection
 pumping without injury to personnel or damage to equipment

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment**Context of assessment**

A combination of oral or written presentations, on the job and/or in a range of simulated environments

Specific resources for assessment

Access to a range of pumps

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement**RANGE STATEMENT**

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Pumps may include

portable pumps
 positive displacement
 centrifugal
 ejector
 free-standing, trailer or vehicle-mounted

RANGE STATEMENT

	<ul style="list-style-type: none"> petrol or diesel driven appliance-mounted pumps single-stage centrifugal multi-stage centrifugal series/parallel centrifugal peripheral water turbine
Water supplies may be of the following shapes	<ul style="list-style-type: none"> rectangular spherical cylindrical trapezoidal irregular
Hydraulic calculations may include	<ul style="list-style-type: none"> friction loss velocity discharge and flow rates jet reaction theoretical and effective height of a jet
Foam equipment may include	<ul style="list-style-type: none"> foam-making branch pipes in-line inductors in-line foam generators round-the-pump proportioners pressure-balanced foam systems electronic foam systems Class A foam systems Class B foam systems medium expansion foam equipment high expansion foam equipment high back-pressure (sub-surface injection) foam system compressed air foam system pick-up tubes
Primers may include	<ul style="list-style-type: none"> force pump

RANGE STATEMENT

	exhaust ejector
	diaphragm
	water ring
	rotary vane
	rotary gear
Concentrates may include	aqueous film forming foam
	alcohol type foam
	protein foam
	Class A foam
Static water supply may include	Dams
	rivers
	lakes
	reservoirs
	tanks
	seawater
	swimming pools
	portable dams
Reticulated water supply may include	trunk mains
	distributary mains
	reticulation mains
Ancillary equipment may include	hydrant tools and openers
	standpipes
	suction hoses, spanners, strainers, baskets
	ropes/lines
	couplings
	adaptors and matching pieces
	breechings
	delivery hose
Organisation's procedures may be covered in	training manuals
	manufacturer's specifications
	fireground procedures

RANGE STATEMENT

<p>Operation includes observance of</p>	<p>OH&S guidelines maintenance procedures and checks pumping practices service procedures standard operating procedures</p> <p>branch operators, where possible pump operators on other units when relay pumping monitoring of gauges and warning lights use of pressure relief valves and transfer valves use of pump performance charts or tables illustrating information such as optimum nozzle pressure and friction loss water levels</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify target areas and burn objectives	<p>1.1 Areas requiring prescribed burning are identified in accordance with the organisation's procedures</p> <p>1.2 Burn objectives are developed in accordance with the organisation's procedures</p>
2. Prepare plans for prescribed burning	<p>2.1 Strategies and tactics which are suitable for the location and will meet objectives, are nominated in accordance with organisational procedures and programs</p> <p>2.2 Consultation with other <i>interested parties</i>, during the planning process, is conducted in accordance with organisational procedures</p> <p>2.3 Proposed strategies and tactics take into account the safety of persons and <i>protection of property, assets</i> and the <i>environment</i></p> <p>2.4 Resources required and conditions for implementation of the strategies and tactics, are specified in accordance with organisational procedures</p>
3. Monitor implementation of prescribed burning plans	<p>3.1 Progress of plan implementation is monitored for compliance with organisational requirements</p> <p>3.2 Prescribed burning activities are recorded in accordance with organisational procedures</p> <p>3.3 <i>Incidents</i> are reported and investigated in accordance with organisational procedures</p>

ELEMENT

PERFORMANCE CRITERIA

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

community consultation and liaison
recommending actions to be taken, communicating with others
preparation of plans
map reading
measuring quantities, calculating areas

Required Knowledge

wildfire hazards
prescribed burning strategies
wildfire behaviour
organisational procedures and programs
legislation relevant to wildfire hazard reduction
effects of fire on vegetation, fauna and fuel accumulation
effects of fire on areas and places of cultural significance

Evidence Guide

EVIDENCE GUIDE

**Critical aspects for
assessment and evidence
required to demonstrate**

It is essential for this unit that competence be demonstrated by:

EVIDENCE GUIDE

competency in this unit

identifying wildfire hazards
 developing objectives
 meeting objectives for burn strategies and tactics
 minimising environmental impact
 recognising and consulting interested parties

Consistency in performance

competency demonstrated over a period of time within the range of variables

Context of and specific resources for assessment

Context of assessment

on the job and/or
 indirect evidence in the form of documentation, and/or
 discussion with the applicant and nominated referees
 simulated situations

Specific resources for assessment

travel to remote locations may be necessary

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Hazards may include

flammable vegetation
 flammable hazardous materials
 adjoining land use, proximity to urban areas

Actions may include

assist in community protection
 hazard reduction
 vegetation management

RANGE STATEMENT

	<ul style="list-style-type: none"> habitat management management of cultural sites
Interested parties may include	<ul style="list-style-type: none"> government organisations including local, state and federal adjacent land owners and/or managers community groups with specific interests
Safety of people may include	<ul style="list-style-type: none"> people on areas adjacent to the target area people permanently or temporarily in the target area smoke management
Protection of property and assets may include	<ul style="list-style-type: none"> property and assets adjacent to the target area commercial crops or other assets on the target area cultural sites, historical buildings, etc.
Protection of the environment may include	<ul style="list-style-type: none"> native flora and fauna rare and endangered species water quality soil conservation safe use of chemical sprays smoke management
Incidents may include	<ul style="list-style-type: none"> fire escapes over control lines accidental chemical spillage damage to equipment and property damage to environment injury to persons complaints from persons or organisations

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Prepare to burn

- 1.1 Burn plan is identified in accordance with the organisational procedures and legislative requirements
- 1.2 A *contingency plan* is developed based on *local conditions at the time of burn* and communicated to all personnel
- 1.3 Permits are obtained in accordance with organisational procedures
- 1.4 Burn *notifications* are issued in accordance with organisational procedures
- 1.5 Resource requirements are identified
- 1.6 Control lines are specified and prepared in accordance with organisational procedures
- 1.7 *Assets* are *protected* in accordance with organisational procedures
- 1.8 *Weather conditions* are *monitored*

2. Conduct burn

- 2.1 *Resources* are gathered and deployed
- 2.2 Day of burn notifications are issued
- 2.3 Pre burn checks are conducted
- 2.4 *Lighting* is conducted in accordance with plan or organisational procedures
- 2.5 *Burning* is monitored and operational changes are made as required

ELEMENT	PERFORMANCE CRITERIA
3. Conduct post burn activities	2.6 Records are kept in accordance with organisational procedures 2.7 Burn operations are concluded 3.1 Outcomes of the burn are assessed and reported 3.2 Variations from the burn plan are reported in accordance with organisational procedures 3.3 Restoration and rehabilitation is carried out in accordance with organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

developing a prescribed burn
 conducting high and low intensity prescribed burns
 establishing control lines for prescribed burns
 developing a contingency plan
 monitoring the burn
 undertaking patrol activities

Required Knowledge

legislative, organisational policy and procedures for conducting a prescribed burn
 types of prescribed burns
 seasonal restrictions on prescribed burns
 authorisations required for conducting a burn
 high and low intensity prescribed burns
 ignition patterns and techniques
 developing a prescription
 resource requirements
 procedures for monitoring prescribed burns and securing burn area

REQUIRED SKILLS AND KNOWLEDGE

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence is demonstrated in:

- the preparation of burn plans for a designated area
- the effective conduct of a burn, utilising the appropriate resources and record action taken
- follow up activities once the burn is completed

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

Evidence of competence may be demonstrated on the job and/or in a simulated environment

Specific resources for assessment

Access to a range of controlled or simulated fires
lighting equipment

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised***

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

1. **Plan fire/incident investigation and analysis activities**

PERFORMANCE CRITERIA

- 1.1 The roles and responsibilities of the government and non-government organisations involved in fire/incident investigation are identified
- 1.2 ***Procedures*** and ***protocols*** for the cooperation and coordination of relevant organisations involved in the fire/incident investigation are identified, agreed and implemented
- 1.3 Strategies required to conduct a fire/incident investigation and analysis are identified and implemented in accordance with the organisation's procedures
- 1.4 Preliminary and background ***information*** concerning the context of the fire/incident investigation is prepared
- 1.5 The relevant legislative requirements that impact on the collection and recording of ***evidence*** are identified
- 1.6 Evidence and information gathering process at the incident site is planned in accordance with organisation and legislative requirements, environmental conditions and resource availability
- 1.7 Required fire investigation equipment and resources for the incident are identified and assembled

ELEMENT	PERFORMANCE CRITERIA
2. Collect, collate and preserve evidence	<p>2.1 The methods and techniques of evidence and information collection appropriate to the investigation are applied in accordance with legislative requirements</p> <p>2.2 The various types of evidence and information pertinent to the investigation are recorded and/or collected in accordance with organisational and legislative procedures</p> <p>2.3 The procedures for continuity and <i>preservation</i> of evidence are followed in accordance with legislative requirements</p> <p>2.4 Appropriate <i>packaging</i> and identification techniques for the transportation of evidence for the purpose of laboratory testing are implemented</p>
3. Determine cause and origin of fire	<p>3.1 The procedures required to determine the origin and cause of fire are followed</p> <p>3.2 Assistance is rendered to laboratory personnel and specialist organisations in accordance with organisational procedures</p> <p>3.3 Physical evidence that can lead to the determination of the origin and cause of fire is identified and examined</p> <p>3.4 Preliminary findings are documented and validated in accordance with organisational procedures</p> <p>3.5 The cause and origin of fire is determined</p> <p>3.6 Findings, methodologies, support data and briefing notes are documented in accordance with organisational and legislative procedures</p>
4. Conduct analysis of incident	<p>4.1 Information relating to incident is gathered in accordance with the organisation's policies and procedures</p> <p>4.2 Information relating to incident is evaluated in accordance with the organisation's procedures</p>
5. Record and report information collected	<p>5.1 Relevant organisation/legislative requirements for the recording, reporting and producing of information for a fire/incident investigation are implemented</p>
6. Prepare personnel for proceedings	<p>6.1 Briefings are held with counsel as required</p> <p>6.2 Other personnel involved in the proceedings are briefed</p>

ELEMENT	PERFORMANCE CRITERIA
7. Review and evaluate fire/incident investigation	<p>6.3 Additional information and/or clarification of fire/incident investigation procedures/findings are provided as required</p> <p>6.4 Protocols for giving of evidence at a coronial/civil/criminal proceeding are followed</p> <p>7.1 Outcomes of proceedings are <i>reviewed</i> to ensure knowledge of investigations, trends and precedents is current</p> <p>7.2 Changes to an organisation's policy and procedures arising from rulings and decisions are formulated and reported</p> <p>7.3 Post incident analysis <i>documentation</i> is completed in accordance with the organisation's requirements</p> <p>7.4 Fire/incident cause determination/documentation/recommendations are forwarded according to the organisation's procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

communication

handling of dangerous goods and hazardous substances

cooperation with community groups

evidence packaging techniques

demonstrated evidence gathering techniques

conducting briefings

cooperating with other organisations and community groups

Required Knowledge

factors affecting fire behaviour

security of the scene/scene contamination and preservation

REQUIRED SKILLS AND KNOWLEDGE

examination of the fire scene

determining point of origin by deductive evidence

collection of physical evidence

distinguishing between fires that are accidentally, negligently and deliberately or naturally lit

matching evidence to proof of point and offence provisions

differences between fire conditions

fatality and criminal involvement procedures

role of expert witnesses

motives of the fire setter

legal implications of evidence collection and legislative requirements

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence is demonstrated in:

securing the scene and preserving the evidence

determining the point of origin and cause of fire

distinguishing between fires that are caused deliberately or accidentally, negligently and naturally lit

collecting evidence in accordance with legislative requirements

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

<p>Evidence must include</p>	<p>video tapes, audio tapes, drawings, photographs, plans, manifests, documents, personal notes, physical evidence, debris, soil</p>
<p>Investigative procedures must include</p>	<p>canvass witnesses, conduct examinations, advise and cooperate with other agencies, take notes and photographs, make sketches and maps, collect and secure physical evidence, collect, collate and analyse information, conduct interview, prepare reports, produce information</p>
<p>Evidence preservation must include</p>	<p>chain of evidence recording, tagging secure encasements, log of events</p>
<p>Packaging of evidence may include</p>	<p>non-lined tins, non-leaching bags, glass receptacles, gas sampling equipment, rigid and non-rigid receptacles</p>

RANGE STATEMENT

Causes of fire may include	electrical origin, gas explosion, gas, accidental or deliberate nature, motor vehicles, flammable liquids, chemical, mechanical defect, lightning, environmental or natural occurrences, matches and lighters, smoking, spontaneous combustion
Liaison with specialist personnel may include	laboratory technicians, forensic specialist, insurance investigators, medical examiners, lawyers, crime scene police, arson squad, other relevant authorities
Protocols for giving evidence must may include	court procedures, court practices, pre-court briefings, rules of evidence
Review of information may include	incidence mapping, databases, journals, correspondence, Internet, inter-organisation activities, intra-organisation activities
Post investigation documentation may include	statements, proformas, photographs, tape recordings

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. **Conduct initial assessment of scene**

1.1 Scene is assessed with regard to occupational health and safety and all actions are undertaken in line with organisation's policies, procedures, guidelines and duty of care requirements

1.2 Communication is established with the senior *investigating officer* and liaison is maintained throughout the investigation

1.3 Circumstances surrounding the scene are ascertained from visual assessment and reports from other personnel

1.4 Scene boundary is defined/redefined as required to preserve physical evidence for collection

1.5 Obvious and accessible *physical evidence* is located and, where appropriate, protected from possible contamination

2. **Control integrity of scene**

2.1 Appropriate *arrangements for scene access and egress* are established and maintained

2.2 All non-essential persons are removed from the scene and relevant details are recorded accurately and legibly in accordance with organisation and regulatory procedures

2.3 *Additional resources* are identified and accessed

ELEMENT	PERFORMANCE CRITERIA
3. Examine scene	<p>to secure incident scene</p> <p>2.4 The personal and health and safety needs of those involved in the incident are attended to</p> <p>3.1 An appropriate search pattern is instigated in accordance with instructions from senior investigating officer to ensure all evidence is located and preserved</p> <p>3.2 <i>Details of the scene</i> are recorded comprehensively and accurately in line with organisation's operating procedures</p> <p>3.3 Evidence is located, collected, packaged, labelled and stored to ensure preservation for further post-scene examination</p> <p>3.4 An accurate log of all evidence is maintained</p> <p>3.5 Scenes are correctly assessed for future investigative requirements and appropriate persons notified</p>
4. Identify potential witnesses and initial statements recorded	<p>4.1 Bystanders are canvassed to identify potential witnesses</p> <p>4.2 Details of potential witnesses are recorded</p> <p>4.3 Appropriate recording practices are used that are in accordance with legislative and regulatory requirements and organisation's policies and procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accurate written recording and compilation of interviews and statements
- attention to detail
- implementing methodical and systematic approach
- listening to bystanders
- putting bystanders at ease
- questioning bystanders

REQUIRED SKILLS AND KNOWLEDGE

- use of recording and specialised evidence collection equipment
- working with a variety of professionals

Required Knowledge

- anti discrimination public safety
- appropriate use of interpreting services
- collection and recording of various types of evidence ranging from large objects to minute traces
- details of scene
- equal employment opportunity
- features and use of a variety of specialised equipment to search
- functions and roles of other professionals and experts
- incident scene protection and preservation
- indicators of emotional distress
- indicators of need for specialised investigations
- legislative requirements relating to occupational health and safety
- policies and procedures relating to occupational health and safety
- policies and procedures relating to recording details of persons
- public safety and duty of care at accident/incident scene
- recognition
- record and collect evidence
- shock
- taking and compiling statements
- taking of statements

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Correct application of legislative requirements and organisation policies and procedures in all situations

Consistency in performance

Evidence will need to be gathered over time in a range of actual and/or simulated environment

EVIDENCE GUIDE

Context of and specific resources for assessment

Context of assessment

A real life incident, exercise or simulation, or series of tasks are required to demonstrate competence in this unit. This may involve setting scenarios to be completed either individually or as a member of a team

Specific resources for assessment

No special requirements

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Initial investigation

those enquiries conducted by the first public safety official on scene

Incident scene may include

structural fire
wild fire
vehicle fire
crime scene
vehicle accident
natural disaster
industrial/mining accidents and incidents
accident/incident involving death or injury to person or damage to property

Incident scene may be

indoor or outdoor
in a rural or urban environment

Incident scene may be affected by

prevailing weather and require additional resources to preserve and protect incident scene

RANGE STATEMENT

Security of an incident scene may be affected by	<p>topography</p> <p>climatic conditions</p> <p>human interference</p> <p>animal interference</p> <p>preservation of life/property</p>
Public safety risk factors include	<p>those factors at the incident scene that could impact on: the safety of investigators; the security/preservation of the actual site</p> <p>the security and preservation of situational evidence</p>
Investigating incident scenes may include	<p>dangerous or distasteful conditions and may involve handling injured or deceased persons</p>
Circumstances surrounding scene may include	<p>sequence of events</p> <p>possible causes</p> <p>people involved</p> <p>property involved</p> <p>victims</p> <p>suspects</p> <p>witnesses</p> <p>damage</p> <p>injury</p> <p>organisation personnel involved</p> <p>other agencies involved</p> <p>current status of investigation</p> <p>action taken to date</p>
Tactical factors may include	<p>environmental circumstances</p> <p>chronology of events</p> <p>access to scene</p> <p>number of persons at scene</p> <p>availability of support services</p> <p>boundaries</p>
Persons at incident scene may include	<p>Incident scene specialists and forensic experts;</p> <p>witnesses</p>

RANGE STATEMENT

	victims other bystanders; police and emergency services; media; coroners pathologists medical practitioners undertakers; forensic accountants information technology consultants and legal officers
Activities at incident scenes may be recorded by	running sheets exhibit logs receipts and personnel movement video photography
Physical evidence may include	shoe impressions tyre prints skid marks fingerprints containers fibres flammable and combustible liquids tool marks bloodstains identifying numbers bodily fluids burn patterns
Methods of collection may include	vacuuming tape lifts shovelling photographing casing
Methods of packaging may include	metal containers plastic bags paper bags

RANGE STATEMENT

Additional resources may include	<p>glass vials</p> <p>organisation personnel</p> <p>other organisation personnel</p> <p>expert personnel</p> <p>audio visual services</p> <p>emergency lighting</p> <p>forensic personnel</p>
Relevant details from persons may include	<p>name</p> <p>contact details</p> <p>other details in accordance with standard operating procedures</p>
Liaison with investigating officer may include	<p>professional and technical advice</p> <p>identification of avenues of inquiry</p> <p>significance of located evidence</p>
Arrangements for scene access and egress	<p>clear brief as to who has control of access</p> <p>physical barriers may also be required</p> <p>roster guards</p> <p>limit entry to essential personnel</p> <p>delegation of authority to control entry</p> <p>record all persons who enter or depart the scene and reasons</p>
Arrangements to protect integrity of evidence	<p>roster scene guards</p> <p>cover evidence</p> <p>may require removal of evidence to ensure its protection</p>
Details of scene	<p>time</p> <p>date</p> <p>location</p> <p>damage to property</p> <p>injury to persons</p> <p>personnel present</p> <p>physical details of scene</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Determine hazards at incident site

1.1 Issues affecting safety of self and other personnel are established by identification of ***hazards*** and assessment of ***risks***, and by liaison with others at the scene

1.2 Relevant operational safety procedures are implemented in accordance with organisation's policies

1.3 Duties are undertaken in line with organisational health and safety codes of practice and ***relevant legislation***

2. Implement hazard controls at incident scene

2.1 Hazards are identified and mitigation procedures are selected in line with work instructions and procedures

2.2 Hazardous situations rectified where possible and reported and/or recorded according to organisation's policies and procedures

2.3 Changes in situation and/or conditions are reported immediately to ***designated person***

2.4 ***Hazard controls*** are monitored and communicated to relevant personnel to ensure continuing effectiveness

2.5 Hazard control and mitigation measures are implemented with minimum damage to the environment, while maintaining safety of self

ELEMENT	PERFORMANCE CRITERIA
3. Maintain personal safety	<p>and others</p> <p>2.6 Incident/accident scene is effectively secured to preserve the scene and maintain <i>public safety</i> in line with legislative requirements</p> <p>3.1 <i>Personal protective clothing and equipment</i> is selected and checked according to organisational procedures to ensure it is operational prior to entry into incident situation</p> <p>3.2 Personal protective clothing and equipment appropriate to dealing with the hazard is worn/fitted and used in accordance with organisation's policies and procedures and manufacturer's guidelines</p> <p>3.3 Water and food intake, rest breaks and shelter requirements are maintained</p> <p>3.4 <i>Survival technique strategies</i> are implemented in accordance with organisation's policies and guidelines</p>
4. Contribute to maintaining safety of other work group members	<p>4.1 Impact of own actions on safety of others is recognised</p> <p>4.2 Contact is maintained at all times with other work group members</p> <p>4.3 Signals are correctly used, interpreted, confirmed and acted upon in a timely manner</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate non-verbally and verbally
- follow procedures and instructions
- record information
- use communication equipment
- work with others in a team situation

Required Knowledge

REQUIRED SKILLS AND KNOWLEDGE

- accidents and incidents
- commonly encountered hazards and procedures and safety precautions to prevent injury on encountering various hazards
- employee responsibilities and obligations
- food intake
- hazards
- heat induced illness factors leading to prevention
- injuries
- labelling and storage of hazardous substances
- manual handling hazards
- means of relaying warnings to other personnel
- methods of hazard control and reporting
- organisation's occupational health and safety policy
- problems associated with insufficient water intake
- procedures for investigating injuries
- procedures for participating in occupational health and safety arrangements
- procedures for reporting hazards
- protection
- relevant standard operating procedures
- respiratory system functions
- rest breaks
- State and Territory occupational health and safety requirements
- survival techniques for various situations
- symptoms and treatment
- techniques and aids
- use and limitations of relevant protective clothing and equipment

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in maintaining personal safety and safety of others

EVIDENCE GUIDE

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

<p>Working environment may be</p>	<p>hazardous</p> <p>unpredictable</p> <p>subject to time pressure</p> <p>chaotic and expose responders to risk</p>
<p>Public Safety workplaces include</p>	<p>any location where a Public Safety incident occurs</p>
<p>Response situation include</p>	<p>single and multi agency response situations</p>
<p>Risk is</p>	<p>the likelihood of injury or damage occurring and the potential consequences of any injury or damage</p>
<p>Hazards include</p>	<p>all potential sources of injury or damage to property or the environment including identified and potential</p>

RANGE STATEMENT

	<p>hazards to persons equipment or the environment</p>
Incidents may include	<p>a variety of natural or man made events including but not limited to rescues and extrications (flood storm tempest natural disaster vehicle aircraft rail industrial civil defence) fires (structural wild prescribed burning) search and rescue (urban rural sea) hazardous materials and dangerous goods</p>
Hazards may be identified by	<p>scene assessment visual inspections plan reviews recognising hazard warnings accessing data bases interviewing others at scene seeking expert advice</p>
Others at scene may include	<p>organisational personnel personnel from other organisations general public</p>
Hazardous materials may include	<p>thermal mechanical</p>

RANGE STATEMENT

	explosives
	toxic
	corrosive
	asphyxiant
	radiation
	etiological hazards
	mutagenic materials
Biological hazards may include	bacteria
	viruses
	fungi and yeasts
	including exotic organisms
Physical hazards may include	noise
	slippery surfaces
	poor visibility
	smoky environments
	fallen/falling objects
	fatigue
Electrical hazards may include	pole fires
	electrical fires
	electricity in damaged/burning structures
	energised vehicles/structures due to downed wires
Manual handling hazards may include	heavy objects
	content and shape of containers
Environmental hazards may include	temperature
	darkness
	fire
	snow
	floods
	winds
	rain
	hail

RANGE STATEMENT

	flora
	fauna
	postural restrictions and access
	terrain
	traffic
Hazard control measures may include	erection of barriers
	establishment of control zone
	use of spill clean up kits
	use of electrically insulated tools and equipment
	vehicle protection hoses and devices
	life support equipment (heat radiation shielded crew cabin
	vehicle cabins with/without sprays)
	entry control procedures to hazardous areas
	decontamination
Relevant legislation may include	state or territory occupational health and safety acts and regulations
Personal protective clothing and equipment may include	breathing apparatus
	personal lines
	air lines
	personal distress units
	respiratory protection
	protective hoods
	goggles
	hearing protectors
	sunscreen
	chemical protective clothing
	personal flotation devices
	wet suits
	turnout uniform
	gloves
	hard hat

RANGE STATEMENT

	safety boots
	overalls
	chainsaw chaps
	bullet proof vests
	firearms
	batons
	handcuffs
Hazard control equipment may include	atmospheric monitoring equipment
	meteorological equipment
	radiation monitoring equipment
	oxygen meters
	flammable gas detectors
Reporting may include	verbal
	written reports
	completing standard forms
	logs
	sitreps
	note taking
	logging entry to hazardous areas
Designated person may include	supervisor
	team leader
	workplace occupational health and safety representative
	officer in charge
Survival strategies which maybe applied in	buildings
	wildfire situations
	water
	extreme heat or cold
Factors which may require monitoring may include	traffic
	weather conditions
	vegetation type
	spectators

RANGE STATEMENT

	temperature
	structural integrity
	relative humidity
	slope
	terrain
	water supply/pressure
	fire development
	stream flows
	suspect atmospheres
Contact with other personnel may include	visual

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive incident response request	<p>1.1 Requests for response are received and dealt with in accordance with <i>organisational policy</i> and guidelines</p> <p>1.2 Relevant incident information is obtained and assessed to enable personnel to make appropriate preparations</p> <p>1.3 An appropriate response is determined according to the type of incident and information available in accordance with organisational policies and procedures</p> <p>1.4 The location of the incident and the most appropriate route to the incident are ascertained</p>
2. Proceed to incident	<p>2.1 Personnel, equipment and <i>transport</i> resources are dispatched promptly, consistent with the nature of the incident and the information available</p> <p>2.2 Communication is established and maintained</p> <p>2.3 An appropriate route to the incident is followed</p>

ELEMENT**PERFORMANCE CRITERIA****3. Assess the incident**

- to minimise response time
- 2.4 *En-route hazards* are recognised and negotiated to minimise risk
- 2.5 Multi-vehicle response is conducted in accordance with the organisation's procedures
- 3.1 Observations are made en route to assist with *incident* assessments
- 3.2 Assigned personnel's arrival at the incident is confirmed according to organisational policies and procedures
- 3.3 *Communication* with on-site personnel is established
- 3.4 An initial assessment of the incident is carried out promptly
- 3.5 *Hazards* or potential hazards are assessed and minimised or controlled
- 3.6 Assigned *resources* to deal with the incident are established at the earliest opportunity
- 3.7 The need for additional resources is identified and resources requested in accordance with organisational policy and procedures
- 3.8 Hazards are monitored during the incidents and changes in the situation acted upon

4. Plan and implement an operational response to the incident

- 4.1 A safe and effective operational environment is established and maintained in accordance with occupational health and safety guidelines and organisation's policies and procedures
- 4.2 Incident information is communicated to assigned personnel clearly, accurately and in a timely manner
- 4.3 *Incident plan* is developed based on available information and organisational procedures
- 4.4 Strategies and tactics are determined and tasks allocated to appropriate personnel
- 4.5 An incident plan is implemented, continually monitored, reported and reviewed in the light of additional information and communicated in accordance with the organisation's policies and procedures
- 4.6 Leadership and supervision are provided to ensure that performance and practice are to operational standards

ELEMENT	PERFORMANCE CRITERIA
5. Conclude operation	<p>4.7 Appropriate equipment and materials are deployed to deal with the incident</p> <p>4.8 Changes in the incident plan are communicated to relevant personnel and organisations</p> <p>5.1 Incident is terminated in accordance with the organisation's procedures</p> <p>5.2 Incident records of incident actions and decisions are maintained in accordance with the organisation's requirements</p> <p>5.3 Incident assessment is conducted in accordance with the organisation's requirements</p>
6. Supervise post-response activities	<p>6.1 Equipment cleaning, repair, storage and replenishment is supervised</p> <p>6.2 Debriefing requirements are met</p> <p>6.3 Post operation reports are prepared to organisation's requirements</p> <p>6.4 <i>Welfare of team members</i> is monitored and appropriate action taken</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse an incident
- assess risks and apply safe work practices
- communicate effectively
- conduct an incident assessment
- conduct briefings and debriefings for aircraft based work
- deploy personnel and equipment to deal with the incident
- for aircraft based work the ability to work in an aircraft for an extended period
- make decisions
- respond promptly to an incident
- use communication equipment

Required Knowledge

REQUIRED SKILLS AND KNOWLEDGE

- hazards/potential hazards and their effects
- knowledge of current navigational practices to perform navigation
- knowledge of current practices to perform conduct briefings and debriefings
- organisational policies and procedures relating to operations

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in implementation of an appropriate strategy to deal effectively with the incident

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

Evidence of competent performance should be obtained by observing an individual in responding to and dealing with an actual or simulated incident operation and supplemented by appropriate questions

Specific resources for assessment

Assessment of this competency will require access to relevant transport, communication and emergency equipment

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Incidents may include	<ul style="list-style-type: none"> fires public disorder crime flood storms accident hazardous materials incidents rescues
Transport may include	<ul style="list-style-type: none"> on-road off-road aviation maritime
En route hazards may include	<ul style="list-style-type: none"> smoke crowds traffic unauthorised redirection prevailing weather road conditions terrain debris tidal flow spot fires restricted areas wires masts/aerials other aircraft interference to communications
Hazardous conditions may include	<ul style="list-style-type: none"> adverse weather and fire behaviour

RANGE STATEMENT

Incident assessment may include

after-dark operations
difficult terrain
dangerous goods and substances
time pressure
level of visibility
structural collapse
type and size of incident
risk to life
property and environment
hazards/no go areas
climatic and weather conditions
capability of assigned personnel
adequacy of allocated equipment
information gathered from existing plans/databases
forecasts and meteorological profiles
crowds gathering
installed fire protection
type of building
building construction
persons trapped
exposures
access

Resources may include

aircraft (rotary and fixed wing)
personnel trained for the task
specialised personnel
protective clothing
equipment
materials
navigation aids
maps
aide memoirs
pumps

RANGE STATEMENT

Communications equipment may include	<ul style="list-style-type: none"> appliances specialist appliances radio (eg VHF aeronautical) telephone computer facsimile pager mobile data terminal audible alarms/whistles
Communications may include	<ul style="list-style-type: none"> ground to air hand signals distress signal units whistles verbal and written instructions radio telephone mobile phone
Incidents may include	<ul style="list-style-type: none"> life threatening situations protection of property and the environment armed offenders explosive devices
Incident plan may include	<ul style="list-style-type: none"> incident objectives or goals roles and responsibilities of personnel resource requirements and limitations communication procedures strategies and tactics to be employed contingency arrangements planning checklists flight plans emergency landing areas for aircraft
Welfare of team members	<ul style="list-style-type: none"> physical stress

RANGE STATEMENT**may include**

physiological stress
 physical needs such as refreshments
 fatigue
 relief

Organisational policy, procedures, requirements and guidelines may vary between sectors and organisations and may include

legislation relevant to the operation/incident/response
 legislation relevant to the organisation
 operational
 corporate and strategic plans
 operational procedures
 operational performance standards
 organisational personnel practices and guidelines
 organisational quality standards
 interagency liaison
 Civil Aviation Orders and requirements
 search and rescue time/procedures/action
 incident management systems

When dealing with aircraft response, performance may be affected by

task
 range
 engine type-piston
 turbine
 wing configuration
 twin/single engine
 load capacity
 airstrip length requirements
 pilot ability
 weather
 fire behaviour
 terrain

When dealing with aircraft, suitability may be affected by

visibility
 range
 speed

RANGE STATEMENT

When dealing with aircraft, supervising of aircraft management procedures includes

take off capability
communications system availability
pilot local knowledge
temporary restricted airspace
aircraft separation-vertically and horizontally
height separation
direction
inbound/outbound calls
Fire Common Traffic Advisory Frequency (F-CTAF)

Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Use communication systems and equipment

1.1 Equipment is used and operated safely to support communications consistent with organisation's policies and procedures

1.2 **Communication equipment** and techniques are selected to best meet the task, context and needs of the situation

1.3 The **communication system** is correctly utilised to facilitate transmission and reception

1.4 Communication systems are operationally maintained according to organisation's policies and procedures

2. Transmit and receive communications

2.1 Information is transmitted concisely and clearly to facilitate accurate reception of the message in accordance with organisation's policy and procedures

2.2 Contact is acknowledged, communication is confirmed and action initiated

2.3 Communication faults and deficiencies are reported according to organisation's policy and procedures

2.4 Alternative communication strategies are employed according to organisational procedures to address identified faults and deficiencies in communication

ELEMENT**PERFORMANCE CRITERIA****3. Maintain communications equipment**

- 2.5 Communication is processed and recorded in accordance with organisation's policies and procedures
- 3.1 Fault finding techniques are applied and basic maintenance conducted according to organisational policies and procedures
- 3.2 Faulty equipment is identified and noted for repair

Required Skills and Knowledge**REQUIRED SKILLS AND KNOWLEDGE**

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- clean and service communication equipment according to organisational procedures
- report communication faults and deficiencies according to organisational procedures
- use verbal communication procedures consistent with the organisation's communication system
- utilise the organisation's communication processes and systems

Required Knowledge

- organisational policy and procedures relevant to the operation of communication equipment
- range of communication equipment available to the organisation
- the organisation's communication system

Evidence Guide**EVIDENCE GUIDE****Critical aspects for assessment and evidence**

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Conduct an assessment of incident	1.1 A risk assessment of all factors impacting upon the response is conducted 1.2 An initial assessment of <i>resources</i> required is conducted 1.3 Resources required to deal with the incident are identified 1.4 <i>Constraints</i> which may impede the response are identified 1.5 <i>Initial response options</i> are identified and assessed
2. Establish control and command	2.1 Control is assumed in accordance with the organisation's policies and procedures 2.2 <i>Communication systems</i> are activated in accordance with organisation's policies and procedures 2.3 Reporting processes are activated in accordance with organisational policies and procedures to provide continuous monitoring and evaluation of incident 2.4 <i>Command and control facilities</i> are established
3. Develop operational plan	3.1 <i>Operational plan</i> is developed and adjusted if required in accordance with response requirements and operational guidelines

ELEMENT	PERFORMANCE CRITERIA
4. Implement operational plan	<p>3.2 Response strategies are identified</p> <p>3.3 Tactics to effectively manage the incident are identified in accordance with the operational plan</p> <p>3.4 Tasks are determined and prioritised</p> <p>4.1 Operational plan is communicated to teams in accordance with the organisation's guidelines</p> <p>4.2 Resources are deployed to ensure that the operational plan is implemented in accordance with organisation guidelines</p> <p>4.3 Operations are conducted and monitored in accordance with the operational plan</p> <p>4.4 Operational reports are issued in accordance with <i>policy and procedures</i></p> <p>4.5 Operations are modified as required by the situation</p> <p>4.6 Resources are requested, acquired and deployed</p>
5. Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accessing information and support from the control facility

REQUIRED SKILLS AND KNOWLEDGE

- development of response plans including predicting consequences and identifying improvements
- effective and efficient deployment of human and physical resources including:
 - electronic data exchange systems etc.
 - equipment and consumables
 - identification and correct use of equipment
 - materials
 - other organisations
 - personnel
 - personnel and external authorities
 - processes and procedures
 - radio frequency devices
 - team and personnel management
 - team dynamics
- use of a range of information technology devices including computers
- using tools and techniques to solve problems

Required Knowledge

- codes of practice or other legislative requirements
- current principles and practices in response activities
- display of the following knowledge and skills in terms of job role or function:
 - emergency management plans
 - emergency site layout
 - focus of operation of work systems and equipment
 - legislation
 - organisational command structure
 - relevant agreements
 - roles and responsibilities of all organisations
 - security and confidentiality of material

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate

It is essential for this unit that competence be demonstrated in assessment of incident both functionally and strategically; development of a plan

EVIDENCE GUIDE

competency in this unit

and implementation of response in accordance with the organisation's policies and procedures.

Strategic reaction to changes within the emergency environment

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

Assessment may occur in an operational environment or in an industry-approved simulated work environment

Specific resources for assessment

Resources should involve access to, or simulation of, emergency situations in a multi-team response environment.

This includes resources relating to: equipment, personnel, facilities etc appropriate to the emergency situation and within the bounds of responsibility as designated within the requirements of control

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Initial response options will be determined by

the availability of resources and estimated outcome
organisational guidelines
regulatory authorities
legislative requirements

Risks to life and property

fire

RANGE STATEMENT**may include**

flood
 hazardous materials
 landslip
 severe storm
 biological agents
 fauna rescue

Transport may include

on road
 off road
 aviation
 maritime
 rail

Command facility may include

field facility such as an existing airfield helipads or established operations centre

En route hazards may include

traffic
 prevailing weather
 road conditions
 terrain
 debris
 plumes
 animals
 atmospheric hazards
 tidal conditions
 restricted areas
 wires/masts/aerials
 other aircraft
 interference communications

Hazardous conditions may include

adverse weather
 after dark operations
 difficult terrain
 dangerous goods and substances
 time pressure

RANGE STATEMENT

Incident assessment may include	<ul style="list-style-type: none"> visibility type of incident risk to life property and environment hazards capability of assigned personnel adequacy of allocated equipment information gathered from existing plans/databases forecasts meteorological profiles
Communications systems may include	<ul style="list-style-type: none"> radio telephone computer facsimile pager mobile data terminal satellite signalling signage warnings
Incidents may include	<ul style="list-style-type: none"> life threatening situations protection of property and the environment
Constraints may include	<ul style="list-style-type: none"> legislative resources time prevailing weather restrictions on duration of work or the conditions under which personnel may be employed constraints on road closure redirection of water course military areas

RANGE STATEMENT

	Aboriginal and Torres Strait Islander sacred sites other areas of environmental and cultural significance seasonal factors wilderness areas hazardous areas other areas requiring permission and/or authorisation to enter existing emergency management plans financial
Documentation and reporting requirements may include	input to debriefs completion of logs sitreps journal records assessment of safety procedures utilised financial statements post-operational report

PUAOPE007B Command agency personnel within a multi-agency emergency response

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit covers the competence to command an organisation's personnel within a multi-agency emergency response environment.

Command is the internal direction of the members and resources of an organisation in the performance of the organisation's roles and tasks by agreement or in accordance with relevant legislation. Command operates vertically within an organisation.

Application of the Unit

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Take command

- 1.1 Command is exercised in accordance with organisation authority and guidelines
- 1.2 The identity, location and contact details of the commander are communicated to internal personnel and to relevant external authorities/organisations/individuals pertinent to the emergency/incident

2. Establish a command facility

- 2.1 An appropriate ***command facility*** is established and operated in accordance with organisational guidelines
- 2.2 Details of the facility are communicated to internal personnel and to relevant external authorities/organisations/individuals as required

3. Establish a command structure

- 3.1 A command structure is established appropriate to the nature and complexity of the task (s) undertaken by the organisation

ELEMENT	PERFORMANCE CRITERIA
4. Establish procedures to permit command to be exercised	<p>3.2 The command structure is expanded, contracted or modified in response to changes within the emergency environment</p> <p>4.1 Command structure is communicated to internal personnel and external authorities/individuals whom may have a regulatory interest applicable to the emergency/incident</p> <p>4.2 Command <i>information management system</i> is implemented</p> <p>4.3 Communication mechanisms and procedures are implemented between levels of command in accordance with organisational guidelines</p> <p>4.4 Liaison is established and maintained to meet control and command requirements</p> <p>4.5 A public information system is established in accordance with control plan requirements</p>
5. Determine operational command plan	<p>5.1 Tasks are received and/or determined in accordance with the control requirements</p> <p>5.2 Operational command plan to implement strategies is developed and modified as required in accordance with organisational guidelines</p> <p>5.3 Appropriate tactics to effectively manage the emergency/incident are identified in accordance with the operational command plan</p>
6. Manage resources under organisation command	<p>6.1 <i>Resources</i> are deployed to ensure that the operational command plan is implemented in accordance with organisational guidelines</p> <p>6.2 Human and physical resources are effectively managed to achieve command plan outcomes</p>
7. Manage operation(s)	<p>7.1 Operations are conducted in accordance with the operational command plan</p> <p>7.2 Significant changes in status and actions taken are reported consistent with organisational policy and procedures</p> <p>7.3 Operations are redirected as required to meet changes in the conditions which affect the emergency/incident situation</p>
8. Conclude operation(s)	<p>8.1 Physical, human and capital resources are accounted for in accordance with organisational guidelines</p> <p>8.2 <i>Debriefing</i> requirements are met in accordance with organisational guidelines</p>

ELEMENT	PERFORMANCE CRITERIA
9. Review operations	8.3 Operational documentation is completed to organisation standards 8.4 Reports are produced as required 9.1 Plans and guidelines are evaluated and reviewed 9.2 Effectiveness of command and interaction with control is evaluated and documented 9.3 Reports are produced and communicated in accordance with established protocols

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accessing information and support from the control facility, other organisations' personnel and external authorities
- analyse emergency situations both functionally and strategically
- development of response plans including predicting consequences and identifying improvements
- effective and efficient deployment of human and physical resources including:
 - operative and non-operative personnel
 - materials
 - equipment and consumables
- effective deployment, monitoring and communication of organisation allocated task(s)
- identification and correct use of equipment
- implement response in accordance with organisational procedures and within bounds of authority
- incorporate risk management and contingency processes
- liaise effectively with emergency controller
- operation of work systems and equipment
- processes and procedures
- secure emergency/operations site
- select, prioritise, implement and evaluate appropriate strategies
- strategically react to changes within the emergency environment
- using a range of information technology devices including:

REQUIRED SKILLS AND KNOWLEDGE

- computers
- radio frequency devices
- electronic data exchange systems etc
- using tools and techniques to solve problems

Required Knowledge

- applications of relevant agreements
- code of practice or other legislative requirements
- emergency site layout
- identification and correct use of equipment
- knowledge of current principles and practices to conduct an activity which exercises elements of public safety management
- organisational command structure
- processes and procedures
- security and confidentiality of material

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in:

Effective deployment, monitoring and communication of organisation allocated task(s)

analysis of emergency situations both functionally and strategically

selection, prioritisation, implementation and evaluation of appropriate strategies

implementation of response in accordance with organisational procedures and within bounds of authority

securing emergency/operations site

strategic reaction to changes within the emergency environment,

incorporation of risk management and contingency

EVIDENCE GUIDE

	<p>processes</p> <p>effective liaison with emergency controller and logging and recording all actions and decisions</p>
	<p>Consistency in performance</p> <p>Evidence should be gathered over a period of time in a range of actual or simulated workplace environments</p>
Context of and specific resources for assessment	<p>Context of assessment</p> <p>Assessment may occur in an operational environment or in an industry-approved simulated work environment</p> <p>Specific resources for assessment</p> <p>Resources should involve access to or simulation of emergency situations in a multi-organisation response environment. This includes resources relating to: equipment, personnel, facilities etc appropriate to the emergency situation and within the bounds of responsibility as designated within the requirements of control</p>

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Types of emergencies (imminent or actual) may include	<p>natural events</p> <p>drought</p> <p>fire (forest range urban)</p> <p>avalanche snow/ice/hail</p>
--	--

RANGE STATEMENT

	tsunami
	windstorm/tropical storm
	hurricane/typhoon
	biological
	extreme heat/cold
	flood/wind driven water
	earthquakes/land shifts
	volcanic eruption
	tornado/cyclone
	landslide/mudslide
	dust/sand storms
	lightning storm
	search and rescue
	fauna rescues (eg marine life rescue)
Technological/industrial events may include	radiological accidents
	dam/levee failure
	fuel/resource shortages
	hazardous material releases
	explosions/fire
	transportation accidents
	building/structure collapse
	power/utility failure
	extreme air pollution
	strikes
	business interruption
	financial collapse
Civil/political events may include	economic
	general strike
	terrorism
	sabotage
	hostage situation(s)
	civil unrest

RANGE STATEMENT**Considerations in the determination of the nature, extent and potential of an emergency may include**

eco-terrorism
 enemy attack
 risk to life
 risk to property
 risk to environment
 scope and scale of incident including likely duration of incident
 resource availability
 potential for changes in situation
 topography
 weather
 speed of onset
 hazard agent location
 demography

Resources may include

human-operations personnel
 volunteers
 support personnel
 local
 state/territory and federal governments
 physical-equipment
 machinery
 vehicles
 technology devices
 communication devices
 aviation and marine vessels

Information management system may include

data receipt
 recording
 storage and dispatch modes
 procedures and protocols
 types of technology - electronic data exchange devices
 audio and visual recording mechanisms
 public/media information dissemination

RANGE STATEMENT

	security and authorisation assignment recording and documenting of incident
Personnel support activities may include supply of	catering sanitation shelter rest/relief counselling services stress management services
Command facility establishment procedures and principles may include consideration of	proximity to emergency/incident size and type of structure special incident requirements communication modes logistical operations site access and exit requirements security requirements equipment characteristics support services amenities parking topography environment climatic conditions logistical operations
Communication processes and systems may include	designation of appropriate modes and channels of communication communication responsibilities of personnel radio communications inter organisation liaison data transfer telecommunications interpersonal communications
Internal and external personnel and authorities	operational personnel

RANGE STATEMENT**may include**

emergency organisations
 ancillary organisations
 higher authorities
 public
 media
 clients
 government and semi government authorities and departments
 witnesses
 victims
 occupational health and safety specialists
 emergency management specialists
 service providers
 other analysts and stakeholders

Support services may include

emergency agencies
 water
 gas and power agencies
 welfare and counselling organisations
 medical organisations
 equipment suppliers
 contractors
 community service organisations
 land management agencies
 transport

Debriefing may include

critical incident stress debriefing
 performance evaluations
 operational analysis

Agreed reporting mechanisms will involve

authorisation
 distribution and development of reports in accordance with regulatory and organisational requirements and may include:
 media reports

RANGE STATEMENT

	<p>ministerial reports</p> <p>coronial reports</p> <p>situation reports-within emergency for external distribution-status reports</p> <p>performance evaluations</p> <p>legal reports</p> <p>final reports</p> <p>briefing papers</p>
Activities controlled include	<p>operations</p> <p>planning</p> <p>logistics</p> <p>communications</p>
Sources of information/ documents may include	<p>emergency procedures</p> <p>standard operating procedures</p> <p>maps</p> <p>field reports</p> <p>relevant Australian or international documentation in disaster/emergency management</p> <p>organisational and workplace operating procedures and policies</p> <p>client requirements</p> <p>communications technology equipment</p> <p>oral</p> <p>aural or signed communications</p> <p>personal and work area work procedures and practices</p> <p>evacuation procedures</p> <p>occupational health and safety procedures</p> <p>applicable state, territory, commonwealth legislation and regulations which relate to:</p> <p>public safety</p> <p>state of emergency</p> <p>occupational health and safety regulations and legislation</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Contribute to team activities</p>	<p>1.1 Roles and responsibilities of team members are recognised</p> <p>1.2 Contribution is made to identifying team goals and objectives</p> <p>1.3 Activities are completed to required standard within timeframe and in accordance with organisation's policies and procedures</p> <p>1.4 Assistance in the completion of tasks is requested from other team members where appropriate</p> <p>1.5 Team members are assisted to ensure efficient and safe completion of tasks in accordance with organisation's policies and procedures</p> <p>1.6 Participation by team members is encouraged and acknowledged</p> <p>1.7 Changes in allocated role and responsibilities are implemented</p> <p>1.8 Team meetings are attended regularly and punctually</p>
<p>2. Share knowledge and information</p>	<p>2.1 Information relevant to work is communicated effectively with team members to enable efficient completion of tasks in accordance with the organisation's policies and procedures</p> <p>2.2 Knowledge and skills are shared between team</p>

ELEMENT**PERFORMANCE CRITERIA****3. Give and receive support to/from team members**

members

3.1 *Feedback*/assistance is given to other team members in an appropriate manner

3.2 Team members are supported in achieving workplace goals

3.3 Feedback from other team members is acted upon appropriately

Required Skills and Knowledge**REQUIRED SKILLS AND KNOWLEDGE**

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- encouraging others/team members
- following instructions
- interpersonal skills
- listening and using a variety of communication skills
- providing suggestions and information
- reporting information

Required Knowledge

- composition of workplace teams and roles and responsibilities of team members
- non operational and operational communication processes
- techniques for giving and receiving feedback in a constructive manner
- techniques for supporting others

Evidence Guide**EVIDENCE GUIDE****Critical aspects for**

It is essential for this unit that competence be

EVIDENCE GUIDE

assessment and evidence required to demonstrate competency in this unit

demonstrated in the effective communication and contribution to the achievement of tasks consistent with agreed goals

Consistency in performance

Evidence will need to be gathered over time in a variety of team situations including regular work group and occasional or one-off work group

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated workplace environment

Specific resources for assessment

No special requirements

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Teams comprise

two or more people working towards a shared purpose

Appropriate situation to request assistance may include

difficulty meeting timelines
to comply with occupational health and safety requirements
unsure of best method to complete task
to maximise efficiency

Assisting other team members may include

own tasks completed
to comply with occupational health and safety requirements
assistance requested
actions of others do not comply with requirements

RANGE STATEMENT

	other team member appears to be having difficulty completing task
Contribute to workplace goals may include	completion of task achievement of new competencies development of new skills attainment of new knowledge personal development
Activities may include	Working with other members of a team in a work environment or responding in a combat or support role to natural emergencies technological/industrial emergencies civil/political emergencies and non emergency operations including community events public relations - activities sporting events parades festivals
Conditions under which this competency may be required include	hazardous conditions eg adverse weather after dark operations difficult terrain time pressure varying time frames from immediate/short term to long term response operations varying access to equipment/resources necessitating the use of improvised techniques single or multi organisation responses dealing with human behaviours that result from emergency situations non-emergency operations and events eg training and community education
Appropriate feedback on performance may include	acknowledging initiative aptitude ideas performance and assistance

RANGE STATEMENT

Organisation's policy and procedures may vary between sectors and organisations and may include

providing constructive criticism
 legislation relevant to the operation/incident/response
 legislation relevant to the organisation
 operational
 corporate and strategic plans
 operational procedures
 operational performance standards
 organisation's personnel practices
 policy and procedures
 organisation's quality standards

Communication processes may include

established organisation's procedures for recording and reporting
 the use of logs
 notebooks
 pagers
 radios and telephones
 team members may be geographically dispersed and require communication systems and technology to remain in contact

Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Undertake work activities

- 1.1 Work requirements are identified and undertaken
- 1.2 Instructions and directions are understood and implemented
- 1.3 Communication is maintained with team leader advising of progress of task/activity
- 1.4 Personal safety and safety of others is maintained
- 1.5 Any legal requirements and/or ramifications of *activities* are communicated to team leader
- 1.6 *Work area* is determined or selected in accordance with operational or organisation's requirements
- 1.7 Equipment is operated in accordance with the manufacturer's specifications
- 1.8 OH&S and the organisation's policies and procedures

2. Accept responsibilities

- 2.1 Responsibilities are accepted according to the organisation's policy and procedures
- 2.2 Team leader is appraised of the outcome of task/activity
- 2.3 Any activity that exceeds the scope of the defined task is referred to the supervisor

3. Set performance requirements

- 3.1 *Performance requirements* are based on objectives and goals and agreed with supervisor

ELEMENT**PERFORMANCE CRITERIA****4. Maintain team performance**

- 4.1 Individual performance is monitored against defined performance requirements and appropriate action taken to maintain performance if required
- 4.2 Performance of others is monitored and appropriate action is taken through coaching and mentoring to ensure team objectives and goals are met
- 4.3 Supervisor is provided with feedback and constructive advice
- 4.4 Issues which cannot be rectified or addressed are referred to the supervisor for appropriate action according to the organisation's policy
- 4.5 Supervisor is advised of any changes in priorities or tasks
- 4.6 All *required documentation* relevant to performance is completed

5. Act as a team leader as required

- 5.1 Responsibility for the performance of the team is accepted
- 5.2 Goals are set, tasks identified and presented to team members
- 5.3 Instructions and directions are communicated to team members clearly and unambiguously
- 5.4 Team members' concerns and queries are recognised, discussed and dealt with
- 5.5 Any legal requirements and/or ramifications of team activities are communicated to team members
- 5.6 Duties, rosters and responsibilities are allocated to team members having regard to the skills and knowledge required to properly undertake the assignment or task and according to organisation's policy and procedures
- 5.7 Feedback on own performance is provided as required
- 5.8 Level of authority is recognised and adhered to
- 5.9 Operational debrief is conducted in accordance with the organisation's requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicating instructions and directions
- communicating performance expectations
- completing a range of documentation
- encouraging team members
- informal performance counselling
- providing feedback on performance
- representing issues to management
- team building

Required Knowledge

- defined OH&S policies and procedures
- knowledge of current principles and practices
- legal requirements and ramifications of team activities
- method of monitoring performance
- organisation's policy for referring performance issues
- organisation's policy relevant to hours of work and work allocation
- organisation's requirements for documenting team performance and activities
- procedures and methods of setting performance expectations
- required to work in a team
- team members' duties and responsibilities

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent</p>
--	--

	with the evidence guide.
--	--------------------------

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	<p>1.1. Access, interpret and apply <i>compliance documentation</i> and <i>safety requirements</i> relevant to the work activity</p> <p>1.2. Work instructions, plans, operational details are obtained, confirmed and applied to the work activity</p> <p>1.3. The loading/unloading site is made safe and isolated from general traffic flow by appropriate barriers</p>
2. Load the plant	<p>2.1. The dimensions and capacity of the <i>float or trailer</i> to safely carry the plant item is confirmed</p> <p>2.2. Tools and loading equipment selected to carry out tasks are consistent with the requirements of the job, checked for serviceability and any faults are rectified or reported prior to commencement</p> <p>2.3. Preparation of the <i>plant</i> for transportation are confirmed as having been completed</p> <p>2.4. Loading aids, including ramps and bridging materials, are placed and secured in accordance with the trailer or float specifications</p> <p>2.5. Loading procedure is agreed to by operator and/or guide before loading commences</p> <p>2.6. The plant item is moved onto the trailer or float and halted at the designated position</p>
3. Unload the plant	<p>3.1. Unloading procedure is agreed to by operator and/or guide agreed before unloading commences</p> <p>3.2. Unloading aids, including ramps, are placed and secured in accordance with the trailer or float specifications</p> <p>3.3. Securing devices are slackened and removed in a sequence which optimises safety</p>

	<p>3.4. The plant item is moved off the trailer or float and halted at the designated position</p> <p>3.5. Stow loading aids including ramps and bridging materials and securing devices for further use</p>
--	--

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes the ability to carry out the following as required to load and unload plant:

- apply legislative, organisation and site requirements and procedures for loading and unloading plant
- apply operational safety requirements
- safely drive mobile plant
- access interpret and apply technical information
- calculate volume, weights
- maintain equipment records
- apply fault finding techniques
- comply with environmental requirements
- dispose of environmentally sensitive fluids and materials

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes knowledge of the following as required to load and unload plant:

- site and equipment safety requirements
- understanding of required hand signals
- techniques and processes for preparing plant for transportation
- basic motion and restraint theory related to heavy plant on floats or trailers
- basic centre of gravity and balance theory related to heavy plant on floats or trailers
- types, operation, uses and imitations of load securing equipment
- site isolation and traffic control responsibilities and authorities
- materials safety data sheet
- levelling techniques
- JSA's/safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for loading and unloading plant • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of loading and unloading plant • working with others to undertake and complete the loading and unloading plant that meets all of the required outcomes • consistent timely completion of loading and unloading plant that safely, effectively and efficiently meets the required outcomes
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • Assessment of this competency requires typical resources normally used in a resources and infrastructure sector environment. Selection and use of resources for particular worksites may differ due to the site circumstances. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those

	<p>required on the job.</p> <ul style="list-style-type: none"> • Customisation of assessment and delivery environment should sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Where applicable, physical resources should include equipment modified for people with disabilities. Access must be provided to appropriate learning and/or assessment support when required.
Method of assessment	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirements, procedures and techniques for the safe, effective and efficient achievement of required outcomes • consistent achievement of required outcomes • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and complete the loading and unloading plant
Guidance information for assessment	<p>Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work

situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Compliance documentation may include:	<ul style="list-style-type: none"> • legislative, organisation and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • graphical instructions, signage, work schedules/plans/specifications, load tables, tie-down instructions and charts and materials safety data sheet (MSDS) • safe work procedures related to the loading and unloading of plant items from floats or trailers • regulatory/legislative requirements pertaining to the loading and unloading of plant items from floats or trailers • quality requirements including those relating to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
Safety requirements may include:	<ul style="list-style-type: none"> • State or Territory legislation and regulations, organisational safety policies and procedures, and project safety plan. This may include protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances • personal protective equipment prescribed under legislation, regulation and workplace policies and practices • safe operating procedures that include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, securing devices under strain, centre of gravity and balance requirements, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public

	<ul style="list-style-type: none"> • safe parking practices that include but not be limited to ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement • emergency procedures that include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation
The float or trailer may include:	<ul style="list-style-type: none"> • of generic construction or purpose designed for a particular item or range of plant • normally have self loading aids although some may require an established drive on/off ramp
Plant may include:	<ul style="list-style-type: none"> • loaded and unloaded may be wheeled or tracked

Unit Sector(s)

Load Handling

Competency field

Refer to Unit Sector(s).

Co-requisite units

Not applicable.

RIIMPO315A Conduct tractor operations

Modification History

Not applicable.

Unit Descriptor

This unit covers conducting tractor operations in the civil construction industry. It includes: planning and preparing; conducting machine pre-operational checks; operating the tractor; selecting, removing and fitting attachments; relocating the tractor; and carrying out machine operator maintenance and cleaning up.

Application of the Unit

This unit is appropriate for those working in mobile plant operator roles, at worksites within:

- Civil construction

Tractors must be registered to drive and operate on public roads.

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare for operations	1.1. Access, interpret and apply <i>compliance documentation</i> relevant to conducting <i>tractor operations</i> 1.2. Obtain, confirm and apply <i>work instructions</i> to the allotted task 1.3. Obtain, confirm and apply <i>safety requirements</i> to the allotted task 1.4. Identify, obtain and implement signage requirements from the project traffic management plan 1.5. Select plant, tools and equipment to carry out tasks that are consistent with the requirements of the job and check them for serviceability and rectify or report any faults 1.6. Identify, confirm and apply <i>environmental</i> protection requirements from the project environmental management plan to the allotted task
2. Conduct machine pre-operational checks	2.1. Carry out pre-start, start-up, park and shutdown procedures 2.2. Check <i>tractor controls and functions</i> for serviceability and rectify or report any faults
3. Operate tractor	3.1. Identify site hazards associated with tractor operations and use safe operating techniques to minimise risk 3.2. Identify and apply operating techniques for tractor to achieve optimum output while achieving specified tolerances 3.3. Operate tractor to work instructions
4. Select, remove and fit attachments	4.1. Select <i>attachment</i> for the task 4.2. Remove and fit attachment 4.3. Test attachment to ensure correct fitting and operation 4.4. Use attachment in accordance with recommendations and design limits 4.5. Clean and store removed attachments in designated location

5. Relocate tractor	5.1. Move tractor safely between worksites, observing relevant codes and traffic management requirements 5.2. Prepare tractor for relocation
6. Carry out machine operator maintenance	6.1. <i>Safely park</i> , shutdown and prepare tractor for maintenance 6.2. Conduct inspection and fault finding 6.3. Remove and replace defective parts safely and in accordance with instructions 6.4. Carry out regular <i>programmed maintenance</i> tasks
7. Clean up	7.1. Clear work area and dispose of or recycle <i>materials</i> 7.2. Clean, check, maintain and store plant, <i>tools and equipment</i>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct tractor operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply tractor and attachment operating techniques
- interpret drawings and sketches
- apply machine attachments changing procedures

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct tractor operations:

- tractor types, characteristics, technical capabilities and limitations
- site and equipment safety requirements
- tractor and attachment operating techniques related to essential tasks
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities

- materials characteristics
- materials safety data sheet and materials handling methods
- project quality requirements
- civil construction terminology
- methods of changing machine attachments
- safe operating techniques in all terrain
- JSAs/Safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for conducting tractor operations • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of tractor operations, which are to include: <ul style="list-style-type: none"> • the minimum of three of the operations listed in the Range Statement, and • the fitting and removal of at least one attachment • working with others to undertake and complete tractor operations that meet all of the required outcomes • consistent timely completion of tractor operations that safely, effectively and efficiently meet the required outcomes
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and

	<p>sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.</p> <ul style="list-style-type: none"> • The assessment environment should not disadvantage the participant. Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply <i>compliance documentation</i> relevant to <i>roller operations</i> in the civil construction industry 1.2. Obtain, confirm and apply <i>work instructions</i> to the allotted task 1.3. Obtain, confirm and apply <i>safety requirements</i> to the allotted task 1.4. Identify, obtain and implement signage requirements from the project traffic management plan 1.5. Select plant, tools and equipment to carry out tasks that are consistent with the requirements of the job, and check them for serviceability and rectify or report any faults 1.6. Identify, confirm and apply <i>environmental protection requirements</i> to the allotted task
2. Conduct machine pre-operational checks	2.1. Carry out Pre-start, start-up, park and shutdown procedures 2.2. Check, rectify or report <i>roller controls and functions</i> for serviceability and any faults
3. Operate roller	3.1. Identify site hazards and use safe operating techniques to minimise risk 3.2. Identify and apply operating techniques to achieve optimum output while achieving specified tolerances 3.3. Operate roller to work instructions in accordance with procedures
4. Select, remove and fit attachments	4.1. Select <i>attachment</i> for the task 4.2. Remove and fit attachment 4.3. Test attachment to ensure correct fitting and operation 4.4. Use attachment in accordance with recommendations and design limits 4.5. Clean and store removed attachments in designated location
5. Relocate the roller	5.1. Move the roller safely between worksites, observing relevant codes and traffic management requirements

	5.2.Prepare the roller for relocation
6. Carry out machine operator maintenance	6.1. <i>Safely park</i> , shutdown and prepare the roller for maintenance 6.2.Conduct inspection and fault finding 6.3.Remove and replace defective parts safely and effectively 6.4.Carry out regular <i>programmed maintenance</i> tasks
7. Clean up	7.1.Clear work area and dispose of or recycle <i>materials</i> 7.2.Clean, check, maintain and store plant, <i>tools and equipment</i>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct roller operations:

- apply legislative, organisation and site requirements and procedures
- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply attachment and roller operating techniques
- interpret drawings and sketches

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct roller operations:

- roller types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- basic principles of soil compaction
- site and equipment safety requirements
- rolling/compacting techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities

- materials safety data sheet and materials handling methods
- project quality requirements
- civil construction terminology
- methods of changing machine attachments
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- levelling techniques
- JSA's/Safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions for conducting roller operations in the civil construction industry
- implementation of requirements, procedures and techniques for the safe, effective and efficient completion of roller operations in the civil construction industry, which are to include:
 - operations performed in a minimum of three different soil types and include the mandatory tasks of:
 - compacting materials to pattern and density
 - sealing and finishing
 - the removal and fitting of at least one attachment
- working with others to undertake and complete roller operations in the civil construction industry that meet all of the required outcomes

	<ul style="list-style-type: none"> • consistent timely completion of roller operations in the civil construction industry that safely, effectively and efficiently meet the required outcomes
<p>Context of and specific resources for assessment</p>	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
<p>Method of assessment</p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand

	<p>testimonial evidence of the candidate's:</p> <ul style="list-style-type: none"> • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes, which are to include operations performed in a minimum of three different soil types and include the mandatory tasks of: <ul style="list-style-type: none"> • compacting materials to pattern and density • sealing and finishing • the removal and fitting of at least one attachment • consistently achieving the required outcomes • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and complete roller operations in the civil construction industry

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply <i>compliance documentation</i> relevant to conduct <i>backhoe/loader tasks</i> 1.2. Obtain, confirm and apply <i>work instructions</i> to the allotted task 1.3. Obtain, confirm and apply <i>safety requirements</i> to the allotted task 1.4. Identify, obtain and implement signage requirements from the project traffic management plan 1.5. Select plant, <i>tools and equipment</i> to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults 1.6. Identify, confirm and apply <i>environmental</i> protection requirements from the project environmental management plan, to the allotted task
2. Conduct machine pre-operational checks	2.1. Carry out <i>pre-start, start-up, park and shutdown procedures</i> 2.2. Check machine controls and functions, including implements or other attachments, brakes and manoeuvrability for serviceability and rectify or report any faults
3. Operate backhoe/ loader	3.1. Identify site hazards associated with backhoe/loader operations and use safe operating techniques to minimise risk 3.2. Identify and apply operating techniques for backhoe/loader to achieve optimum output in accordance with design specifications while achieving specified tolerances 3.3. Operate machine to work instructions
4. Lift, carry and place materials	4.1. Conduct <i>communication</i> practices associated with transportation and lifting of <i>materials</i> 4.2. Select and attach slings and lifting gear in accordance with safe working load requirements 4.3. Establish weight of load

	<p>4.4.Position and locate machinery to ensure stability to effectively shift materials according to job specifications</p> <p>4.5.Shift load safely and effectively</p> <p>4.6.Move load in accordance with conventional hand and audible signals</p>
5. Select, remove and fit attachments	<p>5.1.Select <i>attachment</i> for the task</p> <p>5.2.Remove and fit attachment</p> <p>5.3.Test attachment to ensure correct fitting and operation</p> <p>5.4.Use attachment in accordance with recommendations and design limits</p> <p>5.5.Clean and store removed attachments in designated location</p>
6. Relocate the backhoe/ loader	<p>6.1.Move backhoe/loader safely between worksites, observing relevant codes and traffic management requirements</p> <p>6.2.Prepare backhoe/loader for relocation</p>
7. Carry out machine operator maintenance	<p>7.1.Park safely, shutdown and prepare machine for <i>maintenance</i></p> <p>7.2.Conduct inspection and fault finding</p> <p>7.3.Remove, replace safely and effectively defective parts</p> <p>7.4.Carry out regular programmed maintenance tasks</p>
8. Clean up	<p>8.1.Clear work area and dispose of or recycle materials in accordance with project environmental management plan</p> <p>8.2.Clean, check, maintain and store plant, tools and equipment</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct backhoe/loader operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply techniques for calculating safe working loads
- apply backhoe/loader techniques related to essential tasks
- interpret drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- interpret materials safety data sheet and materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- carry out basic earthworks calculations
- apply levelling techniques
- interpret JSA's/Safe work method statement

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct backhoe/loader operations:

- backhoe/loader types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- techniques for calculating safe working loads
- backhoe/loader techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheet and materials handling methods
- project quality requirements
- civil construction terminology
- methods of changing machine attachments
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- levelling techniques
- JSA's/Safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for conducting backhoe/loader operations • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of backhoe/ loader operations, including: <ul style="list-style-type: none"> • in a minimum of two different soil types and • to include the mandatory tasks: mixing materials, stripping/spreading topsoils and materials, trench excavation, backfilling, lifting and carrying materials, loading dump trucks, wagons, hoppers, chutes, and cutting/boxing • working with others to undertake and complete backhoe/ loader operations that meet all of the required outcomes • consistent timely completion of backhoe/loader operations that safely, effectively and efficiently meet the required outcomes
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • The assessment environment should not

	<p>disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.</p> <ul style="list-style-type: none"> • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
<p>Method of assessment</p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes, including: <ul style="list-style-type: none"> • in a minimum of two different soil types and • the mandatory tasks: mixing materials, stripping/spreading topsoils and materials, trench excavation, backfilling, lifting and carrying materials, loading dump trucks, wagons, hoppers, chutes, and cutting/boxing • consistently achieving the required outcomes

	<ul style="list-style-type: none"> • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and complete the backhoe/loader operations
Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Relevant compliance documentation may include:</p>	<ul style="list-style-type: none"> • legislative, organisation and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • codes of practice • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
<p>A backhoe/loader is:</p>	<ul style="list-style-type: none"> • a self-propelled wheeled machine with a main structural support designed to carry both a front-mounted bucket loading mechanism and a rear-mounted backhoe
<p>Backhoe/loader tasks are to include:</p>	<ul style="list-style-type: none"> • mixing materials, stripping/spreading topsoils and materials, trench excavation, backfilling, lifting and carrying materials, loading dump trucks, wagons, hoppers, chutes and cutting/boxing
<p>Backhoe/loader tasks may include:</p>	<ul style="list-style-type: none"> • scrub clearing, ripping, compacting, cutting, batters and benches, rock breaking, demolition and any activities associated with the attachments listed
<p>A skid steer loader is:</p>	<ul style="list-style-type: none"> • a self-propelled wheeled machine in which steering is accomplished by skidding or reversing the wheels or tracks on one side of the machine. It has an integral front-mounted

	<p>bucket-supporting structure and linkage, which loads or excavates through forward motion of the machine, and lifts, transports and discharges material</p>
Skid steer loader may include:	<ul style="list-style-type: none"> • compacting, truck excavation, lifting and carrying materials, cutting batters and benches, rock breaking and any activities associated with attachments listed
Skid steer loader tasks are to include:	<ul style="list-style-type: none"> • stripping/ spreading topsoil and materials, backfilling, lifting, loading vehicles, excavations, mixing materials and site clean up
Work instructions may include:	<ul style="list-style-type: none"> • plans, specifications, quality requirements and operational details • quality requirements may include but not be limited to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction
Safety requirements are to be:	<ul style="list-style-type: none"> • in accordance with State or Territory legislation and regulations, organisational safety policies and procedures, and project safety plan
Safety requirements may include:	<ul style="list-style-type: none"> • protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances • personal protective equipment is to include that prescribed under legislation, regulation and workplace policies and practices • safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public • safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement

	<ul style="list-style-type: none"> hazards and risks may include but not be limited to uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation
Tools and equipment are to include:	<ul style="list-style-type: none"> hand tools and maintenance equipment relevant to the particular loader and may include lifting equipment
Environmental requirements are to include:	<ul style="list-style-type: none"> organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management
Communications practices are to include:	<ul style="list-style-type: none"> verbal instructions and fault reporting and may include two way radio, hand signals, mobile phone, site specific instructions, written instructions or instructions related to job/task on site meeting processes may include notification/ scheduling (time, place, purpose), task discussions and local coordination of procedural and operational issues
Materials may include:	<ul style="list-style-type: none"> clays, silts, stone, gravel, mud, rock, sand, topsoil, blended materials, organic materials, typical construction site materials/waste and bituminous mixes rock types may include metamorphic, igneous and sedimentary
Attachments may include:	<ul style="list-style-type: none"> extending devices, tilt bucket, buckets, compaction wheel, ripper, plate compactor, rock breaker, auger, broom, mower/slasher, forklift, 4 in 1 bucket and free/rock grab
Operator maintenance is to include:	<ul style="list-style-type: none"> cleaning, authorised servicing and the monitoring, recording and reporting of faults. It may also include the conduct of authorised minor replacements and the provision of assistance to maintenance personnel during maintenance and repair activities

Unit Sector(s)

Mobile Plant Operations

Competency field

Refer to Unit Sector(s).

Co-requisite units

Not applicable.

RIIMPO320A Conduct civil construction excavator operations

Modification History

Not applicable.

Unit Descriptor

This unit covers the conduct excavator operations in the civil construction industry. It includes: planning and preparing; conducting machine pre-operational checks; operating the machine; lifting, carrying and placing materials; selecting, removing and fitting attachments; relocating the machine; carrying out machine operator maintenance; and cleaning up.

Application of the Unit

This unit is appropriate for those working in mobile plant operator roles, at worksites within:

- Civil construction

Operator license issued by OHS authority may be required in some states or territories and some excavators must be registered to drive and operate on public roads.

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply compliance documentation relevant to excavator operations tasks 1.2. Obtain, confirm and apply work instructions to the allotted task 1.3. Obtain, confirm and apply safety requirements to the allotted task 1.4. Obtain, identify and implement signage requirements from the project traffic management plan 1.5. Select plant, tools and equipment to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults 1.6. Identify, confirm and apply environmental protection requirements from the project environmental management plan, to the allotted task
2. Conduct machine preoperational checks	2.1. Carry out pre-start, start-up, park and shutdown procedures 2.2. Check excavator controls and functions, including implements or other attachments, brakes and manoeuvrability for serviceability and report or rectify any faults
3. Operate excavator	3.1. Identify site hazards associated with excavator operations and use safe operating techniques to minimise risk 3.2. Identify and apply operating techniques for excavator to achieve optimum output in accordance with design specifications while achieving specified tolerances 3.3. Operate excavator to work instructions
4. Lift, carry and place materials	4.1. Conduct communication practices associated with transportation and lifting of materials 4.2. Establish weight of load

	<p>4.3. Select, attach and use slings and lifting gear in accordance with safe working load requirements</p> <p>4.4. Position machinery ensuring stability and locate to effectively shift materials according to job specifications</p> <p>4.5. Shift load safely and effectively</p> <p>4.6. Move load in accordance with conventional hand and audible signals</p>
5. Select, remove and fit attachments	<p>5.1. Select <i>attachment</i> for the task</p> <p>5.2. Remove and fit attachment according</p> <p>5.3. Test attachment to ensure correct fitting and operation</p> <p>5.4. Use attachment in accordance with recommendations and design limits</p> <p>5.5. Remove, clean and store attachments in designated location</p>
6. Relocate the excavator	<p>6.1. Move excavator safely between worksites, observing relevant codes and traffic management requirements</p> <p>6.2. Prepare excavator for relocation</p>
7. Carry out machine operator maintenance	<p>7.1. Safely park-up, shutdown and prepare the machine for <i>maintenance</i></p> <p>7.2. Conduct inspection and fault finding</p> <p>7.3. Remove and replace defective parts safely and effectively</p> <p>7.4. Carry out regular programmed maintenance tasks</p>
8. Clean up	<p>8.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan</p> <p>8.2. Clean, check, maintain and store plant, tools and equipment</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly

for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct excavator operations:

- apply legislative, organisation and site requirements and procedures
- apply basic principles of soil technology for civil works
- apply site and equipment safety requirements
- apply techniques for calculating safe working loads
- apply excavator and attachment operating techniques related to essential tasks
- interpret drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- interpret materials safety data sheets and apply materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- carry out basic earthworks calculations
- apply levelling techniques
- apply JSA's/Safe work method statement

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct excavator operations:

- excavator types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- techniques for calculating safe working loads
- excavator and attachment operating techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheets and materials handling methods
- project quality requirements
- civil construction terminology
- methods of changing machine attachments
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- levelling techniques
- JSA's/Safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for conducting excavator operations • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of excavator operations, including: <ul style="list-style-type: none"> • in a minimum of two different soil types; and • to include the mandatory tasks of loading, bulk excavation, backfilling, trench excavation, stockpiling, battering and benching • working with others to undertake and complete excavator operations that meet all of the required outcomes • consistent timely completion of excavator operations that safely, effectively and efficiently meet the required outcomes • laser guidance or ATS are not to be used to assist in control of the machine during assessment
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment

	<p>skills.</p> <ul style="list-style-type: none"> • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
<p>Method of assessment</p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes, including: <ul style="list-style-type: none"> • in a minimum of two different soil types; and • to include the mandatory tasks of loading, bulk excavation, backfilling, trench excavation, stockpiling, battering and benching • consistently achieving the required outcomes

	<ul style="list-style-type: none"> • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and complete excavator operations
Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Relevant compliance documentation may include:</p>	<ul style="list-style-type: none"> • legislative, organisation and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • codes of practice • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
<p>An excavator is:</p>	<ul style="list-style-type: none"> • a self-propelled crawler or wheeled machine with an upper structure capable of a minimum of 360 degree rotation which excavates, elevates, swings and discharges material by the action of a bucket fitted to the boom and arm or telescoping boom, without moving the chassis or undercarriage during any part of the working cycle of the machine • are to include tracked and may include wheeled excavators
<p>Excavator operations tasks are to include:</p>	<ul style="list-style-type: none"> • loading, bulk excavation, backfilling, trench excavation, stockpiling, battering and benching
<p>Excavator operations tasks may include:</p>	<ul style="list-style-type: none"> • compacting materials, demolition, rock breaking, removal of trees and ripping, lifting materials, cutting/boxing, laying pipes, cut and fill, mixing materials, stripping/spreading

	topsoil and materials
Work instructions may include:	<ul style="list-style-type: none"> plans, specifications, quality requirements and operational details quality requirements may include but not be limited to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction
Safety requirements are to be:	<ul style="list-style-type: none"> in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan
Safety requirements may include:	<ul style="list-style-type: none"> protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances personal protective equipment is to include that prescribed under legislation, regulation and workplace policies and practices safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement hazards and risks may include but not be limited to uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation
Tools and equipment are to	<ul style="list-style-type: none"> hand tools and maintenance equipment relevant to the particular loader

include:	
Environmental requirements are to include:	<ul style="list-style-type: none"> organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management
Communications practices are to include:	<ul style="list-style-type: none"> verbal instructions and fault reporting and may include 2-way radio, hand signals, mobile phone, site specific instructions, written instructions or instructions related to job/task on site meeting processes may include notification/ scheduling (time, place, purpose), task discussions and local coordination of procedural and operational issues
Materials may include:	<ul style="list-style-type: none"> clays, silts, stone, gravel, mud, rock, sand, topsoil, blended materials, organic materials, typical construction site materials/waste and bituminous mixes rock types may include metamorphic, igneous and sedimentary
Attachments may include:	<ul style="list-style-type: none"> ripper/tyne, auger, tilt bucket, rock breaker, buckets, lifting device, vibrating compaction plate and compaction wheel
Operator maintenance is to include:	<ul style="list-style-type: none"> cleaning, authorised servicing and the monitoring, recording and reporting of faults. It may also include the conduct of authorised minor replacements and the provision of assistance to maintenance personnel during maintenance and repair activities

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	<p>1.1. Access, interpret and apply <i>compliance documentation</i> relevant to <i>wheeled front end loader tasks</i></p> <p>1.2. Obtain, confirm and apply <i>work instructions</i> to the allotted task</p> <p>1.3. Obtain, confirm and apply <i>safety requirements</i> to the allotted task</p> <p>1.4. Obtain, identify and implement signage requirements from the project traffic management plan</p> <p>1.5. Select plant, <i>tools and equipment</i> to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults</p> <p>1.6. Identify, confirm and apply <i>environmental protection requirements</i> from the project</p>

ELEMENT	PERFORMANCE CRITERIA
	environmental management plan to the allotted task
2. Conduct machine pre-operational checks	2.1. Carry out pre-start, start-up, park and shutdown procedures 2.2. Check front end loader controls and functions, including implements or other attachments, brakes and manoeuvrability for serviceability and rectify or report any faults
3. Operate front end loader	3.1. Identify site hazards associated with front end loader operations and use safe operating techniques to minimise risk 3.2. Identify and apply operating techniques for front end loader to achieve optimum output in accordance with design specifications while achieving specified tolerances 3.3. Operate front end loader to work instructions
4. Attach, secure, lift, carry and place materials	4.1. Conduct communication practices associated with transportation and lifting of materials 4.2. Establish weight of load 4.3. Select, attach and use slings and lifting gear in accordance with safe working load requirements 4.4. Position machinery to ensure stability and locate to effectively shift materials according to job specifications 4.5. Shift load safely and effectively 4.6. Move load in accordance with conventional hand and audible signals
5. Select, remove and fit attachments	5.1. Select attachment for the task 5.2. Remove and fit attachment 5.3. Test attachment to ensure correct fitting and operation 5.4. Use attachment in accordance with recommendations and design limits 5.5. Clean and store removed attachments in designated location
6. Relocate the front end loader	6.1. Move front end loader safely between worksites, observing relevant codes and traffic management requirements 6.2. Prepare front end loader for relocation
7. Carry out machine operator maintenance	7.1. Safely park, shutdown and prepare machine for maintenance

ELEMENT	PERFORMANCE CRITERIA
	7.2. Conduct inspection and fault finding 7.3. Remove and replace defective parts safely and effectively 7.4. Carry out regular programmed maintenance tasks
8. Clean up	8.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan 8.2. Clean, check, maintain and store plant tools and equipment

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct wheeled front end loader operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply techniques for calculating safe working loads
- apply front end loader and attachment operating techniques related to essential tasks
- interpret drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities

REQUIRED SKILLS AND KNOWLEDGE

- interpret materials safety data sheets and apply materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- carry out basic earthworks calculations
- apply levelling techniques
- apply JSA's/Safe work method statement

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct wheeled front end loader operations:

- front end loader types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- techniques for calculating safe working loads
- front end loader and attachment operating techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheets and materials handling methods
- project quality requirements
- civil construction terminology
- methods of changing machine attachments
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- levelling techniques
- JSA's/Safe work method statement

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for conducting wheeled front end loader operations • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of wheeled front end loader operations, including: <ul style="list-style-type: none"> • in a minimum of two different soil types; and • to include the mandatory tasks of mixing materials, stripping/spreading topsoil and materials, loading, cutting/boxing, backfilling, lifting and carrying materials • working with others to undertake and complete wheeled front end loader operations that meet all of the required outcomes • consistent timely completion of wheeled front end loader operations that safely, effectively and efficiently meet the required outcomes
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non Englishspeaking background may have second

EVIDENCE GUIDE	
	<p>language issues.</p> <ul style="list-style-type: none"> • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
Method of assessment	<p>This unit maybe assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes, including: <ul style="list-style-type: none"> • in a minimum of two different soil types; and • to include the mandatory tasks of mixing materials, stripping/spreading topsoil and materials, loading, cutting/boxing, backfilling, lifting and carrying materials • consistently achieving the required outcomes • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and complete wheeled front end loader operations
Guidance information for assessment	<p>Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different

RANGE STATEMENT	
work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Relevant compliance documentation may include:	<ul style="list-style-type: none"> legislative, organisation and site requirements and procedures manufacturer's guidelines and specifications Australian standards codes of practice Employment and workplace relations legislation Equal Employment Opportunity and Disability Discrimination legislation
A wheeled front end loader is:	<ul style="list-style-type: none"> a self-propelled wheeled machine with an integral front-mounted bucket-supporting structure and linkage with integral quick coupler it loads or excavates through forward motion of the machine, and lifts, transports and discharges material
Front end loader tasks are to include:	<ul style="list-style-type: none"> mixing materials, stripping/spreading topsoil and materials, loading, cutting/boxing, backfilling, lifting and carrying materials
Work instructions may include:	<ul style="list-style-type: none"> plans, specifications, quality requirements and operational details quality requirements may include but not be limited to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction
Safety requirements are to be:	<ul style="list-style-type: none"> in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan
Safety requirements may include:	<ul style="list-style-type: none"> protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances personal protective equipment is to include that prescribed under legislation, regulation

RANGE STATEMENT	
	<p>and workplace policies and practices</p> <ul style="list-style-type: none"> • safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public • safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement • hazards and risks may include but not be limited to uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials • emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation
Tools and equipment are to include:	<ul style="list-style-type: none"> • hand tools and maintenance equipment relevant to the particular loader
Environmental requirements are to include:	<ul style="list-style-type: none"> • organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management
Communications practices are to include:	<ul style="list-style-type: none"> • verbal instructions and fault reporting and may include two way radio, hand signals, mobile phone, site specific instructions, written instructions or instructions related to job/task • on site meeting processes may include notification/ scheduling (time, place, purpose), task discussions and local coordination of procedural and operational issues
Materials may include:	<ul style="list-style-type: none"> • clays, silts, stone, gravel, mud, rock, sand, topsoil, blended materials, organic materials, typical construction site materials/waste and bituminous mixes

RANGE STATEMENT	
	<ul style="list-style-type: none"> rock types may include metamorphic, igneous and sedimentary
Attachments are to include:	<ul style="list-style-type: none"> a bucket (general purpose or multipurpose)
Attachments may include:	<ul style="list-style-type: none"> rippers/scarifiers and/or other attachments approved by the manufacturer
Operator maintenance is to include:	<ul style="list-style-type: none"> cleaning, authorised servicing and the monitoring, recording and reporting of faults <p>It may also include the conduct of authorised minor replacements and the provision of assistance to maintenance personnel during maintenance and repair activities</p>

Co-requisite units

Co-requisite units	

RIIMPO322A Conduct civil construction tracked front end loader operations

Modification History

Not applicable.

Unit Descriptor

This unit covers conducting tracked front end loader operations in the civil construction industry. It includes: planning and preparing; conducting machine pre-operational checks; operating the machine; lifting, carrying and placing materials; relocating the machine; carrying out machine operator maintenance; and cleaning up.

Application of the Unit

This unit is appropriate for those working in mobile plant operator roles, at worksites within:

- Civil construction

Operator license issued by OHS authority may be required in some states or territories and tracked loaders must be registered to drive and operate on public roads.

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent</p>
--	--

	with the evidence guide.
--	--------------------------

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	<p>1.1. Access, interpret and apply compliance documentation relevant to tracked front end loader tasks</p> <p>1.2. Obtain, confirm and apply work instructions to the allotted task</p> <p>1.3. Obtain, confirm and apply safety requirements to the allotted task</p> <p>1.4. Identify, obtain and implement signage requirements from the project traffic management plan</p> <p>1.5. Select plant, tools and equipment to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults</p> <p>1.6. Identify, confirm and apply environmental protection requirements from the project environmental management plan, to the allotted task</p>
2. Conduct machine pre-operational checks	<p>2.1. Carry out pre-start, start-up, park and shutdown procedures</p> <p>2.2. Check front end loader controls and functions, including implements or other attachments, brakes and manoeuvrability for serviceability and rectify or report any faults</p>
3. Operate front end loader	<p>3.1. Identify site hazards associated with front end loader operations and safe operating techniques are used to minimise risk</p> <p>3.2. Identify and apply operating techniques for front end loader to achieve optimum output in accordance with design specifications while achieving specified tolerances</p> <p>3.3. Operate front end loader to work instructions</p>
4. Attach, secure, lift, carry and	4.1. Conduct communication practices

place	<p>associated with transportation and lifting of materials</p> <p>4.2. Establish weight of load</p> <p>4.3. Select, attach and use slings and lifting gear in accordance with safe working load requirements</p> <p>4.4. Position machinery to ensure stability and locate to effectively shift materials according to job specifications</p> <p>4.5. Shift load safely and effectively</p> <p>4.6. Move load in accordance with conventional hand and audible signals</p>
5. Relocate the front end loader	<p>5.1. Move front end loader safely between work sites, observing relevant codes and traffic management requirements</p> <p>5.2. Prepare front end loader for relocation</p>
6. Carry out machine operator maintenance	<p>6.1. Safely park front, shutdown and prepare machine for <i>maintenance</i></p> <p>6.2. Conduct inspection and fault finding</p> <p>6.3. Remove and replace defective parts safely and effectively</p> <p>6.4. Carry out regular programmed maintenance tasks</p>
7. Clean up	<p>7.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan</p> <p>7.2. Clean, check, maintain and store plant, tools and equipment</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct tracked front end loader operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements

- apply techniques for calculating safe working loads
- apply front end loader and attachment operating techniques related to essential tasks
- interpret drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- interpret materials safety data sheets and apply materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- carry out basic earthworks calculations
- apply levelling techniques
- apply JSA's/Safe work method statement requirements

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct tracked front end loader operations:

- tracked front end loader types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- techniques for calculating safe working loads
- front end loader and attachment operating techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheets and materials handling methods
- project quality requirements
- civil construction terminology
- methods of changing machine attachments
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- levelling techniques
- JSA's/Safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction

with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for conducting tracked front end loader operations • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of tracked front end loader operations, including: <ul style="list-style-type: none"> • in a minimum of two different soil types; and • are to include the mandatory tasks of mixing materials, stripping/spreading topsoil and materials, loading, cutting/boxing, backfilling, lifting and carrying materials • working with others to undertake and complete tracked front end loader operations that meet all of the required outcomes • consistent timely completion of tracked front end loader operations that safely, effectively and efficiently meet the required outcomes

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply compliance documentation relevant to grader operations tasks 1.2. Obtain, confirm and apply work instructions to the allotted task 1.3. Obtain, confirm and apply safety requirements to the allotted task 1.4. Resolve coordination requirements with others at the site prior to commencing and during work activities 1.5. Identify, obtain and implement signage requirements from the project traffic management plan 1.6. Select plant, tools and equipment to carry out tasks that are consistent with the requirements of the job, check them for serviceability and rectify or report any faults 1.7. Identify, confirm and apply environmental protection requirements from the project environmental management plan, to the allotted task
2. Conduct machine pre-operational checks	2.1. Carry out pre-start, start-up, park and shutdown procedures 2.2. Recognise and respond to hazardous and emergency situations as required 2.3. Check grader controls and functions, including implements or other attachments, brakes and manoeuvrability for serviceability and rectify or report any faults
3. Operate grader	3.1. Identify site hazards associated with grader operations and use safe operating techniques to minimise risk 3.2. Identify and apply operating techniques for grader to achieve optimum output in accordance with design specifications while achieving specified tolerances

	3.3. Operate grader to work instructions
4. Select, remove and fit attachments	<p>4.1. Select <i>attachment</i> for the task</p> <p>4.2. Remove and fit attachment</p> <p>4.3. Test attachment to ensure correct fitting and operation</p> <p>4.4. Use attachment in accordance with recommendations and design limits</p> <p>4.5. Clean and store removed attachments in designated location</p>
5. Relocate the grader	<p>5.1. Move grader safely between worksites, observing relevant codes and traffic management requirements</p> <p>5.2. Prepare grader for relocation</p>
6. Carry out machine operator maintenance	<p>6.1. Safely park, shutdown and prepare machine for <i>maintenance</i></p> <p>6.2. Conduct inspection and fault finding</p> <p>6.3. Remove and replace defective parts safely and effectively</p> <p>6.4. Carry out regular programmed maintenance and housekeeping tasks</p> <p>6.5. Maintain and process records</p>
7. Clean up	<p>7.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan</p> <p>7.2. Clean, check, maintain and store plant, tools and equipment</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to conduct grader operations:

- apply legislative, organisation and site requirements and procedures
- apply site and equipment safety requirements
- apply grader operating techniques related to essential tasks, including:
 - apply cut and fill techniques

- apply levelling techniques
- construct drains
- form and carry a windrow
- tow equipment/plant
- apply processes for interpreting drawings and sketches
- apply operational, maintenance and basic diagnostic procedures
- apply site isolation and traffic control responsibilities and authorities
- interpret materials safety data sheets and apply materials handling methods
- apply project quality requirements
- use civil construction terminology
- apply methods of changing machine attachments
- apply safe operating techniques in all terrain
- carry out basic earthworks calculations
- apply JSA's/Safe work method statement procedures
- apply diagnostic techniques
- apply operations directing techniques
- apply driving techniques
- apply hazardous goods handling techniques
- interpret plans, reports, maps, specifications
- apply lifting techniques
- organise work tasks
- apply defect reporting requirements
- apply safe work practices
- use communications equipment
- use computer systems
- use hand and power tools

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to conduct grader operations:

- site risk control procedures
- site and equipment health and safety procedures, including:
 - site isolation and traffic control responsibilities and authorities
 - materials safety data sheets (MSDS) and materials handling methods
 - JSA's/Safe work method statement
 - hazard identification and response procedures
 - site and project personal protective equipment requirements
- site and project environmental requirements and constraints
- site and project quality requirements
- site and project communication procedures

- site operational procedures
- civil construction activity sequences of road construction, earthworks and drainage
- civil construction terminology
- processes for interpreting drawings and sketches
- site soil and survey data
- basic principles of soil technology for civil works
- grader types, characteristics, technical capability and limitations
- grader pre-start, start-up, operating and shut-down procedures and techniques
- grader and attachment operating techniques related to essential tasks, including:
 - safe operating techniques in all terrain
 - levelling techniques
- operational, maintenance and basic diagnostic procedures
- methods of changing machine attachments
- site record keeping requirements
- basic earthworks calculations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for conducting grader operations • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of grader operations, including: <ul style="list-style-type: none"> • in a minimum of two different soil types and • to include the mandatory tasks of cutting and maintaining drains, forming/upgrading/maintaining roads, mixing/ spreading materials, scarifying and ripping, cutting and trimming of batters and trimming of road sub-grades and pavements

	<ul style="list-style-type: none"> • working with others to undertake and complete grader operations that meet all of the required outcomes • consistent timely completion of grader operations that safely, effectively and efficiently meet the required outcomes • laser guidance or ATS are not to be used to assist in control of the machine during assessment
<p>Context of and specific resources for assessment</p>	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
<p>Method of assessment</p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment</p>

	<p>methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes, including: <ul style="list-style-type: none"> • in a minimum of two different soil types, and • to include the mandatory tasks of cutting and maintaining drains, forming/upgrading/ maintaining roads, mixing/ spreading materials, scarifying and ripping, cutting and trimming of batters and trimming of road sub-grades and pavements • consistently achieving the required outcomes • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and complete grader operations
Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Relevant compliance documentation may include:</p>	<ul style="list-style-type: none"> • legislative, organisation and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • codes of practice

	<ul style="list-style-type: none"> • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
A grader:	<ul style="list-style-type: none"> • is a self-propelled articulating or rigid framed wheeled machine, designed to cut, move and place construction materials using a centrally mounted blade and may include forward and/or rear mounted rippers/scarifiers • the blade and attachment controls are normally hydraulic; however, they may be mechanical
Grader tasks are to include:	<ul style="list-style-type: none"> • cutting and maintaining drains, forming/upgrading/maintaining roads, mixing/spreading materials, scarifying and ripping, cutting and trimming of batters and trimming of road sub-grades and pavements
Grader tasks may include:	<ul style="list-style-type: none"> • stripping/spreading topsoil and materials, cutting/boxing, cut and fill
Work instructions may include:	<ul style="list-style-type: none"> • plans, specifications, quality requirements and operational details • quality requirements may include but not be limited to dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction • soil types and information • survey data, including: cut and fill levels, layer thicknesses, finished levels, finished grades and cross-falls
Safety requirements are to be:	<ul style="list-style-type: none"> • in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan
Safety requirements may include:	<ul style="list-style-type: none"> • the site safety plan and organisational policies and procedures • protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances • personal protective equipment is to include that prescribed under legislation, regulation and workplace policies and practices • safe operating procedures which are to include but not be limited to recognising and preventing hazards associated with underground and overhead services, other machines, personnel,

	<p>restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public</p> <ul style="list-style-type: none"> • safe parking practices which is to include but not be limited to ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement • hazards and risks may include but not be limited to installed services, damaged or defective pressurise hoses and fastenings, abandoned equipment, adverse weather conditions (electrical storms, floods, fires), chemicals, contaminants, ancillary equipment, fences, holes and pot holes, over-hanging rocks, personnel, unsafe ground, unstable faces, vehicles, powerlines, dust and noise, conveyors, overhead services and stored energy which may include: engine components, radiators and cooling systems, hydraulic tanks and reservoirs, air tanks and reservoirs, hydraulic hoses, air hoses, tyres, air conditioning components, electrical components, braking systems, centrifugal forces • hazardous and emergency situations, which may include: motor vehicle accidents, lighting strikes (potential tyre explosion) and tyre fires (isolation procedures) • emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation
Tools and equipment are to include:	<ul style="list-style-type: none"> • hand tools and maintenance equipment relevant to the particular grader
Environmental requirements are to include:	<ul style="list-style-type: none"> • organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management
pre-start, start-up, park and shutdown procedures may include:	<ul style="list-style-type: none"> • external check of the machine • inspection of attachments to ensure security and identify defects • checking of fluid levels (windscreen washer tank, hydraulic oil, coolant, grease, water,

	<p>engine oil, fuel)</p> <ul style="list-style-type: none"> • carry out lubrication • checking of display instrumentation and gauges (indicators, gauges, laser levels), computer systems, including: <ul style="list-style-type: none"> • brake air pressure • brake oil temperature • computer indicators • engine oil pressure • fuel filter • parking brake • retarder • service meter • speedometer/odometer • steering filters • tachometer • torque converter • oil temperature • transmission filter • voltmeter • water temperature • inspection of air filter restriction indicator • inspection and checking of cab (horn, lights, air conditioner) • testing of engine and stop engine lights • testing visual and audio warning devices and lights • checking instruments and control lever • reporting of defects and damage • secure equipment as required by site procedures • render attachments safe • clear access ways
Materials may include:	<ul style="list-style-type: none"> • clays, silts, stone, gravel, mud, rock, sand, topsoil, blended materials, organic materials, typical construction site materials/waste and bituminous mixes • rock types may include metamorphic, igneous and sedimentary
Attachments are to include:	<ul style="list-style-type: none"> • tynes/scarifiers
Attachments may include:	<ul style="list-style-type: none"> • dozer blade, machine guidance system, laser levelling equipment, ripper, slash

Operator maintenance is to include:	<ul style="list-style-type: none">• cleaning, authorised servicing and the monitoring, recording and reporting of faults. It may also include the conduct of authorised minor replacements and the provision of assistance to maintenance personnel during maintenance and repair activities
--	--

Unit Sector(s)

Mobile Plant Operations

Competency field

Refer to Unit Sector(s).

Co-requisite units

Not applicable.

RIIOHS205A Control traffic with stop-slow bat

Modification History

Not applicable.

Unit Descriptor

This unit covers controlling of traffic with a stop-slow bat in resources and infrastructure industries. It includes: planning and preparing; coordinating traffic; operating radios; and cleaning up.

Application of the Unit

This unit is appropriate for those working in a operational roles, at worksites within:

- Civil construction
- Coal mining
- Drilling
- Extractive industries
- Metalliferous mining

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<p>Elements describe the essential outcomes of a unit of competency.</p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</p>
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Plan and prepare</p>	<p>1.1. Access, interpret and apply compliance documentation relevant to controlling of traffic with a stop-slow bat</p> <p>1.2. Obtain, confirm and apply work instructions relevant to the allotted task</p> <p>1.3. Obtain, confirm and apply safety requirements from the site safety plan and organisational policies and procedures for the allotted task</p> <p>1.4. Identify, obtain and implement signage and devices requirements from the project traffic management plan</p> <p>1.5. Select tools and equipment to carry out tasks that are consistent with the requirements of the job; check them for serviceability and rectify or report any faults</p> <p>1.6. Identify, confirm and apply environmental protection requirements from the project environmental management plan</p>
<p>2. Coordinate traffic</p>	<p>2.1. Position or confirm temporary traffic signs and barriers in accordance with regulations</p> <p>2.2. Direct traffic in accordance with site traffic plan and away from services or areas of potential damage or danger</p> <p>2.3. Control vehicles and pedestrian traffic within the worksite to ensure safety of workers</p> <p>2.4. Monitor traffic, and make adjustments for changing conditions, and position waiting vehicles to allow for smooth traffic flow</p> <p>2.5. Use hand held stop/slow bats in accordance with regulatory authority approved procedures</p> <p>2.6. Use hand signals in accordance with regulatory authority approved procedures</p> <p>2.7. Report traffic offenders in accordance with regulatory authority approved procedures</p>

<p>3. Operate radio</p>	<p>3.1.Adjust <i>radio</i> controls for optimum reception/transmission results</p> <p>3.2.Transmit messages concisely and in accordance with operating procedures or best practice</p> <p>3.3.Maintain radio power supply</p> <p>3.4.Check radio contact after nominated period of non contact</p>
<p>4. Clean up</p>	<p>4.1.Remove or cover signs and devices sequentially to provide warning to motorists during shutdown</p> <p>4.2.Clean, check, maintain and store tools and equipment in accordance with recommendations and standard work practices</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to control traffic with a stop-slow bat:

- apply legislative, organisation and site requirements and procedures

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to control traffic with a stop-slow bat:

- site and equipment safety requirements
- traffic controlling
- traffic management plans
- traffic control signage and barricades
- radio operations
- equipment types, characteristics, technical capabilities and limitations
- operational and maintenance procedures for equipment
- site isolation and traffic control responsibilities and authorities

- affects of travel speed and vehicle mass on stopping distances
- quality requirements
- JSAs/Safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for controlling traffic with a stop-slow bat • implementation of requirements, procedures and techniques for the safe, effective and efficient control of traffic with a stop-slow bat • working with others to control traffic with a stop-slow bat that meets all of the required outcomes • consistent timely control of traffic with a stop-slow bat that safely, effectively and efficiently meets the required outcomes
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • Evidence for assessment is best gathered using the outcomes of products and processes of the workplace context. • The assessment environment should not

	<p>disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job.</p> <ul style="list-style-type: none"> • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
<p>Method of assessment</p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes • consistently achieving the required outcomes • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to control traffic with a stop-slow bat
<p>Guidance information for assessment</p>	<p>Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.</p>

Range Statement

<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p>Relevant compliance documentation may include:</p>	<ul style="list-style-type: none"> • legislative, organisation and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • code of practice • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
<p>Work instructions may be received via verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, charts and hand drawings, memos, maps, materials safety data sheets (MSDS) and diagrams or sketches and may include:</p>	<ul style="list-style-type: none"> • plans • specifications • quality requirements • operational details • safe work procedures or equivalent • regulatory/legislative requirements • manufacturers' specifications and instructions • organisation work specifications and requirements • instructions issued by authorised organisational or external personnel • relevant Australian Standards
<p>Safety requirements may include:</p>	<ul style="list-style-type: none"> • those included in compliance documentation • personal protective equipment • safe operating procedures, including recognising and preventing hazards associated with: <ul style="list-style-type: none"> • uneven/unstable terrain • trees • pits • poles • trip hazards

	<ul style="list-style-type: none"> • dirt mounds • overhead services • underground services • bridges • surrounding buildings • obstructions • structures • facilities • fires • excavations • traffic • embankments • cuttings • hazardous materials • recently filled trenches • other machines • personnel • restricted access barriers • traffic control • working in proximity to others • worksite visitors and the public • safe parking practices, including: <ul style="list-style-type: none"> • ensuring access ways are clear • equipment/machinery is away from overhangs and refuelling sites • safe distance from excavations • secured from unauthorised access or movement
<p>Signage and devices are to include:</p>	<ul style="list-style-type: none"> • temporary warning signs • regulatory and traffic cones
<p>Signage and devices may include:</p>	<ul style="list-style-type: none"> • vehicle mounted signs and flashing lights • guide signs • warning signs • barriers • hazard markers • bollards • arrow boards
<p>Tools and equipment are to include:</p>	<ul style="list-style-type: none"> • radio • stop-slow bat • high visibility vest

	<ul style="list-style-type: none"> • traffic cones • signage
Tools and equipment may include:	<ul style="list-style-type: none"> • warning lights and beacons • arrow boards
Environmental include the requirements of the organisational/ project environmental management plan, and may include:	<ul style="list-style-type: none"> • waste management • water quality protection • noise, vibration and dust management • clean-up management
Traffic conditions may include	<ul style="list-style-type: none"> • congested urban environments • low traffic rural areas • off-road un-trafficked areas • buildings • parking sites • pedestrian areas
Radios may include:	<ul style="list-style-type: none"> • VHF and UHF

Unit Sector(s)

Co-requisite units

Not applicable.

RIIVEH304A Conduct tip truck operations

Modification History

Not applicable.

Unit Descriptor

This unit covers the conduct of tip truck operations in the resources and infrastructure industries. It includes planning and preparing, conducting pre-operational checks, operating a tip truck, loading, transporting and tipping materials, carrying out driver maintenance, and cleaning up. Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the unit.

Application of the Unit

This unit is appropriate for those working in an operational role at worksites within:

- Civil construction
- Coal mining
- Drilling
- Extractive industries
- Metalliferous mining

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

	statement. Assessment of performance is to be consistent with the evidence guide.
--	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	<p>1.1. Access, interpret and apply compliance documentation and procedures relevant to the work activity</p> <p>1.2. Work instructions, including plans, specifications, quality requirements and operational details are obtained, confirmed and applied to the allocated task</p> <p>1.3. Signage requirements are identified and obtained from the project traffic management plan and implemented</p> <p>1.4. Vehicle, tools and equipment selected to carry out tip truck tasks are consistent with the requirements of the job, checked for serviceability and any faults are rectified or reported</p> <p>1.5. Environmental protection requirements are identified from the project environmental management plan, confirmed and applied to the allocated task</p>
2. Conduct machine pre-operational checks	<p>2.1. Pre-start, start-up, park and shutdown procedures are carried out</p> <p>2.2. Tip truck controls and functions, including tray, steering, brakes and manoeuvrability are checked for serviceability and any faults are rectified or reported</p>
3. Operate truck	<p>3.1. Site hazards associated with tip truck operations are identified and safe operating techniques are used to minimise risk</p> <p>3.2. Engine power is managed to ensure efficiency of truck movements and to minimise damage to the engine and gears</p> <p>3.3. Engine power is coordinated with gear selection ensuring smooth transition and operation within torque range</p> <p>3.4. Tip truck is operated to work instructions</p> <p>3.5. Road/traffic conditions are constantly</p>

	<p>monitored taking into account of road standards, traffic flow, distance and load, ensuring no injury to people or damage to property, equipment, loads and facilities</p> <p>3.6. Vehicle is brought to a halt smoothly, minimising the wear and tear on vehicle using the engine retarder, gears and brakes</p>
4. Load, transport and tip materials	<p>4.1. Vehicle is positioned at load and discharge points with a minimum of manoeuvre</p> <p>4.2. Tip truck movements including the raising and lowering of the tray are smooth and controlled</p> <p>4.3. Weight and distribution of load is assessed for type of material and size of vehicle to ensure it is within vehicle capacity</p> <p>4.4. Safety and security of load, including load cover requirements, are maintained from loading site to discharge site</p> <p>4.5. Load is discharged on slope and/or over face at fill site</p> <p>4.6. Material is dumped/spread evenly to work instructions</p> <p>4.7. Tray is cleared, lowered and secured before resuming travel</p>
5. Carry out operator maintenance	<p>5.1. Tip truck is safely parked, prepared for maintenance and shutdown</p> <p>5.2. Inspection and fault finding are conducted</p> <p>5.3. Defective parts are removed and replaced safely and effectively</p> <p>5.4. Regular programmed maintenance tasks are carried out</p>
6. Clean up	<p>6.1. Work area is cleared and materials disposed of or recycled</p> <p>6.2. Vehicle, tools and equipment are cleaned, checked, maintained and stored</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes the ability to carry out the following as required to conduct tip truck operations:

- apply legislative, organisation and site requirements and procedures for conducting tip truck operations

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes knowledge of the following as required to conduct tip truck operations:

- tip truck types, characteristics, technical capabilities and limitations
- basic principles of soil technology for civil works
- site and equipment safety requirements
- tip truck operational techniques related to essential tasks
- processes for interpreting drawings and sketches
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheet and materials handling methods
- safe operating techniques in all terrain
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage
- load quantity calculations
- JSA's/safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions for conducting tip truck operations

	<ul style="list-style-type: none"> • implementation of requirements, procedures and techniques for the safe, effective and efficient conduct of tip truck operations • working with others to undertake and complete the conduct of tip truck operations that meets all of the required outcomes • consistent timely completion of tip truck operations that safely, effectively and efficiently meets the required outcomes
<p>Context of and specific resources for assessment</p>	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • Assessment of this competency requires typical resources normally used in a resources and infrastructure sector environment. Selection and use of resources for particular worksites may differ due to the site circumstances. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment should sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Where applicable, physical resources should include equipment modified for people with disabilities. Access must be provided to appropriate learning and/or assessment support when required.
<p>Method of assessment</p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p>

	<ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirements, procedures and techniques for the safe, effective and efficient achievement of required outcomes • consistent achievement of required outcomes • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and complete tip truck operations
<p>Guidance information for assessment</p>	<p>Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.</p>

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p>Compliance documentation and procedures may include:</p>	<ul style="list-style-type: none"> • legislative, organisation and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • OHS requirements including protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances • safe operating procedures including (but not limited to) recognising and preventing hazards associated with fill-site traffic movement, overhead services, other machines, personnel, restricted access barriers, traffic control,
--	--

	<p>working at heights, working in proximity to others, worksite visitors and the public</p> <ul style="list-style-type: none"> • safe parking practices including (but not limited to) ensuring access ways are clear, equipment/ machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement • hazards and risks including (but not limited to) uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials • emergency procedures related to this unit including (but not limited to) emergency shutdown and stopping, extinguishing fires, organisational First Aid requirements and evacuation • environmental requirements including (but not limited to) organisational/project environmental management plan, waste management, water quality protection, noise, vibration, dust and clean-up management • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
<p>Quality requirements may include:</p>	<ul style="list-style-type: none"> • dimensions, tolerances, standards of work and material standards as detailed in the project drawings, specifications and project documentation to meet client satisfaction
<p>Tools and equipment includes:</p>	<ul style="list-style-type: none"> • the hand tools and maintenance equipment associated with the particular tip truck
<p>Tip truck tasks should include:</p>	<ul style="list-style-type: none"> • the transporting and tipping of soils, sand, rocks and construction gravels on public roads and worksites • static tipping and mobile tipping and spreading, discharging/tipping on slopes and discharging/tipping over edges • discharging into bins and hoppers and spreading aggregate
<p>Tip trucks may include:</p>	<ul style="list-style-type: none"> • self-propelled vehicle designed for on road use to transport a variety of construction materials to and from construction sites • vehicles that are rigid (with or without a dog

	<p>trailer) or articulated</p> <ul style="list-style-type: none"> • various configurations of tip trucks, the number of vehicle axles, the weight of each vehicle and load capacities are dependent on the vehicle class • loads that are normally discharged by tipping from the rear of the vehicle or trailer but, methods of material discharge may also include side and belly dumping • National Licence Classes for trucks are: <ul style="list-style-type: none"> • MR (Medium rigid) - a vehicle (2 axle only) which is greater than 8t GVM, plus a trailer of not more than 9t GVM • HR (Heavy Rigid) - a vehicle (no axle limit) which is greater than 8t GVM, plus a trailer of not more than 9t GVM • HC (Heavy combination) - a heavy rigid vehicle with a trailer greater than 9t GVM or a prime mover and semi trailer
Materials may include:	<ul style="list-style-type: none"> • materials may include but are not limited to clays, silts, stone, gravel, mud, rock, sand, topsoil, bituminous mixes, timber, blended materials, organic materials, typical construction site materials/waste and aggregates • rock types may include metamorphic, igneous and sedimentary
Operator maintenance may include:	<ul style="list-style-type: none"> • cleaning, authorised servicing and the monitoring, recording and reporting of faults • the conduct of authorised minor replacements • the provision of assistance to maintenance personnel during maintenance and repair activities

RIIVEH305A Operate and maintain a four wheel drive vehicle

Modification History

Not applicable.

Unit Descriptor

This unit covers the operation and maintenance of four-wheel drive vehicles in the resources and infrastructure industries. It includes identifying four-wheel drive specific terms, terminology and techniques, planning for minimal environmental impact, performing pre-departure checks, using the features of a four-wheel drive vehicle to drive in a variety of terrain types, and performing maintenance and minor repairs on four-wheel drive vehicles. Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the unit.

Application of the Unit

This unit is appropriate for those working in an operational role at worksites within:

- Civil construction
- Coal mining
- Drilling
- Extractive industries
- Metalliferous mining

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

unit of competency.	italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---------------------	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify four-wheel drive specific terms, terminology and techniques	1.1. Access, interpret and apply <i>compliance documentation</i> relevant to the work activity 1.2. Identify the structural and handling differences between a conventional two wheel drive and a four-wheel drive vehicle 1.3. Identify and demonstrate the purpose and use of front wheel hubs 1.4. Identify factors affecting tyre size, fitment, rating, and pressure 1.5. Correctly identify, recovery hooks and mounting features 1.6. Identify hazards associated with incorrect use of vehicle features or equipment
2. Plan for minimal environmental impact	2.1. Determine <i>types of impact</i> likely to occur during four-wheel driving and associated activities 2.2. Demonstrate compliance with land management principles and policies when planning exploration activities 2.3. Comply with policies and management plans relevant to the activity area 2.4. Plan and conduct activities in a manner which minimises environmental impact 2.5. Adopt and implement procedures to ensure minimisation of harm to the environment from four-wheel drive activities 2.6. Demonstrate cooperation and consideration towards other land users
3. Perform pre-departure checks	3.1. Perform routine pre-departure checks under the bonnet, under the body, and on external and internal items and accessories 3.2. Take action to correct any deficiency 3.3. Determine food and water requirements for

	<p>journey</p> <p>3.4. Select suitable navigation equipment where necessary</p> <p>3.5. Interpret weather conditions to determine suitability for driving</p> <p>3.6. Apply safe vehicle loading practices</p> <p>3.7. Secure items of personal luggage safely</p> <p>3.8. Advise passengers of any special safety precautions to be taken when traversing rough terrain</p>
<p>4. Use the features of a four-wheel drive vehicle to drive in a variety of terrain types</p>	<p>4.1. Operate four-wheel drive vehicles correctly and safely both on and off road, in accordance with road rules, principles of four-wheel driving and OHS regulations</p> <p>4.2. Apply smooth accelerator control strategies over a range of terrain types</p> <p>4.3. Demonstrate recommended braking techniques for hard top surfaces and off road conditions</p> <p>4.4. Correctly identify situations where the engagement of four-wheel drive is required</p> <p>4.5. Engage correctly, where fitted, front hubs or centre differential lock (constant four-wheel drive vehicles)</p> <p>4.6. Survey track to identify hazards, assess risk and select a best route</p> <p>4.7. Select routes to minimise damage to the environment</p> <p>4.8. Use appropriate range, gear, speed, driving and braking technique to negotiate a range of terrain types and whilst maintaining control of vehicle at all times, being aware of contextual issues</p> <p>4.9. Perform a stop stall key start recovery procedure on a moderate incline</p> <p>4.10. Check brakes and undercarriage after negotiating varying terrain</p> <p>4.11. Perform repairs to damaged tracks if necessary</p> <p>4.12. Use standardised operating procedures when travelling in company with other vehicles</p> <p>4.13. Maintain appropriate hand positioning on steering wheel</p>

<p>5. Use a single snatch strap to recover a vehicle</p>	<p>5.1. Identify risks associated with vehicle recovery and develop and implement strategies to minimise risks</p> <p>5.2. Identify recovery hooks</p> <p>5.3. Confirm use of recommended mounting strategy on the four-wheel drive vehicle and use of rated recovery equipment when practicable</p> <p>5.4. Demonstrate procedures for preparing vehicles for recovery</p> <p>5.5. Demonstrate techniques to minimise impact on the environment during vehicle recovery</p> <p>5.6. Demonstrate techniques for joining two snatch straps</p> <p>5.7. Coordinate safe recovery of a four-wheel drive vehicle using a single snatch strap</p> <p>5.8. Correctly perform post recovery checks and repairs</p>
<p>6. Perform maintenance and minor repairs on four-wheel drive vehicles</p>	<p>6.1. Select/access maintenance equipment correctly, including spares and fluids, prior to departure after consideration of contextual issues</p> <p>6.2. Check vehicles regularly prior to and during trip and correctly perform <i>routine maintenance</i>/repair tasks</p> <p>6.3. Make vehicle performance reports to the designated person</p> <p>6.4. Demonstrate safe use of a jack to support a four-wheel drive vehicle on uneven ground</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes the ability to carry out the following as required to operate and maintain a four-wheel drive vehicle:

- apply legislative, organisation and site requirements and procedures for operating

and maintaining a four-wheel drive vehicle

- apply four-wheel driving techniques in different terrain
- reduce environmental impact
- research and evaluation of impact through observation and questioning
- solve problems and apply solution focused strategies
- apply communication and recording skills
- perform basic manual and mechanical maintenance skills
- acquire required licences and permits
- apply diagnostic and troubleshooting procedures

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes knowledge of the following as required to operate and maintain a four-wheel drive vehicle:

- features driving techniques and handling characteristics of four-wheel drives in different terrain
- terms used to describe four-wheel drive capabilities including:
 - approach departure angles
 - ramp over angle
 - ground clearance
 - suspension travel
- differences between optional four-wheel drive and constant four-wheel drive vehicles and their impacts on vehicle operation and capability
- tyre management principles
- environmental impact of four-wheel driving
- OHS legislation relevant to the use of four-wheel drive vehicles
- use of single snatch straps to recover vehicles and hazards associated with vehicle recovery
- techniques for travelling in convoy
- minimum impact codes
- legal and statutory requirements (of land management agencies)
- specific problems of fragile environments or threatened species
- area restrictions
- natural processes and interrelationships occurring within natural environments and the manner in which interrelationships between natural processes can be affected
- cultural protocols for making contact and communicating with indigenous people and organisations
- practices which may be implemented to minimise impact (e.g. avoidance of sensitive areas, appropriate site and route selection, limited party size, keeping to marked tracks or routes, campfire management and rehabilitation)
- practices and procedures used by land management authorities to reduce impact including:

- restricting access/limiting group size
- seasonal restrictions
- use of permits
- enforcing code of ethics and conduct

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:</p> <ul style="list-style-type: none"> • knowledge of the requirements, procedures and instructions for operating and maintenance of a four-wheel drive vehicle • implementation of requirements, procedures and techniques for the safe, effective and efficient operation and maintenance of a four-wheel drive vehicle • working with others to undertake and complete the operating and maintenance of a four-wheel drive vehicle that meets all of the required outcomes • consistent timely maintenance and operation of a four-wheel drive vehicle that safely, effectively and efficiently meets the required outcomes
Context of and specific resources for assessment	<ul style="list-style-type: none"> • This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.

	<ul style="list-style-type: none"> • Assessment of this competency requires typical resources normally used in a resources and infrastructure sector environment. Selection and use of resources for particular worksites may differ due to the site circumstances. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment should sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Where applicable, physical resources should include equipment modified for people with disabilities. Access must be provided to appropriate learning and/or assessment support when required.
<p>Method of assessment</p>	<p>This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:</p> <ul style="list-style-type: none"> • written and/or oral assessment of the candidate's required knowledge • observed, documented and/or first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • implementation of appropriate requirements, procedures and techniques for the safe, effective and efficient achievement of required outcomes • consistent achievement of required outcomes • first hand testimonial evidence of the candidate's: <ul style="list-style-type: none"> • working with others to undertake and complete the maintenance of a four-wheel drive vehicle
<p>Guidance information for assessment</p>	<p>Consult the SkillsDMC User Guide for further information on assessment including access and</p>

	equity issues.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Research store product range.	<p>1.1 Develop <i>product knowledge</i> by accessing <i>relevant sources of information</i>.</p> <p>1.2 Identify <i>store product range</i> according to relevant product information.</p>
2 Recommend home and home improvement products.	<p>2.1 Identify relevant products to meet expressed <i>customer requirements</i> to assist their buying decisions.</p> <p>2.2 Demonstrate <i>features and benefits of products</i> to <i>customers</i> to create a buying environment.</p> <p>2.3 Convey technical features and benefits as outlined in manufacturer specifications.</p>
3 Advise on product warranties.	<p>3.1 Clearly explain comparisons between product and manufacturer warranty terms to customers.</p> <p>3.2 Confirm individual product warranty terms and by accessing relevant sources of information and</p>

ELEMENT	PERFORMANCE CRITERIA
	accurately conveying to customers.
	3.3 Provide customers with written information regarding individual product warranty terms and conditions, especially extended or promotional warranties, according to store policy and procedures.
4 Estimate quantities and order product.	4.1 <i>Estimate area and product quantities</i> , where required, based on manufacturer specifications, plan provided or customer needs.
	4.2 Arrange for area measurement where indicated by product type and according to store procedures.
	4.3 Calculate cost to customers and prepare quotes according to <i>store policy and procedures</i> .
	4.4 Order product and arrange customer pick-up and delivery or installation where required.
	4.5 Provide customers with accurate information regarding product availability, delivery and installation procedures as required, including date and time of delivery.
	4.6 Notify customers promptly of any undue delays regarding completion, supply or installation of products.
5 Negotiate price and payment options.	5.1 Convey store recommended retail pricing for various brand options accurately conveyed to customers according to legislative requirements.
	5.2 Negotiate individual product prices according to store policy where necessary to achieve sales.
	5.3 Convey store payment options to customers and negotiate preferred option following store procedures.
6 Advise on and arrange product service and repair.	6.1 Diagnose problem in terms of operator and equipment faults by observation, customer questioning and accessing manufacturer information.
	6.2 Offer solutions according to nature of problem, available product information and store policy.
	6.3 Identify and accurately describe service and repair process to customers, as required, according to store policy.

ELEMENT

PERFORMANCE CRITERIA

- 6.4 Prepare and supply quotations and timelines to customers for basic service and repairs.
- 6.5 Identify and accurately transcribe customer details to repair form according to store procedures.
- 6.6 Label and securely store items for repair according to store policy.
- 6.7 Notify customers without undue delay on completion of service and repair.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- interpersonal communication skills to:
 - apply product knowledge by providing information and advice to customers and staff, including advice on warranties and product service and repair
 - make recommendations and advise on services through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- handling customers with special needs, including difficult or abusive customers
- demonstrating product features and operation
- negotiation skills
- using and applying technology required to demonstrate operation of store product range
- literacy skills in the following areas:
 - reading and understanding product information
 - reading and understanding product warranties and guarantees
- numeracy skills in regard to:
 - advising and negotiating price and payment options
 - measuring and estimating accurately
 - metric and imperial measuring scales

REQUIRED SKILLS AND KNOWLEDGE

- techniques and procedures for measuring surface areas
- estimating from architects or builders plans.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - sales and customer service
 - methods of dealing with special needs and requests of customers
 - customer complaints
 - store pricing and payment and warranty terms and conditions
 - store product service and repair policy and procedures
- store home and home improvement product range
- design and technical information and features and function and operation of store product range
- quality, energy efficiency and environmental considerations of products
- pricing procedures, including GST requirements
- relevant industry codes of practice.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- continually updates and applies product knowledge to provide comprehensive advice to customers and other sales team members
- understands and applies available product information when providing advice to customers
- consistently applies store policy and procedures and industry codes of practice in regard to sales and customer service procedures
- advises customers and informs other sales team members on store home and home improvement products in the store merchandise range. Advises

EVIDENCE GUIDE

customers and other sales team members on store merchandise range warranties and store pricing and payment options.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant sources of product information
- relevant documentation, such as:
 - store policy and procedures manuals
 - industry codes of practice and relevant legislation
 - OHS legislation and codes of practice
- an appropriate range of home and home improvement products
- a range of customers with different requirements.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

- Product knowledge*** may include:
- function
 - brand and product options
 - warranties
 - quality
 - accessories
 - component parts
 - storage and operation
 - design features
 - style
 - available colour range
 - manufacturing process
 - price
 - partner or complementary products
 - country of manufacture
 - energy efficiency
 - safety features, including flammability
 - environmental considerations
 - materials and fibre types
 - construction of products
 - care and maintenance requirements
 - stain and dirt resistance
 - product performance
 - colour fastness, colour fading properties
 - availability.

- Relevant sources of information*** may include:
- supplier product leaflets
 - store product manuals
 - energy rating information
 - warranty information
 - internet

RANGE STATEMENT

Store product range may include:

- trade shows
- customer feedback
- consulting store information
- designated staff members
- contacting suppliers direct.
- home and home improvement products
- furniture products
- floor covering products and services
- kitchen and bathroom renovation products
- hardware products
- home gardening products
- soft furnishings
- manchester
- haberdashery.

Customer requirements may include:

- usage requirements
- lifestyle
- price range.

Features and benefits of products may include:

- product type
- product performance features
- product durability
- function
- warranties
- quality
- design aspects of colour and texture feel
- thickness and weight of furnishing fabrics
- acoustic and thermal insulation properties of materials
- manufacturing process
- price
- country of manufacture
- energy efficiency
- environmental considerations.

Customers may include:

- new and existing customers
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities

RANGE STATEMENT

- customers with routine or special needs.
- Estimating area and product quantities* may include:
- using measuring tools
 - using a calculator
 - estimating from builders' and architects' plans
 - on-site measuring
 - estimating based on measurements provided by customer
 - making allowances for pattern matching
 - estimating linear or volume-based quantities.
- Store policy and procedures* may include:
- policy and procedures relating to sales, payment and credit options, store reward schemes and customer service.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Research product range.	<p>1.1 Identify product and <i>service range</i>.</p> <p>1.2 Demonstrate knowledge of location of product range.</p> <p>1.3 Demonstrate operation of <i>inventory system</i>.</p> <p>1.4 Develop <i>product knowledge</i> by accessing <i>relevant sources of information</i>.</p> <p>1.5 Develop knowledge and application of manufacturer technical information and specifications of product range.</p> <p>1.6 Demonstrate use and operation of products according to organisation policy and procedures.</p> <p>1.7 Research comparisons between products and services and apply accurately according to product information.</p> <p>1.8 Demonstrate knowledge of relevant <i>legislative requirements</i>.</p> <p>1.9 Convey product information to <i>customers</i> and other <i>staff members</i> as required.</p>

ELEMENT	PERFORMANCE CRITERIA
2 Recommend specialised products and services.	<p>2.1 Identify and evaluate <i>customer requirements</i> to provide advice on product suitability to assist buying decisions.</p> <p>2.2 Determine suitability of products and materials according to customer requirements and manufacturer specifications.</p> <p>2.3 Provide accurate advice on product specifications to meet customer requirements according to relevant legislation.</p> <p>2.4 Convey features and benefits of products to customers to assist buying decisions.</p> <p>2.5 Demonstrate or explain use and operation of products to customers in a systematic manner as required to create a buying environment.</p> <p>2.6 Apply correct measuring, fitting or sizing procedures as relevant to the product.</p> <p>2.7 Explain relevant maintenance and care requirements of product to customer.</p> <p>2.8 Clearly explain to customer safety features and safe usage relevant to the product.</p> <p>2.9 Maximise sales opportunities by use of add-on and complementary sales techniques.</p> <p>2.10 Estimate quantities of product required.</p>
3 Advise on product warranties.	<p>3.1 Clearly explain to customer <i>comparisons</i> between product and manufacturer warranty terms.</p> <p>3.2 Confirm and accurately convey individual product warranty terms and conditions to customers by accessing relevant sources of information.</p> <p>3.3 Provide customer with written information regarding individual product warranty terms and conditions, especially extended or promotional warranties, according to legislative requirements and <i>organisation policy and procedures</i>.</p>
4 Quote on price and payment options.	<p>4.1 Calculate organisation recommended pricing for various product and service options and convey to customer according to legislative requirements.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>4.2 Perform <i>negotiation of individual product prices</i> where appropriate according to pricing determinants and organisation policy.</p> <p>4.3 Convey payment and credit options to customers and negotiate a preferred option following organisation procedures.</p>
5 Advise on and arrange product service and repair.	<p>5.1 Advise customer on organisation range of service and repairs according to organisation policy and procedures.</p> <p>5.2 Question and actively listen to customer determine nature of problem.</p> <p>5.3 Complete <i>diagnosis of problem</i> in terms of operator and equipment faults.</p> <p>5.4 Offer solutions according to nature of problem, available product information and company and enterprise policy.</p> <p>5.5 Identify service and repair process and accurately describe to customer, as required, according to company and enterprise policy.</p> <p>5.6 Identify price and timelines for basic service and repairs and quote to customer where applicable.</p> <p>5.7 Identify customer details and accurately transcribe to service report according to company and enterprise procedures and legislative requirements.</p> <p>5.8 Label and securely store item for repair according to company and enterprise policy.</p> <p>5.9 Organise service according to availability, customer requirements and legislative requirements.</p> <p>5.10 Notify customer without undue delay on completion of service and repair.</p> <p>5.11 Take <i>follow-up action</i> as necessary to ensure customer satisfaction.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- interpersonal communication skills to:
 - apply product knowledge by providing information and advice to customers and staff
 - make recommendations and advise on warranties and product service and repair through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- handling customers with special needs, including difficult or abusive customers
- literacy skills in the following areas:
 - reading and understanding store policy and procedures
 - reading and understanding product information and specifications
 - writing order specifications and delivery details
- numeracy skills in the following areas:
 - measuring and estimating accurately
 - advising and negotiating price and payment options.

The following knowledge must be assessed as part of this unit:

- company and enterprise policy and procedures in regard to:
 - sales and customer service, up-selling, on-selling
 - methods of dealing with special needs and requests of customers
 - customer complaints
 - price negotiation and payment options
 - services and repairs
- company and enterprise product range
- pricing procedures, including GST requirements
- manufacturer technical information
- product and manufacturer warranty terms and conditions
- relevant legislation and statutory requirements
- relevant industry codes of practice.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently updates and applies product knowledge to provide comprehensive advice to customers and staff, including technical information and advice on warranties and insurance policies where applicable
- consistently applies company and enterprise policy and procedures and industry codes of practice in regard to sales and customer service procedures
- advises customers and informs sales team members of organisation range of products, their features and benefits, performance, complementary products, product availability and warranties
- advises customers and sales team members on operation, storage and use of products
- estimates and quotes on quantities of product required, as relevant to the product and customer requirements
- successfully negotiates and administers price and payment options with customers as per organisation policy and procedures
- advises on and arranges for organisation services, internal and external, including repairs, according to organisation policy and procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant sources of product information
- relevant documentation, such as:
 - organisation policy and procedures manuals
 - industry codes of practice and relevant legislation
 - organisation inventory
- an appropriate range of products
- a range of customers with different requirements.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- written or verbal answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Service range may include:

- product service and repairs
- materials measuring and cutting
- delivery
- installation
- insurance facilities
- finance options.

RANGE STATEMENT

Inventory system may be:

- manual
- electronic
- centralised.

Product knowledge may include:

- brand options
- materials, ingredients and composition
- manufacturing process and construction
- design features
- quality
- price
- accessories
- workmanship
- component parts
- safety features and toxicity
- available styles, sizes and colour range
- operation
- storage and care requirements
- country of manufacture
- energy efficiency
- environmental considerations and recycled products
- age suitability and rating
- performance
- durability
- warranties
- health and hygiene
- supply and availability.

Relevant sources of information may include:

- supplier product leaflets
- company and enterprise or trade product manuals
- manufacturer brochures and specifications
- catalogues
- trade shows
- internet
- customer feedback
- designated staff members
- contacting suppliers direct.

RANGE STATEMENT

Relevant legislative requirements may include:

- consumer law
- pricing procedures, including GST requirements
- censorship, licensing and copyright laws
- Trade Practices and Fair Trading Acts
- sale of second-hand goods
- OHS
- industry codes of practice
- privacy laws
- customs regulations.

Customers may include:

- people with routine or special requests
- people with special needs
- regular and new customers
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- individuals or organisations.

Staff members may include:

- new or existing staff
- people with varying levels of language and literacy
- people from a range of cultural, social and ethnic backgrounds.

Customer requirements may include:

- usage requirements
- existing skills and knowledge
- experience and professional and hobby needs
- colour preferences and style
- durability, function and usage
- fashion and preferences
- health factors
- lifestyle
- price
- size
- culture and ethnicity
- interests
- age suitability.

RANGE STATEMENT

Comparisons between product and manufacturer warranty terms may relate to:

- features
- benefits
- limitations
- duration
- price, where applicable.

Organisation policy and procedures may include:

- selling specialised products and services
- interaction with customers
- processing items for service and repair.

Negotiation of individual product prices may include:

- price matching
- individual discounts
- adding value to purchase
- bulk discounts.

Diagnosis of problem may occur:

- face to face
- by telephone
- by correspondence (electronic or postal).

Follow-up action may occur:

- formally or informally
- face to face
- by telephone
- by correspondence (electronic or postal)
- by appointment.

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Process incoming and outgoing mail.	<p>1.1 <i>Sort and dispatch incoming mail</i> to nominated recipients or locations.</p> <p>1.2 Collect and check outgoing mail to ensure all items are correctly prepared for dispatch.</p> <p>1.3 Record mail according to <i>store policy and procedures</i>.</p> <p>1.4 Dispatch mail within designated time limits.</p>
2 Process bulk mail.	<p>2.1 Collate documents as required.</p> <p>2.2 Sort and batch envelopes according to Australia Post specifications.</p> <p>2.3 Lodge batched items for delivery.</p>

ELEMENT	PERFORMANCE CRITERIA
3 Operate office equipment.	3.1 Identify appropriate <i>equipment</i> for intended application. 3.2 Operate equipment according to manufacturer instructions. 3.3 Identify and rectify equipment faults or report to <i>relevant personnel</i> . 3.4 Follow opening and shutdown processes according to store procedures. 3.5 Apply maintenance program for equipment to ensure down time is minimised.
4 File and retrieve documents.	4.1 <i>File documents</i> according to store policy. 4.2 Identify and retrieve documents as requested. 4.3 Update and modify existing records. 4.4 Remove, process and store designated inactive files according to store policy. 4.5 Assemble new files. 4.6 Record movements of documentation.
5 Establish contact with internal and external customers.	5.1 Use telephone system functions according to store policy. 5.2 Obtain and accurately record telephone and fax number or email <i>address</i> . 5.3 Answer incoming calls promptly and according to store policy. 5.4 Establish and clearly convey purpose of <i>contact</i> . 5.5 Transfer or place calls on hold as required. 5.6 Keep customers informed of delays and action being taken. 5.7 Record messages accurately and promptly return calls if required.
6 Prepare simple correspondence.	6.1 Prepare and present correspondence for approval or signature according to set timeframes. 6.2 Write text using clear, concise language.

ELEMENT

PERFORMANCE CRITERIA

- 6.3 Use correct spelling, punctuation and grammar.
- 6.4 Use standard form letters according to store policy.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- operating a range of office technology
- organising work tasks
- completing tasks in a set timeframe
- literacy and numeracy skills in regard to:
 - processing, recording and documenting information
 - generating a range of retail documents
- interpersonal communication skills to
 - report equipment faults
 - answer telephone calls and keep customers informed of delays and action being taken through clear and direct communication
 - ask questions to identify and confirm requirements
 - share information
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - store administration and clerical systems
 - receiving and dispatching incoming and outgoing mail
 - processing information
 - reporting problems and faults
- relevant regulatory and licensing requirements such as:
 - OHS

REQUIRED SKILLS AND KNOWLEDGE

- privacy policies.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies procedures for the processing of mail, including bulk mail
- operates and maintains office equipment according to store policy and procedures
- files and retrieves documents according to store policy and procedures
- follows procedures for establishing contact with internal and external customers
- applies procedures for the preparation of simple correspondence.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - store policy and procedures manuals
 - manufacturer instructions and operation manuals
- a range of retail equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor

EVIDENCE GUIDE

- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXICT001A Operate retail technology
- SIRXFIN002A Perform retail finance duties.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Procedures to ***sort and dispatch incoming mail*** may relate to:

- internal systems
- Australia Post
- courier services.

Store policy and procedures in regard to:

- store administration
- clerical systems
- operating and maintaining retail equipment.

RANGE STATEMENT

- Equipment*** may include:
- fax machine
 - telephone system
 - photocopier
 - answering machine or voicemail
 - public address system
 - paging system
 - franking machine
 - typewriters
 - computers
 - calculators
 - adapted equipment for people with a disability, for example, talking calculators, computer hard and software, and TTY.
- Relevant personnel*** may include:
- supervisor
 - team leader
 - manager.
- Systems used to record or ***file documents*** may be:
- manual
 - electronic.
- Contact*** may be established by:
- telephone
 - fax
 - email
 - letter
 - face-to-face contact.

Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Operate point-of-sale equipment.	<p>1.1 Operate <i>point-of-sale equipment</i> according to design specifications.</p> <p>1.2 Open and close point-of-sale terminal according to <i>store policy and procedures</i>.</p> <p>1.3 Clear point-of-sale terminal and transfer tender according to store procedure.</p> <p>1.4 Handle cash according to store security procedures.</p> <p>1.5 Maintain supplies of change in point-of-sale terminal according to store policy.</p> <p>1.6 Attend active point-of-sale terminals according to store policy.</p> <p>1.7 Complete records for transaction errors according to store policy.</p> <p>1.8 Maintain adequate supplies of dockets, vouchers and <i>point-of-sale documents</i>.</p>

ELEMENT	PERFORMANCE CRITERIA
	1.9 Inform <i>customers</i> of delays in the point-of-sale operation.
2 Use numbers in the workplace.	2.1 Accurately list a range of possible retail workplace <i>numerical problems</i> .
	2.2 Collect numerical information from various sources and calculate accurately with or without the use of a calculator.
3 Perform point-of-sale transactions.	3.1 Complete <i>point-of-sale transactions</i> according to store policy.
	3.2 Identify and apply store procedures in respect of cash and non-cash transactions.
	3.3 Identify and apply store procedures in regard to exchanges and returns.
	3.4 Move goods through point-of-sale area efficiently and with attention to fragility and packaging.
	3.5 Accurately enter information entered into point-of-sale equipment.
	3.6 State price or total and amount of cash received verbally to customer.
	3.7 Tender correct change.
4 Complete sales.	4.1 Complete customer order forms, invoices and receipts accurately.
	4.2 Accurately identify and process customer delivery requirements according to set timeframes.
	4.3 Process sales transactions or direct customers to point-of-sale terminals according to store policy without undue delay.
5 Wrap and pack goods.	5.1 Maintain and request adequate supplies of <i>wrapping and packaging materials</i> .
	5.2 Select appropriate wrapping or packaging material.
	5.3 Wrap merchandise neatly and effectively where required.

ELEMENT

PERFORMANCE CRITERIA

- 5.4 Pack items safely to avoid damage in transit, and attach labels where required.
- 5.5 Arrange transfer of merchandise for parcel pick-up or other *delivery methods* if required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- following set routines and procedures
- interpersonal communication skills to:
 - inform customers of delays
 - state price or total and amount of cash received
 - request adequate supplies of wrapping material or bags through clear and direct communication
 - ask questions to identify and confirm requirements
 - share information
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- questioning and active listening
- dealing with different types of transactions
- wrapping and packing techniques
- store bag checking procedures
- merchandise handling techniques
- literacy skills in regard to sales and delivery documentation
- numeracy skills in regard to rendering change.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in relation to:
 - customer service
 - point-of-sale transactions
 - allocated duties and responsibilities
 - exchanges and returns

REQUIRED SKILLS AND KNOWLEDGE

- handling, packing and wrapping of goods or merchandise
- the range of services provided by the store
- stock availability
- relevant legislation and statutory requirements, including:
 - Trade Practices Act and consumer law
 - industry codes of practice
 - OHS
- cash and non-cash handling procedures, including:
 - opening and closing point-of-sale terminal
 - clearance of terminal and transference of tender
 - maintenance of cash float
 - tendering of change
 - counting cash
 - calculating non-cash documents
 - balancing point-of-sale equipment
 - recording takings
 - security of cash and non-cash transactions
 - change required and denominations of change
- numeracy skills in regard to workplace functions:
 - addition
 - subtraction
 - multiplication
 - division
 - percentages
 - use of a calculator
- functions and procedures for operating point-of-sale equipment, including:
 - registers
 - numerical display board
 - calculators
 - electronic scales
 - scanners.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the

EVIDENCE GUIDE

performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently operates point-of-sale equipment according to manufacturer instructions and store policy and procedures
- consistently applies store policy and procedures in regard to cash handling and point-of-sale transactions
- interprets, calculates and records numerical information accurately
- processes sales transaction information responsibly and accurately according to store policy and procedures
- constantly applies store policy and procedures in regard to the handling, packing, wrapping and delivery of goods or merchandise.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - stock, inventory and price lists
 - financial transaction dockets and slips
 - lay-by, credit and product return slips
 - store policy and procedures manuals
- a range of point-of-sale equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the

EVIDENCE GUIDE

industry sector, workplace and job role is recommended, for example:

- SIRXRSK001A Minimise theft
- SIRXCCS002A Interact with customers
- SIRXINV001A Perform stock control procedures
- SIRXFIN001A Balance point-of-sale terminal.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Deliver service to customers.	<p>1.1 Conduct <i>communication</i> with <i>customers</i> in a professional, courteous manner according to <i>store policy</i>.</p> <p>1.2 Meet <i>customer needs</i> and reasonable requests or refer to supervisor according to store policy and <i>legislative requirements</i>.</p> <p>1.3 Record customer details and information where necessary.</p> <p>1.4 Identify and anticipate possible problems and take action to minimise the effect on customer satisfaction.</p> <p>1.5 Recognise and act upon opportunities to deliver additional levels of <i>service</i> beyond the customer's immediate request.</p> <p>1.6 Maintain contact with customer until sale is completed according to store policy.</p> <p>1.7 Farewell customer appropriately and courteously</p>

ELEMENT	PERFORMANCE CRITERIA
	according to store policy.
	1.8 Use verbal and non-verbal communication to develop rapport with customers during service delivery.
	1.9 Encourage repeat customers by promotion of appropriate services or products according to store policy.
	1.10 Process customer returns or refunds according to store policy and procedures.
2 Respond to customer complaints.	<p>2.1 Convey a positive, helpful attitude to customers when handling <i>complaints</i> according to store policy.</p> <p>2.2 Handle complaints sensitively, courteously and with discretion.</p> <p>2.3 Establish and confirm with customer nature of complaint by active listening and questioning.</p> <p>2.4 Take action to resolve complaint to customers' satisfaction wherever possible.</p> <p>2.5 Promptly refer unresolved customer dissatisfaction or complaints to supervisor.</p> <p>2.6 Take the opportunity to turn incidents of customer dissatisfaction into a demonstration of high-quality service to customers according to store policy.</p> <p>2.7 Complete documentation regarding customer dissatisfaction or complaints accurately and legibly.</p> <p>2.8 Take <i>follow-up action</i> as necessary to ensure customer satisfaction.</p>
3 Receive and process sales orders.	<p>3.1 Record customers' details and information accurately.</p> <p>3.2 Promptly refer customers to appropriate area as required.</p> <p>3.3 Provide customers with information in clear, concise manner.</p> <p>3.4 Process, record and act upon <i>sales orders</i> according to store policy.</p>
4 Identify special customer requirements.	<p>4.1 Promptly identify customers with special needs or requirements by observation and questioning.</p> <p>4.2 Verbally and non-verbally convey a willingness to assist.</p>

ELEMENT

PERFORMANCE CRITERIA

- 4.3 Promptly service, refer or redirect customers' needs as required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- greeting and farewelling techniques
- add-on selling concepts
- literacy skills in the following areas:
 - written procedures for orders, in person, by telephone or in electronic format
 - message taking in person or by telephone
 - written record of complaints
 - sales, stock and delivery documentation
- numeracy skills in regard to:
 - handling of tender
 - weighing and measuring goods.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - customer service
 - dealing with customer complaints
 - allocated duties and responsibilities
 - customer returns and refunds
 - lay-by, gift voucher and rain-check procedures
- merchandise and service range of store departments
- location of store departments
- functions and procedures for operating the store telephone system and other communication equipment and the relevant numbers
- relevant legislation and statutory requirements
- relevant industry codes of practice
- relevant OHS requirements
- questioning and active listening

REQUIRED SKILLS AND KNOWLEDGE

- conflict resolution
- following set routines and procedures
- handling difficult or abusive customers.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures and industry codes of practice in regard to customer service
- provides a quality service environment by treating customers and team members in a courteous and professional manner through all stages of the service and sales procedure
- accurately identifies the nature of customer complaints, resolves complaints and provides service to customers according to store policies
- uses effective questioning, active listening and observation skills to identify special customer requirements
- accesses, records and processes sales orders accurately and responsibly according to store policy and procedures
- collaboratively works within a team to meet customers' needs.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - sales order forms
 - complaint and return forms
 - stock, inventory and price lists

EVIDENCE GUIDE

- store policy and procedures manuals
- a range of customers with different requirements
- point-of-sale equipment and materials
- a communication system or a range of communication equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS001A Apply point-of-sale handling procedures
- SIRXRSK001A Minimise theft
- SIRXINV001A Perform stock control procedures
- SIRXFIN001A Balance point-of-sale terminal.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Communication techniques may include:

- using open and inclusive language
- speaking clearly and concisely
- using appropriate language
- non-verbal communication
- face-to-face or telephone contact with customers.

Customers may include:

- new or repeat contacts
- internal and external contacts
- customers with routine or special requests
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Store policy may relate to:

- customer service
- dealing with customer complaints
- processing sales orders
- cash handling.

Customer needs may include:

- information regarding store facilities and services
- location of specific items within the store
- product information
- returns or refunds.

Legislative requirements may include:

- Trade Practices Act
- tobacco laws
- lottery legislation
- liquor licensing regulations
- sale of X and R rated products
- sale of second-hand goods
- trading hours
- transport, storage and handling of goods.

RANGE STATEMENT

- Service* may include:
- all store activities
 - internal and external customers
 - follow up in event of delays in service provision.
- Complaints* may relate to:
- service
 - products
 - prices.
- Follow-up action* may require:
- verbal and non-verbal communication with:
 - customers
 - staff
 - supervisors and management
 - suppliers
 - recommendations to supervisor regarding policy and procedure development or alteration.
- Sales orders* may be:
- verbal
 - written
 - electronic.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Remove takings from register or terminal.	<p>1.1 Perform <i>register or terminal</i> balance at designated times according to <i>store policy and procedures</i>.</p> <p>1.2 Separate cash float from takings prior to balancing procedure and secure according to store policy.</p> <p>1.3 Supply change to register or terminal according to store policy.</p> <p>1.4 Acquire and accurately interpret register or terminal reading or print-out.</p> <p>1.5 Remove and transport cash and <i>non-cash documents</i> according to store security policy and procedures.</p>
2 Reconcile takings.	<p>2.1 Count cash accurately.</p> <p>2.2 Calculate non-cash documents accurately.</p> <p>2.3 Determine balance between register or terminal reading and sum of cash and non-cash transactions.</p>

ELEMENT

PERFORMANCE CRITERIA

- 2.4 Report discrepancies between register or terminal reading and sum of cash and non-cash transactions to *relevant personnel* according to store policy.
- 2.5 Record store and individual department takings and file *records* according to store policy.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- operating register or terminal
- completing tasks in a set timeframe
- literacy skills in regard to:
 - interpreting documentation
 - completing documentation
- numeracy skills in regard to:
 - counting cash
 - calculating non-cash transactions
 - reporting on takings.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - register or terminal balance
 - cash and non-cash transactions security
 - cash float
 - operation of equipment used at register or terminal
- cash and non-cash handling procedures, including:
 - opening and closing point-of-sale terminal
 - clearance of terminal and transference of tender
 - maintenance of cash float
 - counting cash

REQUIRED SKILLS AND KNOWLEDGE

- calculating non-cash documents
- balancing point-of-sale terminal
- recording takings
- security of cash and non-cash transactions
- change required and denominations of change
- EFTPOS
- credit cards
- gift vouchers
- lay-by
- credit and returns.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- operates register or terminal equipment according to manufacturer instructions and store policy
- consistently applies store policy and procedures in regard to handling cash and removing takings from register or terminal
- consistently applies store policy and procedures in regard to cash float
- consistently applies store policy and procedures in regard to reading registers and recording information
- processes documentation and records responsibly and according to store policy and procedures
- reconciles takings according to store policy and procedures.

Context of and specific

Assessment must ensure access to:

EVIDENCE GUIDE

resources for assessment

- a real or simulated work environment
- relevant documentation, such as:
 - financial transaction dockets, slips and invoices
 - sample debit card and credit card vouchers
 - recording and tally sheets
 - store policy and procedure manuals in regard to register or terminal balance
- register or terminal and related equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS001A Apply point-of-sale handling procedures
- SIRXRSK001A Minimise theft.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Register or terminals may be:

- manual
- electronic
- cleared by operator or specialist staff
- cleared at intervals during or at close of trading.

Store policy and procedures in regard to:

- register or terminal balance
- cash handling
- security.

Non-cash documents may relate to:

- credit cards
- cheques
- gift vouchers
- hire-purchase
- lay-by
- cash on delivery (COD)
- customer refunds
- customer credit ratings.

Relevant personnel may include:

- manager
- supervisor
- team leader.

Records may be:

- manual
- electronic.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Process petty cash transactions.	<p>1.1 Check petty cash claims for approval, accuracy and authenticity before processing.</p> <p>1.2 Check and balance transactions according to <i>store policy and procedures</i>.</p> <p>1.3 Note irregularities and refer to <i>relevant personnel</i> for resolution.</p> <p>1.4 Process and record petty cash transactions within designated time limits.</p>
2 Prepare banking documents.	<p>2.1 Balance cashbook entries against record of takings.</p> <p>2.2 Compile and balance deposit entries.</p> <p>2.3 List cash and <i>non-cash transactions</i> on banking deposit forms according to the banking institution's guidelines.</p> <p>2.4 Process in-store credit systems according to store policy.</p>

ELEMENT	PERFORMANCE CRITERIA
3 Process non-cash transactions.	3.1 Balance non-cash transactions and present <i>documentation</i> to relevant personnel for checking. 3.2 Note irregularities and refer to relevant personnel for resolution.
4 Reconcile invoices for payment to creditors.	4.1 Identify discrepancies between invoices and delivery notes and report to relevant personnel or section for resolution. 4.2 Identify errors in invoice charges and report to relevant personnel or section for correction or resolution. 4.3 Rectify discrepancies and errors as directed. 4.4 Process corrected and authorised invoices for payment within designated time limits. 4.5 Resolve creditor enquiries or refer to relevant personnel or section for resolution.
5 Prepare invoices for debtors.	5.1 Perform <i>preparatory calculations</i> to produce accurate customer invoices. 5.2 Complete relevant documentation to ensure accuracy of contents. 5.3 Distribute documents to relevant personnel or section for certification prior to being dispatched. 5.4 Dispatch verified documents within designated time limits. 5.5 Copy and <i>file</i> documents for auditing purposes.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

REQUIRED SKILLS AND KNOWLEDGE

- completing tasks in a set timeframe
- literacy skills in regard to interpreting documentation
- numeracy skills in regard to:
 - processing petty cash transactions
 - receiving and processing deliveries
 - performing sales transactions
 - balancing cashbook entries and takings
 - generating invoices
- interpersonal communication skills to:
 - refer and report irregularities, discrepancies and errors in transactions to relevant personnel
 - resolve creditor enquiries or refer to relevant personnel through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - register or terminal balance
 - security of cash and non-cash transactions
 - petty cash
 - cash balances
 - banking procedures
 - purchase requisitions or orders
 - issuing of receipts
 - delivery dockets
 - credit notes
 - statements
 - remittance advices
 - cash register rolls
 - deposit books
 - change required and denomination of change
 - operation of equipment used at register or terminal
 - processing delivery and delivery document discrepancies
 - invoicing procedures for debtors and creditors
- payment and invoice procedures, including GST requirements
- cash and non-cash handling procedures, including:

REQUIRED SKILLS AND KNOWLEDGE

- opening and closing point-of-sale terminal

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures in regard to petty cash and non-cash transactions, invoicing, banking processes and processing delivery and document discrepancies
- consistently applies skills related to the reconciliation and payments of invoices for creditors and debtors, according to store policy and procedures.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - store policy and procedures manuals
 - financial transaction dockets, slips and invoices
 - banking deposit forms
- EFTPOS facilities and equipment
- registers and related equipment
- relevant financial management systems.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXADM001A Apply retail office procedures
- SIRXICT001A Operate retail technology.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Enter payment summaries into journals.	1.1 Fill payment documents out identifying relevant details. 1.2 Check payment documents for authenticity of claim. 1.3 Balance payment documents on a routine basis.
2 Reconcile accounts to balance.	2.1 Identify discrepancies between <i>transaction</i> documentation and account balances. 2.2 Rectify errors in documentation. 2.3 Record data on <i>nominated system</i> within designated time limits.

ELEMENT	PERFORMANCE CRITERIA
3 Prepare bank reconciliations.	3.1 Check deposit entries and cash payment summaries for accuracy against bank statements. 3.2 Note and resolve discrepancies. 3.3 Produce regular reconciliation reports within designated time limits to provide data for preparation of trial balance. 3.4 Complete pay-in documentation accurately. 3.5 Balance all transaction calculations .
4 Receive and document payments and takings.	4.1 Count cash correctly and give correct change, if applicable. 4.2 Verify cheque and credit card payments with the <i>relevant personnel</i> or department prior to acceptance. 4.3 Complete and issue receipts.
5 Dispatch statements to debtors and follow up outstanding accounts.	5.1 Check debtor statements for accuracy of contents. 5.2 Rectify any noted discrepancies accurately. 5.3 Dispatch debtor statements within designated time limits. 5.4 Collect outstanding accounts within designated credit periods. 5.5 Review and control credit terms to ensure payment within designated time limits. 5.6 Maintain debtors ledger to reflect current situation. 5.7 Review customer credit terms when indicated according to <i>store policy and procedures</i> .
6 Dispatch payments to creditors.	6.1 Check payment documentation prepared by others for accuracy of information and dispatch to creditors within designated time limits. 6.2 Reconcile creditors' statements with accounting <i>records</i> .

ELEMENT	PERFORMANCE CRITERIA
	6.3 Input relevant data to creditors' ledger. 6.4 Reconcile general ledger against accounting records.
7 Generate financial documents.	7.1 Clarify purpose of the report with relevant personnel. 7.2 Identify and obtain relevant data from nominated internal or external <i>sources</i> . 7.3 Update nominated internal records to show current status of financial report. 7.4 Transcribe data onto nominated form and in the authorised manner.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- literacy skills in regard to:
 - interpreting documentation
 - report writing
- numeracy skills in regard to:
 - reconciling accounts
 - counting cash
 - calculating non-cash transactions
 - reporting on takings
- interpersonal communication skills to:
 - verify cheque and credit card payments with relevant personnel or department prior to acceptance
 - clarify purpose of report with relevant personnel
 - identify and obtain relevant data through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences

REQUIRED SKILLS AND KNOWLEDGE

- use and interpret non-verbal communication.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - register or terminal balance
 - cash and non-cash transactions security
 - cash balances
 - banking procedures
 - purchase requisitions and orders
 - issuing of receipts
 - delivery dockets
 - credit notes
 - statements
 - remittance advices
 - cash register rolls
 - deposit books
 - change required and denomination of change
 - operation of equipment used at register or terminal
 - processing delivery document discrepancies
 - invoicing procedures for debtors and creditors
- payment and invoice procedures, including GST requirements
- relevant legislation and statutory requirements
- cash and non-cash handling procedures, including:
 - balancing point-of-sale terminal
 - recording takings
 - security of cash and non-cash transactions
 - change required and denominations of change
 - EFTPOS
 - credit cards
 - gift vouchers
 - lay-by
 - credits and returns.

Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | | |
|---|-----------------|--|
| 1 | Control costs. | 1.1 Implement cost reduction measures according to <i>store policy and procedures</i> . |
| | | 1.2 Assess and interpret <i>information</i> on costs and <i>resource</i> allocation. |
| | | 1.3 Actively encourage <i>team members</i> to control costs in their areas of responsibility. |
| | | 1.4 Promptly implement recommendations for improving cost reduction or <i>communicate to relevant personnel</i> . |
| 2 | Control budget. | 2.1 Monitor and maintain expenditure within budget targets according to store policy. |
| | | 2.2 Compare actual income and expenditure to budget targets at regular intervals according to store policy. |
| | | 2.3 Monitor, analyse and compare gross profit and loss figures by department or section and store, with budget targets. |
| | | 2.4 Monitor and analyse net profit figures, including floor space profitability according to budget targets. |

ELEMENT	PERFORMANCE CRITERIA
	2.5 Monitor and analyse stock turnover figures according to budget targets.
	2.6 Promptly inform relevant personnel, where potential occurs for budget under or overspend.
	2.7 Take prompt corrective action where significant deviations from budget occur.
	2.8 Negotiate necessary changes or allocations to agreed budget in advance of requirement.
	2.9 Ensure modifications to existing budgets are authorised according to store policy.
3 Propose expenditure.	3.1 Ensure estimates of costs and benefits are supported by valid, relevant information.
	3.2 Ensure final recommendations are supported by realistic alternatives and contain accurate, clear <i>proposals</i> .
	3.3 Ensure recommendations clearly indicate net benefits over designated timeframe and related changes in operations.
	3.4 Clarify contentious issues by further explanation.
	3.5 Compare estimates to actual costs and benefits to improve future proposals.
4 Maintain store accounting systems.	4.1 Manage and maintain store policy and procedures in regard to <i>record-keeping systems</i> .
	4.2 Monitor and maintain store systems for recording sales figures, revenue and expenditure.
	4.3 Monitor and maintain systems for recording and retrieving financial, personnel and payroll information as required by store policy.
5 Prepare store sales budgets.	5.1 Maintain store policy and procedures in regard to preparation of <i>budget or target figures</i> .
	5.2 Compare, analyse, document and report budget and actual sales revenue and expenditure figures according to budget targets and store policy.
	5.3 Maintain accurate records on past sales budgets or targets according to store policy.

ELEMENT	PERFORMANCE CRITERIA
	5.4 Present proposed budgets or targets accurately and concisely.
	5.5 Justify variations to proposed targets and report according to store policy.
6 Negotiate budgets.	6.1 Conduct budget negotiations within a set timeframe and in a manner likely to promote good relationships.
	6.2 Ensure budget negotiations reflect the overall store policies and objectives relevant to the manager's area of responsibility.
	6.3 Seek clarification, where areas of uncertainty or disagreement occur.
	6.4 Promptly inform all relevant personnel of budget decisions.
	6.5 Present proposals clearly, concisely, in an appropriate form, and emphasising benefits to store operation.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- report presentation
- interpersonal communication skills to:
 - encourage team members to control costs
 - provide information to relevant personnel where potential occurs for budget under or overspend
 - negotiate budgets and provide information on budget decisions through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- time management

REQUIRED SKILLS AND KNOWLEDGE

- literacy and numeracy skills in regard to:
 - report writing
 - compilation and analysis of budgetary figures.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - financial management
 - resource utilisation
- store revenue
- capital and overhead costs
- interest rates
- pricing policies, including GST requirements
- cost of stock, materials and equipment
- staffing costs
- operational costs
- principles and techniques in:
 - interpersonal communication
 - monitoring resource utilisation and costs
 - analysing efficiency and effectiveness
 - cost-benefit analysis
 - differential analysis
 - risk analysis.

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store policy and procedures in regard to:

- financial management
- reporting mechanisms.

Information may include:

- resource utilisation
- capital and overhead costs
- interest rates
- stock, materials and equipment
- staffing levels
- operational costs.

Information may be obtained by:

- direct observation
- written reports
- numerical data.

Resources may include:

- people
- materials
- equipment and technology
- finances
- time.

Team members may include:

- full-time, part-time, casual or contract staff
- people from a range of social, cultural and ethnic backgrounds
- people with varying degrees of language and literacy levels.

Communication may be:

- formal and informal
- with individuals or groups

RANGE STATEMENT

- written, faxed, emailed or spoken.

- Relevant personnel* may include:
- relevant managers
 - supervisor
 - team leader.

- Proposals* may include:
- profitability
 - productivity
 - quality of service
 - environmental impact
 - working conditions
 - working relationships
 - team motivation
 - long-term goals
 - short-term goals.

- Record keeping systems* may include:
- manual
 - computerised.

- Budget or target figures* may encompass:
- sales
 - cash flow
 - net profit
 - payroll
 - staff expenditure
 - capital
 - maintenance
 - advertising and promotion.

ELEMENT	PERFORMANCE CRITERIA
	5.4 Present proposed budgets or targets accurately and concisely. 5.5 Justify variations to proposed targets and report according to business policy. 5.6 Report sales budgets accurately and concisely.
6 Set budget targets and monitoring mechanisms.	6.1 Conduct budget negotiations within a set timeframe and in a manner likely to promote good relationships. 6.2 Ensure budget negotiations reflect the overall business policies and objectives relevant to the manager's area of responsibility. 6.3 Acquire and deploy resources according to relevant legislation and company guidelines. 6.4 Maintain accurate and up-to-date records of resource allocation and usage according to company guidelines. 6.5 Develop and <i>review</i> management systems that enable timely collection, management and processing of information. 6.6 Complete records of budget performance and expenditure and report according to company procedures and guidelines. 6.7 Enforce budget <i>audit mechanisms</i> and compliance requirements. 6.8 Promptly inform relevant personnel of <i>budget decisions</i> .

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- report presentation
- interpersonal communication skills to:
 - encourage team members to control costs

REQUIRED SKILLS AND KNOWLEDGE

- provide information to relevant personnel where potential occurs for budget under or overspend
- negotiate budgets and provide information on budget decisions through clear and direct communication
- ask questions to identify and confirm requirements
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- time management
- resource management
- literacy skills in regard to:
 - reading and understanding business policy and procedures
 - generating reports
- numeracy skills in regard to:
 - budget calculation and control
 - using accounting systems.

The following knowledge must be assessed as part of this unit:

- principles and techniques in:
 - interpersonal communication
 - monitoring resource utilisation and costs
 - analysing efficiency and effectiveness
 - cost-benefit analysis
 - differential analysis
 - risk analysis
 - resource planning
 - interpreting and analysing budget and accounting documentation
- information sources on product and supply arrangements for customers
- business policy and procedures affecting job role or function
- resource utilisation, including capital, material and human
- business revenue
- capital and overhead costs
- interest rates
- cost of stock, materials and equipment
- accounting and reporting protocols and professional standards
- staffing costs
- operational costs
- relevant legislation.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- negotiating, developing and implementing budgets according to business policy and procedures
- managing and maintaining accounting systems according to business policy and procedures
- monitoring, analysing and reporting on operational areas income and expenditure against budget
- taking corrective actions, where appropriate, where income and expenditure performance is not being completed according to budget or business targets
- consistently producing financial reports to standard business requirements over a period of time
- consistently implementing policy and procedures for the reporting and recording of budgetary and financial information within an operational area
- developing, advocating and gaining approval for an operational area's budget.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- business or sample policy and procedures in regard to financial management
- an accounting system
- budgetary information
- a team involved in budget control.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor

EVIDENCE GUIDE

- a case study
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Company policy and procedures in regard to:

- operating procedures and instructions
- financial management
- resource management
- reporting mechanisms.

Information may be obtained by:

- direct observation
- accessing written reports
- accessing numerical data.

RANGE STATEMENT

Resources may include:

- people
- materials
- equipment and technology
- finances
- time.

Team members may include:

- full-time, part-time, casual or contract staff
- people from a range of social, cultural and ethnic backgrounds
- people with varying degrees of language and literacy levels.

Relevant personnel may include:

- senior managers
- team members.

Proposals may:

- be long-term or short-term
- include potential improvements in profitability
 - productivity
 - quality of service
 - environmental impact
 - working conditions
 - working relationships
 - team motivation.

Record-keeping systems may include:

- manual
- computerised.

Relevant legislation may include:

- taxation law, including GST
- superannuation guarantee
- awards, workplace agreements, and other industrial arrangements
- OHS
- workplace relations
- workers' compensation
- industry codes of practice
- transport, storage and handling of goods

RANGE STATEMENT

- Australian Competition and Consumer Commission provisions
- Trade Practices and Fair Trading Acts.

Budget or target figures may encompass:

- sales
- cash flow
- net profit
- payroll
- staff expenditure
- capital
- maintenance costs.

Review of management systems may include:

- stakeholder consultation
- modelling results
- cost-benefit analysis
- data analysis.

Audit mechanisms may be:

- manual or electronic
- cyclical
- automated.

Budget decisions may vary according to:

- key performance indicators
- strategic objectives
- cash flow
- net profit or loss
- market and sales indicators
- brand value
- quality standards and criteria
- performance benchmarks.

SIRXICT001A Operate retail technology

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to operate a variety of retail equipment. It involves identifying the correct equipment required for a given task, maintaining retail equipment, applying keyboard skills and operating data entry equipment.

Application of the Unit

Application of the unit

This unit requires the skilled operation and maintenance of a range of retail equipment, including point-of-sale systems, keyboards and data entry equipment according to manufacturer instructions, design specifications, store policy and designated timeframes. This work is undertaken with some supervision and guidance.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

Nil

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Maintain retail equipment.	1.1 Identify purpose of <i>equipment</i> used in store or department. 1.2 Operate equipment according to design specifications and <i>safety requirements</i> . 1.3 Identify equipment faults and report to <i>relevant personnel</i> . 1.4 Identify and apply maintenance program for retail equipment according to <i>store policy and procedures</i> .
2 Apply keyboard skills.	2.1 Operate keyboard using typing techniques within designated speed and accuracy requirements. 2.2 Enter and edit information accurately.
3 Operate data entry equipment.	3.1 Enter data using relevant equipment according to store policy and procedures.

ELEMENT

PERFORMANCE CRITERIA

- 3.2 Operate price marking equipment according to manufacturer instructions and store policy.
- 3.3 Enter data accurately and within designated time limits.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- completing tasks in set timeframe
- dealing with different types of transactions
- following common fault-finding procedures
- operation and use of store retail equipment
- literacy and numeracy skills in regard to:
 - reading store procedures for operating equipment
 - data entry
 - performing point-of-sale transactions.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - the operation of store retail equipment
 - maintenance of store retail equipment
 - reporting problems and faults
- relevant legislation and statutory requirements
- relevant OHS regulations
- relevant industry codes of practice
- purpose and impact of using electronic technology
- operation and maintenance of store retail equipment
- licensing requirements for carrying and moving merchandise (if applicable).

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- operates a range of store retail equipment according to store policy and procedures and industry codes of practice
- operates and maintains a range of store retail equipment according to manufacturer instructions and design specifications
- applies store maintenance program and reports faults and problems
- consistently applies safe working practices in the operation and maintenance of store retail equipment according to OHS legislation and codes of practice
- reads and interprets operation manuals to solve routine faults and errors and maintains and uses equipment effectively
- uses keyboard skills to enter and edit data accurately
- completes tasks in set timeframe.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - store policy and procedure manuals
 - manufacturer instructions and operation manuals
- a range of store retail equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- customer feedback

EVIDENCE GUIDE

- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Equipment may include:

- point-of-sale terminals
- electronic bar coding equipment for price labelling and stocktaking
- portable data entry
- printers
- EFTPOS terminals
- electronic ordering equipment
- wrapping and packing equipment
- equipment for carrying or moving merchandise
- equipment for storage of merchandise, including refrigerators
- weighing machines

RANGE STATEMENT

- thermometers
- security tag systems
- trolley return equipment
- computers
- scanners
- numerical keyboard equipment, including calculators.

Safety requirements may include:

- hazard identification (e.g. workplace inspections)
- emergency, fire and accident procedures
- personal safety procedures
- stress management
- procedures for the use of personal protective clothing and equipment
- reporting incidents and accidents in the workplace.

Relevant personnel may include:

- supervisor
- team leader
- manager.

Store policy and procedures in regard to:

- store administration
- clerical systems
- operating and maintaining retail equipment
- OHS.

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Use store information technology system.	<p>1.1 Demonstrate knowledge of store <i>information technology system</i> and convey to other <i>staff members</i> as required.</p> <p>1.2 Identify and operate <i>hardware</i> according to manufacturer instructions and <i>store policy and procedures</i>.</p> <p>1.3 Identify and use <i>software</i> according to manufacturer instructions and store procedures.</p> <p>1.4 Describe the <i>application and uses</i> of information technology systems available.</p> <p>1.5 Transmit data according to electronic data interchange procedures as required.</p> <p>1.6 Use keyboard skills to accurately enter <i>information</i> as required by store policy.</p> <p>1.7 Regularly perform <i>back-up procedures</i> according to store policy.</p>

ELEMENT	PERFORMANCE CRITERIA
2 Edit and update information.	2.1 Identify information to be edited and updated according to store procedures. 2.2 Edit and update information on system according to store policy and procedures. 2.3 Identify and enter price changes into store system as required. 2.4 Ensure shelf data price and computer records match.
3 Solve problems.	3.1 Identify equipment, hardware and software <i>faults</i> and rectify where possible or seek expert assistance without delay. 3.2 Monitor and implement maintenance program for hardware and software systems according to manufacturer specifications and store procedures. 3.3 Handle routine problems using appropriate <i>problem-solving techniques</i> and refer to <i>relevant personnel</i> as required. 3.4 Evaluate and resolve problems arising at point of sale according to store procedures and <i>relevant legislation</i> . 3.5 Provide assistance positively and actively to staff as problems arise.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- using store technology information systems
- application and use of hardware and software
- interpersonal communication skills to:
 - convey knowledge of store technology system to other staff members

REQUIRED SKILLS AND KNOWLEDGE

- refer problems to appropriate personnel
- provide assistance to staff through clear and direct communication
- ask questions to identify and confirm requirements
- share information
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- literacy and numeracy skills in regard to processing, recording and documenting information.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to use and operation of store information technology systems, including:
 - use and maintenance of hardware and software systems
 - solutions to problems and breakdowns
 - operation of equipment
- relevant legislation and statutory requirements, including:
 - consumer law
 - credit procedures
 - OHS
- relevant industry codes of practice
- store products and services range, including pricing structure
- manufacturer specifications in regard to operation of hardware and software
- software licensing specifications
- problem-solving techniques

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in Evidence of the following is essential:

- applies store policy and procedures in regard to information technology systems, including:

EVIDENCE GUIDE

this unit

- resolution of system faults
- use and application of store credit and EFTPOS
- reviewing and entering information on store system
- follows requirements of relevant legislation and statutory requirements, including consumer law and credit procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- hardware and software instruction manuals
- information technology system
- relevant documentation, such as:
 - store or sample policy and procedures on management of information technology systems
 - legislation and statutory requirements
 - OHS requirements
 - industry codes of practice.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be

assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Information technology system used may be:

- centrally based
- store-based
- networked.

Staff members may be:

- full-time, part-time or casual
- under contract
- people with varying degrees of language and literacy
- people from a range of cultural, social and ethnic backgrounds
- people with a range of responsibilities and job descriptions.

Hardware may include:

- personal computers or terminals (stand-alone or networked)
- scanning equipment
- bar coding
- point-of-sale terminals
- hand-held pricing equipment.

Store policy and procedures in regard to:

- information technology systems
- processing sales orders.

RANGE STATEMENT

Software may include:

- word processing
- databases
- spreadsheets
- financial
- electronic data interchange (EDI).

Application and uses may include:

- point-of-sale operations, including:
 - EFTPOS
 - credit cards
 - smart cards
 - loyalty cards
 - fly buys
 - online sales
- credit checks for granting of credit or loans
- arrangement of credit for customer via a third party
- customer records
- financial management
- pricing, price changes
- inventory control
- electronic cataloguing
- stock transfers and delivery
- individual, department or item sales performance analysis
- staff payroll (from staff log-in and log-out)
- staff rosters
- use of multimedia
- use of internet facilities.

Information may include:

- price changes (manually or electronically)
- staffing information
- customer details or records, including names, addresses, and consumer information or profiles
- stock records
- stock transfers
- orders.

Back-up procedures may

- zip disc
- CD

RANGE STATEMENT

include:

- DVD
- digital tape
- external hard drive
- off-site data storage.

Faults may include:

- hardware faults or breakdowns
- software
- staff abilities and training
- point-of-sale (e.g. EFTPOS, credit facilities and cheque clearances)
- pricing variations.

Problem-solving techniques may include:

- routine procedures
- manufacturer recommendations
- lateral thinking
- referral to:
 - operator or manager
 - specialist or expert.

Relevant personnel may include:

- relevant managers
- supervisor
- team leader
- technical specialist.

Relevant legislation may include:

- consumer law
- credit procedures
- OHS.

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Receive and process incoming goods.	<p>1.1 Maintain cleanliness and orderliness in receiving bay according to <i>store policy and procedures</i>.</p> <p>1.2 Unpack goods using correct <i>handling techniques and equipment</i> according to store policy.</p> <p>1.3 Remove and promptly dispose of packing materials according to store policy and relevant <i>legislative requirements</i>.</p> <p>1.4 Check incoming stock and validate against purchase orders and delivery documentation according to store policy and relevant legislative requirements.</p> <p>1.5 Inspect items received for damage, quality, use-by dates, breakage or discrepancies and record according to store policy.</p> <p>1.6 Record stock levels on store <i>stock systems</i> according to store policy.</p> <p>1.7 Rotate and store stock according to the first in first out (FIFO) principle.</p>

ELEMENT	PERFORMANCE CRITERIA
	1.8 Dispatch stock to appropriate area or department.
	1.9 Apply stock price and code labels when required according to store policy.
2 Rotate stock.	2.1 Carry out stock rotation procedures according to store routine and policy.
	2.2 Perform store code checking and reporting procedures, including recording of waste and markdowns.
	2.3 Place merchandise to achieve a balanced, fully-stocked display appearance and promote sales.
	2.4 Place excess stock in storage or dispose of according to store policy and legislative requirements.
	2.5 Maintain safe lifting, shifting and carrying techniques according to store OHS policy and legislative requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- following set routines and procedures
- using electronic labelling and ticketing equipment
- literacy and numeracy skills in regard to:
 - stock records and delivery documentation
 - reporting problems.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - stock control
 - store labelling policy
 - product quality standards

REQUIRED SKILLS AND KNOWLEDGE

- correct unpacking of goods
- out-of-date, missing or damaged stock
- equipment used
- stock location
- waste disposal
- methods of storage
- delivery documentation
- stock record documentation
- dispatch documentation
- reporting faults and problems
- relevant legislation and statutory requirements
- relevant industry codes of practice
- relevant OHS regulations.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit Evidence of the following is essential:

- consistently applies store policy and procedures, industry codes of practice, relevant legislation and statutory requirements in regard to stock control
- consistently applies safe working practices in the manual handling and moving of stock according to OHS legislation and store policy
- interprets and applies manufacturer instructions with regard to handling stock and using relevant equipment
- receives and processes incoming goods and dispatches outgoing goods according to store policy and procedures
- rotates stock and performs out-of-code checking and reporting according to store policy and procedures
- interprets and processes information accurately and responsibly.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant equipment, including:
 - stock moving equipment
 - manual and electronic labelling and ticketing equipment
- computers and stock recording equipment
- relevant documentation, such as:
 - invoices, packing slips, dispatch documents and order forms
 - recording and tally sheets
 - store policy and procedures manuals
 - OHS regulations
 - relevant legislation and statutory requirements
 - industry codes of practice.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS001A Apply point-of-sale handling procedures
- SIRXRSK001A Minimise theft
- SIRXCCS002A Interact with customers
- SIRXFIN001A Balance point-of-sale terminal.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Monitor receipt and dispatch of goods	<p>1.1 Delegate responsibility for receipt and dispatch of goods to <i>appropriate staff</i>.</p> <p>1.2 Implement store procedures in regard to receipt, dispatch and secure storage of goods.</p> <p>1.3 Observe <i>staff</i> functions to ensure store procedures are followed and documentation is completed correctly.</p> <p>1.4 Implement store procedures to ensure goods inspected for quantity and quality on receipt.</p> <p>1.5 Act upon variations to quantity and quality of delivered goods according to <i>store policy and procedures</i>.</p> <p>1.6 Supervise safe <i>handling and storage of goods</i> according to store policy.</p>

ELEMENT	PERFORMANCE CRITERIA
2 Maintain stock records.	2.1 Monitor and maintain stock levels at required levels. 2.2 Maintain, monitor and adjust stock reorder cycles as required. 2.3 Inform team members of their individual responsibilities in regard to recording of stock. 2.4 Maintain stock storage and movement <i>records</i> according to store policy. 2.5 Record stock discrepancies and follow procedures according to store policy. 2.6 Monitor stock performance and identify and <i>report</i> fast and slow selling items according to store policy.
3 Coordinate stocktake or cyclical count.	3.1 Interpret policy and procedures in regard to <i>stocktaking</i> and cyclical counts and explain to team members. 3.2 <i>Roster</i> staff according to allocated budget and time constraints. 3.3 Allocate stocktaking tasks to individual team members. 3.4 Provide team members with clear directions for the performance of each task. 3.5 Allocate team members to ensure effective use of staff resources to complete task. 3.6 Produce accurate reports on stocktake data, including discrepancies, for management.
4 Identify stock losses.	4.1 Identify, record and assess losses against potential loss forecast on a regular basis. 4.2 Identify avoidable losses and establish reasons. 4.3 Recommend and implement possible solutions.
5 Process orders.	5.1 Process and raise orders for stock as requested according to store policy and procedures. 5.2 Maintain <i>ordering and recording system</i> . 5.3 Ensure availability of sample range according to buying plan.

ELEMENT	PERFORMANCE CRITERIA
	5.4 Order pricing materials as required.
	5.5 Record negotiated purchase and supply agreements and file for retrieval.
6 Follow up orders.	6.1 Monitor delivery process to meet agreed deadlines.
	6.2 Handle routine supply problems or refer to management as required by store policy.
	6.3 Maintain ongoing liaison with buyers, store or departments, warehouse and <i>suppliers</i> to ensure continuity of supply.
	6.4 Distribute stock according to store or department allocation.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- store stocktaking systems
- use of electronic recording equipment
- interpersonal communication skills to:
 - inform team members of their responsibilities and give instructions
 - explain policies and procedures to staff
 - allocate tasks and provide directions for performance of tasks
 - liaise with buyers, store and departments, warehouse and suppliers through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- time management
- negotiation skills
- report preparation and presentation
- literacy and numeracy skills in regard to:
 - stock control reports and documentation
 - processing orders

REQUIRED SKILLS AND KNOWLEDGE

- maintaining delivery and supply records
- stock distribution records
- maintaining stock ordering and recording systems.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - stock control
 - store merchandising system
 - current and future stock levels
 - bar codes, labels and price tags
 - store stock recording system
 - stock replenishment and reorder procedures
 - inter- and intra-store and department transfers
 - reporting of stock discrepancies and damage
 - identifying and recording stock losses
 - identifying and recording discrepancies
 - existing suppliers
 - quality control procedures and requirements
 - receipt and dispatch of goods, including inspection for quality and quantity
- relevant licensing requirements for moving stock mechanically
- relevant legislation and statutory requirements
- relevant industry codes of practice
- relevant OHS legislation and codes of practice
- principles and techniques for interpersonal communication skills.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in Evidence of the following is essential:

- consistently implements and monitors store policy and

EVIDENCE GUIDE

this unit

procedures regarding receipt, dispatch and secure storage of goods

- regularly monitors staff implementation of store procedures and documentation in regard to receipt, dispatch and secure storage of goods
- monitors stock levels, storage, movement and reorder cycles on a regular basis.
- organises and coordinates stocktake according to store policy and procedures
- consistently raises and processes stock orders and maintains record system according to store policy and procedures
- monitors delivery processes and distributes stock to ensure continuity of supply.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - store policy and procedures for receipt and dispatch of goods
 - store procedures for stocktake
 - OHS legislation and codes of practice
 - industry codes of practice
 - legislation and statutory requirements
 - store merchandising and marketing policy and procedures
 - inter- and intra-store and department transfer procedures
 - store quality control procedures and requirements.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

EVIDENCE GUIDE

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Appropriate staff may include:

- frontline staff
- relevant managers
- supervisor
- team leader
- specialist staff.

Staff may include:

- full-time, part-time, casual or contract staff
- people from a range of social, cultural and ethnic backgrounds
- people with varying degrees of language and literacy levels.

Store policy and procedures in regard to:

- stock control
- stock control system
- recording procedures

RANGE STATEMENT

- procedures for investigating discrepancies
- store merchandise and marketing
- pricing, labelling and packaging requirements
- quality control policy and procedures.

Handling and storage of goods may vary according to:

- stock characteristics
- industry codes of practice.

Records may be:

- manual
- digital.

Reports for management may include:

- financial reports
- business documents
- informal reports
- stocktake reports.

Stocktaking may be:

- cyclical
- compliance driven.

Roster may include:

- varying levels of staff training
- staffing levels
- routine or busy trading conditions
- full-time, part-time or casual staff
- range of staff responsibilities.

Ordering and recording system may be:

- manual
- digital.

Suppliers may include:

- existing contacts
- new contacts
- local suppliers
- overseas supplies.

SIRXINV004A Buy merchandise

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to buy merchandise in a retail environment. It involves analysing the market, planning the product range, establishing supplier relationships, negotiating supply of goods, introducing the product range, maximising profit and rationalising stock.

Application of the Unit

Application of the unit

This unit requires the consistent application of store policy and legislative requirements in regard to market analysis, planning merchandise and service ranges, procurement and rationalisation of stock, maintenance of supplier relations, quality control and staff merchandise training. The team member is required to recognise known and unknown loss and how it affects buying and ordering patterns, and to interpret and apply market trends to the store situation to create opportunities to improve sales and service while maximising profits.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse market.	<p>1.1 Identify and analyse <i>store merchandise and marketing policy and procedures</i>.</p> <p>1.2 Monitor <i>customer requirements</i> formally and informally in order to evaluate market trends and customer needs.</p> <p>1.3 Research new products and services.</p> <p>1.4 Identify, evaluate, implement and review opportunities to improve sales.</p> <p>1.5 Monitor <i>merchandise range</i> to identify the demand for individual items and seasonal variations.</p> <p>1.6 Monitor market competition.</p>

ELEMENT	PERFORMANCE CRITERIA
2 Analyse factors affecting stock levels and range requirements.	2.1 Apply mathematical calculations to measure analyse and report on existing and potential stock loss and dissipation and its <i>impact on business operations</i> . 2.2 Analyse store or department sales figures to determine contribution rates of product lines. 2.3 Determine store or department space requirements and brand product mix according to store policy. 2.4 Determine future directions for merchandise ranges according to store policy.
3 Plan merchandise ranges.	3.1 Develop and implement buying plan according to outcomes of analysis and store policy. 3.2 Determine future directions for merchandise ranges according to store policy. 3.3 Liaise with <i>relevant personnel</i> to coordinate promotional and marketing activities. 3.4 Analyse store or department sales figures to determine contribution rates of product lines. 3.5 Determine investment levels with reference to previous years' sales figures, predicted demand and projected gross profit. 3.6 Identify and act upon contribution improvement opportunities. 3.7 Determine store or department space requirements and brand product mix according to store policy. 3.8 Determine stock levels according to peak seasons, special events and supplier lead time. 3.9 Analyse, evaluate and amend merchandise range and sources of supply according to management, staff and customer <i>feedback</i> .
4 Establish supplier relations.	4.1 Develop cooperative relationships with supplier representatives according to store policy. 4.2 Continuously review existing suppliers in regard to quality, profitability, service and delivery status. 4.3 Identify new suppliers and delete existing suppliers according to <i>performance indicators</i> .

ELEMENT	PERFORMANCE CRITERIA
5 Negotiate supply of goods.	<p>5.1 <i>Negotiate</i> and implement arrangements with suppliers according to store policy and procedures, and communicate to relevant personnel.</p> <p>5.2 Authorise special <i>pricing arrangements</i> and customer payment agreements and communicate to relevant staff and management personnel according to store policy.</p> <p>5.3 Monitor records of suppliers and stock for accuracy and legibility and take appropriate action where necessary.</p> <p>5.4 Identify <i>market factors</i> affecting supply and communicate to relevant personnel.</p> <p>5.5 Convey complete and accurate records of negotiations and agreements to relevant personnel within designated timelines.</p> <p>5.6 Take immediate corrective action where potential or actual problems with supply are indicated.</p> <p>5.7 Identify and develop new suppliers to maintain and improve sales and service delivery.</p> <p>5.8 Analyse, evaluate and amend stock range and source of supply according to management, staff and customer feedback.</p>
6 Monitor quality control.	<p>6.1 Establish merchandise quality standards with suppliers according to <i>legal requirements</i>, customer requirements and store policy.</p> <p>6.2 Monitor and ensure quality of merchandise during supply, manufacture and delivery processes.</p> <p>6.3 Record and analyse stock return figures against target figure.</p>
7 Introduce product ranges.	<p>7.1 Inform relevant personnel of new product ranges and advise on preferred location of merchandise.</p> <p>7.2 Implement <i>staff training</i> in product knowledge to introduce product range.</p> <p>7.3 Demonstrate or display new ranges to <i>staff</i> according to store merchandising plan.</p>

ELEMENT	PERFORMANCE CRITERIA
8 Maximise profit.	8.1 Calculate or estimate individual product range contributions against budget and targets. 8.2 Develop and implement product range assessment checks against budget and targets. 8.3 Calculate or estimate overall selling space contributions according to store merchandising plan. 8.4 Maximise profit margins in negotiations with suppliers. 8.5 Determine store pricing policies according to stated net profit margin in store merchandising plan and consumer law. 8.6 Negotiate specifications for <i>terms of trade</i> .
9 Rationalise stock.	9.1 Review and update stock range at regular intervals. 9.2 Identify stock lines to be <i>deleted</i> and take action to minimise adverse effect on profit. 9.3 <i>Consolidate stock</i> as required to maximise sales potential.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- evaluating and analysing:
 - market trends and projections
 - sales figures and investment levels
 - space requirements
- negotiation skills
 - interpersonal communication skills to:
 - liaise with relevant personnel
 - establish supplier relationships, negotiate supply of goods
 - provide information and training on product range
 - provide feedback and coaching through clear and direct communication

REQUIRED SKILLS AND KNOWLEDGE

- ask questions to identify and confirm requirements
- give instructions
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- group presentation skills
- report writing
- using and applying technology, including electronic data interchange
- literacy and numeracy skills in relation to:
 - developing pricing policies
 - calculating and estimating product range contributions
 - calculating the cost of stock loss and dissipation
 - analysing stock figures.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - marketing
 - buying
 - profit margins
 - quality control
 - stock inventory levels: current and future
 - stock location and allocated areas
- staff product knowledge training
- industry and store information, including:
 - market needs
 - range of merchandise available
 - market competition
 - existing and possible new suppliers
 - channels of distribution
- relevant legislation and statutory requirements
- relevant industry codes of practice
 - pricing procedures, including GST requirements.

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures, industry codes of practice, statutory requirements and regulations in regard to buying, merchandising and marketing practices
- applies market analysis, planning, procurement and rationalisation of stock and merchandise and service ranges, maintenance of supplier relations and quality control
- interprets market trends and applies these to the store situation to create opportunities to improve sales and services, while maximising profits
- analyses market and plans the introduction of a product and service range
- identifies suppliers, negotiates supply of goods, rationalises stock and monitors quality control
- trains and communicates information to and from staff or team members in regard to stock and merchandise and service range.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant information and documentation, including:
 - store policy and procedures
 - legislation and statutory requirements
 - industry codes of practice
 - merchandise and supplier data.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback

EVIDENCE GUIDE

- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store merchandise and marketing policies may include:

- store culture
- current market position
- target market.

Customer requirements may be monitored by:

- questionnaires
- surveys
- observation.

Merchandise range may include:

- existing stock
- new stock.

RANGE STATEMENT

Impact on business operations may include:

- buying
- ordering patterns
- planning
- budgeting.

Relevant personnel may include:

- frontline staff
- relevant managers
- supervisor
- team leader
- specialist staff.

Feedback may be sought and given:

- verbally
- in writing
- in groups
- individually.

Performance indicators may include:

- price
- quality
- performance
- supply reliability
- merchandise range.

Negotiation process may include:

- face-to-face
- correspondence
- meetings
- telephone or electronic media.

Pricing arrangements may include:

- cash on delivery (COD)
- cheque
- credit card
- invoice
- GST.

Market factors may include:

- fashion trends

RANGE STATEMENT

- product availability
 - sales performance.
- Legal requirements* may include:
- sale of second-hand goods
 - Trade Practices and Fair Trading Acts
 - licence, patent or copyright arrangements
 - pricing procedures, including GST requirements.
- Staff training* may include:
- on-the-job
 - off-the-job
 - one-on-one coaching
 - any combination of the above.
- Staff* may include:
- full-time, part-time, casual or contract staff
 - people from a range of social, cultural and ethnic backgrounds
 - people with varying degrees of language and literacy levels.
- Terms of trade* may include:
- special buys
 - payment terms
 - promotional deals with supplier.
- Stock lines may be *deleted* due to:
- changes in store policy and culture
 - sales performance
 - customer requirements
 - fashion trends
 - product availability
 - problems with supply.
- Methods to *consolidate stock* may include:
- movement of stock between departments or stores.

Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Place and arrange merchandise.	<p>1.1 Unpack <i>merchandise</i> according to <i>store policy and procedures</i> and <i>legislative requirements</i>.</p> <p>1.2 Place merchandise on floor, fixtures and shelves in determined locations according to OHS and other relevant legislative requirements.</p> <p>1.3 <i>Display</i> merchandise to achieve a balanced, fully-stocked appearance and promote sales.</p> <p>1.4 Identify damaged, soiled or out-of-date stock and take corrective action as required according to store procedure.</p> <p>1.5 Place stock range to conform with fixtures, ticketing, prices or bar codes.</p> <p>1.6 Rotate stock according to stock requirements and store procedure.</p>

ELEMENT	PERFORMANCE CRITERIA
	1.7 Ensure stock presentation conforms to special <i>handling techniques</i> and other <i>safety requirements</i> .
2 Prepare display labels and tickets.	<p>2.1 Prepare <i>labels and tickets</i> for window, wall or floor displays according to store policy.</p> <p>2.2 Prepare tickets using electronic equipment or neatly by hand according to store procedures.</p> <p>2.3 Identify soiled, damaged, illegible or incorrect labels and tickets and take corrective action.</p> <p>2.4 Use and maintain electronic ticketing and labelling equipment according to design specifications.</p> <p>2.5 Store ticketing equipment in a secure location.</p>
3 Place, arrange and display price labels and tickets.	<p>3.1 Place labels and tickets visibly and correctly on merchandise.</p> <p>3.2 Replace labels and tickets according to store policy.</p> <p>3.3 Maintain correct pricing and information on merchandise according to store procedures, industry codes of practice and legislative requirements.</p>
4 Maintain displays.	<p>4.1 Reset and dismantle <i>special promotion areas</i>.</p> <p>4.2 Assist supervisor in selection of merchandise for display.</p> <p>4.3 Arrange and face up merchandise as directed and according to layout specifications and load-bearing capacity of fixtures.</p> <p>4.4 Identify, reset or remove unsuitable or out-of-date displays as directed.</p> <p>4.5 Identify optimum stock levels and replenish stock according to store policy.</p> <p>4.6 Maintain display areas in a clean and tidy condition.</p> <p>4.7 Remove excess packaging from display areas.</p>
5 Protect merchandise.	5.1 Identify and apply correct handling, storage and display techniques according to stock characteristics and

ELEMENT	PERFORMANCE CRITERIA
	legislative requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- use and maintenance of manual and electronic labelling and ticketing equipment
- completing tasks in a set timeframe
- literacy and numeracy skills in relation to:
 - reading and interpreting store procedures and guidelines
 - machine or manual preparation of labels and tickets
 - reading and understanding manufacturer instructions.

The following knowledge must be assessed as part of this unit:

- store policies and procedures, in regard to:
 - merchandising, ticketing and pricing of stock
 - correct storage of stock
 - store promotional themes, including advertising, catalogues and special offers
 - location of display areas
 - availability and use of display materials
 - stock rotation
 - stock replenishment
 - merchandise range
 - scheduling for building or rotating displays
 - correct storage procedures for labelling and ticketing equipment and materials
- correct manual handling techniques for protection of self and merchandise
- principles of display
- elements and principles of design and trends in retail design
- relevant OHS regulations, including:
 - manual handling
 - hygiene and sanitation
 - hazardous substances

REQUIRED SKILLS AND KNOWLEDGE

- labelling of workplace substances
- relevant legislation and statutory requirements
- pricing procedures, including inclusion and exclusion of GST
- relevant industry codes of practice.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies store policies and procedures and legislative requirements in regard to displaying, merchandising, ticketing, pricing and storage of stock
- displays merchandise on floor, fixtures, shelves and display areas, in determined locations, according to special manual handling techniques and other safety requirements
- prepares display labels and price tickets for merchandise with regard to store policies and procedures
- operates, maintains and stores a range of ticketing equipment according to:
 - store policy and procedures
 - industry codes of practice
 - manufacturer instructions and design specifications
- arranges correct pricing and information on merchandise according to store procedures, industry codes and government requirements
- identifies damaged, soiled or out-of-date stock and takes corrective action as required by store procedures and legislative requirements
- maintains display areas and replenishes stock as required according to store procedures and legislative requirements
- performs correct manual handling, storage and display

EVIDENCE GUIDE

techniques according to:

- stock characteristics
- industry codes of practice
- OHS legislation and codes of practice.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- a range of ticketing and pricing equipment
- merchandise for display
- display materials and props
- cleaning materials
- relevant documentation, such as:
 - store policy and procedure manuals on housekeeping, merchandising and OHS
 - manufacturer instructions and operation manuals for electronic ticketing equipment
 - relevant legislation and industry codes of practice.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXSLS001A Sell products and services
- SIRXSLS002A Advise on products and services.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Coordinate merchandise presentation and display.	<p>1.1 Identify items to be advertised or promoted according to store merchandising policy.</p> <p>1.2 Plan, coordinate and evaluate promotions or special events as directed by management.</p> <p>1.3 Plan and supervise construction and maintenance of <i>displays</i> in order to achieve balance and visual impact.</p> <p>1.4 Inform <i>staff</i> of store <i>display standards and requirements</i>.</p> <p>1.5 Inform staff of occurrence and timing of <i>promotions and special events</i>.</p> <p>1.6 Ensure product or service <i>display information</i> accurately depicts product or service being promoted.</p>

ELEMENT	PERFORMANCE CRITERIA
	1.7 Ensure displays are completed according to required time schedule, with minimum disruption to <i>customer</i> service and traffic flow.
	1.8 Construct and maintain displays in a safe, secure manner.
	1.9 Regularly monitor replenishment of merchandise and rotation of stock on store displays and take action as required.
	1.10 Inform staff of appropriate timing for dismantling and disposal of displays.
	1.11 Evaluate merchandise presentation against sales turnover and store presentation standards.
	1.12 Provide management with feedback in regard to improvement of store marketing and promotional activities.
2 Implement merchandise pricing.	2.1 Implement store policy and procedures in regard to pricing and ticketing.
	2.2 Identify current prices for products and services and amend according to store policy.
	2.3 Inform team members of price changes and current pricing policies.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- use and maintenance of electronic labelling and ticketing equipment
- interpersonal communication skills to:
 - provide information to staff
 - provide feedback to management through clear and direct communication
 - share information

REQUIRED SKILLS AND KNOWLEDGE

- give instructions
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- literacy and numeracy skills in relation to:
 - machine or manual preparation of labels and tickets
 - reading and interpreting store policies and procedures
 - merchandise presentation and pricing.

The following knowledge must be assessed as part of this unit:

- store policies and procedures, in regard to:
 - merchandising, pricing and ticketing
 - merchandise range
 - storage of stock
 - stock rotation and replenishment
 - minimum stock levels required
- procedure for accessing information and implementing price changes
- principles of display and design
- location of display areas
- availability and use of materials
- store promotional themes
- occurrence and timing of store promotions, including advertising, catalogues and special offers
- load-bearing capacity of fixtures and display areas
- correct storage procedures for labelling and ticketing equipment and materials
- relevant OHS legislation and codes of practice
- relevant legislation and statutory requirements, including Trade Practices and Fair Trading Acts
- pricing procedures, including GST requirements
- relevant industry codes of practice
- principles and techniques of interpersonal communication skills
- manufacturer specifications for the use of electronic labelling and ticketing equipment.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Interpret a visual merchandising plan.	1.1 Identify <i>design requirements</i> of visual merchandising plan or manual. 1.2 Source <i>resources required</i> to implement plan. 1.3 Identify <i>factors that may affect the plan.</i> 1.4 Apply organisation's visual merchandising standards to the plan.
2 Monitor display requirements.	2.1 Regularly monitor display to ensure it meets the requirements of the <i>visual merchandising plan.</i> 2.2 Identify <i>damage or changes to the display.</i>

ELEMENT	PERFORMANCE CRITERIA
	2.3 Action is taken to rectify any changes to the display.
3 Maintain displays to organisation requirements and plan.	3.1 Maintain displays so that they are clean and tidy. 3.2 Make additions or changes to displays to ensure display consistently adheres to the visual merchandising plan. 3.3 Maintain organisation's requirements for visual merchandising in the display.
4 Contribute to the visual merchandising standards of the organisation.	4.1 Interpret visual merchandising standards of the organisation. 4.2 Identify opportunities for improving visual merchandising standards. 4.3 Make contributions to the visual merchandising standards as appropriate.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- maintaining and updating displays according to the visual merchandising plan
- generating ideas for improving visual merchandising standards.

The following knowledge must be assessed as part of this unit:

- basic principles of visual merchandising
- basic design principles
- organisation visual merchandising principles.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- interprets and identifies the design requirements of a visual merchandising plan
- monitors the display closely and completes regular maintenance to ensure it meets the requirements of the visual merchandising plan and the organisation's visual merchandising standards
- contributes appropriately to the ongoing development of the organisation's visual merchandising standards.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - store policy and procedures manuals
 - store visual merchandising standards.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work

EVIDENCE GUIDE

functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Design requirements may include:

- colours used
- layout of display
- functionality
- merchandise for display
- size of display
- location of display in store.

Resources required may include:

- fixtures and fittings
- people
- time
- materials
- supports
- lights.

Factors that may affect the plan may include:

- store promotions
- merchandise availability
- availability of display stands and structures
- time requirements
- budget requirements
- availability of staff.

RANGE STATEMENT

Visual merchandising standards may include:

- store plan and design
- retail image
- display location.

Damage or changes to the display may include:

- damage to fixtures, fittings or display supports
- damage to items on display
- changes in the appearance of the display.

SIRXMER004A Manage merchandise and store presentation

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit describes the performance outcomes, skills and knowledge required to manage merchandise and store presentation.

Application of the Unit

Application of the unit This unit requires the team member to apply knowledge of store merchandising to plan and manage store advertising and promotions, manage store pricing policies and housekeeping. It includes interpretation of and compliance with store layout and visual merchandising policies, developing and implementing procedures to manage merchandise pricing, and managing all aspects of store housekeeping, including contingency procedures. This role applies to frontline retail managers.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Manage store merchandising.	<p>1.1 Ensure layout and presentation support market position and promote customer flow according to store <i>visual merchandising policies and plans</i>.</p> <p>1.2 Develop and implement layout assessment checks.</p> <p>1.3 Define standards for visual presentations and displays and clearly communicate to all staff</p> <p>1.4 Consult floor staff to assess customer response to space allocations.</p>
2 Plan and manage store advertising and promotions.	<p>2.1 Manage and implement store policies and procedures, in regard to store <i>promotional activities</i>.</p> <p>2.2 Organise activities in line with anticipated or researched customer requirements.</p> <p>2.3 Manage <i>promotions</i> in order to achieve maximum customer impact.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.4 Negotiate arrangements with suppliers in regard to special promotional activities.
	2.5 Coordinate store activities to complement shopping centre or retail complex promotions.
	2.6 Develop and implement assessment checks to measure effectiveness of promotions, including layout, visual impact and customer response.
	2.7 Document and report on promotional activities.
3 Manage store pricing policies.	3.1 Maintain store pricing according to <i>organisation pricing policies and procedures</i> in regard to pricing.
	3.2 Maintain accurate information on pricing trends and changes and communicate to relevant staff.
	3.3 Develop and implement procedures for pricing according to store policies and <i>legislative requirements</i> .
4 Manage housekeeping.	4.1 Develop and implement store policies and procedures in regard to <i>store housekeeping and maintenance</i> .
	4.2 Develop and manage rosters or schedules, ensuring store housekeeping standards are monitored and maintained.
	4.3 Initiate <i>contingency plan</i> in the event of merchandise or store presentation problems.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- providing feedback on performance
- interpersonal communication skills to:
 - communicate store standards and expectations to staff
 - consult floor staff
 - negotiate arrangements with suppliers, through clear and direct communication
 - ask questions to identify and confirm requirements

REQUIRED SKILLS AND KNOWLEDGE

- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- roster development
- report writing
- literacy skills in regard to:
 - researching, analysing and interpreting a broad range of written material
 - preparing rosters
 - preparing reports
 - documenting results

The following knowledge must be assessed as part of this unit:

- store policies and procedures, in regard to:
 - layout and presentation
 - advertising and promotions
 - pricing or marking down of goods, including risk assessment
 - housekeeping for premises, fittings, fixtures and equipment
 - store merchandise and service range
 - store merchandising plan
 - range and availability of new products and services
 - customer demand and market trends
 - product quality standards
- OHS legislation and codes of practice
- relevant legislation and statutory requirements
- relevant industry codes of practice
- pricing procedures, including GST requirements
- principles and techniques in:
 - visual merchandising
 - project management

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- collaboratively plans layout and presentation of merchandise according to store policies and procedures
- assesses effectiveness of layout and presentation according to sales targets or predetermined objectives
- collaboratively plans, coordinates and implements advertising and promotions activities according to store policies and procedures
- assesses and reports on effectiveness of advertising and promotions to staff and management according to store policies and procedures
- collaboratively plans, coordinates and implements pricing activities according to store policies and procedures
- collaboratively plans, coordinates and implements housekeeping activities according to store policies and procedures and OHS legislation, regulations and codes of practice.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - store policy and procedures manuals
 - store merchandising plan
 - legislation and statutory requirements
 - OHS legislation, regulations and codes of practice
- a work team.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge.

Holistic assessment with other units relevant to the

EVIDENCE GUIDE

industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Visual merchandising policies and plans may include:

- target market
- market research
- store image
- store layout and space availability
- seasonal lines
- pricing policy.

Promotional activities may involve:

- external and in-store activities
- corporate or locally based activities
- dealing with advertising agencies and consultants.

Promotions may include:

- advertising
- catalogues
- newspapers
- posters

RANGE STATEMENT

- Organisation pricing policies and procedures* may include:
- radio or TV
 - suppliers
 - internet
 - website.
 - marking down of slow moving stock
 - soiled or damaged goods
 - goods close to use-by date
 - end of season stock
 - pricing policies, including GST requirements.
- Legislative requirements* may include:
- Trade Practices and Fair Trading Acts
 - consumer law.
- Store housekeeping and maintenance* may include:
- store premises
 - fittings
 - fixtures
 - equipment.
- Contingency plan* may include:
- major spillages
 - flood, storm or cyclone
 - breakages
 - blackout
 - break-in.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify the requirements of the display.	1.1 Identify <i>purpose</i> and <i>audience</i> for the display. 1.2 Identify products that will be displayed. 1.3 Identify organisation's requirements and research <i>relevant information</i> where required. 1.4 Identify <i>resources</i> required to create the display. 1.5 Identify and consider <i>constraints or factors</i> that may affect the creation of the display.
2 Develop display ideas.	2.1 Generate ideas for the display using <i>creative thinking techniques</i> . 2.2 Test ideas against display requirements and <i>organisation's requirements</i> . 2.3 Discuss <i>display options</i> with relevant personnel. 2.4 Modify display ideas and refine according to <i>feedback</i> and

ELEMENT	PERFORMANCE CRITERIA
	confirm with <i>relevant personnel</i> .
3 Plan and build displays.	3.1 Develop ideas into a simple <i>display plan</i> . 3.2 Source resources, materials and products to meet plan requirements. 3.3 Create display following the display plan. 3.4 Seek assistance from relevant personnel where required. 3.5 Review display and make refinements as required.
4 Maintain display.	4.1 Maintain display in a clean and tidy condition and replace products as necessary according to display plan. 4.2 Make changes or alterations to the display as appropriate.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- creative thinking skills
- interpersonal communication skills to:
 - communicate display ideas to others
 - seek and accept feedback through clear and direct communication
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- representing ideas in the form of a simple display plan
- observing when display needs to be changed, updated or altered
- maintaining display.

The following knowledge must be assessed as part of this unit:

- basic design principles, including:

REQUIRED SKILLS AND KNOWLEDGE

- colour
- shape
- use of space
- flow of product
- the audience for the display and what the display needs to communicate
- a variety of display options
- organisational requirements in terms of product display.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- identifies the requirements for a new display
- creates a display plan that meets the requirements of the product, the audience and the organisation
- plans and builds the display plan and maintains the display.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as store policy and procedures manuals
- display space
- a range of display products and materials.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor

EVIDENCE GUIDE

- customer feedback
- written or verbal questioning to assess knowledge and understanding.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Purpose of the display may include:

- window display
- promotion
- sale
- new products
- new range.

Audience for the display may include:

- new or repeat customers
- external and internal foot or vehicular traffic
- people of different ages
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

RANGE STATEMENT

- people with varying degrees of language and literacy.

Relevant information may be sourced from:

- direct observation
- written reports
- colleagues
- internet
- magazines
- technical personnel
- marketing personnel.

Resources may include:

- labels and tickets
- materials
- equipment and technology
- fixtures and fittings
- staff
- time
- budget.

Constraints or factors may include:

- time
- budget
- staff
- availability of materials
- space
- product characteristics.

Creative thinking techniques may include:

- product association
- brainstorming
- visualising
- telling stories
- creative writing
- lateral thinking
- mind mapping
- drawings
- using prompts.

Organisation's requirements

- organisational standards
- OHS

RANGE STATEMENT

may include:

- branding
- store policy and procedures
- aesthetics
- budget
- staff
- allocated space.

Display options may include:

- indoor or outdoor
- static or moving
- sound
- lighting.

Feedback may be sought and received:

- verbally
- in writing
- in groups
- individually.

Relevant personnel may include:

- manager
- team leader
- external personnel with display creation expertise.

Display plan may include:

- simple sketches of planned display
- checklist of materials and equipment required.

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Communicate and implement mission statement.	<p>1.1 Communicate <i>mission statement</i> according to store's stated purpose and values.</p> <p>1.2 Interpret mission statement in active consultation with <i>team members and management</i>.</p>
2 Set objectives and targets.	<p>2.1 Develop objectives and targets after active consultation with team members and management according to <i>store policy and procedures</i>.</p> <p>2.2 Ensure <i>strategies and objectives</i> accurately reflect the overall <i>store mission and values</i>.</p> <p>2.3 Ensure strategies and objectives are attainable, cost-efficient and realistic within a designated timeframe and allow for continuous improvement planning.</p> <p>2.4 Ensure strategies and objectives contain sufficient detail to allow development of specific projects.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.5 Clearly acknowledge <i>constraints upon objectives</i> .
3 Develop action plans.	3.1 Develop, evaluate and implement action plans according to store policy and procedures.
	3.2 Ensure action plans contain, clear, comprehensive and concise details.
	3.3 Ensure action plans take account of appropriate operational and other relevant considerations.
	3.4 Ensure proposals identify targets, standards and implementation methods.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- analysing, implementing and evaluating plans
- presenting reports
- consultative processes
- group presentation
- interpersonal communication skills to:
 - interpret and communicate mission statement
 - develop objectives and targets in consultation with team members and management through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- literacy skills in regard to:
 - documenting strategic plans
 - reading and interpreting information
 - numerical skills in regard to financial and budget planning.

REQUIRED SKILLS AND KNOWLEDGE

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to strategic planning
- store purpose and values
- store mission statement
- internal and external operating environment
- principles and techniques in strategic planning.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- interprets, communicates and implements store's mission statement
- collaboratively develops team objectives reflecting the store's mission statement
- collaboratively develops strategies for achieving team objectives
- collaboratively develops effective action plans to implement strategies, including targets, standards and implementation methods.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
- strategic plans
- store mission statement
- store value statement
- information on the internal and external operating environment

EVIDENCE GUIDE

- a team.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- research reports
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Mission statements may be:

- formal
- informal
- communicated verbally

RANGE STATEMENT

- communicated in writing.

Team members and management may include:

- people with varying degrees of language and literacy
- people from a range of cultural, social and ethnic backgrounds
- people with a range of responsibilities and job descriptions.

Store policy and procedures in regard to:

- strategic planning

Strategies and objectives may relate to:

- technology
- time management
- standards of work
- quality
- quantity
- human relations, personal development
- legal issues
- internal and external operating environments
- implementation of policy and procedures
- development and communication of ideas
- development of product and service provision
- problem solving
- financial control and accounting
- profits
- management systems
- inventory control
- loss prevention.

Store mission and values may include:

- customer relationships
- supplier relationships
- legal requirements
- OHS
- equal opportunity

RANGE STATEMENT

- ethics
- employment
- human relations
- training
- environment.

Constraints upon objectives may include:

- internal considerations
- external considerations.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Inform team members.	<p>1.1 Clearly and accurately explain <i>store policy and procedures</i> in regard to OHS and <i>emergency procedures to team members</i>.</p> <p>1.2 Ensure access for team members to store <i>OHS policy and procedures</i>.</p> <p>1.3 Clearly and accurately explain relevant provisions of OHS legislation and codes of practice to team members.</p> <p>1.4 Regularly provide clear and accurate information on identified <i>hazards</i> and risk control procedures to team members.</p>
2 Involve team members.	<p>2.1 Provide <i>opportunities and processes for team members to consult and contribute</i> on OHS issues according to store policy.</p> <p>2.2 Promptly resolve issues raised or refer to relevant personnel according to store policy.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.3 Promptly convey outcomes of issues raised on OHS matters to team members.
3 Monitor and maintain a safe work environment.	<p>3.1 Implement store policy and procedures with regard to identification, prevention and reporting of potential hazards.</p> <p>3.2 Take prompt action to deal with hazardous events according to store policy.</p> <p>3.3 Investigate unsafe or hazardous events to identify cause and report any inadequacies in risk control measures or resource allocation for risk control to relevant personnel.</p> <p>3.4 Implement and monitor control measures to prevent recurrence and minimise risks of unsafe and hazardous events according to store policy and the hierarchy of control.</p> <p>3.5 Handle and store hazardous goods according to store policy and OHS regulations.</p> <p>3.6 Maintain equipment according to store policy and OHS regulations.</p> <p>3.7 Monitor team performance to ensure use of safe manual handling techniques.</p>
4 Implement emergency procedures.	4.1 Implement store emergency policy and procedures promptly in the event of an emergency.
5 Identify need for OHS training.	<p>5.1 Identify OHS training needs, specifying gaps between OHS competencies required and those held by team members.</p> <p>5.2 Organise and arrange training according to store policy.</p>
6 Maintain OHS records.	<p>6.1 Complete and maintain OHS records regarding occupational injury and disease according to store policy and legislative requirements.</p> <p>6.2 Use information from records to identify hazards and monitor risk control procedures according to store policy.</p>

ELEMENT	PERFORMANCE CRITERIA
----------------	-----------------------------

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- interpersonal communication skills to:
 - provide information, coaching and feedback to team members
 - involve team members
 - refer issues to appropriate personnel through clear and direct communication
 - use and interpret non-verbal communication
 - motivate and lead a team
- locating and using safety alarms, fire extinguishers and emergency exits
- identifying hazardous goods and substances
- interpreting symbols used for OHS signage
- identifying broken or damaged equipment
- manual handling procedures
- literacy and numeracy skills in regard to:
 - interpreting and applying OHS regulations
 - reading and understanding store policy and procedures
 - generating reports.

The following knowledge must be assessed as part of this unit:

- job role and responsibilities
- store policies and procedures, in regard to:
 - OHS
 - emergency procedures
 - unsafe or hazardous goods
 - handling and storage
 - disposal
 - bomb threat procedures
 - store evacuation

REQUIRED SKILLS AND KNOWLEDGE

- manual handling and safe lifting techniques
- possible fire and safety hazards
- sickness and accident procedures
- location of nearest first aid assistant or facility
- hierarchy of risk control:
 - elimination of hazards
 - engineering controls to reduce risk
 - administrative controls
 - use of personal protective equipment
- relevant OHS legislation and codes of practice
- principles and techniques in interpersonal communication.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit Evidence of the following is essential:

- applies and monitors store policy, industry codes of practice, relevant legislation and statutory requirements in regard to OHS and emergency procedures
- applies and monitors safe working practices in the handling and moving of stock, according to OHS legislation and codes of practice
- interprets and monitors the implementation of manufacturer instructions with regard to handling stock and using relevant equipment
- applies and monitors safe working practices in the handling, storage and disposal of unsafe or hazardous materials
- identifies OHS training needs and maintains OHS records.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant equipment, such as:
 - stock moving equipment
 - alarm systems
 - first aid equipment
 - firefighting equipment
 - communication equipment
- relevant documentation, such as:
 - OHS legislation
 - store evacuation procedures
 - store policy and procedures manuals
 - incident reporting forms.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- customer feedback
- written or verbal questioning to assess knowledge and understanding.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXRSK002A Maintain store security.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store policy and procedures may relate to:

- OHS
- emergency procedures
- reporting procedures
- issue resolution procedures.

Emergency procedures may relate to:

- sickness
- accidents
- fire
- store evacuation involving staff or customers
- product recall and contamination
- bomb threat
- cyclones
- flooding
- dealing with dangerous customers.

Team members may include:

- new or existing staff
- full-time, part-time, casual or contract
- people with varying levels of language and literacy
- people from a range of cultural, social and ethnic backgrounds.

OHS policy and procedures may relate to:

- reporting procedures
- issue resolution procedures
- basic safety procedures
- emergency procedures
- safe manual handling and lifting
- dangerous goods

RANGE STATEMENT

- customers
- staff
- equipment and tools
- premises
- stock.

Hazards may include:

- unguarded equipment
- electricity and water
- fires
- chemical spills
- sharp cutting tools and instruments
- broken or damaged equipment
- damaged packing material or containers
- manual handling
- stress.

Opportunities and processes for team members to consult and contribute may include:

- staff meetings
- OHS meetings
- identification of health and safety representatives
- suggestions from staff for improving existing tasks and procedures.

Resource allocation may include:

- people
- materials
- equipment and technology
- finances
- time.

Relevant personnel may include:

- safety representative
- supervisor
- team leader
- manager.

Hierarchy of control may

- elimination of hazards
- substitution

RANGE STATEMENT

include:

- isolating hazards
- use of engineering controls
- use of administrative controls
- appropriate use of personal protective clothing and equipment.

Hazardous goods may include:

- electrical equipment
- chemicals
- flammable goods
- waste.

Equipment may include:

- point of sale terminals
- printers
- EFTPOS terminals
- computers
- wrapping and packing equipment such as shrink wrapping
- equipment for carrying or moving merchandise
- equipment for storage of merchandise, including refrigerators
- weighing machines
- thermometers
- security tag systems
- trolley return equipment.

Safe manual handling techniques may include:

- lifting or shifting practices
- use of equipment such as ladders and trolleys
- job procedures.

Store emergency policy and procedures may relate to:

- alarm systems and procedures
- firefighting procedures
- store evacuation procedures for staff and customers
- transport arrangements for sick or injured persons
- medical attention procedures
- events likely to endanger staff, contractors, customers or visitors

RANGE STATEMENT

- product recall and contamination.

Training may include:

- first aid
- emergency procedures
- evacuation procedures
- manual handling techniques
- stress management
- reporting procedures.

Records may include:

- manual
- electronic
- departmental
- centralised.

Legislative requirements may include:

- OHS regulations
- privacy legislation
- workers' compensation regulations
- federal, state or territory and local legislation.

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Apply routine store security.	<p>1.1 Apply store <i>security systems and procedures</i> according to store policy.</p> <p>1.2 Handle and secure cash according to <i>store policy and procedures</i>.</p> <p>1.3 Observe and deal with suspect behaviour by <i>customers</i> according to store policy and <i>legislative requirements</i>.</p> <p>1.4 Deal with internal and external theft according to store policy and legislative requirements.</p> <p>1.5 Store products and equipment in a secure manner.</p>
2 Minimise theft.	<p>2.1 Take appropriate action to minimise theft by applying store procedures and legislative requirements.</p> <p>2.2 Match merchandise to correct price tags.</p> <p>2.3 Maintain surveillance of merchandise according to store policy and <i>legislative requirements</i>.</p>

ELEMENT

PERFORMANCE CRITERIA

- 2.4 Check customers' bags as required at point of sale according to store policy and legislative requirements.
- 2.5 Maintain security of cash, cash register and keys according to store policy.
- 2.6 Maintain security of stock, cash and equipment in regard to customers, *staff* and outside contractors according to store policy and legislative requirements.
- 2.7 Deal with suspected or potential thieves according to store policy and procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- literacy and numeracy skills in:
 - recording of stolen items
 - reporting of theft.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - security
 - checking customers' bags and purchases
 - reporting problems and faults
- relevant legislation and statutory requirements, particularly in regard to checking customers' bags and purchases
- Trade Practices and Fair Trading Acts
- store merchandising system
- security procedures relating to cash and non-cash transactions
- location and operation of store security equipment
- reporting procedures for internal and external theft or suspicious circumstances.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures and legislative requirements, including industry codes of practice in regard to store security and theft prevention in a range of contexts and situations
- consistently applies store policy and procedures in regard to following security procedures and for reporting theft or suspicious behaviour to relevant personnel
- monitors stock, work area, customers and staff to minimise opportunities for theft.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - store policy and procedures manuals
 - legislation and statutory regulations
 - industry codes of practice
 - Trade Practices and Fair Trading Acts
- relevant security equipment
- point-of-sale equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a simulated work environment
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge

EVIDENCE GUIDE

- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS001A Apply point-of-sale handling procedures
- SIRXCCS002A Interact with customers
- SIRXINV001A Perform stock control procedures
- SIRXFIN001A Balance point-of-sale terminal.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Security systems and procedures may deal with:

- customers
- staff
- keys
- visitors, sales representatives, contractors and vendors
- stock
- records
- cash, credit cards

RANGE STATEMENT

- equipment, including:
 - alarm systems
 - video surveillance
 - mirrors
 - security tags
- locked and secure areas
- premises
- armed hold-up.

Store policy and procedures may relate to:

- security
- surveillance of merchandise
- reporting problems and faults.

Customers may include:

- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Legislative requirements may include:

- privacy and confidentiality laws
- Trade Practices and Fair Trading Acts
- consumer law
- awards and agreements
- property offences
- credit laws
- reporting procedures
- criminal law.

Staff may include:

- management
- other staff members
- full-time, part-time and casual staff
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Monitor and maintain store security.	<p>1.1 Implement <i>store policy and procedures</i> to ensure store security is maintained.</p> <p>1.2 Monitor and review <i>security procedures</i> according to store policy and <i>legislative requirements</i>.</p> <p>1.3 Implement procedures to minimise theft of easily stolen merchandise.</p> <p>1.4 Maintain security of cash, cash register and keys according to store policy.</p> <p>1.5 Implement store procedures in regard to <i>transactions</i>.</p> <p>1.6 Inform <i>team members</i> of store policy and procedures in regard to security.</p> <p>1.7 Provide team members with <i>feedback</i> in regard to implementation or non-implementation of store security procedures.</p>

ELEMENT	PERFORMANCE CRITERIA
	1.8 Provide staff with ongoing supervision and <i>training</i> to facilitate awareness and detection of theft.
	1.9 <i>Report</i> matters likely to affect store security according to store policy.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- interpersonal communication skills to:
 - provide information, feedback and training to staff
 - report relevant matters through clear and direct communication
 - ask questions to identify and confirm requirements
 - share information
 - give instructions
 - use and interpret non-verbal communication
- literacy skills in regard to:
 - interpreting and applying OHS documents
 - reporting procedures
- performance analysis
- team leadership.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - security
 - cash and non-cash transactions
 - external or internal theft
 - suspicious circumstances
 - armed robbery
 - staff security training
 - procedures for opening and closing premises
- relevant legislation and statutory regulations, particularly in relation to checking of

REQUIRED SKILLS AND KNOWLEDGE

- customers' bags and purchases
- store alarm and security systems
- principles and techniques for interpersonal communication.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures, industry codes of practice, relevant legislation and statutory requirements in regard to store security
- accurately applies relevant legislation and statutory regulations particularly in regard to checking of customers' bags and purchases
- interprets, applies and monitors security procedures in regard to:
 - cash handling, and cash and non-cash transactions
 - internal or external theft or suspicious circumstances
 - armed robbery
 - opening and closing premises
- implements store policy and procedures in regard to:
 - reporting on matters related to store security
 - staff security supervision and training.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - store policy and procedures in regard to security

EVIDENCE GUIDE

- legislation and statutory requirements
- OHS legislation
- relevant equipment such as:
 - alarm systems
 - point-of-sale equipment
 - communication equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- third-party reports from a supervisor
- observation of performance in the workplace
- a role play
- customer feedback
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXOHS002A Maintain store safety.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store policy and procedures in regard to:

- security
- checking bags
- cash and non-cash transactions
- surveillance of merchandise
- reporting problems and faults.

Security procedures may deal with:

- customers
- staff or staff property
- visitors, sales representatives, contractors and vendors
- stock
- records
- cash and cash movement
- equipment
- premises
- opening and closing of premises
- theft
- armed robbery
- events likely to endanger customers or staff.

Legislative requirements may include:

- privacy or confidentiality laws
- Trade Practices and Fair Trading Acts
- consumer law
- awards or agreements
- property offences
- credit laws
- reporting procedures
- criminal law.

Transactions may include:

- cash

RANGE STATEMENT

- EFTPOS
- cheques
- credit cards or store cards
- smart cards
- lay-by
- returns
- exchanges
- gift vouchers.

Team members may include:

- small work teams
- store team
- corporate team
- full-time, part-time, casual or contract staff
- people with varying degrees of language and literacy
- people from a range of cultural, social and ethnic backgrounds
- people with a range of responsibilities and job descriptions.

Feedback may be given:

- verbally
- in writing
- in groups
- individually.

Training may include:

- mentoring or coaching
- off-the-job training
- on-the-job training.

Report may be:

- verbal
- written
- formal
- informal.

Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Apply product knowledge.	<p>1.1 Demonstrate knowledge of the use and application of relevant products and services according to <i>store policy</i> and <i>legislative requirements</i>.</p> <p>1.2 Develop <i>product knowledge</i> by accessing <i>relevant sources of information</i>.</p>
2 Approach customer.	<p>2.1 Determine and apply timing of <i>customer</i> approach.</p> <p>2.2 Identify and apply effective <i>sales</i> approach.</p> <p>2.3 Convey a positive impression to arouse customer interest.</p> <p>2.4 Demonstrate knowledge of customer buying behaviour.</p>

ELEMENT	PERFORMANCE CRITERIA
3 Gather information.	3.1 Apply questioning techniques to determine customer buying motives. 3.2 Use listening skills to determine customer requirements. 3.3 Interpret and clarify non-verbal communication cues. 3.4 Identify customers by name where possible. 3.5 Direct customer to specific merchandise.
4 Sell benefits.	4.1 Match customer needs to appropriate products and services. 4.2 Communicate knowledge of products features and benefits clearly to customers. 4.3 Describe product use and safety requirements to customers. 4.4 Refer customers to appropriate product specialist as required. 4.5 Answer <i>routine customer questions</i> about merchandise accurately and honestly or refer to senior sales staff.
5 Overcome objections.	5.1 Identify and accept customer objections. 5.2 Categorise objections into price, time and merchandise characteristics. 5.3 Offer solutions according to store policy. 5.4 Apply <i>problem solving</i> to overcome customer objections.
6 Close sale.	6.1 Monitor, identify and respond appropriately to customer buying signals. 6.2 Encourage customer to make purchase decisions. 6.3 Select and apply appropriate method of closing sale.
7 Maximise sales	7.1 Recognise and apply opportunities for making

ELEMENT	PERFORMANCE CRITERIA
opportunities.	additional sales.
	7.2 Advise customer of complementary products or services according to customer's identified need.
	7.3 Review personal sales outcomes to maximise future sales.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- selling techniques, including:
 - opening techniques
 - recognising buying signals
 - strategies to focus customer on specific merchandise
 - add-ons and complementary sales
 - overcoming customer objections
 - closing techniques
- verbal and non-verbal communication skills
- handling difficult customers
- negotiation skills
- sales performance appreciation
- questioning, listening and observation
- literacy skills in regard to:
 - reading and understanding product information
 - reading and understanding store policies and procedures
 - recording information
- numeracy skills in regard to:
 - handling payment for goods
 - weighing and measuring goods.

The following knowledge must be assessed as part of this unit:

- store policies and procedures, in regard to:

REQUIRED SKILLS AND KNOWLEDGE

- selling products and services
- allocated duties and responsibilities
- store merchandise and service range
- specific product knowledge for area or section
- relevant legislation and statutory requirements
- relevant industry codes of practice
- customer types and needs, including:
 - customer buying motives
 - customer behaviour and cues
 - individual and cultural differences
 - demographics, lifestyle and income
 - types of customer needs, e.g. functional, psychological.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit Evidence of the following is essential:

- applies product knowledge and uses appropriate sales approach to sell the benefits of products and services, overcome objections and close sales
- uses questioning, listening and observation skills to determine customer requirements
- consistently applies store policies and procedures in regard to selling products and services
- maximises sales opportunities according to store policies and procedures
- consistently applies industry codes of practice, relevant legislation and statutory requirements in regard to selling products and services
- evaluates personal sales performance to maximise future sales.

EVIDENCE GUIDE

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as policy and procedures manuals
- a range of customers with different requirements
- a range of merchandise and products appropriate to the retail workplace
- product labels and sources of product information.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store policy and procedures in regard to:

- interaction with customers
- selling products and services.

Legislative requirements may include:

- Trade Practices and Fair Trading Acts
- tobacco laws
- liquor laws
- lottery legislation
- industry codes of practice
- OHS
- sale of second-hand goods
- sale of X and R rated products
- trading hours
- transport, storage and handling of goods.

Product knowledge may include:

- warranties
- features and benefits
- use-by dates
- handling and storage requirements
- stock availability
- safety features
- price.

Relevant sources of information may include:

- internet
- staff members
- store or supplier product manuals
- product profiles
- videos
- demonstrations
- labels
- store tours.

RANGE STATEMENT

Customers may include:

- new or repeat contacts
- external and internal contacts
- customers with routine or special requests
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Sales transactions may be completed:

- face to face
- over the telephone
- online.

Routine customer questions may relate to:

- price and price reductions
- quality
- availability
- features and benefits.

Problem solving may be affected by:

- store policies and procedures
- resource implications.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- interpersonal communication skills to:
 - convey product knowledge to staff
 - apply knowledge to provide advice to customers
 - handle difficult customers through clear and direct communication
 - ask questions to identify and confirm requirements
 - share information
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- using a range of communication and electronic equipment
- accessing relevant product and service information
- literacy skills in regard to:
 - reading and understanding product information
 - reading and understanding store policies and procedures
 - recording information
- numerical skills in regard to:
 - estimating and calculating costs relevant to pricing products.

The following knowledge must be assessed as part of this unit:

- specialised product knowledge, including:
 - warranties
 - benefits and features
 - shelf life and use-by date
 - storage requirements
 - ingredients or materials contained in product
 - product and ingredient origins
 - care and handling of products
 - corresponding or complementary products and services
 - stock availability

- other relevant policies and procedures
- relevant legislation and statutory requirements
- relevant industry codes of practice.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policies and procedures and industry codes of practice in regard to customer service and selling products and services
- develops, maintains and conveys product knowledge to customers and other staff
- applies detailed and specialised product knowledge to provide accurate advice according to the needs of the customer.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- a range of stock and merchandise

relevant documentation, such as:

- price lists
- policy and procedures manuals
- a range of customers with different requirements
- a range of communication equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples

EVIDENCE GUIDE

are appropriate for this unit:

- observation of the candidate in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Product knowledge may include:

- brand options
- product features and benefits
- warranties
- safety features
- use-by dates
- handling and storage requirements
- stock availability

RANGE STATEMENT

- price.
- Product knowledge* may be developed and maintained by:
- accessing the internet
 - attending product launches
 - attending product seminars
 - discussions with staff
 - accessing product information booklets and pamphlets.
- Store policy* and procedures in regard to:
- interaction with customers
 - selling products and services.
- Legislative requirements* may include:
- Trade Practices and Fair Trading Acts
 - tobacco laws
 - liquor laws
 - lottery legislation
 - industry codes of practice
 - OHS
 - sale of second-hand goods
 - sale of X and R rated products
 - trading hours
 - transport, storage and handling of goods.
- Staff* may include:
- full-time, part-time or casual
 - under contract
 - people with varying degrees of language and literacy
 - people from a range of cultural, social and ethnic backgrounds
 - people with a range of responsibilities and job descriptions.
- Customer requirements* may include:
- specific brand
 - sizing
 - quality

RANGE STATEMENT

- quantity
- price range
- usage.

Customers may include:

- new or repeat contacts
- external and internal contacts
- customers with routine or special requests
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Pricing structure may include:

- sales reductions
- pricing procedures, including GST requirements
- mark-downs.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Implement sales policies and procedures.	<p>1.1 Implement and monitor adherence to <i>store policy and procedures</i> and <i>relevant legislation</i> in regard to <i>selling</i>.</p> <p>1.2 Implement and monitor store policy and procedures in regard to <i>sales transactions</i>.</p> <p>1.3 Monitor <i>team</i> to ensure information is entered into point-of-sale equipment accurately.</p> <p>1.4 Monitor team to ensure the efficient and safe <i>handling</i> of goods through point-of-sale areas.</p> <p>1.5 Monitor team to ensure that products and services are matched to <i>customer</i> needs.</p>
2 Monitor achievement of sales targets.	<p>2.1 Monitor and record individual and department sales targets according to store policy.</p> <p>2.2 Monitor and record store sales results in line with sales targets and according to store policy.</p>

ELEMENT

PERFORMANCE CRITERIA

- 2.3 Provide *feedback* to management and staff on sales performance in relation to sales targets and planning.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- interpersonal communication skills to:
 - provide feedback, coaching and performance analysis through clear and direct communication
 - ask questions to identify and confirm requirements
 - share information
 - give instructions
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- literacy skills in regard to:
 - reading and understanding store policy and procedures
 - processing, recording and documenting information
- numerical skills in regard to:
 - analysis of store, department and individual sales figures.

The following knowledge must be assessed as part of this unit:

- store policies and procedures, in regard to:
 - external and internal customer contact
 - selling products and services
 - allocated duties and responsibilities
- store merchandise and services
- customer profile
- location of store departments and importance of sales to store performance
- store and department sales targets
- factors that enhance sales performance
- stock control procedures

REQUIRED SKILLS AND KNOWLEDGE

- relevant legislation and statutory requirements
- relevant industry codes of practice
- relevant OHS requirements
- pricing procedures, including GST requirements
- principles and techniques of interpersonal communication.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit Evidence of the following is essential:

- consistently applies store policies and procedures and industry codes of practice in regard to customer service and selling products and services
- implements and monitors store policies and procedures in relation to sales transactions, including non-cash sales and variations to standard sales transactions
- monitors and provides feedback to management and staff on sales performance in relation to sales targets and planning.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - policy and procedures manuals
 - individual and department sales targets and results
 - reporting proformas
 - legislation and statutory requirements
- a sales team
- point-of-sale equipment and materials.

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- third-party reports from a supervisor
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store policy and procedures in regard to:

- selling products and services
- sales transactions
- reporting.

RANGE STATEMENT

Relevant legislation may include:

- Trade Practices and Fair Trading Acts
- tobacco laws
- liquor laws
- lottery legislation
- industry codes of practice
- OHS
- sale of second-hand goods
- sale of X and R rated products
- pricing procedures, including GST requirements
- trading hours
- transport, storage and handling of goods.

Selling may include:

- face to face
- telephone
- internet.

Sales transactions may include:

- cash
- EFTPOS
- cheque
- credit card
- store card
- lay-by
- gift voucher.

Team may include:

- full-time, part-time, casual or contract staff
- people with varying degrees of language and literacy
- people from a range of cultural, social and ethnic backgrounds
- people with a range of responsibilities and job descriptions.

Handling techniques may vary according to:

- stock characteristics
- OHS
- industry codes of practice.

RANGE STATEMENT

Customers may include:

- new or repeat contacts
- external or internal contacts
- customers with routine or special requests
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Feedback to management and staff may include:

- presentations
- reports
- informal meetings
- email
- financial reports
- business documents
- records of store sales.

Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Establish rapport with customers.	<p>1.1 Establish rapport and relationship with <i>customer</i> and express a genuine interest in <i>customer needs and requirements</i> to enhance customer commitment, trust and credibility of store and to build return customer base.</p> <p>1.2 Maintain <i>professional ethics</i> with the customer to promote store image and credibility.</p> <p>1.3 Accurately clarify <i>customer needs and preferences</i> to maximise sales opportunities.</p> <p>1.4 Maximise sales opportunities by use of add-on and complementary <i>sales techniques</i>.</p> <p>1.5 Give customer space and time to evaluate purchase decision, while using time to maximum advantage for customer and store.</p>

ELEMENT	PERFORMANCE CRITERIA
	1.6 Use effective methods to close sales.
2 Apply expert knowledge.	<p>2.1 Provide customer with accurate information regarding product and service appraisals, correct statements and warranties according to legislative requirements.</p> <p>2.2 Provide detailed knowledge of supplier or manufacturer information according to customer needs and commercial confidentiality guidelines.</p> <p>2.3 Evaluate product range, accurately demonstrate features and benefits of products or services where appropriate and make recommendations to the customer to maximise sales potential.</p> <p>2.4 Maximise customer interest in product or service through price negotiation where applicable and offer payment and credit options according to store policy.</p> <p>2.5 Accurately calculate prices and discounts according to pricing determinants and store policy.</p>
3 Provide post sales support.	<p>3.1 Accurately provide evidence of ongoing support as sale is concluded.</p> <p>3.2 Accurately explain back-up service and reassure customer according to legislative requirements and store policy.</p> <p>3.3 Provide customer with store or salesperson's contact details to provide line of contact and customer followed up according to store policy.</p> <p>3.4 Accurately enter customer and transaction details into customer database.</p>
4 Plan sales presentations.	<p>4.1 Plan presentation to complement product characteristics.</p> <p>4.2 Select client group according to product characteristics and store merchandising policy.</p> <p>4.3 Access promotional materials where required and distribute to client group.</p> <p>4.4 Select and prepare a range of products or services for presentation to reflect store image, demographics and merchandising plan.</p>

ELEMENT	PERFORMANCE CRITERIA
5 Implement sales presentation.	<p>5.1 Ensure sufficient numbers of adequately briefed support staff, where required for a presentation.</p> <p>5.2 Apply communication skills to effectively create interest, focus attention, and encourage customer interaction with individuals or groups.</p> <p>5.3 Demonstrate products or services to create a buying environment.</p> <p>5.4 Measure results of sales presentation according to predetermined criteria, review overall performance and results, and apply information to enhance future <i>sales presentations</i> according to store sales policy.</p>
6 Maintain and utilise a customer database.	<p>6.1 Maintain customer confidentiality as required by store policy and legislative requirements.</p> <p>6.2 Develop and maintain accurate <i>customer records</i> and store securely according to store policy and procedures.</p> <p>6.3 Accurately identify and follow up regular customers according to store marketing policy.</p> <p>6.4 Accurately utilise customer records to advise customers on products and services of possible interest.</p> <p>6.5 Implement <i>customer loyalty schemes</i> where required according to store promotional activities.</p>
7 Deal with difficult customers.	<p>7.1 Acknowledge customer complaints and problems and reassuringly support <i>difficult customers</i> to produce positive outcome.</p> <p>7.2 Use questioning and active listening to encourage customer to verbalise issue and minimise customer frustration.</p> <p>7.3 Develop customer's confidence in the candidate and product or service to promote long-term trust and commitment to store.</p> <p>7.4 Establish mutually acceptable resolution of complaint.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- selling techniques, including:
 - opening and closing techniques
 - identifying buying signals
 - strategies to focus customer on specific merchandise
 - add-ons and complementary sales
 - overcoming customer objections
- presentation skills
- conflict resolution
- verbal and non-verbal interpersonal communication
- accessing relevant product information
- literacy and numeracy skills in regard to:
 - reading and understanding product information
 - reading and understanding store policies and procedures
 - recording client and sales information
 - calculating prices and discounts.

The following knowledge must be assessed as part of this unit:

- store policies and procedures, in regard to:
 - establishing, maintaining and utilising customer records
 - updating and maintaining customer mailing lists
 - methods of maintaining customer confidentiality and secure storage of customer details
 - pricing, including GST requirements
 - price negotiation and payment and credit options
 - resolving customer complaints
- store and area merchandise and service range
- relevant legislation and statutory requirements
- relevant industry codes of practice
- OHS requirements such as:
 - manual handling
 - plant and equipment

REQUIRED SKILLS AND KNOWLEDGE

- hazardous substances and dangerous goods
- workers compensation
- customer types and needs, including:
 - customer buying motives, customer behaviour and cues
 - individual and cultural differences, demographics, lifestyle and income
 - types of customer needs, e.g. functional, psychological.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit Evidence of the following is essential:

- consistently applies store policies and procedures in regard to selling products and services, dealing with customers, planning and implementing sales presentations and providing after sales support
- consistently applies industry codes of practice, relevant legislation and statutory requirements in regard to selling products and services
- consistently develops customer commitment to store and builds return customer base by establishing rapport and relationship with customer, maintaining professional ethics, and accurately discerning customer buying motives and customer needs and requirements
- consistently maximises sales opportunities by using effective selling techniques, applying detailed product knowledge and using an appropriate sales approach to sell the benefits of products, overcome objections and close sales
- consistently and accurately applies detailed knowledge of manufacturer and supplier supply, back-up service and warranty information to enhance customer support
- consistently uses effective questioning, listening

EVIDENCE GUIDE

and observation skills to accurately determine customer requirements

- consistently and effectively plans, prepares and conducts sales presentations and briefs support staff where required, to create a buying environment and maximise sales performance
- consistently evaluates personal and or team sales performance to maximise future sales
- consistently and accurately establishes, records and maintains customer records and details, maintains customer confidentiality, ensures secure storage of data and uses customer records to maximise customer interest and create a buying atmosphere
- consistently resolves customer complaints by acknowledging problems and supporting customer to produce positive outcomes and obtain mutually acceptable complaint resolution.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant sources of product information
- relevant documentation, such as:
 - policy and procedures manuals
 - industry codes of practice and relevant legislation
 - OHS legislation and codes of practice
- a range of customers with different requirements
- an appropriate range of products and equipment
- a customer database system.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- third-party reports from a supervisor
- customer feedback
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party

EVIDENCE GUIDE

workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Customers may include:

- new or repeat contacts
- external and internal contacts
- customers with routine or special requests
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- a single customer, couples, families or groups.

Customer needs and requirements may be clarified through:

- observation
- appropriate questioning
- active listening
- empathy
- reassurance and confirmation.

RANGE STATEMENT

Maintaining *professional ethics* with the customer may include:

- honesty
- positive statements
- confirmed appraisals of products and services.

Customer needs and preferences may include:

- product type
- brand
- size
- product characteristics
- customer physical needs
- price.

Sales techniques will include:

- add-on and complementary products and services
- selling up or down
- suggestive selling
- variety of methods of closing sales.

Legislative requirements may include:

- Trade Practices and Fair Trading Acts
- environmental protection legislation
- OHS
- transport, storage and handling of goods
- pricing procedures, including GST requirements
- privacy laws
- liquor laws
- tobacco laws
- sale of second-hand goods
- health and welfare law specific to local government, state and federal legislation.

Store policy and procedures in regard to:

- selling products and services
- maintaining and utilising client records
- promotional, marketing, discounting and reward programs
- dealing with difficult customers
- resolving customer complaints.

RANGE STATEMENT

Back-up service may include:

- delivery specifications
- warranties and guarantees
- returns policies
- technical support
- installation
- financial products and services.

Customer database may be:

- manual
- computer-based.

Product characteristics may include:

- features and benefits
- price range
- supplier or manufacturer information
- target group.

Promotional materials may include:

- brochures
- pamphlets
- posters
- promotional merchandise
- business cards
- vouchers.

Sales presentations may be:

- in-house
- at client site
- visual
- verbal.

Customer records may include:

- name and contact details
- transaction records
- personal preferences
- anniversaries and special dates
- details of items bought or returned.

RANGE STATEMENT

Customer loyalty schemes may include:

- customer clubs
- customer reward schemes
- credit or discount facilities
- special offers.

Difficult customers may include:

- aggressive
- assertive
- passive
- fussy
- demanding
- rude
- exasperated
- arrogant.

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Monitor, maintain and improve sales and service delivery.	<p>1.1 Implement, communicate and review <i>policies and procedures for sales and service delivery</i> on a regular basis.</p> <p>1.2 Maintain adequate <i>resource</i> allocation for client service provision in line with <i>store policy and procedures</i>.</p> <p>1.3 Resolve <i>customer</i> complaints that have been referred by <i>staff</i>, according to store policy.</p> <p>1.4 Ensure sales and service targets and plans are consistent with quality and functional <i>specifications</i>.</p> <p>1.5 Monitor sales and service targets and plans to ensure that customer requirements are met, and take appropriate</p>

ELEMENT	PERFORMANCE CRITERIA
	remedial action if required.
	1.6 Communicate sales and service targets and plans to <i>relevant personnel</i> according to implementation schedules.
	1.7 Provide <i>feedback</i> to staff on operations and outcomes.
	1.8 Encourage staff to take responsibility for meeting customer requirements.
	1.9 Seek and use feedback from customers to improve future operations.
	1.10 Take corrective measures to minimise <i>factors that may cause disruption to operations</i> .
	1.11 Monitor and evaluate effectiveness of corrective actions for future operational planning.
	1.12 Ensure current and accurate <i>records</i> on sales are available to authorised personnel.
	1.13 Interpret and act on relevant reports as required.
2 Negotiate supply of goods.	2.1 <i>Negotiate</i> and implement <i>arrangements with suppliers</i> according to store policies and procedures and communicate to relevant personnel.
	2.2 Authorise and communicate special pricing arrangements and customer payment agreements to relevant staff and management personnel according to store policy.
	2.3 Monitor records of suppliers and stock for accuracy and legibility and take appropriate action where necessary.
	2.4 Identify and communicate to relevant personnel market factors affecting <i>supply</i> .
	2.5 Convey complete and accurate records of negotiations and agreements to appropriate personnel within designated time limits.
	2.6 Take immediate corrective action where potential or actual <i>problems with supply</i> are indicated.
	2.7 Identify and develop new suppliers to maintain and improve sales and service delivery.

ELEMENT	PERFORMANCE CRITERIA
3 Establish customer requirements.	3.1 Plan and develop strategies to enhance provision of customer service according to store policy. 3.2 Research and accurately <i>analyse customer needs</i> in regard to local geographic and cultural issues.
4 Provide productive work environment.	4.1 Establish and maintain a sufficient supply of resources of the necessary quantity and quality to meet customer requirements. 4.2 Regulate and monitor access to and use of resources for maximum efficiency. 4.3 Maintain staff working conditions that meet requirements of <i>relevant legislation</i> and store policy. 4.4 Ensure that maintenance frequency and use of equipment conform to recommended schedules and procedures. 4.5 Replace, repair or adapt resources that do not meet requirements as soon as practicable and with minimum disruption to work activity. 4.6 <i>Communicate recommendations</i> for improving conditions to relevant personnel within designated timeframe. 4.7 Maintain complete, accurate records and make them available to authorised personnel.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- interpersonal communication skills to:
 - communicate with staff through clear and direct communication
 - ask questions to identify and confirm requirements
 - share information
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication

REQUIRED SKILLS AND KNOWLEDGE

- negotiating with suppliers and customers
- presentation skills
- using new technology
- literacy skills in regard to:
 - researching, analysing and interpreting a broad range of written material
 - preparing reports
 - documenting results
- numeracy skills in regard to:
 - interpreting and maintaining data
 - estimating volume
 - calculating costs and pricing arrangements.

The following knowledge must be assessed as part of this unit:

- store policies and procedures in regard to:
 - sales and service delivery
 - supply specifications
 - quality assurance and control
 - stock maintenance and control
 - pricing procedures, including GST requirements
- store merchandise and service range
- store merchandising plan
- range and availability of new products and services
- customer demand and market trends
- product quality standards
- relevant legislation and statutory requirements
- relevant industry codes of practice
- principles and techniques in:
 - purchasing and supply specifications
 - stock control
 - interpersonal communication.

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently maintains, monitors and evaluates sales and service delivery
- communicates sales and service targets and plans and provides feedback on operations and outcomes to relevant personnel in accordance with store policy
- proactively improves sales and service delivery operations
- accurately interprets and maintains data on sales and services delivery
- negotiates and arranges supply of goods according to store policy and procedures
- consistently authorises pricing and payment agreements according to store policy and procedures
- consistently maintains, monitors and evaluates supply of stock.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - policy and procedures manuals
 - sales and service delivery targets and plans
 - records of sales and service
 - legislation and statutory requirements
 - industry codes of practice
 - OHS legislation and codes of practice
- suppliers
- a team.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace

EVIDENCE GUIDE

- third-party reports from a supervisor
- customer feedback
- research report
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Policies and procedures for sales and service delivery may involve:

- service standards
- staff presentation
- customer complaints
- staff induction
- customer service and sales training.

Resources may include:

- people
- materials

RANGE STATEMENT

- equipment and technology
- finances
- time.

Store policy and procedures in regard to:

- the acquisition and sale of products and services
- quality assurance and control
- interaction with customers
- interaction with other team members
- OHS.

Customers may include:

- new or repeat contacts
- external and internal contacts
- customers with routine or special requests
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Staff may include:

- full-time, part-time, casual or contract staff
- people from a range of social, cultural and ethnic backgrounds
- people with varying degrees of language and literacy levels.

Specifications may include:

- customer agreements
- operational means for meeting agreements
- specific functional duties within the organisation.

Relevant personnel may include:

- managers
- supervisors
- members of own or other work teams.

Feedback may be sought and given:

- verbally
- in writing
- in groups

RANGE STATEMENT

- individually.

Factors that may cause disruption to operations may include:

- supply
- operational resources
- quality of materials.

Records may be:

- hard copy
- electronic.

Techniques used to *negotiate* with suppliers may include:

- face to face contact
- correspondence
- meetings
- telephone
- email.

Arrangements with suppliers may relate to:

- pricing
- delivery
- partnerships and exclusivity
- credit levels.

Sources of *supply* may include:

- people
- external organisations
- internal departments and teams.

Problems with supply may involve:

- quality
- quantity
- coverage or content
- time schedules or scales
- cost.

Methods used to *analyse customer needs* may be:

- quantitative
- qualitative.

RANGE STATEMENT

Relevant legislation may include:

- federal, state and local legislation
- OHS
- equal employment opportunity and anti-discrimination laws.

Recommendations may be communicated to:

- higher-level managers
- subordinates
- colleagues, specialists, staff from other departments
- external organisations with a health, safety or environmental responsibility
- government bodies.

SITTPPD005A Plan and develop interpretive activities

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and develop interpretive activities for different customer groups. It requires the ability to establish the educational, interpretive and commercial objectives of the activity, develop all operational aspects and evaluate the success of the activity.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

This unit does not cover the ability to participate in the strategic development of the organisation's product range. SITTPPD001B Research, assess and develop tourism products, takes a more strategic focus to product development and covers the high-level market research and analysis function of product planning.

The actual presentation of activities is covered in unit SITTGDE006A Prepare and present tour commentaries or activities.

Application of the Unit

Application of the unit

This unit describes a product planning function for a diverse range of tourism activities delivered in a range of tourism industry sectors. It is particularly relevant to those developing activities within tour operations, attractions, theme parks, and national parks for delivery at a particular site. Many would be nature or ecotourism-based experiences.

This unit can have broader industry application and can apply to cultural industries where delivery of interpretive activities takes place in a museum, gallery, library, performing arts centre or zoo; sport and recreation industries for interpretive activities that are linked to outdoor and adventure activities such as

guided bushwalking; and any industry that operates interpretive activities at an industrial site, e.g. breweries, waste management facilities and factories.

The planning and development of interpretive activities may be for a series of activities within a venue or tour operation or for a one-off activity. Planning and development may be undertaken by the same person involved in delivering the activity or may be developed by senior operational or supervisory personnel. The planning role would normally apply to those who operate with some level of autonomy or under limited supervision and guidance from others, e.g. senior guide or senior activities coordinator, site guide and interpretive guide.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the

of competency.

required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Establish need for activity.	<p>1.1 Identify need for the <i>interpretive activity</i>, based on customer requests and feedback, product development initiatives and wider community needs.</p> <p>1.2 Establish educational, interpretive and commercial objectives of the activity in consultation with appropriate colleagues.</p>
2 Develop the activity.	<p>2.1 Identify and develop possible themes and messages for the activity.</p> <p>2.2 Identify and access a range of potential information and <i>resources</i>, including <i>other specialists</i> as required, in a culturally and environmentally appropriate manner.</p> <p>2.3 Develop activity using creative and interpretive techniques.</p> <p>2.4 Identify hazards for customers and delivery personnel at activity site, conduct a risk assessment and incorporate controls into activity development.</p> <p>2.5 Select messages and supporting information of appropriate breadth and depth to meet customer needs.</p> <p>2.6 Develop resources to support the activity within designated timelines.</p> <p>2.7 Develop activity within budget to meet agreed objectives in consultation with colleagues.</p> <p>2.8 Promote activity in conjunction with relevant colleagues and according to organisation marketing objectives.</p>
3 Evaluate activity.	<p>3.1 Obtain formal and informal feedback from customers and colleagues during piloting or conduct of activity.</p> <p>3.2 Modify activity according to feedback received.</p>

ELEMENT

PERFORMANCE CRITERIA

- 3.3 Establish and implement ongoing review mechanisms to ensure continuous improvement of activity in line with its objectives.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- ability to conduct a safety-based risk assessment
- interpretation of the specific needs of customers and any specific services previously promoted to customers
- high-level communication skills to facilitate the gathering and analysis of complex information and to interpret this for simpler communication to customers
- creative communication techniques for interpretive commentaries or activities, including such things as storytelling, role-play, games, sensory awareness exercises and illustrated talks.

The following knowledge must be assessed as part of this unit:

- in-depth knowledge of subject matter around which the activity is developed
- the comprehensive details of Freeman Tilden's principles of interpretation
- principles and processes that support activity development.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to Evidence of the following is essential:

EVIDENCE GUIDE

demonstrate competency in this unit

- ability to develop all operational aspects of interpretive activities that meet the needs of the specific customers and objectives of the organisation and evaluate those activities
- subject knowledge and ability to apply that knowledge to the development of tourism-related interpretive activities
- planning and developing various interpretive activities covering multiple themes and messages that meet the needs of different customer groups to ensure consistency of performance
- planning and developing interpretive activities that take account of the commercial constraints of their delivery, e.g. budget restrictions and limitations on activity duration
- planning and developing interpretive activities for a number of different delivery environments (e.g. at a nature-based site, at a cultural site, in a national park or on a walking tour) to ensure that skills can be adapted to different delivery locations and contexts
- project or work activities conducted over an operationally realistic period of time so that monitoring, evaluation and review of interpretive activities can be assessed, e.g. through a pilot of activities.

Context of and specific resources for assessment

Assessment must ensure:

- access to and use of appropriate environments for which interpretive activities can be planned and developed, e.g. nature-based sites, cultural sites, national parks and walking tours
- access to comprehensive and sufficient information about the customer base for which interpretive activities would be planned to allow the candidate to fully develop appropriate activities
- access to resources and equipment used for the presentation of interpretive activities.

Methods of assessment

A range of assessment methods should be used to assess the practical skills and knowledge required to plan and develop interpretive activities. The following examples are appropriate for this unit:

EVIDENCE GUIDE

- project to develop and evaluate activities for a nominated customer group or organisation
- review of planning and development activities undertaken as part of industry placement or training with an industry operator
- written and oral questioning or interview to test knowledge of interpretation principles and activity development processes
- case studies to assess ability to tailor activities and information to suit particular customer needs
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITTGDE006A Prepare and present tour commentaries or activities
- SITTGDE008A Research and share general information on Australian Indigenous culture
- SITTGDE009A Interpret aspects of local Australian Indigenous culture
- SITTGDE010B Prepare specialised interpretive content on flora, fauna and landscape
- SITTGDE011B Prepare specialised interpretive content on marine environments
- SITTGDE012B Prepare specialised interpretive content on cultural and heritage environments.

This unit involves substantial knowledge of the subject matter around which the interpretive activity is based. This knowledge must be thoroughly assessed. Co-assessment with at least one of the abovementioned units is required. Those units describe skills and knowledge essential to this unit of competency.

Assessment methods should take into account that individuals may have acquired this knowledge through formal study or life experience. This would include such things as the recognition of scientific qualifications of ecotour guides and recognition systems that relate to cultural knowledge that exists in Aboriginal and Torres Strait Islander societies.

EVIDENCE GUIDE

Assessing employability skills Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

An *interpretive activity*:

- may include:
 - guided walks
 - guided site activities
 - touring activities
 - sporting activities
 - one or more activities that may be combined in an overall tour program
- may relate to a range of subjects, including:
 - wildlife
 - domestic and farm animals
 - birds
 - history and heritage
 - culture
 - art
 - natural environment
 - built environment
 - sports

RANGE STATEMENT

- festivals or seasonal themes.

Resources may include:

- natural resources
- audiovisual equipment, such as:
 - video and video monitor
 - slides and slide projector
 - microphone
 - overhead projector and transparencies
- handouts
- costumes
- props
- actors and performers
- guest speakers
- special interest organisations.

Other specialists may include:

- subject matter experts
- cultural advisers
- technical experts
- creative designers
- actors and performers
- marketers
- environmental educators
- interpretation consultants.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine assessment approach	<p>1.1. Identify candidate and confirm <i>purposes and context of assessment/RPL</i> with relevant people according to <i>legal, organisational and ethical requirements</i></p> <p>1.2. Identify and access <i>benchmarks for assessment/RPL</i> and any specific assessment guidelines</p>
2. Prepare the assessment plan	<p>2.1. Determine evidence and <i>types of evidence</i> needed to demonstrate competence, according to the <i>rules of evidence</i></p> <p>2.2. Select <i>assessment methods</i> which will support the collection of defined evidence, taking into account the context in which the assessment will take place</p> <p>2.3. Document all aspects of the <i>assessment plan</i> and confirm with relevant personnel</p>
3. Develop assessment instruments	<p>3.1. Develop <i>simple assessment instruments</i> to meet target group needs</p> <p>3.2. Analyse <i>available assessment instruments</i> for their suitability for use and modify as required</p> <p>3.3. <i>Map assessment</i> instruments against unit or course requirements</p> <p>3.4. Write clear instructions for candidate about the use of the instruments</p>

ELEMENT	PERFORMANCE CRITERIA
	3.5.Trial draft assessment instruments to validate content and applicability, and record outcomes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- cognitive interpretation skills to:
 - interpret competency standards and other assessment documentation, including material relating to reasonable adjustment
 - identify opportunities for integrated competency assessment
 - contextualise competency standards to the operating assessment environment, including RPL
 - consider access and equity needs of diverse candidates
- technology skills to use appropriate equipment and software to communicate effectively with others
- research and evaluation skills to:
 - obtain competency standards, assessment tools and other relevant assessment resources
 - research candidate characteristics and any reasonable adjustment needs
 - evaluate feedback, and determine and implement improvements to processes
- literacy skills to read and interpret relevant information to design and facilitate assessment and recognition processes
- communication skills to discuss assessment, including RPL processes with clients and other assessors
- interpersonal skills to:
 - demonstrate sensitivity to access and equity considerations and candidate diversity
 - promote and implement equity, fairness, validity, reliability and flexibility in planning an assessment processes

Required knowledge

- ethical and legal requirements of an assessor
- competency-based assessment, including:
 - work-focused
 - criterion-referenced

REQUIRED SKILLS AND KNOWLEDGE

- standards-based
- evidence-based
- different purposes of assessment and different assessment contexts, including RPL
- how to read and interpret the identified competency standards as the benchmarks for assessment
- how to contextualise competency standards within relevant guidelines
- four principles of assessment and how they guide the assessment process
- purpose and features of evidence, and different types of evidence used in competency-based assessments, including RPL
- rules of evidence and how they guide evidence collection
- different types of assessment methods, including suitability for collecting various types of evidence
- assessment tools and their purpose; different types of tools; relevance of different tools for specific evidence-gathering opportunities

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must address the scope of this unit and reflect all components of the unit. Arrange of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- plan and organise the assessment process on a minimum of two occasions
- collect evidence that demonstrates:
 - documented assessment plans
 - having covered a range of assessment events
 - catering for a number of candidates
 - different competency standards or accredited curricula
 - an RPL assessment
 - contextualisation of competency standards and the

EVIDENCE GUIDE	
	<p>selected assessment tools, where required</p> <ul style="list-style-type: none"> • incorporation of reasonable adjustment strategies • development of simple assessment instruments for use in the process • organisational arrangements.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p> <p>Assessment must ensure access to training products, such as training packages and accredited course documentation.</p>
Method of assessment	
Guidance information for assessment	<p>For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Purposes of assessment/ RPL</i> may include:	<ul style="list-style-type: none"> • recognising current existing competence of candidates • determining if competence has been achieved following learning • establishing candidate progress towards achievement of competence • determining language, literacy and numeracy needs of candidates • certifying competence through a qualification or Statement of Attainment • licensing or regulatory requirements.
<i>Context of assessment/ RPL</i>	<ul style="list-style-type: none"> • environment in which the assessment/RPL will be carried out, including real or simulated workplace

RANGE STATEMENT	
may include:	<ul style="list-style-type: none"> • opportunities for collecting evidence in a number of situations • relationships between competency standards and: <ul style="list-style-type: none"> • evidence to support RPL • work activities in the candidate's workplace • learning activities • who carries out the assessment/RPL.
<i>Organisational, legal and ethical requirements</i> may include:	<ul style="list-style-type: none"> • assessment system policies and procedures • assessment strategy requirements • reporting, recording and retrieval systems for assessment, including RPL • quality assurance systems • business and performance plans • access and equity policies and procedures • collaborative and partnership arrangements • defined resource parameters • mutual recognition arrangements • industrial relations systems and processes, awards, and enterprise agreements • Australian Quality Training Framework • registration scope • human resources policies and procedures • legal requirements, including: <ul style="list-style-type: none"> • anti-discrimination • equal employment opportunity • job role, responsibilities and conditions • relevant industry codes of practice • confidentiality and privacy requirements • OHS considerations, including: <ul style="list-style-type: none"> • ensuring OHS requirements are adhered to during the assessment process • identifying and reporting OHS hazards and concerns to relevant personnel.
<i>Benchmarks for assessment/RPL</i> may include:	<ul style="list-style-type: none"> • criterion against which the candidate is assessed or prior learning recognised, which may be: <ul style="list-style-type: none"> • competency standard/unit of competency • assessment criteria of course curricula • performance specifications of an enterprise or industry • product specifications.

RANGE STATEMENT	
<i>Types of evidence</i> may include:	<ul style="list-style-type: none"> • direct • indirect • supplementary.
<i>Rules of evidence</i> ensure that evidence collected is:	<ul style="list-style-type: none"> • valid • sufficient • authentic • reliable.
<i>Assessment methods</i> are the particular techniques used to gather evidence and may include:	<ul style="list-style-type: none"> • direct observation, for example: <ul style="list-style-type: none"> • real work/real time activities at the workplace • work activities in a simulated workplace environment • structured activities, for example: <ul style="list-style-type: none"> • simulation exercises and role-plays • projects • presentations • activity sheets • questioning, for example: <ul style="list-style-type: none"> • written questions, e.g. on a computer • interviews • self-assessment • verbal questioning • questionnaires • oral or written examinations (applicable at higher AQF levels) • portfolios of evidence, for example: <ul style="list-style-type: none"> • collection of work samples compiled by candidate • product with supporting documentation • historical evidence • journal or log book • information about life experience • review of products, for example: <ul style="list-style-type: none"> • testimonials and reports from employers and supervisors • evidence of training • authenticated prior achievements • interview with employer, supervisor, or peer.
<i>Assessment plan</i> may	<ul style="list-style-type: none"> • overall planning document describing:

RANGE STATEMENT	
include:	<ul style="list-style-type: none"> • what is to be assessed • when assessment is to take place • where assessment is to take place • how assessment is to take place.
<i>Simple assessment instruments</i> may include:	<ul style="list-style-type: none"> • instruments developed by an assessor as part of formative or summative assessment activities, including: <ul style="list-style-type: none"> • profiles of acceptable performance measures • templates and proformas • specific questions or activities • evidence and observation checklists • checklists for the evaluation of work samples • recognition portfolios • candidate self-assessment materials • instruments developed elsewhere that have been modified by the assessor for use with a particular client group.
<i>Available assessment instruments</i> may include:	<ul style="list-style-type: none"> • commercially available instruments • those created by others inside the registered training organisation.
<i>Map assessment</i> means:	<ul style="list-style-type: none"> • showing a clear relationship between the evidence and the requirements of the unit.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for assessment	1.1. Interpret <i>assessment plan</i> and confirm organisational, legal and ethical requirements for conducting assessment with relevant people 1.2. Access and interpret relevant <i>benchmarks for assessment</i> and nominated <i>assessment tools</i> to confirm the requirements for evidence to be collected 1.3. Arrange identified material and physical resource requirements according to assessment system policies and procedures 1.4. Organise <i>specialist support</i> required for assessment 1.5. Explain, discuss and agree details of the assessment plan with candidate
2. Gather quality evidence	2.1. Use agreed <i>assessment methods</i> and tools to gather, organise and document evidence in a format suitable for determining competence 2.2. Apply the principles of assessment and rules of evidence in gathering quality evidence 2.3. Determine opportunities for evidence gathering in actual or simulated activities through consultation with the candidate and relevant personnel 2.4. Determine opportunities for integrated assessment activities and document any changes to assessment instruments where required
3. Support the candidate	3.1. Guide candidates in gathering their own evidence to support recognition of prior learning (RPL) 3.2. Use appropriate communication and interpersonal skills to develop a professional relationship with the candidate that reflects sensitivity to <i>individual differences</i> and enables two-way <i>feedback</i> 3.3. Make decisions on reasonable adjustments with the

ELEMENT	PERFORMANCE CRITERIA
	<p>candidate, based on candidate's needs and characteristics</p> <p>3.4. Access required specialist support in accordance with the assessment plan</p> <p>3.5. Address any OHS risk to person or equipment immediately</p>
4. Make the assessment decision	<p>4.1. Examine collected evidence and evaluate it to ensure that it reflects the evidence required to demonstrate competence</p> <p>4.2. Use judgement to infer whether competence has been demonstrated, based on the available evidence</p> <p>4.3. Make assessment decision in line with agreed assessment procedures and according to agreed assessment plan</p> <p>4.4. Provide clear and constructive feedback to candidate regarding the assessment decision and develop any follow-up action plan required</p>
5. Record and report the assessment decision	<p>5.1. Record assessment outcomes promptly and accurately</p> <p>5.2. Complete and process an assessment report according to agreed assessment procedures</p> <p>5.3. Inform other relevant parties of the assessment decision according to confidentiality conventions</p>
6. Review the assessment process	<p>6.1. Review the assessment process in <i>consultation</i> with relevant people to improve own future practice</p> <p>6.2. Document and record the review according to relevant assessment system policies and procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analysis and interpretation skills to:
 - break down competency standards
 - interpret assessment tools and other assessment information, including those used in RPL

REQUIRED SKILLS AND KNOWLEDGE

- identify candidate needs
- make judgements based on assessment of available evidence
- observation skills to:
 - recognise candidate's prior learning
 - determine candidate's performance
 - identify when candidate may need assistance during the assessment processes
- research and evaluation skills to:
 - access required human and material resources for assessment
 - access assessment system policies and procedures
 - access RPL policies and procedures
 - evaluate evidence
 - evaluate assessment process
- cognitive skills to:
 - weigh up the evidence and make a judgement
 - consider and recommend reasonable adjustments
- decision-making skills to:
 - recognise a candidate's prior learning
 - make a decision on a candidate's competence
- literacy skills to:
 - read and interpret relevant information to conduct assessment
 - prepare required documentation and records or reports of assessment outcomes in required format
- communication and interpersonal skills to:
 - explain the assessment, including RPL process
 - give clear and precise instructions
 - ask effective questions
 - provide clarification
 - discuss process with other relevant people
 - give appropriate feedback
 - discuss assessment outcome
 - use language appropriate to candidate and assessment environment
 - establish a working relationship with candidate

Required knowledge

- competency-based assessment, including:
 - vocational education and training as a competency-based system
 - criterion-referenced assessment as distinct from norm-referenced assessment
 - competency standards as the basis of qualifications

REQUIRED SKILLS AND KNOWLEDGE

- structure and application of competency standards
- principles of assessment and how they are applied
- rules of evidence and how they are applied
- range of assessment purposes and assessment contexts, including RPL
- different assessment methods, including suitability for gathering various types of evidence, suitability for content of units, and resource requirements and associated costs
- reasonable adjustments and when they are applicable
- types and forms of evidence, including assessment tools that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
- potential barriers and processes relating to assessment tools and methods
- assessment system, including policies and procedures established by the industry, organisation or training authority
- RPL policies and procedures established by the organisation
- cultural sensitivity and equity considerations
- relevant policy, legislation, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector, such as:
 - copyright and privacy laws in terms of electronic technology
 - security of information
 - plagiarism
 - training packages and competency standards
 - licensing requirements
 - industry and workplace requirements
 - duty of care under common law
 - recording information and confidentiality requirements
 - anti-discrimination, including equal employment opportunity, racial vilification and disability discrimination
 - workplace relations
 - industrial awards and enterprise agreements
- OHS responsibilities associated with assessing competence, such as:
 - requirements for reporting hazards and incidents
 - emergency procedures
 - procedures for use of relevant personal protective equipment
 - safe use and maintenance of relevant equipment
 - sources of OHS information

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • assess competence of a number of candidates within the vocational education and training context against different units of competency or accredited curricula, following the relevant assessment plan • assess at least one candidate for RPL • consider reasonable adjustment and the reasons for decisions in at least one assessment • cover an entire unit of competency and show: <ul style="list-style-type: none"> • the application of different assessment methods and tools involving a range of assessment activities and events • two-way communication and feedback • how judgement was exercised in making the assessment decision • how and when assessment outcomes were recorded and reported • assessment records and reports completed in accordance with assessment system and organisational, legal and ethical requirements • how the assessment process was reviewed.
<p>Context of and specific resources for assessment</p>	<p>Evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided.</p>
<p>Method of assessment</p>	
<p>Guidance information for assessment</p>	<p>For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Assessment plan</i> may include:</p>	<ul style="list-style-type: none"> • overall planning, describing: <ul style="list-style-type: none"> • what is to be assessed • when assessment is to take place • where assessment is to take place • how assessment is to take place.
<p><i>Benchmarks for assessment:</i></p>	<ul style="list-style-type: none"> • refer to a criterion against which the candidate is assessed • may be a competency standard/unit of competency, assessment criteria of course curricula, performance specifications, or product specifications.
<p><i>Assessment tools</i> may include:</p>	<ul style="list-style-type: none"> • both the instrument and the procedures for gathering and interpreting evidence in accordance with designated assessment methods • instruments to be used for gathering evidence, such as: <ul style="list-style-type: none"> • profile of acceptable performance measures • templates and proformas • specific questions or activities • evidence and observation checklists • checklists for evaluating work samples • candidate self-assessment materials • procedures, information and instructions for the assessor and candidate relating to the use of assessment instruments and assessment conditions.
<p><i>Specialist support</i> may include:</p>	<ul style="list-style-type: none"> • assistance by third party, such as carer or interpreter • support from specialist educator • provision of developed online assessment activities • support for remote or isolated candidates and assessors • support from subject matter or safety experts • advice from regulatory authorities • assessment teams and panels

RANGE STATEMENT	
	<ul style="list-style-type: none"> • support from lead assessors • advice from policy development experts.
<i>Assessment methods</i> include:	<ul style="list-style-type: none"> • particular techniques used to gather different types of evidence, such as: <ul style="list-style-type: none"> • direct observation • structured activities • oral or written questioning • portfolios of evidence • review of products • third-party feedback.
<i>Individual differences</i> may include:	<ul style="list-style-type: none"> • English language, literacy and numeracy barriers • physical impairment or disability • intellectual impairment or disability • medical condition that may impact on assessment, such as arthritis, epilepsy, diabetes and asthma • learning difficulties • mental or psychological disability • religious and spiritual observances • cultural images and perceptions • age • gender.
<i>Feedback</i> may include:	<ul style="list-style-type: none"> • ensuring assessment/RPL process is understood • ensuring candidate concerns are addressed • enabling questions and answers • confirming outcomes • identifying further evidence to be provided • discussing action plans • confirming gap training needed • providing information regarding available appeal processes • suggesting improvements in evidence gathering and presentation.
<i>Consultation</i> may involve:	<ul style="list-style-type: none"> • moderation with other assessors, or training and assessment coordinators • discussions with client, team leaders, managers, RPL coordinators, supervisors, coaches and mentors • technical and subject experts • English language, literacy and numeracy experts.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for validation	1.1. Discuss and confirm the approach to validation according to defined purposes, context, and relevant <i>assessment system policies and procedures</i> 1.2. Analyse relevant <i>benchmarks for assessment</i> and agree on the evidence needed to demonstrate competence 1.3. Arrange <i>materials for validation activities</i>
2. Contribute to validation process	2.1. Demonstrate active <i>participation</i> in validation sessions and activities using appropriate communication skills 2.2. Participate in validation sessions and activities by applying the principles of assessment and rules of evidence 2.3. Check all documents used in the validation process for accuracy and version control
3. Contribute to validation outcomes	3.1. Collectively discuss validation findings to support improvements in the quality of assessment 3.2. Discuss, agree and record recommendations to improve assessment practice 3.3. Implement changes to own assessment practice, arising from validation

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

REQUIRED SKILLS AND KNOWLEDGE

Required skills

- planning skills to participate in validation activities within agreed timeframes
- problem-solving skills to identify information that is inconsistent, ambiguous or contradictory
- evaluation skills to:
 - determine evidence requirements from competency standards
 - review assessment process, methods and tools
 - review collected evidence
- communication skills to share information in validation meetings

Required knowledge

- how to interpret competency standards and other related assessment information to determine the evidence needed to demonstrate competence, including:
 - criterion-referenced assessment as distinct from norm-referenced assessment
 - various reasons for carrying out validation and the different approaches to validation that may be appropriate before, during and after assessment
 - critical aspects of validation, including validation of assessment processes, methods and products
 - relevant OHS legislation, codes of practice, standards and guidelines, impacting on assessment
 - legal and ethical requirements of assessors, particularly in relation to validation activities
- principles of assessment
- rules of evidence

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been

EVIDENCE GUIDE	
	demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> actively participate in a minimum of two validation sessions or meetings which, in combination, address the critical aspects of validation using different validation approaches and activities clearly explain purposes of validation and the legal and ethical responsibilities of assessors collate documentation relating to validation process in a logical manner demonstrate communication and liaison with relevant people provide feedback and interpret documentation in validation sessions record contribution to validation findings.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Co-requisite units

Co-requisite units		

TAEDEL301A Provide work skill instruction

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to conduct individual and group instruction and demonstrate work skills, using existing learning resources in a safe and comfortable learning environment. The unit covers the skills and knowledge required to determine the success of both the training provided and one's own personal training performance. It emphasises the training as being driven by the work process and context.
------------------------	--

Application of the Unit

Application of the unit	This unit supports a wide range of applications across any workplace setting and so can be used by any organisation. Its use is not restricted to training organisations.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise instruction and demonstration	1.1. Gather information about <i>learner characteristics</i> and learning needs 1.2. Confirm a <i>safe learning environment</i> 1.3. Gather and check <i>instruction and demonstration objectives</i> and seek assistance if required 1.4. Access and review relevant <i>learning resources</i> and <i>learning materials</i> for suitability and relevance, and seek assistance to interpret the contextual application 1.5. Organise access to necessary equipment or physical resources required for instruction and demonstration 1.6. Notify learners of <i>details</i> regarding the implementation of the learning program and/or delivery plan
2. Conduct instruction and demonstration	2.1. Use interpersonal skills with learners to establish a safe and comfortable learning environment 2.2. Follow the learning program and/or delivery plan to cover all learning objectives 2.3. Brief learners on any <i>OHS procedures</i> and requirements prior to and during training 2.4. Use <i>delivery techniques</i> to structure, pace and enhance learning 2.5. Apply <i>coaching</i> techniques to assist learning 2.6. Use communication skills to provide information,

ELEMENT	PERFORMANCE CRITERIA
	instruct learners and demonstrate relevant work skills 2.7. Provide opportunities for practice during instruction and through work activities 2.8. Provide and discuss feedback on learner performance to support learning
3. Check training performance	3.1. Use <i>measures</i> to ensure learners are acquiring and can use new technical and generic skills and knowledge 3.2. Monitor learner progress and outcomes in consultation with learner 3.3. Review relationship between the trainer/coach and the learner and adjust to suit learner needs
4. Review personal training performance and finalise documentation	4.1. Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement 4.2. Maintain, store and secure learner records according to organisational and legal requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- verbal and non-verbal communication techniques, such as:
 - asking relevant and appropriate questions
 - providing explanations
 - demonstrating
 - using listening skills
 - providing information clearly
- safety skills to implement OHS requirements, by acting and responding safely in order to:
 - identify hazards
 - conduct prestart-up checks if required
 - observe and interpret learner behaviour that may put people at risk
- time-management, skills to:

REQUIRED SKILLS AND KNOWLEDGE

- ensure all learning objectives are covered
- pace learning
- reflection skills in order to:
 - identify areas for improvement
 - maintain personal skill development
- literacy skills to:
 - complete and maintain documentation
 - read and follow learning programs and plans
 - read and analyse learner information
- technology skills to operate audio-visual and technical equipment
- interpersonal skills to:
 - engage, motivate and connect with learners
 - provide constructive feedback
 - maintain appropriate relationships
 - establish trust
 - use appropriate body language
 - maintain humour
 - demonstrate tolerance
 - manage a group
 - recognise and be sensitive to individual difference and diversity
- observation skills to:
 - monitor learner acquisition of new skills, knowledge and competency requirements
 - assess learner communication and skills in interacting with others
 - identify learner concerns
 - recognise learner readiness to take on new skills and tasks

Required knowledge

- learner characteristics and needs
- content and requirements of the relevant learning program and/or delivery plan
- sources and availability of relevant learning resources and learning materials
- content of learning resources and learning materials
- training techniques that enhance learning and when to use them
- introductory knowledge of learning principles and learning styles
- key OHS issues in the learning environment, including:
 - roles and responsibilities of key personnel
 - responsibilities of learners
 - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency

REQUIRED SKILLS AND KNOWLEDGE

procedures

- risk controls for the specific learning environment

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- carry out a minimum of three training sessions, involving demonstrating and instructing particular work skills for different groups; with each session addressing:
 - different learning objectives
 - a range of techniques and effective communication skills appropriate to the audience.

Context of and specific resources for assessment

Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.

Method of assessment**Guidance information for assessment**

For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement**RANGE STATEMENT**

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Learner characteristics</i> may include:	<ul style="list-style-type: none"> • language, literacy and numeracy levels • learning styles • past learning and work experiences • specific needs • workplace culture.
<i>Safe learning environment</i> may include:	<ul style="list-style-type: none"> • exit requirements • personal protective equipment • safe access • safe use of equipment.
<i>Instruction and demonstration objectives</i> may include:	<ul style="list-style-type: none"> • competencies to be achieved • generic and technical skills, which may be: <ul style="list-style-type: none"> • provided by the organisation • developed by a colleague • individual or group objectives • learning outcomes.
<i>Learning resources</i> may include:	<ul style="list-style-type: none"> • any material used to support learning, such as: <ul style="list-style-type: none"> • learner and user guides • trainer and facilitator guides • example training programs • specific case studies • professional development materials • assessment materials • a variety of formats • those produced locally • those acquired from other sources.
<i>Learning materials</i> may include:	<ul style="list-style-type: none"> • handouts for learners • materials sourced from the workplace, e.g. workplace documentation, operating procedures, and specifications.
<i>Details</i> may include:	<ul style="list-style-type: none"> • location and time • outcomes of instruction or demonstration • reason for instruction or demonstration • who will be attending instruction session.

RANGE STATEMENT	
<i>OHS procedures</i> may include:	<ul style="list-style-type: none"> • emergency procedures • hazards and their means of control • incident reporting • use of personal protective equipment • safe work practices • safety briefings • site-specific safety rules.
<i>Delivery techniques</i> may include:	<ul style="list-style-type: none"> • coaching • demonstration • explanation • group or pair work • providing opportunities to practise skills and solve problems • questions and answers.
<i>Coaching</i> may include:	<ul style="list-style-type: none"> • learning arrangements requiring immediate interaction and feedback • on-the-job instruction and 'buddy' systems • relationships targeting enhanced performance • short-term learning arrangements • working on a one-to-one basis.
<i>Measures</i> may include:	<ul style="list-style-type: none"> • informal review or discussion • learner survey • on-the-job observation • review of peer coaching arrangements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret learning environment and delivery requirements	1.1. Access, read and interpret <i>learning program documentation</i> to determine delivery requirements 1.2. Use available information and documentation to identify group and individual learner needs and learner characteristics 1.3. Identify and assess constraints and risks to delivery 1.4. Confirm personal role and responsibilities in planning and delivering training with relevant personnel
2. Prepare session plans	2.1. Refine existing learning objectives according to program requirements and specific needs of individual learners 2.2. Develop <i>session plans</i> and document these for each segment of the learning program 2.3. Use knowledge of learning principles and theories to generate ideas for managing session delivery
3. Prepare resources for delivery	3.1. Contextualise existing learning materials to meet the needs of the specific learner group 3.2. Finalise learning materials and organise facility, technology and equipment needs in time for delivery of learning sessions 3.3. Confirm overall delivery arrangements with relevant personnel
4. Deliver and facilitate training sessions	4.1. Conduct each session according to session plan, modified where appropriate to meet learner needs 4.2. Use the diversity of the group as another resource to

ELEMENT	PERFORMANCE CRITERIA
	support learning 4.3. Employ a range of delivery methods as training aids to optimise learner experiences 4.4. Demonstrate effective facilitation skills to ensure effective participation and group management
5. Support and monitor learning	5.1. Monitor and document learner progress to ensure outcomes are being achieved and individual learner needs are being met 5.2. Make adjustments to the delivery sessions to reflect specific needs and circumstances 5.3. Manage <i>inappropriate behaviour</i> to ensure learning can take place 5.4. Maintain and store learner records according to organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- presentation skills to ensure delivery is engaging and relevant, including:
 - synthesising information and ideas
 - preparing equipment, such as data projectors and computer presentation applications
 - speaking with appropriate tone and pitch
 - using language appropriate to audience
 - encouraging and dealing appropriately with questions
- group facilitation skills to ensure that:
 - every individual has an opportunity for participation and input
 - group cohesion is maintained
 - behaviour that puts others at risk is observed, interpreted and addressed
 - discussion and group interaction are enhanced
- conflict resolution and negotiation skills to:
 - identify critical points, issues, concerns and problems
 - identify options for changing behaviours
- oral communication and language skills to:

REQUIRED SKILLS AND KNOWLEDGE

- motivate learners to transfer skills and knowledge
- engage with the learner
- interpersonal skills to maintain appropriate relationships and ensure inclusivity
- observation skills to monitor individual and group progress

Required knowledge

- introductory knowledge of learning theories
- sound knowledge of learning principles
- sound knowledge of learner styles
- industry area and subject matter of the delivery
- learner group profile, including characteristics and needs of individual learners in the group
- content and requirements of the learning program and/or delivery plan
- different delivery methods and techniques appropriate to face-to-face group delivery
- techniques for the recognition and resolution of inappropriate behaviours
- behaviours in learners that may indicate learner difficulties
- organisational record-management systems and reporting requirements
- evaluation and revision techniques
- specific resources, equipment and support services available for learners with special needs
- relevant policy, legal requirements, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector
- OHS relating to the facilitation of group-based learning, including:
 - assessment and risk control measures
 - reporting requirements for hazards
 - safe use and maintenance of relevant equipment
 - emergency procedures
 - sources of OHS information
 - role of key workplace persons
- policies and procedures relevant to the learning environment

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. Arrange of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • facilitate group-based learning by preparing and delivering a series of training sessions, including: <ul style="list-style-type: none"> • at least two consecutive sessions, of a duration commensurate with a substantive training session (e.g. 40-60 minutes), that follow one of the learning program designs • at least one session delivered to a different learner group, with evidence of how the characteristics and needs of this group were addressed • identify and respond to diversity and individual needs • access and use documented resources and support personnel to guide inclusive practices.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p> <p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • training products, such as training packages and accredited course documentation.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish effective work environment for learning	1.1. Establish and agree upon objectives and scope of the work-based learning 1.2. Analyse work practices and routines to determine their effectiveness in meeting established learning objectives 1.3. Identify and address <i>OHS implications</i> of using work as the basis for learning
2. Develop a work-based learning pathway	2.1. Address <i>contractual requirements</i> and responsibilities for learning at work 2.2. Arrange for integration and monitoring of external learning activities with the <i>work-based learning pathway</i> 2.3. Obtain agreement from relevant personnel to implement the work-based learning pathway
3. Establish the learning-facilitation relationship	3.1. Identify context for learning and individual's learning style 3.2. Select appropriate technique or process to facilitate learning and explain the basis of the technique to learner 3.3. Develop, document and discuss <i>individualised learning plan</i> with learner 3.4. Access, read and interpret documentation outlining the OHS responsibilities of the various parties in the learning environment 3.5. Monitor supervisory arrangements appropriate to learner's levels of knowledge, skill and experience to provide support and encouragement and ensure

ELEMENT	PERFORMANCE CRITERIA
	learner's health and safety
4. Implement work-based learning pathway	4.1. Sequence introduction of workplace tasks, activities and processes to reflect the agreed work-based learning pathway 4.2. Explain objectives of work-based learning and the processes involved to learner 4.3. Encourage learner to take responsibility for learning and to self-reflect 4.4. Develop techniques that facilitate learner's transfer of skills and knowledge
5. Maintain and develop the learning/facilitation relationship	5.1. Prepare for each session 5.2. Structure learning activities to support and reinforce new learning, build on strengths, and identify areas for further development 5.3. Observe learner cues and change approaches where necessary to maintain momentum 5.4. Practise <i>ethical behaviour</i> at all times 5.5. Monitor effectiveness of the learning/facilitation relationship through regular meetings between the parties
6. Close and evaluate the learning/facilitation relationship	6.1. Carry out the closure smoothly, using appropriate interpersonal and communication skills 6.2. Seek feedback from learner on the outcomes achieved and value of the relationship 6.3. Evaluate and document process, including <i>impact, self evaluation and reflection</i> , and file according to legal and organisational requirements
7. Monitor and review the effectiveness of the work-based learning pathway	7.1. Document work performance and learning achievement and keep records according to organisational requirements 7.2. Evaluate effectiveness of the work-based pathway against the objectives, processes and techniques used 7.3. Recommend improvements to work-based practice in light of the review process

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- oral communication and language skills to:
 - motivate the learner
 - transfer skills and knowledge
- interpersonal skills to maintain appropriate relationships
- observation skills to monitor individual progress
- literacy skills to:
 - read and interpret organisational documents, legal documents and contracts
 - complete and maintain documentation
- organisational skills to provide guidance and feedback to individuals
- communication skills, including:
 - using effective verbal and non-verbal language
 - using critical listening and questioning techniques
 - giving constructive and supportive feedback
 - assisting learners to paraphrase advice or instructions back to the trainer/facilitator
 - providing clear and concrete options and advice
 - using appropriate industry/profession terminology and language
 - ensuring language, literacy and numeracy used is appropriate to learners

Required knowledge

- systems, processes and practices within the organisation where work-based learning is taking place
- operational demands of the work and impact of changes on work roles
- organisational work culture, including industrial relations environment
- systems for identifying skill needs
- introductory knowledge of different learning styles and how to encourage learning in each, for example:
 - visual learners
 - audio learners
 - kinaesthetic learners
 - theoretical learners
- relevant policy, legislation, codes of practice and national standards that may affect training and assessment in the vocational education and training sector
- OHS relating to the work role, including:
 - hazards relating to the industry and specific workplace
 - reporting requirements for hazards and incidents

REQUIRED SKILLS AND KNOWLEDGE

- specific procedures for work tasks
- safe use and maintenance of relevant equipment
- emergency procedures
- sources of OHS information

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- prepare and facilitate work-based learning
- provide evidence of a minimum of two examples of developing work-based learning pathways, that include:
 - identifying needs for learning
 - analysing work practices, work environment and work activities
 - organising and allocating work in a way that reflects learning needs and provides effective learning opportunities through work processes
- provide a minimum of two examples of a learning facilitation relationship being conducted:
 - with different individuals
 - demonstrating communication skills and flexibility
 - demonstrating one or more of the processes or techniques identified.

Context of and specific resources for assessment

Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.

EVIDENCE GUIDE	
	Assessment must ensure access to information about work activities.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>OHS implications</i> may include:	<ul style="list-style-type: none"> • OHS obligations • workplace OHS policies and procedures • ensuring work practices, routines and proposed changes do not pose a risk to learners and others.
<i>Contractual requirements</i> may include:	<ul style="list-style-type: none"> • training plans under apprenticeships/traineeships • requirements of government-funded training programs, such as Workplace English Language and Literacy (WELL).
<i>Work-based learning pathway</i> may include:	<ul style="list-style-type: none"> • identifying specific goals for work-based learning • identifying job tasks or activities to be included in learning process • appropriate sequencing of job tasks/activities to reflect learner incremental development • direct guidance and modelling from experienced co-workers and experts • opportunities for practice.
<i>Individualised learning plan</i> may include:	<ul style="list-style-type: none"> • information about individual's learning style, learner characteristics, and the context for learning • clear boundaries and expectations of the learning/facilitation relationship • documented equity or additional support needs for the learner

RANGE STATEMENT	
	<ul style="list-style-type: none"> • performance benchmarks to be achieved • activities and processes which together will achieve the benchmarks.
<i>Ethical behaviour</i> includes:	<ul style="list-style-type: none"> • trust • integrity • privacy and confidentiality of the session • following organisational policies • knowing own limitations • having a range of other intervention referrals ready when needed • honesty • fairness to others.
<i>Impact</i> may be:	<ul style="list-style-type: none"> • successful achievement, rate of achievement, or lack of achievement of identified goals • achievement of other outcomes as a result of the relationship • development of new goals • new or increased motivation to learn • greater capacity to learn • increase in learner's self-confidence.
<i>Self-evaluation and reflection</i> may include:	<ul style="list-style-type: none"> • asking critical questions about: <ul style="list-style-type: none"> • own ability • what worked or didn't work • how the relationship building process could be improved • reviewing records and journals on sessions and critically evaluating own performance • reviewing feedback from learner and identifying critical aspects and areas for improvement.

Co-requisite units		

TAEDES401A Design and develop learning programs

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to conceptualise, design, develop and review learning programs to meet an identified need for a group of learners. The unit addresses the skills and knowledge needed to identify the parameters of a learning program, determine the design, outline the content and review its effectiveness.
------------------------	---

Application of the Unit

Application of the unit	This unit typically applies to a trainer or facilitator who designs or develops learning programs. A learning program can be discrete, providing a planned learning approach that relates to specific learning and training needs, or it may form part of the learning design for a qualification.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define parameters of the learning program	1.1. Clarify <i>purpose</i> and type of learning program with key stakeholders 1.2. Access and confirm the competency standards and <i>other training specifications</i> on which to base the learning program 1.3. Identify language, literacy and numeracy requirements of the program 1.4. Identify and consider characteristics of the target learner group
2. Work within the vocational education and training (VET) policy framework	2.1. Access relevant <i>VET policies</i> and frameworks, and apply to work practices 2.2. Identify changes to training packages and accredited courses and apply these to program development 2.3. Conduct work according to organisational quality assurance policies and procedures
3. Develop program content	3.1. Research, develop and document specific subject matter content according to agreed design options 3.2. Evaluate existing learning resources for content relevance and quality 3.3. Specify assessment requirements of the learning program
4. Design structure of the learning program	4.1. Break the learning content into manageable segments and document timeframe for each segment

ELEMENT	PERFORMANCE CRITERIA
	<p>4.2. Determine and confirm <i>delivery strategies</i> and required assessment methods and tools</p> <p>4.3. Document complete learning program in line with organisational requirements</p> <p>4.4. Review complete program with key stakeholders and adjust as required</p> <p>4.5. Ensure a safe learning progression by analysing risks in the learning environment and including a risk control plan</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- organisational skills to ensure resources are available and suitable
- evaluation skills to determine the time required for each learning segment and the overall timelines of the learning program
- cognitive skills to develop the learning program content and design its structure
- language and literacy skills to read and interpret a range of documentation, including technical and subject matter documents, references and texts

Required knowledge

- information about training package developers and course accreditation agencies responsible for specific learning program parameters
- training packages and relevant competency standards to be used as the basis of the learning program
- other performance standards and criteria to be used as the basis of the learning program, where relevant
- distinction and relationship between a training package/accredited course, learning strategy and learning program, where linked
- different purposes and focus of learning programs
- sound knowledge of learning principles
- instructional design principles relating to different design options for learning program design and structure
- availability and types of different relevant learning resources, learning materials and pre-developed learning activities
- methodology relating to developing and documenting new learning activities and

REQUIRED SKILLS AND KNOWLEDGE

related learning materials

- different delivery modes and methods
- relevant policies, legal requirements, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the VET sector
- relevant OHS knowledge relating to the work role, and OHS considerations that need to be included in the learning program

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none"> • design, develop and review learning programs within the VET context • prepare and develop a minimum of two learning programs: <ul style="list-style-type: none"> • that contain differentiated learning program designs to reflect particular needs, contexts and timelines • at least one of which must be based on competency standards or accredited courses and must cover at least one entire unit of competency or accredited course module.
Context of and specific resources for assessment	Evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the

EVIDENCE GUIDE

	IBSA website (www.ibsa.org.au).
--	---------------------------------

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Purpose</i> may include:	<ul style="list-style-type: none"> • developing vocational competency or vocational skills • developing language, literacy and numeracy skills • developing general education • meeting legislative, licensing and registration requirements, such as OHS requirements.
<i>Other training specifications</i> may include:	<ul style="list-style-type: none"> • curriculum specifications • product specifications • organisational work requirements and training needs • induction needs • language, literacy and numeracy development needs • regulatory and licensing requirements.
<i>Vocational education and training policies</i> may include:	<ul style="list-style-type: none"> • policies and procedures set by national organisations, such as the National Quality Council • Australian Quality Training Framework • other relevant policies.
<i>Delivery strategies</i> may include:	<ul style="list-style-type: none"> • focus of delivery in terms of size and type of group • context of delivery, for example: <ul style="list-style-type: none"> • in the workplace • in a training room • in a community setting • mode of delivery, for example: <ul style="list-style-type: none"> • face-to-face • online • blended delivery mode • delivery methods, for example: <ul style="list-style-type: none"> • lock-step, learner-paced and mixed

RANGE STATEMENT

	<ul style="list-style-type: none"> • interactive, participative and collaborative • blended delivery methods.

TAEDES402A Use training packages and accredited courses to meet client needs

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to use training packages and accredited courses as tools to support industry, organisation and individual competency development needs.
------------------------	---

Application of the Unit

Application of the unit	This unit typically applies to a person working in or with training and/or assessment organisations as an entry-level trainer, teacher, facilitator or assessor. It assumes that the person is working from a pre-defined training product, such as a training package or accredited course, and applying that product to meet client needs.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select appropriate training package or accredited course	1.1. Confirm training and/or assessment needs of <i>client</i> 1.2. Identify and source training packages and/or accredited courses which could satisfy client needs 1.3. Use training products in line with the <i>training and assessment organisation's quality assurance policies</i> and procedures
2. Analyse and interpret the qualifications framework	2.1. Read and interpret qualification rules 2.2. Review and determine applicable licensing requirements and prerequisites 2.3. Determine suitable electives that meet client needs and job roles
3. Analyse and interpret units of competency and accredited modules	3.1. Select individual unit or accredited module to meet client needs 3.2. Read, analyse and interpret all parts of the unit or accredited module for application to client needs 3.3. Analyse links between unit and/or accredited module to develop effective applications for the client 3.4. Document analysis of unit or accredited module in a clear and accessible manner
4. Contextualise units and modules for client applications	4.1. Use information from the client to <i>contextualise the unit</i> or accredited module to meet client needs 4.2. Use advice on contextualisation produced by the

ELEMENT	PERFORMANCE CRITERIA
	training package developer or course developer to meet client needs
5. Analyse and interpret assessment guidance	5.1. Read, analyse and apply the assessment guidance of the relevant training package or accredited course 5.2. Determine any special requirements for assessment or reasonable adjustment to suit client needs

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to collaborate with others in using training products
- planning skills to develop a structure for a particular application of training packages and accredited courses
- cognitive skills to analyse, interpret and apply the various components of selected training packages and accredited courses
- research skills to analyse and interpret training package and accredited course content to meet client needs

Required knowledge

- Australian Qualifications Framework (AQF) guidelines, including characteristics of AQF qualification levels
- functions and responsibilities of training package developers and course accreditation agencies, and their roles as key vocational education and training (VET) organisations
- dimensions of competency
- format and structure of accredited courses
- format and structure of competency standards
- function of training packages and accredited curriculum as benchmarks in a competency-based VET training and assessment system
- methodology relating to analysing and using competency standards for a range of applications and purposes to meet the needs of a diverse range of VET clients
- language and terminology used in training packages and accredited courses
- parts of training packages that can be contextualised and parts that cannot
- structure of training packages and the role and purpose of each endorsed component

REQUIRED SKILLS AND KNOWLEDGE

- sources of training package information

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. Arrange of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: <ul style="list-style-type: none"> • analyse a training package and or accredited course to examine its component parts, identify relevant units of competency or modules, and contextualise those to meet a specific client need • demonstrate a minimum of two examples of analysing training specifications, including at least one training package; the other may be another training package or an accredited course that meets a specific client need.
Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided. Assessment must ensure access to: <ul style="list-style-type: none"> • training products, such as training packages and accredited course documentation.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Client</i> may include:	<ul style="list-style-type: none"> individual learners candidates for assessment organisations or enterprises with specific training needs.
<i>Training and assessment organisation</i> may include:	<ul style="list-style-type: none"> registered training organisation (RTO) organisation working in a partnership arrangement with an RTO to provide recognised training and assessment services organisation that provides non-recognised training and assessment services.
<i>Quality assurance policies</i> may include:	<ul style="list-style-type: none"> Australian Quality Training Framework requirements as they apply to RTOs organisational internal quality policies and procedures.
<i>Contextualising units:</i>	<ul style="list-style-type: none"> means linking the requirements of the competency standard to the work environment of a particular client or client group may include: <ul style="list-style-type: none"> identifying specific types of tools and equipment relevant to the competency identifying specific organisational policies, procedures, processes and forms relevant to the competency linking organisation-specific terminology to the competency identifying specific people relevant to the competency.

TLIA2012A Pick and process orders

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to pick and process orders in accordance with workplace requirements including identifying workplace order picking processes, policies and procedures; picking and despatching orders, and recording stock levels. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in accordance with relevant codes/regulations and workplace requirements for the picking and processing of orders.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures to the picking and processing of orders in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify workplace order picking processes, policies and procedures	1.1 Workplace procedures for order picking and related workplace documentation are interpreted 1.2 Stock allocation and location systems are identified and located 1.3 Appropriate manual handling equipment is selected in accordance with OH&S regulations and workplace procedures
2 Pick and despatch an order	2.1 Work requirements are planned with appropriate equipment and documentation assembled 2.2 Zones of the warehouse which store required products are identified and located 2.3 Pick path is established 2.4 Where required, appropriate pallet(s) for orders are selected and stacked to minimise stock damage and maximise stability 2.5 Products are selected and consolidated 2.6 Products/pallets are located in despatch areas 2.7 Products are assembled to meet workplace schedules 2.8 Orders are consolidated, secured, arranged and placed in storage zones in accordance with the schedule
3 Record stock levels	3.1 Storage areas are checked and stocks are noted for replenishment in accordance with workplace procedures 3.2 Workplace records are completed in accordance with workplace requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to the picking and processing of orders, including relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the picking and processing of orders
- Focus of operation of work systems, equipment, management and site operating systems for the picking and processing of orders
- Problems that may occur when picking and processing an order and appropriate action that can be taken to resolve the problems
- Documentation and record requirements when picking and processing an order
- Equipment used during picking and processing operations and the precautions and procedures that should be followed in its use
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when picking and processing orders
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures, signs and labels relevant to the picking and processing of orders
- Complete documentation related to picking and processing orders
- Identify relevant stock and goods coding and labelling, including ADG and IMDG markings
- Work collaboratively with others when picking and processing orders
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions when picking and processing orders in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when picking and processing orders
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when picking and processing orders
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Required skills:

- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use relevant equipment and communications technology when picking and processing orders
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Estimate the size, shape and special requirements of goods/loads

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

- | | |
|---|---|
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | <ul style="list-style-type: none"> • The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying: <ul style="list-style-type: none"> • the underpinning knowledge and skills • relevant legislation and workplace procedures • other relevant aspects of the range statement |

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Plan and organise despatch operations

- 1.1 Knowledge of product characteristics and workplace procedures are applied to the analysis of the stock
- 1.2 Resources including manual handling equipment, employee competencies, storage areas and goods management equipment are identified to match stock characteristics
- 1.3 Deadlines are scheduled to meet order requirements
- 1.4 Work processes are planned to meet deadlines

2 Organise the storage and despatch of stock

- 2.1 Employees, equipment and storage areas are allocated and supervised
- 2.2 Individuals are informed of work requirements and deadlines
- 2.3 Work processes are monitored to ensure that resources, both human and equipment, are maintained at productive levels and in accordance with workplace procedures and OH&S requirements
- 2.4 Discrepancies in stocks are noted and reported in accordance with company procedures

3 Complete documentation

- 3.1 Required despatch documentation and records are completed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to the organising of despatch operations, including the ADG Code and

REQUIRED KNOWLEDGE AND SKILLS

relevant bond, quarantine or other legislative requirements

- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the organising of despatch operations
- Focus of operation of work systems, equipment, management and site operating systems for the organising of despatch operations
- Problems that may occur when organising despatch operations and appropriate action that can be taken to resolve the problems
- Documentation and record requirements for despatch operations
- Equipment used during the organisation of despatch operations and the precautions and procedures that should be followed in its use
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when organising despatch operations
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the organising of despatch operations
- Complete documentation related to the organising of despatch operations
- Identify relevant stock and goods coding and labelling, including ADG and IMDG markings
- Work collaboratively with others when organising despatch operations
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when organising despatch operations in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Select and use relevant equipment and communications technology when organising despatch operations
- Estimate the size, shape and special requirements of goods and loads

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

- Critical aspects for assessment and evidence required to demonstrate competency in this unit**
- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement
- Context of and specific resources for assessment**
- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
 - Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted:
- in a range of work environments
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- limited or restricted spaces
 - exposed conditions
 - controlled or open environments
- Goods to be despatched may involve:
- special handling, location, storage and/or packaging requirements, including temperature controlled goods, dangerous goods or hazardous substances
- Problems that may occur when despatching an order include:
- wrong stock is despatched
 - wrong carton for order
 - incorrect location
 - damaged stock
 - no stock at location
 - incorrect quantity
 - failing to meet a special order requirement
 - failing to meet customers delivery requirements
- Special order requirements may include:
- pricing
 - special packing
 - specific size of carton
 - special categories of stock
- Hazards in the work area may include exposure to:
- chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
 - oil or water on floor
 - a fire or explosion
 - damaged packaging or pallets
 - debris on floor
 - faulty racking
 - poorly stacked pallets
 - faulty equipment
- Communication in the work area may include:

Competency Field A - Handling Cargo/Stock

TLIC2002A Drive light rigid vehicle

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to drive a light rigid vehicle safely including systematic and efficient control of all vehicle functions, monitoring of traffic and road conditions, management of vehicle condition, and performance and effective management of hazardous situations. Assessment of this unit may be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory Road Traffic Authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Driving must be carried out in compliance with the licence requirements and regulations of the relevant state/territory roads and traffic authority pertaining to light rigid vehicles.

Driving is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a commercial light rigid vehicle across a variety of driving contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Drive the light rigid vehicle

- 1.1 The light rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions
- 1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage
- 1.3 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.4 The light rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
- 1.5 The light rigid vehicle is parked, shut down and secured in accordance with manufacturers specifications, traffic regulations and workplace procedures
- 1.6 Appropriate procedures are followed in the event of a driving emergency

2 Monitor traffic and road conditions

- 2.1 The most efficient route of travel is taken through monitoring and anticipation of traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
- 2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and ensure no injury to people or damage to property, equipment, loads and facilities

3 Monitor and maintain vehicle performance

- 3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle
- 3.2 Performance and efficiency of vehicle operation is monitored during use
- 3.3 Defective or irregular performance or malfunctions are reported to the appropriate authority

ELEMENT**PERFORMANCE CRITERIA**

3.4 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Light rigid vehicle controls, instruments and indicators and their use
- Light rigid vehicle handling procedures
- Driving hazards and related defensive driving techniques
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques
- Pre-operational checks carried out on vehicle and related action
- Differences between transmission types
- Map reading and road navigation techniques including the use of a GPS device where applicable
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Workplace driving and operational instructions
- Principles of stress management when driving a vehicle
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents
- Fatigue management strategies including on-road techniques
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a commercial light rigid vehicle
- Read and interpret instructions, procedures, information and signs relevant to the driving of a commercial light rigid vehicle

Required skills:

- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the driving of a commercial light rigid vehicle
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when driving a commercial light rigid vehicle
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when driving a commercial light rigid vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when driving a commercial light rigid vehicle
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor and anticipate traffic hazards and take appropriate action
- Carry out pre-operational checks on the vehicle in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills

EVIDENCE GUIDE

- Context of and specific resources for assessment**
- relevant legislation and workplace procedures
 - other relevant aspects of the range statement
 - Performance is demonstrated consistently over a period of time and in a suitable range of contexts
 - Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Type of vehicle includes:
- all light rigid vehicles including trucks and buses greater than 4.5 tonnes or seating more than 12 adults including the driver
- Driving may be carried out in typical road transport situations, including:
- operations conducted at day or night
 - typical weather conditions
 - on the open road

RANGE STATEMENT

- Vehicle handling procedures may include:
- on a private road
 - while at a depot, base or warehouse
 - while at a client's workplace or work site
 - starting a vehicle
 - steering and manoeuvring a vehicle
 - accelerating and braking
 - positioning and stopping a vehicle
 - reversing a vehicle
 - operating vehicle controls, instruments and indicators
 - using defensive driving techniques
 - managing engine performance
- Pre-operational checks may include:
- visual check of vehicle
 - checking and topping up of fluid levels
 - checks of tyre pressures
 - checks of operation of vehicle lights and indicators
 - checks of brakes
- Minor routine repairs may include:
- replacement of blown globes in vehicle lights
 - replacement of broken fan belt
 - replacement of blown fuse
 - replacement of door mirrors
 - repairs to rear tail-light lens
 - changing of tyres
 - repair of tyre punctures
 - replacement of broken coolant hose
- Driving hazards may include (examples only):
- wet and iced roads
 - oil on road
 - animals and objects on road
 - fire in vehicle
 - leaking fuel
 - faulty brakes
 - parked vehicles on the road
 - faulty steering mechanism on vehicle
 - pedestrians crossing the road
 - flooded sections of road
 - windy sections of road
 - foggy conditions
- Factors that can cause traffic delays and diversions may include (examples only):
- traffic accidents
 - flooded sections of road
 - road damage
 - bridge/tunnel damage

RANGE STATEMENT

- road works
 - building construction
 - emergency situations such as bushfires, building fires, etc.
 - road closures for special events such as marches, parades, etc.
 - holiday traffic
 - road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.
 - company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- Documentation/records may include:
- state/territory light rigid vehicle driving licence requirements
 - state/territory road rules
 - workplace driving instructions and procedures
 - vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle
 - emergency procedures
 - vehicle log book or record book (where required)
- Applicable procedures and codes may include:
- relevant state/territory roads and traffic authority driving regulations and licence requirements pertaining to light rigid vehicles
 - relevant state/territory road rules
 - relevant state/territory permit regulations and requirements
 - relevant state/territory OH&S legislation
 - relevant state/territory fatigue management regulations
 - relevant state/territory environmental protection legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to drive a medium rigid vehicle safely including systematic and efficient control of all vehicle functions, monitoring of traffic and road conditions, management of vehicle condition and performance and effective management of hazardous situations. Assessment of this unit may be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory Road Traffic Authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Driving must be carried out in compliance with the licence requirements and regulations of the relevant state/territory roads and traffic authority pertaining to medium rigid vehicles.

Driving is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a commercial medium rigid vehicle across a variety of driving contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Drive the medium rigid vehicle

- 1.1 The medium rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions
- 1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage
- 1.3 Engine operation is maintained within the manufacturer's specified torque range and temperature through effective transmission use
- 1.4 Braking system of medium rigid vehicle is managed and operated to ensure effective control of the vehicle under all conditions
- 1.5 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.6 The medium rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
- 1.7 The medium rigid vehicle is parked, shut down and secured in accordance with manufacturers specifications, traffic regulations and workplace procedures
- 1.8 Appropriate procedures are followed in the event of a driving emergency

2 Monitor traffic and road conditions

- 2.1 The most efficient route of travel is taken through monitoring and anticipation of traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
- 2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and to ensure no injury to people

ELEMENT	PERFORMANCE CRITERIA
3 Monitor and maintain vehicle performance	or damage to property, equipment, loads and facilities 3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle 3.2 Performance and efficiency of vehicle operation is monitored during use 3.3 Defective or irregular performance or malfunctions are reported to the appropriate authority 3.4 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Medium rigid vehicle controls, instruments and indicators and their use
- Medium rigid vehicle handling procedures
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques
- Workplace driving and operational instructions
- Driving hazards and related defensive driving techniques
- Pre-operational checks carried out on vehicle and related action
- Differences between transmission types
- Principles of operation of air brakes and procedures for their use
- Principles of stress management when driving a vehicle
- Map reading and road navigation techniques including the use of a GPS device where applicable
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents

REQUIRED KNOWLEDGE AND SKILLS

- Fatigue management strategies including on-road techniques
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a medium rigid vehicle
- Read and interpret instructions, procedures, information and signs relevant to work activities
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when driving a medium rigid vehicle
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when driving a medium rigid vehicle in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when driving a medium rigid vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of equipment
- Monitor and anticipate traffic hazards and take appropriate action
- Carry out pre-operational checks on a medium rigid vehicle
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Type of vehicle includes:
- all medium rigid vehicles, for example any 2-axle rigid vehicle, including truck and bus greater than 8 tonnes GVM
- Driving may be carried out in typical road transport situations, including:
- operations conducted at day or night
 - typical weather conditions
 - on the open road
 - on a private road
 - while at a depot, base or warehouse
 - while at a client's workplace or work site
- Vehicle handling procedures may include:
- starting a vehicle
 - steering and manoeuvring a vehicle
 - accelerating and braking
 - positioning and stopping a vehicle
 - reversing a vehicle
 - operating vehicle controls, instruments and indicators
 - using air brakes
 - using defensive driving techniques
 - managing engine performance
- Pre-operational checks may include:
- visual check of vehicle
 - checking and topping up of fluid levels
 - checks of tyre pressures
 - checks of operation of vehicle lights and indicators
 - checks of brakes
- Minor routine repairs may include:
- replacement of blown globes in vehicle lights
 - replacement of broken fan belt
 - replacement of blown fuse
 - replacement of door mirrors
 - repairs to rear tail-light lens
 - changing of tyres
 - repair of tyre punctures
 - replacement of broken coolant hose
- Driving hazards may include (examples only):
- wet and iced roads
 - oil on road
 - animals and objects on road
 - fire in vehicle
 - leaking fuel

RANGE STATEMENT

Factors that can cause traffic delays and diversions may include:

- faulty brakes
- parked vehicles on the road
- faulty steering mechanism on vehicle
- pedestrians crossing the road
- flooded sections of road
- windy sections of road
- foggy conditions
- traffic accidents
- flooded sections of road
- road damage
- bridge/tunnel damage
- road works
- building construction
- emergency situations such as bushfires, building fires, etc.
- road closures for special events such as marches, parades, etc.
- holiday traffic
- road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Documentation/records may include:

- state/territory medium rigid vehicle driving licence requirements
- state/territory road rules
- workplace driving instructions and procedures
- vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle
- emergency procedures
- vehicle log book or record book (where required)

Applicable procedures and codes may include:

- relevant state/territory roads and traffic authority driving regulations and licence requirements pertaining to medium rigid vehicles
- relevant state/territory road rules
- relevant state/territory permit regulations and requirements
- relevant state/territory OH&S legislation
- relevant state/territory fatigue management regulations
- relevant state/territory environmental protection legislation

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Drive the heavy rigid vehicle

- 1.1 The heavy rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions
- 1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
- 1.3 Engine operation is maintained within the manufacturer's specified torque range and temperature through effective gear selection and smooth transition in gear changes
- 1.4 Braking system of heavy rigid vehicle is managed and operated to ensure effective control of the vehicle under all conditions
- 1.5 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.6 The heavy rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning.
- 1.7 The heavy rigid vehicle is parked, shut down and secured in accordance with manufacturers specifications, traffic regulations and workplace procedures
- 1.8 Where required, overwidth and overweight permit applications are undertaken in accordance with relevant regulatory requirements
- 1.9 Appropriate procedures are followed in the event of a driving emergency

2 Monitor traffic and road conditions

- 2.1 The most efficient route of travel is taken through monitoring and anticipation of traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
- 2.2 Traffic and road conditions are constantly monitored and acted

ELEMENT	PERFORMANCE CRITERIA
3 Monitor and maintain vehicle performance	upon to enable safe operation and ensure no injury to people or damage to property, equipment loads and facilities 3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle 3.2 Performance and efficiency of vehicle operation is monitored during use 3.3 Defective or irregular performance or malfunctions are reported to the appropriate authority 3.4 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Heavy rigid vehicle controls, instruments and indicators and their use
- Heavy rigid vehicle handling procedures
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques
- Pre-operational checks carried out on heavy rigid vehicle and related action
- Differences between transmission types
- Principles of operation of air brakes and procedures for their use
- Workplace driving and operational instructions
- Driving hazards and related defensive driving techniques
- Principles of stress management when driving a vehicle
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents
- Fatigue management strategies and on-road techniques

REQUIRED KNOWLEDGE AND SKILLS

- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a commercial heavy rigid vehicle
- Read and interpret instructions, procedures, information and signs relevant to when the driving of a commercial heavy rigid vehicle
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the driving of a commercial heavy rigid vehicle
- Work collaboratively with others when driving a commercial heavy rigid vehicle
- Operate electronic communication equipment to required protocol
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when driving a commercial heavy rigid vehicle in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when driving a commercial heavy rigid vehicle
- Monitor and anticipate traffic hazards and take appropriate action
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of the vehicle and its equipment and take appropriate action where required
- Carry out pre-operational checks in the course of work activities

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

1 Drive the heavy combination vehicle

PERFORMANCE CRITERIA

- 1.1 The heavy combination vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions
- 1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
- 1.3 Engine operation is maintained within the manufacturer's specified torque range and temperature through effective gear selection and smooth transition in gear changes
- 1.4 Braking system of heavy combination vehicle is managed and operated to ensure effective control of the vehicle under all conditions
- 1.5 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.6 The heavy combination vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
- 1.7 The heavy combination vehicle is parked, uncoupled, shut down and secured in accordance with manufacturers specifications, traffic regulations and workplace procedures
- 1.8 Where required, overwidth and overweight permit applications are undertaken in accordance with relevant regulatory requirements
- 1.9 Appropriate signage, lights and the like are checked for

ELEMENT	PERFORMANCE CRITERIA
	operational effectiveness and for conformity to prescribed traffic regulations
	1.10 Appropriate procedures are followed in the event of a driving emergency
2 Monitor traffic and road conditions	2.1 The most efficient route of travel is taken through monitoring and anticipation of traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
	2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and ensure no injury to people or damage to property, equipment loads and facilities
3 Monitor and maintain vehicle performance	3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle
	3.2 Prime mover and trailer are aligned and coupled in accordance with manufacturers instructions and workplace procedures
	3.3 Coupled vehicle is checked and tested to ensure it is correctly secured and to confirm that it is fully operational
	3.4 Performance and efficiency of vehicle operation is monitored during use
	3.5 Defective or irregular performance or malfunctions are reported to the appropriate authority
	3.6 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Heavy combination vehicle controls, instruments and indicators and their use
- Heavy combination vehicle handling procedures
- Workplace driving and operational instructions
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies

REQUIRED KNOWLEDGE AND SKILLS

- Efficient driving techniques
- Pre-operational checks carried out on heavy combination vehicle and related action
- Differences between transmission types
- Principles of operation of air brakes and procedures for their use
- Driving hazards and related defensive driving techniques
- Map reading and navigation of the vehicle and related action
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Principles of stress management when driving a vehicle
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents
- Fatigue management strategies including on-road techniques
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a heavy combination vehicle
- Read and interpret instructions, procedures, information and signs relevant to the driving of a heavy combination vehicle
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the driving of a heavy combination vehicle
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when driving a heavy combination vehicle
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when driving a heavy combination vehicle in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when driving a heavy combination vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor and anticipate traffic hazards and take appropriate action
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Required skills:

- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Apply map reading and road navigation techniques to the operation of a heavy combination vehicle
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of vehicle, its trailers and its equipment and take appropriate action where required
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

EVIDENCE GUIDE

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:

- all heavy combination vehicles that may be driven on public and private roads and work sites

Driving may be carried out in typical road transport situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road
- while at a depot, base or warehouse
- while at a client's workplace or work site

Vehicle handling procedures may include:

- starting a vehicle
- steering and manoeuvring a vehicle
- accelerating and braking
- positioning and stopping a vehicle
- reversing a vehicle
- operating vehicle controls, instruments and indicators
- using air brakes
- using defensive driving techniques
- managing engine performance

Pre-operational checks may include:

- visual check of vehicle
- checking and topping up of fluid levels
- checks of tyre pressures
- checks of operation of vehicle lights and indicators
- checks of brakes

RANGE STATEMENT

- Minor routine repairs may include:
- checks of coupling equipment
 - replacement of blown globes in vehicle lights
 - replacement of broken fan belt
 - replacement of blown fuse
 - replacement of door mirrors
 - repairs to rear tail-light lens
 - changing of tyres
 - repair of tyre punctures
 - replacement of broken coolant hose
- Driving hazards may include (examples only):
- wet and iced roads
 - oil on road
 - animals and objects on road
 - fire in vehicle
 - leaking fuel
 - faulty brakes
 - parked vehicles on the road
 - faulty steering mechanism on vehicle
 - pedestrians crossing the road
 - flooded sections of road
 - windy sections of road
 - foggy conditions
 - work site hazards including power and service lines, buildings, structures, facilities, underground services, uneven or unstable ground and recently filled trenches, stationary and moving machinery and equipment, hazardous or dangerous materials, noise, light, energy sources, and obstructions
- Factors that can cause traffic delays and diversions may include (examples only):
- traffic accidents
 - flooded sections of road
 - road damage
 - bridge/tunnel damage
 - road works
 - building construction
 - emergency situations such as bushfires, building fires, etc.
 - road closures for special events such as marches, parades, sporting events, etc.
 - holiday traffic
 - road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.
- Depending on the type of organisation concerned and the
- company procedures
 - enterprise procedures

RANGE STATEMENT

local terminology used, workplace procedures may include:

- organisational procedures
- established procedures

Documentation/records may include:

- state/territory heavy combination vehicle driving licence/permit requirements
- state/territory road rules
- workplace driving instructions and procedures
- vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle
- emergency procedures
- vehicle log book or record book (where required)

Applicable procedures and codes may include:

- relevant state/territory roads and traffic authority driving regulations and licence requirements pertaining to heavy combination vehicles
- relevant state/territory road rules
- relevant state/territory permit regulations and requirements
- relevant state/territory OH&S legislation
- relevant state/territory fatigue management regulations
- relevant state/territory environmental protection legislation

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to drive a vehicle carrying a special load safely including compliance with road traffic authority and other relevant government regulations and company policies; and effective management of hazardous situations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Driving must be carried out in compliance with the licence and permit requirements and regulations of the relevant state/territory roads and traffic authority as well as the specific regulatory and permit requirements pertaining to the special load being carried.

Driving is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a commercial vehicle carrying a special load across a variety of driving contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Carry out pre-operational checks

- 1.1 The pre-operational checks for the special purpose vehicle and its associated ancillary equipment are carried out in accordance with manufacturers requirements, government regulations and workplace policies and procedures
- 1.2 All faults and defects identified during checks are repaired or reported in accordance with workplace procedures

2 Drive a vehicle carrying special loads

- 2.1 The vehicle is manoeuvred in accordance with the regulations/permit requirements for the class of vehicle involved and the load being carried
- 2.2 Vehicles carrying explosives or dangerous goods are driven along designated routes in accordance with the relevant codes, relevant government regulations and workplace policies
- 2.3 The load is transported and the vehicle manoeuvred in accordance with any required precautions relating to unusual/special characteristics of the load and/or relevant government regulations pertaining to the special load including the Australian Dangerous Goods Code and the Australian Explosives Code
- 2.4 Signs or indicators are fixed to the vehicle if required
- 2.5 Appropriate procedures are followed for the load concerned in the event of a driving emergency

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Where applicable, Australian regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including the Australian Dangerous Goods Code and the Australian Explosives Code
- Relevant OH&S and environmental procedures and regulations
- Vehicle controls, instruments and indicators and their use
- Workplace driving and operational instructions
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques
- Pre-operational checks carried out on vehicle and related action
- Differences between transmission types
- Map reading and road navigation techniques
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Principles of stress management when driving a vehicle
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents
- Fatigue management strategies including on-road techniques
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a vehicle designed to carry special loads
- Read and interpret instructions, procedures, information and signs relevant to the driving of a vehicle designed to carry special loads
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the driving of a vehicle designed to carry special loads
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when driving a vehicle designed to carry special loads
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Required skills:

- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when driving a vehicle designed to carry special loads in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when driving a vehicle designed to carry special loads
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the driving of a vehicle designed to carry special loads
- Monitor and anticipate traffic hazards and take appropriate action
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of vehicle and its equipment and load and take appropriate action if required
- Service vehicle and its equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources

- Performance is demonstrated consistently over a period

EVIDENCE GUIDE

for assessment

of time and in a suitable range of contexts

- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:

- all vehicles designed to carry special loads, for example concrete agitator, livestock transporter, armoured car, tanker, refrigerated vehicle, waste vehicle, fresh produce vehicle, car carrier, container carrier, recovery vehicle

Driving may be carried out in typical road transport situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road
- while at a depot, base or warehouse

RANGE STATEMENT

- Vehicle handling procedures may include:
- while at a client's workplace or work site
 - starting a vehicle
 - steering and manoeuvring a vehicle
 - accelerating and braking
 - positioning and stopping a vehicle
 - reversing a vehicle
 - operating vehicle controls, instruments and indicators
 - using defensive driving techniques
 - managing engine performance
- Pre-operational checks may include:
- visual check of vehicle
 - checking and topping up of fluid levels
 - checks of tyre pressures
 - checks of operation of vehicle lights and indicators
 - checks of brakes
- Minor routine repairs may include:
- replacement of blown globes in vehicle lights
 - replacement of broken fan belt
 - replacement of blown fuse
 - replacement of door mirrors
 - repairs to rear tail-light lens
 - changing of tyres
 - repair of tyre punctures
 - replacement of broken coolant hose
- Designated routes are:
- those that are determined by permit/regulatory requirements for a specific class of load such as explosives or dangerous goods
- Driving hazards may include (examples only):
- wet and iced roads
 - oil on road
 - animals and objects on road
 - fire in vehicle
 - leaking fuel
 - faulty brakes
 - parked vehicles on the road
 - faulty steering mechanism on vehicle
 - pedestrians crossing the road
 - flooded sections of road
 - windy sections of road
 - foggy conditions
- Factors that can cause traffic delays and diversions may include (examples only):
- traffic accidents
 - flooded sections of road
 - road damage

RANGE STATEMENT

- bridge/tunnel damage
 - road works
 - building construction
 - emergency situations such as bushfires, building fires, etc
 - road closures for special events such as marches, parades, etc
 - holiday traffic
 - road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Documentation/records may include:
- state/territory driving licence requirements
 - state/territory road rules
 - workplace driving instructions and procedures for drivers of vehicles carrying the specific load concerned
 - vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle
 - procedures/designated routes prescribed by the relevant authority for vehicles carrying the specific loads concerned
- Applicable procedures and codes may include:
- relevant state/territory roads and traffic authority driving regulations and licence/permit requirements pertaining to the class of vehicle
 - relevant regulations/permit requirements specific to the load being carried
 - Australian regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including the Australian Dangerous Goods Code and the Australian Explosives Code
 - relevant state/territory road rules
 - relevant state/territory OH&S legislation
 - relevant state/territory fatigue management regulations
 - relevant State/Territory environmental protection legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to drive a multi-combination vehicle safely, including systematic and efficient control of all vehicle functions, coupling and uncoupling of dollies, monitoring of traffic and road conditions, management of vehicle condition and performance, and effective management of hazardous situations. Assessment of this unit may be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory Road Traffic Authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Driving must be carried out in compliance with the licence requirements and regulations of the relevant state/territory roads and traffic authority pertaining to multi-combination vehicles.

Driving is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a commercial multi-combination vehicle across a variety of driving contexts.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

1 Drive the multi-combination vehicle

PERFORMANCE CRITERIA

- 1.1 The multi-combination vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions
- 1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage
- 1.3 Braking system of multi-combination vehicle is managed and operated to ensure effective control of the vehicle under all conditions
- 1.4 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.5 The multi-combination vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
- 1.6 The multi-combination vehicle is parked, shut down, uncoupled and secured according to manufacturers specifications, traffic regulations and workplace procedures
- 1.7 Appropriate signage, lights and the like are checked for operational effectiveness and for conformity to prescribed traffic regulations
- 1.8 Appropriate procedures are followed in the event of a driving emergency

2 Monitor traffic and road conditions

- 2.1 The most efficient and permissible route of travel is taken through monitoring and anticipation of traffic flows and

ELEMENT	PERFORMANCE CRITERIA
	conditions, road standards and other factors likely to cause delays or route deviations
	2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities
3 Monitor and maintain vehicle performance	3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle
	3.2 Prime mover, dollies and trailer are aligned and coupled in proper sequence in accordance with manufacturers instructions and workplace procedures
	3.3 Coupled vehicle is checked and tested to ensure it is correctly secured and to confirm that it is fully operational
	3.4 Performance and efficiency of vehicle operation is monitored during use
	3.5 Defective or irregular performance or malfunctions are reported to the appropriate authority
	3.6 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Multi-combination vehicle controls, instruments and indicators and their use
- Multi-combination vehicle handling procedures
- Workplace driving and operational instructions
- Engine power management and safe driving strategies
- Efficient driving techniques
- Pre-operational checks carried out on multi-combination vehicle and related action
- Differences between transmission types
- Principles of operation of air brakes and procedures for their use
- Driving hazards and related defensive driving techniques

REQUIRED KNOWLEDGE AND SKILLS

- Map reading and road navigation techniques
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Principles of stress management when driving a vehicle
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents
- Fatigue management strategies including on-road techniques
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a multi-combination vehicle
- Read and interpret instructions, procedures, information and signs relevant to the driving of a multi-combination vehicle
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the driving of a multi-combination vehicle
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when driving a multi-combination vehicle
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when driving a multi-combination vehicle in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when driving a multi-combination vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the driving of a multi-combination vehicle
- Monitor and anticipate traffic hazards and take appropriate action
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of vehicle, its trailers and its equipment and take appropriate action where required

Required skills:

- Service vehicle and its equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated

EVIDENCE GUIDE

- environment at the registered training organisation, and/or
- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:

- all multi-combination vehicles that may be driven on public and private roads and work sites

Driving may be carried out in typical road transport situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road
- while at a depot, base or warehouse
- while at a client's workplace or work site

Vehicle handling procedures may include:

- starting a vehicle
- steering and manoeuvring a vehicle
- accelerating and braking
- positioning and stopping a vehicle
- reversing a vehicle
- operating vehicle controls, instruments and indicators
- using air brakes
- using defensive driving techniques
- managing engine performance

Pre-operational checks may include:

- visual check of vehicle
- checking and topping up of fluid levels
- checks of tyre pressures
- checks of operation of vehicle lights and indicators
- checks of brakes
- checks of coupling equipment

Minor routine repairs may include:

- replacement of blown globes in vehicle lights
- replacement of broken fan belt
- replacement of blown fuse
- replacement of door mirrors
- repairs to rear tail-light lens

RANGE STATEMENT

Driving hazards may include (examples only):

- changing of tyres
- repair of tyre punctures
- replacement of broken coolant hose
- wet and iced roads
- oil on road
- animals and objects on road
- fire in vehicle
- leaking fuel
- faulty brakes
- parked vehicles on the road
- faulty steering mechanism on vehicle
- pedestrians crossing the road
- flooded sections of road
- windy sections of road
- foggy conditions

Factors that can cause traffic delays and diversions may include (examples only):

- traffic accidents
- flooded sections of road
- road damage
- bridge/tunnel damage
- road works
- building construction
- emergency situations such as bushfires, building fires, etc.
- road closures for special events such as marches, parades, etc.
- holiday traffic
- road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Documentation/records may include:

- state/territory multi-combination vehicle driving licence/permit requirements
- state/territory road rules
- workplace driving instructions and procedures
- vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle
- emergency procedures
- vehicle log book or record book (where required)

RANGE STATEMENT

Applicable procedures and codes may include:

- relevant state/territory roads and traffic authority driving regulations and licence/permit requirements pertaining to multi-combination vehicles
- relevant state/territory road rules
- relevant state/territory OH&S legislation
- relevant state/territory fatigue management regulations
- relevant state/territory environmental protection legislation

TLID1001A Shift materials safely using manual handling methods

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to shift loads using manual handling methods, including assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the manual handling and movement of loads.

Work is performed under some supervision generally within a team environment.

Work involves the application of the basic principles for the safe manual handling techniques and movement of loads when shifting materials using manual handling methods as part of day-to-day work.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Assess risks associated with the relocation of the load

- 1.1 Products, goods or materials to be relocated are identified and assessed for the appropriate method of relocation
- 1.2 Locations for storage are determined and potential routes to be followed are identified
- 1.3 Effect of load relocation on original load base is predicted
- 1.4 Points of balance are estimated
- 1.5 Required clearances are compared to available space and adjustments are made
- 1.6 Effects of moving contents which may be loose, liquid, dangerous or hazardous are considered
- 1.7 Potential risks in route(s) which may be followed are considered
- 1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods
- 1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified
- 1.10 Team lifting processes are considered for application
- 1.11 Appropriate personal protective equipment is worn
- 1.12 Size to weight ratio of items to be manually handled are identified

2 Plan load relocation

- 2.1 Relocation of the load is planned consistent with the code of practice for manual handling
- 2.2 Process for relocating load is proposed including predicting and planning for potential difficulties
- 2.3 Proposed process is checked against code of practice and workplace procedures for compliance

ELEMENT**PERFORMANCE CRITERIA****3 Relocate load**

- 3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and OH&S requirements
- 3.2 Applications appropriate for team relocation of load are identified
- 3.3 Team lifting tasks are coordinated
- 3.4 Planned process and route are followed
- 3.5 Relocated materials are set down without damage to goods, personnel or equipment and checked for stability
- 3.6 Relocation is checked to see that it meets work requirements, with any variance(s) reported

Required Skills and Knowledge**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant OH&S procedures and guidelines concerning the manual lifting and movement of loads
- Risks when manually lifting and handling materials and goods and related precautions to control the risk, including: the load on the spine during lifting; controlled actions on a movement during lifting; rotation and side movement of the spine during lifting; postures and positions during lifting; work layout; the type, weight and position of the load; frequency of shifting operations; distance over which load is to be shifted; and time allowed for the shifting of the load
- Workplace procedures and policies for manual handling
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when manually lifting and handling materials and goods
- Read and interpret instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- Interpret and follow operational instructions and prioritise work
- Work collaboratively with others when manually lifting and handling materials and goods

Required skills:

- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when manually lifting and handling materials and goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected situations that may occur when manually lifting and handling materials and goods
- Apply precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in loads and materials in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - applying the underpinning knowledge and skills
 - interpreting manual handling risks
 - using correct manual handling practices
 - applying relevant legislation and workplace procedures

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts

EVIDENCE GUIDE

- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- As a minimum, assessment of knowledge must be conducted through appropriate assessments using written/practical/oral assessments
- Practical assessment must occur:
 - through activities in an appropriately simulated environment, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The shifting operations may be conducted:

- in a range of work environments
- by day or night

Customers may be:

- internal or external

Workplaces may comprise:

- large, medium or small worksites

Work may be conducted in:

- restricted spaces
- exposed conditions
- controlled or open environments

Materials to be shifted may include:

- goods
- large luggage items
- baggage items

RANGE STATEMENT

- equipment and tools
 - cleaning materials
 - components and parts of vehicles and equipment such as tyres, batteries, lifting gear, etc.
 - materials used in the course of work such as drums of fuel, raw materials, packaging, etc.
- Loads to be shifted may be:
- irregularly shaped
 - packaged or unpackaged
 - labelled or unlabelled
- Hazards in the work area may include exposure to:
- chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
 - weight of items being handled
- Personnel in the work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Communication in the work area may include:
- phone
 - electronic data interchange
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Information/documents may include:
- goods identification numbers and codes
 - manifests, bar codes, goods and container identification
 - manufacturers specifications for equipment/tools
 - workplace procedures and policies
 - supplier and/or client instructions
 - material safety data sheets
 - codes of practice including the National Standards for

RANGE STATEMENT

Applicable regulations and legislation may include:

- Manual Handling and the Industry Safety Code
- relevant legislation, regulations and related documentation
 - award, enterprise bargaining agreement, other industrial arrangements
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
 - relevant state/territory OH&S legislation
 - relevant state/territory environmental protection legislation
 - workplace relations regulations
 - workers compensation regulations
 - licence, patent or copyright arrangements
 - dangerous goods and air freight regulations
 - export/import/quarantine/bond requirements
 - marine orders

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Load and unload goods/cargo

- 1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading procedures
- 1.2 Dangerous or hazardous goods are identified and handled in accordance with the Australian Dangerous Goods (ADG) Code and other relevant regulations/permit requirements
- 1.3 Load is packed/unpacked to make safe and effective use of available spaces
- 1.4 Goods/cargo are loaded in accordance with relevant mass and loading regulations and workplace procedures
- 1.5 Lifting aids and appliances are selected and used to aid loading procedures in compliance with workplace procedures and safety legislation
- 1.6 Unloading activities are conducted in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and the balance of the remaining load
- 1.7 Goods requiring special handling and/or documentation are identified and appropriate procedures followed
- 1.8 Relocated material is restacked appropriate for the transport method, safe height, weight loading, size and crushability of the goods

2 Secure and protect load

- 2.1 The distribution of the load is checked to ensure that it is even, legal and within safe working capacity
- 2.2 Load is checked to ensure that dangerous goods and hazardous substances are appropriately segregated in accordance with the ADG Code
- 2.3 Load is secured using the correct load restraint and protection equipment for different loads, carrying and storage conditions
- 2.4 The load is protected in accordance with legal and workplace safety requirements

3 Complete

- 3.1 The load is inspected and checked for security to travel in

ELEMENT	PERFORMANCE CRITERIA
documentation	accordance with relevant regulations/permit requirements and the ADG Code where applicable 3.2 All required documentation for the goods is completed in accordance with workplace requirements including the ADG Code where applicable

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant Australian standards and regulations including state/territory mass and loading regulations
- National Load Restraint Guide
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- OH&S procedures and guidelines concerning the lifting and movement of loads
- Risks when loading and unloading goods/cargo and related precautions to control the risk
- Security awareness requirements when loading and unloading vehicles and in particular the recognition, isolation and reporting of suspicious cargo and goods
- Workplace procedures and policies for the loading and unloading of goods/cargo
- Housekeeping standards procedures required in the workplace
- Methods of securing a load
- Site layout and obstacles
- Problems that may arise when loading and unloading goods and cargo and actions that should be taken to prevent or solve them

Required skills:

- Communicate effectively with others when loading and unloading goods and cargo
- Read and interpret instructions, procedures, information, signs and labels relevant to the loading and unloading of goods and cargo
- Identify containers and goods coding, ADG and IMDG markings and, where applicable, emergency information panels and take appropriate action
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the loading and unloading of goods and cargo

Required skills:

- Operate electronic communication equipment to required protocol
- Estimate the size, shape and special requirements of loads and take appropriate action
- Work collaboratively with others when loading and unloading goods and cargo
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when loading and unloading goods and cargo in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected situations that may occur when loading and unloading goods and cargo
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the loading and unloading of goods and cargo
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in cargo and equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts

EVIDENCE GUIDE

for assessment

- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|------------------------------|--|
| Operations may be conducted: | <ul style="list-style-type: none"> • in a range of work environments • by day or night |
| Customers may be: | <ul style="list-style-type: none"> • internal or external |
| Workplaces may comprise: | <ul style="list-style-type: none"> • large, medium or small worksites |
| Work may be conducted in: | <ul style="list-style-type: none"> • restricted spaces • exposed conditions • controlled or open environments |
| Goods/cargo to be loaded or | <ul style="list-style-type: none"> • require special precautions |

RANGE STATEMENT

unloaded may:

Loads to be shifted may be:

- irregularly shaped
- packaged or unpackaged
- labelled or unlabelled
- palleted or unpalleted

Hazards in the work area may include exposure to:

- chemicals
- dangerous or hazardous substances
- movements of equipment, goods and materials

Personnel in the work area may include:

- workplace personnel
- site visitors
- contractors
- official representatives

Communication in the work area may include:

- phone
- electronic data interchange
- fax
- email
- internet
- radio
- oral, aural or signed communications

Loading operations may be carried out:

- manually
- with the aid of lifting equipment and/or appliances

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Information/documents may include:

- goods identification numbers and codes, including ADG and IMDG markings and HAZCHEM signs
- manifests, bar codes, goods and container identification
- manufacturers specifications for equipment/tools
- workplace procedures and policies for the loading and unloading of goods/cargo
- ADG Code and associated regulations
- supplier and/or client instructions
- material safety data sheets

RANGE STATEMENT

Applicable regulations and legislation may include

- EPGs and Initial Response Guide (HB76:1998 or equivalent)
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- emergency procedures
- Load Restraint Guide
- relevant Australian standards and regulations including state/territory mass and loading regulations
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian Marine Orders and the International Maritime Dangerous Goods Code
 - IATA Dangerous Goods by Air regulations
 - Australian and International Explosives Codes
- relevant state/territory environmental protection legislation
- relevant state/territory OH&S legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate a forklift, including checking forklift condition, driving the forklift to fulfil operational requirements, monitoring site conditions, and monitoring and maintaining forklift performance. Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory OH&S authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Operation of a forklift must be carried out in compliance with the licence requirements and regulations of the relevant state/territory authority.

Operation of a forklift is performed under some supervision, generally within a team environment. It involves the application of routine equipment operation principles and procedures to maintain the safety and operation of a forklift in a variety of operational contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|--|
| 1 Check forklift condition | <p>1.1 Condition of forklift is checked for compliance with OH&S and workplace requirements for warning devices, manufacturers specifications and the nature of the load shifting task</p> <p>1.2 Attachments are checked to ensure appropriate adjustment and operation</p> <p>1.3 Mirrors and seats are adjusted for safe operation by the driver</p> <p>1.4 Log books are checked and appropriate workplace documentation is completed in accordance with workplace requirements</p> |
| 2 Drive the forklift | <p>2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturers instructions</p> <p>2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage</p> <p>2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques</p> <p>2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning</p> <p>2.5 The forklift is parked, shut down and secured in accordance with manufacturers specifications, regulations and workplace procedures</p> |
| 3 Operate a forklift to handle loads | <p>3.1 The lifting task to be undertaken is appropriately planned and the correct lifting truck and attachments are selected</p> <p>3.2 The load is lifted, carried, lowered and set down in accordance with OH&S legislation, manufacturers specifications and company procedures</p> |

ELEMENT	PERFORMANCE CRITERIA
4 Monitor site conditions	4.1 When selecting the most efficient route, hazards and traffic flow are identified and appropriate adjustments are made 4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs
5 Monitor and maintain forklift performance	5.1 Performance and efficiency of vehicle operation is monitored during use 5.2 Defective/irregular performance and malfunctions reported to relevant personnel 5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant duty of care requirements pertaining to the operation of a forklift
- Relevant OH&S and environmental procedures and regulations
- Workplace operating procedures
- Forklift controls, instruments and indicators and their use
- Forklift handling procedures
- Procedures to be followed in the event of an operational emergency
- Engine power management and safe operating strategies
- Efficient driving techniques
- Operating hazards and related defensive driving and hazard control techniques
- Pre-operational checks carried out on forklift and related action
- Principles of stress management when driving a forklift
- Site layout and obstacles

Required skills:

- Communicate effectively with others when operating a forklift
- Read and interpret instructions, procedures, information and signs relevant to the operation of a forklift

Required skills:

- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the operation of a forklift
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating a forklift
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when operating a forklift
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of a forklift
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Identify points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- Monitor performance of forklift and its equipment and take appropriate action where required
- Ensure that a forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the

EVIDENCE GUIDE

demonstrate competency in this unit

requirements of the elements and performance criteria of this unit and include demonstration of applying:

- the underpinning knowledge and skills
- relevant legislation and workplace procedures
- other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Types of forklift may include:

- counterbalance trucks
- reach trucks
- pallet trucks

RANGE STATEMENT

- Operations may be carried out in typical forklift operational situations, including:
- operations conducted at day or night
 - typical weather conditions
 - on the open road
 - on a private road or worksite
 - while at a workplace
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Loads to be shifted may require:
- special precautions
- Loads to be shifted may be:
- irregularly shaped
 - packaged or unpackaged
 - labelled or unlabelled
 - palleted or unpalleted
 - chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
- Hazards in the work area may include exposure to:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Forklift handling procedures may include:
- starting a forklift
 - steering and manoeuvring a forklift
 - accelerating and braking
 - positioning and stopping a forklift
 - reversing a forklift
 - operating forklift controls, instruments and indicators
 - using defensive driving techniques
 - managing engine performance
- Pre-operational checks may include:
- visual check of forklift
 - checking and topping up of fluid levels
 - checks of tyres
 - checks of operation of forklift lights and indicators
 - checks of brakes
- Hazards may include (examples only):
- wet and iced operating surfaces
 - oil on operating surface

RANGE STATEMENT

- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- faulty brakes
 - workplace obstacles and other operational equipment and vehicles
 - damaged loads and pallets
 - other personnel in work area
 - company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protection equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
- Information/documents may include:
- goods identification numbers and codes, including IMDG markings and HAZCHEM signs
 - manifests, bar codes, picking slips, merchandise transfers, stock requisitions, goods and container identification
 - Australian Standard 2359 - Industrial Truck Code
 - manufacturers specifications for forklift and associated equipment
 - operations and service record book or log
 - workplace procedures and policies for the operation of forklifts
 - supplier and/or client instructions
 - ADG Code and material safety data sheets
 - regulatory requirements concerning the use of forklifts
 - award, enterprise bargaining agreement, other industrial arrangements
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
- Applicable procedures and codes may include:
- relevant state/territory regulations pertaining to the operation of forklifts
 - relevant codes and standards, including Australian Standard 2359 - Industrial Truck Code
 - relevant state/territory OH&S legislation
 - relevant state/territory fatigue management regulations
 - relevant state/territory environmental protection legislation

Competency Field

Competency Field D - Load Handling

TLID2012A Operate specialised load shifting equipment

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate specialised load shifting equipment in accordance with workplace requirements and relevant regulatory requirements, including planning work for the current working conditions; using controls and equipment operating systems to manage movement of the unit and accessory operations; locating load and identifying load characteristics; moving materials and loads; monitoring and operating controls; and stopping, parking and securing equipment after operation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in accordance with codes, regulations, licence and/or permit and workplace requirements relevant to operation of the specialised load shifting equipment concerned.

Safety checks and equipment tests are performed under limited supervision.

Work involves the application of regulatory requirements and workplace procedures to the operation of specialised load shifting equipment in the stevedoring, transport, warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Plan work for the current working conditions

- 1.1 Traffic flow and work area conditions are constantly assessed and anticipated to allow safe operation to ensure no injury to people, or damage to equipment, loads or facilities
- 1.2 Characteristics of the load are taken into account to ensure that, where applicable, appropriate attachments are used to transport the load
- 1.3 Any occurrences in the work area that may affect the safety and efficiency of operations are reported to the appropriate personnel

2 Use controls and equipment operating systems to manage movement of the unit and accessory operations

- 2.1 Equipment is prepared and any appropriate attachment fitted
- 2.2 Gear and operational levers are checked to ensure that they are in the neutral position prior to inserting ignition key and starting engine
- 2.3 Engine is started in accordance with manufacturers guidelines to bring the engine to speed
- 2.4 Instruments and gauges are monitored during start-up and operations to ensure that operation is within manufacturers specifications and enterprise safety requirements
- 2.5 Engine power is managed for efficiency of equipment movement and economy of equipment operations
- 2.6 Equipment operations are conducted within the manufacturer's specified torque range
- 2.7 Any faults or damage to equipment are immediately reported to the appropriate personnel

ELEMENT	PERFORMANCE CRITERIA
3 Locate load and identify load characteristics	3.1 Load is located and identified according to instructions 3.2 Loading and unloading plans are followed to ensure efficiency and safety of operations 3.3 Characteristics of the load are taken into account to ensure that appropriate loading and unloading procedures are followed 3.4 Hazardous goods are identified and relevant procedures are taken into account when planning and conducting the work 3.5 Load weight and dimensions are within the capacity of the equipment
4 Move materials and loads	4.1 Equipment is manoeuvred and positioned using smooth and controlled movements 4.2 Manoeuvres are within the limits of the equipment and in line with manufacturers specifications 4.3 Materials are moved ensuring no injury to personnel or damage to equipment or goods
5 Monitor and operate controls	5.1 Equipment controls are monitored and operated in accordance with manufacturers operating instructions 5.2 Control systems are understood and acted upon in accordance with statutory authority regulations, manufacturers guidelines and site operating procedures 5.3 Control faults are identified and reported in accordance with manufacturers instructions and workplace guidelines
6 Stop, park and secure equipment	6.1 Equipment is brought to a controlled halt within manufacturers guidelines 6.2 Equipment is parked without injury to personnel or damage to equipment, loads or facilities in accordance with company procedures 6.3 Equipment is secured on a flat, even surface and not close to doorways, aisles, access-ways or blind corners and in accordance with securing procedures for the appropriate equipment

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

REQUIRED KNOWLEDGE AND SKILLS

- Regulations relevant to the operation of specialised load shifting equipment, including, where relevant, the ADG Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the operation of the specialised load shifting equipment
- Focus of operation of work systems, equipment, management and site operating systems for the operation of the specialised load shifting equipment
- The purpose, characteristics, capabilities, requirements and limitations of the specialised load shifting equipment
- Conveyed materials' potential for toxicity, reactivity, material grade, type and purpose including information from relevant material safety data sheets and ADG Code documentation (where applicable)
- Problems that may occur when operating specialised load shifting equipment and appropriate action that can be taken to resolve the problems
- Operational safety requirements and precautions for the specialised load shifting equipment concerned
- Documentation and record requirements
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles
- Relevant permit and licence requirements

Required skills:

- Communicate effectively with others when operating specialised load shifting equipment
- Read and interpret instructions, procedures, information and signs relevant to work activities
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the operation of specialised load shifting equipment
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating specialised load shifting equipment
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when operating specialised load shifting equipment in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when operating specialised load shifting equipment
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of specialised load shifting equipment
- Plan own work including predicting consequences and identifying improvements
- Monitor work activities in terms of planned schedule

Required skills:

- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use relevant gear and accessories when operating specialised load shifting equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of specialised load shifting equipment and take appropriate action where required
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace

EVIDENCE GUIDE

- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted:
- in a range of work environments
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- limited or restricted spaces
 - holds on ships
 - exposed conditions
 - controlled or open environments
 - even or uneven surfaces
 - wet or dry surfaces
- Equipment may include:
- reach stackers
 - straddle trucks
 - excavators
 - front-end loaders (over 10 tonne)

RANGE STATEMENT

- Requirements for work may include:
- bulldozers (both in transport and shipping terminals and in the holds of ships)
 - straddle carriers
 - site restrictions and procedures
 - use of safety and personal protective equipment
 - communications equipment
 - specialised lifting and/or handling equipment
 - additional gear and equipment
 - noise restrictions
 - hours of operations
 - authorities and permits
- Hazards in the work area may include exposure to:
- chemicals and fumes
 - dangerous or hazardous substances
 - stationary and moving machinery, goods, materials and vehicular traffic
 - contamination of, or from, materials being handled
 - service lines
 - spills, leakages and ruptures
 - dust/vapours
 - faulty gear/equipment/tools
- Consultative processes may involve:
- workplace personnel including supervisors and managers
 - equipment manufacturers and suppliers
 - site visitors and contractors
 - union representatives, industrial relations and OH&S specialists
 - other professional or technical staff
- Communication in the work area may include:
- phone
 - fax
 - email
 - internet
 - electronic data interchange (EDI)
 - RF communications
 - bar code readers
 - oral, aural or signed communications
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - respirators and fume masks
 - protective clothing

RANGE STATEMENT

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

Information/documents may include:

Applicable regulations and legislation may include:

- high visibility clothing
- company procedures
- enterprise procedures
- organisational procedures
- established procedures
- workplace procedures and policies for the operation of the specialised load shifting equipment concerned
- goods identification numbers and codes
- manifests, picking slips, merchandise transfers, stock requisitions and bar codes
- manufacturers specifications for equipment/tools
- equipment identification labels, bar codes and serial numbers
- supplier and/or client instructions
- relevant OH&S requirements and policies
- relevant Australian standards and certification requirements
- material safety data sheets where applicable
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- relevant legislation, regulations and related documentation including the ADG Code
- award, enterprise bargaining agreement and other industrial arrangements
- quality assurance procedures
- emergency procedures
- relevant codes, regulations and licence/permit requirements pertaining to the operation of the specialised load shifting equipment concerned including the ADG Code (where applicable)
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- relevant Australian standards and certification requirements
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- workplace relations regulations including equal opportunity, equal employment opportunity and affirmative action legislation
- workers compensation regulations

Unit Sector(s)

Competency Field

Competency Field D - Load Handling

TLID2013A Move materials mechanically using automated equipment

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to move materials mechanically using automated equipment such as automatic guided vehicles, tow motors, high level order pickers, conveyor systems, and mechanised pallet movers. This includes selecting appropriate mechanical moving equipment (where relevant), moving materials/goods in accordance with operational requirements, checking condition of materials/goods and completing all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the movement of materials mechanically using automated equipment.

Work is performed under limited or minimum supervision. It involves the application of the basic principles and routine procedures for the safe movement of materials mechanically using automated equipment.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Select load moving equipment

1.1 The mechanised handling equipment, the route to be taken and procedures to be used are selected appropriate to the characteristics of the goods

1.2 Dangerous goods and hazardous materials are identified and handled in accordance with codes of practice, OH&S requirements and workplace procedures

2 Move goods

2.1 Goods are moved using the selected materials handling equipment in accordance with occupational health and safety regulations, manufacturers instructions and company procedures

2.2 Problems in the movement of goods and materials using the automated equipment are identified and are reported in accordance with workplace procedures

3 Check goods and complete documentation

3.1 Moved goods are inspected for possible damage during transit/movement and appropriate action is taken

3.2 All required documentation is completed for the tracking of the moved goods in accordance with company requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

REQUIRED KNOWLEDGE AND SKILLS

Required knowledge:

- Regulations relevant to the use of automated equipment to move materials mechanically
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the use of automated equipment to move materials mechanically
- Focus of operation of work systems, equipment, management and site operating systems for the use of automated equipment to move materials mechanically
- The purpose, characteristics, capabilities, requirements and limitations of the automated materials moving equipment
- Problems that may occur during the use of automated equipment to move materials mechanically and appropriate action that can be taken to resolve the problems
- Risks when using automated equipment to move materials and related precautions to control the risks
- Documentation and record requirements
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when using automated equipment to move materials mechanically
- Read and interpret instructions, procedures, information and signs relevant to the use of automated equipment to move materials mechanically
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the use of automated equipment to move materials mechanically
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when using automated equipment to move materials mechanically
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when using automated equipment to move materials mechanically in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule

Required skills:

- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of automated equipment and take appropriate action where required
- Ensure servicing of automated equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids (where applicable) and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment,

EVIDENCE GUIDE

- and
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- The operations may be conducted:
- in a range of work environments
 - by day or night
 - in a range of typical weather conditions
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Mechanised equipment may include a range of goods and materials handling equipment such as:
- automatic guided vehicle
 - tow motors
 - high level order picker
 - conveyor system
 - mechanised pallet mover
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios

RANGE STATEMENT

- Hazards in the work area may include exposure to:
- high visibility clothing
 - chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
 - moving and rotating equipment and vehicles
- Personnel in the work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Communication in the work area may include:
- phone
 - electronic data interchange
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Information/documents may include:
- goods identification numbers and codes
 - manifests, bar codes, goods and container identification
 - manufacturers instructions concerning the use and servicing of automated mechanical equipment
 - workplace procedures and policies
 - supplier and/or client instructions
 - material safety data sheets
 - codes of practice including the National Standards for Manual Handling and the Industry Safety Code
 - relevant legislation, regulations and related documentation
 - award, enterprise bargaining agreement, other industrial arrangements
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
- Applicable regulations and legislation may include:
- relevant state/territory OH&S legislation
 - relevant state/territory environmental protection legislation
 - workplace relations regulations
 - workers compensation regulations
 - ADG Code and regulations

TLID2047A Prepare cargo for transfer with slings

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to prepare cargo for transfer with slings in accordance with workplace requirements and relevant regulatory requirements, including preparing for transfer of cargo, calculating Safe Working Load (SWL) or Working Load Limit (WLL) of slings and loads, slinging cargo and unslinging cargo, and strapping and unstrapping goods. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in accordance with codes/regulations and workplace requirements relevant to the preparation of cargo for transfer with slings.

Safety checks and equipment tests are performed under limited supervision.

Work involves the application of regulatory requirements and workplace procedures to the preparation of cargo for transfer with slings in the stevedoring, transport, warehousing, distribution and/or storage industries.

|--|---|
| 1 Prepare for transfer of cargo | <ul style="list-style-type: none"> 1.1 Working area is prepared and maintained in accordance with national standards and safety codes and site operating procedures 1.2 Unsafe work practices and/or faulty equipment is reported in accordance with enterprise procedures 1.3 Correct protective equipment is identified and worn |
| 2 Calculate Safe Working Load or Working Load Limit of slings and loads | <ul style="list-style-type: none"> 2.1 Safe Working Load (SWL) or Working Load Limit (WLL) is calculated using standardised formulae for different types of lifting cables 2.2 Lifting equipment is checked to determine the safe working load 2.3 Slinging gear is checked for conformity with safety equipment |
| 3 Sling cargo and unslung cargo | <ul style="list-style-type: none"> 3.1 Cargo is slung/unslung in accordance with national standards, safety codes and site operating procedures 3.2 Correct securing devices are identified and used 3.3 Load is steadied by tag lines as required 3.4 Damaged cargo is identified and reported in accordance with enterprise procedures 3.5 Slinging attachments are released from load ensuring no injury to personnel or damage to machinery or cargo |
| 4 Strap and unstrap goods | <ul style="list-style-type: none"> 4.1 Cargo is strapped and unstrapped in accordance with national standards, safety codes and site operating procedures 4.2 Mechanical strapping equipment is used in accordance with manufacturers instructions 4.3 Damaged cargo is identified and reported in accordance with |

ELEMENT**PERFORMANCE CRITERIA**

- enterprise reporting procedures
- 4.4 Strapping arrangements are secured/released to/from load ensuring no injury to personnel or damage to machinery or cargo

Required Skills and Knowledge**REQUIRED KNOWLEDGE AND SKILLS**

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations relevant to the transfer of cargo with slings, including, where relevant, the Australian Dangerous Goods Code and relevant bond, quarantine or other legislative requirements
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the transfer of cargo with slings
- Focus of operation of work systems, equipment, management and site operating procedures for the transfer of cargo with slings
- Cargos potential for toxicity, reactivity, material grade, type and purpose including information from relevant material safety data sheets and Australian Dangerous Goods Code documentation (where applicable)
- Gear and equipment used during the transfer of cargo with slings and the precautions and procedures that should be followed in their use
- Problems that may occur when preparing cargo for transfer with slings and appropriate action that can be taken to resolve the problems
- Documentation and record requirements
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when preparing cargo for transfer with slings
- Read and interpret instructions, procedures, information and signs relevant to the preparation of cargo for transfer with slings
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the preparation of cargo for transfer with slings
- Operate electronic communication equipment to required protocol

Required skills:

- Work collaboratively with others when preparing cargo for transfer with slings
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when preparing cargo for transfer with slings in accordance with regulatory requirements and workplace procedures
- Plan own work including predicting consequences and identifying improvements
- Implement contingency plans for unanticipated situations that may arise when preparing cargo for transfer with slings
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the preparation of cargo for transfer with slings
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and use relevant gear and equipment when preparing cargo for transfer with slings
- Use balance points and estimate weights in setting up loads to be shifted
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts

EVIDENCE GUIDE

for assessment

- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|---------------------------|--|
| Work may be conducted: | <ul style="list-style-type: none"> • in a range of work environments • by day or night |
| Customers may be: | <ul style="list-style-type: none"> • internal or external |
| Workplaces may comprise: | <ul style="list-style-type: none"> • large, medium or small worksites |
| Work may be conducted in: | <ul style="list-style-type: none"> • limited or restricted spaces • exposed conditions • controlled or open environments • even or uneven surfaces |

RANGE STATEMENT

- Slinging gear may include:
- wet or dry surfaces
 - fibre ropes
 - wire ropes
 - chains
 - webbing slings
- Hazards in the work area may include exposure to:
- chemicals and fumes
 - dangerous or hazardous substances
 - stationary and moving machinery, goods, materials and vehicular traffic
 - contamination of, or from, materials being handled
 - service lines
 - spills, leakages and ruptures
 - dust/vapours
 - faulty gear/equipment/tools
- Requirements for work may include:
- site restrictions and procedures
 - use of safety and personal protective equipment
 - communications equipment
 - specialised lifting and/or handling equipment
 - additional gear and equipment
 - noise restrictions
 - hours of operations
 - authorities and permits
- Consultative processes may involve:
- workplace personnel including supervisors and managers
 - equipment manufacturers and suppliers
 - site visitors and contractors
 - union representatives, industrial relations and OH&S specialists
 - other professional or technical staff
- Communication in the work area may include:
- phone
 - fax
 - email
 - internet
 - RF communications
 - bar code readers
 - oral, aural or signed communications
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - respirators and fume masks

RANGE STATEMENT

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- protective clothing
- high visibility clothing
- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:

- workplace procedures and policies for the preparation of cargo for transfer with slings
- goods identification numbers and codes
- manifests, bar codes, goods and container identification/serial number
- manufacturers specifications
- equipment identification labels, bar codes and serial numbers
- supplier and/or client instructions
- relevant OH&S requirements and policies
- relevant Australian standards and certification requirements including Australian Standard on wire rope, chain and webbing slings
- material safety data sheets where applicable
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- relevant legislation, regulations and related documentation including the ADG Code (where applicable)
- award, enterprise bargaining agreement and other industrial arrangements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- relevant codes and regulations pertaining to the transfer of cargo with slings
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- relevant Australian standards and certification requirements, including Australian Standard 2359 - Industrial Truck Code
- licence, patent or copyright arrangements
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- workplace relations regulations including equal opportunity, equal employment opportunity and affirmative action legislation
- workers compensation regulations

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate a forklift with specialised attachments or all-terrain equipment, including checking attachments and worksite for suitability, selecting the type of forklift and accessories for required load shifting tasks, and shifting load and completing work in accordance with operational requirements. Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory OH&S authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Specialised operation of a forklift must be carried out in compliance with the licence requirements and regulations of the relevant state/territory authority.

Specialised operation of a forklift is performed under some supervision, generally within a team environment. It involves the application of equipment operation principles and procedures to maintain the safety and specialised operation of a forklift in a wide variety of operational contexts.

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant duty of care requirements pertaining to the specialised operation of a forklift
- Relevant OH&S and environmental procedures and regulations
- Workplace operating procedures
- Forklift controls, instruments and indicators and their use
- Types of forklift accessories and ancillary equipment, their purposes and procedures for their use
- Handling procedures for forklifts involved in specialised operations
- Procedures to be followed in the event of an operational emergency
- Operating hazards and related defensive driving and hazard control techniques
- Engine power management and safe operating strategies
- Efficient driving techniques
- Pre-operational checks carried out on forklift and accessories and related action
- Site layout and obstacles
- Principles of stress management when driving a forklift

Required skills:

- Communicate effectively with others when conducting specialised forklift operations
- Read and interpret instructions, procedures, information and signs relevant to specialised forklift operations
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to specialised forklift operations
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when conducting specialised forklift operations
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when conducting specialised forklift operations in accordance with regulatory requirements

Required skills:

and workplace procedures

- Implement contingency plans for unexpected events that may occur when conducting specialised forklift operations
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during specialised forklift operations
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Identify points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- Monitor performance of equipment
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:

EVIDENCE GUIDE

- a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
- access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Types of forklift may include:

- counterbalance trucks
- reach trucks
- pallet trucks
- container-handling heavy forklifts
- vacuum
- top frame

Specialised forklift operations may be carried out in typical forklift operational situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road or worksite
- while at a workplace

RANGE STATEMENT

- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Specialised forklift may be used to assist in a range of workplace tasks, including:
- stock/goods/container handling
 - loading and unloading vehicles
 - stacking stock and goods
 - lifting and moving equipment
 - transporting materials and goods in a workplace
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Loads to be shifted may require:
- special precautions
- Specialised forklift operations may involve the use of a range of attachments and accessories, including:
- spikes
 - drum carriers
 - bale carriers
 - tines
 - personnel carriers
 - high reaching
 - pantograph
 - jibs
 - paper clamps
 - hooks
 - side lifters
- Loads to be shifted may be:
- irregularly shaped
 - packaged or unpackaged
 - labelled or unlabelled
 - palletted or unpalletted
 - containerised
- Personnel in the work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Forklift operational procedures may include:
- starting a forklift (including pre-start checks)
 - steering and manoeuvring a forklift
 - accelerating and braking
 - positioning and stopping a forklift
 - reversing a forklift
 - operating forklift controls, instruments and indicators
 - using defensive driving techniques

RANGE STATEMENT

Pre-operational checks may include but are not limited to:

- managing engine performance
- visual checking of forklift and its associated accessories and equipment
- checking and topping up of fluid levels
- checks of tyres
- checks of operation of forklift lights and indicators
- checks of brakes

Post-operational checks may include but are not limited to:

- parking in a safe place
- shutting down forklift
- lowering all equipment
- visually checking for faults or damage

Hazards may include (examples only):

- wet and iced operating surfaces
- oil on operating surface
- faulty brakes
- workplace obstacles and other operational equipment and vehicles
- damaged loads and pallets
- other personnel in work area

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Information/documents may include:

- goods identification numbers and codes, including IMDG markings and HAZCHEM signs
- manifests, bar codes, picking slips, merchandise transfers, stock requisitions, goods and container identification
- Australian Standard 2359 - Industrial Truck Code
- manufacturers specifications for forklift and associated accessories and equipment
- operations and service record book or log
- workplace procedures and policies for the operation of forklifts
- supplier and/or client instructions
- material safety data sheets
- regulatory requirements concerning the use of forklifts

RANGE STATEMENT

Applicable procedures and codes may include:

- award, enterprise bargaining agreement, other industrial arrangements
- standards and certification requirements
- quality assurance procedures
- emergency procedures
- relevant state/territory regulations pertaining to the operation of forklifts
- relevant codes and standards, including Australian Standard 2359 - Industrial Truck Code
- relevant state/territory OH&S legislation
- relevant state/territory fatigue management regulations
- relevant state/territory environmental protection legislation

Unit Sector(s)

Competency Field

Competency Field D - Load Handling

TLID3014A Load and unload vehicles carrying special loads

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to load and unload vehicles carrying special loads. It includes loading and unloading the special load onto and from the vehicle, securing and protecting the vehicle and the load, and completing all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the licence and permit requirements and regulations of the relevant state/territory roads and traffic authority as well as the specific code, regulatory and permit requirements pertaining to the special load being carried.

Work is performed under some supervision generally within a team environment. It involves the application of the basic principles, routine procedures and regulatory requirements to the loading and unloading of vehicles designed to carry special loads.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Load and unload vehicle

- 1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading procedures
- 1.2 Hazardous cargo is identified and handled in accordance with required procedures for hazardous and dangerous cargo
- 1.3 Vehicle is loaded demonstrating compliance with vehicle loading regulations and workplace safety requirements
- 1.4 Lifting aids and appliances are selected and used to aid loading procedures in compliance with workplace procedures and safety legislation
- 1.5 Vehicle is unloaded or partially unloaded in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and the balance of the remaining load
- 1.6 Ancillary equipment is operated in accordance with company procedures and manufacturers instructions during loading and unloading operations

2 Secure and protect vehicle and load

- 2.1 The vehicle load is secured using the correct load restraint and protection equipment for different loads, vehicles and carriage conditions
- 2.2 The load is protected in accordance with legal and workplace safety requirements
- 2.3 The distribution of the load is checked to ensure that it is even, legal and within the safe working capacity of the vehicle

3 Complete documentation

- 3.1 The loaded vehicle is inspected and checked for security to travel
- 3.2 All required transportation documentation for the cargo is completed in accordance with workplace requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant state/territory mass and loading regulations and regulations pertaining to the various types of special loads, including Australian Dangerous Goods (ADG) and Australian Explosives Code, where applicable
- OH&S procedures and guidelines concerning the lifting and movement of loads
- Characteristics of various types of special loads
- Risks and hazards when loading and unloading various types of special loads, and related precautions to control the risk
- Workplace procedures and policies for the loading and unloading of vehicles designed to carry special loads
- Containers and goods coding, IMDG markings and, where applicable, emergency information panels, including their meaning and implications for loading and unloading processes
- Housekeeping standards procedures required in the workplace
- Methods of securing various types of special loads
- Site layout and obstacles

Required skills:

- Communicate effectively with others when loading and unloading special loads from vehicles
- Read and interpret instructions, procedures, information and signs relevant to the loading and unloading of special loads from vehicles
- Identify and interpret containers and goods coding, IMDG markings and, where applicable, emergency information panels
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the loading and unloading of special loads from vehicles
- Operate electronic communication equipment to required protocol
- Estimate the size, shape and special requirements of loads
- Work collaboratively with others when loading and unloading special loads from vehicles
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when loading and unloading special loads from vehicles in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when loading and unloading special loads from vehicles

Required skills:

- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the loading and unloading of special loads from vehicles
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Identify and correctly use equipment required to load and unload the various types of special loads
- Safely use manual handling techniques to operate manually

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - applying the underpinning knowledge and skills
 - demonstrating the safe loading and unloading of a load
 - applying techniques for the security of loads
 - applying relevant legislation and workplace procedures

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment,

EVIDENCE GUIDE

and/or

- access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- As a minimum, assessment of knowledge must be conducted through appropriate assessments using written/practical/oral assessments
- Practical assessment must occur:
 - through activities in an appropriately simulated environment, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle may include all vehicles designed to carry special loads, for example:

- concrete agitator
- livestock transporter
- armoured car
- tanker
- refrigerated vehicle
- waste vehicle
- fresh produce vehicle
- car carrier
- container carrier
- recovery vehicle
- vehicle carrying dangerous goods or explosives
- vehicle carry over dimensional load

Loading and unloading operations may be conducted:

- in a range of work environments and weather conditions
- by day or night

RANGE STATEMENT

- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Loads to be shifted may be:
- irregularly shaped
 - packaged or unpackaged
 - labelled or unlabelled
 - palleted or unpalleted
 - liquid loads
 - motor vehicles
 - motor bikes
- Hazards in the work area may include exposure to:
- chemicals
 - dangerous or hazardous substances
 - movements of equipment, goods and materials
- Personnel in the work area may include:
- workplace personnel
 - site visitors
 - contractors
 - official representatives
- Communication in the work area may include:
- phone
 - electronic data interchange (EDI)
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Loading operations may be carried out:
- manually
 - with the aid of lifting equipment and/or appliances
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing

RANGE STATEMENT

Information/documents may include:

- goods identification numbers and codes, including ADG and IMDG markings and HAZCHEM signs
- manifests, bar codes, goods and container identification
- manufacturers specifications for equipment/tools
- workplace procedures and policies
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- supplier and/or client instructions
- material safety data sheets
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- National Load Restraint Guide
- Australian Truck Drivers Manual
- award, enterprise bargaining agreement, other industrial arrangements
- relevant standards and certification requirements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- state/territory mass and loading regulations
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian Marine Orders and the International Maritime Dangerous Goods Code
 - IATA Dangerous Goods by Air regulations
 - Australian and International Explosives Codes
 - Code of Practice for the Safe Transport of Radioactive Substances
 - state/territory legislation covering the safe handling of infectious substances
- relevant state/territory environmental protection legislation
- relevant state/territory OH&S legislation

TLID3033A Operate a vehicle-mounted loading crane

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate a vehicle-mounted loading crane to shift loads, including positioning and stabilising the crane, operating the vehicle-mounted crane, monitoring lift conditions, packing up the crane after operations, and completing all required job records. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the licence/permit requirements and regulations of the relevant state/territory authorities pertaining to vehicle-mounted loading cranes.

Work is performed under general supervision. It involves the application of routine principles and procedures to the operation of a vehicle-mounted loading crane in a variety of operational contexts.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Position and stabilise crane

- 1.1 Crane is driven to position as per job plan to ensure safe operation in accordance with applicable Australian standards, codes of practice, manufacturers specifications and, where applicable, regulatory and local government requirements
- 1.2 Where appropriate, barriers, fencing, temporary boundaries, signage and the like are used to isolate working area in accordance with safe working practice and lift requirements
- 1.3 Ground is checked to ensure it is firm enough to bear the load
- 1.4 Appropriate plates or packing are correctly used to adequately distribute the load
- 1.5 Any outriggers and stabilisers are correctly deployed and positioned in accordance with manufacturers instructions and the appropriate Australian standard and other relevant statutory regulations or local authority requirements
- 1.6 Outrigger packing is checked for adequacy prior to and after load is taken

2 Operate vehicle-mounted crane

- 2.1 Planned hazard control strategies are implemented
- 2.2 Required signals are correctly given, interpreted and followed in accordance with appropriate Australian standards
- 2.3 Load mass is assessed and correlated with lifting capacity of crane throughout proposed radii of operation
- 2.4 Appropriate lifting gear is selected and load secured
- 2.5 Load is hoisted and lowered into position using crane movements in accordance with the appropriate Australian standard
- 2.6 Crane controls are operated smoothly
- 2.7 Crane is shut down and secured during periods of non-operation according to manufacturers specifications and workplace procedures

ELEMENT	PERFORMANCE CRITERIA
3 Monitor lift conditions	<ul style="list-style-type: none">3.1 Load is constantly monitored to ensure load and structural stability3.2 Conditions which may affect the continuing stability of the crane are identified and monitored3.3 Unplanned situations are responded to in line with workplace procedures in a manner that minimises risk to personnel and equipment3.4 Advice is sought from supervisor where there is doubt about correct response to unanticipated conditions, or conflict with customer request3.5 Supervisor/allocator is advised of any concern about completing the job within timeframe3.6 Shut-down procedures are implemented in accordance with manufacturers instructions in the event of an emergency3.7 The relevant motion locks and brakes are applied3.8 Crane is shut down using the correct sequence of procedures in accordance with manufacturers specifications and workplace procedures3.9 Routine post-operational equipment checks are carried out in accordance with manufacturers specifications
4 Pack up crane	<ul style="list-style-type: none">4.1 All lifting equipment and crane components are checked for any signs of deterioration or damage in accordance with the appropriate Australian standard4.2 Damaged or worn equipment is segregated and reported to an authorised person for testing/repair/destruction4.3 Crane equipment is correctly stowed and secured in accordance with manufacturers instructions and the appropriate Australian standard4.4 Crane is immobilised and secured for travel in accordance with manufacturers instructions, workplace guidelines and regulatory requirements
5 Complete job records	<ul style="list-style-type: none">5.1 Customer feedback is sought regarding satisfaction with the completed job and any areas of concern reported according to workplace procedures5.2 Customer's signature on job completion documentation is obtained5.3 Required workplace records are updated accurately and promptly and processed according to workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements pertaining to mobile crane operation
- Relevant OH&S and environmental procedures and regulations
- Mobile crane applications, capacities, configurations, safety hazards and control mechanisms
- Operational procedures for crane crews
- Prioritising and multi-tasking work
- Company work procedures concerning the setting up and rigging of a mobile crane at a work site
- Problems that may arise when operating a vehicle-mounted loading crane and actions that should be taken to prevent or solve them
- Focus of operation of work systems and equipment
- Application of relevant agreements, codes of practice or other legislative requirements

Required skills:

- Communicate effectively with others when operating a vehicle-mounted loading crane
- Read and interpret instructions, procedures, information and signs relevant to the operation of a vehicle-mounted loading crane
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the operation of a vehicle-mounted loading crane
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating a vehicle-mounted loading crane
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when operating a vehicle-mounted loading crane in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unanticipated situations that may arise when operating a vehicle-mounted loading crane
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of a vehicle-mounted loading crane
- Plan own work including predicting consequences and identifying improvements
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and

Required skills:

environments

- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of crane and its equipment and take appropriate action where required
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and

EVIDENCE GUIDE

- Method of assessment**
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
 - Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Operations may be conducted:
- day or night
 - in a variety of weather conditions
- Environment may include movement of:
- equipment
 - goods
 - materials
 - vehicular traffic
- Customers may be:
- internal or external
- Mobile crane may be involved in work in a range of industry sectors including:
- construction and demolition
 - manufacturing
 - waterfront
 - mining
 - primary industry
 - utilities (electricity, gas, water)
 - arboricultural
 - swimming pool
 - quarrying
- Hazards may include:
- power lines
 - noise, light, energy sources

RANGE STATEMENT

- overhead service lines
 - surrounding buildings, structures, facilities
 - underground services
 - obstructions
 - uneven or unstable ground and recently filled trenches
 - stationary and moving machinery and equipment
 - hazardous or dangerous materials
 - traffic hazards and congestion
- Hazard management is:
- consistent with the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
- Consultative processes may involve:
- other employees and supervisors
 - management
 - union representatives
 - clients
 - industrial relations and OH&S specialists
 - other professional or technical staff
- Requirements for access and/or lift may include:
- site restrictions and procedures
 - authorities and permits
 - hours of operation
 - induction
 - slings, chains, nets, brackets and other specialised lifting equipment
 - noise restrictions
 - personal protective equipment
 - support trucks
 - additional gear and equipment
 - communications equipment
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - sunscreen, sunglasses and safety glasses
 - two-way radios
 - high visibility clothing
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
 - site procedures
- Documentation/records may
- operations manuals for vehicle-mounted loading cranes

RANGE STATEMENT

include:

- Safe Working Load (SWL) and Working Load Limit (WLL)
- material safety data sheets
- induction documentation
- competency standards and training materials
- job specifications and procedures
- manufacturers specifications for vehicle-mounted loading cranes
- workplace operating procedures and policies
- supplier and/or client instructions
- communications technology equipment, oral, aural or signed communications
- personal and work area work procedures and practices
- conditions of service, legislation and industrial agreements including:
 - workplace agreements and awards
 - occupational health and safety procedures
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures

Applicable procedures and codes may include:

- relevant state/territory regulations and licence/permit requirements pertaining to vehicle-mounted loading cranes
- relevant state/territory road rules
- relevant state/territory OH&S legislation
- relevant state/territory fatigue management regulations
- relevant state/territory environmental protection legislation

TLID3035A Operate a boom type elevating work platform

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate a boom type elevating work platform, including inspecting and testing the elevating work platform, assessing job requirements and work, planning work and setting up for lift, carrying out the elevation, implementing planned hazard control and strategies, and packing up the work platform after operations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the licence/permit requirements and regulations of the relevant state/territory authorities pertaining to boom type elevating work platform operations.

Work is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes. It involves the application of routine principles and procedures to the operation of a boom type elevating work platform in a variety of operational contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Inspect and test elevating work platform

- 1.1 Work platform is visually inspected prior to operation for any evidence of damage, structural weakness or interference according to pre-operational safety check procedures
- 1.2 Routine pre-operational equipment checks are carried out in accordance with available checklists
- 1.3 Work platform log book is checked, service requirements are noted and maintenance personnel advised of any requirements
- 1.4 Elevating work platform is started in accordance with manufacturers guidelines and start-up procedures for operations and any abnormal noise or movement reported to an authorised person for corrective action
- 1.5 Start-up checks are conducted according to manufacturers specifications and company procedures to ensure work platform and equipment are operating correctly
- 1.6 Faults are corrected or are reported to an authorised person for corrective action according to company procedures
- 1.7 The operating and emergency controls are checked for correct operation in accordance with manufacturers specifications including use of the emergency decent device
- 1.8 Boom is lowered under simulated emergency conditions to check for operational effectiveness
- 1.9 Gear and accessories are checked and damaged or worn gear is segregated and reported to an authorised person for testing/repair/destruction
- 1.10 Results of inspections are recorded and reported according to company procedures

ELEMENT	PERFORMANCE CRITERIA
2 Assess job requirements and work	<p>2.1 Briefing, hand-over details, authorisations and clearances are received, interpreted and clarified in accordance with company and site procedures and legislative requirements</p> <p>2.2 Work area is inspected and potential hazards are identified and appropriate elimination or control measures selected</p> <p>2.3 Weight of load including personnel and equipment is correctly estimated to ensure job is within limits of work platform capacity</p>
3 Plan work and set up for lift	<p>3.1 A work plan is developed and agreed with relevant workplace personnel to include hazard prevention/control measures and safety and emergency procedures in line with applicable Australian standards</p> <p>3.2 A suitable firm and level standing is chosen and prepared for the location of the elevating work platform</p> <p>3.3 Outriggers and stabilisers are correctly deployed and positioned in accordance with manufacturers instructions and appropriate Australian standards</p> <p>3.4 Appropriate plates or packing are correctly used under the footplates as required to adequately distribute the loading</p> <p>3.5 Ground is checked before and after packing is installed to ensure it is firm enough to bear the load</p> <p>3.6 The job plan is developed to include hazard prevention/control measures and safety procedures in line with applicable Australian standards and to equipment manufacturers specifications</p> <p>3.7 Work platform load chart is located and information on permissible loads, radii and heights taken into account in planning the job</p> <p>3.8 The job plan takes into account job requirements and workplace rules and procedures</p> <p>3.9 Job plan is discussed and confirmed with relevant personnel</p> <p>3.10 Work gear and tools are properly stowed in the elevating work platform in accordance with Australian standards, company procedures and guides</p>
4 Carry out elevation	<p>4.1 Configuration and operation of elevating work platform are checked as necessary to ensure safe lift</p> <p>4.2 Operation of work platform is carried out in accordance with the job plan, the appropriate Australian standard and manufacturers specifications</p>
5 Planned hazard control and strategies are implemented	<p>5.1 Load is constantly monitored to ensure safety of personnel, load and structural stability</p> <p>5.2 Unplanned situations are responded to in line with company</p>

ELEMENT	PERFORMANCE CRITERIA
	procedures in a manner that minimises risk to personnel and equipment
	5.3 Required signals are correctly given, interpreted and followed in accordance with appropriate Australian standards
6 Pack up work platform	6.1 The elevating work platform is shut down using the correct sequence of procedures in accordance with manufacturers instructions
	6.2 Routine post-operational equipment checks are carried out in accordance with manufacturers instructions and available checklists and defects recorded and reported in line with company procedures
	6.3 The elevating work platform is dismantled in accordance with the job plan, manufacturers instructions and relevant statutory regulations
	6.4 The outriggers and stabilisers are secured and stowed in accordance with manufacturers instructions
	6.5 The elevating work platform is correctly stowed and secured in accordance with manufacturers instructions and company procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements pertaining to boom type elevating work platform operation
- Relevant OH&S and environmental procedures and regulations
- Boom type elevating work platform applications, capacities, configurations, safety hazards and control mechanisms
- Workplace procedures concerning the operation of a boom type elevating work platform at a worksite
- Problems that may arise when operating a boom type elevating work platform and actions that should be taken to prevent or solve them
- Risks and hazards involved in the operation of a boom type elevating work platform and the associated action that can be taken to eliminate or minimise the risk/hazards concerned
- Focus of operation of work systems and equipment

Required skills:

- Communicate effectively with others when operating a boom type elevating work platform
- Read and interpret instructions, procedures, regulations, codes of practice and manuals relevant to the operation of a boom type elevating work platform
- Interpret and follow operational instructions
- Complete documentation related to the operation of a boom type elevating work platform
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating a boom type elevating work platform
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when operating a boom type elevating work platform in accordance with regulatory requirements and workplace procedures
- Plan own work including predicting consequences and identifying improvements
- Prioritise and multi-task work
- Implement contingency plans for unanticipated situations that may arise when operating a boom type elevating work platform
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of a boom type elevating work platform
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Identify and correctly use equipment, processes and procedures
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of equipment
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Operations may be conducted:
- by day or night
 - in a variety of weather conditions
- Environment may include movement of:
- equipment
 - goods
 - materials
 - vehicular traffic
- Customers may be:
- internal or external
- Boom type elevating work platform may be involved in work in a range of industry sectors including:
- construction and demolition
 - manufacturing
 - waterfront
 - mining
 - primary industry
 - utilities (electricity, gas, water)
 - arboricultural
 - swimming pool
 - quarrying
- Hazards may include:
- power lines
 - noise, light, energy sources
 - overhead service lines
 - surrounding buildings, structures, facilities
 - underground services
 - obstructions
 - uneven or unstable ground and recently filled trenches
 - stationary and moving machinery and equipment
 - hazardous or dangerous materials
 - traffic hazards and congestion
- Hazard management is consistent with:
- the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
- Consultative processes may involve:
- other employees and supervisors
 - management
 - union representatives
 - clients
 - industrial relations and OH&S specialists
 - other professional or technical staff

RANGE STATEMENT

Requirements for access and/or lift may include:

- site restrictions and procedures
- authorities and permits
- hours of operation
- induction
- slings, chains, nets, brackets and other specialised lifting equipment
- noise restrictions
- personal protective equipment
- support trucks
- additional gear and equipment
- communications equipment

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- sunscreen, sunglasses and safety glasses
- two-way radios
- high visibility clothing

Elevating platforms may include:

- mechanically operated equipment
- hydraulically operated equipment
- electrically operated equipment

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures
- site procedures

Documentation/records may include:

- operations manuals
- Safe Working Load (SWL) and Working Load Limit (WLL)
- site plans
- induction documentation
- competency standards and training materials
- job specifications and procedures
- manufacturers specifications
- workplace operating procedures and policies
- supplier and/or client instructions
- communications technology equipment, oral, aural or signed communications
- personal and work area work procedures and practices
- conditions of service, legislation and industrial agreements including:
 - workplace agreements and awards

RANGE STATEMENT

- occupational health and safety procedures
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
- Applicable procedures and codes may include:
- relevant state/territory regulations and licence/permit requirements pertaining to the operation of boom type elevating work platforms
 - relevant state/territory road rules
 - relevant state/territory OH&S legislation
 - relevant state/territory fatigue management regulations
 - relevant state/territory environmental protection legislation

TLID3036A Lift and move load using a mobile crane

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to lift and move a load using a non-slewing mobile crane or a slewing mobile crane. It includes operating the mobile crane to complete job requirements, monitoring lift conditions, implementing shut-down procedures, packing up crane after operations, and completing all required job records. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the licence/permit requirements and regulations of the relevant state/territory authorities pertaining to operations of mobile cranes.

Work is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes. It involves the application of routine principles, procedures and regulations to lift and move loads using slewing and non-slewing mobile cranes in a variety of operational contexts.

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Operate mobile crane

- 1.1 In ascent and descent to/from crane correct use is made of the means provided in accordance with codes of practice and workplace procedures
- 1.2 Planned hazard control strategies are implemented
- 1.3 Required signals are correctly given, interpreted and followed in accordance with appropriate workplace procedures
- 1.4 Boom is positioned to ensure load to be lifted is plumbed under hook
- 1.5 Load is hoisted and lowered into position using crane movements in accordance with the appropriate workplace procedures
- 1.6 Crane controls are operated smoothly
- 1.7 Crane is shut down and secured during periods of non-operation according to manufacturers specifications and workplace procedures

2 Monitor lift conditions

- 2.1 Load is constantly monitored to ensure load and structural stability
- 2.2 Conditions which may affect the continuing stability of the crane are identified and monitored
- 2.3 Unplanned situations are responded to in line with workplace procedures in a manner that minimises risk to personnel and equipment
- 2.4 Dogger is advised of any new information which affects the lift
- 2.5 Any necessary changes to job plan are discussed and confirmed with rest of crew
- 2.6 Advice is sought from supervisor where there is doubt about

ELEMENT	PERFORMANCE CRITERIA
	correct response to unanticipated conditions, or conflict with customer request
	2.7 Supervisor/allocator is advised of any concern about completing the job within timeframe
3 Implement shut-down procedures	3.1 The relevant motion locks and brakes are applied
	3.2 Crane is shut down using the correct sequence of procedures in accordance with manufacturers specifications and workplace procedures
	3.3 Routine post-operational equipment checks are carried out in accordance with manufacturers specifications
4 Pack up crane	4.1 Crane is de-rigged with other crane personnel in accordance with manufacturers instructions
	4.2 All lifting equipment and crane components are checked in consultation with crane personnel for any signs of deterioration or damage in accordance with the appropriate Australian Standard
	4.3 Damaged or worn equipment is segregated and reported to an authorised person for testing/repair/destruction
	4.4 Crane and equipment are correctly stowed and secured in accordance with manufacturers instructions and the appropriate Australian Standard
5 Complete job records	5.1 Customer feedback is sought regarding satisfaction with the completed job, and any areas of concern are reported according to workplace procedures
	5.2 Customer's signature on job completion documentation is obtained
	5.3 Required workplace records are updated accurately and promptly and processed according to workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements pertaining to mobile crane operation
- Relevant OH&S and environmental procedures and regulations

REQUIRED KNOWLEDGE AND SKILLS

- Mobile crane applications, capacities, configurations, safety hazards and control mechanisms
- Risks and hazards involved in mobile crane operation, and associated action that can be taken to eliminate or minimise the risk
- Workplace procedures concerning the operation of a mobile crane at a worksite
- Problems that may occur during a lift, and associated action that can be taken to address the problems concerned
- Communication systems used during a lift
- Focus of operation of work systems and equipment

Required skills:

- Communicate effectively with others when lifting and moving a load using a mobile crane
- Read and interpret instructions, procedures, information and signs relevant to the lifting and moving of a load using a mobile crane
- Complete documentation related to the lifting and moving of a load using a mobile crane
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when lifting and moving a load using a mobile crane
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when lifting and moving a load using a mobile crane in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unanticipated situations that may arise when lifting and moving a load using a mobile crane
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the lifting and moving of a load using a mobile crane
- Plan own work including predicting consequences and identifying improvements
- Prioritise and multi-task work
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of equipment

Required skills:

- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - applying the underpinning knowledge and skills
 - applying relevant legislation and workplace procedures
 - complying with OH&S licensing legislation
 - applying risk assessment and management procedures for mobile crane operations
 - effectively completing the pre-operational checks, positioning, stabilising, set-up, post-operational checks of a mobile crane
 - using mathematical procedures to determine the weight of a load and the lifting equipment required for the lift
 - using load charts to determine the limitations of the crane and/or crane set-up required
 - operating the crane including all functions to their maximum extension in the lifting and moving of a load

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace

EVIDENCE GUIDE

- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through appropriately simulated activities at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

D - Load Handling

TLID3043A Shift loads using gantry equipment

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to shift loads using gantry equipment in accordance with workplace and regulatory requirements, including planning the work for the prevailing working conditions; using the controls and operating systems to manage the operation of the equipment; locating the load and identifying the load characteristics; safely moving the load; monitoring the controls; and stopping, shutting down and securing the equipment after the completion of operations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the shifting of loads using gantry equipment.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements when shifting loads using gantry equipment as part of work activities in the stevedoring, transport, distribution and allied industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Plan work for the prevailing working conditions

- 1.1 Traffic flow, weather and work area conditions are constantly assessed and anticipated to allow safe operation to ensure no injury to people, or damage to equipment, loads or facilities
- 1.2 Characteristics of the load are taken into account to ensure that, where applicable, appropriate attachments/gear are used to move the load
- 1.3 Any occurrences in the work area that may affect the safety and efficiency of operations are reported to the appropriate personnel

2 Use controls and operating systems to manage the operation of the equipment

- 2.1 Equipment is prepared and appropriate attachments fitted (where applicable)
- 2.2 Gear and operational levers are checked to ensure that they are in the neutral position prior to inserting ignition key and starting engine
- 2.3 Engine is started in accordance with manufacturers guidelines to bring the engine to speed
- 2.4 Instruments and gauges are monitored during start-up and operations to ensure that operation is within manufacturers specifications and workplace and regulatory safety requirements
- 2.5 Engine power is managed for efficiency of equipment movement and economy of equipment operations
- 2.6 Equipment operations are conducted within manufacturers specified torque range
- 2.7 Any faults or damage to equipment are immediately reported to the appropriate personnel

3 Locate load and identify

- 3.1 Load is located and identified according to instructions

ELEMENT	PERFORMANCE CRITERIA
load characteristics	<p>3.2 Requirements for Safe Working Load (SWL) and Working Load Limit (WLL) of the gantry equipment are identified</p> <p>3.3 Load weight and dimensions are checked to ensure they fall within the capacity of the equipment</p> <p>3.4 Loading and unloading plans are followed to ensure efficiency and safety of operations</p> <p>3.5 Characteristics of the load are taken into account to ensure that appropriate loading and unloading procedures are followed</p> <p>3.6 Hazardous cargo is identified and relevant procedures are taken into account when planning and conducting the work</p>
4 Safely move load	<p>4.1 Equipment is operated and positioned using smooth and controlled movements</p> <p>4.2 Manoeuvres are within the limits of the equipment and in line with manufacturers specifications</p> <p>4.3 Load is moved ensuring no injury to personnel or damage to equipment or cargo</p> <p>4.4 Continuous communication is maintained with personnel assisting the operator in the load movement operations using appropriate communications technology and procedures</p> <p>4.5 In the event of a safety incident or emergency, the equipment is immediately stopped and workplace emergency procedures followed</p> <p>4.6 Safety incidents and emergencies are reported in accordance with workplace procedures and regulatory requirements</p>
5 Monitor and operate controls	<p>5.1 Equipment controls are monitored and operated in accordance with manufacturers operating instructions</p> <p>5.2 Control systems are understood and acted upon in accordance with regulatory requirements, manufacturers guidelines and workplace operating procedures</p> <p>5.3 Control faults are identified and reported in accordance with enterprise guidelines</p> <p>5.4 Hazards in the work area are identified and appropriate measures are adopted to control the risks in accordance with regulatory requirements and workplace procedures</p>
6 Stop, shut down and secure equipment	<p>6.1 Equipment is brought to a controlled halt and shut down without injury to personnel or damage to equipment, loads or facilities in accordance with manufacturers guidelines and workplace procedures</p> <p>6.2 Equipment is secured in accordance with manufacturers instructions and workplace procedures</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes, regulations, licence/permit requirements relevant to the use of gantry equipment to shift loads
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the use of gantry equipment to shift loads
- Focus of operation of work systems, equipment, management and site operating systems for the use of gantry equipment to shift loads
- Problems that may occur when using gantry equipment to shift loads and appropriate action that can be taken to resolve the problems
- Relevant safety codes and emergency procedures
- Types of gantry equipment used to shift loads in terminals/wharves, their applications and procedures and precautions for their use
- Requirements for Safe Working Load (SWL) and Working Load Limit (WLL) of gantry equipment
- The marking and numbering systems for cargo
- Relevant bond, quarantine or other legislative requirements

Required skills:

- Communicate effectively with others when shifting loads using gantry equipment
- Read and interpret instructions, procedures, information and labels relevant to the shifting of loads using gantry equipment
- Identify cargo, container and goods, coding, ADG and IMDG markings and where applicable emergency information panels
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the shifting of loads using gantry equipment
- Receive, acknowledge and send messages with appropriate communications equipment
- Estimate the size, shape and special requirements of loads
- Work collaboratively with others when shifting loads using gantry equipment
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when shifting loads using gantry equipment in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unanticipated situations that may arise when shifting loads

Required skills:

using gantry equipment

- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the shifting of loads using gantry equipment
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Identify, select and use relevant equipment, processes and procedures when using gantry equipment to shift loads
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Apply effective eye-hand coordination to operational tasks
- Monitor performance of equipment
- Service equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or

EVIDENCE GUIDE

- other simulated practical and knowledge assessment, and/or
- access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- Method of assessment**
- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted:
- in a range of work environments
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- limited or restricted spaces
 - exposed conditions
 - controlled or open environments
 - even or uneven surfaces
 - wet or dry surfaces
- Cargo/freight may include:
- goods/containers with specialist requirements, including

RANGE STATEMENT

- | | |
|---|--|
| Range of equipment may include: | <ul style="list-style-type: none"> • temperature controlled goods and dangerous goods • various types of bridge and gantry cranes |
| Hazards in the work area may include exposure to: | <ul style="list-style-type: none"> • chemicals • dangerous or hazardous substances • movements of equipment, goods, materials and vehicular traffic |
| Personal protective equipment may include: | <ul style="list-style-type: none"> • gloves • safety headwear and footwear • safety glasses • two-way radios • protective clothing • high visibility clothing |
| Communication in the work area may include: | <ul style="list-style-type: none"> • phone • fax • email • electronic data transfer (EDI) • RF systems • radio • oral, aural or signed communications |
| Personnel in work area may include: | <ul style="list-style-type: none"> • workplace personnel • site visitors • contractors • official representatives |
| Consultative processes may involve: | <ul style="list-style-type: none"> • staff members • management • union representatives • industrial relations, OH&S specialists • other professional or technical staff |

RANGE STATEMENT

- practice for the handling and transport of dangerous goods and hazardous substances
- operations manuals, job specifications and induction documentation
 - manufacturers specifications for equipment
 - workplace procedures and policies
 - supplier and/or client instructions
 - dangerous goods declarations and material safety data sheets
 - award, enterprise bargaining agreement, other industrial arrangements
 - relevant Australian standards and certification requirements
 - quality assurance procedures
 - emergency procedures
 - relevant codes and regulations for the shifting of cargo/containers using gantry equipment
 - Australian and international regulations and codes of practice for the handling of dangerous goods and hazardous substances, including:
 - Australian and International Dangerous Goods Codes
 - Australian Marine Orders and the International Maritime Dangerous Goods Code
 - IATA Dangerous Goods by Air regulations
 - Australian and International Explosives Codes
 - relevant Australian Standards including AS 1418 and AS 2550
 - licence, patent or copyright arrangements
 - water and road use and licence arrangements
 - export/import/quarantine/bond requirements
 - marine orders
 - relevant state/territory OH&S and environmental protection legislation
 - workplace relations regulations
 - workers compensation regulations
- Applicable regulations and legislation may include:

Competency Field

Competency Field

D - Load Handling

TLID4032A Plan and conduct specialised lift

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to plan and conduct a specialised lift by a mobile crane (excluding demolition work). It involves a lift which may be specialised in terms of job and equipment requirements, the qualities of the load, or the critical aspects of the location(s) of the lift. It includes inspecting the site, planning the lift, setting up the lift, working effectively in a team, lifting and moving the load, and following up on the job. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the licence/permit requirements and regulations of the relevant state/territory authorities pertaining to specialised mobile crane operations.

Work is performed under general supervision. It involves the application of some judgement and routine principles and procedures to the planning and conduct of specialised lifts in a variety of operational contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Inspect site

- 1.1 Site is inspected as required with other relevant personnel to assess job requirements
- 1.2 All necessary parameters are measured to ensure accuracy of calculations
- 1.3 Hazards are identified through inspection of site and load
- 1.4 Additional information regarding load and possible hazards is sought from customer and expert personnel
- 1.5 Special site requirements are identified

2 Plan the lift

- 2.1 Operation plan is developed in consultation with other relevant personnel to include hazard prevention/control measures in line with workplace procedures, applicable Australian standards and codes of practice
- 2.2 Where required, approval to carry out lift is obtained from the appropriate statutory authority
- 2.3 Multiple crane lifts are planned (as applicable) to encompass the determination of the types of cranes suitable for use and an assessment of the share of the load to be carried by each crane
- 2.4 Cranes load chart is interpreted and information on permissible loads, radii, weights, boom and jib taken into account in planning the job
- 2.5 Safe Working Load (SWL) or Working Load Limit (WLL) is calculated
- 2.6 Appropriate drawings and simulations are created to check feasibility of planned operations
- 2.7 Information from previous lifts is used in developing the operational plan

ELEMENT	PERFORMANCE CRITERIA
	2.8 A range of different alternatives is considered to ensure effective and safe lift
	2.9 Unsolicited, irrelevant information is disregarded to focus on the task at hand
	2.10 Need for additional/specialised equipment is ascertained and arrangements made for collection/delivery to site
	2.11 Communication system is determined and all team members are briefed on its use in conducting lift
3 Set up lift	3.1 Site measurements are checked to verify accuracy
	3.2 Operating and emergency controls are checked to ensure the crane is in safe working order
	3.3 Appropriate personal protective equipment is selected and worn in accordance with manufacturers specifications and site requirements
	3.4 Site is isolated as necessary and, when required, assistance sought to ensure public safety
	3.5 Other personnel on site are directed as necessary to ensure risks to personnel and equipment are minimised
	3.6 Variables which affect the predictability of the operation are eliminated wherever possible
4 Work effectively in team	4.1 The advice of all team members is sought in developing the operational plan
	4.2 Ideas are discussed and evaluated with team members to determine viability and reach consensus on an effective plan
	4.3 Individual roles and responsibilities are clarified and agreed
	4.4 Other team members are assisted as necessary to ensure the operation can be completed safely and efficiently
5 Lift and move load	5.1 Nominated authorised person is recognised as being in control and instructions are followed
	5.2 Test runs are conducted as necessary to ensure a safe lift
	5.3 Load is hoisted and lowered into position using crane movements in accordance with the appropriate Australian standard
	5.4 Danger is anticipated by monitoring of crane and load, and instruction to stop operation given where there are any concerns the lift is not proceeding as planned
	5.5 Potential impact of change in one area of operation on the lift as a whole is recognised
	5.6 In the event of unanticipated situations, contribution is made to developing alternative operational plan
6 Follow up on job	6.1 Specialised equipment is checked and re-stored in accordance

ELEMENT**PERFORMANCE CRITERIA**

- with workplace procedures
- 6.2 Operation is reviewed in consultation with relevant personnel and contribution is made to recommendations for review of procedures where appropriate
- 6.3 Need for further after job debriefing or counselling is recognised and appropriate action is taken
- 6.4 Records are completed promptly in line with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements pertaining to mobile crane operation
- Relevant OH&S and environmental procedures and regulations
- Mobile crane applications, capacities, configurations, safety hazards and control mechanisms
- Operational procedures for crane crews
- Prioritising and multi-tasking work
- Company work procedures concerning the setting up and rigging of a mobile crane at a work site
- Problems that may arise when planning and supervising a specialised lift using a mobile crane and actions that should be taken to prevent or solve them
- Focus of operation of work systems and equipment
- Relevant agreements, codes of practice or other legislative requirements

Required skills:

- Communicate effectively with others when planning and supervising a specialised lift using a mobile crane
- Read and interpret instructions, procedures, information, technical data, manuals and signs relevant to the planning and supervision of a specialised lift using a mobile crane
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the planning and supervision of a specialised lift using a mobile crane

Required skills:

- Operate electronic communication equipment to required protocol
- Provide leadership and work collaboratively with others when planning and supervising a specialised lift using a mobile crane
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any problems identified when planning and supervising a specialised lift using a mobile crane in accordance with regulatory requirements and workplace procedures
- Plan own work including predicting consequences and identifying improvements
- Develop contingency plans for possible unanticipated situations
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the planning and supervision of a specialised lift using a mobile crane
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Ensure the use of required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts

EVIDENCE GUIDE

for assessment

- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted:

- day or night
- in a variety of weather conditions

Environment may include movement of:

- equipment
- goods
- materials
- vehicular traffic

Customers may be:

- internal or external

Mobile crane may be involved in work in a range of industry sectors

- construction and demolition
- manufacturing

RANGE STATEMENT

including:

- waterfront
- mining
- primary industry
- utilities (electricity, gas, water)
- arboricultural
- swimming pool
- quarrying

Specialised lifts may include:

- large surface areas-pools
- tilt-up panels
- drive-in movie screens
- tree removal and replacement
- bridge beams
- multiple crane lifts
- passing loads to other cranes
- tailing out of loads
- turning loads over
- lifting high value goods
- recovery work
- specialised operations-drag lines
- clam shell
- pile driving
- barge work
- work involving work box duties

Hazards may include:

- power lines
- noise, light, energy sources
- overhead service lines
- surrounding buildings, structures, facilities
- underground services
- obstructions
- uneven or unstable ground and recently filled trenches
- stationary and moving machinery and equipment
- hazardous or dangerous materials
- traffic hazards and congestion

Hazard management is:

- consistent with the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment

Consultative processes may involve:

- other employees and supervisors
- management
- union representatives

RANGE STATEMENT

- clients
 - industrial relations and OH&S specialists
 - other professional or technical staff
- Requirements for access and/or lift may include:
- site restrictions and procedures
 - authorities and permits
 - hours of operation
 - induction
 - slings, chains, nets, brackets and other specialised lifting equipment
 - noise restrictions
 - personal protective equipment
 - support trucks
 - additional gear and equipment
 - communications equipment
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - sunscreen, sunglasses and safety glasses
 - two-way radios
 - high visibility clothing
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
 - site procedures
- Documentation/records may include:
- site plans
 - Safe Working Load (SWL) and Working Load Limit (WLL)
 - operations manuals including load charts and crane and rigging manuals
 - induction documentation
 - competency standards and training materials
 - job specifications and procedures
 - manufacturers specifications
 - workplace operating procedures and policies
 - supplier and/or client instructions
 - communications technology equipment, oral, aural or signed communications
 - personal and work area work procedures and practices
 - conditions of service, legislation and industrial agreements including:

RANGE STATEMENT

- workplace agreements and awards
 - occupational health and safety procedures
 - standards and certification requirements
 - quality assurance procedures
 - emergency procedures
- Applicable procedures and codes may include:
- relevant state/territory regulations and licence/permit requirements pertaining to specialised mobile crane operations
 - relevant state/territory road rules
 - relevant state/territory OH&S legislation
 - relevant state/territory fatigue management regulations
 - relevant state/territory environmental protection legislation

Unit Sector(s)

Not Applicable

Competency Field

Competency Field D - Load Handling

TLIE3002A Estimate/calculate mass, area and quantify dimensions

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to estimate and calculate mass and area and quantify dimensions of loads as part of work functions in the transport, stevedoring, warehousing, and/or storage sectors. This includes estimating loads to be transported or placed in storage, identifying mass, area and volume limitations of available transport/storage systems and carrying out calculations required to organise load(s) to match identified transport/storage limitations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with workplace requirements and any relevant regulations related to the estimation and/or calculation of mass and area and the quantification of dimensions as part of workplace tasks.

Work is performed under some supervision generally within a team environment. It involves the application of basic mathematical principles and operations to the estimation and/or calculation of mass and area and the quantification of dimensions as part of workplace activities in the transport, stevedoring, warehousing, distributi

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|---|
| 1 Estimate loads for transport or storage | 1.1 Order forms/work orders are read and requirements are noted
1.2 Shape, balance characteristics, dimensions and mass of the load(s) are identified
1.3 Area/volume required for storage is estimated
1.4 Weights and volumes are totalled to calculate load requirements of transport or storage system |
| 2 Estimate load limits of transport and/or storage | 2.1 Allowable load limits for storage and/or transport systems are identified in accordance with workplace procedures
2.2 Capacity of transport and storage systems in terms of mass, area and volume are calculated |
| 3 Organise load | 3.1 Load(s) is restricted to allowable range(s)
3.2 Load(s) is spread to ensure safe weighting on pallets, trucks, platforms or other storage or transport systems
3.3 Appropriate workplace documentation is completed |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international codes and regulations relevant to workplace activities
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the estimation and/or calculation of mass, area and volumes of loads and transport and storage facilities including the quantification of dimensions
- Basic mathematical operations required when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities including addition, subtraction, multiplication and division
- Focus of operation of work systems, equipment, management and site operating systems for the transport and/or storage of goods and stock
- Problems that may occur when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities and appropriate action that can be taken to resolve the problems
- Documentation requirements for the workplace activities concerned

Required skills:

- Communicate effectively with others when estimating and/or calculating mass, area and volumes of loads and transport and storage facilities
- Read and interpret instructions, procedures, information and labels relevant to the estimation and/or calculation of mass, area and volumes of loads and transport and storage facilities
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when estimating and/or calculating mass, area and volumes of loads and transport and storage facilities in accordance with workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Identify, select and use relevant calculators, computing and office equipment when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities

Required skills:

- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:

EVIDENCE GUIDE

- through activities in an appropriately simulated environment at the registered training organisation, and/or
- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|--|
| 1 Identify the housekeeping requirements, procedures, and resources of different areas of the workplace | <ul style="list-style-type: none"> 1.1 Workplace procedures for housekeeping are identified 1.2 Equipment and consumables are selected in accordance with work area requirements 1.3 Specific requirements for housekeeping activities in different parts of the employees' work area are identified and followed 1.4 Requirements for the minor disassembly/reassembly of storage zones are identified (where applicable) |
| 2 Monitor and maintain cleanliness and tidiness in the workplace | <ul style="list-style-type: none"> 2.1 Initiative is used to continuously monitor the cleanliness and tidiness of the worksites used by the employees 2.2 Housekeeping issues are raised with designated personnel in accordance with workplace procedures 2.3 Housekeeping equipment and supplies are maintained and stored |
| 3 Complete assigned housekeeping duties | <ul style="list-style-type: none"> 3.1 Assigned housekeeping duties are conducted following workplace procedures and ensuring that waste is removed 3.2 Maintenance requirements of any damaged items are notified to appropriate personnel 3.3 Minor disassembly/reassembly of storage zones is conducted within enterprise policies and procedures 3.4 Schedules and records for housekeeping duties are maintained 3.5 Work areas are checked and meet required workplace standards 3.6 Work is carried out following enterprise practices and safe work procedures |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant OH&S procedures and guidelines concerning housekeeping operations
- Workplace procedures and policies for the carrying out housekeeping tasks in the workplace
- Risks when carrying out housekeeping tasks and related precautions to control the risk
- Housekeeping standards required in the workplace
- Site layout and obstacles
- Application of relevant industrial regulations and requirements
- Servicing procedures for housekeeping equipment

Required skills:

- Communicate effectively with others when carrying out housekeeping tasks
- Read and interpret instructions, procedures, information and signs relevant to housekeeping activities in the workplace
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to housekeeping in the workplace
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when carrying out housekeeping tasks
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any problems, faults or malfunctions identified when carrying out housekeeping tasks in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during housekeeping activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Monitor condition and performance of housekeeping tools and equipment
- Service housekeeping tools and equipment in terms of servicing schedule and standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S

Required skills:

standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or

EVIDENCE GUIDE

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|---|--|
| The housekeeping tasks may be conducted: | <ul style="list-style-type: none"> • in a range of work environments • by day or night |
| Customers may be: | <ul style="list-style-type: none"> • internal or external |
| Workplaces may comprise: | <ul style="list-style-type: none"> • large, medium or small worksites |
| Work may be conducted in: | <ul style="list-style-type: none"> • tight or restricted spaces • exposed conditions • controlled or open environments |
| Housekeeping duties may include: | <ul style="list-style-type: none"> • cleaning • returning goods or equipment to storage • repacking • waste removal • maintenance |
| Hazards in the work area may include exposure to: | <ul style="list-style-type: none"> • chemicals • dangerous or hazardous substances • movements of equipment, goods and materials |
| Personnel in the work area may include: | <ul style="list-style-type: none"> • workplace personnel • site visitors • contractors • official representatives |
| Depending on the type of organisation concerned and the local terminology used, workplace procedures may include: | <ul style="list-style-type: none"> • company procedures • enterprise procedures • organisational procedures • established procedures |
| Depending on workplace context, personal protective equipment may include: | <ul style="list-style-type: none"> • gloves • safety headwear and footwear • safety glasses • two-way radios • high visibility clothing |

RANGE STATEMENT

Information/documents may include:

- OH&S and environmental protection regulations
- workplace housekeeping procedures and policies
- codes of practice including the National Standards for Manual Handling and the Industry Safety Code
- material safety data sheets
- policies and procedures for entry and work in confined spaces
- manufacturers instructions concerning the use and servicing of equipment
- supplier and/or client instructions
- emergency procedures
- regulations and policies concerning noise, smoking, work station ergonomics and other critical OH&S issues
- goods identification numbers and codes
- manifests, bar codes, goods and container identification
- relevant legislation, regulations and related documentation
- award, enterprise bargaining agreement, other industrial arrangements
- standards and certification requirements
- quality assurance procedures
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- workplace relations regulations
- dangerous goods and air freight regulations

Applicable regulations and legislation may include:

TLIF2010A Apply fatigue management strategies

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to apply fatigue management strategies, including identifying and acting upon signs of fatigue and implementing appropriate strategies to minimise fatigue during work activities, in accordance with legislative and regulatory requirements. Licensing or certification requirements are not applicable to this unit.

Application of the Unit

Application of the Unit

Persons achieving competence in this unit will need to fulfil the applicable federal and state/territory legislation and relevant regulations covering the management of fatigue in the workplace.

Work is performed under some supervision generally within a team environment. It involves the application of the relevant regulations, codes and guidelines of the federal government and state/territory authorities concerning fatigue management during work activities and in particular when operating equipment, trains, vehicles, load shifting equipment, marine vessels and aircraft.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|--|
| 1 Identify and act upon signs of fatigue | <p>1.1 Potential causes of fatigue are identified and action is taken to minimise their effects in accordance with company procedures</p> <p>1.2 Personal warning signs of fatigue are recognised and necessary steps are taken in accordance with workplace procedures to ensure that effective work capability and alertness are maintained</p> |
| 2 Implement strategies to minimise fatigue | <p>2.1 Workplace procedures are assessed to minimise fatigue</p> <p>2.2 Factors which increase the risk of fatigue-related accidents and safety incidents are understood and minimised</p> <p>2.3 Strategies to manage fatigue are implemented in accordance with company policy</p> <p>2.4 Lifestyle choices are made which promote the effective long-term management of fatigue</p> <p>2.5 Effective practices in combating fatigue are adopted and applied</p> <p>2.6 Personal fatigue management strategies are communicated to other relevant people</p> <p>2.7 Appropriate counter measures are planned to combat fatigue</p> |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

REQUIRED KNOWLEDGE AND SKILLS

Required knowledge:

- Relevant codes, regulations, permit and licence requirements related to fatigue management
- Relevant OH&S regulations as they relate to fatigue
- Workplace policies and procedures related to fatigue management and the control of factors that can contribute to fatigue and fatigue-related accidents
- Sources of information on fatigue
- The risks and hazards created by fatigue in the workplace
- How fatigue affects workplace performance
- How fatigue contributes to workplace accidents
- Ways of recognising fatigue
- Strategies and ways of managing fatigue
- Causes and effects of fatigue on workers/drivers
- Factors which increase fatigue-related accidents
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when applying fatigue management strategies
- Read and interpret instructions, procedures, regulations and signs related to fatigue management and apply them to work activities
- Recognise symptoms of fatigue and take appropriate action in accordance with fatigue management regulations and workplace procedures
- Work collaboratively with others to manage and minimise the effects of fatigue during work activities
- Adjust lifestyle patterns to ensure effective fatigue management during work activities
- Modify activities and take appropriate initiatives to manage fatigue in the workplace depending on differing work contexts, risk situations and environments
- Apply precautions and required action to minimise and control the effects of fatigue when carrying out own work functions
- Adapt to changes in rosters and standard operating procedures as they may relate to fatigue management
- Participate in identifying and meeting own learning needs on matters related to fatigue management

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and other/or simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and/or equipment, and/or
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Workplace may include:

- any work environment requiring safety critical operational judgements to be made and in particular when operating equipment, vehicles, load shifting equipment, trains, marine vessels and aircraft at night

The need for fatigue management in a range of industry situations including:

- operations conducted at all times but particularly at night
- typical weather conditions
- while working and/or driving at a workplace, depot, base or warehouse
- while working and/or driving at a client's workplace or worksite
- driving a motor vehicle on the open road
- driving a motor vehicle on a private road
- driving a train, locomotive or motive power unit
- operating a marine vessel in coastal or international waters
- operating an aircraft
- operating load shifting equipment
- operating safety critical industrial plant and equipment

Work-related factors that may contribute to fatigue include:

- work demands such as: workload, work duration, shift pattern, time of day, frequency and duration of breaks and the type of work (such as working in isolation, repetitive tasks and boring, monotonous or under-challenging tasks)
- organisational factors such as: work environment (including temperature, ventilation, continual rhythmic vibration from equipment), payment system, trip and work scheduling, and the predictability of work

Worker/operator-related factors that may contribute to fatigue include:

- lifestyle factors such as: sleep patterns, alcohol and drug use, quantity and timing of food and drink, and opportunities for relaxation with family and friends
- working multiple jobs
- personal or biological factors such as: state of mental and/or physical health, inadequate sleep, sleep disorders, emotional stress, family responsibilities, relationship difficulties, inadequate competence to complete work tasks, and circadian rhythms

Responsibilities of individual for fatigue risk management may include:

- following the organisation's fatigue management policy and procedures
- using time away from work appropriately to rest and recover
- checking and ensuring fitness for work
- reporting symptoms of fatigue

RANGE STATEMENT

- Schedules may include:
- taking action to minimise risk when symptoms of fatigue are recognised
 - rosters
 - vehicle schedules
 - timetabling
 - workplans
- Depending on the organisation, operating procedures may include:
- standard operating procedures
 - company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Information and documents may include:
- federal and state/territory regulations and guidelines concerning fatigue management in various transport and workplace situations
 - workplace instructions and procedures on fatigue management
 - relevant OH&S regulations and procedures
 - work schedules and shift rosters
 - emergency procedures
 - log book or record book (where required)
 - records and reports of fatigue-related errors and safety incidents
 - relevant standards and certification requirements
 - quality assurance procedures
- Applicable legislation, regulations and codes may include:
- relevant regulations and codes of the federal government and the state/territory regulatory authorities concerning fatigue management
 - relevant state/territory road rules
 - relevant rail industry safe working codes and regulations (where applicable)
 - relevant state/territory permit regulations and requirements
 - relevant state/territory OH&S legislation

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|--|
| 1 Respond to the incident | <ul style="list-style-type: none"> 1.1 Details of incidents, accidents and emergencies are received, analysed and confirmed 1.2 Immediate coordination requirements are identified and actioned in accordance with organisation procedures 1.3 Travel to the incident site is by the shortest, fastest, legal means and routes |
| 2 Coordinate on-site activities | <ul style="list-style-type: none"> 2.1 Control of site activities is assumed on arrival and the operator and other authorities present are informed of this action 2.2 Assistance is provided to clients and operators within the limitations of duty of care and organisation requirements 2.3 Details of personnel, including names and nature of injuries, are notified to relevant personnel, following enterprise procedures 2.4 Assistance is provided to relevant authorities within legal and policy limitations |
| 3 Complete follow-up actions | <ul style="list-style-type: none"> 3.1 Details of affected personnel, including names, nature of injuries and follow-up treatments are notified to next-of-kin in accordance with organisation procedures 3.2 Incidents resulting in a near miss, accident or emergency are investigated and a report, including recommendations, is completed in accordance with enterprise policies and procedures 3.3 Accident procedures and emergency plans are reviewed for effectiveness and recommendations for changes are prepared and submitted to appropriate persons |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant OH&S and other regulatory codes, procedures and guidelines concerning response to accidents and emergencies
- Risks and hazards in the workplace and related precautions to control the risk
- Workplace procedures and policies for responding to accident/emergency situations
- Types of accidents and emergencies that can occur in a workplace and the appropriate action to be taken in each case
- Types of emergency equipment in the workplace and instructions for its use
- Site layout and obstacles
- Means to control and organise the accident scene, provide practical assistance and cooperate with others at the scene
- Focus of operation of work systems, equipment, management and site operating systems

Required skills:

- Communicate effectively with others when implementing and coordinating accident and emergency procedures
- Read and interpret instructions, procedures, information and signs relevant to the implementation and coordination of accident and emergency procedures
- Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the implementation and coordination of accident and emergency procedures
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when implementing and coordinating accident and emergency procedures
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when implementing and coordinating accident and emergency procedures in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events that may occur when implementing and coordinating accident and emergency procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Required skills:

- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Identify, select and use emergency equipment, processes and procedures
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and

EVIDENCE GUIDE

- Method of assessment**
- operation manuals
 - Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Work may be conducted:
- in a range of work environments and weather conditions
 - by day or night
- Customers may be:
- internal or external
- Workplaces may comprise:
- large, medium or small worksites
- Work may be conducted in:
- restricted spaces
 - exposed conditions
 - controlled or open environments
- Action to be taken in the event of an accident-emergency may include:
- identifying and following established emergency procedures
 - assessing the nature and extent of the emergency
 - rendering assistance and first aid
 - isolating and coordinating safety of the scene
 - alerting relevant organisational personnel and emergency services
 - recording relevant information and reporting on accident/emergency situation in accordance with regulatory and workplace requirements
- Emergency equipment may include:
- first aid kit
 - fire extinguishers
 - fire hose

RANGE STATEMENT

- Hazards in the work area may include:
- fire blanket
 - resuscitation equipment
 - exposure to chemicals
 - exposure to dangerous or hazardous substances
 - movements of equipment, goods and materials
 - accidents involving chemicals, toxic substances and other harmful substances
 - accidents involving equipment and vehicles
 - explosion and/or fire
 - personal accidents including lifting injuries
 - waste management and disposal
 - violent incidents such as armed robberies
- Consultative processes may include:
- workplace personnel and management
 - designated workplace emergency officers
 - emergency services personnel including ambulance, police, fire services, etc.
 - union representatives
 - industrial relations and OH&S specialists
 - other professional or technical staff
 - site visitors
 - contractors
 - official representatives
- Communication in the work area may include:
- phone
 - electronic data interchange
 - fax
 - email
 - internet
 - radio
 - oral, aural or signed communications
- Personal protective equipment may include:
- gloves
 - safety headwear and footwear
 - safety glasses
 - two-way radios
 - high visibility clothing
 - breathing apparatus
- Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:
- company procedures
 - enterprise procedures
 - organisational procedures
 - established procedures
- Information/documents may
- workplace emergency/fire/accident procedures

RANGE STATEMENT

include:

- workplace procedures for the use of emergency equipment and personal protection equipment
- first aid instructions and procedures
- manufacturers instructions concerning the use and servicing of equipment
- manifests, bar codes, goods and container identification goods identification numbers and codes
- material safety data sheets
- codes of practice including the Dangerous Goods Code
- IMDG code markings, HAZCHEM codes and where applicable emergency information panels
- relevant legislation, regulations and related documentation related to emergency response situations
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- supplier and/or client advice on the hazards involved with goods or cargo
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- emergency procedures regulations
- dangerous goods and hazardous goods regulations
- relevant Australian standards and certification including Australian Standard AS 2865 - Safe Working in a Confined Space Code
- workplace relations regulations
- workers compensation regulations

Applicable regulations and legislation may include:

TLIH2001A Interpret road maps and navigate pre-determined routes

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to interpret road maps and navigate routes as part of transport operations. It includes identifying and determining the most appropriate route, and completing required route documentation in accordance with operational requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the regulations of the relevant state/territory roads and traffic authorities.

Work is performed under general or limited supervision. It involves the application of the basic map reading principles and procedures when interpreting street directories and road maps and following pre-determined routes as part of transport operations.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Identify and determine the pre-planned route

- 1.1 Documentation on the pre-determined route is accessed and interpreted
- 1.2 Relevant street directory, global positioning system (GPS) and road maps are identified and accessed
- 1.3 Street directory, GPS and road map symbols are recognised and interpreted
- 1.4 Points of departure and destination are identified in a directory index and the information is used to locate designated places on the appropriate map
- 1.5 Directions for a pre-determined route are interpreted and the route is traced using a street directory, GPS and road map
- 1.6 Key intersections and other landmarks along the route are identified for use in following the planned route
- 1.7 Alternative routes are identified for possible contingency situations such as emergencies or traffic delays
- 1.8 Pre-determined route is correctly followed

2 Complete necessary documentation

- 2.1 Required route documentation is completed in accordance with purpose of transportation and with workplace requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant state and territory permit and licence regulations and requirements

REQUIRED KNOWLEDGE AND SKILLS

- Operational procedures for interpreting road maps, using GPS devices and navigating routes
- Road conditions for various routes, including sections undergoing road works
- Height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
- Traffic conditions at various times of the day along specific routes
- Security hazards and issues (where relevant)
- Current information on accidents or emergencies that might close or restrict traffic on a particular route
- Location of service stations/rest stops where relevant
- Typical problems that may arise concerning the interpretation of road maps, the use of GPS devices and the navigation of pre-determined routes, and appropriate action that should be taken
- Workplace requirements for recording and documenting route information

Required skills:

- Communicate effectively with others when interpreting road maps, using GPS devices and navigating pre-determined routes
- Read and interpret instructions, procedures, information and signs relevant to route navigation
- Identify and correctly use maps and other route documentation including: identification of town and suburb locations, identification of roads and intersections, reading and interpretation of map symbols, and estimation of route distances using map information
- Where applicable, use GPS devices to navigate pre-determined routes
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to route navigation
- Operate electronic communication equipment to required protocol
- Where applicable work collaboratively with others (such as fleet managers, sales team etc.) when interpreting road maps, using GPS devices and navigating pre-determined routes
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when interpreting road maps, using GPS devices and navigating pre-determined routes in accordance with workplace procedures
- Plan for alternative routes in the event of contingencies such as road works, emergencies or delays
- Plan own work including predicting consequences and identifying improvements
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments

Required skills:

- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - applying the underpinning knowledge and skills
 - applying relevant legislation and workplace procedures
 - plotting a route from one destination to another relevant to the job role
 - demonstrating the ability to navigate a pre-determined route

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- As a minimum, assessment of knowledge must be

EVIDENCE GUIDE

conducted through appropriate assessments using written/practical/oral assessments

- Practical assessment must occur:
 - through activities in an appropriately simulated environment, and/or
 - in an appropriate range of situations in the workplace
- A simulator/online assessment is not suitable for the final assessment of this unit of competency

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|--|--|
| This unit covers: | <ul style="list-style-type: none"> • work of transport and distribution personnel involved in the delivery of a range of possible goods and materials including valuables, secured products and documents and materials |
| Operations may be conducted: | <ul style="list-style-type: none"> • in a range of work environments and weather conditions • by day or night |
| Customers may be: | <ul style="list-style-type: none"> • internal or external |

Elements and Performance Criteria

ELEMENT <i>Elements describe the essential outcomes of a unit of competency.</i>	PERFORMANCE CRITERIA <i>Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.</i>
1. Plan work	1.1 Potential workplace <i>hazards</i> are identified 1.2 <i>Hazard control measures</i> are identified consistent with <i>appropriate standards</i> to ensure the safety of personnel and equipment 1.3 Appropriate <i>forklift</i> truck is selected according to the load and workplace conditions 1.4 Working area is inspected to determine appropriate path of movement for loads and forklift truck 1.5 <i>Communication methods</i> are identified according to <i>procedures</i>
2. Conduct routine checks	2.1 Forklift is visually checked for any damage or defects 2.2 All <i>signage and labels</i> are visible and legible according to the <i>appropriate standard</i> 2.3 All controls are located and identified 2.4 <i>Pre-start operational checks</i> are carried out according to <i>procedures</i> 2.5 <i>Forklift</i> is started according to <i>procedures</i> and checked for any abnormal noise 2.6 <i>Post-start operational checks</i> are carried out according to <i>procedures</i> 2.7 All forklift functions and safety devices are tested to their maximum according to <i>procedures</i>

	2.8 Defects and damage are reported and recorded according to <i>procedures</i> , and appropriate action is taken
3. Shift load	<p>3.1 The weight of load is assessed to ensure compliance with <i>forklift</i> truck data plate specifications</p> <p>3.2 Appropriate <i>hazard prevention/control measures</i> are implemented and communicated with personnel in the work area</p> <p>3.3 <i>Forklift</i> is operated at a safe speed and according to <i>procedures</i></p> <p>3.4 Loads are moved and placed to ensure stability of material and avoidance of hazards</p> <p>3.5 Load movement is monitored constantly ensuring safety to personnel and load, and structural stability</p> <p>3.6 <i>Unplanned and/or unsafe situations</i> are responded to in line with <i>procedures</i></p>
4. Shut down and secure forklift truck	<p>4.1 <i>Forklift</i> truck is parked to avoid hazards</p> <p>4.2 Forklift is <i>shut down</i> according to <i>procedures</i></p> <p>4.3 Routine post-operational forklift checks are carried out according to <i>procedures</i></p> <p>4.4 Forklift is secured to prevent unauthorised access/use</p> <p>4.5 All defects and damage are reported and recorded according to <i>procedures</i>, and appropriate action is taken</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Required skills:

- Accurately interpret information relating to conducting forklift truck operations (e.g. procedures)
- Safely conduct forklift truck operations including all functions to the maximum height and load capacity
- Identify hazards associated with the operation of the forklift truck, assess risks and put into place effective hazard prevention/control measures for those hazards identified
- Use communication skills at a level sufficient to communicate with other site personnel (e.g. receive and interpret work instructions, safety information, emergency procedures)

REQUIRED SKILLS AND KNOWLEDGE

- Drive forklift with load in forward and reverse, maintaining visibility
- Verify problems and equipment faults and demonstrate appropriate response procedures

Required knowledge:

- Methodology of determining the weight of a load
- Commonwealth, state or territory OH&S legislation, standards relevant to the safe operation for the forklift trucks
- Understanding of forklift characteristics and capabilities (including use of load data plates)
- Understanding of the hierarchy of hazard identification and control
- Organisational and workplace standards, requirements, policies and procedures for conducting operations for the crane class
- Procedures for the recording, reporting and maintenance of workplace records and information
- Forklift truck operations and safe operating techniques
- Typical routine problems encountered in the operation of the crane and equipment and adjustments required for correction

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for the Training Package.

Overview of assessment

- Successful assessment of this unit meets the competency requirement of the National Standard for Licensing Persons Performing High Risk Work.
- State/territory OH&S regulators have mandated the use of Assessment Instruments and Instructions for Assessment for this unit which have been endorsed by the national body responsible for OH&S matters.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Compliance with OH&S licensing legislation.
- Communicate and work safely with others in the work area.
- Identify hazards associated with the operation of the forklift truck and put in place effective hazard controls for those hazards identified.

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • Conduct pre-start-up, operational, moving loads and shut down and secure checks of the forklift truck according to procedures. • Operate the forklift truck and move loads safely, including driving and manoeuvring, picking up and placing of loads at various stack heights. • Drive forklift truck with load in forward and reverse, maintaining visibility.
Context of and specific resources for assessment	<ul style="list-style-type: none"> • Assessment of the safe application of knowledge and skills to workplace tasks (performance) must be undertaken using the endorsed Assessment Instrument. • Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace setting. • Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints. • Applicants must have access to: <ul style="list-style-type: none"> • Personal Protective Equipment (PPE) for the purpose of the Performance Assessment • associated equipment appropriate to forklift truck operations • suitable loads as described by the endorsed Assessment Instrument • manufacturers specifications • appropriate forklift truck in a safe condition.
Method of assessment	<ul style="list-style-type: none"> • Assessment must be conducted using the endorsed Assessment Instrument. These Instruments provide instruction on their application. • The use of 'simulators' in the assessment of this unit of competency is not acceptable. • Assessment may be in conjunction with the assessment of other units of competency. • Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. • Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
Guidance information for	<ul style="list-style-type: none"> • Further information about endorsed Assessment Instruments may be obtained from state/territory

EVIDENCE GUIDE**assessment**

OH&S regulators.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below.

Hazards

May include but not limited to:

- ground conditions (e.g. condition of pavement, slopes)
- overhead hazards (e.g. powerlines, service pipes)
- insufficient lighting
- traffic (e.g. pedestrians, vehicles, other plant)
- weather (e.g. wind, lightning, rain)
- forklift instability (e.g. overloading, poor load placement, irregular loads)
- other hazards (e.g. dangerous materials)

Hazard control measures

Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls

It includes the application of the hierarchy of control, the six-step preference of control measures to manage and control risk:

- 1 elimination
- 2 substitution
- 3 isolation
- 4 engineering control measures
- 5 using safe work practices
- 6 personal protective equipment

Appropriate standards

May include but not limited to:

- legislation
- Australian standards
- manufacturer's specifications
- industry standards (where applicable)

RANGE STATEMENT	
Forklift truck	<p>May include but not be limited to:</p> <ul style="list-style-type: none"> • counterbalanced • reach trucks • rough terrain • internal combustion petrol, diesel, gas • electric
Communications methods	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • verbal and non-verbal language • written instructions • signage • hand signals • listening • questioning to confirm understanding • appropriate worksite protocol
Procedures	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • manufacturer's guidelines (instructions, specifications or checklists) • industry operating procedures • workplace procedures (work instructions, operating procedures, checklists)
Pre-start operational checks	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • safety devices fitted where appropriate • forklift data plate fitted and interpreted • logbook, handbook or operating manuals available • external visual check including, evidence of damage, leaks, visual evidence of structural weaknesses (including paint separation or stressed welds) is carried out • forklift attachment is checked for security • approved modifications and/or attachments fitted to manufacturer's specifications (e.g. as per forklift or attachment data plate) are identified • checks for adaptations or modifications outside manufacturer's specifications (e.g. not listed on the forklift or attachment data plate) are carried out • maintenance logbook/records checked

RANGE STATEMENT	
Post-start operational checks	<p>May include checks of the forklift truck and equipment after start-up to ensure:</p> <ul style="list-style-type: none"> • hazard warning systems (for example lights and horns), are functional • attachment movements and control functions are smooth and comply with operating requirements • steering, transmission and brake functions comply with operating requirements
Hazard prevention/control measures	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • barricades and traffic control • safety tags on electrical switches/isolators • insulated powerlines • safety observer used inside exclusion zone • disconnected power • pedestrian control (barricades, signs, etc.) • excavation safeguards • movement of obstructions • personal protective equipment • adequate illumination
Unplanned and/or unsafe situations	<p>May include but not limited:</p> <ul style="list-style-type: none"> • failure/loss of control (e.g. brakes and steering) • failure of equipment (e.g. hydraulic system) • environmental condition
Shut down	<p>May include, but is not limited to:</p> <ul style="list-style-type: none"> • parking in a suitable location away from dangerous areas • fork arms are correctly positioned (tips down, tilted forward, lowered to ground) • appropriate transmission/gear is selected for parking (relevant to transmission type) • hand/parking brake is applied • engine power is turned off • ignition key is removed (if applicable) • LPG gas cylinder valve is shut off (where fitted) • securing equipment against unauthorised operation • securing the site • ensuring access ways are clear • identifying and segregating defective equipment

RANGE STATEMENT	
	and reporting to authorised personnel <ul style="list-style-type: none">• batteries are connected to the charger (if applicable)

Unit Sector(s)

TLILIC2016A Licence to drive heavy rigid vehicle

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to obtain a licence to drive a heavy rigid vehicle. It includes systematic and efficient control of all vehicle functions, monitoring of traffic and road conditions, management of vehicle condition and performance and effective management of hazardous situations. Assessment of this unit will be undertaken within a licensing examination conducted by, or under the authority of, the relevant Heavy Vehicle Driver Licensing Authority.

Application of the Unit

Application of the Unit

Driving must be carried out in compliance with the licence requirements and regulations of the relevant state/territory roads and traffic authority pertaining to heavy rigid vehicles.

Driving is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a heavy rigid vehicle across a variety of driving contexts.

Licensing/Legislative Requirements

The primary legislative requirements applicable to this unit of competency are State/Territory legislation in relation to road use and driver licensing.

This unit addresses the underlying knowledge and skills necessary for the granting of a Heavy Rigid Driver Licence. Drivers may require additional training to drive particular vehicles of the class or in particular contexts.

Obtaining this competency is a necessary pre-requisite for obtaining a Heavy Rigid Driver Licence. However, it is only one of several criteria for obtaining the licence. Prospective licence applicants should check with the State/Territory driver licensing

authority for other criteria (for example: licence tenure and medical fitness) to confirm compliance with other eligibility requirements before undertaking training and/or assessment.

Licensing/Regulatory Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

1 Drive the heavy rigid vehicle

PERFORMANCE CRITERIA

- 1.1 The heavy rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions
- 1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
- 1.3 Braking system of heavy rigid vehicle is managed and operated to ensure effective control of the vehicle under all conditions
- 1.4 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.5 The heavy rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning.

ELEMENT	PERFORMANCE CRITERIA
	1.6 The heavy rigid vehicle is parked, shut down and secured in accordance with traffic regulations, safe and secure
	1.7 Load is safely and effectively restrained
	1.8 Where required, overwidth and overweight permit applications are undertaken in accordance with relevant regulatory requirements
	1.9 Appropriate procedures are followed in the event of a driving emergency
2 Monitor traffic and road conditions	2.1 An appropriate route of travel is observed taking into account prescribed routes.
	2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and ensure no injury to people or damage to property, equipment loads and facilities
	2.3 Interaction with other road users is conducted courteously and in accordance with road rules to ensure safe and efficient traffic flow
3 Monitor and maintain vehicle performance	3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle
	3.2 Appropriate signage, lights and the like are checked for operational effectiveness and for conformity to prescribed traffic regulations
	3.3 Performance and efficiency of vehicle operation is monitored during use

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Heavy rigid vehicle controls, instruments and indicators and their use
- Heavy rigid vehicle handling procedures
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques

REQUIRED KNOWLEDGE AND SKILLS

- Pre-operational checks carried out on heavy rigid vehicle and related action
- Differences between transmission types
- Principles of operation of air brakes and procedures for their use
- Map reading and navigation of the vehicle and related action (including prescribed routes)
- Driving hazards and related defensive driving techniques
- Principles of stress management when driving a vehicle
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Causes and effects of fatigue on drivers
- Fatigue management strategies and on-road techniques

Required skills:

- Communicate effectively with others when driving a heavy rigid vehicle
- Read and interpret instructions, procedures, information and signs relevant to when the driving of a heavy rigid vehicle
- Complete documentation related to the driving of a heavy rigid vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when driving a heavy rigid vehicle
- Monitor and anticipate traffic hazards and take appropriate action
- Apply fatigue management knowledge and techniques
- Monitor performance of the vehicle and its equipment and take appropriate action where required
- Carry out pre-operational checks

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills

EVIDENCE GUIDE

- relevant legislation
- other relevant aspects of the range statement
- Assessment of competency for this unit must be subject to the successful completion of the Mandatory Assessment Instrument as approved by the Licensing Authority
- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations on road or in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including regulations, codes of practice and operation manuals
- The mandatory assessment tool provided by the Licensing Authority must be used to conduct the final assessment.
- The Licensing Authority may prescribe approved routes which must be used for the conduct of the final assessment
- Practical driving aspects must be assessed in a vehicle typical of the class as approved by the Licensing Authority. The use of simulators for driver testing is not permitted.
- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations on road or in the workplace
- The assessor must use the mandatory assessment tool provided by the Licensing Authority to conduct the assessment for this unit in accordance with Licensing

Context of and specific resources for assessment

Method of assessment

EVIDENCE GUIDE

Authority requirements

- Practical driving aspects must be assessed in a vehicle typical of the class as approved by the Licensing Authority. The use of simulators for driver testing is not permitted.

EXCEPTION

Where the candidate is already the holder of a valid Australian driver licence of the Heavy Rigid class, the Licensing Authority has already deemed the candidate to be competent against this standard for the purposes of issuing a driver licence. In this case the requirement to conduct the assessment using the Mandatory Assessment Instrument provided by the Licensing Authority is waived and the assessor may use any suitable process and materials for conducting the assessment.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:

- all heavy rigid vehicles, for example any rigid vehicle with 3 or more axles, including trucks or buses, greater than 8 tonnes GVM

Driving may be carried out in typical road transport situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road
- while at a depot, base or warehouse
- while at a client's workplace or work site

Driving must be carried out in typical road transport situations, including:

- negotiating hills
- negotiating a range of more complex traffic infrastructure (for example; roundabouts, traffic lights, stalemate intersections, level crossings of railways)

Vehicle handling procedures may include:

- starting a vehicle
- steering and manoeuvring a vehicle
- accelerating and braking
- positioning and stopping a vehicle
- reversing a vehicle
- operating vehicle controls, instruments and indicators
- using air brakes
- using defensive driving techniques

RANGE STATEMENT

Pre-operational checks may include:

- managing engine performance
- visual check of vehicle
- checking and topping up of fluid levels
- checks of tyre pressures
- checks of operation of vehicle lights and indicators
- checks of brakes

Driving hazards may include (examples only):

- wet and iced roads
- oil on road
- animals and objects on road
- fire in vehicle
- leaking fuel
- faulty brakes
- parked vehicles on the road
- faulty steering mechanism on vehicle
- pedestrians crossing the road
- flooded sections of road
- windy sections of road
- foggy conditions

Factors that can cause traffic delays and diversions may include:

- traffic accidents
- flooded sections of road
- road damage
- bridge/tunnel damage
- road works
- building construction
- emergency situations such as bushfires, building fires, etc.
- road closures for special events such as marches, parades, sporting events, etc
- holiday traffic
- road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.

Documentation/records may include:

- state/territory heavy rigid vehicle driving licence and permit requirements
- vehicle log book or record book (where required)
- relevant standards and certification requirements

Applicable procedures and codes may include:

- relevant state/territory roads and traffic authority driving regulations and licence/permit requirements pertaining to heavy rigid vehicles
- relevant state/territory road rules
- relevant state/territory permit regulations and requirements
- relevant state/territory OH&S legislation

RANGE STATEMENT

- relevant state/territory fatigue management regulations
- relevant state/territory environmental protection legislation

Employability Skills

The required outcomes described in this unit of competency contain applicable facets of employability skills. The employability skills summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

1 Drive the multi-combination vehicle

PERFORMANCE CRITERIA

- 1.1 The multi-combination vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations
- 1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage
- 1.3 Braking system of multi-combination vehicle is managed and operated to ensure effective control of the vehicle under all conditions
- 1.4 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.5 The multi-combination vehicle is driven in reverse, maintaining

ELEMENT	PERFORMANCE CRITERIA
	visibility and achieving accurate positioning
	1.6 The multi-combination vehicle is parked, shut down, uncoupled and secured according to traffic regulations, safe and secure
	1.7 Where required, overwidth and overweight permit applications are undertaken in accordance with relevant regulatory requirements
	1.8 Load is safely and effectively restrained
	1.9 Appropriate procedures are followed in the event of a driving emergency
2 Monitor traffic and road conditions	2.1 An appropriate route of travel is observed taking into account prescribed routes.
	2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and ensure no injury to people or damage to property, equipment loads and facilities
	2.3 Interaction with other road users is conducted courteously and in accordance with road rules to ensure safe and efficient traffic flow
3 Monitor and maintain vehicle performance	3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle
	3.2 Appropriate signage, lights and the like are checked for operational effectiveness and for conformity to prescribed traffic regulations
	3.3 Prime mover, dollies and trailer are aligned and coupled in proper sequence, safe and secure
	3.4 Coupled vehicle is checked and tested to ensure it is correctly secured and to confirm that it is fully operational
	3.5 Performance and efficiency of vehicle operation is monitored during use

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations

REQUIRED KNOWLEDGE AND SKILLS

- Multi-combination vehicle controls, instruments and indicators and their use
- Multi-combination vehicle handling procedures
- Engine power management and safe driving strategies
- Efficient driving techniques
- Pre-operational checks carried out on multi-combination vehicle and related action
- Differences between transmission types
- Principles of operation of air brakes and procedures for their use
- Driving hazards and related defensive driving techniques
- Map reading and road navigation techniques (including prescribed routes)
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Principles of stress management when driving a vehicle
- Causes and effects of fatigue on drivers
- Fatigue management strategies including on-road techniques

Required skills:

- Communicate effectively with others when driving a multi-combination vehicle
- Read and interpret instructions, procedures, information and signs relevant to the driving of a multi-combination vehicle
- Complete documentation related to the driving of a multi-combination vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the driving of a multi-combination vehicle
- Monitor and anticipate traffic hazards and take appropriate action
- Apply fatigue management knowledge and techniques
- Monitor performance of vehicle, its trailers and its equipment and take appropriate action where required

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment • The evidence required to demonstrate competency in

EVIDENCE GUIDE

and evidence required to demonstrate competency in this unit

this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

- the underpinning knowledge and skills
- relevant legislation
- other relevant aspects of the range statement

Context of and specific resources for assessment

- Assessment of competency for this unit must be subject to the successful completion of the Mandatory Assessment Instrument as approved by the Licensing Authority
- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations on road or in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including regulations, codes of practice and operation manuals
- The mandatory assessment tool provided by the Licensing Authority must be used to conduct the final assessment.
- The Licensing Authority may prescribe approved routes which must be used for the conduct of the final assessment.
- Practical driving aspects must be assessed in a vehicle typical of the class as approved by the Licensing Authority. The use of simulators for driver testing is not permitted.

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or

EVIDENCE GUIDE

- in an appropriate range of situations on road or in the workplace
- The assessor must use the mandatory assessment tool provided by the Licensing Authority to conduct the assessment for this unit in accordance with Licensing Authority requirements.
- Practical driving aspects must be assessed in a vehicle typical of the class as approved by the Licensing Authority. The use of simulators for driver testing is not permitted.

EXCEPTION

Where the candidate is already the holder of a valid Australian driver licence of the Multi-Combination class, the Licensing Authority has already deemed the candidate to be competent against this standard for the purposes of issuing a driver licence. In this case the requirement to conduct the assessment using the Mandatory Assessment Instrument provided by the Licensing Authority is waived and the assessor may use any suitable process and materials for conducting the assessment.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:

- any vehicle that may be driven by the holder of Multi-Combination Vehicle Driver Licence

Driving may be carried out in typical road transport situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road
- while at a depot, base or warehouse
- while at a client's workplace or work site

Driving must be carried out in typical road transport situations, including:

- negotiating hills
- negotiating a range of more complex traffic infrastructure (for example; roundabouts, traffic lights, stalemate intersections, level crossings of railways)

Vehicle handling procedures may include:

- starting a vehicle
- steering and manoeuvring a vehicle
- accelerating and braking
- positioning and stopping a vehicle

RANGE STATEMENT

Pre-operational checks may include:

- reversing a vehicle
- operating vehicle controls, instruments and indicators
- using air brakes
- using defensive driving techniques
- managing engine performance
- visual check of vehicle
- checking and topping up of fluid levels
- checks of tyre pressures
- checks of operation of vehicle lights and indicators
- checks of brakes
- checks of coupling equipment

Driving hazards may include (examples only):

- wet and iced roads
- oil on road
- animals and objects on road
- fire in vehicle
- leaking fuel
- faulty brakes
- parked vehicles on the road
- faulty steering mechanism on vehicle
- pedestrians crossing the road
- flooded sections of road
- windy sections of road
- foggy conditions

Factors that can cause traffic delays and diversions may include (examples only):

- traffic accidents
- flooded sections of road
- road damage
- bridge/tunnel damage
- road works
- building construction
- emergency situations such as bushfires, building fires, etc.
- road closures for special events such as marches, parades, sporting events, etc.
- holiday traffic
- road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.

Documentation/records may include:

- state/territory multi-combination vehicle driving licence/permit requirements
- state/territory road rules
- specifications and recommended driving procedures including preoperational checks of vehicle

RANGE STATEMENT

Applicable procedures and codes may include

- vehicle log book or record book (where required)
- relevant state/territory roads and traffic authority driving regulations and licence/permit requirements pertaining to multi-combination vehicles
- relevant state/territory road rules
- relevant state/territory OH&S legislation
- relevant state/territory fatigue management regulations
- relevant state/territory environmental protection legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to source goods/materials/services and evaluate contractors including analysing supply requirements, and evaluating and selecting appropriate potential contractor(s). Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work is performed under general guidance on progress and outcomes of work. It involves discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within organisational policy and procedures. This includes the application of established workplace procedures to source goods and to evaluate potential contractors.

A range of opportunities may be used to develop the work area and to support the development of work systems and innovative strategies to deal with contingencies and to encourage the achievement of the organisations' goals and key performance objectives by the work area and the individuals and teams within it.

The unit generally applies to those with responsibility for resource coordination and allocation and who provide leadership of others individually or in teams.

Licensing/Regulatory Information

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse supply requirements	1.1 Purpose and specifications of required goods/services are identified 1.2 Criteria to evaluate potential or existing contractor performance is established 1.3 Quantities of required goods/services are determined 1.4 Frequency of ordering/requesting of goods/services is identified
2 Evaluate potential contractors	2.1 Contractors of requested goods/materials/services are identified 2.2 Comparative costings for goods/materials/services are obtained 2.3 Contractors' ability to provide a consistent level of performance on repeat jobs is assessed 2.4 Contractors are evaluated in relation to established criteria and in accordance with workplace and regulatory procedures 2.5 A prioritised contractor shortlist is established based on the capacity of contractors to provide a cost competitive quality service 2.6 The outcomes of the contractor selection process are documented including recommendations for actioning agreements/contracts with selected contractors 2.7 Information and data generated during the selection process is filed and maintained in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant regulatory and code requirements
- Relevant OH&S responsibilities and procedures
- Workplace policies, procedures and protocols for the sourcing and supply of goods/services, and the evaluation of potential supply contractors
- Workplace grievance and disputation handling policies and procedures
- Workplace business policies and plans as they relate to supply contracts, including procedures for maintenance of confidentiality
- Focus of operation of recording, reporting and statistical analysis systems and resources
- Resource availability including the processing capacity of equipment and software systems for statistical analysis of data
- Typical problems that can occur when sourcing goods and services and evaluating contractors, and related appropriate action that can be taken

Required skills:

- Communicate and negotiate effectively with others when sourcing goods and services and evaluating contractors
- Read and interpret instructions, procedures and information and signs relevant to the sourcing of goods and services and the evaluation of contractors
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the sourcing of goods and services and the evaluation of contractors
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when sourcing goods and services and evaluating contractors
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when sourcing goods and services and evaluating contractors in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and appropriately apply technology, information systems and procedures to workplace

Required skills:

tasks

- Adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation,

EVIDENCE GUIDE

and/or

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The workplace environment may involve twenty-four hour operation and may include:

- single and multi-site location
- large, medium or small companies

Services, products, risks, work systems and requirements may:

- potentially vary across different sections of the workplace

Operations require:

- customer and supplier contact and coordination

Contractors may be:

- for one-off or repeat supplies/contract services

Document/data interchange may be:

- electronic
- paper-based

Selection processes include:

- procedures for maintenance of confidentiality and integrity

Personnel in work area may include

- other employees and supervisors
- customers and suppliers
- external authorities and agencies
- management and union representatives
- industrial relations, occupational health and safety specialists
- other professional or technical staff, contractors and maintenance personnel

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documentation may include:

- quality and work specifications and procedures
- specifications for required products or services
- manufacturers specifications and/or suppliers handling and storage advice

RANGE STATEMENT

Applicable regulations and legislation may include:

- workplace procedures, policies and instructions
- OH&S regulations and procedures
- supplier and/or client instructions
- materials safety data sheets
- relevant agreements, codes of practice including the national standards for manual handling and the industry safety code
- legislation, regulations and related documentation, including regulations related to hazardous substances, dangerous goods and environment protection
- reports of accidents and incidents within regulatory requirements and enterprise procedures
- workplace guidelines on appropriate workplace language and communication strategies and interpretation of relevant information
- quality assurance procedures
- relevant regulations, standards and codes of practice
- relevant Australian and state/territory OH&S legislation
- equal employment legislation and related policies
- environmental protection regulations
- hazardous substances and dangerous goods codes
- relevant Australian standards and certification requirements
- licence, patent or copyright arrangements

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare maintenance plan	<p>1.1. Maintenance requirements for property, machinery and equipment are identified from relevant information sources.</p> <p>1.2. Maintenance costs are identified and quantified.</p> <p>1.3. Maintenance requirements are checked against warranty, insurance agreements and indemnity provisions.</p> <p>1.4. Maintenance plan is developed to promote and sustain performance and production systems in line with enterprise requirements.</p> <p>1.5. Effective workplace communication strategies are established with regard to maintenance plan, environmental and Occupational Health and Safety (OHS) policies, and enterprise requirements.</p>
2. Implement maintenance plan	<p>2.1. Resource and supply requirements are identified, secured and included in enterprise budgets and operational considerations.</p> <p>2.2. Prepared maintenance schedules and procedures are effectively communicated to staff, contractors and suppliers to minimise negative impacts on production and costs.</p> <p>2.3. Maintenance plan is implemented and scheduled to minimise disruption to enterprise operations.</p> <p>2.4. Potential risks are assessed with regard to staff and supply problems, and contingency plans prepared accordingly.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5. Tasks required are aligned to staff capability, and training is provided where required.</p> <p>2.6. Machinery and equipment are operated to manufacturer's specifications, OHS and enterprise requirements.</p>
3. Monitor maintenance plan	<p>3.1. Maintenance activities and performance are monitored against maintenance plan for efficiency and effectiveness.</p> <p>3.2. Workplace hazards and environmental implications associated with maintenance procedures are monitored and controlled in line with OHS and enterprise requirements.</p> <p>3.3. Costs are monitored and controlled within enterprise budget requirements.</p> <p>3.4. Relevant information with regard to the maintenance plan is documented in accordance with enterprise requirements.</p> <p>3.5. Property, machinery and equipment are maintained in clean and safe operational conditions.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- identify hazards and oversee safe work practices
- plan, cost and schedule maintenance requirements
- establish and monitor performance targets for maintenance team
- monitor and access performance of maintenance activities
- observe the emergence and supervise the removal of workplace hazards and risks
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex

REQUIRED SKILLS AND KNOWLEDGE
<p>workplace measures and data</p> <ul style="list-style-type: none"> • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
<ul style="list-style-type: none"> • types of maintenance requirements with regard to property, machinery and equipment • maintenance and servicing cycles for property, machinery and equipment • relevant State/Territory legislation, regulations and Codes of Practice with regard to workplace OHS and environmental protection requirements, and the use and control of hazardous substances • hazards and risks and respective control measures • training and instruction techniques for directing the learning of staff.

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> • schedule and cost the maintenance requirements of machinery • order materials, allocate resources and schedule maintenance • carry out maintenance with regard to timelines, costs and safety • deal with contingencies and reschedule maintenance where necessary • dispose of waste products according to environmental legislation and enterprise procedures.

EVIDENCE GUIDE	
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Supervision may include:	<ul style="list-style-type: none"> the range of maintenance programs performed in agriculture horticulture industry enterprises.

FPIFGM3214 Operate a four wheel drive in a towing situation

Modification History

Version	Detail
1	New unit

Unit Descriptor

This unit covers the techniques for towing and moving an object using a four-wheel drive (4x4) vehicle on roads and varied terrain. This may include towing a trailer, vehicle or equipment as well as moving logs or other loads.

Application of the Unit

This unit involves the operation of a 4x4 vehicle in a towing situation. The skills and knowledge required for competent workplace performance of towing are to be used within the scope of the person's job and authority.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply in various jurisdictions.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1. Prepare 4x4 for towing
 - 1.1 Identify and follow *occupational health and safety* (OHS), environmental, legislative and *organisational requirements* relevant to operating in a towing situation
 - 1.2 Identify *type of object* to be towed and determine a suitable towing arrangement
 - 1.3 Identify equipment requirements and techniques to carry out the towing job
 - 1.4 Identify potential *hazards* that may be experienced at the towing site and during the towing operation
 - 1.5 Assess the towing activity for safety and security of persons, vehicles and property
 - 1.6 Check the *4x4 vehicle* to ensure equipment is appropriate to conditions and operationally effective in line with *manufacturer specifications*
2. Drive 4x4 towing a trailer
 - 2.1 Identify hazards and risk-management strategies associated with towing a trailer
 - 2.2 Safely couple and uncouple the trailer
 - 2.3 Secure load onto trailer
 - 2.4 Apply *risk-management strategies* while 4x4 vehicle is in operation and towing a trailer
 - 2.5 Demonstrate reversing a trailer uphill, around corners and in a straight line
 - 2.6 Use correct jack technique to change a trailer wheel
 - 2.7 Park and shut down 4x4 vehicle in line with manufacturer specifications and organisational requirements
3. Drive 4x4 moving an attached object
 - 3.1 Secure vehicle, equipment or object to be towed using appropriate *recovery devices*
 - 3.2 Apply risk-management strategies to a 4x4 vehicle operating in a towing situation
 - 3.3 Park and shut down 4x4 vehicle in line with manufacturer specifications and organisational requirements

- 4. Perform post-towing tasks
 - 4.1 Notify relevant personnel of trip completion
 - 4.2 Document activity in line with organisational procedures
 - 4.3 Apply maintenance procedures for allocated vehicle

Required Skills and Knowledge

Required skills:

- Technical skills to:
 - use and maintain relevant tools, machinery and equipment
 - perform minor routine servicing of vehicle
 - operate 4x4 vehicle in a towing situation
 - tow a trailer and move an attached object safely and according to organisational requirements
 - conserve energy with appropriate throttle use
- Communication skills to use appropriate communication and interpersonal techniques with colleagues and others
- Literacy skills to:
 - record and report workplace information
 - complete documentation relating to towing a trailer or object
- Numeracy skills to measure, estimate and calculate:
 - time required to complete the task
 - force of the recovery operation
 - journey time, fuel consumption and other variables
- Problem-solving skills to identify problems and equipment faults
- Teamwork skills to work safely and collaboratively with others when towing a trailer or object
- Initiative and enterprise skills to:
 - apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
 - select and use personal protective equipment (PPE) in line with OHS requirements

Required knowledge:

- Applicable federal, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes when towing a trailer or object
- Environmental protection requirements, including the safe disposal of waste material and the minimisation of carbon emissions and

environmental impact

- Environmental risks and hazards, organisational and site standards, requirements, policies and procedures for towing a trailer or object
- Road rules, regulations, permit and licence requirements of the relevant state or territory
- Operational knowledge of 4x4 vehicle, including controls, instruments and indicators, and their use
- 4x4 techniques
- Vehicle maintenance requirements
- Established communication channels and protocols
- Vehicle problem identification and resolution strategies, and common vehicle fault-finding techniques
- Types of tools and equipment, and procedures for their safe use and maintenance
- Procedures for recording and reporting workplace information
- Characteristics, applications, capabilities and limitations of a 4x4 vehicle while towing a trailer or object
- Tools and equipment used when setting up and securing an object for towing
- Problems that may occur when setting up and securing an object for towing

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment A person who demonstrates competency in this unit must be able to provide evidence that they can tow a trailer or move an object using a 4x4 vehicle safely and in line with organisational requirements

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:

- following applicable federal, state or territory legislative and regulatory requirements and codes of practice relevant to operating a 4x4 vehicle towing a trailer or object
- following organisational policies and procedures relevant to operating a 4x4 in a towing situation
- assessing the safety of towing a trailer or object
- operating a 4x4 over a range of towing situations

Context of and specific resources for assessment

- Competency is assessed in the workplace or a realistically simulated workplace
- Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints
- Assessment of required knowledge, other than confirmatory questions, will usually be conducted in an offsite context
- Assessment is to follow relevant regulatory requirements and Australian standards
- The following resources should be in place:
 - 4x4 vehicle
 - workplace location or simulated workplace
 - materials and equipment relevant to undertaking work applicable to this unit
 - specifications and work instructions

Method of assessment

- Assessment methods must satisfy the endorsed Assessment Guidelines of the FPI11 Training Package
- Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of required knowledge
- Assessment must be by direct observation of tasks, with questioning on required knowledge and it must also reinforce the integration of employability skills
- Assessment methods must confirm the ability to access, interpret and apply the required knowledge
- Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
- Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other

circumstances

- Assessment may be in conjunction with assessment of other units of competency
- The assessment environment should not disadvantage the candidate
- Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English
- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OHS requirements:

- are to be in line with federal, state or territory legislation and regulations, and organisational safety policies and procedures, and may include:
 - PPE and clothing
 - safety equipment
 - current first aid equipment in vehicle
 - current vehicle firefighting equipment
 - hazard and risk control
 - fatigue management
 - elimination of hazardous materials and substances
 - safe forest practices, including required actions relating to forest fire
 - techniques for manual handling, including shifting, lifting and carrying

Environmental

requirements may include:

- legislation
- organisational policies and procedures
- workplace practices

- Legislative requirements:**
- are to be in line with federal, state or territory legislation, regulations, certification requirements and codes of practice and may include:
 - award and organisational agreements
 - industrial relations
 - Australian standards
 - confidentiality and privacy
 - OHS
 - the environment
 - equal employment opportunity
 - anti-discrimination
 - relevant industry codes of practice
 - duty of care

- Organisational requirements** may include:
- legal compliance documentation
 - organisational and site guidelines
 - policies and procedures relating to own role and responsibility
 - procedural manuals
 - quality and continuous improvement processes and standards
 - OHS, emergency and evacuation procedures
 - ethical standards
 - recording and reporting requirements
 - equipment use, maintenance and storage requirements
 - environmental management requirements, including waste minimisation and disposal, recycling and re-use guidelines

- Type of object** may include:
- vehicle
 - water tank
 - log
 - rock
 - other object

- Hazards** may include:
- damage to vehicle
 - wet and iced terrain
 - flooded terrain
 - fire in vehicle

- fire at the scene
- faulty brakes
- leaking fuel
- faulty steering mechanism on vehicle
- animals and objects in vehicle path
- crocodiles and snakes in some areas
- windy or foggy sections of terrain
- steep slopes
- land slides
- tree limbs
- black ice
- trailers
- logs, rocks and other unexpected obstacles
- weather conditions
- slippery surfaces
- unsafe or damaged equipment
- spilt or leaking fuel or dangerous or hazardous goods or substances
- unsafe manual-lifting procedures

4x4 vehicle may include:

- manual and automatic four-wheel drive
- all-wheel drive

Manufacturer specifications may include:

- engine characteristics, including:
 - towing capacity of the vehicle
 - system's warning functions
 - four-wheel drive operation
 - radius of turning circle
 - safety procedures
 - instructions relating to engine air intake

Risk-management strategies may include:

- appropriate vehicle and trailer clearance
- appropriate approach and departure angles
- correct load management
- controlled braking methods using:
 - electric brakes
 - no brakes
 - override brakes
- adequate movement of the tow system
- making adjustment for extra length and width of

trailers, and their tendency to 'cut in' on corners and curves

- making appropriate adjustment in braking distance to compensate for the combined extra weight of vehicle and trailer
- driving vehicle to minimise trailer sway
- engaging a lower gear when travelling downhill with a trailer to give greater vehicle control and reduce load on brakes
- ensuring mirrors on both sides of towing vehicle are properly adjusted to give a clear view of vehicles approaching from the rear

Recovery devices may include:

- winches
- ropes
- cables
- slings
- pullers

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Shut down machine/equipment	<p>1.1. Machine/equipment operational function is determined and understood.</p> <p>1.2. Shut-down sequence is undertaken safely and to standard operating procedures.</p> <p>1.3. Machine/equipment is depressurised/emptied/de-energised/bled to standard operating procedures.</p> <p>1.4. Safe shut-down of machine/equipment is verified.</p> <p>1.5. Safety/security lock-off devices and signage are installed to standard operating procedures.</p> <p>1.6. Machine/equipment is left in clean and safe state.</p>
2. Isolate machine/equipment	<p>2.1. Machine/equipment operational function is determined and understood.</p> <p>2.2. Isolation methods and points are recognised and identified.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.3. Isolation is undertaken safely and to standard operating procedures. 2.4. Safe isolation of machine/equipment is verified. 2.5. Safety/security lock-off devices and signage are installed to standard operating procedure. 2.6. Machine/equipment is left in clean and safe state.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- reading, interpreting and following information on written job instructions, specifications and other applicable reference documents
- checking and clarifying task-related information
- entering information onto proformas and standard workplace forms
- shutting down machine/equipment
- purging/de-energising equipment
- installing safety/security lock-off devices and signage\

Required knowledge

Look for evidence that confirms knowledge of:

- the operational function of the machine/equipment
- the shut-down sequence
- the procedures for shutting down and isolating the machine/equipment
- safety precautions for shutting down and isolating the machine/equipment
- procedures for purging/de-energising the machine/equipment and reasons for doing so
- procedures for verifying machine/equipment shut-down and isolation and reasons for verifying
- the safety/security lock-off devices and signage to be installed
- the reasons and procedures for installing lock-off devices and signage
- the reasons for ensuring the machine/equipment is left in a clean, safe state
- hazards and control measures
- use and application of personal protective equipment

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	A person who demonstrates competency in this unit must be able to shut down and isolate machines/equipment.
-------------------------------	---

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
---	--

Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with shutting down and isolating machines/equipment or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
---	--

Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate
-----------------------------	--

EVIDENCE GUIDE	
	must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Shut down/isolate	Shut down/isolation means and includes isolation of mechanical, electrical drives, pipework (pressure) rotating equipment etc. utilising electrical lock-off isolators, mechanical and power driven valves etc. in accordance with standard operating instructions. Relevant regulations, Australian standards and legislative requirements governing isolation and shut-down must be complied with
Machine/equipment	Manual, semi automatic and automatic machines of a stand-alone, continuous production or process nature.
